CITY OF ROSEVILLE CALIFORNIA

AGENDA

June 16, 2021

CITY COUNCIL
FINANCE AUTHORITY
HOUSING AUTHORITY
NATURAL GAS FINANCING AUTHORITY
6:00 p.m.
Council Chambers
311 Vernon Street
Roseville, California
www.roseville.ca.us/CORTV

The meeting will be open to limited in-person attendance. To remain in compliance with the state's public health guidance, attendance will be limited to 25% of the room's capacity (15 seats) and will require 6 feet of social distancing inside and outside the council chambers. Face coverings are required and will be provided to those who don't have a mask.

Due to the limited capacity in the chambers, the public is highly encouraged to participate virtually. The meeting may be viewed on Comcast channel 14, Consolidated Communications channel 73, and AT&T U-Verse. City Council meetings are also video streamed live and are available on the City's website and YouTube channel.

Members of the public may offer public comment by phone:

Dial in Phone Number: 916-774-5353

If you need disability-related modification or accommodation to participate in this meeting, please contact: Voice: 916-774-5200, TDD: 916-774-5220. Requests must be made as early as possible.

THE CITY OF ROSEVILLE WELCOMES YOUR PARTICIPATION

If an agenda item is open to public comment, such public comment shall be addressed to the chair of the meeting.

Public Comment - Speakers have three minutes under Public Comment to speak on issues that are not listed on the agenda and are within the City's jurisdiction. The Brown Act does not permit any action or discussion on items not listed on the agenda.

Consent Calendar - If applicable, the Consent Calendar consists of routine items that may be approved by one motion. Any person can remove an item from the Consent Calendar to be discussed separately.

Agenda Items - Speakers have five minutes to address items that are listed on the agenda.

Americans with Disabilities Act - Notify the City Clerk or Secretary at least 72 hours in advance if special assistance is required to participate in a meeting including the need of auxiliary aids or services.

Audio/Visual Presentations - If making a presentation regarding an agenda item, audio/visual materials must be submitted to the City Clerk or Secretary at least 72 hours in advance.

Security procedures are in place to attend Roseville City Council meetings. All attendees must successfully pass through a security metal detector. Any person with a prohibited item will not be allowed entry. Prohibited items include, but are not limited to: firearms (even with valid CCW), knives, pepper spray/mace, explosives of any kind/ any weapons and/or dangerous devices of any kind, illegal drugs and alcohol.

Roseville City Clerk 311 Vernon Street, Roseville, CA 916-774-5200 TDD 916-774-5220

Bids / Purchases / Services

7.2. Asphalt Products (RFQ 10-3301) - Purchase Order

Memo from Buyer Sue Jessup and Assistant City Manager/Chief Financial Officer Dennis Kauffman recommending the City Council adopt RESOLUTION NO. 21-260 APPROVING A PURCHASE ORDER FOR ASPHALT PRODUCTS. Staff requests City Council authorize open purchase orders with CalMat Co. dba Vulcan Materials as the lowest responsive and responsible bidder for the purchase of asphalt products on an as-needed basis in response to RFQ 10-3301. The estimated total of the award for FY2021-22 is $420,000. Funding is included in the proposed FY2021-22 budget for the Public Works Department's Street Maintenance Division and the Environmental Utilities Department's Water and Wastewater Divisions.

7.3. Enterprise Asset Management Consulting Services – Sole Source Contract Purchase Agreement

Memo from Data Management Systems Administrator Duke Arakaki and Environmental Utilities Director Richard Plecker recommending the City Council adopt RESOLUTION NO. 21-273 APPROVING A CONTRACT PURCHASE AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND SIXTY SEVEN SOLUTIONS, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE (3001219). Staff requests approval of a Sole Source Contract Purchase Agreement with Sixty Seven Solutions, Inc. to continue development support of Roseville's Enterprise Asset Management system and integrations support as part of the Advanced Metering Infrastructure project. The total cost of the service for FY2021-22 is not to exceed $250,000, pending budget approval. Funding for the first year is included in the proposed Environmental Utilities and Electric funds budget for FY2021-22. Staff also requests authorization for two additional one-year renewals of the contract purchase agreement for a total not-to-exceed amount of $750,000 over a three-year period without further Council approval contingent upon Council approval of future year budgets, or unless City staff determines that continuing with the same vendor is not in the City's best interest. Funding for this project is from Environmental Utilities and Electric funds.

7.4. Liquid Aluminum Sulfate (BACC 01-2021) - Contract Purchase Agreement

Memo from Buyer Becky Philipp and Assistant City Manager/Chief Financial Officer Dennis Kauffman recommending City Council adopt RESOLUTION NO. 21-265 APPROVING A CONTRACT PURCHASE AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND THATCHER COMPANY

OF CALIFORNIA, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE (3001194). Staff recommends the City Council approve a contract purchase agreement with Thatcher Company of California, Inc. as the lowest responsive bidder for Bay Area Chemical Consortium Bid No. 01-2021 for the supply and delivery of liquid aluminum sulfate for the City's Water Treatment Plant. The annual cost is $175,000. Funding is included in the Environmental Utilities Department's proposed FY2021-22 budget.

7.5. Landscape Bark and Playground Engineered Wood Fiber - Contract Purchase Agreement

Memo from Parks, Recreation & Libraries Superintendent Brian Castelluccio and Parks, Recreation & Libraries Director Jill Geller recommending the City Council adopt RESOLUTION NO. 21-274 APPROVING A CONTRACT PURCHASE AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND APPLIED LANDSCAPE MATERIALS, INC. DBA NORCAL WHOLESALE BARK, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE (3001199). This item recommends Council approval of a contract purchase agreement with Applied Landscapes Materials Inc., for the purchase and installation of landscape bark and playground wood fiber within parks, facilities and streetscapes. The amount of the contract purchase agreement for FY2021-22 is not to exceed $300,000. Funding is included in the Park, Recreation & Libraries Department's General Fund, Community Facilities Districts and Landscaping and Lighting Districts proposed FY2021-22 budgets.

7.6. Securing Facilities Services - Contract Purchase Agreement

Memo from Parks, Recreation & Libraries Superintendent Brian Castelluccio and Parks, Recreation & Libraries Director Jill Geller recommending the City Council adopt RESOLUTION NO. 21-266 APPROVING A CONTRACT PURCHASE AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND CAL TAC SECURITY, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE (3001178). This item recommends Council approval of a contract purchase agreement with CAL TAC Security to perform security inspections, locking of park facilities and on-call security services, with the option of four (4) additional one (1) year extensions. The amount of the service agreement for FY2021-22 is not to exceed $100,000. Funding is included in the Park, Recreation & Libraries Department's proposed FY2021-22 budget. The funding sources include the General Fund in the amount of $70,000 and Community Facilities Districts in the amount of $30,000.

7.7. William "Bill" Hughes Park Shade Sails – Contract Purchase Agreement

Memo from the Park Planning & Development Superintendent Tara Gee and Parks, Recreation & Libraries Director Jill Geller recommending the City Council adopt RESOLUTION NO. 21-279 APPROVING A CONTRACT PURCHASE AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND ROSS RECREATION EQUIPMENT COMPANY, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE (3001165). The contract purchase agreement outlines a cost of $117,026, which includes all labor, materials, bonds and structural calculations. A budget adjustment was approved in May 2020 allocating funds from Diamond Creek Community Facilities District 1 towards specific projects at Duke Davis and Bill Hughes Parks. These upgrades will require no General Fund resources.

7.9. 2021 Sewer Collection System Cured-in-Place Pipe Rehabilitation Project – Award of Contract

Memo from Associate Engineer Jonathan Cummings and Environmental Utilities Director Richard Plecker recommending the City Council adopt RESOLUTION NO. 21-275 APPROVING AN AGREEMENT, BY AND BETWEEN INSITUFORM TECHNOLOGIES, LLC AND THE CITY OF ROSEVILLE, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE. This item requests approval and award of a construction contract for the 2021 Sewer Collection System Cured-in-Place Pipe Rehabilitation project to Insituform Technologies, LLC in the amount of $1,584,796, and authorization for the City Manager or his designee to approve and pay for contract change orders for the project that could increase the contract amount by no more than 10% or $158,480. The budget for the construction contract is within the existing capital improvement

project budget, which is funded through the Wastewater Rehabilitation Fund.

Resolutions

7.10. Parks, Recreation & Libraries Strategic Master Plan - Professional Services Agreement

Memo from the Park Planning & Development Superintendent Tara Gee and Parks, Recreation & Libraries Director Jill Geller recommending the City Council adopt RESOLUTION NO. 21-284 APPROVING A PROFESSIONAL SERVICES AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND PROS CONSULTING, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE. The project consists of a comprehensive strategic master plan and a sports tourism plan that analyzes existing services provided, seeks input from the community through public outreach and statistically valid surveys, identifies gaps and needs of the community, outlines recreation and library program trends for the future, reviews access to public spaces as well as parks/facility needs and makes recommendations for future action based on findings over the next ten to fifteen years. The strategic master plan is intended to be a road map for future decisions. The total not-to-exceed amount is $199,958. Funding for this project was allocated through the General Fund Contingency budget during FY2020-21.

7.11. Parks Design & Construction Standards - 2021 Update

Memo from the Park Planning & Development Superintendent Tara Gee and Parks, Recreation & Libraries Director Jill Geller recommending the City Council adopt RESOLUTION NO. 21-269 ADOPTING THE 2021 PARKS DESIGN & CONSTRUCTION STANDARDS. The Parks Design & Construction Standards is a guiding document that outlines design and construction standards applied to parks, neighborhood and citywide, and streetscapes. This document is updated every two years in order to ensure new codes, regulations and requirements are updated or added, address typographical errors, provide clarity in areas that may cause multiple interpretations or misinterpretations, and to ensure the latest technology in irrigation, lighting and other systems. Feedback from contractors and staff is collected over each two-year period which provides the basis for updates/revisions. The changes described above will have no fiscal impact to projects and could potentially reduce costs by identifying equipment and materials that are less labor intensive to install and maintain. There is no General Fund impact.

CC #: 1537

File #: 0704

CONTACT: Joel De Jong 916-774-5924 jdejong@roseville.ca.us

7.12. Park Naming Policy Revisions

Memo from the Park Planning & Development Superintendent Tara Gee and Parks, Recreation & Libraries Director Jill Geller recommending Council adopt RESOLUTION NO. 21-264 APPROVING REVISIONS TO THE PARK NAMING POLICY PROGRAM FOR THE CITY OF ROSEVILLE. This public process solicits name suggestions every July for new parks that will be under construction in that fiscal year. Two recent changes have occurred that caused staff to re-evaluate the process: 1) The Parks & Recreation Commission no longer appoints a Secretary position; and 2) Attorney review of the Subcommittee has determined that the Subcommittee is subject to the Brown Act. These changes create a need to change the process. The changes to the park naming process has no fiscal impact.

CC #: 1529

File #: 0704

CONTACT: Tara Gee 916-774-5253 tgee@roseville.ca.us

7.13. Roseville Electric Utility Security Plan

Memo from Electric Risk and Compliance Supervisor Petra Wallace and Electric Utility Director Michelle Bertolino recommending the City Council adopt RESOLUTION NO. 21-277 APPROVING THE ROSEVILLE ELECTRIC UTILITY SECURITY PLAN. The plan report describes Roseville Electric Utility's conformance with the industry standard and describes the approach that Roseville is taking to identify and protect the City's critical infrastructure, Covered Distribution Facilities, from physical security threats. There is no cost associated with the approval of the plan.

CONTACT: Petra Wallace 916-774-5510 pwallace@roseville.ca.us

7.14. Maidu Soccer Arena Improvement Project - Notice of Completion

Memo from Park Development Analyst Heather Buck and Parks, Recreation & Libraries Director Jill Geller recommending the City Council adopt RESOLUTION NO. 21-263 ACCEPTING THE PUBLIC WORK KNOWN AS THE MAIDU SOCCER ARENA IMPROVEMENT PROJECT, APPROVING THE "NOTICE OF COMPLETION", AND AUTHORIZING THE PARKS, RECREATION AND LIBRARIES DIRECTOR TO EXECUTE SAID NOTICE ON BEHALF OF THE CITY OF ROSEVILLE. The Parks, Recreation & Libraries Department has made a final inspection of the Maidu Covered Soccer Arena Improvements Project and has found that all contract work has been completed in accordance with the improvement plans and specifications. The project is now ready for acceptance. Funding for the park improvements was provided through the Parks, Recreation & Library Capital Projects Fund in FY2019-20. Maintenance of the existing citywide park is paid from the General Fund and remains unchanged.

7.15. Rotation Tow Program - Service Agreements

Memo from Police Lieutenant Scott Blynn and Police Chief Troy Bergstrom recommending the City Council adopt RESOLUTION NO. 21-278 APPROVING TOW SERVICE AGREEMENTS AND AUTHORIZING THE POLICE CHIEF OR HIS DESIGNEE TO EXECUTE THEM ON BEHALF OF THE CITY OF ROSEVILLE. Six tow companies will be included on the Police Department's rotation tow list for the two-year period following execution of the agreements. Vehicle owners are responsible to pay towing companies for the towing and storage of their vehicles. There is no cost to the City.

7.16. Transit Bus Shelter Construction Fee Agreements

Memo from Alternative Transportation Analyst Alison Winter and Public Utilities Director Jason Shykowski recommending the City Council adopt RESOLUTION NO. 21-276 APPROVING THE FORM OF TWO TRANSIT BUS SHELTER CONSTRUCTION FEE AGREEMENTS, AUTHORIZING THE CITY MANAGER TO EXECUTE THEM ON BEHALF OF THE CITY OF ROSEVILLE AND AUTHORIZING THE CITY ATTORNEY TO MODIFY THE FORMS AS NECESSARY. Staff requests Council approve the form of two template Transit Bus Shelter Construction Fee Agreements, authorizing the City Manager to execute all pending and future Agreements, and authorizing the City Attorney to make any non-substantive changes to the form of the template Agreements. The current construction fee of $10,000 per shelter provides security for future installation of transit improvements with no fiscal impact to the City's General Fund or Transportation Development Act funds.

7.17. Roseville Transit System Management, Operations and Call Center Services - Agreement Amendment

Memo from Transit Operations Analyst Ed Scofield and Public Works Director Jason Shykowski recommending the City Council adopt RESOLUTION NO. 21-272 APPROVING AMENDMENT NO. 1 TO AGREEMENT FOR CITY OF ROSEVILLE TRANSIT SYSTEM MANAGEMENT, OPERATIONS AND CALL CENTER SERVICES, BY AND BETWEEN MV TRANSPORTATION, INC. AND THE CITY OF ROSEVILLE, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE. The proposed amendment would extend the term of the Agreement two additional years to an end date of June 30, 2023. All provisions of the existing agreement remain unchanged and in force. Since

Roseville Transit receives Federal Transit Administration (FTA) funds, the proposed Amendment incorporates additional federal contracting clauses which were not included in the existing Agreement. Costs for option years FY2021-22 and FY2022-23 were established in the existing Agreement. The maximum obligation to the City for MV Transportation to manage and operate Roseville Transit and the Call Center are as follows: FY2021-22 is $4,244,102.52 to manage and operate Roseville Transit and $378,656.11 to manage and operate the South Placer County Transit Information Center; FY2022-23 is $4,509,198.27 to manage and operate Roseville Transit and $385,561.41 to manage and operate the South Placer County Transit Information Center. Funding for transit services is provided primarily through FTA funds, Transportation Development Act (TDA) funds and fare revenue through the City's Transit fund. The call center is funded through the Consolidated Transportation Services Agency (CTSA) fund, with TDA revenues provided by the West Placer CTSA. General Fund resources are not used for either transit operations or the call center.

7.18. Transportation Impact Studies - On-Call Professional Services Agreements

Memo from Management Analyst Brandy LeBeau and Development Services Director Mike Isom recommending the City Council adopt RESOLUTION NO. 21-256 APPROVING AN ON-CALL PROFESSIONAL SERVICES AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND FEHR & PEERS, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE; and adopt RESOLUTION NO. 21-257 APPROVING AN ON-CALL PROFESSIONAL SERVICES AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND KIMLEY-HORN AND ASSOCIATES, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE; and adopt RESOLUTION NO. 21-258 APPROVING AN ON-CALL PROFESSIONAL SERVICES AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND DKS ASSOCIATES, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE; and adopt RESOLUTION NO. 21-259 APPROVING AN ON-CALL PROFESSIONAL SERVICES AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND T J K M, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE. Staff requests Council approve four professional services agreements with Fehr & Peers, Kimley-Horn and Associates, DKS Associates, and T J K M, for on-call traffic study services. The full cost of these agreements are paid by development applicants at the time services are rendered and have no impact on the General Fund.

7.23. Community Facilities District No. 3 (Municipal Services) - Annexation No. 25 (Villages at Sierra Vista - Phase B) - Resolution of Intention to Annex Territory

Memo from Management Analyst Jeannine Thrash and Assistant City Manager/Chief Financial Officer Dennis Kauffman recommending the City Council adopt RESOLUTION NO. 21-282 A RESOLUTION OF INTENTION TO ANNEX TERRITORY TO COMMUNITY FACILITIES DISTRICT AND TO AUTHORIZE THE LEVY OF SPECIAL TAXES THEREIN. The landowner is obligated per the Developer Agreement by and between the City and the developers relative to the Sierra Vista Specific Plan, to annex into the Municipal Services Community Facilities District (CFD) No. 3 prior to the issuance of the first residential building permit. The CFD will generate special taxes levied on the landowner's annual property tax bill. Annexation into Community Facilities District No. 3, Municipal Services, helps offset the property's impact on City General Fund resources available to pay for municipal services and therefore will not negatively impact the General Fund.

7.24. Audit Services - Agreement

Memo from Accounting Manager Nick Rosas and Assistant City Manager/Chief Financial Officer Dennis Kauffman recommending the City Council adopt RESOLUTION NO. 21-271 APPROVING AN AGREEMENT FOR AUDIT SERVICES, BY AND BETWEEN THE CITY OF ROSEVILLE AND LANCE, SOLL & LUNGHARD, LLP, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE. The term of the agreement is for a two-year period ending in May 2023 with two options to extend the term of the contract for an additional two years. The cost of the audit services is $157,160 per year, for a total of

$314,320 over the two-year period, part of which will be paid for by the General Fund. The cost of the first year of the audit services has been included in the proposed FY2021-22 budget. The cost of the second year of the audit services will be included in the FY2022-23 budget, pending City Council approval.

7.25. General Financial Analysis Services - Professional Services Agreement

Memo from Management Analyst Jeannine Thrash and Assistant City Manger/Chief Financial Officer Dennis Kauffman recommending the City Council adopt RESOLUTION NO. 21-261 APPROVING A PROFESSIONAL SERVICES AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND ECONOMIC & PLANNING SYSTEMS, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE. Staff recommends approval of an agreement with Economic & Planning Systems, Inc. to provide various financial consulting services, including fiscal and economic impact analyses, district formation and annexation support, development impact fee studies, and other feasibility analyses. There will be no fiscal impact from this agreement since the consulting services it covers will be for projects that will either be charged to an external party or, if not already budgeted, require staff to return to Council to recommend a budget adjustment. The recommended three-year agreement allows services up to $100,000 per year, for an overall total compensation not to exceed $300,000.

7.26. Read-Only Sublicense To License and Software Services - Agreement

Memo from Power Supply & Portfolio Administrator William Forsythe recommending the City Council adopt RESOLUTION NO. 21-268 APPROVING AN AGREEMENT, BY AND BETWEEN SACRAMENTO MUNICIPAL UTILITY DISTRICT AND THE CITY OF ROSEVILLE, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE. This item requests approval of a Sublicense To License and Software Services Agreement with the Sacramento Municipal Utility District and its software vendor PowerSettlements. This agreement is required due to the Balancing Authority of Northern California (BANC) selecting PowerSettlements as its vendor to perform settlements for BANC and its members participating in the California Independent System Operator Energy Imbalance Market. There is no added fiscal impact to executing the sublicense Agreement. The funds for the software were budgeted in the Electric Department FY2020-21 budget and will be in future years' budget requests for ongoing costs.

Ordinances (for introduction and adoption - appropriation/urgency measures)

7.29. Local Road Safety Plan - Professional Services Agreement Amendment and Budget Adjustment

Memo from Junior Engineer Heather Chan and Public Works Director Jason Shykowski recommending the City Council adopt RESOLUTION NO. 21-2 6 2 APPROVING A FIRST AMENDMENT TO PROFESSIONAL SERVICES AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND KIMLEY-HORN AND ASSOCIATES, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE; and adopt ORDINANCE NO. 6374 OF THE COUNCIL OF THE CITY OF ROSEVILLE AUTHORIZING CERTAIN AMENDMENTS TO THE FISCAL YEAR 2020-21 BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY EFFECTIVE AS AN APPROPRIATION MEASURE. Staff requests approval of a budget

adjustment for $61,000 and an amendment to the professional service agreement with Kimley-Horn and Associates in an amount not to exceed $52,684.66 (original contract amount of $79, 881.29) for the purpose of continuing the development of a Local Road Safety Plan for the City, with $47,700 coming from state grant funding and $13,300 from the Highway User Tax Fund. Updated contract amount would be $132,566.95. No General Fund resources will be used for the project.

7.30. Dry Creek Wastewater Treatment Plant Cogeneration Project - Budget Adjustment

Memo from Environmental Utilities Process Engineer Todd Jordan and Environmental Utilities Director Richard Plecker recommending the City Council adopt ORDINANCE NO. 6373 OF THE CITY OF ROSEVILLE AUTHORIZING CERTAIN AMENDMENTS TO THE FISCAL YEAR 2020-21 BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY EFFECTIVE AS AN APPROPRIATION MEASURE. Staff requests approval of a budget adjustment for the Dry Creek Wastewater Treatment Plant Cogeneration Project budget to cover the higher than anticipated costs for City staff labor. Approval of the attached budget adjustment authorizes an additional $239,368 in funding from the Wastewater Rehabilitation Fund, increasing the total project budget to $10,143,725.

7.33. Mahany Park Open Space Multi-Use Trail Feasibility Study

Memo from Administrative Analyst Jeannie Gandler and Public Works Director Jason Shykowski recommending the City Council accept the Mahany Park Open Space Multi-Use Trail Feasibility Study and direct staff to pursue funding opportunities for the next steps including environmental documents, permits, design and construction. The study resulted in a proposed trail alignment through the open space that will connect existing trails leading into the study area and close gaps in the City's bikeway network. The study process included evaluation of existing trails, approved planning documents, field walks with assessment of existing conditions, monthly Project Development Team meetings including consultant and City staff, consultation with regulatory agencies, interviews with nearby stakeholders, and a robust community engagement program. The proposed alignment through the Mahany open space provides various lengths of recreational loop trails along with important active transportation connections between residential areas, schools, employment, shopping, and recreational amenities. Funding for the next steps of this project have not been identified. At City Council direction, staff will pursue funding through various federal, state, and local sources over the next several years to complete the project. General Fund resources were not used for this study and are not used for multi-use trail construction.

7.34. Out-of-State Travel Request - Police Department

Memo from Management Analyst Mark Peinado and Police Chief Troy Bergstrom recommending the City Council approve four police officers to travel to San Antonio, Texas in July for the 2021 Campus Safety Conference. The Roseville Joint Union High School District will pay all costs associated with the training, airfare, lodging, transportation and meals for three police officers. The total cost to the City for the fourth officer to attend this conference is $1,616. There are sufficient funds in the proposed FY2021-22 Police Social Services training budget in the General Fund to cover the expense.

8. SPECIAL REQUESTS/REPORTS/PRESENTATION

8.1. Council Discretionary Funds - Roseville Crime Stoppers

Memo from Management Assistant Heather Blanco and City Clerk Sonia Orozco requesting the City Council consider a request for $2,000 from Council Discretionary Funds for Roseville Crime Stoppers for the annual Fourth of July Fun Run. The funds raised through runners' fees and sponsorship are used for cash rewards for information leading to arrests and convictions in serious crimes committed in Roseville. The funds are also used to grant scholarships for Roseville youth pursuing careers in public safety, and community education on public safety issues.

8.4. City Policy on Display of Flags

Memo from Assistant City Manager Dion Louthan and Senior Deputy City

Attorney Joe Speaker recommending the City Council consider two proposed versions of a "City of Roseville Policy on Display of Flags" and either adopt RESOLUTION NO. 21-283 ADOPTING A CITY OF ROSEVILLE POLICY ON DISPLAY OF FLAGS, approving one of the two proposed policies or provide Staff with further direction. This was a requested item from the City Council at the May 6, 2021, City Council meeting and is an opportunity for City Council to approve a formal policy on display of flags going forward. One version of the proposed policy memorializes the longstanding past practice of the City in displaying only legally required and governmentally recognized flags at City-owned properties (i.e. the U.S. flag, California State flag, City of Roseville flag, and POW-MIA flag). The other version of the proposed policy would allow for the additional display of a "commemorative flag" (i.e. a flag that is not formally recognized nationally and congressionally as a governmental flag or associated with a local government) and otherwise consistent with the policy.

9. ORDINANCES

9.1. FY2021-22 Citywide Budget, Position Allocation Schedule, Housing Authority Budget and Roseville Finance Authority Budget

Memo from Budget Manager Scott Pettingell and Assistant City Manager/Chief Financial Officer Dennis Kauffman recommending the City Council adopt ORDINANCE NO. 6375 ADOPTING THE ANNUAL BUDGET FOR THE FISCAL YEAR 2021-2022, ADOPTING BUDGET CONTROL POLICIES, ADOPTING AN APPROPRIATIONS LIMIT, ADOPTING THE BUDGET FOR THE SUCCESSOR AGENCY OF THE ROSEVILLE REDEVELOPMENT AGENCY, TO BE EFFECTIVE IMMEDIATELY AS AN URGENCY MEASURE; and approve out-of-state travel requests, new vehicle requests, and the Citywide position allocation schedule as incorporated into the FY2021-22 budget document, effective July 1, 2021; and the City Council, acting as the Board of Directors for the Roseville Housing Authority, adopt HOUSING AUTHORITY OF THE CITY OF ROSEVILLE RESOLUTION NO. 6-21 APPROVING THE ANNUAL BUDGET FOR FISCAL YEAR 2021-22; and adopt a ROSEVILLE FINANCE AUTHORITY RESOLUTION NO. 3-21 ADOPTING THE ANNUAL BUDGET FOR THE FISCAL YEAR 2021-22. The FY2021-22 proposed citywide budget totals $571 million from all funding sources. The budget for the General Fund is $183 million, which includes operating ($176 million) and non-operating expenditures ($6 million). The FY2021-22 Housing Authority program expenditure budget is $6.6 million and is primarily comprised of funding from the federally-funded Housing Choice Voucher Program for the purpose of providing rental assistance to over 700 very-low income households in Roseville and Rocklin. The cost to the General Fund for the administration of this program is $76,019 and is included in the City's proposed FY2021-22 budget. The FY2021-22 Roseville Finance Authority Budget includes debt service payments of $2,377,715 reflecting scheduled payments on the Certificates of Participation (COPs) for the Corporation Yard and 316 Vernon Street. The Finance Authority has issued other bonds and COPs, but that debt service is reflected in the City's budget within each respective fund. For community facilities district bond issues, the Finance Authority acts as a

conduit to collect payments through the County property tax levy process for the repayment of outstanding debt of these special districts. Transfers out of the capital improvement fund of $414,351 represents money transferred to the Citywide Parks Fund for the repayment of a loan from the Fleet Replacement Fund which partially funded the construction of Harry Crabb Park.

Title: Resolution - Williams + Paddon 40th Anniversary
Contact: Blair Hutchison 916-774-5266 bmhutchison@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 5.1.

RECOMMENDATION TO COUNCIL

Commend Williams + Paddon on the celebration of their 40th anniversary, congratulate them on the vital role they have played in improving the quality of life in the Roseville community, and extend best wishes for continued success in the future.

BACKGROUND

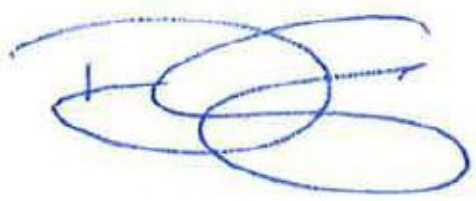
Not applicable.

FISCAL IMPACT

Not applicable.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Ceremonial documents meet the above criteria and are not subject to CEQA. No additional environmental review is required.



CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Not applicable.

Respectfully Submitted,

Blair Hutchison, Deputy Clerk

Sonia Orozco, City Clerk

Dominick Casey, City Manager

ATTACHMENTS:

Description

Resolution - Williams + Paddon 40th Anniversary

Resolution

WHEREAS, Jim Williams and Jack Paddon founded Williams + Paddon Architects + Planners, Inc. in 1981 with four employees and an office at 730 Sunrise Boulevard in Roseville; and

WHEREAS, Williams + Paddon was significantly involved with the planning and design of the City of Roseville's first specific plan, the Southeast Roseville Specific Plan, and they then designed and relocated the first major business park on Douglas Boulevard; and

WHEREAS, in 1988, the Roseville Telephone Company hired Williams + Paddon to design their corporate campus on Industrial Boulevard, a site that now serves as corporate headquarters for SureWest; and

WHEREAS, a number of other notable Roseville projects were all designed, or significantly influenced by, Williams + Paddon, including the City of Roseville Civic Center expansion, Martha Riley Community Library, Roseville and Oakmont High School campus modernizations, Roseville Chamber of Commerce, Maidu Interpretive Center, Downtown Specific Plan, and Blue Line Gallery; and

WHEREAS, the recent renovation of Placer County Fair Grounds (@ The Grounds) including the addition of the Event Center which is the first and largest indoor sporting facility of its kind in the region, was also designed, or significantly influenced by, Williams + Paddon; and

WHEREAS, the creative talents of Williams + Paddon extend beyond Roseville and include innovative new housing in both Sacramento and Lake Tahoe as well as K-12 schools, Community Clubhouses, Retail and Corporate Offices in the greater Sacramento region, Williams + Paddon has also extended their reach to design office and hospitality spaces for a large corporate client in China; and

WHEREAS, community service has always been an important part of the Williams + Paddon culture, whereby staff members have served on a wide variety of local boards, commissions, chamber boards, and charity committees, including two terms as the Chair of the Roseville Chamber of Commerce; and

WHEREAS, Williams + Paddon have continually maintained an office in the City of Roseville, including their current location at 2237 Douglas Boulevard, which they, of course, designed; and

NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, that **WILLIAMS + PADDON** be commended on the celebration of their 40th anniversary, congratulated on the vital role they have played in improving the quality of life in the Roseville community, and extended best wishes for continued success in the future.

SIGNED AND APPROVED this 16th day of June, 2021.

KRISTA BERNASCONI, MAYOR

CITY OF ROSEVILLE
INCORPORATED APRIL 10, 1909

May 5, 2021 City Council Minutes

MINUTES
May 5, 2021

CITY COUNCIL
6:00 p.m.
Council Chambers
311 Vernon Street
Roseville, California
www.roseville.ca.us/CORTV

The meeting will be open to limited in-person attendance. To remain in compliance with the state's public health guidance, attendance will be limited to 25% of the room's capacity (15 seats) and will require 6 feet of social distancing inside and outside the council chambers. Face coverings are required and will be provided to those who don't have a mask.

Due to the limited capacity in the chambers, the public is highly encouraged to participate virtually. The meeting may be viewed on Comcast channel 14, Consolidated Communications channel 73, and AT&T U-Verse. City Council meetings are also video streamed live and are available on the City's website and YouTube channel.

Members of the public may offer public comment by phone:

Dial in Phone Number: 916-774-5353

If you need disability-related modification or accommodation to participate in this meeting, please contact: Voice: 916-774-5200, TDD: 916-774-5220. Requests must be made as early as possible.

1. CALL TO ORDER

Mayor Krista Bernasconi called the meeting to order at 6:00 p.m.

2. ROLL CALL

Present: Houdesheldt, Alvord, Roccucci, Mendonsa, Bernasconi

3. PLEDGE OF ALLEGIANCE

Roseville Joint Union High School District Vice President Scott Huber led the Pledge of Allegiance.

4. MEETING PROCEDURES

City Clerk Sonia Orozco announced the procedures for addressing the City Council.

5. PRESENTATIONS

5.1. Proclamation - Public Service Recognition Week

Proclaim May 2-8, 2021 as Public Service Recognition Week and encourage all citizens to recognize the accomplishments and contributions of government employees at all levels.

Below is the video link highlighting why employees appreciate working for the City of Roseville:

https://youtu.be/RJ-kbufu6Xw

CONTACT: Blair Hutchison 916-774-5266 bmhutchison@roseville.ca.us

Mayor Krista Bernasoni made the presentation to City Manager Dominick Casey, who responded.

No public comment received.

5.2. Placer County Whole Person Care Program Presentation

Presentation by Dr. Rob Oldham, Placer County Health and Human Services Director regarding the County's Whole Person Care Program and Keith Diederich, President and CEO of The Gathering Inn regarding permanent supportive housing within the City of Roseville.

CONTACT: Laura Matteoli 916-774-5284 lmatteoli@roseville.ca.us

Economic Development Director Laura Matteoli introduced Placer County Health and Human Services Director Dr. Rob Oldham, Whole Person Care Program Manager Geoff Smith, and Gathering Inn President and CEO Keith Diederich.

Placer County Health and Human Services Director Dr. Rob Oldham made the presentation to the City Council.

Whole Person Care Program Manager Geoff Smith continued the presentation to the City Council.

Gathering Inn Director and CEO Keith Diederich continued the presentation to the City Council.

Gary (no last name given) - Spoke in opposition to permanent supportive housing in

Fiddyment Farm neighborhood with school aged children and cited disturbing incidences with residents.

Natalie Grand - Spoke in opposition to permanent supportive housing and on impact to housing values.

Julie Hirota - Requested the City Council focus on result-oriented partnership solutions to house the unhoused community in Roseville.

Paul Boudier - Spoke in support of the Whole Person Care program.

Bill Boudier - Spoke in support of the Whole Person Care program.

Kathleen Crawford - Spoke in support of the Whole Person Care program.

Frank Thomas - Spoke in opposition to the Whole Person Care program.

For information only. No action required as Roseville has no authority over program.

6. PUBLIC COMMENTS

Barbara Brass - Spoke in support of the proposed honor LGBTQ proclamation and requested the City fly the rainbow Pride flag on downtown flag pole.

Retired Colonel Patsy Thompson - Spoke on her military service and requested the City fly the rainbow Pride flag.

Wendy Gerig - representing Roseville Area Chamber of Commerce - Thanked the City's Economic Development Department for partnering with the Chamber in applying for the Placer Shares Grant #3 in the amount of $200,000 and thanked the City Council for help in distributing

Holly Zefferson - Read excerpt of her letter in support of a Pride Month proclamation and of the City flying the rainbow flag.

Paul Griffin - Spoke in acknowledgement of Public Service Recognition Week and thanked Engineering and Planning employees for their work, and spoke in support of police officer worn body cameras.

Ellen Debach-Riley - Spoke in support of the City flying the rainbow Pride flag.

M (no last name given) - Spoke in support of the City flying the rainbow Pride flag.

Bob Tallman Jessup - Spoke in opposition to flying the rainbow flag and in support of only flying the United States and State of California flags.

Roseville Joint Union High School District Vice President Scott Huber - Recommended the City create a flag policy.

7. CONSENT CALENDAR

BEGINNING OF CONSENT CALENDAR

No public comment received.

Motion by Bruce Houdesheldt, seconded by Pauline Roccucci, to approve The Consent Calendar as recommended. The Motion Passed.

Roll call vote: Ayes: Alvord, Bernasconi, Houdesheldt, Mendonsa, Roccucci

Bids / Purchases / Services

7.1. City Council/Housing Authority - 316 Vernon Street Front Counter Security Renovation and Coronavirus Aid, Relief, and Economic Security Act COVID-19 Project (RFQ 10-3285) – Contract Purchase Agreement, Budget Adjustment and Housing Authority Budget Adjustment

Memo from Buyer Tiffany Valdez and Assistant City Manager/Chief Financial Officer Dennis Kauffman recommending the City Council adopt RESOLUTION NO. 21-191 APPROVING A CONTRACT PURCHASE AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND OLEG KOVRIZHNYKH DBA OK CONSTRUCTION, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE (3001130); and adopt ORDINANCE NO. 6358 OF THE COUNCIL OF THE CITY OF ROSEVILLE AUTHORIZING CERTAIN AMENDMENTS TO THE FISCAL YEAR 2020-21 BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY EFFECTIVE AS AN APPROPRIATION MEASURE; and adopt RESOLUTION NO. 4-21 APPROVING A BUDGET ADJUSTMENT FOR FISCAL YEAR 2020-21. Staff requests Council authorize a contract purchase agreement with Oleg Kovrizhnykh dba OK Construction for the materials and labor to complete the front counter security renovations at 316 Vernon Street. The cost of the agreement is $289,000. Staff also requests approval of change order requests for this project up to 10% or $28,900 as a construction contingency. Additionally, a budget adjustment of $44,931 from the Transit Fund and $44,941 from the Transportation Fund, as well as a budget adjustment of $116,618 from Housing Authority funds from the Coronavirus Aid, Relief, and Economic Security Act funding is also requested. There are adequate resources available in both of these funds for the recommended budget adjustments.

7.2. On-Call Roadway and Trail Maintenance Services - Approval of Project Manual and Authorization to Call for Bids

Memo from Assistant Engineer Jesse Khatkar and Public Works Director Jason Shykowski recommending the City Council approve the project manual, including the Special Provisions, for the On-Call Roadway and Trail Maintenance Services and authorize staff to call for bids. The scope of the services consists of various resurfacing treatments in order to maintain the City's network of existing roadways and trails. The first areas anticipated to be resurfaced by the contractor selected for the work is a portion of the Sun City Neighborhood in 2021 and the Hillcrest Neighborhood in 2022. The engineer's estimate for the annual contract is estimated at $6.4 million. Funding sources identified for use on this contract include State Gas Tax, Highway Users Fund, SB-1 Road Maintenance and Rehabilitation Account, and the Local Transportation Fund. Funds will be allocated based on Council approved Capital Improvement Program project budgets. No General Fund resources will be used.

7.3. Four Corners Park (W-50C) Project - Approval of Plans and Specifications and Authorization to Call for Bids

Memo from Park Development Project Manager Joel De Jong and Parks, Recreation & Libraries Director Jill Geller recommending the City Council approve the plans and specifications for the Four Corners Park (W-50C) project and authorize staff to call for bids. This 1.2-acre park site is located at the intersection of Garland Way and Stanwyck Way in the West Roseville Specific Plan. The project includes a children's play area, swings, a basketball half court, bocce ball court area, pedestrian pathways, tricycle track, shade trees, open turf areas, benches, picnic tables, landscape, and irrigation. In order to meet budget constraints, additive alternates have been identified and include a shade structure for the picnic area and sod for the turf areas in lieu of seed. The estimate for construction of the base bids is $859,000. Funding for the park construction is provided through the West Roseville Neighborhood Park Development Fund and was allocated in the FY2020-21 budget. Maintenance of the park will be funded from the Westpark Community Facilities District No. 2 (Public Services).

Resolutions

7.5. Roseville Firefighters Employer Paid Member Contributions - California Public Employees' Retirement System Resolution

Memo from Human Resources Manager Linda Hampton and Human Resources Director Stacey Peterson recommending the City Council adopt RESOLUTION NO. 21-196 FOR PAYING AND REPORTING THE VALUE OF EMPLOYER PAID MEMBER CONTRIBUTIONS. Staff recommends that Council adopt the resolution formally authorizing the City of Roseville to implement the provisions of Government Code 20636(c)(4) as provided for in the January 5, 2017, through December 31, 2018, Roseville Firefighters (RFF) bargaining agreement. In accordance with this and subsequent agreements, the City discontinued reporting Employer Paid Member Contributions to California Public Employees' Retirement System (CalPERS) as additional compensation for Classic RFF public safety employees effective January 6, 2018. While the City has been reporting compensation correctly to CalPERS in accordance with the agreements with RFF, an updated resolution was not filed with CalPERS. To administratively correct the required CalPERS documentation, staff recommends adopting the resolution to file with CalPERS. These provisions have reduced retirement costs since implementation and cost savings will continue to be realized going forward. This recommended action has no fiscal impact.

7.10. Cresthaven Tennis Court Renovation Project - Notice of Completion

Memo from Park Development Project Manager Heather Buck and Parks, Recreation & Libraries Director Jill Geller recommending the City Council ADOPT RESOLUTION NO. 21-184 ACCEPTING THE PUBLIC WORK KNOWN AS THE CRESTHAVEN TENNIS COURT RENOVATION PROJECT, APPROVING THE “NOTICE OF COMPLETION”, AND AUTHORIZING THE PARKS, RECREATION AND LIBRARIES DIRECTOR TO EXECUTE SAID NOTICE ON BEHALF OF THE CITY OF ROSEVILLE. The Parks, Recreation & Libraries Department has made a final inspection of the Cresthaven Tennis Court Renovation project and has found that all contract work has been completed in accordance with the improvement plans and specifications. The project is now ready for acceptance. The project included removal and replacement of the existing tennis court surfacing, new striping for one tennis court and two pickleball courts, and new seating. In accordance with City specifications, the contractor shall guarantee the installation of these improvements for a period of twelve (12) months from the date of this Notice of Completion. Funding for the park improvements was provided through the Parks, Recreation & Libraries Capital Projects Fund. Maintenance of the existing neighborhood park is funded by the General Fund and will remain unchanged.

7.11. Roseville Aquatics Complex - Concession Agreement

Memo from Parks, Recreation & Libraries Superintendent Jeff Nereson and Parks, Recreation & Libraries Director Jill Geller recommending the City Council adopt RESOLUTION NO. 21-189 APPROVING AN AGREEMENT GRANTING AN EXCLUSIVE REVOCABLE LICENSE TO OPERATE A CONCESSION STAND AT THE ROSEVILLE AQUATICS COMPLEX, BY AND BETWEEN THE CITY OF ROSEVILLE AND DAVE'S DAWGS, LTD LLC, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE. The City will receive 15% of all net sales, reducing General Fund support needed for the Aquatics Complex. Net sales shall be defined as gross sales, less the cost of goods sold and payroll expense. In addition, staff requests Council authorize the City Manager or his designee to approve two (2) additional one (1) year renewals without further Council approval, potentially extending this contract through September of 2024. There is no impact to the City's General Fund associated with this agreement as the revenue is already included in the budget.

7.12. Sun City - Phase I Resurfacing Project - Road Maintenance and Rehabilitation Account Project Identification

Memo from Assistant Engineer Jesse Khatkar and Public Works Director Jason Shykowski recommending the City Council adopt RESOLUTION NO. 21-197 ADOPTING THE SUN CITY PHASE I - RESURFACING PROJECT FUNDED BY SENATE BILL 1: THE ROAD REPAIR AND ACCOUNTABILITY ACT OF 2017. Local agencies are required to list all proposed projects scheduled to receive Senate Bill 1 (SB 1) funding by resolution prior to receiving an apportionment of Road Maintenance and Rehabilitation Account (RMRA) funds in a fiscal year. This item identifies the City's 2021 Residential Resurfacing Project for use of the 2021-2022 funding allotment. The project will repair damaged asphalt and apply a maintenance surface treatments to a portion of the Sun City neighborhood. The construction estimate for the first phase is $4.42 million and is funded by $2.73 million from the RMRA Fund (SB 1), with the remaining costs covered by Highway Users Tax and Roadway funds. No General Fund resources will be used on this project.

7.13. Northern California Power Agency - Support Services Program Agreement

Memo from Electric Resource Analyst Brian Schinstock and Electric Utility Director

Michelle Bertolino recommending the City Council adopt RESOLUTION NO. 21-194 APPROVING A SUPPORT SERVICES PROGRAM AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND NORTHERN CALIFORNIA POWER AGENCY, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE. The Support Services Program Agreement allows Roseville to utilize various support services available through Northern California Power Agency. This item request is increasing the limit from $50,000 to $74,999 to be consistent with the new City Ordinance. There is no fiscal impact associated with the increased limit as it is only an enabling agreement.

7.17. City of Roseville Financial Policies for Fiscal Year 2021-22

Memo from Assistant City Manager/Chief Financial Officer Dennis Kauffman recommending the City Council adopt RESOLUTION NO. 21-187 ADOPTING THE CITY OF ROSEVILLE FINANCIAL POLICIES, EFFECTIVE JULY 1, 2021. The financial policies recommended for adoption include the Investment Policy, the Debt Management Policy, the Swap Policy, the Budget Development Policy, the General Fund Emergency Reserve Policy, the Federal Stimulus Reserve Fund Policy, the Internal Service Funds - Operating and Replacement Reserves Policy, the Capital Improvement Program Rehabilitation Funding Policy, the Other Post-Employment Benefits Funding Policy, the Workers' Compensation and General Liability Funding Policy, and the Requests for Proposals Policy. The Internal Service Funds - Operating and Replacement Reserves Policy is a new policy to formalize existing operating reserve practices and document long-term replacement reserve funding processes. Approval of the policies has no fiscal impact. However, implementation of the policies is expected to improve the fiscal position and financial health of the City. The Fiscal Year 2021-22 Proposed Budget is being developed based on these recommended financial policies.

7.18. South Placer Transit Project - Low Carbon Transportation Operations Program Allocation Authorization and Budget Adjustment

Memo from Transportation Analyst Ed Scofield and Public Works Director Jason

Shykowski recommending the City Council adopt RESOLUTION NO. 21-183 AUTHORIZING THE CITY MANAGER OR HIS DESIGNEE TO EXECUTE THE CERTIFICATIONS AND ASSURANCES AND AUTHORIZED AGENT FORMS FOR THE LOW CARBON TRANSIT OPERATIONS PROGRAM FOR THE REGIONAL SOUTH PLACER TRANSIT PROJECT; and ADOPT ORDINANCE NO. 6356 OF THE COUNCIL OF THE CITY OF ROSEVILLE AUTHORIZING CERTAIN AMENDMENTS TO THE FISCAL YEAR 2020-21 BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY EFFECTIVE AS AN APPROPRIATION MEASURE. Staff is requesting Council receive the FY2020-21 Low Carbon Transportation Operations Program (LCTOP) grant funds, receive FY2019-20 LCTOP grant funds from Placer County Transportation Planning Agency, and approve a budget adjustment for the South Placer Transit Project. The Transit Fund balance will be reduced by $80,000 for staff costs. LCTOP allocations totaling $961,799 will be used toward operation of the South Placer Transit Project. These actions have no fiscal impact to the City's General Fund.

7.19. Washington Boulevard/Andora Bridge Widening Phase 1 (Washington Boulevard Bikeway and Pedestrian Pathways Project) - Award of Contract and Budget Adjustment

Memo from Assistant Engineer Beth Taylor and Public Works Director Jason Shykowski recommending the City Council adopt RESOLUTION NO. 21-190 APPROVING AN AGREEMENT, BY AND BETWEEN A. TEICHERT & SON, INC. DBA TEICHERT CONSTRUCTION AND THE CITY OF ROSEVILLE, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE; and adopt ORDINANCE NO. 6357 OF THE COUNCIL OF THE CITY OF ROSEVILLE AUTHORIZING CERTAIN AMENDMENTS TO THE FISCAL YEAR 2020-21 BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY EFFECTIVE AS AN APPROPRIATION MEASURE. Staff recommends Council award the Washington Boulevard/Andora Bridge Widening Phase 1 (Washington Boulevard Bikeway and Pedestrian Pathways Project) to the lowest responsive bidder, A. Teichert & Son, Inc. dba Teichert Construction, in the amount of $4,399,428 with authorization for staff to exceed the award amount by 10% or $439,943 as a construction contingency. The construction scope of this project consists of clearing and grubbing, excavation, pedestrian and bicycle facilities construction and paving, street lighting, new and modification of traffic signals, grading, drainage, utilities, widening, and striping. A budget adjustment is necessary in the amount of $6,416,119 which will cover the construction, construction contingency, permit fees, staff time, and construction management. The project will be funded by an Active Transportation Program grant; a Congestion Mitigation Air Quality grant; and Local Transportation Fund, Electric Fund - Traffic Signal Maintenance, and Traffic Mitigation Fund resources. No General Fund resources are allocated for this project.

7.21. International Brotherhood of Electrical Workers, Local 1245 - Implementation of Labor Market Salary Adjustments

Memo from Human Resources Manager Linda Hampton and Human Resources Director Stacey Peterson recommending the City Council adopt ORDINANCE NO. 6359 OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING ORDINANCE NO. 6250, THE SALARY ORDINANCE FOR ELECTRIC PERSONNEL REPRESENTED BY THE INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, AFL-CIO, LOCAL NO. 1245, IBEW-A AND IBEW-B, AS AMENDED BY APPENDIX “D” TO BE EFFECTIVE MAY 8, 2021, AS AN URGENCY MEASURE; and adopt ORDINANCE NO. 6360 OF THE COUNCIL OF THE CITY OF ROSEVILLE AUTHORIZING CERTAIN AMENDMENTS TO THE FISCAL YEAR 2020-21 BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY EFFECTIVE AS AN APPROPRIATION MEASURE. As part of the City Council approved International Brotherhood of Electrical Workers, Local 1245 Memorandum of Understanding, effective April 27, 2019, through April 30, 2022, the City agreed to conduct a labor market survey and adjust the job classes salary ranges that are behind in the labor market starting the first pay period of May 2021. Staff is recommending that Council approve new IBEW A and B salary schedules to reflect the labor market adjustments. The estimated cost of the recommended labor market adjustments totals is $110,622 for the remainder of FY2020-21. Staff recommends that the City Council consider a budget adjustment of $97,347 to fund the increases in the Electric Fund. The Waste Operations and Wastewater Operations Funds have adequate resources to absorb the cost for the remainder of the fiscal year. The ongoing cost of $719,045 will be incorporated into the FY2021-22 budget.

File #: 0203-13-1

Title: Asphalt Products (RFQ 10-3301) - Purchase Order
Contact: Sue Jessup 916-746-1702 sjessup@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.2.

RECOMMENDATION TO COUNCIL

Staff recommends the City Council adopt a resolution to approve a purchase order with CalMat Co. dba Vulcan Materials as the lowest responsive and responsible bidder for the purchase of asphalt products in response to RFQ 10-3301.

The bid allowed for four optional renewal years at one-year intervals. Staff requests authorization to continue utilizing the remaining optional renewal years without further Council approvals until the contract expires or until City staff determines that continuing with the same vendor is not in the City's best interest.

BACKGROUND

Various City departments, including the Public Works Department's Street Maintenance Division and the Environmental Utilities (EU) Department's Water and Wastewater Divisions, have ongoing requirements for asphalt products. The Street Maintenance Division uses asphalt materials for street repair work, to include: routine maintenance, emergency pothole repairs, and preparing streets for resurfacing projects. The EU Water Division uses asphalt products for street patching due to utility maintenance and water service line repairs, and the Wastewater Division uses asphalt products for trench patching repairs.

Bidders were asked to quote “will call” pricing for the asphalt products. The purchases will be made on an as-needed basis throughout the City’s fiscal year. The difference between the estimated annual spend of $420,000 and the bid total of $821,300 is because the estimated annual usage in the bid specification reflects the potential for higher than usual requirements if needed.

After evaluating all of the bid submittals, Vulcan Company was deemed the lowest responsive bidder because the bid award is based on the lump sum total of all asphalt products, and none of the other bidders were able to supply all of the specified asphalt products. Therefore, they were deemed non-responsive.

A formal bid was issued with the following vendor responses:

Vendor	**Total**
Vulcan Materials Company Roseville, CA	**$821,300.00 + $5 per load environmental fee**
Vulcan Materials Company Grass Valley, CA	$903,500.00 + $5 per load environmental fee
Granite Construction Co. Sacramento, CA	$658,250.00
Syar Industries, Inc. Napa, CA	$23,266.25

FISCAL IMPACT

The estimated total annual spend is $420,000 for FY2021-22 contingent upon Council approval of budgets. Funding is included in the proposed FY2021-22 budget for the Street Maintenance Division in the General Fund, Gas Tax Fund, and Highway Users Tax Fund. Funding for Environmental Utilities' Water Division is included in the Water Rehabilitation Fund budget and funding for the Wastewater Division is included in the Wastewater Rehabilitation Fund budget. Spending for future renewals will be contingent upon Council approval of budgets. Estimated spending for the optional renewal years is as follows: FY2022-23, $444,000; FY2023-24 $468,400; FY2024-25 $493,240; FY2025-26 $518,564.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval for the purchase of asphalt meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Meeting Date: 6/16/2021
Item #: 7.3.

RECOMMENDATION TO COUNCIL

Staff recommends City Council adopt a resolution to approve a contract purchase agreement with Sixty Seven Solutions, Inc. for operational support of the City's Enterprise Asset Management (EAM) system. Staff requests authorization for two additional one-year renewals of the contract purchase agreement without further Council approval contingent upon Council approval of future year budgets, or unless City staff determines that continuing with the same vendor is not in the City's best interest.

BACKGROUND

The City's Enterprise Asset Management (EAM) system provides tracking and maintenance of critical department assets, providing the ability to report on regulatory compliance, work order efficiencies, and cost benefit analysis. The EAM program will complete its final stage of implementation and will transition to an operational support structure. Improvements to Utilities' asset groups will continue, as well as support for critical integrations for the AMI project.

Sixty Seven Solutions has provided specialized expertise in resolving production support issues, improving system performance, and advancing project tasks and goals. Upon approval of this service agreement, Sixty Seven Solutions, Inc., will assist IT and the EAM project team to manage system improvements, including software and integration upgrades, transition to site specific work types, and process efficiencies. Sixty Seven Solutions, Inc., will also assist and train the City to facilitate the support and maintenance of the EAM system for the long term.

FISCAL IMPACT

The contract purchase agreement is not to exceed $250,000 per year for a total not-to-exceed amount of $750,000 over the three-year period. Funding for this project is from Environmental Utilities and Electric funds.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) only applies to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3)).

Contract Terms and Conditions

1. To the fullest extent allowed by law, Consultant agrees to indemnify, including the cost to defend City, and its officers, agents, employees and volunteers from any and all claims, demands, costs or liability that arise out of, or pertain to, or relate to the negligence, recklessness, or willful misconduct of Consultant and its agents in the performance of services under this contract, but this indemnity does not apply to liability for damages for death or bodily injury to persons, injury to property, or other loss, arising from the sole negligence, willful misconduct or defects in design by City or the agents, servants, or independent contractors who are directly responsible to City, or arising from the active negligence of City. Consultant's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

2. Consultant is an independent contractor, and shall not be considered an officer, agent or employee of the City.

3. Without the written consent of the City, this Agreement is not assignable by Consultant either in whole or in part.

4. Time is of the essence of this Agreement.

5. At any time during the term of this Agreement, the City has the right to terminate this Agreement, provided Consultant is given thirty (30) days written notice. City's termination shall be without further liability to City; however, Consultant shall be entitled to all costs reasonably incurred prior to the date of termination. Consultant acknowledges that City may terminate this Agreement should funds not be appropriated by its governing body to continue services under this Agreement.

6. This Agreement may only be amended or modified in writing. It is integrated and contains the complete understanding of the parties.

7. All equipment, supplies and services sold to the City of Roseville shall conform to the general safety orders of the State of California.

8. Unless notified to the contrary, in writing, the City assumes that the Consultant has accepted the work in accordance with the plans and specifications (if any) and agrees to do the work in compliance with this Agreement. Any work product created for City pursuant to this Agreement is deemed owned by City.

9. All prevailing wages and fair employment practices must be adhered to. For prevailing wage contracts over $25,000, copies of certified payroll must be submitted with invoices. Prevailing wage rates may be obtained from the State Department of Industrial Relations and/or the following website address:
http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm
10. Consultant agrees to the below insurance requirements:

    a. Unless otherwise specified, the Consultant shall maintain the policies of insurance outlined in Attachment A, incorporated herein by this reference, in full force and effect during the term of this Agreement. The City of Roseville retains sole discretion in determining the types and proper levels of insurance coverage.

    b. Form. Consultant shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City

Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

c. Additional Insureds. Consultant shall also provide a separate endorsement or section of the policy showing City, its officers, agents, employees, and volunteers as additional insureds for each type of coverage, except for Workers' Compensation and Professional Liability. Such insurance shall specifically cover the contractual liability of Consultant. The additional insured coverage under the Consultant's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from City's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office (ISO) CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be:

(1) the minimum coverage and limits specified in this Agreement; or

(2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater

d. Cancellation/Modification. Consultant shall provide ten (10) days written notice to City prior to cancellation or modification of any insurance required by this Agreement.

e. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of City (if agreed to in a written contract) before City's own insurance shall be called upon to protect it as a named insured.

f. Subconsultants. Consultant agrees to include in its contracts with all subconsultants the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subconsultants work. Furthermore, Consultant shall require its subconsultants to agree to be bound to Consultant and City in the same manner and to the same extent as Consultant is bound to City under this Agreement. Additionally, Consultant shall obligate its subconsultants to comply with these same provisions with respect to any tertiary subconsultant, regardless of tier. A copy of City's indemnity and insurance provisions will be furnished to the subconsultant or tertiary subconsultant upon request.

g. Self-Insured Retentions. All self-insured retentions (SIR) must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

h. Waiver of Subrogation. Consultant hereby agrees to waive subrogation which any insurer of Consultant may acquire from Consultant by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of City, its officers, agents, employees and volunteers for all worked performed by Consultant, its employees, agents and sub consultants.

i. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve Consultant of liability in excess of such coverage, nor shall it preclude City from taking such other actions as are available to it under any other

provisions of this Agreement or law.

11. Consultant shall comply with all federal, state, local laws, ordinances and policies as may be applicable to the performance of services under this Agreement. Failure to comply with local ordinances may result in monetary fines and cancellation of this Agreement.

12. In the event that the terms of any attachment or exhibit conflict with any terms of this Agreement, the terms of this Agreement shall control.

13. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. In the event that any signature is delivered by facsimile transmission or by e-mail delivery of a ".pdf" format data file, such signature shall create a valid and binding obligation of the party executing (or on whose behalf such signature is executed) with the same force and effect as if such facsimile or ".pdf" signature page were an original thereof.

14. If either party commences any legal action against the other party arising out of this Agreement or the performance thereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorneys' fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

15. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.

16. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

17. For purposes of this Agreement, the terms "Contractor," "Consultant," and "Supplier" are used interchangeably.

18. Consultant agrees that any and all information furnished by City shall be deemed proprietary and confidential. All such information, to the extent previously, presently or subsequently disclosed to Consultant and/or processed and derived by Consultant services is the property of City and such property shall be deemed and treated as "Confidential Information" of City. Consultant acknowledges that such Confidential Information may contain information provided and/or generated by third-parties. Consultant agrees that such Confidential Information shall not be disclosed to any third party without written permission from City, except as required by law. Consultant shall not use the Confidential Information except to perform Consultant's services as directed by City.

19. All facilities, devices, networks and services used to store, deliver, process, backup or purge Confidential Information will employ administrative, physical, technical, and procedural safeguards and best practices at a level sufficient to secure Confidential Information from unauthorized access, destruction, use, modification, or disclosure. Such measures will be no less protective than those used to secure Consultant's own information of a similar type, and in no event less than reasonable in view of the type and nature of the information involved. It is the City's expectation that Consultant, at its own expense, shall perform annual audits for any data centers that house Confidential Information, using an independent third-party audit that meets industry standards applicable to the services under this Agreement, and provide the audit report or certification upon request to City.

20. Consultant will retain Confidential Information until deleted by City or City-authorized third party, or for a time period mutually agreed upon by the parties to this Agreement.

21. Upon termination or expiration of this Agreement, Consultant will ensure that all Confidential Information is securely transferred to City within thirty (30) calendar days. Consultant will ensure that any transfer of Confidential Information is accomplished by methods that are compatible with the relevant City systems, and that City will have access to all Confidential Information during any such transfer. Consultant shall securely dispose of all Confidential Information when requested by City and Consultant will provide written notification to City once all Confidential Information has been securely disposed of.

22. Consultant shall report to City any data compromise or unauthorized access to Confidential Information within twenty-four (24) hours after Consultant discovers such data compromise or unauthorized access. Consultant will take commercially reasonable measures to address any such data compromise or unauthorized access in a timely manner. Except as otherwise required by law, Consultant will not provide notice to end users or other entities of any such data compromise or unauthorized access without written permission from City. Consultant will promptly reimburse City in full for all fees and costs incurred by City in any investigation, remediation or litigation resulting from any such data compromise or unauthorized access, including identity protection and restoration services for each person, who in the City's sole discretion, could be impacted by identity theft.

23. Consultant may not advertise that City is a client, list City as a reference or otherwise use City's name, logos, trademarks, or service marks without prior written permission from City.

24. Consultant acknowledges that services rendered under this agreement (including but not limited to service levels and operational levels) shall be performed in accordance with industry standards.

25. If the project referenced on this agreement is a Public Works project, then the following shall apply: No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this agreement, Contractor and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

26. If the project referenced on this agreement is a Public Works project, then the following shall apply: Contractor must submit all claims as defined in and in accordance with the claim resolution process set forth in Section 9204 of the Public Contract Code. Each such claim must be sent to the City by registered mail or certified mail with return receipt requested and must contain reasonable documentation to support the claim. All claims must be received prior to acceptance of the work.

27. Contractor agrees to defend and indemnify City if, despite the parties intent and practice, any venue, agency, or court with competent jurisdiction determines that Contractor and/or any of its agents, officers, employees, volunteers, independent contractors, or subcontractors, are characterized as employee(s) of City.

Contractor and City agree that: (a) Contractor is free from the control and direction of City in connection with the performance of the work; (b) Contractor is providing services directly to City; (c) Contractor has and will maintain at all relevant times a business license; (d) Contractor maintains a business location that is separate from City; (e) Contractor is customarily engaged in an independently established business of the same nature as that involved in the work performed hereunder; (f) Contractor actually contracts with other businesses to provide the same or similar services and maintains a clientele without restrictions from City; (g) Contractor advertises and holds itself out to the public as available to provide the same or similar services; (h) Contractor provides its own tools, vehicles, and equipment to perform the services; (i) Contractor has negotiated its own rates; (j) Contractor

set its own hours and location of work in accomplishing City's on-call needs; and (k) Contractor has the right to control the manner and means of accomplishing the result desired and exercises its own expert independent judgement.

The supplier named hereon by the acceptance of this order agrees to the provisions of this document titled "Contract Purchase Agreement" and all accompanying terms, conditions, and attachments.

Insurance Submission Process

The City of Roseville Human Resources/Risk Management Department uses a service called EBIX to manage our insurance certificate tracking.

How It Works

- The vendor's contact information is entered into EBIX. EBIX will contact the vendor to request proof of insurance.
- The Vendor can forward the request to their Insurance Agent(s) if necessary.
- Vendor/Insurance Agent submits insurance to EBIX by email to roseville@ebix.com or by fax to (770) 325-5727. After faxing or emailing the certificate, please DO NOT send the certificate by mail to EBIX. Please do not mail, email or fax any certificates to the City of Roseville.
- Once submitted, EBIX reviews the insurance documentation. If there are deficiencies, EBIX will send a follow up letter or email requesting additional information.

Questions Regarding Insurance Submission: Contact EBIX at (951) 652-4239
Questions Regarding Insurance Requirements Contact Risk Management at (916) 774-5202

SIXTY SEVEN SOLUTIONS
6940 COUNTRY CT, GRANITE BAY, CA 95746
(916) 539-0865

CITY OF ROSEVILLE EAM SUPPORT

May 5, 2021

Scope of Services

Provide operational support, administration and implementations of the city's Enterprise Asset Management systems as directed by the City of Roseville (COR) Enterprise Asset Management Project Management Team (PM Team) for the term of July 1st, 2021 to September 30th, 2022. Systems are defined as all production and non-production hosted and maintained within the city's IT network infrastructure. Specific scope as follows:

1. EAM Support:
    a. Conversion of data from legacy EAM systems to the city's current Maximo EAM system.
    b. Development of interfaces, analytical reports, and alike technology, within the EAM to support the city's business requirements.
    c. Development of customization and configurations within the city's EAM in support of migrating the city's business within the Maximo EAM system.
    d. Provide technical assistance to the PM Team with system migrations, data loading, upgrades and documentation of the city's Maximo EAM.
    e. Evaluate, provide recommendations, and implement IBM Fix Packs, Interim Fixes and upgrades to existing Maximo Add-ons.
    f. Evaluate, provide recommendations, draft documentation and implement changes to improve system performance and align with Maximo system infrastructure best practices.
    g. Evaluate, provide recommendations, draft documentation and implement other Maximo related development efforts as directed by the PM Team.
    h. Development of BIRT reports to support the requirements of the AMI meters in the EAM system. Estimated effort is 40 hours.
    i. Assist in any go-live activities supporting the AMI project and the city's EAM system. Estimated effort is 80 hours.
    j. Provide Maximo production support assistance as needed.

Compensation

Sixty Seven Solutions, Inc. will be compensated at a rate of $120 per labor hour. EAM Support not to exceed 2086 hours or $250,000 in invoiced hours. An invoice of services will submitted by Sixty Seven Solutions for the prior month's services. Payment of services will be due within 30 calendar days of the invoice date.

Title: Liquid Aluminum Sulfate (BACC 01-2021) - Contract Purchase Agreement
Contact: Becky Philipp 916-774-5724 bphilipp@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.4.

RECOMMENDATION TO COUNCIL

Staff recommends Council adopt a resolution to approve a contract and authorize the City Manager to execute it on behalf of the City of Roseville. The bid allowed for three optional renewal years at one-year intervals. Staff requests authorization to continue utilizing the remaining optional renewal years of the bid contract without further Council approvals until the contract expires or until City staff determines that continuing with the same vendor is not in the City's best interest.

BACKGROUND

The City's Water Treatment Plant has an ongoing requirement for liquid aluminum sulfate (liquid alum) which is used as a flocculating agent in the water purification process. This chemical will be purchased as needed throughout the year. In March 2021, the City participated in a regional chemical bid led by the Bay Area Chemical Consortium (BACC), with the East Bay Muni Utility District serving as the coordinating agency. BACC is comprised of water and wastewater agencies in the Northern California area, working together to purchase chemicals by combining bid solicitations. BACC is an informal cooperative that advertises and opens sealed competitive bids and then prepares bid recommendations. Combined bid solicitations offer vendors an opportunity to sell greater quantities of their products. Because more than 50 public agencies are now participating, significant savings for chemical purchases are being passed along to the agencies' water and wastewater customers.

FISCAL IMPACT

The annual cost is $175,000. Funding is included in the Environmental Utilities Department's proposed FY2021-22 budget. Projected spending for the optional renewal years is as follows: FY2022-23, $180,000; FY2023-24, $185,000; FY2024-25, $190,000.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in

a direct or reasonably foreseeable indirect physical change in the environment (CEQA Guidelines §15061(b)(3)). The hauling and delivery of hazardous substances is regulated by the state. Hazardous material transport consistent with applicable safety regulations should not result in a significant environmental effect. Therefore, the proposed Service Agreement does not include the potential for significant environmental effect and is not subject to CEQA.

Resolution 21-265

Contract Purchase Agreement

RESOLUTION NO. 21-265

APPROVING A CONTRACT PURCHASE AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND THATCHER COMPANY OF CALIFORNIA, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, a contract purchase agreement (3001194) for the supply and delivery of liquid aluminum sulfate for the City's Water Treatment Plant, between the City of Roseville and Thatcher Company of California, Inc., has been reviewed by the Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said agreement is approved and the City Manager is authorized to execute it on behalf of the City of Roseville.

BE IT FURTHER RESOLVED that the City Manager or his designee is authorized to execute three (3) additional one (1) year renewals without further City Council approval, provided that the applicable budget is approved by the City Council each year, or until City staff determines that continuing with the same vendor is not in the City's best interest.

PASSED AND ADOPTED by the Council of the City of Roseville this____day of _____, 2021, by the following vote on roll call:

Contract Terms and Conditions

1. To the fullest extent allowed by law, Contractor shall defend, indemnify, and save and hold harmless City, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of Contractor's willful misconduct or negligent act or omission while engaged in the performance of obligations or exercise of rights created by this Agreement, except those matters arising from City's sole negligence or willful misconduct. The parties intend that this provision shall be broadly construed. Contractor's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.
2. Contractor is an independent contractor, and shall not be considered an officer, agent or employee of the City.
3. Without the written consent of the City, this Agreement is not assignable by Contractor either in whole or in part.
4. Time is of the essence of this Agreement.
5. At any time during the term of this Agreement, the City has the right to terminate this Agreement, provided Contractor is given thirty (30) days written notice. City's termination shall be without further liability to City; however, Contractor shall be entitled to all costs reasonably incurred prior to the date of termination. Contractor acknowledges that City may terminate this Agreement should funds not be appropriated by its governing body to continue services under this Agreement.
6. This Agreement may only be amended or modified in writing. It is integrated and contains the complete understanding of the parties.
7. All equipment, supplies and services sold to the City of Roseville shall conform to the general safety orders of the State of California.
8. Unless notified to the contrary, in writing, the City assumes that the Contractor has accepted the work in accordance with the plans and specifications (if any) and agrees to do the work in compliance with this Agreement.
9. All fair employment practices must be adhered to. In addition, if the project referenced on this service agreement is a Public Works project, all prevailing wage laws must be complied with. For prevailing wage contracts over $25,000, copies of certified payroll must be submitted with invoices. Prevailing wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm.
10. Contractor agrees to the below insurance requirements:
    a. Unless otherwise specified, the Contractor shall maintain the policies of insurance outlined in Attachment A, incorporated herein by this reference, in full force and effect during the term of this Agreement. The City of Roseville retains sole discretion in determining the types and proper levels of insurance coverage.
    b. Form. Contractor shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.
    c. Additional Insureds. Contractor shall also provide a separate endorsement or

section of the policy showing City, its officers, agents, employees, and volunteers as additional insureds for each type of coverage, except for Workers' Compensation. Such insurance shall specifically cover the contractual liability of Contractor. The additional insured coverage under the Contractor's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from City's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office (ISO) CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be:
(1) the minimum coverage and limits specified in this Agreement; or
(2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

d. Cancellation/Modification. Contractor shall provide ten (10) days written notice to City prior to cancellation or modification of any insurance required by this Agreement.

e. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of City (if agreed to in a written contract) before City's own insurance shall be called upon to protect it as a named insured.

f. Subcontractors. Contractor agrees to include in its contracts with all subcontractors the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, Contractor shall require its subcontractors to agree to be bound to Contractor and City in the same manner and to the same extent as Contractor is bound to City under this Agreement. Additionally, Contractor shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of City's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request.

g. Self-Insured Retentions. All self-insured retentions (SIR) must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

h. Waiver of Subrogation. Contractor hereby agrees to waive subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of City, its officers, agents, employees and volunteers for all work performed by Contractor, its employees, agents and subcontractors.

i. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve Contractor of liability in excess of such coverage, nor shall it preclude City from taking such other actions as are available to it under any other provisions of this Agreement or law.

11. Contractor shall comply with all federal, state and local laws and ordinances, including but not limited to the City's storm water regulations, as may be applicable to the performance of services under this Agreement. Failure to comply with local ordinances

may result in monetary fines and cancellation of this Agreement. Refer to www.roseville.ca.us/stormwater for links to more information on the City's storm water regulations.

12. In the event that the terms of any attachment or exhibit conflict with any terms of this Agreement, the terms of this Agreement shall control.
13. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. In the event that any signature is delivered by facsimile transmission or by e-mail delivery of a ".pdf" format data file, such signature shall create a valid and binding obligation of the party executing (or on whose behalf such signature is executed) with the same force and effect as if such facsimile or ".pdf" signature page were an original hereof.
14. If either party commences any legal action against the other party arising out of this Agreement or the performance thereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorneys' fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.
15. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.
16. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.
17. For purposes of this Agreement, the terms "Contractor," "Consultant," and "Supplier" are used interchangeably.
18. If the project referenced on this agreement is a Public Works project, then the following shall apply: No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this agreement, Contractor and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.
19. If the project referenced on this agreement is a Public Works project, then the following shall apply: Contractor must submit all claims as defined in and in accordance with the claim resolution process set forth in Section 9204 of the Public Contract Code. Each such claim must be sent to the City by registered mail or certified mail with return receipt requested and must contain reasonable documentation to support the claim. All claims must be received prior to acceptance of the work.
20. CONTRACTOR agrees to defend and indemnify CITY if, despite the parties intent and practice, any venue, agency, or court with competent jurisdiction determines that CONTRACTOR and/or any of its agents, officers, employees, volunteers, independent contractors, or subcontractors, are characterized as employee(s) of CITY.

    CONTRACTOR and CITY agree that: (a) CONTRACTOR is free from the control and direction of CITY in connection with the performance of the work; (b) CONTRACTOR is providing services directly to CITY; (c) CONTRACTOR has and will maintain at all relevant times a business license; (d) CONTRACTOR maintains a business location that is separate from CITY; (e) CONTRACTOR is customarily engaged in an independently established business of the same nature as that involved in the work performed hereunder; (f) CONTRACTOR actually contracts with other businesses to provide the same or similar services and maintains a clientele without restrictions from CITY; (g) CONTRACTOR advertises and holds itself out to the public as available to provide the same or similar services; (h) CONTRACTOR provides its own tools, vehicles, and

equipment to perform the services; (i) CONTRACTOR has negotiated its own rates; (j) CONTRACTOR set its own hours and location of work in accomplishing CITY's on-call needs; and (k) CONTRACTOR has the right to control the manner and means of accomplishing the result desired and exercises its own expert independent judgement.

21. Contractor certifies that Contractor, its employees, directors, officers, agents, subcontractors, vendors, and volunteers are not presently debarred, excluded, suspended, declared ineligible, voluntarily excluded, or proposed for debarment, exclusion, suspension or ineligibility by any federal, state, or local department or agency.
22. This Agreement may be amended via change order, but only if such change order is made in writing, approved by the City, and signed by both parties.

The supplier named hereon by the acceptance of this order agrees to the provisions of this document titled "Contract Purchase Agreement" and all accompanying terms, conditions, and attachments.

Insurance Submission Process

The City of Roseville Human Resources/Risk Management Department uses a service called EBIX to manage our insurance certificate tracking.

How It Works

- The vendor's contact information is entered into EBIX. EBIX will contact the vendor to request proof of insurance.
- The Vendor can forward the request to their Insurance Agent(s) if necessary.
- Vendor/Insurance Agent submits insurance to EBIX by email to roseville@ebix.com or by fax to (770) 325-5727. After faxing or emailing the certificate, please DO NOT send the certificate by mail to EBIX. Please do not mail, email or fax any certificates to the City of Roseville.
- Once submitted, EBIX reviews the insurance documentation. If there are deficiencies, EBIX will send a follow up letter or email requesting additional information.

Questions Regarding Insurance Submission: Contact EBIX at (951) 652-4239

COUNCIL COMMUNICATION

CC #: 1542
File #: 0203-10

Title:	Landscape Bark and Playground Engineered Wood Fiber - Contract Purchase Agreement
Contact:	Brian Castelluccio 916-746-1755 bcastelluccio@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.5.

RECOMMENDATION TO COUNCIL

Recommend Council adopt a resolution authorizing the City Manager to execute a contract purchase agreement with Applied Landscapes Materials Inc., for the purchase and installation of landscape bark and play ground fiber materials. Additionally authorize the City Manager to execute the remaining renewal years without further Council approval, contingent upon approval of the Parks, Recreation & Libraries budget in subsequent years.

BACKGROUND

The Parks Division currently oversees over 80 facilities with play areas and over 300 acres of landscaping. Engineered wood fiber is the primary safety component within play areas. Sustaining acceptable levels of this material is critical to providing a safe and enjoyable experience. Landscape bark is used within our Community Facilities Districts and Landscaping and Lighting Districts to retain moisture in the soil for healthier plants and trees, reduce weeds and enhance the aesthetics of the community.

In April 2021, a Request for Proposals (RFP 13-098) was issued for Landscape Bark and Playground Engineered Wood Fiber Material and Services. Two bids were received and, after staff review, Applied Landscape Materials Inc., was chosen as the selected vendor based on experience, understanding of the project and ability to handle a project of this scope.

Staff estimates the not-to-exceed award of $300,000 based on historical data, knowledge of future requirements and potential needs.

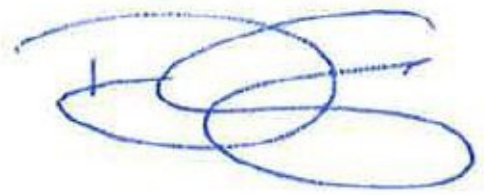
FISCAL IMPACT

The cost of the first year of the contract is not to exceed $300,000, contingent on budget approval. This funding is included in the Parks, Recreation & Libraries proposed FY2021-22 General Fund ($100,000), Community Facilities Districts (CFD) and Landscaping and Lighting Districts (LLD) ($200,000) budgets. Subsequent years costs will be based on needs and

approved budgets. Estimated spending for FY2022-23, $300,000: FY2023-24, $300,000; FY2024-25, $300,000; FY2025-26, $300,000.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of a contract purchase agreement for the installation of bark and playground fiber meets the above criteria and is not subject to CEQA. No additional environmental review is required.



CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal C - Maintain a safe and healthy community
Goal E - Deliver exceptional city services

Respectfully Submitted,

Brian Castelluccio, Parks, Recreation & Libraries Superintendent

Jill Geller, Parks, Recreation & Libraries Director

Contract Terms and Conditions

1. To the fullest extent allowed by law, Contractor shall defend, indemnify, and save and hold harmless the City, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of Contractor's willful misconduct or negligent act or omission while engaged in the performance of obligations or exercise of rights created by this Agreement, except those matters arising from City's sole or active negligence or willful misconduct. The parties intend that this provision shall be broadly construed. Contractor's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

2. Contractor is an independent contractor, and shall not be considered an officer, agent or employee of the City.

3. Without the written consent of the City, this Agreement is not assignable by Contractor either in whole or in part.

4. Time is of the essence of this Agreement.

5. At any time during the term of this Agreement, the City has the right to terminate this Agreement, provided Contractor is given thirty (30) days written notice. City's termination shall be without further liability to City; however, Contractor shall be entitled to all costs reasonably incurred prior to the date of termination. Contractor acknowledges that City may terminate this Agreement should funds not be appropriated by its governing body to continue services under this Agreement.

6. This Agreement may only be amended or modified in writing. It is integrated and contains the complete understanding of the parties.

7. All equipment, supplies and services sold to the City of Roseville shall conform to the general safety orders of the State of California.

8. Unless notified to the contrary, in writing, the City assumes that the Contractor has accepted the work in accordance with the plans and specifications (if any) and agrees to do the work in compliance with this Agreement.

9. All prevailing wages and fair employment practices must be adhered to. For prevailing wage contracts over $25,000, copies of certified payroll must be submitted with invoices. Prevailing wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm.

10. Contractor agrees to the below insurance requirements:

    a. Unless otherwise specified, the Contractor shall maintain the policies of insurance outlined in Attachment A, incorporated herein by this reference, in full force and effect during the term of this Agreement. The City of Roseville retains sole discretion in determining the types and proper levels of insurance coverage.

b. Form. Contractor shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

c. Additional Insureds. Contractor shall also provide a separate endorsement or section of the policy showing City, its officers, agents, employees, and volunteers as additional insureds for each type of coverage (except Workers' Compensation) and for ongoing and completed operations. Such insurance shall specifically cover the contractual liability of Contractor. The additional insured coverage under the Contractor's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from City's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office (ISO) CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be:

(1) the minimum coverage and limits specified in this Agreement; or
(2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

d. Cancellation/Modification. Contractor shall provide ten (10) days written notice to City prior to cancellation or modification of any insurance required by this Agreement.

e. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of City (if agreed to in a written contract) before City's own insurance shall be called upon to protect it as a named insured.

f. Subcontractors. Contractor agrees to include in its contracts with all subcontractors the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, Contractor shall require its subcontractors to agree to be bound to Contractor and City in the same manner and to the same extent as Contractor is bound to City under this Agreement. Additionally, Contractor shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of City's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request.

g. Self-Insured Retentions. All self-insured retentions (SIR) must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

h. Waiver of Subrogation. Contractor hereby agrees to waive subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General

Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of City, its officers, agents, employees and volunteers for all work performed by Contractor, its employees, agents and subcontractors.

i. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve Contractor of liability in excess of such coverage, nor shall it preclude City from taking such other actions as are available to it under any other provisions of this Agreement or law.

11. Contractor shall comply with all federal, state and local laws and ordinances, including but not limited to the City's storm water regulations, as may be applicable to the performance of services under this Agreement. Failure to comply with local ordinances may result in monetary fines and cancellation of this Agreement. Refer to www.roseville.ca.us/stormwater for links to more information on the City's storm water regulations.

12. In the event that the terms of any attachment or exhibit conflict with any terms of this Agreement, the terms of this Agreement shall control.

13. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. In the event that any signature is delivered by facsimile transmission or by e-mail delivery of a ".pdf" format data file, such signature shall create a valid and binding obligation of the party executing (or on whose behalf such signature is executed) with the same force and effect as if such facsimile or ".pdf" signature page were an original thereof.

14. If either party commences any legal action against the other party arising out of this Agreement or the performance thereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorneys' fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

15. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.

16. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

17. For purposes of this Agreement, the terms "Contractor," "Consultant," and "Supplier" are used interchangeably.

18. No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this agreement, Contractor and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

19. Contractor must submit all claims as defined in and in accordance with the claim resolution process set forth in Section 9204 of the Public Contract Code. Each such claim must be sent to the City by registered mail or certified mail with return receipt requested and must contain reasonable documentation to support the claim. All claims must be received prior to acceptance of the work.

20. CONTRACTOR agrees to defend and indemnify CITY if, despite the parties intent and practice, any venue, agency, or court with competent jurisdiction determines that CONTRACTOR and/or any of its agents, officers, employees, volunteers, independent contractors, or subcontractors, are characterized as employee(s) of CITY.

    CONTRACTOR and CITY agree that: (a) CONTRACTOR is free from the control and direction of CITY in connection with the performance of the work; (b) CONTRACTOR is providing services directly to CITY; (c) CONTRACTOR has and will maintain at all relevant times a business license; (d) CONTRACTOR maintains a business location that is separate from CITY; (e) CONTRACTOR is customarily engaged in an independently established business of the same nature as that involved in the work performed hereunder; (f) CONTRACTOR actually contracts with other businesses to provide the same or similar services and maintains a clientele without restrictions from CITY; (g) CONTRACTOR advertises and holds itself out to the public as available to provide the same or similar services; (h) CONTRACTOR provides its own tools, vehicles, and equipment to perform the services; (i) CONTRACTOR has negotiated its own rates; (j) CONTRACTOR set its own hours and location of work in accomplishing CITY's on-call needs; and (k) CONTRACTOR has the right to control the manner and means of accomplishing the result desired and exercises its own expert independent judgement.
21. Contractor certifies that Contractor, its employees, directors, officers, agents, subcontractors, vendors, and volunteers are not presently debarred, excluded, suspended, declared ineligible, voluntarily excluded, or proposed for debarment, exclusion, suspension or ineligibility by any federal, state, or local department or agency.

22. This Agreement may be amended via change order, but only if such change order is made in writing, approved by the City, and signed by both parties.

The supplier named hereon by the acceptance of this order agrees to the provisions of this document titled "Contract Purchase Agreement" and all accompanying terms, conditions, and attachments.

Insurance Submission Process

The City of Roseville Human Resources/Risk Management Department uses a service called EBIX to manage our insurance certificate tracking.

How It Works

- The vendor's contact information is entered into EBIX. EBIX will contact the vendor to request proof of insurance.
- The Vendor can forward the request to their Insurance Agent(s) if necessary.
- Vendor/Insurance Agent submits insurance to EBIX by email to roseville@ebix.com or by fax to (770) 325-5727. After faxing or emailing the certificate, please DO NOT send the certificate by mail to EBIX. Please do not mail, email or fax any certificates to the City of Roseville.
- Once submitted, EBIX reviews the insurance documentation. If there are deficiencies, EBIX will send a follow up letter or email requesting additional information.

Questions Regarding Insurance Submission: Contact EBIX at (951) 652-4239

COUNCIL COMMUNICATION

CC #: 1535
File #: 0704

Title:	Securing Facilities Services - Contract Purchase Agreement
Contact:	Brian Castelluccio 916-746-1755 bcastelluccio@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.6.

RECOMMENDATION TO COUNCIL

Staff recommends Council adopt a resolution authorizing the City Manager to execute a contract purchase agreement with CAL TAC Security to perform security inspections, locking of park facilities and on-call security services. Additionally, staff recommends Council authorize the City Manager to execute four (4) optional one (1) year renewal years without further Council approval, contingent upon approval of the Parks, Recreation & Libraries Department budget in each subsequent year.

BACKGROUND

The City's Parks, Recreation & Libraries Department currently manages a park system that consists of 80 parks and facilities, 23 of which contain restrooms/gates that need to be secured on a nightly basis. Locking these facilities nightly reduces vandalism costs and ensures the safety of residents and staff. The service also provides for inspection and a security presence as each site is visited, and allows for on-call security services that may be used to have on-site security during assigned times, providing added security, if needed, and discouraging vandalism and other unwanted activity.

A request for proposals (RFP) was issued for park security services in March of 2021. Four bids were received and, after staff review, CAL TAC was chosen as the selected vendor due to their experience, organizational structure, and understanding/ability to achieve the scope of work.

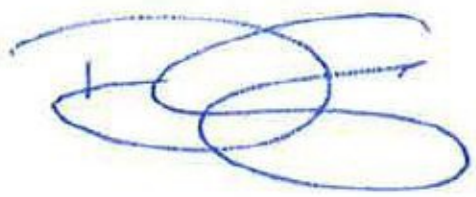
FISCAL IMPACT

The cost for the first year of the contract is not to exceed $100,000, pending budget approval. The funding is included in the Park, Recreation & Libraries Department's proposed FY2021-22 budget. The funding sources include the General Fund ($70,000) and Community Facilities Districts (CFD) ($30,000). Estimated costs for FY2022-23, $100,000; FY2023-24, $100.000; FY2024-25, $100,000, and FY2025-26, $100,000.

Locking the facilities nightly has shown to create savings to Parks Operations and CFDs by reducing vandalism and the cost of repairs.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities and will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of a contract purchase agreement for securing facilities services meets the above criteria and is not subject to CEQA. No additional environmental review is required.



CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal A - Remain fiscally responsible in a changing world
Goal C - Maintain a safe and healthy community

Respectfully Submitted,

Brian Castelluccio, Parks, Recreation & Libraries Superintendent

Jill Geller, Parks, Recreation & Libraries Director

_____
Dominick Casey, City Manager

Description

Resolution 21-266

CAL TAC Security - Service Agreement

RESOLUTION NO. 21-266

APPROVING A CONTRACT PURCHASE AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND CAL TAC SECURITY, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, a contract purchase agreement (3001178) for securing facilities services, between the City of Roseville and CAL TAC Security, has been reviewed by the Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said agreement is approved and the City Manager is authorized to execute it on behalf of the City of Roseville.

BE IT FURTHER RESOLVED that the City Manager or his designee is authorized to execute four (4) additional one (1) year renewals without further City Council approval, provided that the applicable budget is approved by the City Council each year, or until City staff determines that continuing with the same vendor is not in the City's best interest.

PASSED AND ADOPTED by the Council of the City of Roseville this____day of _____, 2021, by the following vote on roll call:

Contract Terms and Conditions

1. To the fullest extent allowed by law, Contractor shall defend, indemnify, and save and hold harmless City, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of Contractor's willful misconduct or negligent act or omission while engaged in the performance of obligations or exercise of rights created by this Agreement, except those matters arising from City's sole negligence or willful misconduct. The parties intend that this provision shall be broadly construed. Contractor's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

2. Contractor is an independent contractor, and shall not be considered an officer, agent or employee of the City.

3. Without the written consent of the City, this Agreement is not assignable by Contractor either in whole or in part.

4. Time is of the essence of this Agreement.

5. At any time during the term of this Agreement, the City has the right to terminate this Agreement, provided Contractor is given thirty (30) days written notice. City's termination shall be without further liability to City; however, Contractor shall be entitled to all costs reasonably incurred prior to the date of termination. Contractor acknowledges that City may terminate this Agreement should funds not be appropriated by its governing body to continue services under this Agreement.

6. This Agreement may only be amended or modified in writing. It is integrated and contains the complete understanding of the parties.

7. All equipment, supplies and services sold to the City of Roseville shall conform to the general safety orders of the State of California.

8. Unless notified to the contrary, in writing, the City assumes that the Contractor has accepted the work in accordance with the plans and specifications (if any) and agrees to do the work in compliance with this Agreement.

9. All fair employment practices must be adhered to. In addition, if the project referenced on this service agreement is a Public Works project, all prevailing wage laws must be complied with. For prevailing wage contracts over $25,000, copies of certified payroll must be submitted with invoices. Prevailing wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm.

10. Contractor agrees to the below insurance requirements:

    a. Unless otherwise specified, the Contractor shall maintain the policies of insurance outlined in Attachment A, incorporated herein by this reference, in full force and effect during the term of this Agreement. The City of Roseville retains sole discretion in determining the types and proper levels of insurance coverage.

b. Form. Contractor shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

c. Additional Insureds. Contractor shall also provide a separate endorsement or section of the policy showing City, its officers, agents, employees, and volunteers as additional insureds for each type of coverage, except for Workers' Compensation. Such insurance shall specifically cover the contractual liability of Contractor. The additional insured coverage under the Contractor's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from City's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office (ISO) CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be:

(1) the minimum coverage and limits specified in this Agreement; or
(2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

d. Cancellation/Modification. Contractor shall provide ten (10) days written notice to City prior to cancellation or modification of any insurance required by this Agreement.

e. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of City (if agreed to in a written contract) before City's own insurance shall be called upon to protect it as a named insured.

f. Subcontractors. Contractor agrees to include in its contracts with all subcontractors the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, Contractor shall require its subcontractors to agree to be bound to Contractor and City in the same manner and to the same extent as Contractor is bound to City under this Agreement. Additionally, Contractor shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of City's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request.

g. Self-Insured Retentions. All self-insured retentions (SIR) must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

h. Waiver of Subrogation. Contractor hereby agrees to waive subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of

subrogation in favor of City, its officers, agents, employees and volunteers for all work performed by Contractor, its employees, agents and subcontractors.

i. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve Contractor of liability in excess of such coverage, nor shall it preclude City from taking such other actions as are available to it under any other provisions of this Agreement or law.

11. Contractor shall comply with all federal, state and local laws and ordinances, including but not limited to the City's storm water regulations, as may be applicable to the performance of services under this Agreement. Failure to comply with local ordinances may result in monetary fines and cancellation of this Agreement. Refer to www.roseville.ca.us/stormwater for links to more information on the City's storm water regulations.

12. In the event that the terms of any attachment or exhibit conflict with any terms of this Agreement, the terms of this Agreement shall control.

13. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. In the event that any signature is delivered by facsimile transmission or by e-mail delivery of a ".pdf" format data file, such signature shall create a valid and binding obligation of the party executing (or on whose behalf such signature is executed) with the same force and effect as if such facsimile or ".pdf" signature page were an original hereof.

14. If either party commences any legal action against the other party arising out of this Agreement or the performance thereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorneys' fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

15. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.

16. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

17. For purposes of this Agreement, the terms "Contractor," "Consultant," and "Supplier" are used interchangeably.

18. If the project referenced on this agreement is a Public Works project, then the following shall apply: No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this agreement, Contractor and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

19. If the project referenced on this agreement is a Public Works project, then the following shall apply: Contractor must submit all claims as defined in and in accordance with the claim resolution process set forth in Section 9204 of the Public Contract Code. Each such claim must be sent to the City by registered mail or certified mail with return receipt requested and must contain reasonable documentation to support the claim. All claims must be received prior to acceptance of the work.

20. Contractor agrees to defend and indemnify City if, despite the parties intent and practice, any venue, agency, or court with competent jurisdiction determines that Contractor and/or any of its agents, officers, employees, volunteers, independent contractors, or subcontractors, are characterized as employee(s) of City. Contractor and City agree that: (a) Contractor is free from the control and direction of City in connection with the performance of the work; (b) Contractor is providing services directly to City; (c) Contractor has and will maintain at all relevant times a business license; (d) Contractor maintains a business location that is separate from City; (e) Contractor is customarily engaged in an independently established business of the same nature as that involved in the work performed hereunder; (f) Contractor actually contracts with other businesses to provide the same or similar services and maintains a clientele without restrictions from City; (g) Contractor advertises and holds itself out to the public as available to provide the same or similar services; (h) Contractor provides its own tools, vehicles, and equipment to perform the services; (i) Contractor has negotiated its own rates; (j) Contractor set its own hours and location of work in accomplishing City's on-call needs; and (k) Contractor has the right to control the manner and means of accomplishing the result desired and exercises its own expert independent judgement.

21. Contractor certifies that Contractor, its employees, directors, officers, agents, subcontractors, vendors, and volunteers are not presently debarred, excluded, suspended, declared ineligible, voluntarily excluded, or proposed for debarment, exclusion, suspension or ineligibility by any federal, state, or local department or agency.

22. This Agreement may be amended via change order, but only if such change order is made in writing, approved by the City, and signed by both parties.

The supplier named hereon by the acceptance of this order agrees to the provisions of this document titled "Contract Purchase Agreement" and all accompanying terms, conditions, and attachments.

Insurance Submission Process

The City of Roseville Human Resources/Risk Management Department uses a service called EBIX to manage our insurance certificate tracking.

How It Works

- The vendor's contact information is entered into EBIX. EBIX will contact the vendor to request proof of insurance.
- The Vendor can forward the request to their Insurance Agent(s) if necessary.
- Vendor/Insurance Agent submits insurance to EBIX by email to roseville@ebix.com or by fax to (770) 325-5727. After faxing or emailing the certificate, please DO NOT send the certificate by mail to EBIX. Please do not mail, email or fax any certificates to the City of Roseville.
- Once submitted, EBIX reviews the insurance documentation. If there are deficiencies, EBIX will send a follow up letter or email requesting additional information.

Questions Regarding Insurance Submission: Contact EBIX at (951) 652-4239

RE: SECURING FACILITIES SERVICES
RFP 13-094

Dear City Clerk,

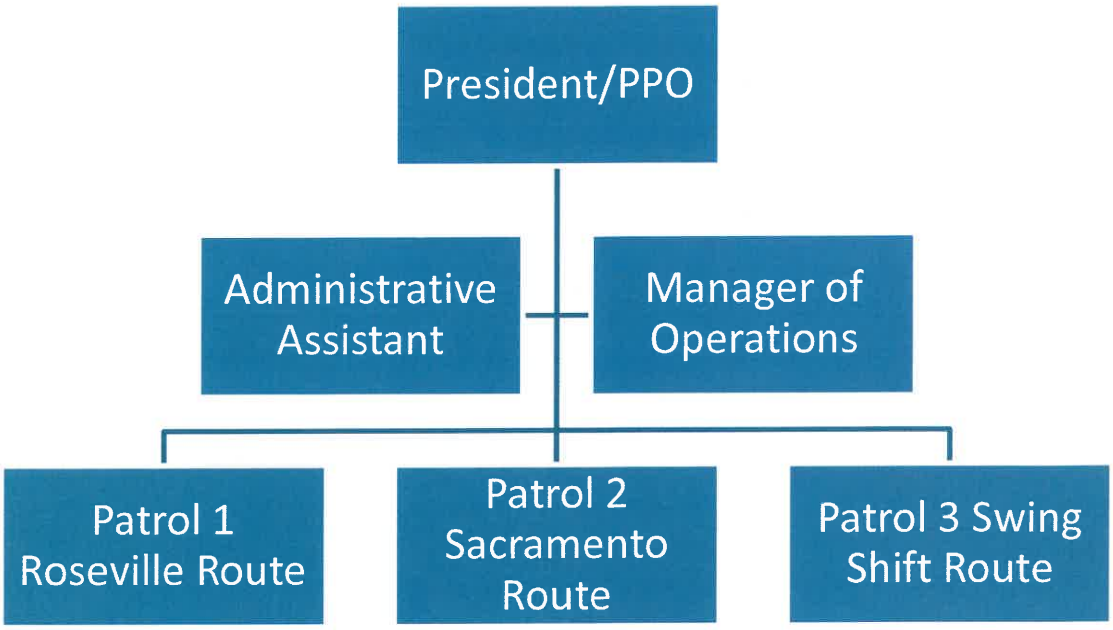
Thank you for allowing me to present CALTAC Security as a security service provider to check and secure Roseville facilities throughout the City park system. Our physical office is located at 1700 Eureka Road, Suite 130-A in Roseville, CA 95661.

CALTAC Security will perform the services and adhere to the requirements described in this RFP, including any addenda attached to this RFP. Questions from March 17, 2021 through April 5, 2021 for Bid RFP # 13-094 were reviewed on the Public Purchase system.

I am confident that you will be very satisfied with the services that we provide. If you have any questions, please feel free to contact me directly. As your needs change, we will be happy to help you evaluate options for services that will help you achieve your new goals. As the Owner of CALTAC Security I thank you for the opportunity to bid our services to you.

Sincerely,

Mike Menas



Mike Menas
President, PPO
CALTAC Security, Inc.

6.3 TAB A: Firm's Qualifications

CALTAC Security is a private security company qualified to perform the requested services by employing security guards registered with the State to provide protection services. All of our services are provided by security guards employed by the company and no sub-consultants or sub-contractors are used. All CALTAC Security patrol employees are registered with the State as a Security Guard through the Bureau of Security and Investigative Services (BSIS) and their credentials are current. During the five years CALTAC Security has been a corporation, the number of staff has grown from one to eight.

6.4 TAB B: Experience and References

Summary of Related Experience

CALTAC Security has provided security patrol services for a variety of business at locations from El Dorado Hills, Roseville, Rocklin, Lincoln, North Highlands, Sacramento, Natomas and West Sacramento. Enforcement of trespassing laws at Business Parks, Residential Income Apartments and Commercial Strip Malls provides the experience that relates to securing Roseville facilities.

References

Reference #1 Roseville Public Cemetery District
Kelly Ehrman
421 Berry St., Roseville, CA 95678
916-783-3131
kellyrpcd@surewest.net

Service for the Roseville Cemetery began on September 1, 2016 and continues without interruption. The cemetery is unique in that it has a rotating time schedule for gates to be secured at sundown, a security patrol in the middle of the night, and patrol with unlock of the gates every morning. Solutions to challenges of the security of the cemetery have been resolved with the help of the Roseville Police always responding to our calls for help. Crimes of Vandalism, Trespassing, Driving Under the Influence, Exhibition of Speed, and use of illegal substances have been successfully handled along with clearing out people who refuse to leave at sundown.

Reference #2 NCM Property Management
Tony Zogopoulos
1700 Eureka Rd #130, Roseville, CA 95661
916-223-8284
tonyz@2NCM.com

CALTAC Security developed a business relationship with NCM with our first contract at Olympus Pointe Theater for parking lot patrol beginning April 2017 and we now provide security service to twelve of their property management locations. Commercial and Residential sites are patrolled nightly with foot patrol, vehicle patrol and parking enforcement services being provided. Ongoing protection of these sites from trespassing, vandalism, arson and transient camp development continues with CALTAC Security officers confronting subjects directly for effective crime prevention. CALTAC Security officers count on resources from seven different law enforcement agencies in three separate counties to help keep these properties secure.

Reference #3 Verdera Community Association
Leanne Luebkeman
1875 Ladera Drive, Ste. 3, Lincoln, CA 95648
(916) 253-9205
leanne@verderahoa.com

CALTAC Security patrol officers deter and detect criminal activity for the Verdera community that encompasses approximately 900 acres and has 614 home sites in Lincoln, California. Parking Enforcement is provided by using a software system developed by this community specifically for tracking violators in a fair and efficient manner with in-car, real-time systems. Our security service at this location began January 2020 and continues nightly.

6.5 TAB C: Qualifications of Team

Management

Director of Project Management
Michael Menas, President/Private Patrol Operator of CALTAC Security since March 2016
Experience and Qualifications:
Mr. Menas is a 1993 graduate of the 82nd Butte Law Enforcement Academy located in Oroville, California. Mr. Menas has extensive experience in several areas of Law Enforcement and Private Security as well as

Bachelor's degree in Business Management from National University.

Mr. Menas' private security experience is in several areas including: Starting CALTAC Security as a new business after obtaining a Private Patrol Operator's license in 2014. Prior to starting CALTAC Security, Mr. Menas worked for several private security companies to gain experience in other of the private security field such as Chief Executive Officer and Licensed Private Patrol Operator of another Roseville Security and Investigations Company, Golden State Investigating, Armed Vehicle Patrol Sergeant for two local security patrol companies, Armed, Plain-Clothes Robbery Suppression Officer for Wells Fargo Bank, and Uniformed-Armed Critical Infrastructure Protection for a large facility under Federal Contract with the Department of Energy.

Other areas of experience include ten years in Real Estate with a major accomplishment of successfully negotiating the contracts of 89 Short Sale transactions; eighteen years of retail grocery, including managing employees of the store and catching shoplifters; and six years as a Volunteer with the Placer County Sheriff's Search and Rescue Motorcycle Unit.

Designated Project Manager
Jeremy Curtis, Manager of Patrol Operations for CALTAC Security since June 2020.
Experience and Qualifications:
Previous positions held include: Security Operations Manager, Security Manager, Assistant Site Supervisor, and Day Patrol Supervisor. Supervisory and management experience including direct oversight of 6-14 guards, maintaining schedules, mentoring subordinates, and conducting update training for all officers at a secure federal facility. Management of the Security Department at a high-end country club to include budgeting, training, testing of security and fire detection systems and integration of new security hardware. Familiar with Critical Infrastructure Protection Standards as it pertains to physical security. Jeremy is licensed by the Bureau of Security and Investigative Services with a guard card, chemical agents, baton, taser, exposed firearm, and also current with first aid and CPR certifications.

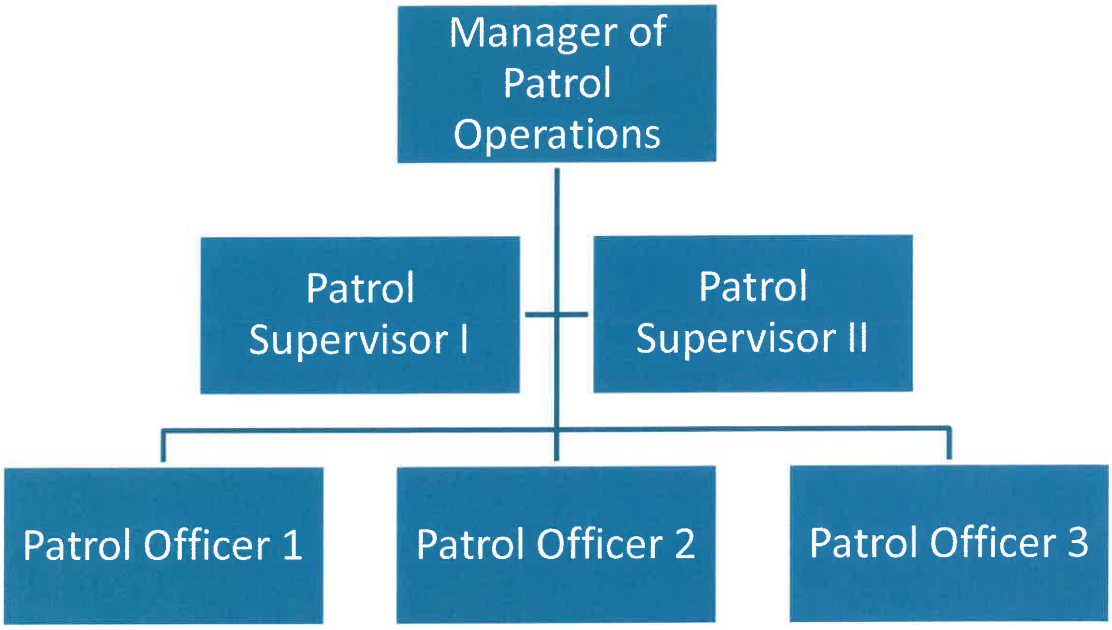
Team Members

Tim Gilbert, Security Patrol Officer for CALTAC Security since April 2019
Experience and Qualifications:
Eight years of armed and unarmed security officer experience with four other security companies in the Sacramento area. Tim is licensed by the Bureau of Security and Investigative Services with a guard card, chemical agents, baton, taser, and exposed firearm permits.

Tristan Christ, Security Patrol Officer for CALTAC Security since August 2020
Experience and Qualifications:
With previous skills as a landscape foreman and as a preschool teacher, Tristan began working as a security patrol officer after being licensed by the Bureau of Security and Investigative Services with a guard card, chemical agents, taser, and is also current with first aid and CPR certifications.

Ivan Gomez, Security Patrol Officer for CALTAC Security since November 2020
Experience and Qualifications:
Bachelor of Science – Criminal Justice, has worked for three other security companies as an armed or unarmed security officer. Ivan is licensed by the Bureau of Security and Investigative Services with a guard card, chemical agents, baton, taser, and exposed firearm permits and is bilingual in Spanish.

Damion Dossett, Security Patrol Officer for CALTAC Security since February of 2021
Experience and Qualifications:



Security Guard Supervisor and Asset Protection Specialist in Shoplifter Apprehension, Mobile Security Patrol Officer and the Security Lead for event security overseeing scheduling and payroll of a staff of 40-60 employees. Damion is licensed by the Bureau of Security and Investigative Services with a guard card, and chemical agents permit.

Francisco Ramos, Security Patrol Officer for CALTAC Security since March 2021

Experience and Qualifications:

Eleven years as a Security Officer including Standing Guard, Patrol Driver, Patrol Supervisor, Doorman/Bouncer and previously with CALTAC Security for two more years. Francisco is licensed by the Bureau of Security and Investigative Services with a guard card, chemical agents, baton, and taser.

Project Team Organizational Diagram

Geographical Location of the Firm is the Roseville/Sacramento Area. No sub-consultants or sub-contractors will be used for this project.

6.6 TAB D: Project Understanding

Based on the available information, supplemental research, field observations, and experience with similar projects, our understanding of the services requested in this RFP is to contract with the City of Roseville for Securing Facilities Services where our private security officers will be locking gates and restroom doors after checking to ensure the facilities are unoccupied. The optimal working relationship would be a partnership where our team is the eyes and ears for city staff to help maintain our parks and facilities. Our approach to facilitate this is to maintain good communication between CALTAC Security management and Park Operations staff with regular reporting of park conditions. Any issues that may have required special attention were addressed in the RFP and the Addendums.

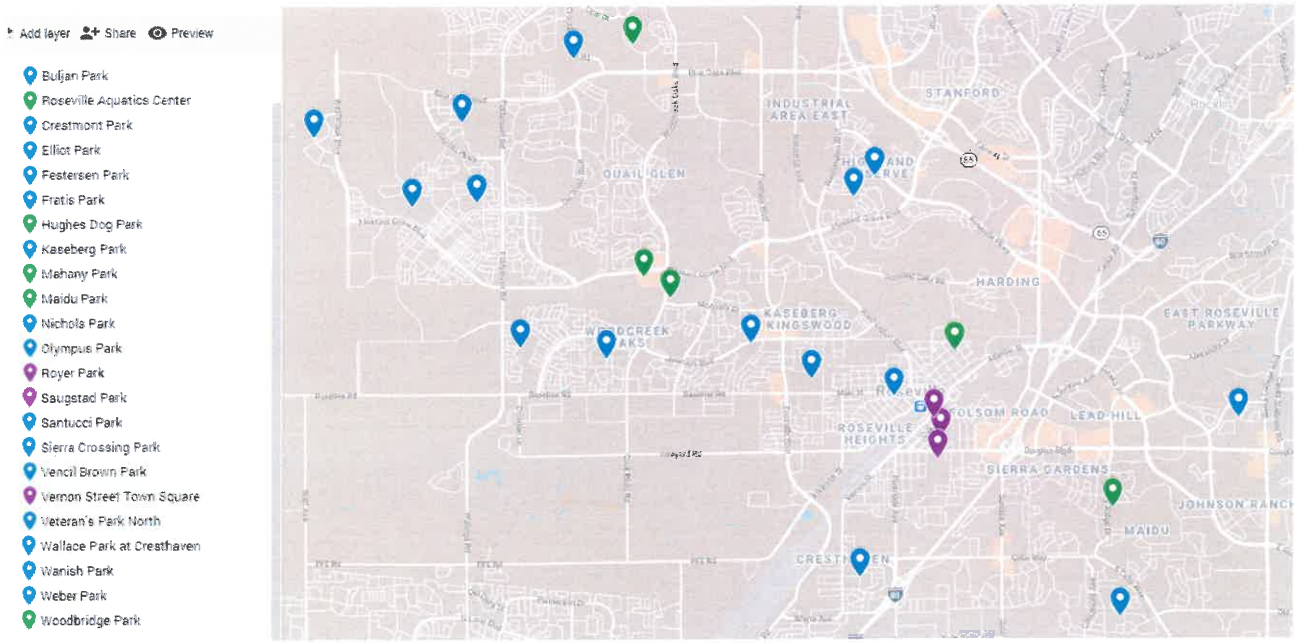
Our unique approach to this project includes training and information for the security patrol officers to be familiar with Roseville Municipal Code 8.02.316, the Park and Park Facility Exclusions regulation that covers all parks and park facilities. This regulation allows any parks, recreation and libraries employee or police officer to exclude any person who, while present in a park or park facility, violates any applicable ordinance, statute, posted rule or regulation, or city policy after being put on notice of same. Security Patrol Officer awareness of this regulation and cooperation with the Roseville Police Department will help to limit illegal activity at the Roseville parks and facilities by enforcing this regulation.

6.7 TAB E: Project Plan

Our methodology to successfully implementing this project is to integrate the newly acquired Roseville City park properties within our existing patrol routes, not to create one new route with one driver and one car. CALTAC Security deploys three patrol cars to this area nightly, with security officers servicing three different patrol routes. The system of integrating the Roseville facilities into our current patrol routes is to assign certain park facilities to all three of these patrols. This allows for a saturation of checking the facilities and providing lock-ups within a timely manner. It also provides an immediate back-up system whereby two other patrol cars are immediately available should one of the security officer/patrol car units experience a delay. Further redundancy with the back-up system is the immediate availability of the Manager of Patrol Operations being a stand-by position that is ready to continue service, if required.

The work schedule coincides with the timing to close the parks at the correct time. Staff assigned to each task includes Patrol Officer 1, 2 and 3 with the Team Members listed in Section 6.5 TAB C. No sub-consultants or sub-contractors will be used for this project. Necessary equipment will be the use of our CALTAC Security marked patrol cars, issued patrol car cell phones and the reporting software system with photos. CALTAC Security employees will be in a State approved uniform with State approved badges and patches. Training will be provided by our Manager of Patrol Operations who will lead and control this project.

Patrol Route Integration Plan



Facilities would be added to our existing patrol routes at times that coincide with park closing. The timing is dynamic to adhere to the park closing rules: Parks without sports court or field lighting shall be locked no earlier than sunset; and parks identified with sports court or field lighting will be locked no earlier than 11pm.

(continued next page)

Roseville Park Patrol Route Assignments for each patrol (Dynamic timing with sunset closures):

PATROL ROUTE - 1		PATROL ROUTE - 2		PATROL ROUTE - 3

Patrol - 2	Half Hour
Patrol - 3	Two Hours

Reimbursable Expenses

There are no known reimbursable expenses at this time.

6.9 TAB G: Required Statements/Documents

Statements of assurance regarding the following requirements in the proposal:

Non-substitution for the designated members of the team without approval by City staff (Section 5.0).

Proposer assures that the designated project team, including sub-consultants or sub-contractors (if any), is used for this project. Departure or reassignment of, or substitution for, any member of the designated project team, sub-consultant(s) or sub-contractor(s) shall not be made without the prior written approval of the City.

Absence of a conflict of interest (Section 10.4)

The Contractor warrants that no official or employee of the City has an interest, has been employed or retained to solicit or aid in the procuring of the resulting contract, nor that any such person will be employed in the performance of such contract without immediate divulgence of such fact to the City. Contractor submitting this proposal in response to the RFP discloses that there are no actual, apparent, direct, indirect, or potential conflicts of interest that may exist with respect to the Contractor or the Contractor's management or employees relative to the services to be provided to the City.

Ability and agreement to fulfill the indemnification and insurance requirements contained in the sample contract (Section 10.7).

CALTAC Security agrees to the City's standard indemnification and insurance requirements that have been provided in the sample contract, included in Attachment C of the RFP. All costs of complying with the insurance requirements have been included in the pricing. CALTAC Security will provide complete and valid insurance certificates within ten (10) days of the City's written request.

Proprietary Information (Section 10.23).
Nothing contained in the submitted proposal is proprietary.

Attachment A

PROPOSER'S CERTIFICATION

I hereby propose to furnish the goods or services specified in the Request for Proposals ("RFP"). I agree that my proposal will remain firm for a period of up to ninety (90) days in order to allow the City of Roseville ("City") adequate time to evaluate the qualifications submitted.

I have carefully examined the Request for Proposals and any other documents accompanying or made a part of this RFP. The information contained in this proposal is true and correct to the best of my knowledge and is signed under penalty of perjury under the laws of the State of California. I further certify that I am duly authorized to submit this proposal on behalf of the firm as its authorized agent and that the firm is ready, willing and able to perform if awarded the contract.

I further certify that this proposal is made without prior understanding, agreement, connection, discussion, or conspiracy with any other person, firm or corporation submitting a proposal for the same product or service; that this proposal is fair and made without outside control, collusion, fraud or illegal action; that no officer, employee or agent of the City or any other proposer is financially interested in said proposal; that no undue influence or pressure was used against or in concert with any officer, employee or agent of the City in connection with the award or terms of the contract that will be executed as a result of this RFP; and that the undersigned executed this Proposer's Certification with full knowledge and understanding of the matters therein contained and was duly authorized to do so.

NONCOLLUSION DECLARATION TO BE EXECUTED BY BIDDER AND SUBMITTED WITH BID

The undersigned declares:

I am the President of CALTAC Security, the party making the foregoing bid.

The bid is not made in the interest of, or on behalf of, any undisclosed person, partnership, company, association, organization, or corporation. The bid is genuine and not collusive or sham. The bidder has not directly or indirectly induced or solicited any other bidder to put in a false or sham bid. The bidder has not directly or indirectly colluded, conspired, connived, or agreed with any bidder or anyone else to put in a sham bid, or to refrain from bidding. The bidder has not in any manner, directly or indirectly, sought by agreement, communication, or conference with anyone to fix the bid price of the bidder or any other bidder, or to fix any overhead, profit, or cost element of the bid price, or of that of any other bidder. All statements contained in the bid are true. The bidder has not, directly or indirectly, submitted his or her bid price or any breakdown thereof, or the contents thereof, or divulged information or data relative thereto, to any corporation, partnership, company, association, organization, bid depository, or to any member or agent thereof, to effectuate a collusive or sham bid, and has not paid, and will not pay, any person or entity for such purpose.

Any person executing this declaration on behalf of a bidder that is a corporation, partnership, joint venture, limited liability company, limited liability partnership, or any other entity, hereby represents that he or she has full power to execute, and does execute, this declaration on behalf of the bidder.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that this declaration is executed on April 9, 2021, at Roseville, California.

COUNCIL COMMUNICATION

CC #: 1547
File #: 0704-01

Title: William "Bill" Hughes Park Shade Sails – Contract Purchase Agreement
Contact: Tara Gee 916-774-5253 tgee@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.7.

RECOMMENDATION TO COUNCIL

Staff recommends City Council adopt a resolution approving Contract Purchase Agreement (CPA) #3001165 with Ross Recreation Equipment Company, Inc., and authorize the City Manager to execute it on behalf of the City of Roseville.

BACKGROUND

In May 2020, a budget adjustment was approved allocating funds from the Diamond Creek CFD 1 (Fund 3016) fund for the addition of the shade structures at William "Bill" Hughes Park. The Contract Purchase Agreement (CPA) outlines a cost of $117,026, which includes all labor, materials, bonds and structural calculations. The addition of the shade sails is consistent with the work plan outlined in the bond refunding process during FY2018-19 from Diamond Creek CFD 1 (Fund 3016).

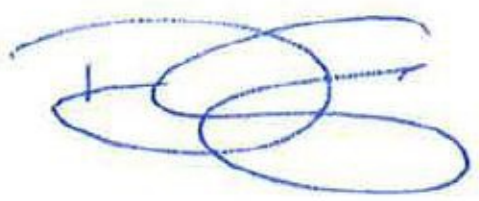
FISCAL IMPACT

A budget adjustment was approved in May 2020 allocating funds from Diamond Creek CFD 1 (Fund 3016) towards specific projects at Duke Davis and William "Bill" Hughes Parks. The work at Duke Davis Park is complete. These upgrades will require no General Fund resources.

ENVIRONMENTAL REVIEW

The proposed project involves the minor alteration of an existing facility. This activity is categorically exempt from CEQA as a Class 1 Exemption (State CEQA Guidelines Section 15301). The Exemption has been prepared and no further CEQA action is required.

CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS



Goal C - Maintain a safe and healthy community
Goal E - Deliver exceptional city services

Goal F - Invest in well-planned infrastructure and growth

Respectfully Submitted,

Tara Gee, Park Planning & Development Superintendent

Jill Geller, Parks, Recreation & Libraries Director

Insurance Submission Process

The City of Roseville Human Resources/Risk Management Department uses a service called EBIX to manage our insurance certificate tracking.

How It Works

- The vendor's contact information is entered into EBIX. EBIX will contact the vendor to request proof of insurance.
- The Vendor can forward the request to their Insurance Agent(s) if necessary.
- Vendor/Insurance Agent submits insurance to EBIX by email to roseville@ebix.com or by fax to (770) 325-5727. After faxing or emailing the certificate, please DO NOT send the certificate by mail to EBIX. Please do not mail, email or fax any certificates to the City of Roseville.
- Once submitted, EBIX reviews the insurance documentation. If there are deficiencies, EBIX will send a follow up letter or email requesting additional information.

Questions Regarding Insurance Submission: Contact EBIX at (951) 652-4239
Questions Regarding Insurance Requirements Contact Risk Management at (916) 774-5202

Contract Terms and Conditions

1. To the fullest extent allowed by law, Contractor shall defend, indemnify, and save and hold harmless the City, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of Contractor's willful misconduct or negligent act or omission while engaged in the performance of obligations or exercise of rights created by this Agreement, except those matters arising from City's sole or active negligence or willful misconduct. The parties intend that this provision shall be broadly construed. Contractor's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

2. Contractor is an independent contractor, and shall not be considered an officer, agent or employee of the City.

3. Without the written consent of the City, this Agreement is not assignable by Contractor either in whole or in part.

4. Time is of the essence of this Agreement.

5. At any time during the term of this Agreement, the City has the right to terminate this Agreement, provided Contractor is given thirty (30) days written notice. City's termination shall be without further liability to City; however, Contractor shall be entitled to all costs reasonably incurred prior to the date of termination. Contractor acknowledges that City may terminate this Agreement should funds not be appropriated by its governing body to continue services under this Agreement.

6. This Agreement may only be amended or modified in writing. It is integrated and contains the complete understanding of the parties.

7. All equipment, supplies and services sold to the City of Roseville shall conform to the general safety orders of the State of California.

8. Unless notified to the contrary, in writing, the City assumes that the Contractor has accepted the work in accordance with the plans and specifications (if any) and agrees to do the work in compliance with this Agreement.

9. All prevailing wages and fair employment practices must be adhered to. For prevailing wage contracts over $25,000, copies of certified payroll must be submitted with invoices. Prevailing wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm.

10. Contractor agrees to the below insurance requirements:

    a. Unless otherwise specified, the Contractor shall maintain the policies of insurance outlined in Attachment A, incorporated herein by this reference, in full force and effect during the term of this Agreement. The City of Roseville retains sole discretion in determining the types and proper levels of insurance coverage.

b. Form. Contractor shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

c. Additional Insureds. Contractor shall also provide a separate endorsement or section of the policy showing City, its officers, agents, employees, and volunteers as additional insureds for each type of coverage (except Workers' Compensation) and for ongoing and completed operations. Such insurance shall specifically cover the contractual liability of Contractor. The additional insured coverage under the Contractor's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from City's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office (ISO) CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be:

(1) the minimum coverage and limits specified in this Agreement; or
(2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

d. Cancellation/Modification. Contractor shall provide ten (10) days written notice to City prior to cancellation or modification of any insurance required by this Agreement.

e. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of City (if agreed to in a written contract) before City's own insurance shall be called upon to protect it as a named insured.

f. Subcontractors. Contractor agrees to include in its contracts with all subcontractors the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, Contractor shall require its subcontractors to agree to be bound to Contractor and City in the same manner and to the same extent as Contractor is bound to City under this Agreement. Additionally, Contractor shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of City's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request.

g. Self-Insured Retentions. All self-insured retentions (SIR) must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

h. Waiver of Subrogation. Contractor hereby agrees to waive subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General

Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of City, its officers, agents, employees and volunteers for all work performed by Contractor, its employees, agents and subcontractors.

i. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve Contractor of liability in excess of such coverage, nor shall it preclude City from taking such other actions as are available to it under any other provisions of this Agreement or law.

11. Contractor shall comply with all federal, state and local laws and ordinances, including but not limited to the City's storm water regulations, as may be applicable to the performance of services under this Agreement. Failure to comply with local ordinances may result in monetary fines and cancellation of this Agreement. Refer to www.roseville.ca.us/stormwater for links to more information on the City's storm water regulations.

12. In the event that the terms of any attachment or exhibit conflict with any terms of this Agreement, the terms of this Agreement shall control.

13. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. In the event that any signature is delivered by facsimile transmission or by e-mail delivery of a ".pdf" format data file, such signature shall create a valid and binding obligation of the party executing (or on whose behalf such signature is executed) with the same force and effect as if such facsimile or ".pdf" signature page were an original thereof.

14. If either party commences any legal action against the other party arising out of this Agreement or the performance thereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorneys' fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

15. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.

16. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

17. For purposes of this Agreement, the terms "Contractor," "Consultant," and "Supplier" are used interchangeably.

18. No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this agreement, Contractor and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

19. Contractor must submit all claims as defined in and in accordance with the claim resolution process set forth in Section 9204 of the Public Contract Code. Each such claim must be sent to the City by registered mail or certified mail with return receipt requested and must contain reasonable documentation to support the claim. All claims must be received prior to acceptance of the work.

20. Contractor agrees to defend and indemnify City if, despite the parties intent and

Notes to Customer

Thank you for the opportunity to quote your upcoming project. PLEASE NOTE: quote does not include installation, offload, payment and performance bonds, engineering calculations, security, storage, permits, inspection, or safety surfacing unless otherwise noted.

Deposits may be required before order can be placed depending on customer credit terms. Your purchase is subject to the terms and conditions of this quote, approval of this quote agrees to those terms.

If ordering materials after the expiration date, please add 3-6% annually to materials for anticipated price increase. If this is for a BID, it is the responsibility of the General Contractor bidding to adjust their bid to accommodate anticipated pricing. Please also note that sales tax will be based on the current rate at the time of shipping, not order date. Customer will be expected to cover these taxes.

Ross Recreation will provide labor using a subcontractor for all installation and labor quoted. Neither Ross Recreation nor our subcontractors are signatory to any unions, however compliance with prevailing wage rate requirements will occur. If union enrollment is required by our subcontractor for completion of this project, Ross Recreation will require a change order to cover the costs of a per project enrollment and additional wage/benefit requirements.

COUNCIL COMMUNICATION

CC #: 1521
File #: 0203-01

Title: Vehicle – Purchase Orders
Contact: Brian Craighead 916-774-5731 bcraighead@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.8.

RECOMMENDATION TO COUNCIL

RFQ 10-3303
Staff recommends Council approve a purchase order to Global Machinery International West LLC dba Global Machinery for two Hogg & Davis Hydra 985 cable pulling trailers utilizing RFQ 10-3303 as fleet additions approved in the FY2020-21 Fleet Replacement budget. The total cost including options and sales tax is $335,050.

Sourcewell
Staff recommends Council approve a purchase order to Owen Equipment Sales for one Elgin Whirlwind street sweeper utilizing Sourcewell contract# 122017-FSC as a fleet addition approved in the FY2020-21 Fleet Replacement budget. This Sourcewell contract is a cooperative agreement in compliance with Roseville Municipal Code section 4.12.105(B). The total cost including options and sales tax is $359,986.

BACKGROUND

RFQ 10-3303
The Roseville Electric Construction and Maintenance division is purchasing two Hogg & Davis Hydra 985 cable pulling trailers as fleet additions. These trailers are designed specifically to remove underground electrical cables during cable replacement projects. The importance of these units is magnified in the fact that 85% of our electrical grid is underground. Roseville Electric has an aggressive cable replacement program which plays a key role in our historically low outage numbers. These two trailers are required in order to keep up with the growth of the City and its underground infrastructure.

A formal bid was issued with the following vendor responses:

Vendor	Total price (with all potential options)
Global Machinery	**$335,049.52**

Sacramento, CA

Vet Nation Inc. $420,225.00
Santa Barbra, CA

Terex Utilities $362,090.14
Stockton, CA

Nesco, LLC $322,676.00
Bluffton, IN

The apparent low bidder Nesco, LLC did not include sales tax in the grand total bid price and adding sales tax would increase their bid to $347,683.39. Global Machinery's bid of $335,049.52 is the low bid.

Sourcewell
The Public Works Street Sweeping division is purchasing one Elgin Whirlwind vacuum street sweeper as a fleet addition. The sweeper is used for residential and commercial street sweeping. The vehicle is used to meet state regulatory requirements for the MS4 permit. Street sweeping keeps gutters and alleys clean, improves aesthetics, and removes road debris. This Sourcewell contract is a cooperative agreement in compliance with Roseville Municipal Code section 4.12.105(B).

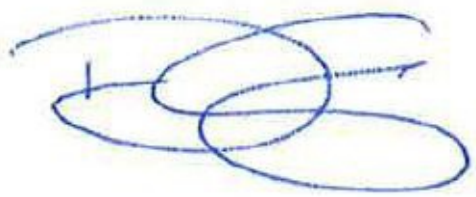
FISCAL IMPACT

RFQ 10-3303
The total cost of two Hogg & Davis Hydra 985 cable pulling trailers including options and sales tax is $335,050. Funding is included in the FY2020-21 Fleet Replacement budget.

Sourcewell
The total cost of one Elgin Whirlwind street sweeper including options and sales tax is $359,986. Funding is included in the FY2020-21 Fleet Replacement budget.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The purchase of vehicles meets the above criteria and is not subject to CEQA. No additional environmental review is required.



CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Title:	2021 Sewer Collection System Cured-in-Place Pipe Rehabilitation Project – Award of Contract
Contact:	Jonathan Cummings 916-774-5566 jcummings@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.9.

RECOMMENDATION TO COUNCIL

Staff recommends City Council:

1. Approve a construction contract with Insituform Technologies, LLC in the amount of $1,584,796 for the 2021 Sewer Collection System CIPP Rehabilitation Project (Project), and adopt a resolution authorizing the City Manager to execute it, and
2. Authorize the City Manager or his designee to approve and pay for contract change orders for the Project that could increase the contract amount by no more than 10% ($158,480) or a not-to-exceed total contract amount of $1,743,276.

BACKGROUND

The Environmental Utilities Department has an ongoing repair and maintenance program for its sewer collection system. Closed circuit television (CCTV) was used to inspect 26 miles of the pipeline interior and, based on severity of defects, segments of pipeline were prioritized for repair. To date, the rehabilitation program has repaired over 17 miles of defective sewer pipeline.

On March 17, 2021, City Council approved plans and specifications for the 2021 Sewer Collection System Cured-in-Place Pipe (CIPP) Rehabilitation Project and authorized the Environmental Utilities Department to advertise and accept bids. This year's plan will continue the repair of approximately 13,400 linear feet of the collection system that has cracked and/or deteriorated pipe, and will include repair of approximately 340 service laterals to provide a seal between the repaired sewer pipe and the lateral connection.

For City Council consideration under this memorandum is the award of the construction contract. Two (2) bids were received for the Project. The bids were opened at the City Clerk's office on April 19, 2021. The lowest responsive and responsible bid received was for a construction cost of $1,584,796. The Engineers' Estimate was $2,600,000. A summary of the bids received is attached as Exhibit A. The construction contract agreement is attached as Exhibit B.

FISCAL IMPACT

The existing project budget is $2,039,395 and is funded by the Wastewater Rehabilitation Fund. The available budget will fund the construction contract ($1,584,796), the requested construction change order allowance ($158,480), and the estimated $240,000 needed for secondary labor during construction. The total anticipated budget required to cover the costs of the Project is $1,983,276.

ENVIRONMENTAL REVIEW

The proposed project involves the repair of an existing facility. This activity is categorically exempt from CEQA as a Class 1 Exemption (State CEQA Guidelines Section 15301). The Exemption has been prepared (Exhibit C) and no further CEQA action is required.

AGREEMENT

THIS AGREEMENT, is made and entered into this _____day of _____, 20_____, by and between the City of Roseville, a municipal corporation, ("CITY"), and Insituform Technologies, LLC, a Limited Liability Company, ("CONTRACTOR"); and

WITNESSETH:

WHEREAS, the City Council of the CITY, at a meeting held on the 17th day of March, 2021, approved plans and specifications for the 2021 Sewer Collection System Cured-In-Place Pipe Rehabilitation Project and directed the City Clerk to advertise for sealed proposals for doing said work and providing that bids be submitted on the 19th day of April, 2021; and

WHEREAS, the City Clerk, thereafter duly and regularly caused a notice to be published in the manner and for the time prescribed by law; and

WHEREAS, CONTRACTOR, pursuant to the provisions of said notice duly filed a bid with the City Clerk, a true copy of which bid is now on file in the office of the City Clerk, and is hereby referred to and by this reference made a part hereof as fully as if set forth at length herein; and

WHEREAS, all bids received pursuant to said notice were opened and examined and publicly declared at the time specified in said advertisement for bids and at a meeting of the City Council held on the _____ day of _____, 20_____, the Council found and

declared the bid of CONTRACTOR to be the lowest responsible bid and thereupon awarded a contract to CONTRACTOR to do the work referred to in the aforementioned specifications.

NOW, THEREFORE, the parties agree as follows:

1. THE WORK. CONTRACTOR agrees:

a. To do the work and furnish all the labor, materials, tools, supplies, equipment, superintendence, insurance, and bonds required for the 2021 Sewer Collection System Cured-In-Place Pipe Rehabilitation Project in accordance with the Contract Documents (the Work).

b. To do and perform the Work contemplated hereby in a good and workmanlike manner under the direction of and to the satisfaction of the Director of Public Works of the City of Roseville.

2. PAYMENT. CITY shall pay CONTRACTOR One Million, five hundred eighty-four thousand, seven hundred ninety-six dollars ($1,584,796.00) for the Work to be done under this Agreement in accordance with the Contract Documents.

3. CONTRACT DOCUMENTS. The complete Agreement between the parties hereto consists of the following documents:

a. The advertisement for bids (including the notice to bidders, instructions to bidders and proposals);

b. The accepted bid;

c. Plans and specifications (including standard construction specifications, special provisions and construction details);

d. Bonds and insurance required by the specifications; and

e. This contract.

All documents specified above are intended to operate so that any work called for in any one and not mentioned in the other, or vice versa, is to be executed the same as if mentioned in all said documents.

4. LIQUIDATED DAMAGES. In the event CONTRACTOR does not complete the Work within the time specified, CONTRACTOR agrees that CITY will suffer damages. Inasmuch as the actual damages which would result from such breach by CONTRACTOR under this Agreement are uncertain, and would be impractical or extremely difficult to fix, CONTRACTOR agrees that it shall pay, or CITY shall deduct from CONTRACTOR's fee, the amount of $ 1,000.00 per day as liquidated damages, in the event of such delay.

5. TIME OF COMPLETION. Time is of the essence of this Agreement. CONTRACTOR shall complete all Work under the Contract Documents within 186 Days of the date of this Contract. CONTRACTOR shall begin work by the date specified in the "Notice to Proceed" letter and shall diligently prosecute all of the Work under this Contract in all parts and requirements as defined in the Contract Documents.

6. SERVICE OF NOTICE. Any notice required or permitted to be given under this Agreement shall be deemed given when (a) personally delivered to the recipient identified below; (b) mailed by registered or certified mail, return receipt requested, postage pre-paid, to the address specified below; or (c) sent by facsimile, with confirmation of receipt, to the facsimile number identified below.

CITY OF ROSEVILLE	CONTRACTOR
Jonathan Cummings	Whittney Schulte
Environmental Utilities	17988 Edison Avenue
2005 Hilltop Circle, Suite 130	Chesterfield, MO 63005
Roseville, CA 95747	

CITY may also act through either its architect or construction manager if CITY expressly gives notice to CONTRACTOR, in writing, that CITY's designee has authority to act for CITY in a specific capacity.

7. DISPUTES. Disputes arising from this Agreement will be determined in accordance with the Contract Documents and Public Contract Code Sections 10240-10240.13.

8. GOVERNING LAW. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

9. INDEPENDENT CONTRACTOR. CONTRACTOR shall act as an independent contractor, and covenants and agrees that it will conduct itself consistent with such status, that it will neither hold itself out as, nor claim to be, an officer or employee of CITY by reason of this Agreement.

10. SUCCESSORS IN INTEREST. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.

11. MODIFICATION. This Agreement and each provision contained herein may be waived, amended, supplemented or eliminated only by mutual written agreement of the parties.

12. SEVERABILITY. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

13. INTEGRATED AGREEMENT. This is an integrated agreement and contains all of the terms, considerations, understanding and promises of the parties. It shall be read as a whole.

14. CONTRACTORS LICENSE LAW. CONTRACTORS ARE REQUIRED BY LAW TO BE LICENSED AND REGULATED BY THE CONTRACTORS' STATE LICENSE BOARD WHICH HAS JURISDICTION TO INVESTIGATE COMPLAINTS AGAINST CONTRACTORS IF A COMPLAINT REGARDING A PATENT ACT OR OMISSION IS FILED WITHIN FOUR (4) YEARS OF THE DATE OF THE ALLEGED VIOLATION. A COMPLAINT REGARDING A LATENT ACT OR OMISISON PERTAINING TO STRUCUTRAL DEFECTS MUST BE FILED WITHIN TEN (10) YEARS OF THE DATE OF THE ALLEGED VIOLATION. ANY QUESTIONS CONCERNING A CONTRACTOR MAY BE REFERRED TO THE REGISTRAR, CONTRACTORS' STATE LICENSE BOARD, P.O. BOX 26000, SACRAMENTO, CALIFORNIA 95826.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attestation by its City Clerk under authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____day of _____, 20_____, and CONTRACTOR has caused this Agreement to be duly executed.

Meeting Date: 6/16/2021
Item #: 7.10.

RECOMMENDATION TO COUNCIL

Staff recommends Council adopt a resolution approving a professional services agreement with PROS Consulting, Inc., and authorizing the City Manager to execute it on behalf of the City of Roseville.

BACKGROUND

The project consists of a comprehensive strategic master plan that analyzes existing services provided, seeks input from the community through public outreach and statistically valid surveys, identifies gaps and needs of the community, outlines recreation and library program trends for the future, reviews access to public spaces as well as parks/facility needs and makes recommendations for future action based on findings over the next ten to fifteen years. The strategic master plan is intended to be a road map for future decisions.

On April 6, 2021, a Request for Proposals (RFP) was issued asking qualified consultants to submit a response and cost proposal to develop a strategic master plan for the Parks, Recreation & Libraries (PRL) Department. Responses to the RFP were due on May 3, 2021. Three submissions were received.

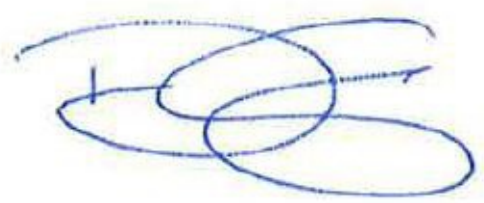
A five person panel made up of key staff within the Department reviewed and ranked the submissions. On May 17, 2021, virtual interviews were held with the top two ranked firms. Reference checks were conducted and after additional discussion, staff recommends a contract award to Pros Consulting, Inc. for $199,958.

FISCAL IMPACT

Funding for this project was allocated through the General Fund Contingency budget during FY2020-21.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) only applies to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3)).



CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal B - Support community engagement and advocacy
Goal C - Maintain a safe and healthy community
Goal D - Enhance economic vitality
Goal E - Deliver exceptional city services

Respectfully Submitted,

Tara Gee, Park Planning & Development Superintendent

Jill Geller, Parks, Recreation & Libraries Director

PROFESSIONAL SERVICES AGREEMENT

Project: Strategic Master Plan for the Parks Recreation & Libraries Department

THIS AGREEMENT is made and entered into this ___ day of _____, 20__, by and between the City of Roseville, a municipal corporation ("CITY"), and PROS Consulting, Inc., an Indiana corporation ("CONSULTANT"); and

W I T N E S S E T H:

WHEREAS, CITY desires professional services consisting of a strategic master plan for the Parks, Recreation & Libraries Department; and

WHEREAS, CONSULTANT has prepared a proposal in response to RFP #13-100 dated May 3, 2021, which describes the scope of work to be performed by CONSULTANT, the budget for the work, and the schedule for performance of the work; and

WHEREAS, CONSULTANT is qualified and experienced to provide such professional services.

NOW, THEREFORE, the parties agree as follows:

1. Services. CONSULTANT shall perform, at the direction of CITY, the scope of services as described in EXHIBIT "A," attached hereto and incorporated herein by this reference.

2. Compensation. For its services provided hereunder, CONSULTANT shall be compensated on a time and expense basis in accordance with the budget estimate as described in

EXHIBIT "A". Total compensation shall not exceed one hundred ninety-nine thousand, nine hundred fifty-eight dollars ($199,958).

CONSULTANT shall submit one monthly invoice for its services. Such invoices shall be delineated by task, the person performing the services, and the hourly rate, which shall be stated in time increments of not greater than one tenth (1/10) hours. CITY shall pay invoices within thirty (30) days after receipt, if the services specified in the invoice have been satisfactorily completed.

3. Indemnification. To the fullest extent allowed by law, CONSULTANT shall defend, indemnify, and save and hold harmless CITY, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of CONSULTANT's willful misconduct or negligent act or omission while engaged in the performance of obligations or exercise of rights created by this Agreement, except those matters arising from CITY's sole negligence or willful misconduct. The parties intend that this provision shall be broadly construed.

CONSULTANT's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

4. Insurance. CONSULTANT agrees to continuously maintain, in full force and effect, the following minimum policies of insurance during the term of this Agreement.

COVERAGE	LIMITS OF LIABILITY
Workers' Compensation	Statutory
Commercial General Liability	$1,000,000 each occurrence $2,000,000 aggregate Personal Injury: $1,000,000 each occurrence $2,000,000 aggregate
Automobile Liability	$1,000,000 combined single limit
Professional Liability (errors and omissions)	$1,000,000 per claim $2,000,000 aggregate

a. Form. CONSULTANT shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

b. Additional Insureds. CONSULTANT shall also provide a separate endorsement form or section of the policy showing CITY, its officers, agents, employees and volunteers as additional insureds for each type of coverage, except for Workers' Compensation and Professional Liability. Such insurance shall specifically cover the contractual liability of CONSULTANT. The additional insured coverage under the CONSULTANT's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from CITY's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office ("ISO") CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and

limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

c. Cancellation/Modification. CONSULTANT shall provide ten (10) days written notice to CITY prior to cancellation or modification of any insurance required by this Agreement.

d. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of CITY (if agreed to in a written contract) before CITY's own insurance shall be called upon to protect it as a named insured.

e. Subcontractors. CONSULTANT agrees to include in its contracts with all subcontractors the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, CONSULTANT shall require its subcontractors to agree to be bound to CONSULTANT and CITY in the same manner and to the same extent as CONSULTANT is bound to CITY under this Agreement. Additionally, CONSULTANT shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of CITY's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request.

f. Self-Insured Retentions. All self-insured retentions ("SIR") must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or CITY. CITY reserves the right to obtain a full

certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

g. Waiver of Subrogation. CONSULTANT hereby agrees to waive subrogation which any insurer of CONSULTANT may acquire from CONSULTANT by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of CITY, its officers, agents, employees and volunteers for all worked performed by CONSULTANT, its employees, agents and subcontractors.

h. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve CONSULTANT of liability in excess of such coverage, nor shall it preclude CITY from taking such other actions as are available to it under any other provisions of this Agreement or law.

5. Records. CONSULTANT and its subcontractors shall maintain all files and records relating to the services performed hereunder during the term of this Agreement and for a period of not less than one (1) year after the date of termination or expiration. Provided, however, that in the event of litigation or settlement of claims arising from the performance of this Agreement, CONSULTANT and its subcontractors shall maintain all files and records until such litigation, appeals or claims are resolved. Duly authorized representatives of CITY shall have right of access during normal business hours and after reasonable notice to CONSULTANT's and subcontractors' files and records relating to the services performed hereunder, and may review and copy the files and records at appropriate stages during performance of the services and during the one (1) year period following termination or

expiration of this Agreement. CONSULTANT shall include this provisions in its contracts with all subcontractors.

6. Time is of the Essence. Time is of the essence of this Agreement.

7. Compliance with Laws. CONSULTANT shall comply with all federal, state and local laws, ordinances and policies as may be applicable to the performance of services under this Agreement.

8. Ability to Perform. CONSULTANT agrees and represents that it has the time, ability and professional expertise to perform the services required under this Agreement.

9. Governing Agreement. In the event of any conflict between this Agreement and its EXHIBITS, the provisions of this Agreement shall govern. In the event of any conflict between any of the EXHIBITS, the provisions of the first in order of attachment shall govern.

10. Assignment. CONSULTANT is employed to perform unique personal services. CONSULTANT shall not assign this Agreement without the prior written consent of CITY. CONSULTANT shall not employ or otherwise incur any obligation to pay other specialists or experts for services in connection with this Agreement, without prior written consent of CITY.

11. Independent Contractor. CONSULTANT, inclusive of its agents, officers, employees, volunteers, independent contractors, and subcontractors, shall act as an independent contractor, and covenants and agrees that it will conduct itself consistent with such status, that it will neither hold itself out as, nor claim to be, an officer or employee of CITY by reason of this Agreement.

12. Representations and Warranties. CONSULTANT warrants that it has not employed or retained any company or person, other than a bona fide employee working for CONSULTANT, to solicit or secure this Agreement, and that it has not paid or agreed to pay any

company or person, other than a bona fide employee, any fee, commission, percentage, brokerage fee, gift or any other consideration, contingent upon or resulting from the award or making of this Agreement. For breach or violation of this warranty, CITY shall have the right to terminate as void this Agreement, without liability, or, in its discretion, to deduct from the Agreement price or consideration, or otherwise recover, the full amount of such fee, commission, percentage, brokerage fee, gift or contingent fee.

13. Successors in Interest. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.

14. Copyright, Ownership and Use of Materials. All tangible material ("Material") created or delivered pursuant to this Agreement is considered a work made for hire under the Copyright Act. To the extent such Material does not qualify as a work made for hire, CONSULTANT hereby assigns to CITY all right, title, and interest, including but not limited to all copyrights, in all Material created by CONSULTANT in its performance under this Agreement. Material constitutes the scope of work outlined in Exhibit A and attached hereto, and all written and other tangible expressions, including but not limited to, drawings (including computer aided drawings), papers, documents, reports, surveys, renderings, exhibits, sketches, maps, models, prints, paintings or photographs, in any and all media or formats in which such materials have been created or are maintained. All Material furnished by CONSULTANT is, and shall remain, the property of CITY.

CONSULTANT shall execute any documents necessary to effectuate such assignment. In the event that CONSULTANT uses, employs, designates, or retains any person or entity who is not an employee of CONSULTANT, to perform any work required of it pursuant to this

Agreement, CONSULTANT shall require said person or entity to execute an agreement containing the preceding paragraph.

15. Termination of Agreement. The City may terminate this Agreement without cause by giving CONSULTANT ten (10) days advance written notice from the City Manager. CONSULTANT may terminate this Agreement without cause by giving CITY thirty (30) days advance written notice. In the event of termination through no fault of CONSULTANT, CITY shall compensate CONSULTANT for services performed as of the date of termination, upon the release to CITY of all Material hereunder, in any and all media or formats in which such materials have been created or are maintained. CITY retains the right to receive and use any Material, notwithstanding any termination or any dispute regarding the amount to be paid.

16. Attorney's Fees; Venue; Governing Law. If either party commences any legal action against the other party arising out of this Agreement or the performance hereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorney's fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

17. Modification. This Agreement and each provision contained herein may be waived, amended, supplemented or eliminated only by mutual written agreement of the parties.

18. Severability. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

19. Notices. Any notices to parties required by this Agreement shall be delivered personally or mailed, U.S. first class postage prepaid, addressed as follows:

CITY OF ROSEVILLE	CONSULTANT
Jill Geller Parks, Recreation & Libraries Director 316 Vernon Street Roseville, CA 95678	Leon Younger PROS Consulting, Inc. 35 Whittington Dr., Suite 300 Brownsburg, Indiana 46112

Either party may amend its address for notice by giving notice to the other party in writing.

20. Integrated Agreement. This is an integrated agreement and contains all of the terms, considerations, understanding and promises of the parties. It shall be read as a whole.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ___ day of _____, 20__, and CONSULTANT has caused this Agreement to be executed.

RE: Request for Proposals – Strategic Master Plan for Parks, Recreation & Libraries Department
Dear Ms. Gee & Selection Committee:

PROS Consulting, Inc. is very excited about the opportunity to partner with the City of Roseville on the development of *Strategic Master Plan for the Parks, Recreation & Libraries Department*. We are a full-service management consulting and strategic master planning firm focusing on services to government agencies, with specialized experience in parks and recreation, national accreditation, open space planning, economic development, and marketing and branding.

Our national experience and our extensive work locally throughout the Sacramento Area and in California enables us to offer the ideal combination of national expertise and local insights, critical to a high performing agency such as Roseville. We believe our experience working with higher-performing and CAPRA Accredited agencies on similar master plans throughout the nation will have the least learning curve and our customized methodology is best suited to help you:

1. **Maximize community engagement in an extensive and innovative manner** to ensure the broad interests of the diverse community and stakeholders in Roseville is heard and can help shape the future of the City's parks and recreation system;
2. **Utilize a wide variety of data sources, including a statistically-valid survey,** and recreation and library best practices to predict trends and patterns of use and how to address unmet needs in Roseville;
3. **Determine unique Level of Service Standards** to develop appropriate actions regarding programs and facilities that reflects the City's strong commitment in providing high quality recreational activities for the community;
4. **Shape financial sustainability** through "next" practices for the City to achieve the strategic objectives, identify revenue opportunities and ensure future operational and maintenance needs are addressed; and
5. **Develop a dynamic and realistic strategic action plan** in order to establish, goals, policies, guidelines, and strategies for the City's parks, recreation, and library services to support the family-oriented community and many businesses that call Roseville home.

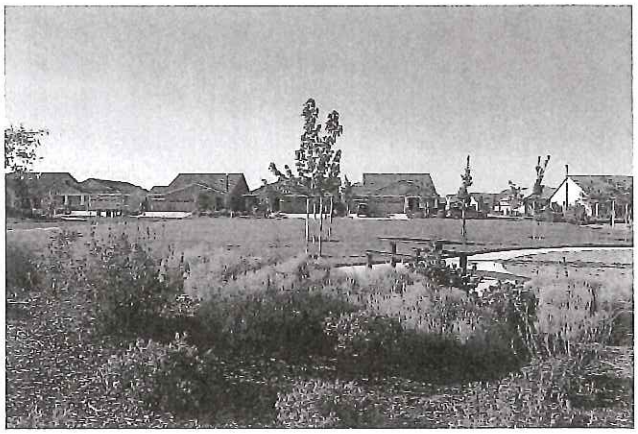
We are proud to say that California is in the top 3 states nationwide for the extent of work we have performed over the last several years and with this proposal we sincerely hope for an opportunity to continue our relationship. Also, since 2012, PROS has completed parks and recreation planning projects for over 55% of NRPA Gold Medal winners and nearly 40% of the CAPRA accredited agencies.

Our team includes **Wallace Roberts & Todd ("WRT")**, a local and nationally renowned planning design firm made up of city and regional planners, urban designers, landscape architects, and architects. PROS Consulting and WRT have worked together on many planning projects throughout California and large parks and recreation planning projects across the country. Also on the team is our longtime partner **ETC Institute**, a nationally renowned survey and market research firm to assist in the statistically-valid community survey development. Lastly we have included our team **Jennifer K. Sweeney & Associates, LLC** to assist in the evaluation and strategic planning for libraries.

PROS Consulting will perform the services and adhere to the requirements described in the RFP, including addenda dated 4/22/2021.

We welcome the opportunity to meet in person and present our approach and qualifications to perform this exciting project. If you have any questions or need additional information, please do not hesitate to me at 317.679.5615 or leon.younger@prosconsulting.com.

Sincerely,
PROS Consulting



Leon Younger

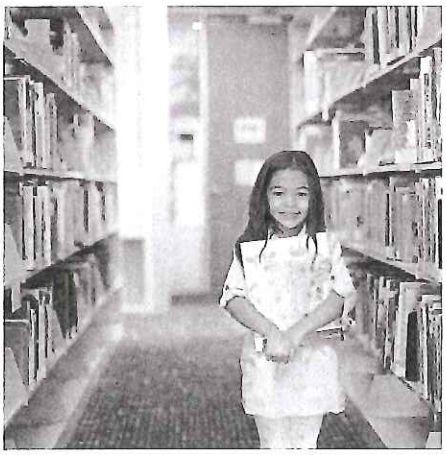
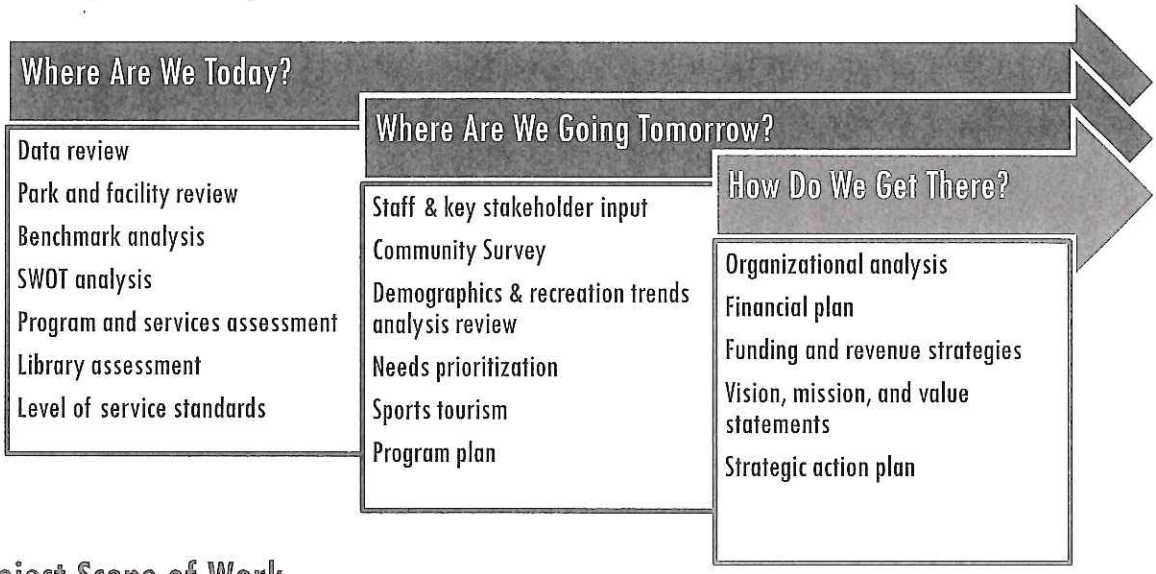
Tab D – Project Understanding



Project Understanding

The City of Roseville Parks, Recreation & Libraries Recreation Department ("Department") has a strong commitment to provide parks, trails, library, and recreational service programs for residents and visitors. The Department also partners with many community and state organizations to bring new, exciting ideas into its programming to enhance the community's quality of life. As such, the Department is seeking professional services to prepare a *Parks, Recreation, and Libraries Master Plan* ("Master Plan") to provide a vision for the future. Key components of the master planning process will be research, public involvement, and the development of recommendations for all aspects of Department recreation activities with a focus on facilities and capital improvements.

The Department desires a Master Plan that will align new investments with a strong community-driven mission and vision that integrates the City's strong pursuit of recreation activities to the community. The outcome will be a Master Plan that will be heavily used as a resource for future development and redevelopment of the Department's parks, recreation programs, and facilities. The Master Plan will:



- **Maximize community engagement in an extensive and innovative manner** to ensure the broad interests of the diverse community and stakeholders in Roseville is heard and can help shape the future of the City's parks and recreation system;
- **Utilize a wide variety of data sources, including a statistically-valid survey,** and recreation and library best practices to predict trends and patterns of use and how to address unmet needs in Roseville;
- **Determine unique Level of Service Standards** to develop appropriate actions regarding programs and facilities that reflects the City's strong commitment in providing high quality recreational activities for the community;
- **Shape financial sustainability** through "next" practices for the City to achieve the strategic objectives, identify revenue opportunities and ensure future operational and maintenance needs are addressed; and
- **Develop a dynamic and realistic strategic action plan** in order to establish, goals, policies, guidelines, and strategies for the City's parks, recreation, and library services to support the family-oriented community and many businesses that call Roseville home.

The foundation of the Consulting Team's approach is a creative and comprehensive public participation process. It is very important to not only to engage those who typically participate in the planning process, but also those who do not. We will identify opportunities that engage people through a variety of community input processes. The information derived by the public's participation in key leadership meetings, focus group meetings, public forums, and surveys is important. However, it is equally important that the information received is applied to the overall planning process to accurately articulate the true unmet needs, address key issues and provide the greatest recommendations and strategies to move the City's parks and recreation services forward for optimum results.

Key Steps in the Process

The Master Plan will create a clear set of objectives that will provide direction to staff, elected officials, and the Parks and Recreation Commission for a short-term, mid-term and long-term range. There are numerous steps in the project, with the following key areas of focus being foundation components.

Project Scope of Work

Task 1 – Project Management, Progress Reporting & Existing Document Review

A. Kick-off Meeting, Data Collection & Project Management – A kick-off meeting should be attended by the key Department staff and Consulting Team members to confirm project goals, objectives, and expectations that will help guide actions and decisions of the Consulting Team. Detailed steps of this task include:

- Confirmation – The project goals, objectives, scope, and schedule will be confirmed.
- Outcome Expectations – Discuss expectations of the completed project.
- Communications – Confirmation on lines of communication, points of contact, level of involvement by Department and local leaders, and other related project management details. Also, protocols and procedures for scheduling meetings should be agreed to. We will coordinate and participate in routine progress meetings as often as necessary, no less than once a month and until the final plan is approved by the City Council. We will electronically provide the city's project manager with all completed or partially completed reports, forecasts, maps or plans at least three (3) working days prior to each progress meeting.
- Prepare database of stakeholders – The Consulting Team will work with the Department who will gather contact information from a variety of sources. This information will be used in the key leadership/focus group interview portion of the Master Plan.
- Site Tour – The Consulting Team will conduct a site tour of all existing assets located within the Department's boundaries.

B. Existing Document Review – We will review and analyze existing studies, plans, programs and other data to be provided by the city. This includes, but is not limited to:

- 2013 Needs Assessment
- Copy of Department NRPA Gold Medal application
- Department Business Plan
- Division Business Plans/Best Practices
- Asset inventory (latest version could be a few years old)
- Bikeway Map (bike trail are not a department responsibility, however, it relates to our park system)

- Maintenance Service Levels
- Maintenance Fee Schedule
- Urban Forestry Master Plan
- Department Policies
- Joint-Use Agreements with schools
- General Fund Park Rehabilitation Plan
- Visions 2010
- Ten Year General Fund/Lighting & Landscape Districts Rehabilitation Plan

Task 2 – Community Profile

A. Demographic & Trends Analysis – We will review the City's demographics and develop a comprehensive community profile including recreational trends that may impact the types of services provided by the department over the next ten to fifteen (10-15) years. This will include the needs of specific user groups, geographical areas, recommended re-envisioning of under-utilized public spaces or amenities, program/service needs, future development considerations and open space/urban forestry protection/enhancements. We will utilize the City of Roseville's projections and supplement with census tract demographic data obtained from Environmental Systems Research Institute, Inc. (ESRI), the largest research and development organization dedicated to Geographical Information Systems (GIS) and specializing in population projections and market trends; for comparison purposes data will also obtained from the U.S. Census Bureau. This analysis will provide an understanding of the demographic environment for the following reasons:

- To understand the market areas served by the City of Roseville and distinguish customer groups.
- To determine changes occurring in the City of Roseville and the region, and assist in making proactive decisions to accommodate those shifts.
- Provide the basis for Equity Mapping and Service Area Analysis

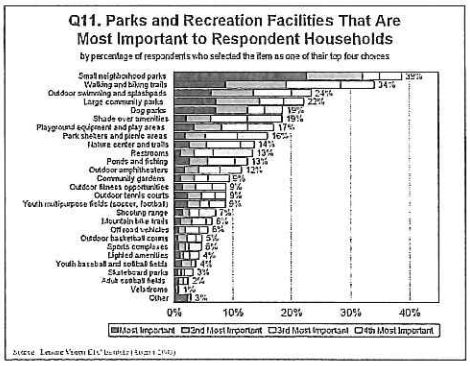
The demographic analysis will be based on US 2020 Census information, 2021 updated projections, and 5 (2026), 10 (2031), and 15 (2036) year projections. The following demographic characteristics will be included:

- Population density; Age Distribution ; Households; Gender; Ethnicity; Household Income

From the demographic base data, sports, recreation, and outdoor trends are applied to the local populace to assist in determining the potential participation base within the community. For the sports and recreation trends, the Consulting Team utilizes the Sports & Fitness Industry Association's (SFIA) 2021 Study of Sports, Fitness and Leisure Participation, ESRI local market potential, as well as participation trends from the Outdoor Foundation on outdoor recreation trends.

Task 3 – Comparisons and Benchmarking

A. Benchmark Analysis – We will complete a benchmark analysis of the City of Roseville's Parks, Recreation & Libraries Department that includes, at minimum, open spaces, urban forestry, facilities, programs, services, maintenance standards, revenue/expenses, community use and staffing levels of similar size, composition and demographics, including cities within the Sacramento region. The benchmark study will include the following metrics:



- Number of assets per population separated by asset type, open space acres per population, park acres per population, senior, youth and adult programs, maintenance levels and ADA compliance.
- Evaluation tools to be used are city standards, National Recreation & Parks Association (NRPA), American Library Association and International City/County Management Association (ICMA) guidelines.
- Identify opportunities to better address services.

Also, we will provide recommendations for minimizing duplication of effort either internally or externally (is services provided by the private sector).

Task 4 – Needs Assessment

A. SWOT Analysis - The Consulting Team will work with the staff to complete a SWOT analysis highlighting existing Strengths, Weaknesses, Opportunities and Threats faced by the Departments as it seeks to expand and grow its offerings over the next five to ten years.

B. Statistically-Valid Needs Assessment Survey – The Consulting Team will perform a random, scientifically valid community-wide household survey to quantify knowledge, need, unmet need, priorities, and support for system improvements including facility and programming needs of the Department. The Consulting Team will administer a statistically valid random sampling Needs Assessment Survey of household surveys in Roseville. The survey will be administered by a combination of a mail, online, and phone. Prior to the survey being administered, it will be reviewed and approved by staff. The survey will be mailed to all households in the Department, and ETC Institute will follow-up by e-mail and/or phone. The minimum sample size of 400 completed surveys at a 95% level of confidence will have a confidence interval of +/- 4.9%.

C. Parks and Facilities Inventory and Assessment – Roseville has evolved from a railroad town to a sleepy bedroom community to the fast-growing suburban city of over 140,000 that it is today. The city's park system has also evolved, starting with the small town parks from early days to the neighborhood and community parks created with outward growth. WRT will support the PROS team in understanding the park system today in the context of current demographic and recreation trends, and assessing how each of the city's parks is serving its community. Times have changed, and so must our parks. Drawing from our experience working with cities with similar trajectories—Fremont, Benicia, Tracy—we will be closely attuned to how typical suburban parks can be retrofitted and modernized as part of the lifecycle replacement process, so that they enliven and add value to a maturing community.

We will compile a comprehensive GIS inventory of existing parks using shape files provided by the City. This will include confirmation of the completeness of the data and comparison of the GIS recorded size to the acreage used in the LOS calculation. We will also confirm accuracy of location and review functionality, accessibility, general condition, comfort, and convenience. The analysis will note each location's major program amenities (i.e. fields, restrooms, playgrounds, picnic pavilions, basketball, aquatics, etc.), and its current general condition. Our team will provide qualitative evaluation of amenities per park report (e.g. equal balance of amenities in each park) and develop a set of prioritized recommendations for improvements needed within existing parks, open space, buildings, and other recreation facilities. The data will form the basis of materials prepared for the Park by Park workshop. We will confirm asset inventory separated by General Fund/Lighting & Landscaping District parks and parks within a Community Facilities District for Service.

An assessment form will be prepared to fit Roseville's needs. We will provide two samples for review and discussion. Based on City direction, we will prepare the final form.

A park and facility tour and working session will be performed with City staff to assess and confirm the inventory and existing conditions. The WRT team will then visit additional parks, using the assessment form and informed by the Staff-led tour (NOTE: Up to 25 Sites). In person assessment will be augmented with aerial photo review.

An aerial map and amenity inventory table will be provided for each park site. A comprehensive list of all parks and facilities citywide will be created. The City will review our draft condition assessment and provide additional information about the park and condition of facilities (i.e. irrigation system, buildings, fields, lighting systems). WRT, based on City input, will record all proposed improvements and renovations along with any identified facilities and amenities that should not be replaced. Information from this assessment will be used to inform public outreach, to update the Levels of Service standards, and influence the Capital Improvement Needs for the plan. The assessment will examine:

- Visual condition of major park amenities using good, fair, poor.
- Patterns of use and misuse will be noted as observed.
- Level of maintenance and maintainability (items in poor condition may not be maintainable)
- The surrounding open spaces and connectivity to those open spaces and to the City's parks.
- Building conditions and underground infrastructure will be noted at a high level for each site as provided by the City.

A comprehensive assessment form will be created for each park. A spreadsheet will summarize key attributes of Roseville parks and serve as the basis for the future Park by Park workshop.

D. Park/Facility Classifications and Level of Service Standards – The Consulting Team will work with the Department to review and confirm, modify or add to existing park classifications, and preferred facility standards for all park sites, trails, open space amenities including common areas and indoor and outdoor facilities. These classifications will consider size, population served, length of stay, and amenity types/services. Facility standards include level of service standards and the population served per recreational facilities and park amenities. Any new or modified classification or standard will be approved as required. These are based on regional, statewide or nationally accepted parks and recreation standards, as well as the Consulting Team's national experience and comparison with peer/survey agencies. These standards will be adapted based on the needs and expectations of the Department.

PARKS:	2015 Inventory - Developed Facilities												2015 Facility Standards			2020 Facility Standards		
Park Type	Valpo Parks	Schools	Valpo YMCA	Total Inventory	Current Service Level based upon population				Recommended Service Levels; Revised for Local Service Area				Meet Standard/ Need Exists	Additional Facilities/ Amenities Needed		Meet Standard/ Need Exists	Additional Facilities/ Amenities Needed	
Neighborhood Parks	15.50			15.50	0.48	acres per	1,000		2.00	acres per	1,000		Need Exists	49	Acre(s)	Need Exists	51	Acre(s)

Spraygrounds	1.00	-	-	1.00	1.00	site per	32,443		1.00	site per	50,000		Meets Standard	-	Site(s)	Meets Standard	-	Site(s)
Outdoor Pools	-	-	-	-	1.00	site per	#DIV/0!		1.00	site per	50,000		Need Exists	1	Site(s)	Need Exists	1	Site(s)
INDOOR AMENITIES:																		
Recreation/Gymnasium (Square Feet)	-	12,000.00	7,800.00	19,800.00	0.61	SF per	person		2.00	SF per	person		Need Exists	45,086	Square Feet	Need Exists	46,532	Square Feet

2015 Estimated Population	32,443
2020 Estimated Population	33,166

Notes:
School inventory is reduced due to public access availability for several amenities.
Central Park Plaza acres is included under Special Use acres.

E. Geographical Analysis through Mapping – To begin, a comprehensive map of existing parks, facilities, and open space areas will be created. The City will provide accurate GIS data on the existing park system. The street network, topography, land use, and other relevant data will be added to aid analysis. We will review the Parks & Recreation and Open Space & Conservation Elements of the General Plan, determine consistency with current assets and locations and identify opportunities to address gaps. Mapping will address the following areas:

- The park system in its regional context.
- City parks by type.
- Residents' walkability and access to parks in pursuit of the Trust for Public Land's (TPL's) goal of a maximum of a 10-minute walk to a park for every resident.
- Location of major and special facilities (i.e. community centers, aquatic facilities, sports complexes, dog parks).
- Distribution of key park features (e.g. playgrounds, recreation amenities).
- Multiuse trails and the existing and planned bike network.
- Planned and future parks, trails, and open spaces, and future development areas.

F. **Recreation Program and Services Analysis and Plan**– Recreation programs and services are the backbone of park, recreation, and library departments. This assessment will review how well the system aligns itself with community needs. The goal of this process is to provide program enhancements that result in successful and innovative recreation program offerings. The Consulting Team will provide insight into program trends from agencies all around the country. The process includes analysis of:

- Age segment distribution
- Lifecycle analysis
- Core program analysis and development
- Similar provider analysis/duplication of service
- Market position and marketing analysis
- User fee analysis for facilities and programs/services
- Review of program development process
- Backstage support, or service systems and agency support needed to deliver excellent service

Ultimately, the outcome of the process will be the creation of a dynamic program plan that results in increased registration, drives customer retention and loyalty, improves customer satisfaction, and increases revenues. Additionally, it will help focus Department efforts in core program areas and create excellence in those programs deemed most important by program participants. Furthermore, the recreation assessment and programming plan for youth and adult and senior populations will be completed that meets CAPRA standards as outlined below:

- Program objectives
- Program and service statistics
- Program and service determinants
- Recreation and leisure service trends
- Community programming inventory

G. **Sports Tourism Strategy** – We will work with the Department to understand how current sports facilities are meeting the local/regional demand, and whether there is a market or opportunity for expanded or new venues. From this cursory review, we will look at other service providers in the region to quantify market share, as well as growth opportunities in the City. Recommendations will be built into the final Strategic Plan by facility type and size.

H. **Prioritized Park and Facility / Program Priority Rankings**– The Consulting Team will synthesize the findings from the community input, survey results, standards, demographics and trends analysis, park and facility assessment, program assessment, and the service area mapping into a quantified park and facility / program ranking. This priority listing will be compared against gaps or surplus in facilities and amenities, as well as programs. This will list and prioritize facility, infrastructure, amenities, and program needs for the recreation system and **provide guidance** for the Capital Improvement Plan. The analysis will include probable future recreation facilities, as well as program needs based on community input, as well as state and national user figures and trends. The Team will conduct a work session with the Department to review the findings and make revisions as necessary.

I. **Capital Improvement Plan** – The Consulting Team recommends the development of a three-tier capital improvement plan that will assist the City in the inevitable and continuous rebalancing of priorities and their associated expenditures. Each tier reflects different assumptions about available resources.

- The **Critical Alternative** has plans for prioritized spending within existing budget targets and focuses on deferred maintenance and lifecycle replacement of assets and amenities within the existing parks system. The intention of this alternative is to refocus and make the most of existing resources with the primary goal being for the City to maintain high quality services.

- The **Sustainable Alternative** describes the extra services or capital improvement that should be undertaken when additional funding is available. This includes strategically enhancing and renovating existing parks and facilities to better meet the park and recreational needs of Roseville residents that would require additional operational or capital funding. In coordination with the city's financial staff, the Department would evaluate and analyze potential sources of additional revenue, including but not limited to capital bond funding, partnerships, grants, and existing or new taxes.

- The **Visionary Alternative** represents the complete set of services and facilities desired by the community. It is fiscally unconstrained but can help provide policy guidance by illustrating the ultimate goals of the parks and recreation system and by providing a long-range look to address future needs and deficiencies. In the *Master Plan*, the Visionary Alternative addresses complete renovations of aging parks and facilities and the development of new parks and facilities. Funding for visionary projects would be derived from partnerships, private investments and new tax dollars.

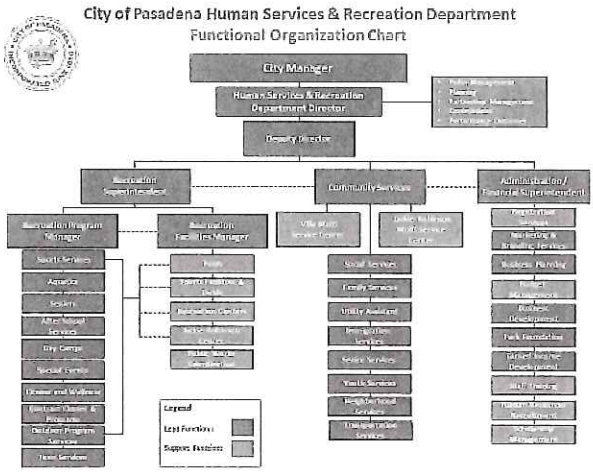
Task 5 – Financial Analysis

A. Financial Plan and User Fee Analysis – We will review the Department's current Pricing Policy and will make recommendations regarding for potential updates over the next ten to fifteen (10-15) years. We will also will perform analysis to document the financial situation of the Department. The financial analysis will look at the budget, pricing policy, user fees, current and other revenue generating opportunities, grant opportunities, and the revenue forecast. This analysis will identify the financial situation of the Department with three primary goals:

- Understand the financial dynamics to further advance the understanding of operations gained through the work described above
- Review funding and accounting practices with an objective of accurate financial fund tracking and the ability of the Department to have more useful financial information for strategic decision-making
- Seek opportunities to improve the financial sustainability of the Department including evaluating expenditures and increasing current and new sources of revenue

This review will include comparison of current policies with national standards of best practice agencies. The Consulting Team will recommend policies and adjustments to current policies where enhancements may be needed or gaps are identified, as well as potential user fees for facilities, programs, and services.

B. Funding and Revenue Strategies – Funding strategies will be developed based in part to our review and analysis of the facilities as well as the national experience brought by the Consulting Team. The Consulting Team has identified numerous funding options that can be applied to the Master Plan based on the community values. The funding strategies to be evaluated for recommendations will include at a minimum:



- Fees and charges options and recommendations
- Endowments/Non-profits opportunities for supporting operational and capital costs
- Sponsorships to support programs, events, and facilities
- Partnerships with public/public partners, public/not-for-profit partners and public/private partnerships
- Dedicated funding sources to support land acquisition and capital improvements
- Development agreements to support park acquisition, open space and park and facility development
- Earned Income options to support operational costs
- Land or facility leases to support operational and capital costs
- Identify grant opportunities and resources to construct facilities identified in the Master Plan including suggested timelines

Task 6 – Orgnizational Analysis

A. Organizational Analysis– It is understood that the Department has recently re-organized to better blend the Department, create cross-training opportunities and to provide efficient and effective services. We will work with Department leadership

to evaluate the current organizational structure and provide recommendations regarding staffing levels and the organizational structure to ensure efficiency and effectives in the delivery of services. This analysis will identify Department staffing needs, improved operational efficiencies, policy development, process improvements, system and technology improvements, and marketing/communication opportunities. This task will include recommendations in a comprehensive manner. This will include data collection, analysis and on-site observations of key organizational components in the following areas:

- Classification of services
- Administrative delivery
- Maintenance and operating standards
- Organizational design and staffing
- Customer service
- Staffing levels
- Field equipment/resources
- Service contracts
- Workload requirements
- Procedures manuals
- Existing policy and procedures management
- Performance measures and indicators
- Information systems and technology
- Marketing and communications
- Identify and expand partnerships/volunteer support for facilities and services
- Review and suggest new rules and regulations related to parks

This review will include comparison of current policies with national standards of best practice agencies. The Consulting Team will recommend policies and adjustments to current policies where enhancements may be needed or gaps are identified.

Task 7 – Public Outreach

The Consulting Team will utilize a **robust** public input process to solicit community input on how the recreation system and programs meet the needs of residents into the future. This task is an integral part of the planning process. A wide range of community/participation methods may be utilized with traditional public meetings. We will prepare a community outreach agenda to include the number and types of meetings which will be held. Working with the Department, we will develop and implement an innovative, strategic, and cost-effective public outreach program that incorporates a variety of outreach methods to attract and involve a wide-range of the community. Specific tasks include:

A. Public Engagement/Advocacy Strategy – The public engagement process will work hand-in-hand with the development of an advocacy strategy for the Master Plan. This will also need to account for the new realities in these Covid-19 times and help determine what's the best way to engage the community in person or virtually. This strategic process is a series of workshops at each milestone of the phase as shown:

- Workshop Series #1 – Overview of project and processes to achieve successful, sustainable implementation
- Workshop Series #2 – Present Key Public Needs Assessment Findings
- Workshop Series #3 – Present Key Technical findings
- Workshop Series #4 – Present Recommendations and Implementation Plan
- Workshop Series #5 – Present Final Plan for Adoption

B. Key Leadership/Focus Group Interviews – The Consulting Team will perform focus groups and key leadership interviews the community to evaluate their vision for recreation in the Roseville community. Up to eight (8) focus group meetings and key leadership interviews and other key leaders (up to 16) will be held over a two-day period. Also, during these interviews/focus groups, the Consulting Team will gain an understanding of the community values, as well as determine the priority for

recreation facilities and programming needs of the Department. The following list of potential interviewees will be used to select the final list in conjunction with the Department:

- Key city staff, including Executive Management
- City Council (1 meeting, 1 presentation)
- Parks & Recreation Commission (1 meeting, 1 presentation)
- Library Board
- Senior Commission
- Chamber of Commerce
- Placer Valley Tourism
- Public Safety
- Alternative Transportation
- Area School Districts
- Community-at-large
- Roseville Coalition of Neighborhood Association
- Other groups as may be identified in future discussions

C. **Public Forums/Workshops** – Public forums will serve to present information and gather feedback from citizens at large. It is important to have initial meetings early in the process and follow-up meetings during the final plan development process. It will be important to get maximum media exposure to inform citizens of the purpose and importance of the meetings and clearly note time and locations. We propose to conduct a total of two (2) public forums: one (1) initial public forum at the project midpoint to introduce the project and project goals, preliminary findings, gain input for the community's vision and core values for the recreation system, and one (1) as a final briefing and input opportunity on the draft plan. These meetings would be informal in nature offering the public an opportunity to participate in the planning process and to provide feedback on the proposed options. The purpose for these meetings will be to ensure opportunities for the general public to discuss their priorities and perceptions surrounding the recreation system.

D. **Needs Assessment Electronic Survey** – Also, the Consulting Team will create an online survey administered through www.surveymonkey.com that is open to anyone in the Roseville community. This survey will be promoted through the Department's website and promotional mediums to maximize outreach and response rates. These surveys would provide quantitative data (e.g., not statistically-valid) and guidance in addition to the stakeholder and focus groups in regards to the recommendations for park amenities, specific programs, facility components, usage, and pricing strategies.

E. **Crowd-Sourcing Project Website** – The Consulting Team will develop a customized project website that will provide on-going project updates and will serve as the avenue to crowd-source information throughout the project for the entire community. This could be combined with input through Social Media and could also host videos through a dedicated YouTube Channel and utilize the Town's website. (E.g. www.durangoparksplan.com or www.planindyparks.com.) It has proven to be a very effective tool in engaging the community on an on-going basis as well as maximize outreach to an audience that may not traditionally show up at public meetings or choose to respond to a phone or mail survey.

Task 8 – Implementation Plan & Master Plan Development

The Master Plan will be framed and prepared through a series of workshops with the Department. The overall vision and mission statements will be affirmed or modified, and direction for the Department will be established along with individual action strategies that were identified from all the research work completed. Specific tasks include:

A. **Develop Vision, Mission and Goals/Objectives** – The supporting vision and mission statements will be affirmed or developed with senior staff in a work session. Following this effort, goals/objectives and policies will be established and prioritized. A status briefing will be presented to gain input and consensus on direction.

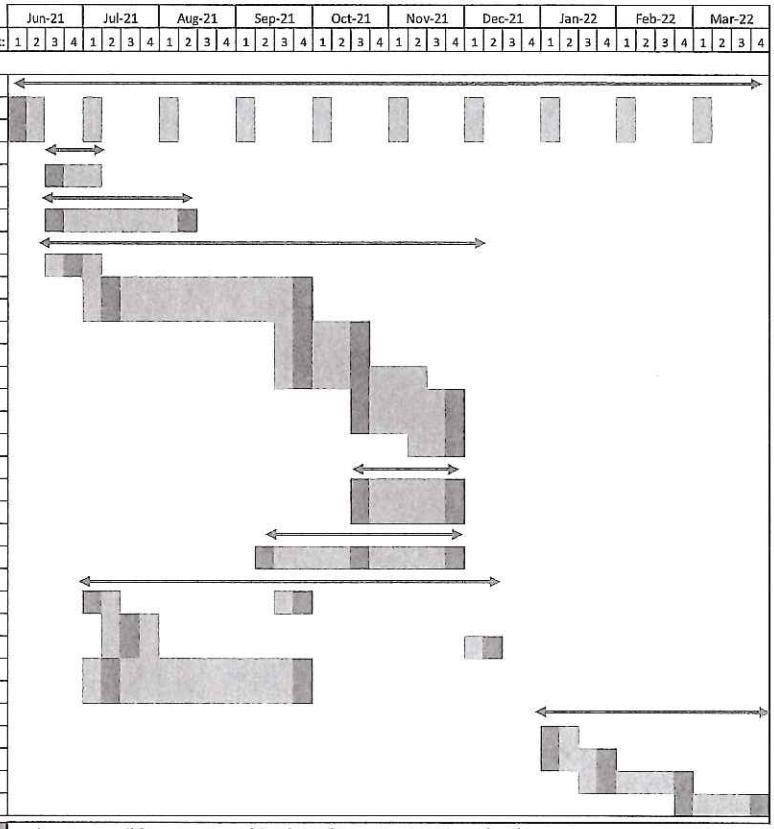
B. **Strategic Action Plan** - Upon consensus of all technical work, the remaining action plan will be completed with supporting strategies, actions, responsibilities, and priorities/timelines. These strategies will be classified as short-term, mid-term or long-term strategies and priorities. This will be reviewed with the Department in a half-day workshop. The Consulting Team will propose a prioritization schedule and methodology used on successful master plans across the United States from their work. Action plans will be established in the following key areas:

- **Park Development and Improvements** – Recommendations that provide for short and long-term enhancement of park development, improvements, and land acquisition in the City.
- **Park and Facility Operational Management** – Recommendations that provide for short and long-term enhancement of park and facility operational management practices of the Department.
- **Programs and Services** – Recommendations that provide for short and long-term development of programs and services provided by the Department, including opportunities to improve meeting user needs.
- **Library Services** – Recommendations that provide for short and long-term enhancement of library operational management practices of the Department.
- **Financial and Budgetary Capacity Development** – Recommendations that provide for short and long-term enhancement of the financial and budgetary capacity of the Department related to facilities and lands.
- **Policies and Practices** – Specific policies and practices for the Department that will support the desired outcomes of this Master Plan will be detailed.

C. **Draft Report Preparation and Briefings**– The Consulting Team will prepare a draft Master Plan with strategies taking into account all analyses performed and. One electronic copy for public information. A presentation of the draft report will be completed to the City Council.

D. **Final Master Plan Presentations, Preparation, and Production** – Upon comment by City Council, as well as the community, the Consulting Team will revise the Draft Master Plan to reflect all input received. Once the draft Master Plan is approved by the City Council, the Consulting Team will prepare a final summary report and present to the Department for final approval and adoption. The final plan will be prepared with a Summary Report delivered along with associated appendices (technical reports).

Deliverables: Deliverables will be the following:



- A strategic ten to fifteen (10-15) year master plan that includes all of the above and:
- A strategic action plan with clear and measurable goals/objectives.
- A summary of existing conditions, asset inventories, staffing levels and level of service standards/analysis, including maintenance and operations.
- Specific and prioritized recommendations to enhance current and future programs, facilities, parks and public spaces to ensure the quality of life in Roseville.
- Identification of amenities that will either fill community gaps/needs or will contribute toward Roseville's economic vitality.
- Identification of recreational trends that will address identified gaps and needs now and into the future.
    - Identify core programs and services currently being offered and provide recommendations for the future based on identified gaps and needs.
- Recommendations for organizational efficiency and effectiveness related to staffing, structure, policies, best practices, expenses/revenues, and administration.
- Identification of new funding and revenue strategies. This should include recommendations to update the current Pricing Policy, if any.
- A ten to fifteen (10-15) year rehabilitation plan for parks and public spaces located within existing Community Facilities Districts for Service.

- A ten year plan for General Funded parks has been developed previously. This plan should be folded into this project and expanded to include new General Funded parks recently completed and extended to the ten to fifteen (10-15) year strategic plan timeframe.
- Charts, graphics or mapping that assists in clearly communicating findings and recommendations.
- A recreation assessment and programming plan for youth and adult and senior populations that meets CAPRA standards.
    - Program objectives
    - Program and service statistics
    - Program and service determinants
    - Recreation and leisure trends analysis
    - Community programming inventory
- A sports tourism plan based on review of City sports facilities (existing and proposed).

Tab E – Project Plan

PROS can begin the project immediately and has the capability and availability to meet the project timeline described below. Specific dates will be set during the kick-off meeting process and the PROS Team will consider any special requirements by the City in regards to scheduling. Each task / sub task lists the firm responsible for each deliverable.

Firm Responsible	Roseville Parks, Recreation & Libraries Strategic Master Plan
	Task 1 - Project Management, Progress Reporting & Existing Document Review
PROS, WRT, ETC, JKSA	A. Kick-off Meeting, Data Collection & Project Management
PROS, WRT, ETC, JKSA	B. Existing Document Review
	Task 2 - Community Profile
PROS, WRT	A. Demographic & Trends Analysis
	Task 3 - Comparisons and Benchmarking
PROS, JKSA	A. Comparative and Benchmark Analysis
	Task 4 - Needs Assessment
PROS, JKSA	A. SWOT Analysis
PROS, ETC	B. Statistically-Valid Needs Assessment Survey
WRT	C. Parks and Facilities Inventory and Assessment
PROS, WRT	D. Park/Facility Classifications and Level of Service Standards
WRT	E. Geographical Analysis through Mapping
PROS	F. Recreation Program and Services Analysis and Plan
PROS	G. Sports Tourism Strategy
PROS, WRT, JKSA	H. Prioritized Park and Facility/Program Priority Rankings
PROS, WRT	I. Capital Improvement Plan
	Task 5 - Financial Analysis
PROS	A. Financial Plan and User Fee Analysis
PROS	B. Funding and Revenue Strategies
	Task 6 - Organizational Analysis
PROS, JKSA	A. Organizational Analysis
	Task 7 - Public Outreach
PROS	A. Public Engagement/Advocacy Strategy
PROS, WRT, JKSA	B. Key Leadership/Focus Group Interviews
PROS, WRT, JKSA	C. Public Forums/Workshops
PROS	D. Needs Assessment Electronic Survey
PROS	E. Crowd-Sourcing Project Website
	Task 8 - Implementation Plan & Master Plan Development
PROS, WRT, JKSA	A. Develop Vision, Mission and Goals/Objectives
PROS, WRT, JKSA	B. Strategic Action Plan
PROS, WRT, JKSA	C. Draft Report Preparation and Briefings
PROS	D. Final Master Plan Preparation and Production

Key Meeting Dates
Length of Task
Task Technical Work

Firm Responsible: PROS Consulting (PROS), WRT, ETC Institute (ETC), Jennifer K. Sweeney & Associates (JKSA)

Tab F – Cost Proposal and Hourly Rates

The following fee breakdown is based on the project approach. We would appreciate the opportunity to meet and discuss the project approach and fees to ensure they are consistent with your expectations, as we are flexible in meeting your needs. This fee is a not-to-exceed amount and includes all costs, both direct and indirect, including any reimbursable expenses.

Hourly Rates:

Leon Younger, PROS Consulting President - $185
Michael Svetz, PROS Consulting Principal - $165
Philip Parnin, PROS Consulting Associate Principal - $145
John Gibbs, WRT Principal - $257
Jennifer K. Sweeney, Principal - $175
Neelay Bhatt, PROS Consulting Principal - $165
Mike Shellito, PROS Consulting Strategic Consultant - $150
Jason Morado, ETC Director of Research - $150
Peter Winch, WRT Senior Planner - $152

Cost Proposal

Review		
A. Kick-off Meeting, Data Collection & Project Management	$	11,561
B. Existing Document Review	$	3,756
Expenses	**$**	**2,000**
Subtotal Dollars	**$**	**17,317**
Task 2 - Community Profile		
A. Demographic & Trends Analysis	$	3,424
Expenses	**$**	**-**
Subtotal Dollars	**$**	**3,424**
Task 3 - Comparisons and Benchmarking		
A. Comparative and Benchmark Analysis	$	5,000
Expenses	**$**	-
Subtotal Dollars	**$**	**5,000**
Task 4 - Needs Assessment		
A. SWOT Analysis	$	4,200
B. Statistically-Valid Needs Assessment Survey	$	15,100
C. Parks and Facilities Inventory and Assessment	$	26,960
D. Park/Facility Classifications and Level of Service Standards	$	4,120

COUNCIL COMMUNICATION

CC #: 1537
File #: 0704

Title: Parks Design & Construction Standards - 2021 Update
Contact: Joel De Jong 916-774-5924 jdejong@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.11.

RECOMMENDATION TO COUNCIL

Staff recommends Council adopt a resolution approving the revisions of the Parks Design & Construction Standards for release starting July 1, 2021.

BACKGROUND

The Parks Design & Construction Standards is a guiding document that outlines design and construction standards applied to parks (neighborhood and citywide), and streetscapes. This document is updated every two years in order to ensure new codes, regulations and requirements are updated or added, address typographical errors, provide clarity in areas that may cause multiple interpretations or misinterpretations, and to ensure the latest technology in irrigation, lighting and other systems.

The revisions included in the July 2021 update include:
1. Correction of typographical errors and minor clarifications;
2. Clarifications to the establishment and close-out processes;
3. Updated site furnishings with new model numbers and updated supplier/manufacturer specifications on current products;
4. Updated lighting with updated supplier/manufacturer specifications on current products;
5. Updated irrigation, including new flow sensor and master valve models, pipe fittings, control wire connections and updated supplier/manufacturer specifications on current products;
6. Updated recommended tree list; and
7. Revised standard Parks Details to reflect updated standards, as needed, and update signature blocks to current Parks, Recreation and Libraries Director, Jill Geller.

Feedback from contractors and staff is collected over each two-year period which provides the basis for updates/revisions.

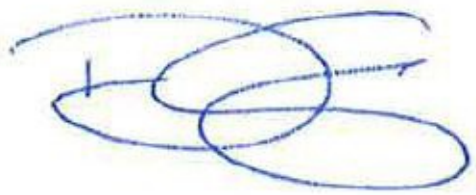
FISCAL IMPACT

The changes described above will have no fiscal impact to projects and could potentially reduce

costs by identifying equipment and materials that are less labor intensive to install and maintain. There is no general fund impact.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) only applies to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3)).



CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal A - Remain fiscally responsible in a changing world
Goal C - Maintain a safe and healthy community
Goal F - Invest in well-planned infrastructure and growth

Respectfully Submitted,

Joel De Jong, Park Development Project Manager

Jill Geller, Parks, Recreation & Libraries Director

_____
Dominick Casey, City Manager

Resolution 21-269

2021 Parks Design & Construction Standards

RESOLUTION NO. 21-269

ADOPTING THE 2021 PARKS DESIGN & CONSTRUCTION STANDARDS

WHEREAS, in 1998, Council adopted the Parks Construction Standards to provide consistency in the construction of City parks; and

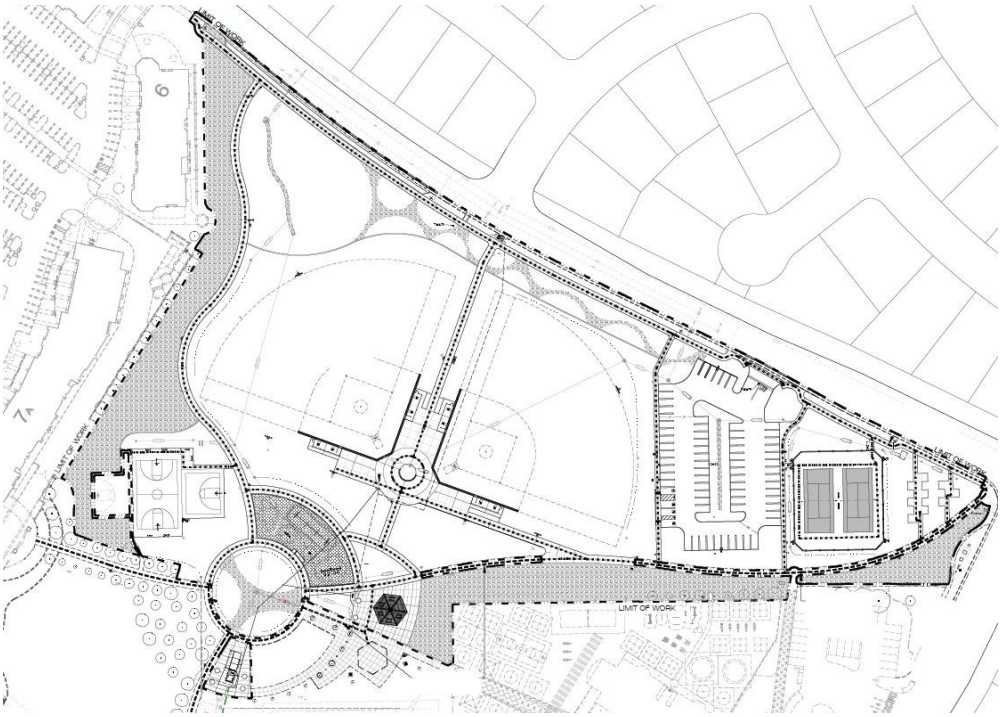
WHEREAS, these standards are updated every two years to ensure that the requirements remain up-to-date and applicable to the current construction environment; and

WHEREAS, the City Council has reviewed the proposed revisions of the Parks Design & Construction Standards, a copy of which is on file with the City Clerk,

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Roseville that the 2021 Parks Design & Construction Standards, effective July 1, 2021, is hereby adopted.

PASSED AND ADOPTED by the Council of the City of Roseville this____day of _____, 20_, by the following vote on roll call:

AYES COUNCILMEMBERS:



NOES COUNCILMEMBERS:

ABSENT COUNCILMEMBERS:

City Clerk

Parks Design & Construction Standards

July 2021 Edition

REDLINE COPY
FOR COUNCIL APPROVAL ONLY

In order to ensure the most up-to-date version, hard copies of the Buildings & Grounds Section is provided as a supplemental. In all cases, the Buildings & Grounds Section is considered a part of these Parks Construction Standards.

316 Vernon Street, Suite 400
Roseville, California 95678
www.roseville.ca.us

CITY OF ROSEVILLE CALIFORNIA

CITY OF ROSEVILLE CALIFORNIA

PREFACE

The purpose of these construction standards is to set a minimum standard to be applied to the design and construction of park and streetscape projects within the City of Roseville. These standards are intended to apply to City-generated projects as well as Developer-generated ("Turn-Key") projects. To maintain a standard level of consistency, these requirements shall be applied by all Consultants, Developers, and Contractors.

Standard Construction Practice methodology has been applied to the creation of these standards. It is difficult to anticipate all situations, which may require the use of these standards, therefore, modifications, on a case-by-case basis, may be necessary. Proposed changes shall be reviewed by the Parks, Recreation & Libraries department prior to any modifications. These standards are not intended to replace federal, state, or local codes.

This document is organized into six sections:

- The first section discusses design guidelines and expectations.
- The second section outlines construction document preparation, Developer responsibilities for "Turn-Key" projects and inspection requirements.
- The third section references the City of Roseville's General Conditions for Buildings and Grounds. (See supplemental)
- The fourth section includes the Park's standard for technical specifications, section numbers, and formatting. These specification sections make up the "backbone" of the specification package. Additional information and specifications sections will and should be added by the Consultant to ensure that all project parameters are included in the final package. The City of Roseville Department of Public Works Design and Construction Standards is referenced as it applies to the type of work required to be performed.
- The fifth section contains the standard forms that would apply to each construction project.
- Lastly, the sixth section contains the standard details typically used in a park project. These details are those that can and should be standardized. Additional details specific to the project are to be prepared by the Consultant and included in the contract documents.

The next update to these standards will be in July 2023.

Roseville Parks, Recreation & Libraries Values

Parks, Recreation & Libraries Mission
To enhance lives and the community by providing exceptional experiences.

Parks, Recreation & Libraries Vision
To be the leader in creating a healthy community through progressive, sustainable & memorable experiences.

Parks, Recreation & Libraries Values
- Fun & Celebration
- Innovation
- Learning
- Creativity
- Health & Wellness
- Community
- People
- Stewardship
- Safety
- Inclusion
- Diversity
- Collaboration

Values in Our Partners (Consultants, Contractors, Developers, Others)
- Responsiveness
- Creative and Innovative
- Team Work
- Fiscally Responsible
- Timeliness
- Human Design Bias
- Place-making orientation
- Learners-Teachers
- High Tech-High Touch
- Honesty and Ethics

The focus in all projects should be creating areas for social interaction for people oriented experiences/outcomes. Each space should offer, at minimum, an opportunity to learn and grow, interact and be social through a variety of positive active/programmed and passive/self-directed activities, which are aesthetically pleasing and are safe, clean and green.

The next update to these standards will be in July ~~2021~~ 2023.

CITY OF ROSEVILLE CALIFORNIA

Design Guidelines and Preferred Materials Checklist

These guidelines do not replace adopted Specific Plan Design Guidelines for landscape medians and street frontages. These Specific Plan Design Guidelines also contain conceptual guidance for improved park amenities. For all master plans, the proposed design shall include elements outlined in the adopted Specific Plan to the extent possible.

Grading

- Do not grade turfed slopes greater than 4:1 (25%) as it cannot be easily mowed. If possible, provide a 60" minimum flat bench at top of slope.
- Crown playing fields such as baseball, softball, and soccer, at a minimum of 1.5%, preferably 2%.
- Consider spectator areas when grading the play field sidelines. Provide adequate level areas for spectator seating.
- Provide for a not-to-exceed 2% cross slope on walkways consistent with ADA regulations~~,~~. ~~unless it can be demonstrated that compliance of the 2% cross slope negatively impacts the usability of the park.~~ Less than 2% is preferable to allow for construction tolerances.
- Longitudinal slopes on walks may vary when necessary given the site-specific terrain. Do not exceed 20:1 (5%) without providing handrails per the ADA regulations and the California Title 24 Building Code.
- Ensure compliance with Americans with Disabilities Act of 1990 (ADA), California Title 24 Building Code (Title 24) and minimize the need for handrails whenever possible.
- Hard court surfaces shall be graded at 1%.
- Obtain the current standard notes for grading from the ~~Public Works~~Development Services Engineering Division. These can be found online.
- Comply with the City of Roseville Oak Tree Ordinance.
- Slopes greater than 3:1 are not permitted. If unavoidable circumstances arise during construction, a solution for future erosion of bark and soils must be provided for all slopes greater than 3:1. A drainage plan showing a constructed drainage solution must be provided. An example is to place drain inlets at point discharges and a swale two feet from back of walk. Approval of the proposed drainage solution must be obtained from the Parks, ~~and~~ Recreation & Libraries Department prior to installation.

Drainage

- Confirm and indicate depth of storm drain stub.
- Locate all clean-outs **OUTSIDE** of the play area, within planting or turf.
- Provide a combination system using a main drain inlet and a perforated pipe (in a drain rock filled trench) drainage system to capture long runs or isolated areas within the play area. Slope subgrade to drain inlets.
- Do not locate drains within or immediately adjacent to a play field.
- Do not use drop inlets smaller than sixteen inches (16") square or diameter for landscape areas and twenty-four inches (24") minimum for all other areas. Drop inlets shall be concrete.
- Refer to Parks Standard Construction Details and Public Works Design and Construction Standards. Ensure the plan reference is to the most recent edition.
- For swales in planted or turf areas, ensure a minimum slope of 2%. Avoid swales in turf whenever possible.

The next update to these standards will be in July ~~2021~~2023.

- Do not sheet drain from planted or landscape areas across hardscape.
- Provide area drains ~~at tree wells~~in planter areas enclosed by concrete to prevent flooding.
- Manholes shall be ~~be 48" square (minimum) and~~ per the ~~Public Works~~Development Services Design and Construction Standards.
- For storm drain stubs to future phases of work, cap or install a riser above the silt line.
- Do not place drains within the Oak tree canopy.

Chain Link Fencing

- Where fencing is related to a specific facility, i.e. tennis courts, etc., install black vinyl coated fabric, posts and fittings, whenever budget allows.

Site Furniture

- Do not specify wood furniture.
- Use only in-ground mounted site furniture, except drinking fountains
- All site features, including planter and sound walls shall be sealed with two coats of anti-graffiti sealant in compliance with the ~~Public Works~~Development Services Design and Construction Standards. Site furniture, i.e. benches, picnic tables, etc. shall be coated with anti-graffiti finishes.
- Planters, seat walls and retaining walls shall be designed to prevent skateboarding. This shall be an integral part of the overall design. Third party "add-ons" shall be prohibited.
- Colors "to be selected by the City". Select furniture that provides compatible colors with the play components.
- Provide a two-foot (2') clearance between hardscape edges and site furnishings, or as otherwise required by ADA regulations.
- Provide a minimum four-foot (4') clearance between picnic tables or other obstructions on a minimum of one side for each table, or as otherwise required by ADA regulations.

The next update to these standards will be in July ~~2021~~2023.

Preferred Materials List

(While materials and equipment are listed as preferred, it shall be understood to include "or accepted equal" as stipulated in the standard specifications.)

Description	Model #	Manufacturer	Distributor	Comments
Backstops (Permanent)				Shall be per PK-45 or PK-46 and PK-50
Backstops (Portable)	1204-12	Patterson Williams	Miracle Play Group (916) 317-0545	or accepted equal.
Ball Field Mix	60/40 red lava and clay loam		~~Valley~~ Cascade Rock (916) 383-1300~~916-652-7209~~	or accepted equal.
Barbecue Pits	#200-X	Iron Mountain Forge	All About Play (800) 788-8855	Heavy duty, black or accepted equal.
Basketball Courts				Concrete with fiber mesh, except with prior approval.
Basketball Goals	1513-26-44 #29 backboard perimeter	Patterson Williams	Miracle Play Group (916) 317-0545	6' offset, dual post, #44 ~~net and~~ goal with #35 net, #26 ¼" rectangular heavy-duty solid steel, powder-coated backboard with #29 perimeter, lifetime warrantee. ~~Dual post~~
		Tomark Sports	(800) 959-1844	
	TF7174 (rim) PP10172 (net) TFS172 (backboard) TF7175 (stand)	Wausau Tile	(800) 231-4836	6' offset, heavy-duty chain net, aluminum rectangular powder-coated backboard. Single pre-cast concrete post.
				or accepted equal.
Benches	'SG' Series Signature Series	Wabash Valley	Miracle Play Group (916) 317-0545	Expanded metal, perforated pattern, PVC coated, in-ground mount or accepted equal.
Bike Racks	WBR-700	L.A. Steelcraft Products	Ross Recreation (916) 985-6349	7' loop (ribbon-style), 2-3/8" O.D Powder coated
	709	Miracle	Dale Green & Associates (916) 672-0112	Loop style, powder coated or accepted equal.

The next update to these standards will be in July ~~2021~~2023.

Bollard				shall be per detail PK-39.
Chain Link Fencing	Standard 9 gauge fabric	Per Standard detail PK-40		At play courts, all parts (i.e. posts, fabric, fittings) black vinyl coated, unless otherwise accepted.

Preferred Materials List

(While materials and equipment are listed as preferred, it shall be understood to include "or accepted equal" as stipulated in the standard specifications.)

Description	Model #	Manufacturer	Distributor	Comments
Booster Pump		~~Custom Pump~~V-Power		Sizes required by irrigation system or accepted equal.
Water Feature Controller		Water Odyssey		Sizes required by water play features or accepted equal.
Drinking Fountains	10145~~440~~ SM	Most Dependable Fountains	(800) 821-9838	Dual bowl with ~~jug~~ bottle filler & stainless steel carrier surface option and black powder coated finish. ~~Jug fillers to be added only at field complexes with 2 or more fields~~ Include recessed hose bib with locking cover. All drinking fountains to connect to sanitary sewer lines where feasible
Light Pole	RT34-~~14~~ 16 DE BLK TXT 30-30	Whatley		~~14'~~ 16' nominal mounting height, round tapered, direct burial pole. Finish: Black ~~(This item is available at Central Stores.)~~
Lights (Security/ Pathway)				Whenever possible, match existing streetlights and use an LED fixture
Lights (Parking lot)		Verify fixture style with Project Manager		150 W HPS. 20' straight steel pole. Finish: Black
Park	City	Quick Crete	(916) 447-8644	Concrete

The next update to these standards will be in July ~~2021~~2023.

Identification Sign	Standard PK-28	Products Norco, CA		
		Outdoor Creations Inc.	(530) 365-6106	
Park Namesake Bio Sign		KVO Industries, Inc.	(707) 573-6868	Information provided by City.
Playground Rules Sign	~~City Standard PK—24~~	Gopher Sign Company	(651) 698-5095	Or accepted equal

Preferred Materials List

(While materials and equipment are listed as preferred, it shall be understood to include "or accepted equal" as stipulated in the standard specifications.)

Description	Model #	Manufacturer	Distributor	Comments
Picnic Tables	'SG' series	Wabash Valley	Miracle Play Group (916) 317-0545	Expanded metal, perforated pattern, PVC-coated, in-ground mount. Select 6' long tables with double legs and cross braces. Specified tables shall not have umbrella holes.
Garbage Cans	Urbanscape "FG Style"	Wabash Valley	Miracle Play Group (916) 317-0545	Specify solid dome top, 32 gallon size with receptacle, surface mounted
Tennis Court Posts/Net	2205	Patterson Williams	Miracle Play Group (916) 317-0545	3" sq. posts, black vinyl coated, removable brass tension handle. Heavy duty net or accepted equal.
Volleyball Posts	2219-20	Patterson Williams	Miracle Play Group (916) 317-0545	4" O.D. posts, 11'-6" long w/fixed eyelets, self-securing rope clamp, 4" stainless steel cable option or accepted equal.
Volleyball Net	PBN4		Volleyballusa.com	
Volleyball Sand	~~Mortar Sand~~#1 White Masonry Sand	Hasties Capitol Sand & Gravel	(916) 989-4600	
Softball Bases	10355	Enduro	Tomark Sports	1/field

The next update to these standards will be in July ~~2021~~2023.

and Pitching Rubber		Bury-In Home Plate	(800) 959-1844	
	10390	Step-Down Pitching Rubber		2/field
	10053 and 10050	Saf-T-Slider Base with Double First Base		1 set/field
	10225	Anchor Ground Stakes		8 total/field

Play Areas

- Provide a minimum of three inches (3") between the finish surface of engineered wood fiber or sand and the top of curb/wall/or other. Ensure the 3" is at compaction/settling.
- Include as a part of the design "Age Appropriate" stickers visibly displayed on the equipment indicating the age range of the user in which the designed play structure is intended.
- Include as a part of the design the location of a "Playground Rules" sign indicating expectations for playground behavior and supervision. See standard details for sign design.
- Provide for an accessible path of travel to every major play component (the transfer deck of an active play structure and one belt swing), i.e. poured-in-place rubber surfacing per ASTM requirements. The path of travel must be constructed on non-friable materials.
- Orient the transfer deck to relate directly to the play area entry. Provide an access ramp in compliance with the latest ADA regulations, Consumer Product Safety
  - Commission (CPSC) Guidelines, and American Standards, Testing and Materials (ASTM). Comply with all applicable laws.
- Separate the swing area from the active play area to avoid conflicts in play circulation. Separation should be physical.
- Provide an eight foot (8') distance use zone between the play component and the play area containment edge.
- Do not overlap use zones, unless accepted in applicable regulations/codes. Use zones shall remain in compliance with accepted standards and requirements.
- Do not include "Super Scoops" or similar type sand scoop play components.
- Do not include rubber tile in the play design.
- Site play area for safe play and easy viewing from the street or parking lot.
- Sand for play areas shall be mortar sand as produced by Hasties Sand & Gravel, Roseville, California or equal.
- Colors of the play components "to be selected by the City".

Irrigation

- Confirm and indicate depth of water stubs.
- Recycled Water Systems: See City Environmental Utilities Department (EU).
- **Irrigation Pressure Calculations and Watering Schedules**
  - Pressure loss calculations must consider utilizing a minimum of two and up to 4 valves concurrently equaling the largest system demand.

The next update to these standards will be in July ~~2021~~2023.

- Pressure loss calculations must consider the longest run and the largest demand based on gallons per minute.
- Pressure loss calculations shall consider static water pressure at build-out.
- Watering schedules should consider a finite watering of nine hours per day. The maintenance watering schedule should ensure that the entire system associated with each controller shall meet the nine hour window per day. Watering various areas within a system for seven days a week does not meet the nine hour per watering day criteria.
- The goal of the irrigation system is to provide maximum flexibility to the system in cases where pressure losses are greater than originally estimated, new valves must be added to the system or other long term needs to ensure a healthy, thriving landscaped/turf area.

- Contact EU for selected/accepted backflow prevention device and/or refer to the Development Services Design and Construction Standards.
- Comply to extent reasonable with the City's water conservation ordinance.
- Meter
  - The meter shall be a part of the construction contract. Meters must be purchased through the City (EU).
  - The water connection (if not previously provided) shall be provided by EU. Fees for such connection shall be waived. The actual water tap shall be performed by the City (EU). Costs for installation shall be part of the contract.
- Backflow Preventers (BFP)
  - The BFP can be installed by the contractor OR by the City. All costs of installation (no matter method) is the responsibility of the contractor.
  - Size BFP the same size as the meter.
  - Type shall be accepted by EU.
  - Provide a lockable and removable insulation cover.
- Master Valve
  - For systems with one master valve, use a normally open master valve.
  - For systems with two master valves, the smaller master valve shall be normally open and the larger master valve shall be normally closed. However, bypass manifold assemblies can and should be avoided by using the FLOMEC flow sensor when needed.
  - Install master valve in valve box below grade.
- Flow Meters
  - Install flow meter that can capture maximum flow and minimum flow for the system. ~~If needed, install two flow meters – one flow meter to capture minimum flow and one meter to capture maximum flow.~~
  - Refer to Calsense design guidelines for proper sizing. Use Calsense "Recommend Range".
- Controller
  - Install one antenna for every controller.
  - Controllers for irrigation shall be Calsense and wired one (1) valve per output. Communications shall be via radio.
- Piping
  - Locate mainline as close to hardscape edges as possible.

The next update to these standards will be in July ~~2021~~2023.

- Do not pipe full and part or quarter turf rotor heads on the same valve unless MPR nozzles are specified.
- Sleeve all wiring and waterlines under paving and supply a spare sleeve, same size as largest, capped at both ends under roadways. Mark sleeves with ball markers.
- Pipe sprinkler heads following grade contours.

- Automatic Control Valves
  - The total number of turf heads per valve and GPM flow rate shall not exceed 75% maximum flow rate of the backflow as measured on the downstream side of the backflow.
  - All valves shall be Rainbird with ball valves on the inlet side or approved equal.
  - Zones (Valves) GPM should be matched so that when (the maximum number of) combined (largest valves) in a single program line they will operate close to or equal to the POC (mainline size) assigned maximum GPM. Combine 2 or more turf valves not to exceed MAX POC.
  - Reclaimed Valves to be PEB – no scrubber valves.
  - Water Window: 9 p.m. to 6 a.m. for reclaimed water. (9 hours)
  - Water Window: 9 p.m. to 6 a.m. for potable water. (9 hours)
  - Water Window: Sports Complex with Lights 11 p.m. to 6 a.m. (7 hours)
  - When using turf block or cells, design irrigation within these areas to be separate from adjacent areas for ease of operations.
- Sprinkler Heads
  - When recycled water is used, avoid direct spray onto picnic tables & drinking fountains.
  - Discuss head layout concepts with Project Manager prior to design. Multi-head (rotor) layouts in turf for long turf growth are discouraged.
  - Heads shall be spaced to achieve maximum Distribution Uniformity (DU) and designed to the middle nozzle or middle of nozzle range to allow for maximum adjustability.
  - For turf areas wider than 20 feet:
    - use Rainbird, 8000 or 5500 series
    - use stainless steel riser
    - use risers 5” or taller.
    - use pressure regulators in heads
  - For turf areas less than 20 feet wide:
    - use Rainbird R-VAN nozzles
    - use Rainbird 1800 P45 or Hunter PROS-PRS40 series body
    - use 6” pop-up height
    - use pressure regulators in heads
    - use built-in check valve where needed to prevent low head drainage.
- Spray heads and bubblers for planted areas:
  - In areas where width is 8' or greater:
    - use Rainbird R-VAN nozzles
    - use Rainbird 1800 P45 or Hunter PROS-PRS40 series body
    - use reclaimed body cap when needed (-R)
    - use matched precipitation rates

The next update to these standards will be in July ~~2021~~2023.

- use pressure regulators in heads
- use built-in check valve where needed to prevent low head drainage.
- use 12” minimum offset from hardscape where prevention of overspray and run-off is required.
- Do not use head spacing greater than 20’ in planted areas.

- In areas where width is < 8’:
  - use Rainbird R-VAN Side Strip Nozzles for linear applications or flood bubblers, stream bubblers, or other micro-emission devices
  - use Rainbird 1800 PRS series body
  - use check valve (SAM) when slopes are greater than 3%
  - use reclaimed body cap when needed
  - use pressure regulators in heads
  - use of drip may be considered on narrow, sloped planters where no other technology is feasible, and will be reviewed on a case-by-case basis.
- Design systems with deep water bubblers to trees in turf or planters for 24: boxed specimen or larger.
- Design irrigation zones large enough to see flow on controller independently. ~~This may require a by-pass manifold with two flow sensors.~~

- ~~Provide~~ Provide quick couplers at ~~100’~~ 300’ on center and at all end-of-line locations. ~~and at drinking fountain and picnic area locations.~~

- Sewer
  - Indicate sewer stub, depth of stub and proposed pipe routing.
  - For drinking fountain drain lines in small parks with no planned or future restrooms, SDR35 pipe may be used. All other applications require VCP sewer pipe.
  - If phased, indicate future manholes.
- Other
  - Comply with the City and State Water Conservation Ordinance.
  - Provide a complete water table outlining water needs per valve by month for a twelve-month period. The water table shall be included in the project manual as a part of the specifications (appendix) or on the plans.
  - Provide a complete watering schedule per valve. The watering schedule shall be included in the project manual as a part of the specifications (appendix) or on the plans with expected precipitation rates per valve. The schedule shall list the area (in sq ft) that is irrigated by that valve.
  - All Consultants shall utilize the attached irrigation legend shown in Section 1B for standardization of symbols for commonly used equipment.
  - Install a manual bypass for all quick coupler valves.
  - Do not irrigate within the tree canopy of existing Oak.
  - Points of connection, valves, gate valves, meters, and backflows shall be line size unless specifically approved by the Parks Department.
  - All swing joint components shall be the same size as the inlet of the sprinkler head to be connected.
  - Install a mow band to separate City maintained landscape areas from private maintained landscape areas for streetscapes.

Formatted: Bulleted + Level: 1 + Aligned at: 0.25" + Indent at: 0.5"

Formatted: Justified

The next update to these standards will be in July ~~2021~~2023.

- Install a mow band to separate irrigation systems that use potable water from irrigation systems that use recycled water for streetscapes.
- Install a mow band to delineate the end of a recycled mainline and the start of a different recycled mainline for streetscapes.
- Recycled water signs shall be at park entrances only.
- No planter area shall be less than 4' wide at its minimum width.

- Baseball/softball infield irrigation: (See PK-51 and PK-52)
  - Install a minimum of five (5) rotors on all infields; refer to PK-51 and PK-52. Use Rainbird 8000 heads. Set heads a minimum of four inches (4") and a maximum of six inches (6") into the turf from the infield edge.
  - Set infield rotors a minimum of four inches (4") and a maximum of six inches (6") away from backboards or hardscape.
  - Install a brass manual irrigation valve to turn on the infield line after the control valve.

Landscape Standards

- It should be noted that each specific plan area was carefully planned to create a unique aesthetic using plant material as a key component to achieve the aesthetic goals of the area. Selected plant material should consider the original goals outlined in the design guidelines specific to each plan area.
- Overall Landscape Concepts must:
  - Meet Water Efficient Landscape Ordinance (WELO) goals for water conservation,
  - Ensure diversity in trees, shrubs and groundcovers.
  - Include a mix of seasonal color/flowers (no annuals);
  - Consider location for height of plants at maturity
  - Against buildings/walls: taller plants against wall with layers of descending heights toward the front of planter with groundcover or sub shrubs in front 6" or lower at maturity;
  - In the open (planters with sidewalks on both sides, pathway one side/turf on other, streetscape medians, etc.): taller plants in the center with descending mature heights toward both edges and groundcover or sub shrubs at outer edges (6" or lower);
  - On berms taller than 2' from finish grade: sub shrubs or groundcover (6" or lower) only (total height with plantings at maturity to be 30" or less unless berm is existing);
  - Avoid use of woody stemmed shrubs;
  - Consider walk-on turf alternatives (low groundcover-types);
  - Use perennials to add color, but ensure evergreen are dominant in the planters.
  - Evergreens to provide mix of texture, leaf color and proven longevity;
  - Focus on water conserving plants and not natives, succulents or water thirsty plants;
  - Use multiple types of trees, shrubs and groundcovers (avoid designs that utilize only one tree, one shrub and one groundcover species);

The next update to these standards will be in July ~~2021~~2023.

- Review and contrast specific plan design guidelines with plant material noted in the Parks Construction Standards and current master gardeners/national nursery associations' plant cultivation advances

Landscaping for Parks

- Designs of parks and streetscapes shall maximize use of water-wise plants to the extent possible. Turf shall be designed for functional use for recreational purposes. Eliminate all non-functional turf.
- Where space allows, provide tree groupings in groves rather than in singles or rows in equal intervals, unless the design dictates the need.
- Provide a ten-foot (10') clearance between the tree trunk and the edge of hardscape, locate trees in center of planted areas and not in a straight row.
- Provide an eight-foot (8') minimum clearance between trees and other site improvements, including shrubs.
- Provide an entry planted (non turf) area to locate the park identification sign. Provide three to five (3-5) specialty roses to accent the sign. See City Project Manager for specific type.
- Refer to the list provided for preferred trees. Selected trees shall fulfill the following criteria:
  - For all areas with drains, do not plant trees within 12' of the drain, whenever possible.
  - Be appropriate to the site specific environment;
  - Tolerates heavy soil conditions;
  - Tolerates freeze;
  - Is considered disease and pest resistant;
  - Is known to have a deep rooting system (not shallow rooted) and
  - Tolerates heat (is not susceptible to sunburn).
  - Tree species, which are known for shallow root systems may be considered acceptable if located within a planted area and/or planted with root barrier panels.
  - When providing tree cut outs within hardscape, provide a five-foot (5') diameter round or square cut out. When budgets allow, include tree grates.
  - Planting sizes shall be:
    - 15 gallon for trees
    - 5 gallon for shrubs
    - 1 gallon for vines, selected shrubs and groundcovers
    - Flats for groundcovers.
    - *Size variations to be accepted by the City.*
  - Medium to large trees shall be spaced no closer than 25' on center.
  - Trees shall be planted no closer than 15' to any light fixture or structure.
  - Landscape plans shall draw all plantings, including trees at the mature widths.
  - Plants shall be located away from edge of pavement equal to the radius of the shrub at maturity, plus one foot. (E.g., a shrub that will grow to a 4' width at maturity shall be placed no closer than 3' from edge of pavement.)
- Berms shall not exceed 30" in height. This shall include plant material at maturity.

The next update to these standards will be in July ~~2021~~2023.

- Obtain a soils fertility test and report and include amendment recommendations as a part of improvement plans/construction documents.
- For trees located within open space or natural areas, install drain tiles within the plant basin.

Landscaping for Streetscape

- Grading & Drainage
  - Berms shall not exceed 30" in height. This shall include plant material at maturity.
  - Slopes greater than 3:1 are not permitted. If unavoidable circumstances arise during construction, a solution for future erosion of bark and soils must be provided for all slopes greater than 3:1. A drainage plan showing a constructed drainage solution must be provided. Approval of the proposed drainage solution must be obtained from the Parks and Recreation Department prior to installation.
  - Streetscapes shall not solely rely on surface drainage to address run-off issues. Hard pipe or other designed drainage systems shall be included in all design solutions.
  - Run-off shall be collected and satisfactorily addressed in order to avoid excessive water on sidewalks and/or bike trails.
- Landscaping
  - Tree and plant selection shall be consistent with the specific plan design guidelines AND these Parks Construction Standards.
  - In addition to the original goals of the specific plan, consideration related to major arterials and collector streets that cross specific plan areas or that stretches for long lengths should consider continuity of the plantings. This can be achieved in many ways:
    - Consistent street tree choices;
    - Groupings of a common tree species throughout the length of the road;
    - Use of a common shrubs and groundcover in groupings;
    - Specialty paving in the noses and crossings that convey continuity.
  - All landscape plans shall show sight distance triangles (to be confirmed by the project engineer), signs, streets lights, utility boxes, fire hydrants and any other appurtenances that will affect landscape and irrigation installation.
  - Plantings within the sight distance triangles shall be no taller than 12" at mature height.
  - For unsignalized left turn lanes, landscaping shall be no taller than 12" at mature height for a distance of 175' as measured from the ~~nose of the median~~turn pocket.
  - Trees in medians to be in two rows and offset to avoid a visual "picket fence" effect.
  - Obtain a soils fertility test and report and include as a part of improvement plans/construction documents.

The next update to these standards will be in July ~~2021~~2023.

- A soils fertility test shall be obtained by the contractor and submitted for review prior to adding soil amendments. The soils fertility test shall include recommendations for amendments.

- Irrigation
  - A master irrigation plan shall be developed, submitted and approved with the first phase of sub-phase of a development plan set.
    - The master irrigation plan shall show mainlines and sizes (gallons per minute and pressure), separate point of connections and sizes for each sub-phase, controller sizes, sleeves sizes and locations and valve sizes and locations.
    - Once approved, the master irrigation plan shall be included with each subsequent phase of sub-phased improvement plans.
    - Also, approved sleeve locations shall be reflected on the civil plans.
  - All plans must include a separation of City maintained irrigation and privately maintained irrigation for all irrigation areas shown on the plans. Separation of services includes but is not limited to the following: water meter, backflows, main line, lateral lines, valves, sprinkler layout, drip lines and all other irrigation related items.
  - City maintained irrigation lines, including the main line must not be constructed in privately maintained landscape areas or private property. The separation of City maintained irrigation and privately maintained irrigation must be easily identified on the plans to receive plan approval.
  - If the plans do not contain any City maintained irrigation a note stating this must be shown on each sheet containing irrigation plans.
  - Comply to extent reasonable with the City's water conservation ordinance.
  - All equipment and components of the irrigation system shall be consistent to these Parks Construction Standards. No substitutions are allowed, unless specifically approved.
  - Points of connection, valves, gate valves, meters, and backflows shall be line size unless specifically approved by the Parks Department.
  - For streetscapes, booster pumps are not considered a solution to address low pressure concerns and shall not be used.
  - All swing joint components shall be the same size as the inlet of the sprinkler head to be connected.
  - Master valve shall be Superior 3300.
  - Place mainline in parkway strip if planter is 10' or wider. Otherwise, place mainline in 2' bench at back of walk.
  - Parkway strips under 8' width may use Rainbird R-Van side strip and corner strip nozzles, as appropriate.
  - Areas where width is 4' – 6' (such as tapered noses of medians) should remain unirrigated and unplanted, mulched only. Under 4' should be paved.

- On-Site Amenities
  - Entry monuments and signs shall be designed to include monolithic signage or lettering that is connected as one component. Single lettering is prohibited. All signs and lettering shall be bolted in place and must be flush against surface. Use of epoxy only is prohibited.

The next update to these standards will be in July ~~2021~~2023.

- All plans must include a physical separation, such as a concrete mow band between City maintained landscape and privately maintained landscape. The separation of City maintained landscape and privately maintained landscape must be easily identified on the plans to receive plan approval. If the plans do not contain any City maintained landscape areas a note stating this must be shown on each sheet containing landscape plans.
- Selected stone veneer or stonework shall be available on a long-term basis to ensure future repair work will provide consistency in aesthetics. All veneer shall be grouted in place.
- Accent lighting shall be above-ground, up-light fixtures, or set in the entry walls. Use LED bulbs. All fixtures shall be readily available, with a realistic lead-time for replacement orders. No fixture shall be placed in turf areas.
- Planters and seat walls 4' high and lower with adjacent pavement or hardscape shall be designed to include skate deterrents as an integral part of the wall cap design. Third party add-on products such as "Skate Block" are prohibited.

Flatwork

- Concrete
  - Standard walkway finish shall be medium broom finish, unless identified as a special paving area.
  - Provide at least one path of travel to all major amenities within the park design where the concrete pathway is at least ten feet (10') wide for use by service vehicles. All curves within this route shall contain curves no smaller than ten feet (10') in radius.
  - Concrete mow bands, and concrete collars around light fixtures in turf areas shall be per details PK-27 and PK-29, unless otherwise accepted.
  - Concrete pads for light fixtures, benches, picnic tables or other site furnishings shall use 45-degree (or similar) angles rather than 90-degree angles.
  - Concrete pathways and other standard flatwork applications, shall be installed with fiber mesh at a (concrete section) depth of five inches (5"). Do not include welded wire mesh or rebar, unless otherwise accepted.
  - Install barbeques within decomposed granite. Barbeques shall not be installed within plantings areas or within the concrete picnic pad.
  - Color shall be integral.
- Asphalt Concrete Bike Paths and Miscellaneous Pads
  - Bike paths shall be a minimum of ten-feet (10') wide with a two-foot (2') wide AB shoulder on one side and a two-foot (2') wide decomposed granite shoulder on the other side of the path (for joggers/pedestrians) as shown in Parks Construction detail PK-43. See Public Works' Construction Standards for additional design criteria.
  - Bike path access shall be protected from private vehicle traffic through the use of collapsible bollards, stationary bollards, boulders and post and cable fencing.
  - Bike paths that serve as fire access lanes to wild land environments must have a minimum turning radius of twenty-two feet (22') inside diameter and thirty-two

The next update to these standards will be in July ~~2021~~2023.

feet (32') outside diameter. The bike path shall be capable of supporting a minimum GVW of 30,000 pounds.
  - Other AC paving (including parking lots) shall be per ~~Public Works~~Development Services' Construction Standards.
  - Include a redwood header on the outside edges of the DG shoulder when located within a developed park.
  - For additional bike trail construction requirements, see ~~Public Works~~Development Services Design and Construction Standards.
- Decomposed Granite (DG) Paving
  - Do not install DG in areas ~~which~~ exceed a longitudinal slope greater than 3%.
  - Provide a cross slope not-to-exceed 2%.
  - Install per detail PK-33.
- Header
  - Install per PK-25.
  - Install at both edges of AC or DG pathways within developed park boundaries. Required edging on open space trails shall be determined on a case-by-case basis.

Post & Cable Fencing

- Install per PK-41.
- Fire access points through the post and cable assembly shall be provided at a maximum interval of 750 feet. The cable crossing the fire access point shall be yellow, plastic coated cable in order to delineate the access points. The ends of the access point cable shall be secured to the posts in a similar fashion as the terminal post anchor, with the exception of adding a City of Roseville padlock connecting each end of the cable to the eyebolt.

Restrooms and Outdoor Sinks

- Do not specify porcelain fixtures.
- Use heavy-duty fixtures only, i.e. Chicago or accepted equal.
- Use polished concrete (flooring) sealed with two (2) coats of anti-graffiti stain.
- Do not use tile or brick (on outdoor sinks).
- Install at least one (1) outdoor GFI quadruple outlet with a heavy-duty, weather-resistant, vandal-proof, lockable cover.
- See the City Parks standard restroom plans. Contact the Project Manager to obtain information.
- Sewer connections shall be installed similarly to that described for the water connection and per EU approval. See page 6 of this Section under "Irrigation Meter".
- Do not use dead-bolt locks. Use a latch/lock handle.
- Use unisex signage.
- Lights shall be "LED high abuse security light similar to "Utilitech" 26-W model # 0208819 or approved equal. Timers shall be "Leviton" digital timer switch # VPT24-1P or approved equal.
- Restroom locks shall be "Schlage" dorm locks #ND73PD RHO626 or approved equal.

- Doors to be keyed to City Standard

Pre-Fabricated and/or Proprietary Structures

- Consult with the Building Department for requirements for structural calculations. Some items may be accepted as a deferred submittal. Determination shall be included in the Design Development submittal to the City.
- Include a note on the plans, if deferred items are a part of the project, "No additional time will be granted to the Contractor for Building review and approval of deferred item(s)."
- Bridges that serve as fire access lanes to wild land environments shall be constructed to allow for twelve feet (12') clear width, capable of supporting a minimum GVW of 30,000 pounds and shall allow a straight-line approach of a minimum of thirty-five feet (35').
- Submit structural calculations wet signed by a California licensed structural engineer.
- Submit shop drawings as a part of the construction submittal process.

Site Electrical

- Provide two separate circuits for pathway/security lighting throughout the park per the Parks Construction Standards.
- Security lighting shall be 25% of all fixtures, to be finalized upon design.
- Locate an outdoor GFI dual outlet, weatherproof, vandal-resistant cover in all group picnic areas mounting shall be mounted flush at top of post near roof.
- Metered service panels and service points shall be approved by the Electric Department. Where questions arise regarding acceptable standards, contact the Electric Department directly.
- Playing field lights shall be operated by a Musco control link system or accepted equal.
- Restrooms shall be on a separate circuit.
- Outlets flushed with wall.

Lighting for Security Purposes

- Coverage is for potential gathering places when the park is closed for ease of police surveillance.

Upon Approval of Master Plan

- Upon completion and prior to Parks & Recreation Commission hearing and City Council approval of the Master Plan, provide:
  - a full size rendering laminated and mounted on foam core board;
  - a digital file of the color rendering, jpg & pdf formats.
  - an 8-1/2"x11" color reduction (largest image possible),
  - an 8-1/2"x11" black and white reduction (largest image possible), and
  - an Estimate of Probable Costs.

Neighborhood and Pocket Park Design Criteria

The next update to these standards will be in July ~~2021~~2023.

Design

- Each park is to create a different look, theme or contain an element not already used in other City of Roseville parks.
- Comply with the current Parks Construction Standards.
- Elements to include, but not limited to:
  - Usable/turf for purposes of recreation
  - Maximize water-wise landscape areas where non-functional turf have traditionally been placed.
  - Design for one hour stay
  - One school-aged children's play area
  - One to two bay swings (2 – 4 actual swings)
  - Four and up picnic tables under a shaded shelter
  - Two – three picnic tables scattered within the park
  - Benches
  - Concrete pathways
  - Service access for maintenance to the picnic and play area
  - ADA accessibility through-out
  - One – two security lights
  - One drinking fountain
  - One park identification sign

Open Space Standards

- Provide a 10' clearance between toe of slopes and open space fencing/barriers for maintenance access
- Provide a master access plan for open space within a plan area to strategically identify access points for maintenance access into the open space
- All wetlands shall be flagged and fenced using orange construction fencing prior to start of any clearing and grading operations
- Slopes onto the open space shall be 3:1 maximum
- For landscapes adjacent to open space, use only native, non-invasive plantings
- Irrigation in landscaped areas adjacent to open space shall be designed to avoid all over-spray
- Over-grading onto Open Space shall be avoided
- Increased run-off due to new development on adjacent property shall be avoided or shall be collected into a piped storm drain system and conveyed to an acceptable receiving water. Daylighting onto Open Space is prohibited.

The next update to these standards will be in July ~~2021~~2023.

CITY OF ROSEVILLE CALIFORNIA

Parks, Recreation & Libraries Department

Section 1B:
DESIGN DEVELOPMENT

Preferred Tree List

The following list includes the Department's preferred tree species. Additional species may be suggested by the Consultant, which will be considered during the 75% construction document submittal phase of work.

Planting sizes to be 15 gallon. Variations in size shall be approved by the City.

Botanical Name	Common Name	Deciduous (D), Evergreen (E)	Turf (T), Non-Turf (N), Accent (A), Wet (W)
Large Trees	(Height/Spread: 35' and up)		
Acer rubrum	Red Maple	D	T, N, W
Acer macrophyllum	Big Leaf Maple	D	T, N, W
Acer negundo	Box Elder	D	W
Fraxinus ornus	Flowering Ash	D	T, N
Fraxinus raywoodii	Raywood Ash	D	T, N
Magnolia grandiflora	Southern Magnolia	E	N
Platanus acerfolia "Bloodgood'	London Plane Tree	D	T, N, W
Platanus racemosa	California Sycamore	D	T, N, W
Quercus castaneaefolia	Chestnut Leaf Oak	D	T, N
Quercus douglasii	Blue Oak	D	N
Quercus lobata	Valley Oak	D	N
Quercus phellos	Willow Oak	D	N
Quercus virginiana	Southern Live Oak	E	N
Quercus wislizenii	Interior Live Oak	E	N
Pistacia chinensis	Chinese Pistache	D	T, N
Sequoia sempervirens	Coast Live Redwood	E	T, N
Ulmus 'Accolade'	Accolade Elm	D	T, N
Ulmus 'Emerald Sunshine'	Emerald Sunshine Elm	D	T, N
Umbellularia californica	California Bay	E	T, N

The next update to these standards will be in July ~~2021~~2023.

Botanical Name	Common Name	Deciduous (D), Evergreen (E)	Turf (T), Non-Turf (N), Accent (A), Wet (W)
Medium Trees	(Height/Spread: 20'-35')		
Acer buergeranum	Trident Maple	D	T, N
Geijera parvifolia	Austrian Willow	E	N
Gleditsia triacanthos 'Sunburst'	Honey Locust	D	T, N, W
Koelreuteria paniculata	Golden Rain Tree	D	T, N, A
Laurus nobililis	Grecian Laurel	D	N
Malus floribunda	Japanese Flowering Crabapple	D	T, N, A
Nyssa sylvatica	Tupelo Tree	D	T, N
Schinus molle	California Pepper Tree	E	N
Sophora japonica	Japanese Pagoda	D	T, N
Small Trees	(Height/Spread: 15' - 20')		
Acer palmatum	Japanese Maple	D	N, A
Cercis canadensis	Eastern Redbud	D	N, A
Cercis occidentalis	Western Redbud	D	N, A
Lagerstroemia indica	Crepe Myrtle	D	N, A
Magnolia x soulangiana	Saucer Magnolia	D	N, A
Magnolia stellata	Star Magnolia	D	N, A
Melaleuca nesophila	Pink Melaleuca	E	N, A
Rhus lancea	African Sumac	E	N, A

See following pages for additional tree species options. To the extent possible, tree selections in Streetscapes shall be consistent with the design guidelines in the specific plan.

The next update to these standards will be in July ~~2021~~2023.

~~2019~~ 2021 City of Roseville RECOMMENDED TREE LIST

Common Name	Botanical Name	Water requirements	Distance Between Trees*	Mature Tree Shape	Av Mature Canopy Size (Diameter)	Mature Tree Height (max.)
Trees for 3' Wide Parkway / Planter or Larger *To calulate the planting distance between 2 different tree spacings, add the distances of the 2 species and divide by 2						
Amur Maple	*Acer tataricum ginnala*	*moist to dry*	15'	Rounded	15-20'	20'
Strawberry Tree	*Arbutus unedo*	*moist to dry*	12'	Oval to rounded	8-35'	8-35'
Western Redbud	*Cercis occidentalis*	*moist to dry drought tolerant*	10'	Rounded	10-18'	10-18'
Chinese Fringe Tree	*Chionanthus retusus*	*moist soil*	12'	Rounded	20-25'	20-25'
Chinese Fringe Tree 'Tokyo Tower'	*Chionanthus retusus*	*moist soil*	10'	Rounded	10'	20'
Purple Smoke Tree	*Cotinus coggygria*	*wet to moist*	10'	Rounded	10-15'	20'
English Hawthorn 'Paul's Scarlet'	*Crataegus laevigata 'Paul's Scarlet'*	*moist to dry*	15'	Vase-shape	20-25'	18-25'
Washington Hawthorn	*Crataegus phaenopyrum*	*moist to dry*	12'	Rounded, vase-shaped	15-20'	25'
Goldenchain Tree	*Laburnum anagyroides*	*moist soil*	8'	Oval to round-headed	15-20'	20-30'
Crape Myrtle	*Lagerstroemia hybrids*	*moist to dry*	12'	Broad-rounded	15-20'	6-30'
Crape Myrtle	*Lagerstroemia indica 'dynamite'*	*moist to dry*	12'	Broad-rounded	10-15"	25"
Amur Maackia	*Maackia amurensis*	*moist soil*	15'	Vase-shaped	15-20'	30-50'
Bechtel Crabapple	*Malus ioensis 'Plena'*	*moist soil*	12'	Broad-rounded	20'	25'
Rejoice Crabapple	*Malus 'Rejzam'*	*moist soil*	12'	Broad-rounded	10'	20'

The next update to these standards will be in July ~~2021~~2023.

Common Name	Botanical Name	Water requirements	Distance Between Trees*	Mature Tree Shape	Av Mature Canopy Size (Diameter)	Mature Tree Height (max.)
Crabapple 'Prariefire"	*Malus ioensis 'Prariefire'*	*moist soil*	12'	Broad-rounded	15-20'	25'
Golden Raindrops Crabapple	*Malus 'Schmidtcutleaf'*	*moist soil*	12'	upright vase	15'	20'
Firebird Crabapple	*Malus sargentii*	*well drained soil*	10'	rounded	10'	8'
Royal Raindrops Crabapple	*Malus 'JFS-KWS'*	*moist soil*	15'	upright spreading	15'	20'
Japanese Snowdrop	*Styrax japonicus*	*moist soil*	12'	Rounded	15-20'	25-30'
Fragrant Snowbell	*Styrax obassia*	*moist soil*	12'	Rounded	15-20'	20-30'
Chaste Tree	*Vitex agnus-castus*	*moist to dry*	15'	Rounded	15-20'	20-25'
Trees for 4' Parkway / Planter or Larger *To calculate the planting distance between 2 different tree spacings, add the distances of the 2 species and divide by 2						
Strawberry Tree	*Arbutus unedo 'Marina'*	*moist to dry*	20'	Oval to rounded	30'	40'
Trident Maple	*Acer buergerianum*	*moist soil*	18'	Oval	20-25'	20-25'
Urban Sunset Maple	*Acer truncatum x platanoides*	*moist and well drained soil*	25'	Oval	20'	35'
Hedge Maple	*Acer campestre*	*moist to dry but well drained soil*	18'	Rounded	30-35'	35'
Vine Maple	*Acer circinatum*	*moist soil*	18'	Rounded	25-35'	5-25'
Flame Maple	*Acer ginnala* 'Flame'	*moist soil*	18'	Rounded	20'	20'
Ruby Slipper Maple	*Acer ginnala 'Ruby Slippers*'	*moist soil*	18'	Rounded	20'	20'
Metro Gold Maple	*Acer campestre* 'Panacek'	*moist to dry but well drained soil*	18'	Oval	20'	35'
Red Sunset Maple	*Acer rubrum* 'Franksred'	*wet to moist soil*	18'	Oval	30'	45'
Fireburst Paperbark Maple	*Acer griseum 'JFS KW8AGRI'*	*moist soil*	15'	Upright-oval	15'	25'
Paperbark Maple	*Acer griseum 'JFS KW8AGRI'*	*moist soil*	10'	Oval to rounded	20'	25'

The next update to these standards will be in July ~~2021~~2023.

Common Name	Botanical Name	Water requirements	Distance Between Trees*	Mature Tree Shape	Av Mature Canopy Size (Diameter)	Mature Tree Height (max.)
Crismson Sentry Maple	*Acer Platanoides'Crimson Sentry'*	*moist and well drained soil*	10'	Pyramidal	15'	25'
European Hornbeam	*Carpinus betulus 'Fastigiata'*	*moist soil*	12'	Broad oval-vase shaped	20-30'	35'
American Hornbeam	*Carpinus caroliniana*	*wet to moist soil*	14'	Vase-shaped	20-30'	35'
Eastern Redbud	*Cercis canadensis*	*moist soil*	12'	Rounded	25-35'	20-30'
Golden Flame Tree	*Koelreuteria bipinnata*	*moist soil*	15'	Rounded	15-25'	35'
Goldenrain Tree	*Koelreuteria paniculata*	*moist to dry drought tolerant*	18'	Rounded	30-40'+	30-40'
Coral Sun Goldenrain Tree	*Koelreuteria paniculata 'Coral Sun'*	*moist to dry drought tolerant*	18'	Rounded	18'	20'
Katsura	*Cercidiphyllum japonicum*	*moist soil*	18'	Oval, Rounded or Umbrella	30-40'+	35'
Trees for 4' Wide Parkway / Planter or Larger (Continued) *To calulate the planting distance between 2 different tree spacings, add the distances of the 2 species and divide by 2						
Southern Magnolia 'St. Mary'	*Magnolia grandiflora* 'St. Mary'	*moist soil*	12'	Rounded	15-20'	25'
DD Blanchard Magnolia	*Magnolia grandiflora 'DD Blanchard'*	*moist soil*	12'	Rounded	15-20'	35'
Kobus Magnolia	*Magnolia kobus*	*well drained soil*	15'	Rounded	15-25'	50'
Saucer Magnolia	*Magnolia soulangiana*	*moist soil*	20'	Rounded	20-30'	25'
Mercury Magbnolia	*Magnolia soulangiana 'NCMX1'*	*moist soil*	15'	Upright pyramidal	10-15'	25'
Tupelo / Sour Gum	*Nyssa sylvatica*	*wet tor dry soil*	20'	Rounded pyramidal	20-30'	30-50'
Firestarter Tupelo	*Nyssa sylvatica 'JFS red'*	*wet tor dry soil*	18'	Upright Oval	15'	35'
Green Gable Tupelo	*Nyssa sylvatica' NSUHH'*	*wet tor dry soil*	20'	Pyramidal	20'	40'

The next update to these standards will be in July ~~2021~~2023.

Common Name	Botanical Name	Water requirements	Distance Between Trees*	Mature Tree Shape	Av Mature Canopy Size (Diameter)	Mature Tree Height (max.)
Chinese Pistache	*Pistacia chinensis*	*moist to dry drought tolerant*	24'	Broad-rounded	25-35'	30-35' (65')
Fern Pine	*Afrocarpus acilior*	*moist soil*	10'	Irregular oval	10-18'	65'
Carolina Laurel Cherry	*Prunus caroliniana*	*moist soil, drought tolerant*	15'	Irregular rounded	15-25'	20-30' (40')
Glenleven Littleleaf Linden	*Tilia cordata*	*well drained soil*	15'	Connical or oval	40-60'	65'
Purple Leaf Plum	*Prunus cerasifera* 'Krauter Vesuvius'	*moist soil*	15'	Rounded	15-25'	15-30'
Akebono Cherry	*Prunus x yedoensis*	*moist to dry*	15'	Upright spreading	25'	25'
Pink Flair Cherry	*Prunus sargentii 'JFS-KW58'*	*moist to dry*	15'	Upright narrow vase	10-15'	25'
Kwanzan Cherry	*Prunus serrulata'Kwanzan'*	*moist*	20'	vase	20'	30'
Royal Burgandy Cherry	*Prunus serrulata 'Royal Burgandy'*	*moist*	15'	Broad vase	15'	20'
Ornamental Pear 'Chanticleer'	*Pyrus calleryana* 'Chanticleer'	*moist soil*	18'	Narrow oval	15-20'	30-50'
Trees for 6' Parkway / Planter or Larger					***To calulate the planting distance between 2 different tree spacings, add the distances of the 2 species, divide by 2**	
Marshal Seedless Green Ash	*Fraxinus pennsyvanica 'Marshal'*	*wet to moist soil*	25'	Oval, errect, spreading	30-40'	50'
Bigleaf Maple	*Acer macrophyllum*	*moist soil, drought tolerant*	20'	Broad-rounded	30-75'	45-75'
Japanese Maple	*Acer palmatum 'Bloodgood'*	*moist and well drained soil*	15'	Broad-rounded	25'+	25'
Glowing Embers Japanese Maple	*Acer palmatum 'Glowing Embers'*	*moist and well drained soil*	15'	Broad-rounded	20'	22'

The next update to these standards will be in July ~~2021~~2023.

Common Name	Botanical Name	Water requirements	Distance Between Trees*	Mature Tree Shape	Av Mature Canopy Size (Diameter)	Mature Tree Height (max.)
Red Maple	*Acer rubrum*	*wet to moist soil*	25'	Oval to rounded	to 60'	40-60'
Fall Fiesta Maple	*Acer saccharum 'Bailsta'*	*moist soil*	25'	Broad-rounded	35-50'	50'
Armstrong Gold	*Acer rubrum*	*wet to moist soil*	25'	Columnar	12'	40'
October Glory Maple	*Acer rubrum 'October Glory'*	*wet to moist soil*	25'	Oval to rounded	35'	40'-50'
Columnar Norway Maple	*Acer Platanoides 'columnar'*	*moist and well drained soil*	15'	Narrow upright	15'	35'
Norway Maple	*Acer Platanoides*	*moist and well drained soil*	25'	Rounded	50-60'	65'
Crismson King Maple	*Acer Platanoides 'Crimson King'*	*moist and well drained soil*	25'	Oval to rounded	35'	40'
Armstrong Maple	*Acer rubrum*	*wet to moist soil*	25'	Narrow, fastigiate	12'	45'
Sebsation Box Elder	*Acer neguno 'sensation'*	*wet to dry soil*	25'	Rounded to umbrella	25'	30'
Common Horsechestnut	*Aesculus hippocastanum*	*moist soil*	25'	Rounded	40-70'	60-75'
European Hackberry	*Celtis australis*	*moist to dry drought tolerant*	30'	Rounded	50-60'	40-70'
Common Hackberry	*Celtis occidentalis*	*moist to dry drought tolerant*	25'	Rounded	50-60'	40-70'
Kentucky Coffee Tree	*Gymnocladus dioica*	*moist to dry drought tolerant*	25'	Oval with coarse branching	40-50'	60-75'
Princeton Sentry Ginkgo (Male Only)	*Ginkgo biloba 'Princeton sentry'*	*moist to dry*	15'	narrowly pyrimoidal	15'	40'
Sweet Bay	*Laurus nobilis*	*moist to dry*	20'	Irregular rounded	20-25'	25-35'
Trees for 6' Parkway / Planter or Larger (Continued) *To calulate the planting distance between 2 different tree spacings, add the distances of the 2 species, divide by 2						
Douglas Fir	*Pseudotsuga menziesii*	*moist to dry*	30'	Conical	30-40'	60-80'

The next update to these standards will be in July ~~2021~~2023.

Common Name	Botanical Name	Water requirements	Distance Between Trees*	Mature Tree Shape	Av Mature Canopy Size (Diameter)	Mature Tree Height (max.)
Blue Oak	*Quercus douglasii*	*moist to dry*	30'	Rounded umbrella	50-80'	50-60'
English Oak	*Quercus robur*	*moist to dry*	30'	Oval, round, or umbrella	35-60'	65'
Holly Oak	*Quercus ilex*	*moist to dry*	25'	Rounded umbrella	40-50'	40-65'
Burr Oak	*Quercus macrocarpa*	*wet to dry*	30'	Rounded or umbrella	75-85'	>65'
Turkey Oak	*Quercus cerris*	*well drained soil*	30'	Rounded	50'	50'
Willow Oak	*Quercus phellos*	*moist to dry*	25'	Rounded or umbrella	30-40'	40-60'
Southern Live Oak	*Quercus virginiana*	*wet to moist soil*	25'	Oval, round, or umbrella	30-50'	50'
Cork Oak	*Quercus suber*	*moist to dry drought tolerant*	30'	Rounded or umbrella	35-45'	>65'
Trees for 6' Parkway / Planter or Larger						
Japanese Pagoda Tree	*Sophora japonica*	*moist soil*	25'	Rounded to broad-spreading	50-75'	50'
Accolade® Elm	*Ulmus japonica x wilsoniana 'Morton'*	*moist soil*	25'	Vase shaped with arching limbs	60'	70'
Emerald Sunshine Elm	*Ulmus propinqua 'Emerald Sunshine'*	*moist soil*	25'	Vase shaped	30'	30'
Trees for 8' Parkway / Planter or Larger *To calulate the planting distance between 2 different tree spacings, add the distances of the 2 species and divide by 2						
Sycamore Maple	*Acer pseudoplatanus*	*moist soil*	25'	Oval or Rounded	40-50'	50'
Incense Cedar	*Calocedrus decurrens*	*moist to dry drought*	25'	Conical	25-30'	>65'

The next update to these standards will be in July ~~2021~~2023.

Common Name	Botanical Name	Water requirements	Distance Between Trees*	Mature Tree Shape	Av Mature Canopy Size (Diameter)	Mature Tree Height (max.)
Atlas (Blue) Cedar	*Cedrus atlantica*	*moist to dry drought tolerant*	30'	Conical, spreading	30-40'	>65'
Deodar Cedar	*Cedrus deodara*	*moist to dry drought tolerant*	35'	Conical	30-60'	>65'
Carob	*Ceratonia siliqua*	*moist to dry*	25'	Broad to wide-rounded or umbrella	30-45'	30-40'
Arizona Cypress	*Cupressus arizonica*	*well drained soil*	20'	Conical to columnar	25-30'	40-50'
Maidenhair tree (Male Only)	*Ginkgo biloba*	*moist to dry*	30'	Conical, spreading	30-40'+	40-65'
Autumn Gold Ginkgo (Male Only)	*Ginkgo biloba 'Autumn Gold'*	*moist to dry*	30'	Broadly pyrimoidal	35'	45'
Honey Locust (thornless)	*Gleditsia triacanthos*	*wet to dry soil, drought tolerant*	25'	Oval or umbrella	30-70'	40-65'
Rubylace Honey Locust (thornless)	*Gleditsia triacanthos 'Rubylace'*	*wet to dry soil, drought tolerant*	25'	Oval or umbrella	25'	30'
Sunburst Honey Locust (thornless)	*Gleditsia triacanthos 'Suncole'*	*wet to dry soil, drought tolerant*	25'	Irregular	35'	40'
Toyon	*Heteromeles arbutifolia*	*moist to dry*	25'	Rounded	15-25'	35'
Japanese Lilac	*Syringa reticulata*	*moist to dry drought tolerant*	25'	Oval or Rounded	25-40'	35'
Empress Tree	*Paulownia tomentosa*	*moist soil*	20'	Oval or rounded	30-40'	40-60'
London Plane Tree	*Platanus x hispanica*	*wet to dry soil*	30'	Oval, rounded or umbrella	30-50'	40-70'
American Sycamore	*Platanus occidentalis*	*wet to dry soil*	30'	Oval, rounded or umbrella	30-50'	>70'

The next update to these standards will be in July ~~2021~~2023.

Common Name	Botanical Name	Water requirements	Distance Between Trees*	Mature Tree Shape	Av Mature Canopy Size (Diameter)	Mature Tree Height (max.)
California Sycamore	*Platanus racemosa*	*moist to dry*	30'	Oval, rounded or umbrella	30-50'	40-70'
California Black Oak	*Quercus kelloggii*	*moist to dry*	30'	Oval, rounded or umbrella	30-60'	40-70'
Valley Oak	*Quercus lobata*	*moist to dry*	30'	Broad-rounded	50-80'	>65'
Swamp White Oak	Quercus *bicolor*	*wet to moist soil*	30'	Oval, rounded or umbrella	30-60'	65'
Interior Live Oak	*Quercus wislizenii*	*moist to dry*	30'	Oval, rounded, umbrella or vase	30-60'	30-65'
Western Red Cedar	*Thuja plicata*	*moist soil*	25'	Conical to wide conical	50-80'	50-70'
Sawleaf Zelkova	*Zelkova serrata*	*moist soil*	30'	Rounded or umbrella	30-60'	40-70'
Village Green Zelkova	*Zelkova serrata'Village Green'*	*moist soil*	30'	vase - rounded	40'	40'
Wireless Zelkova	*Zelkova serrata* 'Schmidtlow'	*moist soil*	30'	Broad-vase	15'	24'
Trees for 12'+ Parkway / Planter					***To calulate the planting distance between 2 different tree spacings, add the distances of the 2 species and divide by 2**	
American Chestnut	*Castanea dentata*	*moist soil*	30'	Oval to rounded or wide spreading	40-60'	>65'
Southern Magnolia	*Magnolia grandiflora*	*moist soil*	30'	Broad pyramidal, rounded pyramidal and rounded	30-50'	60-80'

The next update to these standards will be in July ~~2021~~2023.

Common Name	Botanical Name	Water requirements	Distance Between Trees*	Mature Tree Shape	Av Mature Canopy Size (Diameter)	Mature Tree Height (max.)
Chestnut-Leafed Oak	*Quercus castaneafolia*	*well drained soil*	30'	Broad and rounded	50-60'	60-80'
Red Oak	*Quercus rubra*	*moist soil*	30'	Rounded	60-75'	60-75'
Willow Oak	*Quercus phellos*	*moist to dry*	30'	Rounded	30-50'	90'
Scarlet Oak	*Quercus coccinea*	*moist to dry*	30'	Broad oval	40'	50'-60'
Coast Redwood	*Sequoia sempervirens*	*moist soil*	25'	Narrow pyramidal to wide conical	50-60'	60-80'
Giant Sequoia	*Sequoiadendron giganteum*	*moist to dry*	30'	Narrow pyramidal	50-60'	60-80'
Bald Cypress	*Taxodium distichum*	*wet to dry soil*	25'	Oval at maturity, uniform	20-30'	50-70'
Drought Tolerant Species						
Red Push Pistache	*Pistacia atlantica x Pistacia integerrima*	*Moist to dry soil*	25'	Oval at maturity, uniform	20-30'	50-70'
Mulga	*Acacia aneura*	*Moist to dry soil*	10'	Rounded	10-18'	
Palo Verde	*Parkinsonia x desert museum*	*Moist to dry soil*	24'	Broad-rounded	25-35'	30-35' (65')
California Buckeye	*Aesculus californica*	*Moist to dry soil*	24'	Broad-rounded	25'	25'

Macfadyena unguis-cati	Yellow Trumpet Vine, Cat's Claw		X
Rosa californica	California Rose	X	
Tecoma capensis	Cape Honeysuckle		X
Vitus californica	California Grape	X	

*denotes fire-resistant plants
Native denotes California native
Non-Native denotes ornamental plant species prone to utilize minimal water

While all plants listed require little water at maturity, all plants require initial watering over a three +/- year period in order to properly establish. California natives planted in urban surroundings will require periodic watering during the summer.

The next update to these standards will be in July ~~2021~~2023.

Standard Symbols for the Irrigation Legend

	Pressure Mainline, Schedule 40 PVC, size as noted on the plans. *(Bold and distinctly different from other graphic lines).*
	Non-pressurized Lateral Lines, Schedule 40 PVC, size as noted on the plans. *(Do not use pipe smaller than ¾").*
	Schedule 40 PVC Sleeve under pavement per Parks Standard detail PK-4.
	Point of Connection *(Label static water pressure and gallons per minute available at POC).*
	Meter *(Note size, type and for which line type it applies).*
	Backflow Prevention Device *(Note size, type and City standard detail).*
	Flow Sensor per Parks Standard detail PK-2 *(Note size, and model #).*
	Calsense (V.2) *(Note # of stations).* Install inside enclosure. See Specifications.
	Gate/Ball Valves per Parks Standard detail PK-11 or PK-12. *(Note size, model #, manufacturer).*
	Quick Coupler Valve, Rainbird 44RC per Parks Standard detail PK-14. *(Note size).*
	Electric Remote Control Valve, size as noted on plans. *(Note type, model # and precipitation rate).*
	Pop-Up Rotor *(Note nozzle size, radius, gpm and psi).*
	Other sprinkler heads *(Note type, model, radius, gpm and psi. Use triangular, circular and square shapes, in that order).*
	RCV Valve Labeling Symbol *(Include Station number, gpm and valve size).*

The next update to these standards will be in July ~~2021~~2023.

Design Development

Upon Approval of Master Plan, Prepare Design Development Documents

- Use 22" x 34" size sheets is preferred. Plan information shall be contained within a 21" x 33" framework for eventual reduction to 11" x 17" size.
- The first sheet shall be the Title Sheet and shall include only the following items:
  - Vicinity Map
  - Sheet Index
  - Project Title
  - Consultant/Sub-consultant Names, Addresses and Phone Numbers
  - Professional Stamp with Name, License Number and Expiration Date clearly marked.
  - Signature Block for the Development Services Department, City Engineer, Date.
  - 2" x 2" box for Development Services (Engineering and Building) stamp plans upon approval.
  - ***Do not place general plan notes on this sheet. If space is available, these general notes shall be placed on the appropriate sheet to which the notes apply.***
- The second plan sheet shall be a Scope of Work Sheet. This sheet shall be an overall base plan identifying all types of construction including in project using textures and labels all add alternates and any deferred submittals and, if the project is to be phased, a sheet which clearly delineates the various park elements to be constructed under this contract by use of textures and labels.
- Provide the following individual plan sheets, as required for a complete set of working drawings:
  - Demolition (Use topographic survey, existing trees, wetlands, water courses, other natural features, existing utilities and stubs and other pertinent information as a part of the base map).
  - Grading & Drainage (These two sheets can be combined or separated depending on the amount of information which needs to be conveyed. Also include existing topographic information overlaid in a 35% halftone or CAD equivalent).
  - Erosion Control sheet is for reference only and to facilitate preparation of the Storm Water Pollution Prevention Plan (SWPPP). Include the following note "The SWPPP shall be implemented and monitored by the contractor and shall be a "living document" reflecting the status of construction work as it progresses."
  - Staking & Reference (Include roadway stationing, if applicable; and existing street improvements, including street lights, transformers, fire hydrants, and water storm drain and sewer stubs.)
  - Irrigation

- Planting (show proposed trees and shrubs/groundcover on one plan sheet. Include tree permit conditions and notes, if applicable.)
- Landscape Details
- Other trades' sheets

- The plan scale shall be no smaller than 1" = 30', preferably 1" = 20', unless otherwise approved. All plan sheets shall be drawn at the same scale and the north arrows shall be oriented in the same direction from sheet to sheet.

Specifications

- Revise Table of Contents as needed.
- Cover sheet shall be provided by the City, unless it is a turn-key project.
- Review basic sections provided, edit to reflect project needs.
- (First draft submittal shall show strikeouts and redlines. Do not delete shaded paragraphs until final version.) Non shaded paragraphs can not be modified only paragraphs that are shaded should contain revisions.
- Insert additional sections to reflect project needs consistent with format provided. (Modifications shall be Microsoft Word 2010 compatible, Arial font, 12 pt. Indicate all new sections.)
- Specifications shall be prepared and provided in 8-1/2" x 11" booklet form.
- ***The provision of these specifications does not relieve the Consultant of his/her responsibility to provide detailed and complete contract documents.***

Design Development 75% Completion

The purpose of this submittal is to refine design, select materials and address site issues.

(Note: Design Refinement and Materials Selection can occur before 75% submittal. A submittal is required for Parks internal review and comment. Provide electronic pdf plans which includes, at minimum):

- 100% complete Grading Plan with cut and fill calculations and drainage calculations (per City of Roseville Public Works Construction Standards, latest edition). Indicating number import, export or a balanced project.
- 100% complete Drainage Plan. (See #1 comment above and confirm underground stubs/utilities.)
- Partial Construction/Staking and Reference Plan indicating materials and detail references.
- Electrical Plan showing light location, POC and size of transformer.
- Irrigation Plan showing complete mainline layout with gate valves shown, head layout, controller type and location, sprinkler head type (e.g. model number, manufacturer name, gpm, psi and radius in feet), point of connection location and the static water pressure at the point of connection. For projects where the subdivision has not yet been built, indicate the projected static water pressure at build-out.

- Planting Plan, including a plant list, soils analysis report (report to be consistent with test recommendations per Section 32 90 00- Planting, 1.06), a delineation of turf and groundcover areas, and tree locations.
- 75% of the construction details, including references to the City Standards by detail number.
- Determination of any deferred items have been identified and discussed with Building Department and noted on the plans.
- Updated estimate of probable costs.
- Checklist requirements

The next update to these standards will be in July ~~2021~~2023.

Design Development Completion Checklist

Project Name _____ Reviewed By: _____ Date: __/___/___

Grading

- ☐ Cut and fill calculations provided and addressed on plans.
- ☐ Playfield and courts sloped per Design Guidelines.
- ☐ Adequate level space provided at play fields for spectators.
- ☐ Walkways comply with ADA.
- ☐ Berms do not exceed 30" in height.

Drainage

- ☐ Design complies with Design Guidelines, including drainage calculations.

Site Improvements

- ☐ Layout of all site improvements are clearly shown on base map, including:
  - Fencing
  - Drinking Fountains
  - Site Furniture (benches, picnic tables, etc.)
  - Pavement by type
  - Poured-in-place items, i.e. seat wall, retaining walls, concrete curbs, mowstrips, etc.
  - Hard Court Surfaces
  - Overhead Structures
  - buildings
- ☐ Layout of improvements does not create unsafe conditions or conflict with adjacent uses.
- ☐ Layout complies with Design Guidelines.
- ☐ Proposal of unique construction materials and deferred submittal items are clearly shown. (Further discussion may be necessary).

Play Area

- ☐ Drainage and layout complies with Design Guidelines.
- ☐ Use zones are clearly marked and do not overlap, except between spring toys.
- ☐ A clear path of travel from the play area entrance to the transfer deck is shown in the most direct route.
- ☐ The swing area is visually and/or physically separated.
- ☐ At least one belt swing has an accessible non-friable play surface beneath connected to an accessible pathway.

Irrigation

- ☐ Sprinkler head layout is shown.
- ☐ Controller type and location is shown.
- ☐ Sprinkler types and models are listed.
- ☐ Point of connection and static water pressure (current and projected) is listed.

Planting

- ☐ A preliminary plant list is provided.
- ☐ Species shown on the list comply with Design Guidelines.
- ☐ Trees are shown and turf/groundcover areas are delineated.

The next update to these standards will be in July ~~2021~~2023.

CITY OF ROSEVILLE CALIFORNIA

Parks, Recreation & Libraries Department

Section 2:
CONSTRUCTION DOCUMENTS

Standard Construction Document Preparation Checklist for Parks

Construction Documents Review and Approval Process 99% Completion

(City – wide plan review)

- City-wide plan review of 99% complete Plans occurs through the Online Permitting Services (OPS) Portal and Electronic Plan Review system. Plans and other technical documents must comply with the document submittal requirements outlined by the City of Roseville Development Services Department.

- Upon completion of the documents for submittal, provide the Project Manager with the electronic files for upload to the OPS Portal.

- An Appendix should include the, soils fertility, chemistry, and structure testing lab report, permits (other than City permits), geotechnical report (if necessary), and the environmental document (if necessary) shall be incorporated within the appendix. City shall provide permits, geotechnical report, and environmental documents, as needed for the specific project.

- Include an Estimate of Probable Costs with the 99% submittal.

Construction Documents 100% Completion

- Upon receipt of City comments, revise the plans and specifications and provide written responses to each Department's comments indicating where the changes have been made within the contract documents.

- Resubmit plans and specifications (100%) (quantity of resubmittal shall be as necessary to respond to City comments) to the Project Manager for redistribution. Include written responses to the plan check comments.

- Utility Composite (CAD) drawing required by Environmental Utilities at this stage.

Approved Plans and Specifications

- After all departments have approved the construction documents, submit to the project manager the complete set of plans in AutoCAD 2014 or higher format.

Park Plan Requirement *Checklist (For Use by Consultant prior to submitting plans to the City)*

Date: _____

To: _____

CC: _____

Project: _____

CWJ#: _____ **EN#** _____ **BD#** _____

Plans submitted to the City for review and approval must contain the following components. Provide checklist with plan submittals:

COVER SHEET

- ☐ Project Name and Address
- ☐ CWJ# is noted on the top right-hand corner of the plan sheet
- ☐ Landscape Architect Seal
- ☐ Vicinity Map
- ☐ Signature Block
- ☐ Sheet Index
- ☐ Codes Reference
- ☐ Reference to date specific Parks Construction Standards
- ☐ Cut and fill calculations are provided
- ☐ Deferred submittals and add alternates are listed
- ☐ Each sheet is clearly labeled

SCOPE OF WORK PLAN

- ☐ Street lights and roadways are shown.
- ☐ Limit of work line is shown
- ☐ Match lines are shown
- ☐ ADA routes are indicated
- ☐ City of Roseville Public Improvement and Tree Preservation Notes are clearly labeled.
- ☐ Proposed driveways, sidewalks, access points/ramps and right-of-way improvements shown

EROSION CONTROL PLAN

- ☐ Plan is provided

GRADING & DRAINAGE PLAN

- ☐ Storm drain tie-ins are shown
- ☐ Drainage systems are shown.
- ☐ Contour lines are shown, both existing and future
- ☐ Percentage of slope is shown on all sidewalks, concrete, planter areas, etc.
- ☐ Height of walls, curbs and finish grade elevations are shown.
- ☐ Legend is shown.

LAYOUT & REFERENCE (CONSTRUCTION) PLAN

- ☐ Plan is provided.

The next update to these standards will be in July ~~2021~~ 2023.

CONSTRUCTION DETAILS

- ☐ Play structure components are labeled and safety zones are shown.
- ☐ Construction details are provided.
- ☐ Standards Construction details are shown with Department Head signature or referenced.

IRRIGATION PLAN & DETAILS

- ☐ Potable water connection, irrigation point of connection (POC), meters, backflows and types of waterlines are clearly labeled.
- ☐ Sewer and water tie-ins are shown
- ☐ Irrigation main line layout and the size are clearly labeled
- ☐ Sprinkler head and valve layout is shown.
- ☐ Gallons per minute (GPM) is _____ and is shown.
- ☐ Pounds per square inch (PSI) is _____ and is shown.
- ☐ Irrigation legend is provided.
- ☐ Watering schedule is provided.
- ☐ Controller type is _____ and the location is shown.
- ☐ Standard Irrigation details are shown with Department Head signature or referenced.
- ☐ Backflow/connection details comply with Public Works Standards.

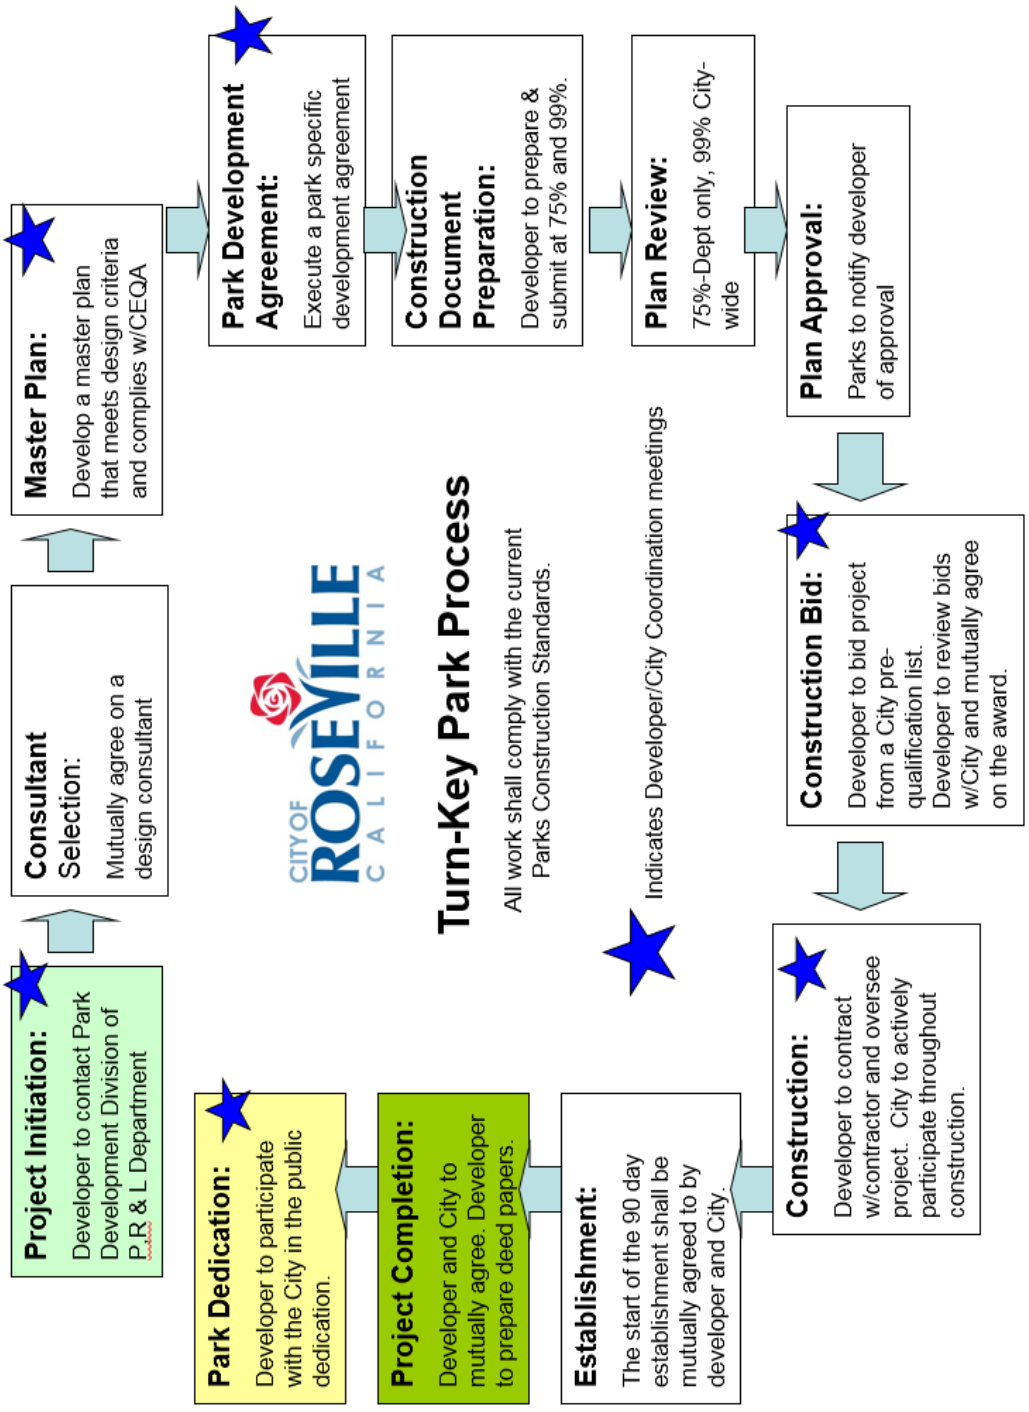
LANDSCAPE PLAN & DETAILS

- ☐ Plant list is provided.
- ☐ Tree and shrub locations are shown and turf/groundcover areas are delineated.
- ☐ Standard Planting details are shown with Department Head signature or referenced.

ELECTRICAL PLAN

- ☐ Electrical point of connection is shown.
- ☐ Available amperage is _____ and is shown.
- ☐ Light locations and types are located and labeled.
- ☐ One-line diagram is provided.
- ☐ Load calculations, voltage, phase, size of main service and location of metered pedestal are shown.

STRUCTURAL COMPONENTS (Building, lights, fences over 6' high, walls over 4' high)



- ☐ Construction details are shown.

As an authorized representative of _____ (firm/company), I have reviewed and verified that the submitted plans contain all of the required items listed above.

Signature _____ Date _____

Print Name _____ Print Firm/Company _____

The next update to these standards will be in July ~~2021~~ 2023.

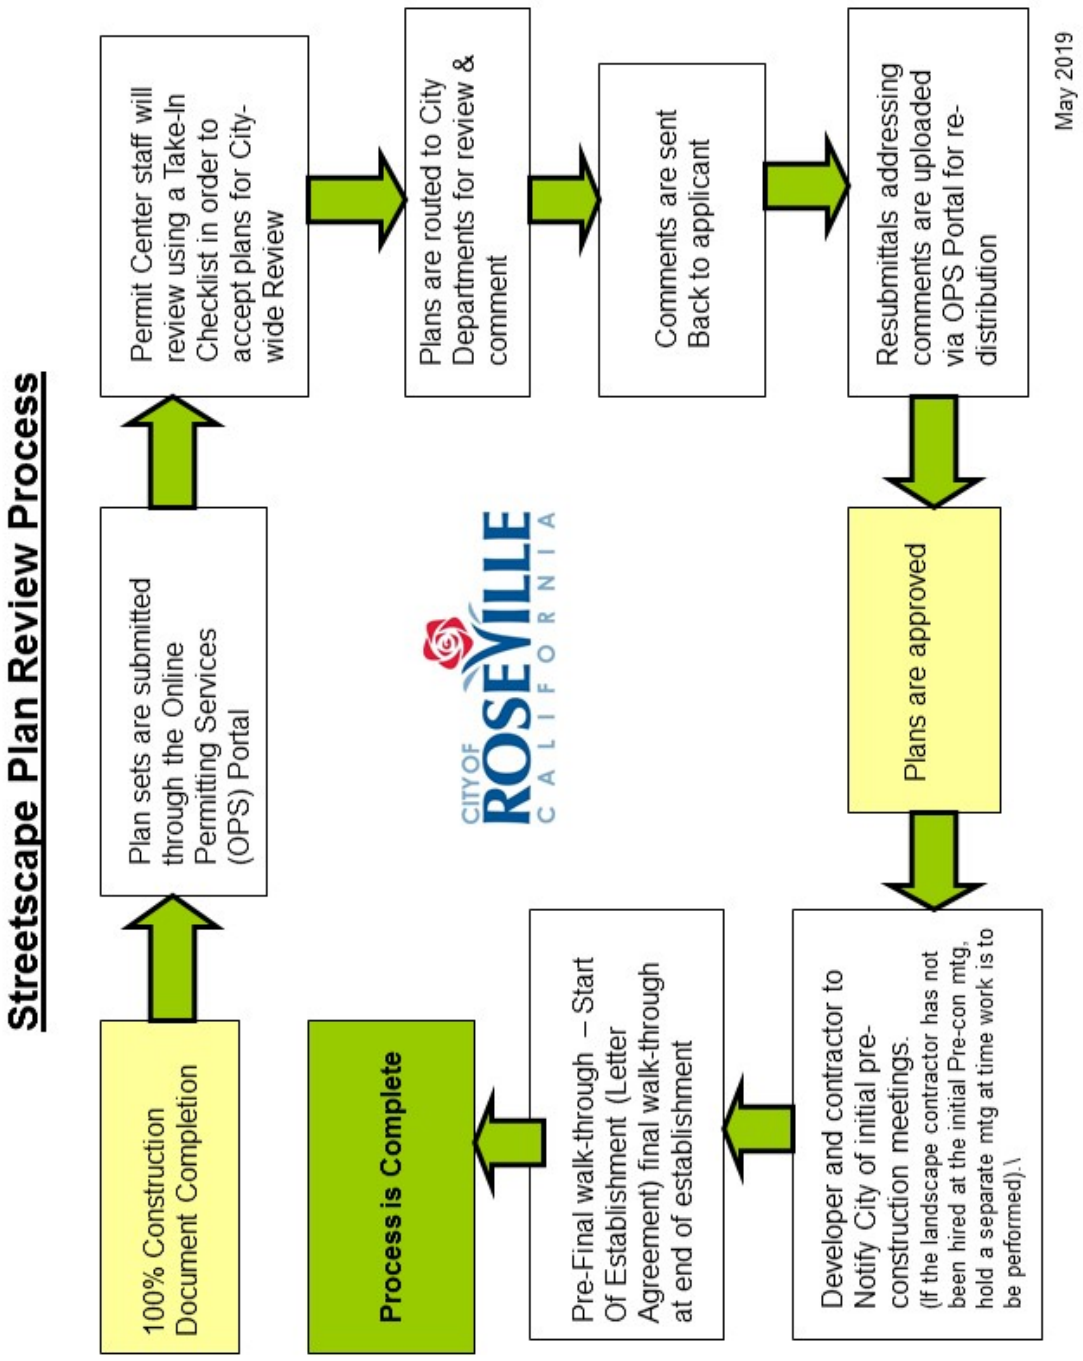
Process for Developer Generated “Turn-Key” Park Projects

Step	The Developer shall…..	The City shall….
1	Contact Parks, Recreation & Libraries, Park Development Division (774-5505) to set up a meeting to review project and process. Include the proposed construction budget and schedule for design, construction document preparation, and construction.	Meet with the Developer to review the project including: process, design criteria, construction budget and schedule.
2	Execute Park Development Agreement between the City and the Developer(s). (Template available upon request.)	Provide input and assistance toward the creation of the Park Development Agreement. Staff to take agreement to City Council for approval.
3	Provide a list of Landscape Architects under consideration to design the park and to provide construction documents for the project on CAD. Landscape Architect must have had previous park design experience, a valid Calif. Landscape Architect license, and have local experience. Submit a statement of qualifications, and an example of full-scale construction drawings to the City for review and approval.	Review submitted materials and provide input. Make recommendations towards the selection of the Landscape Architects and related Consultants based on their qualifications, references and experience.
4	Notify the City of who the recommended Landscape Architect is, prior to award of their contract and start of their work.	Approve selection of Landscape Architect and related Consultants.
5	Download a copy or provide a link of the Parks Construction Standards, which include park design guidelines for use by the Consultant and City Improvement Construction Standards through Development Services.	Provide a link to the Park Construction Standards.
6	Submit to the City a Conceptual Park Plan and an estimate of probable costs, based on the approved specific plan concept, for review and input.	Review and provide input on the submitted plan.
7	Revise the submitted plan, based on City input, for completion of the Final Master Plan. Submit a colored, laminated rendering and an 8-1/2”x 11” black and	Upon receipt of the final master plan, take proposed plan to Parks and Recreation Commission.

The next update to these standards will be in July ~~2021~~ 2023.



Step	The Developer shall…..	The City shall….
7 (Cont'd)	white reduction of the master plan, a digital file of the color rendering and a revised estimate of probable costs.	
8	Developer is responsible for any required permits, and environmental clearances for project. Based on the completed master plan design, contact the City's Environmental Coordinator for environmental review and determination of requirements and/or clearances. (Generally an initial study is required and possibly a negative declaration.)	
9	Submit final master plan with approved environmental documentation and final cost estimate to City for final approval by City Council.	Take the final master plan with environmental determination to the City Council for approval.
10	Provide construction documents based on the Parks Construction Standards, and applicable City Improvement Standards, at Design Development (75%) and 99% completion. At Design Development completion, provide electronic plan files as outlined in the Design Development Section of these Standards. At 99% completion and prior to citywide review, submit complete sets of plans, permit applications, draft specifications consistent with the Construction Document Section of these Standards to the Project Manager for submittal to the Online Portal Services system. An estimate of fees will be calculated by Development Services and will need to be paid by the Developer in order to cover City plan review, GIS/mapping and inspection costs. Unspent balances of the deposit will be returned to the Developer upon completion of the warrantee period.	Review the construction documents at Design Development and 99% completion. At 99% completion, coordinate plan review with other City departments through the city-wide review process.
11	Revise and resubmit to the Parks, Recreation & Libraries Department contact the construction documents to	Assist in obtaining City approvals of the bid package.

Step	The Developer shall…..	The City shall….
11 (cont.)	reflect City comments. At 100% provide written responses to each City comment indicating where in the documents the response to the comment is located. After all Departments have approved the construction documents, submit the bid package (see next page)	
12	Upon receipt of approved plans, obtain list of pre-qualified contractors from City. Certain subcontractor trades are included in pre-qualifications.	Provide pre-qualified contractors/subcontractors' list.
13	Solicit bids for the construction of the project utilizing the pre-qualified contractors list.	
14	Upon receipt of bids, provide the City with the results of the bid. Make recommendations for selection of the contractor and value engineering items, if necessary.	Review and approve bid recommendation. (Value engineering may be necessary if bids are over budget.)
15	If required, hire a park construction inspector, as approved by the City.	Approve or provide a park construction inspector.
16	Upon City approval, register selected contractor with the Department of Industrial Relations, outlining scope of work included in the contract, and proceed with the construction of the project. Notify the City's liaison of the Pre-construction meeting and submit a construction schedule at that time.	All applicable City Dept's to participate in the Pre-construction meeting and ongoing inspections as required.
17	Obtain all applicable City permits, including, but not limited to, grading, drainage, encroachment, building and tree permits. Maintain all inspection cards including Parks inspection card on site to be signed off by inspectors at the time of each inspection.	Provide Parks inspection card.
18	Submit electronic versions of project submittals for review and approval by the City.	Review and stamp submittals. Distribute to applicable City staff and return electronic copy to developer.

The next update to these standards will be in July ~~2021~~ 2023.

Step	The Developer shall…..	The City shall….
19	Developer to provide a professional liaison (i.e. landscape architect or construction manager) to monitor and communicate with the City during the progress of construction and any changes which may need to be considered due to site conditions or other. This shall include the review of any submittals and other shop drawings.	Participate in the on-site review, submittal reviews, and inspections of construction progress. Attend routine construction meetings as needed.
20	Conduct on-site reviews on a weekly basis. Complete establishment period. Conduct a Pre-final and Final site review. Submit certification by landscape architect that park is built according to plans and specifications.	Participate in the Pre-final and Final site review.
21	If a reimbursement is due, submit a detailed cost summary with receipts or approval forms to the City for review, including approved change orders.	Meet with Developer to review final cost summary. Based on agreed cost, process reimbursement to the Developer.
22	Coordinate a meeting with the City to provide turn-over documents as outlined in the Parks Standards.	Facilitate a meeting and collect all turn-in items, including meter numbers for transfer to City.
22	Submit the appropriate documentation for the deeding of the improved park property to the City for recordation. Coordinate with the City Manager's Office. Also switch utility bills from developer to City of Roseville.	Accept the project upon completion of all of the following: formal dedication by the developer, upon satisfactory completion of the project including the maintenance period, and upon receipt of asbuilts.
23	Celebrate with a dedication - Work with City to plan.	Work with Developer to plan dedication of park.
24	Respond on a timely basis to any repairs under the one-year warrantee.	Monitor warranty period and request any repairs.
25		At end of warranty period, provide balance remaining of deposit to Developer.

The next update to these standards will be in July ~~2021~~ 2023.

The next update to these standards will be in July ~~2021~~ 2023.

Streetscape Construction Documents and Plan Processing

Streetscape Construction Document

Streetscapes General

- List the square footages of turf areas and landscape areas individually (by valve number) within the irrigation sheets.
- Redwood header boards are not permitted. Utilize the 12" wide concrete mow bands per Parks Construction Standards.
- Include required notes on all plan sets:
  - "All improvements shall comply with City of Roseville Parks Construction Standards, latest edition".
  - "Contact USA Alert (800) 642-2444 at least 48 hours prior to start of work."
  - "A preconstruction meeting must be scheduled prior to construction commencement of any irrigation and/or landscaping."
- Show accent lighting including model # and type on the plans. In-ground fixtures are not permitted. Lighting located within a turf area is not permitted. Use LED fixtures where possible.
- Subdivision names on entry monuments shall be cast in place or monolithic and bolted. Epoxy placed lettering or logos are not permitted.
- Seat/Planter walls and handrails shall be designed with skate deterrents as an integral part of the design. Third party add-on products such as "Skate Block" are prohibited.

Grading

- All plans shall include grading contours and drainage systems to show how site water is being surface and subsurface drained.
- All berms shall not exceed 30 inches in height; this shall include the height of plant material on the berm at maturity.
- Slopes of any landscaped areas greater than 2% shall locate the toe of slope two feet away from back of walk. The remaining two feet shall be a bench sloped at 2% away from the back of walk.

Irrigation

- Provide water/irrigation schedule on each irrigation plan consistent with requirements outlined in the City's Water Efficient Landscape Ordinance.
- The gallons per minute shall be included for all irrigation nozzles on the irrigation legend.
- Location and size of back flow preventer shall be shown. Provide a detail enlargement of the point of connection.
- Size of the meter, backflow and all valves shall be consistent with the size of the irrigation main line.
- #12 copper tracing wire is required along entire length of irrigation main line.

- Reclaimed water notes shall state compliance with City of Roseville Department of Public Works Design and Construction Standards. If utilizing an existing controller, specify its location and how many stations are available for use. Landscape architect shall verify existing controller conditions.
- All irrigation designs must comply with the City of Roseville Water Efficient Landscape Ordinance.
- Sub-surface irrigation shall be minimally used and only as approved by the Parks, Recreation & Libraries Department. Areas for consideration in allowed used of sub-surface irrigation are corners around monuments and narrow areas less than 3 feet wide. Additional review of drip will be required for changing legislation.
- Do not design streetscapes using booster pumps.

Planting

- Planting and irrigation must be integrated so that like-water use plants are placed together in the same irrigation zone.
- Do not use “No Mow” fescue.
- Large trees shall not be used where planter or median strip widths are less than ten feet wide. Either remove the tree or replace with smaller variety. See Design Guidelines Section for trees specific to planter widths.
- All plans shall include vehicle site distance triangles at all intersections and turn pockets. Site distance triangles shall be verified by the project engineer. No plantings which will grow taller than 12” in height at maturity shall be planted within the site distance triangles.
- All plan sets shall show fire hydrants, streets signs, street lights and underground utility easements. Planting shall avoid conflicts with these improvements.
- Do not plant trees or shrubs in front of irrigation heads.

The next update to these standards will be in July ~~2021~~ 2023.

Streetscapes Plant Species Concern

Botanical Name	Common Name	Concerns	Alternate Suggestion
Agapanthus	African Lily	Limit use, heat and frost sensitive	dwarf variety
Aquilegia formosa	Western Columbine	Short lived species, sun and heat sensitive	Phygelius x rectus 'Winchester Fanfare' or 'Pink Elf' or 'African Queen' or 'Trewidden Pink'
Artemesia californica 'Canyon Gray'	Trailing Sagebrush	Prohibited in the specific plan	Artemisia stellerana 'Silver Brocade' or Lessingia filaginifolia 'Silver Carpet'
Crataegus laevigata	English Hawthorn	Disease prone, do not use	Acer buergeranum 'Streetwise'
Hypericum calycinum	Creeping St. Johnswort	Do not use, this species is invasive	Teucrium chamaedrys 'Prostratum' or Gazania or Erigeron 'Wayne Roderick'
Imperata cylindrical 'Rubra'	Japanese Blood Grass	Winter dormancy, with high water requirements	Pennisetum setaceum 'rubrum'
Lupinus albifrons	Silver Bush Lupine	Short lived	Teucrium fruticans 'Compactum'
Mimulus aurantiacus	Sticky Monkey Flower	Brittle stems and summer dormant	Agastache 'Apricot Sunrise' or 'Tangerine Dreams' or 'Tutti-frutti' (These require good drainage)
Platanus x acerifolia	London Plane Tree	Limit use, do not use in planters less than 10' wide	
Pinus spp	Pines	Structurally unsound	
Rosmarinus officinalis	Rosemary	Collects trash too rangy	

The next update to these standards will be in July ~~2021~~ 2023.

Plan Approvals and Construction

- Plans approved more than two years prior to the start of construction shall comply with the current Parks Construction Standards and may require a new review at the time of construction.
- Contractor shall include Parks, Recreation & Libraries Department in the initial pre-construction meeting.
- Due to the delay in time between the initial pre-construction meeting and landscape work, the Contractor shall call for a second pre-construction meeting with Parks, Recreation & Libraries prior to start of irrigation work. This includes any proposed impacts to existing irrigation systems already under City operations. The landscape subcontractor shall be in attendance.
- All streetscapes are required to be inspected by the City of Roseville Park Inspector at key milestones of the project. A construction inspection card specific to streetscapes will be presented at the preconstruction meeting and must be kept at the construction site at all times. The Inspector must approve and sign each construction milestone listed on the inspection card at the time of inspection. Signing off of all phases/milestones at the end of the project is not permitted.

The next update to these standards will be in July ~~2021~~ 2023.

CITY OF ROSEVILLE CALIFORNIA

Street Landscape Plan Requirement *Checklist (For use by the Consultant prior to submitting plans)*

Date: _____

To: _____

CC: _____

Project: _____

CWJ#: _____ **EN#** _____ **BD#** _____

Plans submitted to the City for review and approval must contain the following components:

COVER SHEET

- ☐ Project Name and Address
- ☐ CWJ# is noted on the top right-hand corner of the plan sheet
- ☐ Architect or Engineer Seal
- ☐ Vicinity Map (Context of the property is shown with adjacent land uses labeled.)
- ☐ Signature Block
- ☐ Sheet Index
- ☐ Reference to date specific Parks Construction Standards
- ☐ Individual square footage of turf areas and landscape areas are listed.
- ☐ Each sheet is clearly labeled

GRADING & DRAINAGE PLAN

- ☐ Storm drain tie-ins are shown
- ☐ Drainage systems are shown.
- ☐ Contour lines are shown, both existing and future
- ☐ Percentage of slope is shown on all sidewalks, concrete, planter areas, etc.
- ☐ Height of walls, curbs and finish grade elevations are shown.
- ☐ Legend is shown.

LAYOUT & REFERENCE (CONSTRUCTION) PLAN

- ☐ Plan is provided.
- ☐ Street lights and roadways are shown.
- ☐ Limit of work line is shown
- ☐ Match lines are shown
- ☐ Proposed driveways, sidewalks, access points/ramps and right-of-way improvements are shown
- ☐ Major sewer, water and storm drain lines are shown.
- ☐ Fire hydrants are shown

IRRIGATION PLAN & DETAILS

- ☐ A master irrigation plan showing points of connections/sizes, sleeves/sizes, valbes/sizes, mainline/sizes and controller locations shall be included in all phased plans sets.
- ☐ Areas that are to be City maintained and privately maintained are clearly labeled.
- ☐ Irrigation water point of connection (POC), meters, backflows and types of waterlines are clearly labeled.
- ☐ Irrigation main line layout and the size are clearly labeled
- ☐ Sprinkler head and valve layout is shown.
- ☐ Gallons per minute (GPM) is _____ and is shown.

The next update to these standards will be in July ~~2021~~ 2023.

☐ Pounds per square inch (PSI) is _____ and is shown.
☐ Irrigation legend is provided.
☐ Watering schedule is provided.
☐ Controller type is _____ and the location is shown.
☐ Standard Irrigation details are shown with Department Head signature or referenced.
☐ Backflow/connection details comply with Public Works Standards.

LANDSCAPE PLAN & DETAILS

☐ Areas that are to be City maintained and privately maintained are clearly labeled.
☐ Plant list/legend is provided and is consistent with the specific plan design guidelines and Parks Construction Standards.
☐ Tree and shrub locations are shown and turf/groundcover areas are delineated.
☐ Site distance triangles are shown.
☐ Standard Planting details are shown with Department Head signature or referenced.

ELECTRICAL PLAN

☐ Electrical point of connection is shown.
☐ Available amperage is _____ and is shown.
☐ Light locations and types are located and labeled.
☐ Load calculations, voltage, phase, size of main service and location of metered pedestal are shown.

STRUCTURAL COMPONENTS (Building, lights, fences over 6' high, walls over 4' high)

☐ Construction details are shown.

As an authorized representative of _____ (firm/company), I have reviewed and verified that the submitted plans contain all of the required items listed above.

Signature _____ Date _____

Print Name _____ Print Firm/Company _____

The next update to these standards will be in July ~~2021~~ 2023.

CITY OF ROSEVILLE CALIFORNIA

Parks, Recreation & Libraries Department

In order to ensure the most up-to-date version, hard copies of the Buildings & Grounds Section is provided as a supplemental. In all cases, the Buildings & Grounds Section is considered a part of these Parks Construction Standards.

Consultants to add new sections and/or edit existing sections as needed to reflect specific project needs. New sections shall be formatted to match those included in these standards.

APPENDICES

A: Irrigation Schedules # pages
B: Soils Fertility Report # pages
C: Permits (provided by the City/Project Owner) # pages
D: Environmental Document (provided by the City/Project Owner) # pages
E: Geotechnical Report (provided by the City/Project Owner) # pages

Consultant to add or delete sections/appendices as they apply to specific project needs. Items noted to be provided by the City shall be identified on a project by project basis.

SECTION 00 31 46
PERMITS

PART 1 - GENERAL

1.01 General Requirements

A. The requirements set forth in the General Conditions shall be in addition to the standards provided herein.

B. The requirements set forth in the Supplemental Conditions shall be in addition to the standards provided herein.

C. The intent of this Section is to furnish bidders with the known list of required permits for the Work under the Contract Documents. Bidders should note that the list is not necessarily complete and that additional requirements may exist or arise.

1.02 Permits

A. The Contractor shall obtain copies of the following permits from the Project Manager. Copies of these shall be obtained prior to start of work and shall be kept on the jobsite.

1. State Water Resources Control Board General Permit for Discharges of Storm Water Associated with Construction Activity:

   The City has prepared and submitted the SWPPP and Notice of Intent (NOI) to the State Water Resources Control Board. Prior to starting construction, Contractor shall obtain coverage under and comply with the General Permit for Discharges of Storm Water Associated with Construction Activity (Construction General Permit Order 2009-0009-DWQ). The City will prepare and submit the NOT when permanent BMP's have been installed.
2. City of Roseville Department of Development Services, Encroachment Permit for all Work related to this project.
3. City of Roseville Department of Development Services, Grading Permit for all Work related to this project.
4. City of Roseville Department of Development Services, Building Permit for all structural items associated with this project, including, but not limited to, lighting, backstops, restrooms, shade structures, drinking fountain (plumbing code), and miscellaneous electrical.
5. California Department of Fish & Game, Section 1601 Streambed Alteration Agreement: Owner has applied for and obtained the Section 1601

Agreements to allow work within streambeds and banks. A copy of the permit is included in the Appendix of the Project Manual.

6. City of Roseville Planning Department, Tree Permit: Owner has applied for and obtained a tree permit to allow removal or encroachment under Heritage Oaks.

B. Contractor shall comply with the conditions of these permits, and will be solely responsible for all costs associated with meeting permit conditions unless specifically specified otherwise in these Contract Documents.

C. A copy of the permit is included in the Appendix of the Project Manual. A trench/excavation permit must be on file with the City. Submit a copy of the notification letter to CAL OSHA, which outlines the project, and contracted scope of work.

PART 2 - PRODUCTS

Intentionally left blank.

PART 3 - EXECUTION

Intentionally left blank.

END OF SECTION

SECTION 01 10 00
SUMMARY OF WORK

PART 1 - GENERAL

1.01 General

A. The requirements set forth in the General Conditions shall be in addition to the standards provided herein.

B. The requirements set forth in the Special Conditions shall be in addition to the standards provided herein.

1.02 Project Description

A. Project Name and address:

Sample Project Name
123 Main Street Roseville

B. Project description/scope of work:

The scope of this project includes …

C. The Contractor, prior to submission of his bid, shall visit the site and become familiar with the physical site conditions, the plans and specifications. All existing site conditions, apparent in a detailed, on-site inspection, shall be a part of the project. Submission of a bid shall represent the Contractor's acknowledgment of the existing site conditions and its effect on the implementation of the contract documents.

1.03 Engineering

A. Field Engineering, as a part of this contract, shall include:

1. Layout of the work and establishment of lines and grades.
2. Said work to be performed by a California Registered Civil Engineer or a California licensed Land Surveyor.
3. When discrepancies between the drawings and actual site conditions are discovered, notify the Inspector for instruction on how to proceed.
4. All work shall:
   a) Establish indicated layout in relation to the property survey and existing reference points.
   b) Establish and preserve permanent reference points during the course of construction.
   c) Set locations and elevations of all site elements as required for proper completion of the work.

1.04 Permits, Fees and Notices

A. The Contractor and/or his assigned Subcontractors shall obtain any and all required permits (beyond those provided in the Appendix) from all governing authorities, including other City Departments, prior to start of construction.

1.05 Construction Plans

A. Any discrepancies or omissions found in the Contract Documents shall be reported to the City's project manager immediately. The City's project manager will clarify discrepancies or omissions, in writing, within a reasonable time.

B. In resolving inconsistencies among two or more sections of the Contract Documents, precedence shall be given in the following order:

1. Notice to Contractors
2. Special Provisions
3. City of Roseville Parks Construction Standards
4. City of Roseville Design and Construction Standards
5. Drawings

Addenda shall take precedence over all sections referenced therein. Figure dimensions on Drawings shall take precedence over scale dimensions. Detailed Drawings shall take precedence over general Drawings.

1.06 Definitions

A. The term "accepted" where used within, shall mean accepted in writing by the City of Roseville's Project Manager.

B. The term "Inspector", where noted, shall mean the project representative, appointed by the City of Roseville, who will oversee the project on a day-to-day basis.

C. The term "Project Manager", where noted, shall mean the project representative appointed by the Parks Department.

D. The term "Consultant", where noted, shall mean the prime Consultant listed on the cover sheet of these Specifications.

E. The term "accepted equal", where used herein, shall mean the equal in the opinion of the Project Manager, in consultation with the Consultant, when necessary, and as accepted in writing by the Project Manager.

F. The term "Project Owner", where used herein, shall mean the landowner or developer.

G. The term "provide", where used herein, shall mean furnish and install complete.

H. The term "as selected", where used herein, shall mean as selected by the Consultant and as accepted by the Project Manager.

I. The term "substantially complete", where used herein, shall mean the state of which the project can be used in the manner of which it is intended with the exception of minor items as determined by the Project Manager.

J. See Section 1 of the General Conditions for additional definitions and terms.

1.07 Standards

A. Numerous standards are referenced in these contract documents. The referenced standards shall be the current edition as of the date of these contract documents. Also, see Section 4 - 1.02 of the General Conditions.

B. The codes adopted by the City, County, State and federal agencies shall govern minimum requirements for this project. Where codes conflict with these Specifications, the more stringent shall apply, and such conflicts shall be brought to the attention of the Project Manager. Caltrans Standards shall be applied where specifically referenced. In the absence of specific reference requirements in the contract documents, the applicable codes shall govern.

C. In addition to the standards noted in individual sections of these Specifications, standards of the following organizations shall be noted by initials only.
   1. ANSI: American National Standards Institute.
   2. ASTM: American Society for Testing and Materials.

1.08 Submittals

A. All submittals shall be submitted at one time within ten (10) working days from issuance of Notice to Proceed. The review time for submittals shall be as noted in Section 2 - 1.04 of the Special Conditions. Items returned for re- submittal shall be returned to the City within two weeks

B. The Contractor shall include a cover sheet indicating the following (A sample is provided in Section 5: Forms):
   1. Drawing sheet or specification section reference (by section, paragraph and sub-paragraph numbers);
   2. Item description;
   3. Indication whether this item is “as specified” or “proposed substitution” and
   4. A space for itemized response summary, e.g. “reviewed” or “resubmit”.

C. Contractor shall provide submittals electronically in PDF file format and physical product samples as required in specifications.~~submit a minimum of two copies/samples of each submittal.~~ It shall be the Contractor’s responsibility to ensure that the summary sheet ~~and the appropriate number of copies are~~is included in the submittal package. Incomplete submittal packages (i.e., the lack of a summary sheet or lack of ~~the~~an appropriate ~~number of copies~~product sample) will not be reviewed.

D. Proposed substitution requests must include a comparison between the originally specified item and the proposed substitute. The burden of proof of compliance for proposed substitutions with project requirements rests with the Contractor. Coordination of the installation of accepted substitutions, including

incidental changes/modifications to accommodate proposed products shall be at no additional cost to the Owner.

E. Where required in specified Section of these Specifications, submittals shall include proof of order of site furnishings, play equipment or other materials within two weeks (ten working days) ~~from issuance of Notice to Proceed~~of receipt of the returned, approved submittal. Submittals of orders shall be made at one time. Exceptions will be considered, with justification.

1.09 Tests

A. In addition to Section 4 - 1.03 of the General Conditions, testing and inspections may be performed by a private testing laboratory. The testing laboratory, provided by the City, shall be under the direction of a California registered civil engineer. All work shall conform to requirements set forth by ASTM B329, and shall be acceptable to the City.

B. Copies of the laboratory reports/results of each test or inspection shall be provided to the Project Manager, Inspector and Contractor.

1.10 Temporary Facilities

A. Sanitary provisions shall be the responsibility of the Contractor. Existing restroom facilities shall be not utilized by the Contractor, his Sub-contractors, or employees thereof, unless specifically accepted by the Project Manager. Provide chemical toilets or water closets and urinals connected to the sewer in a location accepted by the Project Manager.

B. Barricades shall be the responsibility of the Contractor and shall be erected as necessary to protect the property, the construction and the public from hazards due to construction.

C. Signs, other than those identified in these Specifications, shall be prohibited. Notices, required by law, shall be posted and maintained.

1.11 Utilities

A. All utility fees, including, but not limited to, connection fees, installation fees, meters, monthly service fees and cost of utilities used during the course of construction and establishment are considered a direct cost and are the responsibility of the Contractor until project acceptance by City Council.

1.12 Dust/Noise Control Requirements

A. Dust and other air pollution nuisances on or adjacent to the site shall be abated, per Section 2 - 1.07 of the General Conditions. Dirt shall not be allowed to accumulate on streets or sidewalks nor be washed into sewer. ~~The Contractor shall install silt basin, silt fences or other physical means to prevent winter run-off or dry season flow passing through the site.~~

B. Noise from construction operations shall be kept to a minimum. Allowable hours of operations shall be from 7 a.m. to 7 p.m. Monday through Friday. Work on weekends and holidays must be approved by the project manager. Work on weekends and holidays shall not begin before 8 a.m. and must be completed by 8 p.m.

1.13 Tree Replacement Schedule

A. Trees damaged or removed without prior approval shall be replaced at an inch per inch basis on-site, except otherwise accepted. New stock shall follow the table provided:

Plant Size	Inch Value
3 Five Gallon Stock	One Inch
1 Fifteen Gallon Stock	One Inch
1 24” Box Stock	Two Inches
1 36” Box Stock	Three Inches

1.14 Inspection of Construction

A. In addition to the routine inspections performed by the Parks Inspector, portions of work may be inspected by the other city departments. Notify the Parks Inspector and Project Manager a minimum of 48 hours prior to date of inspection.

B. The Parks Inspector shall be the main line of communication between the site superintendent, the project manager and other City department inspectors. Changes in scope of work or standards shall be approved by the project manager.

C. Refer to the parks inspection record. This shall be issued at the Pre-Construction meeting and shall be utilized by the Contractor throughout the course of construction. A completed “hard card” shall be submitted to the Project Manager along with required turn in items (See 1.~~15~~ 19 this Section) upon final acceptance of the project. The Notice of Completion shall not be filed until all record documents have been received and accepted.

1.15 Adverse Impacts to Site Conditions Due to Construction

A. Impacts that affect the site conditions to the detriment of the park or streetscape Impacts that affect the site conditions to the detriment of the park or streetscape construction or long term viability of the site shall be mitigated by the contractor prior to acceptance of the project. Such impacts shall include, but are not limited to:

1. Soil compaction in non-structural areas;
2. Diesel or gas fuel leaks/spillage;
3. Buried concrete or other construction debris;
4. Hazardous material contamination;

5. Lime treatment in planting areas;
6. and more.

1.16 Pre-final (Punch List) Review

A. Notify, in writing, to the Parks Construction Inspector, that the work is substantially complete. Substantially complete is defined as "the state of work where it may be used in a suitable and intended manner with exception of minor corrections". Partial acceptances will not be granted. Items to be reviewed as a part of substantial completion include:
   1. All construction items
   2. Installation of all site furnishings, including lights and signs
   3. Seeding or sodding of all turf areas
   4. All planting, including weeding of planted areas
   5. The irrigation system is fully functioning as designed and as confirmed by the landscape irrigation audit.

B. Within five workings days of receipt of notification, the Parks Construction Inspector will confirm substantial completion. The Parks Construction Inspector will schedule the punch list walk (pre-final review) within five working days after the project has been determined as substantially complete. A formal punch list will be developed at the punch list walk. The Parks Construction Inspector will provide a copy of the formal punch list to the Contractor within five working days of punch list walk. Performance of the punch list walk does not automatically trigger the start of establishment.

~~B. Upon field confirmation by the Parks Construction Inspector regarding substantial completion, a pre-final (punch list) walk-through will be conducted within seven (7) calendar days of receipt of notification. A formal punch list will be developed at that time. Performance of the pre-final (punch list) review shall not automatically trigger the start of establishment.~~

   1. If at any point during this review that it becomes apparent that the Contractor has not properly prepared for the site review, the inspection shall immediately be terminated and re-scheduled at such a time as the site has been readied for a review. Any costs for the re-scheduling of the review shall be the responsibility of the Contractor. Lack of site preparation could delay start of the establishment period.

C. ~~The pre-final (punch list) review shall occur within one (1) business week after the project has been determined as "substantially complete".~~ Concurrent to the pre-final review~~y~~, the City will make a formal request for all required turn-in items to be submitted to the City. All turn-in items shall be submitted to the City (single point of contact), at one time and only by appointment. Do not drop off the turn-in items at the front counter and without an appointment.

Formatted: Indent: Left: 0.75", No bullets or numbering

D. Once all turn-in items have been confirmed to be complete and accurate, the establishment period may be considered to begin. The City shall have sole discretion in determining the appropriateness of the commencement of the establishment period and shall notify the developer/contractor in writing of the start and end dates. Portions of the project will not be accepted for establishment prior to the substantial completion of the entire project.

1.17 Establishment Period

A. The duration of the establishment period shall be:
   1. For seeded turf in parks: Ninety (90) calendar days, minimum, and until the Notice of Completion (NOC) for City-built parks has been approved by the City Council, or the deed transferring property ownership, has been recorded at the County for Developer-built parks.
   2. For sodded turf in parks: Forty-five (45) calendar days commencing between March 1st and October 31st and sixty (60) calendar days commencing between November 1st and February 28th, and until the Notice of Completion (NOC) for City-built parks has been approved by the City Council, or the deed transferring property ownership, has been recorded at the County for Developer-built parks.
   3. For streetscapes: Thirty (30) calendar days, minimum, and until final acceptance of all related street improvements subject to approval of a ~~Certificate~~ Notice of Completion by the City Council.

B. Active maintenance is required throughout the entire establishment period. Active maintenance is defined as:
   1. All areas within the project site shall be protected against damage including vandalism, erosion, trespass, rodents and other acts. Immediately repair all damaged areas.
   2. All walkways and paved areas shall be kept clean and all debris within planting and turf areas shall be immediately removed.
   3. Automatic irrigation controller shall be fully utilized and irrigation system monitored and adjusted as described in Section 32 84 00 4.03.
   4. All plant and turf maintenance as described in Section 32 90 00 3.11

C. Prior to the start of the final thirty (30) days of establishment:
   1. All punch list items shall be completed.
   2. All certifications and testing shall be completed.
   3. All plantings and turf shall be thriving and in a healthy condition.
   4. The lack of active maintenance prior to the final thirty (30) days may constitute a delay in the start of the final thirty (30) days of the establishment period.

1.18 Final Review

A. One (1) week prior to the end of the establishment period, a final on-site review shall be conducted to review project readiness for final turn-over. All punch list items must be satisfactorily addressed prior to the final review.

B. The project shall be prepared and cleaned per Section 2 - 1.12 of the General Conditions; the turf shall be mowed; and the irrigation heads shall be adjusted appropriately one day prior to the scheduled final review.

C. Acceptance of the project shall be considered "field accepted" and a recommendation will be forwarded to the City Council for "final acceptance" per Section 7 - 1.01 of the General Conditions.

D. An unaccepted project shall extend the establishment period until such time as the unaccepted portions of the project have been reviewed and field accepted by the Inspector and Project Manager.

E. Turn over for City maintenance shall occur only after:

1. The specified duration of the establishment period has been successfully completed.
2. If required, the deed transferring property ownership, has been recorded at the County.
3. A ~~Certificate of Compliance (COC) for streetscapes or~~ Notice of Completion (NOC) for city~~-~~-built parks and for streetscapes has been approved by the City Council.

F. Contractor shall provide a written guarantee covering all improvements associated with this project. See 1.19 – Warrantees and Guarantees.

1.19 Record Documents

A. Record documents or as-built plans shall be maintained on-site and updated routinely as specified in Section 2 - 1.13 of the General Conditions. Record documents shall include **all items under the contracted scope of work**.

B. Record documents shall be submitted:

1. one full size set of final as-built drawings (verified/initialed by the Parks Inspector during the establishment period)
2. one set of 11 x 17 reductions of the complete as-built package; and
3. two sets 11 x 17 laminated reductions of the irrigation plan illustrating with colors the individual controller stations; and
4. one USB storage device containing PDF scanned images (in color) of the verified/initialed ~~-~~as-built drawings.
5. For City of Roseville CIP projects, SWPPP binder.

1.20 Warranties and Guarantees

A. Warranties are required under various Sections of these Specifications. Prior to final acceptance, the Contractor shall assemble all warranties into a single,

bound or stapled package. All ~~warrantees~~ warranties shall be clearly labeled and the number of years highlighted. Also, see Sections 7 - 1.10 and 7 - 1.11 of the General Conditions.

1. Warranties for equipment shall be submitted in the manufacturer's standard form and shall be countersigned by the subcontractor or supplier and the Contractor.
2. All other warranties shall be provided in the following format, written on subcontractor's or supplier's letterhead, signed by the subcontractor or supplier and countersigned by the Contractor:

WARRANTY FOR _____ YEARS

"We hereby warrant that the ***product*** which we have installed at ***project name*** has been done in accordance with the contract documents, and that the work, as installed will fulfill the warranty requirements included in the Specifications.

We agree to repair or replace any or all of our work, together with any other adjacent work which may be displaced by so doing, that may prove to be defective in its workmanship or material within the warranty period stated above commencing from the date of final acceptance of the above named project by the City of Roseville's City Council, without additional expense to the City, ordinary wear and tear and unusual abuse or neglect excepted.

In the event of failure to comply with the above conditions within thirty (30) days of notification by the City, we collectively or separately do hereby authorize the City to proceed with the repairs or replacement of such defects at our expense. Payment of said costs and charges will be forwarded to the City upon demand.

Signed: _____ _____
Subcontractor or Supplier Date

Countersigned:_____ _____
Contractor Date

B. Guarantees shall be a minimum of one (1) year for all plant material, including trees and shrubs. The guarantee shall state that plant materials (trees & shrubs) to be free of all defects or disease and all plants are in a healthy and thriving condition at the completion of the contract. Deciduous plant material shall be warranted beyond the time of contract completion until such time as growth becomes evident.

SECTION 01 57 23
STORM WATER POLLUTION CONTROL

PART 1 - GENERAL

1.01 General

A. The requirements set forth in the General Conditions shall be in addition to the standards provided herein.
B. The requirements set forth in the Special Conditions shall be in addition to the standards provided herein.

1.02 References

A. State Water Resources Control Board Order No. 2009-0009-DWQ National Pollutant Discharge Elimination System General Permit No. CAS0000002, for Storm Water Discharges Associated with Construction and Land Disturbance Activities.
B. CASQA California Stormwater BMP Handbook – Construction, November 2009

1.03 Definitions

A. NOI: Notice of Intent
B. NOT: Notice of Termination
C. QSP: Qualified SWPPP Practitioner
D. QSD: Qualified SWPPP Developer
E. SWPPP: Storm Water Pollution Prevention Plan
F. SWRCB: State Water Resources Control Board
G. NPDES: National Pollutant Discharge Elimination System General
H. WDID: Waste Discharger Identification number
I. BMP: Best Management Practices

PART 2 - PRODUCTS

Intentionally left blank.

PART 3 - EXECUTION

3.01 SWPPP

A. Comply with State Water Resources Control Board Order No. 2009-0009-DWQ National Pollutant Discharge Elimination System General Permit No.

CAS0000002, for Storm Water Discharges Associated with Construction and Land Disturbance Activities.

B. A SWPPP has been developed for this project. The SWPPP is a dynamic document and will change as conditions (weather or construction phases) warrant.
C. Implementation of the SWPPP is the responsibility of the Contractor and a part of this project. Costs associated with implementation and maintenance of the BMPs per the SWPPP shall be included in the lump sum base bid.
D. Major changes to the SWPPP shall be reviewed by the City's QSD prior to implementation. Cost associated with the major changes will be paid for using the unit cost listed in the Additions or Deletions Sheet of the Proposal
E. The City's QSP will perform weekly inspections of the jobsite. Implementation of and minor changes to the SWPPP as directed by the City's QSP shall be incidental to the Work. Contractor shall start all inspection corrective actions within 72 hours of observation, and complete as soon as possible.
F. All BMPs installed will be inspected by the City's QSD/QSP for compliance with the SWPPP and BMP Fact Sheets. BMPs that are not in compliance shall be brought into compliance by the Contractor at no cost to the City.
G. Keep one copy of the SWPPP and amendments at the project site.
H. The SWPPP shall be readily available throughout the course of construction and until the NOT has been accepted by SWRCB. The SWPPP shall be made available upon request by a representative of the Regional Water Quality Control Board, State Water Resources Control Board, United States Environmental Protection Agency, or City' storm water staff.
I. At the end of the establishment period, the Contractor shall submit the project site copy of the SWPPP including copies of all inspections, Rain Event Action Plans (REAPs), reports, and sampling and analysis results to the City's Project Manager.

3.02 Schedule

A. Contractor shall develop a Water Pollution Control Schedule that describes the timing of grading or other work activities that could affect water pollution. The schedule shall be updated by the Contractor to reflect changes in the Contractor's operations that would affect the necessary implementation of water pollution control practices. The typical sequence of work shall be adjusted by the Contractor based on weather conditions and forecasted rain events. The schedule is considered an appropriate and applicable BMP.

3.03 Penalties and fines

A. Contractor is responsible for all penalties and fines assessed to or levied on the project related to the implementation of the SWPPP.

B. In an effort to maintain compliance with the General Permit, the Contractor may be asked to make changes to the BMPs. If the Contractor is unable to perform these services in a timely manner the City reserves the right to address any areas of concern and deduct the cost from the contract.

3.04 ~~Inlet Filters~~BMP's

A. ~~Drain inlet filters may be employed in lieu of straw bales. Horizontal mesh filters attached to the top of or below the drain inlet grate shall not be allowed. Only high flow volume, bag type filters or others as accepted by the Public Works Inspector shall be used~~Construction BMP's shall be installed per the Erosion / Sediment Control Plan and project SWPPP, and in accordance with the CASQA California Stormwater BMP Handbook. Use of alternative BMP's will be reviewed and accepted at the discretion of the City's QSD..

~~3.05 Silt Fence and Straw Wattles~~

~~A. Silt fences and straw wattles may be employed in lieu of, and are preferred to straw bales.~~

~~3.06 Slope Protection/Erosion Control~~

~~A. All slopes greater than 10:1 shall be covered with broadcast straw at a rate of 50 bales or 4,000 pounds per acre. Slopes exceeding 4:1 shall have straw pressed in place or a tackifier shall be applied.~~

~~B. All slopes along building frontages (from the building setback line to the City right-of-way) exceeding 4:1 shall have erosion netting installed (jute or as accepted by the Public Works Inspector).~~

~~C. Slopes steeper than 4:1 and adjacent to City of Roseville right-of-way, flood plains, natural drainages, park land or designated open space shall require broadcast seeding and shall be covered with straw matting.~~

~~D. Hydroseed shall not be used on slopes where broadcast straw, erosion netting or straw matting are specified above, except as an additional measure to them. Within a site, protection of bare and/or disturbed slopes which are isolated from areas requiring erosion protection shall be addressed on the plans. Hydroseeding may be an acceptable alternative in isolated expanses, regardless of slope.~~

~~E. From the back of City sidewalk to 25 feet back, all disturbed, bare slopes of less than 10:1 shall be hydroseeded. Broadcast straw as specified above for 10:1 or steeper slopes is an acceptable option.~~

~~3.07 Straw Bales~~

~~A. Straw bales shall be stockpiled on the site at a rate of 1.5 bales per acre by October 1. Measures shall be provided to keep straw dry.~~

~~**3.08 Silt Controlling Devices**~~

~~A. Use of alternative silt controlling devices will be review and accepted at the discretion of the City's QSD.~~

~~**3.09**~~**3.05 Cleaning**

A. Thoroughly clean all areas where work has occurred. Remove from the site excess material, debris and rubbish.
B. Take all precautions to protect completed work. Immediately repair or replace all damaged areas due to tire ruts, erosion, compaction failure, etc. Keep all erosion control measures intact.

Delete this article if winter suspension is not required

~~**3.10**~~**3.06 Winter Construction Suspension**

A. Contractor shall include a winter construction suspension as part of the construction schedule. The counting of working days will be suspended during the winter suspension period. It is at the City's sole and complete discretion to determine the start and end dates of the winter construction suspension. The City will notify the Contractor 10 working days before the start of the winter construction suspension. The City will notify the Contractor 10 working days before the end of the winter construction suspension. The Contractor shall begin work within 15 calendar days after receiving the notice of the end of the winter construction suspension.
B. Contractor shall include an allowance of *($15,000)* for the winter construction suspension. Costs associated with preparing the site for the winter construction suspension and costs associated with corrective actions required during the winter construction suspension will be paid for using the allowance on a Time & Materials Basis according to the allowable mark-ups in the project's General Conditions. Costs to implement and maintain the BMPs per the Erosion and Sediment Control Plan are excluded from the winter suspension allowance and shall be included in the lump sum base bid.
C. Prior to the winter construction suspension, stabilize all exposed soils ~~with hydroseed and straw. Hydroseed shall consist of annual rye grass seed at 20 lbs/acre and mulch at 1 ton/acre. Straw shall be placed at 2 tons/acre and tackifier shall be placed over the straw to prevent dislocation by wind~~at the direction of the City's QSD/QSP. In addition, all adjacent drainage inlets shall be protected and perimeter control shall be installed and in good repair.
D. Traffic on the construction site shall be kept to minimum. All traffic entering or exiting the site must use the stabilized construction entrance.
E. Where there are areas of concentrated runoff flows, Contractor shall protect the soil from erosion.

F. Per the Construction General Permit Requirements, inspections by the City's QSD/QSP will continue into and through the winter suspension period. Inspections will occur before, during, and after each qualifying storm event (0.5" or more precipitation) and at least once per week. Contractor shall start all inspection corrective actions within 72 hours of observation, and complete as soon as possible.
G. Should rain be forecast at 50% or better by NOAA, the City's QSD/QSP will prepare a Rain Event Action Plan (REAP) and email such document to the Contractor. Contractor shall complete all corrective actions within the REAP prior to the start of precipitation.
H. The City's QSD/QSP will be sampling all discharge to ensure compliance with runoff standards for pH and turbidity. If the water sampling indicates compliance issues, Contractor shall make repairs or adjustments to BMPs immediately, and respond to any such requests within 24 hours.

END OF SECTION

SECTION 03 30 00
SITE CONCRETE

PART 1 - GENERAL

1.01 General Requirements

A. The requirements set forth in the General Conditions shall be in addition to the standards provided herein.
B. The requirements set forth in the Supplemental Conditions shall be in addition to the standards provided herein.
C. The standards set forth in the City of Roseville Design and Construction Standards and the City of Roseville Parks Construction Standards, latest editions, shall be in addition to the standards provided herein.

1.02 Description

A. Furnish all labor, materials and equipment for the complete installation of all concrete work, flatwork and poured-in-place as shown in the Plans and as specified herein.

1.03 References

A. Caltrans Standard Specifications, latest edition.
B. California Building Code (CBC) and California Administrative Code (Title 24), latest editions.

1.04 Quality Assurance

A. For all flatwork, the Contractor shall pour a six-foot by six-foot (6" x 6") sample of each type of finish specified for review and acceptance by the Project Manager prior to pouring any concrete. The accepted samples shall remain on-site and intact until all concrete work has been completed. The quality of the concrete work shall be measured by the accepted samples.
B. During the course of construction, a qualified testing laboratory shall obtain samples as determined by the Inspector and conforming to federal and state codes and standards. Such costs shall be paid for by the City. Re-tests and removal of below acceptable strength concrete shall be borne by the Contractor. The Contractor shall cooperate with the testing during the course of obtaining such samples.
C. Variances in surface grades of more than 1/8", as measured by a straight edge ten feet (10") long, shall be corrected to the satisfaction of the Inspector. Remove all areas where standing water occurs, including any surface irregularities.

1.05 Handling and Storage

A. Comply with ATSM C-94, “Specifications for Ready Mix Concrete” for the batch, mix and transport of concrete.
B. Mix and deliver only the amount that will be poured immediately.

1.06 Record Drawings

A. The Contractor shall keep an accurate record of the as-built conditions of the site concrete. These records shall be updated daily and kept at the construction site. At any time, the Inspector may examine the conditions of the “as-builts” to ensure compliance of the above.

PART 2 - PRODUCTS

2.01 Concrete

A. Concrete for play area curbs, sidewalks, and accessible ramps shall conform to the provisions of Section 90-2 “Minor Concrete” of the Caltrans Standard Specifications. Cementitious material shall be „Type II Modified” and shall contain no less than 505 pounds of cementitious material per cubic yard. Aggregate shall be not greater than one-inch or smaller than 3/8-inch. Submit concrete analysis for review and acceptance prior to placement of concrete.

2.02 Fiberglass Reinforcement

A. Fibers for concrete shall be Fibermesh 150, as manufactured by Propex Operating Company; or accepted equal. Fibers shall contain 100 percent virgin polypropylene multifilament fibers, e3 patented technology, containing no reprocessed olefin materials. The fibers shall conform to ASTM C1116 Type III and manufactured specifically for the secondary reinforcement of concrete.

2.03 Expansion Joint Material

A. Fiber expansion joint shall conform to ASTM-1751 and shall be a non-extruding resilient filler. Filler shall have preserve attributes and high quality bituminous materials.
B. Apply Sikaflex elastomeric sealant, or accepted equal, over all expansion joints.

2.04 Concrete Forms

A. All forms shall be new at the start of the project and shall be construction grade Douglas Fir. Minimum size lumber shall be 2 x 6.
B. Radius bends shall be formed by spring steel forms or laminated boards, as required.
C. Plywood shall be 5/8”, Class I, exterior grade as outlined in APA “Guide to Plywood Grades”. Omit mill oiling treatment.

2.05 Coloring Agents

A. (Insert amount and color)

B. All colored concrete admixtures shall be integral.

2.06 Seeded Aggregate

A. Aggregate shall be clean, washed aggregate as selected. Provide samples of rock mixture.

PART 3 - EXECUTION

3.01 Poured-In-Place Concrete Forms

A. Concrete for hardscape or flatwork shall be placed on subgrade compacted to 95% relative compaction. Prior to placement of concrete, a soils compaction test must be performed by an accepted soils testing professional on a representative number of locations along the flatwork area. The City or project owner shall provide the initial test. The results of these tests must be available and meet acceptable levels prior to pouring. Re-tests and re-work of any area, as directed by the soils professional, shall be the responsibility of the Contractor.

B. Construct forms to conform to the shapes, dimensions and details shown on the Plans. All forms shall be true to lines, plumb, level and square.

C. Forms shall not leak, spread, shift or settle when concrete is placed.

D. All forms shall carry dead and live loads and shall not deflect more than 1/8" between supports after placement of concrete.

E. All forms shall be thoroughly soaked a minimum of twelve (12) hours prior to pouring of concrete. Forms shall be treated per manufacturer's recommendations.

F. Reuse of forms may be allowed at the discretion of the Inspector. Reused forms shall be cleaned and free of defects that would affect the final concrete finish.

G. Concrete footings shall be formed only when excavations slump or cave in. Over-excavate the trench or footing diameter to accommodate the forms' installation and removal. Apply water to moisten soil. Do not allow water to create mud or ponding.

3.02 Fiberglass Reinforcement

A. Install per manufacturer's instructions. Apply at the batch plant prior to delivery. Thoroughly mix fiber material to avoid "clumping".

3.03 Expansion Joints

A. Expansion joints shall be placed where vertical elements meet horizontal paving unless otherwise noted on the Plans. This shall include vertical expansion joints on play area curb walls, buildings, shade structures, walls and/or planters. The corners of the paving shall be tooled at the expansion

joints. Trim exposed fibers which protrude above or beyond the finish surface of paving or the finish surface of the wall.

3.04 Control Joints for Concrete Sidewalks

A. Control joints shall be per detail PK-32 with deep, straight and finished with rounded edges. Control joints shall be placed (on-center) a distance equal to the width of the concrete walkway, unless otherwise shown on the Plans. For example a ten-foot wide walkway shall have control joint placed ten feet on center.

3.05 Admixtures

A. (Insert, if used)

3.06 Coloring Agent

A. (Insert, if used)

3.07 Placement of Concrete

A. Do not pour concrete in weather below 40 degrees F. or when temperatures are predicted to fall below freezing within 24 hours, except with prior authorization.
B. Concrete shall be transit mixed according to ASTM C-94. Limit the quantity of water to the required strength. Concrete shall be of a consistency that it flows slowly into the forms.
C. Mixing of concrete shall be continuous commencing from the time water is added to the mix until such time that the concrete is poured. All concrete shall be placed within an hour of the time when water is first added.
D. Concrete shall be deposited up to the finished height of the forms and up to the adjacent joint. No partial pours will be allowed. Excess material shall be dumped on-site and later removed by the Contractor.
E. Thoroughly compact the concrete manually spading and tamping concrete into all corners of the forms and by utilizing a high-speed mechanical vibrator. Retain a standby vibrator on-site during the course of concrete work. When utilizing the vibrator, take precautions to avoid impact on the forms.
F. After obtaining uniform compaction, screen tamper all flatwork surfaces, screed and bull float to ensure that large aggregates are pushed below the surface. When it is practical to work on the surface, wood float, steel trowel paving to a uniform surface.
G. Concrete elements shall not exceed the following tolerances:
    1. Linear: 1/8”
    2. Slab deviation: 1/8” in 10"

3.08 Finishes

A. Finishes shall be as shown on the Plans and shall be consistent in quality throughout the project. Medium broom finished concrete shall have clean, deep control joints spaced appropriately. No visible cracks or discoloration will be accepted. Finishes on vertical surfaces shall be consistent throughout. Vertical expansion joints are spaced as identified on the plans and are smooth with the finish surfaces. All edges for flatwork and vertical surfaces shall be eased at a consistent radius.

B. Upon completion of float finishing, provide the final finish as follows:
   1. Medium Broom Finish: shall be accomplished by pulling a stiff bristle broom across a floated surface. The direction of the broom shall be perpendicular to the path of travel, unless otherwise shown on the Plans.
   2. Seeded Aggregate Finish: shall be accomplished by evenly distributing selected aggregate over the floated surface. Surface voids shall be minimum. Thoroughly embed aggregates just beneath the finished surface using a hand float. When the concrete has firmly set, brush and hose the surface with water to expose the aggregate to a uniform surface. Aggregate shall not be exposed more than 1/16", shall not be dislodged and shall not be unevenly exposed. Use of a pressurized nozzle for this work shall be prohibited.
   3. Acid Washed Finish: shall be accomplished after the slab has cured and no sooner than two (2) weeks after the concrete had been placed. Remove the cement film from the surface of the aggregate by an acid wash. Delaying the acid wash additional time is permissible. The slab shall be saturated with water, brushed free of standing water and washed with 5% to 10% solution muriatic acid. Several flushings with clear water should follow until the surface matches the accepted sample panel.
   4. Rock Salt Finish: shall be accomplished by (Insert, if used).
   5. Medium Sandblast Finish: shall be accomplished by (Insert, if used)
   6. Other (Insert, if used)

3.09 Removal of Forms

A. Forms shall remain in place as follows:
   1. For mass concrete work: 5 days.
   2. For other flatwork and other concrete work: 3 days.

B. Remove all bolts, nails, ties, wires, etc. a minimum of one inch (1") below the surface of the concrete. Remove imprints, irregularities or other such defects and patch as directed by the Inspector.

3.10 Curing and Protection

A. Allow adequate time for the concrete to cure. In temperatures above 75 degrees F., ensure that the concrete surface remains wet for a period of seven (7) days minimum.

B. Protect all concrete from damage during the curing period. This shall include damage from sun, rain, flowing water, frost, mechanical injury, tire tracks, footprints, oil stains, etc. Should such damage occur, Contractor shall take immediate action to repair damage to the satisfaction of the City.

3.11 Clean-Up

A. During the course of this work, the area shall be kept clear and free of debris as realistically possible. Upon completion of concrete work, completely remove from the site all used forms, hardware, spillage, rejected work and other materials.

B. Remove from site furnishing posts all concrete “slobber”. Re-touch posts as necessary for a clean finish.

END OF SECTION

SECTION 04 20 00
UNIT MASONRY (GENERAL)

PART 1 - GENERAL

1.01 Conditions

A. The general provisions of the Contract, including General and Supplementary Conditions and General Requirements apply to the work specified in this section.

1.02 Scope of Work

A. Provide all labor, materials, and equipment required to complete the unit masonry work as indicated on the Drawings and/or specified herein.
B. Work includes, but not limited to the following:
   1. Concrete masonry units.
   2. Face brick units.
   3. Pre-cast Elements.
   4. Installation of all required reinforcements, fasteners, anchors and accessories.
   5. Cleaning of unit masonry.
C. Related work specified in other sections:
   1. Section 03 30 00: Concrete

1.03 Quality Assurance

A. Material and installation standards: Comply with recommendations of the Brick Institute of America (BIA) standards; National Concrete Masonry Association standards; and ASTM standards.
B. Verify all measurements indicated on Drawings by taking field measurements; proper fit and attachment of all units is required.
C. Accurately fit, cut, and securely mortar together all units to produce a plumb, level and rigid installation.
D. All work and materials shall comply with Uniform National Building Codes (latest edition), and all other applicable codes and ordinances that govern the work of this Section.

1.04 Qualification of Installers

A. Installers shall be trained and experienced in the skills required and shall be completely familiar with the materials and their installation. Qualified installers shall be present at all time during the progress of work.

1.05 Coordination

A. Coordinate with all other trades whose work relates to unit masonry installation for placing all required reinforcements, fasteners, anchor, accessories, etc.

1.06 Submittals

A. Submit for Landscape Architect's written approval two (2) representative samples of each unit specified.
B. Submit manufacturer's certificate that units meet or exceed material specifications.

PART 2 - PRODUCTS

2.01 Concrete Masonry Units

A. ASTM C-652, concrete masonry hollow units, wire cut. Standard and bond beam units. Size and color as indicated on the Drawings. Color shall be standard grey.

2.02 Stone Veneer

A. As shown on Drawings.

2.03 Precast Concrete Molding and Baseboard

A. As shown on Drawings.

2.04 Masonry Mortar

A. ASTM C-270, Type M, consisting of one (1) part cement and three (3) parts sand with quarter (1/4) part lime.
B. LATICRETE 3701 grout and Mortar Admix
C. Mortar compressive strength at 28 days shall be 3000 PSI

2.05 Grout

A. Grout mix ratio by volumes: one part Portland Cement (ASTM C-150, Type 1); two parts minimum to three parts maximum damp loose sand, two (2) parts coarse aggregate (ASTM C-404).
B. LATICRETE 3701 Grout and Mortar Admix.
C. Grout compressive strength at 28 days shall be 3000 PSI.

2.06 Unit Masonry Reinforcement

A. Horizontal Joint Reinforcement: Truss type, hot-dipped galvanized zinc coated steel construction; 3/16 inch side rods with No. 9 cross ties.
B. Horizontal and vertical rebar reinforcements: ASTM A-615, Grade 40, size as indicated on the Drawings.

2.07 Concrete

A. As per Section 03 30 00: Concrete

PART 3 - EXECUTION

3.01 General

A. Supply anchor devices as indicated on the Drawings and as required to install materials as specified in other sections of work.
B. Cut units where required with a power saw or order units pre-cut from manufacturer.
C. Construct walls and other masonry construction to the full thickness indicated on the Drawings, using unit sizes as indicated.
D. Establish lines, levels, and coursing. Protect from disturbances.

3.02 Coursing

A. Install units straight and plumb with all courses true to line and level.
B. Install units in pattern as indicated on the Drawings.
C. Maintain unit courses to uniform width. Make vertical and horizontal joints equal and of uniform thickness.

3.03 Placing and Bonding

A. Lay units in full bed of mortar properly jointed with other work.
B. Install full mortar coverage of vertical and horizontal face of joints. Maintain uniform joint width of 3/8" – 1/2", depending on nominal unit sizes. Cut joints flush and tool slightly concave.
C. Fully bond intersections and external and internal corners.
D. Do not shift or tap units after mortar has taken initial set. Where adjustment must be made remove mortar and replace.
E. Remove excess mortar.
F. Fill hollows at concrete masonry units solid with grout or as indicated on the Drawings. Fill hollows of structural brick block units where reinforcement occurs solid with grout or as indicated on the Drawings.
G. Wall caps shall be epoxied and anchored in place.

3.04 Reinforcement

A. Horizontal joint reinforcement: Place masonry joint reinforcement sixteen (16) inches on center or as indicated on the Drawings.
B. Place joint reinforcement continuous and lap reinforcement according to the recommendations of the Manual of Standard Practice of the Concrete Reinforcing Steel Institute.
C. Horizontal and vertical rebar reinforcement: Install with bond and beam spacing and rebar spacing as indicted on Drawings.

D. Place and consolidate grout fill without disturbing reinforcing. Cells containing reinforcement shall be grouted solid.

3.05 Curing and Protection

A. Provide thorough curing of joints and grout pours.
B. Protect newly laid masonry from exposure to precipitation, excessive drying, freezing, soiling, backfill and other harmful elements.

3.06 Waterproofing & Graffiti Seal

A. All walls below grade shall be waterproofed on the backside extending from the foundation to the brick cap.
B. Install in conformance with manufacturer's specifications.
C. Apply 2 clear coats of graffiti sealant on exposed exterior and interior surfaces. Submit proposed sealant type and conform to manufacturer specifications.

3.07 Cleaning

A. Brush off excess mortar as work progresses. Dry-brush masonry at end of each day's work.
B. Clean masonry with cleaners and methods as recommended by the manufacturer of the masonry units.
C. Rinse walls by washing off cleaning solution, dirt and mortar using clean, pressurized water.
D. Repair damage to adjacent materials that occurs during cleaning operation at no additional cost to the Owner.

END OF SECTION

SECTION 05 12 00
STRUCTURAL AND MISCELLANEOUS STEEL (GENERAL)

PART 1 - GENERAL

1.01 Conditions

A. The general provisions of the Contract, including General and Special Provisions apply to the work specified in this Section.

1.02 Scope of Work

A. Furnish all labor, materials, and equipment as required to fabricate and install all structural and miscellaneous steel work as indicated on Drawings and specified herein.
B. Although such work or materials are not specifically indicated, furnish and install all supplementary or miscellaneous items, appurtenances and devices incidental to or necessary for a secure and complete installation.
C. Provide shop drawings for all work.
D. Completely coordinate with work of all other trades.

1.03 References (Latest Edition)

A. AISC: Standard Specifications for the Design, Fabrication and Erection of Structural Steel for Buildings by the American Institute of Steel Construction (AISC).

I. ASTM A501 – Hot Formed Welded and Seamless Carbon Steel Structural Tubing.
J. AWS A2.4 – Symbols of Welding, Brazing, and Nondestructive Examination.
K. AWS D1.1 – Structural Welding Code.
L. SSPC (Steel Structures Painting Council) – Painting Manual.

M. California Building Code (CBC), latest edition.

1.04 Regulatory Requirements

A. Safety Requirements: Work shall comply with all Federal, State and municipal regulations regarding safety, including the requirements of the following:
   1. William-Steiger Occupational Safety & Health Act of 1970
   2. State of California, California Administrative Code, Title 8 Industrial Relations, Chapter 4, Subchapter 4, “Construction Safety Orders” and other State and local agencies having jurisdiction.

B. California Building Code (CBC), latest edition.

1.05 Submittals

A. Shop Drawings: General
   1. Before any structural steel is fabricated or delivered to jobsite, submit Shop Drawings in accordance with the General Conditions of these specifications.
   2. Shop Drawings shall clearly show all pieces with all pertinent dimensions, data, layout, sizes and weights, connections, and all controlled dimensions and elevations. Drawings shall clearly distinguish between shop and field bolts and welds. Errors in dimensions shown on shop drawings shall be responsibility of Contractor.
   3. Show details, including cuts, copes, connections, holes, threaded fasteners, and welds in accordance with AWS.
   4. Indicate which structural units, members or brackets require field cuts or welds due to construction techniques.
   5. Indicated metal fabricator’s method for radius form bents of pipe or tubing.
   6. All shop and field welds shall be indicated by AWS Welding Symbols.
      a) Indicate size, length and type of each weld.
      b) Special Inspection required by CBC and Building Department.

B. Welding:
   1. Certification of Welder’s Qualifications.
   2. Welding Procedure: Submit descriptive data to illustrate welding procedures to be performed.

1.06 Quality Assurance

A. Fabricated structural steel members in accordance with AISC Code of Standard Practice.
B. Perform Work in accordance with AISC Section 10.
C. Perform Work in accordance California Building Code (CBC), latest edition.
D. All welding procedures, welders, welding operation, and tackers shall be qualified in accordance with AWS Standard Code D1.1.
E. Maintain one copy of each document on site.

F. Fabricator: Company specializing in performing the work of this section.
G. Erector: Company specializing in performing the work of this section.
H. All construction shall conform to applicable building codes, project specifications and applicable regulations. Where the provisions of applicable codes, material manufacturer's requirements, and project specifications conflict, the more stringent provision shall govern.
I. Certification: Furnish, before fabrication, a mill certified report (in duplicate) of the tests for ach heat of steel or iron from which the material is to be fabricated, containing the results of chemical and physical tests required by the ASTM specifications for the materials.
J. Qualify welding processes and welding operators in accordance with AWS "Standard Qualifications Procedure". Provide certification that welders to be employed in work have satisfactorily passed AWS qualification test within the previous twelve (12) months. If recertification of welders is required, retesting will be Contractor's responsibility.
K. Work shall comply with the Drawings, Specifications and accepted Shop Drawings in every aspect. All errors of fabrication and connections, defective materials, fasteners, and workmanship shall be replaced at the expense of the Contractor.

1.07 Delivery, Storage and Handling

A. Deliver anchor bolts and anchorage devices which are to be embedded in cast-in-place concrete or masonry in ample time so as not to delay that Work.
B. Store materials to permit easy access for inspection and identifications. Keep steel members off the ground using pallets, platforms, or other supports. Protect steel members and packaged materials from corrosion and deterioration. Remove any damaged items from the site and replace at no cost to the Owner.
C. Use all means necessary to protect structural steel before, during and after installation.

1.08 Coordination

A. Coordinate and furnish all required anchorages, templates, and patterns, setting drawings, and installation directions for all built-in items. Supervise the proper location and the installation of all built-in items. Deliver all items required to be embedded in concrete, masonry or built into other material to their respective Contractor. Provide holes and connections for Work of others Contractors.

1.09 Field Measurements

A. Take field measurements prior to preparation of Shop Drawings and metal fabrication. Proper fit and attachments of all items is required; allow for trimming and fitting when taking field measurements before metal fabrication.

1.10 Shop Assembly

A. Preassemble items in shop to greatest extent possible to minimize field splicing and assembly. Disassemble units only as necessary for shipping and handling limitations. Clearly mark units for reassembly and coordinated installation.

PART 2 - PRODUCTS

2.01 General

A. Use materials of size and thickness indicated or, if not indicated, as required to produce strength and durability in finished product for use intended.
B. Metal surfaces used for fabrications of miscellaneous metal items which will be exposed to view shall be smooth and free of surface blemishes including pitting, seam marks, roller marks, rolled trade names and roughness.
C. All other materials not specifically described, but required for a complete and proper installation, shall be new, free from rust, best quality of their respective kind, and subject to the approval of the Project Inspector.

2.02 Steel Plates, Shapes and Bars

A. All miscellaneous steel shall be standard cold-rolled sections, new, free from rust, and conforming to ASTM A-36.

2.03 Steel Pipe

A. All steel pipe shall be black steel pipe, except where indicated to be galvanized, complying with provisions of:
    1. ASTM A-120, Schedule 40 for pipe less than four (4) inch diameter.
    2. ASTM A-53 ERW for pipe greater than four (4) inch diameter.

2.04 Steel Tubing

A. All steel tubing shall be cold-formed steel tubing conforming to ASTM A-500, Grade B.

2.05 Fasteners

A. General: Provide electro-zinc plated fasteners for exterior use or where built into exterior walls or slabs. Select fasteners for the type, grade and class specified.
B. Bolts and Nuts: Regular hexagon-head carbon steel type conforming to ASTM A-307, Grade A with electro-zinc plating.

C. Flat Washers: U.S.S. standard round carbon steel type conforming to FS FF-W-92 with electro-zinc plating.
D. Lock Washers: Helical spring carbon steel type conforming to FS FF-W-84 with electro-zinc plating.
E. Anchor Bolts: Nonheaded "J" bolt type, unless otherwise indicated on Drawings, conforming to ASTM A-307, Grade A with electro-zinc plating.

2.06 Shop Paint

A. Primer shall be Red Oxide Primer, conforming to Federal Specification TT-P-31 for steel surfaces and Federal Specifications TT-P-64b for galvanized surfaces.

2.07 Grout

A. Pre-mixed, factory packaged, non-shrinking, non-metallic, non-staining, non-corrosive and non-gaseous group complying with CE CRD-C588. Provide grout specifically manufactured for exterior applications.

PART 3 - EXECUTION

3.01 General

A. Comply with AISC Code and Specifications and maintain Work in safe and stable conditions during erection. Provide temporary bracing and shoring as required; remove when final connections are in-place.
B. Execute all Work using skilled metal workers only. Do all welding as per AWS Specifications with certified welders.
C. When possible, fit and shop assemble all metal Work, ready for installation, with shop and field connections welded or attached with fasteners as indicated on Drawings.
D. Prior to all work of this Section, carefully inspect the installed work of all other trades and verify that all such work is complete to the point where fabrication and installation of the work of this section may properly commence.
E. Make all required measurements in the field to ensure proper and adequate fit of miscellaneous metal items.
F. It is the intent of the Drawings to indicate detail connections. Where connection detail is not shown, detail shall be patterned after a connection similar condition, or an AISC standard type.

3.02 Fabrication

A. General
   1. Use materials of size and thickness indicated on Drawings or on accepted Shop Drawings to produce strength and durability in finished product for use

intended. Work to dimensions are indicated on drawings or on accepted Shop Drawings, using proven details of fabrication and support.

2. All fabrication shall be in accordance with AISC Specifications for fabrication of structural steel, California Building Codes, and requirements of regulatory agencies.
3. Do not field cut or alter structural metal units, members or brackets without accepted Shop Drawings.
4. Fabricate and pre-assemble work in shop to greatest extent possible.
5. Fabricate exposed work true to line, shape and level with accurate angles and radiuses. Ease exposed metal edges to a radius of approximately 1/32 inch.
6. Make cuts, bends, punching and drilling accurate, neat and properly located. Grind and file smooth all parts exposed to view; leave exposed surfaces free of fabrication marks. Mark and match-mark units requiring field assembly.
7. All welds shall be continuous, unless otherwise indicated, complying with AWS Specifications. Form exposed connections with tight, flush and smooth hairline joints. Grind exposed welds smooth and flush to match and blend with adjoining surfaces.
8. Cut, reinforce, drill and tap fabricated metal work as indicated on Drawings to receive finish hardware, fasteners and similar items.

B. Bolted Connections:
   1. Punch or drill holes 1/16 inch larger than bolt size and spear-ream before inserting bolts.
   2. Ream unfair holes, but only up to next larger bolt size. Where unfairness exceeds maximum, weld hole in base material solid and drill hole of proper size.
   3. As erection progresses, bolt up work to take care of dead load, lateral forces, and erection stresses. Provide any additional bracing necessary to resist all possible forces during erection. Contractor is entirely responsible for the stability of the structural steel work until the job is complete.

C. Assembly with Standard Threaded Fasteners:
   1. Beveled Washers: Provide under bolt heads or nuts resting on surfaces exceeding 5 percent slope with respect to head or nut.
   2. Draw up tight, check threads with chisel, or provide approved lock washers or self-tightening nuts.

D. Welded Connections:
   1. Perform welding using shielded metal arc, submerged arc, gas metal arc, or flux cored arc methods in accordance with appropriate sections of AWS D1.1 and CBC Chapter 27.

2. In addition to specific requirements of Drawings, details of welded joints shall comply with all requirements for joints which are accepted without qualification tests under the AWS Code. If sizes of fillet welds are not shown on Drawings, use AWS minimum weld size, but not less than thinnest part thickness minus 1/16 inch.
3. Plan welding operations to eliminate stress build-up.
4. Field Welding:
   a) Perform field welding in accordance AWS D1.1.
   b) Where field welding is applied to existing flexural members involving application of significant amounts of heat to member, provide temporary shoring to prevent deflections.
   c) Provide Special Inspection per the CBC, latest edition.

E. Column Bases:
1. Finish in accordance with AISC. Lack of contact bearing with column shall not exceed 1/16 inch.

F. Bearing Plates:
1. Finish in accordance with AISC. Provide for attachment as shown on Drawings.
2. Cut, drill (tap where indicated or required), or punch holes perpendicular to metal surfaces. Do not flame cut holes or enlarge holes by burning. Drill holes in bearing plates.

3.03 Shop Painting

A. Shop paint all metal Work, except members or portions of members to be embedded in concrete or masonry, surfaces and edges to be field welded, stainless steel, and galvanized surfaces, unless otherwise indicated.
B. Clean all metal work to be primed and painted in accordance with Section 09 91 00 – Painting and Finishes.
C. Immediately after surface preparation brush or spray on primer in accordance with manufacturer's instruction at a rate to provide uniform dry film thickness of 20 mils for each coat. Use painting methods which will result in full coverage of joints, corners, edges and exposed surfaces.
D. Apply one (1) shop coat to fabricated metal items, except apply two () coats of primer to surfaces inaccessible after assembly or installation.
E. Give any painted built-in portions one (1) field coat of primer on all abraded areas after installation.

3.04 Galvanizing

A. All metal fabrications intended for exteriors use or for use in high moisture areas are to be hot-dip galvanized, unless otherwise noted.

B. Hot dip galvanizing or zinc coatings, applied on products fabricated from rolled, pressed and forged steel shapes, plates, bars and strips shall comply with ASTM Specification A123-73.
C. Hot dip galvanizing or zinc coatings on assembled steel products shall comply with ASTM Specifications A386.
D. The weight of coatings shall be as designated in Table 1 for the class and thickness of material to be coated. Galvanized surfaces for which a shop coat of paint is specified shall be chemically treated to provide a bond for the paint.
E. Except for bolts and nuts, all galvanizing shall be done after fabrication.

3.05 Installation

A. General:
   1. Compliance: Erect and install all miscellaneous metal in strict accordance with the Drawings, the reviewed shop drawings, and the referenced standards, aligning straight, plumb, and level within a tolerance of one in 200. Accurately assemble structural steel to lines and elevations indicated, within specified AISC tolerances.
   2. Splice metal work only where indicated and approved on shop Drawings.
   3. Install anchorage devices and fasteners where required for securing miscellaneous metal fabrications to in-place construction; including anchorage devices and fasteners that require to be cast into concrete or masonry. Provide temporary bracing or anchors in formwork for items cast into concrete or similar construction.
   4. Perform cutting, drilling, and fitting required for installation of miscellaneous metal fabrications. Set Work accurately in location, alignment and elevation. Install items plumb, level, true and free of rack; measured from established lines and levels.
   5. Fit exposed connections accurately together to form tight hairline joints. Weld connections which are not to be left as exposed joints, but cannot be shop welded due to shipping size limitations. Grind exposed joints smooth and touch-up shop paint coat.
   6. Do not weld, cut or abrade the surfaces of exterior units which have been hot-dip galvanized after fabrication, and are intended for bolted or screwed field connections.
   7. All field welds shall conform to AWS Specifications. Grind all exposed welds smooth and flush to match and blend with adjoining surfaces.
   8. Clean and touch-up all field welds and scratches with shop paint as specified.

3.06 Finishes

A. Finish all fabricated metal Work as per Section 09 91 00: Painting and Finishes

END OF SECTION

SECTION 09 91 00
PAINTING AND FINISHES (GENERAL)

PART 1 - GENERAL

1.01 Conditions

A. The general provisions of the Contract, including General Conditions and Special Provisions apply to the work specified in this Section.

1.02 Description

A. Work includes, but is not limited to the following:
   1. Provide all materials, tools, equipment, appliances, labor and supervision required to paint and finish all surfaces and/or components as specified herein and as indicated on the Drawings, including all miscellaneous items and labor required to complete the Work of this Section.
   2. Surface preparation, priming and painting of all metal surfaces as indicated on Drawings or as follows:
      a) Miscellaneous surfaces.
   3. All surfaces that are left unfinished by the requirements of other sections shall be painted or finished as part of this contract.

B. Related Work described elsewhere.
   1. Section 05 12 00: Structural and Miscellaneous Steel

C. Definition: The term “paint”, as used herein, shall mean all coating systems materials, including primers, emulsions, enamels, stains, sealers and fillers, and other applied materials whether used as prime intermediate or finish coats.

1.03 Work Not Included

A. Pre-Finished Items: Unless otherwise specified or indicated on the Drawings, do not include the painting of items that are specified to receive manufacturer’s factory finish, i.e. such items as site furnishings, irrigation equipment, electrical equipment, etc. See applicable Sections.

B. Finished Metal Surfaces: Unless otherwise specified, all metal surfaces or anodized aluminum, stainless steel, chromium plate, copper, bronze or similar finished materials do not require painting.

1.04 Submittals

A. Provide in accordance with the General Conditions prior to ordering material, a complete, detailed list of materials proposed for use on work. Include affidavit from manufacturer stating that proposed materials are the best of their

respective kinds and suitable for intended purpose. Submit in ample time to avoid delays in work if the list, or portions thereof, are rejected.

B. Painter shall prepare and submit color samples to match color chips in 12- inch square size and must receive approval from Project Inspector before applying final paint coats to finish surfaces. Approved samples shall be retained at the Project Inspector's office for record.

1.05 Paint Coordination

A. Provide prime coats which are compatible with finish paints used. Review other Sections of these specifications in which prime paints are to be provided to ensure compatibility of total painting system for various surfaces. Upon request from other trades, furnish information and specifications for finish materials proposed for use, to ensure compatible prime coats are used. Provide barrier coats over incompatible primers or remove and reprime as required. Notify Project Inspector in writing of any anticipated problems using specified painting systems with surfaces primed by others.

1.06 Job Conditions

A. Applicator shall examine areas, surfaces and conditions under which painting Work is to be applied and notify the Project Inspector in writing of conditions detrimental to proper and timely completion of Work. Do not proceed with Work until unsatisfactory conditions have been corrected in a manner acceptable to Project Inspector and Applicator, or Applicator shall assume responsibility for and rectify any unsatisfactory finish resulting.

B. Starting of painting Work shall be construed as Applicator's acceptance of surfaces and conditions.

1.07 Weather Conditions

A. Apply water base paints only when temperature of surfaces to be painted and surrounding air temperature are between fifty (50) degrees F (10 degrees C) and ninety (90) degrees F (32 degrees C), unless otherwise permitted by paint manufacturer's printed specifications.

B. Apply solvent-thinned paints only when temperature of surfaces to be painted and surrounding air temperatures are between forty-five (45) degrees F (7 degrees C) and ninety-five (95) degrees F (35 degrees C), unless otherwise permitted by paint manufacturer's printed specifications.

C. Do not apply paint in rain, fog or mist; or when relative humidity exceeds eighty-five (85) percent; or to damp or wet surfaces.

1.08 Delivery and Storage

A. Deliver materials to job site in original, new and unopened packages or containers bearing manufacturer's name and label, and the following information:
   1. Manufacturer's Name
   2. Manufacturer's stock number and date of manufacture
   3. Special color mix: name and number
   4. Contents by volume for major pigment and vehicle constituents
   5. Thinning instructions
   6. Application instructions

B. Store materials and equipment as approved by applicable codes and enforce good housekeeping practices. Any soiled or used rags waste, etc., shall be removed from the site every night and every precaution shall be taken to avoid the danger of fire. No paint materials shall be washed or emptied on the site or into any sewer drains, storm drains or street gutters.

1.09 Protections

A. Protection Work of other trades, whether to be painted or not, against damage by painting and finishing Work. Provide suitable covering or other methods of protection during progress of this Work. Correct any damage by cleaning, repairing or replacing, and repainting, as acceptable to the Project Inspector.

B. Provide "Wet Paint" signs as required to protect newly painted surfaces. Remove all protective materials upon completion of the Work and touch-up and restore all damaged or defaced surfaces, including the removal of paint spots from other surfaces.

1.10 Guarantee

A. Adhesion: All materials applied shall be guaranteed for a period of two (2) years against failure due to surface conditions, materials, or application. There shall be no evidence of fingerprints blisters, running, peeling, scaling, chalking, streaks or stains.

PART 2 - PRODUCTS

2.01 Color Schedule

A. Project Inspector shall furnish to the Contractor a color schedule of paints to be used based on one of the approved manufacturer's color charts or requirements for specially mixed colors. Use of one of the other approved manufacturer's requires the Contractor to match the color schedule provided by the Project Inspector.

B. Manufacturers names used to designate colors of color schedule is not intended to imply that products names are required to the exclusion of equivalent products of other manufacturers.
C. All colors and manufacturers shall be approved and authorized by the Project Inspector before commencing work.

2.02 Materials Quality

A. Provide best quality grade of various types of paints as regularly manufactured by acceptable paint materials manufacturer. Materials not displaying manufacturer's identification as a standard, best-grade product will not be acceptable. Acceptable paint manufacturers include:
   1. Kelley-Moore
   2. Benjamin Moore Company
   3. The Glidden Company
   4. Pratt and Lambert, Inc.
   5. Dunn and Edwards
   6. Sherwin-Williams
   7. W.P. Fuller Company
   8. Tiger Drylac

B. Provide primer and undercoat paint produced by the same manufacturer as finish paint. Use only thinners approved by paint manufacturer, and use only within recommended limits.

~~C.~~ Epoxy paints and wood stains for use in standard comfort stations shall be as specified on plans.

2.03 Metal Primer

A. Primer for metal surfaces shall be Red Oxide Primer, conforming to Federal Specification TT-P-31 for metal surfaces and Federal Specification TT-P-64b for galvanized surfaces.

PART 3 - EXECUTION

3.01 Surface Preparation

A. General: Perform preparation and cleaning procedures in accordance with paint manufacturer's instructions, and as herein specified, for each particular surface condition.
B. Paint no items fitted with finish hardware or other similar items until hardware has been removed or provided with surface-applied protection prior to surface preparation and painting operations. Install hardware or remove surface-applied protection after paint has dried.

C. Metal Surfaces: Clean all metal surfaces, which are not galvanized or shop-painted, of scale, dirt, rust and other deleterious materials before priming. Clean metal in accordance with Steel Structures Painting Council (SSPC) Specifications.
   1. SP-2: Hand Tool Cleaning
   2. SP-3: Power Tool Cleaning
   3. SP-7: Brush-off Blasting Cleaning

   Remove oil, grease, and similar contaminants in accordance with:
   1. SP-1: Solvent Cleaning

D. Galvanized Surface: Clean all galvanized surfaces of oil and other surface contaminants with a crystalline zinc phosphate pretreatment (phosphoric acid etch). Remove pretreatment solution by thoroughly washing with clean water and wipe dry.

3.02 Materials Preparation

A. Mix and prepare painting materials in accordance with manufacturer's specifications.
B. Stir materials before application to produce a mixture of uniform density, and stir as required during application. Do not stir surface film into materials. Remove film and if necessary, strain materials before using.

3.03 Application of Primer Coat

A. Apply primer coast to all surfaces which are required to be painted or finished, and which have not been prime coated or shop-painted by others. For metal surfaces, tough up shop-painted coats as required.
B. Immediately after surface preparation brush or spray on primer in accordance with manufacturer's instructions at a rate to provide uniform dry film thickness of two (2.0) mils for each coat. Use painting methods which shall result in full coverage of joints, corners, edges and exposed surfaces.
C. All primer coats shall be free from runs, sags, and other defects. All coats shall be thoroughly dry before applying succeeding coats.
D. Apply one (1) coat of metal primer for metal surfaces, as specified and/or as recommended by manufacturer's instructions.

3.04 Application of Paint

A. Apply paint in accordance with manufacturer's instructions. Use applicators and techniques best suited for each surface and type of materials being painted.
B. All painting Work shall be done by skilled workman in a professional manner. All coats shall be evenly spread and shall be free from run, sags and other defects. All coats shall be thoroughly dry before applying succeeding coats.

C. All individual coats of paint shall be inspected and approved by the Project Inspector before application of the succeeding specified coat; otherwise no credit for the coat applied shall be given, and the Applicator shall automatically assume responsibility to recoat the Work. The applicator shall provide the Project Inspector a report of each coat applied when completed for inspection and approval to comply with the above.
D. Where coverage is incomplete, not uniform, or not to the required dry film thickness, provide an additional coat at no extra cost to the Developer.
E. Apply finish coats of paint to all exposed surfaces as follows:
   1. For primed metal surfaces, apply two (2) coats of 100% acrylic latex base paint, per manufacturer's recommendations. Apply first coat of paint within 72 hours of primer application. If first coat of finish paint cannot be applied within the specified application time, the contractor shall re-clean and re-primer all exposed metal surfaces prior to start of metal paining operations.
F. Give special attention to ensure that surfaces, including edges, corners, crevices, welds, and exposed fasteners, receive a dry film thickness equivalent to that of flat surfaces.
G. Apply first-coat material to surfaces that have been cleaned, pretreated or otherwise prepared for painting as soon as practical after preparation and before subsequent surface deterioration's.
H. Allow sufficient time between successive coatings to permit proper drying. Do not recoat until pain has dried to where it feels firm, does not deform or feel sticky under moderate thumb pressure and application of another coat of paint does not cause lifting or loss of adhesion of the undercoat.
I. Apply all coating without reduction, except as specifically required by label directions, or required by this Section.
J. Sand carefully between all coats on smooth surfaces for good adhesion of subsequent coats.
K. Paint all exposed surfaces and anything inaccessible after installation prior to installation, if required to be painted.

3.05 Application of Epoxy Paint

A. Use epoxy paint for floor and wall in restrooms up to ADA height.

END OF SECTION

SECTION 12 93 00
SITE FURNISHINGS

PART 1 - GENERAL

1.01 General Requirements

A. The requirements set forth in the General Conditions shall be in addition to the standards provided herein.

B. The requirements set forth in the Supplemental Conditions shall be in addition to the standards provided herein.

1.02 Description

A. Furnish all labor, materials and equipment for the complete installation of all site furniture, including play equipment and play surfacing, as shown on the Plans and as specified herein.

1.03 References

A. All play equipment shall meet or exceed the standards set forth by the Consumer Product Safety Commission (CPSC), comply with the Americans with Disabilities Act (ADA), meet all current ASTM standards and be consistent with State and local codes.

B. The play area surfacing shall meet or exceed the fall absorption/impact rates set forth by the CPSC guidelines and ASTM standards. The surfacing shall be an accessible surface and manufactured specifically for play areas.

C. Nothing in the Plans or Specifications is to be construed to permit work not conforming to regulating codes and standards. The Contractor shall furnish without extra charge any material and labor, when required, by the compliance with these rules and regulations, even though the work was not mentioned in these particular Specifications or shown on the Plans.

D. The product manufacturer shall supply complete Specifications for the installation of all site furnishings, including play equipment and play surfacing.

1.04 Submittals

A. Submittals for specified items are required. The Contractor shall submit a materials summary sheet indicating which items will be installed as specified and which items are proposed for substitutions. The Contractor shall submit proof of order within ten (10) working days of the Notice to Proceed, indicating all specified materials have been ordered, noting “as specified” or “substitution proposed”. For the following items, also provide:

1. Resilient Play Surfacing (i.e. rubber surfacing material) Submittal shall include IPEMA certification of materials and the most recent impact absorption test results.
2. Play Equipment and Swings submittals shall include color samples, manufacturer's materials and parts list, and installation instructions.
3. All items with "color as selected by City" shall include color samples.
4.

B. On the date of the Notice to Proceed, the Contractor shall immediately place the order to purchase all site furnishings, including the play equipment and play surfacing as specified on the Plans and as outlined herein. **Proof of all orders shall be submitted to the Project Manager within ten (10) working days of the Notice to Proceed.**

C. The Contractor shall submit a Certificate of Compliance from a third party certified playground inspector which verifies that the entire playground, including individual components, and surfacing meets or exceeds regulated requirements as described in Section 1.03 above.

1.05 Record Drawings

A. The Contractor shall keep an accurate record of the as-built conditions of the miscellaneous site amenities. These records shall be updated daily and kept at the construction site. At any time, the Inspector may examine the conditions of the "as-builts" to ensure compliance of the above.

PART 2 - PRODUCTS

2.01 Materials

A. Play Equipment shall be custom configuration as shown on the Plans and as specified herein. The equipment shall be as distributed by *(contact name and phone number)*, and as manufactured by *(contact name and phone number)* or accepted equal. Color as selected by the City.

B. Swings shall be the custom configuration as shown on the Plans as distributed by *(contact name and phone number)*, and as manufactured by *(contact name and phone number)*, or accepted equal. Color as selected by the City.

C. Poured-in-place resilient surfacing shall be as shown on the Plans and as specified herein. The play surfacing shall be Tot Turf TPV Poured Surfacing as manufactured by Robertson Industries, contact Frank Horwath, (510) 433-0655 or accepted equal. Color as selected by the City.
   1. Thickness of surfacing shall meet or exceed ASTM F 1292-93 Thickness vs. Fall Height requirements. The topcoat shall be ½ inch thick.
   2. Color shall be 50/50 black and brown mix, unless custom colors are shown on plans. For yellow, gold, red, and green colors use an aromatic binder.

For blue, gray, purple, teal and tan colors use an aliphatic binder to preserve the color.

3. Poured-in place resilient surfacing shall have a five (5) year warranty.

D. Engineered wood fiber shall be clean, engineered wood fiber, manufactured specifically for play areas.
   1. Engineered wood fiber manufacturer shall provide testing certification by an independent testing agency that the results comply with CPSC guidelines and ASTM standards.
   2. Engineered wood fiber shall meet the following requirements: ASTM F1951-99 (ADA Compliance Test) and ASTM F 1292-96 (Shock Absorbency).
   3. Manufacturer shall provide a Certificate of Insurance that shall provide coverage for products liability with the limit of liability not less than $1,000,000.
   4. The manufacturer shall also provide written guarantee for three (3) years from the date of installation against decay and biochemical degradation calling for replacement of defective materials during the guarantee period.
   5. Manufacturer certifies that the engineered wood fiber has been installed in not less than three (3) sites for periods of not less than three (3) years demonstrating the claims made with regard to these Specifications.

E. Picnic Tables shall be as shown on the Plans and as specified herein. The tables shall be as distributed by *(contact name and phone number)*, and as manufactured by *(contact name and phone number)* or accepted equal. Color as selected by the City.

F. Benches shall be as shown on the Plans and as specified herein. The benches shall be as distributed by *(contact name and phone number)*, and as manufactured by *(contact name and phone number)* or accepted equal. Color as selected by the City.

G. Drinking Fountain shall be MDF #~~440~~ 10145 SM (bottle filler dual bowl and accessible) and stainless steel surface carrier as distributed by Husbands and Associates (800) 821-9838 and as manufactured by Most Dependable Fountains or accepted equal. Color to be stainless powder coated black or as approved. Include recessed hose bib with locking cover. Install with a sand strainer when sand amenities are included in the park design. ~~For drain inlet at drinking fountain, see Section 33 00 00: Utilities.~~

H. Infield Mix shall be 60/40 red lava/ screened clay mix as distributed by ~~Valley~~ Cascade Rock, 916-~~652~~383·~~7209~~ 1300 or accepted equal.

I. Park Identification Sign shall be fabricated by Quick Crete Products Corp., Norco, CA, (916) 447-8644, or by Outdoor Creations, Inc., Anderson, CA, (530) 365-6106, or accepted equal.

J. Age-Appropriate Signage shall contain the following language:

"This play area has been designed for the use of children aged *(fill in the appropriate age range)* years of age."

K. Park Namesake Plaque shall be a 24" by 18" digital high pressure laminate graphic panel fabricated or accepted equal. Plaque shall be mounted on a SlimLine single pedestal sign system or accepted equal. Manufacturer for the plaque and sign system (model # 2418 SL-SLP-AL) is KVO Industries (Chris Howell, (707) 573-6868). Installation location shall be verified in the field with the Project Manager.

L. Playground rules sign shall be as fabricated by Gopher Sign Company, (651) 698- 5095, or accepted equal.

M. BBQ Grill shall be Iron Mountain Forge or accepted equal. Installation location shall be verified in the field with the Project Manager.

N. Line Paint (for basketball courts): Hawker - Laykold; Koch Materials - Decocolor; Extol - Color; L&M - Nova acrylic; California Products Corp - Plexicolor Laykold; or accepted equal.

O. Trash Receptacle shall be 32 gallon receptacle with liner, dome top (model # TG3D33S) as fabricated by Wabash Valley, (260) 352-2102, or accepted equal.

P. Other (See Design Guidelines for additional information) shall be as shown on the Plans and as specified herein. The *(site amenity)* shall be as distributed by *(contact name and phone number)*, and as manufactured by *(contact name and phone number)* or accepted equal. Color as selected by the City.

PART 3 - EXECUTION

3.01 Installation

A. Contractor to provide experienced workers or subcontractors to install all site furnishings, including the play equipment and play surfacing described in these Specifications. The workers or subcontractor must demonstrate that at least five (5) similar play structures and five (5) play surface applications similar to that specified for this project have been installed in the last three (3) years.

B. All site furnishing, including play equipment shall be installed per manufacturer's instructions.

C. Engineered wood fiber shall be blown in place to avoid damage to adjacent improvements unless specifically approved by City.

D. Poured-in-place rubber play surfacing and access ramps shall be installed as shown on the plans. Install poured-in-place rubber over a 4" thick concrete base. The rubber base coat shall be _____" and the rubber topcoat shall be 1/2", unless otherwise noted on the plans. Apply the appropriate binder with all finished poured-in-place rubber surfaces based on color as outlined in Section 2.01 J and per manufacturer's instructions. Installation of poured-in-place rubber surfacing shall be performed by an International Playground Equipment

Manufacturer Association (IPEMA) certified and experienced installer. Submit a copy of the installer's certification prior to installation. "Experience" is as defined in 3.01 A above.

For Aggregate sub base: Grading to be +/- .375 (3/8") inside the play area 4" minimum thickness. Applied as follows:

Step 1 Install 2", compact
Step 2 Apply by hand Portland cement to entire surface
Step 3 Apply ¼" water to entire surface
Step 4 Repeat Steps 1, 2, & 3 to attain required thickness

Sub base to be installed before play equipment in order to utilize large compaction equipment. Jumper compactor equipment to be utilized along outside perimeter of play area curb. Compaction test shall be performed to verify that the aggregate is compacted to 95%. Sub base (aggregate) must be sloped per ADA requirements.

E. Heights of tables and benches shall be as follows, unless otherwise required by ADA; California Title 24 or other code requirements:

Description	**Height Above Finish Grade**
Table Surface Height	34" Maximum
Knee Space Height	27" Minimum Clear Space
Knee Space Depth	17" Minimum from edge of table to nearest obstruction under table top
Width of Knee Space	30" Minimum clear width beneath table
Bench Surface Height	16" Minimum, 18" Maximum

F. Heights for play equipment, including ramps and transfer decks shall comply with the approved recommendations by the U.S. Architectural and Transportation Barriers Compliance Board: Play Facilities Regulatory Negotiation Committee.

G. For play equipment, locate all footings prior to installation of drain lines. Adjust drain lines to accommodate play structure footings. Provide appropriate fall zones as shown on the Plans and per applicable codes and guidelines.

H. All footings shall be Class A concrete with 3/4" maximum size aggregate, unless otherwise noted. Footings shall be in accordance with Caltrans Standard Specifications, Section 90. Install all footings below finish surface. In paved areas, install paved surface over footing for a clean finished surface as shown on the Plans.

I. Carefully install all furnishings and equipment without disturbance to adjacent finishes. Contractor shall be responsible for the damage and subsequent repairs of damaged finished product.

J. Install park namesake plaque. Installation location shall be verified in the field with the Project Manager.

K. Install age-appropriate stickers on all play structures.

L. Install playground rules sign. Installation location shall be verified in the field with the Project Manager.

3.02 Cleaning

A. Thoroughly clean all areas where work has occurred. Remove from the site excess material, debris and rubbish.
B. Take all precautions to protect completed work. Immediately repair or replace all damaged areas due to tire ruts, erosion, compaction failure, etc. Keep all erosion control measures intact.

PART 4 - WARRANTY

4.01 General

A. Contractor shall warranty all site amenities included under this Section.
B. Contractor shall also provide a written warranty covering all materials, equipment and workmanship furnished by him to be free of all defects after installation is accepted, including all defective parts that may have been found.
C. Submit written warranty on company letterhead addressed to the City when providing As-built drawings.
D. Contractor shall submit to the City, upon completion of work, a Certificate of Compliance by a third party certified playground inspector for the installation of the play structure and safety surfacing. Certification shall include testing for compliance of ASTM 1292 (Impact Attenuation of Surfacing Systems under and around Play Equipment). All tests, including re-tests, shall be the responsibility of the Contractor. Submit all test results to the City.
E. Submit maintenance manual for poured-in-place resilient surfacing.
F. Contractor shall submit to the City, upon completion of work, a Certificate of Compliance from the manufacturer of the play structure for the installation of the play structure.
G. Contractor shall submit to the City, upon completion of work, critical fall criterion used to certify all play surfacing material.
H. Attach cut sheets of installed items to the warranty.

END OF SECTION

SECTION 26 00 00
SITE ELECTRICAL

(This Section is only partially complete. Consultant shall provide all applicable 260000 series Sections specific to the project scope.)

PART 1 - GENERAL

1.01 General Requirements

A. The requirements set forth in the General Conditions shall be in addition to the standards provided herein.
B. The requirements set forth in the Special Conditions shall be in addition to the standards provided herein.
C. The standards set forth in the City of Roseville Design and Construction Standards, latest edition and requirements outlined by the City of Roseville Electric Department shall be in addition to the standards provided herein.
D. The standards set forth in the latest edition of the California Electrical Code (CEC), incorporating the latest edition of the NEC with City of Roseville amendments shall be in addition to the standards provided herein.

1.02 Description

A. Furnish all labor, materials and equipment for the complete installation of site electrical as shown in the Plans and as specified herein.
B. Submittals shall be required for requested substitutions or plan deviations ONLY. The Contractor shall install all specified electrical fixtures, poles and equipment, unless otherwise accepted and determined as an equivalent.

1.03 References

A. Conform to requirements outlined in the latest editions of the California Electrical Code (CEC), California Administrative Code (Title 24), California Building Code (CBC), California Administrative Code (Title 22) and other applicable codes.
B. Conform to requirements outlined in the latest edition of the Roseville Electric Specifications for Commercial Construction.

1.04 Record Drawings

A. Record drawings are required as a part of this work. At all times, the Contractor shall maintain accurate information of the work in progress. Deviation in layout of conduit or other materials shall be recorded to the satisfaction of the Inspector. Upon completion of the project, as-builts shall be submitted to the

City on reproducible plan sheets and shall depict all changes in a neat and legible manner.

PART 2 - PRODUCTS

2.01 Service Panels

A. Service panels shall meet the Roseville Electric approved sections of the EUSERC requirements. The list of acceptable panels can be found at https://the.euserc.org/s/Roseville-City-of-Acceptability-Pages.pdf
B. Service panel shall be:
   1. Built to UL508A standards
   2. Metered
   3. Single phase or three phase application
   4. Rated for 120 to 480 volts
   5. Color: Hunter Green

2.02 Electronic Astronomic Time Switch

A. Electronic Astronomic Time Switch shall be model ET-2815C, as manufactured by Intermatic, or accepted equal.

2.03 Conduit and Fittings

A. For primaries (12,000 volts), conform to Roseville Electric's Specifications for Commercial Construction, latest edition.
B. All other conduit and fittings shall conform to the California Electric Code, latest edition.

2.04 Wires and Cables

A. Conform to the California Electric Code, latest edition.
B. All wires shall be copper only, 90-degree-C THHN/THWN insulation.

2.05 Wire Connections and Devices

A. Conform to the California Electric Code, latest edition.
B. Splices and joints for #10 AWG or smaller wiring shall be twisted together electrically and mechanically strong and insulated with approved type insulated electrical spring connectors, Scotchlok or Ideal. Joints and connections for #8 AWG or larger shall be made with Burndy, T & B, or approved equal, solderless tool applied pressure lugs and connectors. Uninsulated lugs and wire ends shall be insulated with layers of plastic tape equal to insulation of wire and with all irregular surfaces properly padded with "Scotchfil" putty prior to application of tape. Tape shall be equal to Scotch #33, General Electric #AW-1, or approved equal. Feeder splicing is not permitted.

C. Receptacles: 15 & 20 Amp 125 Volt receptacles shall be "Specification" grade, duplex, UL Listed, rated Weatherproof where installed outdoors or in damp or wet locations. Where only one receptacle is connected to a 20 ampere circuit, a 20 ampere receptacle shall be used. Receptacles to be Hubbell 5262 series, 5362 series, or equal. Provide an equipment grounding jumper (pigtail) connecting the grounding terminal of the receptacle to the grounded box.

2.06 Outlet Boxes

A. Cast Metal boxes shall be cadmium plated, cast iron alloy by Crouse-Hinds Form 8 condulets, Appleton Form 35 Unilets or accepted equal.

B. Cast Metal Outlet boxes shall be four inch (4") round, galvanized cast iron alloy with threaded hubs and mounting lugs as required. Boxes shall be furnished with cast cover plates of the same material as the box and neoprene gaskets by Crouse-Hinds VXF series, Appleton JBX series or accepted equal.

2.07 Pull and Junction Boxes

A. Per City of Roseville Electric Department's Specifications for Commercial Construction, latest edition.

2.08 Parts Identification

A. Consistent with the City of Roseville Electric Department's Specifications for Commercial Construction, latest edition.

2.09 Electrical Support Equipment

A. Concrete Fasteners shall be Philips "Red-Head" or accepted equal. Powder driven concrete pin fasteners, low velocity type shall be Remington, Ramset or accepted equal.

B. Conduit Straps shall be hot dipped galvanized, cast malleable iron, one hole type strap with cast clamp-backs and spacers (as required) by O-Z/Gedney No. 15-50G strap and #14G spacer, Efcor No. 231 strap and No.131 spacer or accepted equal.

C. Concrete Inserts shall be pressed galvanized steel, spot insert with oval slot capable of accepting support nuts of ¼ inch to ½ inch diameter thread by Unistrut No. M2506 series, Globestrut CSI series or accepted equal.

D. Construction Channel shall be 1-1/2 inch by 1-1/2 inch 12 gauge galvanized steel channel with 17/32 inch diameter bolt holes, 1-1/2 inch on center, in the base of the channel by Kindorf 905 series, Unistrut P-1000-HS or accepted equal.

E. Cable Ties and Clamps shall be one piece, nylon, reusable type lashing tiesby Thomas and Betts Co "Ty-Raps", Panduit "Pan-Ty" or accepted equal.

F. General Fasteners shall be wood screws for fastening to work; machine screws for fastening to steel; toggle bolts for fastening to gypsum board or plaster walls; expansion anchors for attachments to pre-poured concrete.
G. GFI Outlet Cover shall be metal, lockable, and flush with the surface it is installed in. Cover must conform to the California Electric Code, latest edition.

2.10 Fixtures and Poles

A. Parking Lot lights shall be:
B. Pathway/Security lights shall be:
   1. LED: Hadco: RL54 B B N N 1 A W N N N A 2 N N N N SP1~~RL54 B B N N 1 A N N 80 A N~~
   2. Pod: die-cast aluminum housing with tool-less access
   3. Globe: clear prismatic injection molded U.V. stabilized acrylic
   4. Symmetric photometric distribution
   5. Rated 120 volts
C. Poles shall be:
   1. Whatley: TR34 ~~20~~ 16 DE BLK ~~SMS~~ TXT 30-30 or accepted equal
   2. Fiberglass, direct burial
   3. ~~Smooth~~ Textured round, tapered
   4. ~~20'~~ 16' mounting height
   4.~~5.~~ Include –RC receptacle as shown on plans

2.11 Tracer Wire

A. Insulated solid copper wire, minimum #12 gauge.

PART 3 - EXECUTION

3.01 Installation

A. Install (luminaire and poles) in accordance to manufacturer's instructions.
B. Ensure proper handling and installation of fixtures including hardware necessary for a complete installation. Fixtures (luminaire and poles) shall be clean, plumb and level.
C. All lamps shall be new and in operating condition. New lamps shall have less than 100 hours of operation on-site.
D. All splices in exterior fixtures or fixture outlet boxes shall be made watertight, using specified epoxy resin splicing kits.
E. Operate the entire system, once complete, in the presence of the Inspector. Immediately correct any improper connections or other items.
F. Install concrete collars around light poles. Concrete collars shall be per the Parks Construction Standards, latest edition.
G. Install tracer wire on top of conduit for all up-lighting and sports field lighting.

3.02 Clean Up

A. At all times, maintain a safe and clean work site, free of debris and rubbish.
B. All electrical parts shall be clean of conductive and deleterious materials.
C. All enclosures shall be free of dirt and debris.
D. Clean all finishes and touch up damaged areas prior to pre-final inspection.

3.03 Excavation & Backfill

A. Refer to Section 33 00 00 Utilities.

3.04 Equipment Pads

A. Concrete reinforced pads for mounting of equipment (i.e. switchboard, transformers, freestanding panels, etc.) shall be minimum 3000psi, 6" thick with #4 rebars at 12" on center each way. Rebars shall be centered in pad. Pad shall extend 2" beyond equipment and 1.5" above surrounding area. Backfill and compact to 95% maximum dry density at optimum moisture content in layers not to exceed 6" when compacted.

3.05 Grounding

A. Grounding and ground bonding of the electrical installation shall be in accordance with CEC Article 250, and any applicable codes. Ground fittings shall be approved manufactured type, installed and connected to conform with Code requirements.
B. Neutral conductors and noncurrent-carrying parts of equipment at each installation shall be grounded in accordance with applicable code. Ground conductor shall be copper having a current capacity sized in accordance with CEC.
C. All equipment cases, motor frames, etc., shall be completely grounded to satisfy requirements of CEC. Install bond wire in flexible conduit. Install copper bond wire, sized in accordance with CEC, in all nonmetallic raceways and bond to all metallic parts using approved fittings.
D. Service ground conductor shall be connected to a "Ufer" encased ground and bonded to the metallic cold water pipe system and to the metallic natural gas line. 5/8” x 10 ft copper clad ground rods may be used in lieu of the Ufer ground where no footing is available.
E. All connections shall be made with solderless connectors or molded fusion-welding process.
F. Equipment grounding conductors shall be insulated with a continuous green outer finish along its entire length. Conductors size #4 AWG and larger may be identified (with green electrical tape applied half-lapped) at each end and at every point where the conductor is accessible. Tape shall be applied from its point of entry to point of exit or termination.

G. Insulated grounded (neutral) conductors shall be identified with a continuous white outer finish along its entire length. Neutral conductors #4 AWG or larger can be identified by a distinctive white marking (applied half-lapped with white electrical tape) for the last 12 inches at each end.

3.06 Field Testing

A. Perform Insulation Resistance (IR) "Megger" Testing per NETA Standards. Submit test results. Provide testing for:
   1. All feeders 100 Amps and higher.
   2. Branch circuits 100 Amps and higher.

B. Each ground rod shall be tested. A ground rod which does not have a resistance to ground of 25 ohms or less shall be augmented by one additional ground rod at no less than 8 feet from each other.

3.07 Consultant to complete.

END OF SECTION

SECTION 31 10 00
CLEARING AND GRUBBING

PART 1 - GENERAL

1.01 General Requirements

A. The requirements set forth in the General Conditions shall be in addition to the standards provided herein.

B. The requirements set forth in the Supplemental Conditions shall be in addition to the standards provided herein.

1.02 Description

A. Preserve and protect existing site amenities to remain, including, but not limited to, trees, shrubs, underground utilities and other improvements as shown on the Plans. Protection of work shall include affected improvements on adjoining properties.

B. Scope of work includes: site preparation, removal of debris, staging of equipment and materials and securing the site for construction.

1.03 Related Work

A. Section 31 20 00: Earthwork

B. Section 01 57 23: Storm Water Pollution Control

1.04 Protection/Replacement

A. Prior to demolition, erect protective fencing a minimum of one foot (1') beyond the canopy of all trees to remain. The radius of the canopy shall be measured from the longest branch furthest from the trunk. Refer to the environmental document for additional requirements for protective fencing on other existing natural features. For work within or near protected trees, a tree permit may be required.

B. If public use is to be maintained on unaffected portions of the project site, the Contractor shall be responsible for directing pedestrian and vehicular traffic safely around the construction zone. Utilization of temporary fencing, barricades, signage, etc. shall be the responsibility of the Contractor. Safe detours shall be available to the general public at all times during the course of construction.

C. Protection of existing site improvements shown to remain, including, but not limited to, fencing, signs, benches, picnic tables, play structures, shade structures, drinking fountains, concrete paving, concrete wall and curbs,

decomposed granite paving, asphalt concrete paving, recreational site improvements, etc. are to be protected and preserved.

D. The Contractor shall be responsible for any damage to and maintenance of all existing street improvements, drainage facilities and irrigation systems and to re-establish these improvements to their original condition as soon as possible after completion of the work in the area, to the complete satisfaction of the Project Manager and Inspector. Realignments or modifications to the existing facilities as shown on the plans are accepted.
E. Survey monuments and markers either shown on the Plans or encountered during the course of construction shall be protected and preserved. The Contractor shall notify the Inspector upon discovery of an unmarked monument, at which time, arrangements for the relocation or adjustment of the monument will be determined. All costs associated with the relocation or adjustment of these monuments shall be the Contractor's responsibility.
F. Burning or burying removed material on-site is prohibited.
G. Where the removal of specific material creates an open hole, pit, trench or other depression, the Contractor shall immediately backfill and compact the areas consistent with requirements outlined in Section 31 20 00 of these Specifications.
H. All items identified in the Plans to remain or identified in the field to remain, removed in error by the Contractor, shall be repaired or replaced to match in equal or better construction, at no cost to the City. The quality of the repair or replacement shall be measured as that existing at contract award.

PART 2 - PRODUCTS

Intentionally left blank.

PART 3 - EXECUTION

3.01 Pre-Construction Site Review

A. Contractor shall review existing site conditions with the Inspector prior to start of construction and document any conditions which adversely affect the satisfactory execution of the work and final acceptance of the project.
B. Commencement of work constitutes acceptance of existing conditions. The Contractor shall, at his expense, be responsible for correcting all unsatisfactory and defective work.

3.02 Clearing

A. Completely remove trees, shrubs, stumps, vines, rubbish/debris, undergrowth, deadwood, structures, and other elements identified to be removed and/or which interfere with the construction as shown on the Plans and as specified.

B. Obtain verification from the Project Manager for non-identified items scheduled to be removed prior to actual removal.

3.03 Grubbing

A. Remove all stumps, roots, grasses and weeds in its entirety. Apply systemic weed killer. Confirm weed kill prior to removal.
B. Once surface material is removed, the Contractor shall stockpile the top twelve inches (12") of topsoil for use during the final grading phase of work. This soil shall be free of rocks, debris, roots and other undesirable material.

3.04 Utilities

A. Contact USA Alert (800) 642-2444 prior to commencement of any demolition or excavation work. Provide a minimum of 48 hours' notice. Verify all utilities entering into and their locations within the project site.
B. Where utilities lie within the project site, but are not a part of the project, the Contractor shall cooperate with the agency or utility company having jurisdiction to maintain its use and the integrity of the structure.
C. Where utilities enter into the project site and taps, connections to or extensions of the utility are identified in the Plans, the Contractor shall coordinate all work with the agency or utility company having jurisdiction to minimize or eliminate disruption of use by the adjacent properties.
D. Verify that all utilities, shown to be removed on the Plans, are inactive and turned off prior to disconnection and/or re-routing, prior to demolition.

3.05 Debris Removal

A. All materials removed as a part of this contract shall become the property of the Contractor and shall be legally disposed of off-site, unless otherwise noted on the Plans.
B. Where a portion of a concrete slab, curb or wall and asphalt concrete paving or curb is to be removed, the concrete shall be cut with a concrete saw at a 90 degree angle so that the edge of the remaining concrete shall form a neat, straight line. Conform to the City of Roseville Design and Construction Standards, latest edition.

END OF SECTION

SECTION 31 20 00
EARTHWORK

PART 1 - GENERAL

1.01 General Requirements

A. The requirements set forth in the General Conditions shall be in addition to the standards provided herein.
B. The requirements set forth in the Supplemental Conditions shall be in addition to the standards provided herein.
C. The standards set forth in the Caltrans Standard Specifications, latest edition, shall be in addition to the standards provided herein.
D. The requirements set forth by CAL OSHA shall be in addition to the standards provided herein.

1.02 Description

A. Provide all labor, operations and materials necessary for earthwork, including, but not limited to, staking and surveying, grading; excavating; installation of facilities necessary to perform excavation and subsequent removal of such facilities upon completion of work; subgrade preparation; backfilling; and other incidental items necessary for a complete project.
B. This project (is a balanced cut and fill project) (requires export of material) or (requires import of material) – select one. The (import) or (export) of material shall be a part of the Contractor's bid price.
C. The intent of the grading plan is to provide positive drainage and to maintain slopes on walkways as required by the Americans with Disabilities Act and California Title 24 throughout the project site. The Project Manager shall be notified immediately of any discrepancies between the Plans and actual field conditions and/or conflicts between the design and code requirements.

1.03 Related Work

A. Section 31 10 00: Clearing and Grubbing
B. Section 33 00 00: Utilities
C. Section 32 84 00: Irrigation System
D. Section 32 90 00: Planting
E. Section 26 00 00: Site Electrical
F. Section 01 57 23 Storm Water Pollution Control

1.04 Quality Assurance

A. All work shall conform to local codes and regulations, including standards set forth in the Standard Specifications of the State of California, Business and Transportation Agency, Department of Transportation (Caltrans), Chapter 70 of the Uniform Building Code and ASTM.
B. Relative compaction shall be the in-place dry density of soil denoted as a percentage of the maximum dry density of the same material. This shall be as determined by ASTM 1557. The optimum moisture is measured by the water content which corresponds to the maximum dry density.
C. Upon discovery of unforeseen subsurface site conditions, the Contractor shall notify the Inspector immediately.
D. Upon discovery of hazardous materials, cease all activity and immediately contact the Fire Department.

1.05 Protection

A. Provide and install all supports, shoring, bracing, underpinning, sheet piling and other methods for the sides of excavations necessary for ensuring safe working conditions for the workmen and to protect adjacent improvements to remain.
B. Provide any and all protection measures necessary to ensure the protection of the workmen, the general public, including children and the project site. These protection requirements remain the Contractor's sole responsibility throughout the duration of the project, including non-working hours.
C. Do not obstruct vehicular, bicycle or pedestrian thoroughfares, unless previously accepted by the City. Provide safe and adequate detours around the construction as required by City and State regulations.
D. Trenches shall be covered at all times when work directly associated with the trenches is not occurring, including non-work hours.
E. During the course of construction, the Contractor shall ensure that surface drainage does not create a nuisance onto adjacent properties.

1.06 Erosion Control Measures

A. Construction sites shall have required erosion and sediment control measures in place as required by the SWPPP. If construction is in progress, the Contractor shall ensure that the construction site is prepared prior to the onset of any storm. At a minimum, erosion control measures shall include:
    1. Broadcast seed
    2. Drainage area protection
    3. Dust/mud control
    4. Drain inlet filters
    5. Silt fence and straw wattles
    6. Slope protection

7. Straw bales
8. Silt controlling devices

PART 2 - PRODUCTS

2.01 Base Rock

A. Class 2 aggregate base per Caltrans Standard Specifications, latest edition.

2.02 Drain Rock

A. Drain rock shall be Class 2 permeable, washed, unbroken stone or gravel. Material gradation shall conform to the following:

Sieve Size	Percent Passing
1 inch	100
No. 4	20-50
No. 50	0-10
No. 200	0-5

2.03 Pea Gravel

A. Pea gravel shall be natural stone, free of clay, shale or organic matter, and shall conform to the following:

Sieve Size	Percent Passing
3/8 inch	100
No. 4	47
No. 8	2
No. 16	1

2.04 Fill

A. Structural Fill shall conform to Caltrans Standard Specifications or the accepted site-specific geotechnical report generated for the project.
B. Fill for non-structural areas shall conform to the following standards:
   1. Plasticity: ASTM D4318-84
   2. Expansion Index: No greater than twenty (20)
   3. Testing: UBC 29-9 and ASTM D422-72
   4. Particle Size: No greater than one inch (1”)

2.05 Topsoil

A. The top eight to ten inches (8” – 10”) of native soil containing more than three percent (3%) organic material. Topsoil shall be free of rocks no larger than one inch (1”) in diameter, free from subsoil, roots, heavy or stiff clay, course sand, destructive seeds, noxious chemicals, brush, debris, litter and other undesirable materials.
B. For any import soil to be used in turf/planting areas, submit a soils analysis with soil amendment recommendations (for plant growth) for review and acceptance

prior to placement on-site. Soils test information shall be as outlined in Section 32 90 00: Planting – 1.06.

2.06 Soil Sterilant

A. Sterilizer shall be standard, quick-acting, short-lived and non-selective weed and grass killer, commonly used under roadway/transportation projects. Application of the sterilant shall pose no short or long term health threats to the installer or the general public. Submit analysis for approval prior to applying.

2.07 Sand

A. Granular, fine, free of organic matter, mica, loam or clay material.

PART 3 - EXECUTION

3.01 Construction Staking

A. The layout of all work shall be performed by a California State licensed land surveyor provided by the Contractor.
B. Notify the Inspector immediately of any discrepancies between actual field conditions and the Plans. Minor field adjustments may be necessary in order to fulfill the intent of the Plans.
C. Non-notification of discrepancies between actual field conditions and the Plans by the Contractor, in writing, shall indicate his acceptance of such field conditions. Adjustments/modifications to the construction to accommodate the inconsistencies (without notification) shall be at no additional cost to the City.

3.02 Excavation

A. All excavations shall be as noted on the Plans. Excavations shall include accommodation of base material.
B. Do not over-excavate. Excavations shall provide appropriate space to install shoring, bracing, formwork, etc, as needed to ensure the safe and proper construction of the work.
C. Take every precaution to prevent water from entering, softening, and undercutting excavated areas, including, pits, footings, trenches, etc.
D. Notify the Inspector immediately upon discovery of unsatisfactory soils materials or unforeseen site conditions. Excavation shall include the complete removal of the unsatisfactory material and its legal disposal thereof.

3.03 Site Grading

A. A grading permit is required to be obtained by the Contractor prior to commencing any earthwork.
B. Grading shall include adjacent transition areas, new elevations/contours as shown on the Plans. All subgrade areas shall be graded parallel to the finish

grades and contours and shall be uniform in slope. Transition areas shall provide a smooth connection between new and existing grades and shall not create additional drainage or ponding onto adjoining properties.

C. Surface grades shall provide for positive drainage away from structures and footings, and shall be uniformly smooth throughout.
D. Rough grading shall:
   1. Be graded to a tolerance of 0.10 feet, plus or minus for planted and turf areas.
   2. Be graded with a tolerance less than .04' from specified grade and cross section for subgrade in which pavement, curbs and other structural elements are to be placed immediately above.
   3. Provide a subgrade surface free of exposed rocks, stones and boulders.
   4. Provide a subgrade surface free of depressions, pits, etc., with proper backfill and compaction. See paragraph 3.04 below.

3.04 Placement of Fill Material

A. Prior to placement of fill material, the Contractor shall:
   1. Obtain approval of the subgrade surface from the Inspector.
   2. Scarify, dry and compact soft and/or wet areas.
   3. Remove and replace unsuitable subgrade material to the satisfaction of the Inspector.
   4. Take all necessary corrective action.
B. Do not use topsoil as fill or backfill material, unless otherwise accepted in writing.
C. Fill shall be placed in the following manner:
   1. Accepted engineered fill material for structural slabs and areas to be paved shall be placed in six-inch (6") loose thickness, uniform layers over the entire area.
   2. Fill material in planted areas shall be placed in twenty-four inch (24") maximum loose thickness throughout the areas to receive fill.
D. Aerate or water each lift to obtain the required compaction rate indicated on the Plans. Thoroughly mix material to ensure proper moisture content for compaction. Repeat the operations until grades, as shown on the Plans, are obtained. Jetting of trenches shall be reviewed and accepted by the Inspector prior to performance of work.
E. Do not place fill when the subgrade is frozen, muddy or wet. Allow conditions to thaw and dry out before resuming operations.
F. Use hand tampers or vibrating compactors around foundations walls, retaining walls and other structural elements. Do not use large equipment in these areas and do not begin compaction operations until the bearing surfaces have reached its design strength.

G. Fill around existing trees to remain shall not exceed twelve inches (12”).
   1. Minor fill (6” or less) shall utilize topsoil and shall be placed by hand. Do not cover crown of trunk. Feather grades to the extent possible.
   2. Fills between 6” and 12” shall utilize 3/4” pea gravel on grade, placed up to three inches (3”) below finish grade. Apply topsoil, by hand, to meet finish grade elevations. Feather grades to the extent possible.
H. Construct mounds from on-site material. The core of the mound (1’ below finish elevations) shall be compacted to 90%. The top twelve inches (12”) shall be compacted to 85%. Place topsoil in the top twelve inches (12”).
I. Place topsoil in all turf and planting areas a minimum of twelve (12) inches deep. See Section 31 10 00, 3.03-B: Clearing and Grubbing.

3.05 Trenching, Backfilling and Compacting

A. For trenches greater than five feet (5’) in depth, submit an OSHA permit related to the work.
B. All trenches shall be straight, true and cut vertical at 90 degrees to the surface plane.
C. For trenches through existing paved surfaces, use a concrete saw or other tool to achieve straight, clean lines. Replace paved surface to the same or better condition as existing prior to cut.
D. Do not over-excavate. Maintain bearing surfaces true, level and undisturbed to the extent possible.
E. Trenches shall be kept dry and frost-free. Do not allow standing water to collect.
F. Do not allow trenches to remain exposed at any time when work directly related is not occurring. Cover all trenches during non-work hours.
G. Bedding for all trenches to receive pipes shall be as follows:
   1. Bedding material shall be consistent with the City of Roseville Design and Construction Standards, latest edition.
   2. Pipe shall lie completely on bedding. Pipe fittings or joints shall not bear weight.
   3. Bedding shall be uniform throughout the length of pipe.
H. Initial backfill for storm drains, sewer lines and electrical conduit shall conform the applicable City standard set forth by the Department having jurisdiction.
I. Backfill beyond the initial operations shall be native soil, placed in twelve-inch (12”) lifts. Compaction for trenched areas shall be 95% for parking lot, driveway and roadway areas; 90% for hardscape (i.e. walkways, picnic pads basketball and tennis courts); and 85% in areas to be planted. Place topsoil over trenches in planted areas. Upon completion, all trenches shall be filled flush with adjacent finish grades.
J. Compaction tests shall be required for trenched areas, hardscape areas and areas where fill over two feet in depth will be placed. The Inspector shall

determine the number of tests and the locations. Re-tests shall be the Contractor's responsibility.

K. Potholing shall be required in areas where existing utilities are indicated. Hand digging may be required.

3.06 Soil Sterilant

A. Soil sterilant shall be applied to areas where paving is to be installed. The worker applying the sterilant shall take every precaution to avoid overspray of sterilant onto areas to be planted. The sterilant shall be placed no further than six inches (6") beyond the edge of pavement.

B. Soil sterilant shall not be applied in inclement weather and windy days.

3.07 Drainage Areas

A. All bare areas, regardless of slope, within 50 feet of natural drainages shall be covered with straw and pressed in place.

B. No grading or trenching, except as required for erosion or sediment control, shall occur within 35 feet from the centerline of perennial and intermittent drainage swales between October 5 and April 1 unless approved by the Engineering Division, as well as any other governmental agency which may have additional jurisdiction and/or requirements.

3.08 Dust/Mud Control

A. Adjacent Streets: Adjacent street frontages shall be swept at least once a day to remove silt and other dirt which is evident from construction activities.

B. Construction Vehicles: The Contractor is responsible for cleaning construction vehicles leaving the site on a daily basis to prevent dust, silt, mud and dirt from being released or tracked offsite. Adjacent streets shall be swept clean daily.

C. Grading Spoils: Dry stockpiles of soil shall be watered to prevent the generation of airborne dust. Trucks transporting dry soil shall be covered with tarpaulins.

D. Water: Water shall be sprayed on all exposed earth surfaces during clearing, grading, earth moving and other site preparation activities. The exposed earth shall be watered throughout the day to minimize dust. The Contractor shall obtain a hydrant permit from the Environmental Utilities Department.

E. Wind Allowances: Grading activities shall be restricted or halted when winds exceed 15 miles per hour as deemed necessary by the Public Works Inspector.

END OF SECTION

SECTION 32 12 16
ASPHALT CONCRETE PAVING

PART 1 - GENERAL

1.01 General Requirements

A. The requirements set forth in the General Conditions shall be in addition to the standards provided herein.

B. The requirements set forth in the Supplemental Conditions shall be in addition to the standards provided herein.

C. The standards set forth in the City of Roseville Design and Construction Standards and the City of Roseville Parks Construction Standards, latest editions, shall be in addition to the standards provided herein.

D. The standards set forth in the State of California, Title 24, Americans with Disabilities Act, latest edition, shall be in addition to the standards provided herein.

1.02 Description

A. Furnish all labor, materials and equipment for the complete installation of asphalt concrete paving, including international disabled signs as shown in the City Standard, as shown on the Plans and as specified herein.

1.03 References

A. Caltrans Standard Specifications for asphaltic concrete, latest edition.

1.04 Tolerances

A. All surface areas shall drain. Ponding, puddling or birdbaths are not acceptable.

B. Surface grades shall conform to the following:

Description	**shall not exceed, ... from indicated line, grade or thickness**
Base Course	0.1 foot +/-
Finish Surface	0.05 foot +/-
Thickness of finished pavement	0.01 foot less

C. Flatness: maximum variance of 1/8” as measured with a ten (10) foot straight edge.

1.05 Testing

A. Testing shall occur during the installation of pavement. The number and frequency of tests shall be as determined by the Inspector.

PART 2 - PRODUCTS

2.01 Aggregate Base

A. Conform to Caltrans Standard Specification, Section 26 paragraph 1.02B, Class 2.

2.02 Asphalt Concrete

A. Conform to Caltrans Standard Specification, Section 39 and the City of Roseville Design and Construction Standards, latest edition.

2.03 Soil Sterilant

A. Sterilizer shall be standard, quick-acting, short-lived and non-selective weed and grass killer, commonly used under roadway/transportation projects. Application of the sterilant shall pose no short or long term health threats to the installer or the general public. Submit analysis for approval prior to applying.

2.04 Striping

A. Traffic marker paint, in accordance with Caltrans Standard Specifications, Section 83-3.02.
B. Thermoplastic marking tape in accordance with Caltrans Standard Specifications, Section 84-2.02. (Required for bike trails)

2.05 Header

A. Per City of Roseville Parks Construction Standards, latest edition.

2.06 Accessible Parking Signs

A. Signs for parking stalls shall conform to the California Manual on Uniform Traffic Control Devices (CMUTCD), the Standard Highway Signs manual with the Caltrans California Sign Specifications.
B. Notification sign: Notification sign shall read: “Unauthorized vehicles parked in designated handicapped spaces not displaying distinguishing placards or license plates issued for physically disabled persons may be towed at owner’s expense. Towed vehicles may be reclaimed at Roseville PD, 1051 Junction Blvd or by telephoning (916) 774-5000. CVC 22511.8”.
C. Sign posts: shall conform to Section 56 Signs in the City of Roseville Design and Construction Standards.

PART 3 - EXECUTION

3.01 Preparation

A. Upon completion of grading operations, compact the subgrade at the required elevation to a relative compaction density of 95%, unless otherwise noted on

the Plans. A load or performance test shall be conducted in the presence of the Inspector prior to the placement of AC.

B. Apply soil sterilant per manufacturer's directions. Limit the work zone of the sterilant application to the area to receive paving plus three feet (3') on each side.
C. Completely install redwood header as shown in the City of Roseville Parks Construction Standards, latest edition, if shown on the Plans.
D. No material shall be placed in muddy conditions, nor shall any material be placed during or immediately after inclement weather, i.e. rain storms, temperatures below 35 degrees F, etc.
E. In areas where soil conditions are less than optimal, geotechnical tests shall be performed to verify compaction rates. The Inspector shall determine the number of tests necessary in order to verify conditions. Initial tests will be provided by the City. Re-tests shall be the Contractor's responsibility.

3.02 Installation

A. Spread aggregate base material in six-inch (6") lifts.
B. Compact base surface to a relative compaction of 95% and in accordance to the Caltrans Standard Specifications, Section 26.
C. Spread asphalt concrete material in accordance to the Caltrans Standard Specifications, Section 39.
D. Upon completion, apply water to the finished surface and allow water to run-off. All areas of ponding, puddling or birdbaths shall be filled with asphalt and fine aggregate. Conform fill surface with adjacent surface to the point edges are not visible.
E. Take every precaution to protect adjacent amenities or structures from material spillage or damage. In case of spillage or damage, the Contractor shall immediately repair or replace the damaged area to the satisfaction of the City.
F. Clean and oil all manhole covers, grates and other surface structures within the pavement area.
G. All new asphalt concrete paving shall receive a fog seal at a rate of 1/12 to 1/10 gallon of undiluted emulsion per square yard. All work shall conform to Caltrans Standard Specifications, Section 37. **Once sealed, parking of vehicles and/or equipment or stockpiling of material on the finished surface is prohibited.**
H. Clean all surface structures that lie within the asphalt concrete area.

3.03 Striping

A. Conform to the City of Roseville Design and Construction Standards, latest edition.

B. Ensure that all pavement to receive striping is completely cured. Clean all pavement surfaces.
C. Accurately lay out all pavement markings, including, parking stripes, centerline stripes, international disabled parking logo, striping for disabled access ramp, directional arrows, game court lines and other pavement markings as shown on the Plans or as required by code.
D. All pavement lines, striping and lettering shall be four inches (4") in width, unless otherwise indicated on the Plans.
E. Lines painted with traffic paint shall receive two coats of paint. Allow each coat to dry completely prior to applying the second coat.
F. Apply all pavement markings on clean, dry surfaces, during weather conditions where temperatures are higher than 35 degrees F, no rain is occurring or predicted within the next twenty-four (24) hours, and the humidity is less than 80.
G. Remove all excess adhesives and tracking onto unmarked areas.
H. All pavement striping applications shall conform to Caltrans Standard Specifications, Sections 84 and 85.

3.04 Accessible Parking Signs (For parking lots only)

A. Verify that the language on the signs meets with current laws and regulations prior to installation. Immediately notify project manager of discrepancies.
B. For signs at parking stalls: install one per space designated for disabled parking. Locate sign as shown on the Plans. Verify location in the field prior to installation. Sign bottom shall be set at seven feet (7') above finished grade.
C. For notification signs: install one per driveway entrance. Verify location in the field prior to installation. Sign bottom shall be set at two feet (2') above finished grade unless otherwise directed.
D. Sign post installation shall conform to TS-17A of the City of Roseville Development Services Design and Construction Standards.

3.05 Protection and Cleaning

A. Do not allow equipment or vehicles to park on new asphalt surfaces upon completion of fog seal operations. At his discretion, the Contractor may allow the parking of equipment and vehicles on the asphalt concrete **AFTER** the asphalt concrete material has been laid, passing applicable compaction tests and **PRIOR TO** applications of fog seal and striping.

END OF SECTION

SECTION 32 15 40
DECOMPOSED GRANITE PAVING

PART 1 - GENERAL

1.01 General Requirements

A. The requirements set forth in the General Conditions shall be in addition to the standards provided herein.

B. The requirements set forth in the Supplemental Conditions shall be in addition to the standards provided herein.

C. The standards set forth in the City of Roseville Design and Construction Standards and the City of Roseville Parks Construction Standards, latest editions, shall be in addition to the standards provided herein.

1.02 Description

A. Furnish all labor, materials and equipment for the complete installation of decomposed granite paving, including redwood headers as shown in the Plans and as specified herein.

1.03 References

A. Caltrans Standard Specifications, latest edition.

1.04 Submittals

A. Submittals for specified items are not required; however, submittals are required for any proposed substitutions or deviations from the Plans or Specifications. Additionally, submittals are required for the specific items listed below. The Contractor shall submit a materials summary sheet indicating which items will be installed as specified and which items are proposed for substitutions. The Contractor shall submit proof of order within ten (10) working days of the Notice to Proceed, indicating all specified materials have been ordered, noting “as specified” or “substitution proposed”. Submittals are required on the following items:

1. Decomposed granite material and binding material: provide a sample “brick” for review and approval.

PART 2 - PRODUCTS

2.01 Crushed Quarry Rock

A. Crushed rock, graded between #4 and #200. Rock shall be high quality and well-graded.

B. Hastie's Capitol Sand and Gravel, Roseville, CA (916) 989-4600 or accepted equal.

2.02 Header

A. 1"x6"or2"x6" Redwood header board.

2.03 Binding Material

A. PolyPavement, Los Angeles, CA (323) 954-2240 or accepted equal.

PART 3 - EXECUTION

3.01 Preparation

A. Upon completion of grading operations, compact the subgrade at the required elevation to a relative compaction density of 95%, unless otherwise noted on the Plans.
B. Completely install redwood header as shown in the City of Roseville Parks Construction Standards.
C. No material shall be placed in muddy conditions, nor shall any material be placed during or immediately after inclement weather, i.e. rain storms, etc.
D. Submit samples of crushed rock to a PolyPavement Certified Lab to prepare a laboratory "brick" to confirm that the quarry material has sufficient fines for good binding.

3.02 Installation

A. Provide a 10' by specified width test sample, to be approved prior to installation. This sample shall be the basis of overall approval.
B. Thoroughly combine binder per manufacturer recommendations.
C. Spread crushed granite fine/binder material in two (2) one and one half inch (1-1/2") lifts (thickness after compaction).
D. Wet and roll each lift to form a uniform, smooth surface with a cross slope of 2%. Compact each lift to a 95% relative compaction density.
E. Upon completion of the final lift, fill any depressions, holes or divots and re- roll using the above process.
F. Provide a Certificate of Compliance verifying that the binder/stabilizer has been mixed per manufacturer's recommendations.

3.03 Clean Up and Protection

A. Thoroughly clean all areas where work has occurred. Remove from site excess material, debris and rubbish.
B. Take all precautions to protect completed work. Immediately repair or replace all damaged areas due to tire ruts, erosion, compaction failure, etc.

END OF SECTION

SECTION 32 31 13
CHAIN LINK FENCING

PART 1 - GENERAL

1.01 General Requirements

A. The requirements set forth in the General Conditions shall be in addition to the standards provided herein.

B. The requirements set forth in the Special Conditions shall be in addition to the standards provided herein.

1.02 Description

A. Furnish all labor, materials and equipment for the complete installation of the chain link fence system, including gates as shown on the Plans and as specified herein.

1.03 References

A. Caltrans Standard Specifications, latest edition.

PART 2 - PRODUCTS

2.01 General

A. Wire used in the fabric shall be galvanized and shall have a tensile strength of 80,000 lbs. Per square inch based on cross sectional areas of the wire. One sample shall be tested without removing bends caused by weaving of the wire with the mesh. A second test shall be conducted on a wire strand carefully straightened. The tensile strength is finally determined as the average reading between the two tests. Wire to match fabric selection.

B. Fabric shall be 1-3/4" 9-gauge nominal wire mesh, *hot-dipped galvanized or black vinyl coated* after weaving as shown on the plans. Conform to ASTM A392, with tensile strength as described in 2.01A above. Fabric shall be knuckled top and bottom with single width to full height of fence.

C. Ties/Fasteners shall be 9-gauge aluminum or black powder coated wire.

D. Fittings, clips, bolts, bands, bars, post tops/covers and other hardware necessary for a complete fence system shall be *galvanized or black powder coated*.

E. Where fencing is shown on the Plans to be black vinyl or powder coated, all appurtenances, including fabric, posts, rails, clips, bands, fittings, etc., necessary for a complete fence system shall be black vinyl or powder coated. Vinyl or powder coating shall be the industry standard for this type of finish.

2.02 Posts and Rails

A. Posts and rails shall be *hot-dipped galvanized per ASTM ~~A120~~ ~~A53~~ or black powder coated*, to match fabric and as shown on the Plans. All posts shall be installed with moisture-proofed caps on the top.
B. Size and lengths of posts shall be as shown in the City of Roseville Design and Construction Standards PK-40, latest edition.

2.03 Gates

A. Fabric and finish to match fence.
B. Hinges and latches shall be industrial strength, heavy duty and shall fit snugly around post. Latches shall be lockable.
C. Size and lengths of posts shall be as shown in the City of Roseville Design and Construction Standards PK-40, latest edition.

PART 3 - EXECUTION

3.01 Post Installation

A. Posts are to be spaced evenly as shown on the City Standard and set plumb and true to lines with the top line uniform as shown in the City of Roseville Design and Construction Standards PK-40, latest edition.
B. All posts shall be set in concrete as shown in the City of Roseville Design and Construction Standards PK-40, latest edition.
C. Where nicks on vinyl or powder coated finished occurs due to installation, the Contractor shall re-finish and patch damaged areas immediately.

3.02 Fabric

A. Attach fabric using fabric bands or clips spaced approximately 14” apart. Connections to top rails and tension wires shall utilize wire ties placed 24” on center.
B. For corner and vertical end connections, install stretcher bars banded to posts and gate frames at 24” apart (maximum).
C. All fabric to be stretched tight, free from sags and bulges.

3.03 Rails

A. For splices along the top rail, provide couplings every 20’. The coupling shall produce a continuous brace from end to end of each stretch of fence. Install a heavy spring at every fifth coupling to allow for expansion or contraction.
B. Utilize the appropriate fittings to ensure that all rails are rigidly clamped to end and corner posts.
C. Clamp mid and bottom rails at each post.

3.04 Gates

A. Gates shall be installed consistent with the City Standard detail. Verify grade conditions along the fence bottom to ensure proper use of the gate(s).
B. Gate openings shall be face-to-face dimensions and shall swing according to the Plans.

3.05 Cleaning

A. Thoroughly clean all areas where work has occurred. Remove from the site excess material, debris and rubbish.
B. Take all precautions to protect completed work. Immediately repair or replace all damaged areas due to tire ruts, erosion, compaction failure, etc. Keep all erosion control measures intact.

END OF SECTION

SECTION 32 32 19
MODULAR CONCRETE RETAINING WALLS

PART 1 - GENERAL

1.01 General Requirements

A. The requirements set forth in the General Conditions shall be in addition to the standards provided herein.
B. The requirements set forth in the Supplemental Conditions shall be in addition to the standards provided herein.

1.02 Description

A. Work includes furnishing and installing concrete modular block retaining wall units to the lines and grades shown on the construction drawings and as specified herein.
B. Work includes preparing foundation soil, furnishing and installing leveling pad, unit fill and backfill to the lines and grades shown on the construction drawings.
C. Keystone retaining walls of low height may be constructed without reinforcement using simple techniques, while high walls and walls with surcharge may be constructed with geogrid reinforcement and compacted backfill to suit a wide range of engineering requirements.

Delete the following paragraph if all retaining walls are unreinforced.

D. Work includes furnishing and installing geogrid reinforcement and backfill to the lines and grades designated on the construction drawings.

1.03 Related Sections

A. Section 31 20 00: Earthwork
B. Section 03 30 00: Site Concrete

1.04 References

A. ASTM C 33 - Standard Specification for Concrete Aggregates.
B. ASTM C 150 - Standard Specification for Portland Cement.
C. ASTM C 331 - Standard Specification for Lightweight Aggregates for Concrete Masonry Units.
D. ASTM C 618 - Standard Specification for Fly Ash and Raw Calcined Natural Pozzolan for Use as a Mineral Admixture in Portland Cement Concrete.
E. ASTM C 989 - Ground Granulated Blast-Furnace Slag for Use in Concrete and Mortars.
F. ASTM D 698 - Standard Method of Laboratory Compaction Characteristics of Soil Using Standard Effort (12,400 ft-lbf/ft3) 600kN-m/m3)).

G. ASTM D 1557 - Standard Specification for Laboratory Compaction Characteristics of Soils Using Modified Effort (56,000 ft-lbf/ft3 (2,700 kN- m/m3).

1.05 Definitions

A. Structural Geogrid: A structural element formed by a regular network of integrally connected tensile elements with apertures of sufficient size to allow interlocking with surrounding soil, rock, or earth and to function primarily as reinforcement.
B. Modular Unit: A concrete retaining wall element machine made from Portland cement, water, and aggregates.
C. Unit Fill: A drainage aggregate which is placed within and immediately behind the modular concrete units.
D. Reinforced Backfill: A compacted soil which is placed within the reinforced soil volume as outlined on the plans.

1.06 Submittals

A. Submit under provisions of Section 01 10 00: Summary of Work.
B. Product Data: Submit manufacturer's product data for proposed materials and method of installation.
C. Samples: Submit samples of each product used in the work of this section.
D. Certifications: Submit a manufacturer's certification, prior to start of work, that the retaining wall system components meet the requirements of this specification.
    1. Contractor's submittal package shall include but not be limited to actual test results for tension/creep, durability/aging, construction damage, geogrid/facing connection, pullout, and quality control.
    2. Contractor shall submit certification, prior to start of work, that the retaining wall system (modular concrete units and specific geogrid):
        a) has been successfully utilized on a minimum of five (5) similar projects, i.e., height, soil fill types, erection tolerances, etc.; and
        b) has been successfully installed on a minimum of 1 million (1,000,000) square feet (92,000 sq m) of retaining walls.
E. Test Reports: Submit test reports documenting strength of specific modular concrete unit and geogrid reinforcement connection. The maximum design tensile load of the geogrid shall be equal to the laboratory tested ultimate strength of geogrid/concrete retaining wall unit connection at a maximum normal force limited by the "Hinge Height" of the structure divided by a safety factor of 1.5. The connection strength evaluation shall be performed in accordance with NCMA test method SRWU-1.
F. Contractor shall submit engineering plans prepared by a professional engineer experienced with Mechanically Stabilized Earth retaining wall systems and

registered in the state of the project location. The engineering designs, techniques, and material evaluations shall be in accordance with the KEYSTONE Design Manual, 1995, NCMA Design Guidelines for Segmental Retaining Walls, 1997, or the AASHTO Standard Specifications for Highway Bridges, Section 5.8, 1993 Interim, whichever is applicable.

G. Submit a list of previous projects totaling of 500,000 square feet (46,000 sq m) or more where the specific retaining wall system has been used successfully. Contact names and telephone numbers shall be listed for each project.

1.07 Quality Assurance

A. Owner will engage and pay for independent soil testing services during earthwork operations.

1.08 Delivery, Storage and Handling

A. Contractor shall check the materials upon delivery to assure that proper materials have been received.

B. Contractor shall prevent excessive mud, wet cement, epoxy, and similar materials (which may affix themselves) from coming in contact with the materials.

C. Contractor shall protect the materials from damage. Damaged materials shall not be incorporated into the retaining wall structure.

Delete the following two paragraphs if all retaining walls are unreinforced.

D. Geogrids shall be stored above minus 20 degrees F.

E. Rolled geogrid material may be laid flat or stood on end for storage.

1.09 Record Drawings

A. The Contractor shall keep an accurate record of the as-built conditions of the modular concrete retaining walls. These records shall be updated daily and kept at the construction site. At any time, the Inspector may examine the conditions of the “as-builts” to ensure compliance of the above.

PART 2 - PRODUCTS

2.01 Manufacturer

A. Provide modular concrete retaining wall units and accessory materials fabricated by authorized licensed manufacturers of Keystone Retaining Wall Systems, 4444 West 78th Street, Minneapolis, MN 55435. Telephone 612-897-1040. ASD. FAX 612-897-3858, or accepted equal.

2.02 Modular Concrete Retaining Wall Units

A. Modular concrete units shall conform to the following architectural requirements:

1. Modular concrete unit color: Manufacturer's standard color.
2. Face finish: Sculptured rock face in angular multiplanar configuration. Other face finishes will not be allowed without written approval.
3. Bond configuration - running with bonds nominally located at midpoint vertically adjacent units, in both straight and curved alignments.
4. Exposed surfaces of units shall be free of chips, cracks or other imperfections when viewed from a distance of 20 feet (6.1 m) under diffused lighting.
5. Corners: Provide 90 degree corners, finished two sides, where indicated.
6. Cap units: Provide solid cap units with parallel sides for straight walls and convex walls, angular sides for concave walls.

B. Modular concrete units shall conform to the following material requirements:
   1. Cement: Materials shall conform to the following applicable specifications.
      a) Portland Cement: ASTM C 150.
      b) Modified Portland Cement: Portland cement conforming to ASTM C 150, modified as follows:
         1) Limestone - calcium carbonate, with a minimum 85 percent content, may be added to the cement, provided these requirements of ASTM C 150 as modified are met:
            a. Limitation on insoluble residue 1.5 percent.
            b. Limitation on air content of mortar by volume: 22 percent maximum.
            c. Limitations of loss of ignition: 7 percent.
      c) Blended Cements: ASTM C 618.
      d) Pozzolans: ASTM C 618.
      e) Blast Furnace Slag Cement: ASTM C 989.
   2. Aggregates: Conform to the following specifications:
      a) Normal Weight Aggregates - ASTM C 33.
      b) Lightweight Aggregates - ASTM C 331.
   3. Other Constituents: Air entraining agents, coloring pigments, integral water repellents, finely ground silica, and other constituents shall be previously established as suitable for use in modular concrete retaining wall units and shall conform to applicable ASTM standards or, shall be shown by test or experience to be not detrimental to the durability of the modular concrete units or any material customarily used in retaining wall construction.

C. Modular concrete units shall conform to the following structural and geometric requirements:
   1. Compressive strength: 3000 pounds per square inch (20MPa) minimum.
   2. Absorption: 8 percent maximum for standard weight aggregates.
   3. Unit width to height ratio: 2.25 to 1.

In the next four paragraphs concerning unit depth, weight, shear strength, and connection strength, delete the requirement for Standard or Compact units, respectively, if only one type is required. If both types are required, retain both.

4. Unit depth:
   a) Standard units: 20 inches (508 mm) minimum.
   b) Compact units: 12 inches (305 mm) minimum.
5. Unit weight:
   a) Standard units: 90 pounds (40 kg) per unit minimum for standard weight aggregates.
   b) Compact units: 75 pounds (34 kg) per unit minimum for standard weight aggregates.
6. Inter-unit shear strength:
   a) Standard units: 1500 pounds per linear foot (21,000 N/m), minimum, at 2 pounds per square inch (13 kPa) normal pressure.
   b) Compact units: 400 pounds per linear foot (5800 N/m), minimum, at 2 pounds per square inch (13 kPa) normal pressure.
7. Geogrid/unit peak connection strength:
   a) Standard units: 1000 pounds per linear foot (14600 N/m), minimum, at 2 pounds per square inch (13 kPa) normal force.
   b) Compact units: 600 plf minimum at 2 psi normal force. 600 pounds per linear foot (8700 N/m), minimum, at 2 pounds per square inch (13 kPa) normal force.
8. Maximum horizontal gap between erected units: 1/2 inch (13 mm).

D. Modular concrete units shall conform to the following constructability requirements:
   1. Vertical setback: 1/8 inch (3 mm) plus/minus per course (near vertical) or 1-1/4 inch (31.3 mm) plus/minus per course per the design drawings.
   2. Alignment and grid positioning mechanism: Fiberglass pins, two per unit minimum.

2.03 Shear Connectors

A. Strength of shear connectors between vertical adjacent units shall be applicable over a design temperature range of minus 10 degrees F (minus 23 degrees C) to plus 100 degrees F (plus 38 degrees C). Shear connectors shall be ½-inch (13 mm) diameter thermoset isopthalic polyester resin- pultruded fiberglass reinforcement rods. Connectors shall have a minimum flexural strength of 128,000 pounds per square inch (882 MPa) and short beam shear of 6,400 pounds per square inch (44 MPa).

B. Shear connectors shall be capable of holding the geogrid in the proper design position during grid pre-tensioning and backfilling.

2.04 Adhesive

A. Construction Adhesive: Keystone Kapseal as supplied by manufacturer of modular concrete units.

2.05 Base Leveling Pad Material

A. Material shall consist of a compacted crushed stone base or non-reinforced concrete as shown on the drawings.

2.06 Unit Fill

A. Unit fill shall consist of clean 1-inch minus crushed stone or crushed gravel meeting the gradation listed below.
   1. 1-inch (25 mm) sieve, 100 percent passing.
   2. ¾-inch (19 mm) sieve, 75-100 percent passing.
   3. No. 4 (4.75 mm) sieve, 0 - 10 percent passing.
   4. No. 50 (300 micro-m) sieve, 0 - 5 percent passing.

B. Pea gravel (3/8-inch to ½-inch (9.5 mm to 13 mm) round stone) is not acceptable.

2.07 Reinforced Backfill

A. Reinforced backfill shall be free of debris and meet the following gradation requirements:
   1. 2-inch (50 mm) sieve, 100-75 percent passing.
   2. 3/4-inch (19 mm) sieve, 100-75 percent passing.
   3. No. 4 (4.75 mm) sieve, 100-20 percent passing.
   4. No. 40 (425 micro-m) sieve, 0-60 percent passing.
   5. No. 200 (75 micro-m) sieve, 0-35 percent passing.
   6. Plasticity Index (PI) less than 10 and liquid limit less than 40.

B. The maximum aggregate size shall be limited to 3/4 inch (19 mm) unless field tests have been or will be performed to evaluate potential strength reductions to the geogrid design due to damage during construction.

C. Material can be sit-excavated soils where the above requirements can be met. Unsuitable soils for backfill (high plastic clays or organic soils) shall not be used in the backfill or in the reinforced soil mass.

D. Contractor shall submit reinforced fill sample and laboratory test results to the Architect/Engineer for approval prior to the use of any proposed reinforced fill material.

Delete the following article if all retaining walls are unreinforced.

2.08 Geogrid

A. Material: Geogrid products shall be high-density polyethylene or polypropylene expanded sheet or polyester woven fiber materials, specifically fabricated for use as soil reinforcement.
B. Tal, Allowable Tensile Design Load, shall be determined as follows:
   1. Tal = Tult/(Rfd x Rfcr x Rfcd x FS)
   2. Tal shall be evaluated based on a 75 year design life.
C. Rfcr, Reduction Factor for Creep Limited Tensile Load: Rfcr shall be determined from 10,000 hour creep testing performed in accordance with ASTM D 5262.
D. Rfd, Reduction Factor for Durability/Aging: Rfd shall be determined from polymer specific durability testing covering the range of expected soil environments.
E. Rfcd, Reduction Factor for Construction Damage: Rfcd shall be determined from product specific construction damage testing performed in accordance with GRI-GG4. Test results shall be provided for each product to be used with project specific or more severe soil type.
F. FS, Overall Factor of Safety: FS shall be 1.5 unless otherwise noted.
G. The maximum design tensile load of the geogrid shall not exceed the laboratory tested ultimate strength of the geogrid/facing unit connection as limited by the "Hinge Height" divided by a factor of safety of 1.5. The connection strength testing and computation procedures shall be in accordance with NCMA test methods.
H. Soil Interaction Coefficient, Ci: Ci values shall be determined per GRI:GG5 at a maximum 0.75 inch (19 mm) displacement.
I. Manufacturing Quality Control: The geogrid manufacturer shall have a manufacturing quality control program that includes QC testing for each 40,000 square feet (3700 sq m) of production, each lot, or each production day. The QC testing shall include:
   1. Tensile Modulus
   2. Specific Gravity
   3. Melt Flow Index (PP & HDPE)
   4. Molecular Weight (PETP)

PART 3 - EXECUTION

3.01 Examination

A. Verify that layout dimensions are correct and substrate is in proper condition for installation. Do not proceed with installation until unsatisfactory conditions have been corrected.

3.02 Excavation

A. Contractor shall excavate to the lines and grades shown on the construction drawings. Obtain the Architect/Engineer's approval of excavation prior to placement of leveling material or fill soils.
B. Over-excavation of deleterious soils and replacement with suitable fill, when approved in advance by the Architect/Engineer, will be paid at unit cost rates.
C. Contractor shall be careful not to disturb embankment and foundation materials beyond lines shown.

3.03 Base Leveling Pad

A. Leveling pad material shall be placed to the lines and grades shown on the construction drawings.

Select one of the following three paragraphs for desired base leveling pad, or leave more than one if contractor may choose. Note that Proctor testing is not possible for crushed stone option.

B. Granular leveling pad material shall be compacted to a minimum of 95 percent Standard or 90 percent Modified Proctor.
C. Crushed stone leveling pad shall be compacted to yield (Proctor testing does not apply).
D. Concrete leveling pad shall be minimum inches of unreinforced concrete.

E. Leveling pad shall be prepared to ensure full contact to the base surface of the concrete units.

3.04 Modular Unit Installation

A. First course of units shall be placed on the leveling pad, and alignment and level checked. Pins or molded surfaces of modular concrete units shall be used for alignment control; do not attempt alignment from split-face surface.
B. Ensure that all units are in full contact with base and properly seated.
C. Install fiberglass-connecting pins and fill all voids in and around the modular units with unit fill material. Tamp or rod unit fill to ensure that all voids are completely filled.
D. Sweep excess material from top of units and install the next course. Ensure that each course is completely unit filled, backfilled and compacted prior to proceeding to next course.

E. Place each subsequent course ensuring that pins protrude into adjoining courses a minimum of 1 inch (25 mm). Two pins are required per unit. Push next course unit forward, away from the fill zone, locking against the pins in the previous course and backfill as the course is completed. Repeat procedure to the extent of wall height.
F. Follow wall erection and unit fill placement closely with any other backfilling required.
G. Position vertically adjacent modular concrete units as recommended by the manufacturer (in running bond pattern).
H. Maximum, stacked, vertical height of wall units, prior to wall unit fill, backfill placement and compaction, shall not exceed two courses.
I. One cubic foot, minimum, of unit fill shall be used for each square foot (0.30 cu m/sq m) of wall face. Unit fill shall be placed within cores of, between, and behind units to meet this requirement.
J. Whole, or cut, units on curves and corners to shall be erected with running bond approximately centered on units above and below.
K. Cap Installation: Apply adhesive to top surface of unit below and place cap unit into position over projecting pins from units below.

Delete the following article if all retaining walls are reinforced with geogrid reinforcement.

3.05 Unreinforced Backfill Placement

A. Place and compact backfill in lifts not to exceed 8 inches (200 mm).
B. Backfill shall be compacted to 95 percent of the maximum density as determined by ASTM D 698.
C. Place the top 8 inches (200 mm) of the structure fill using low permeability soil.
D. Only lightweight hand-operated equipment shall be allowed within 3 feet (900 mm) from the tail of the modular concrete units.
E. At the end of each day's operation, the Contractor shall slope the last lift of reinforced backfill away from the wall units to direct runoff away from wall face. The Contractor shall not allow surface runoff from adjacent areas to enter the wall construction site.

Delete the following article if all retaining walls are unreinforced.

3.06 Structural Geogrid Installation

A. Geogrid shall be oriented with the highest strength axis perpendicular to the wall alignment.
B. Geogrid reinforcement shall be placed at the elevations and to the extent shown on the construction drawings or as directed by the Engineer.
C. The geogrid shall be laid over the fiberglass pins of the modular wall units and extended horizontally on compacted backfill. Place the next course of modular

concrete units over geogrid. The geogrid shall be pulled taut, and anchored prior to backfill placement on the geogrid.

D. Follow manufacturer's guidelines relative to overlap requirements of uniaxial and biaxial geogrids.
E. Geogrid reinforcements shall be continuous throughout their embedment lengths. Spliced connections between shorter pieces of geogrid is not allowed unless pre-approved by the Architect/Engineer prior to construction.

Delete the following article if all retaining walls are unreinforced.

3.07 Reinforced Backfill Placement

A. Reinforced backfill shall be placed, spread, and compacted in such a manner that minimizes the development of slack in the geogrid.
B. Backfill shall be placed from the wall back towards the embankment to ensure that the geogrid remains taut.
C. Reinforced backfill shall be placed and compacted in lifts not to exceed 8 inches (200 mm) where hand compaction is used, or 12 inches (300 mm) where heavy compaction equipment is used.
D. Reinforced backfill shall be compacted to 95 percent of the maximum density as determined by ASTM D 698. The moisture content of the backfill material prior to and during compaction shall be uniformly distributed throughout each layer and shall be within +1/-3 percentage points dry of optimum.
E. Place the top 8 inches (200 mm) of the structure fill using low permeability soil.
F. Only lightweight hand-operated equipment shall be allowed within 3 feet (900 mm) from the tail of the modular concrete unit.
G. Tracked construction equipment shall not be operated directly upon the geogrid reinforcement. A minimum fill thickness of 6 inches (152 mm) is required prior to operation of tracked vehicles over the geogrid. Tracked vehicle turning should be kept to a minimum to prevent tracks from displacing the fill and damaging the geogrid.
H. Rubber tired equipment may pass over geogrid reinforcement at slow speeds, less than 10 miles per hour (16 kph). Sudden braking and sharp turning shall be avoided.
I. At the end of each day's operation, the Contractor shall slope the last lift of reinforced backfill away from the wall units to direct runoff away from wall face. The Contractor shall not allow surface runoff from adjacent areas to enter the wall construction site.

END OF SECTION

SECTION 32 84 00
IRRIGATION SYSTEM

PART 1 - GENERAL

1.01 General Requirements

A. The requirements set forth in the General Conditions shall be in addition to the standards provided herein.
B. The requirements set forth in the Supplemental Conditions shall be in addition to the standards provided herein.

1.02 Description

A. Furnish all labor, materials and equipment for the complete installation of an automated irrigation system, including all necessary appurtenances for proper operation, noted or implied, as shown on the Plans and as specified herein.
B. Water usage, meter costs, connection fees, testing and other associated utility costs are considered direct costs and is the responsibility of the Contractor until the project is accepted.
C. Installation of the water meter shall be by the City.

1.03 Related Work

A. Section 32 90 00: Planting
B. Section 26 00 00: Site Electrical

1.04 Quality Assurance

A. All work shall comply with local and state laws, codes, regulations and requirements which govern any portion or all of the work contained in this Section. These include, but are not limited to, the latest editions of:
   1. City of Roseville Park Construction Standards,
   2. City of Roseville Design and Construction Standards,
   3. City of Roseville Electric Department Standard Specifications,
   4. Local, state and federal electrical codes, manuals and guidelines, and
   5. Local, state and federal plumbing codes, manuals and guidelines.

1.05 Submittals

A. Submittals for specified items are not required for Parks or Streetscape projects, unless specifically listed below. However, submittals are required for any proposed substitutions or deviations from the parks Plans or Specifications. For Streetscapes, no substitutions will be accepted. The Contractor shall submit a materials summary sheet indicating which items will be installed as specified

and which items are proposed for substitutions. The Contractor shall submit proof of order within ten (10) working days of the Notice to Proceed, indicating all specified materials have been ordered, noting “as specified” or “substitution proposed”. Submittals are required on the following items:

1. Controller, Flow Sensor(s), and Master Valve(s).
2. Filter (Recycled water)
3.

1.06 Explanation of Drawings

A. The drawings are diagrammatic and do not reflect all offsets, fittings and other miscellaneous items required for a complete and operable irrigation system. It shall be the Contractor’s responsibility to investigate all existing site conditions, become thoroughly familiar with the site, and provide all labor, materials and equipment required for the installation of the irrigation system.
B. Avoid conflicts between other trades and the installation of the irrigation system. Minor adjustments to avoid such conflicts shall be made in the field. Major discrepancies between actual field conditions and the Plans shall be brought to the attention of the Project Manager. The lack of notification shall indicate that the Contractor assumes full responsibility for any revision deemed necessary to ensure proper installation.

1.07 Product Delivery, Handling and Storage

A. All materials shall be delivered bearing manufacturer’s label with size, type and model number (if applicable) clearly marked.
B. All pipe shall be delivered in a vehicle which allows the material to lie flat without concentrated weight or stress at any point.
C. Unload all materials with care so as to avoid damage. Store materials in a covered area and do not expose PVC pipe to extreme sun or heat. Store pipe lying flat.
D. Do not install any material that has been damaged. Replace all material found to be damaged.

1.08 Record Drawings

A. The Contractor shall keep an accurate record of the as-built conditions of the irrigation system. These records shall be updated daily and kept at the construction site. At any time, the Inspector may examine the conditions of the “as-builts” to ensure compliance of the above.
B. Dimensions shall be recorded from two (2) permanent points of reference.
C. The City may at its discretion withhold progress payments to the Contractor if the as-built records are not updated to the satisfaction of the City.

PART 2 - PRODUCTS

2.01 General

A. All materials specified shall be new, bearing the brand name, type, serial numbers and model number as shown on the Plans and as specified herein, unless otherwise accepted in writing.

2.02 Backfill Material

A. Backfill shall be clean, screened, on-site material, free from organic material, large clods of earth and/or rock larger than one (1) inch in diameter, trash, debris, rubbish, tree trunks, broken concrete or asphalt and other unacceptable material.

B. Material larger than one (1) inch shall be removed from site and legally disposed. All removal shall be the responsibility of the Contractor.

2.03 Meter

A. Meter shall be as shown on the Plans and as required by the City of Roseville Environmental Utilities Department.

2.04 Backflow Prevention Device

A. Backflow Prevention Device shall be as shown on the Plans.

B. Cover shall be insulated, freeze-proof, removable and lockable, manufacturer and model per the City of Roseville Design and Construction Standards or accepted equal.

2.05 Filter (Recycled Water Only)

A. Amiad Filtration Systems, Manual Steel Filter, Disc Type-Red 130 micron filter element, match line size of recycled water meter.

2.06 Flow Sensor and Master Valve

A. Calsense Controllers:

1. Flow sensor shall be a Calsense Flow Meter (FM-B) featuring a proprietary, non-magnetic sensing mechanism and a six-bladed design. Flow sensor shall be accurate to +/- 1% of full scale. Flow sensor body shall be constructed of bronze. Applications with high and low flows requiring a bypass manifold flow meter shall instead utilize Flomec QS200 Ultrasonic Flow Sensor.

2. Master valve(s) shall be Superior, ~~3000~~ 3300 series, normally open, electric globe valve, constructed of brass with dirty water protection and No Minimum Flow feature. For ~~installations with a single master valve, the valve shall be normally open. For installations with two master valves, the larger valve shall be normally closed and the smaller valve shall be normally~~

~~open~~recycled water systems, include -RW Recycled Water designation with purple handle for identification.

3. Flow meters to be constructed consistent with the Calsense specifications.
4. Valve boxes for master valve and flow sensor shall be 18" (jumbo) green rectangular rigid plastic valve boxes with lockable lids and extensions by Carson Industries, LLC or accepted equal. Valve box lid shall be colored green in turf areas, tan in natural planter areas, and purple for recycled water applications.

2.07 Booster Pump

A. Customflow Quality Booster Pump by ~~Custom Pump & Power~~V-Power Equipment, Inc. (888) 830-8025.
B. Provide technical startup support, pump certification and 30 month following delivery warranty by V-Power Equipment~~Custom Pump & Power,~~ Inc.
C. Variable Frequency Drive Control Panel with Fuji Eco Drive, NEMA 12 enclosure, main disconnect, DC choke, panel cooling fan, HOA switch on panel door, 110 volt transformer for controls and external fan, Terminals for wire connections, (2) Pump start relays for irrigation controller controls, ET/U.L. 508A Listed and proprietary programmed for City of Roseville standard operation by Custom Pump & Power, Inc.
D. IFM Efector PA3224 transducer is rated for 0-145PSI and adjustable through the VFD.
E. Enclosures to be sized to fit pump, VFD, valves, bypass, transducer, and pump inserted Hot Stop temperature protection to be activated at 120 degree with manual reset mounted on the VFD panel door. Flange connection for inlet and outlet outside the enclosure. Standard enclosure to be fitted for padlock and have a shock assisted opening on the front. Larger enclosures with removable doors with built in lock with the 402 key. All enclosures to be steel and powder coated dark green.
F. Installation by licensed contractor as shown on plans and connect power wires from meter pedestal and 24-volt control wire from the controller to the VFD line connectors inside the enclosure.

2.08 Pipe

A. PVC Pressurized Mainline
   1. For lines three inch (3") or larger: polyvinyl chloride (PVC) 1120-1220, SDR 21, Class 200 rubber gasketed pipe, and NSF accepted per Standard No. 14, Type I, Grade I. Conform to:

Material	ASTM
Pipe	D1784, D2241
Rubber Gasket	F477

2. For lines two and one half inches (2-1/2") or smaller: Schedule 40 polyvinyl chloride (PVC) 1120-1220, and NSF accepted per Standard No. 14, Type I, Grade I. Conform to:

Material	ASTM
Pipe	D1784, D1785

B. PVC Non-Pressurized Lateral Lines
1. Schedule 40 polyvinyl chloride (PVC) 1120-1220, SDR 21.0, NSF accepted per Standard No. 14, Type 1, Grade II.

C. Recycled Water
1. Pipes shall meet the standards outlined in Sections 2.08, A and B above, unless otherwise noted in the City of Roseville Design and Construction Standards for recycled water, latest edition.
2. All pipes containing recycled water shall be purple, NSF accepted and conform to the City of Roseville Design and Construction Standards, latest edition.

2.09 Fittings and Nipples

A. Fittings for ~~Potable~~ Mainline Pipe:
1. For all control valves on mainlines three inches (3") and larger, use painted, ductile iron saddle taps with double stainless steel straps and nuts Model #202 by Romac Industries, Inc. or accepted equal.
2. For all other connections on mainlines three inches (3") and larger mainline pipe, use glued schedule 80 fittings.
3. For all connections on mainlines two and one half inches (2-1/2") or smaller, use glued schedule 40 fittings.

B. Fittings for ~~Potable~~ Solvent Weld Pipe:
1. Schedule 40 for 2 ½" pipes or smaller and Schedule 80 for 3" pipe and larger polyvinyl chloride (PVC), standard weight, conforming to ASTM D2466-73. Use Schedule 80 for all recycled water systems.
2. Weld-on #P-70 primer and Weld-on #711 gray glue or accepted equal.
3. Teflon tape for all threaded PVC fittings.

C. Plastic Nipples shall be Schedule 80, Type 1, Grade 1, polyvinyl chloride (PVC), threaded at both ends, and conforming to ASTM D1784 -85. Nipples shall be uniformly gray.

D. Fittings for Recycled Pipe:
1. ~~See Section 141 Recycled Water in the City of Roseville Design and Construction Standards, latest edition~~Fittings shall meet the standards outlined in Sections 2.09, A, B and C above, unless otherwise noted in the City of Roseville Design and Construction Standards for recycled water, latest edition.~~.~~

2.10 Swing Joints

A. Swings joints shall be as shown in the City Parks Construction Standard detail. Schedule 40 threaded PVC triple swing joints or an accepted equal.

2.11 Electric Remote Control Valve

A. Sizes as shown on the Plans. All valves shall be Rainbird PEB series or accepted equal and shall contain the following:
   1. a globe-type electric remote control, normally closed diaphragm type with slow opening and closing action,
   2. encapsulated solenoid type actuation,
   3. a minimum rating of twenty-four (24) volts,
   4. sixty (60) cycle,
   5. two to five (2-5) watts,
   6. a manual flow adjustment with shut-off provisions,
   7. provisions for an external “bleed” of the diaphragm chamber for manual operation.
   8. a ball valve on the inlet.
   9. Schedule 80 PVC threaded fittings from saddle tap to POC to valve.

B. Valve boxes shall be rectangular, rigid plastic valve boxes with lockable lids and extensions by Carson Industries, LLC or accepted equal. Valve box shall be sized appropriately to house entire valve assembly with space to accommodate maintenance access.
   1. Boxes shall be colored green in potable applications, and purple for recycled water applications.
   2. Valve boxes used on recycled water systems shall be permanently colored purple through the manufacturer. Boxes painted purple will be rejected.
   3. Label lids using heat branded identification, T:Turf, S:Shrubs, B:Bubblers

C. Controller station identification number shall be standard yellow tags with permanent numbers by Christy or accepted equal.

2.12 Root Watering System

A. Provide pre-manufactured root watering system.
   1. Pressure compensating bubbler. See irrigation sheets for flow rates.
   2. Check valve where applicable to prevent low head drainage.
   3. Swing joint assembly
   4. Locking grate top on semi-rigid mesh tube
   5. Filter fabric sleeve

2.13 Irrigation Heads

A. All irrigation heads shall conform to type, size, precipitation rate, gallons per minute discharge, pressure and throw radius as shown on the Plans, unless otherwise accepted in writing.
B. In all available models, all irrigation heads shall have stainless steel risers, unless otherwise approved in writing.
C. For recycled water applications, irrigation heads shall be colored purple, have debris pocket, and wiper seals with 3 touch points.
D. Irrigation heads shall have built-in pressure regulation for pop up sprays and/or water-efficient heads.
E. Include built-in check valve where applicable to prevent low head drainage.

2.14 Drip Irrigation

A. Sub-surface dripline.
    1. Flexible polyethylene tubing shall have factory-installed pressure-compensating, inline emitters spaced evenly per listed spacing.
    2. Emitter shall incorporate elemental or ionic copper root intrusion prevention technology, and shall be warranted by the manufacturer to be free of emitter plugging due to root intrusion for a period of fifteen (15) years minimum.
    3. Emitter shall have a built-in check valve that will hold back, at minimum, an 8.5' column of water.
    4. Dripline for use with recycled water systems shall be properly and permanently marked for non-potable use.
B. All fittings shall be constructed of injection molded, brown plastic having a nominal outside dimension of 17mm (0.56”). Female and male threaded ends shall be capable of mating to standard PVC pipe with tapered threads.
C. Line flushing valve
    1. Valve shall be schedule 40 PVC ball valve with brass hose thread adapter.
    2. Valve box shall be rigid plastic, with lockable cover by Carson Industries, LLC or accepted equal. Boxes shall be colored green in potable applications, and purple for recycled water applications.
    3. Drip system operation indicator shall be Rainbird 1812 Pop-up spray body with 4-VAN nozzle set to 0-degree pattern, with Rainbird SA-125050 swing assembly and XFF-TFA barbed bt ½” FIPT fitting, or accepted equal.
D. Pressure Regulating Filters shall be Rainbird PRB Pressure Regulating Basket Filter, or approved equal, and shall include: Basket style body and jar-top cap constructed of heavy-duty glass-filled, UV-resistant polypropylene, with 150 PSI (10,3 bar) operating pressure rating. Standard 200 mesh (75 micron) filter screen constructed of stainless steel attached to propylene frame. Normally-open in-line pressure regulating device, constructed of durable, UV resistant non-corrosive material able to accommodate an inlet pressure rating of not less

than 150 PSI (10,3 bar), with preset outlet pressure of approximately 40 PSI (2,8 bar).

2.15 Thrust Blocks

A. All thrust blocks shall be concrete. The size of the blocks shall be determined by the average safe soil-bearing load of 700 lbs. per square foot.
B. Polyethylene sheeting at thrust blocks shall be 6mil.

2.16 Quick Coupler Valves

A. For potable water, quick coupling valves shall be Rainbird #44LRC or accepted equal. For recycled water, quick coupling valves shall be Rainbird #44NP lockable or accepted equal. All quick coupling valves shall be:
   1. brass or bronze with one (1) IPS female pipe connection,
   2. two piece body with a removable upper portion (for replacement), and
   3. durable yellow covers for potable and purple for recycled.
B. Valve keys shall be brass or bronze and shall be of the same manufacturer and size as the valve.
C. Valve box shall be rigid plastic, a minimum of ten inches (10") in diameter with lockable cover by Carson Industries, LLC or accepted equal. Boxes shall be colored green in potable applications, and purple for recycled water applications.
D. Where recycled water is used, conform to the City of Roseville Design and Construction Standards.

2.17 Manual Valves

A. For pipe four inches (4") and larger gate valves shall be:
   1. located where shown on the Plans,
   2. flanged with Class 125 cast iron body,
   3. bronze trimmed with a non-rising stem,
   4. square operating nut,
   5. able to withstand a cold water pressure of 150 pounds per square inch, and
   6. sized to match the pipeline which the valves serve, unless otherwise shown on the Plans.
B. For pipe three inches (3") or smaller and on pipes which feed directly into a remote control valve, ball valves shall be installed and shall:
   1. allow for manual operations,
   2. rapid on/off , drip-tight shut-off control,
   3. be constructed of bronze or brass with heavy-duty handle,
   4. operate up to 22 gallons per minute,
   5. operate between 15 and 150 pounds per square inch, and

6. be sized to match the pipeline which the valves serve, unless otherwise shown on the Plans.

C. Valve box shall be rigid plastic, a minimum of ten inches (10") in diameter with extensions and lockable cover by Carson Industries, LLC, as shown on the Plans or accepted equal. Boxes shall be colored green in potable applications, and purple for recycled water applications.

2.18 Automatic Irrigation Controller

A. Automatic controllers shall be Calsense CS3000 or accepted equal, ~~as distributed by Ewing Irrigation, 500 Berry St # B, Roseville, CA, 95678, Attn: Tom Noonan, (916) 812-5034~~. Each controller shall include:

1. CS3-LR – Calsense Local Radio,
2. FM-B – Flow Meter (Brass),
3. CS3-~~SSE~~SS1 or CS3-~~SSE~~SS1-D – Stainless Steel Enclosure with:
   a) CS3000 Transient Protection
   b) TP-110 – AC Line Protection,
   c) LR-STUBBY – Antennae w/2ft cable
   d) On/Off Switch
   e) GFI electrical outlet inside enclosure.

When multiple controllers are used, include:

4. CS3-FL – Flowsense software (for multiple controllers sharing POC and/or communications)
5. CS3-MSSE-KIT or CS3-SR-KIT – Hardwire or SR radio,

When multiple flow sensors are used, include:

6. CS3-2WIRE-OPT & CS-2W-POC (one per POC) – Additional Flow Meter interface.

B. Communication wire between controllers shall be Paige Cable P7171D or accepted equal.

2.19 Control Wires

A. Direct burial solid copper wire AWG-U.F. 600 volt.

B. Common wire and two spare wires shall be minimum #12-gauge.

C. Pilot wires shall be red, minimum #14-gauge. Wire gauge shall be, at minimum:

Wire Gauge	#14	#12	#10	#8
Max. Distance (ft.)	2,500	3,250	4,000	4,800

D. Splices:

1. Wire connections at remote control valves only shall utilize 3M direct bury splice kit model #DBY (yellow) or model #DBR (red).
2. All other splices, including line splices, connections to flow meters and other sensors, shall

utilize 3M Scotchcast 3570G Connector Sealing Packs~~Spears DS-100 Connectors with Spears DS300 sealant, or accepted~~no known equal.

E. Wiring colors shall be:

USE	COLOR
Flow	Yellow
Master	Blue
Pump	Black
Valves	Red
Common	White
Spare	Orange
Tracer	Green

2.20 Sleeves

A. Schedule 40 PVC 1120-1220 and two times the diameter of the pipe to be accommodated by the sleeve, one (1) for control wires and one (1) for main line, and one (1) for lateral lines.
B. Maximum one (1) line per sleeve.
C. Add one (1) spare, same size as largest.

2.21 Tracer Wire

A. Insulated solid copper wire, minimum #12 gauge. Color shall be green.

PART 3 - EXECUTION

3.01 Site Conditions

A. Prior to start of irrigation work, review the site conditions to verify that stub- outs, points of connections, sizes of the points of connections, water pressure and other essential items necessary for irrigation work to commence are as shown on the Plans and as indicated in the Specifications.
B. Notify the Inspector immediately of any existing conditions which are unacceptable for the commencement of irrigation work.

3.02 Coordination of Work

A. Coordinate all work with other trades.
B. The irrigation plan is diagrammatic. Whenever possible, locate all pipes in planted or turf areas. Do not scale off of the Plans. Where field conditions have changed, notify the Inspector immediately.

3.03 Excavation and Trenching

A. Trenches shall be dug straight and in such a manner as to completely support the pipe continuously along the bottom of the trench. In rocky conditions, over-excavation and placement of clean bedding material may be required to ensure

protruding rocks do not place undue stress on pipes. Trench layout shall follow that shown on the Plans, except where accepted by the City.

B. The following minimum cover shall be provided for pipe:

Pipe Type	Minimum Cover
Pressurized Mainlines	24”
Non- Pressurized Lateral Lines	18”
Domestic Water Lines	24”
Control wires	24”
PVC Sleeves under Paving	18”
PVC Sleeves under Auto X-ings	24”

C. Install detection wire, looped in and out of valve boxes and attached to all irrigation mainlines.

D. High voltage wires shall not be installed in the same irrigation water line trench.

3.04 Testing and Flushing

A. Pressure Testing shall occur only when the following conditions can be fulfilled:

Item Description	Condition
Quick coupler valves	Installed and capped
Electric remote control valves	Installed
Flow valve	Installed and open
Ball/Gate valves	Installed and open
Lateral lines	Disconnected
Welded PVC joints	Cured at least 24 hours
Pipe	Center loaded with backfill
Concrete Thrust Blocks	Installed and cured at least 48 hours
Couplings and fittings	Exposed
Detection wire	Installed

~~A.~~B. A pressure gauge shall be installed at the lowest point of the line. Continuous pressure shall be applied at a rate of 125 psi for all mainlines. The pressure shall remain stable for a minimum of two hours with no detectable leakage. Upon completion of the test, a complete examination of the line shall be conducted by the City. Leaks resulting from the test shall be repaired and the line shall be re-tested. This process shall be repeated until the line passes the leakage test.

~~B.~~C. All lines and risers shall be flushed prior to final installation of irrigation heads. All control valves shall be left open during the flushing process.

3.05 Backfilling and Compacting

A. Backfilling of trenches shall not occur until all tests and reviews have been performed. See inspection record contained in the Parks Construction Standards, latest edition. Any trench that is prematurely backfilled may be required to be re-dug for review.

B. Compaction of the trenched areas shall meet the following compaction rates of 95% in areas to receive paving and 85% in areas to be planted.
C. Do not flood trenches unless otherwise accepted by the City.
D. Sunken trenches shall be re-finished flush with the adjacent grades.

3.06 Backflow Prevention Device and Enclosure

A. Install per local codes and manufacturer's instructions.
B. When the flow meter is installed above grade, install a backflow prevention device enclosure with lockable gate.

3.07 Flow Meter Installation

A. Install per local codes and manufacturer's instructions.
B. All flow meters shall be installed in ground.
C. Install 3/4" conduit from irrigation controller to flow meter valve box. Install a pull box every 100'.
D. Valve box lids shall be permanently marked identifying FM for flow meter and MV for master valve and GR for grounding rod with heat branding using stencils in a uniform location on all boxes throughout.

3.08 Booster Pump Installation

A. Install per local codes and per manufacture's instruction.
B. Furnish wires and conduits to connect electrical power, and 24-volt pump start controls to the VFD panel located inside the VFD panel
C. Ductile iron plumbing from the flanges above ground to the mainline.
D. Install level concrete housekeeping pad for the pump enclosure per plans, 4" thick, 1"above ground, with 1/2" tool edges
E. Trust blocks to be installed per pump manufacturer's and landscape architect's requirements.

3.09 Pipe Installation

A. Install irrigation pipe in planted areas whenever possible.
B. All pipe and fittings shall be cleaned and free from dirt, dust and moisture.
C. Pipe may be assembled along the trench at grade to avoid undue strain on the pipe or the fittings. All solvent weld connections shall be primed before applying glue. Snake the pipe within the trench to compensate for expansion and contraction.
D. All PVC pipe and metal valve connections shall be made with threaded fittings consistent with drawings PK-15 and PK-16 of the City of Roseville Parks Construction Standards.
E. All PVC-to-PVC threaded connections shall be made with Teflon tape.

F. Install concrete thrust blocks in locations where rubber gasketed irrigation mainlines change directions, e.g. ells, tees; as required on other lines and fittings; and at the termination point of the mainline. Do not conduct a pressure test within 48 hours of the thrust block pours. The size of the thrust blocks shall be per manufacturer's instructions and shall be adequate in size to absorb thrusts up to the maximum internal water pressure. Refer to 3.18 Thrust Blocks.
G. Use glued fittings for all connections inside of a sleeve and within 20' of a sleeve.

3.10 Electric Remote Control Valves

A. Install per local codes, manufacturer's instructions, City of Roseville Design and Construction Standards and as shown on the Plans.
B. Install one (1) electric remote control valve per box and whenever possible, group valve boxes together. Align boxes in a straight and neat row and flush to finish grade. Provide a minimum of six (6) inches between boxes.
C. All valves shall be tagged for easy identification of valve number. Valve box lids shall be permanently marked identifying valve number and controller letter with heat branding using stencils in a uniform location on all boxes throughout.
D. Each valve shall be separately saddle tapped. Manifolded valves shall be rejected.
E. Locate valve boxes outside of turf areas, adjacent to paving, i.e. sidewalks, hardscape, etc. except where shown on the Plans.
F. Provide a minimum of eighteen (18) inches of a complete set of spare control wires, looped, within all control valve boxes.

3.11 Irrigation Heads

A. Install all heads where shown on the Plans and as specified herein.
B. Turf rotary pop-up heads shall be placed two (2) inches from any edge of adjacent walkway, concrete mow band, concrete curb, header board or other hardscape edging, or as required by current WELO regulations.
C. Rotary pop-up heads shall be installed flush with the top of finish grades of turf or planting areas.
D. Sprinkler head riser nipples sizes shall match or be the same as the riser opening of the sprinkler body.
E. Install sprinkler heads with internal check valves where heads are located in low drainage areas, i.e. bottom of berms, bottom of drainage swales, toe of slopes, etc.
F. Install all heads perpendicular to ground surface with an offset from the edge of pavement as indicated in the details.

3.12 Drip Irrigation

A. Drip irrigation is to be installed in a grid pattern layout of equal spacing between rows, unless otherwise noted on approved plans.
B. All drip irrigation shall be installed sub-surface, per manufacturer's specifications. Staple all tubing to soil at 5 feet on-center spacing prior to backfilling.
C. Drip line shall be installed prior to plant installation, with the exception of 15-gallon and larger plant container sizes, which may be installed first at the discretion of the contractor.
D. Line Flushing Valves are to be installed below grade, as detailed, in a valve box with bolt-down lid to allow for periodic inspection and flushing.
    1. Minimum of One (1) Line Flushing Valve shall be installed for every fifteen (15) GPM of zone flow, and at every termination point within a zone, and shall be installed at a point farthest away from the source (typically on an exhaust header) as possible.
E. Pop-up drip system operation indicators shall be placed within eighteen inches (18") of each Flush Valve and shall not be placed such that it will be obstructed by vegetation. Place minimum twelve (12) inches from adjacent hardscapes.
F. If required, Air/Vacuum Relief Valves shall be installed below grade in valve boxes to allow for periodic inspection.
G. Valve box lids shall be permanently marked identifying LF for Line Flush valve and AR for Air/vacuum Relief with heat branding using stencils in a uniform location on all boxes throughout.

3.13 Quick Coupler and Gate Valves

A. Install per local codes and manufacturer's instructions.
B. Locate valve boxes flush with finish grade, twelve (12) inches from walkways, curbs, header boards, etc., and within planted area whenever possible.
C. Install one (1) valve per box.
D. For quick coupler valves, install at 100 feet on center to the extent possible. Provide a 24" steel support staked adjacent to the riser using two (2) stainless steel clamps.
E. For gate valves, install at locations indicated on the Plans.
F. For valve boxes installed below grade, provide 3M ball markers.
G. Valve box lids shall be permanently marked identifying GV for gate valve and QC for quick couplers, and SB for splice boxes with heat branding using stencils in a uniform location on all boxes throughout.

3.14 Automatic Controller

A. Install per local codes and manufacturer's instructions within the specified enclosure.

B. Provide single Paige Cable P-7171D installed in conduit between all controllers.
C. Provide all necessary wiring for a complete installation between the controller and the valves.
D. Above grade wiring shall be installed in metal conduit, unless otherwise accepted. Securely mount conduit onto enclosure or wall and paint to match the adjacent surface.
E. Provide a grounding rod and bonding for each enclosure as required for lightning protection. Grounding rod shall be consistent with drawing PK-1 of the City of Roseville Parks Construction Standards. Install separate grounding rods for each enclosure where bonding is impractical.
F. Label each controller, using permanent markings, with the letter identification indicated on the Plans. Affix label on the inside of the controller cabinet door.
G. Install 110V outlet (GFIC) inside controller enclosure.
H. Provide two (2) reduced as-built irrigation diagrams, laminated and color-coded indicating controller letter, valve/station numbers, valve size, operating pressure, gallons per minute and type of planting for each valve. See Section 01 10 00: Summary of Work 1.15B.
I. Ground test to be conducted after installation. Test results shall not exceed 25 ohms.

3.15 Control Wires

A. Wherever possible, install control wires in common trenches with mainline. The wires shall be taped in bundles at ten (10) feet on center and laid to the side of the pipe. Provide slack between ties to allow for contraction.
B. Wire valve to controller as shown on the plans.
C. Where runs are long, provide an extra three (3) feet of extra ground and control wires looped at 200’ intervals. Snake wires within trenches to allow for contraction.
D. Line splices shall occur in valve boxes at grade, label and allowed only on lengths greater than 2500’. Show locations on as-built plans.
E. Do not wrap wire around pipe or allow any wiring to be placed in concrete or concrete thrust blocks.
F. Install two (2) spare wires starting from the controller, looped to each valve box to the furthest valve box, without splices.

3.16 Tracer Wire

A. Install tracer wire on top of the mainline.
B. Provide a twelve-inch (12”) loop in and out of each valve box. Solder all splices.
C. Where potable water lines are placed in a separate trench, install a tracer wire on top of the potable water line.
D. Tracer wire shall be tested during review and pressure test of the mainline.

3.17 Sleeves

A. Install sleeves under all pavement and as shown on the Plans.
B. Install sleeves at the depths indicated in Section 3.03B above.
C. Extend sleeves a minimum of twelve (12) inches beyond the edge of pavement.
D. At every sleeve location installed in roadways, provide a spare PVC sleeve capped at each end and marked with a 3M ball marker.

3.18 Thrust Blocks

A. Install polyethylene sheeting between mainline and concrete.
B. Thrust blocks shall be formed against a solid trench wall. The thrust block cavity shall be in undisturbed soil or previously placed compacted backfill that yields an acceptable allowable bearing pressure.
C. Concrete thrust blocks shall not be poured on valve wires.

3.19 Cross Connection Testing for Recycled Water Systems

A. The Recycled Water System shall be tested for cross connection in accordance with Uniform Plumbing Code Appendix J prior to use.
B. All testing of Recycled Water Systems must be performed utilizing a potable water source via a construction water connection per City of Roseville Construction Standards. No Recycled Water may enter a Recycled Water System until all testing is successfully completed.
C. At the time a cross connection test is to be performed, construction on both the Potable and Recycled Water Systems being tested must be complete and both systems fully operational and functioning as designed.
D. Cross connection testing shall be performed in the system by City forces with the assistance of the contractor. The test must be coordinated through the Parks Department Inspector. Forty-eight (48) hours' notice is required before the test. Depending on complexity of the site, a preliminary field meet may be required.

3.20 Coverage Test

A. Prior to planting, the Contractor shall perform a coverage test to confirm that water coverage is complete and adequate, and produces no overspray onto hardscapes. Irrigation pressure readings at the head or emission device may also be taken as part of the coverage test to confirm adequate system hydraulics.
B. The coverage test shall be performed on the entire irrigation system and shall be performed in the presence of the Parks Inspector. The irrigation system must be connected to the City water system through the water meter. Temporary connections are not allowed. On recycled water systems, the

coverage test shall take place only after successful completion of the cross-connection test, with the recycled water meter in place.

C. On Park projects containing turf, a comprehensive survey of the Distribution Uniformity (Low Quarter) of each irrigation zone containing turf shall be performed by a third-party, certified irrigation auditor prior to planting of turf. The irrigation system must be 100% complete, including functionality of the irrigation controller and booster pump, if present. The irrigation auditor shall prepare and submit a report listing each zone's Distribution Uniformity, including actual mapping data of catch cans, and noting any potential deficiencies in the system leading to any inadequate findings. Reported deficiencies in Distribution Uniformity will be evaluated by the Project Manager and may require corrective measures prior to approval of turf planting. Deficiencies caused by improper installation shall be corrected at no additional cost to City.

3.21 Irrigation Audit

A. A landscape irrigation audit shall be performed after all landscape and irrigation is installed. The irrigation system must be 100% complete, including functionality of the irrigation controller and booster pump, if present.

B. All landscape irrigation audits shall be conducted by a third party certified landscape irrigation auditor. Landscape audits shall not be conducted by the person who designed the landscape or installed the landscape.

C. The water audit shall conform to the specific water audit requirements of the City of Roseville Environmental Utilities Department, and any supplemental requirements from the City of Roseville Parks, Recreation & Libraries Department. The contractor shall submit a comprehensive landscape irrigation audit. This shall include, but is not limited to:
   1. A completed Irrigation Audit Report-(City of Roseville provided forms only)
   2. Complete system evaluation, including site conditions, system and flow data.
   3. Scheduling parameters used to set the irrigation controller.
   4. An Irrigation schedule for the landscape provided to the owner.

D. A minimum of 25% of all zones shall be audited. The 25% minimum shall be a representative sample of each irrigation method present (i.e. Rotors, bubblers, rotary nozzles, drip, etc.), and is in addition to any turf zones audited during the coverage test.

E. Any deficiencies noted in the audit report such as, but not limited to, run-off, overspray, obstruction of spray patterns, etc., shall be corrected and signed off as such by the original irrigation auditor prior to submission of the report. Do not submit audit reports with uncorrected deficiencies.

3.22 Clean Up

A. Each phase of work shall be immediately cleaned up. Excess equipment, material, etc., shall be legally disposed of and removed from site. All concrete, asphalt and/or decomposed granite paving shall be kept free of soil. Damage to such surfaces shall be immediately repaired to the satisfaction of the City.

PART 4 - GUARANTEE

4.01 General

A. Contractor shall provide a written guarantee covering all materials, equipment and workmanship furnished by him to be free of all defects after installation is accepted, including all defective parts that may have been found.
B. All paved areas shall be swept clean and planted areas shall be weed-free.
C. All irrigation heads shall be properly adjusted. Debris and refuse shall be removed from site prior to inspection.

4.02 Pre-Final (Punch List) Review

A. See Section 01 10 00 1.16 - Summary of Work for notification process.

4.03 Establishment

A. Full automated utilization of the irrigation system shall be included as part of the maintenance of the project. See Section 329000: Planting for additional information.
B. Program and utilize the establishment schedule as submitted with the turn-in items.
C. Contractor to run the system in “quantity” mode or “time plus flow” for a minimum of one (1) week.
D. Check the irrigation system weekly to ensure proper operations. Make all necessary adjustments, including watering schedule to ensure proper and healthy plant growth. At no time shall pools of water be present within any part of the project. Conversely, at no point shall dry or under-watered spots be visible upon inspection. Improper irrigation management resulting in flooding or dry conditions to the detriment of plant material may constitute an extension of the establishment period, at no additional cost to the City.

4.04 Final Review

A. The Contractor shall demonstrate to the City, valve by valve, the entire irrigation system to be operable. All heads shall be adjusted/flushed and all drip zones shall be flushed prior to the on-site review. Any item requiring adjustments shall be completed immediately and to the satisfaction of the City.
B. Provide necessary training to City staff in the proper operations and maintenance of the booster pump.

C. The date of final acceptance by the City Council or the recordation of the property transfer shall signify the start date of the warranty period. Final acceptance shall include the project in total and will not segregate any specific item or trade included in the construction of the project.

END OF SECTION

SECTION 32 90 00
PLANTING

PART 1 - GENERAL

1.01 General Requirements

A. The requirements set forth in the General Conditions shall be in addition to the standards provided herein.

B. The requirements set forth in the Supplemental Conditions shall be in addition to the standards provided herein.

1.02 Description

A. Furnish all labor, materials and equipment for the complete installation of landscape items, including all trees, shrubs, groundcovers and turf; maintenance for the establishment of new plant materials; and all necessary appurtenances for proper planting, noted or implied, as shown on the Plans and as specified herein.

1.03 Related Work

A. Section 31 20 00: Earthwork

B. Section 32 84 00: Irrigation System

1.04 Quality Assurance

A. Provide an experienced foreman who shall directly supervise the work force during all work to be performed under this contract. The foreman shall be present during the time when work is to be performed.

B. Plant material shall conform to current “American Standards for Nursery Stock” and the State of California Grading Code of Nursery Stock, No. 1 grade. Use only nursery-grown stock.

C. All plant material shall be certified free of plant diseases and insect infestations from the County Agricultural Commissioner as required by law. Each shipment of plant material shall be required to have clearance certificates.

D. Prior to planting, a soils fertility test/analysis shall be conducted by an accepted and qualified testing laboratory. Test results shall contain existing nutrient levels, soil texture, cation exchange capacity, soluble salts, pH levels, infiltration rates and recommended soil amendments/fertilizers to ensure proper growth of the specified plantings.

1.05 Submittals

A. Submittals for specified items are not required; however, submittals are required for any proposed substitutions or deviations from the Plans or Specifications. Additionally, submittals are required for the specific items listed below. The Contractor shall submit a materials summary sheet indicating which items will be installed as specified and which items are proposed for substitutions. The Contractor shall submit proof of order within ten (10) working days of the Notice to Proceed, indicating all specified materials have been ordered, noting “as specified” or “substitution proposed”. Submittals are required on the following items:
   1. Bark mulch material,
   2. Certificates of compliance for turf seed mix, soil amendments, fertilizers and hydroseed mix,
   3. Sod-grown turf,
   4. Soils test with soil amendment recommendations.
   5. Trees
      a) Submit for approval, plant sources including the names of nurseries proposed as sources of acceptable trees, and a list of the trees they will provide. The plant list shall include the botanical and common name and the size at the time of selection, including basal caliper and height.
      b) Submit all requests for substitutions of plant species or size for approval. Request for substitution shall be accompanied with a list of nurseries contacted in the search for the required plant and a record of other attempts to locate the required material. Requests shall also include sources of plants found that may be of a smaller or larger size, or a different shape or habit than specified, or plants of the same genus and species but different cultivar origin, or which may otherwise not meet the requirements of the specifications, but which may be available for substitution.

1.06 Soil Testing

A. Native soil and in-place topsoil shall be tested for amendment determination. Soil Tests shall include soil texture, macro nutrients, micro nutrients, lime, base saturation, pH, sodium, boron, salinity, Cation Exchange Capacity (CEC), and Organic content.

B. Submit soils report for review and approval after completion of grading operations. Soil Testing shall be performed by an agriculture-based lab, with detailed, written recommendations for soil amendments and fertilizers specific to ornamental landscape plants and turf.

1.07 Product Delivery, Handling and Storage

A. All materials shall be delivered bearing nursery label with botanical, common names, including cultivars.
B. Carefully handle plant material to ensure that limbs are not broken during the planting or storage of the material.
C. Store plant material in a covered area on-site, protected from inclement or hot weather on-site. Keep root balls moist by frequent watering (during hot weather) of all accepted stock until such time as planting occurs.

1.08 Inspection of Plant Material

A. Notify the Project Manager a minimum of 48 hours prior to date of delivery. All plant material is subject to inspection at the time of delivery. A sample number of plants will be inspected for the following items:

If the sample....	**then the plant shall be...**
is healthy, shapely and well rooted	accepted.
bears a strong central leader	accepted.
is wilted, wind-blown or sunburned	rejected.
is root-bound, restricted or deformed	rejected.
does not bear a strong central leader or has been severely pruned back	rejected.

B. Stock to be consistent with CALFIRE Nursery/Tree Quality Cue card and Root Management Cue Card. Inspector may require contractor to remove tree or plant stock from plant containers to examine roots.
C. 15 gal tree needs to have at least 1" in basal caliper, a 24" box tree needs to have at least 2" in basal caliper, a 36" box tree needs to have at least 3" in basal caliper. Basal caliper is measured as 6" above the ground.
D. Based on the sample inspection, the Project Manager or Inspector reserves the right to reject any or all of the plant material delivered. All rejected plant material shall be immediately disposed of off-site.

1.09 Record Drawings

A. The Contractor shall keep an accurate record of the as-built conditions of the landscaping. These records shall be updated daily and kept at the construction site. At any time, the Inspector may examine the conditions of the "as-builts" to ensure compliance of the above.

PART 2 - PRODUCTS

2.01 Plants

A. The material to be planted shall conform to that indicated on the plans, unless otherwise accepted. The quantity shown on the Plans is approximate and is

furnished for convenience only. Verify all quantities prior to ordering plant material.

2.02 Turf

A. Turf shall be *seed or sod*.
B. Seed –
   1. 98% pure, weed-free mixture with a minimum of 95% germination. Deliver on-site unopened and in the original containers.
   2. 100% Turf Saver RTF (Rhizomatous Tall Fescue) by Barenbrug or accepted equal.
   3. Rhyzome – Active Tall Fescue Blend by Pacific Coast Seed or accepted equal:
      34% Traverse Turf-type Tall Fescue
      33% 3rd Millennium Turf-type Tall Fescue
      33% Rhambler Turf-type Tall Fescue
   4. Turf seed mix shall be Blue tag certified.
C. Sod – Tall fescue blend with named, improved turf-type varieties only. Blend shall contain a minimum 25% Lateral Spread, Rhizomatous, or Self-Repair type tall fescue. Sod shall be non-netted, and contain no more than 10% Bluegrass.
D. Seed / Sod must be submitted and accepted by the Project Manager prior to ordering.

2.03 Soil Amendment

A. As recommended by soils test report.

2.04 Mulch

A. Regular "Walk-on" fir bark as manufactured by Redi-Gro Corporation, Sacramento, CA (916) 381-6063, Mallard Creek, Inc, Rocklin, CA (916) 645-1681, My Bark Company, Inc., Linden, CA (209) 649-4250 or accepted equal.
B. Decorative bark, shredded lumber or saw dust, and construction debris are not permitted. The mulch must be free of needles.

2.05 Topsoil

A. Stockpiled, on-site material.
B. Imported topsoil shall be natural, friable, well-draining, free from admixture of subsoil and foreign objects larger than one inch (1") in diameter, free from toxins or any other harmful substance which may deter healthy plant growth.
C. Perform a soils test for all imported soil. Soil test shall comply with Section 1.06. Submit soils report for review and approval prior to import activities.

2.06 Pre- and Post- Emergent Herbicide

A. Clean, and non-staining. Consult with a pesticide specialist.

2.07 Tree Stakes and Ties

A. Trees furnished in #15 nursery containers require 2" diameter stakes. Trees less than 8' in height require an 8' stake; trees 8' or greater in height require a 10' stake. ~~Two (two) inch diameter by eight (8) feet long minimum,~~ Stakes shall be pine or douglas fir (pressure or non-pressure treated).

B. Trees furnished in 24" boxes or larger require 3" diameter by 10' long stakes. Stakes shall be ~~Three (3) inch diameter by ten (10) feet long minimum,~~ pine or douglas fir (pressure or non-pressure treated).

C. Tree ties should be cut in length out of flat woven polypropylene material, 3/4 inch wide, and 900 lb. break strength. Color to be Green. Product to be ArborTie manufactured by Deep Root Partners, L.P. or approved equal.

D. Tree guying to be flat woven polypropylene material, 3/4 inch wide, and 900 lb. break strength. Color to be Green. Product to be ArborTie manufactured by Deep Root Partners, L.P. or approved equal.

2.08 Native Broadcast Seed

A. Where required, broadcast seed shall be applied as follows:

1. Upland areas ~~(to 3' above swale bottom)~~

Elymus glaucus (Blue Wildrye)	10.0 lbs/acre
Nassella pulchra (Purple Needlegrass)	9.0 lbs/acre
Nassella cernua (Nodding Needlegrass)	6.0 lbs/acre
Melica caljfornica (Californiameljc)	3.0 lbs/acre
Vulpia microstachys (Small Fescue)	3.0 lbs/acre
Poa secunda (Native Pine Bluegrass)	3.0 lbs/acre
Bromus carinaws (California Brome)	2.0 lbs/acre

2. Channel / Wetland Edges (bottom to 3' ~~upslope~~ above high water ~~surface~~ level)

Elymus trachycaulus (Slender Wheetgrass)	12.0 lbs/acre
Hordeum brachyantherum (Meadow Barley)	10.0 lbs/acre
Leymus triticoides 'Yolo' (Creeping Wildrye)	8.0 lbs/acre
Agrostis exarata (Bentgrass)	3.0 lbs/acre
Elymus glaucus (Blue Wildrye)	5.0 lbs/acre

3. Wildflowers (addition to seed mix(es) above, if specified)

Clarkia amoena (Farewell to Spring)	0.5 lbs/acre
Eschscholzia caljfornica (California Poppy)	2.0 lbs/acre
Lupinus nanus {Sky Lupine)	3.5 lbs/acre
Nemophila menziesii (Baby Blue Eyes)	1.5 lbs/acre
Lasthenia californica (Common Goldfields)	1.5 lbs/acre

Formatted: Font: Not Italic

Formatted: Font: Not Italic

Formatted: Font: Not Italic

B. Areas with sandy, dry soil shall receive: Zorro Annual Fescue 6 lbs/acre, Rose Clover 9 lbs/acre
C. A fertilizer consisting of 15-15-15 shall be applied at a rate of one half pound per 1,000 square feet. Fertilizer shall be Natural-based, slow release, and balanced in N, P, & K.
D. Seed for creek banks shall conform to the latest requirements of the California Department of Fish and Game.

PART 3 - EXECUTION

3.01 Site Preparations

A. Prior to start of landscaping work, review the site conditions to verify that final grades have been established, plant/turf beds are weed free, and the irrigation system is operational as shown on the Plans and as indicated in the Specifications.
B. For landscaping within all street right-of-ways, conduct a soils analysis test of the existing soils and remove all lime-treated soils, aggregate base or other non-organic material to a minimum depth of two feet before planting or irrigation installation. Import topsoil to bring the finish grade to specified grades. Submit the soils analysis test results of the imported material prior to import.
C. Notify the Inspector immediately of any existing conditions which are unacceptable for the commencement of landscaping work.

3.02 Coordination of Work

A. Coordinate all work with other trades.

3.03 Preparation of Planting and Turf Areas

A. Upon completion of grading and underground activity, Contractor shall obtain a soils test as outlined in 1.06.
B. Place stockpiled topsoil in all areas to receive planting or turf to a minimum depth of twelve inches (12”).
C. Rip topsoil surface in two directions to a minimum depth of twelve inches (12”).
D. Spread soil amendments at the rates indicated in the soils report.
E. Rototill amendments to recommended depths. Till amendments to a depth of 6” or as recommended by soils report.
F. Remove all rock and debris which are greater than ½ inch in areas to be turfed and one inch (1”) in areas to be planted.
G. All planted and turf areas to be smooth and uniform in grade as shown on the Plans.
H. Planting areas to be sloped to drain as shown on the Plans.

3.04 Storage of Plants and Trees

A. Protect materials from deterioration during delivery and storage. Adequately protect plants from drying out, exposure of roots to sun, wind or extremes of heat and cold temperatures. If planting is delayed more than 24 hours after delivery, set plants in a location protected from sun and wind. Provide adequate water to the root ball package during the shipping and storage period, including weekends and Holidays.

B. Soil moisture shall be maintained above wilting point and below field capacity for the root ball substrate or soil.

C. All plant materials must be available for observation prior to planting. Any plants determined to damaged or distressed due to improper watering may be rejected by inspector and shall be replaced at no cost to City.

3.05 Plant Installation

A. Tree and Shrub Planting

1. Remove only those plants which will be planted the same day. Place such plants in the proposed locations for review and accepted by the City prior to actual planting. Notify the Inspector a minimum of 48 hours prior to day of planting.
2. Dig planting pits as shown on the Plans and as shown in the Parks Construction Standards. Scarify the sides and bottom of pit to prevent glazing. Fill pit completely with water and allow the water to completely drain from the pit prior to actual planting.
3. Relocate any plantings taller than 6” in height that fall in front of any irrigation head in order to ensure proper coverage of the irrigation system.
4. For pits that retain water, completely penetrate the hardpan layer at the bottom of the pit and backfill with topsoil. Fill pit with water to test and ensure proper drainage.
5. Prior to tree planting a central leader needs to be established by structural pruning, as necessary. Codominant leaders need to be removed or suppressed by structural pruning. Refer to the CALFIRE "Tree Training", "Tree Planting", and "Tree Quality" cue cards and "Tree and Plant Root Management Standard and Quality Expectations" contained in Section 5 of these Standards.
6. Plants shall be removed from their containers only at the time of placement within the plant pit. Perform root pruning on all four sides of the root ball by shaving and cutting away the root ball periphery to reduce the amount of circling roots. Starting from the top and then cutting/slicing down to the bottom of the root ball. On a 15 gal container at least 1-1.5 inches of the root ball periphery needs to be removed by slicing or shaving. On a 24” and 36”box tree at least 2 inches of the root ball periphery needs to be removed

by slicing or shaving. A sharp hand pruning saw needs to be used for the slicing or shaving of the root ball. Refer to the CALFIRE "Root Management" cue card contained in Section 5 of these Standards. This process will remove many girdling and circling roots deflected by the container wall and allows for root penetration within the planting basin. Spread all roots to the side to allow proper root development. Add native backfill and amendments as shown in the Parks Construction Standards and as recommended by the soils testing laboratory.

7. Plant tree at least three inches (2") above grade on mount to prevent bowl effect. The tree's beginning root flare must be located at top of grade with installed sod.
8. Carefully place plant into the plant pit without damaging the root ball. Water the backfill until saturated. For trees, water in by hand after planting using at least ten (10) gallons of water, minimum.
9. Construct berm and place tree stakes and install mulch per the Parks Construction Standards. Mulch is required for trees within the turf area.
10. Where mowing will occur, provide an eight-foot (8') minimum horizontal clearance between trees and other site improvements, including shrubs.
11. Tree ties should be installed via a figure eight loop and each tie shall be secured with a nail on the tree stake. Install two (2) Arbor Ties at 2/3 of tree height and two (2) Arbor Ties at ½ of tree height.
12. ~~Trees less than 8' in height require an 8' stake. Trees 8' or greater in height require a 10' stake.~~
13. ~~13.~~12. Tree stakes should be inserted into the ground to a minimum depth of 18".

B. Groundcover Planting
   1. Place groundcover plants in neat, straight, and parallel rows, triangularly spaced as shown on the Plans and as indicated herein.
   2. Start the first row of planting at a distance equal to the on-center spacing required per plan, minimum, from the edge of the adjacent hardscape, mow band or header board.
   3. Groundcover shall be installed to the outside edge of the water basins of trees or shrubs.

3.06 ~~Turf Planting~~Seeding- Turf and Native

(Hydroseeding for turf or natural areas)

A. Lightly scarify areas to be hydroseeded.
B. Tank, hose and associated apparatus must be thoroughly clean and free of debris or other material prior to placement/spraying of seed.
C. Hydroseed turf mix shall contain the following:

Material	Application Rate
Turf Seed	Per Manufacturer's Recommendations
Wood Cellulose Fiber Mulch	60 lbs. per 1,000 SF
Binder	Per Manufacturer's Recommendation
Fungicide turf only	1/3 lb. per 1,000 SF
Fertilizer	Per soils lab recommendation and as approved by Parks, Recreation & Libraries Department
Soil Conditioner	Per Soil Conditioner soils lab recommendation and as approved by Parks, Recreation & Libraries Department

D. Blend mix in a hydraulic mixer until all material is consistently blended.
E. Apply mix at a rate of 125 pounds per 1,000 square feet unless otherwise recommended by the manufacturer.
F. Spray mixture consistently over the area to be hydroseeded. Protect adjacent areas such as paving, walls, play areas and other from overspray.
G. At the end of each day of spraying operations, clean up all areas where overspray has occurred.
H. Once seed is placed, it should not be allowed to dry out.

3.07 Sod- Turf

~~H.~~

~~(Sod)~~

A. Remove all "humps" and depressions prior to sodding.
B. Keep all sod rolls shaded and moist prior to installation.
C. Do not store sod rolls more than one (1) day. Sod shall be laid upon delivery.
D. Unroll sod one at a time for immediate installation.
E. Provide tight seam between rolls of sod (less than 1/8" gaps).
F. Stagger rows so that the ends of sod rolls are stepped.
G. For turf areas where sod is partially provided, add topsoil at all transition edges to same as finish grade.

~~3.07~~3.08 Mulch

A. Prior to placing mulch, apply post-emergent herbicide to any weeds present, per label directions.
B. Prior to placing mulch, apply pre-emergent herbicide in all planting areas, per label directions.
C. Apply three inches (3") of mulch in all landscape planter areas.

Formatted: Heading 3

Formatted: Heading 3, Pattern: Clear (Background 1)

Formatted: Heading 3, Indent: Left: 0"

D. Keep mulch a minimum of three inches (3") away from the trunks of all woody shrubs and ~~six~~ four inches (~~6~~4") away from all trees. Taper mulch profile away from this point to prevent subsequent collection of mulch against trunks.

~~3.08~~3.09 Watering

A. Upon completion of each planting or turf area, irrigate appropriately to ensure proper health and growth.
B. Continually adjust the irrigation for plant needs regardless of air temperature.

~~3.09~~3.10 Clean-up

A. Upon completion of planting operations, collect and remove from site all empty plant containers, debris, rubbish and other trash.
B. Sweep clean and wash all hardscape areas.
C. Clean up shall occur, at minimum of once a week, at the end of the work week.
D. Maintain the entire site in a clean condition to the satisfaction of the City.

~~3.10~~3.11 Pre-Final (Punch List) Review

A. See Section 011000 1.16 of the Summary of Work for notification process.
B. The following conditions must be met in order for planting to be considered towards substantial completion, as required to enter into the establishment period described in Section 011000, 1.16:
    1. For seeded turf:
        a. Upon completion of the second mowing of completely germinated turf. Second mowing is defined as full coverage of turfed area 90% weed free.
        b. Root depth – Turf grass roots shall be healthy, creamy-white in color and be 4" or greater in length/depth as measured from the soil surface to root tip. This shall be consistent throughout turfed area.
        c. Turf shall be of uniform green color with no visible signs of stress due to soil fertility, moisture, disease or pests.
    2. For sodded turf:
        a. Accepted installation of the sod.
        b. Turf shall be of uniform green color with no visible signs of stress due to soil fertility, moisture, disease or pests.
    3. For trees and shrubs:
        a. Trees and shrubs shall be properly installed, and with no visible signs of stress due to soil fertility, moisture, disease or pests.

~~3.11~~3.12 Establishment Period

A. Active maintenance is required throughout the entire establishment period:
    1. Maintain turf to a height of two and one half inches (2-1/2") for cool season turf varieties and one and one half inches (1-1/2") for warm season turf

varieties. Maintained height shall be measured from the surface of finish grade to the top of the leaf blade throughout the establishment period, and mowed as frequently as required to maintain said height. At no time shall the leaf blade be mowed or cut more than 1/3 of the length of the blade. Root mass/depth must remain consistent as measured at the start of establishment or greater.

2. Edge all turf areas along hardscape edges.
3. Re-seed all bare areas within the turf as soon as evident.
4. Immediately replace all dead plants.
5. As necessary, raise all trees and shrubs which have sunk within the plant pit beyond the levels indicated in the Standard details.
6. Keep all areas free of weeds, pests and disease.
7. For trees located in turf areas, maintain a circle free of turf at a distance described in the Standard details

B. Prior to the start of the final thirty (30) days of establishment:
   1. All plant replacements shall be completed.
   2. All plantings and turf shall be thriving and in a healthy condition.
   3. The lack of active maintenance prior to the final thirty (30) days may constitute a delay in the start of the final thirty (30) days of the establishment period.

~~3.12~~3.13 Final Review

A. The Inspector shall review the site for completion of items noted, but not limited to, “B” below. All corrective action is required to enter into the final thirty (30) days of establishment.
B. The site shall be prepared for review, by ensuring that:
   1. All spray heads have been properly adjusted,
   2. Dead plants have been replaced,
   3. Planting areas have been weeded,
   4. Turf areas have full germination, are consistent in green color and are weed-free,
   5. Walkways and paved areas have been swept and washed, and
   6. Turf roots meet standards outlined in 3.10
C. Failure to complete any one or all of the above items may constitute non-performance of the final review and will require re-scheduling. In this case, the cost of the extended establishment period shall be at no additional cost to the City.

PART 4 - GUARANTEE

4.01 General

A. Contractor shall provide a written guarantee covering all plant materials (trees & shrubs) furnished by him to be free of all defects or disease and that all plants are in a healthy and thriving condition at the completion of the contract. Deciduous plant material shall be warranted beyond the time of contract completion until such time as growth becomes evident.

(For all park construction projects)

B. All plants, except those provided by the City, shall be warrantied for a period of one (1) year, commencing on the date of final acceptance. The ~~warrantee~~ warranty shall be as outlined in Section 011000: Summary of Work, paragraph 1.19.

(For all streetscapes, street landscape frontage, street medians and Lighting & Landscape District projects.)

C. All plants, except those provided by the City, shall be warrantied for a period of nine (9) months, minimum, commencing on the date of final acceptance. Warrantee responsibilities expire upon acceptance and approval of the "~~Certificate~~ Notice of Completion" for the overall development project. The warrantee shall be as outlined in Section 011000: Summary of Work, paragraph 1.19.

END OF SECTION

SECTION 33 00 00
UTILITIES

PART 1 - GENERAL

1.01 General Requirements

A. The requirements set forth in the General Conditions shall be in addition to the standards provided herein.
B. The requirements set forth in the Supplemental Conditions shall be in addition to the standards provided herein.
C. The standards set forth in the City of Roseville Design and Construction Standards, latest edition, for storm drainage throughout the project and for sanitary sewer installations within the public rights-of-ways, easements, or as shown on the improvement plans shall be in addition to the standards provided herein.
D. The standards set forth in the latest edition of the California Building Code (CBC) for sanitary sewer installation within the project site, outside of the public right-of-way or easement shall be in addition to the standards provided herein.

1.02 Description

A. Furnish all labor, materials and equipment for the complete installation of the storm drain system and sanitary sewer pipe, and necessary appurtenances as shown on the Plans and as specified herein.
B. Submit a materials listing for review and approval prior to commencement of specified work.

1.03 Related Work

A. Section 31 10 00: Clearing and Grubbing
B. Section 31 20 00: Earthwork

1.04 Safety Requirements

A. Furnish, install and maintain required sheeting, shoring, bracing, and other methods to ensure complete and safe work environment for all workers. Upon completion of work, remove all bracing, shoring, etc. in its entirely, unless otherwise directed by the Inspector.
B. Prior to excavation or trenching, the Contractor shall contact USA Alert (800)
C. 227-2600 to locate all known utilities a minimum of 48 hours prior to start of work. During the course of construction, the Contractor shall take every precaution to maintain and protect utilities noted to remain. Said utilities shall remain operational at all times, unless otherwise noted on the plans.

D. The existing utilities are shown on the Plans based on the information available at the time of contract document development. The City shall not assume responsibility for any inaccuracies or incompleteness of the Plans based on such information. The Contractor shall immediately notify, upon damage of any pipeline or facility, the Owner and/or its agents and take every action necessary to repair or replace damaged facilities to the satisfaction of the Inspector, and at no additional cost to the City.
E. Trenches, excavations and repair of pavement shall be consistent with Section 31 20 00: Earthwork.

1.05 Coordination

A. The piping system as shown on the Plans is diagrammatic. The Contractor shall make reasonable adjustments to the layout to avoid conflicts, based on actual field conditions. Said changes shall not interfere with the design intent of the system.

1.06 Tolerance

A. The allowable tolerance for the installation of pipe is 0.05 feet within grades or spot elevations indicated on the Plans.

1.07 Product Storage

A. Take every precaution to protect the materials and pipes from damage during the delivery, storage and installation of the pipe system. Store in a cool, contained area, protected from direct sunlight and per manufacturer's recommendations. Pipe shall be supported on firm level ground at the site.

1.08 Record Drawings

A. The Contractor shall keep an accurate record of the as-built conditions of the storm drain and sanitary sewer system. These records shall be updated daily and kept at the construction site. At any time, the Inspector may examine the conditions of the "as-builts" to ensure compliance of the above.

PART 2 - PRODUCTS

2.01 General

A. All products shall conform to City of Roseville Design and Construction Standards, latest edition, except as noted below.

2.02 Drain Pipe

A. Solid drainpipe shall be PVC SDR 35 and shall conform to ASTM D1784, or accepted equal. Gasketed connections shall conform to ASTM F477.

B. Perforated drainpipe shall be smooth walled PVC, open per Caltrans Section 68-1.02K, or accepted equal.

2.03 Drain Rock

A. Drain rock shall be Class 2 washed, ¾" diameter.

2.04 Filter Fabric

A. Filter fabric shall be MiraDRAIN 5000, or accepted equal.

2.05 Drains

A. Drain Inlets shall be pre-cast and a minimum size of twenty-four inches (24") square or round by Jensen Precast, or accepted equal.
   1. Grate shall be heavy duty, cast iron, walk-on, and bolt down.
   2. Box extensions shall be Jensen Precast, or accepted equal.
   3. The base shall be six inches (6") thick.
   4. Walls shall be six inches (6") thick.
   5. A "No Dumping" Metal Storm Drain Marker shall be affixed to the concrete color of each drain inlet (See Detail DR-20)
   6. Contractor may install cast-in-place drain inlets in lieu of pre-cast drain inlets. Submit shop drawings and concrete mix design for review and approval.

B. Channel Drains for baseball/softball backstop areas shall be Polycast 600 series pre-sloped trench drains with galvanized steel slotted grates or accepted equal.

~~C. Drinking fountain drain inlet shall be eight inch (8") round cast iron drain with cast iron grate, #Z-742-VP by Zurn or accepted equal.~~

~~D.~~C. Sanitary sewer clean outs shall be as specified in the City of Roseville, Design and Construction Standards, latest edition.

2.06 Manholes

A. Manholes shall have tongue and groove joints, be forty-eight inches (48") minimum in diameter, meeting ASTM C-478.

B. Covers shall be cast iron.

C. All components shall conform to the City of Roseville Design and Construction Standards, latest edition.

2.07 Tracer Wire

A. Insulated solid copper wire, minimum #12 gauge. Color shall be green.

2.08 Sanitary Sewer~~Vitrified Clay~~ Pipe

A. Vitrified clay pipe (VCP) shall be as specified in Section 91 Sanitary Sewer in the City of Roseville, Design and Construction Standards, latest edition.

~~A.~~B. PVC SDR 35 may be used for drinking fountain drain applications only, with prior approval, and shall conform to ASTM D3034.

2.09 Potable Water Warning Tape

A. On sites with both Recycled water and potable water lines. Blue plastic tape, 3 inches wide, with the words "CAUTION: POTABLE WATERLINE" imprinted in minimum 1-inch high, black letters. Imprinting shall be continuous and permanent.

2.10 Other (Specify)

A. Additional products not listed in City Standard.

PART 3 - EXECUTION

3.01 General

A. All pipes shall slope uniformly from given elevations shown on the Plans.
B. All pipes shall be accurately laid true to line and grade, utilizing accepted construction methods.
C. Damaged or cracked pipe and fittings shall not be installed and shall be removed from site.
D. Install all pipe in locations shown on the Plans, except where existing conditions necessitate minor changes.
E. All pipe and fittings shall be kept clean and closed throughout the course of construction.
F. Connections to existing sanitary sewer stubs shall be "TV-ed" and air tested prior to the start of construction per the City of Roseville Design and Construction Standards, latest edition.

3.02 Installation

A. Installation of the specified pipe lines shall conform to the City of Roseville Design and Construction Standards, latest edition.
B. Notify the Inspector a minimum of 48 hours prior to covering of work to ensure timely inspections.
C. Cutting of AC or concrete paving shall be clean, vertical and straight, using a saw, or other tool specific to this application. Replace paving to existing or better condition prior to work.
D. Trench and backfill shall be per City of Roseville Design and Construction Standards, latest edition.
E. Catch basins and drain inlets shall be installed with a concrete collar with "No Dumping" message and fish symbol depressed into the concrete or bolted in

place, consistent with Drawing DR-20 the City of Roseville Design and Construction Standards, latest edition.

F. Drain inlets installed in mulched planter areas shall have a 12-inch wide collar of 2- to 6-inch river cobble placed over filter fabric.

G. Channel drains shall be set per manufacturer's instructions. Place slotted grates along the entire length of the backstop, including wing fencing, wherever concrete is placed adjacent to the backstop system. Provide a below grade piped connection at all gate openings into the infield area. Do not install grated drain sections at these entry/exit points.

~~H. Drain inlets at drinking fountains shall be located under jug filler and connected to storm drain per local codes.~~

~~I.~~H. Manholes shall be per City of Roseville Design and Construction Standards, latest edition. Install grate flush with finish grade.

~~J.~~I. Sanitary Sewer Clean-outs shall be installed with 3M ball markers and shall be located within planted or turf areas, whenever possible. Place clean-outs at 100' intervals throughout the project. Clean-outs shall not be located within play areas. Install per City of Roseville Design and Construction Standards, latest edition.

~~K.~~J. Upon completion, thoroughly flush storm drain system in the presence of the Parks Inspector.

~~L.~~K. Installation of additional products not listed in the City Standards.

3.03 Tracer Wire

A. Install tracer wire on top of the potable water lines

B. Tracer wire shall be continuous with no splices.

3.04 Potable Water Warning Tape

A. To be used on all potable water piping installed within the same project limits as on-site recycled water piping.

B. Install plastic warning tape in pipe backfill, six inches above pipe, for the entire length of the pipe.

3.05 Cleaning

A. Keep site clean at all times. Remove from the site all debris and rubbish and legally dispose.

Project Schedule Sample

Checklist of Preparation of CPM Schedules

1. The structural breakdown of the project.
2. The types of work to be performed and the labor trades involved.
3. Permit requirements.
4. Procurement, fabrication, delivery, installation and test activities for major materials and equipment.
5. Submittal and approval of shop and working drawings and material samples.
6. Availability and access to work areas.
7. Procurement and delivery of owner-furnished equipment.
8. Interfaces and dependencies with preceding, concurrent and follow-up contractors (and their subcontractors, if any).
9. Availability of workforce and special skills required.
10. Material and equipment restrictions and availability.
11. Distance to and from the jobsite for the labor force, the delivery of materials and the company's personnel.
12. Potential utility interruptions.
13. Temporary construction utility storage space.
14. Laydown space and storage space.
15. Environmental controls.
16. Special regulations.
17. Climate considerations.
18. Special construction equipment and techniques.
19. Interim milestone dates.
20. Contingency plans for critical events.
21. Any other significant elements peculiar to the project in question.

Irrigation Color Laminate Schematic Example

1. A minimum of 5 colors should be used, and separated so no adjoining laterals are the same color.
2. Laterals shall be traced in a manner that reflects the actual pipe installation, and to include all heads. In cases where Nettafim is used, the <u>area</u> covered by the valve should be outlined. ***(see illustration A)***
3. Valve descriptions shall be outlined with the same color as the lateral it runs. DO NOT color in or cover the valve description with color. The valve number shall also be printed at/on the actual lateral. ***(see illustration B)***
4. Valve descriptions should be of a size and quality that is easily legible (More than one sheet may be required for larger areas).
5. Valve descriptions shall <u>accurately</u> reflect the valve number, size and flow rate as it is installed.

Coverage Tests and Irrigation Audits for City of Roseville Parks and Streetscapes

Purpose:

- Maximize irrigation water efficiency by ensuring proper installation and functioning of irrigation system as designed.
- Analyze water requirements and irrigation use in the context of each site's unique conditions.
- Develop irrigation schedules based on water requirements, quality and availability.
- Make maintenance recommendations to keep the irrigation system working reliably and cost effectively.

Coverage Tests:

- Prior to planting, the Contractor shall perform a coverage test to confirm that water coverage is complete and adequate, and produces no overspray onto hardscapes.
- Performed on the entire irrigation system and in the presence of the Parks Inspector.
- The irrigation system must be connected to the City water system through the water meter. Temporary connections are not allowed.
- For park projects with turf:
    - Survey of the Distribution Uniformity (Low Quarter) of each irrigation zone containing turf to be performed prior to planting of turf.
    - The irrigation system must be 100% complete, including functionality of the irrigation controller and booster pump, if present.
    - Reported deficiencies in Distribution Uniformity may require corrective measures prior to approval of turf planting.

Irrigation Audits:

- A landscape irrigation audit shall be performed after all landscape and irrigation is installed and 100% complete.
- All landscape irrigation audits shall be conducted by a third party certified landscape irrigation auditor. Landscape audits shall not be conducted by the person who designed the landscape or installed the landscape.
- The water audit shall conform to the specific water audit requirements of the City of Roseville Environmental Utilities Department, and any supplemental requirements from the City of Roseville Parks, Recreation & Libraries

Department. The contractor shall submit a comprehensive landscape irrigation audit. This shall include, but is not limited to:

  - A completed Field Audit Submission Package **(City of Roseville provided forms only)**
  - Complete system evaluation, including site conditions, system and flow data.
  - Scheduling parameters used to set the irrigation controller.
  - An Irrigation schedule for the landscape provided to the owner.

- A minimum of 25% of all zones shall be audited. The 25% minimum shall be a representative sample of each irrigation method present (i.e. Rotors, bubblers, rotary nozzles, drip, etc.), and is in addition to any turf zones audited during the coverage test.
- Any deficiencies noted in the audit report such as, but not limited to, run-off, overspray, obstruction of spray patterns, etc., shall be corrected and signed off as such by the original irrigation auditor prior to submission of the report. Do not submit audit reports with uncorrected deficiencies.

Best Management Practices for Preparing for a Water Audit

System tune-up	• Level and adjust sprinkler heads flush with finish grades or as outlined in the Parks Construction Standards. • Flush all nozzles, unplug any plugs. • Adjust spray patterns to eliminate overspray over hardscapes, fences and walls. • Double check all heads are matched precipitation rates per station.
Calculate correct run times. Develop water schedules based on weather and/or fine tune the water schedules	• Recognize that each station's performance will vary. Adjust schedules outlined in the approved plans accordingly. • Reflect changes in actual site conditions and microclimates. • Make notations of schedule adjustments on the as-built plans.
Test operating pressures	• Test pressure at the point of connection (after the backflow), middle of the system and at the end of the system. • Consider pressure changes at build-out.

Root Management Cue Card

Consistent root management in the nursery promotes structurally stable and healthy trees in the landscape. Improperly managed root balls can form permanent defects, such as circles and bends on the periphery. Follow these guidelines for managing roots to reduce defects on young trees.

The root ball should be inspected at each shift to a larger container starting with the liner (the young tree in its original container, Fig. 1A). Root pruning on the periphery and bottom of liner root ball removes most defects (Fig. 1B).

Cut a root back to the point just behind the bend (Fig. 2A) to remove the bend. Cutting the root at a point after the bend (Fig. 2B) is less effective because the bend remains. Roots that grow down and around the sides of the liner root ball become woody as they enlarge in diameter (Fig. 3, right). These woody roots retain their original deflected orientation, which can cause health and stability problems for the tree.

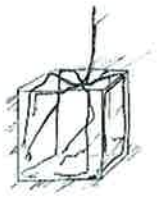

Figure 1A. Roots growing on the periphery of the liner.

Figure 1B. Pruning the liner to remove roots growing on the periphery.

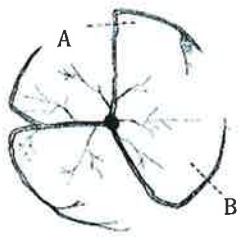

Figure 2. Cut roots at (A) to form new roots that grow away from the trunk (see Fig. 5). Do not cut roots at (B), since the defects can regrow.

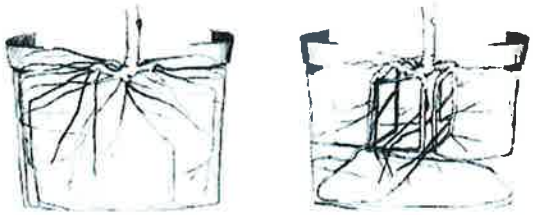

Figure 3. A quality root system develops if the roots of liners (see Fig. 1) are properly pruned when the tree is shifted to a larger container (left). A poor root system develops when deformed roots are not pruned during shifting (right).

Pruning a tree's roots when shifting it to a larger container or before planting it in the landscape improves the root system because it cuts roots back to straight, radial root segments attached to the trunk (Fig. 4). A pruned root ball will be smaller than it was before pruning. Certain types of containers reduce root growth on the periphery of the root ball, so less root pruning may be needed. In some instances, root defects develop further inside the root ball. In these cases, prune root balls deep enough to remove defects.

In the weeks and months following root pruning, new roots grow away from the cut ends in a fanlike manner (Fig. 5). These new roots provide greater stability and should not girdle the tree.

Whether root defects can be corrected depends on their location in the root ball, severity, tree species, water management, size of roots, and time of year. It is easier to cut defective roots when a tree is younger than when it is older (Fig. 6).
Ideally, roots should be inspected and defective roots pruned at each shift to a larger container, reducing the need to heavily prune larger roots.

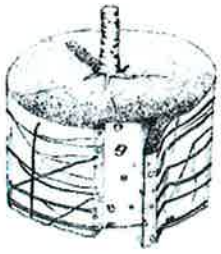

Figure 4. Pruning the roots on the periphery of a container root ball.

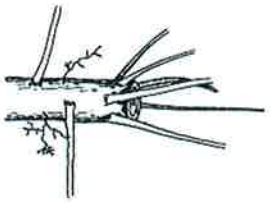

Figure 5. Roots growing from a cut root.

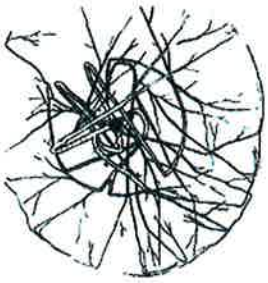

Figure 6. The liner, 5-gallon, and 15-gallon containers left an imprint on this root system. These root defects would be difficult to correct at this stage.

Tree Training Cue Card

Trees that grow to be large are more structurally sound and cost-effective to maintain when trained with a central dominant leader that extends 30 feet or more into the crown (Fig. 1, left). Vigorous, upright branches and stems that compete with the central leader can become weakly attached (Fig. 1, right).

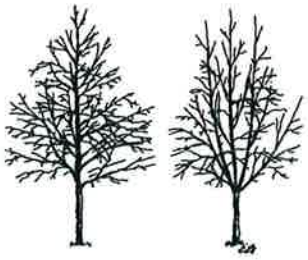

Figure 1. Good tree structure (left); poor structure (right).

Trees with branches spaced along the central leader, or trunk, (Fig. 1, left) are stronger than trees with branches clustered together (Fig. 1, right). Prune newly planted trees to one central leader by shortening competing stems (Fig. 2). All branches and stems should be shorter than the central leader after pruning is completed (Fig. 2, right).

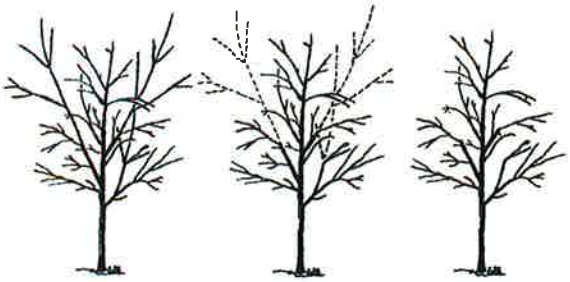

Figure 2. Shorten competing stems to improve structure.

Shorten or remove branches that are larger than half the trunk diameter at planting and every few years thereafter. Shorten them by cutting back to a live lateral branch (Fig 3, top drawing). This lateral branch should be pointed away from the trunk and it should not be growing upright. The central leader should be more visible in the crown center after pruning. Only large-diameter branches need to be pruned because they compete with the leader and could be weakly attached (Fig 3, L). Small branches (Fig. 3, S) do not need pruning because they will not compete with the leader.

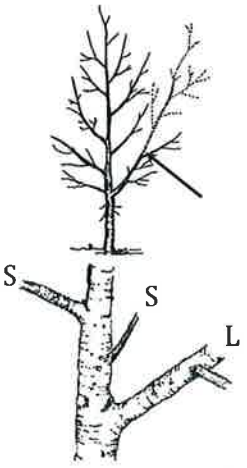

Figure 3. Only large branches need pruning (L). Small branches (S) do not need to be pruned.

Shorten the largest low branches when the tree is young to keep them small (Fig. 4). These shortened branches may be removed later for clearance; removing small branches creates smaller wounds with less likelihood of decay.

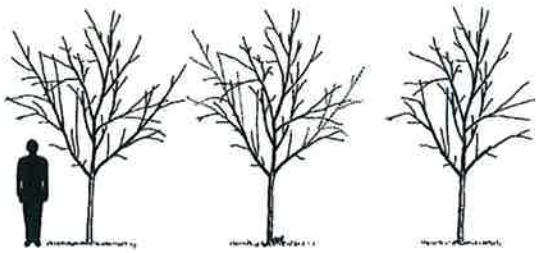

Figure 4. Shorten larger low branches to encourage growth in the leader and improve tree structure.

The best way to shorten large or long stems and branches is to cut them back to a live lateral branch (Fig 5). This slows growth on the pruned parts and encourages growth in the dominant leader creating sound structure.

Figure 5. Reduce a stem back to a live lateral branch to slow its growth.

Remove larger branches by making three cuts (Fig. 6). This prevents the bark from peeling or splitting off the trunk below the cut. Make the final cut back to the branch collar (enlarged area around union of branch and trunk).

Structural Pruning Checklist

1. Develop and maintain a central leader.
2. Identify the lowest branch in what will become the permanent crown.
3. Prevent branches below the permanent crown from growing larger than half the trunk diameter.
4. Space main branches along the central leader.
5. Reduce vigorous upright stems back to lateral branches.

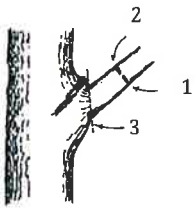

Figure 6. Remove large branches using three cuts.

Pruning Safety

Prune from the ground using proper tools and safety equipment. Do not prune near power lines.

Copyright © 2010 Edward F. Gilman and Brian Kempf www.urbantree.org

Tree Planting Cue Card

Selecting quality trees: Planting quality trees begins by choosing vigorous, structurally sound trees from the nursery. Strong trees have straight roots, a thick trunk with taper, and a good branch structure appropriate for the species (Fig. 1). The root collar (the uppermost roots) should be in the top 2 inches of the root ball.

Figure 1. Quality tree ready for planting.

Digging the hole: A firm, flat-bottomed hole will prevent trees from sinking. Dig the hole only deep enough to position the root collar even with the landscape soil surface (Fig. 2). Use a rototiller or shovel to loosen soil in an area three times the size of the root ball. This loose soil promotes rapid root growth and quick establishment.

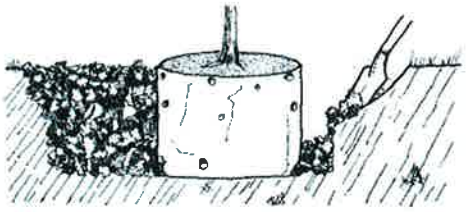

Figure 2. Loosening soil in a large area around the root ball allows for rapid root growth and quick establishment.

Installing the tree: Remove soil and roots from the top of the root ball to expose the root collar; cut away any roots that grow over the collar (Fig. 3). Also cut any roots that circle or mat along the sides and bottom of the root ball (Fig. 4). The root collar should be even with the landscape soil after planting (see Fig. 3). Backfill with soil removed from the hole. Minimize air pockets by packing gently and applying water. Build a berm 4 inches tall around the rootball to help force water through the root ball. Enlarge the berm as the tree establishes.

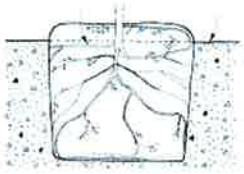

Figure 3. Remove soil and roots growing over the root collar (A) and place collar level with soil surface (B).

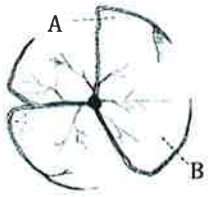

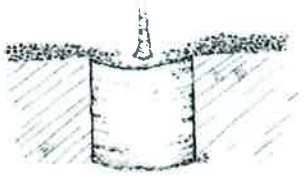

Figure 4. Cut roots at (A) to form new roots that grow away from the trunk. Do not cut roots at (B), since the root defects will regrow.

Staking: Staking holds trees erect and allows the root ball to anchor. Secure the trunk at the point where the tree stands straight. A second stake tied directly to the trunk made of bamboo may be required to straighten the upper trunk.

Mulching: A layer of organic mulch, such as leaf litter, shredded bark, or wood chips, helps protect tree roots from temperature extremes and conserves soil moisture. Mulch also helps prevent grass from competing with the tree for water and nutrients. The mulched area makes it easier to operate mowers and weed eaters without hitting the trunk and compacting soil. Apply mulch to a depth of 3 to 4 inches (slightly thinner on top of the root ball).

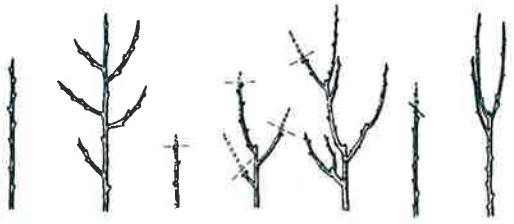
Irrigating: Consistent irrigation is critical for establishment.
1. Apply about 3 gallons irrigation per inch of trunk diameter to the root ball 2 or 3 times a week for the first growing season.
2. Increase volume and decrease frequency as the tree becomes established.
3. Weekly irrigation the second year and bimonthly irrigation the third year should be sufficient for establishment.
4. Once established irrigation requirements depend on species, climate and soil conditions.
5. Irrigation devices should be regularly checked for breaks and leaks.

Pruning: Training young trees promotes structurally sound growth and overall tree health. Cut back or remove codominant stems (stems that compete with the central leader) to encourage growth in the central leader (below).

Before Pruning

After Pruning

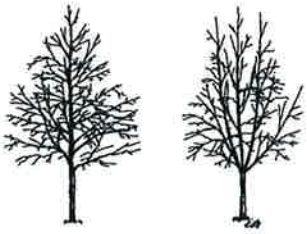
Urban Tree Foundation



CAL FIRE

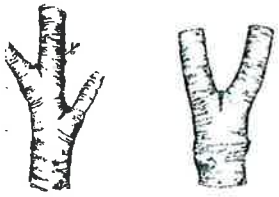
ReLEAF

Tree Quality Cue Card



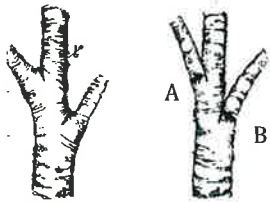
Shade trees that grow to be large should have one relatively straight central leader. Heading the tree is acceptable provided the central leader is retrained.

Desirable Desirable Not desirable



Main branches should be well distributed along the central leader, not clustered together. They should form a balanced crown appropriate for the cultivar or species.

Desirable Not desirable



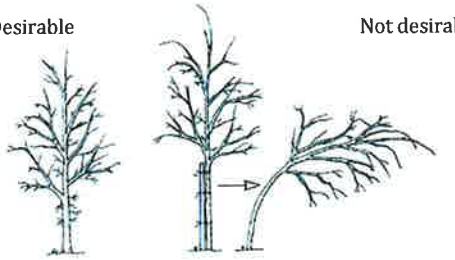
The diameter of branches that grow from the central leader, or trunk, should be no larger than two-thirds (one-half is preferred) the diameter of the trunk measured just above the branch.

Desirable Not desirable

The largest branches should be free of bark that extends into the branch union, known as included bark (see A and B).

Desirable Not desirable

Temporary branches particularly on trees less than 1 inch caliper should be present along the lower trunk below the lowest main branch. These branches should be no larger than 3/8 inch in diameter.



Desirable Not desirable

The trunk should be free of wounds, sunburned areas, conks (fungal fruiting bodies), wood cracks, bleeding areas, signs of boring insects, cankers, or lesions. Properly made recent pruning cuts are acceptable.

The trunk caliper (thickness) and taper should be sufficient so that the tree remains vertical without a stake.

Desirable Not desirable

The root collar (the uppermost roots) should be within the upper 2 inches of the soil media (substrate). The root collar and the inside portion of the root ball should be free of defects, including circling, kinked, and stem girdling roots. You may need to remove soil near the root collar to inspect for root defects.

Desirable Not desirable

The tree should be well rooted in the soil media. Roots should be uniformly distributed throughout the container. The tree's structure and growth should be appropriate for the species or cultivar. When the container is removed, the root ball should remain intact. When the trunk is lifted, both the trunk and root system should move as one.

The root ball should be moist throughout at the time of inspection and delivery. The roots should show no signs of excess soil moisture as indicated by poor root growth, root discoloration, distortion, death, or foul odor. The crown should show no signs of moisture stress as indicated by wilted, shriveled, or dead leaves or branch dieback.

STRUCTURAL PRUNING GUIDELINES OF NEW TREES

- Structural prune tree before you plant it.
- Develop and/or maintain a central leader.
- Remove dead branches at the point of attachment.
- Remove diseased, decayed, broken, weakly attached, and/or crossing branches.
- Reduce or remove co-dominant leaders and branches.
- Space main branches along one central leader.

Tree and Plant Root Management Standards & Quality Expectations

Parks, Recreation & Libraries

This brochure is provided to you to ensure that the City's expectations are conveyed to you in a practical and understandable format. These standards and quality expectations are outlined in greater detail in the Parks Construction Standards.

CITY OF ROSEVILLE CALIFORNIA

GIRDLING / CIRCLING ROOTS

If trees are held too long in containers / boxes roots are not able to spread out to the sides anymore and will be deflected by the sidewalls of the container. Roots will then start to girdle or circle around the container walls. If a tree is planted with a circling or girdling roots, the roots will continue to circle and girdle; the roots will not be able to extend to the sides. Trees planted with a girdled or circled root system will also create a structural instability in the future and the trees will fall over within 5 years of planting. Proper root pruning will assure safe, sound and healthy trees.

EXAMPLES

ROOT PRUNING GUIDELINES PRIOR TO PLANTING

Root prune root ball on all four sides by shaving/cutting by using a sharp hand pruning saw.

Start at the top of the root ball and slice down to the bottom like a cake; slice/shave all 4 sides.

On a 15 gal tree cut/shave at least 1-1.5 inches off the root ball on all 4 sides.

On a 24" or 36" box tree cut/ shave at least 2 inches of root ball on all 4 sides.

Cut and remove all remaining/ girdling roots with a sharp pruning shear.

This process will remove any girdling and circling roots deflected by the container wall.

Spread all roots of the sliced root ball to the side to allow proper root development.

ROOT COLLAR INSPECTION

Most often the root collar is buried with soil by the nursery. The root collar (uppermost roots) should be within the upper two inches of soil media and should be free of defects such as circling or girdling roots. You may need to remove some soil in order to find and inspect the root collar. The root collar must be visible before the tree can get planted. Do not bury root collar when planting the tree.

TREE PLANTING & MULCHING

1. Spread out roots to the side of the planting hole.
2. Plant tree at least 3 inches above grade on mount to prevent bowl effect.
3. The tree's beginning root flare must be located at top of grade with installed sod.
4. Water tree when planted.
5. Stake tree.
6. Place mulch around tree, 4 ft. in diameter, with a thickness of 4 inches. Stay 6 inches away from tree trunk to prevent stem decay.

EXPECTATIONS

The City of Roseville's Parks, Recreation & Libraries Department joins you in your efforts in designing parks that are creative, innovative and functional. Following is a list of expectations, which assist us in accomplishing these goals:

QUALITY

Quality is a priority for Roseville parks. We define quality by:

1. Designs include a signature element that separates the park from others. These help our residents to identify with our parks without having to know the park name.
2. Designs that are functional, addresses long term maintenance concerns and are aesthetically pleasing.
3. Designs that meet federal, state and local codes and ordinances.
4. Construction documents that are complete, thorough and easily read with particular attention to grading and irrigation.

ON TIME

Deadlines and milestones are mutually set and met. Communication to anything contrary is provided.

ON BUDGET

Accurate cost estimating is provided and reflective of the most current industry costs. Designs meet the stipulated budget.

INNOVATIVE

To be innovative does not automatically equal high cost. Innovation and creativity can be found in all aspects of the project and can be found in paying attention to the details. Innovation can simply be in the form of finding new ways to accomplish a traditional outcome more effectively and more efficiently.

The expectations shown are only a small collection of samples of what the City of Roseville considers quality finish work. Please consult the Parks Construction Standards for a more detailed outline of design guidelines.

Design Standards & Quality Expectations

Parks, Recreation & Libraries

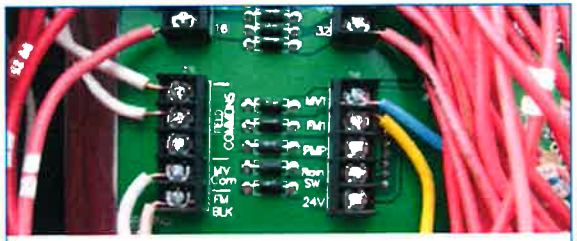
This brochure is provided to you to ensure that the City's expectations are conveyed to you in a practical and understandable format. These standards and quality expectations are outlined in greater detail in the Parks Construction Standards.

CITY OF ROSEVILLE CALIFORNIA

OUR EXPECTATIONS

Ensure ADA access and path of travel and other code requirements.

Ensure grading considers mowers and on-going maintenance needs.



Ensure drains are appropriately located and slopes into the drains are not overly exaggerated nor too gradual.

Site features consider heavy use, potential vandalism and misuse such as skate boards.

Play areas are attractive and contain interest.

Irrigation designs adhere to the standards outlined in the Parks Construction Standards.

Irrigation designs consider site specific constraints and compensate for these challenges.

Irrigation designs consider the most water efficient approach, takes full advantage of available technology and takes steps beyond meeting minimal requirements.

Landscaping offers good variety of sizes, textures and shapes as well as seasonal change.

Trees are selected specific for the space provided, eg, small tree species for a narrow planter, etc.

The City seeks knowledgeable, experienced and creative partners as our design consultants. We search for partners who are flexible, open to ideas and who are willing to push innovation forward by providing suggestions, ideas and solutions.

EXPECTATIONS

The City of Roseville's Parks & Recreation Department joins you in your efforts in building a successful park project. Following is a list of expectations, which pertain to this project:

PROJECT APPROACH

This project is a City project. Professional courtesy is to be displayed at all times. Professional courtesy can be defined as being a team member, displaying an interest in obtaining and performing quality work, a willingness to listen to other team member's opinions, accepting responsibility where the responsibility lies, and acknowledging that we all are pursuing the same goal, that is, to build the best park/project we can.

CORRESPONDENCE

All correspondence shall contain a cover sheet, transmittal or memorandum indicating the name of the recipient, the date and a summary of what is either being transmitted or requested. Typical forms are provided in the Parks Standards book, which shall be used during the course of construction.

DISCREPANCIES

Discrepancies between the plans/specifications and the Parks Construction Standards shall be immediately brought to the attention of the Project Manager. In most cases, the Parks Standards shall prevail over the project plans and specifications. Lack of notification shall place sole responsibility on the contractor without guarantee of City approval.

PRIOR NOTICE

Lack of prior notice for any item of work requiring inspection or review will result in a delay of work. Notice shall be given to the Project Manager a minimum of 48 hours in advance. Same day notices will not be accepted.

The expectations shown are only a small collection of samples of what the City of Roseville considers quality finish work. Please consult the Parks Construction Standards for a more detailed outline of design guidelines.

CITY OF ROSEVILLE CALIFORNIA

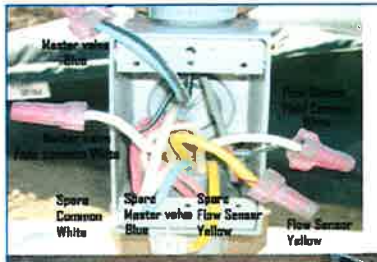
OUR EXPECTATIONS

Valve boxes aligned and square with hardscape. Boxes are set at 2-1/2" above finish grade in planting areas and 1-1/2" above finish grade in turf areas.

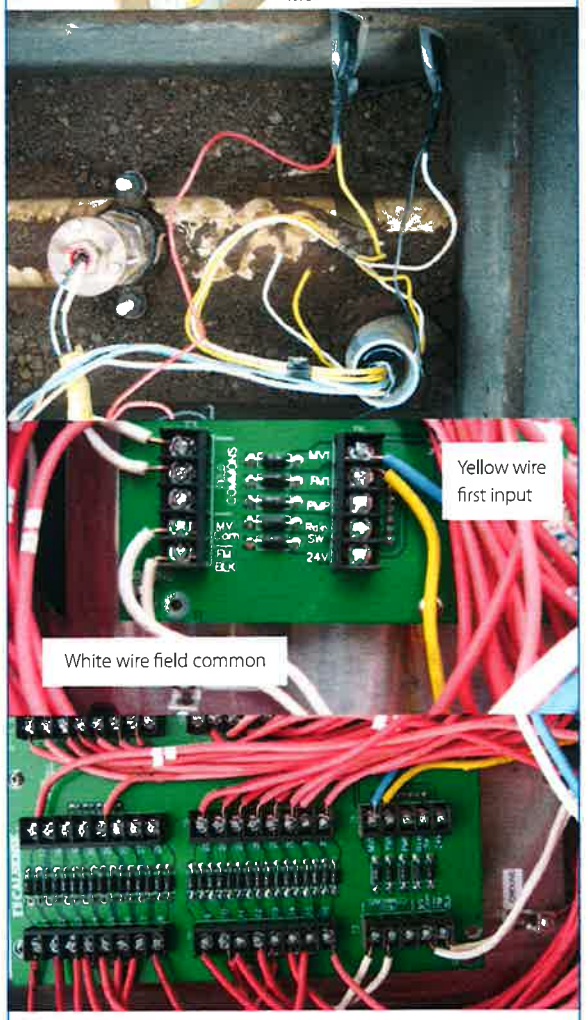
Valves placed centered in valve box, aligned square within the box, tagged and filled with drain rock.

Quick coupler valves set 2-1/2" above finish grade in planting areas, placed centered within the valve box and anchored with an angle iron, 36" long.

Backflow prevention device, meter and flow sensor are aligned.



Irrigation heads at grade in planters and in turf areas.



Irrigation enclosure contains equipment, neatly aligned. Manuals and irrigation station layouts are contained inside.

Ground rod 8' from control panel in irrigated areas.

Master valve wiring installed correctly.

Irrigation control wiring installed neatly and correctly.

EXPECTATIONS

Park Construction Standards & Quality Expectations

Parks, Recreation & Libraries

This brochure is provided to you to ensure that the City's expectations are conveyed to you in a practical and understandable format. These standards and quality expectations are outlined in greater detail in the Parks Construction Standards.

CITY OF ROSEVILLE CALIFORNIA

OUR EXPECTATIONS

Valve boxes aligned and square with hardscape. Boxes are set at 2-1/2" above finish grade in planting areas and 1-1/2" above finish grade in turf areas.

Valves placed centered in valve box, aligned square within the box, tagged and filled with drain rock.

Quick coupler valves set 2-1/2" above finish grade in planting areas, placed centered within the valve box and anchored with an angle iron, 36" long.

Backflow prevention device, meter and flow sensor are aligned.

All posts are plumb, and fall zones are maintained at 8'. Age appropriate signs are installed.

Picnic table and benches are horizontal and all bolts are tight. Seat heights are as specified. Concrete slobber is removed.

Irrigation enclosure contains equipment, neatly aligned. Manuals and irrigation station layouts are contained inside.

Electrical transformer and irrigation controller enclosure are aligned.

"Playground Rules" sign is located near all play areas and in plain view. The sign is durable and constructed of aluminum with vinyl lettering. The frame/posts are tubular steel powder coated to match play structure colors.

Vertical surfaces are consistent throughout. Vertical expansion joints are provided and are smooth with the finish surfaces. All edges have been eased at a consistent radius.

Medium broom finished concrete with clean, deep score joints spaced appropriately. No visible cracks or discoloration.

TREE SELECTION

The types of trees selected for planting is dependent on the space available, the urban forest inventory, and the specific plan. A specific plan has been developed with design guidelines outlining the types of preferred trees that help define the aesthetics of the area. Tree selections may be changed over time based on long tern maintenance and safety concerns.

PLANT SELECTION

The types of shrubs and groundcovers are selected for aesthetics. Taller shrubs and hedges are planted to hide fences and walls. Smaller shrubs are selected to minimize the need for pruning. Perennials are selected for annual accent color, but without the need for annual replacement. Groundcovers are selected to provide green space while being cautious to not create trash collectors. Harsh routine pruning shortens the life span of shrubs, thus increasing long term costs.

UPDATED JUNE 2015

Street Landscape Standards & Quality Expectations

Parks, Recreation & Libraries

This brochure is provided to you to ensure that the City's expectations are conveyed to you in a practical and understandable format. These standards and quality expectations are outlined in greater detail in the Parks Construction Standards.

CITY OF ROSEVILLE CALIFORNIA

PREFERRED PRUNING APPROACHES

"Boxed" pruning along fences, sound walls and parking lot edges to create a continuous hedge.

Plants in medians retain natural shapes, but clipped away from street pavement.

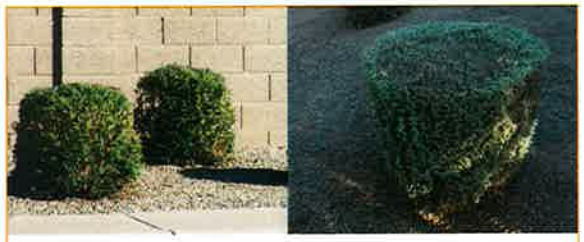
Strapped leafed plants cut back in Fall only and only if they are deciduous species.

Use the shrub's natural shape in the landscapes.

STREET TREE STANDARDS

Street Trees are to be:

- Pruned to ensure an overhead clearance over the street of 15'.
- Pruned to ensure an overhead clearance of 10' over sidewalks.
- Limbs might be pruned when branches overhang adjacent property and pose impending property damage.



Trees will be removed:

- if the roots are or will be causing pavement damage;
- if the structural integrity of the tree is compromised;
- if the health of the tree is declining; or
- if the tree is dead.

PLEASE **DO NOT**

Prune shrubs in balls or squares if not next to fences, walls or parking lots.

Prune trees without appropriate arboricultural practices.

Prune evergreen plants.

Leave dead plants in place.

COUNCIL COMMUNICATION

CC #: 1529
File #: 0704

Title: Park Naming Policy Revisions
Contact: Tara Gee 916-774-5253 tgee@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.12.

RECOMMENDATION TO COUNCIL

Adopt a resolution approving the proposed May 2021 revisions to the Park Naming Policy.

BACKGROUND

The park naming process has been in place for more than twenty years. This public process solicits name suggestions every July for new parks that will be under construction that fiscal year. The Park Naming Subcommittee has been made up of two City Council members and three officers of the Parks & Recreation Commission. The three officers included Chair, Vice-Chair and Secretary.

Recent Changes
Two recent changes have occurred that caused staff to re-evaluate the process. These are:
• The Parks & Recreation Commission no longer appoints a Secretary position.
• Attorney review of the Subcommittee has determined that the Subcommittee is subject to the Brown Act.

Impacts
These changes create a need to change the process. The most critical aspect of the change is compliance with the Brown Act. To address this, options were considered. These included:
• Create a Subcommittee made up of staff who will present up to three recommendations per park to be named to the Parks & Recreation Commission who, in turn, will recommend up to three names per park to the City Council for their final approval.
• Keep the Subcommittee as is (with makeup to consist of three “members” of the Parks & Recreation Commission rather than three “officers”) and conduct the review and selection of submitted names in a public forum.

Recommendation
The recommendation is to create a Subcommittee made up of staff to present up to three recommendations per park to be named to the Parks & Recreation Commission, who, in turn shall forward up to three names to the City Council for their final approval. This allows for both the Commission and Council to remain actively involved in the process while also complying with the Brown Act when suggested names are brought forward to the Commission and Council. The

proposed revised park naming process is attached.

Parks and Recreation Commission
The Parks and Recreation Commission reviewed the policy revisions at the June 7, 2021 meeting. The Commission approved the proposed policy revisions and is forwarding the recommendation to Council for approval.

FISCAL IMPACT

The changes to the park naming process have no fiscal impact.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of the Park Naming Policy revisions meet the above criteria and are not subject to CEQA. No additional environmental review is required.

Park Naming Process

Parks, Recreation & Libraries

Revised May 2021

On ~~January 18~~, 2021~~17~~, City Council approved changes to the park naming process. ~~These changes apply to parks and facilities within parks only. The naming process for City buildings and other City facilities remains unchanged.~~ This process applies to parks and Parks, Recreation & Libraries (PRL) facilities only. "PRL facilities" are defined as recreation facilities, rooms within PRL buildings, and amenities within parks including, but not limited to, sports fields, groves of trees, walkways and trails. There is a separate naming process for City buildings and other City facilities.

Annual Advertisement Period

~~On the first working day i~~In July, ~~a press release would be sent out~~ notification is made to~~ying~~ the public and interested individuals that name suggestions are being sought for new parks and new facilities within parks that will be under construction during that fiscal year period (July 1 to June 30). This suggestion period is open for three weeks. Names should be submitted to the City Clerk and forwarded to appropriate staff.

At the conclusion of the suggestion period, the names received will be considered as follows:

1. The Park Naming Subcommittee shall review the list and make recommendations for park and/or facility names, using the criteria outlined below, to the Parks & Recreation Commission. The Park Naming Subcommittee shall consist of the following staff:
   a. Parks, Recreation & Libraries Director
   b. Park Planning and Development Superintendent
   c. Park Development Project Manager (one representative serving a two-year term, to be rotated among Park Development Project Managers)
   d. PRL Superintendent from the Parks Division (one representative serving a two-year term, to be rotated among PRL Superintendents from the Parks Division)
   e. PRL staff member chosen "at-large", who shall serve a two-year term
   f. Staff member from the Development Services Department (one representative serving a two-year term, to be rotated among Development Services staff)

   Two-year terms shall be staggered to provide continuity in the rotational representation.
2. Names received shall be considered "active" for both the current and following fiscal years, and will be considered for those parks and facilities scheduled for construction during those same fiscal years.
3. A name suggestion cannot be submitted more than three consecutive years.
4. The Park Naming Subcommittee maintains the right to select a name not included on the "active" list, due to special circumstances such as historical significance, the passing of an active contributor(s) to the community, or other considerations.

~~Annual List~~

~~The names received during this open advertisement period would be compiled into a list with the following provisions:~~

~~4. The list will be maintained as "active" for a one (1) year period and will be reviewed for name considerations for park projects and facilities within parks scheduled for construction during the same time period of the advertisement;~~
~~5. The Park Naming Subcommittee maintains the right to select a name appropriate for the park based on geographical location, such as street names, subdivision name, or adjacent school name;~~
~~6. A name suggestion cannot be submitted more than three consecutive years;~~
~~7.~~1. ~~The Park Naming Subcommittee maintains the right to select a name not on the "active" list due to special circumstances, such as historical significance; the passing of an active contributor(s) to the community; or other.~~

Criteria for Naming a Park Facility

~~Names must:~~

~~1. reflect geographical location;~~

~~2. reflect significant natural features;~~
~~3. honor a significant individual (See below)~~

~~Individuals must have made a significant contribution to the Roseville community, including, but not limited to:~~

~~A - Donation of land or large financial contribution to a specific facility;~~
~~B - Contributed substantially and improved the quality of life in Roseville. This could relate to involvement with Parks and Recreation or other volunteer community involvement activities towards the betterment of life in Roseville.~~
~~C - Died or disabled in the line of duty as part of City service.~~

The act of naming is significant and meaningful. A name can invoke powerful emotions, create images and help to recall history. The naming of a park or facility is intended to be a permanent act, and therefore should be approached in a thoughtful manner. The name of a park or facility may take into consideration the past, present and future history of the land, its use, and our relationship to it. The following criteria and factors shall be considered when naming or renaming a park or facility:

- Recognition of nearby prominent geographical locations (e.g., street names, subdivision names, or adjacent school names)
- Recognition of significant natural and geological features of the area
- Recognition of outstanding features of the park or facility
- Recognition of historical or cultural significance in the area
- Recognition of significant individuals within the community, as follows:
  - The person contributed a significant amount of land or funding for the park or facility (typically amounting to 50% or more of development costs).
  - The person has made significant volunteer contributions to the Roseville community and its residents' quality of life.
  - The person is deceased and is being recognized for substantial volunteer contributions to the quality of life in Roseville.
  - The person died in the line of duty as part of City service.

Naming of new parks or recreation facilities should also consider:

- Including "Roseville" for regional or city-wide parks and recreation facilities;
- Avoidance of duplication of surnames in order to ease confusion of sites and locations for the general public;

The Subcommittee reserves the right to consider exceptions due to extraordinary circumstances which inspire vision and civic engagement. Exceptions can be made when the actions or contributions of an individual not normally meeting the established criteria are so significant and profound that this person deserves consideration.

~~Each park or facility within a park, such as ball-playing fields, groves of trees, walkways, trails and buildings, or special rooms in a building could be named after selected individuals in their honor as desired and as appropriate.~~

It is noted that the City of Roseville is grateful for the sacrifices of our fallen soldiers and veterans who served our country. With limited parks and recreation facilities available, it is difficult to place a higher value or honor of one life over another. Therefore, honoring our fallen soldiers and veterans shall be directed to existing veteran-related programs within the City.

R~~Additionally, r~~e-naming of an existing park due to costs, potential loss of neighborhood identity and other considerations shall be discouraged. The City Council reserves the right to add to the name of an existing park not named after a person or family, ~~consider park sites, not associated with a specific individual(s), to add onto an existing established park name~~ due to special circumstances. In such cases, the original park name shall not be replaced. Under these special circumstances, community contributions towards the offset of costs incurred to change signage shall be a component of the approval process. ~~To ensure geographically named parks remain a part of the process, an effort shall be made to balance the naming of parks in the range of 20% of the parks within the park system inventory shall be geographically based at any given time.~~

Name Selection Process
~~The Park Naming subcommittee is made up of the three officers of the Parks and Recreation Commission; the Mayor and one City Council member.~~

~~1. The Subcommittee shall review all names and recommend a short list of up to three name for each new park or recreation facility scheduled for construction during the same fiscal year;~~

~~2. he short list of selected names shall be reviewed by the Parks and Recreation Commission for consideration at a formal meeting;~~
~~3. Thereafter, the Parks and Recreation Commission shall forward the short list of recommendations to the City Council for formal approval. The Commission may elect to recommend a name per park or facility for Council consideration along with the short list; All l names submitted during the submission period shall be forwarded to the City Council with the recommendations. This shall include the "active list" of names from the previous year;~~
~~4. Potential namesakes will be contacted by Staff prior to the Parks & Recreation Commission meeting~~

1. The Subcommittee shall review all names and recommend up to three names for each new park or facility to the Parks & Recreation Commission.
2. The recommended names, along with the full list of submissions (including the "active" names from the previous year), shall be reviewed by the Parks and Recreation Commission for consideration at a formal meeting. The Parks and Recreation Commission shall recommend up to three names for each new park or facility to the City Council.
3. The recommended names, along with the full list of submissions (including the "active" names from the previous year), shall be reviewed by the City Council for approval at a formal meeting.
4. Family members of any potential namesakes shall be contacted by PRL staff prior to final approval by City Council, to ensure their support of the recommendation.
5. The Annual Park Naming Process shall conclude upon City Council's final approval of the park or facility name.

Park Naming Process

Parks, Recreation & Libraries

Revised May 2021

On _____, 2021, the City Council approved revisions to the Park Naming Process. This process applies to parks and Parks, Recreation & Libraries (PRL) facilities only. "PRL facilities" are defined as recreation facilities, rooms within PRL buildings, and amenities within parks including, but not limited to, sports fields, groves of trees, walkways and trails. There is a separate naming process for City buildings and other City facilities.

Process

In July of each year, notification is made to the public and interested individuals that name suggestions are being sought for new parks and facilities that will be under construction during that fiscal year period (July 1 to June 30). This suggestion period is open for the month of July. Names should be submitted to the City Clerk and forwarded to the Park Planning and Development Superintendent.

At the conclusion of the suggestion period, the names received will be considered as follows:

1. The Park Naming Subcommittee shall review the list and make recommendations for park and/or facility names, using the criteria outlined below, to the Parks & Recreation Commission. The Park Naming Subcommittee shall consist of the following staff:
    a. Parks, Recreation & Libraries Director
    b. Park Planning and Development Superintendent
    c. Park Development Project Manager (one representative serving a two-year term, to be rotated among Park Development Project Managers)
    d. PRL Superintendent from the Parks Division (one representative serving a two-year term, to be rotated among PRL Superintendents from the Parks Division)
    e. PRL staff member chosen "at-large", who shall serve a two-year term
    f. Staff member from the Development Services Department (one representative serving a two-year term, to be rotated among Development Services staff)

    Two-year terms shall be staggered to provide continuity in the rotational representation.
2. Names received shall be considered "active" for both the current and following fiscal years, and will be considered for those parks and facilities scheduled for construction during those same fiscal years.
3. A name suggestion cannot be submitted more than three consecutive years.
4. The Park Naming Subcommittee maintains the right to select a name not included on the "active" list, due to special circumstances such as historical significance, the passing of an active contributor(s) to the community, or other considerations.

Criteria for Naming a Park Facility

The act of naming is significant and meaningful. A name can invoke powerful emotions, create images and help to recall history. The naming of a park or facility is intended to be a permanent act, and therefore should be approached in a thoughtful manner. The name of a park or facility may take into consideration the past, present and future history of the land, its use, and our relationship to it. The following criteria and factors shall be considered when naming or renaming a park or facility:

- Recognition of nearby prominent geographical locations (e.g., street names, subdivision names, or adjacent school names)
- Recognition of significant natural and geological features of the area
- Recognition of outstanding features of the park or facility
- Recognition of historical or cultural significance in the area
- Recognition of significant individuals within the community, as follows:
    - The person contributed a significant amount of land or funding for the park or facility (typically amounting to 50% or more of development costs).
    - The person has made significant volunteer contributions to the Roseville community and its residents' quality of life.
    - The person is deceased and is being recognized for substantial volunteer contributions to the quality of life in Roseville.

- The person died in the line of duty as part of City service.

Naming of new parks or facilities should also consider:

- Including “Roseville” for regional or city-wide parks and facilities
- Avoiding duplication of names in order to ease confusion of sites and locations for the general public

The Subcommittee reserves the right to consider exceptions due to extraordinary circumstances, which inspire vision and civic engagement. Exceptions can be made when the actions or contributions of an individual not normally meeting the established criteria are so significant and profound that this person deserves consideration.

It is noted that the City of Roseville is grateful for the sacrifices of our fallen soldiers and veterans who served our country. With limited parks and facilities available, it is difficult to place a higher value or honor of one life over another. Therefore, honoring our fallen soldiers and veterans shall be directed to existing veteran-related programs within the City.

Re-naming of an existing park or facility, due to costs, potential loss of neighborhood identity and other considerations, shall be discouraged. The City Council reserves the right to add to the name of an existing park not named after a person or family, due to special circumstances. In such cases, the original park name shall not be replaced. Under these special circumstances, community contributions towards the offset of costs incurred to change signage shall be considered in the approval process.

Name Selection Process

1. The Subcommittee shall review all names and recommend up to three names for each new park or facility to the Parks & Recreation Commission.
2. The recommended names, along with the full list of submissions (including the “active” names from the previous year), shall be reviewed by the Parks and Recreation Commission for consideration at a formal meeting. The Parks and Recreation Commission shall recommend up to three names for each new park or facility to the City Council.
3. The recommended names, along with the full list of submissions (including the “active” names from the previous year), shall be reviewed by the City Council for approval at a formal meeting.
4. Family members of any potential namesakes shall be contacted by PRL staff prior to final approval by City Council, to ensure their support of the recommendation.
5. The Annual Park Naming Process shall conclude upon City Council’s final approval of the park or facility name.

COUNCIL COMMUNICATION

CC #: 1545
File #: 0800-03

Title: Roseville Electric Utility Security Plan
Contact: Petra Wallace 916-774-5510 pwallace@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.13.

RECOMMENDATION TO COUNCIL

Roseville Electric Utility staff recommends City Council adopt a resolution to adopt the Roseville Electric Utility Security Plan report.

BACKGROUND

The purpose of the Roseville Electric Utility Security Plan, or "Plan" is to meet the physical security plan requirements as defined by the California Public Utilities Commission (CPUC) Phase I Decision on Order Instituting Rulemaking Regarding the Physical Security of Electrical Corporations D.19-01-018.

The Plan describes Roseville Electric Utility's conformance with the industry standard set by D.19-01-018 and describes the approach that Roseville is taking to identify and protect our critical infrastructure (Covered Distribution Facilities) from physical security threats.

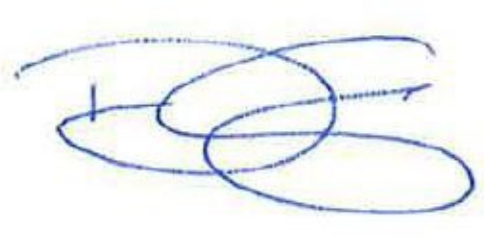
The Plan was reviewed by AESI-US, Inc. a qualified independent third party, and validated by the Roseville Police Department in accordance with the CPUC's requirements. Roseville Electric Utility is required to review this plan every 5 years.

FISCAL IMPACT

There is no fiscal impact associated with the approval of the Physical Security Plan. Security improvements recommended by the plan will be addressed in future budgets.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) only applies to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3)).



CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal A - Remain fiscally responsible in a changing world
Goal C - Maintain a safe and healthy community

Respectfully Submitted,

Petra Wallace, Electric Risk and Compliance Supervisor

Michelle Bertolino, Electric Utility Director

_____
Dominick Casey, City Manager

Description

Resolution 21-277

Roseville Electric Utility Security Plan 2021

RESOLUTION NO. 21-277

APPROVING THE ROSEVILLE ELECTRIC UTILITY SECURITY PLAN

WHEREAS, the purpose of the Roseville Electric Utility Security Plan ("Plan") is to meet the physical security plan requirements as defined by the California Public Utilities Commission (CPUC) Phase I Decision on Order Instituting Rulemaking Regarding the Physical Security of Electrical Corporations D.19-01-018; and

WHEREAS, the Plan describes Roseville Electric Utility's conformance with the industry standard set by D.19-01-018 and describes the approach that Roseville is taking to identify and protect our critical infrastructure (Covered Distribution Facilities) from physical security threats; and

WHEREAS, the Plan was reviewed by AESI-US, Inc. a qualified independent third party, and validated by the Roseville Police Department in accordance with the CPUC's requirements; and

WHEREAS, Roseville Electric Utility is required to review this plan every 5 years; and

WHEREAS, the Roseville Electric Utility Security Plan has been reviewed by the City Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said Roseville Electric Utility Security Plan is hereby approved and may be submitted to the California Public Utilities Commission.

PASSED AND ADOPTED by the Council of the City of Roseville this____day of _____, 2021, by the following vote on roll call:

AYES COUNCILMEMBERS:

I. OVERVIEW

A. GOAL OF UTILITY SECURITY PLAN

Ensuring the safety of its facilities is a top priority for Roseville Electric Utility (Roseville). Roseville prioritizes safety in all aspects of its design, operation, and maintenance practices. The overarching goal of this Utility Security Plan is to describe Roseville's risk management approach concerning "Covered Distribution Facilities" physical security as defined by the Joint IOU/POU Straw Proposal and D.19-01-018. Appropriate consideration of resiliency, impact, and cost factors were also considered.

B. DESCRIPTION OF ROSEVILLE ELECTRIC UTILITY

Roseville Electric Utility, as the City of Roseville's community-owned electric service, has provided reliable and affordable electric service for more than 100 years. The City of Roseville is located in Placer County, northeast of Sacramento, California along Interstate 80 and State Route 65 (38°45'9"N, 121°17'22" W), and has a population of nearly 140,000. In 2020, Roseville Electric Utility employed 153 people and served 63,507 customers, including 56,467 residential and 7,040 business customers. Roseville owns its distribution system, fifteen distribution substations (including two Receiving Substations). Roseville's system serves an area of 43 square miles, and maintains 145 miles of overhead lines and more than 704 miles of underground lines.

C. RESULTS OF UTILITY SECURITY PLAN ASSESSEMENT

Roseville has fifteen Distribution Facilities located within its service territory meeting the definition of Distribution Facility per D.19-01-018. A Distribution Facility is defined as an electric power substation associated with the distribution system and the primary feeders for supply to residential, commercial and/or industrial loads.

All fifteen Distribution Facilities were considered and evaluated in Roseville's Physical Security Program for Distribution Level Facilities. In order to identify which of the fifteen Distribution Substations within Roseville's service territory provide electricity to critical loads, a thorough risk assessment was completed in Section VI. The assessment identified four "Covered Distribution Facilities" as defined by the Joint IOU/POU Straw Proposal and D.19-01-018.

After an extensive review of Roseville's existing methodology, it was determined that the risk level for the four Covered Distribution Facilities was medium, with existing and planned mitigating measures sufficient to effectively mitigate the identified risks of a physical attack to a low/very low probability. Roseville continues to identify and assess potential risks associated with Covered Distribution Facilities and continues to apply the methodologies described in this document.

II. BACKGROUND

On April 16, 2013, one or more individuals attacked equipment located within Pacific Gas and Electric Company's (PG&E) Metcalf Transmission Substation, ultimately damaging 17 transformers. These individuals also cut nearby fiber-optic telecommunication cables owned by AT&T. In response to the attack, the Federal Energy Regulatory Commission (FERC) directed the North American Electric Reliability Corporation (NERC) to develop new physical security requirements, resulting in the creation of CIP-014.

At the state level, Senator Jerry Hill authored SB 699 (2014), directing the California Public Utilities Commission (CPUC) to "consider adopting rules to address the physical security risks to the distribution systems of electrical corporations." In response to SB 699, the CPUC's Safety and Enforcement Division (SED) prepared a white paper proposing a new requirement for investor owned utilities (IOUs) and publicly owned utilities (POUs) to develop security plans that would identify security risks to their distribution and transmission systems, and propose methods to mitigate those risks. The CPUC hosted a series of workshops to better understand the state of utility physical security protections and to seek input on refining their proposal.

In order to support the CPUC's development of reasonable industry standards for state-level regulations of physical security, the California Municipal Utilities Association (CMUA), which is the statewide trade association for POUs, coordinated with the state's IOUs to develop a comprehensive Straw Proposal[1] (Joint IOU/POU Straw Proposal) for a process to identify at-risk facilities and, if necessary, develop physical security mitigation plans. As a member of CMUA, Roseville staff participated in the development of the Joint IOU/POU Straw Proposal through a CMUA working group as well as through direct meetings with the IOUs. The Joint POU/IOU Straw Proposal set out a guideline for the following: (1) identifying if the utility has any high priority distribution facilities; (2) evaluating the potential risks to those high priority distribution facilities; (3) for determining the distribution facilities where the identified risks are not effectively mitigated through existing resilience/security measures and a process for developing a mitigation plan; (4) a process where a third party reviews the mitigation plans; (5) a document retention policy; (6) a verification process established by the POU governing board; and (7) for information sharing protocols.

SED filed a response[2] to the Joint IOU/POU Straw Proposal that recommended various modifications and clarifications, including a six step process. Additionally, SED recommended that the utility mitigation plans include: (1) an assessment of supply chain vulnerabilities; (2) training programs for law enforcement and utility staff to improve communication during physical security events; and (3) an assessment of any near-by communication utility infrastructure that supports a distribution substation.

[1] Straw Proposal available at: https://www.cpuc.ca.gov/uploadedFiles/CPUCWebsite/Content/Safety/Risk_Assessment/physicalsecurity/R1506009-Updated%20Joint%20Straw%20Proposal%20and%20Cover%20083117%20Filing.pdf.

[2] SED Response available at: https://www.cpuc.ca.gov/uploadedFiles/CPUCWebsite/Content/Safety/Risk_Assessment/physicalsecurity/Final%20Staff%20Recommendation%20for%20Commission%20Consideration%20010318.pdf.

In early 2019, the CPUC approved Decision (D.) 19-01-018, which adopted the Joint IOU/POU Straw Proposal as modified by the SED proposal, with additional clarifications and guidance. D.19-01-018 clarified that where there is a conflict between the Straw Proposal and the SED Proposal, then it is the rule in the SED Proposal that controls.[3]

The POUs generally treat CPUC safety rules for electric utility supply systems as key industry standards. This Utility Security Plan describes Roseville Electric Utility's conformance with the industry standard set by D.19-01-018.

III. PLAN DEVELOPMENT PROCESS

A. PHYSICAL SECURITY PRINCIPLES

The Joint IOU/POU Straw Proposal seeks to support the creation of a risk management approach toward distribution system physical security, with appropriate considerations of resiliency, impact, and cost. In order to accomplish this risk-based approach, the Joint IOU/POU Straw Proposal identifies several principles to guide the development of each individual utility's program. These principles are the following:

1. Distribution systems are not subject to the same physical security risks and associated consequences, including threats of physical attack by terrorists, as the transmission system.

2. Distribution utilities will not be able to eliminate the risk of a physical attack occurring, but certain actions can be taken to reduce the risk or consequences, or both, of a significant attack.

3. A one-size-fits-all standard or rule will not work. Distribution utilities should have the flexibility to address physical security risks in a manner that works best for their systems and unique situations, consistent with a risk management approach.

4. Protecting the distribution system should consider both physical security protection and operational resiliency or redundancy.

5. The focus should not be on all Distribution Substations, but only those that risk dictates would require additional measures.

6. Planning and coordination with the appropriate federal and state regulatory and law enforcement authorities will help prepare for attacks on the electrical distribution system and thereby help reduce or mitigate the potential consequences of such attacks.

[3] D.19-01-018 at 43, footnote 58 ("Should there be any question of which shall predominate should there be any incongruity or conflict between a utility or SED RASA recommended rule, the SED RASA rule shall apply.").

B. UTILITY SECURITY PLAN DEVELOPMENT PROCESS

Roseville utilized a multi-step process to develop this Utility Security Plan that is consistent with the Joint IOU/POU Straw Proposal and D.19-01-018. The intent of the proposal is to implement a risk management approach toward distribution system physical security, with appropriate consideration of resiliency, impact, and cost. In order to accomplish this risk-based approach, general principles were derived from information described and evaluated during meetings to guide the utility's overall evaluation of Distribution Facilities. The relevant six steps of that process are the following:

STEP 1: ASSESSMENT/PLAN DEVELOPMENT

Roseville's staff prepared a Draft Utility Security Plan through the process set forth in Steps 1A, 1B, and 1C. Please note the following principles:

- Distribution Facilities will not be able to eliminate the risk of a physical attack occurring, but certain actions can be taken to reduce the risk or consequences of a significant attack.
- Distribution Facilities should have the flexibility to address physical security risks in a manner that works best for their systems and unique situations, consistent with a risk management approach.
- The focus of this assessment is both physical security protection and operational resiliency on the identified critical load facilities (Covered Distribution Facilities) in which additional risk mitigation measures are required.

STEP 1A: IDENTIFY COVERED DISTRIBUTION FACILITIES

Roseville evaluated all distribution-level facilities in its service territory that are subject to its control to determine if any facility met the definition of a "Covered Distribution Facility" pursuant to the factors identified in the Joint IOU/POU Straw Proposal as modified by D.19-01-018.

STEP 1B: PERFORM RISK ASSESSMENT

For every individual "Covered Distribution Facility" identified in the Joint IOU/POU Straw Proposal as modified by D.19-01-018 pursuant to Step 1A, Roseville performed an evaluation of the potential risks associated with a successful physical attack that Covered Distribution Facilities, and whether existing grid resiliency, back-up generation, and/or physical security measures appropriately mitigate identified risks.

STEP 1C: DEVELOP MITIGATION PLAN

If there are any individual Covered Distribution Facilities where the Risk Assessment performed pursuant to Step 1B finds that the existing mitigation and/or resiliency measures do not effectively mitigate the identified risks, then Roseville will develop a Mitigation Plan for that

Covered Distribution Facilities. The Mitigation Plan will use a risk-based approach to select reasonable and cost-effective measures that can either be security focused (*e.g.*, walls or alarms) or resiliency focused (*e.g.*, adequate spare parts).

STEP 2: INDEPENDENT REVIEW

Roseville's Utility Security Plan cycle will contain the identification process, risk assessment, and Mitigation Plan development performed pursuant to Steps 1A, 1B, and 1C. This documentation in combination with the narrative description in Sections IV-VI below will constitute Roseville Electric Utility's Draft Utility Security Plan. Each Draft Utility Security Plan is submitted to a Qualified Third Party for Independent Review. The Qualified Third Party will then issue an evaluation that identifies any potential deficiencies in the Draft Utility Security Plan as well as recommendations for improvements. Roseville will then modify its plan to address any identified deficiencies or recommendations. The combination of the Draft Utility Security Plan, the non-confidential conclusions of the Qualified Third Party, and Roseville's responses to the Qualified Third Party Review will constitute Roseville Electric Utility's Utility Security Plan.

STEP 3: VALIDATION

Roseville will submit its Utility Security Plan to a qualified authority for review. Such entity will provide additional feedback and evaluation of Roseville Electric Utility's Utility Security Plan and, to the extent that this entity is authorized, such entity deems the Utility Security Plan as adequate.

STEP 4: ADOPTION

Roseville's Utility Security Plan will be presented to and adopted by City of Roseville's Council at a public meeting.

STEP 5: MAINTENANCE

Roseville will refine and update the Utility Security on an ongoing basis as appropriate and necessary to preserve plan integrity.

STEP 6: REPEAT PROCESS

Roseville will repeat this six step process at least once every five years or sooner if circumstances dictate.

IV. IDENTIFICATION OF COVERED DISTRIBUTION FACILITY (STEP 1A)

As described in Section III, Step 1A of the Utility Security Plan process involves assessing all distribution-level facilities that are subject to the control of Roseville to determine which facilities are "Covered Distribution Facilities" subject to the need for a risk assessment. This Section describes the factors that Roseville used to evaluate its distribution facilities and the results of its evaluation.

A. IDENTIFICATION FACTORS

The Joint IOU/POU Straw Proposal defines seven screening factors to determine if a facility is a "Covered Distribution Facility." Some factors require additional definitions and/or clarifications in order to be applied to Roseville's facilities. The following Table provides the Joint IOU/POU Straw Proposals Factors as modified/clarified by Roseville.

Factor	Joint IOU/POU Straw Proposal Description	Roseville's Specific Approach*
1	Distribution Facility necessary for crank path, black start or capability essential to the restoration of regional electricity service that are not subject to the California Independent System Operator's (CAISO) operational control and/or subject to North American Electric Reliability Corporation (NERC) Reliability Standard CIP-014-2 or its successors	Roseville reviewed system operations, grid operations, and area planning to identify any crank path or black start essential facilities within Roseville Electric Utility's service territory. As Roseville does not have any black start facilities in the state of California, no loads or facilities meet this criteria.
2	Distribution Facility that is the primary source of electrical service to a military installation essential to national security and/or emergency response services (may include certain airfields, command centers, weapons stations, emergency supply depots)	Roseville reviewed customer and load attributes to identify those specifically critical to national security and/or emergency response services. Roseville potentially identified and included 1 primary source of electrical service.
3	Distribution Facility that serves installations necessary for the provision of regional drinking water supplies and wastewater services (may include certain aqueducts, well fields, groundwater pumps, and treatment plants)	Roseville defines "regional drinking water supplies and wastewater services" to mean a facility providing the primary source of these services to over 40,000 customer accounts or to an area with a population of over 100,000. Based on the approach described above, Roseville identified and included 2 Distribution Facilities with the potential to impact a significant portion of the Roseville community.
4	Distribution Facility that serves a regional public safety establishment (may include County Emergency Operations Centers; county sheriff's department and major city police department headquarters; major state and county fire service headquarters; county jails and state and federal prisons; and 911 dispatch centers)	Roseville defines "regional public safety establishment" as any of the following: (1) a major police or fire department serving 1.5 million population with an least 1000 sworn officers; (2) County Sheriff's Department Headquarters; (3) County Emergency Operations Center; (4) County/State Fire

		headquarters; (5) a California State Prison; (5) a United States Penitentiary; or (6) a Federal Correctional Institute. Roseville identified 1 Distribution Facility that met this requirement.
5	Distribution Facility that serves a major transportation facility (may include International Airport, Mega Seaport, other air traffic control center, and international border crossing)	In addition to the facilities listed in the Joint IOU/POU Straw Proposal, Roseville defines a "major transportation facility" as any transportation facility that has (1) an average of 600 or more flights per day; or (2) 50,000 passengers per day. Roseville identified 1 Distribution Facility that met this requirement.
6	Distribution Facility that serves as a Level 1 Trauma Center as designated by the Office of Statewide Health Planning and Development	Roseville reviewed current listings of Level 1 Trauma Centers and cross referenced with the company's service territory and customer information. No Level 1 Trauma Centers are found to be located within Roseville Electric Utility's service territory.
7	Distribution Facility that serves over 60,000 meters	Roseville identified a Distribution Facility providing electrical service to over 60,000 customers.

Note: The "Roseville's Specific Approach" in the table above was defined by Electric Staff.

B. IDENTIFICATION ANALYSIS

In performing this identification analysis, Roseville is assessing all distribution level facilities that are subject to its exclusive control, or if the facility is jointly owned, the joint ownership agreement identifies Roseville as the entity responsible for operation and maintenance. These specific types of facilities include Distribution Facilities.

Based on this scope, Roseville has identified fifteen Distribution Facilities that are subject to this identification analysis. Of the fifteen Distribution Substations, four fell within one of the covered categories listed above. The Covered Distribution Facility Category Matrix below summarizes this analysis.

Facility ID	1. Crank Path, Black Start	2. Military Installation	3. Regional Drinking Water/ Wastewater Services	4. Regional Public Safety	5. Major Transportation Facility	6. Level 1 Trauma Center	7. Over 60,000 Meters
Facility 1			X		X		
Facility 2			X				
Facility 3				X			
Facility 4							X

Covered Distribution Facility Category Matrix

V. RISK ASSESSMENT (STEP 1B)

A. METHODOLOGY

Pursuant to the process identified in the Joint IOU/POU Straw Proposal and D.19-01-018, Roseville will assess the potential risks associated with a successful physical attack on each of the Covered Distribution Facilities identified in Section IV above. For purpose of this analysis, a physical attack is limited to the following: (1) theft; (2) vandalism; (3) discharge of a firearm; and (4) sabotage. A "successful physical attack" is limited to circumstances where a theft, vandalism, discharge of a firearm, and/or sabotage has directly led to the failure of any elements of the Covered Distribution Facility that are necessary to provide uninterrupted service to the specific load identified in Section IV. While no sabotage related incident has occurred at the facilities in the past, Roseville continues to monitor for sabotage related threats.

In order to perform this risk analysis, Roseville evaluated the relative risk that (1) a physical attack on a Covered Distribution Facility will be successful considering the protective measures in place; or (2) that the impacts of a successful attack will be mitigated due to resiliency and other measures in place.

B. MITIGATION MEASURES

D.19-01-018 identifies the specific mitigation measures that a utility should consider when performing this risk analysis. The following table lists these mitigation measures and provides additional clarifications that are necessary to apply these measures to Roseville's territory.

Measure	D.19-01-018 Description	Additional Clarification
1	The existing system resiliency and/or redundancy solutions (e.g., switching the load to another distribution substation or circuit capable of serving the load, temporary circuit ties, mobile generation and/or storage solutions).	No additional clarification.
2	The availability of spare assets to restore a particular load.	No additional clarification.
3	The existing physical security protections to reasonably address the risk.	No additional clarification.
4	The potential for emergency responders to identify and respond to an attack in a timely manner.	Each facility is evaluated based on a law enforcement officer arriving at the Covered Distribution Facility within 15 minutes of a report from the public of a break in or attack, or of Roseville notifying the law enforcement agency of the triggering of an alarm at the facility.
5	Location and physical surroundings, including proximity to gas pipelines and geographical challenges, and impacts of weather.	Roseville evaluated this element based on the proximity of the Covered Distribution Facility to populated areas and the extent to which the interior of the facility is

		shielded from view due to walls, vegetation, or other visual obstructions.
6	History of criminal activity at the Distribution Facility and in the area.	Roseville evaluated the property crime rates in the immediate vicinity of the Covered Distribution Facility from Roseville Police Department and compared those crimes rates to property crime rates for the county and the state to determine if the area is subject to a higher than average incidence of property related crimes.
7	The availability of other sources of energy to serve the load (e.g., customer owned back-up generation or storage solutions).	No additional clarification.
8	The availability of alternative ways to meet the health, safety, or security.	No additional clarification.
9	Requirements served by the load (e.g., back up command center or water storage facility).	No additional clarification.

Figure 1 below illustrates the causes of a successful physical security attack (Top Event) and Covered Distribution Facility consequences, as well as prevention measures to prevent a physical security attack and control measures that can be employed to mitigate the outcome.

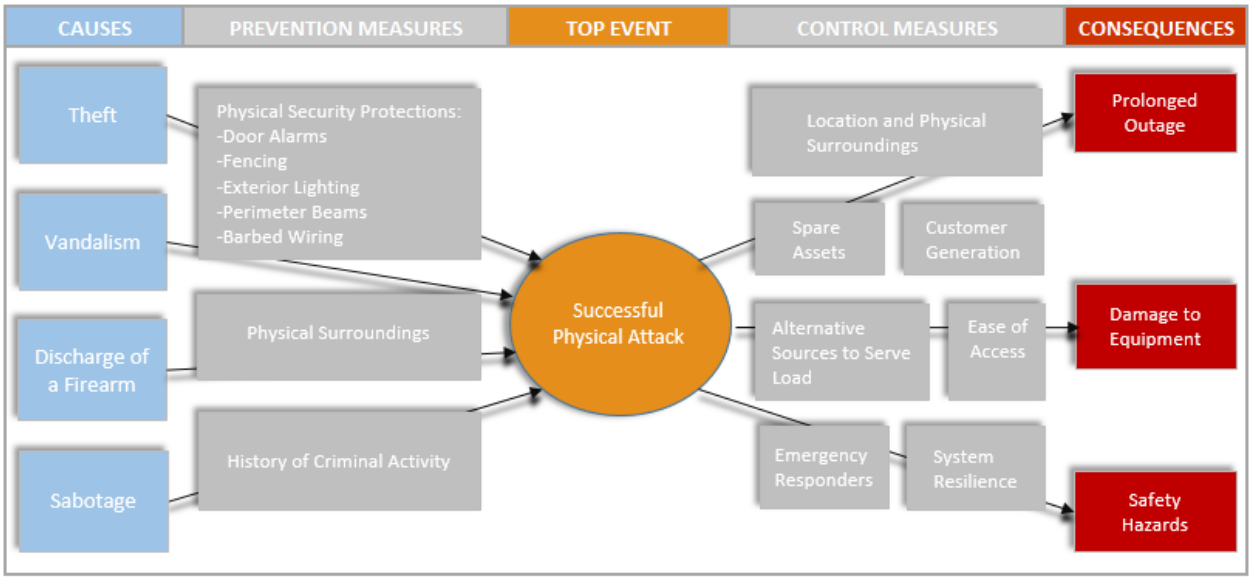

Figure 1: Roseville Bow-Tie Assessment of Covered Distribution Facilities

C. RISK ASSESSMENT

Based on the process described in the Joint IOU/POU Straw Proposal and the direction provided in D.19-01-018, Roseville has determined that of the four Covered Distribution Facilities identified in Section IV, the existing programs and measures in effect at each Covered Distribution Facility effectively mitigate the risks of a physical attack.

All Covered Distribution Facilities are initially designated as high risk given the nature of the proceeding and the assessment of impact through the identification of critical loads. The assessed risk level of each Covered Distribution Facility is then a result of both the presence and the effectiveness of existing prevention and control mitigation measures in place. A greater number of more effective measures reduce the risk level at a greater rate than fewer or less effective measures.

The following section includes the results of applying this methodology to the four Covered Distribution Facilities along with the resulting assessment of each mitigation measure for each Covered Distribution Facility and the assessed risk level.

The following table provides the results of applying this methodology to the four Covered Distribution Facilities and a summary of Roseville's assessment of each mitigation measure for each Covered Distribution Facility.

Mitigation	Facility 1	Facility 2	Facility 3	Facility 4
1. The existing system resiliency and/or redundancy solutions (e.g., switching the load to another substation or circuit capable of serving the load, temporary circuit ties, mobile generation and/or storage solutions).	Fully Effective	Fully Effective	Fully Effective	Fully Effective
2. The availability of spare assets to restore a particular load.	Partly Effective	Partly Effective	Partly Effective	Partly Effective
3. The existing physical security protections to reasonably address the risk.	Partly Effective	Partly Effective	Fully Effective	Partly Effective
4. The potential for emergency responders to identify and respond to an attack in a timely manner.	Fully Effective	Fully Effective	Fully Effective	Fully Effective
5. Location and physical surroundings, including proximity to gas pipelines and geographical challenges, and impacts of weather.	Fully Effective	Fully Effective	Fully Effective	Fully Effective
6. History of criminal activity at the Distribution Facility and in the area.	Fully Effective	Fully Effective	Fully Effective	Fully Effective
7. The availability of other sources of energy to serve the load (e.g., customer owned back-up generation or storage solutions).	Fully Effective	Fully Effective	Fully Effective	Fully Effective
8. The availability of alternative ways to meet the health, safety, or security.	Fully Effective	Fully Effective	Fully Effective	Fully Effective
9. Requirements served by the load (e.g., back up command center or water storage facility).	Fully Effective	Fully Effective	Fully Effective	Fully Effective

As identified above, the four identified Covered Distribution Facilities have existing mitigating measures sufficient to effectively mitigate the identified risks of a physical attack. These facilities are discussed in Section VI.

VI. COVERED DISTRIBUTION FACILITY MITIGATION PLANS (STEP 1C)

Pursuant to the process identified in the Joint IOU/POU Straw Proposal and D.19-01-018, Roseville has determined that for the four Covered Distribution Facilities that are subject to Roseville's control, the existing and planned mitigation measures effectively reduce the risk of a physical security attack to a from medium to low/very low risk. This section describes the existing Mitigation Plan that Roseville utilizes for the four Covered Distribution Facilities.

In order to perform this risk analysis, Roseville evaluated the relative risk that (1) a physical attack on a Covered Distribution Facility would be successful considering the protective measures in place; or (2) that the impacts of a successful attack would be mitigated due to resiliency and other measures in place. Throughout the below analysis Roseville determined that the physical security risks for the identified Covered Distribution Facilities are low with Roseville's existing resiliency, security measures, and planned mitigation efforts.

1. *System resilience:* The vast majority of Roseville's system has been designed to handle the anticipated loss of service to a major component (transformer, 60kv line, 12kv feeder etc.). Once Roseville reaches the individual customer level, loss of a pad mount transformer or service drop would require the repair/replacement prior to having the power restored.

2. *Spare assets:* Roseville's system has been designed to accommodate the loss of any one of the identified Covered Distribution Facilities (via switching on Roseville's distribution system). Other components such as wire, cable, distribution switches, pad mount transformers, and wood pole replacements are readily available in stock, with the exception of metal switchgear.

   Roseville performs detailed contingency analysis on the loss of a substation transformer biennially. This analysis is performed using distribution load flow software and takes into account updated load forecasts. Detailed switching schedules have been prepared for the loss of every substation transformer. While Roseville operates a radial distribution system, all circuits are looped (with normal open points) and mitigation of the loss of a transformer can be accommodated by using the excess capacity on other substation transformers and 12kV circuits.

3. *Existing physical security protections:* Includes door alarms, brick and wire fencing, exterior lighting, barbed wire, and perimeter beams. Note that door alarms, perimeter beams, and exterior gate contacts are monitored through the Roseville SCADA system.

4. *Emergency responders to respond to occurrence:* The Covered Distribution Facilities were not built with the express purpose of emergency responder access however, all are

within the City limits, and most are adjacent to roadways and have reasonable access for the Roseville Police Department and Roseville Fire Department emergency response crews. Important to note that City of Roseville is a full service city with its own fire and police departments.

5. *Location and physical surroundings, including proximity to gas pipelines and geographical challenges, and impacts of weather:* The above mentioned Covered Distribution Facilities are located in an urban area and all are within the City of Roseville limits. No major gas transportation pipelines are close to the Covered Distribution Facilities.

6. *History of criminal activity at the Covered Distribution Facilities and in the area:* Graffiti happens infrequently (not typical) and addressed during monthly routine inspections as needed (if graffiti is detected it is addressed within two days). Roseville has had one theft at Facility 2 (loss of a portable propane tank) in 2018.

7. *The availability of other sources of energy to serve the load (e.g., customer owned back-up generation or storage solutions):* Roseville has evaluated the potential for customer owned generation at each critical load as a part of this assessment. All identified critical load entities maintain backup generation in the event that a successful physical attack occurs on the Covered Distribution Facilities and in the highly unlikely event that secondary sources are not available. The backups are tested on a yearly basis to ensure they are working if they are called upon. City owned critical facilities are evaluated on an annual basis to ensure backup generation is reliable and available.

8. *The availability of alternative ways to meet the health, safety, or security:* Roseville's existing resilience, backup generation, and availability of secondary sources to feed the load provide multiple options to meet health, safety, and security. At this time, Roseville is not formally considering providing alternate ways to meet the needs served by the critical loads as these needs are fully covered currently.

9. *Requirements served by the load:* The critical loads have backup generation available and are able to be fed by secondary sources. As a result it was determined that the load requirements would be met through alternative means as discussed in this section.

A. COVERED DISTRIBUTION FACILITY MITIGATION PLAN

Roseville operates the electric grid with the lowest level of risk reasonably attainable. After an extensive review of Roseville's existing methodology, it was determined that the risk level for the four Covered Distribution Facilities was slightly below medium. The Facility Mitigation Plan will increase the physical security measures by December 31, 2022. Roseville will also develop a utility-wide physical security plan that will create a more holistic approach to Facility security. Roseville takes an active approach to both physical security and system resilience, thus proactively reducing potential risks, as shown in Figure 2 & 3 below.

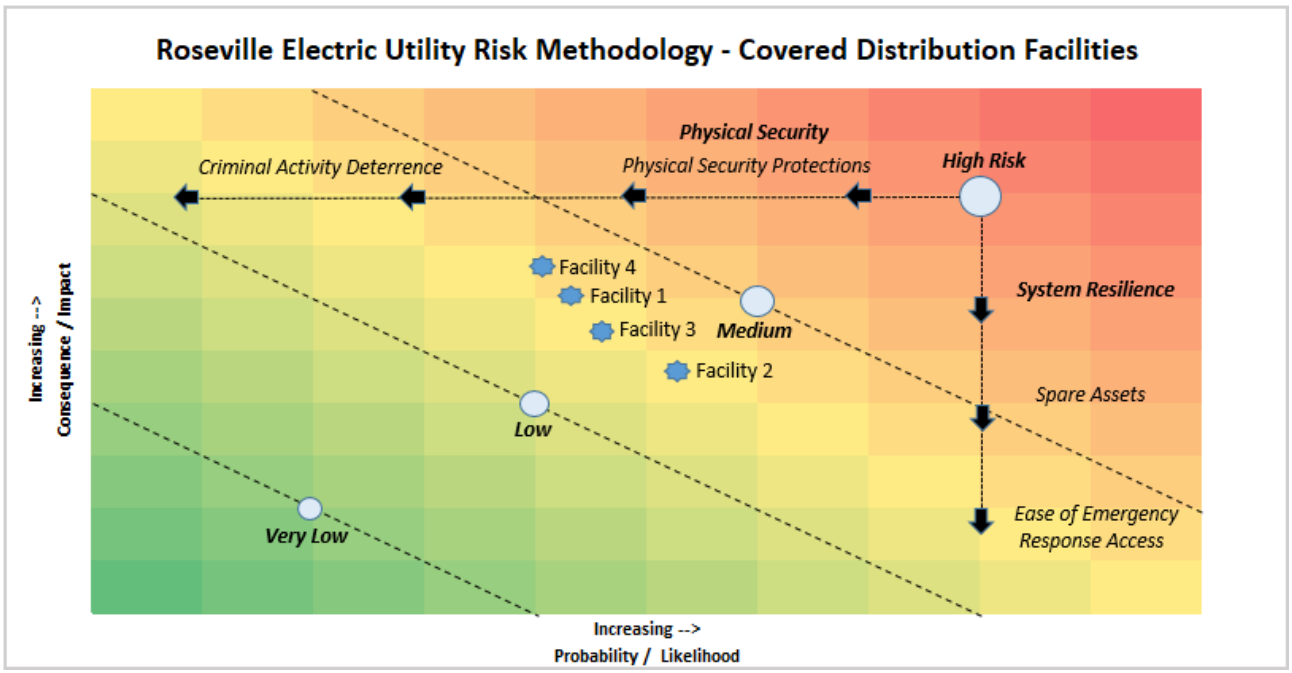

Figure 2: Roseville Risk Methodology Baseline Prior to Assessment

The heat map above indicates the baseline risk prior to existing physical and resilience measures that Roseville has in place or is in the active process of implementing based on the analysis performed during the assessment.

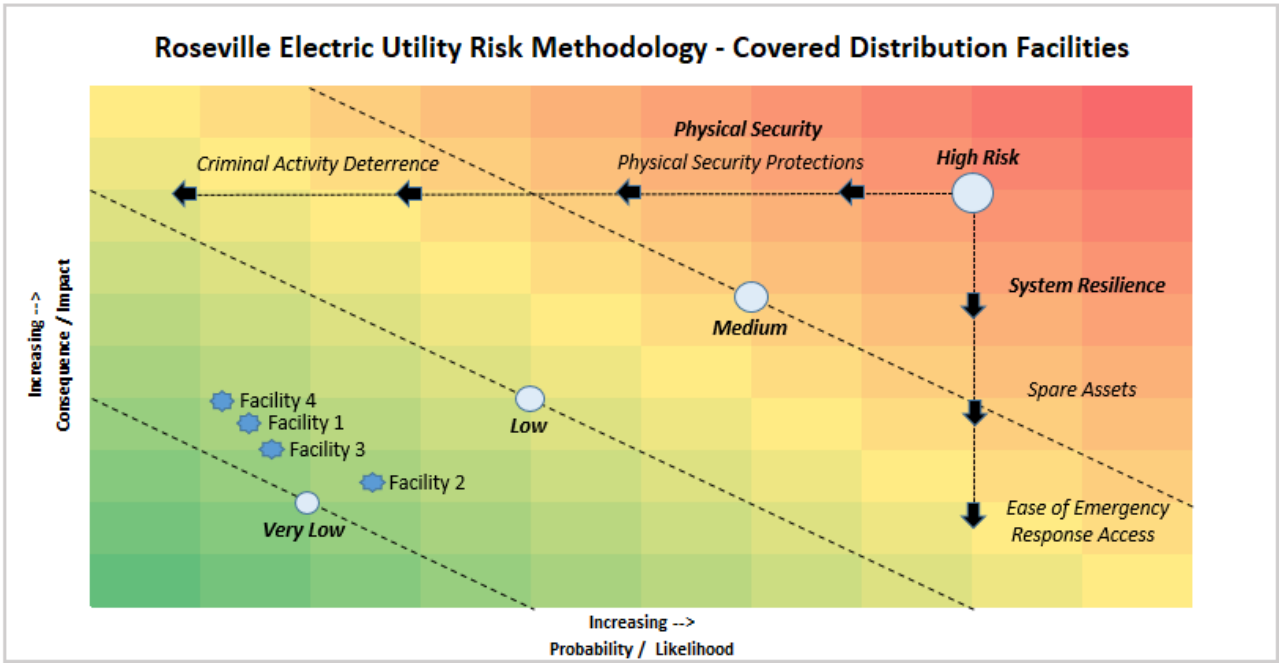

Figure 3: Roseville Risk Methodology Post Mitigation Measures

The post mitigation heat map above illustrates Roseville's four Covered Distribution Facilities risk exposure moving to the low/very low quadrant due to existing and planned physical and resilience measures. Roseville will continue to identify and assess potential risks associated with Covered Distribution Facilities and apply the methodologies described in this document consistent with D.19-01-018.

Roseville also considered the emerging threats below that after current evaluation considered them to be low risk:

- Insider threats: Roseville has a documented process that includes performing Personal Risk Assessments (PRA) during the hiring process to identify any potential past issues with the perspective employee being considered for employment. Roseville also has a documented process to remove the employee's physical and network access when they are no longer employed by Roseville.
- Unmanned aerial vehicles (UAVs): Roseville monitors and evaluates these emerging industry trends. UAV activity near the Covered Distribution Facilities was determined to be very low at this time.
- Supply chain risk: Should the Roseville supply chain become unavailable, Roseville would address this through spare assets on hand or request needed materials through the use of existing mutual aid agreements with neighboring utilities.

VII. INDEPENDENT EVALUATION AND RESPONSE (STEP 2)

A. REQUIREMENTS FOR QUALIFIED THIRD PARTY REVIEW

D.19-01-018 specifies the following criteria for a Qualified Third Party:

Independence: A Qualified Third Party cannot be a division of the POU. A governmental entity can select as the third-party reviewer another governmental entity within the same political subdivision, so long as the entity has the appropriate expertise, and is not a division of the POU that operates as a functional unit, i.e., a municipality could use its police department as its third-party reviewer if it has the appropriate expertise.

Adequate Qualifications: A Qualified Third Party must be an entity or organization with electric industry physical security experience and whose review staff has appropriate physical security expertise, which means that it meets one of the following: (1) an entity with at least one member who holds either an ASIS International Certified Protection Professional (CPP) or Physical Security Professional (PSP) certification; (2) an entity or organization with demonstrated law enforcement, government, or military physical security expertise; or (3) an entity or organization approved to do physical security assessments by the CPUC, Electric Reliability Organization, or similar electrical industry regulatory body.

B. IDENTIFICATION OF THIRD PARTY REVIEWER

Roseville has selected as its Third Party Reviewer AESI-US, Inc. (AESI). AESI is an independent third party and not a part of the City of Roseville. AESI meets the second qualification criterion above, "an entity or organization with demonstrated law enforcement, government, or military physical security expertise."

C. PUBLIC RESULTS OF THIRD PARTY EVALUATION

AESI has reviewed the Roseville's Physical Security Plan pursuant to the California Public Utilities Commission's ("CPUC") Phase 1 Decision on Order Instituting Rulemaking Regarding the Physical Security of Electrical Corporations, dated January 10, 2019, which requires electric utilities to identify electric distribution assets that may merit special protection and measures to lessen identified risks and threats.

AESI made several recommendations to improve current physical security measures. The recommended changes are not a requirement but best industry practices.

D. ROSEVILLE ELECTRIC UTILITY RESPONSE

Roseville will implement the recommended physical security enhancements at the identified Covered Distribution Facilities by December 31, 2022. Currently Roseville has separate physical security plans for different sections of the organization. Roseville will work towards completing a holistic department wide physical security plan that would combine existing measures.

VIII. VALIDATION (STEP 3)

A. SELECTION OF QUALIFIED AUTHORITY

Roseville selected the Roseville Police Department as its Qualified Authority to conduct the validation step of the physical security as required. Roseville's Police Department is a separate department from the utility, therefore they are independent in their validation review. Employees from the Roseville Police Department have been through extensive training focusing on physical security of electric substations in the last five years. Roseville feels that the Roseville Police Department is the perfect entity to validate Roseville's Physical Security Plan and measures.

B. RESULTS OF QUALIFIED AUTHORITY REVIEW

The Roseville Police Department reviewed and determined that current measures are adequate based on the mitigation plan and the fact that local crimes are not targeting the Covered Distribution Facilities.

C. ROSEVILLE ELECTRIC UTILITY RESPONSE TO QUALIFIED AUTHORITY REVIEW

Roseville continues to work with the Roseville Police Department to improve and enhance physical security measures.

IX. NARRATIVE DESCRIPTIONS FOR UTILITY SECURITY PLAN

A. ASSET MANAGEMENT PROGRAM

Roseville utilizes a Computer Maintenance Management System (CMMS) for asset and inventory management. This software is an enterprise asset management solution (equipment, installations, buildings, etc.) and includes services such as purchasing, inventory, location management, service desk, and work planning.

This CMMS software tracks the majority of items in Roseville's warehouses. The software is used to:

- track when inventory falls below "safety-stock" reorder points
- perform cycle counts and make appropriate adjustments
- create purchase requisitions and purchase orders to restock needed items
- capture transactions such as receipts, issues, transfers and returns

The utilization of an inventory management program optimizes service levels by tracking each item's location, number in stock and how many are available. CMMS manages Roseville's field assets as well. Roseville uses time based scheduling for maintenance planning and inspections. Workforce mapping and asset visualization is accomplished through the CMMS's geospatial connection to Roseville's Geographic Information System (GIS). Work orders are created and closed in the field on mobile devices which help to streamline the process.

B. WORKFORCE TRAINING AND RETENTION

Roseville staff are highly trained in all aspects of infrastructure operations at all four Covered Distribution Facilities. Personnel are available via call back in the event of an emergency and/or to initiate repairs utilizing Roseville's spare part inventory. Finally, Roseville is aware that retention of employees with these skill sets are a necessity and continues to work on maintaining a positive work environment.

C. PREVENTATIVE MAINTENANCE PLAN

Roseville has a Standard Operating Procedure as a documented preventative maintenance plan for identified equipment (PRC-005-6) to ensure that mitigation measures are functional and performing adequately. It establishes procedures for analyzing, mitigating, and providing documentation regarding failures and corrective action plans internally. It also establishes standard procedures for reporting protection system failures and misoperation.

Roseville performs preventative maintenance on a scheduled basis on all distribution facility assets, such as: breakers, switch gear, substation transformers, and physical security systems.

Roseville utilizes a maintenance program for substation inspections. The objective of this program is to establish a standard for utility operations use pertaining to type, frequency and grading of the City's electric utility substation activities.

Additionally, the Covered Distribution Facilities use a Computer Maintenance Management System (CMMS) to track and schedule maintenance activities. CMMS is a software package that maintains a computer database of information about Roseville's maintenance operations.

D. PHYSICAL SECURITY EVENT TRAINING

The City of Roseville has an Emergency Management Team (EMT) that meets regularly and has representatives from each City department as part of the team. The EMT works to ensure that the City of Roseville is prepared to respond to disasters that may occur within the City. The City Manager acts as the Emergency Services Director. The Director works closely with city staff during a disaster; while the day-to-day operation of disaster preparedness and readiness lies with the Emergency Preparedness Manager, a Roseville Fire Department Battalion Chief.

The City of Roseville is a member of the California Utility Emergency Association (CUEA), which plays a key role in ensuring communications between utilities during emergencies. CUEA serves as a point-of-contact for critical infrastructure utilities, CalOES and other governmental agencies before, during and after an event.

Roseville has worked with local law enforcement on the four Covered Distribution Facilities to educate them on physical hazards, points of entry and protection. Roseville and local law enforcement participate semiannually with the City's EMT on Emergency Operations Center scenarios, further increasing communication between agencies. Roseville also belongs to the Electricity Information Sharing and Analysis Center (E-ISAC) which is a trusted source of quality analysis and rapid sharing of security information for the electric industry.

COUNCIL COMMUNICATION

Title: Maidu Soccer Arena Improvement Project - Notice of Completion
Contact: Heather Buck 916-774-5254 hcbuck@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.14.

RECOMMENDATION TO COUNCIL

Staff recommends City Council accept the Maidu Soccer Arena Improvement Project as complete and adopt a resolution authorizing the Parks, Recreation & Libraries Director to execute the Notice of Completion.

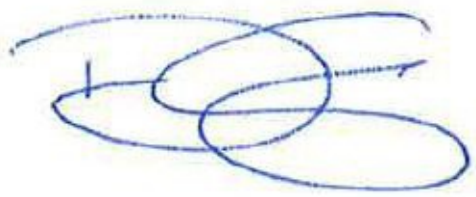
BACKGROUND

The Parks, Recreation & Libraries Department has made a final inspection of the Maidu Covered Soccer Arena Improvements Project and has found that all contract work has been completed in accordance with the improvement plans and specifications. The project is now ready for acceptance. The Maidu Covered Soccer Arena is located on the 152-acre regional park site located off of Rocky Ridge Drive and south of Douglas Boulevard. The project included minor alterations to the existing covered soccer arena to improve access, cleanliness, and spectator comfort. It included replacement of the existing fencing with new fencing, and added shade for bleachers, additional concrete walks for access within the facility, and an electrically operated gate for improved management of facility rentals. In accordance with City specifications, the contractor shall guarantee the installation of these improvements for a period of twelve (12) months from the date of this Notice of Completion.

The project originally included replacement of the existing net system. This component of the original contract has been deducted from the contract and will be implemented under a separate contract. This deduction of the contract has been mutually agreed upon between the City and contractor.

FISCAL IMPACT

Funding for the park improvements was provided through the Parks, Recreation & Library Capital Projects Fund in FY2019-20. Maintenance of the existing citywide park is paid from the General Fund and remains unchanged.



ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of a Notice of Completion meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Respectfully Submitted,

Heather Buck, Park Development Project Manager

Title: Rotation Tow Program - Service Agreements
Contact: Scott Blynn 916-746-1076 sblynn@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.15.

RECOMMENDATION TO COUNCIL

Adopt a resolution authorizing the Police Chief, or his designee, to execute agreements with six tow companies to be included on the Police Department's rotation tow list for the two-year period following execution of the agreements.

BACKGROUND

The Police Department maintains a list of local towing companies to call when Police employees need a vehicle towed and stored, or they need a vehicle promptly removed from the roadway, and the driver doesn't have a preferred towing company available within an acceptable period of time. The towing companies on the Police Department's list are called in turn, so that they receive equal opportunities for business - therefore, they're called "rotation tows". The Police Department maintains no more than ten companies on the rotation tow list. This year, during a publicly advertised open enrollment period, six companies submitted applications. Staff reviewed their applications, conducted inspections and determined that they all met City requirements. They include Ace in the Hole Towing, Anderson Tow Service, Classic Tow Service, Jake's Towing & Recovery Inc, LJ's Towing and Neighborhood Enterprise Tow.

FISCAL IMPACT

Vehicle owners are responsible to pay towing companies for the towing and storage of their vehicles. The agreements stipulate that the tow companies will charge vehicle owners involved in Police Department tows according to the approved rate schedules listed in their agreements. There is no cost to the City.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not

considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of the tow rotation service agreements meets the above criteria and is not subject to CEQA. No additional environmental review is required.

ROSEVILLE POLICE DEPARTMENT

TOW SERVICE AGREEMENT

This Tow Service Agreement (Agreement) contains rules and regulations that a company agrees to comply with in order to receive a rotation tow listing with the Roseville Police Department ("Department"). Participation in the Department Rotation Tow Program ("Program") is voluntary. Compliance with all of the terms and conditions of the Tow Service Agreement is mandatory for tow companies participating in the Department's Program. An Operator ("Operator"), by agreeing to participate in the Program, is not acting as an agent for the Department or the City of Roseville ("City") when performing services under the Agreement.

For clarification purposes, definitions are contained in Attachment A. Attachment B contains instructions for completing required application forms.

This Agreement, and the terms, conditions, and specifications contained herein, supersedes previous Agreements. The term of this Agreement is for two years from the date of execution by the City.

I. Lottery and Rotation List:

A. The Department shall conduct a bi-annual public lottery of all tow companies that desire to be placed on the rotational call list. The Department will randomly select ten (10) companies for the following two years. The selected companies are then placed on a Rotation Tow List which establishes a rotational system to facilitate the distribution of calls, meet the needs of the Department with regards to response time and available tow services, and to ensure an equitable distribution of calls. The Department shall maintain a separate RV Rotation Tow Lists for towing recreational vehicles (RVs) including Class B and/or C RVs. Nothing in this Agreement shall prohibit a Department supervisor from requesting a specific tow company when, in the supervisor's opinion, the necessary resources to clear a hazard as expeditiously as possible are not available from the tow company currently at the top of the rotation tow list.

1. In such instance, the tow company selected would be the next tow company on the list which has the qualifications (equipment, skills, timeliness, etc.) to provide the required service. After the request, the selected company would then go to the bottom of the rotation tow list and remain there until it rotates back into its original position.

   Tow companies on the list that were by-passed would remain in the same order until their selection for a rotation tow for which they are qualified.

2. The Department alternates rotation tow calls after every call. Call rotation order is established by the Department. A call to an Operator shall constitute one turn on the list and the Operator shall be moved to the bottom of the list. This includes when the Operator fails to answer the telephone or the telephone is busy after two (2) attempts, is unable to respond, or is unable to perform the required service. In this event, the next rotation tow, in order, will be called. An Operator who refuses to respond or provide service, or is canceled due to excessively delayed response time, will be moved to the bottom of the list.

    a. If it is determined that the Operator is not needed and is canceled by the Department, up to and including arrival at the scene, there shall be no monetary charges and the Operator will be placed back at the top of the list. There shall be no monetary charges for standby time which does not result in a tow.

    b. If the Operator is canceled by the vehicle's owner or agent prior to the Operator taking possession (as defined in Attachment A) of the vehicle, there shall be no charges for towing. The Operator shall immediately contact the Department and advise of the cancellation. The Operator will then be placed back at the top of the list.

    c. If service, other than towing and recovery, has begun and is canceled by the vehicle's owner or agent, the Operator may charge a minimum of one-half of the regular hourly service charge, for the time expended on the call. For purposes of cancellation, work begins when physical work on the vehicle has begun, not the response. No lien shall arise for the service unless the Operator has presented a written statement to the vehicle's owner or agent for the signed authorization of services to be performed.

        1. The Operator shall not attempt to take possession of the vehicle in order to establish a lien for any non-towing services performed, or begun and subsequently canceled, when not entitled to such lien by law. Refer to Civil Code Section 3068.1 for when a lien begins.

B. The Department shall determine the maximum response time, enrollment period, reasonable rates, and other applicable requirements.

    1. The enrollment period must be at least bi-annually commencing on the date the Agreement is executed by the City, and will be open for at least thirty (30) days. Department. The Agreement will be effective for the following two years.

    2. The Agreement will be based on the initial Approved Rates in Section XX of this Agreement. Though the Agreement term is two (2) years, the Department is willing to re-negotiate out-year pricing (increases and/or decreases) based on market fluctuations thirty (30) days prior to the end of the first year of this two (2) year Agreement. Any proposed rate changes will be evaluated based on what the Department deems to be fair and reasonable. Any requests made by an Operator for a price increase must be fully documented utilizing an appropriate Consumer or

Producer Price Index or other reputable relevant market data to justify a rate change. In its request for price increases Operator shall cite sources, specific conditions, and document how those market conditions affect the rate. Such rate adjustments will not be automatic. Any rate adjustment must be mutually agreed upon by both the Department and the Operator. The Department will review the proposed rate adjustment and determine if it is allowable, fair, reasonable, and in the best interest of the Department.

C. Nothing shall prohibit a Class B, Class C, or Class D Operator from maintaining a place on a lighter class rotation tow list provided the tow truck meets the equipment specifications for that class of operation.

D. Operators applying for a rotation tow listing shall have a minimum of three (3) years verifiable for-hire-towing experience, as an owner or principal or other position of comparable managerial experience, prior to the final filing date of the enrollment period in order to qualify for a Department rotation tow listing.

1. Operators who have less than the required three-years' experience who are currently on the Department rotation tow list are exempt from this provision.

2. Ownership status will be investigated and determined by the Department.

II. Tow Truck Classifications:

A. An Operator shall equip and maintain tow trucks covered under this Agreement (Attachments B and C) in accordance with the provisions set forth in the California Vehicle Code (CVC), Title 13 of the California Code of Regulations, and the specifications contained in this Agreement, and consistent with industry standards and practices. All Operator's must maintain tow trucks capable of towing a Class B and C recreational vehicle (RV), trailer, etc.

1. Notwithstanding Section 615 of the CVC, all tow trucks shall have recovery capabilities, wheel lift capabilities, and a boom meeting the specifications contained in this Agreement. For the purpose of this Agreement, "a trailer for hire that is being used to transport a vehicle" shall not qualify as a primary tow truck for a rotation tow listing.

2. An Operator who has a car carrier may be exempted from the recovery, wheel lift, and boom capability requirements. However, the car carrier must be an additional unit.

B. A violation of the Gross Vehicle Weight Rating (GVWR) and safe loading requirements of a tow truck may be cause for immediate suspension. This includes exceeding the tow truck's GVWR, front axle weight rating, rear axle weight rating, maximum tire weight ratings, or not maintaining fifty (50) percent of the tow truck's unladen front axle weight on the front axle when in tow.

C. There will be four classes of tow trucks covered under this Agreement, as follows:

1. **Class A - Light Duty**

   a. An Operator shall maintain a minimum of two (2) tow trucks which have a manufacturer's Gross Vehicle Weight Rating (GVWR) of at least 14,000 pounds. One truck may be a car carrier.

      (1) A “trailer for hire” shall not be approved for listing as a Class A tow truck.

2. **Class B - Medium Duty**

   a. An Operator shall maintain a minimum of one (1) tow truck with a GVWR of at least 19,501 pounds. The truck shall be equipped with air brakes and a tractor protection valve or device, and be capable of providing and maintaining continuous air to the towed vehicle.

      (1) Class B tow trucks that are not equipped with portable tow dollies 24 hours a day, 7 days a week, will not be allowed to operate on a Class A rotation tow list.

3. **Class C - Heavy Duty**

   a. An Operator shall maintain at least one (1) three-axle tow truck with a GVWR of at least 33,000 pounds. The truck shall be equipped with air brakes and must be capable of providing and maintaining continuous air to the towed vehicle.

4. **Class D - Super Heavy Duty**

   a. An Operator shall maintain at least one (1) three-axle tow truck with a GVWR of at least 50,000 pounds. The truck shall be equipped with air brakes and must be capable of providing and maintaining continuous air to the towed vehicle.

C. To properly and safely tow and service the wide variety of vehicles being operated on the highway, a towing procedure may require the use of auxiliary equipment specifically designed for the purpose. This auxiliary equipment should be used when appropriate.

D. The Operator understands and agrees that they may be called upon to tow recreational vehicles (RVs). Operator agrees that they will maintain storage space and provide tow trucks capable of towing Class B and/or C recreational vehicles (RVs) upon Department’s request.

III. Tow Truck Drivers:

A. All rotation tow truck drivers will attend or challenge and successfully pass a certified tow truck driver training course. Acceptable courses to fulfill this requirement will be reviewed and approved by the Department.

B. The Operator shall ensure that tow truck drivers responding to calls initiated by the Department have completed a certified tow truck driver training course and are qualified and competent employees of the Operator's company. The Operator shall ensure that the tow truck drivers are trained and proficient in the use of the tow truck and related equipment, including, but not limited to, the procedures necessary for the safe towing and recovery of the various types of vehicles serviced through Department rotation.

C. Tow truck drivers shall be at least eighteen (18) years old and possess the following minimum class driver's license:

1. Class A Tow Truck - A valid Class C license, or a valid Class A license with valid medical certificate.

2. Class B Tow Truck - A valid Class C license for nonregulated vehicles, or a valid Class A license with a valid medical certificate for regulated vehicles pursuant to Section 34500 (k) of the CVC.

3. Class C Tow Truck - A valid Class A license with a valid medical certificate.

4. Class D Tow Truck - A valid Class A license with a valid medical certificate.

C. The Class A (1) licenses must be endorsed to allow operation of special vehicle configurations and/or special cargoes.

D. The Operator shall maintain a current list of drivers.

1. Operators shall provide a current list of drivers to the Department upon implementation of this Agreement. The Operator shall notify the Department upon any change in driver status, including the addition of any new drivers, or the deletion of any drivers. An updated list shall be provided to the Department within seven (7) calendar days of any change in driver status.

2. All drivers are required to complete and sign the Tow Operator/Driver Information Sheet (CHP 234F). If drivers refuse to complete and sign the form, they shall not be permitted to respond to rotation calls.

3. Operators shall submit, with each annual application, a copy of the certified tow truck driver's training certificate for each driver.

4. Operators, shall as a minimum, maintain the following information for each employee:
   a. Full name.
   b. Date of birth.
   c. California driver's license number.
   d. Copy of a valid medical certificate (if required).
   e. Job title/description.
   f. Current home address.
   g. Current home telephone number.

h. Types of trucks the driver is trained and instructed to operate.
i. A copy of the tow truck driver training course certificate.

E. All tow truck drivers and owner/Operators shall be enrolled in the DMV Pull Notice Program.

1. Upon the addition of new drivers, an Operator will be granted a maximum of thirty (30) days to enroll drivers in the Pull Notice Program.

2. Pull Notices shall be kept on file, signed and dated by the Operator.

3. The Department may require an Operator to provide copies of Pull Notice Reports.

IV. Rates:

A. Fees charged for response to calls originating from the Department shall be reasonable and not in excess of those rates charged for similar services provided in response to requests initiated by any other public agency or private person. The reasonableness of the fees charged will be determined in the following manner:

1. The Operator shall submit the retail hourly rate to the Department. The Department shall determine the validity and reasonableness of the submitted rates.

a. Validity will be based upon telephone quotes, posted rates, charges to retail customers, etc. Any submitted rate in excess of an Operator's retail rate (as defined in Attachment A) will be considered invalid and will not be accepted. An Operator who submits an invalid rate shall not be allowed to resubmit a new rate and will be disqualified from Department rotation tow listing until the next enrollment period.

b. Reasonableness shall be determined as compared to other rates. An Operator who submits a rate that is determined to be excessive shall be allowed to resubmit rates only once.

2. In an effort to remain competitive in the open market, the Operator may lower retail rates at anytime by notifying the Department. When an Operator lowers the retail rate, that retail rate becomes the new approved Department rate. Operators may only raise rates for Department calls during enrollment periods. Operators may raise rates for non-Department calls at any time. Rates for Department calls shall remain at the lowest retail rate until the next enrollment period.

3. Any Operator which charges rates above the Operator’s retail hourly rates or submitted rates for a Department call shall be in violation of the Agreement and subject to disciplinary action.

B. The rate for towing shall be computed from portal to portal (as defined in Attachment A). Time expended shall be charged at a rate not to exceed the hourly rate. Time

expended in excess of the minimums shall also be at the hourly rate in no more than one (1) minute increments. There shall be no additional charges for mileage, labor, etc.

1. The Operator may charge up to a thirty (30) minute minimum per call for base services (as defined in Attachment A).

2. The Operator may charge up to a one (1) hour minimum per call on public safety response calls (as defined in Attachment A).

3. The Operator shall base towing charges upon the class of vehicle being towed regardless of the class of truck used, except when vehicle recovery operations require a larger class truck.

C. Rates for service calls (out of gas, lockouts, tire changes, etc.) shall be from portal to end of service, and may be at the hourly rate with up to a thirty (30) minute minimum. Charges in excess of thirty (30) minutes may be charged in no more than one (1) minute increments.

D. The approved schedule of rates charged by the Operator shall be available in the tow truck, and shall be presented upon demand to the person(s) for whom the tow services were provided, their agent, or any Department officer.

E. Fees for Special Operations

1. For special operations involving Class B, C, or D tow trucks, the Operator shall submit the proposed fees for vehicle recovery operations and load salvage operations (as defined in Attachment A) to the Department. Fees shall be reasonable and consistent with industry standards for similar operations. Charges in excess of thirty minutes may be charged in no more than one (1) minute increments.

   a. Hourly rates shall be established for the following categories:

      (1) Auxiliary Equipment, e.g., airbags, converter gear/dolly, additional trailers, etc.

      (2) Contracted Equipment, e.g., airbags, converter gear/dolly, additional trailers, forklifts, front loaders, etc.

      (3) Contract labor.

   b. The Department shall determine the reasonableness of the fees for these types of operations, based upon the average of the proposed fees submitted and a comparison to industry standards for similar operations.

   c. Operators shall submit a markup rate (percentage of the cost to the Operator) for retail equipment and specialized labor not otherwise listed on the application.

d. If an Operator performs a service for which a required rate was not submitted to, and approved by, the Department, the Operator shall only be entitled to charge for the actual cost of that service. Example: contract labor rate not submitted, the Operator may only charge for the actual rate paid for the labor.

F. The Operator, or his/her employee, shall accept a valid bank credit card or cash, at the customer's discretion, for payment of towing and/or storage costs.

1. Rates for services shall be charged on the basis of a credit card transaction. The tow Operator may charge a discounted rate for a cash transaction.

G. Storage Fees

1. The Operator shall submit proposed storage fees for inside and outside storage to the Department. The Department shall determine the validity and reasonableness of the fees for inside and outside storage, based upon the average of the proposed fees submitted by those applying for rotation.

2. The Operator shall display in plain view at all cashiers' stations, a sign as described in Section 3070 of the Civil Code, disclosing all storage fees and charges in force, including the maximum storage rate.

3. A request for outside or inside storage by the customer or Department officer shall be honored. If no request is made, the vehicle should be stored in the least costly manner to the customer's benefit, unless documentable circumstances dictate otherwise.

4. Upon request, Operators shall provide after-hour vehicle releases. After-hours release fees may only be charged for vehicles released after normal business hours.

a. For the purpose of this Agreement, "normal business hours" shall not be less than 8 a.m. to 5 p.m., Monday through Friday, except for the following state recognized holidays:

New Year’s Day, Martin Luther King Day, Lincoln Day, Presidents’ Day, Memorial Day, Independence Day, Labor Day, Columbus Day, Veterans’ Day, Thanksgiving Day, day after Thanksgiving Day, and Christmas Day.

b. Business hours shall be posted in plain view to the public.

c. The after-hours release contact telephone number(s) shall be posted in plain view to the public.

d. Employees and agents shall be properly trained to conduct business transactions related to towing, storage and release of vehicles/property.

e. The total fees charged for release after normal business hours shall be no more than one-half the hourly rate, and shall only be allowed outside posted business hours, after 5:00 p.m. on business days, weekends and holidays.

5. Vehicles stored twenty-four (24) hours or less shall be charged no more than one (1) day storage. Each day thereafter shall be calculated by calendar day. (Civil Code §3068.1(a))

6. Lien sales are the sole responsibility of the Operator and all such sales shall be conducted in accordance with the applicable provisions of California state law.

H. Rate requirements represent the maximums an Operator may charge on a Department call. An Operator is not precluded from charging less when deemed appropriate by the Operator. These requirements shall not be construed as requiring a charge when an Operator would not normally charge for such service.

1. No Operator, agent, or employee shall refer to any rate as the minimum required or set by the Department.

I. IMPOUND NOTIFICATION.

1. In the event that ANY vehicle impounded by this Department is expected to remain in storage thirty (30) days after impound, the Operator shall notify the Department's Operations Commander on the thirtieth (30th) day.

J. VEHICLE RELEASE.

1. No vehicle impounded by the Department shall be released to any party without a signed written authorization to release (CHP Form 180) from the Department.

V. Collusion:

A. The Operator and/or applicant shall not conspire, or attempt to conspire, or commit any act of collusion, with any other Operator or applicant for the purpose of secretly, or otherwise, establishing an unfair understanding regarding rates or conditions to the Agreement that would bring about any unfair condition which could be prejudicial to the Department, the motoring public, or other Operator(s).

1. An example of "collusion" includes, but is not limited to: conspiracy by any Operator(s) to establish artificially high or low rate(s) for services performed pursuant to the Agreement.

B. A finding by the Department that any Operator, applicant, or agent has been involved in collusion shall be cause for denial of an application or shall nullify the Agreement. Any Operator or applicant found to be involved in any act, or attempted act of collusion, shall be disqualified from participation on the Department rotation tow list for the current term, plus three (3) years.

VI. Response to Calls:

A. The Operator shall respond to Department calls 24 hours a day, seven days a week, within the maximum response time as established by the Department, and as specified in this Agreement. The Operator shall respond with a tow truck of the class required to tow the vehicle specified by the Department.

1. The maximum response time for Class A tow trucks is established as twenty (20) minutes, 24-hours a day. The maximum response time for Class B, C and D tow trucks is thirty (30) minutes, 24-hours a day, however Department and Operator agree that in non-emergency situations where there is no immediate threat to health or safety, the maximum response time for towing recreational vehicles, including Class B and/or C recreational vehicles shall bewithin one week and only during normal business hours Monday through Friday.

B. The Operator shall advise the Department's Communications Center, at the time of notification, if they are either unable to respond or unable to meet the maximum response time. If, after accepting the call, the Operator is unable to respond or will be delayed in responding, the Operator shall immediately notify the Department's Communications Center. The Operator shall not assign initial calls to other tow Operators.

1. A failure to respond and/or repeated failure to meet the maximum response time requirements shall constitute failure to comply with the terms and conditions of this Agreement.

a. The Department may take immediate disciplinary action for any flagrant violation of the requirement to respond within the maximum response time. Disciplinary action may include written reprimands, suspension from the rotation, and/or removal from the rotation.

b. When an Operator will be temporarily unavailable to provide services due to a preplanned/scheduled activity, e.g., vacation, maintenance, medical leave, etc., the Operator shall notify the Department Communications Center at least 24 hours prior to the date that services will be unavailable, noting the times and dates of the unavailability.

C. The Operator, or Operator's employees responding to a Department call, shall perform the towing or service required for which they were called. This requirement may be waived by the Department Incident Commander, if the requested equipment is inadequate for the service to be performed.

1. Any refusal to respond or to perform the required towing or service will subject the Operator to suspension, if deemed appropriate by the Department.

D. An Operator shall not respond to a Department call assigned to another Operator unless requested to do so by the Department.

1. There may be times when the Operator assigned the initial Department call, may require the assistance of an additional Operator at the scene. The Operator assigned the initial call may, with the concurrence of the Department Incident Commander, request a specific Operator for assistance. The request shall be routed to the additional Operator through the Department.

2. There may be times when an Operator, who was not called to a scene, comes upon a collision scene where a vehicle or vehicles are blocking a roadway and a Department officer requests assistance in clearing the roadway. In such a case, the Operator may be requested to move the vehicle to a safe location, as directed by the officer, and leave it. There shall be no charge for this assistance, and the assistance provided shall not change the Operator's place in the rotation.

E. Only the tow truck personnel and equipment requested shall respond to a Department call. Additional tow truck personnel and equipment shall be at the approval of the Incident Commander. This shall not preclude the Operator from responding to an incident to ascertain if additional assistance or equipment is required. There shall be no additional charge for any personnel or equipment that is not necessary to perform the required service and approved by the Incident Commander.

1. An Operator may dispatch more than one tow truck to a multi-vehicle collision scene in response to a rotation tow call.

F. If two or more Operators are called to the same incident, distribution of the vehicles shall be at the discretion of the Department Incident Commander.

1. The Department Incident Commander may direct an Operator to move vehicles to help clear a roadway or for lifesaving operations. Operators shall provide the requested assistance.

VII. Business and Storage Facility:

A. An Operator shall have a business office and storage facility located within the city limits of the City of Roseville. Prior to the execution of this Agreement, the Operator shall furnish the Department the address(es) of all facilities.

1. Operators shall maintain a City business license and comply with all City ordinances and zoning requirements.

2. Operators shall not share or jointly use with any other towing company doing business within the City any of the following: (i) towing equipment; (ii) personnel; (iii) insurance; or (iv) business license.

3. No employee of the City shall have any direct financial interest in this Agreement. This Agreement shall be voidable at the option of the City if this provision is violated.

B. The Operator shall be responsible for the security of vehicles and property at the place of storage. As a minimum, a fenced or enclosed area shall be provided. The Operator is responsible for the reasonable care, custody, and control of any property contained in towed or stored vehicles.

C. The Operator shall obtain approval from the Department prior to the removal of any property from a stored or impounded vehicle and shall provide a receipt, with a copy placed in the stored vehicle. This requirement to obtain approval from the Department prior to the removal of property may be waived by the Department if it is determined that proper safeguards and procedures are utilized by the Operator.

1. This requirement may not be waived in cases where a vehicle has been impounded for evidence or investigation.

2. Upon approval from the Department, the Operator shall release personal property from a stored or impounded vehicle at the request of the vehicle owner or agent.

a. There shall be no charge for the release of personal property during normal business hours. Operators may charge an after hours release fee for property released after normal business hours, consistent with the after hours vehicle release provisions.

b. Personal property is considered to be items which are not affixed to the vehicle.

(1) Personal property includes: papers, transportable cellular telephones, portable radios and/or portable stereo equipment, clothes, luggage, tools, etc.

(2) Personal property from a stored vehicle shall be released upon request of the vehicle owner or agent.

3. Cargo shall be released upon demand of the carrier or pursuant to a court order.

D. The primary storage facility shall normally be at the same location as the business address. If not at the same location, there shall be no charge for any additional distance traveled to and from a secondary location. The vehicle and/or personal property shall be released at the primary storage facility or place of business (when the primary storage facility and place of business are not at the same location) upon request of the owner or a person having a legal entitlement to the vehicle and/or property.

1. The following three requirements constitute a business office for purposes of this Agreement:

a. The business office shall be equipped with a telephone with a separate telephone number/line for the towing business.

b. At least one individual is available to answer the telephone during normal business hours.

c. If the business office is not staffed during normal business hours, then an Operator shall respond to the tow yard to release property or a vehicle within 30 minutes of receiving a call from a vehicle owner.

d. Vehicle owners shall be able to pay service charges at that location and make arrangements for reclaiming the towed vehicle (i.e., upon leaving the office, the owner can go directly to the tow yard without delay to reclaim their vehicle).

2. Prior to the utilization of new storage facilities that were not listed and approved on the application for rotation tow listing, the Operator shall furnish the address and obtain the Department's approval.

a. Secondary storage facilities shall be located reasonably close to the main business office and within the city limits.

E. Tow Operators shall maintain a sufficient number of outside or inside storage spaces to meet the needs of the Department and the public. This includes specifically enough storage for large vehicles such as a recreational vehicle (RV), trailer, etc.

F. An Operator's place of business shall have a sign that clearly identifies it to the public as a towing service. The sign shall have letters that are clearly visible to the public from the street. The sign shall be visible at night.

G. Personnel/employees shall be properly trained to conduct business transactions related to towing, storage and release of vehicles/property.

H. The release of vehicles shall be conducted in accordance with procedures established by the Department. Operators shall comply with the instructions on form CHP 180, issued at the time of the tow.

VIII. Insurance

A. The Operator shall maintain the following minimum levels of insurance from an insurance carrier admitted in California or admitted in the state in which the Operator's business is located and is authorized to do business in California:

1. Minimum Level of Financial Responsibility (as required by Section 34631.5 of the CVC) - Bodily injury and property damage with a combined single limit of not less than $750,000 for Class A tow trucks. The combined limits for Classes B, C and D shall be not less than $1,000,000. These minimum standards are to include non-owned and hired auto coverage.

2. Uninsured Motorist - Legal minimum, combined single limit.

3. On-Hook Coverage - Insuring the vehicle in tow with limits based on the size of the tow truck:

a.	Class A tow truck	-	$ 50,000
b.	Class B tow truck	-	$ 75,000
c.	Class C tow truck	-	$ 100,000
d.	Class D tow truck	-	$ 100,000

4. Garage Liability - Includes premises and operations. Coverage for bodily injury and property damage with a combined single limit of not less than $500,000.

5. Garage Keepers Liability - Shall be the same minimum as on-hook coverage for vehicles in the care, custody, and control of the Operator in the storage yard.

6. Workman's Compensation Insurance - Legal minimum requirement.

B. Proof of insurance shall be in the form of a certificate of insurance acceptable to the city. Policy expiration or cancellation will immediately nullify the Tow Service Agreement. The Operator's insurance policy shall provide for not less than thirty (30) days written notice to the Department in the event the insurance policy is canceled or is due to expire. Additionally, the Operator shall notify the Department in advance of the expiration or cancellation of the Operator's insurance policy.

1. The Operator may be reinstated only after proof of insurance has been presented to the Department and any subsequent disciplinary action for failure to notify the Department of insurance expiration/cancellation has been served.

C. Those tow truck Operators removing a vehicle from a hazardous materials incident to the nearest reasonable and safe stopping location will be considered to be transporting property subject to normal minimum insurance requirements of Section 34631.5 of the CVC.

D. Upon request of a customer, an Operator shall provide, in writing, the name, address, phone number and policy number of their insurance provider.

E. The ultimate responsibility for any damage to the vehicle or property, or the loss of the vehicle or any property contained in the vehicle, while the vehicle and/or property are in the Operator's care and custody, rests with the Operator. The Operator shall reimburse the vehicle or property owner for any loss or damage which has been identified in a Department inventory and is not covered by the Operator's insurance, if required by court order.

IX. Inspections:

A. The Department shall provide for not less than one (1) annual inspection of all tow trucks and business and storage facilities, at no charge to the Operator. The Department may conduct additional inspections without notice during normal business hours.

1. A tow truck, upon initial inspection or during an enrollment period, will be allowed one follow-up inspection. A tow truck which fails to pass the follow-up inspection will not be approved for use on the Department Rotation Tow List during the term of this Agreement.

2. The Department may waive the inspection of a tow truck which has been inspected by the CHP and has a current tow truck inspection certificate. To request a waiver, the Operator must submit a copy of the completed CHP inspection form to the Roseville Police Department.

B. The Operator shall not dispatch a tow truck to a Department call that has not been inspected (by the Department or the CHP) and approved for use by the Department.

X. Business Records:

A. The Operator shall maintain records of all tow services furnished. The records will be maintained at the Operator's place of business.

1. Invoices shall at a minimum include a description of each vehicle, nature of service, start time, end time, location of call, and itemized costs of towing and storage.

2. Records for each call shall indicate the tow truck driver's name and truck used.

B. The Operator shall also maintain business records relating to personnel, insurance, personnel taxes, payroll, applicable operating authorities, local operating authorities, lien sale actions, Federal Communications Commission licensing, and non-Department tows.

C. The Department may inspect all Operator records without notice during normal business hours.

D. Operators shall permit the Department to make copies of business records at their place of business, or to remove business records for the purpose of reproduction.

1. The Department shall provide a receipt for any (original) records removed from the place of business.

E. Records shall be maintained and available for inspection for a period of two (2) years plus the current term of this Agreement.

F. Failure of the Operator to comply with the inspection requirements shall be cause for suspension, if deemed appropriate by the Department.

XI. Financial Interest:

A. No Operator or applicant shall be directly involved in the towing related business of any other Operator or applicant within the City of Roseville. "Directly involved" shall mean anything in common between Operators or applicants with regards to any of the following: 1) business licenses; 2) insurance; 3) tow truck or equipment ownership; and 4) employees.

B. Storage facilities owned by an Operator, and shared with another Operator, shall only be approved if the owner/Operator charges for the space exclusively on a flat monthly rate rather than a vehicle-by-vehicle basis, or combination thereof.

    1. Facilities shared by Operators shall be physically separated and secured from each other.

C. The sale or transfer of the controlling interest in a company shall immediately terminate an Agreement. The new owner may apply for a rotation tow listing at any time during the remainder of the current Agreement term, regardless of the Department's enrollment period.

    1. Employees may work for more than one Operator, however, the specific hours of employment with each Operator shall be indicated in the list of employees.

        a. These employees shall be approved in advance by the Department.

D. A terminated or suspended Operator and/or the tow business owner at the time of the suspension or termination (as defined in Attachment A) shall not be eligible for a rotation listing for the duration of the suspension or termination.

    1. This provision applies to the Operator working in any capacity within any tow business, or operating any tow business, and to the tow business, even if operated under new ownership.

E. Any violation of this element is cause for suspension, if deemed appropriate by the Department.

XII. Meetings:

A. The Department shall conduct a meeting to discuss issues concerning the tow rotation. All meetings shall be mandatory for the Operator or Operator’s designee wishing to remain on rotation. The Department shall give the Operator fifteen (15) days written notice (as defined in Attachment A) of these meetings.

XIII. Demeanor and Conduct:

A. While involved in Department rotation tow operations or related business, the tow Operator and/or employees shall refrain from any acts of misconduct including, but not be limited to, any of the following:

1. Rude or discourteous behavior.

2. Lack of service, selective service, or refusal to provide service which the Operator is/should be capable of performing.

3. Any act of sexual harassment or sexual impropriety.

4. Unsafe driving practices.

5. Exhibiting any objective symptoms of alcohol and/or drug use.

6. Appearing at the scene of a Department rotation tow call with the odor of an alcoholic beverage emitting from the driver's or employee's breath.

    a. The Operator/tow truck driver shall submit to a preliminary alcohol screening test upon demand of the Department.

B. All Department related tow service complaints received by the Department against a tow Operator or tow Operator's employees will be accepted and investigated in a fair and impartial manner. As a result of the investigation, the Department may initiate disciplinary action as deemed appropriate. In any event, the Operator will be notified of the results of any investigation.

C. Should the filing of criminal charges be a possibility, the Department will conduct the investigation to conclusion or assist the lead investigating agency and, if warranted, request prosecution.

D. Any violation of this element is cause for suspension, if deemed appropriate by the Department.

XIV. Compliance with Law:

A. The tow Operator and employees shall, at all times, comply with federal, state and local laws and ordinances, which include, but are not limited to, those laws which are applicable to the Operator.

1. In the event of a minor traffic violation by the tow truck driver which is known by the Department, the Operator shall be advised of the violation by the Department. The Operator will be granted the opportunity to take necessary steps to ensure that the driver complies with the law. Any subsequent traffic violations may be cause for disciplinary action against the Operator and/or the involved employees.

    a. Any flagrant traffic violation may be cause for immediate disciplinary action against the Operator and/or the involved employees.

2. The provisions contained in this element do not preclude the Department from taking appropriate enforcement or administrative action for any violations of law.

B. Any conviction of the Operator involving a stolen or embezzled vehicle, fraud related to the towing business, stolen or embezzled property, crimes of violence, felony driving while under the influence of alcohol and/or a drug, misdemeanor driving while under the influence of alcohol and/or a drug while involved in a Department rotation tow call, or moral turpitude shall be cause for denial of application or termination of the Agreement.

C. Any conviction of an Operator's employee involving a stolen or embezzled vehicle, fraud related to the towing business, stolen or embezzled property, crimes of violence, felony driving while under the influence of alcohol and/or a drug, misdemeanor driving under the influence of alcohol and/or a drug while involved in a Department rotation tow call, or moral turpitude shall be cause for the removal of the employee from the list of current Department rotation tow truck drivers.

D. An Operator, or employee, arrested/charged for a violation involving any of the above crimes may be suspended until the case is adjudicated.

XV. Compliance with Agreement:

A. The Operator agrees, that as a condition of inclusion on the rotation tow list, to comply with the terms and conditions of this Tow Service Agreement. Furthermore, the Operator agrees that failure by the Operator or the Operator's agent to comply with these terms or conditions shall be cause for written reprimand (as defined in Attachment A), suspension, or termination from the Department's rotation tow list. Alleged violations of the Tow Service Agreement will be investigated by the Department. The Operator will be notified of the Department's findings within thirty (30) calendar days of the conclusion of the investigation.

XVI. Disciplinary Action:

A. The Department shall take disciplinary action against Operators for violations investigated and confirmed or sustained.

1. The Department shall retain discretion regarding the length of any suspension imposed pursuant to the terms and conditions of this Agreement.

B. Records of violations shall be retained by the Department for at least thirty-six (36) months.

C. A violation of the equipment requirements related to safety shall be cause for immediate suspension. The period of the suspension shall be determined by the Department. The suspension shall remain in effect until the period of suspension is completed and the Department has conducted an inspection and found that the Operator is in compliance.

D. A violation of the gross vehicle weight rating ("GVWR") and safe loading requirements of a tow truck may cause for immediate suspension. This includes exceeding the tow

truck's GVWR, front axle weight rating, rear axle weight rating, maximum tire weight ratings, or not maintaining fifty percent (50%) of the tow truck's unladen front axle weight on the front axle when in tow.

E. A violation of overcharging or a pattern of overcharging shall be cause for suspension. The period of the suspension shall be determined by the Department. The suspension will remain in effect until the period of suspension is completed and the Operator has presented proof to the Department that reimbursement has been made to the aggrieved customer.

F. Failure of the Operator to satisfy a court order mandating reimbursement to the vehicle or property owner for the damage or loss which occurred while the vehicle was in the Operator's custody will result in a suspension. The period of suspension shall be determined by the Department. The suspension will remain in effect until the period of suspension is completed and the Operator has presented proof of the reimbursement.

G. Failure of the Operator to comply with the inspection requirements of this Agreement will result in a suspension. The period of the suspension shall be determined by the Department. The suspension shall remain in effect until the period of suspension is completed and the Operator has complied with the inspection requirement.

H. Operators will not send tow truck drivers on Department calls unless the drivers have completed a certified tow truck driver training course. Failure of the Operator to comply with this requirement will result in a suspension. The period of suspension will be determined by the Department.

I. Failure of the Operator to maintain the minimum insurance requirements set forth in the Agreement will immediately nullify the Agreement and is deemed to be a major violation of the Agreement.

    1. The Operator shall be subject to additional suspension for failure to notify the Department in advance of the insurance policy expiration or cancellation.

J. Failure of the Operator or employee to comply with Element XIII, Demeanor and Conduct, and/or Element XIV, Compliance with Law, may be cause for suspension if deemed appropriate by the Department.

    1. Minor traffic violations may be considered minor violations of the Agreement.

    2. A tow truck driver, not under the immediate observations of the Operator, while on-duty and driving a tow truck, who is arrested and subsequently convicted for misdemeanor driving under the influence of alcohol and/or drugs, will be subject to suspension from participating as a tow truck driver under the provisions of this Agreement. The length of suspension will be at the Department's discretion.

K. If the Operator is serving a suspension for one year or more, the Operator shall be required to comply with all terms and conditions of the current Agreement at the time of the reinstatement. There will be no approval of equipment that is not in compliance with

the equipment specifications contained in the Agreement at the time of reinstatement. Elements of this Agreement which are commonly referred to as "grandfather clauses" shall no longer apply to the Operator who is suspended for one year or more.

L. **Major Violations**. Violations of the terms and conditions of the Agreement that are subject to suspension for the first violation are categorized as major violations. Any subsequent or continuing major violations may be cause for termination.

1. When considering punitive action for a major violation of the TSA, the Department may take into consideration all major and minor violations that occurred within thirty-six (36) months prior to the date of the current violation.

2. Termination shall be invoked if, in the Department's judgment, continued participation in the Rotation Tow Program by the affected tow Operator may result in a hazard to public safety and/or welfare, or the Operator has been convicted of a crime listed in Element XIV-B.

2. In lieu of termination, the Department may impose additional suspensions for longer periods, if deemed appropriate.

M. **Minor Violations.** Except as specifically stated in the Agreement, minor violations of the terms and conditions of the Agreement may be cause for disciplinary action in the following manner:

1. 1st violation within a 12 month period - letter of written reprimand.

2. 2nd violation within a 12 month period - up to 30 day suspension.

3. 3rd violation within a 12 month period - 60 to 90 day suspension.

4. 4th violation within a 12 month period - termination of the Agreement.

a. In lieu of termination, the Department may impose additional suspensions for longer periods, if deemed appropriate by the Department.

N. Nothing herein shall be deemed to prohibit the Department from immediately suspending any Operator or employee whose conduct, in the opinion of the Department, is deemed to be a danger to the motoring public or who has engaged in conduct constituting a flagrant violation of this Agreement.

XVII. HEARING/APPEAL:

A. In the event the Department serves the Operator with a written reprimand, suspension, or termination, the Operator may request a hearing within seven (7) calendar days by submitting a request in writing to the Department's Administrative Services Commander. If a hearing is requested, it shall be held as soon as practicable. The purpose of the hearing shall be to review all facts of the case and to determine if the

facts support the allegations and/or the prescribed level of disciplinary action. The hearing shall be conducted by the Administrative Services Commander or designee and the Operator shall be entitled to present all relevant facts and circumstances in support of the Operator's position. The Operator shall be further entitled to present testimony of at least one representative (as defined in Attachment A) of a tow truck association or other qualified person. The Operator shall be notified in writing of the decision of the Administrative Services Commander, within ten (10) business days of the date of the hearing.

B. Following a hearing, if the Operator is dissatisfied with the Administrative Services Commander's decision, the Operator may request an appeal (as defined in Attachment A) by submitting a request in writing to the Chief of Police within seven (7) calendar days. If an appeal is requested, it shall be held as soon as practicable. The appeal shall be conducted by the Chief of Police or designee. The Operator shall have the same rights as those provided at the hearing level. The Operator shall be notified in writing of the decision of the Chief of Police within ten (10) business days of the date of appeal. The Chief's decision shall be final and not subject to further administrative appeal.

C. A suspension or termination shall not take effect until the hearing and appeal process has been exhausted, with the exception of Operators whose conduct is deemed to be a danger to the motoring public or whose conduct grossly violates the terms and conditions of this Agreement. If an Operator fails to request a hearing or appeal within the specified time or fails to appear at a scheduled hearing or appeal, the action taken by the Administrative Services Commander shall be final and the suspension or termination shall take effect upon written notification to the Operator by the Department.

XVIII. Advertising:

A. The Operator shall not display any sign or engage any advertisement indicating an official or unofficial connection with the Department or the Department of Motor Vehicles.

1. Examples include, "Official Police Tow," "Approved by Roseville Police Department," "Roseville P.D. Rotation Tow," etc.

2. This will not preclude the Department from implementing a system to mark and identify particular tow trucks as having passed the CHP/Department inspection.

B. Any violation of this element is cause for suspension. At a minimum, the suspension should be for the duration of the advertisement.

XIX. Cancellation:

A. This Agreement may be cancelled by either party by giving written notice to the other party.

XX. Approval Specifications:

A. Geographical Area - The city limits of the City of Roseville.

G. OPERATOR APPROVAL:

I certify that I have read and understand this Tow Service Agreement and agree to abide by all of the provisions. I further agree to indemnify, defend and save and hold harmless the City of Roseville, its officers, agents, volunteers and employees from any and all claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property resulting from the Operator or its agent's willful misconduct or negligent act or omission while engaged in the performance of obligations or exercise of rights created by this Agreement, except those matters arising from City's sole or active negligence or willful misconduct Operator. The parties intend that this provision shall be broadly construed. The Operator's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law.

The Operator, and the agents and employees of the Operator, in the performance of this Agreement, shall act in an independent capacity and not as officers or employees or agents of the City of Roseville.

ATTACHMENT A

DEFINITIONS

AGREEMENT:

For purposes of this document, Agreement and Tow Service Agreement are synonymous.

APPEAL:

The final level of review for written reprimands, suspensions, or terminations. An informal review conducted by the Chief of Police or his/her designee at which an Operator may present evidence or witnesses to show that an action taken by the Department was improper, or to mitigate the action taken.

AWR:

Axle Weight Rating

BASE SERVICES:

Any service or tow which is performed when the vehicle Operator or agent is present and the vehicle is not stored at the direction of an officer.

CHP:

The Department of the California Highway Patrol.

CITY:

The City of Roseville, California.

COLLUSION:

An agreement between two or more persons to defraud a person(s) or to obtain an object forbidden by law; conspiracy. It implies existence of fraud of some kind; the employment of fraudulent means or lawful means for the accomplishment of an unlawful purpose.

CVC:

California Vehicle Code

DEPARTMENT:

The City of Roseville Police Department.

ENROLLMENT PERIOD:

The period of time when a tow company may submit an application for inclusion on the Department's Rotation Tow List. The enrollment period will be open at least 30 days a year and is determined by the Department.

GVWR:

Gross Vehicle Weight Rating.

HEARING:

The first level of review for written reprimands, suspensions, or terminations. An informal process in which an Operator may present evidence or witnesses, which would show that an action taken by the Department was improper, or to mitigate the action taken. The review will be conducted by the Department's Administrative Services Commander, or his/her designee.

INCIDENT COMMANDER:

A representative from the Law Enforcement Agency who has scene management responsibilities.

LOAD SALVAGE OPERATIONS:
Any operation involving the recovery of a load which has been spilled, or the off-loading and reloading of a load from an overturned vehicle performed in order to upright the vehicle. This will usually be limited to operations involving Class B, C, and D tow trucks.

MAY:

“May” is permissive.

MORAL TURPITUDE:

“[G]ross violation of standards of moral conduct, vileness. An act involving moral turpitude is considered intentionally evil, making the act a crime. The existence of moral turpitude can bring a more severe criminal charge or penalty for a criminal defendant,” http://dictionary.law.com (last visited February 26, 2015).

NORMAL BUSINESS HOURS:

For purposes of this document, "Normal Business Hours" shall be not less than 8 a.m. to 5 p.m., Monday through Friday, except for state recognized holidays.

NOTICE:

All notices relating to this Agreement shall be in writing and delivered to the other party in person, via FAX, or by U.S. mail.

OPERATOR:

A tow service which has been issued a Letter of Authorization, has signed the Tow Service Agreement, and is approved to receive Department referred calls. The term "Operator" refers to the company, its owner(s), and its manager(s), who have authority to enter into an Agreement with the Department for towing services and/or to conduct business in accordance with the terms of this Agreement, as well as its agents and employees.

PARTY OF INTEREST:

Refers to the registered owner of the vehicle, or the owner's agent. An agent is a party who may lawfully act on behalf of the registered or legal owner of the vehicle.

PORTAL TO PORTAL:

Service shall start at the time of departure from the place of business or point of dispatch, whichever is closer to the location of the call, and shall end at the estimated time of return to the place of business or the completion of the call, if another call is pending, whichever is shorter. Return to place of business includes a reasonable and verifiable amount of time required to place the tow truck back into service when unusual circumstances require additional time that is not part of the normal operating procedures.

(Examples: 1) 4 X 4 recovery in the mud: Reasonable to charge for cleaning mud from the truck and equipment; 2) burned car on a car carrier: Reasonable to charge for cleaning burn debris from carrier bed; 3) car towed from side of road on misty night and leaves mud track on bed of carrier: not reasonable to charge for cleaning of carrier bed.) For the purpose of this agreement, "Portal to Portal" shall also mean "Portal to End of Service."

POSSESSION:

Pursuant to Section 3068.1 of the Civil Code, possession is deemed to arise when the vehicle is removed and is in transit, or when vehicle recovery operations or load salvage operations have begun.

PUBLIC SAFETY RESPONSE:

A response which results in a storage of a vehicle at the direction of a Department officer. This does not include a storage at the request of the vehicle Operator, registered owner, or agent thereof.

RESPONSE TIME:

The period of time from an Operator's notification by the Department's Communications Center of a call to the arrival of the tow truck at the location requested.

RETAIL RATE:

The usual customary retail rate charged by an Operator to individual retail customers is the competitive hourly rate a company has posted in the office and quotes over the phone.

ROTATION TOW BUSINESS:

A rotation tow business shall be sufficiently staffed to allow customers to talk face-to-face with a tow company's owner or agent to conduct the customer's business transactions during the Department approved business hours. The business shall be conveniently located within the City and available to the motoring public.

SERVICE CALL RATE:

The maximum rate which may be charged to the registered owner/agent of a vehicle which requires service to put the vehicle back into operation, (i.e., out of gas, change a flat tire, etc.) and the vehicle's owner/agent is able to pay the Operator for the services upon completion of the call. This rate shall be consistent with rates charged for similar services.

SHALL:

"Shall" is mandatory.

SUSPENSION:

Removal of an Operator from the Department's rotation tow list for a specified period of time. Suspensions may be for periods longer than the current term of the Agreement.

TERMINATION:

Permanent removal of a tow Operator from the Department's rotation tow list for the remainder of the term of the Tow Service Agreement and disqualification from any further participation in the Department's Rotation Tow Program.

TOW TRUCK:

A tow truck is defined in Section 615 of the CVC. Also includes slide-back carriers and wheel lift vehicles.

TOW SERVICE AGREEMENT (TSA):

A document which sets forth the terms and conditions of an Agreement between the Operator and the Department. For purposes of this document, the Agreement also means the "TSA".

VEHICLE RECOVERY OPERATION:

An operation involving the process of uprighting an overturned vehicle or returning a vehicle to a normal position on the roadway which requires the use of auxiliary equipment due to the size or location of the vehicle. This will usually be limited to operations requiring a Class B, C or D tow truck.

WAIVER OF REQUIREMENTS:

Provides for temporary relief from selected terms and conditions of the Tow Service Agreement.

WRITTEN REPRIMAND:

A written notice to an Operator which specifies any violation of the Tow Service Agreement, orders corrective action, and warns of further action to be taken if corrective action is not taken.

ATTACHMENT B

APPLICANT'S INSTRUCTIONS FOR COMPLETING THE RPD FORM 73.

I. GENERAL INFORMATION:

A. The following instructions are being provided to assist you in the accurate completion of the necessary forms. ***Please be sure to sign and date the application form as indicated.***

1. You should thoroughly read and understand the Tow Service Agreement prior to submitting your application.

2. Please be sure to sign and date the application form (RPD 73) as indicated.

3. After completing the application form, submit the following with the completed application:

   a. Completed Element XX (Pages 21 and 22) ***(return one copy of page 21 and both signed copies of page 23)***

   b. A copy of your current, valid City of Roseville business license.

   c. Signed and dated vehicle inspection forms for each vehicle to be used for rotation tows. (If inspected by the CHP within the past nine (9) months, a copy of the CHP inspection report should be submitted.) A second inspection will also need to be completed during the second year of the contract.

   d. A current, dated rate schedule.
   e. A list of drivers with information specified in Element III.
   f. A current copy of your DMV Motor Carrier Permit.

4. Submit the application to the Roseville Police Department at the address below. All TSA applications submitted through the mail shall be sent by certified mail, with return receipt requested. The return receipt shall be presented to the Department as proof that the application was mailed to the Department. All applications and attachments must be received by **April 30, 2021**. Return the application and required attachments to:

   Roseville Police Department
   Attn: Traffic Division Lieutenant
   1051 Junction Boulevard
   Roseville, California 95678-7191

   Applications received after April 30, 2021 will be rejected. No exceptions.

5. **Submit all required certificates of insurance (as specified in Element VIII), in a separate envelope, addressed to:**

City of Roseville
Risk Management Division
311 Vernon Street
Roseville, CA 95678

6. If your company receives preliminary approval, an inspection of your facilities and equipment will be scheduled, if necessary. (If you also tow for the CHP, we will accept a copy of the CHP's inspection of your truck(s) if conducted within the past nine (9) months.) A second inspection will also need to be completed during the second year of the contract.

7. Upon final approval, one copy the completed Element XX (page 22) will be signed and returned to you.

II. SPECIFIC INSTRUCTIONS FOR FORMS PREPARATION:

A. Application for Rotation Tow Listing (RPD 73). Complete and sign. All information on the RPD 73 must be complete. ***Incomplete applications will not be accepted and shall be grounds for immediate disqualification in the TSA process.*** Any misrepresentation on the application may be grounds for criminal and/or disciplinary action. Disciplinary action may include disqualification, written reprimands, suspension from the rotation, and/or removal from the rotation.

1. **Business Name and Mailing Address** - as it appears on your business license.

2. **Daytime Telephone Number** - Telephone number for the dispatch of tow services.

3. **Nighttime Telephone Number** - Telephone number for nighttime/holiday dispatch of tow services. If the daytime number is 24 hours a day, leave night phone blank.

4. **Business address**, if different than mailing address.

5. List any automobile club affiliations (i.e., AAA, National, etc.).

6. Do you provide towing services 24 hours-a-day? (Yes or No)

7. How many years have you been in the towing business?

8. Have you or anyone with financial interest ever been convicted of a crime involving stolen or embezzled vehicles, fraud related to the towing business, stolen or embezzled property, crimes of violence, drug related offenses, DUI offenses as specified, or moral turpitude? (Yes or No)

9. Check the class(es) and note the number of each class of truck that you operate.

10. Are any of your Class A tow trucks a car carrier? (Yes or No)

11. List your primary storage address and whether it is owned, leased, or rented.
12/13. List any secondary storage addresses and whether they are owned, leased or rented.

14. Are all the storage yards fenced? (Yes or No)

15. How many outside storage spaces are available?

16. Is inside storage available? (Yes or No)

17. How many inside storage spaces are available?

18. List all legal owner(s). If the owner is a firm, company, association or corporation, list all persons having financial interest.

19. Do you or any legal owner of your tow company have any financial interest in any other tow company within the City of Roseville? (Yes or No)

20. Do you have any family members who own or have financial interest in any other tow company within the City of Roseville? (Yes or No) (Family members are any person or persons related by blood or marriage.)

21. Do you share any facilities with any other tow company? (Yes or No)

22. A "yes" answer to 19, 20, or 21 shall be explained in the remarks section by listing the name of the tow company.

23. Accurately list the maximum hourly rate to be charged on Department calls for each tow truck class for which you are applying.

24. List the outside storage rate for each tow truck class for which you are applying.

25. List the inside storage rate for each tow truck class for which you are applying.

26. List the service call rate for each tow truck class for which you are applying.

27. List the contract labor rate for each tow truck class for which you are applying.

28. List the rate(s) for auxiliary equipment for each class for which you are applying.

29. Are you capable of towing Class A recreational vehicles (RVs)? (Yes or No)

30. Are you capable of towing Class B recreational vehicles (RVs)? (Yes or No)

31. Are you capable of towing Class C recreational vehicles (RVs)? (Yes or No)

32. Do you have storage space spaces for a recreational vehicle (RV)? (Yes or No)

33. List any comments or additional information, such as an explanation of any "Yes" response to questions 19, 20 and/or 21.

34. Read the statement and sign and date the application. Include the name and title of the person signing the application.

COUNCIL COMMUNICATION

CC #: 1544
File #: 0721

Title:	Transit Bus Shelter Construction Fee Agreements
Contact:	Alison Winter 916-774-5365 awinter@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.16.

RECOMMENDATION TO COUNCIL

Staff recommends Council adopt a resolution approving the form of two template Transit Bus Shelter Construction Fee Agreements, authorizing the City Manager to execute all pending and future Agreements, and authorizing the City Attorney to make any non-substantive changes to the form of the template Agreements.

BACKGROUND

A Transit Bus Shelter Construction Fee Agreement (CFA) is the mechanism used by the City of Roseville to satisfy transit-related conditions placed on a developer to develop certain properties within the City of Roseville. Locations of bus shelters are typically identified in specific plans and determined at the time of the planning entitlement process.

A Transit Bus Shelter CFA is used when a bus shelter is planned at a location, but there is a benefit to postpone the installation of a shelter to a later date. The two (2) versions of Transit Bus Shelter CFA forms that are used are differentiated by the need to dedicate an easement around the bus shelter pad. In the case where an easement is needed, that document is recorded.

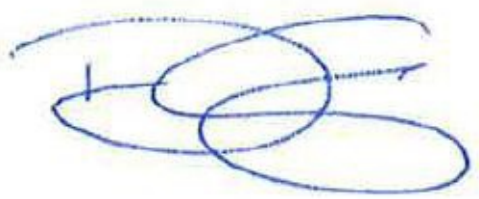
The requested action will result in a streamlined CFA process that will save developers and City staff time during the project approval process.

FISCAL IMPACT

The current construction fee of $10,000 per shelter provides security for future installation of transit improvements with no fiscal impact to the City's General Fund or Transportation Development Act (TDA) funds.

ENVIRONMENTAL REVIEW

The proposed project involves the construction and location of a limited number of small facilities. This activity is categorically exempt from CEQA as a Class 3 exemption (State CEQA Guidelines Section 15303). The Exemption has been prepared and no further CEQA action is required.



CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal A - Remain fiscally responsible in a changing world
Goal E - Deliver exceptional city services
Goal F - Invest in well-planned infrastructure and growth

Respectfully Submitted,

Alison Winter, Alternative Transportation Analyst

Jason Shykowski, Public Works Director

Description

Resolution 21-276

Transit Shelter CFA form (no recording)

Transit Shelter CFA form

RESOLUTION NO. 21-276

APPROVING THE FORM OF TWO TRANSIT BUS SHELTER CONSTRUCTION FEE AGREEMENTS, AUTHORIZING THE CITY MANAGER TO EXECUTE THEM ON BEHALF OF THE CITY OF ROSEVILLE AND AUTHORIZING THE CITY ATTORNEY TO MODIFY THE FORMS AS NECESSARY

WHEREAS, a Transit Bus Shelter Construction Fee Agreement (CFA) is the mechanism used by the City of Roseville to satisfy transit-related conditions placed on a developer to develop certain properties within the City of Roseville; and

WHEREAS, locations of bus shelters are typically identified in specific plans and determined at the time of the planning entitlement process; and

WHEREAS, a Transit Bus Shelter CFA is used when a bus shelter is planned at a location, but there is a benefit to postpone the installation of a shelter to a later date; and

WHEREAS, the two (2) versions of Transit Bus Shelter CFA forms that are used are differentiated by the need to dedicate an easement around the bus shelter pad, and in the case where an easement is needed, that document is recorded; and

WHEREAS, the requested action will result in a streamlined CFA process that will save developers and City staff time during the project approval process.

WHEREAS, both forms of the Transit Bus Shelter Construction Fee Agreements have been reviewed by City Council.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Roseville that two Transit Bus Shelter Construction Fee Agreement Forms have been approved, and the City Manager is authorized to execute all pending and future Transit Bus Shelter Construction Fee Agreements.

BE IT FURTHER RESOLVED that the City Attorney is authorized to make non-substantive changes to the form of the Transit Bus Shelter Construction Fee Agreements.

PASSED AND ADOPTED by the Council of the City of Roseville this____day of _____, 20__, by the following vote on roll call:

TRANSIT BUS SHELTER
CONSTRUCTION FEE AGREEMENT

Project Name: _____

Shelter Number: _____

THIS AGREEMENT is made and entered into this _____ day of _____, 20___, by and between the CITY OF ROSEVILLE, a municipal corporation, ("CITY") and _____, a _____, ("DEVELOPER").

W I T N E S S E T H:

A. DEVELOPER is the owner of a parcel of real property located in Roseville, Placer County, California, which is more particularly described in Exhibit "A" and as shown on the map labeled Exhibit “B” ("the Subject Property"). DEVELOPER currently intends to develop the Subject Property, and as a condition of such development, or as provided for per the Development Agreement between DEVELOPER and CITY, the terms of which are fully incorporated herein by this reference, CITY requires that DEVELOPER construct or finance the construction of a bus shelter on the Subject Property, on real property dedicated to CITY as part of landscape corridor and/or public right-of-way.

B. In order to satisfy such condition(s) set forth in Paragraph A, DEVELOPER hereby desires to pay CITY the full present cost of constructing such bus shelter. DEVELOPER has previously provided to CITY an easement or right of way to allow for the construction, installation, operation, and maintenance of a bus shelter, or other transit related facilities, by CITY or its designated agents, in further satisfaction of such condition(s).

C. CITY is willing to accept and deems such payment and easement as in full compliance with the aforementioned condition(s) of the project permit for the Subject Property, with the understanding that the funds may be used as determined by CITY for the placement of any transit related improvement within the transit service area in which the Subject Property is located.

NOW, THEREFORE, the parties agree as follows:

1. Payment. Concurrent with the execution of this Agreement, DEVELOPER shall pay to CITY the sum of _____ ($_____), which represents the full current cost of constructing a bus shelter, or other transit related facility.

2. Location. CITY, in its sole discretion, may choose to construct, install, operate, and/or maintain a bus shelter upon the Subject Property, or may choose to use the funds in whole or in part to construct, install, operate, and/or maintain any other transit related facilities in the transit service area in which the Subject Property is located.

3. Right of Entry. Permission to enter onto the Subject Property or other property of DEVELOPER is hereby granted to CITY, or its designated agents, as may be necessary to construct, install, operate, or maintain such bus shelter or other transit related facilities.

4. Compliance with Conditions. Upon delivery to CITY of both the fully executed grant of easement specified in Paragraph B above and the payment specified in Section 1 above, DEVELOPER shall be deemed to have fully complied with and satisfied the condition of the Project Permit for the Subject Property for the financing and construction of the required bus shelter.

5. Integration. This is an integrated agreement, and contains the complete understanding of the parties. It shall be read as a whole.

6. Amendments. This Agreement and each provision contained herein may be waived, amended, supplemented, or terminated only by mutual written agreement of CITY and DEVELOPER.

7. Notices. Any notices required by this Agreement shall be personally delivered or mailed, U.S. Mail first class postage prepaid, addressed as follows:

CITY OF ROSEVILLE	DEVELOPER
City of Roseville	_____
316 Vernon Street Ste. 150	_____
Roseville, CA 95678	_____
Attn: Alternative Transportation Division	_____

Either party may amend its address for notice by notifying the other party in writing.

8. Venue. Any action arising out of this Agreement shall be brought in Placer County, regardless of where else it might otherwise be venued.

9. Attorney's Fees. In any action brought by either party to enforce the terms of this Agreement, the prevailing party shall be entitled to recover its reasonable attorney's fees.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has caused this Agreement to be executed in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the _____ day of _____, 20___, and DEVELOPER has caused this Agreement to be executed.

TRANSIT BUS SHELTER
CONSTRUCTION FEE AGREEMENT

Project Name: _____

Shelter Number: _____

THIS AGREEMENT is made and entered into this _____ day of _____, 20___, by and between the CITY OF ROSEVILLE, a municipal corporation, ("CITY") and _____, a _____, ("DEVELOPER"), and

W I T N E S S E T H:

A. DEVELOPER is the owner of a parcel of real property located in Roseville, Placer County, California, which is more particularly described in Exhibit "A" and as shown on the map labeled Exhibit “B” ("the Subject Property"). DEVELOPER currently intends to develop the Subject Property, and as a condition of such development, or as provided for per the Development Agreement between DEVELOPER and CITY, the terms of which are fully incorporated herein by this reference, CITY requires that DEVELOPER construct or finance the construction of a bus shelter on the Subject Property, on real property to be dedicated to CITY as part of landscape corridor and/or public right-of-way.

B. In order to satisfy such condition(s) set forth in Paragraph A, DEVELOPER hereby desires to pay CITY the full present cost of constructing such bus shelter. DEVELOPER has previously provided to CITY, or will provide to CITY concurrent to the execution of this Agreement, an easement to allow for the construction, installation, operation, and maintenance of a bus shelter, or other transit related facilities, by CITY or its designated agents, in further satisfaction of such condition(s).

C. CITY is willing to accept and deems such payment and easement as in full compliance with the aforementioned condition(s) of the project permit for the Subject Property, with the understanding that the funds may be used as determined by CITY for the placement of any transit related improvement within the transit service area in which the Subject Property is located.

NOW, THEREFORE, the parties agree as follows:

1. Agreement Runs with the Land. This Agreement is an instrument affecting the title or possession of the Subject Property. It shall run with the land, and all of the terms, covenants, conditions and restrictions of this Agreement shall be binding upon and inure to the benefit of all of the successors in interest of DEVELOPER. Upon sale or division of the Subject Property, the terms, conditions, covenants and restrictions of this Agreement shall apply to each parcel, and the owner or owners of each parcel of the Subject Property shall succeed to the obligations imposed upon DEVELOPER by this Agreement.

2. Payment. Concurrent with the execution of this Agreement, DEVELOPER shall pay to CITY the sum of _____ ($_____), which represents the full current cost of constructing a bus shelter, or other transit related facility.

3. Location. CITY, in its sole discretion, may choose to construct, install, operate, and/or maintain a bus shelter upon the Subject Property, or may choose to use the funds in whole or in part to construct, install, operate, and/or maintain any other transit related facilities in the transit service area in which the Subject Property is located.

4. Right of Entry. Permission to enter onto the Subject Property or other property of DEVELOPER is hereby granted to CITY, or its designated agents, as may be necessary to construct, install, operate, or maintain such bus shelter or other transit related facilities.

5. Compliance with Conditions. Upon delivery to CITY of both the fully executed grant of easement specified in Paragraph B above and the payment specified in Section 2 above, DEVELOPER shall be deemed to have fully complied with and satisfied the condition of the Project Permit for the Subject Property for the financing and construction of the required bus shelter.

6. Integration. This is an integrated agreement, and contains the complete understanding of the parties. It shall be read as a whole.

7. Amendments. This Agreement and each provision contained herein may be waived, amended, supplemented, or terminated only by mutual written agreement of CITY and DEVELOPER.

8. Notices. Any notices required by this Agreement shall be personally delivered or mailed, U.S. Mail first class postage prepaid, addressed as follows:

CITY OF ROSEVILLE	DEVELOPER
City of Roseville	_____
316 Vernon Street Ste. 150	_____
Roseville, CA 95678	_____
Attn: Alternative Transportation Division	_____

Either party may amend its address for notice by notifying the other party in writing.

9. Venue. Any action arising out of this Agreement shall be brought in Placer County, regardless of where else it might otherwise be venued.

10. Attorney's Fees. In any action brought by either party to enforce the terms of this Agreement, the prevailing party shall be entitled to recover its reasonable attorney's fees.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has caused this Agreement to be executed in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the _____ day of _____, 20___, and DEVELOPER has caused this Agreement to be executed.

COUNCIL COMMUNICATION

CC #: 1540
File #: 0721

Title:	Roseville Transit System Management, Operations and Call Center Services - Agreement Amendment
Contact:	Ed Scofield 916-774-5449 ecscofield@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.17.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt a resolution authorizing the City Manager to execute the First Amendment to the Agreement between the City of Roseville and MV Transportation, Inc. for the operation of the City of Roseville Transit System and the South Placer County Transit Information Center.

BACKGROUND

The City of Roseville operates transit services that include Commuter Service between Roseville and downtown Sacramento; Local Service within the City of Roseville; Dial-A-Ride Service that provides trips to the general public with advance reservations; Roseville Paratransit service for American with Disabilities Act (ADA) eligible passengers within the Roseville city limits; and Game Day Express. On behalf of a consortium of transit operators within the South Placer County region, the City of Roseville also administers the South Placer County Transit Information Center ('Call Center') which provides travel information, makes ride reservations, and answers questions.

Pursuant to an existing Agreement with the City, MV Transportation manages and operates Roseville Transit and the Call Center. The Agreement between the City and MV Transportation was approved on September 20, 2017 and is scheduled to terminate on June 30, 2021. The Agreement provides the City, at its sole discretion, the option to extend services for two additional two-year terms (Section 12.3). Staff performed an Independent Cost Evaluation (ICE) using costs from other nearby transit agencies and determined that the prices for the two additional years of service are still competitive.

The proposed Amendment No. 1 would extend the term of the Agreement two additional years to an end date of June 30, 2023. All provisions of the existing Agreement remain unchanged and in force. Since Roseville Transit receives Federal Transit Administration (FTA) funds, the proposed Amendment incorporates additional federal contracting clauses which were not included in the existing Agreement.

FISCAL IMPACT

Costs for option years FY2021-22 and FY2022-23 were established in the existing Agreement. The maximum obligation to the City for MV Transportation to manage and operate Roseville Transit and the Call Center are as follows:

FY2021-22

- $4,244,102.52 – Manage and Operate Roseville Transit
- $378,656.11 – Manage and Operate the South Placer County Transit Information Center

FY2022-23

- $4,509,198.27 – Manage and Operate Roseville Transit
- $385,561.41 – Manage and Operate the South Placer County Transit Information Center

Funding for transit services is provided primarily through FTA funds, Transportation Development Act (TDA) funds and fare revenue through the City's Transit Fund (6511). The call center is funded through the Consolidated Transportation Services Agency (CTSA) fund (6540), with TDA revenues provided by the West Placer CTSA. General Fund monies are not used for either transit operations or the call center.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) only applies to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3)).

AMENDMENT NO. 1 TO

AGREEMENT FOR CITY OF ROSEVILLE TRANSIT SYSTEM MANAGEMENT, OPERATIONS AND CALL CENTER SERVICES

THIS AMENDMENT NO. 1 TO AGREEMENT is made and entered into this ___ day of _____, 20__, by and between the City of Roseville, a municipal corporation ("CITY"), and MV Transportation, Inc., a California corporation ("CONTRACTOR"); and

W I T N E S S E T H:

WHEREAS, CITY and CONTRACTOR previously entered into an Agreement for City of Roseville Transit System Management, Operations and Call Center Services dated September 20, 2017 ("Agreement"); and

WHEREAS, CITY desires to amend the Agreement for an additional term; and

WHEREAS, CONTRACTOR is willing and able to provide such additional services.

NOW, THEREFORE, the parties agree as follows:

1. A new Section 12.5 is added to the Agreement, to read as follows:

"CITY is exercising its option to extend the term of the Agreement for an additional two (2) year period commencing July 1, 2021 and ending on June 30, 2023".

2. Additional Federal Clauses which were not included in Exhibit "C" to the Agreement are contained in Exhibit "C-1", attached hereto and incorporated herein by this reference.

3. All other provisions of the Agreement shall remain unchanged and in full force and effect.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Amendment No. 1 to Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ___ day of _____, 20__, and CONTRACTOR has caused this Amendment No. 1 to Agreement to be executed.

EXHIBIT “C-1”

Exhibit C-1
ADDITIONAL FEDERAL CLAUSES*
***Clauses not listed in prior agreement.**

#19 - PUBLIC TRANSPORTATION EMPLOYEE PROTECTIVE ARRANGEMENTS

49 U.S.C. § 5333(b) ("13(c)")

29 C.F.R. part 215

Applicability to Contracts

The Public Transportation Employee Protective Arrangements apply to each contract for transit operations performed by employees of a Contractor recognized by FTA to be a transit operator.

Flow Down

The employee protective arrangements clause flows down to all third party contractors and their contracts at every tier.

Model Clause/Language

There is no required language for the Public Transportation Employee Protective Arrangements clause. Recipients can draw on the following language for inclusion in their federally funded procurements.

Public Transportation Employee Protective Arrangements

The Contractor agrees to comply with the following employee protective arrangements of 49 U.S.C. § 5333(b):

1. **U.S. DOL Certification**. Under this Contract or any Amendments thereto that involve public transportation operations that are supported with federal assistance, a certification issued by U.S. DOL is a condition of the Contract.
2. **Special Warranty**. When the Contract involves public transportation operations and is supported with federal assistance appropriated or made available for 49 U.S.C. § 5311, U.S. DOL will provide a Special Warranty for its Award, including its Award of federal

assistance under the Tribal Transit Program. The U.S. DOL Special Warranty is a condition of the Contract.

3. **Special Arrangements**. The conditions of 49 U.S.C. § 5333(b) do not apply to Contractors providing public transportation operations pursuant to 49 U.S.C. § 5310. FTA reserves the right to make case-by-case determinations of the applicability of 49 U.S.C. § 5333(b) for all transfers of funding authorized under title 23, United States Code (flex funds), and make other exceptions as it deems appropriate, and, in those instances, any special arrangements required by FTA will be incorporated herein as required.

#21 - SAFE OPERATION OF MOTOR VEHICLES

23 U.S.C. part 402
Executive Order No. 13043
Executive Order No. 13513
U.S. DOT Order No. 3902.10

Applicability to Contracts

The Safe Operation of Motor Vehicles requirements apply to all federally funded third party contracts. In compliance with Federal Executive Order No. 13043, "Increasing Seat Belt Use in the United States," April 16, 1997, 23 U.S.C. Section 402 note, FTA encourages each third party contractor to adopt and promote on-the-job seat belt use policies and programs for its employees and other personnel that operate company owned, rented, or personally operated vehicles, and to include this provision in each third party subcontract involving the project. Additionally, recipients are required by FTA to include a Distracted Driving clause that addresses distracted driving, including text messaging in each of its third party agreements supported with Federal assistance.

Flow Down Requirements

The Safe Operation of Motor Vehicles requirements flow down to all third party contractors at every tier.

Model Clause/Language

There is no required language for the Safe Operation of Motor Vehicles clause. Recipients can draw on the following language for inclusion in their federally funded procurements.

Safe Operation of Motor Vehicles

Seat Belt Use

The Contractor is encouraged to adopt and promote on-the-job seat belt use policies and programs for its employees and other personnel that operate company-owned vehicles, company-rented vehicles, or personally operated vehicles. The terms "company-owned" and "company-leased" refer to vehicles owned or leased either by the Contractor or CITY.

Distracted Driving

The Contractor agrees to adopt and enforce workplace safety policies to decrease crashes caused by distracted drivers, including policies to ban text messaging while using an electronic device supplied by an employer, and driving a vehicle the driver owns or rents, a vehicle Contactor owns, leases, or rents, or a privately-owned vehicle when on official business in connection with the work performed under this agreement.

#22 SCHOOL BUS OPERATIONS

49 U.S.C. 5323(f)

49 C.F.R. part 605

Applicability to Contracts

The School Bus requirements apply to contracts for operating public transportation service.

Flow Down Requirements

The School Bus requirements flow down from FTA recipients and subrecipients to first tier service contractors.

Model Clause/Language

The relevant statutes and regulations do not mandate any specific clause or language. Recipients can draw on the following language for inclusion in their federally funded procurements.

School Bus Operations

The contractor agrees to comply with 49 U.S.C. 5323(f), and 49 C.F.R. part 604, and not engage in school bus operations using federally funded equipment or facilities in competition with private operators of school buses, except as permitted under:

1. Federal transit laws, specifically 49 U.S.C. § 5323(f);
2. FTA regulations, "School Bus Operations," 49 C.F.R. part 605;
3. Any other Federal School Bus regulations; or
4. Federal guidance, except as FTA determines otherwise in writing. If Contractor violates this School Bus Agreement, FTA may:
    a. Bar the Contractor from receiving Federal assistance for public transportation; or
    b. Require the contractor to take such remedial measures as FTA considers appropriate.

When operating exclusive school bus service under an allowable exemption, the contractor may not use federally funded equipment, vehicles, or facilities.

The Contractor should include the substance of this clause in each subcontract or purchase under this contract that may operate public transportation services.

#28 – CONFLICT OF INTEREST

2 CFR 200.112

Applicability to Contracts

The requirements applies to all contracts using federal funding.

Conflict of Interest

The Contractor and its subcontractors that perform work under this Agreement shall comply with Federal and State conflict of interest laws, regulations and policies, and applicable provisions of the CITY'S conflict of interest policy in regards to federal funds (CITY A.R. 4.06).

COUNCIL COMMUNICATION

CC #: 1520
File #: 0800-06

Title:	Transportation Impact Studies - On-Call Professional Services Agreements
Contact:	Brandy LeBeau 916-774-5278 blebeau@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.18.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt resolutions approving four (4) on-call professional services agreements for preparation of Transportation Impact Studies with Fehr & Peers, Kimley-Horn and Associates, DKS Associates, and T J K M, and authorizing the City Manager to execute them on behalf of the City of Roseville.

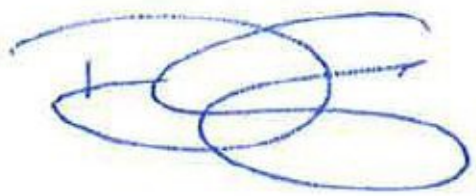
BACKGROUND

New development projects are often required to evaluate impacts to the City's transportation network during the entitlement and environmental review process, depending on the size and scope of the development project proposed. If a traffic impact study is deemed necessary, staff solicits a scope of work and not-to-exceed cost from the City's on-call consulting firms, which are reviewed and approved by staff, then forwarded to the project applicant for review and approval. Once the scope is approved by all parties, the applicant is required to submit a check for the entire not-to-exceed amount, which is deposited into an individual project account. Once funds have cleared, the study is authorized to begin. The City's current on-call agreements expire August 7, 2021.

Consistent with the City's contracting requirements, staff issued a Request for Proposals (RFP) for on-call traffic impact studies on November 13, 2020. Four firms submitted proposals in response to the RFP. Fehr & Peers, Kimley-Horn and Associates, DSK Associates and T J K M ranked highest in terms of service, experience, and available staffing resources to meet the City's needs. Similar to past practice, four separate firms will be engaged to eliminate any possible conflicts of interest that may arise as a result of any of the firms' existing or future contracts with other private entities (i.e., development interests). Each agreement has a not-to-exceed total of $500,000 and a term of one year with an option to extend for four additional years. The agreement grants the City Manager authority to approve the optional extensions with no further Council action.

FISCAL IMPACT

Approval of the on-call professional services agreements will have no impact to the City's General Fund. All development projects are required to pay the full cost of traffic impact studies prior to the City authorizing work to begin.



ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) only applies to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3)).

ON-CALL PROFESSIONAL SERVICES AGREEMENT

Services: Transportation Impact Studies

THIS AGREEMENT is made and entered into this ___ day of _____, 20__, by and between the City of Roseville, a municipal corporation ("CITY"), and Fehr & Peers, a California corporation ("CONSULTANT"); and

W I T N E S S E T H:

WHEREAS, CITY issued Request for Proposal #06-0002 for professional services consisting of on-call transportation impact study services; and

WHEREAS, CONSULTANT has prepared a response to the Request for Proposal dated February 12, 2021, which describes the scope of services to be performed by CONSULTANT, and the hourly rates for performance of such services; and

WHEREAS, CONSULTANT is qualified and experienced to provide professional services on an on-call basis.

NOW, THEREFORE, the parties agree as follows:

1. Term. The term of this Agreement shall commence upon execution and expire on June 30, 2022. The City Manager may, in his or her discretion, elect to extend the Agreement in one (1) year increments for up to an additional four (4) years by giving CONSULTANT thirty (30) days advance written notice of each optional one (1) year renewal. Such extensions shall be memorialized by a written amendment to this Agreement.

2. Services. CONSULTANT shall perform, at the direction of CITY, the scope of the on-call services as described in EXHIBIT "A," attached hereto and incorporated herein by this reference. Individual tasks will be awarded by CITY on an as-needed basis. CITY may assign work to one, or more than one consultant from an approved qualified list. CITY reserves the right to unilaterally assign work to any consultant as it deems prudent or, if no services are required, no work. CITY makes no specific guarantee of a minimum or maximum number of hours or amount of tasks or services, which shall be required of any single consultant. In addition, the inclusion of any consultant on any qualified list, if so utilized by CITY, shall in no way be considered an exclusive agreement to provide service for CITY.

3. Compensation. For its services provided hereunder, CONSULTANT shall be compensated on a time and expense basis in accordance with the hourly rates as described in EXHIBIT "B," attached hereto and incorporated herein by this reference. Any proposed increase in the effective rates for future services must be preceded by at least a 90-day written notice to the contracting department. Total compensation shall not exceed five hundred thousand dollars ($500,000). Total compensation for optional renewal years of this Agreement shall not exceed five hundred thousand dollars per year ($500,000). Adjustment to the total compensation per year shall require a written amendment to this Agreement, subject to approval by the City Council.

CONSULTANT shall submit one monthly invoice for its services. Such invoices shall be delineated by task, the person performing the services, and the hourly rate, which shall be stated in time increments of not greater than one tenth (1/10) hours. CITY shall pay invoices within thirty (30) days after receipt, if the services specified in the invoice have been satisfactorily completed.

4. Indemnification. To the fullest extent allowed by law, CONSULTANT shall defend, indemnify, and save and hold harmless CITY, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of CONSULTANT's willful misconduct or negligent act or omission while engaged in the performance of obligations or exercise of rights created by this Agreement, except those matters arising from CITY's sole negligence or willful misconduct. The parties intend that this provision shall be broadly construed.

CONSULTANT agrees to defend and indemnify CITY if, despite the parties intent and practice, any venue, agency, or court with competent jurisdiction determines that CONSULTANT and/or any of its agents, officers, employees, volunteers, independent contractors, or subcontractors, are characterized as employee(s) of CITY.

CONSULTANT's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

5. Insurance. CONSULTANT agrees to continuously maintain, in full force and effect, the following minimum policies of insurance during the term of this Agreement.

COVERAGE	LIMITS OF LIABILITY
Workers' Compensation	Statutory

Commercial General Liability	$1,000,000 each occurrence $2,000,000 aggregate Personal Injury: $1,000,000 each occurrence $2,000,000 aggregate
Automobile Liability	$1,000,000 combined single limit
Professional Liability (errors and omissions)	$1,000,000 per claim $2,000,000 aggregate

a. Form. CONSULTANT shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

b. Additional Insureds. CONSULTANT shall also provide a separate endorsement form or section of the policy showing CITY, its officers, agents, employees and volunteers as additional insureds for each type of coverage, except for Workers' Compensation and Professional Liability. Such insurance shall specifically cover the contractual liability of CONSULTANT. The additional insured coverage under the CONSULTANT's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from CITY's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office ("ISO") CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

c. Cancellation/Modification. CONSULTANT shall provide ten (10) days written notice to CITY prior to cancellation or modification of any insurance required by this Agreement.

d. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of CITY (if agreed to in a written contract) before CITY's own insurance shall be called upon to protect it as a named insured.

e. Subcontractors. CONSULTANT agrees to include in its contracts with all subcontractors the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, CONSULTANT shall require its subcontractors to agree to be bound to CONSULTANT and CITY in the same manner and to the same extent as CONSULTANT is bound to CITY under this Agreement. Additionally, CONSULTANT shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of CITY's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request.

f. Self-Insured Retentions. All self-insured retentions ("SIR") must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or CITY. CITY reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

g. Waiver of Subrogation. CONSULTANT hereby agrees to waive subrogation which any insurer of CONSULTANT may acquire from CONSULTANT by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of CITY, its officers, agents, employees and volunteers for all worked performed by CONSULTANT, its employees, agents and subcontractors.

h. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve CONSULTANT of liability in excess of such coverage, nor shall it preclude CITY from taking such other actions as are available to it under any other provisions of this Agreement or law.

6. Records. CONSULTANT and its subcontractors shall maintain all files and records relating to the services performed hereunder during the term of this Agreement and for a period of not less than one (1) year after the date of termination or expiration. Provided, however, that in the event of litigation or settlement of claims arising from the performance of this Agreement, CONSULTANT and its subcontractors shall maintain all files and records until such litigation, appeals or claims are resolved. Duly authorized representatives of CITY shall have right of access during normal business hours and after reasonable notice to CONSULTANT's and subcontractors' files and records relating to the services performed hereunder, and may review and copy the files and records at appropriate stages during performance of the services and during the one (1) year period following termination or expiration of this Agreement. CONSULTANT shall include this provisions in its contracts with all subcontractors.

7. Prevailing Wages. When applicable, for purposes of this Agreement, CONSULTANT and its subcontractors shall comply with all applicable prevailing wage laws, e.g., but not limited to, California Labor Code Sections 1770 et seq. In accordance with said Section 1775, CONSULTANT shall forfeit as a penalty to the City two hundred dollars ($200) for each calendar day or portion thereof for each worker paid less than the prevailing rates for such work or craft in which such worker is employed for any work done on-site under the Agreement by CONSULTANT or by any subcontractor in violation of the provisions of the Labor Code and in particular, Labor Code Sections 1770 to 1780, inclusive. In addition to said penalty and pursuant to said Section 1775, the difference between such stipulated prevailing wage rates and the amount paid to each worker for each calendar day or portion thereof for which each worker was paid less than the stipulated prevailing wage shall be paid to each worker by CONSULTANT or the applicable subcontractor.

Pursuant to the provisions of California Labor Code Section 1773, the contracting department has identified the source, stated below, of the general prevailing rate of wages applicable to the site to be done, for straight time, overtime, and holiday work. The holiday wage rate listed shall be applicable to all holidays recognized in the collective bargaining agreement of the particular craft, classification or type of worker concerned. These wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm.

Pursuant to Labor Code Section 1773.2, general prevailing wage rates set forth above, which forms a part of this Agreement, shall be posted by CONSULTANT at a prominent place at the work site. Prevailing wage rates to be posted at the work site will be furnished by the contracting department. The possibility of wage increases is one of the elements to be

considered by CONSULTANT in determining its proposal, and will not under any circumstances be considered as the basis of a claim against CITY or the Agreement.

8. Contractor Registration. No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this Agreement, CONSULTANT and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. CONSULTANT is hereby notified that this Agreement is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

9. Time is of the Essence. Time is of the essence of this Agreement.

10. Compliance with Laws. CONSULTANT shall comply with all federal, state and local laws, ordinances and policies as may be applicable to the performance of services under this Agreement.

11. Ability to Perform. CONSULTANT agrees and represents that it has the time, ability and professional expertise to perform the services required under this Agreement.

12. Governing Agreement. In the event of any conflict between this Agreement and its EXHIBITS, the provisions of this Agreement shall govern. In the event of any conflict between any of the EXHIBITS, the provisions of the first in order of attachment shall govern.

13. Assignment. CONSULTANT is employed to perform unique personal services. CONSULTANT shall not assign this Agreement without the prior written consent of CITY. CONSULTANT shall not employ or otherwise incur any obligation to pay other specialists or experts for services in connection with this Agreement, without prior written consent of CITY.

14. Independent Contractor. CONSULTANT, inclusive of its agents, officers, employees, volunteers, independent contractors, and subcontractors, shall act as an independent

contractor, and covenants and agrees that it will conduct itself consistent with such status, that it will neither hold itself out as, nor claim to be, an officer or employee of CITY by reason of this Agreement.

CONSULTANT and CITY agree that: (a) CONSULTANT is free from the control and direction of CITY in connection with the performance of the work; (b) CONSULTANT is providing services directly to CITY; (c) CONSULTANT has and will maintain at all relevant times a business license; (d) CONSULTANT maintains a business location that is separate from CITY; (e) CONSULTANT is customarily engaged in an independently established business of the same nature as that involved in the work performed hereunder; (f) CONSULTANT actually contracts with other businesses to provide the same or similar services and maintains a clientele without restrictions from CITY; (g) CONSULTANT advertises and holds itself out to the public as available to provide the same or similar services; (h) CONSULTANT provides its own tools, vehicles, and equipment to perform the services; (i) CONSULTANT has negotiated its own rates; (j) CONSULTANT set its own hours and location of work in accomplishing CITY's on-call needs; and (k) CONSULTANT has the right to control the manner and means of accomplishing the result desired and exercises its own expert independent judgement.

15. Representations and Warranties. CONSULTANT warrants that it has not employed or retained any company or person, other than a bona fide employee working for CONSULTANT, to solicit or secure this Agreement, and that it has not paid or agreed to pay any company or person, other than a bona fide employee, any fee, commission, percentage, brokerage fee, gift or any other consideration, contingent upon or resulting from the award or making of this Agreement. For breach or violation of this warranty, CITY shall have the right to

terminate as void this Agreement, without liability, or, in its discretion, to deduct from the Agreement price or consideration, or otherwise recover, the full amount of such fee, commission, percentage, brokerage fee, gift or contingent fee.

16. Successors in Interest. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.

17. Copyright, Ownership and Use of Materials. All tangible material ("Material") created or delivered pursuant to this Agreement is considered a work made for hire under the Copyright Act. To the extent such Material does not qualify as a work made for hire, CONSULTANT hereby assigns to CITY all right, title, and interest, including but not limited to all copyrights, in all Material created by CONSULTANT in its performance under this Agreement. Material constitutes the scope of work outlined in Exhibit A and attached hereto, and all written and other tangible expressions, including but not limited to, drawings (including computer aided drawings), papers, documents, reports, surveys, renderings, exhibits, sketches, maps, models, prints, paintings or photographs, in any and all media or formats in which such materials have been created or are maintained. All Material furnished by CONSULTANT is, and shall remain, the property of CITY.

CONSULTANT shall execute any documents necessary to effectuate such assignment. In the event that CONSULTANT uses, employs, designates, or retains any person or entity who is not an employee of CONSULTANT, to perform any work required of it pursuant to this Agreement, CONSULTANT shall require said person or entity to execute an agreement containing the preceding paragraph.

18. Termination of Agreement. CITY may terminate this Agreement without cause by giving CONSULTANT ten (10) days advance written notice from the City Manager.

CONSULTANT may terminate this Agreement without cause by giving CITY thirty (30) days advance written notice. CONSULTANT understands that continuation of this Agreement past June 30th of any given year is contingent upon appropriation of funds for such purpose in the budget of the City of Roseville in the sole discretion of the City Council. In the event of termination through no fault of CONSULTANT, CITY shall compensate CONSULTANT for services performed as of the date of termination, upon the release to CITY of all Material hereunder, in any and all media or formats in which such materials have been created or are maintained. CITY retains the right to receive and use any MATERIAL, notwithstanding any termination or any dispute regarding the amount to be paid.

19. Attorney's Fees; Venue; Governing Law. If either party commences any legal action against the other party arising out of this Agreement or the performance hereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorney's fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

20. Modification. This Agreement and each provision contained herein may be waived, amended, supplemented or eliminated only by mutual written agreement of the parties.

21. Severability. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

22. Notices. Any notices to parties required by this Agreement shall be delivered personally or mailed, U.S. first class postage prepaid, addressed as follows:

CITY OF ROSEVILLE	CONSULTANT
Mike Isom City of Roseville 311 Vernon Street Roseville, CA 95678	John Gard, PE Fehr & Peers 1013 Galleria Blvd, Suite 255 Roseville, CA 95678

Either party may amend its address for notice by giving notice to the other party in writing.

23. Integrated Agreement. This is an integrated agreement and contains all of the terms, considerations, understanding and promises of the parties. It shall be read as a whole.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ___ day of _____, 20__, and CONSULTANT has caused this Agreement to be executed.

Corporate Secretary's Certificate

I, Marion Donnelly, Secretary of Fehr & Peers, a corporation organized and existing under the laws of the State of California, hereby certify that the foregoing is a complete, true and correct copy of resolutions of the Board of Directors of the Corporation, duly and regularly adopted by the Board of Directors of the Corporation, duly and regularly adopted by the Board of Directors of the Corporation in all respects as required by law and the by-laws of the Corporation on July 10, 2019 at a meeting at which a quorum of the Board of Directors of the Corporation was present and the requisite number of such directors voted in favor of said resolutions, or by unanimous consent in writing of all members of the Board of Directors of the Corporation to the adoption of said resolutions.

I further certify that the said resolutions are still in force and effect and have not been amended or revoked and do not exceed the objects or powers of the Corporation or the powers of its directors.

IN WITNESS WHEREOF, I have hereunto set my hand as Secretary of the Corporation, an affixed the corporate seal of the Corporation, on July 10, 2019.

Affix Corporate Seal Here:

Marion Donnelly (signature), SECRETARY OF Fehr & Peers, A CORPORATION

UNANIMOUS WRITTEN CONSENT OF DIRECTORS OF

FEHR & PEERS

The undersigned, constituting all of the directors of the corporation, acting pursuant to the authority of 307(b) of the California General Corporation Law, hereby adopt the following recitals and resolution, effective on the date of the last signature hereof.

"RESOLVED, that the President and each director of this corporation is authorized to execute any contract by which the corporation would perform services for any client, and to bind the corporation thereto by his or her signature alone."

BE IT FURTHER RESOLVED, that any executed copy of this Resolution, duly signed as hereunder, shall constitute a Certificate of Corporate Resolution in the matters hereinabove recited.

Qualifications of Team

Team Qualifications

ORGANIZATION CHART

FEHR & PEERS STAFF

To ensure the City of Roseville receives a high level of support, we have designated five experienced staff to serve this on-call. The organization chart to the left illustrates our team's structure.

John Gard, TE, RSP$_1$ will serve as the Fehr & Peers primary point of contact. John is based in our Roseville office and has been continously employed with Fehr & Peers since 1995.

Supporting John with on-call project management task orders are four expert team members, whose relevant experience is summarized on the following pages (including experience working on projects in Roseville).

GEOGRAPHIC LOCATIONS

The vast majority of work will be performed by staff from the Fehr & Peers Roseville and Sacramento offices. On occasion, we may utilize staff with specific expertise from other Fehr & Peers offices.

Roseville Office: 1013 Galleria Blvd, Suite 255, 95678
Sacramento Office: 1001 K Street, 3rd Floor, 95814

SUBCONSULTANTS

Fehr & Peers proposes to perform all work using its own staff. No subconsultants or subcontractors are proposed.

JOHN GARD, TE, RSP$_1$

Principal-in-Charge. John is a Principal and has been employed with Fehr & Peers since 1995. He has an extensive history of studies within Roseville. John will serve as the primary point of contact for this on-call assignment and will be responsible for the overall quality and timeliness of work products. John's in-depth understanding of Roseville's transportation system, its planned growth, combined with his historical perspective having managed studies in the City for over 25 years, makes him highly qualified to lead Fehr & Peers' in this on-call assignment.

Geographical Location: Roseville Office

Years with FP: 25

Experience in City of Roseville

- Lifetime Fitness TIS
- Villasport TIS
- Campus Oaks Access Study
- Foothills Station Access Study
- Bayside Church TIS
- Sutter Roseville Medical Center Expansion
- Kaiser Cirby-Riverside Medical Center Expansion
- Kaiser Eureka Road Medical Center Expansion
- Placer Sports Complex EIR
- Roseville General Plan Update
- Roseville Travel Demand Model Update

ROB HANANOUCHI, AICP

Project Manager. Rob is an Associate in the Fehr & Peers Roseville office with more than 10 years of professional experience. He has served as Fehr & Peers' project manager for a variety of projects including transportation impact assessments, environmental impact reports, general plans, specific plans, corridor plans, active transportation plans, complete streets projects, and transportation infrastructure projects. Rob has extensive experience in developing travel forecasts, performing traffic operations analyses, and evaluating the transportation impacts of land development, transportation and land use plans, and transportation infrastructure projects in accordance with current CEQA and NEPA requirements.

Geographical Location: Roseville Office

Years with FP: 11

Experience in City of Roseville

- Roseville NCRSP Parcel 49 Phase 3 TIS
- Roseville NCRSP Parcel 49 TopGolf TIS
- Roseville NCRSP Parcel 44 Traffic Study

ROD BROWN, AICP, PTP, RSP$_1$

Project Manager. Rod is an Associate with Fehr & Peers. Rod contributes a solid background in transportation policy and a strong multimodal focus to each of his projects. Rod also brings to each of his projects an attention to detail and commitment to quality control that is rooted in his previous experience as an engineer and project manager for the United States Navy's Nuclear Propulsion Program and in the tech industry. After joining Fehr & Peers in early 2015, Rod quickly earned a reputation as a thoughtful and dependable project manager with a strong commitment to rigorous quality control. He has served as the project manager or lead planner on many complex transportation planning projects, including regional transportation plans, general plans, transportation impacts assessments, active transportation plans and model development for general plans.

Geographical Location: Roseville Office

Years with FP: 6

Experience in City of Roseville

- Roseville VMT Study Standards
- Roseville General Plan Update
- Roseville Travel Demand Model Update (for Housing Element Update)

GREG BEHRENS, AICP

Project Manager. Greg Behrens is an Associate with more than ten years of public and private sector transportation planning experience. He has served as project manager and lead planner on numerous community mobility and transit service improvement projects. His work focuses on helping communities solve complex transportation challenges, ranging from expanding active transportation options to enhancing public transit service access, performance, and operations, with an emphasis on enhancing the interface between transit systems and the communities they serve.

Geographical Location: Sacramento Office

Years with FP: 4

Experience in City of Roseville

- Placer-Sacramento Gateway Plan
- Pleasant Grove Blvd Coffee Shack Access Study
- Downtown Roseville Parking and Circulation Study

REBECCA (BECCA) SHAFER, PE

Project Manager. Becca is a Senior Transportation Engineer based in the Fehr & Peers Sacramento office. She holds a dual Masters in Transportation Engineering and City and Regional Planning from the University of California, Berkeley. Since joining Fehr & Peers, her primary area of focus is in traffic operations analysis. Rebecca has served as the lead traffic forecasting and/or operations analyst for several large and complex projects, including the Sacramento Railyards/Kaiser/MLS Stadium EIR, the Fresno Downtown Plans, and the Richards Boulevard / Olive Drive Circulation Study. Rebecca's projects benefit greatly from her commitment to efficiency and attention to detail.

Geographical Location: Sacramento Office

Experience in City of Roseville

- Roseville General Plan
- Roseville Foothills Station TIS
- Roseville NCRSP Parcel 49 Phase 3 TIS

D

Project Understanding

Project Understanding

PROJECT UNDERSTANDING

Fehr & Peers has demonstrated competence, creativity, and responsiveness in conducting traffic studies within the City of Roseville. This has ranged from simple access studies (e.g., Pleasant Grove Boulevard Coffee Store), to complex access studies (e.g., Foothills Station), to highly controversial projects such as Villasport and LifeTime Family Fitness projects. We have also completed work for entire Specific Plans (e.g., Amoruso) and Major Project Permits (e.g., Campus Oaks).

We are intimately familiar with City of Roseville design standards and approaches to analyzing the traffic impacts of proposed land developments. The City typically supports the use of Institute of Transportation Engineers (ITE) trip rates to estimate project trips when determining off-site impacts and access needs for studies (i.e., "short-term" studies). But when examining if a project is consistent with the City's traffic model, it is customary to view the project using trip rates from the City's traffic model to determine whether the project would generate more trips than what the model currently assumes. Under circumstances where a project would generate more than 50 PM peak hour trips above what is assumed in the City's model that particular traffic analysis zone, the City requires a long-term traffic study. For large specific plans, the long-term analysis covers the entirety of the City to determine whether the City's 70 percent LOS C General Plan policy for operations at signalized intersections would continue to be met. For smaller projects, a more localized analysis of project effects is typically conducted.

PROJECT ACCESS REVIEWS

Analysis of project access focuses on a variety of traffic engineering and planning concepts including (but not limited to):

- Driveway design (placement, permitted movement, widths, curb return radii, throat depth)
- Need for deceleration lanes
- Median treatments including turn lane storage
- Sight distance considerations
- Traffic signal phasing changes and effects of new signals on signalized corridors
- Spacing of new traffic signals
- Adequacy of design to accommodate anticipated truck traffic
- Accommodation of bicyclists and pedestrians

ON-SITE CIRCULATION REVIEWS

The review of on-site circulation is also important. This includes review of parking lot layouts, drive-through storage capacity, dead-end drive aisles, pedestrian connections to adjacent streets, etc. Often, Fehr & Peers develops site access and on-site circulation recommendation in an illustrative format that can be used in public hearings and to develop conditions of approval for a project.

SITE ACCESS CHALLENGES AND SOLUTIONS

As the City builds out, it becomes more challenging to identify viable access solutions to remaining undeveloped parcels. We work cooperatively with City staff and offer many unique approaches to address these challenges. A recent example is a customized sight distance review we performed on the Foothills Station project, in which we determined how sight distance would be affected by the change in grade along the project frontage. This study also illustrated how we examine how multiple project access solutions may need to be considered for these complex project types. Additionally, published research by Fehr & Peers staff from years ago now forms the basis for how minimum required throat depths should be calculated per the City's Design Standards.

As a firm, we offer numerous tools to address built environment issues such as: crosswalk placement, bicyclist/pedestrian comfort, shared parking among complementary land uses, and curbspace requirements for pick-up/drop-off. We have built or have access to customized tools for these and other topics.

E

Project Plan

Project Plan

ANALYSIS METHODOLOGIES

Our extensive work history in Roseville has provided us with a strong understanding of the analysis methodologies preferred by City staff. Our analytical approaches are typically well-aligned with City staff when scoping studies. This includes selection of study intersections, choice of time periods, trip generation, analysis methods (e.g., microsimulation versus synchro), need for a long-term study, etc.

WORK SCHEDULE

The complexity of the project and type of study will dictate the schedule. For smaller, site-access studies, we can typically perform the study in as little as four weeks from authorization. For larger, more complex studies, up to eight weeks may be required.

ASSIGNED STAFF

All Fehr & Peers staff listed in this proposal have considerable prior work experience in the City of Roseville. We will staff this on-call assignment almost exclusively from our Roseville and Sacramento offices. On occasion, we may call upon experts from outside our region to provide specialized expertise. We do not propose including any subconsultants on our team.

NECESSARY EQUIPMENT/TRAINING

We do not require any special equipment or training to perform these studies. We have an excellent understanding of City design standards from years of work in the City. We know the City's travel demand model very well, being in the midst of updating it and using it on projects for decades. We know how to access traffic count data from the City's ITS database. We know which City staff to contact to request a range of data such as: engineering speed surveys, as-built drawings, etc.

PUBLIC HEARINGS

Fehr & Peers has attended numerous public hearings while serving as a consultant on behalf of the City. We not only work cooperatively with Engineering Department staff, but we regularly also collaborate with Community Development Department staff on a range of traffic and land use issues. We understand that our role may differ at Planning Commission and City Council hearings based on the type of project. In some instances, we will be present in the event questions should arise. In other instances, we may need to deliver a presentation on a complex transportation issue or to support City staff that are making this presentation.

Cost Proposal

FEHR PEERS

2020-2021

(July 2020 through June 2021)

Hourly Billing Rates

Classification	**Hourly Rate**		
Principal	$180.00	-	$350.00
Senior Associate	$185.00	-	$340.00
Associate	$170.00	-	$245.00
Senior Engineer/Planner	$135.00	-	$215.00
Engineer/Planner	$115.00	-	$165.00
Senior Engineering Technician	$145.00	-	$195.00
Senior Project Accountant	$160.00	-	$165.00
Senior Project Coordinator	$120.00	-	$165.00
Project Coordinator	$85.00	-	$150.00
Technician	$115.00	-	$160.00
Intern	$90.00	-	$115.00

- *Other Direct Costs / Reimbursable expenses are invoiced at cost plus 10% for handling.*
- *Personal auto mileage is reimbursed at the then current IRS approved rate (56 cents per mile as of Jan 2021).*
- *Voice & Data Communications (Telephone, fax, computer, e-mail, etc.) are invoiced at cost as a percentage of project labor.*

Fehr & Peers reserves the right to change these rates at any time with or without advance notice.

RESOLUTION NO. 21-257

APPROVING AN ON-CALL PROFESSIONAL SERVICES AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND KIMLEY-HORN AND ASSOCIATES, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, an on-call professional services agreement regarding On-Call Transportation Impact Studies, by and between the City of Roseville and Kimley-Horn and Associates, has been reviewed by the City Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said on-call agreement is hereby approved and the City Manager is authorized to execute it on behalf of the City of Roseville.

PASSED AND ADOPTED by the Council of the City of Roseville this___day of _____, 20___, by the following vote on roll call:

AYES COUNCILMEMBERS:

NOES COUNCILMEMBERS:

ABSENT COUNCILMEMBERS:

ON-CALL PROFESSIONAL SERVICES AGREEMENT

Services: Transportation Impact Studies

THIS AGREEMENT is made and entered into this ___ day of _____, 20__, by and between the City of Roseville, a municipal corporation ("CITY"), and Kimley-Horn and Associates, Inc., a North Carolina corporation ("CONSULTANT"); and

W I T N E S S E T H:

WHEREAS, CITY issued Request for Proposal #06-0002 for professional services consisting of on-call transportation impact study services; and

WHEREAS, CONSULTANT has prepared a response to the Request for Proposal dated February 16, 2021, which describes the scope of services to be performed by CONSULTANT, and the hourly rates for performance of such services; and

WHEREAS, CONSULTANT is qualified and experienced to provide professional services on an on-call basis.

NOW, THEREFORE, the parties agree as follows:

1. Term. The term of this Agreement shall commence upon execution and expire on June 30, 2022. The City Manager may, in his or her discretion, elect to extend the Agreement in one (1) year increments for up to an additional four (4) years by giving CONSULTANT thirty (30) days advance written notice of each optional one (1) year renewal. Such extensions shall be memorialized by a written amendment to this Agreement.

2. Services. CONSULTANT shall perform, at the direction of CITY, the scope of the on-call services as described in EXHIBIT "A," attached hereto and incorporated herein by this reference. Individual tasks will be awarded by CITY on an as-needed basis. CITY may assign work to one, or more than one consultant from an approved qualified list. CITY reserves the right to unilaterally assign work to any consultant as it deems prudent or, if no services are required, no work. CITY makes no specific guarantee of a minimum or maximum number of hours or amount of tasks or services, which shall be required of any single consultant. In addition, the inclusion of any consultant on any qualified list, if so utilized by CITY, shall in no way be considered an exclusive agreement to provide service for CITY.

3. Compensation. For its services provided hereunder, CONSULTANT shall be compensated on a time and expense basis in accordance with the hourly rates as described in EXHIBIT "B," attached hereto and incorporated herein by this reference. Any proposed increase in the effective rates for future services must be preceded by at least a 90-day written notice to the contracting department. Total compensation shall not exceed five hundred thousand dollars ($500,000). Total compensation for optional renewal years of this Agreement shall not exceed five hundred thousand dollars per year ($500,000). Adjustment to the total compensation per year shall require a written amendment to this Agreement, subject to approval by the City Council.

CONSULTANT shall submit one monthly invoice for its services. Such invoices shall be delineated by task, the person performing the services, and the hourly rate, which shall be stated in time increments of not greater than one tenth (1/10) hours. CITY shall pay invoices within thirty (30) days after receipt, if the services specified in the invoice have been satisfactorily completed.

4. Indemnification. To the fullest extent allowed by law, CONSULTANT shall defend, indemnify, and save and hold harmless CITY, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of CONSULTANT's willful misconduct or negligent act or omission while engaged in the performance of obligations or exercise of rights created by this Agreement, except those matters arising from CITY's sole negligence or willful misconduct. The parties intend that this provision shall be broadly construed.

CONSULTANT agrees to defend and indemnify CITY if, despite the parties intent and practice, any venue, agency, or court with competent jurisdiction determines that CONSULTANT and/or any of its agents, officers, employees, volunteers, independent contractors, or subcontractors, are characterized as employee(s) of CITY.

CONSULTANT's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

5. Insurance. CONSULTANT agrees to continuously maintain, in full force and effect, the following minimum policies of insurance during the term of this Agreement.

COVERAGE	LIMITS OF LIABILITY
Workers' Compensation	Statutory

Commercial General Liability	$1,000,000 each occurrence $2,000,000 aggregate Personal Injury: $1,000,000 each occurrence $2,000,000 aggregate
Automobile Liability	$1,000,000 combined single limit
Professional Liability (errors and omissions)	$1,000,000 per claim $2,000,000 aggregate

a. Form. CONSULTANT shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

b. Additional Insureds. CONSULTANT shall also provide a separate endorsement form or section of the policy showing CITY, its officers, agents, employees and volunteers as additional insureds for each type of coverage, except for Workers' Compensation and Professional Liability. Such insurance shall specifically cover the contractual liability of CONSULTANT. The additional insured coverage under the CONSULTANT's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from CITY's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office ("ISO") CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

c. Cancellation/Modification. CONSULTANT shall provide ten (10) days written notice to CITY prior to cancellation or modification of any insurance required by this Agreement.

d. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of CITY (if agreed to in a written contract) before CITY's own insurance shall be called upon to protect it as a named insured.

e. Subcontractors. CONSULTANT agrees to include in its contracts with all subcontractors the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, CONSULTANT shall require its subcontractors to agree to be bound to CONSULTANT and CITY in the same manner and to the same extent as CONSULTANT is bound to CITY under this Agreement. Additionally, CONSULTANT shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of CITY's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request.

f. Self-Insured Retentions. All self-insured retentions ("SIR") must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or CITY. CITY reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

g. Waiver of Subrogation. CONSULTANT hereby agrees to waive subrogation which any insurer of CONSULTANT may acquire from CONSULTANT by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of CITY, its officers, agents, employees and volunteers for all worked performed by CONSULTANT, its employees, agents and subcontractors.

h. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve CONSULTANT of liability in excess of such coverage, nor shall it preclude CITY from taking such other actions as are available to it under any other provisions of this Agreement or law.

6. Records. CONSULTANT and its subcontractors shall maintain all files and records relating to the services performed hereunder during the term of this Agreement and for a period of not less than one (1) year after the date of termination or expiration. Provided, however, that in the event of litigation or settlement of claims arising from the performance of this Agreement, CONSULTANT and its subcontractors shall maintain all files and records until such litigation, appeals or claims are resolved. Duly authorized representatives of CITY shall have right of access during normal business hours and after reasonable notice to CONSULTANT's and subcontractors' files and records relating to the services performed hereunder, and may review and copy the files and records at appropriate stages during performance of the services and during the one (1) year period following termination or expiration of this Agreement. CONSULTANT shall include this provisions in its contracts with all subcontractors.

7. Prevailing Wages. When applicable, for purposes of this Agreement, CONSULTANT and its subcontractors shall comply with all applicable prevailing wage laws, e.g., but not limited to, California Labor Code Sections 1770 et seq. In accordance with said Section 1775, CONSULTANT shall forfeit as a penalty to the City two hundred dollars ($200) for each calendar day or portion thereof for each worker paid less than the prevailing rates for such work or craft in which such worker is employed for any work done on-site under the Agreement by CONSULTANT or by any subcontractor in violation of the provisions of the Labor Code and in particular, Labor Code Sections 1770 to 1780, inclusive. In addition to said penalty and pursuant to said Section 1775, the difference between such stipulated prevailing wage rates and the amount paid to each worker for each calendar day or portion thereof for which each worker was paid less than the stipulated prevailing wage shall be paid to each worker by CONSULTANT or the applicable subcontractor.

Pursuant to the provisions of California Labor Code Section 1773, the contracting department has identified the source, stated below, of the general prevailing rate of wages applicable to the site to be done, for straight time, overtime, and holiday work. The holiday wage rate listed shall be applicable to all holidays recognized in the collective bargaining agreement of the particular craft, classification or type of worker concerned. These wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm.

Pursuant to Labor Code Section 1773.2, general prevailing wage rates set forth above, which forms a part of this Agreement, shall be posted by CONSULTANT at a prominent place at the work site. Prevailing wage rates to be posted at the work site will be furnished by the contracting department. The possibility of wage increases is one of the elements to be

considered by CONSULTANT in determining its proposal, and will not under any circumstances be considered as the basis of a claim against CITY or the Agreement.

8. Contractor Registration. No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this Agreement, CONSULTANT and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. CONSULTANT is hereby notified that this Agreement is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

9. Time is of the Essence. Time is of the essence of this Agreement. Notwithstanding any other provisions of this Agreement, the CONSULTANT shall not be deemed in breach because of minor reasonable delays caused by natural disasters, epidemics, pandemics, applicable quarantine restrictions, or acts of the City, third parties outside of CONSULTANT's control, or governmental agencies. CONSULTANT shall make best efforts to minimize and mitigate any such delay and shall provide notice to CITY within 24 hours of determining that a delay may occur.

10. Compliance with Laws. CONSULTANT shall comply with all federal, state and local laws, ordinances and policies as may be applicable to the performance of services under this Agreement.

11. Ability to Perform. CONSULTANT agrees and represents that it has the time, ability and professional expertise to perform the services required under this Agreement.

12. Governing Agreement. In the event of any conflict between this Agreement and its EXHIBITS, the provisions of this Agreement shall govern. In the event of any conflict between any of the EXHIBITS, the provisions of the first in order of attachment shall govern.

13. Assignment. CONSULTANT is employed to perform unique personal services. CONSULTANT shall not assign this Agreement without the prior written consent of CITY. CONSULTANT shall not employ or otherwise incur any obligation to pay other specialists or experts for services in connection with this Agreement, without prior written consent of CITY.

14. Independent Contractor. CONSULTANT, inclusive of its agents, officers, employees, volunteers, independent contractors, and subcontractors, shall act as an independent contractor, and covenants and agrees that it will conduct itself consistent with such status, that it will neither hold itself out as, nor claim to be, an officer or employee of CITY by reason of this Agreement.

CONSULTANT and CITY agree that: (a) CONSULTANT is free from the control and direction of CITY in connection with the performance of the work; (b) CONSULTANT is providing services directly to CITY; (c) CONSULTANT has and will maintain at all relevant times a business license; (d) CONSULTANT maintains a business location that is separate from CITY; (e) CONSULTANT is customarily engaged in an independently established business of the same nature as that involved in the work performed hereunder; (f) CONSULTANT actually contracts with other businesses to provide the same or similar services and maintains a clientele without restrictions from CITY; (g) CONSULTANT advertises and holds itself out to the public as available to provide the same or similar services; (h) CONSULTANT provides its own tools, vehicles, and equipment to perform the services; (i) CONSULTANT has negotiated its own rates; (j) CONSULTANT set its own hours and location of work in accomplishing CITY's on-call needs; and (k) CONSULTANT has the right to control the manner and means of accomplishing the result desired and exercises its own expert independent judgement.

15. Representations and Warranties. CONSULTANT warrants that it has not employed or retained any company or person, other than a bona fide employee working for CONSULTANT, to solicit or secure this Agreement, and that it has not paid or agreed to pay any company or person, other than a bona fide employee, any fee, commission, percentage, brokerage fee, gift or any other consideration, contingent upon or resulting from the award or making of this Agreement. For breach or violation of this warranty, CITY shall have the right to terminate as void this Agreement, without liability, or, in its discretion, to deduct from the Agreement price or consideration, or otherwise recover, the full amount of such fee, commission, percentage, brokerage fee, gift or contingent fee.

16. Successors in Interest. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.

17. Copyright, Ownership and Use of Materials. All tangible material ("Material") created or delivered pursuant to this Agreement is considered a work made for hire under the Copyright Act. To the extent such Material does not qualify as a work made for hire, CONSULTANT hereby assigns to CITY all right, title, and interest, including but not limited to all copyrights, in all Material created by CONSULTANT in its performance under this Agreement. Material constitutes the scope of work outlined in Exhibit A and attached hereto, and all written and other tangible expressions, including but not limited to, drawings (including computer aided drawings), papers, documents, reports, surveys, renderings, exhibits, sketches, maps, models, prints, paintings or photographs, in any and all media or formats in which such materials have been created or are maintained. All Material furnished by CONSULTANT is, and shall remain, the property of CITY.

CONSULTANT shall execute any documents necessary to effectuate such assignment. In the event that CONSULTANT uses, employs, designates, or retains any person or entity who is not an employee of CONSULTANT, to perform any work required of it pursuant to this Agreement, CONSULTANT shall require said person or entity to execute an agreement containing the preceding paragraph.

18. Termination of Agreement. CITY may terminate this Agreement without cause by giving CONSULTANT ten (10) days advance written notice from the City Manager. CONSULTANT may terminate this Agreement without cause by giving CITY thirty (30) days advance written notice. CONSULTANT understands that continuation of this Agreement past June 30th of any given year is contingent upon appropriation of funds for such purpose in the budget of the City of Roseville in the sole discretion of the City Council. In the event of termination through no fault of CONSULTANT, CITY shall compensate CONSULTANT for services performed as of the date of termination, upon the release to CITY of all Material hereunder, in any and all media or formats in which such materials have been created or are maintained. CITY retains the right to receive and use any MATERIAL, notwithstanding any termination or any dispute regarding the amount to be paid.

19. Attorney's Fees; Venue; Governing Law. If either party commences any legal action against the other party arising out of this Agreement or the performance hereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorney's fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

20. Modification. This Agreement and each provision contained herein may be waived, amended, supplemented or eliminated only by mutual written agreement of the parties.

21. Severability. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

22. Notices. Any notices to parties required by this Agreement shall be delivered personally or mailed, U.S. first class postage prepaid, addressed as follows:

CITY OF ROSEVILLE	CONSULTANT
Mike Isom City of Roseville 311 Vernon Street Roseville, CA 95678	Matt Weir Kimley-Horn and Associates, Inc. 555 Capitol Mall, Suite 300 Sacramento, CA 95814

Either party may amend its address for notice by giving notice to the other party in writing.

23. Integrated Agreement. This is an integrated agreement and contains all of the terms, considerations, understanding and promises of the parties. It shall be read as a whole.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ___ day of _____, 20__, and CONSULTANT has caused this Agreement to be executed.

EXHIBIT "A"

C: Qualifications of Team

Kimley-Horn knows that when you choose a consulting firm, you are really choosing the people who will bring you technical expertise, hands-on experience with similar projects, and commitment to timely and high-quality deliverables and client service. Our project team brings to this project local knowledge and extensive experience and has been structured to effectively provide strong support to the City of Roseville. Our team's leadership includes our project manager, **Matt Weir, P.E., T.E., PTOE, RSP$_1$**. We respect your requirement that our project manager role will not be changed without prior approval. Matt will serve as the City's main and day-to-day point of contact.

We have identified the most qualified personnel with recent, relevant, and local experience to be available to work with you. The organization chart below highlights our proposed team members' roles, with resumes in the following pages. The work for this on-call contract will be performed out of our Sacramento Office on Capitol Mall.

Matt Weir, P.E., T.E., PTOE, RSP$_1$

Program Manager

Matt is a civil/traffic engineer with more than 20 years of focused traffic engineering experience in traffic signal design, signal timing development and implementation, traffic impact studies, safety studies, parking and access studies, and ITS planning and design. Matt has a deep resume of traffic and ITS project experience throughout the Sacramento Region and Northern California.

Professional Credentials

- Master of Science, Civil Engineering (Transportation Systems), Georgia Institute of Technology
- Bachelor of Science, Civil Engineering, Clemson University
- Professional Civil Engineer in California #C70216
- Professional Traffic Engineer in California #TR2424
- Professional Traffic Operations Engineer (National) #2827
- Road Safety Professional 1 #571
- **Office Location:** Sacramento

RELEVANT EXPERIENCE

- **City of Roseville, On-Call Transportation Impact Studies, Roseville, CA** – Project Manager. Kimley-Horn was selected for this on-call roster to provide a variety of transportation planning and traffic operations services. In response to increasing development activity, the City of Roseville has been relying on their on-call transportation planning consultant roster to position themselves for the improving market. While mostly focused on development activity, these studies have included site access studies, multi-modal circulation and safety considerations, travel demand modeling and review, and general traffic impact and operations.
- **City of Roseville, Local Road Safety Plan (LRSP), Roseville, CA** – Principal-in-Charge. The City experiences a considerable multimodal mix of trips across its transportation network that serves a variety of needs and purposes, including high levels of bicycle and pedestrian activity. The City's top three primary collision factors include unsafe speed, automobile right-of-way, and traffic signal/sign violations. Our team is working with the City on the use of a data-driven analysis to further categorize collisions by intersection and roadway size and type, while working directly with local law enforcement to identify critical issues occurring on Roseville's roadways. Our scope of services includes the preparation of a public outreach plan as well as the completion of a focused countermeasure evaluation and project sheet development for five specific priority locations to assist with Highway Safety Improvement Program (HSIP) applications.
- **City of Roseville, Junction Boulevard at Vallejo Avenue Intersection Improvements, Roseville, CA** – QC/QA Reviewer. Kimley-Horn is supporting the City of Roseville with preparation of plans, specifications, and estimate (PS&E) for a new traffic signal at the intersection of Junction Boulevard and Vallejo Avenue. The intersection is being modified to convert an existing "T" intersection into a four leg intersection, with the new southern approach providing direct access to the Placer County Fairgrounds. The design includes traffic signals, signal interconnect, signing and striping, roadway, curb ramp modifications, utilities, and retaining walls. Kimley-Horn is coordinating closely with the Placer County Tourism (PVT) and its engineering design consultant who is leading the on-site design.
- **City of Roseville, Washington Boulevard at All America City Boulevard Roundabout Project, Roseville, CA** – Project Manager. Kimley-Horn was selected by the City of Roseville to prepare final design and construction documents for this important intersection improvement project. This intersection, located just north of downtown, serves as the gateway to the downtown core, and has critical interaction with Woodbridge Elementary, @ the Grounds, the Los Cerritos Neighborhood, and Washington Square. The Washington Boulevard corridor, Lincoln Street, and the adjacent Catalyst Site complete the diverse picture of challenges and opportunities. Kimley-Horn is preparing the design for a modern, multilane roundabout that is anticipated to reduce vehicle and pedestrian delay, and improve safety. This project includes additional Kimley-Horn services to assist with obtaining environmental clearance, developing streetscape concepts for application at this and the adjacent Oak Street roundabout, and inclusion of street lighting and ITS infrastructure for future use.
- **City of Roseville, ITS Master Plan Update, Roseville, CA** – Project Manager. Kimley-Horn has been assisting the City of Roseville for over 10 years as they implement their vision to be on the leading edge of the Sacramento region with its comprehensive and thorough traffic management system. The City's first ITS master plan was adopted in 2005. This plan strategically examined new traffic and ITS technologies, expanding City boundaries, and increasing population demand on its transportation system. After nearly a decade of successful ITS implementation, Kimley-Horn reviewed and updated the ITS Master Plan to confirm its current course, to assess emerging technologies, and to ensure an appropriate vision for expansion (both geographically and technologically). The plan will be implemented in phased deployments over five years.

- **City of Roseville, Roseville Parkway Extension, Roseville, CA** – Project Manager. Kimley-Horn is supporting the City of Roseville with the engineering design and traffic analysis services for the extension of Roseville Parkway between Foothills Boulevard and Washington Boulevard. The project includes a new bridge over the Union Pacific Railroad (UPRR) tracks and Industrial Avenue. Kimley-Horn is supporting the design team with preparation of plans, specifications, and engineer's estimate of probable construction costs (PS&E) for traffic signal modifications and lighting improvements at the Roseville Parkway intersections with Foothills Boulevard and Washington Boulevard, as well as the bridge lighting. We also performed a traffic operations and queuing analysis to inform intersection lane configurations and assess the effects of the extension of Roseville Parkway and the resulting operating conditions under Existing Base Year and Cumulative (Year 2035) conditions.
- **City of Sacramento, On-Call Traffic Impact Studies, Sacramento, CA** – Project Manager. Kimley-Horn is currently providing on-call traffic engineering services, including traffic impact studies, parking planning and policy, traffic scoping and design, and traffic signal timing and operations to the City of Sacramento for development related projects. As one of the first consultants to use SACOG's next generation activity-based travel demand model for the purposes of evaluating the traffic impacts associated with several development projects, we have developed a deep understanding of SACSIM. The development projects for which these traffic impact studies have been performed have ranged in size and complexity.
- **Various Traffic Impact Analyses (TIAs), Sacramento County, CA** – Project Manager. Kimley-Horn was one of the first consultants to use SACOG's next generation activity-based travel demand model, SACSIM, for the purposes of evaluating the traffic impacts associated with several development projects. These projects have enabled us to develop a deep understanding of SACSIM including experience with file sharing between multiple consultants who were working on adjacent projects. These projects have included Northborough, Barrett Ranch East, and Wilton Rancheria and each have required the preparation of an EIR into which our traffic analyses have been inserted. In addition, these projects have required frequent interaction with other technical study leads, such as Air Quality and Acoustic, to share technical data necessary to complete the various studies.
- **Citrus Heights, Local Roadway Safety Plan (LRSP), Citrus Heights, CA** – Principal-in-Charge. Kimley-Horn is currently assisting the City of Citrus Heights develop an LRSP to help the City identify and prioritize the most effective ways to improve traffic safety for all users, as part of a statewide goal to reduce traffic injuries and fatalities. The LRSP will address safety through roadway improvements, measures to modify driver behavior, and improved education, enforcement, and emergency response best practices. The LRSP will result in a set of data driven recommendations, coupled with input from key stakeholders representing the Safety Es included in the Strategic Highway Safety Plan (SHSP); engineering, enforcement, education, and emergency services. Detailed project sheets will be prepared for priority, high-crash locations to assist with the preparation of HSIP applications.
- **SACOG, Smart Region Sacramento: ITS Architecture and Future Technology Master and Implementation Plan, Sacramento Region, CA** – Project Manager. Kimley-Horn was selected by the Sacramento Area Council of Governments (SACOG) to develop a Regional Technology and Mobility Master Plan and individual agency Technology Implementation Plans. Greater Sacramento is comprised of diverse urban, suburban, and rural communities that routinely experience a wide range of demands and needs from their residents and users of the transportation system. Contributing to the region's challenges is the fact that some local agencies lack basic transportation communications and technology infrastructure while others are far more advanced and more appropriately positioned for evolving and disruptive technologies.
- **County of El Dorado, Traffic Impact Mitigation (TIM) Fee Update, El Dorado County, CA** – Principal-in-Charge. Kimley-Horn updated El Dorado County's TIM Fee program in conjunction with the newly adopted Capital Improvement Program (CIP). This update involved making changes to the Traffic Analysis Zones (TAZs) and TIM Fee Zone designations, running several different analysis scenarios and completing operations analysis for intersections and roadway segments throughout the County, and participating in public involvement with the Board of Supervisors meetings.
- **South of US 50 Analysis Forecast/VMT Tool, Folsom CA** – Project Manager. Kimley-Horn updated El Dorado County's TIM Fee program in conjunction with the newly adopted Capital Improvement Program (CIP). This update involved making changes to the Traffic Analysis Zones (TAZs) and TIM Fee Zone designations, running several different analysis scenarios and completing operations analysis for intersections and roadway segments throughout the County, and participating in public involvement with the Board of Supervisors meetings.

Robert Paderna, P.E., RSP$_1$

Multimodal Circulation/Access; Traffic Operations and Data Collection; Electrical/ITS

Professional Credentials

- Bachelor of Science, Civil Engineering, San Jose State University
- Professional Engineer in California #73262
- Road Safety Professional 1 #553
- **Office Location:** Sacramento

Robert has over 16 years of experience in transportation and traffic engineering. His experience includes safety studies, roadway safety signing audits, traffic control, engineering and traffic surveys, signal warrant analysis, pedestrian/bicycle facilities planning and design, signing and striping, traffic impact studies, signal timing, traffic signal design, street lighting, and ITS design. He is skilled in the application of California Manual on Uniform Traffic Control Devices (CA MUTCD) guidelines, ADA guidelines, Caltrans' HDM and Standard Plans, and industry best practices included in National Association of City Transportation Officials (NACTO) publications.

RELEVANT EXPERIENCE

- **City of Roseville, Junction Boulevard at Vallejo Avenue Intersection Improvements, Roseville, CA** – Project Manager. Kimley-Horn is supporting the City of Roseville with preparation of plans, specifications, and estimate (PS&E) for a new traffic signal at the intersection of Junction Boulevard and Vallejo Avenue. The intersection is being modified to convert an existing "T" intersection into a four-leg intersection, with the new southern approach providing direct access to the Placer County Fairgrounds. The design includes traffic signals, signal interconnect, signing and striping, roadway, curb ramp modifications, utilities, and retaining walls. Kimley-Horn is coordinating closely with the Placer County Tourism (PVT) and its engineering design consultant who is leading the on-site design.
- **City of Roseville, Roseville Parkway Extension, Roseville, CA** – Project Engineer. Kimley-Horn is supporting the City of Roseville with the engineering design and traffic analysis services for the extension of Roseville Parkway between Foothills Boulevard and Washington Boulevard. The project includes a new bridge over the Union Pacific Railroad (UPRR) tracks and Industrial Avenue. Kimley-Horn is supporting the design team with preparation of plans, specifications, and engineer's estimate of probable construction costs (PS&E) for traffic signal modifications and lighting improvements at the Roseville Parkway intersections with Foothills Boulevard and Washington Boulevard, as well as the bridge lighting. We also performed a traffic operations and queuing analysis to inform intersection lane configurations and assess the effects of the extension of Roseville Parkway and the resulting operating conditions under Existing Base Year and Cumulative (Year 2035) conditions.
- **City of Roseville, Local Road Safety Plan (LRSP), Roseville, CA** – Deputy Project Manager. The City experiences a considerable multimodal mix of trips across its transportation network that serves a variety of needs and purposes, including high levels of bicycle and pedestrian activity. The City's top three primary collision factors include unsafe speed, automobile right-of-way, and traffic signal/sign violations. Our team is working with the City on the use of a data-driven analysis to further categorize collisions by intersection and roadway size and type, while working directly with local law enforcement to identify critical issues occurring on Roseville's roadways. Our scope of services includes the preparation of a public outreach plan as well as the completion of a focused countermeasure evaluation and project sheet development for five specific priority locations to assist with Highway Safety Improvement Program (HSIP) applications.
- **City of Roseville, ITS Master Plan Update, Roseville, CA** – Project Engineer. Kimley-Horn has been assisting the City of Roseville for over 10 years as they implement their vision to be on the leading edge of the Sacramento region with its comprehensive and thorough traffic management system. The City's first ITS master plan was adopted in 2005. This plan strategically examined new traffic and ITS technologies, expanding City boundaries, and increasing population demand on its transportation system. After nearly a decade of successful ITS implementation, Kimley-Horn reviewed and updated the ITS Master Plan to confirm its current course, to assess emerging technologies, and to ensure an appropriate vision for expansion (both geographically and technologically). The plan will be implemented in phased deployments over five years.

Michael Schmitt, AICP CTP, PTP, RSP$_1$

Travel Demand Models and VMT

Professional Credentials

- Master of Science, Planning, University of Arizona
- Bachelor of Science, Regional Development, University of Arizona
- American Institute of Certified Planners Certified Transportation Planner (AICP CTP) #106984
- Professional Transportation Planner (PTP) #220
- Road Safety Professional 1 #185
- **Office Location:** Sacramento

Mike is one of only a handful of transportation professionals in the United States that is recognized by both the American Planning Association (APA) and Transportation Professional Certification Board (TPCB) as being an expert in transportation planning. With nearly two decades of experience, Mike has worked on a wide variety of multimodal transportation projects including those with a significant focus on transit planning and operations. Most recently, Mike has led the preparation of a detailed VISSIM analysis of BRT operations in a major downtown, prepared a "Best Practices" document on transit center design, and developed an organization wide public involvement plan for a major transit provider in the Bay Area. Mike's broader technical expertise includes public involvement, transportation modeling, multi-modal planning, land use planning, geographic information systems (GIS), traffic operations, technical writing, and research.

RELEVANT EXPERIENCE

- **County of El Dorado, Travel Demand Model Update, El Dorado County, CA** – Project Manager. Kimley-Horn is updating El Dorado County's Travel Demand Model base year to 2016 and the horizon year to 2040. This effort involves incorporating updated land use information for the buffer zone (the modelled area outside the County) and for the County itself. The resulting base year (2016) model will be validated using accepted standards and the underlying Geographical Information System (GIS) based parcel dataset will also be updated.
- **County of El Dorado, Travel Demand Update/Land Use Forecast/ Environmental Impact Report, El Dorado County, CA** – Project Manager. Kimley-Horn was responsible for completing this multifaceted transportation and land use planning project. Major activities being undertaken as part of this effort include the development of a new travel demand model that includes state-of the art methodologies, GIS integration, and GIS based data sets. Kimley-Horn was also responsible for developing a parcel-based land use forecast, providing transportation planning and policy expertise, public open houses and board of supervisor's presentations, and preparing the traffic chapter of the Environmental Impact Report being prepared to evaluate potential updates to the existing General Plan.
- **Sacramento International Airport (SMF), Master Infrastructure Plan SB 743 Analysis, Sacramento, CA** – Task Lead. Kimley-Horn completed a VMT assessment as a part of the airport's Master Infrastructure Plan update. The primary focus of the VMT assessment was to complete a CEQA level analysis of the expected passenger growth forecasted to occur over the next twenty years. The VMT assessment included tracking airport passengers throughout the six-County Sacramento Area Council of Governments (SACOG) region using SACOG's travel demand model, as well as determining the length passengers will travel to airports in the Bay Area due to unmet demand at SMF. Kimley-Horn determined the overall impact to VMT in the region due to passengers being recaptured by the airport due to future increases in flight supply, increased growth within the SACOG region, and increases to employment at the airport due to the increased supply of flights.
- **City of Folsom, South of US-50 Analysis Forecast/VMT Tool, Folsom, CA** – Project Manager. Kimley-Horn developed a transportation planning tool based on detailed land use forecasting and travel demand modeling to facilitate the orderly planning and financing of planned transportation infrastructure within the South of US-50 development area for the City of Folsom. The tool developed is a spreadsheet-based sketch planning tool that assists the City in determining the timing and need for specific planned transportation improvements within the South of US-50 development area.
- **County of Santa Cruz, Travel Demand Modeling and Vehicle Miles Traveled (VMT) Analysis for General Plan Update, Santa Cruz County, CA** – Project Planner. Kimley-Horn is working with the County of Santa Cruz to build on Kimley-Horn's previous effort of updating County's travel demand model to a base year of 2015 and future year of 2035. As a part of the County's General Plan Update, Kimley-Horn is working with the County to update the travel demand to a base year of 2019 and a future year of 2040. In addition, Kimley-Horn is completing a VMT analysis for the County and Cities of Capitola, Santa Cruz, Scotts Valley, and Watsonville as a part of the SB 743 threshold development process.

Chris Gregerson, P.E., T.E., PTOE, PTP

Micro-simulation; Travel Demand Models and VMT

Chris is a professional civil and traffic engineer with more than nine years of experience in developing traffic impact analyses for both new developments and the expansion of existing developments. He has aided in identifying levels of service and operations for both intersections and roadway and highway segments. Chris has experience in dealing with identifying unsafe roadway conditions due to vehicle speeds and volume as well as analyzing the minimum required throat depth (MRTD) for driveways at new developments. Chris has direct experience in running travel demand models in both the standard and activity-based approaches as well as calibrating mode choice models for metropolitan regions. Chris is skilled in GIS and has experience managing and interpreting data for special analysis and graphics creation.

Professional Credentials

- Master of Science, Transportation Engineering, University of Illinois at Urbana-Champaign
- Bachelor of Science, Industrial Engineering, Virginia Polytechnic Institute and State University
- Professional Engineer in California #C86812
- Professional Traffic Engineer in California #2860
- Professional Traffic Operations Engineer #4588
- Professional Transportation Planner #657
- **Office Location:** Sacramento

RELEVANT EXPERIENCE

- **City of Roseville, 850 Cirby Way Traffic Impact Analysis, Roseville, CA** – Project Manager. Kimley-Horn provided traffic impact analysis services for the proposed project, a modification of the Light of the Gospel Church's existing campus to include a new 900-1,000 seat, 20,000-square foot sanctuary building on the project site located in the southeast corner of the Cirby Way intersection with Orlando Avenue in the City of Roseville. Specifically, Kimley-Horn evaluated the proposed project's localized traffic operations and access points, including throat depths, tapers, storage, and driveway treatments that are necessary to ensure safe and efficient operations.
- **City of Sacramento, On-Call Traffic Impact Studies, Sacramento, CA** – Project Engineer. Kimley-Horn is currently providing on-call traffic engineering services, including traffic impact studies, parking planning and policy, traffic scoping and design, and traffic signal timing and operations to the City of Sacramento for development related projects. As one of the first consultants to use SACOG's next generation activity-based travel demand model for the purposes of evaluating the traffic impacts associated with several development projects, we have developed a deep understanding of SACSIM. The development projects for which these traffic impact studies have been performed have ranged in size and complexity.
- **County of El Dorado, Travel Demand Model Update, CA** – Project Engineer. Kimley-Horn is updating El Dorado County's Travel Demand Model base year to 2016 and the horizon year to 2040. This effort involves incorporating updated land use information for the buffer zone (the modelled area outside the County) and for the County itself. The resulting base year (2016) model will be validated using accepted standards and the underlying Geographical Information System (GIS) based parcel dataset will also be updated.
- **City of West Sacramento, NEPA/VMT Analysis, West Sacramento, CA** – Project Manager. Kimley-Horn completed a Vehicle Miles Traveled (VMT) evaluation for a proposed housing project in West Sacramento in support of the NEPA documentation being prepared by others. Specifically, Kimley-Horn completed an assessment of the VMT associated with the proposed project as it compares to the existing use, a twelve-unit apartment complex and a cigarette and tobacco store and documented the change in VMT based on the new homeless housing use.
- **City of West Sacramento, River Park TIA Peer Review, West Sacramento, CA** – Project Manager. Kimley-Horn completed a peer review of the River Park Development Transportation Impact Study. This review will primarily consist of a "fatal flaws" assessment, including a review of volumes (intersection and roadway segments), analysis methodologies (tools and calculations), threshold comparisons, mitigations, and VMT analysis.

Molly O'Brien, P.E., PTOE, RSP$_{2I}$

Safety

Molly has more than 17 years of safety, traffic, and transportation planning and design experience, which includes providing transportation safety consulting services to public agencies throughout the country. Her experience includes LRSPs, SSARs, RSAs, pedestrian/bicycle studies, and complete streets studies. Additionally, she has completed formal training on RSAs and the HSM IHSDM. She is experienced in conducting stakeholder workshops and prioritizing improvements to help maximize resources. Molly has also developed complete streets policies and concept plans that include bicycle and pedestrian facilities. She will use her experience and lessons learned on other systemic safety projects to provide solutions that enhance safety, while maximizing HSIP funding opportunities.

Professional Credentials

- Master of Science, Civil Engineering, Iowa State University, Ames
- Bachelor of Science, Civil Engineering, Iowa State University, Ames
- Professional Engineer in Nevada #17702
- Professional Traffic Operations Engineer #2534
- Road Safety Professional 1 #28
- Road Safety Professional 2I Infrastructure #8
- **Office Location:** Reno, NV

RELEVANT EXPERIENCE

- **City of Roseville, Local Roadway Safety Plan (LRSP), Roseville, CA** – Project Manager. Kimley-Horn is currently assisting the City of Roseville on their LRSP. The City experiences considerable multimodal mix of trips across its transportation network that serves a variety of needs and purposes, including high levels of bicycle and pedestrian activity. Our team is working with the City on the use of a data-driven analysis to further categorize collisions by intersection and roadway size and type, while working directly with local law enforcement to identify critical issues occurring on Roseville's roadways. Our scope of services includes the preparation of a public outreach plan, as well as the completion of a focused countermeasure evaluation and project sheet development for five specific priority locations to assist with HSIP applications.
- **City of Citrus Heights, Local Roadway Safety Plan (LRSP), Citrus Heights, CA** – Deputy Project Manager. Kimley-Horn is currently assisting the City of Citrus Heights develop an LRSP to help the City identify and prioritize the most effective ways to improve traffic safety for all users, as part of a statewide goal to reduce traffic injuries and fatalities. The LRSP will address safety through roadway improvements, measures to modify driver behavior, and improved education, enforcement, and emergency response best practices. The LRSP will result in a set of data driven recommendations, coupled with input from key stakeholders representing the Safety Es included in the SHSP; engineering, enforcement, education, and emergency services. Detailed project sheets will be prepared for priority, high-crash locations to assist with the preparation of HSIP applications.
- **City of Rocklin, Local Roadway Safety Plan (LRSP), Rocklin, CA** – Deputy Project Manager. Kimley-Horn is helping the City of Rocklin identify and prioritize the most effective ways to improve traffic safety for all users, as part of a statewide goal to reduce traffic injuries and fatalities. The City's LRSP will address safety through roadway improvements, measures to modify driver behavior, and improve education, enforcement, and emergency response best practices. The LRSP will result in a set of data driven recommendations, coupled with input from key stakeholders representing the Safety Es included in the Strategic Highway Safety Plan (SHSP): engineering, enforcement, education, and emergency services.
- **Caltrans, California Strategic Highway Safety Plan (SHSP) Update and Implementation, Statewide, CA** – Analyst. Kimley-Horn was selected by the Caltrans Division of Traffic Operations to lead California's 2020 to 2024 Strategic Highway Safety Plan (SHSP) Update and Implementation. The SHSP is a multi-agency collaborative effort between Caltrans and California Highway Patrol, Office of Traffic Safety, Department of Motor Vehicles, Emergency Medical Services Authority, Department of Public Health, Department of Alcoholic Beverage Control, Tribal/Native American Advisory Committee, Metropolitan Planning Organizations, State Association of Counties, League of Cities, and traffic safety advocates. The SHSP's mission is to ensure a safe and sustainable transportation system for all motorized and non-motorized users on all public roads in California and to work Toward Zero Deaths. Kimley-Horn's role is to assist with SHSP development, action plans, and compliance with federal requirements.

Sean Houck, P.E.

Roundabouts

Professional Credentials

- Master of Science, Civil Engineering, California State University, Long Beach
- Bachelor of Science, Civil Engineering, California State University, Long Beach
- Professional Engineer in California #C59500
- **Office Location:** Sacramento

Sean is a principal engineer with 24 years of success in the development and delivery of transportation projects for state and local agencies throughout California. His experience includes the preparation of feasibility studies, intersection control evaluations, project initiation documents, project assessment and environmental documents, construction documents, and construction administration and support. Project experience includes planning and design of urban highway interchanges, urban arterials and collectors, road diet and complete street projects, conventional highways, as well as rail and transit facilities. In addition to traditional civil roadway design, Sean has more than 13 years of experience in the planning and design of mini, single lane, and multilane roundabouts in Caltrans Districts 3, 4, 5, and 6.

RELEVANT EXPERIENCE

- **City of Roseville, Washington Boulevard at All America City Boulevard Roundabout Project, Roseville, CA** – Project Engineer. Kimley-Horn was selected by the City of Roseville to prepare final design and construction documents for this important intersection improvement project. This intersection, located just north of downtown, serves as the gateway to the downtown core, and has critical interaction with Woodbridge Elementary, @ the Grounds, the Los Cerritos Neighborhood, and Washington Square. The Washington Boulevard corridor, Lincoln Street, and the adjacent Catalyst Site complete the diverse picture of challenges and opportunities. Kimley-Horn is preparing the design for a modern, multi-lane roundabout that is anticipated to reduce vehicle and pedestrian delay, and improve safety. This project includes additional Kimley-Horn services to assist with obtaining environmental clearance, developing streetscape concepts for application at this and the adjacent Oak Street roundabout, and inclusion of street lighting and ITS infrastructure for future use.
- **City of Rocklin, Rocklin Road/Pacific Street Roundabout Design and Right-of-Way Services, Rocklin, CA** – Project Manager. Kimley-Horn was selected for the engineering design, right-of-way service, and environmental clearance for the Rocklin Road/Pacific Street Roundabout Project. For the environmental clearance, Kimley-Horn is preparing a Categorical Exclusion (CE) under NEPA with supporting technical studies. The project consists of improvements to the intersection of Rocklin Road and Pacific Street to remove traffic signals and replace them with a roundabout. These improvements will facilitate efficient vehicle traffic circulation through the intersection, as well as facility safer pedestrian crossings through the area. Technical studies managed by Kimley-Horn include an Historic Property Survey Report, Archaeological Survey Report, Natural Environment Study, and Phase I Initial Site Assessment.
- **City of Lincoln, Engineering Design Services on the East Joiner Parkway Widening Project, Lincoln, CA** – Project Manager. Kimley-Horn was selected by the City of Lincoln to perform engineering design and traffic analysis services for the widening of East Joiner Parkway between Twelve Bridges Drive and the Lincoln/Rocklin border, in which the total length will be 0.9 miles. The City's original project included widening the existing roadway from two lanes to four lanes, and installing two traffic signals. In working with the City and in anticipation of the new high school scheduled to open in 2021, we evaluated the long-term cost-effectiveness of implementing traffic signals or roundabouts at two intersection locations. Based on the future volumes and need to widen an existing culvert if a signal was installed at Fieldstone Drive, it was determined a roundabout would be a more appropriate choice for intersection control. The final project design will include widening, a new signal installation at Westview Drive, an emergency vehicle signal at the fire station, and a roundabout at Fieldstone Drive.

Daniel Carley, P.E.

Civil Improvements

Professional Credentials

- Bachelor of Science, Civil Engineering, California Polytechnic State University, San Luis Obispo
- Professional Engineer in California #76304
- **Office Location:** Sacramento

Daniel is a professional engineer with more than 17 years of experience, specializing in both municipal and State roadway design projects. He has been involved with and managed many different types of projects, from planning to preliminary engineering to final PS&E for roadway modifications, BRT systems, roundabouts, and freeway interchanges. With these different types of projects, Daniel has been responsible for developing design alternatives, estimates of probable cost, specifications, and final construction plans. Daniel is also up-to-date with the latest applicable design standards and guidelines, including ADA guidelines, Caltrans' HDM and Standard Plans, AASHTO design guidelines, and the California MUTCD.

RELEVANT EXPERIENCE

- **City of Roseville, Washington Boulevard at All America City Boulevard Roundabout Project, Roseville, CA** – Project Engineer. Kimley-Horn was selected by the City of Roseville to prepare final design and construction documents for this important intersection improvement project. This intersection, located just north of downtown, serves as the gateway to the downtown core, and has critical interaction with Woodbridge Elementary, @ the Grounds, the Los Cerritos Neighborhood, and Washington Square. The Washington Boulevard corridor, Lincoln Street, and the adjacent Catalyst Site complete the diverse picture of challenges and opportunities. Kimley-Horn is preparing the design for a modern, multilane roundabout that is anticipated to reduce vehicle and pedestrian delay and improve safety. This project includes additional Kimley-Horn services to assist with obtaining environmental clearance, developing streetscape concepts for application at this and the adjacent Oak Street roundabout, and inclusion of street lighting and ITS infrastructure for future use.
- **City of Roseville, Junction Boulevard at Vallejo Avenue Intersection Improvements, Roseville, CA** – Project Engineer. Kimley-Horn is supporting the City of Roseville with preparation of plans, specifications, and estimate (PS&E) for a new traffic signal at the intersection of Junction Boulevard and Vallejo Avenue. The intersection is being modified to convert an existing "T" intersection into a four-leg intersection, with the new southern approach providing direct access to the Placer County Fairgrounds. The design includes traffic signals, signal interconnect, signing and striping, roadway, curb ramp modifications, utilities, and retaining walls. Kimley-Horn is coordinating closely with the Placer County Tourism (PVT) and its engineering design consultant who is leading the on-site design.
- **City of Lincoln, Engineering Design Services on the East Joiner Parkway Widening Project, Lincoln, CA** – Project Engineer. Kimley-Horn was selected by the City of Lincoln to perform engineering design and traffic analysis services for the widening of East Joiner Parkway between Twelve Bridges Drive and the Lincoln/Rocklin border, in which the total length will be 0.9 miles. The City's original project included widening the existing roadway from two lanes to four lanes and installing two traffic signals. In working with the City and in anticipation of the new high school scheduled to open in 2021, we evaluated the long-term cost-effectiveness of implementing traffic signals or roundabouts at two intersection locations. Based on the future volumes and need to widen an existing culvert if a signal was installed at Fieldstone Drive, it was determined a roundabout would be a more appropriate choice for intersection control. The final project design will include widening, a new signal installation at Westview Drive, an emergency vehicle signal at the fire station, and a roundabout at Fieldstone Drive.
- **City of Santa Rosa, Bicycle and Pedestrian Gap Closures at Piner Road and Dutton Avenue, Santa Rosa, CA** – Project Manager. Kimley-Horn worked with the City of Santa Rosa on the Piner Road and Dutton Avenue Bicycle and Pedestrian Closure project. The City's existing bicycle and pedestrian facility network along Piner Road and Dutton Avenue had several critical gaps and deficiencies that the project sought to correct. Improvements included ADA curb ramp replacement at nine locations, new sidewalk for approximately 500 feet along Dutton Avenue, and pavement rehabilitation with designated bicycle lane striping along approximately three quarters of a mile of Piner Road. Kimley-Horn provided final PS&E and design services during construction, which was completed in summer 2020.

Curtis Yee, EIT

Traffic Operations and Data Collection

Professional Credentials

- Bachelor of Science, Civil Engineering, California Polytechnic State University, San Luis Obispo
- Engineer-in-Training (EIT) #163265
- **Office Location:** Sacramento

Curtis is a transportation analyst with experience in transportation design throughout Northern California. Curtis has worked on projects in which he supported tasks including data collection, temporary traffic control, and preparing PS&E for traffic signals, communications, and street lighting. He is proficient in AutoCAD, AGI, and Synchro. He is also adept in application of California Manual on Uniform traffic Control Devices (CAMUTCD) guidelines and Caltrans Standard Plans and Specifications.

RELEVANT EXPERIENCE

- **City of Roseville, Junction Boulevard at Vallejo Avenue Intersection Improvements, Roseville, CA** – Analyst. Kimley-Horn is supporting the City of Roseville with preparation of plans, specifications, and estimate (PS&E) for a new traffic signal at the intersection of Junction Boulevard and Vallejo Avenue. The intersection is being modified to convert an existing "T" intersection into a four-leg intersection, with the new southern approach providing direct access to the Placer County Fairgrounds. The design includes traffic signals, signal interconnect, signing and striping, roadway, curb ramp modifications, utilities, and retaining walls. Kimley-Horn is coordinating closely with the Placer County Tourism (PVT) and its engineering design consultant who is leading the on-site design.
- **City of Roseville, Washington Boulevard at All America City Boulevard Roundabout Project, Roseville, CA** – Analyst. Kimley-Horn was selected by the City of Roseville to prepare final design and construction documents for this important intersection improvement project. This intersection, located just north of downtown, serves as the gateway to the downtown core, and has critical interaction with Woodbridge Elementary, @ the Grounds, the Los Cerritos Neighborhood, and Washington Square. The Washington Boulevard corridor, Lincoln Street, and the adjacent Catalyst Site complete the diverse picture of challenges and opportunities. Kimley-Horn is preparing the design for a modern, multi-lane roundabout that is anticipated to reduce vehicle and pedestrian delay and improve safety. This project includes additional Kimley-Horn services to assist with obtaining environmental clearance, developing streetscape concepts for application at this and the adjacent Oak Street roundabout, and inclusion of street lighting and ITS infrastructure for future use.
- **City of West Sacramento, Harbor Blvd Corridor Signal Coordination, West Sacramento, CA** – Analyst. Kimley-Horn is currently working with the City of West Sacramento to develop and implement new weekday time-of-day coordination plans for three traffic signals along Harbor Boulevard. This corridor is a heavily used arterial providing a primary connection to the Southport area via Industrial Boulevard. This corridor experience high traffic volumes including a significant proportion of truck traffic. These near-term improvements will aid in improving access and circulation between US-50 and the Southport area. This effort follows the familiar task pattern in which three weekday timing plans are developed and implemented, and a final "after" study is completed to document the benefits of the retiming.
- **City of Citrus Heights, Greenback Lane Signal Retiming, Citrus Heights, CA** – Analyst. Kimley-Horn is providing traffic engineering services for the City of Citrus Heights to develop and implement new weekday and weekend time-of-day coordination plans for fourteen (14) traffic signals along Greenback Lane. These timings include three weekday plans, as well as the weekend peak periods (a total of 5 plans). The overall goals outlined by the City for the project include reducing delays and stops at signalized intersections, improving travel time and traffic flow, and improving the safety of motorists, pedestrians, and bicyclists. This project includes completion of a final "after" travel time study to field measure the improvements in system performance.

Olivia Potash, EIT

Microsimulation

Professional Credentials

- Bachelor of Science, Civil Engineering, University of California, Davis
- Engineer-in-Training (EIT) #162541
- **Office Location:** Sacramento

Olivia is a transportation analyst with experience in the public and private sectors. She has been involved in projects related to engineering and traffic surveys, roadway safety assessments, traffic impact studies, and integrated corridor management plans. She is well-versed in Synchro/Simtraffic, Vissim, HCS, and ArcGIS, and Adobe Illustrator.

RELEVANT EXPERIENCE

- **City of Roseville, Local Road Safety Plan (LRSP), Roseville, CA** – Analyst. The City experiences a considerable multimodal mix of trips across its transportation network that serves a variety of needs and purposes, including high levels of bicycle and pedestrian activity. The City's top three primary collision factors include unsafe speed, automobile right-of-way, and traffic signal/sign violations. Our team is working with the City on the use of a data-driven analysis to further categorize collisions by intersection and roadway size and type, while working directly with local law enforcement to identify critical issues occurring on Roseville's roadways. Our scope of services includes the preparation of a public outreach plan as well as the completion of a focused countermeasure evaluation and project sheet development for five specific priority locations to assist with Highway Safety Improvement Program (HSIP) applications.
- **Citrus Heights, Local Roadway Safety Plan (LRSP), Citrus Heights, CA** – Analyst. Kimley-Horn is currently assisting the City of Citrus Heights develop an LRSP to help the City identify and prioritize the most effective ways to improve traffic safety for all users, as part of a statewide goal to reduce traffic injuries and fatalities. The LRSP will address safety through roadway improvements, measures to modify driver behavior, and improved education, enforcement, and emergency response best practices. The LRSP will result in a set of data driven recommendations, coupled with input from key stakeholders representing the Safety Es included in the Strategic Highway Safety Plan (SHSP); engineering, enforcement, education, and emergency services. Detailed project sheets will be prepared for priority, high-crash locations to assist with the preparation of HSIP applications.
- **City of Folsom, Safety Assessment of East Natoma Street and Blue Ravine Road, Folsom, CA** – Analyst. Kimley-Horn is providing traffic engineering services to identify multi-modal safety improvements along the East Natoma Street and Blue Ravine Road corridors. As part of this project, our team has implemented robust, automated data collection methods including Mobile LiDar for sign inventory/ analysis and intersection sight distance (ISD) analysis; Rieker's Curve Advisory Reporting System (CARS) for automated ball bank analysis along horizontal curves; and field testing of High Friction Surface Treatment (HFST). This comprehensive and cost-effective approach to data collection, coupled with application of sound civil and traffic engineering principles, has enabled us to produce a comprehensive safety assessment of both roadway corridors. As part of the assessment, Kimley-Horn performed traffic signal control warrants, traffic operations analysis, comprehensive review of historical collision data, and conducted field observations in support of development of recommended multi-modal safety improvements. The results of the safety assessment with conceptual level exhibits illustrating recommended improvements will be documented in a Final Project Report.
- **Caltrans, California Strategic Highway Safety Plan (SHSP) Update and Implementation, Statewide, CA** – Analyst. Kimley-Horn was selected by the Caltrans Division of Traffic Operations to lead California's 2020 to 2024 Strategic Highway Safety Plan (SHSP) Update and Implementation. The SHSP is a multi-agency collaborative effort between Caltrans and California Highway Patrol, Office of Traffic Safety, Department of Motor Vehicles, Emergency Medical Services Authority, Department of Public Health, Department of Alcoholic Beverage Control, Tribal/Native American Advisory Committee, Metropolitan Planning Organizations, State Association of Counties, League of Cities, and traffic safety advocates. The SHSP's mission is to ensure a safe and sustainable transportation system for all motorized and non-motorized users on all public roads in California and to work Toward Zero Deaths. Kimley-Horn's role is to assist with SHSP development, action plans, and compliance with federal requirements.

D: Project Understanding

The public development process in California requires a deep understanding of regulatory requirements. The California Environmental Quality Act (CEQA) provides the overall analysis framework, defining the necessity and requirements for documentation, analysis, mitigation, and other considerations. In addition, local agencies, such as the City of Roseville, provide additional guidance and requirements specific to their local needs.

To this end, the City has published guidelines for the preparation of traffic impact studies (City of Roseville Design Standards, Section 4, January 2016) to "ensure consistency of analysis and adequacy of information to aid City staff and decision makers in the consideration of project approval with regard to impacts to the City's transportation system." It is important to note that Senate Bill 743 (SB 743) and the associated change in the metric used to identify significant transportation impacts (from delay/Level of Service to Vehicle Miles Traveled) is accommodated separately through the recently adopted Vehicle Miles Traveled (VMT) Impact Studies documentation. The Design Standards inform the nature of the typical studies required to maintain the safety of the City's transportation network and include several critical considerations for conducting traffic impact studies, including:

Short-term vs. Long-term Studies. Using a 50 PM peak-hour trip threshold and the project's consistency with the General Plan, studies are classified as short-term or long-term. Short-term studies focus primarily on existing and near-term conditions, while long-term studies consider future conditions using the City's CIP travel demand model.

LOS C Threshold. The City's LOS policy specifies the requirement to maintain LOS C at a minimum of 70 percent of all signalized intersections and roadway segments during the PM peak-hour.

Site Access Considerations. Driveway configurations, in particular throat depths, are an important site development feature that must satisfy specific requirements specified in the traffic study guidelines. When designed and constructed adequately, off-site traffic is much less likely to be adversely affected by onsite operations. This resultant environment improves safety and operations for the general project area for all users. It is important that site access considerations are vetted early in the project development as modifications to access could trickle down and affect site trip assignment and, subsequently, the evaluation of project trips at the surrounding transportation facilities.

Off-Site Signal Progression. Awareness of, and consideration for the complexity and operational features of the City's coordinated signal systems must be accounted for in the proposal and consideration of offsite mitigation measures. Introducing mid-block driveways and even adding new traffic signals must be considered and evaluated in the context of the broader ITS. Changes to the system's traffic volumes, in number, direction, and peak period characteristics, all have to be considered as they affect the current coordinated signal timing's ability to most efficiently handle traffic demand.

Other Considerations

We also understand the importance of being able to conduct as-needed travel demand modeling to support studies in Roseville. We understand that the City uses a variant of the SACMET model so given our demonstrated experience using SACMET we are well qualified to complete any needed services.

One of the more significant improvements to travel demand models has been the introduction of submodels that are sensitive to non-motorized travel opportunities, transit-oriented development, and mixed-use development (commonly considered Smart Growth Strategies). Simply put, the latest generation of travel demand models does a better job of recognizing and accounting for the vehicular trip reductions that result from these strategies. These model additions (often referred to as 4D or 5D models) can significantly change the results of model forecasts under certain circumstances. We have created these types of solutions for models throughout the United States including one most recently for the El Dorado County travel demand model. However given that a variant of the SACOG SACMET model which was used as the basis for the Roseville model, it is likely that these features may be underrepresented in the resulting analysis. As a result, our expertise with infill trip generation could be invaluable to ensuring that trip generation, analysis, and the resulting mitigations as provided for in traffic impact studies are appropriately determined.

The Project Manager for NCHRP Report 758, a comprehensive study on infill trip generation, are members of the local team identified for this on-call. The resulting methodology is expected to also be incorporated in the Third Edition of ITE's Trip Generation Handbook (again, one of our local team members is on the committee developing ITE's approach). The NCHRP 8-66 methodology advances and provides a more modern and accurate tool to account for the internalization of site trips. Depending on the site, the internalization of project's trips can reduce off-site roadway mitigation and has the potential to redistribute and alter the on-site transportation infrastructure.

Our understanding of travel demand models, model data, and the American Community Survey (ACS), as well as other data sets when coupled with Geographical Information Systems (GIS) can also result in a better product. Depending on the circumstances we often use GIS as a base source for developing trip distributions for development sites. Using overlay and banding functions we can determine the attractiveness, based on the number of probable origins or destinations within a fixed distance of a development site. With this information in hand, we can establish distributions that have a strong quantitative backing and better distributions lead to better traffic assignments and a better understanding of impacts and required mitigations. Likewise, we have also used select link and select zone modeling functions to better understand likely development site origins and destinations.

We are also familiar with the numerous other City documents that guide the development of projects. Including the General Plan, ITS Master Plan, Pedestrian Master Plan, Bicycle Master Plan, and Long Range and Short-Range Transit Plans which include their own respective requirements that must be considered as land develops in the City. It is the awareness of these documents and their effect on both onsite and offsite project features that is critical to the thorough evaluation of a project's impacts.

While projects developed within the City of Roseville may only be required to abide by the City's development requirements, traffic from some projects may be determined to potentially adversely affect facilities in adjacent jurisdictions. Because of this situation, traffic studies in Roseville must allow for the concerns of adjoining agencies and must adequately document the project's traffic effect in these jurisdictions according to their own individual traffic study guidelines. Accordingly, it is important for the City's traffic consultant to have a thorough understanding of the policies, guidelines, thresholds, and other requirements for each of the following agencies: Caltrans, City of Rocklin, City of Citrus Heights, Placer County, Sutter County, and Sacramento County.

Potential Challenges

Senate Bill 743 updated CEQA Guidelines on evaluating transportation impacts in CEQA. It is intended to promote active transportation and transit, as well as reduce Vehicle Miles Traveled (VMT) to comply with other regulations (such as reductions in greenhouse gas emissions). SB 743 eliminated Level of Service (LOS)/Delay as a CEQA impact and replaced it with the VMT metric for CEQA transportation analyses. The Kimley-Horn team is well versed with SB 743 and the determination and application of VMT.

Unique Approaches and Strengths

Our team has extensive experience in travel demand modeling throughout California, including locally with the SACSIM and SACMET models. We have been using a version of SACMET that this project team developed in nearby El Dorado County as the basis for establishing their CIP, evaluating General Plan updates, and as the basis for their Impact Fee program since 2010, so we are well versed in the technical aspects of applying SACMET. Additionally, SACSIM is a useful tool and we have prepared many project specific SACSIM models, including most recently developing the Capital SouthEast Connector JPA Model which covers an area that extends from El Dorado County to Elk Grove. SACSIM is best applied for significant regional considerations, not on on-going project evaluations where its intense labor requirements make it less flexible when compared to SACMET.

Impact Fees. In addition to nearby El Dorado County's impact fee program, we have prepared impact fee programs throughout the state. We regularly do this work and in fact the team on this project is currently preparing TVTC's and the City of Fremont's Impact Fee programs.

One of the newest areas of focus when it comes to Impact Fees is VMT mitigation We also are preparing one of the first VMT Banking Projects in the State for the City of Salinas. We think the insight from this project will be invaluable to planning for successful mitigation from SB 743 for this project.

SB 743. The team for this project has been selected to prepare the policy and thresholds for more than 25 jurisdictions (including 3 counties) in California and have completed countless VMT projects. Our team has presented more than 100 times on the subject throughout the State, were participants in both the ITE California SB 743 Task Force and Caltrans SB 743 Implementation Technical Roundtable, and most recently presented two VMT abstracts at the ITE Western District Annual Meeting. Not only do we know SB 743 backwards and forwards, and know how to address its complexities, we know how make it easier to handle

E: Project Plan

Detailed Typical Approach & Methodologies

Task 1: Project Administration

This task includes general project administration, including management of project staff, quality control, and project accounting.

Task 2: Data Collection

Kimley-Horn shall be entitled to rely on the completeness and accuracy of all information provided by the City. The City shall provide all information requested by Kimley-Horn during the project including, but not limited to the following:

- Proposed project information including existing/proposed uses
- Information pertaining to approved and/or pending transportation improvements in the project vicinity.
- Traffic signal timing information and traffic count data for the study area (counts to be obtained from the City's ITS).

Kimley-Horn will complete a site visit(s) to observe existing project site operations including intersection/driveway lane configurations, vehicle storage lengths, lane utilization, existing traffic control, speed limits, adjacent land uses, and other readily apparent features that are deemed applicable to the Scope of Services. We will complete an evaluation of sight distance for the site access driveway(s) based on observed horizontal and vertical geometric conditions. This evaluation will be performed in accordance with the guidelines presented in the Geometric Design of Highways and Streets published by the American Association of State Highway and Transportation Officials (AASHTO), and the Highway Design Manual, published by Caltrans.

Kimley-Horn will endeavor to obtain readily available intersection turning movement traffic count data from the City's internet Traffic Count Tool.

Task 3: Trip Generation and Distribution

The number of trips anticipated to be generated by the proposed project will be approximated using Trip Generation Manual, 10th Edition, published by the Institute of Transportation Engineers (ITE). As deemed appropriate by Kimley-Horn and allowable by the City, adjustments will be made to the proposed project's trip generation to account for alternate mode trips, and the interaction between project and adjacent land uses. Project traffic will be distributed to the roadway network based on existing traffic volumes, output from the City's travel demand model, or professional judgment.

In an effort to streamline the project, Kimley-Horn will summarize our proposed trip generation and distribution assumptions in a brief memorandum to be submitted electronically (in PDF format) to the City.

Task 4: SB 743 Assessment

Kimley-Horn will perform a qualitative evaluation of the Proposed Project's Vehicle Miles Traveled (VMT) characteristics in a manner consistent with the December 2018 guidance provided by the Governor's Office of Planning and Research (OPR)[1]. OPR's guidance provides several screening criteria for projects in which a quantitative VMT analysis is deemed unnecessary, including retail projects that are less than 50,000 square-feet, such as the Proposed Project. Kimley-Horn will coordinate with the City to determine whether the project can be considered local-serving, and therefore not require a quantitative VMT analysis. For the purposes of this Scope of Services, we anticipate providing supporting documentation of the project's compliance with SB-743 and the City's VMT Impact Standards using a strictly qualitative approach.

Should a quantitative VMT analysis ultimately be required, Kimley-Horn will conduct an analysis consistent with the methodology included in the Final VMT Impact Standards recently approved by the City Council. These services are specified in optional Task 8 below.

Task 5: Technical Analyses

Offsite Operations

Because the proposed project is anticipated to have a net increase in project site traffic, the effect of this additional traffic will be evaluated to ensure the surrounding transportation facilities operate at acceptable levels. Consistent with the City's guidelines, a "Short-Term" traffic study will be performed to identify the project's effect on the external roadway network under existing conditions and to evaluate site access and operations. A short-term traffic analysis will be conducted for the following scenarios:

- Existing (2021) Conditions
- Existing (2021) plus Proposed Project Conditions

[1] *Technical Advisory on Evaluating Transportation Impacts in CEQA. Governor's Office of Planning and Research, State of California, December 2018.*

This analysis will be performed for up to five intersections.

Delay, queuing, and Levels of Service will be determined using methods defined in the Highway Capacity Manual, using the Synchro® traffic analysis software. The interaction of project trips with other turning movements will also be considered and recommendations will be developed to maximize safety for all users of the roadway.

Onsite Operations

Kimley-Horn will review the proposed project's anticipated onsite operations. The primary focus of this evaluation will be the access, circulation, and queuing in the vicinity of the site driveways. Because the proposed project is proposing to alter site access and circulation, this evaluation will also consider the effect of the proposed onsite changes on offsite traffic operations in the vicinity of the site.

Task 6: Draft Report

Analyses completed in Tasks 1-5 will be documented in technical memorandum format. Kimley-Horn will prepare and submit an electronic (PDF) Draft Report to the City for review. We will participate in a face-to-face meeting with the City to receive and review comments on the Draft Report.

Quality Control: Kimley-Horn will provide an independent, internal quality control review of the Draft Report.

Task 7: Final Report

Kimley-Horn will address one set of consolidated, non-conflicting City comments on the Draft Report. If the comments require additional analysis or data collection beyond that provided for in this Scope of Services, this work will be considered as an additional service. Any additional comment responses, regardless of origin, will also be considered as an additional service. Kimley-Horn will prepare and submit an electronic (PDF) Final Report to the City.

Task 8: Quantitative VMT Analysis (Optional)

If requested and authorized, and as per the findings of Task 4 above, Kimley-Horn will prepare a quantitative VMT analysis consistent with the methodology included in the Vehicle Miles Traveled (VMT) Impact Studies guidelines recently approved by the City Council. This effort is anticipated to include a comparison of the net change in VMT between existing conditions and the addition of the proposed project. This effort will be completed using the City's Travel Demand Model (TDM) by comparing the region's VMT without the project to the region's VMT with the addition of the project. The addition of the project will be determined to result in a significant impact if the region's VMT increases by more than 1,000 daily VMT compared to existing conditions.

Typical Schedule

We will provide our services as expeditiously as practicable to meet the mutually agreed upon schedule. We anticipate delivery of the Draft Report within three (3) weeks of receipt of a Notice-to-Proceed and all required information.

Workload and Availability

The members of our project team have firsthand experience in responding effectively and efficiently to the needs and requirements of clients under many different types of projects. We constantly prepare plans and estimates from concepts all the way through construction. We not only have the detailed technical expertise that is required to complete your designs, we proactively plan and set aside adequate time and staff availability provide the City with a high level of responsiveness. Our proposed team all have detailed and intimate design experience working on projects of different sizes and complexity for agencies across California.

Our workload planning is a two-step process called Milestones and Cast-aheads, which look at short-term and long-term workload, respectively. Every week, each Kimley-Horn office meets to discuss workload for the following week and determine deliverables, staffing needs, and adjust staff hours accordingly. After each office meets, representatives from each office attend a conference call to determine if staff reallocation ("shift") are needed to meet deadlines. Since we have three major offices in the Bay Area, we can easily shift staff between offices and assign the most qualified staff to a particular project. If needed, we also have the ability to shift staff from throughout California and across the country if needed to work on larger or more complex projects.

Kimley-Horn's long-term workload planning is called cast-aheads. Our cast-ahead forecast summarizes every work plan for all Kimley-Horn projects and provides an accurate projection of staffing needs and overloads with detailed information for the upcoming month and summary information for the next six months. Kimley-Horn's production managers use this tool to facilitate the shifting and balancing of work across our entire firm. The cast-ahead process provides the following benefits:

- Enables us to better serve our clients and meet their deadlines
- Assigns specialists to tackle more complex project issues
- Facilitates teamwork through a one-profit center approach
- Keeps our people productive and our firm stable

Schedule and Cost Control Procedures

Kimley-Horn is well suited to manage and administer your projects. We are prepared to commit the necessary resources to ensure the success of your efforts. Moreover, we also have the tools that tell us exactly how and when to implement these resources. While this can be perceived as an internal issue to Kimley-Horn, the tools we use to manage and administer a project are really for the client's benefit because a firm basis is established for on-time, within-budget delivery of all services. Schedule and budget are extremely important to Kimley-Horn, and our resources will allow us to meet the goals established for your project. To assist our project managers in efficient administration of projects, Kimley-Horn maintains a detailed, integrated management information system (MIS). This system, designed primarily to focus on schedule adherence and cost control, has proved to be a valuable tool internally to Kimley-Horn and externally to our clients.

Schedule control begins with the preparation of a detailed schedule that includes milestone completion dates for specific tasks and the overall project. We will develop for your project, as we do for every project we undertake, a work plan that allocates item and person-hour commitments by individual for each task. Bi-monthly, the MIS generates a Project Effort Report showing actual effort expended by task. This internal control allows us to make, on a timely basis, any adjustments that may be necessary to maintain your schedule and stay within your budget.

Cost control is achieved through two independent processing systems within our MIS program that we integrate to provide a complete financial and report overview of each individual task, as well as the entire project. Project managers and task managers receive status reports twice each month as to the costs associated with the project. This level of tracking allows us to control project budgets and to keep our clients fully informed of the administrative aspects of each project.

EXHIBIT "B"

F: Cost Proposal

Rate Schedule

Effective September 1, 2020 to June 30, 2021

Classification	Labor Rate* (per hour)
Support Staff	$85 - $120
Technical Support	$100 - $135
Senior Technical Support	$135 - $205
Analyst	$130 - $180
Professional	$185 - $225
Senior Professional I	$225 - $315
Senior Professional II	$295 - $350

**Billing Rates are reviewed yearly and are adjusted as necessary on July 1st.*

Other Direct Costs: Outside Printing/Reproduction, Delivery Services/USPS, Misc. Field Equipment/Supplies, and Travel Expenses will be billed at cost plus 10 percent. Mileage will be billed at the Federal Rate.

Subconsultants: Billed at cost plus 10 percent.

Office Expenses: 5 percent will be applied to labor fees to cover direct expenses, such as in-house duplicating and blueprinting, local mileage, telephone/mobile calls, electronic messaging, postage, and word processing.

ADDITIONAL INSURED - OWNERS, LESSEES OR CONTRACTORS - SCHEDULED PERSON OR ORGANIZATION

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART

SCHEDULE

Name Of Additional Insured Person(s) Or Organization(s)	Location(s) Of Covered Operations
ANY PERSON OR ORGANIZATION WHOM YOU BECOME OBLIGATED TO INCLUDE AS AN ADDITIONAL INSURED AS A RESULT OF ANY CONTRACT OR AGREEMENT YOU HAVE ENTERED INTO.	PER THE CONTRACT OR AGREEMENT.
Information required to complete this Schedule, if not shown above, will be shown in the Declarations.	

A. Section II 6 Who Is An Insured is amended to include as an additional insured the person(s) or organization(s) shown in the Schedule, but only with respect to liability for "bodily injury", "property damage" or "personal and advertising injury" caused, in whole or in part, by:

1. Your acts or omissions; or
2. The acts or omissions of those acting on your behalf;

in the performance of your ongoing operations for the additional insured(s) at the location(s) designated above.

However:

1. The insurance afforded to such additional insured only applies to the extent permitted by law; and
2. If coverage provided to the additional insured is required by a contract or agreement, the insurance afforded to such additional insured will not be broader than that which you are required by the contract or agreement to provide for such additional insured.

B. With respect to the insurance afforded to these additional insureds, the following additional exclusions apply:

This insurance does not apply to "bodily injury" or "property damage" occurring after:

1. All work, including materials, parts or equipment furnished in connection with such work, on the project (other than service, maintenance or repairs) to be performed by or on behalf of the additional insured(s) at the location of the covered operations has been completed; or
2. That portion of "your work" out of which the injury or damage arises has been put to its intended use by any person or organization other than another contractor or subcontractor engaged in performing operations for a principal as a part of the same project.

© Insurance Services Office, Inc., 2018

C. With respect to the insurance afforded to these additional insureds, the following is added to **Section III – Limits Of Insurance:**

If coverage provided to the additional insured is required by a contract or agreement, the most we will pay on behalf of the additional insured is the amount of insurance:

1. Required by the contract or agreement; or
2. Available under the applicable limits of insurance;

whichever is less.

This endorsement shall not increase the applicable limits of insurance.

© Insurance Services Office, Inc., 2018

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

ADDITIONAL INSURED - OWNERS, LESSEES OR CONTRACTORS - COMPLETED OPERATIONS

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART
PRODUCTS/COMPLETED OPERATIONS LIABILITY COVERAGE PART

SCHEDULE

Name Of Additional Insured Person(s) Or Organization(s)	Location And Description Of Completed Operations
ANY PERSON OR ORGANIZATION WHOM YOU BECOME OBLIGATED TO INCLUDE AS AN ADDITIONAL INSURED AS A RESULT OF ANY CONTRACT OR AGREEMENT YOU HAVE ENTERED INTO.	PER THE CONTRACT OR AGREEMENT.
Information required to complete this Schedule, if not shown above, will be shown in the Declarations.	

A. **Section II – Who Is An Insured** is amended to include as an additional insured the person(s) or organization(s) shown in the Schedule, but only with respect to liability for "bodily injury" or "property damage" caused, in whole or in part, by "your work" at the location designated and described in the Schedule of this endorsement performed for that additional insured and included in the "products-completed operations hazard".

However:

1. The insurance afforded to such additional insured only applies to the extent permitted by law; and
2. If coverage provided to the additional insured is required by a contract or agreement, the insurance afforded to such additional insured will not be broader than that which you are required by the contract or agreement to provide for such additional insured.

B. With respect to the insurance afforded to these additional insureds, the following is added to **Section III – Limits Of Insurance:**

If coverage provided to the additional insured is required by a contract or agreement, the most we will pay on behalf of the additional insured is the amount of insurance:

1. Required by the contract or agreement; or
2. Available under the applicable limits of insurance;

whichever is less.

This endorsement shall not increase the applicable limits of insurance.

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

PRIMARY AND NONCONTRIBUTORY - OTHER INSURANCE CONDITION

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART
LIQUOR LIABILITY COVERAGE PART
PRODUCTS/COMPLETED OPERATIONS LIABILITY COVERAGE PART

The following is added to the **Other Insurance** Condition and supersedes any provision to the contrary:

Primary And Noncontributory Insurance

This insurance is primary to and will not seek contribution from any other insurance available to an additional insured under your policy provided that:

(1) The additional insured is a Named Insured under such other insurance; and

(2) You have agreed in writing in a contract or agreement that this insurance would be primary and would not seek contribution from any other insurance available to the additional insured.

© Insurance Services Office, Inc., 2018

WAIVER OF TRANSFER OF RIGHTS OF RECOVERY AGAINST OTHERS TO US (WAIVER OF SUBROGATION)

This endorsement modifies insurance provided under the following:

COMMERCIAL GENERAL LIABILITY COVERAGE PART
ELECTRONIC DATA LIABILITY COVERAGE PART
LIQUOR LIABILITY COVERAGE PART
POLLUTION LIABILITY COVERAGE PART DESIGNATED SITES
POLLUTION LIABILITY LIMITED COVERAGE PART DESIGNATED SITES
PRODUCTS/COMPLETED OPERATIONS LIABILITY COVERAGE PART
RAILROAD PROTECTIVE LIABILITY COVERAGE PART
UNDERGROUND STORAGE TANK POLICY DESIGNATED TANKS

SCHEDULE

Name Of Person(s) Or Organization(s):
PURSUANT TO APPLICABLE WRITTEN CONTRACT OR AGREEMENT YOU ENTER INTO.
Information required to complete this Schedule, if not shown above, will be shown in the Declarations.

The following is added to Paragraph **8. Transfer Of Rights Of Recovery Against Others To Us** of **Section IV – Conditions:**

We waive any right of recovery against the person(s) or organization(s) shown in the Schedule above because of payments we make under this Coverage Part. Such waiver by us applies only to the extent that the insured has waived its right of recovery against such person(s) or organization(s) prior to loss. This endorsement applies only to the person(s) or organization(s) shown in the Schedule above.

© Insurance Services Office, Inc., 2018

BLANKET WAIVER OF OUR RIGHT TO RECOVER FROM OTHERS ENDORSEMENT

This endorsement changes the policy to which it is attached effective on the inception date of the policy unless a different date is indicated below.

(The following "attaching clause" need be completed only when this endorsement is issued subsequent to preparation of the policy).

This endorsement, effective 12:01 AM **04/01/2021** forms a part of Policy No. **WC** 015-89-3686

Issued to **KIMLEY-HORN AND ASSOCIATES, INC.**

By **NATIONAL UNION FIRE INSURANCE COMPANY OF PITTSBURGH, PA.**

We have a right to recover our payments from anyone liable for an injury covered by this policy. We will not enforce our right against any person or organization with whom you have a written contract that requires you to obtain this agreement from us, as regards any work you perform for such person or organization.

The additional premium for this endorsement shall be **2.00** % of the total estimated workers compensation premium for this policy.

COUNCIL COMMUNICATION

CC #: 1514
File #: 0400-04-13-1

Title:	Creekview - Phase 1 Village 10, 11 & 15 - Notice of Completion
Contact:	Ignacio Vizcarra 916-774-5578 ivizcarra@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.19.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt the attached resolution accepting Creekview Phase 1-Village 10, 11 & 15, CWJ# 190186, as complete and authorizing the City Engineer to execute the Notice of Completion, therefore, and accepting all dedications offered on the recorded map of the subdivision.

BACKGROUND

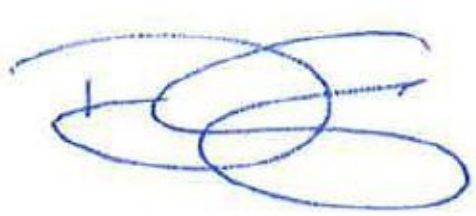
The Engineering Division has made a final inspection of the above project and has found the roadway infrastructure work complete in accordance with the improvement plans and City specifications.

FISCAL IMPACT

The actions requested as part of this action have no impact to the City's General Fund. Construction costs were paid by the developer.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of a Notice of Completion meets the above criteria and is not subject to CEQA. No additional environmental review is required.



CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal F - Invest in well-planned infrastructure and growth

Respectfully Submitted,

Ignacio Vizcarra, Construction Inspector

Mike Isom, Development Services Director

MY COMMISSION EXPIRES: May 31, 2023 MY COMMISSION NUMBER: 2290674

BASIS OF BEARING

THE BASIS OF BEARING FOR THIS MAP IS N 89°30'20" W, BEING THE SOUTH LINE OF SECTION 14 AS SHOWN ON THAT CERTAIN FINAL MAP ENTITLED "CREEKVIEW PHASE 1, LARGE LOT SUBDIVISION SUBDIVISION NO. PL18-0190", RECORDED ON JUNE 1, 2020 IN BOOK EE OF MAPS, AT PAGE 97, PLACER COUNTY RECORDS.

NOTES

1. TOTAL AREA OF THIS SUBDIVISION IS 17.121± ACRES +/-, GROSS, CONSISTING OF 90 RESIDENTIAL LOTS AND 4 LANDSCAPE LOTS.
2. ALL CURVES ARE DIMENSIONED WITH RADIUS, DELTA, ARC LENGTH, CHORD BEARING AND CHORD LENGTH. DISTANCES SHOWN HEREON ARE IN FEET AND DECIMALS THEREOF AND ARE "GROUND" DISTANCES. DUE TO ROUNDING, THE SUM OF INDIVIDUAL DIMENSIONS MAY NOT EQUAL THE OVERALL DIMENSION.
3. A PRELIMINARY SOILS REPORT WAS PREPARED BY GEOCON CONSULTANTS, INC. DATED AUGUST, 2014; PROJECT NO. S9578-05-05 AND ON FILE WITH THE CITY OF ROSEVILLE DEVELOPMENT SERVICES - ENGINEERING DEPARTMENT, FILE No. 308-885.
4. ALL FRONT CORNERS ARE MARKED BY A 1" BRASS MARKER STAMPED "LS 9265" IN THE SIDEWALK ON THE EXTENSION OF SIDE LOT LINES 1.00' FROM THE FRONT PROPERTY LINE UNLESS OTHERWISE NOTED.
5. ALL REAR CORNERS AND ANGLE POINTS WILL BE SET WITH A 5/8" REBAR AND PLASTIC CAP STAMPED "LS 9265". WHERE REAR CORNER FALLS WITHIN A MASONRY RETAINING WALL, MASONRY SOUND WALL OR CONCRETE FOOTING, A 5/8" REBAR WITH PLASTIC CAP STAMPED "LS 9265" WILL BE SET ON THE SIDE LOT LINE 4.00 FOOT OFFSET TO THE REAR CORNER OR A BRASS TAG STAMPED "LS 9265" WILL BE SET WITH EPOXY TO THE FACE WALL 2.00 FOOT ABOVE GROUND OR ON TOP OF WALL WHERE AN OFFSET MONUMENT CANNOT BE SET.
6. PURSUANT TO GOVERNMENT CODE SECTION 66434(G), THE FOLLOWING PUBLIC EASEMENT IS HEREBY ABANDONED:

   A. THE PORTIONS OF THE FORTY (40) FOOT WIDE IRREVOCABLE OFFERS OF DEDICATION/RIGHT OF WAY (I.O.D./RO.W.) AS SHOWN ON THAT CERTAIN FINAL MAP ENTITLED "CREEKVIEW PHASE 1 LARGE LOT MAP" RECORDED IN BOOK EE OF MAPS, AT PAGE 97, PLACER COUNTY RECORDS, LYING WITHIN THE BOUNDARY OF THIS FINAL MAP NOT SHOWN HEREON.

COUNCIL COMMUNICATION

CC #: 1515
File #: 0400-04-13-1

Title:	Creekview Phase 1 Village 13 & 14 - Notice of Completion
Contact:	Ignacio Vizcarra 916-774-5578 ivizcarra@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.20.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt the attached resolution accepting Creekview Phase 1 Village 13 & 14 (Imp. Plan), CWJ# 190188, as complete and authorizing the City Engineer to execute the Notice of Completion.

BACKGROUND

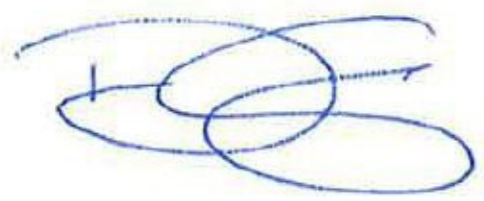
The Engineering Division has made a final inspection of the above project and has found the roadway infrastructure work complete in accordance with the improvement plans and City specifications.

FISCAL IMPACT

The actions requested as part of this action have no impact to the City's General Fund. Construction costs were paid by the developer.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of a Notice of Completion meets the above criteria and is not subject to CEQA. No additional environmental review is required.



CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal F - Invest in well-planned infrastructure and growth

Respectfully Submitted,

Ignacio Vizcarra, Construction Inspector

Mike Isom, Development Services Director

_____

Dominick Casey, City Manager

NOTES:

1. ALL CURVES ARE DIMENSIONED WITH RADIUS, DELTA, ARC LENGTH, CHORD BEARING AND CHORD LENGTH. ALL DISTANCES SHOWN ARE FEET AND DECIMALS THEREOF AND ARE "GROUND" DISTANCES. DUE TO ROUNDING, THE SUM OF INDIVIDUAL DIMENSIONS MAY NOT EQUAL THE OVERALL DIMENSION.
2. TOTAL AREA FOR THIS SUBDIVISION IS 10.912± ACRES, CONSISTING OF 70 RESIDENTIAL LOTS AND 1 LANDSCAPE LOT.
3. PURSUANT TO GOVERNMENT CODE SECTION 66434(G), THE FOLLOWING PUBLIC EASEMENT IS HEREBY ABANDONED:

   a. THE PORTIONS OF FORTY (40) FOOT WIDE IRREVOCABLE OFFERS OF DEDICATION/RIGHT OF WAY (I.O.D./RO.W.) AS SHOWN ON THAT CERTAIN FINAL MAP ENTITLED "CREEKVIEW PHASE 1 LARGE LOT MAP" RECORDED IN BOOK EE OF MAPS, AT PAGE 97, PLACER COUNTY RECORDS, LYING WITHIN THE BOUNDARY OF THIS FINAL MAP NOT SHOWN HEREON.
4. ALL FRONT LOT CORNERS WILL BE SET WITH A 1" DIAMETER BRASS DISC STAMPED "LS 9265" IN THE SIDEWALK ON THE EXTENSION OF SIDE LOT LINES 1.00 FOOT FROM THE FRONT PROPERTY LINE UNLESS OTHERWISE NOTED.
5. ALL REAR LOT CORNERS AND ANGLE POINTS WILL BE SET WITH A 5/8" REBAR WITH PLASTIC CAP STAMPED "LS 9265". WHERE MONUMENTS FALL WITHIN A SOUND WALL OR CONCRETE FOOTING A 5/8" REBAR, WITH PLASTIC CAP STAMPED "LS 9265" WILL BE SET ON THE SIDE LOT LINE ON A 4.00 FOOT OFFSET TO THE REAR LOT CORNER.
6. A PRELIMINARY SOILS REPORT WAS PREPARED BY GEOCON CONSULTING, INC., DATED AUGUST 2014; PROJECT NUMBER S9578-05-05 AND ON FILE WITH THE CITY OF ROSEVILLE DEVELOPMENT SERVICES - ENGINEERING DEPARTMENT, FILE NO. 308-885.

COUNCIL COMMUNICATION

CC #: 1518
File #: 0400-04-12-1

Title:	Sierra Vista - Village JM-21 - Final Map and Subdivision Agreement
Contact:	Jeff Hendrix 916-774-5463 jhendrix@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.21.

RECOMMENDATION TO COUNCIL

It is recommended that the City Council take the following actions:

1. Approve the final map on file with the City Clerk and accept on behalf of the public, the public utility and the emergency access easements offered thereon, and accept, subject to improvement, the public rights of way and Lot F, offered thereon, and approve the abandonment of the easement listed thereon.

2. Adopt the attached resolution approving the Subdivision Agreement and authorize the City Manager to execute the agreement on behalf of the City.

BACKGROUND

The Development Services Engineering section has reviewed the subject final map and found that it is in compliance with the Subdivision Map Act and the City's Subdivision Ordinance and all conditions of the tentative map have been met.

This map will create 80 residential lots, 1 public landscape lot, 4 private common area lots and 1 private roads lot.

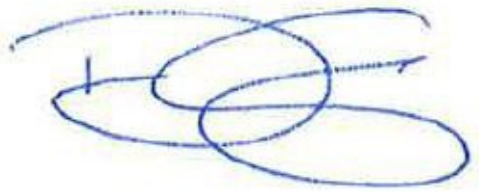
FISCAL IMPACT

There is no fiscal impact to the City's General Fund associated with this approval.

ENVIRONMENTAL REVIEW

Approval of the Sierra Vista Village JM-21 final map is an action that is subject to California Environmental Quality Act (CEQA). Project level CEQA compliance for the Sierra Vista Village JM-21 final map final map was accomplished with preparation of the Sierra Vista Specific Plan

EIR (Adopted: May 5, 2010) (SCH#2008032017) and the Mitigated Negative Declaration (MND) and associated Mitigation Monitoring Program approved by the City of Roseville on June 6, 2012. Because the Sierra Vista Village JM-21 final map is consistent with the project evaluated in the Sierra Vista Specific Plan Environmental Impact Report (EIR), no new effects would be expected to occur and all applicable mitigation measures from the Sierra Vista Specific Plan EIR will be implemented. As such, no additional CEQA action is required at this time.



CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal F - Invest in well-planned infrastructure and growth

SUBDIVISION AGREEMENT

Sierra Vista - Village JM-21 SUBDIVISION

THIS AGREEMENT, made and entered into this ___ day of _____, 20__, by and between the CITY OF ROSEVILLE, a municipal corporation ("CITY"), and John Mourier Construction, Inc., a California corporation, ("SUBDIVIDER"),

W I T N E S S E T H:

WHEREAS, SUBDIVIDER is possessed of a tract of land lying in the City of Roseville, County of Placer, known as "Sierra Vista - Village JM-21 Subdivision" (Subdivision no. PL 20-0191; "the Subdivision"); and

WHEREAS, a tentative map of the Subdivision was approved by the City Planning Commission on the 8th day of September, 2020, and the final map of the Subdivision has been approved subject to the execution of this Agreement; and

WHEREAS, the final map has been filed on the ____ day of _____, 20__ in Book _____ of Parcel/Subdivision Maps at Page _____ in the Official Records, Placer County Recorder, file no. _____; and

WHEREAS, Section 18.20.110 of the Roseville Municipal Code, regulating the subdivision of land in the City, requires that SUBDIVIDER shall execute and file an agreement between itself and CITY relating to the improvements to be made in a subdivision, prior to the approval by the City Council of the final map.

NOW, THEREFORE, the parties agree as follows:

1. Rights-of-Way. Except as otherwise provided by this Agreement, CITY rejects all lands, right-of-ways, and easements offered for dedication on the final map of the Subdivision. All such offers shall, however, remain open, and shall constitute irrevocable offers of dedication in accordance with Government Code Section 66477.2. All such offers may be accepted by CITY in its sole discretion at any later date without further notice to SUBDIVIDER as provided by law.

By way of explanation only, it is the current intention of CITY to accept all or part of such irrevocable offers to dedicate upon acceptance of the improvements called for in this Agreement.

2. Improvements - Time Limit. SUBDIVIDER agrees to cause all improvements to be made and constructed in the Subdivision to fully comply with the requirements of the Roseville Municipal Code and the Subdivision Map Act of the State of California according to the improvement plans for the Subdivision prepared by MacKay & Somps, Civil Engineers, Inc., dated March 2021 and approved by the City Engineer and including any changes or

alterations to such improvements required by the City Engineer, and to install, on or before December 31, 2022, such survey monuments as may be required by the City Engineer ("the Work"). SUBDIVIDER agrees to pay for any materials, provisions or other supplies used in, upon, for or about the performance of the Work, or for any work or labor of any kind done in connection with the Work, or for any amounts due under the Unemployment Insurance Act with respect to such work or labor.

SUBDIVIDER agrees to complete all of the Work on or before twenty-four (24) months from the date of this Agreement. If in the opinion of the City Engineer of CITY, an extension of this Agreement is not detrimental to the public welfare, he or she is, in his or her sole discretion, hereby authorized to extend the time within which the Work shall be completed for a period not to exceed twelve (12) months. Upon a written application made by SUBDIVIDER, further extensions, not to exceed an additional six (6) months, shall be reviewed and approved at the discretion of the City Engineer of CITY. Any such application extension request by SUBDIVIDER shall fully state the grounds and facts relied upon for the granting of additional extensions.

In the event that SUBDIVIDER shall fail to complete the Work within the time provided by this Agreement, CITY may, in its sole discretion and in addition to any other remedy provided in this Agreement or by law, enter upon the Subdivision and complete the Work and recover the full cost and expense of such construction from SUBDIVIDER, SUBDIVIDER's successors and assigns, or from the then owner of the Subdivision, and/or place a lien upon the Subdivision for such cost and expense.

If at anytime prior to the expiration of the time provided by this Agreement the City Engineer of CITY determines that a safety hazard exists within an existing public right-of-

way, the City Engineer shall give written notice to SUBDIVIDER to eliminate the safety hazard. If SUBDIVIDER fails to eliminate the safety hazard within five (5) calendar days of the written notice, CITY may, in its sole discretion and in addition to any other remedy provided in this Agreement or by law, eliminate the safety hazard and recover the full cost and expense of such work from SUBDIVIDER, SUBDIVIDER's successors and assigns, or from the then owner of the Subdivision, and/or place a lien upon the Subdivision for such cost and expense.

3. Acquisition and Dedication of Easements or Rights-of-Ways. If any of the Work is to be constructed or installed on land not within the Subdivision or already existing public right-of-way, no construction or installation shall be commenced before:

a. The irrevocable offer of dedication or conveyance to CITY of appropriate right-of-ways, easements or other interest in real property, and appropriate authorization from the property owner to allow construction or installation of the improvements or work; or

b. The issuance of an order of possession by a court of competent jurisdiction pursuant to the State Eminent Domain Law. SUBDIVIDER shall comply in all respects with any such order of possession.

Nothing in this Section 3 shall be construed as authorizing or granting an extension of time to SUBDIVIDER for completion of the Work.

4. Inspection Fees and Costs. The City Engineer shall inspect all of the Work improvements made in the Subdivision to see that they comply with CITY's subdivision regulations and specifications. SUBDIVIDER shall deposit the estimated inspection fee and reimburse CITY for the cost of such inspections in accordance with Roseville Municipal Code section 18.20.070.

5. Securities.

a. SUBDIVIDER shall file with this Agreement two (2) improvement securities as set forth in Roseville Municipal Code Sections 18.20.150 and 18.20.160. Each security shall be in the amount of one hundred percent (100%) of the total estimated cost of the Work as determined by the City Engineer which amount is the sum of $--1,779,377.50--. One improvement security shall secure faithful performance of this Agreement as required by Section 66499.3(a) of the Government Code of the State of California (the "faithful performance" security). The second improvement security shall, as required by Section 66499.3(b) of the Government Code of the State of California, secure the obligations set forth in Title 15 (commencing with Section 3082) of Part 4 of Division 3 of the Civil Code of the State of California for payment to the contractor, his subcontractors and to persons renting equipment or furnishing labor or materials to them for the Work (the "payment security"). The improvement securities required under this paragraph shall also secure placement of monumentation and guarantee payment therefor as provided by California Government Code section 66496.

b. SUBDIVIDER shall also file with this Agreement a "guarantee and warranty security" in the amount of ten percent (10%) of the City Engineer's estimated cost of the Work as set forth in Section 18.20.170 of the Roseville Municipal Code to guarantee and warrant the Work for a period of one year following its completion and acceptance against any defective work or labor done, or defective materials furnished, as required by Section 66499(a)(5) of the Government Code of the State of California. The guarantee and warranty security shall be released upon SUBDIVIDER's request following expiration of the warranty period and subject to the reasonable determination of the City Engineer that SUBDIVIDER's warranty obligations have been satisfied.

c. Any bonds submitted as security pursuant to this section shall be executed by a surety company authorized to transact a surety business in the State of California. All required securities shall be in a form approved by the City Attorney of CITY.

6. Successors and Assigns – Covenant Running with the Land. This Agreement shall inure to the benefit of, and be binding upon, the successors and assigns of the respective parties. It shall be recorded in the Office of the Recorder of Placer County concurrently with the final map of the Subdivision, and shall constitute a covenant running with the land and an equitable servitude upon the real property within the Subdivision.

7. Acceptance of Improvements Upon Completion. Upon satisfactory completion of the Work, in accordance with this Agreement, CITY agrees to accept the Work and its improvements and the offers of dedication described in paragraph 1, subject to the provisions of paragraphs 1 and 10 of this Agreement.

8. Notice Regarding Construction. SUBDIVIDER shall notify the City Engineer of CITY in writing three (3) days prior to the commencement of construction of the Work.

9. Subdivider's Obligation to Warn Public During Construction. Until final acceptance of the Work, SUBDIVIDER shall give good and adequate warning to the public of each and every dangerous condition which may exist in the Work, and will take all reasonable actions to protect the public from any such dangerous condition.

10. Warranty.

a. SUBDIVIDER guarantees and warrants the public improvements which constitute the Work required by this Agreement, and agrees to remedy any defects in the improvements or the Work arising from faulty or defective materials or construction of said improvements or the Work occurring within twelve (12) months after their acceptance by CITY.

SUBDIVIDER agrees to permit inspection of all improvements in the Subdivision by the City Engineer of CITY for such period, and to reimburse CITY for the cost of such inspections.

b. If, within the warranty period, the Work or improvement or any part of the Work done, furnished, installed, or constructed fails to fulfill any of the requirements of this Agreement or the improvement plans and specifications, SUBDIVIDER shall, without delay or cost to CITY, repair, replace or reconstruct any defective or otherwise unsatisfactory part or parts of the Work. CITY may, at its sole option, perform such repair or replacement itself if SUBDIVIDER has failed to commence such repair within twenty (20) days after CITY has mailed written notice of default to SUBDIVIDER and to SUBDIVIDER'S Surety. In such event, SUBDIVIDER agrees to pay the cost of such repair and replacement by CITY and CITY may, at its option, recover such cost as a lien against the Subdivision should the cost exceed the inspection fee deposited pursuant to paragraph 4 of this Agreement.

Should CITY determine that the public safety requires repairs or replacements to be made before SUBDIVIDER can be notified, CITY may, in its sole discretion, make the necessary repairs or replacement or perform the necessary work. SUBDIVIDER shall pay to CITY the cost of such repairs and CITY may at its option recover such cost as a lien against the Subdivision.

11. Indemnification. To the fullest extent allowed by law, SUBDIVIDER shall defend, indemnify, and save and hold harmless CITY, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of SUBDIVIDER 's willful misconduct or negligent act or omission while engaged in the performance of obligations or

exercise of rights created by this Agreement, except those matters arising from CITY's sole or active negligence or willful misconduct. The parties intend that this provision shall be broadly construed.

SUBDIVIDER's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

12. Insurance. SUBDIVIDER agrees to continuously maintain, in full force and effect, at a minimum the following policies of insurance during the term of this Agreement.

COVERAGE	LIMITS OF LIABILITY
General Liability	$2,000,000 per occurrence $3,000,000 aggregate Personal Injury: $2,000,000 per occurrence $3,000,000 aggregate
Automobile Liability	$1,000,000 combined single limit
Workers' Compensation	Statutory

a. Form. SUBDIVIDER shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

b. Additional Insureds. SUBDIVIDER shall also provide a separate endorsement form or section of the policy showing CITY, its officers, agents, employees and volunteers as additional insureds for each type of coverage, except for Workers' Compensation, for ongoing and completed operations. Such insurance shall specifically cover the contractual

liability of SUBDIVIDER. The additional insured coverage under the SUBDIVIDER's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from CITY's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office ("ISO") CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

c. Cancellation/Modification. SUBDIVIDER shall provide ten (10) days written notice to CITY prior to cancellation or modification of any insurance required by this Agreement.

d. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of CITY (if agreed to in a written contract) before CITY's own insurance shall be called upon to protect it as a named insured.

e. Self-Insured Retentions. All self-insured retentions ("SIR") must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or CITY. CITY reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

f. Waiver of Subrogation. SUBDIVIDER hereby agrees to waive subrogation which any insurer of SUBDIVIDER may acquire from SUBDIVIDER by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of CITY, its officers, agents, employees and volunteers for all worked performed by SUBDIVIDER, its employees, agents and subcontractors.

g. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve SUBDIVIDER of liability in excess of such coverage, nor shall it preclude CITY from taking such other actions as are available to it under any other provisions of this Agreement or law.

13. Irrevocability of Security. The improvement securities furnished pursuant to paragraph 5 shall be irrevocable, shall not be limited as to time (except as to the one-year guarantee and warranty period specified in paragraph 10) and shall provide that they may be released, in whole or part, only upon the written approval of the City Engineer of CITY.

14. Attorney's Fees; Venue; Governing Law. Any action by any party to this Agreement, or any action concerning a security furnished pursuant to paragraph 5, shall be brought in the appropriate court of competent jurisdiction within the County of Placer, State of California, notwithstanding any other provision of law which may provide that such action may be brought in some other location. In the event it becomes necessary for either party to bring an action with respect to enforcement of the provisions of this Agreement, or the security therefor, the prevailing party in such action shall be awarded a reasonable attorney's fee, as may be

determined by the Court. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

15. Release of Faithful Performance Security. Release of faithful performance security shall be in compliance with and pursuant to the procedures set forth in Government Code Section 66499.7. Upon the completion of all secured Work by SUBDIVIDER and written acceptance of that completed Work by CITY, and the furnishing of the warranty security as required by paragraph 5(b), the City Engineer shall authorize the release of the remaining faithful performance security.

16. Release of Payment Security. Thirty-five (35) days after a notice of completion is recorded with respect to the Work, the City Engineer of CITY may authorize the release of the payment security, in the event that no claims have been filed against said security. In the event that claims or actions are filed against the security, the City Engineer may release so much of such security as is in excess of the total of the claims made against it, plus a reasonable amount of costs and attorney's fees.

17. Automatic Termination Upon Completion and Sale of Residential Unit. This Agreement and any lien pursuant hereto shall automatically be terminated, without any further action by either party or need to record any additional document, with respect to any single-family residential lot within a parcel designated by the Specific Plan for residential use, upon completion of construction and issuance by the City of a final inspection for a dwelling unit upon such residential lot and conveyance of such improved residential lot to a bona-fide good faith purchaser thereof. In connection with its issuance of a final inspection for such improved lot, City shall confirm that: (i) all improvements which are required to serve the lot, as determined by City, have been accepted by City; (ii) the lot is included within the Maintenance CFD required

by Section 3.20 or other financing mechanism acceptable to the City, to the extent required hereby; and (iii) if and to the extent applicable to such lot, an affordable purchase or rental housing agreement has been recorded on the lot. Termination of this Agreement for any such residential lot as provided for in this section shall not in any way be construed to terminate or modify any assessment district or Mello-Roos Community Facilities District lien affecting such lot at the time of termination.

18. Failure of Performance. In addition to any other remedies provided in this Agreement or by law, in the event SUBDIVIDER fails to perform one or more of the covenants or conditions of this Agreement, CITY shall have recourse to the security given to guarantee the performance of such acts. CITY may do, or cause to be done, those acts required of SUBDIVIDER, and shall have recourse against so much of the security as is necessary to discharge the responsibility of SUBDIVIDER. In the event CITY seeks recourse against a security, CITY shall also have recourse against SUBDIVIDER for any and all amounts necessary to complete the obligations of SUBDIVIDER in the event the security is insufficient to pay such amounts. All administrative costs, including reasonable attorney's fees pursuant to Section 66499.4 of the Government Code, incurred by CITY, in addition to the costs of the improvements, shall be a proper charge against the security and SUBDIVIDER.

19. Integration. This Agreement is an integrated agreement. It supersedes all prior negotiations, representations, or agreements, either written or oral.

20. Modification. This Agreement and each provision contained herein may be waived, amended, supplemented or eliminated only by mutual written agreement of the parties.

21. Notices. Any notices sent to the parties relating to this Agreement shall be sent by first class mail, postage prepaid or delivered to the following addresses:

Marc Stout, City Engineer
City of Roseville
311 Vernon Street
Roseville, CA 95678

John Mourier Construction, Inc.
Attn: Steve Schnable
1430 Blue Oaks Boulevard, Suite 190
Roseville, CA 95747

Either party may amend its address by giving written notice to the other.

22. Severability. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attestation by its City Clerk under authority of Resolution No. ____, adopted by the Council of the City of Roseville on the ___ day of _____, 20__, and SUBDIVIDER has caused this Agreement to be executed.

NOTES:

1. TOTAL AREA OF THIS SUBDIVISION IS 18.751± ACRES GROSS, CONSISTING OF 80 RESIDENTIAL LOTS, 1 PUBLIC LANDSCAPE LOT, 4 PRIVATE COMMON AREA LOTS AND 1 PRIVATE ROADS LOT.

2. ALL CURVES ARE DIMENSIONED WITH RADIUS, DELTA, ARC LENGTH, CHORD BEARING AND CHORD LENGTH. DISTANCES SHOWN HEREON ARE IN FEET AND DECIMALS THEREOF AND ARE "GROUND" DISTANCES. DUE TO ROUNDING, THE SUM OF INDIVIDUAL DIMENSIONS MAY NOT EQUAL THE OVERALL DIMENSION.

3. A PRELIMINARY SOILS REPORT WAS PREPARED BY YOUNGDAHL CONSULTING GROUP, INC. PROJECT NO. E13171.000, DATED SEPTEMBER 10, 2013, AND IS ON FILE WITI THE CITY OF ROSEVILLE, DEVELOPMENT SERVICES - ENGINEERING DEPARTMENT, FILE NO. 308-810.

4. ALL FRONT CORNERS ARE MARKED BY A 1" DIAMETER BRASS DISC STAMPED "LS 9265" IN THE SIDEWALK ON THE EXTENSION OF SIDE LOT LINES 1.00' FROM THE PROPERTY LINE. WHERE SIDEWALK DOES NOT EXIST, FRONT CORNERS SHALL BE MARKED BY A 1" DIAMETER BRASS DISC STAMPED "LS 9265" ON A 2.00' EXTENSION OF SIDE LOT LINES IN THE GUTTER PAN, UNLESS OTHERWISE NOTED.

5. ALL REAR CORNERS AND ANGLE POINTS WILL BE SET WITH A 5/8" REBAR AND PLASTIC CAP STAMPED "LS 9265", WHERE A REAR CORNER FALLS WITHIN A MASONRY RETAINING WALL, MASONRY SOUND WALL OR CONCRETE FOOTING, A 5/8" REBAR WITH PLASTIC CAP STAMPED "LS 9265" WILL BE SET ON THE SIDE LOT LINE ON A 4.00 FOOT OFFSET TO THE REAR CORNER OR A BRASS TAG STAMPED "LS 9265" WILL BE SET WITH EPOXY TO THE FACE OF WALL 2.00 FOOT ABOVE GROUND OR ON TOP OF WALL WHERE AN OFFSET MONUMENT CANNOT BE SET.

6. PURSUANT TO SECTION 66499.20.2 OF THE GOVERNMENT CODE, THE LANDS SHOWN HEREON, ARE HEREBY MERGED AND RE-SUBDIVIDED AND THE FOLLOWING EASEMENT IS HEREBY ABANDONED:

   a. THE IRREVOCABLE OFFER OF DEDICATION IN FEE FOR SAN FERNANDO DRIVE AS SHOWN ON THAT CERTAIN FINAL MAP ENTITLED "THE VILLAGES AT SIERRA VISTA" RECORDED IN BOOK DD OF MAPS, AT PAGE 26, PLACER COUNTY RECORDS, LYING WITHIN THE BOUNDARY OF THIS FINAL MAP NOT SHOWN HEREON

7. STREET OWNERSHIP AND MAINTENCE INCLUDING STREET LIGHTS, LOT DRAINAGE SYSTEMS AND SURFACE DRAINAGE SYSTEMS ARE PRIVATE AND THE REPSONSIBLITY OF THE HOMEOWNER'S ASSOCIATION.

8. LOT A (PRIVATE ROADS) SHOWN HEREON SHALL BE GRANTED IN FEE TO THE HOMEOWNER'S ASSOCIATION AS PRIVATE ROADS FOR THE BENEFIT AND GENERAL USE OF THE RESIDENTIAL LOTS SHOWN HEREON.

9. LOTS B, C, D AND E SHOWN HEREON SHALL BE GRANTED IN FEE TO THE HOMEOWNER'S ASSOCIATION AS COMMON AREAS FOR LANDSCAPING AND FOR THE BENEFIT AND GENERAL USE OF THE RESIDENTIAL LOTS SHOWN HEREON.

10. LOT F SHOWN HEREON SHALL BE GRANTED TO THE CITY OF ROSEVILLE FOR LANDSCAPING PURPOSES AND AS PUBLIC RIGHT-OF-WAY.

COUNCIL COMMUNICATION

CC #: 1519
File #: 0400-04-12-1

Title:	Sierra Vista - Village JM-40 - Final Map and Subdivision Agreement
Contact:	Edward Winston 916-774-5432 ewinston@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.22.

RECOMMENDATION TO COUNCIL

1. Approve the final map on file with the City Clerk and accept on behalf of the public, the public utility and storm drain easements offered thereon, and accept, subject to improvement, the public rights of way and Lot A offered thereon.

2. Adopt the attached resolution approving the Subdivision Agreement and authorize the City Manager to execute the agreement on behalf of the City.

BACKGROUND

The Development Services Engineering section has reviewed the subject final map and found that it is in compliance with the Subdivision Map Act and the City's Subdivision Ordinance and all conditions of the tentative map have been met.

This map will create 35 residential lots and 1 public landscape lot.

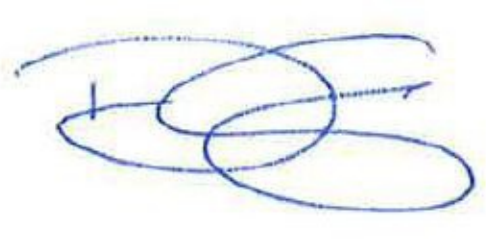
FISCAL IMPACT

There is no fiscal impact to the City's General Fund associated with this approval.

ENVIRONMENTAL REVIEW

Approval of the Sierra Vista Village JM-40 final map is an action that is subject to California Environmental Quality Act (CEQA). Project level CEQA compliance for the Sierra Vista Village JM-40 final map final map was accomplished with preparation of the Sierra Vista Specific Plan EIR (Adopted: May 5, 2010) (SCH#2008032017) and the Mitigated Negative Declaration (MND) and associated Mitigation Monitoring Program approved by the City of Roseville on June 6, 2012. Because the Sierra Vista Village JM-40 final map is consistent with the project evaluated in the Sierra Vista Specific Plan Environmental Impact Report (EIR), no new effects would be expected

to occur and all applicable mitigation measures from the Sierra Vista Specific Plan EIR will be implemented. As such, no additional CEQA action is required at this time.



CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal F - Invest in well-planned infrastructure and growth

Resolution 21-255

Subdivision Agreement

Sierra Vista Village JM-40 Final Map

RESOLUTION NO. 21-255

APPROVING A SUBDIVISION AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND JOHN MOURIER CONSTRUCTION, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, a subdivision agreement, by and between the City of Roseville and John Mourier Construction, Inc., for the Sierra Vista Village JM-40 subdivision, has been reviewed by the City Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said agreement is approved and that the City Manager is authorized to execute it on behalf of the City of Roseville.

PASSED AND ADOPTED by the Council of the City of Roseville this____day of _____, 20_, by the following vote on roll call:

SUBDIVISION AGREEMENT
Sierra Vista Village JM-40 SUBDIVISION

THIS AGREEMENT, made and entered into this ___ day of _____, 20__, by and between the CITY OF ROSEVILLE, a municipal corporation ("CITY"), and John Mourier Construction, Inc., a a California corporation, ("SUBDIVIDER"),

W I T N E S S E T H:

WHEREAS, SUBDIVIDER is possessed of a tract of land lying in the City of Roseville, County of Placer, known as "Sierra Vista Village JM-40 Subdivision" (Subdivision no. PL20-0103; "the Subdivision"); and

WHEREAS, a tentative map of the Subdivision was approved by the City Planning Commission on the 10th day of December, 2020, and the final map of the Subdivision has been approved subject to the execution of this Agreement; and

WHEREAS, the final map has been filed on the ____ day of _____, 20__ in Book _____ of Parcel/Subdivision Maps at Page _____ in the Official Records, Placer County Recorder, file no. _____; and

WHEREAS, Section 18.20.110 of the Roseville Municipal Code, regulating the subdivision of land in the City, requires that SUBDIVIDER shall execute and file an agreement between itself and CITY relating to the improvements to be made in a subdivision, prior to the approval by the City Council of the final map.

NOW, THEREFORE, the parties agree as follows:

1. Rights-of-Way. Except as otherwise provided by this Agreement, CITY rejects all lands, right-of-ways, and easements offered for dedication on the final map of the Subdivision. All such offers shall, however, remain open, and shall constitute irrevocable offers of dedication in accordance with Government Code Section 66477.2. All such offers may be accepted by CITY in its sole discretion at any later date without further notice to SUBDIVIDER as provided by law.

By way of explanation only, it is the current intention of CITY to accept all or part of such irrevocable offers to dedicate upon acceptance of the improvements called for in this Agreement.

2. Improvements - Time Limit. SUBDIVIDER agrees to cause all improvements to be made and constructed in the Subdivision to fully comply with the requirements of the Roseville Municipal Code and the Subdivision Map Act of the State of California according to the improvement plans for the Subdivision prepared by Baker Williams Engineering Group, dated 04/08/2021 and approved by the City Engineer and including any changes or alterations to such improvements required by the City Engineer, and to install, on or before December 31, 2021, such survey monuments as may be required by the City Engineer ("the Work"). SUBDIVIDER agrees to pay for any materials, provisions or other supplies used in, upon, for or about the performance of the Work, or for any work or labor of any kind done in

connection with the Work, or for any amounts due under the Unemployment Insurance Act with respect to such work or labor.

SUBDIVIDER agrees to complete all of the Work on or before twenty-four (24) months from the date of this Agreement. If in the opinion of the City Engineer of CITY, an extension of this Agreement is not detrimental to the public welfare, he or she is, in his or her sole discretion, hereby authorized to extend the time within which the Work shall be completed for a period not to exceed twelve (12) months. Upon a written application made by SUBDIVIDER, further extensions, not to exceed an additional six (6) months, shall be reviewed and approved at the discretion of the City Engineer of CITY. Any such application extension request by SUBDIVIDER shall fully state the grounds and facts relied upon for the granting of additional extensions.

In the event that SUBDIVIDER shall fail to complete the Work within the time provided by this Agreement, CITY may, in its sole discretion and in addition to any other remedy provided in this Agreement or by law, enter upon the Subdivision and complete the Work and recover the full cost and expense of such construction from SUBDIVIDER, SUBDIVIDER's successors and assigns, or from the then owner of the Subdivision, and/or place a lien upon the Subdivision for such cost and expense.

If at anytime prior to the expiration of the time provided by this Agreement the City Engineer of CITY determines that a safety hazard exists within an existing public right-of-way, the City Engineer shall give written notice to SUBDIVIDER to eliminate the safety hazard. If SUBDIVIDER fails to eliminate the safety hazard within five (5) calendar days of the written notice, CITY may, in its sole discretion and in addition to any other remedy provided in this Agreement or by law, eliminate the safety hazard and recover the full cost and expense of such work from SUBDIVIDER, SUBDIVIDER's successors and assigns, or from the then owner of the Subdivision, and/or place a lien upon the Subdivision for such cost and expense.

3. Acquisition and Dedication of Easements or Rights-of-Ways. If any of the Work is to be constructed or installed on land not within the Subdivision or already existing public right-of-way, no construction or installation shall be commenced before:

a. The irrevocable offer of dedication or conveyance to CITY of appropriate right-of-ways, easements or other interest in real property, and appropriate authorization from the property owner to allow construction or installation of the improvements or work; or

b. The issuance of an order of possession by a court of competent jurisdiction pursuant to the State Eminent Domain Law. SUBDIVIDER shall comply in all respects with any such order of possession.

Nothing in this Section 3 shall be construed as authorizing or granting an extension of time to SUBDIVIDER for completion of the Work.

4. Inspection Fees and Costs. The City Engineer shall inspect all of the Work improvements made in the Subdivision to see that they comply with CITY's subdivision regulations and specifications. SUBDIVIDER shall deposit the estimated inspection fee and reimburse CITY for the cost of such inspections in accordance with Roseville Municipal Code section 18.20.070.

5. Securities.

a. SUBDIVIDER shall file with this Agreement two (2) improvement securities as set forth in Roseville Municipal Code Sections 18.20.150 and 18.20.160. Each security shall be in the amount of one hundred percent (100%) of the total estimated cost of the Work as determined by the City Engineer which amount is the sum of $---936,950---. One improvement security shall secure faithful performance of this Agreement as required by Section 66499.3(a) of the Government Code of the State of California (the "faithful performance" security). The second improvement security shall, as required by Section 66499.3(b) of the Government Code of the State of California, secure the obligations set forth in Title 15

(commencing with Section 3082) of Part 4 of Division 3 of the Civil Code of the State of California for payment to the contractor, his subcontractors and to persons renting equipment or furnishing labor or materials to them for the Work (the "payment security"). The improvement securities required under this paragraph shall also secure placement of monumentation and guarantee payment therefor as provided by California Government Code section 66496.

b. SUBDIVIDER shall also file with this Agreement a "guarantee and warranty security" in the amount of ten percent (10%) of the City Engineer's estimated cost of the Work as set forth in Section 18.20.170 of the Roseville Municipal Code to guarantee and warrant the Work for a period of one year following its completion and acceptance against any defective work or labor done, or defective materials furnished, as required by Section 66499(a)(5) of the Government Code of the State of California. The guarantee and warranty security shall be released upon SUBDIVIDER's request following expiration of the warranty period and subject to the reasonable determination of the City Engineer that SUBDIVIDER's warranty obligations have been satisfied.

c. Any bonds submitted as security pursuant to this section shall be executed by a surety company authorized to transact a surety business in the State of California. All required securities shall be in a form approved by the City Attorney of CITY.

6. Successors and Assigns – Covenant Running with the Land. This Agreement shall inure to the benefit of, and be binding upon, the successors and assigns of the respective parties. It shall be recorded in the Office of the Recorder of Placer County concurrently with the final map of the Subdivision, and shall constitute a covenant running with the land and an equitable servitude upon the real property within the Subdivision.

7. Acceptance of Improvements Upon Completion. Upon satisfactory completion of the Work, in accordance with this Agreement, CITY agrees to accept the Work and its

improvements and the offers of dedication described in paragraph 1, subject to the provisions of paragraphs 1 and 10 of this Agreement.

8. Notice Regarding Construction. SUBDIVIDER shall notify the City Engineer of CITY in writing three (3) days prior to the commencement of construction of the Work.

9. Subdivider's Obligation to Warn Public During Construction. Until final acceptance of the Work, SUBDIVIDER shall give good and adequate warning to the public of each and every dangerous condition which may exist in the Work, and will take all reasonable actions to protect the public from any such dangerous condition.

10. Warranty.

a. SUBDIVIDER guarantees and warrants the public improvements which constitute the Work required by this Agreement, and agrees to remedy any defects in the improvements or the Work arising from faulty or defective materials or construction of said improvements or the Work occurring within twelve (12) months after their acceptance by CITY. SUBDIVIDER agrees to permit inspection of all improvements in the Subdivision by the City Engineer of CITY for such period, and to reimburse CITY for the cost of such inspections.

b. If, within the warranty period, the Work or improvement or any part of the Work done, furnished, installed, or constructed fails to fulfill any of the requirements of this Agreement or the improvement plans and specifications, SUBDIVIDER shall, without delay or cost to CITY, repair, replace or reconstruct any defective or otherwise unsatisfactory part or parts of the Work. CITY may, at its sole option, perform such repair or replacement itself if SUBDIVIDER has failed to commence such repair within twenty (20) days after CITY has mailed written notice of default to SUBDIVIDER and to SUBDIVIDER'S Surety. In such event, SUBDIVIDER agrees to pay the cost of such repair and replacement by CITY and CITY may, at its option, recover such cost as a lien against the Subdivision should the cost exceed the inspection fee deposited pursuant to paragraph 4 of this Agreement.

Should CITY determine that the public safety requires repairs or replacements to be made before SUBDIVIDER can be notified, CITY may, in its sole discretion, make the necessary repairs or replacement or perform the necessary work. SUBDIVIDER shall pay to CITY the cost of such repairs and CITY may at its option recover such cost as a lien against the Subdivision.

11. Indemnification. To the fullest extent allowed by law, SUBDIVIDER shall defend, indemnify, and save and hold harmless CITY, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of SUBDIVIDER 's willful misconduct or negligent act or omission while engaged in the performance of obligations or exercise of rights created by this Agreement, except those matters arising from CITY's sole or active negligence or willful misconduct. The parties intend that this provision shall be broadly construed.

SUBDIVIDER's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

12. Insurance. SUBDIVIDER agrees to continuously maintain, in full force and effect, at a minimum the following policies of insurance during the term of this Agreement.

COVERAGE	LIMITS OF LIABILITY
General Liability	$2,000,000 per occurrence $3,000,000 aggregate Personal Injury: $2,000,000 per occurrence $3,000,000 aggregate
Automobile Liability	$1,000,000 combined single limit

Workers' Compensation Statutory

a. Form. SUBDIVIDER shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

b. Additional Insureds. SUBDIVIDER shall also provide a separate endorsement form or section of the policy showing CITY, its officers, agents, employees and volunteers as additional insureds for each type of coverage, except for Workers' Compensation, for ongoing and completed operations. Such insurance shall specifically cover the contractual liability of SUBDIVIDER. The additional insured coverage under the SUBDIVIDER's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from CITY's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office ("ISO") CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

c. Cancellation/Modification. SUBDIVIDER shall provide ten (10) days written notice to CITY prior to cancellation or modification of any insurance required by this Agreement.

d. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply

on a primary and noncontributory basis for the benefit of CITY (if agreed to in a written contract) before CITY's own insurance shall be called upon to protect it as a named insured.

e. Self-Insured Retentions. All self-insured retentions ("SIR") must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or CITY. CITY reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

f. Waiver of Subrogation. SUBDIVIDER hereby agrees to waive subrogation which any insurer of SUBDIVIDER may acquire from SUBDIVIDER by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of CITY, its officers, agents, employees and volunteers for all worked performed by SUBDIVIDER, its employees, agents and subcontractors.

g. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve SUBDIVIDER of liability in excess of such coverage, nor shall it preclude CITY from taking such other actions as are available to it under any other provisions of this Agreement or law.

13. Irrevocability of Security. The improvement securities furnished pursuant to paragraph 5 shall be irrevocable, shall not be limited as to time (except as to the one-year guarantee and warranty period specified in paragraph 10) and shall provide that they may be released, in whole or part, only upon the written approval of the City Engineer of CITY.

14. Attorney's Fees; Venue; Governing Law. Any action by any party to this Agreement, or any action concerning a security furnished pursuant to paragraph 5, shall be

brought in the appropriate court of competent jurisdiction within the County of Placer, State of California, notwithstanding any other provision of law which may provide that such action may be brought in some other location. In the event it becomes necessary for either party to bring an action with respect to enforcement of the provisions of this Agreement, or the security therefor, the prevailing party in such action shall be awarded a reasonable attorney's fee, as may be determined by the Court. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

15. Release of Faithful Performance Security. Release of faithful performance security shall be in compliance with and pursuant to the procedures set forth in Government Code Section 66499.7. Upon the completion of all secured Work by SUBDIVIDER and written acceptance of that completed Work by CITY, and the furnishing of the warranty security as required by paragraph 5(b), the City Engineer shall authorize the release of the remaining faithful performance security.

16. Release of Payment Security. Thirty-five (35) days after a notice of completion is recorded with respect to the Work, the City Engineer of CITY may authorize the release of the payment security, in the event that no claims have been filed against said security. In the event that claims or actions are filed against the security, the City Engineer may release so much of such security as is in excess of the total of the claims made against it, plus a reasonable amount of costs and attorney's fees.

17. Automatic Termination Upon Completion and Sale of Residential Unit. This Agreement and any lien pursuant hereto shall automatically be terminated, without any further action by either party or need to record any additional document, with respect to any single-family residential lot within a parcel designated by the Specific Plan for residential use, upon completion of construction and issuance by the City of a final inspection for a dwelling unit upon such residential lot and conveyance of such improved residential lot to a bona-fide good faith

purchaser thereof. In connection with its issuance of a final inspection for such improved lot, City shall confirm that: (i) all improvements which are required to serve the lot, as determined by City, have been accepted by City; (ii) the lot is included within the Maintenance CFD required by Section 3.20 or other financing mechanism acceptable to the City, to the extent required hereby; and (iii) if and to the extent applicable to such lot, an affordable purchase or rental housing agreement has been recorded on the lot. Termination of this Agreement for any such residential lot as provided for in this section shall not in any way be construed to terminate or modify any assessment district or Mello-Roos Community Facilities District lien affecting such lot at the time of termination.

18. Failure of Performance. In addition to any other remedies provided in this Agreement or by law, in the event SUBDIVIDER fails to perform one or more of the covenants or conditions of this Agreement, CITY shall have recourse to the security given to guarantee the performance of such acts. CITY may do, or cause to be done, those acts required of SUBDIVIDER, and shall have recourse against so much of the security as is necessary to discharge the responsibility of SUBDIVIDER. In the event CITY seeks recourse against a security, CITY shall also have recourse against SUBDIVIDER for any and all amounts necessary to complete the obligations of SUBDIVIDER in the event the security is insufficient to pay such amounts. All administrative costs, including reasonable attorney's fees pursuant to Section 66499.4 of the Government Code, incurred by CITY, in addition to the costs of the improvements, shall be a proper charge against the security and SUBDIVIDER.

19. Integration. This Agreement is an integrated agreement. It supersedes all prior negotiations, representations, or agreements, either written or oral.

20. Modification. This Agreement and each provision contained herein may be waived, amended, supplemented or eliminated only by mutual written agreement of the parties.

21. Notices. Any notices sent to the parties relating to this Agreement shall be sent by first class mail, postage prepaid or delivered to the following addresses:

Marc Stout, City Engineer
City of Roseville
311 Vernon Street
Roseville, CA 95678

John Mourier Construction, Inc.
Attn: Steve Schnable
1430 Blue Oaks Boulevard, Suite 190
Roseville, CA 95747

Either party may amend its address by giving written notice to the other.

22. Severability. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attestation by its City Clerk under authority of Resolution No. ____, adopted by the Council of the City of Roseville on the ___ day of _____, 20__, and SUBDIVIDER has caused this Agreement to be executed.

COUNCIL COMMUNICATION

CC #: 1552
File #: 0400-04-17-1

Title:	Community Facilities District No. 3 (Municipal Services) - Annexation No. 25 (Villages at Sierra Vista - Phase B) - Resolution of Intention to Annex Territory
Contact:	Jeannine Thrash 916-774-5473 jthrash@roseville.ca.us Dennis Kauffman 916-774-5313 dkauffman@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.23.

RECOMMENDATION TO COUNCIL

Staff recommends that Council adopt a Resolution of Intention to Annex Territory to Community Facilities District and to Authorize the Levy of Special Taxes Therein, City of Roseville Community Facilities District No. 3 (Municipal Services), Annexation No. 25. Staff also recommend that Council set Wednesday, July 21, 2021 at 6:00 pm in the Roseville City Council Chambers at 311 Vernon Street, Roseville, California as the time and place to conduct a public hearing on the formation and annexation.

BACKGROUND

The landowner is obligated per the Developer Agreement by and between the City of Roseville and the developers relative to the Sierra Vista Specific Plan, to annex into the Municipal Services Community Facilities District ("CFD") No. 3 prior to the issuance of the first residential building permit.

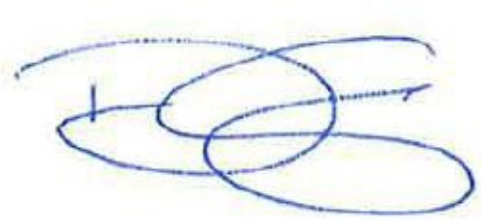
The property is being annexed into CFD No. 3 in order to offset the property's impact on City General Fund resources available to pay for municipal services citywide, including the project area.

FISCAL IMPACT

The CFD will generate special taxes levied on the landowner's annual property tax bill. Annexation into Community Facilities District No. 3 (Municipal Services) helps offset the property's impact on City General Fund resources available to pay for municipal services and therefore will not negatively impact the General Fund.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Adoption of the resolution meets the above criteria and is not subject to CEQA. No additional environmental review is required.



CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal A - Remain fiscally responsible in a changing world

Description

Resolution 21-282

Proposed Boundary Map

CITY COUNCIL OF THE CITY OF ROSEVILLE

RESOLUTION NO. 21-282

A RESOLUTION OF INTENTION TO ANNEX TERRITORY TO COMMUNITY FACILITIES DISTRICT AND TO AUTHORIZE THE LEVY OF SPECIAL TAXES THEREIN

CITY OF ROSEVILLE
Community Facilities District No. 3
(Municipal Services)

Annexation No. 25 (Villages at Sierra Vista-Phase B)

WHEREAS, the City Council (the "Council") of the City of Roseville (the "City") has conducted proceedings to establish Community Facilities District No. 3 (Municipal Services) (the "CFD") pursuant to the Mello-Roos Community Facilities Act of 1982, as amended (the "Act"), Chapter 2.5 of Part 1 of Division 2 of Title 5, commencing at Section 53311, of the California Government Code; and

WHEREAS, under the Act, this Council, as the legislative body for the CFD, is empowered with the authority to annex territory to the CFD, and now desires to undertake proceedings to annex territory to the CFD.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF ROSEVILLE RESOLVES AS FOLLOWS:

1. Findings. This Council hereby finds and determines that public convenience and necessity require that territory be added to the CFD.

2. Territory Described. The name of the existing CFD is "City of Roseville Community Facilities District No. 3 (Municipal Services)." The territory originally included in the existing CFD is set forth in the map of the CFD heretofore recorded in the Placer County Recorder's Office on August 18, 2004, in Book 3 at Page 41 of Maps of Assessment and Community Facilities Districts, to which map reference is hereby made, as such map has been supplemented in connection with subsequent annexations.

The territory now proposed to be annexed to the CFD is as shown on the Annexation Map for the captioned Annexation No. 25 (Villages at Sierra Vista-Phase B) to the CFD, on file with the Clerk, the boundaries of which territory are hereby preliminarily approved and to which map reference is hereby made for further particulars. The City Clerk is hereby directed to cause to be recorded such Annexation Map, showing the territory to be annexed, in the office of the County Recorder of the County of Placer within 15 days of the date of adoption of this resolution.

3. The Services. The types of public services financed by the CFD and pursuant to the Act consist of those services (the "Services") as described in Exhibit B to the Resolution of Formation with respect to the CFD adopted by the Council as Resolution No. 04-426 on September 15, 2004 (the "Resolution of Formation") and included as Exhibit B hereto. It is

presently intended that the Services will be provided, without preference or priority, to the existing territory in the CFD and the territory proposed to be annexed to the CFD.

4. Special Tax. Except to the extent that funds are otherwise available to the CFD to pay for the Services, a special tax sufficient to pay the costs thereof is intended to be levied annually within the CFD, and collected in the same manner as ordinary *ad valorem* property taxes.

The special tax proposed to pay for Services to be supplied within the territory proposed to be annexed will be equal to the special taxes levied to pay for the same Services in the CFD, except that a higher or lower tax may be levied within the territory proposed to be annexed or to be annexed in the future to the extent that the actual cost of providing the Services in that territory is higher or lower than the cost of providing those Services in the CFD.

The proposed rate and method of apportionment of the special tax among the parcels of real property within the CFD, as now in existence and following the annexation proposed herein, in sufficient detail to allow each landowner within the territory proposed to be annexed to the CFD to estimate the maximum amount such owner will have to pay, are described in the Resolution of Formation and included as Exhibit A hereto.

5. Hearing. Wednesday, July 21, 2021 at 6:00 p.m. or as soon as possible thereafter, at the City of Roseville Civic Center Council Chambers located at 311 Vernon Street, Roseville, California 95678, be, and the same are hereby appointed and fixed as the time and place when and where this Council, as legislative body for the CFD, will conduct a public hearing on the matters described in this Resolution.

6. Notice. The City Clerk is hereby directed to cause notice of said public hearing to be given by publication one time in a newspaper of general circulation in the area of the CFD, including the area to be annexed to the CFD. The publication of said notice shall be completed at least 7 days before the date herein set for said hearing. The City Clerk may also cause a copy of such notice and a copy of this Resolution to be mailed to each landowner within the territory proposed to be annexed, which notice and resolution shall be mailed at least 15 days before the date of said hearing. Such notice shall be substantially in the form specified in Section 53339.4 of the Act, with a summary form specifically authorized.

7. Effective Date. This Resolution shall take effect upon its adoption.

* * * * * *

I hereby certify that the foregoing Resolution was duly adopted by the City Council of the City of Roseville, California, at a regularly scheduled meeting thereof, held on the___day of_____20__, by the following vote of the City Council:

AYES: COUNCILMEMBERS
NOES: COUNCILMEMBERS
ABSENT: COUNCILMEMBERS
ABSTAIN: COUNCILMEMBERS

EXHIBIT A

CITY OF ROSEVILLE
COMMUNITY FACILITIES DISTRICT NO. 3
(MUNICIPAL SERVICES)

RATE AND METHOD OF APPORTIONMENT OF SPECIAL TAX

A Special Tax applicable to each Assessor's Parcel in Community Facilities District No. 3 (Municipal Services) [herein "CFD No. 3"] shall be levied and collected according to the tax liability determined by the City Council, acting in its capacity as the legislative body of CFD No. 3, through the application of the appropriate Special Tax rate, as described below. All of the property in CFD No. 3, unless exempted by law or by the provisions of Section E below, shall be taxed for the purposes, to the extent, and in the manner herein provided.

A. DEFINITIONS

The terms hereinafter set forth have the following meanings:

"Acreage" or **"Acre"** means the land area making up an Assessor's Parcel as shown on an Assessor's Parcel Map, or if the land area is not shown on an Assessor's Parcel Map, the land area shown on the applicable final subdivision map or other parcel map recorded at the County Recorder's Office.

"Administrative Expenses" means the costs incurred by the City to determine, levy and collect the Special Tax, including salaries of City employees and fees of consultants and the costs of collecting installments of the Special Taxes upon the general tax rolls; preparation of required reports, and any other costs required to administer the CFD as determined by the Finance Director.

"Administrator" means the person or firm designated by the City to administer the Special Taxes according to this Rate and Method of Apportionment of Special Tax.

"Affordable Housing Director" means, at any point in time, the person within the City who services as head of the department that is in charge of the City's affordable housing program.

"Affordable Unit" means a Unit built on a Parcel for which an Affordable Purchase Development Agreement or similar agreement has been recorded on title of the property designating the Unit as affordable (as determined by the City) and resulting in a deed of trust on the Parcel in favor of the City. The City's Affordable Housing Director shall determine which Units are designated as Affordable Units and maintain an Affordable

Unit Listing which shall contain all designated buildable parcels by tract and lot number. The Affordable Unit Listing shall also be updated to reflect those Units no longer qualifying as Affordable Units, also known as Market Rate Units. The Affordable Unit Listing, which shall contain all qualifying Affordable Units as of April 30, shall be made available to the Administrator by July 1 of each year for purposes of determining the Maximum Special Tax for Parcels pursuant to Section C.

"Affordable Unit Assignment" means a reduction in the Maximum Special Tax for a Parcel due to the assignment of an Affordable Unit(s) to the Parcel.

"Annual Tax Escalation Factor" means an annual increase in the Maximum Special Tax following the Base Year in an amount equal to the lesser of: (i) the combined percentage increase, if any, in the City of Roseville General Fund Operating Budget for police and fire services, or (ii) four percent (4%).

"Assessor's Parcel" or **"Parcel"** means a lot or parcel shown in an Assessor's Parcel Map with an assigned Assessor's Parcel number.

"Assessor's Parcel Map" means an official map of the County Assessor designating parcels by Assessor's Parcel number.

"Authorized Services" means the public services authorized to be funded by CFD No. 3 as set forth in the documents adopted by the City Council when the CFD was formed.

"Base Year" means Fiscal Year 2009-10.

"City" means the City of Roseville.

"City Council" means the City Council of the City of Roseville, acting as the legislative body of CFD No. 3.

"County" means the County of Placer.

"Developed Property" means, in any Fiscal Year, both of the following:

- For Condominium Conversion Parcels, all individual Units for which an escrow has closed prior to June 30 of the preceding Fiscal Year; and
- All other Parcels of Taxable Property within the CFD for which a use permit or building permit for new construction of a residential or non-residential structure was issued prior to June 30 of the preceding Fiscal Year.

"**Finance Director**" means the Finance Director for the City of Roseville or his or her designee or successor.

"**Fiscal Year**" means the period starting on July 1 and ending on the following June 30.

"Land Use Designation" means the land use designated to be built on a particular Parcel based on reference to an adopted community plan or specific plan or, to the extent that such a plan has not been approved for a Parcel, to the City's general plan.

"Market Rate Unit" means a Unit that is not an Affordable Unit.

"Multi-Family Property" means, in any Fiscal Year, all Parcels in CFD No. 3 for which a building permit was issued or may be issued for construction of a residential structure with multiple units that share common walls, all of which are offered for rent to the general public.

"Maximum Special Tax" means the maximum Special Tax determined in accordance with Section C below that can be levied on Taxable Property in any Fiscal Year.

"Public Property" means any property within the boundaries of CFD No. 3 that is owned by the federal government, State of California, County, City, or other public agency.

"Single Family Attached Property" means, in any Fiscal Year, all Parcels in CFD No. 3 for which a building permit was issued for construction of a residential structure consisting of two or more Units that share common walls and are offered as for-sale Units, including such residential structures that meet the statutory definition of a condominium contained in Civil Code Section 1351.

"Single Family Detached Property" means, in any Fiscal Year, all Parcels in CFD No. 3 for which a building permit was issued for construction of a Unit that does not share a common wall with another Unit.

"Special Tax" means any tax levied to pay for Authorized Services.

"Taxable Property" means all Assessor's Parcels within the boundaries of CFD No. 3 which are not exempt from the Special Tax pursuant to law or Section E below.

"Unit" means an individual single-family detached unit or an individual residential unit within a duplex, triplex, fourplex, townhome, condominium, or apartment structure.

"Zoning Designation" means, for a particular Parcel, the designation of zoning for the Parcel based on the zoning map symbols set forth in the City's zoning ordinance or, if the designation is inconsistent with the City's zoning ordinance, as determined by the Administrator.

B. CATEGORIZING PARCELS FOR ANNUAL TAX LEVY

Each Fiscal Year, the Administrator shall identify the current Assessor's Parcel numbers for all Parcels of Developed Property within CFD No. 3. The Administrator shall then identify the Land Use Designation for each Parcel of Developed Property to determine the appropriate Maximum Special Tax pursuant to Section C below. If a Land Use Designation has not been assigned to a Parcel of Developed Property, the Administrator shall determine the Zoning Designation for the Parcel and reference Table 1 below to determine the Maximum Special Tax associated with that Zoning Designation. If the Zoning Designation for the Parcel applies to more than one Land Use Designation as reflected in Table 1, the Administrator shall determine the appropriate Maximum Special Tax rate for the Parcel by identifying the Maximum Special Tax shown in Table 1 for the land use category that is most similar to the land use that will be built on the Parcel.

For Single Family Attached Property or multi-family property, the number of Units shall be determined by referencing the condominium plan, apartment plan, site plan or other development plan for the property. For Condominium Parcels, the Administrator shall also determine the date of which escrow closed for any Units that were sold to individual buyers in the prior Fiscal Year.

For Parcels with a Land Use Designation of Residential, Mixed Use; Village Center – Medium Density Residential; Village Center – High Density Residential; or Commercial, Mixed Use, the Administrator shall determine whether (i) residential units that have been or will be built on the Parcel will be offered for sale to individual home buyers and (ii) a separate Assessor's Parcel number will be assigned to the airspace parcel associated with each residential unit. Once separate Parcel numbers have been assigned to the residential airspace Parcels, the Administrator shall assign a Maximum Special Tax to the airspace Parcel for each residential unit. In addition, the Administrator shall tax the commercial land uses on the Parcel using the Maximum Special Tax for the appropriate commercial Land Use Designation in Table 1 below. The acreage to be used to calculate the Maximum Special Tax on the commercial uses shall be the full land area of the underlying Assessor's Parcel on which the residential and commercial land uses are located.

Upon recordation of each Final Map creating Single Family Detached Property and/or Single Family Attached Property, the ECS Director is to determine the number of Affordable Units included within the Final Map. When building permits are issued for the Affordable Units designated on each Parcel, the Administrator shall reduce the Maximum Special Tax for each Affordable Unit to fifty percent (50%) of the Maximum Special Tax that applies to the Market Rate Units with the same Zoning Designation. After May 1 of each Fiscal Year, the Administrator shall obtain the Affordable Unit Listing from the Affordable Housing Director to confirm which Parcels qualify for an Affordable Unit Adjustment in the following Fiscal Year.

C. MAXIMUM SPECIAL TAX

All Taxable Property within the CFD shall be subject to a Maximum Special Tax that will be levied each Fiscal Year to pay for Authorized Services. As discussed above, the Administrator shall rely first on the Land Use Designation for a Parcel to determine the appropriate Maximum Special Tax in Table 1 below but, in the absence of an assigned Land Use Designation, the Administrator shall refer to the Zoning Designation and land use to be built on the Parcel. The following Maximum Special Tax rates apply to all Parcels of Developed Property within CFD No. 3:

Table 1
Maximum Special Taxes

Land Use Designation	Zoning Designation	Maximum Special Tax (Fiscal Year 2009-10) *
Low Density Residential (LDR)	R1	$342.00 per Unit
Medium Density Residential (MDR)	RS R2	$200.00 per Unit
High Density Residential (HDR)	R3	$100.00 per Unit
Community Commercial	CC	$932.00 per Acre
General Commercial	GC	$932.00 per Acre
Highway Commercial	HC	$932.00 per Acre
Regional Commercial	RC	$932.00 per Acre
Central Business District	CBD	$932.00 per Acre
Business Professional	BP, MP	$801.00 per Acre

* Beginning July 1, 2010 and each July 1 thereafter, the Maximum Special Taxes shown above shall be adjusted by applying the Annual Tax Escalation Factor. The Maximum Special Tax for Affordable Units within a particular Zoning Designation shall be fifty percent (50%) of the amount shown above for that Zoning Designation, as adjusted by the Annual Tax Escalation Factor.

D. METHOD OF LEVY AND COLLECTION OF SPECIAL TAX

Each Fiscal Year, the Administrator shall levy the Maximum Special Tax on each Parcel of Developed Property in CFD No. 3. The Special Tax for CFD No. 3 shall be collected in the same manner and at the same time as ordinary ad valorem property taxes provided, however, that CFD No. 3 may (under the authority of Government Code Section 53340) in any particular case bill the taxes directly to the property owner off the County tax roll, and the Special Tax will be equally subject to foreclosure if delinquent.

E. LIMITATIONS

Notwithstanding any other provision of this Rate and Method of Apportionment of Special Tax, no Special Tax shall be levied on Public Property.

F. INTERPRETATION OF SPECIAL TAX FORMULA

The City reserves the right to make minor administrative and technical changes to this document that does not materially affect the rate and method of apportioning the Special Taxes. In addition, the interpretation and application of any section of this document shall be left to the City's discretion. Interpretations may be made by the City by ordinance or resolution for purposes of clarifying any vagueness or ambiguity in this Rate and Method of Apportionment of Special Tax.

CITY OF ROSEVILLE
COMMUNITY FACILITIES DISTRICT NO. 3
(MUNICIPAL SERVICES)

LIST OF AUTHORIZED SERVICES

The Community Facilities District No. 3 (Municipal Services) (the "CFD") shall include the City services authorized under Section 53313 of the Community Facilities Act of 1982, Chapter 2.5 of Division 2 of Title 5 of the California Government Code, commencing with Section 53311 (the "Act"), which include the following services, to the extent that such services are in addition to those provided in the territory of the CFD before the CFD was created (or, as to territory which may be annexed to the CFD, before such territory was annexed to the CFD.) In accordance with Section 53313 of the Act, the additional services may not supplant services already available within the territory when the district was created.

(a) Police protection services, including, but not limited to, criminal justice services. However, criminal justice services are limited to providing services for jails, detention facilities, and juvenile halls.
(b) Fire protection and suppression services, and ambulance and paramedic services.
(c) Recreation program services, library services, maintenance services for elementary and secondary school sites and structures, and the operation and maintenance of museums and cultural facilities, subject to the limitations contained in Section 53313 of the Act.
(d) Maintenance of parks, parkways, and open space.
(e) Flood and storm protection services, including, but not limited to, the operation and maintenance of storm drainage systems, and sandstorm protection systems.
(f) Services with respect to removal or remedial action for the cleanup of any hazardous substance released or threatened to be released into the environment, subject to the limitations contained in Section 53313 of the Act.

COUNCIL COMMUNICATION

CC #: 1539
File #: 0200

Title: Audit Services - Agreement
Contact: Nick Rosas 916-774-5314 nrosas@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.24.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt a resolution authorizing the City Manager to execute an Agreement for Audit Services with Lance, Soll & Lunghard, LLP.

BACKGROUND

As stated in Article VII, Section 7.19 of the Roseville City Charter, the City Council shall provide for an annual audit of the City by a firm of independent certified public accountants who are in no other way connected with the City government. The firm shall be retained subject to the restrictions and limitations prescribed by state law. A comprehensive audit shall be made covering each fiscal year to assure that the City's financial transactions, accounts and records are maintained in accordance with the requirements of the City charter, state and federal laws and generally accepted accounting principles.

In March 2021, the City issued a request for proposals to conduct a competitive procurement process to engage a CPA firm for this purpose. After staff from multiple City departments reviewed the nine submitted proposals and conducted interviews, staff recommends engaging Lance, Soll & Lunghard, LLP to be the City's new audit firm.

FISCAL IMPACT

The cost of the audit services is $157,160 per year, for a total of $314,320.00 over the two-year period, part of which will be paid for by the General Fund. The cost of the first year of the audit services has been included in the proposed FY2021-22 budget. The cost of the second year of the audit services will be included in the FY2022-23 budget, pending City Council approval.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) only applies to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the

activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3)).

Audit Services Contract

RESOLUTION NO. 21-271

APPROVING AN AGREEMENT FOR AUDIT SERVICES, BY AND BETWEEN THE CITY OF ROSEVILLE AND LANCE, SOLL & LUNGHARD, LLP, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, an Agreement for Audit Services, by and between the City of Roseville and Lance, Soll & Lunghard, LLP, has been reviewed by the City Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said agreement is hereby approved and that the City Manager is authorized to execute it on behalf of the City of Roseville.

PASSED AND ADOPTED by the Council of the City of Roseville this____day of _____, 20_, by the following vote on roll call:

AGREEMENT FOR AUDIT SERVICES

THIS AGREEMENT, is made and entered into this ____ day of _____, 20__, by and between the City of Roseville, a municipal corporation ("CITY"), and Lance, Soll & Lunghard, LLP, a California limited liability partnership ("AUDITOR"); and

W I T N E S S E T H:

WHEREAS, CITY desires a public accounting firm to provide auditing services; and

WHEREAS, AUDITOR has prepared a proposal in response to RFP #10-020, dated April 7, 2021, which describes the scope of work to be performed by AUDITOR, the budget for the work, and the schedule for performance of the work; and

WHEREAS, AUDITOR is qualified and experienced to provide auditing services.

NOW, THEREFORE, the parties agree as follows:

1. Qualifications. AUDITOR certifies its status as a firm of certified public accountants, or as an individual certified public accountant, with the time and ability to perform the services required hereunder in an efficient, trustworthy and businesslike manner. AUDITOR certifies that it and its officers, employees and agents have no personal or financial interest that would conflict with or interfere with the provision of the services to be rendered. The services to be rendered shall be performed in accordance with generally accepted auditing standards in effect at the time of the rendition of such services.

2. Services. AUDITOR shall render the following services:

a. Conduct audits in accordance with auditing standards generally accepted in the United States of America (GAAS), the standards set forth for financial audits contained in Government Auditing Standards issued by the Comptroller General of the United States (GAGAS), and Uniform Administrative Requirements, Cost Principals, and Audit Requirements for Federal Awards issued by the Office of Management and Budget (Uniform Guidance).

b. Annual audit and management letter for the following fiscal years shall be prepared for the fees listed immediately below:

i. 2020 -21 - - $157,160

ii. 2021 -22 - - $157,160

c. The fees to be paid for the annual audit and management letter described in subparagraph b(i) through (ii) shall not exceed in any event the amounts listed above, except in the event of the approval of additional services.

d. AUDITOR shall, during the term of this Agreement, provide advice to CITY on appropriate accounting changes or updates. This service is included in the fees described in subparagraph b(i) through (ii).

3. Fee Adjustment. In the event that the hours worked are less than the quotient of the applicable fee as dividend, divided by the hourly rate, as divisor, then the fee shall be adjusted downward by multiplying the hours worked by the hourly rate and adding thereto the actual expenses incurred, but in no event shall the fee exceed the maximum fee shown above.

4. Additional Services. In the event circumstances disclosed by the audit indicate that more detailed procedures are required in addition to that which would have been sufficient under ordinary circumstances, AUDITOR agrees to provide CITY in writing with an explanation of the extraordinary circumstances, together with an estimate of the additional fee necessary for

such detailed procedures. If CITY approves the additional fee, the work shall proceed; however, CITY may conditionally approve such fee under protest, in which case a payment of the fee shall not be deemed to waive any legal right which CITY might have to contest the propriety of the amount. Any additional services to be rendered hereunder shall be rendered on the basis of the hourly rate incorporated herein.

5. Hourly Rates. The hourly rates for rendition of services by AUDITOR are as listed on EXHIBIT "B", attached hereto and incorporated herein by this reference, for each principal and employee of AUDITOR who may perform services directly under this Agreement.

6. Expenses. AUDITOR may claim the actual, reasonable and necessary out-of-pocket expenses incurred in the reproduction of the annual audit and management letter and for such other actual expenses which are reasonable and necessary for the completion of the audit and management letter, if the same are approved in advance by CITY.

7. Default. Since time is of the essence of this Agreement, and because AUDITOR and CITY understand a late or incomplete audit may frustrate this Agreement entirely, the parties agree that if AUDITOR fails to render services in time, through no fault of CITY, CITY may, at its option, cancel this Agreement and upon giving written notice to AUDITOR of such cancellation, CITY shall be completely free of further liability to AUDITOR for services rendered or for contractual rights after the date of notification, or CITY may elect to enforce this Agreement by requiring AUDITOR to comply with the exact terms hereof. AUDITOR shall only be entitled to payment for the services rendered in preparing the report if the same is delivered in full and complete form to CITY. If delivery is late, then the parties hereby agree that the damages to CITY would be difficult if not impossible to determine; therefore, the total

fee, as calculated by the hours multiplied by the hourly rate, shall be reduced by five (5%) percent for each week the report is late.

8. Indemnification. To the fullest extent allowed by law, AUDITOR shall defend, indemnify, and save and hold harmless CITY, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of AUDITOR's willful misconduct or negligent act or omission while engaged in the performance of obligations or exercise of rights created by this Agreement, except those matters arising from CITY's sole negligence, active negligence or willful misconduct. The parties intend that this provision shall be broadly construed.

AUDITOR's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

9. Insurance. AUDITOR agrees to continuously maintain, in full force and effect, the following minimum policies of insurance during the term of this Agreement.

COVERAGE	LIMITS OF LIABILITY
Workers' Compensation	Statutory
Commercial General Liability	$1,000,000 each occurrence $2,000,000 aggregate Personal Injury: $1,000,000 each occurrence $2,000,000 aggregate

Automobile Liability	$1,000,000 combined single limit
Professional Liability (errors and omissions)	$1,000,000 per claim $2,000,000 aggregate

a. Form. AUDITOR shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

b. Additional Insureds. AUDITOR shall also provide a separate endorsement form or section of the policy showing CITY, its officers, agents, employees and volunteers as additional insureds for each type of coverage, except for Workers' Compensation and Professional Liability. Such insurance shall specifically cover the contractual liability of AUDITOR. The additional insured coverage under the AUDITOR's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from CITY's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office ("ISO") CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

c. Cancellation/Modification. AUDITOR shall provide ten (10) days written notice to CITY prior to cancellation or modification of any insurance required by this Agreement.

d. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of CITY (if agreed to in a written contract) before CITY's own insurance shall be called upon to protect it as a named insured.

e. Subcontractors. AUDITOR agrees to include in its contracts with all subcontractors the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, AUDITOR shall require its subcontractors to agree to be bound to AUDITOR and CITY in the same manner and to the same extent as AUDITOR is bound to CITY under this Agreement. Additionally, AUDITOR shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of CITY's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request.

f. Self-Insured Retentions. All self-insured retentions ("SIR") must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or CITY. CITY reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

g. Waiver of Subrogation. AUDITOR hereby agrees to waive subrogation which any insurer of AUDITOR may acquire from AUDITOR by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of CITY, its officers, agents, employees and volunteers for all worked performed by AUDITOR, its employees, agents and subcontractors.

h. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve AUDITOR of liability in excess of such coverage, nor shall it preclude CITY from taking such other actions as are available to it under any other provisions of this Agreement or law.

10. Term and Termination. This Agreement commences on July 1, 2021 and expires on May 31, 2023. Upon expiration of the initial term, the CITY has two (2) options to renew this Agreement for additional two (2) year terms. Such renewals shall be by written amendments to this Agreement.

CITY may terminate this Agreement, without any cause whatsoever by giving five (5) days advance written notice to AUDITOR, in which event, AUDITOR shall be entitled to be compensated for the services rendered up to the date and time of termination, provided that AUDITOR furnishes CITY with copies of all of its written work and data produced up to the time of its termination.

11. Waiver. The failure of CITY to enforce any provision of this Agreement shall not be construed as a waiver of the right of CITY to compel enforcement or demand recompense for damage.

12. Access to Records. Duly authorized representatives of CITY shall have right of access during normal business hours to AUDITOR's files and records relating to the services performed hereunder, and may review the files and records at appropriate stages during performance of the services.

13. Time is of the Essence. Time is of the essence of this Agreement.

14. Compliance with Laws. AUDITOR shall comply with all federal, state and local laws, ordinances and policies as may be applicable to the performance of services under this Agreement.

15. Ability to Perform. AUDITOR agrees and represents that it has the time, ability and professional expertise to perform the services required under this Agreement.

16. Assignment. AUDITOR is employed to perform unique personal services. AUDITOR shall not assign this Agreement without the prior written consent of City. AUDITOR shall not employ or otherwise incur any obligation to pay other specialists or experts for services in connection with this Agreement, without prior written consent of CITY.

17. Independent Contractor. AUDITOR shall act as an independent contractor, and covenants and agrees that it will conduct itself consistent with such status, that it will neither hold itself out as, nor claim to be, an officer or employee of CITY by reason of this Agreement. AUDITOR has the right to exercise its professional control over the manner in which it renders services, except as set out in this Agreement.

18. Representations and Warranties. AUDITOR warrants that it has not employed or retained any company or person, other than a bona fide employee working for AUDITOR, to solicit or secure this Agreement, and that it has not paid or agreed to pay any company or person, other than a bona fide employee, any fee, commission, percentage, brokerage fee, gift or any

other consideration, contingent upon or resulting from the award or making of this Agreement. For breach or violation of this warranty, CITY shall have the right to terminate as void this Agreement, without liability, or, in its discretion, to deduct from the Agreement price or consideration, or otherwise recover, the full amount of such fee, commission, percentage, brokerage fee, gift or contingent fee.

19. Successors in Interest. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.

20. Copyright, Ownership and Use of Materials. All tangible material ("Material") created or delivered pursuant to this Agreement is considered a work made for hire under the Copyright Act. For purposes of this Agreement, Material excludes tangible material related to AUDITOR's audit strategy, such as materiality calculations, risk assessments and testing thresholds. To the extent Material does not qualify as a work made for hire, AUDITOR hereby assigns to CITY all right, title, and interest, including but not limited to all copyrights, in all Material created by AUDITOR in its performance under this Agreement. Material constitutes the scope of work outlined in EXHIBIT "A" and attached hereto, and all written and other tangible expressions, including but not limited to, drawings (including computer aided drawings), papers, documents, reports, surveys, renderings, exhibits, sketches, maps, models, prints, paintings or photographs, in any and all media or formats in which such materials have been created or are maintained. All Material furnished by AUDITOR is, and shall remain, the property of CITY.

AUDITOR shall execute any documents necessary to effectuate such assignment. In the event that AUDITOR uses, employs, designates, or retains any person or entity who is not an employee of AUDITOR, to perform any work required of it pursuant to this Agreement,

AUDITOR shall require said person or entity to execute an agreement containing the preceding paragraph.

21. Attorney's Fees; Venue; Governing Law. If either party commences any legal action against the other party arising out of this Agreement or the performance hereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorney's fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

22. Modification. This Agreement and each provision contained herein may be waived, amended, supplemented or eliminated only by mutual written agreement of the parties.

23. Severability. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

24. Notices. Any notices to parties required by this Agreement shall be delivered personally or mailed, U.S. first class postage prepaid, addressed as follows:

CITY OF ROSEVILLE	AUDITOR
Dennis Kauffman Assistant City Manager/Chief Financial Officer 311 Vernon Street Roseville, CA 95678	Deborah Harper Lance, Soll, & Lunghard, LLP 2151 River Plaza Drive, Ste 150 Sacramento, CA 95833

Either party may amend its address for notice by giving notice to the other party in writing.

25. Proposal of Audit Services. A copy of AUDITOR's "Proposal for Audit Services to City of Roseville" dated April 7, 2021 is attached to this Agreement as EXHIBIT "A," for

information. The duties of AUDITOR and CITY include all matters within EXHIBIT "A," provided, however, that in the event of any inconsistency of this Agreement and EXHIBIT "A" the provisions of this Agreement shall govern.

26. Integrated Agreement. This is an integrated agreement and contains all of the terms, considerations, understanding and promises of the parties. It shall be read as a whole.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has caused this Agreement to be executed in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the _____ day of _____, 20__, and AUDITOR has caused this Agreement to be executed.

Proposal for Audit Services

QUALIFICATIONS OF TEAM (Continued)

CONTINUING EDUCATION

As a firm policy, all professional government staff meet the requirement of 40 hours of continuing education every year, with at least 24 hours in governmental accounting and auditing in a two-year period. Our educational programs include training from CalCPA, AICPA, Government Audit Quality Center, and GFOA.

We have continuous talent development throughout the year that focuses on new government pronouncements. Deborah Harper, the Engagement Partner assigned to this engagement and the firm's Learning Director, is an elite executive member of the AICPA Government Audit Quality Center Executive Committee. As a member of this committee, she routinely participates in the creating process of new AICPA Audit Guides and partakes in the discussion of Uniform Guidance requirements and changes, which allows her immediate access to oversight and cognizant agencies for any technical questions that may arise.

QUALITY OF STAFF ASSURANCE

LSL will ensure the quality of staffing over the term of the engagement through firm policies which provide for maintaining continuity of engagement teams, except in instances where an employee has left the firm or has been promoted. All other changes in staffing supervisor and above will first have the City's expressed written permission. Our focused efforts to obtain and retain quality staff have further enabled us to provide high levels of services to our clients. If changes are required, our extensive team of government auditors provides for qualified replacements.

LOCATION OF OFFICES

LSL is a regional firm with offices in Brea, Santa Ana and Sacramento, California, as well as Houston, Texas. The audit for the City of Roseville will be staffed primarily from our Sacramento Office, with additional resources utilized from our Brea Office.

PROJECT UNDERSTANDING

Lance, Soll & Lunghard, LLP (LSL) agrees to audit the City of Roseville financial statements for fiscal year ending June 30, 2021, with the options of two (2) additional two-year periods. LSL will perform the services listed in the "Scope of Services" under Section 3 of the RFP.

These audits are to be performed in accordance with generally accepted auditing standards as set forth by the American Institute of Certified Public Accountants; the standards applicable to financial audits contained in Government Auditing Standards (current edition), issued by the Comptroller General of the United States; the provisions of the Single Audit Act (current version at the time of the audit); the provisions of the U.S. Office of Management and Budget (OMB) Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations; the audit requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements of Federal Awards (Uniform Guidance); and when applicable, provisions of the American Recovery and Reinvestment Act.

PROJECT UNDERSTANDING (Continued)

The reports to be issued will include the following:

- An audit opinion on the fair presentation of the City's financial statements (CAFR) in conformity with generally accepted accounting principles.
- All reports required for a Single Audit in compliance with the provisions of *OMB Circular A-133,* the *Single Audit Act and the Uniform Guidance*.
- An Agreed-Upon Procedures report on the City's calculation of its Appropriation Limit in accordance with the *Article XIIIB Appropriations Limit Uniform Guidelines* and as mandated by the California Constitution.
- An Agreed-Upon Procedures report on the City's South Placer Wastewater Authority related to connection fees.
- An audit opinion for the "Bizz Johnson" Highway Interchange Joint Powers Authority financial statements.
- An audit opinion for the Community Development Corporation financial statements.
- An audit opinion for the Roseville Natural Gas Financing Authority financial statements.
- All reports required for the Roseville School-Age Child Care Program financial statements.
- An audit opinion for the Roseville Electric Enterprise Fund Basic financial statements.
- An audit opinion for the Roseville Environmental Utilities Enterprise Funds basic financial statements.
- An audit opinion for the South Placer Wastewater Authority financial statements.
- A report on internal control over financial reporting and on compliance and other matters based on an audit of financial statements performed in accordance with *Government Auditing Standards*. The report will communicate any significant deficiencies found during the audit important enough to merit attention by those charged with governance. Significant deficiencies will be identified as either material weaknesses or significant deficiencies. The report will also include material non-compliance noted.
- Other matters that are not significant deficiencies or material weaknesses and other non-material instances of non-compliance discovered during our audit will be reported in a separate letter to management.
- An audit communication letter addressed to the City of Roseville City Council including all required disclosures under SAS 114.

DISCUSSION OF RELEVANT ACCOUNTING ISSUES

The most recent relevant accounting issue impacting the City is the implementation of GASB Statement No. 95, *Postponement of Effective Dates of Certain Authoritative Guidance*. This statement postponed several key GASB pronouncements as a temporary relief to governments and other stakeholders in light of the COVID-19 pandemic. The two major pronouncements that could impact the City being delayed are GASB Statement No. 84, *Fiduciary Activities,* and GASB Statement No. 87, *Leases.* These statements are now effective in fiscal years 2021 and 2022, respectively.

Regarding how these pronouncements could impact the presentation of the City's financial reports, GASB Statement No. 84 will require all current fiduciary activities to be identified and analyzed. Agency Funds will no longer be valid and will be replaced with Custodial Funds that are required to present assets, liabilities, and equities in the Statement of Fiduciary Net Position. This statement could require the change in classification of some Fiduciary Funds to Special Revenue Funds, and vice versa, depending on the relationship to the City.

GASB Statement No. 87 will require all leases the City currently is under contract for, both as the lessor and lessee, to be analyzed and recorded on the City's financial statements. The term "operating", and "capital" leases will no longer be relevant, and all leases the City is under contract for will now be recorded and disclosed in some form.

PROJECT UNDERSTANDING (Continued)

IDENTIFICATION OF ANTICIPATED POTENTIAL AUDIT PROBLEMS

With our familiarity with similar government agencies, we do not anticipate unusual audit problems. The primary challenge we anticipate in general is the new audit landscape we have been put into given the current COVID-19 related pandemic. Audits are now being performed primarily remote, and we plan on this remaining in place for the future. This challenge will be alleviated by frequent communication between the audit team and the City of Roseville, a secure upload system to provide all documents, and clear expectations as far as fieldwork dates and timing of reports. The only special assistance requested form City staff would be the need to possibly scan documents that are currently not available in electronic form, as well as potentially read-only access to the City's financial reporting system to view items and information remotely.

TECHNOLOGICAL CAPABILITIES

LSL is always at the forefront of technology and finding ways to increase efficiency in our audits. Our goal is to effectively streamline the audit process to make the burden of an audit easier on our clients.

Adapting to a Post COVID-19 Audit Relationship

At LSL with technology being one of our core values, we were already operating in a cloud-based, often remote environment prior to the onset of COVID-19. We experienced no issues performing audits in a remote environment and have found ways to increase efficiencies and the quality of our audits utilizing some of the tools available. Having the ***LSL CaseWare Cloud Portal*** makes the exchange of secure information easy and painless, while utilizing ***Zoom and Microsoft Teams*** has allows us to communicate in a face-to-face setting, giving us the ability to share screens and information in real time.

CaseWare

We are partners with and utilize ***CaseWare*** to perform our audit, retain electronic work papers and supporting documentation in a completely cloud-based platform. During our preparation of the CAFR, all financial statements and schedules are linked to ***CaseWare*** and audit documentation which ensures accuracy and consistency with City records and eliminates the risk of manual errors.

LSL CaseWare Cloud Portal

Our web-based portal system gives our clients the ability to share information in a secure platform that is user friendly and easy to use. This portal is integrated with ***CaseWare OnPoint Collaborate***, a state-of-the-art tool which takes collaborative and accounting and auditing to the next level. It facilitates direct communication with clients throughout the audit to both provide and receive feedback, tracking of activity, audit requests and audit progress, all within a secure hub where access can be restricted to only individuals needing the information where necessary. This tool eliminates the need to send sensitive documents through e-mail and will reduce the confusion on the status of items being requested. Each client's dashboard can be customized to ensure it fits their exact needs.

Data Extraction & Audit Analytics

At LSL we believe a software is only as effective as those who know how to use it. That is why we train all of our staff on and incorporate into our audit approach the use of ***CaseWare Analytics AI*** *and* ***CaseWare IDEA***. These two complement one another to create a risk-based transaction analysis tool that we utilize to scan transaction sets and find exceptions that warrant further investigation, as well as give our clients additional assurances that previously may not have existed. These tools give a high-level summary to users and reduce the time spent in transaction analysis but automatically performing multiple tests on the entire transaction set assisting in identifying duplicate payments, fictitious journal entries and developing expectations for analytical procedures utilized during the audit.

PROJECT UNDERSTANDING (Continued)

Experience with ERP Systems

More and more of our clients have updated their systems software with new Enterprise Resource Planning (ERP) systems in the past three years. We have been available for questions and recommendations, including assistance with the vendor selection process. Our clients upgrading to more sophisticated ERP systems has allowed us to gain a better understanding of each ERP system and its unique capabilities. We often obtain read-only access to our clients' software and can work directly within the system. This allows us to provide useful observations and recommendations in internal control and also provides for efficient audit test work. Some of the ERP and Property Tax System we have extensive experience with include ***Tyler Technologies (Munis, New World, Eden), One Solution, Oracle, Infor & Megabyte*.**

Innovation & Partnerships

At LSL, innovation is one our core values and principles at the firm. As mentioned previously, we utilize and are working with ***CaseWare*** and are creating ways to incorporate artificial intelligence techniques and robotic process automation into both the audit and financial reporting process. We are working to design these tools to not only maximize efficiency during the audit process, but also to give our clients tool and real-time data that they can utilize throughout the year to make informed decisions. Our goal is to create client dashboards that can **pull data directly from your ERP system** to ease your burden on reporting and to ensure the information you have at your fingertips is always as up to date as possible, providing the utmost value to our clients as more than just auditors.

PROJECT PLAN

We utilize a governmental audit program which we will tailor to the City's operations. The tailoring is necessary to accommodate specific client circumstances and to recognize differences in the organizational structure. Our audit programs are organized by financial statement category. This approach takes full advantage of our accumulated experience. The primary benefit is that the risk of omitting important procedures is substantially reduced. We believe that this approach tends to be the most effective and efficient for an entity such as the City. The audit procedures are listed in the most logical sequence which improves efficiency. The savings in effort and time gained by using our audit program can free an auditor's attention for unusual or difficult situations that may arise. The audit programs are designed to increase audit efficiency by linking financial statement assertions, audit objectives, and procedures that are basic to most governmental audit engagements.

PROPOSED SEGMENTATION

The services will be divided into three segments.

Segment 1 - Planning and Obtaining an Understanding: LSL will provide an annual audit communication letter, engagement letter, and Government Audit Quality Center information letter. The audit communication letter is to be provided to the City Council. In addition, this can be communicated orally to the City Council or audit-committee, if requested. This communication will discuss the planning stages, the responsibilities of the City Council, auditors, and management, and provide an opportunity for communication with us as the auditors.

An entrance conference will be scheduled ahead of the on-site visit that is used to obtain an understanding of the City's internal controls. This meeting helps to ensure that the transition to new auditors is as seamless as possible. Discussions in this meeting include, but are not limited to, the following: Understanding of reports and key milestones for deliverables, prior audit reportable conditions and issues, and "Prepared by Client" (PBC) schedules.

PROJECT PLAN (Continued)

LSL's audit team will meet before our initial on-site visit to brainstorm and discuss economic conditions, industry elements, and new standards that will affect the City. A trial balance is requested for our planning meeting to assist the LSL team in obtaining knowledge and preparing expectations for the audit year. We will compile a list of PBC items based on our review of the prior year's financial statements and the information gathered. This will be provided to the City one month prior to our visit or earlier if requested. We operate on a paperless software system and provide a secured cloud-based portal for all clients. The City will have a separate folder that can be customized to organize, and upload requested schedules, support documents, etc.

If available, a current Schedule of Expenditures of Federal Awards (SEFA) will be evaluated during this segment to make a preliminary determination of the City's major programs. This allows us to properly plan and schedule the timing of the Single Audit with the appropriate finance personnel as well as appropriate grant managers. LSL will make every effort to be proactive in our network of federal grants during the interim stages of the audit.

After our interim on-site visit, we will have an exit meeting to discuss potential weaknesses, if any, and provide any feedback for improvements or valuable information we have gathered from our outside clientele that would benefit the City.

Segment 2 - Financial Audit Testing: Based on the information gathered each year thus far, we will utilize a customized audit program based on the risk assessment developed during our assessment of the City's internal controls and *Government Auditing Standards*. The primary benefit of a tailored program is a focused set of procedures to address relevant areas. We believe that this approach will be the most effective and efficient by linking financial statement assertions, audit objectives, and procedures that are basic to most governmental audit engagements and critical to compliance with other material laws and regulations. We will annually compile another customized PBC list for the year-end on-site visit provided at least one month prior or earlier if requested. We will request a trial balance for our analytical review to be provided one week before our arrival.

Year-end fieldwork will include testing of the balance sheet, revenue and expenditures accounts, confirmation of selected balances, analytical procedures, evaluation of the internal controls, and preparation of reports and letters.

***Segment 3* - Conclusion:** Based on our year-end exit meeting we will schedule a plan to finalize the CAFR according to the timetable of the City. We will schedule dates for the initial and final drafts including time for the City review and approval of the financial statements. This period will also account for the review of the engagement partner and quality assurance partner. After the review and receipt of the signed representation letter from the City, we will provide the final report by **October 31st** or **December 23rd** of each year, depending on the report.

SAMPLE SIZE AND EXTENT OF STATISTICAL SAMPLING

Our approach may be to utilize statistical sampling in the areas of receipts, disbursements, utility billing, and payroll. Here we develop a statistical conclusion based upon an initial computer selected random sample which is based on the population and other risk factors identified. If errors are noted in the sample, the sample size will be expanded. We believe that a random selection can be efficient while providing each item in the population an equal chance of being selected. Additionally, we may select a stratified sample of all transactions over a specified dollar limit for review. This allows us to cover all high dollar value transactions not otherwise selected in the random sample. Our samples are selected randomly utilizing IDEA data analysis software.

PROJECT PLAN (Continued)

TYPE AND EXTENT OF ANALYTICAL PROCEDURES

For the audits of the financial statements, we will use analytical procedures as an overall review of the financial information in the preliminary and final stages of the audits. These procedures are designed to assist us in planning our audits and in assessing the propriety of the conclusions reached and evaluating the overall financial statement presentation. The procedures to be utilized consist of determining expectations for changes to significant revenue, expenditure, and balance sheet accounts, reading the financial statements and related notes, reviewing the budget and related material, and focusing on overall relationships within the financial statements. Once determined, these are reviewed to evaluate if the changes appear reasonable or require further analysis. For all significant differences, explanations are obtained as to why the situation occurred and additional substantive procedures may be applied, and related evidence gathered to resolve concerns and questions.

We ask that the City provide a check register electronically for July 1st forward (period after the audit year), so we can pre-select our sample for accounts payable cut-off test work and provide that information ahead of time. Our PBC list will detail out schedules we would like provided, which is directed straight from the audit report. Support requested and sampling for these schedules will be assessed each year based on the strengths and weaknesses of the internal control processes of the City, and the materiality level of the account. We will discuss our analytical variances with the City and obtain documentation that provides support for the accounts. Interim procedures will be completed no later than April 30th of each year.

APPROACH TO UNDERSTANDING THE CITY'S INTERNAL CONTROL STRUCTURE

To gain an understanding of the internal control structure over the financial statements, we will perform procedures as required by SAS 122-125. This will include a review of internal controls in the areas of financial reporting, cash, revenues and receivables, utility billing, expenses, accounts payable, payroll, capital assets, long-term debt, and grant reporting, as applicable.

Based on the result of our review, we will issue a management letter (SAS 115 Letter) that will identify any significant deficiencies and/or material weaknesses noted. This report is required by the *Government Auditing Standards* issued by the Comptroller General of the United States. Auditing Standards require auditors to obtain an understanding of the entity and its environment along with assessing the risks of material misstatements. LSL obtains an understanding through a variety of ways throughout the year, but the most pertinent time each year is during our interim on-site visit. We will conduct interviews with the management of finance along with each audit section responsible party (e.g., cashier, accounts payable clerk, payroll clerk, etc.) to review the processes and controls through observation and discussions. Based on our observations, we will sample transactions as part of a "walk-through" to verify the system of control is working in accordance with policies and procedures. Each year, we will provide a list of randomly selected City employees to interview for SAS 99 fraud interviews. This list will consist of all levels and across all departments within the City.

DETERMINING LAWS AND REGULATIONS SUBJECT TO AUDIT TEST WORK

The laws and regulations that will be subject to audit test work are determined from the applicable laws, regulations, contracts, and grant agreements which we identify through the understanding we obtain of the City and our extensive experience with governmental entities.

PROJECT PLAN (Continued)

DRAWING AUDIT SAMPLES

For tests of controls, we use audit sampling. Tests of controls are procedures directed towards determining the effectiveness of the design or operation of an internal structure policy or procedures. Normally, audit sampling is used for tests of controls and tests of compliance that involve inspection of documents and reports indicating the performance of the applicable policy or procedures and compliance with the applicable laws and regulations. These sampling procedures test the operating effectiveness of an internal control structure policy or procedures by determining how the policy or procedure was applied, the consistency with which it was applied during the audit period, and by whom it was applied. To achieve this goal, we will draw samples for disbursements, receipts, and payroll when applicable. Each document selected will be tested for various attributes that are designed to verify compliance with different aspects of internal controls and applicable laws and regulations. Additionally, each sample item will be tested for coding to the proper accounts and posting to the general ledger. Sample sizes vary based on the population and risk-based calculations.

The quoted fees for the services above include all out-of-pocket expenses and expenses will not be charged to the City. Progress payments will be made on the basis of hours of work completed during the course of the engagement. Interim billings shall cover a period of not less than a calendar month. The final ten percent (10%) of the total all-inclusive maximum price will be paid upon delivery of the firm's final reports.

COUNCIL COMMUNICATION

CC #: 1526
File #: 0200

Title:	General Financial Analysis Services - Professional Services Agreement
Contact:	Jeannine Thrash 916-774-5473 jthrash@roseville.ca.us Dennis Kauffman 916-774-5313 dkauffman@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.25.

RECOMMENDATION TO COUNCIL

Staff recommends Council adopt a resolution to approve a professional services agreement with Economic & Planning Systems, Inc. (EPS), and authorize the City Manager to execute it on behalf of the City.

BACKGROUND

The City contracts with consultants to perform various financial consulting services. EPS is a land economics consulting firm with over 30 years of experience in the full spectrum of services related to fiscal impact and analysis, public finance, and real estate market analysis. The City is currently working on several projects with EPS, including community facilities district formations and annexations, and staff recommends retaining EPS as the City's fiscal consultant. EPS is currently working on several projects for the City, but the current professional services agreement is set to expire on June 30, 2021. Approving a new agreement is in the City's best interests because it will allow the current projects to continue without delay and the City will not lose any traction by retaining a different consultant for these projects.

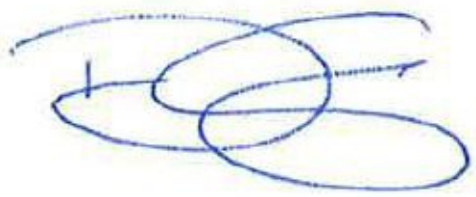
FISCAL IMPACT

There will be no fiscal impact from this agreement since the consulting services it covers will be for projects that will either be charged to an external party or, if not already budgeted, require staff to return to Council to recommend a budget adjustment. The three-year agreement allows services up to $100,000 per year, for an overall total compensation not to exceed $300,000.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) only applies to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the

activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3)).



CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal A - Remain fiscally responsible in a changing world
Goal F - Invest in well-planned infrastructure and growth

Respectfully Submitted,

Jeannine Thrash, Management Analyst

Dennis Kauffman, Assistant City Manger/Chief Financial Officer

PROFESSIONAL SERVICES AGREEMENT

Project: General Financial Analysis Services

THIS AGREEMENT is made and entered into this 20th day of May, 2021, by and between the City of Roseville, a municipal corporation ("CITY"), and Economic & Planning Systems, Inc., a California corporation ("CONSULTANT"); and

W I T N E S S E T H:

WHEREAS, CITY desires professional services consisting of general financial analysis services; and

WHEREAS, CONSULTANT has prepared a proposal dated May 18, 2021, which describes the scope of work to be performed by CONSULTANT, the budget for the work, and the schedule for performance of the work; and

WHEREAS, CONSULTANT is qualified and experienced to provide such professional services.

NOW, THEREFORE, the parties agree as follows:

1. Services. CONSULTANT shall perform, at the direction of CITY, the scope of services as described in EXHIBIT "A," attached hereto and incorporated herein by this reference.

2. Term. The term of this Agreement shall be for three (3) years, commencing on July 1, 2021 and expiring on June 30, 2024.

3. Compensation. For its services provided hereunder, CONSULTANT shall be compensated on a time and expense basis in accordance with the budget estimate as described in EXHIBIT "A". Total compensation shall not exceed one hundred thousand dollars ($100,000) per year, for an overall total compensation not to exceed three hundred thousand dollars ($300,000).

CONSULTANT shall submit one monthly invoice for its services. Such invoices shall be delineated by task, the person performing the services, and the hourly rate, which shall be stated in time increments of not greater than one tenth (1/10) hours. CITY shall pay invoices within thirty (30) days after receipt, if the services specified in the invoice have been satisfactorily completed.

4. Indemnification. To the fullest extent allowed by law, CONSULTANT shall defend, indemnify, and save and hold harmless CITY, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of CONSULTANT's willful misconduct or negligent act or omission while engaged in the performance of obligations or exercise of rights created by this Agreement, except those matters arising from CITY's sole negligence or willful misconduct. The parties intend that this provision shall be broadly construed.

CONSULTANT's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

5. Insurance. CONSULTANT agrees to continuously maintain, in full force and effect, the following minimum policies of insurance during the term of this Agreement.

COVERAGE	LIMITS OF LIABILITY
Workers' Compensation	Statutory
Commercial General Liability	$1,000,000 each occurrence $2,000,000 aggregate Personal Injury: $1,000,000 each occurrence $2,000,000 aggregate
Automobile Liability	$1,000,000 combined single limit
Professional Liability (errors and omissions)	$1,000,000 per claim $2,000,000 aggregate

a. Form. CONSULTANT shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

b. Additional Insureds. CONSULTANT shall also provide a separate endorsement form or section of the policy showing CITY, its officers, agents, employees and volunteers as additional insureds for each type of coverage, except for Workers' Compensation and Professional Liability. Such insurance shall specifically cover the contractual liability of CONSULTANT. The additional insured coverage under the CONSULTANT's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from CITY's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office ("ISO") CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum

insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

c. Cancellation/Modification. CONSULTANT shall provide ten (10) days written notice to CITY prior to cancellation or modification of any insurance required by this Agreement.

d. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of CITY (if agreed to in a written contract) before CITY's own insurance shall be called upon to protect it as a named insured.

e. Subcontractors. CONSULTANT agrees to include in its contracts with all subcontractors the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, CONSULTANT shall require its subcontractors to agree to be bound to CONSULTANT and CITY in the same manner and to the same extent as CONSULTANT is bound to CITY under this Agreement. Additionally, CONSULTANT shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of CITY's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request.

f. Self-Insured Retentions. All self-insured retentions ("SIR") must be disclosed to Risk Management for approval and shall not reduce the limits of liability.

Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or CITY. CITY reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

g. Waiver of Subrogation. CONSULTANT hereby agrees to waive subrogation which any insurer of CONSULTANT may acquire from CONSULTANT by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of CITY, its officers, agents, employees and volunteers for all worked performed by CONSULTANT, its employees, agents and subcontractors.

h. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve CONSULTANT of liability in excess of such coverage, nor shall it preclude CITY from taking such other actions as are available to it under any other provisions of this Agreement or law.

6. Records. CONSULTANT and its subcontractors shall maintain all files and records relating to the services performed hereunder during the term of this Agreement and for a period of not less than one (1) year after the date of termination or expiration. Provided, however, that in the event of litigation or settlement of claims arising from the performance of this Agreement, CONSULTANT and its subcontractors shall maintain all files and records until such litigation, appeals or claims are resolved. Duly authorized representatives of CITY shall have right of access during normal business hours and after reasonable notice to CONSULTANT's and subcontractors' files and records relating to the services performed

hereunder, and may review and copy the files and records at appropriate stages during performance of the services and during the one (1) year period following termination or expiration of this Agreement. CONSULTANT shall include this provisions in its contracts with all subcontractors.

7. Time is of the Essence. Time is of the essence of this Agreement.

8. Compliance with Laws. CONSULTANT shall comply with all federal, state and local laws, ordinances and policies as may be applicable to the performance of services under this Agreement.

9. Ability to Perform. CONSULTANT agrees and represents that it has the time, ability and professional expertise to perform the services required under this Agreement.

10. Governing Agreement. In the event of any conflict between this Agreement and its EXHIBITS, the provisions of this Agreement shall govern. In the event of any conflict between any of the EXHIBITS, the provisions of the first in order of attachment shall govern.

11. Assignment. CONSULTANT is employed to perform unique personal services. CONSULTANT shall not assign this Agreement without the prior written consent of CITY. CONSULTANT shall not employ or otherwise incur any obligation to pay other specialists or experts for services in connection with this Agreement, without prior written consent of CITY.

12. Independent Contractor. CONSULTANT, inclusive of its agents, officers, employees, volunteers, independent contractors, and subcontractors, shall act as an independent contractor, and covenants and agrees that it will conduct itself consistent with such status, that it will neither hold itself out as, nor claim to be, an officer or employee of CITY by reason of this Agreement.

13. Representations and Warranties. CONSULTANT warrants that it has not employed or retained any company or person, other than a bona fide employee working for CONSULTANT, to solicit or secure this Agreement, and that it has not paid or agreed to pay any company or person, other than a bona fide employee, any fee, commission, percentage, brokerage fee, gift or any other consideration, contingent upon or resulting from the award or making of this Agreement. For breach or violation of this warranty, CITY shall have the right to terminate as void this Agreement, without liability, or, in its discretion, to deduct from the Agreement price or consideration, or otherwise recover, the full amount of such fee, commission, percentage, brokerage fee, gift or contingent fee.

14. Successors in Interest. This Agreement shall be binding upon the successors, executors, administrators and assigns of the respective parties hereto.

15. Copyright, Ownership and Use of Materials. All tangible material ("Material") created or delivered pursuant to this Agreement is considered a work made for hire under the Copyright Act. To the extent such Material does not qualify as a work made for hire, CONSULTANT hereby assigns to CITY all right, title, and interest, including but not limited to all copyrights, in all Material created by CONSULTANT in its performance under this Agreement. Material constitutes the scope of work outlined in Exhibit A and attached hereto, and all written and other tangible expressions, including but not limited to, drawings (including computer aided drawings), papers, documents, reports, surveys, renderings, exhibits, sketches, maps, models, prints, paintings or photographs, in any and all media or formats in which such materials have been created or are maintained. All Material furnished by CONSULTANT is, and shall remain, the property of CITY.

CONSULTANT shall execute any documents necessary to effectuate such assignment. In the event that CONSULTANT uses, employs, designates, or retains any person or entity who is not an employee of CONSULTANT, to perform any work required of it pursuant to this Agreement, CONSULTANT shall require said person or entity to execute an agreement containing the preceding paragraph.

16. Termination of Agreement. The City may terminate this Agreement without cause by giving CONSULTANT ten (10) days advance written notice from the City Manager. CONSULTANT may terminate this Agreement without cause by giving CITY thirty (30) days advance written notice. In the event of termination through no fault of CONSULTANT, CITY shall compensate CONSULTANT for services performed as of the date of termination, upon the release to CITY of all Material hereunder, in any and all media or formats in which such materials have been created or are maintained. CITY retains the right to receive and use any Material, notwithstanding any termination or any dispute regarding the amount to be paid.

17. Attorney's Fees; Venue; Governing Law. If either party commences any legal action against the other party arising out of this Agreement or the performance hereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorney's fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

18. Modification. This Agreement and each provision contained herein may be waived, amended, supplemented or eliminated only by mutual written agreement of the parties.

19. Severability. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

20. Notices. Any notices to parties required by this Agreement shall be delivered personally or mailed, U.S. first class postage prepaid, addressed as follows:

CITY OF ROSEVILLE	CONSULTANT
Dennis Kauffman Assistant City Manager/Chief Financial Officer 311 Vernon Street Roseville, CA 95678	Jamie Gomes, Managing Principal Economic & Planning Systems, Inc. P.O. Box 340176 Sacramento, CA 95834

Either party may amend its address for notice by giving notice to the other party in writing.

20. Integrated Agreement. This is an integrated agreement and contains all of the terms, considerations, understanding and promises of the parties. It shall be read as a whole.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ___ day of _____, 20__, and CONSULTANT has caused this Agreement to be executed.

Subject: Master Services Agreement for Financial Consulting Services for Fiscal Year 2022-25; EPS #212082

Dear Dennis:

Economic & Planning Systems, Inc. (EPS) appreciates the opportunity to submit this proposal to provide consulting services to the City of Roseville (City). EPS has enjoyed working with the City over the years and looks forward to continuing that relationship in the next fiscal year and beyond. EPS understands the annual master services agreement for financial consulting services would begin in Fiscal Year 2021-22 and would be for a 3-year term.

Scope of Services

As may be requested by the City, EPS will provide ongoing financial consulting services to support the City's needs. Historically, EPS has assisted the City with the following types of analyses:

- Fiscal Impact Analyses
- Land-Secured Financing District Formation (Mello-Roos Community Facilities Districts)
- Economic Impact Analyses
- Public Finance (e.g., development impact fees)
- Real Estate Market and Feasibility Analyses
- Reuse, Revitalization, and Redevelopment Projects

Consistent with ongoing practices, when the City requests one or more specific services, EPS would prepare a Scope of Work in response to such a request. That specific Scope of Work would be accompanied by a budget identified for the specific task order.

Staffing

Key personnel expected to respond to City needs are Jamie Gomes, Ellen Martin, Amy Lapin, and David Zehnder, all of whom work in EPS's Sacramento office. Jamie and David are both Managing Principals of EPS and Amy and Ellen are both EPS Principals. Additional EPS staff are anticipated to provide additional technical support as needed.

Budget

EPS charges for its services on a direct-cost (hourly billing rates plus direct expenses), not-to-exceed basis; therefore, you will be billed only for the work completed up to the maximum authorized annual budget amount of **$100,000**. Travel, data, or reproduction expenses will be billed at cost, and invoices are submitted monthly and are payable on receipt. EPS's current Hourly Billing Rates are attached as part of this letter scope.

Again, EPS appreciates the opportunity to work with the City. Please call either of us at (916) 649-8010 if you have questions or require changes to this proposal.

Sincerely,

COUNCIL COMMUNICATION

CC #: 1536
File #: 0800-03

Title:	Read-Only Sublicense To License and Software Services - Agreement
Contact:	William Forsythe 916-774-5619 wforsythe@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.26.

RECOMMENDATION TO COUNCIL

Staff recommends City Council adopt a resolution authorizing the City Manager to execute the Sublicense To License and Software Services Agreement (Agreement) with the Sacramento Municipal Utility District (SMUD) and its software vendor PowerSettlements.

BACKGROUND

Roseville Electric and its Balancing Authority of Northern California (BANC) partners joined the California Independent System Operator's (CAISO) voluntary Energy Imbalance Market (EIM) on March 25, 2021. Participating in the EIM involves interacting with the CAISO through BANC. The monthly settlements for energy imbalances with CAISO are aggregated by BANC and distributed to members like Roseville according to our level of voluntary participation. BANC selected PowerSettlements as the software vendor for BANC and members like Roseville to check and validate the CAISO and BANC settlements. Since SMUD joined EIM two years ahead of Roseville and the other BANC members, PowerSettlements was selected by SMUD as the BANC-wide settlement system. Accordingly, Roseville was requested to enter into an Agreement to extend the software licensing terms to cover Roseville's use.

FISCAL IMPACT

There is no added fiscal impact to executing the sublicense Agreement. The funds for the software were already budgeted in the Electric Department FY2020-21 budget and will be in future years' budget requests for ongoing costs.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) only applies to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the

activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3)).

READ-ONLY SUBLICENSE TO LICENSE AND SOFTWARE SERVICES AGREEMENT (NON-EXCLUSIVE)

This Read-Only Sublicense to the License and Software Services Agreement (this "Read-Only Sublicense") is agreed to and made effective as of January 1, 2021 ("Effective Date") by and between Sacramento Municipal Utility District (hereinafter "SMUD," "BANC Administrator," or "Sublicensor"), a political subdivision of the State of California, on behalf of the Balancing Authority of Northern California (hereinafter "BANC"), and the City of Roseville, a municipal corporation of the State of California, (hereinafter a "Read-Only Sublicensee"). This Read-Only Sublicense and all terms and conditions herein are incorporated into the License and Software Services Agreement (Non-Exclusive) entered into by SMUD and Power Settlements Consulting and Software, LLC ("Power") on the December 26, 2019 (the "Agreement"). Capitalized terms used in this Read-Only Sublicense, which are not defined in this Read-Only Sublicense, will have the respective meanings ascribed to them in the Agreement.

1. License.

a. Grant of License to Read-Only Sublicensees. In consideration of the fees payable to Power pursuant to Article 5 of the Agreement, and the rights and obligations granted by Power to SMUD pursuant to Article 2 and Section 13.1 of the Agreement, Sublicensor hereby grants to each Read-Only Sublicensee a revocable, non-transferable, non-sublicenseable, non-exclusive right and sublicense to access on a read-only basis Sublicensor's hosted environment deployment of the Software, including the ISO Downloader Module, the Visual Analytics Module, the Settlement Analyzer Module, and the PPA Module (as Software and each module is defined in Article 1 of the Agreement), provided that each Read-Only Sublicensee shall have read-only access to and may use the PPA Module solely for the settlement of its PPAs in the EIM Market resulting from BANC entity scheduling coordinator allocation results processed by the BANC Administrator.

b. Obligations and Restrictions.

i. Sublicensor shall grant to each Read-Only Sublicensee access to Sublicensor's servers and the hosted environment deployment of the Software solely as necessary to perform under and effectuate this Read-Only Sublicense.

ii. Each Read-Only Sublicensee may only use the Software for One (1) of Sublicensee's CAISO scheduling coordinator IDs.

iii. Each Read-Only Sublicensee shall also adhere to the Restrictions set forth in Section 2.2 of the Agreement.

2. **Additional Payments for License to Read-Only Sublicensees**. Section Not used.

3. **Representations and Warranties**.

a. Sublicensor represents and warrants that it has the authority to enter into this Read-Only Sublicense on behalf of itself, BANC, and the BANC Members.

b. Each Read-Only Sublicensee represents and warrants that it has received, has reviewed, undertakes the obligations of Licensee specified in, and will be responsible for its own compliance with the following provisions of the Agreement: Section 2.2; Sections 6.1 and 6.2 (Audits); Article 7 (Confidential Information); Sections 8.1 and 8.4; Section 9.4; Sections 11.1 and 11.3; Article 12; and Appendix (Mutual Confidentiality and Non-Disclosure Agreement).

c. Each Read-Only Sublicensee further assumes all responsibility and liability on behalf of itself in exercising this Sublicense. Power's responsibilities are solely to Sublicensor and may not be assigned by Sublicensor, without Power's express written permission.

4. **Term and Termination of Read-Only Sublicense**.

a. The Term of this Read-Only Sublicense shall begin on the Effective Date and shall continue until the earlier of (i) termination or expiration of the Agreement by any party for any reason, or (ii) termination of this Read-Only Sublicense pursuant to Section 4(b), below.

b. Any of Sublicensor, a Read-Only Sublicensee, or Power may terminate this Read-Only Sublicense at any time, with or without cause, upon written notice to the other parties.

c. Section not used.

d. In the event of termination or expiration of the Agreement or this Read-Only Sublicense, all support and maintenance of the Software within the Read-Only Sublicense shall discontinue.

5. **Further Indemnification by Read-Only Sublicensee**. Each Read-Only Sublicensee shall indemnify, defend, and hold harmless Sublicensor and its officers, directors, shareholders, members, employees, agents, representatives, and customers (collectively, "Sublicensor Indemnitees") against (i) all liability, claims, costs, damages, and expenses incurred by Sublicensor Indemnitees relating to or arising out of the willful misconduct or negligence of Sublicensee from or concerning the Software, and (ii) all liability,

claims, costs, damages, and expenses incurred by the Sublicensor Indemnitees relating to or arising out of the Agreement and/or this Read-Only Sublicense. Each Read-Only Sublicensee agrees to reimburse Sublicensor for any amounts owed hereunder immediately upon demand, or alternatively, at the election of Sublicensor, to promptly and directly pay any such amounts with respect to any matter for which Sublicensor is indemnified pursuant to this Read-Only Sublicense (including attorneys' fees by Sublicensor in defense or prosecution of any claim to which this Read-Only Sublicense applies) to such person or entity as Sublicensor designates. Any amount to be paid by the Read-Only Sublicensee shall be paid to Sublicensor or designee, within a reasonable time following written demand therefore by Sublicensor. This provision survives termination or expiration of the Agreement or termination of this Read-Only Sublicense.

6. Limitation of Liability.

6.1 Exclusion of Consequential Damages. TO THE EXTENT NOT PROHIBITED BY LAW, IN NO EVENT SHALL EITHER PARTY BE LIABLE TO THE OTHER (NOR POWER TO ANY SUBLICENSEE) FOR ANY CONSEQUENTIAL, INDIRECT, SPECIAL, OR INCIDENTAL DAMAGES, INCLUDING BUT NOT LIMITED TO FAILURES OR LIMITATIONS OF THE SOFTWARE OR SOFTWARE SERVICES, INCLUDING LOSS, DAMAGE, CORRUPTION OR RECOVERY OF DATA, EVEN IF SUCH PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH POTENTIAL LOSS OR DAMAGE. THIS MUTUAL WAIVER OF CONSEQUENTIAL DAMAGES SHALL NOT APPLY TO THOSE CLAIMS FOR DAMAGES ARISING FROM THE GROSS NEGLIGENCE OR INTENTIONAL OR WILLFUL MISCONDUCT OF THE OTHER PARTY.

6.2 Limit on Damages. READ-ONLY SUBLICENSEE AGREES THAT POWER SHALL HAVE A MAXIMUM LIABILITY TO READ-ONLY SUBLICENSEE OF ONE HUNDRED AND NO/100 DOLLARS ($100.00).

7. Miscellaneous.

a. The parties agree and acknowledge that Power is a third-party beneficiary to this Read-Only Sublicense.

b. This Read-Only Sublicense supersedes any prior agreements, negotiations and communications, oral or written, and contains the entire agreement between any of Sublicensor, any Read-Only Sublicensee, and/or Power, as to the subject matter hereof. No subsequent agreement, representation or promise made by either party hereto, or by or to any employee, officer, agent or representative of either party shall be of any effect unless it is in writing and executed by the party to be bound thereby.

c. The Agreement, which is incorporated herein by reference, and any and all terms and conditions therein, shall apply with equal force and effect on each Read-Only Sublicensee.

d. Attorney's Fees. If any legal action is taken to enforce the terms of this Agreement by any party, the prevailing party shall be entitled to recover reasonable attorney fees and other costs and expenses incurred in connection with that legal action.

IN WITNESS WHEREOF, the parties hereto have executed this Read-Only Sublicense as of the day and year first above written.

COUNCIL COMMUNICATION

CC #: 1530
File #: 0103-17 & 0201

Title: Roseville Natural Gas Financing Authority - Fiscal Year 2021-22 Budget
Contact: Nick Rosas 916-774-5314 nrosas@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.27.

RECOMMENDATION TO COUNCIL

Staff is recommending the City Council, acting as the Roseville Natural Gas Financing Authority (RNGFA), approve the attached resolution adopting the RNGFA FY2021-22 budget.

BACKGROUND

Attached is the RNGFA budget for FY2021-22. The debt service expense budget of $16,784,500 represents principal and interest payments on the 2007 Gas Revenue Bonds, which financed the prepayment of natural gas used for power generation at the Roseville Energy Park.

FISCAL IMPACT

The budget document provides a financial summary of the revenues and expenses of the RNGFA. Approval of the annual budget has no new fiscal impact.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of a yearly budget meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Title:	Pleasant Grove Wastewater Treatment Plant Energy Recovery Project Design-Assist and Construction Contract - Change Order Allowance Increase
Contact:	Tracie Mueller 916-774-5688 trmueller@roseville.ca.us

Meeting Date: 6/16/2021
Item #: 7.28.

RECOMMENDATION TO COUNCIL

Staff recommends that City Council authorize the Environmental Utilities Director or his designee to approve and pay for contract change orders for the Design-Assist and Construction Agreement for the Pleasant Grove Wastewater Treatment Plant Energy Recovery Project with W.M. Lyles Company that could increase the original contract amount ($23,349,729) by no more than 10% ($2,334,973) or not to exceed a total contract amount of $25,684,702.

BACKGROUND

The City of Roseville (City) owns and operates the Pleasant Grove Wastewater Treatment Plant (PGWWTP) on behalf of the South Placer Wastewater Authority (SPWA) partner agencies. The PGWWTP Energy Recovery Project (Project) is currently being constructed as a separate parallel project to the PGWWTP Expansion Project and is being built on City-owned property located adjacent to, and immediately south of the existing PGWWTP fence line.

The Project is adding energy-recovery facilities at the PGWWTP that will beneficially utilize digester gas (which has a high methane fraction) produced by the new treatment processes constructed as part of the PGWWTP Expansion Project. The Project includes the following facilities: three microturbines (with plans for possible future fourth unit), receiving facility for High Strength Waste (such as pre-processed food waste and fats, oils and grease), systems for conditioning and upgrading the digester gas to produce renewable compressed natural gas r(CNG) to be used by the City's solid waste collection vehicles as fuel, a fueling station, and associated parking.

The newly added microturbines will produce electrical power to offset a portion of the PGWWTP's power demands and the heat needed for the anaerobic digestion process, thereby making it possible for all the methane gas generated from the PGWWTP Expansion Project to be consumed and converted to heat and electricity.

On November 6, 2019, the City Council approved and awarded a Design-Assist and Construction

Agreement to W.M. Lyles Company for the Project in the amount of $23,394,729 (Attachment A). In addition, the City Council authorized the Environmental Utilities Director or his designee to approve and pay for contract change orders for the Project that could increase the contract amount by no more than 5% or $1,169,736.

W.M. Lyles received the Notice to Proceed on November 13, 2019 which began the approximate 27-month period of construction of the Project with completion expected in February 2022. The current approved change orders on the Project total $412,564; however the next change order is expected to be approximately $546,000 which would use approximately $958,564 of the previously approved 5% change order allowance of $1,169,736. It is expected that the total change orders will continue to increase over the next 9 months of construction and soon exceed the approved 5% allowance; therefore staff recommend increasing the change order allowance from 5% to 10% to assure there is enough contract allowance to complete this Project.

The cause of the Project construction changes is based on many factors including material suppliers issues due to COVID-19, City staff requested changes due to lessons learned on the recent Dry Creek Wastewater Treatment Plant Cogeneration Project, City standards updates, clarifications to the design documents and other recommended improvements to the construction through the design-assist construction process.

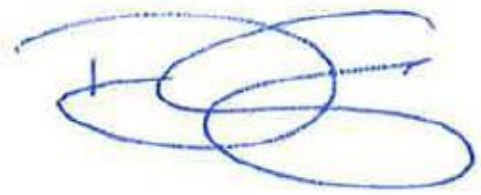
FISCAL IMPACT

The cost of the agreement is $23,394,729 and any approved change orders will be expended over a 27-month period. Funding for this Project is provided under the capital improvement program for SPWA. The SPWA Board has authorized the Project and adequate budget to fund the requested increase in change order allowance from $1,169,736 to $2,334,973. This project is jointly funded between SPWA Regional Partners (approximately 65% City of Roseville, 11% Placer County and 24% South Placer Municipal Utility District), as well as, the following grants and loan:

- California Energy Commission grant for up to $3,000,000, which was approved at the July 17, 2019, City Council Meeting (Resolution No. 19-334).
- Carl Moyer Grant through the Placer County Air Pollution Control District for up to $180,000, which was approved at the May 15, 2019, City Council Meeting (Resolution No. 19-205).
- State Water Resources Control Board State Revolving Fund loan for up to $32,748,824, which was approved at the April 15, 2020, City Council Meeting (Resolution No. 20-110).

ENVIRONMENTAL REVIEW

Implementation of the PGWWTP Energy Recovery Project was previously evaluated in the Pleasant Grove Wastewater Treatment Plant Expansion and Energy Recovery Project Final Initial Study/Mitigated Negative Declaration (IS/MND) (SCH# 2016122040) (certified by the City Council on April 6, 2017), and the Addendum to the IS/MND (SCH# 2016122040) (certified by the City Council on November 7, 2018). The improvement plans included in the design-assist and construction agreement are consistent with the project evaluated in the certified Final IS/MND and the Addendum, and consequently no additional CEQA action is required for the design-assist and construction agreement contract change order allowance approval.



CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal F - Invest in well-planned infrastructure and growth

Respectfully Submitted,

Tracie Mueller, Senior Engineer

Richard Plecker, Environmental Utilities Director

Dominick Casey, City Manager

Description

Resolution 21-270

Attachment A - Fully Executed Agreement Part One

Attachment A - Fully Executed Agreement Part Two

RESOLUTION NO. 21-270

APPROVING AN INCREASE IN CHANGE ORDER AUTHORITY

WHEREAS, a contract with W.M. Lyles Company for the Pleasant Grove Wastewater Treatment Plant Energy Recovery Project was approved by City Council on November 6, 2019; and

WHEREAS, due to material supplier issues due to COVID-19, City staff requested changes, City standards updates, clarification to design documents and other recommended improvements, it is expected that the total change orders will continue to increase over the next 9 months of construction and soon exceed the approved 5% allowance; and

WHEREAS, staff is therefore recommending a five percent (5%) increase in change order authority amount from five percent (5%) to ten percent (10%) of the total contract price; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that the Environmental Utilities Director, or his designee, is authorized to approve change orders for the project, consistent with the contract terms, provided that the net cost of all change orders shall not exceed ten percent (10%) of the original contract price.

PASSED AND ADOPTED by the Council of the City of Roseville this____day of _____, 20_, by the following vote on roll call:

AGREEMENT FOR THE DESIGN-ASSIST AND CONSTRUCTION OF

Pleasant Grove Wastewater Treatment Plant Energy Recovery Project

THIS AGREEMENT, made and entered into in duplicate, on November 6, 2019, by and between the CITY OF ROSEVILLE, a municipal corporation and located in Placer County, CA (hereinafter referred to as "City"), and W.M. Lyles Co. (Lyles) (CSLB License #422390 A and B), doing business as a California corporation hereinafter referred to as "Contractor").

RECITALS

WHEREAS, the City gave published NOTICE TO GENERAL CONTRACTORS requesting Statements of Pre-Qualifications ("SOPQ") to be submitted by April 1, 2019 for consideration by the City to become a Pre-Qualified Contractor approved by the City to submit a Bid Proposal for the design-assist and construction of the Pleasant Grove Wastewater Treatment Plant Energy Recovery Project; and

WHEREAS, Contractor, pursuant to the provisions of said notice requesting Statements of Pre-Qualifications, submitted an SOPQ to the City and such SOPQ is included in this Agreement and made a part hereof as Exhibit A; and

WHEREAS, the City, based on the representations and statements made by Contractor in its SOPQ, approved the Contractor as a Pre-Qualified Contractor which allowed Contractor to submit a Bid Proposal for the design-assist and construction of the Pleasant Grove Wastewater Treatment Plant Energy Recovery Project; and

WHEREAS, the City issued Request for Bid Proposals ("RFBP") to the approved list of Pre-Qualified Contractors to be submitted by July 22, 2019 to allow for the City to determine the best value ranking of all responsive and responsible Proposals using all technical information, required forms, cost information provided by Proposers in the Proposals, and other investigations by the City; and

WHEREAS, the Contractor, pursuant to the requirements of the City's RFBP submitted a Bid Proposal for the design-assist and construction of the Pleasant Grove Wastewater Treatment Plant Energy Recovery Project and such Technical Bid Proposal is included in this Agreement and part hereof as Exhibit B; and

WHEREAS, the City, after an evaluation of all opened Bid Proposals, ranked the Contractor's Bid Proposal as the highest ranked and best value Bid Proposal, and after final negotiations with Contractor, issued a written Notice of Intent to award a Contract to the Contractor on October 31, 2019 for the design-assist and construction of the Pleasant Grove Wastewater Treatment Plant Energy Recovery Project; and

WHEREAS, at a regular meeting of the City Council held on the 6th day of November 2019 by Resolution 2019-475 the City Council found and declared the Bid Proposal of Contractor to be the highest ranked best value Bid Proposal and thereupon awarded this Agreement to the Contractor for the construction of the Pleasant Grove Wastewater Treatment Plant Energy Recovery Project; and

WHEREAS, the Contractor is ready, willing and able to perform the aforementioned services required in accordance with the terms and conditions of this Agreement; and

NOW, THEREFORE, the City and Contractor agree as follows:

ARTICLE 1 - DEFINITIONS OF LANGUAGE USED, WORDS AND TERMS

Where used in the Contract Documents, the following words and terms shall have the meanings indicated. The meanings shall be applicable to the singular, plural, masculine and feminine of the words and terms.

The Contract Documents include the terms "as allowed," "as approved," "as ordered", "as directed" or terms of like effect to authorize an exercise of professional judgment by the City, Construction Manager or Engineer. In addition, the adjectives "reasonable," "suitable," "acceptable," "proper," "satisfactory," or adjectives of like effect are used to describe an action or determination of the City, Construction Manager or Engineer as to the Work. It is intended that such exercise of professional judgment, action or determination will be solely to evaluate, in general, the Work for compliance with the requirements of and information in the Contract Documents and conformance with the design concept of the completed Project as a functioning whole as shown or indicated in the Contract Documents (unless there is a specific statement indicating otherwise). The use of any such term is not intended to and shall not be effective to assign to City, Construction Manager or Engineer any duty or authority to supervise or direct the performance of the Work or any duty or authority contrary to the other provisions of the Contract Documents.

Specification Section Paragraphs entitled "Section Includes" summarize briefly what is generally included in the section. Requirements of Specifications are not limited by "Section Includes" paragraphs. Specifications and Drawings have been partially streamlined by intentionally omitting words and phrases, such as "the Contractor shall," "in conformity therewith," "shall be" following "as indicated," "a," "an," "the" and "all." Phrase "by City's Representative" or "by Engineer" or "by Construction Manager" modifies words such as "accepted," "directed," "selected," "inspected," and "permitted," when they are unmodified.

Phrase "to City's Representative " or "to Engineer" or "by Construction Manager" modifies words such as "submit," "report," and "satisfactory," when they are unmodified.

Words "Contractor shall" are implied when direction is stated.

Colons (:) are used to introduce a list of particulars, an amplification, or an illustrative quotation:

1. When used after designation of product, colons are used in place of words "shall be."

Whether the term or phrase is capitalized or in all capitals (for example, Contractor or CONTRACTOR) in the Contract Documents shall be deemed to be the same for purposes of the Definitions of Language Used, Words and Terms.

Agreement. This Agreement for design-assist and construction of the Pleasant Grove Wastewater Treatment Plant Energy Recovery Project, its exhibits, all documents incorporated therein, and all amendments and/or modifications hereto executed by the parties concerning the performance of the Work and the furnishing of labor, equipment, materials and incidentals in the construction of the Work. This Agreement supersedes all prior negotiations, representations, and/or agreements, whether written or oral.

Allowance. "Allowance" shall mean an amount of money set aside under the Contract for a special purpose identified and defined in the Contract Documents. See Exhibit D, ALLOWANCES AND ALLOWANCE AMOUNTS.

Applicable Laws. All laws, codes, ordinances, rules and regulations of governmental authorities having jurisdiction over the Site and/or the Work.

Application for Payment. A document prepared by Contractor and submitted to the City showing Contractor's entitlement to payments, the requirements of which are more fully described in Article 12.3, Applications for Payment.

Asbestos. Any material that contains more than one percent asbestos and is friable or is releasing asbestos fibers into the air above current action levels established by the United States Occupational Safety and Health Administration.

Beneficial Occupancy. Beneficial occupation or "Beneficial Occupancy" is a term that can be used to describe a distinct portion of the Work, that in the City's Representative's opinion, is capable of being used for its intended purpose, even though it may have some minor deficiencies, including outstanding punch list items to complete.

Bid Proposal. The offer of a Proposer to perform the Work pursuant to completed prescribed Bid Proposal requirements and forms, properly executed and guaranteed, and timely submitted.

Bonds: Labor and Material Bond, Performance Bond, and Warranty Bond. The payment bond (Labor and Materials Payment Bond) and Performance Bond issued by an admitted Surety covering the faithful performance and completion of the Work, including payment for all materials and labor furnished or supplied in connection with the Work, by Contractor. The Labor and Material Bond shall be in an amount equal to one hundred percent (100%) of the GMP and shall be for payment of just claims for materials, equipment, labor and subcontractors employed by the Contractor thereon. See Exhibit G, FAITHFUL PERFORMANCE BOND; Exhibit H, LABOR AND MATERIAL PAYPMENT BOND; and Exhibit I, WARRANTY BOND.

The Faithful Performance Bond shall be in an amount equal to one hundred percent (100%) of the GMP and shall be for the faithful performance of the Agreement, and for the fulfillment of such other requirements as may be provided by Law.

The Warranty Bond shall be issued by an admitted Surety and be in the penal sum equal to ten percent (10%) of the GMP.

The surety company shall familiarize itself with all of the conditions and provisions of this Agreement, and it waives the right of special notification of any change or modification of this Agreement or of extension of time, or of decreased or increased work, or of the cancellation of the Agreement, or of any other act or acts by the City or its authorized agents under the terms of this Agreement; and failure to so notify the aforesaid surety companies of changes shall not relieve the surety companies of their obligations under this Agreement.

All premiums for the Performance Bond, Labor and Materials Payment Bond, and Warranty Bond shall be included in the Cost of the Work and GMP. The City shall have the right to withhold any payment(s) under this Agreement until Contractor has fully complied with all bonding requirements.

Business Day. "Business Day" means any day when the office of the City Clerk of the City of Roseville is open for business.

Change Order. A document which is signed as recommended by the Construction Manager, accepted by the Contractor, and accepted by an authorized representative of the City, which authorizes an addition, deletion, or revision in the Work or an adjustment in the Guaranteed Maximum Price (GMP) or the Contract Time, issued on or after the Effective Date of the Agreement.

City. The word "City" refers to the City of Roseville, the governing body of which is termed the "City Council".

City's Representative. The person(s) designated by the Director of the City's Environmental Utilities Department who has been duly authorized to exercise control and supervision of the Work. A City's Representative generally will be either a professional engineer or architect, depending on the nature of the Work, but is not required to be a professional engineer or architect.

Claim. A demand or assertion by the Contractor seeking an adjustment of the GMP or Contract Times, or both, or other relief with respect to the terms of the Agreement. A demand for money or services by a third party is not a Claim.

Construction Change Directive (CCD). A CCD is a written order prepared by the Construction Manager and signed by the City, directing a change in the Work and stating a proposed basis for adjustment, if any, in the Contract GMP amount or Contract Time.

Construction Manager. The person designated, in writing, by the City to act as its representative at the Site and to perform administrative functions relating to this Agreement. The Construction Manager shall also furnish inspection services as provided by the contract between the Construction Manager and the City. All contact by the Contractor with the City shall be through the Construction Manager; unless otherwise specified or directed. Only the City may modify the Agreement.

Contract Documents. The "Contract Documents" shall consist of the following documents and all documents incorporated therein:

- Request for Bid Proposal (including appendices);
- Agreement (including exhibits A-L attached thereto);
- General Requirements (Division 1);
- Technical Specifications (Divisions 2 through 46);
- Appendices included with Technical Specifications;
- Contract Drawings, prepared by Engineer;
- Addenda issued during the RFBP period; and
- Permits from other agencies specifically required for the performance of the Work as may be required by law.
- City of Roseville's most current version (and Amendments to the current version) of Construction Standards and Design Standards
- Other Referenced Standard Specifications;
- Other Referenced Standard Plans

Exhibits to this Agreement (enumerated as follows):

- Exhibit A - Contractor's SOPQ dated April 1, 2019 excluding the financial statement;
- Exhibit B - Contractor's Technical Bid Proposal dated July 22, 2019 excluding Sections 7 through 11 and the appendices;
- Exhibit C - Guaranteed Maximum Price, Cost of Work and Fees;
- Exhibit D - Allowances and Allowance Amounts;
- Exhibit E - Designation of Subcontractors;
- Exhibit F - Completion Times and Liquidated Damages;
- Exhibit G - Faithful Performance Bond;
- Exhibit H - Labor and Materials Payment Bond;
- Exhibit I - Warranty Bond;
- Exhibit J - Escrow Agreement For Security Deposits In Lieu of Retention;
- Exhibit K - Workers' Compensation Insurance Certification;
- Exhibit L - Contractor's Insurance Certificates;

The following which may be delivered or issued on or after the Effective Date of the Agreement and are not attached hereto:

- Notice to Proceed;
- Field Directive(s);
- Change Order(s);
- Construction Change Directive;
- Field Order(s).

There shall be no Contract Documents other than those listed above.

The Contract Documents are complementary; what is called for by any one of the documents is as binding as if called for by all the documents. It is the intent of the Drawings and Specifications to describe the Work to be constructed in accordance with the requirements of the Contract Documents. Any work, materials or equipment that may reasonably be inferred from the requirements of the Contract will be furnished and performed whether or not specifically called for. When words or phrases that have a well-known technical or construction industry or trade meaning are used to describe Work, materials or equipment, such words or phrases shall be interpreted in accordance with that meaning. The intent of the Drawings specifically includes the intent to depict construction that complies with all applicable laws, codes and standards. Subject to applicable law, including but not limited to California Public Contract Code Section 4100 et seq., and the terms of this Contract governing subcontracting, the Divisions and Sections of the Specifications and identifications of any Drawings shall not control Contractor in dividing the Work among subcontractors or suppliers or delineating the work to be performed by any specific trade.

Reasonably implied parts of the Work shall be performed as "incidental work" even though absent from the Drawings and Specifications. "Incidental" work shall be performed by Contractor and included in the Cost of the Work without an increase in the GMP. Incidental work includes any work not shown on Drawings nor described in Specifications, but which is necessary or normally or customarily required as a part of the Work shown on the Drawings or described in the Specifications to provide a complete installation which is fully connected and tied into the existing facilities and processes and is fully functional and operational. Incidental work shall be treated as if fully described in Specifications and shown on Drawings, and expense thereof shall be included in the GMP. Incidental work includes, but is not limited to, tasks required to be performed under Division 1, GENERAL REQUIREMENTS of the Specifications.

The technical specifications are presented in paragraphs for convenience. However, this presentation does not necessarily delineate trades or limits of responsibility. All paragraphs of the Specifications and Plans are interdependent and applicable to the Work as a whole.

The Specifications and all notes on the Drawings are directed to the Contractor unless otherwise indicated, and all work shall be performed by the Contractor even though phrases such as "the Contractor shall" or "shall be done by the Contractor" are omitted. Where terms such as "approved," "acceptable," "favorably reviewed," "review," "selected," "directed," "equivalent," "equal," or "satisfactory" are used, it shall mean by or to the Construction Manager and/or City's Representative and/or Engineer.

In resolving conflicts resulting from errors or discrepancies in any of the Contract Documents, the order of precedence shall be as follows:

(1) Permits from other agencies specifically required for the performance of the Work as may be required by law;
(2) Supplemental Agreements and Change Orders, the one dated later having the precedence over another dated earlier;
(3) Agreement;
(4) General Requirements (Sections 01 11 00 through 01 99 90);
(5) Technical Specifications (Division 2 and all other Divisions following);
(6) Contract Drawings;
(7) City of Roseville's most current version of Construction Standards and Design Standards and Amendments to the Current Version
(8) Other Referenced Standard Specifications;
(9) Other Referenced Standard Plans.

With reference to the Drawings, the order of precedence is as follows:

(1) Addenda/Change Order drawings govern over any other drawings;
(2) Enumerated dimensions govern over scaled dimensions;

(3) Detail drawings govern over general drawings; and
(4) Contract Drawings govern over standard drawings/plans.

The provisions of the Contract Documents shall take precedence over any Laws or Regulations applicable to the performance of the work unless such an interpretation of the provisions of the Contract Documents would result in a violation of such Law or Regulation.

Contract Time. The number of days or the dates stated in the Agreement to: (i) achieve Milestones, if any, (ii) achieve Substantial Completion; and (iii) complete the Work so that it is ready for final payment as evidenced by Construction Manager's written recommendation of final payment. See Exhibit F, COMPLETION TIMES AND LIQUIDATED DAMAGES.

Contractor. The individual, partnership, corporation or limited liability company who enters into the Agreement for the performance of the Work. The term "Contractor" means the Contractor or his authorized representative. The term "Contractor" also may include subcontractors, sub-tier subcontractors, consultants, equipment and material suppliers, and their employees.

Contractor's Plant and Equipment. The equipment, material, supplies and all other items, except labor, brought onto the Site by the Contractor to carry out the Work, but not to be incorporated in the Work.

Cost of the Work. Consists of those items of Work, which are paid for by City to Contractor, and consist of those categories of costs set forth as allowable on Exhibit C, GUARANTEED MAXIMUM PRICE, COST OF WORK AND FEE. The "Actual Total Cost of the Work" is the aggregate amount of costs and fee actually chargeable to City under the provisions of Exhibit C, GUARANTEED MAXIMUM PRICE, COST OF WORK AND FEE, up to the GMP.

County. Refers to Placer County where the Site is located.

CPM. A critical path method schedule in the form of precedents, networks, and time sequences.

Days. The word "Days" shall mean calendar days, including legal holidays, Saturdays and Sundays, unless specifically noted otherwise. The day shall be 24 hours measured from midnight to the next midnight.

Defective Work. Defective Work refers to Work that does not meet the requirements of the Contract Documents and has been identified to the Contractor by the Construction Manager in writing because the Work:

A. Does not meet the requirements of or conform to the Contract Documents; or

B. Does not meet the requirements of any applicable inspection, reference standard, test, or approval referred to in the Contract Documents; or

C. Has been damaged prior to Construction Manager's or Engineer's recommendation of final payment (unless responsibility for the protection thereof has been assumed by City as of the Substantial Completion date in accordance with the Contract Documents).

Punch list or other minor corrective items of work that are not in compliance with the Contract Documents do not meet to the definition of "Defective Work" as used in these Contract Documents. For work to be deemed "Defective Work," the Construction Manager must have notified the Contractor in writing of a defective item of the Work.

Engineer. The engineer, architect or specialty design consultant designated by the City to have design control over the Work or a specified portion of the Work, acting either directly or through duly authorized representatives. Such representatives shall act within the scope of the particular duties delegated to them. The Engineer may also furnish inspection services as provided by the Agreement. The Engineer may also

be referred to as the "City's Representative " if the definition is used in an Engineer role and capacity. For the purposes of this Agreement, the Engineer is Brown and Caldwell, Inc.

Direct. Action of the City or Construction Manager by which the Contractor is ordered to perform or refrain from performing work under the Agreement.

Drawings. Also referred to as "Plans." That part of the Contract Documents consisting of the graphical and technical requirements of the Agreement as included on the plan, profile, section and detail sheets, included in a response to Request for Information or any revisions issued by Engineer. Drawings, or reproductions thereof, show the location, character, dimensions and details of the Work to be done. Shop drawings and other Contractor submittals are not Drawings as so defined.

Equipment. (Construction): All machinery and equipment, together with the necessary supplies for upkeep and maintenance, including tools and apparatus necessary for the proper construction and acceptable completion of the Work contemplated. (Installation): All material or articles used in equipping a facility or apparatus required to fulfill a functional design.

Execution. Field or site performance, workmanship, installation, erection, application, field fabrication, quality control, and protection of installed products on the Site.

Extra Work. New or unforeseen work, or added work of a different character or function; or that involves revisions of the details of the Work on which Contractor based its GMP. If the extra work increases the Contractor's Cost of the Work and/or time to perform the Work, and is approved by the City via a written Change Order, the GMP and/or Contract Times shall be adjusted as provided in the Contract Documents. Extra Work shall not include Work which is shown, detailed or specified in the Contract Documents or which constitutes "Incidental Work" as defined within the Contract Documents definition above.

Fee. As applicable, means the fee payable to Contractor pursuant to this Agreement and as part of the GMP, as shown on Exhibit C, GUARANTEED MAXIMUM PRICE, COST OF WORK AND FEE.

Field Directive. A change in the scope of the Agreement that does not cause an increase in the Cost of the Work, nor an adjustment to the GMP or the Contract Time(s), unless the Construction Manager determines the Field Directive warrants a Change Order. Also referred to as a "Directive".

Field Order. A written instruction given to the Contractor by Construction Manager authorizing work that is a change to the scope of Work to be performed on a time and material basis or a lump sum cost agreed to between City and the Contractor.

Final Acceptance. Formal approval by City in accepting a portion of the Contractor's work as completed.

Final Completion. The date when the Work is 100% complete, including completion and acceptance of all punch list corrections, as certified by the Construction Manager.

Force Majeure. Force Majeure includes industry wide or nationwide labor dispute (excluding labor shortage), fire, unusual delay in transportation or delivery, unavoidable casualty, flood (assuming Contractor has taken reasonable precautions), earthquake, epidemic, civil disturbance, war, freight embargo, riot, sabotage (by persons other than Contractor or subcontractors), material shortage or any other similar act or condition, in each case only to the extent the event in question is beyond the reasonable control of and without the fault or negligence of Contractor. It is expressly agreed that the following matters shall not constitute Force Majeure:

- Lack of or inability to use funds for any reason;
- Any occurrence which results from the wrongful act, or wrongful omission, of the affected party, or the failure by the affected party to act in a prudent and proper manner and in accordance with good and accepted industry practices;

- Any failure by the affected party to reach agreement with any third party necessary to enable the affected party to perform its obligations under this Agreement;
- An event or circumstance, where the event or circumstance, or its effects on the affected party, or the resulting inability of the affected party to perform its obligations could have been prevented, overcome or remedied by the exercise by the affected party of the standard of care and diligence consistent with that of a reasonable and prudent person;
- Breakdown of Contractor's Equipment;
- Strike or industrial action of Contractor's employees or those of subcontractors; or
- Adverse weather conditions including, without limitation, wet weather, unless the weather is unusually severe for the Site.

Funding Agency or Funding Agencies. A government agency or agencies that the City is in contract with or planning to execute a contract with to obtain construction funds for financing of the Project. For this Project this includes:

- State Water Resources Control Board (SWRCB) including the United States Environmental Protection Agency (USEPA), the State of California and the California Infrastructure and Economic Development Bank that fund and administer the Clean Water State Revolving Fund (CWSRF) Program.

- California Energy Commission (CEC) that fund and administer the Alternative and Renewable Fuel and Vehicle Technology Program.

- Placer County Air Pollution Control District (PCAPCD) that fund and administer the Carl Moyer Program.

Furnish. The word "furnish" when used in connection with services, materials, or equipment, shall mean to supply and deliver specified services, materials, or equipment to the Site (or some other specified location) ready for use or installation and in usable or operable condition.

Guaranteed Maximum Price or "GMP". The amount set forth on Exhibit C, GUARANTEED MAXIMUM PRICE, COST OF WORK AND FEE, hereto, which may be increased or decreased in accordance with the provisions of the Contract Documents.

General Requirements. Division 1, GENERAL REQUIREMENTS, which forms the part of the Contract Documents establishing special conditions or requirements peculiar to the Work.

Hazardous Waste. The term Hazardous Waste shall include the meaning provided in Section 100 of the Solid Waste Disposal Act (42 USC Section 6903 and/or Section 25117 of the California Health and Safety Code) as amended from time to time, or any other hazardous material, hazardous waste, hazardous substance, pollutant, and/or contaminant with requirements under federal, State of California, or local law, statute, regulation, rule, ordinance, order, action, policy or common law.

Herein. Refers to information presented in the Contract Documents.

Hold Harmless. An agreement by one (1) party to indemnify and defend a second party when the second party is sued by a third party as a result of the first party's actions or inactions.

Holidays. The legal holidays as designated by the City including: New Year's Day, Martin Luther King Jr. Day, President's Day, Memorial Day, Independence Day, Labor Day, Columbus Day, Veteran's Day, Thanksgiving Day, the day after Thanksgiving and Christmas Day.

Inspector. Inspector shall mean the person(s), firm(s), or agency(ies) employed by the City to perform inspection during construction of the Work, under the direction of the Construction Manager. It shall also mean any representative of the City who will perform inspections of the Work for code compliance and

quality assurance reporting in addition to those inspections performed by the City's Representative and/or the Engineer. Said inspector may be the Construction Manager or may be another representative of the City.

Install. The word "install" when used in connection with services, materials, or equipment, shall mean to put into use or place in final position the services, materials, or equipment, complete and ready for intended use.

Laws and Regulations; Laws or Regulations. Any and all applicable laws, rules, regulations, ordinances, codes, and orders of any and all governmental bodies, agencies, authorities, and courts having jurisdiction over the Site or the Work.

Liens. Charges, security interests, or encumbrances upon Project funds, or personal property.

Liquidated Damages. The amount of dollars assessed for each and every calendar day required to complete the Agreement in excess of the Contract Time. See Exhibit F, COMPLETION TIMES AND LIQUIDATED DAMAGES.

May. "May," wherever or in whatever manner used, refers to permissive actions.

Milestone. An event specified in the Contract Documents relating to an intermediate completion date or time prior to Final Completion of all the work.

Notice of Completion. Formal action taken by the City in determining that the Contractor's Work has been completed, or as delegated pursuant to a City Council resolution, accepting the Work as fully completed. The written notice is signed by the City and filed with the County Recorder.

Notice to Proceed. A written notice given by the City to the Contractor fixing the date on which the Contract Times will commence to run and on which Contractor shall start to perform the Work under the Contract Documents.

Or Equal. Any product, equipment, material, thing, service, mean/method or service which is proposed by the Contractor for use in the Work, which is equal to or better than, and is as suitable as the product, equipment, material, thing, service, mean/method or service specified in the Contract Documents as to function, performance, reliability, quality, schedule and general configuration. Any "or equal" substitutions must be approved by the City.

Paragraph. For reference or citation purposes, a paragraph shall refer to the paragraph, or paragraphs, called out by paragraph number and alphanumeric designator.

Party. The City or the Contractor individually, and "Parties" shall mean the City and the Contractor collectively.

Perform. Refer to "Provide."

Person. The term, "person", includes firms, companies, corporations and partnerships.

Plans. See "Drawings."

Preconstruction Services. Work performed prior to the issuance of first Drawing(s) for construction to the Contractor, which shall initiate the start of construction services.

Prejudiced. As used herein, the term "Prejudiced" shall include, but is not limited to, material interference with the City's timely consideration of action to prevent increases in the cost or time required to perform the

Work, ability to monitor the Contractor's increased costs resulting from the situation, to timely marshal facts, and to timely plan its affairs.

Product Data. Type of Shop Drawing comprised of standard illustrations, schedules, performance charts, instructions, brochures, diagrams, catalog cuts, and other information assembled by or for the Contractor and submitted by the Contractor to illustrate materials or equipment for some portion of the Work.

Products. Materials, equipment, systems, shop fabrications, mixtures, and source controls.

Progress Schedule. A schedule, prepared and maintained by the Contractor, describing the sequence and duration of the activities comprising of the Contractor's plan to accomplish the Work within the Contract Times.

Project. The design-assist and construction of the Pleasant Grove Wastewater Treatment Plant (PGWWTP) Energy Recovery Project (ERP), together with all on-site infrastructure, site improvements and appurtenances to be designed, constructed and installed in connection therewith, as more fully set forth and described in the Contract Documents and as required thereby or reasonably inferred therefrom.

Proposer. Any individual, firm, partnership, corporation or limited liability company, submitting a Bid Proposal for the Work contemplated, acting directly or through a duly authorized representative.

Provide. The words "provide" or "perform," when used in connection with services, materials, or equipment, shall mean to furnish and install said services, materials, or equipment complete and ready for intended use. When "furnish," "install," "perform," or "provide" is not used in connection with services, materials, or equipment in context clearly requiring an obligation of Contractor, "provide" is implied.

Punch List. Those minor items of work to be completed after Substantial Completion and prior to Final Completion, which do not prevent others from taking over defined areas of the Work to complete the Project.

Reference Specifications. Those standards, rules, method of tests or analysis, codes, and specifications of other agencies, engineering societies, or industrial associations referred to in the Contract Documents.

Request for Information. Also referred to as "Request for Clarification". A Request for Information (RFI) is issued by the Contractor to the Construction Manager requesting additional information necessary to clarify or amplify an item in the Contract Documents that the Contractor believes is not clearly shown or called for in the Drawings or Specifications or other portions of the Contract Documents, or to address problems which have arisen under field conditions. A RFI is not to be used for request for materials/equipment substitutions or value engineering/cost reduction incentive proposals.

Request for Quotation. A request for a proposed cost made to the Contractor by the City to add, delete or change the Work. A Request for Quote (RFQ) shall not be deemed to be a direction to proceed with any addition, deletion or change to the Work.

Samples. Physical examples of materials, equipment, or workmanship that are representative of some portion of the Work and which establish the standards by which such portion of the Work will be judged.

Separate Contractors. Those individuals or entities (including, but not limited to, concessionaires) who have entered into arrangements with City for the provision of labor, materials or other services in connection with the Project or other projects. The terms "Others" or "Expansion Project Contractor" or "EP Contractor" may also be used to indicate "Separate Contractors".

Shall or Will. Refers to actions entered into by the Contractor or the City as a covenant with the other party to do or to perform the action.

Shop Drawings (Submittals). Shop drawings (submittals) are drawings, diagrams, illustrations, schedules, performance charts, instructions, brochures, and other data which are prepared by the Contractor or any subcontractor, manufacturer, supplier, or distributor and which illustrate some portion of the Work.

Shown. Refers to information presented on the drawings, with or without reference to the drawings.

Site. Lands or areas indicated in the Contract Documents as being furnished by City upon which the Work is to be performed, including rights-of-way and easements for access thereto, and such other lands furnished by the City which are designated for the use of Contractor.

Specifications. That part of the Contract Documents consisting of written descriptions of the technical features of materials, equipment, construction systems, standards, and workmanship.

Specify. Refers to information described, shown, noted or presented in any manner in any part of the Agreement.

State. State of California.

State of California Specifications. The State of California Department of Transportation Standard Specifications in effect as documented in the Specifications and/or Drawings. Also referred to as State Standard Specifications and Caltrans Standard Specifications.

Subcontractor. An individual or entity who has entered into an agreement with Contractor or another subcontractor for the provision of labor, materials or other services required to be performed by Contractor under the Contract Documents. The term subcontractor does not include any separate contractor or any separate contractor's subcontractors.

Submittals. The information which is specified for submission to the Construction Manager in accordance with the Contract Documents.

Substantial Completion. Sufficient completion of the Project or the portion thereof to permit a utilization of the Project. Determination of Substantial Completion is solely at the discretion of the City. Substantial Completion does not mean complete in accordance with the Agreement nor shall Substantial Completion of all or any part of the Project entitle the Contractor to Final Completion under the Agreement.

Substantial Completion Date. Date when the City puts into service, the Project or that portion of the Project that has been determined to be Substantially Complete.

Sub-subcontractor. A sub-subcontractor is a person or entity who has a direct or indirect contract with a subcontractor to perform any of the Work associated with the Project. The term sub-subcontractor means a sub-subcontractor or an authorized representative thereof, also referred to as subtier-subcontractor.

Supplier. A manufacturer, fabricator, supplier, distributor, materialman, or vendor having a direct contract with Contractor or with any subcontractor to furnish materials or equipment to be incorporated in the Work by Contractor or any subcontractor.

Surety. One or more issuers of the Labor and Material Payment, Faithful Performance, and Warranty Bonds, each of which shall be admitted and licensed to do business in the State of California.

Surveyor. A land surveyor licensed in the State of California.

Trade Names. Where a certain product is called by its Trade Name, it is intended as a guide for type and quality.

Typical Details. Details of standard structures, devices or instructions referred to on the Plans and Specifications by title or number and developed by the Engineer.

Underground Facilities. All underground pipelines, including but not limited to, conduits, ducts, cables, wires, manholes, vaults, tanks, tunnels, or other such facilities or attachments, and any encasements containing such facilities, including those that convey electrical, gases, steam, liquid petroleum products, telephone or other communications, cable television, water, wastewater, storm water, other liquids or chemicals, or traffic or other control systems.

Unit Price Work. Work to be paid for on the basis of unit prices.

Utility. Public or private fixed works for, including but not limited to, the transportation of fluids, gasses, power, signals, or communications.

Work. Any and all direct and/or incidental obligations, duties, and responsibilities necessary to complete the design-assist and construction assigned to, or undertaken by, the Contractor pursuant to the Contract Documents including all labor necessary to produce such construction and all materials, equipment, and supplies incorporated or to be incorporated in the construction. Also, the completed construction or parts thereof required to be provided under the Contract Documents to provide a complete installation which is fully connected and tied into the existing facilities and processes and is fully integrated, functional and operational.

Work Day. A working day is defined as any day, except Saturdays, Sundays and City's Legal Holidays. Any work scheduled by the Contractor on non-working days (Saturdays, Sundays, and City Legal Holidays) shall be verified with the City at least 72 hours in advance. Depending on the circumstances, the City may request Contractor compensation for inspection work, at an hourly rate, for any work performed on non-working days and for overtime.

Work Site. Any and all areas where Work is be performed by Contractor as required in the Contract Documents with particular emphasis of Work performed at or adjacent to the City's Pleasant Grove Wastewater Treatment Plant located at 5051 Westpark Dr. Roseville, CA 95747.

ARTICLE 2 - SCOPE OF WORK

The City, in conjunction with its Engineer and other consultants, developed the Design-Assist and Construction of the Pleasant Grove Wastewater Treatment Plant Energy Recovery Project Contract Documents. The Contract Documents include the RFBP, this Agreement, Drawings, Specifications, and supplemental information to present the City's Final Design Submittal and timeline to meet the City's needs at the City's Pleasant Grove Wastewater Treatment Plant for this Project.

The Work includes but is not limited to construction of a new compressed natural gas (CNG) fueling station to fuel the City's solid waste garbage truck fleet including all the compressors, dispensers, high pressure storage, and fuel management systems required for a fully operational fast-fill station, biogas upgrading system to treat the City's digester gas (from anaerobic digesters constructed as part of the PGWWTP Expansion Project) to meet CNG engine fuel quality requirements, a microturbine cogeneration facility to use a blend of biogas-upgrading tail gas and natural gas to produce electricity and heat, and a high strength waste receiving station to allow for offloading of trucked material to be fed to the PGWWTP anaerobic digesters. The Work also includes all interconnecting and associated yard piping, electrical and instrumentation duct banks, and all other miscellaneous improvements in support of the Project, including asset management, start up and testing to provide a complete, integrated and operational system as specified and shown within these Contract Documents.

Based on the Final Design Submittal, and in accordance with the Contract Documents, the Contractor will work with the City, Engineer, Construction Manager and possibility other personnel that have regulatory and/or funding authority and as a Design Assist Team member and complete the following design assist activities:

- Conduct a constructability review of the Final Design Submittal Drawings and Specifications, and submit comments and identified mitigation solutions to the City.
- Identify cost savings and added value alternative design/construction solutions, and submit to the City for evaluation.
- Develop detailed cost estimates for identified alternatives when requested by City for the City's evaluation.
- Identify construction sequencing and the impacts of the identified alternatives on the sequencing.
- Develop a detailed schedule and the impacts of the identified alternatives on the schedule.
- Participate in a cooperative partnership relationship with City, Engineer, and Construction Manager to develop a comprehensive construction plan to address project risk and minimize existing facility disruptions.
- Participate in up to twelve (12) Final Design Coordination Meetings lasting up to four (4) hours each to present and work collaboratively to allow for issuance of the Project Drawings and Specifications for construction.

Note that the Engineer is the entity professionally responsible for the design of the Project. City acknowledges that Contractor is a general contractor and not an architect or engineer. Except with respect to any subcontractors of Contractor providing architectural or engineering services for the Project as design-build work, the Contractor's review of or input for any design documents, or Contractor's recommendation for any design concepts, is made solely in Contractor's capacity as a licensed contractor and not as a licensed design professional. Contractor is not responsible for any errors in the Engineer's design or failure of the design to comply with applicable laws, codes, rules and regulations, or lawful orders of public authorities. However, if Contractor observes any such nonconformity or errors it shall promptly notify City's Representative and the Engineer.

The City is working with the SWRCB to obtain CWSRF Program Project funding, and has already obtained funding from CEC and PCAPCD. Compliance with the Funding Agencies requirements contained within the Contract Documents RFBP and Specifications is required as part of the Contractor's Scope of Work. Whether listed or not in the Contract Documents, the Contractor shall meet the Funding Agencies requirements and cooperate in partnership with the City and Engineer as required to obtain grant and/or loan funding and payments.

In accordance with the timeline found in See Exhibit F, COMPLETION TIMES AND LIQUIDATED DAMAGES, the Contractor will commence construction at the Site of the Work on portions of the Work based on partial Construction Documents, provided these documents have been approved by the City and the Engineer. The Contractor shall provide all supervision, testing, construction, equipment, labor, materials, tools, subcontractors and services to complete the construction within the Contract Times listed in See Exhibit F, COMPLETION TIMES AND LIQUIDATED DAMAGES.

The Contractor is solely responsible for the proper handling, storage, installation, testing and demonstration; all in accordance with the Contract Documents and each manufacturer's recommendations/instructions. Failure to meet any performance requirement due to improper handling, storage, installation, testing or demonstrating will be corrected by the Contractor without an increase to the GMP.

ARTICLE 3 – CITY'S REPRESENTATIVE AND CITY'S CONSULTANTS

3.1 City's Representative. The City's Director of the Environmental Utilities Department has designated Tracie Mueller to act as the City's Representative. The City may change the individual(s) acting as the City's Representative(s), or delegate one or more specific functions to one or more specific City's Representative at any time without notice and without liability to Contractor. Each City's Representative is the beneficiary of all Contractor obligations to City, including without limitation, all releases and indemnities.

3.2 Engineer. The City has designated Brown and Caldwell to act as the Engineer. The City may assign all or part of the City's Representative's duties, rights and responsibilities to the Engineer. The Engineer is the beneficiary of all Contractor obligations to City, including without limitation, all releases and indemnities.

3.3 Construction Manager. The City has designated Brown and Caldwell to act as Construction Manager. The City may assign all or part of the City's Representative's duties, rights and responsibilities to the Construction Manager. The Construction Manager is the beneficiary of all Contractor obligations to City, including without limitation, all releases and indemnities.

3.4 Construction Consultant. The City may retain, a Construction Consultant(s) as it deems necessary to assist/advise the City staff and/or other City consultants during the progress of the Work. Any Construction Consultant retained by City for this Project will not have any formal contract administration responsibilities. The Construction Consultant(s) is the beneficiary of all Contractor obligations to City, including without limitation, all releases and indemnities.

ARTICLE 4 - CONTRACTOR'S REPRESENTATIONS

4.1 Representations and Warranties. In order to induce the City to enter into this Agreement, Contractor makes the following representations and warranties:

A. Contractor has visited the Site, has observed, familiarized itself with and understands the nature and extent of the Contract Documents, Work, Site, locality, actual conditions apparent upon reasonable observation, visible as-built conditions, and local conditions, and federal, state and local laws and regulations that in any manner may affect cost, progress, performance or furnishing of Work or which relate to any aspect of the means, methods, techniques, sequences or procedures of construction to be employed by Contractor and safety precautions and programs incident thereto.

B. Contractor has correlated its knowledge and the results of all such observations, examinations, investigations, explorations, tests, reports and studies with the terms and conditions of the Contract Documents in its capacity as a contractor and not as an architect or engineer.

C. Contractor has given City prompt written notice of all conflicts, errors, ambiguities, or discrepancies that it has discovered in or among the Contract Documents and record drawings and actual conditions in its capacity as a contractor and not as an architect or engineer.

D. Contractor is duly organized, existing and in good standing under applicable state law, and is duly qualified to conduct business in the State of California, including, but not limited to, maintaining in good standing its Contractor's license issued by the State of California.

E. Contractor has represented to the City that it has significant knowledge and experience and the requisite expertise, skills, labor, equipment, capabilities and all other necessary resources required to perform the Work.

F. Contractor has duly authorized the execution, delivery and performance of this Agreement, the other Contract Documents and the Work to be performed herein. The Contract Documents do not violate or create a default under any instrument, agreement, order or decree binding on Contractor.

The failure or neglect of Contractor to receive or examine any of the Contract Documents shall in no way relieve it from any obligation with respect to the Contract, and no claim for additional compensation or time will be allowed which is based upon a lack of knowledge of any Contract Documents.

Moreover, the Contractor acknowledges that its observation of the Site prior to the execution of the Agreement has provided information related to existing conditions, as described in paragraph 4.1.A, above, which may affect cost, progress or performance of the Work. Contractor further acknowledges and agrees that, in executing the Agreement, it is relying on its own observation of (1) the Site of the Work, (2) access to the Site, (3) all other data and matters requisite to the fulfillment of the Work and on its own knowledge of existing facilities on and in the vicinity of the Site of the Work to be constructed under the Agreement, (4) the conditions to be encountered, (5) the character, quality and scope of the proposed Work, (6) the quality and quantity of the materials to be furnished, and (7) the requirements of the Contract Documents, and other related information made available to Contractor by the City.

4.2 Supplementary Information. The Contractor hereby acknowledges that, prior to the execution of the Agreement, City has furnished the following Supplementary Information. These Supplementary Information documents are not part of the Contract Documents.

- Geotechnical Report for Pleasant Grove WWTP Cogeneration Facility, Roseville, California dated April 2017 prepared by Blackburn Consulting
- Placer County Air Pollution Control District Carl Moyer Grant Agreement Contract No. SCN101486 for the PGWWTP ERP
- California Energy Commission Grant Agreement Exhibit A – Scope of Work for the PGWWTP ERP
- California Energy Commission Grant Agreement Exhibit C – Alternative and Renewable Fuel and Vehicle Technology Program (ARFVTP) Terms and Conditions
- California Energy Commission Budget Forms Template
- Pleasant Grove Wastewater Treatment Plant Topographic Survey, dated December 2016, prepared by KSN, Inc.

ARTICLE 5 - CONTRACT ADMINISTRATION

5.1 Administration of the Contract

The City's Representative and the Construction Manager will provide administration of the Agreement as hereinafter described. If the status of any of the above parties should change, the City will provide written notice to the Contractor of such change.

5.2 City's Representative

5.2.1 General – The City's Representative has the authority to act on behalf of the City on change orders, field orders, progress payments, Contract Decisions, acceptability of the Contractor's work, and early possession.

5.2.2 Change Orders – The City's Representative has the authority to accept or reject change orders and cost proposals submitted by the Contractor or as recommended by the Construction Manager.

5.2.3 Progress Payments – The City's Representative has the authority to accept or reject requests for progress payments which have been submitted by the Contractor and recommended by the Construction Manager.

5.2.4 Contract Decisions – Should the Contractor disagree with the Construction Manager's decision with respect to the Agreement, the Contractor may appeal to the City's Representative in accordance with the provisions of the Agreement.

5.2.5 Acceptability of Work – The City's Representative has the authority to make the final determination of the acceptability of the Work.

5.3 Construction Manager

5.3.1 General - The Construction Manager is a representative of the City employed to act as advisor and consultant to the City in construction matters related to the Agreement. The term Construction Manager may include more than one individual to perform contract administration and construction observation. Hereinafter, the term Construction Manager includes any and all representatives working under the direction of the Construction Manager.

All instructions to the Contractor and all communications from the Contractor to the City or the City's Representative shall be forwarded through the Construction Manager. The Construction Manager will have authority to act on behalf of the City only to the extent provided in the Contract Documents. The City has delegated its authority to the Construction Manager to make initial decisions regarding questions which may arise as to the quality or acceptability of materials furnished and work performed, and as to the manner of performance and rate of progress of the Work. The Construction Manager shall make initial decisions with respect to the Contractor's fulfillment of the Agreement and the Contractor's entitlement to compensation. The Contractor shall look initially to the Construction Manager in matters relating to the Agreement.

The Construction Manager's authority to act under ARTICLE 5, CONTRACT ADMINISTRATION, herein, and any decision made by it in good faith either to exercise or not to exercise such authority, shall not be interpreted or construed as control of or responsibility for any of the Work performed under this Agreement.

5.3.2 On-Site Representative - The Construction Manager will observe the progress, quality, and quantity of the Work to determine, in general, if the Work is proceeding in accordance with the provisions of the Contract Documents. The Construction Manager shall not be responsible for the superintendence of the construction site conditions; construction means, methods, appliances techniques, sequences, or procedures; operation of equipment; Contractor's personnel; or for safety practices or unsafe practices, precautions, and programs in connection with the Work.

In accordance with the provisions of these Contract Documents, the Construction Manager will make decisions relative to all matters of interpretation or execution of the Contract Documents.

5.3.3 Observation and Inspections of Construction - The Construction Manager shall observe the construction and shall have the authority to reject work and materials which do not conform to the Contract Documents, and to require special inspection or testing. Observation and inspection by the Construction Manager or an inspector is not an authorization to revoke, alter, or waive any requirements of the Specifications. Observation and inspection is the authorization to call the attention of the Contractor to any failure of the Work, materials or workmanship to conform to the Contract Documents. The Construction Manager shall have this authority including the ability to reject materials or, in any emergency, suspend the Work. The Contractor may appeal any such issue which it disagrees with to the Construction Manager for decision. If the decision of the Construction Manager is not satisfactory to the Contractor, the Contractor may appeal such decision to the City's Representative.

5.3.4 Acceptability of the Work - The Construction Manager has the authority to make a recommendation as to the acceptability of the Work.

5.3.5 Change Orders - The Construction Manager has the authority to initiate change orders; to

reject change orders proposed by the Contractor; to negotiate and recommend acceptance of change orders to the City; or to order minor changes in the Work that result in no cost to the City.

5.3.6 Construction Schedule - The Construction Manager has the authority to review and recommend acceptance of the progress schedule submitted by the Contractor at the start of the Work and subsequent significant revisions for conformance to the specified sequence of Work and logic.

5.3.7 Progress Payments - The Construction Manager has the authority to recommend acceptance or rejection of requests for progress payments which have been submitted by the Contractor.

5.3.8 Final Payment - The Construction Manager, with the assistance of the City's Representative and the Engineer, will conduct inspections to determine the date of Final Completion of the Work, and the Construction Manager will receive and forward to the City, for the City's review, written warranties and related documents required by the Agreement and assembled by the Contractor.

5.3.9 Contract Interpretation by the Construction Manager – Notwithstanding any omission from the Specifications or the Drawings it shall be the duty of the Contractor to call the Construction Manager's attention to apparent errors or omissions upon discovery by the Contractor and request instructions in writing before proceeding with the Work. The Contractor shall not unreasonably take advantage of any errors or omissions found by Contractor. If the Contractor discovers any errors or omissions that it believes affect the time or cost of performing the Work, it shall be entitled to request a Change Order. Contractor shall promptly notify the Construction Manager in writing of any design, materials, or specified method that the Contractor identifies as defective or insufficient, provided, however, that in doing so Contractor will be acting in its capacity as a contractor and not an architect or engineer, and that this section does not affect City's responsibility with regard to the Contract Documents. The Construction Manager may, by appropriate written instructions, correct errors and supply omitted information, which instructions shall be as binding upon the Contractor as though contained in the original Specifications or Drawings when incorporated into Change Orders. Such instructions shall be incorporated into the Agreement in accordance with the Change Order provisions of the Agreement.

Any discrepancies discovered by the Contractor between the Contract Documents and Site conditions or any inconsistencies or ambiguities in the Contract Documents shall be promptly reported, in writing, to the Construction Manager. Questions regarding the meaning and intent of the Contract Documents shall be referred in writing by the Contractor to the Construction Manager with a Request for Information (RFI). RFI procedures are further described in Section 01 33 50, REQUESTS FOR INFORMATION AND CLARIFICATIONS.

Work done by the Contractor after its discovery of such errors, omissions, discrepancies, inconsistencies or ambiguities without such notice and prior to response from the Construction Manager shall be done at the Contractor's risk and shall not be reimbursed as a Cost of the Work, nor be a basis for an increase in the GMP.

5.4 Engineer

5.4.1 General – The Engineer will have the authority to act on behalf of the City only to the extent provided in the Contract Documents. The Engineer shall not be responsible or have authority for the superintendence of construction site conditions; construction means, methods, appliances techniques, sequences, or procedures; operation of equipment; Contractor's personnel; or for safety practices or unsafe practices; precautions and programs in connection with the Work; or for any failure of the Contractor to comply with laws, regulations, rules, ordinances, codes, or orders applicable to the Contractor furnishing and performing the Work.

5.4.2 Interpretations - The Engineer has the authority to be the initial interpreter of the technical requirements of the Contract Documents. Either party to the Agreement may make written request to the Construction Manager for interpretations necessary for the proper execution or progress of the Work. The

Construction Manager shall refer such written requests to the Engineer, who will render such interpretations. Where the Contractor has requested an interpretation from the Construction Manager, or been notified by the Construction Manager that such interpretation has been requested by the City, any work done before receipt of such interpretations, if not in accordance with same, shall be removed and replaced or adjusted as directed by the Construction Manager without additional expense to City and shall not be reimbursed as a Cost of the Work, or be a basis for an increase in the GMP.

5.4.3 Acceptability of the Work – The Engineer has the authority to make a recommendation as to the acceptability of the Work. The Engineer has the authority to recommend acceptance regarding the remediation or retention of Defective Work.

5.4.4 Submittal – The Engineer shall receive, through the Construction Manager, shop drawings, product data and samples for review in accordance with Section 01 33 00, SUBMITTAL PROCEDURES.

The Engineer has the authority to review and take other appropriate action upon the Contractor's submittal such as shop drawings, product data and samples, but only for conformance with the design concept of the Work and the information given in the Contract Documents.

ARTICLE 6 - CITY

6.1 General

The City, acting through the City's Representative or the Construction Manager, shall have the authority to act as the sole judge of the Work and materials with respect to both quantity, quality function, performance and reliability as set forth in the Agreement except as delegated to the Construction Manager in these Contract Documents.

6.2 Attention to Work

The City's Representative, Construction Manager and Engineer are designated in ARTICLE 3 herein. The Construction Manager will normally be available at the Site of the Work. An alternate Construction Manager representative will be designated when the designated Construction Manager's representative is not available at the Site of the Work. The Engineer may be available at the Site of the Work at certain specific times as needed to facilitate the Work. If the Contractor requires assistance from the Engineer, this assistance shall be coordinated through the Construction Manager. The Engineer will assign a representative to be available at the Site of the Work during the said specific times as needed.

6.3 Observation and Inspection

In addition to the Construction Manager's designated representative, the City may provide one or more inspectors to the Construction Manager to observe the Work and with the same authority as provided for in Article 5.3.3, Observation and Inspections of Construction.

Separate and independent from the observations and inspections above, the Work may be inspected by Building Officials, Fire Officials , Roseville Electric and/or Pacific Gas and Electric for code compliance. Such inspectors shall have the authority provided to them by their jurisdiction. Any design deficiencies or additional work required by these code inspections not required by the Contract Documents may be incorporated into the Work in accordance with the Change Order provisions of the Agreement

6.4 City's Right to Use or Occupy

The City reserves the right, prior to Final Completion, to occupy, or use, any completed part or parts of the Work, providing these areas have been approved for occupancy by the City. The exercise of this right shall in no way constitute a Final Acceptance of such parts, or any part of the Work, nor shall it in anyway affect the dates and times when progress payments shall become due from the City to the Contractor or in any

way prejudice the City's rights in the Agreement, or any bonds guaranteeing the same. The Agreement shall be deemed completed only when all the Work contracted has been duly and properly performed and accepted by the City.

Prior to such occupancy or use, the City and Contractor shall agree in writing regarding the responsibilities assigned to each of them for payments, security, maintenance, heat, utilities, damage to the Work, insurance, the period for correction of the Work, and the commencement of warranties required by the Contract Documents.

In exercising the right to occupy or use completed parts of the Work prior to the Final Acceptance thereof, the City shall not make any use which will materially increase the cost to the Contractor, without increasing the GMP, nor materially delay the completion of the Agreement, without extending the time for completion.

The part or parts of the Work, if any, which the City anticipates the use or occupancy of prior to Final Completion are noted in Section 01 12 16, WORK SEQUENCE. Failure to include a part of the Work in the above referenced Section, shall not limit the City's right to use or occupy parts of the Work not listed.

6.5 City's Right to Carry Out the Work

If the Contractor should neglect to prosecute the Work in accordance with the Contract Documents or fail to perform any provision of the Agreement, and fails within seven (7) days after receipt of written notice from the City to commence and continue correction of such neglect or deficiency with diligence and promptness, the City may, and without prejudice to any other remedy, make good such default, neglect or failure. A Change Order shall be issued unilaterally deducting from the payments then or thereafter due the Contractor, for the cost of correcting such deficiencies and for performing such work, including compensation for the Engineer's, the Construction Manager's, and City's additional services made necessary by such default, neglect or failure.

The City also reserves the right to perform and suspend any portion of the Work due to an emergency threatening the safety of the Work, public, City, and any property or equipment. No deductive Change Order shall be issued for an emergency not caused by Contractor.

6.6 City's Right to Perform Work and to Award Separate Contracts

The City reserves the right to perform work related to the Project with the City's own forces, and to award separate contracts in connection with the Project or other work on the Site. If the Contractor claims that delay, damage, or additional cost is involved because of such action by the City, the Contractor shall make such claim as provided elsewhere in the Contract Documents.

When separate agreements are awarded for different portions of the Project or other work on the Site, the term "Contractor" in the Contract Documents in each case shall mean the contractor who executes each separate Agreement.

The City will provide for the coordination of the work of the City's own forces and of each separate contractor with the Work of the Contractor, who shall cooperate therewith as provided in Article 7.10, Cooperation with Other Contractors.

6.7 Non-Responsibility of the City

The City shall not be held responsible for the care or protection of any material or parts of the Work prior to the Final Acceptance, except as expressly provided in the Contract Documents.

ARTICLE 7 - CONTRACTOR

7.1 Status of Contractor and Subcontractors

7.1.1 Contractor – It is stipulated and agreed that the Contractor shall be an independent contractor in the performance of this Agreement and shall have complete charge of persons engaged in performance of the Work. The Contractor shall perform the Work in accordance with its own means, methods, and appliances subject to compliance with the requirements of the Agreement.

7.1.2 Subcontractors – If any part of the Work to be done under this Agreement is subcontracted, the subcontract shall be in writing and shall provide that all Work to be performed thereunder shall be performed in accordance with the terms of the Contract Documents. The subcontracting of any or all of the Work to be done will in no way relieve the Contractor of any part of its responsibility under the Agreement. Subcontractors will not be recognized as having a direct relationship with the City. The persons engaged in the Work, including employees of subcontractors and suppliers, will be considered employees of the Contractor and their work shall be subject to the provisions of the Agreement. References in the Contract Documents to actions required of subcontractors, manufacturers, suppliers, or any person other than the Contractor, the City or the Construction Manager shall be interpreted as requiring that the Contractor shall require such subcontractor, manufacturer, supplier or person to perform the specified action.

The Contractor shall only employ subcontractors that are properly licensed in accordance with State law and are registered with the California Department of Industrial Relations (DIR).

Prior to commencement of any work by a subcontractor, the Contractor shall submit to the Construction Manager:

A. Verification that the subcontractor is properly licensed for the work it will perform.
B. Upon City's request, copies of subcontract agreements.
C. Copies of subcontractor's insurance certificates and endorsements.

7.2 Contractor's Representative

The Contractor shall provide in writing, a request to the City to delegate authority to an individual to serve in the capacity of authorized representative and shall wait to receive written confirmation from the City, before the authorized representative can start work. The authorized representative shall be qualified for the duties required and have complete authority to represent and to act for the Contractor. Said authorized representative has the authority to act in matters relating to the Agreement, and shall be personally present at the Site at all times while work is actually in progress on the Agreement. During periods when the Work is suspended, arrangements acceptable to the Construction Manager shall be made for any emergency work that may be required. The Contractor's authorized representative shall be fluent and proficient in the English language in order to understand, receive, and carry out oral and written communications or instructions relating to all job functions and responsibilities. All communications to and from the Contractor's authorized representative shall be binding as if given to or by the Contractor.

Contractor shall provide its authorized representative's contact information which shall include the representative's name, office street address, office telephone number, mobile phone number, home phone number, email address and the office mailing address if different from the street address.

The Contractor's authorized representative shall give its personal attention to and shall supervise the Work to the end that it shall at all reasonable times be prosecuted faithfully; and when the authorized representative is not personally present on the Work, the representative shall at all reasonable times be represented by a competent designated alternate, superintendent or foreman (approved in writing by the City, to act in this capacity) who shall receive and obey all instructions or orders given under this Agreement, and who shall have full authority to supply materials, tools, and labor without delay, and who shall be the legally appointed representative of the Contractor. The Contractor shall be liable for the faithful observation of any instructions delivered to the Contractor or to its authorized representative.

The Contractor's authorized representative shall not be replaced by a person to whom City has a reasonable objection. Furthermore, the City shall have the authority to remove the Contractor's authorized representative from the Project for reasons found in Article 8.3, Character of Workers.

7.3 Use and Protection of City's Site and Adjacent Property

7.3.1 With the approval of the Construction Manager, the Contractor may use designated portions of the City's Site for storage of construction equipment, materials and field offices provided the Contractor does not interfere with City's operations. The Contractor will not be allowed to unreasonably encumber the Site or adjacent areas with its materials and/or equipment. The City will not accept any responsibility for damage to or loss of the Contractor's equipment or materials stored on any Project related site caused by vandalism, nature, or otherwise, suffered by the Contractor. Protection of all construction equipment, stores, and supplies shall be the sole responsibility of the Contractor. Where additional work space is desired by the Contractor or where the City cannot provide the space to the Contractor, it shall be the Contractor's sole responsibility and expense to obtain such a space for its use.

7.3.2 All workers or representatives of the Contractor, subcontractors or suppliers are admitted to the Site only for the proper execution of the Work and have no tenancy without the express written permission of the City. Furthermore, no persons may occupy property owned by the City outside the limit of the Work, as indicated on the Drawings, without the express written permission of the City.

7.3.3 The Contractor shall enforce any instructions from the City or Construction Manager regarding combustible materials, placement of signs, danger signals, barricades, radios, noise, dust, and smoking. Upon completion of the Work, the Contractor shall remove all temporary barricades, signs and related materials.

7.3.4 The Contractor shall determine safe loading capacities and shall not overload any structure, building, pipe or other existing facility beyond its safe capacity during construction. In addition to any requirements imposed by law, the Contractor shall shore up, brace, underpin and protect as may be necessary all foundations and other parts of all existing structures, facilities and improvements on the Site or adjacent to the Site which are in any way affected by the Contractor's excavations or other operations connected with the Work. Prior to commencing any work which in any way affects adjoining or adjacent land or buildings thereon, or public utilities, the Contractor shall notify the Construction Manager to discuss responsibilities for properly notifying the owners/occupants of adjacent land and the protective measures taken by the Contractor. Upon request of the Construction Manager, the Contractor shall meet with the recipient of any notice or attend local public meetings as proper public outreach on local impacts caused by completion of the Work should be communicated to any parties that may be affected prior to commencing any work.

7.3.5 The Contractor shall take all necessary precautions to protect existing facilities on which Contractor is performing Work against the effects of weather and environmental elements.

7.3.6 All existing improvements and facilities shall be protected from any damage resulting from the operations, equipment or workers of the Contractor during the entire Contract Time.

7.3.7 The Contractor shall take all steps necessary to protect all structures, buildings, land and other facilities from fires and sparks originating from the Work. The Contractor shall comply with all laws and regulations regarding fire protection and shall comply with all instructions given by the City's fire department.

7.3.8 Any damage to existing conditions, or to any other improvement or property above or below the ground surface, whether public or private, arising from the Contractor's operations or performance of the Work shall be repaired within forty-eight (48) hours by the Contractor without expense to the City, unless disruption of the City's operations or creation of a safety hazard has occurred, in which case damage will be repaired immediately. The forty-eight (48) hour non-emergency repair response time may be extended

only if agreed to in writing by the City and/or private property owner. Any delays to the Project completion times caused by such repairs shall be considered non-compensable and no further extension of the Contract Time will be granted therefor. Should the Contractor not be timely in repairing damage caused by its operations or performance, the City shall take steps to protect against loss of property and life, in its sole discretion, and deduct entire cost of such Work from the next payment due the Contractor. No prior notice to the Contractor shall be necessary for the City to take such action.

7.3.9 The Contractor shall keep the Site reasonably free from debris, trash and construction wastes to permit Contractor to perform construction services efficiently, safely and without interfering with the use of adjacent land areas, and as further stipulated in the Contract Documents. When the Work is Substantially Complete, or a portion of the Work has been completed, Contractor shall remove all debris, trash, construction wastes, materials, equipment, machinery and tools arising from the Work or applicable portions thereof to permit City to occupy the Project or a portion of the Project for its intended use. Contractor shall provide a finished cleaning of all areas acceptable to the City before releasing any area to the City for occupancy.

7.4 Fees and Permits

The permit requirements for the Project are specified in Section 01 35 43, ENVIRONMENTAL PROCEDURES.

7.5 Compliance with Laws

The City is a municipal corporation in the State of California and is subject to the applicable provisions of law relating to public contracts as a Charter City. It is agreed that all provisions of law applicable to public contracts are a part of these Contract Documents to the same extent as though set forth herein and will be complied with by Contractor.

The Contractor, shall at its own cost and expense, observe and keep itself and its subcontractors fully informed of all existing and future legislated State and Federal Laws and City and County ordinances and regulations which in any manner affect those engaged or employed in the Work, or the materials and equipment used in the Work, or which in any way affect the conduct of the Work, and all such orders and decrees of bodies or tribunals having any jurisdiction or authority over the same. If any discrepancy or inconsistency is discovered in the Drawings, Specifications, or in any other part of this Agreement, in relation to any such law, ordinance, regulation, order or decree, the Contractor shall immediately report the same to the Construction Manager in writing. The Contractor shall at all times observe and comply with all existing laws, ordinances, regulations, orders and decrees; and shall protect, indemnify, and defend the City, the Construction Manager, the Engineer, the Funding Agencies and all of their officers, officials, employees, agents, volunteers, and servants against any claim or liability arising from or based upon the violation of any such law, ordinance, regulation, order, or decree, whether by the Contractor itself, employees, or its subcontractors.

Attention is directed to the following specific regulations and requirements that are included in the Contract Documents. This list of regulations is not warranted to be complete and the burden of ascertaining legal requirements that must be satisfied shall rest solely with the Contractor.

7.5.1 Davis-Bacon Wages- Pursuant to State Water Resources Control Board (SWRCB) Division of Financial Assistance Guidelines for Clean Water State Revolving Fund (CWSRF), the successful bidder must comply with the Davis-Bacon Act (40 U.S.C. 276a to a-7) as supplemental by Department of Labor regulations (29 CFR Part 5) it shall be mandatory upon the Contractor to whom the Work is awarded and upon any subcontractor under the Contractor to pay not less than Davis-Bacon wage rates. The Davis-Bacon requirements and rate determination is included within the RFBP APPENDIX A. The rate determinations may also be found on the Department of Labor's website at: http://www.wdol.gov/dba.aspx. It shall be mandatory upon the Contractor to whom the work is awarded and upon any subcontractor under the Contractor to pay not less than said specified rates or Davis-Bacon wage rates, whichever is higher, to all workmen employed by them in the execution of the Agreement.

7.5.2 Prevailing Wage Rates – This Agreement is subject to prevailing wage requirements pursuant to Section 1770 et seq. of the California Labor Code, which are hereby incorporated by reference and made a part hereof. Accordingly, Contractor shall comply with all applicable laws and regulations related to payment of prevailing wages and Contractor shall ensure that every lower-tier subcontractor complies with all applicable laws and regulations related to payment of prevailing wages. The Contractor and every lower-tier subcontractor shall pay not less than the prevailing rate of wages, as determined by the Director of the California Department of Industrial Relations pursuant to California Labor Code section 1773. The Contractor and every lower-tier subcontractor shall submit certified payrolls and labor compliance documentation electronically as required by the DIR and City, and via hard copy to the Construction Manager. Contractor is responsible for compliance with all prevailing wage requirements, and shall include these requirements in every subcontract. This Agreement is subject to compliance monitoring and enforcement by the California Department of Industrial Relations, as specified in California Labor Code section 1771.4.

7.5.3 DIR Registration- California Labor Code section 1725.5 requires the Contractor and all lower-tier subcontractors performing public works services to be currently registered with the California DIR, as specified in California Labor Code section 1725.5. California Labor Code section 1771.1 provides that a contractor or subcontractor shall not be qualified to bid on, be listed in a bid proposal (subject to the requirements of Section 4104 of the California Public Contract Code), or engage in the performance of any contract for public work, unless currently registered and qualified to perform public work pursuant to California Labor Code section 1725.5. The Contractor shall list the Contractor's current DIR registration number, and the current DIR registration number of all subcontractors, as part of its Bid Proposal.

Further information can be found on DIR's website at http://www.dir.ca.gov/Public-Works/Contractors.html. The above summary is provided solely for informational purposes, and does not in any way affect the Contractor's and subcontractors' obligation to comply in all respects with all other applicable laws and regulations. The Contractor shall disseminate these provisions to every lower-tier subcontractor.

7.5.4 Apprentices on Public Work Projects- The Contractor and any subcontractor or subconsultant shall comply with California Labor Code section 1777.5 et seq., and implementing regulations set forth in Title 8 of the California Code of Regulations, governing the employment of apprentices. Contractor and any subcontractor or subconsultant performing Public Work will be subject to penalties for apprenticeship violations in accordance with Labor Code section 1777.7. Please refer to the link below for guidance in meeting your obligation to satisfy the apprentice requirements for this Project: https://www.dir.ca.gov/das/DASApprenticesOnPublicWorksSummaryOfRequirements.htm.

7.5.5 Contractor Agrees to the Following:

7.5.5.1 The Contractor and subcontractors shall pay all mechanics and laborers employed directly on the Site of the Work, unconditionally and at least once a week, and without subsequent deduction or rebate on any account, the full amounts accrued at time of payment, computed at wage rates not less than those stated in the advertised specifications, regardless of any contractual relationship which may be alleged to exist between the Contractor or subcontractor and the laborers and mechanics.

7.5.5.2 The Contractor will post the scale of wages to be paid in a prominent and easily accessible place at the Site of the Work.

7.5.5.3 There may be withheld from the Contractor so much of accrued payments as the City considers necessary to pay to laborers and mechanics employed by Contractor or any subcontractor on the work the difference between the rates of wages required by the contract to be paid laborers and mechanics on the Work and the rates of wages received by the laborers and mechanics and not refunded to Contractor or subcontractors or their agents.

7.5.6 Travel and Subsistence Payments – Each worker needed to execute the Work must be paid travel and subsistence payments as defined in the applicable collective bargaining agreements filed in accordance with Section 1773.1 of the California Labor Code.

7.5.7 Workday – In accordance with the provisions of Division 2, Part 7, Chapter 1, Article 3 of the Labor Code, State of California, and in particular Sections 1810 to 1815 inclusive, thereof, eight (8) hours labor shall constitute a days' work and no laborer, worker, or mechanic in the employ of said Contractor, or any subcontractor doing or contracting to do any part of the Work contemplated by this Agreement, shall be required or permitted to work more than eight (8) hours in any one calendar day, and forty (40) hours in any one calendar week unless compensated at not less than time and a half as set forth in California Labor Code Section 1815. However, if the prevailing wage determination requires a higher rate of pay for overtime than is required under said Section 1815, then the overtime rate must be paid, as specified in California Code of Regulation Title 8, Group 3, Section 16200(a)(3)(F). The Contractor and each subcontractor shall also keep an accurate record showing the names and actual hours worked of all workers employed by them in connection with the work contemplated by this Agreement, which record shall be open at all reasonable hours for the inspection of the City or its officers or agents and by the Division of Labor Standards Enforcement of the Department of Industrial Relations, their deputies or agents; and it is hereby further agreed that said Contractor shall forfeit as a penalty to the City, the sum of the greater of (i) Twenty-Five and No/100 Dollars ($25.00) or (ii) the maximum penalty allowable by statute for each laborer, worker or mechanic employed in the execution of this Agreement by the Contractor or by any subcontractor for each calendar day during which such laborer, worker or mechanic is required or permitted to labor more than eight (8) hours in any one calendar day and forty (40) hours in one calendar week in violation of these provisions.

7.5.8 Certified Electricians – Workers performing work for an electrical contractor installing, constructing, or maintaining any electrical system covered by the National Electrical Code shall be certified as a General Electrician per California Labor Code Section 3099.

7.5.9 Receipt of Workers' Wages, Fee for Registering or Placing Persons In Public Works – Attention is directed to the provisions of sections 1778 and 1779 of the California Labor Code, which reads as follows:

> "Section 1778. Every person, who individually or as a representative of an awarding or public body or officer, or as a contractor or subcontractor doing public work, or agent or officer thereof, who takes, receives or conspires with another to take or receive, for his own use or the use of any other person any portion of the wages of any workman or working subcontractor, in connection with services rendered upon any public work is guilty of a felony."
>
> "Section 1779. Any person or agent or officer thereof who charges, collects, or attempts to charge or collect, directly or indirectly, a fee or valuable consideration for registering any person for public work, or for giving information as to where such employment may be procured, or for placing, assisting in placing, or attempting to place, any person in public work, whether the person is to work directly for the State, or any political subdivision or for a contractor or subcontractor doing public work is guilty of a misdemeanor."

7.5.10 Labor Discrimination – Attention is directed to Section 1735 of the Labor Code, which reads as follows:

> "No discrimination shall be made in the employment of persons upon public works because of the race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, or sex of such persons, except as provided in Section 12940 of the Government Code, and every contractor for public works violating this Section is subject to all the penalties imposed for violation of this chapter."
>
> Non-Discrimination. Contractor agrees that it shall not discriminate against any person on account of their sex, race, color, religious creed, ancestry, national origin, disability, medical condition, marital status, age, gender, military or veteran status, genetic information, or sexual orientation in violation of the Fair Employment and Housing Act or the Unruh Civil Rights Act. Upon a final determination by a court of competent jurisdiction

that the Grantee has violated either of these Acts, the City may, at its option, (1) withhold payments to Contractor under this Agreement until Contractor complies; or (2) suspend or terminate this Agreement. Contractor shall include the provisions of this paragraph in every subcontract, including procurement of materials and lease of equipment, unless specifically exempted by the City.

7.5.11 Workers' Compensation Insurance – The provisions of Article 13.1.2, Workers' Compensation Insurance, shall be considered as repeated herein.

7.5.12 Not Used.

7.5.13 Safety Standards – The Contractor shall comply with all applicable provisions of the Safety and Health Regulations of Construction, promulgated by the Secretary of Labor under Section 107 of the Contract Work Hours and Safety Standards Act (40 USC 327 et. seq.) as set forth in Title 29, C.F.R., CAL/OSHA, and the regulations issued thereunder. Compliance shall be the Contractor's sole responsibility, and neither the City, the Construction Manager nor the Engineer shall have any liability for non-compliance. See Article 7.7, Safety, for additional safety requirements.

7.5.14 Asbestos Related Work – All work involving asbestos containing material must be performed in accordance with California Labor Code, Sections 6501.5 through 6510, inclusive, and California Administrative Code, Title 8, Section 5208 and all other pertinent laws, rules, regulations, codes, ordinances, decrees and orders.

7.5.15 Public Records Act –

A. Ownership and Disclosure

Except as otherwise provided herein, all records, documents, drawings, plans, specifications, and all other information relating to the conduct of City's business, including information submitted by the Contractor ("Records"), shall become the exclusive property of City and shall be deemed public records. Said Records are subject to the provisions of the California Public Records Act (Government Code § 6250 et seq.). The City's use and disclosure of its records are governed by this Act. The City will use its best efforts to inform the Contractor of any request for any financial records or documents marked "Trade Secret," "Confidential" or "Proprietary" provided by the Contractor to City. The City will not advise as to the nature or content of documents entitled to protection from disclosure under the California Public Records Act.

B. Litigation Related to Disclosure

In the event of litigation concerning the disclosure of any Records, City's sole involvement will be as a stakeholder, retaining the Records until otherwise ordered by a court. The submitting party, at its sole expense and risk, shall be fully responsible for any and all fees for prosecuting or defending any action concerning the Records and shall indemnify and hold City harmless from all costs and expenses including attorney's fees in connection with any such action.

7.6 Compliance with Environmental Laws

During construction, the Contractor shall comply with all pertinent requirements of Federal, State, and local environmental laws and regulations, including, but not limited to, the Federal Clean Air Act, State and local air pollution and noise ordinances, construction site erosion control regulations. Specific requirements are further specified in Section 01 11 80, ENVIRONMENTAL CONDITIONS.

7.7 Safety

7.7.1 Contractor's Safety Responsibility – The Contractor shall be solely and completely responsible for conditions of the jobsite, including safety of all persons and property during performance of the Work. This requirement shall apply continuously and not be limited to normal working hours. Safety provisions shall conform to U.S. Department of Labor (OSHA), the California Occupational Safety and Health Act (CalOSHA), and all other applicable Federal, State, County, and local laws, ordinances, codes, including but not limited to the requirements set forth below, and any regulations that may be detailed in other parts of these Contract Documents. In the event of conflicting requirements, the most stringent requirement as it pertains to the Contractor's safety responsibility, shall be followed by the Contractor.

No provision of the Contract Documents shall act to make the City, the Construction Manager, Engineer or any other party than the Contractor responsible for safety. Neither the City nor the Construction Manager, Engineer or their respective officers, officials, employees, agents or volunteers or other authorized representatives will be responsible for having hazards, and/or potential hazards, corrected and/or removed at the location(s) where the work is to be performed. The Contractor agrees that neither the City nor the Construction Manager, Engineer or their respective officers, officials, employees, agents or volunteers or other authorized representatives will be responsible for taking steps to protect the Contractor's employees from such hazards and/or potential hazards, or for instructing the Contractor's employees to recognize such hazards and/or potential hazards, or to avoid the associated dangers. The Contractor agrees that with respect to the Work to be performed under this Agreement and the location(s) where such Work is to be performed, the Contractor will be responsible for not creating hazards, and for having hazards corrected and/or removed. The Contractor agrees that through the safety obligations contained in this Agreement and the Contractor's own inspection of the Site(s) where the Work is to be performed, the Contractor is aware and has been notified of the hazards and/or potential hazards to which the Contractor's employees may be exposed in the performance of the Work. The Contractor has taken and/or will take appropriate, feasible steps to protect the Contractor's employees from such hazards, and has instructed and/or will instruct its employees to recognize such hazards and/or potential hazards and how to avoid the associated dangers. The Contractor agrees that neither the City nor the Construction Manager, Engineer or their respective officers, officials, employees, agents or volunteers or other authorized representatives will be "employers" pursuant to California Labor Code Section 6400 and related provisions of law with respect to the Contractor, the Contractor's privities or subcontractors or Material Suppliers acting pursuant to this Agreement.

The Contractor shall indemnify, defend and hold City and Construction Manager, Engineer, Funding Agencies and their respective officers, officials, employees, agents and volunteers or other authorized representatives harmless to the full extent permitted by law concerning liability related to the Contractor's safety obligations in accordance with Article 13.2, General Indemnification Obligations.

If death or serious injuries or serious damages occur, the accident shall be reported immediately by telephone or messenger to both the Construction Manager and the City. In addition, the Contractor shall furnish the Construction Manager with a copy of the Employer's Report of Injury immediately following any incident requiring the filing of said report during the prosecution of the Work under this Agreement. The Contractor shall also furnish the Construction Manager with a copy of the Employer's Report of Injury involving any subcontractors on this Project. The Contractor shall make all reports as are, or may be, required by any authority having jurisdiction, and permit all safety inspections of the Work being performed under this Agreement.

If a claim is made by anyone against the Contractor or any subcontractor on account of any accident, the Contractor shall promptly report the facts in writing to the Construction Manager, giving full details of the claim.

7.7.2 Safety Program – The Contractor shall establish, implement, and maintain a written injury prevention program as required by Labor Code Section 6401.7. Before beginning the Work, the Contractor shall file with the Construction Manager a written Contractor Safety Program that provides for the implementation of all of the Contractor's safety responsibilities in connection with the Work at the Site and the coordination of that program and its associated procedures and precautions with safety programs,

precautions and procedures of each of its subcontractors and other Contractors performing work at the Site. The Contractor shall be solely responsible for initiating, maintaining, monitoring, coordinating, and supervising all safety programs, precautions, and procedures in connection with the Work and for coordinating its programs, precautions, and procedures of the other contractors and subcontractors performing the Work at the Site. The Safety Program should contain all the necessary elements for the Contractor to administer its program on the Site. At a minimum, this written Safety Program shall address the elements required by Labor Code Section 6401.7.

The Contractor's compliance with requirements for safety and/or the Construction Manager's acceptance for filing of the Contractor's Safety Program shall not relieve or decrease the liability of the Contractor for safety. The Construction Manager's review of the Contractor's Safety Program is only to determine if the above listed elements are included in the program. The Contractor's completion of review of the Safety Program does not confirm adequacy of the Program to protect workers. The Contractor is solely responsible to determine adequacy of the program to protect workers per the applicable Labor Code Section.

7.7.3 Safety Supervisor – The Contractor shall appoint an employee as safety supervisor who is qualified and authorized to supervise and enforce compliance with the Safety Program. The Contractor shall notify the Construction Manager in writing prior to the commencement of work of the name of the person who will act as the Contractor's safety supervisor and furnish the safety supervisor's resume to the Construction Manager.

The Contractor will, through and with its Safety Supervisor, ensure that all of its employees and its subcontractors of any tier, fully comply with the Project Safety Policies. The Safety Supervisor shall be a full-time employee of the Contractor whose responsibility shall be for supervising compliance with applicable safety requirements on the Site and for developing and implementing safety training classes for all job personnel. The City shall have the authority to require removal of the Contractor's Safety Supervisor if the representative is judged to be improperly or inadequately performing the duties; however, this authority shall not in any way affect the Contractor's sole responsibility for performing this work safely, nor shall it impose any obligation upon the City to ensure the Contractor performs its work safely.

7.7.4 Safety and Protection – The Contractor shall take all necessary precautions to prevent damage, injury, and loss to:

A. All employees on the Project, employees of all subcontractors, and other persons and organizations who may be affected thereby;

B. All the Work and materials and equipment to be incorporated therein, whether in storage on or off the Site; and

C. Other property at the Site or adjacent thereto, including trees, shrubs, lawns, walks, wetlands, pavements, roadways, structures, utilities, and underground facilities not designated for removal, relocation, or replacement in the course of construction.

The Contractor shall comply with all applicable laws and regulations of any public body having jurisdiction for the safety of persons or property or to protect them from damage, injury or loss and shall erect and maintain all necessary safeguards for such safety and protection. The Contractor shall notify owners of adjacent property and of underground facilities and utility districts when prosecution of the Work may affect them and shall cooperate with them in the protection, removal, relocation, and replacement of their property. All injury or loss to any property caused, directly or indirectly, in whole or in part, by the Contractor, any subcontractor, supplier or any other person or organization directly or indirectly employed by any of them to perform or furnish any of the Work or anyone for whose acts any of them may be liable, shall be remedied by the Contractor.

7.7.5 Excavation Safety – In accordance with the provisions of Section 6705 of the Labor Code, the Contractor shall submit, in advance of excavation of any trench or trenches five feet or more in depth,

a detailed plan showing the design of shoring, bracing, sloping, or other provisions to be made for worker protection from the hazard of caving ground during the excavation of such trench or trenches. If such plans vary from the shoring system standards set forth in the Construction Safety Orders of the Division of Industrial Safety in Title 8, Subchapter 4, Article 6, California Code of Regulations, the plans shall be prepared and signed by a registered civil or structural engineer employed by the Contractor, and all costs therefore shall be included in the price named in the Agreement for completion of the Work as set forth in the Contract Documents. Nothing in this article shall be deemed to allow the use of a shoring, bracing, sloping, or other protective system less effective than that required by the Construction Safety Orders. Nothing in this article shall be construed to impose a tort liability on the City, the Engineer, the Construction Manager, nor any of their officers, officials, employees, agents, consultants or volunteers. The City's review of the Contractor's excavation plan is only for general conformance to the Construction Safety Orders.

Prior to commencing any excavation, the Contractor shall designate in writing to the Construction Manager the "competent person(s)" with the authority and responsibilities designated in the Construction Safety Orders.

7.7.6 Safety Emergencies – In emergencies affecting the safety or protection of persons or the Work or property at the Site or adjacent thereto, the Contractor, without special instruction or authorization from the Construction Manager, will take reasonable action to prevent threatened damage, injury or loss. The Contractor shall give the Construction Manager prompt written notice if the Contractor believes that any significant changes in the Work or variations from the Contract Documents have been caused thereby.

7.7.7 Safety Violations – Should the Contractor fail to correct an unsafe condition, the City shall have the right to notify the Contractor through the Construction Manager that an unsafe condition may exist and must be corrected or the Work in question can be stopped in accordance with Article 9.6, **City Suspension of Work**, until the condition is corrected to the satisfaction of the City. No extension of time or additional compensation will be granted as a result of any stop order so issued. The notification and suspension of such Work or the failure to provide such notification and suspension by the City shall not relieve the Contractor of its sole responsibility and liability for safety and the correction of any unsafe conditions.

The City shall have the authority to require the removal from the Project of any worker and the foreman and/or superintendent in responsible charge of the work where safety violations occur. The City also delegates such authority to the Construction Manager as well.

7.7.8 Equipment Safety Provisions – The completed Work shall include the specified permanent safety devices, such as machinery guards and similar safety items, required by the State and Federal (OSHA) industrial authorities and applicable local and national codes. Further, any features of the Work, including City-selected equipment, subject to such safety regulations shall be fabricated, furnished, and installed in compliance with these requirements. All equipment furnished shall be grounded and provided guards and protection as required by safety codes. Where vapor-tight or explosion-proof electrical installation is required by safety codes, this shall be provided. Contractors and manufacturers of equipment shall be held responsible for compliance with the requirements included herein. The Contractor shall notify all equipment suppliers and subcontractors of the provisions of this paragraph.

7.7.9 Confined Spaces – The Project requires work in confined spaces and requires compliance with CAL/OSHA and Federal OSHA requirements. Confined spaces for the purposes of this article shall be as defined by the Division of Industrial Safety. Work within confined spaces of this Project is subject to the definitions and applicable provisions of Section 5156 *et seq.*, Title 8, Division 1, Chapter 4, Subchapter 7, Group 16, Article 108 of California Code of Regulations, and Title 29 Part 1926 of the Code of Federal Regulations.

In addition the City classifies the following existing facilities as confined space: the interior of pipelines, vaults, manholes, reservoirs and any other such structure or space which is similarly surrounded by confining surfaces as to permit the accumulation of dangerous gases or vapors. The confined spaces are "permit" confined spaces as defined by OSHA and CAL/OSHA and therefore entry is allowed only through

compliance with a confined space entry permit program by the Contractor that meets the requirements of 8 C.C.R. Section 5157. While the above mentioned locations have been identified as permit confined spaces, other permit confined spaces may exist. It shall be the responsibility of the Contractor to identify and classify these confined spaces.

It is anticipated that the Contractor may encounter hazardous conditions within these permit confined spaces which include, but are not limited to the following:

A. Exposure to hydrogen sulfide, methane, carbon dioxide and other gases and vapors commonly found in municipal sewers which could have or has the potential of having Immediate Danger to Life or Health Conditions (IDLH).

B. Exposure to atmosphere containing insufficient oxygen to support human life.

C. Exposure to combustible, flammable and/or explosive atmosphere.

D. Exposure to sewage which may contain bacteriological, chemical and other constituents harmful to humans.

E. Work in conditions where engulfment or entrapment may occur.

F. Work in environments which may be slippery and/or have uneven work surfaces.

G. Work in structures where workers may trip, slip and/or fall several feet.

H. Exposure to an oxygen enriched environment.

7.7.10 Public Safety and Convenience – The Contractor shall conduct its work so as to ensure the least possible obstruction to traffic and inconvenience to the general public and the residents in the vicinity of the Work and to ensure the protection of persons and property. No road or street shall be closed to the public except with the permission of the Construction Manager and the written approval by the proper governmental authority. Fire hydrants on or adjacent to the Work shall be accessible to firefighting equipment. Temporary provisions shall be made by the Contractor to ensure the use of sidewalks, private and public driveways and proper functioning of gutters, sewer inlets, drainage ditches and culverts, irrigation ditches and natural water courses.

7.8 Provisions for Handling Emergencies

It is possible that emergencies may arise during the progress of the Work, which may require special treatment or make advisable extra shifts of labor forces to continue the Work for twenty-four (24) hours per day. These emergencies may be caused by damage or possible damage to nearby existing structures or property by reason of the work under construction, or by storm, accidents, or leakage. The Contractor shall be prepared in case of such emergencies to make all necessary repairs and shall promptly execute such work when required; such emergency work will be reimbursed as a Cost of the Work and the GMP increased accordingly.

Upon start of the Work, Contractor shall provide means for immediate emergency notification of Contractor's designated representative and designated emergency alternates.

7.9 Nonstandard Working Hours

The Contractor may be required to prosecute the Work at night or outside of the normal working hours defined in Section 01 12 16-1.03.B, Hours of Work. Such work may be required due to project or operational constraints as defined in Section 01 12 16, WORK SEQUENCE, or if emergencies arise as provided for in Article 7.8, Provisions for Handling Emergencies. When required, ordered, or permitted to work at night,

the Contractor shall provide sufficient and satisfactory lighting and other facilities therefore. Except as provided in Article 7.8, above, for work outside of the normal working hours, the Contractor shall receive no extra payment, but compensation shall be considered as having been included in the GMP stipulated for the Work, except for authorized work performed outside of the Agreement.

7.10 Cooperation with Other Contractors

This paragraph shall serve as notice to the Contractor that the City may allow other contracts for other work at or near the Site of this Work. The Contractor shall afford other Contractors reasonable opportunity for the delivery and storage of their materials and the execution of their work, and shall properly connect and coordinate its work with theirs.

Should construction be under way by other forces or by other Contractors within or adjacent to the limits of the work or in the vicinity of the work to be done under this Agreement, the Contractor shall so conduct its operations as to interfere to the least possible extent with the work of such other forces or Contractors.

Any difference or conflicts which may arise between the Contractor and any other forces or Contractors, creating delays or hindrance to each other, shall be adjusted as determined by the Construction Manager.

Section 01 12 16, WORK SEQUENCE, indicates anticipated other construction activities within or adjacent to work to performed in this Agreement. City shall require contractors performing Work by Others to cooperate with Contractor and not unduly interfere with Contractor's performance of the Work.

ARTICLE 8 - CONTROL OF WORK AND MATERIAL

8.1 Means, Methods and Appliances

The means, methods and appliances adopted by the Contractor shall be planned and executed to produce the highest grade quality of work and will enable the Contractor to complete the Work in the time agreed upon. The City and Construction Manager shall not supervise, direct, or have control over, or be responsible for, Contractor's means, methods and appliances of construction or for the safety precautions and programs incident thereto, or for any failure of Contractor to comply with laws and regulations applicable to the furnishing or performance of Work.

8.2 Contractor's Responsibility for Work

Unless specified otherwise in the Contract Documents, until the Final Completion of the Work by the City, the Contractor shall have the charge and care and shall bear the risk of damage to any part thereof by the action of the elements or from any other cause, whether arising from the execution or non-execution of the Work.

The Contractor shall rebuild, repair, restore and make good all damages to any portion of the Work occasioned by any of the above causes before Final Completion and shall bear the expense, except such damages occasioned by the acts of the Federal government or acts of war.

In case of suspension of work from any cause whatsoever, the Contractor shall be responsible for the Work as previously specified and shall also be responsible for all materials delivered to the Site. Where necessary to protect the Work from damage, the Contractor shall, at its own expense, provide suitable drainage of the worksite and erect such temporary structures as necessary to protect the Work from damage during any period of suspension of work.

The Contractor shall provide twenty-four (24) hour emergency service for all maintenance and operations of the Work specified and shall supply the City with the name and phone number of the responsible person. Contractor will respond to requests for emergency service for the Work promptly upon notification. If the Contractor fails to provide this service after notice from City, City may perform such emergency service and the cost thereof shall be deducted from the next Progress Pay Estimate due the Contractor.

8.3 Character of Workers

None but competent superintendents, forepersons and workers shall be employed on the Work by the Contractor and its subcontractors at all tier levels. The Contractor shall remove from the Work any person who commits trespass, possesses firearms or other weaponry, is under the influence or is in the possession of alcohol or other drugs/controlled substance, or is, in the opinion of the City or Construction Manager, disorderly or profane, dangerous, abusive, insubordinate, incompetent, or otherwise objectionable. Such discharge shall not be the basis of any claim for compensation or damages against the City, its officers, officials, employees, agents, and volunteers, the Engineer, the Construction Manager, and their partners, officers, employees, agents or any representatives.

8.4 Supply of Sufficient Workers

The Contractor shall at all times employ qualified workers sufficient to prosecute the Work at a rate and in a sequence and manner necessary to complete the Work within the required Contract Time. This obligation shall remain in full force and effect notwithstanding disputes or claims of any type. At any time during the progress of Work, should the Contractor directly or indirectly (through subcontractors), refuse, neglect, or be unable to employ a sufficient number of qualified workers to prosecute the Work as required, then the City may require the Contractor to accelerate the Work and/or furnish additional qualified workers as City may consider necessary, at no cost to City.

If Contractor does not comply with the notice within seven (7) days of date of service thereof, City shall have the right (but not a duty) to provide qualified workers to finish the Work or any affected portion of Work, as City may elect. City may at its discretion, exclude Contractor from the Site, or portions of the Site or separate Work elements during the time period that City exercises this right. City will deduct from moneys due or which may thereafter become due under the Contract Documents, the sums necessary to meet expenses thereby incurred and paid to persons doing Work. City will deduct from funds or appropriations set aside for purposes of Contract Documents, the amount of such payments and charge them to Contractor as if paid to Contractor. Contractor shall remain liable for resulting delay, including liquidated damages and indemnification of City from claims of others.

Exercise by the City of the rights conferred upon the City in this Agreement is entirely discretionary on the part of the City. The City shall have no duty or obligation to exercise the rights referred to this Article 8.4, Supply of Sufficient Workers, and its failure to exercise such rights shall not be deemed an approval of existing Work progress or a waiver or limitation of City's right to exercise such rights in other concurrent or future similar circumstances. The rights conferred upon City under this Article 8.4, Supply of Sufficient Workers, are cumulative to City's other rights under any provision of the Contract Documents.

8.5 Materials and Workmanship

The Contractor shall provide safe access, including plants where materials or equipment are manufactured or fabricated, for the City Representative and inspectors to adequately inspect the quality of work and for conformance with the Contract Documents. The Contractor shall furnish the City Representative the necessary labor and facilities for such things as excavation in the compacted fill to the depths required to take samples. The Contractor shall provide adequate lighting, ventilation, ladders and other protective facilities as may be necessary for the safe performance of inspections.

Unless otherwise indicated in the Contract Documents or favorably reviewed by the Engineer, materials and equipment for the Work shall be the best grade in quality of a manufacturer regularly engaged in the production of such materials and equipment, or materials and equipment of comparable character. All materials must be of the specified quality and equal to approved samples, if samples have been submitted. All Work shall be done and completed in the best workmanlike manner, obtainable in the local market. All permanent materials and equipment shall be new unless otherwise specified.

Construction Manager will notify Contractor of Defective Work promptly upon identifying the Work at issue. All Defective Work or materials shall be promptly removed from the premises by the Contractor, whether in place or not, and shall be replaced or renewed with Work that meets the requirements of the Contract Documents. All materials and workmanship of whatever description shall be subjected to the inspection of, and rejection by, the Construction Manager if not in conformance with the Contract Documents.

Defective Work shall be modified, replaced, repaired or redone by the Contractor at no change in GMP (nor will any of the costs to correct Defective Work be reimbursable as a Cost of the Work) or Contract Time. Acceptance of Defective Work, without specific written acknowledgement and approval of the City, shall not relieve the Contractor of the obligation to correct such Work. Should the City determine that it is not feasible or in the City's interest to require Defective Work to be repaired or replaced, an equitable credit shall be made to the Costs of Work owed to the Contractor and a corresponding reduction in the GMP shall be made by agreement between the City and the Contractor (If the Contractor has been paid in full for its Work, the Contractor agrees to pay City the amount of the equitable credit mutually agreed to leave in place the Defective Work). If an equitable amount cannot be agreed upon, a Change Order will be issued and the amount in dispute resolved in accordance with the Contract Documents. The City and the City's consultants disclaim any and all responsibility for Work that is not in conformance with the Contract Documents. The Contractor shall have full responsibility for all direct consequences resulting from Defective Work, including without limitation all delays (pursuant to Section 01 40 00, QUALITY REQUIREMENTS), extra inspection and correction costs, consultant and attorneys' fees costs by the Contractor and re-Work.

The City agrees that after providing the Contractor with written notice of works that it deems to be Defective Work, the City shall allow the Contractor fifteen (15) days to investigate the Defective Work in order for the Contractor to determine whether it agrees that the work is Defective Work and if so, submit to the City, for its approval, a proposed remedy for the Defective Work, before the City shall charge the Contractor for any reasonable extra inspection, consultant and attorneys' fees costs associated with the Defective Work. If it is determined by a court or arbitrator, or the City otherwise agrees, that the work was not Defective Work, City shall bear all inspection, consultant and attorneys' fees costs incurred by City or Contractor as a result of the alleged Defective Work.

Unless otherwise stipulated in the Contract Documents, any defective material, equipment or workmanship, or any unsatisfactory or imperfect work which may be discovered before the Final Completion of the Work or within one (1) year thereafter, shall be corrected immediately upon the receipt of notice from the City, without extra charge, notwithstanding that it may have been overlooked in previous inspections and estimates. The City's failure to inspect work shall not relieve the Contractor from any obligation to perform sound and reliable Work as herein described. Any material, equipment and/or workmanship determined to be defective after the expiration of the one year express warranty provision (or beyond any furnished warranty extending beyond one year) shall be subject to the ten year statute relating to latent defects. The express warranties of the Contract Documents are in addition to, not in lieu of, the ten year statutory obligations.

In the event that the Contractor shall fail to comply with the conditions of the foregoing guarantee within fifteen (15) calendar days after the date of written notification of the defect, the City shall have the right, but shall not be obligated to repair, or obtain the repair of, the defect and the Contractor shall pay to the City on demand all costs and expense of such repair. Notwithstanding anything herein to the contrary, in the event that any defect in workmanship or material covered by the foregoing guarantee results in a condition which constitutes an immediate hazard to the health or safety, or any property interest, or any person, the City shall have the right to immediately repair, or cause to be repaired, such defect, and the Contractor shall pay to the City on demand all costs and expense of such repair. The foregoing statement relating to hazards to health, safety or property shall be deemed to include either temporary or permanent repairs which may be required as determined in the sole discretion and judgment of the City.

8.6 Use of Materials Found on the Site

The City does not warrant the suitability of any native material on the Site for use in the Project. The Contractor, with the approval of the Engineer, may use in the proposed construction such stone, gravel,

sand or other material as may be found on the Site and deemed suitable in the opinion of the Engineer. The Contractor shall replace at its own expense all of that portion of the material so removed and replaced with other suitable material. No charge for native materials so used will be made against the Contractor. The Contractor shall not excavate or remove any material from any location that is not within the excavation, as indicated by the slope and grade lines shown on the Drawings, without written authorization from the Engineer.

8.7 Existing Utilities

8.7.1 General – The location of known existing utilities and pipelines are shown on the Drawings in their approximate locations. However, nothing herein shall be deemed to require the City to indicate the presence of existing service laterals or appurtenances whenever the presence of such utilities on the Site of the Work can be inferred from the presence of other visible facilities, such as buildings, cleanouts, meter and junction boxes, on or adjacent to the Site of the Work.

The City will assume the responsibility for the timely removal, relocation, or protection of existing main or trunkline utility facilities located on the Site if such utilities are not identified by the City in the Contract Documents or which cannot reasonably be inferred from the presence of other visible facilities to the extent required by law.

8.7.2 Utility Location – It shall be the Contractor's responsibility to determine the exact location and depth of all utilities, including service connections, which have been marked by the respective utility owners and which the Contractor believes may affect or be affected by the Contractor's operations. The Contractor shall not be entitled to additional compensation or time extensions for work necessary to avoid interferences nor for repair to damaged utilities if the Contractor does not expose all such existing utilities as required by this Article.

Pursuant to Government Code Section 4216.2 the Contractor shall contact the appropriate regional notification center at least two (2) working days, but not more than fourteen (14) calendar days, before performing any excavation. The Contractor shall request that the utility owners conduct a utility survey and mark or otherwise indicate the location of their service.

After the utility survey is completed, the Contractor shall commence "potholing" or hand digging to determine the actual location of the pipe, duct, or conduit. The Construction Manager shall be given notice prior to commencing potholing operations. The Contractor shall uncover all piping and conduits, to a point one (1) foot below the pipe, where crossings, interferences, or connections are shown on the Drawings or indicated based on the utility survey, and prior to trenching or excavating for any pipe or structures, to determine actual elevations. New pipelines shall be laid to such grade as to clear all existing facilities which are to remain in service for any period subsequent to the construction of the run of pipe involved.

8.7.3 Utility Relocation and Repair – If interferences occur at locations other than those indicated in the Contract Documents with reasonable accuracy, the Contractor shall notify the Construction Manager in writing. The Construction Manager shall work together with the Contractor to supply a method for correcting said interferences in accordance with the responsibilities of this Article and Government Code Section 4215.

The City shall compensate the Contractor for the costs of locating and repairing damage not due to the failure of the Contractor to exercise reasonable care, and for removing or relocating such main(s) or trunkline utility facilities not indicated in the Contract Documents with reasonable accuracy, and for the cost of equipment on the Project necessarily idled during such work. The payment for such costs will be made as provided in Article 10.1, Change Orders. The Contractor shall not be assessed liquidated damages for delay in completion of the Project, when such delay is caused by the failure of the City or utility company to provide adequate advance information to the Contractor for removal or relocation of such utility facilities. Requests for extensions of time arising out of utility relocation or repair delays shall be filed in accordance with Section 01 32 16-1.13, ADJUSTMENT OF PROJECT TIME.

The public utility, that owns the affected utility/asset, shall have the sole discretion to perform repairs or relocation work or permit the Contractor to do such repairs or relocation work at a reasonable price. The right is reserved to the City and the owners of utilities or their authorized agents to enter into the Site for the purpose of making such changes as are necessary for the rearrangement of their facilities or for making necessary connections or repairs to their properties. The Contractor shall cooperate with forces engaged in such work and shall conduct its operations in such a manner as to avoid any unnecessary delay or hindrance to the work being performed by such forces and shall allow the respective utilities time to relocate their facility.

When the Agreement indicates that a utility is to be relocated, altered or constructed by others, the City will conduct all negotiations with the utility company and the work will be done at no cost to the Contractor, unless otherwise stipulated in the Agreement.

Temporary or permanent relocation or alteration of utilities approved by the utility owner and the City that is desired by the Contractor for its own convenience shall be the Contractor's responsibility and it shall make arrangements and bear all costs for such work.

8.8 Surface Restoration

Surface restoration shall be defined as that work necessary to restore the excavated area above backfill and the scarred surrounding work areas to a condition equivalent to or better than existed prior to the construction. This may include pavement replacement, concrete curbs and surface replacement, seeding, shrub and plant replacement, and restoration of ditches and drainage areas.

The replacement of grass and/or wild flowers shall be accomplished by seeding. The kind and type of seed is to be determined by the City. The City and Contractor shall agree before proceeding as to which plants and shrubs shall be saved or replaced.

The restoration of trench surfaces shall include measures to prevent surface erosion of the trench. This shall include seeding, cutoff walls, surface header boards, water bars, interceptor dikes, gravel filter dikes, or rip rap energy dissipaters. These measures shall be used as required to prevent surface erosion.

8.9 Disposal of Materials

Unless otherwise specified in the Contract Documents, the Contractor shall make arrangements for disposing of materials. Excess excavated material not required for backfill, debris, chemicals, sledges and other removed materials shall be disposed of legally by the Contractor.

When any materials, including excess of unsuitable excavated earth or other materials are to be disposed of off the Site, the Contractor shall first obtain a written permit from the property owner on whose property the disposal is to be made and shall file said permit or certified copy together with a written release from the property owner absolving the City from any and all responsibility in connection with the disposal of material on said property. Before any material is disposed of on said property, the Contractor shall obtain permission from the City's Representative to dispose of the material at the location designated in said permit.

Unless otherwise provided in the Contract Documents, full compensation for all cost involved in disposing of materials as above specified, including all costs of overhaul, shall be considered as included in the prices paid for the various contract items of work and no additional allowance will be made.

8.10 American Iron and Steel Requirement Compliance

Goods and services under this Agreement may be funded with monies made available by CWSRF that have statutory requirements commonly known as "American Iron and Steel;" that requires all of the iron and steel products used in the Project to be produced in the United States ("American Iron and Steel

Requirement") including iron and steel products provided by the Contactor pursuant to this Agreement. The Contractor shall comply with the American Iron and Steel Requirement, and all of the iron and steel products applicable to the American Iron and Steel Requirement used in the Project shall be and/or have been produced in the United States in a manner that complies with the American Iron and Steel Requirement, unless a waiver of the requirement is approved. The Contractor shall also provide any further verified information, certification or assurance of compliance with this paragraph, or information necessary to support a waiver of the American Iron and Steel Requirement, as may be requested by the City or Funding Agency. Notwithstanding any other provision of this Agreement, any failure to comply with this paragraph by the Contractor shall permit the City to recover as damages against the Contractor any loss, expense, or cost including without limitation attorney's fees incurred by the City or Funding Agency resulting from any such failure including without limitation any impairment or loss of funding, whether in whole or in part, from the Funding Agency or any damages owed to the Funding Agency by the City.

ARTICLE 9 - PROGRESS OF THE WORK

9.1 Commencement of Work

Within forty-five (45) calendar days after executed of the Agreement, written Notice to Proceed will be issued by the City to Contractor. Notwithstanding other provisions of the Agreement, the Contractor shall not be obligated to perform the Work, and the City shall not be obligated to accept or pay for such Work performed by the Contractor, prior to City's issuance of the Notice to Proceed. The Contractor shall provide the required Agreement bonds and evidences of insurance prior to the City's execution of this Agreement and prior to commencement of any Work.

The Contractor shall commence execution of the Work within ten (10) days after the date established in the Notice to Proceed for the commencement of Contract Time.

The Contractor shall give the Construction Manager written notice not less than five (5) working days in advance of the actual date on which the Work is to begin on the Site (excluding Preconstruction Services performed under the Agreement) will be started. The Contractor shall be entirely responsible for any delay in the Work which may be caused by its failure to give such notice.

9.2 Contract Time

All time limits for Substantial Completion, and Final Completion as stated in the Contract Documents are of the essence of the Agreement. The counting of Working or Calendar Days shall begin ten (10) Calendar Days from the date the Notice to Proceed is issued. The Contractor shall prosecute the Work so that the various portions of the Work shall be complete and ready for use within the times specified in Exhibit F, COMPLETION TIMES AND LIQUIDATED DAMAGES. It is expressly understood and agreed by and between the Contractor and the City that the Contract Time(s) for Contract Milestones, Substantial Completion of the Work and for Final Completion are reasonable times taking into consideration the average climatic and economic conditions and other factors prevailing in the locality and the nature of the Work known as of the date this Agreement is entered into.

9.3 Delays

9.3.1 Notice of Delays - When the Contractor foresees a delay in the prosecution of the Work and, in any event, promptly upon the occurrence of a delay to its Work, the Contractor shall notify the Construction Manager in writing of the occurrence of delay, providing the estimated extent of the delay and its cause. The Contractor shall take immediate steps to prevent or mitigate, if possible the occurrence or continuance of the delay.

The Contractor agrees that no claim shall be made for any occurrence of delay that is not the subject of a written notice and that is not submitted to the attention of the Construction Manager within ten (10) calendar days of its occurrence. The City may accept a delay with more than ten (10) calendar days of notice if the

City finds that the Contract was acting in good faith and the City was not Prejudiced by the Contractor's failure to timely provide the required notice.

9.3.2 Non-Excusable Delays – Non-excusable delays in the prosecution of the Work are delays which were caused by the Contractor, or by its subcontractors and suppliers, at any tier level, or delays which could have been avoided by the exercise of care, prudence, and diligence on the part of the Contractor or its subcontractors or suppliers, at any tier level. The Contractor shall receive no compensation or time extension for such delay. The determination of Non-Excusable Delays shall be made solely by the Construction Manager. In the event that the Contractor is not in agreement with the Construction Manager's decision, the Contractor may appeal the decision by submitting to the City (for consideration), evidence that supports the Contractor's claim for an Excusable Delay consideration.

9.3.3 Excusable Delays - Excusable Delays in the prosecution or completion of the Work are delays which are not caused by or within the control of Contractor and which could not have been avoided by the exercise of care, prudence, foresight, and diligence on the part of the Contractor or its subcontractors or suppliers, at any tier level. In addition, before a delay will be deemed an "Excusable Delay," the delay must prevent the Contractor from proceeding with at least seventy-five (75%) percent of the normal labor and equipment force for at least five (5) hours per day toward completion of the current critical activity item(s) on the latest approved progress schedule submitted by Contractor in accordance with the Contract Documents. The Contractor shall receive no compensation for such delay unless such delay also qualifies as a Compensable Delay, as described below. The following are examples of Excusable Delays:

A. Abnormal Delays - Delays caused by fire, unusual storms, floods, tidal waves, earthquakes, strikes, labor disputes, freight embargoes, and shortages of materials shall be considered as Excusable Delays insofar as they prevent the Contractor from proceeding with at least seventy-five (75%) percent of the normal labor and equipment force for at least five (5) hours per day toward completion of the current critical activity item(s) on the latest favorably reviewed progress schedule.

B. Weather Delays – Delays caused by inclement weather conditions or the conditions resulting from inclement weather shall be considered as "Excusable Delays" if they prevent the Contractor from proceeding with seventy-five (75%) percent of the normal labor and equipment force engaged in the current critical activity item for a period of at least five (5) hours per day toward completion of such operation or operations, and the crew is dismissed as a result thereof.

C. Material Shortages - Upon the Contractor's submission of satisfactory proof to the Construction Manager, shortages of material may be considered an "Excusable Delay" upon the satisfaction of the conditions set forth herein. The Contractor must demonstrate that the Contractor has made every effort to obtain such materials from all known sources within reasonable reach of the proposed Work. Only the physical shortage of material, caused by unusual and unforeseeable circumstances, will be considered as eligible for an "Excusable Delay," and no consideration will be given to any claim that the material could not be obtained at a reasonable, practical, or economical cost or price, unless it is shown to the satisfaction of the Construction Manager that such material could have been obtained only at exorbitant prices entirely out of line with current rates, taking into account the quantities involved and usual practices in obtaining such quantities. A time extension for shortage of material will not be considered for material ordered or delivered late or whose availability is affected by virtue of the Contractor's or its subcontractor's or supplier's mishandling of the procurement for such material. The above provisions apply equally to equipment to be installed in the Work. Nothing herein is intended to affect the Contractor also needing to demonstrate that the delay must prevent the Contractor from proceeding with at least seventy-five (75%) percent of the normal labor and equipment force for at least five (5) hours per day toward completion of the current critical activity item(s) on the latest favorably reviewed progress schedule.

9.3.4 Compensable Delays – Compensable Delays in the prosecution or completion of the Work are delays which meet each of the following three elements: (1) delays which result from causes beyond the control of the Contractor and which could not have been avoided by the reasonable exercise of care, prudence, and diligence on the part of the Contractor or its subcontractors or suppliers, at any tier level; (2) delays that prevent the Contractor from proceeding with at least seventy-five (75%) percent of the normal labor and equipment force for at least five (5) hours per day toward completion of the current critical activity item(s) on the latest approved progress schedule; and (3) delays that are caused by one of the following three causes:

A. Delays due to the actions and/or inactions of the City, Construction Manager, Engineer or any of their agents or employees.

B. Delays due to differing site conditions as defined in Article 10.2, DIFFERING SITE CONDITIONS.

C. Delays due to other contractors (excluding W. M. Lyles) employed by the City who interfere with the Contractor's prosecution of the Work as defined above.

9.3.5 Concurrent Delays – Concurrent delays are those delay periods when the prosecution of the Work is delayed during the same period of time due to causes from a combination of the delays defined in Article 9.3.2, NON-EXCUSABLE DELAYS, Article 9.3.3, EXCUSABLE DELAYS, or Article 9.3.4, COMPENSABLE DELAYS. During such concurrent delay periods, time extensions will be granted in accordance with Article 9.4, TIME EXTENSIONS; however, the Contractor will be granted a non-compensable time extension, and the City shall not assess its actual costs as defined in Article 9.4.1, NON-EXCUSABLE DELAYS, nor will the City assess Liquidated Damages.

9.4 Time Extensions

9.4.1 Non-Excusable Delays – The Contractor shall receive no compensation or time extension for Non-Excusable Delays.

9.4.2 Excusable or Compensable Delays – If the Contractor is delayed in the performance of its Work as defined in Article 9.3.3, EXCUSABLE DELAYS, or Article 9.3.4, COMPENSABLE DELAYS, then the Contract Time(s) will be extended by the City for such time that, the Contractor shows, and the City agrees (which agreement will not be unreasonably withheld), the Project's critical path completion dates will be delayed, provided that the Contractor strictly fulfills the following:

A. The Contractor shall have provided written notification, in accordance with Article 9.3.1, NOTICE OF DELAYS;

B. The Contractor shall have submitted in writing a request for an extension of time to the Construction Manager stating at a minimum the cause of the delay and the estimated number of days being requested. Such request for an extension of time shall be submitted in accordance with the requirements of 01 32 16-1.13, ADJUSTMENT OF PROJECT TIME. As provided therein, the Contractor's request for a time extension shall be submitted within fifteen (15) days of the Contractor furnishing its written notice pursuant to Article 9.3.1, NOTICE OF DELAYS. In the case of an Excusable Delay or Compensable Delay that allegedly is impacting the Contractor's operations for a period longer than fifteen (15) days, the Contractor shall update its request for a time extension, including updating its time impact analysis, every thirty (30) days until the delay is no longer allegedly impacting the Contractor's operations.

C. If the Contractor maintains that the delay at issue is a Compensable Delay, the Contractor shall submit an estimate of the additional compensation for Field Overhead and Indirect Home Office Overhead (per Article 9.4.3, FIELD OVERHEAD AND INDIRECT HOME OFFICE OVERHEAD FOR COMPENSABLE DELAYS) that it is seeking in regards to the alleged

delay. This estimate shall be included with the Contractor's request for time extension that is described in paragraph B, above. In the case of a Compensable Delay that allegedly is impacting the Contractor's operations for a period longer than fifteen (15) days, the Contractor shall update its estimate of additional compensation every thirty (30) days until the delay is no longer allegedly impacting the Contractor's operations.

D. If requested by the Construction Manager, the Contractor shall provide sufficient information to the Construction Manager to assess the cause or effect of the alleged delay (as well as additional compensation in the case of Compensable Delay), or to determine if other concurrent delays affected the Work. Such additional information shall be furnished within fifteen (15) days of the Construction Manager's request for additional information.

E. Time extensions due to Excusable or Compensable Delays will be granted only if such delays involve controlling critical path operations which would prevent completion of the whole Work within the specified Contract Time(s), as described in the above conditions for determination of "Excusable Delay" or "Compensable Delay."

F. **Force Majeure**. Force Majeure events shall be considered Excusable Delays. Any claim by Contractor to classify a Force Majeure event as a Compensable Delay shall be handled pursuant to Article 11.1, RESOLUTION OF DISPUTES. See definition of Force Majeure in Article 1, DEFINITIONS OF LANGUAGE USED, WORDS AND TERMS.

Construction Manager will, in writing, approve or reject the Contractor's request for a time extension within fifteen (15) days of the latter of (i) the Construction Manager's receipt of the Contractor's complete request for a time extension; or (ii) the Construction Manager's receipt of the additional information referenced in paragraph C, above. Should Construction Manager not provide a written response within such fifteen (15) day time period, the Contractor's request shall be deemed denied by the City.

If the Construction Manager determines that the Contractor is entitled to a time extension, during such approved extension of time, neither extra compensation for engineering, inspection and administration nor damages for delay will be charged to the Contractor.

For Weather Delays, the Contractor will be granted a non-compensable time extension for weather caused delays, pursuant to Article 9.3.3.B, WEATHER DELAYS, over and above an allowance as provided for in Exhibit F, COMPLETION TIMES AND LIQUIDATED DAMAGES. No time extensions for weather delays will be granted until the total number of weather days exceeds this allowance.

Should the Contractor fail to complete the Work within the time specified in the Agreement, as extended in accordance with this clause if appropriate, the Contractor shall pay to the City liquidated damages in accordance with Article 9.5, LIQUIDATED DAMAGES.

9.4.3 Field Overhead and Indirect Home Office Overhead for Compensable Delays

The Contractor shall be compensated for field overhead and indirect home office overhead expenses due to Compensable Delays for periods of time when the Work is delayed as defined in Article 9.3.4, COMPENSABLE DELAYS. However, no payment shall be made for compensable delays which occur during a concurrent delay as defined in Article 9.3.5, CONCURRENT DELAYS. As a condition precedent to payment for field overhead and indirect home office overhead, the Contractor must fulfill all conditions as provided in Article 9.4.2, EXCUSABLE OR COMPENSABLE DELAYS. Compensation will be calculated in accordance with 9.4.3.1 and 9.4.3.2, below. No additional markup for overhead or profit shall be provided for such field overhead and indirect home office overhead expenses.

Payment to the Contractor for indirect overhead expenses will be made only if the extended Contract Time period granted for the compensable delay(s) is required to complete the Work following the depletion of the original Contract Time period and any time extensions granted other than compensable time extensions. Payment for field overhead and indirect home office overhead shall be calculated as follows:

9.4.3.1 Field Overhead – For those allowable delay periods as described in Article 9.4.3, FIELD OVERHEAD AND INDIRECT HOME OFFICE OVERHEAD FOR COMPENSABLE DELAYS, the Contractor shall be reimbursed for its field overhead based on:

A. Actual invoice costs for on-site field offices and temporary utilities as described in Section 01 50 00, TEMPORARY FACILITIES AND CONTROLS.

B. Actual labor costs as shown in Exhibit C, GUARANTEED MAXIMUM PRICE, COST OF WORK AND FEE, for field office staff.

C. Fair rental values acceptable to the Construction Manager as described in Section 01 26 00-3.2, COST DETERMINATION, for construction equipment idled due to the delay.

D. Actual Errors and Omissions insurance costs attributable to delay periods.

9.4.3.2 Indirect Home Office Overhead – For those delay periods as described in the introduction of Article 9.4.3, FIELD OVERHEAD AND INDIRECT HOME OFFICE OVERHEAD FOR COMPENSABLE DELAYS, the Contractor shall be reimbursed for its indirect home office overhead based on the following formula:

[Guaranteed Maximum Price ($) divided by the Contract Time Period (Calendar Days)] x 0.03 = Daily Indirect Home Office Overhead ($/Calendar Day)

As it is impractical to determine the actual home office overhead, such reimbursement shall encompass full payment for any and all indirect home office overhead expenses for such periods of time for the Contractor and all subcontractors. Distribution of the markup amount among the Contractor and all subcontractors and suppliers is the responsibility of the Contractor.

9.5 Liquidated Damages

9.5.1 City and the Contractor recognize that time is of the essence of this Agreement and that the City will suffer financial loss if the Work is not completed within the times specified in Exhibit F, COMPLETION TIMES AND LIQUIDATED DAMAGES, plus any extensions thereof allowed in accordance with Article 9.4, TIME EXTENSIONS. It is hereby understood and agreed that it is and will be difficult and/or impossible to ascertain and determine the actual damage which the City will sustain in the event of and by reason of the Contractor's failure to fully perform the Work or to fully perform all of its Agreement obligations that have accrued by the times for completion as specified in Exhibit F, COMPLETION TIMES AND LIQUIDATED DAMAGES.

9.5.2 It is, therefore, agreed in accordance with California Government Code Section 53069.85 that the Contractor will forfeit and pay to the City liquidated damages in the amount set forth in Exhibit F, COMPLETION TIMES AND LIQUIDATED DAMAGES, per day for each and every calendar day that expires after the times for completion specified in Exhibit F, COMPLETION TIMES AND LIQUIDATED DAMAGES, and/or as specified for completion of any scheduled operations or works described in Exhibit F, COMPLETION TIMES AND LIQUIDATED DAMAGES, except as otherwise provided by extension of time pursuant to Article 9.4, TIME EXTENSIONS. It is further understood and agreed in accordance with California Government Code Section 53069.85 that the liquidated damages sum specified in this provision is not manifestly unreasonable under the circumstances existing at the time this Agreement was made, and that the City may deduct liquidated damages sums in accordance with this provision from any payments due or that may become due the Contractor.

9.5.3 Liquidated damages will continue to accrue at the stated rate until the completion of any defined completion milestone(s) and Final Completion of Work, all as set forth in Exhibit F, COMPLETION TIMES AND LIQUIDATED DAMAGES. Accrued liquidated damages may be deducted by the City from

amounts due or that become due to the Contractor for performance of the Work. Liquidated damages may not be waived or reduced by the City unless expressly waived or reduced in writing by the City.

9.6 City Suspension of Work

9.6.1 If the Contractor fails to correct Defective Work as required by Article 8.5, MATERIALS AND WORKMANSHIP, or fails to carry out the Work in accordance with the Contract Documents or any other applicable rules and regulations, or otherwise breaches a material provision of the Agreement, and fails to respond to the City's written notice of the alleged default within ten (10) days, the City, by a written order of the City's Representative or signed personally by an agent specifically so empowered by the City, in writing, may order the Contractor to stop the Work, in its entirety or any portion thereof. In the event of a suspension of only a portion of the Work, the Contractor is obligated to perform the portion of the Work not suspended. The suspension of Work shall remain in effect until the condition or cause for such order has been eliminated. The City's concurrence that the condition or cause has been eliminated will be provided to the Contractor in writing. This right of the City to stop and suspend the Work shall not give rise to any duty on the part of the City to exercise this right for the benefit of the Contractor or any other person or entity. All delays in the Work occasioned by such stoppage shall not relieve the Contractor of any duty to perform the Work or serve to extend the time for its completion. Any and all work necessary to correct Defective Work in order to comply with the Contract Documents shall be performed at no cost to the City.

9.6.2 In the event that a suspension of Work is ordered as provided for in paragraph 9.6.1, the Contractor, at its expense (i.e., without reimbursement as a Cost of Work or an increase in the GMP), shall perform all Work necessary to provide a safe, smooth, and unobstructed passageway through construction for use by the City, the City's other contractors, public, pedestrian, and vehicular traffic, during the period of such use by suspension. Should the Contractor fail to perform the Work as specified, the City may perform such Work and the cost thereof may be deducted from partial payments and/or final payment due the Contractor under the Agreement. The City is also entitled to withhold any costs, expenses and/or damages incurred, in proportion to the Contractor's proportion of responsibility for the suspension, including consultants' costs and fees, due to the suspension of Work if the suspension was due to Contractor's fault. Contractor shall not be entitled to any relief pursuant to an Excusable Delay or Compensable Delay for the Work impacted by any suspension hereunder.

9.6.3 The City shall also have authority to suspend the Work wholly or in part, for such period as the City may deem necessary, due to convenience to the City, unsuitable weather, or to such other conditions as are considered unfavorable for the suitable prosecution of the Work. Such temporary suspension of the Work, if for City's convenience and reasons unrelated to deficiencies in Contractor's performance, shall be a Compensable Delay in accordance with Article 9.3.4, COMPENSABLE DELAYS and justification for time extension pursuant to the provisions set forth in Article 9.4, TIME EXTENSIONS.

9.6.4 The Contractor as directed by the City shall comply with the provisions in Article 9.6, CITY SUSPENSION OF WORK, above. Such additional work shall be compensated as provided for in Article 10, CHANGES IN THE WORK, unless the City's suspension of the Work is caused by the Contractor's failure to prosecute the Work in accordance with the Contract Documents.

9.7 City's Right to Terminate Contract

9.7.1 Termination for Default – If the Contractor refuses or fails to prosecute the Work or any separable part thereof with such diligence as will ensure its completion within the Contract Time(s) specified herein, or any authorized extension thereof, or fails to perform the Work in a manner required by the Contract Documents, or fails to complete such Work within such time as required under the Contract Documents or, if the Contractor should be adjudged as bankrupt, or is otherwise deemed insolvent by the City based on good cause and is unable to proceed with the Work, or if the Contractor should make a general assignment for the benefit of creditors, or if a receiver should be appointed on account of insolvency, or if the Contractor files a petition to take advantage of any debtor's act, or if the Contractor should persistently or repeatedly refuse or fail (except in cases for which an authorized extension of time is provided) to supply enough properly skilled workers or proper materials to complete the Work in the time

specified, or if the Contractor should fail to make prompt payment to subcontractors of undisputed amounts due for material or labor, or if the Contractor should persistently disregard laws or instructions given by City, or if the Contractor otherwise substantially fails to fulfill its obligations under the Contract Documents the City may, without prejudice to any other right or remedy, serve written notice upon the Contractor and Sureties of the City's intention to terminate the Contractor's performance under the Agreement. Said notice shall contain the reasons for such intention to terminate the Contractor's performance under the Agreement, and unless, within seven (7) days after the service of such notice, such alleged violations cease and satisfactory arrangements for the corrections thereof have been made, the City may terminate Contractor's performance under the Agreement and the Contractor shall not be entitled to receive any further payment until the Work is finished.

In the event of any such termination, the City shall serve written notice thereof upon the Surety and Contractor, and the Surety shall have the right to take over and perform the Agreement. However, if the Surety, within ten (10) days after the service of a notice of termination, does not give the City written notice of its intention to take over and perform the Agreement, or if it serves such notice of its intent to take over and perform the Agreement and does not begin performance thereof within fifteen (15) days from the date of serving said notice, the City may take over the Work and prosecute the same to completion by contract or by any other method it may deem advisable for the account and at the expense of the Contractor, and the Sureties and/or Contractor shall be liable to the City for any excess cost or other damage incurred by the City thereby. In such an event, the City may without liability for so doing, take possession of and utilize such materials, supplies and other property belonging to the Contractor and/or assume assignment of any and all subcontracts for subcontractors and/or suppliers that may be on the worksite and be necessary to complete the Work. For any portion of such Work that City elects to complete by furnishing its own employees, materials, tools, and equipment, the City shall be compensated in accordance with the schedule of compensation for force account work as stated in Section 01 26 00, CONTRACT MODIFICATION PROCEDURES.

If the Surety assumes the Contractor's terminated Work, it shall take the Contractor's place in all respects for that part and shall be paid by City for all Work performed by it in accordance with the terms of the Contract Documents, less any amounts City is entitled to withhold pursuant to the Contract Documents. If the Surety assumes the entire Agreement, all money due the Contractor at the time of its default shall be payable to the Surety as the Work progresses, subject to the terms of the Agreement.

In the event of a termination based on Contractor's default, the Contractor will be paid the actual amount due in accordance with the Contract Documents less damages caused to the City arising from the termination, including but not limited to, consultants' costs, attorneys' fees and all costs to the City to complete the Work including all costs generated to insure or bond the work of substituted contractors or subcontractors utilized to complete the Work, such excess shall be paid to the Contractor. If City's costs to complete the Work, including the aforementioned costs exceed the unpaid balance, the Contractor shall pay the difference to the City promptly upon demand. On failure of the Contractor to pay, the Surety shall pay upon demand by City. Any portion of such difference not paid by the Contractor or Surety within thirty (30) days following the mailing of a demand for such costs shall earn interest at the maximum rate authorized by California law.

The Contractor and the City agree that nothing in this article is intended to create a right to recover attorney fees as prevailing party in any lawsuit on this Agreement.

The foregoing provisions are in addition to and not in limitation of any other rights or remedies under law or in equity available to City.

If it is later determined by the City that the Contractor had an excusable reason for not performing, such as, by way of example and not limitation, a fire, flood, or other event which was not the fault of or was beyond the control of the Contractor, the City may allow the Contractor to continue Work on a mutually agreeable schedule, or treat the termination as a termination for convenience, and the rights and obligations of the parties shall be the same as if the termination had been issued for the convenience of the City. Also, in the event that it is determined by a third party, including a judge, jury or arbitrator, that the Contractor should

not have been terminated for fault, then Contractor agrees that the termination will be deemed to be a termination for convenience under Article 9.7.2, TERMINATION FOR CONVENIENCE.

9.7.2 Termination for Convenience – The City, by written notice to the Contractor from the City Manager, may terminate the Contractor's performance under the Agreement, either in whole or in part, at its own discretion or when conditions encountered during the Work make it impossible or impracticable to proceed, or when the City is prevented from proceeding with the Agreement by an act of God, by law, or by official action of a public authority, or upon a determination that such termination is in the best interest and convenience of the City, or whenever the City is prohibited from completing the Work for any reason. The City shall provide no less than seven (7) days written notice of its intent to terminate the Agreement for convenience, but in no event shall City provide written notice of its intent to terminate without having a prior consultation with Contractor.

A. Upon receipt of such written notice of termination, the Contractor shall:

1. Stop Work as specified in the written notice;

2. Terminate all orders and subcontractors except as necessary to complete Work which is not terminated;

3. If directed in writing by the City to do so, assign all right, title and interest in materials in progress, in which case the City will have the right at its discretion to settle, or pay any or all Claims arising out of the termination of such materials contracts, but in no event shall recovery by any Contractor include lost profits for uncompleted portions of Work;

4. Deliver or otherwise make available to the City all data, drawings, specifications, reports, estimates, summaries and such other information and material as may have been accumulated by the Contractor in performing this Agreement whether completed or in process;

5. Settle outstanding liabilities and Claims with the approval of City;

6. Complete performance of such part of the Work as has not been terminated; and

7. Take such other actions as may be necessary, or as may be directed by the City for the protection and preservation of the Project and/or property related to the Agreement.

B. Upon receipt of City's written notice of termination for convenience, and within a period of 30 to 60 days, as determined by the City at the time of termination, the Contractor shall submit to the Construction Manager a Termination Proposal which shall include, but is not limited to, the Contractor's estimate of costs to be incurred by the Contractor as a result of the termination for convenience, and as allowed by the Contract Documents, including documentation reasonably necessary to support such costs; the status of the Work at time of termination; the status of termination of the Contractor's subcontractor(s) and Supplier(s) agreement(s) including the amount of each agreement, amount paid under each agreement up to the date of termination, and the amount that currently remains due and owing under each agreement for Work completed as of the date of termination, if any; a list, certified as to quantity and quality, of termination inventory not previously disposed of, excluding items authorized for disposition by the Construction Manager; and any other information and/or documentation as required by City. Within thirty (30) days of receipt of Contractor's Termination Proposal, City shall provide to Contractor written acceptance of Contractor's Termination Proposal or exceptions to items within the Termination Proposal which must be modified in order to gain City's acceptance of the Termination Proposal.

Upon receipt of City's written acceptance of, or exceptions to, Contractor's Termination Proposal, the Contractor shall submit to the Construction Manager a request for final payment (or the undisputed portion of the Termination Proposal) pursuant to the Contract Document requirements. Such request shall be submitted promptly, but no later than fifteen (15) days from the effective date of receipt of City's written acceptance of, or exceptions to, Contractor's Termination Proposal.

C. Contractor shall not be entitled to recover any lost profits, fee or any other cost or expense on portion of the Work terminated. The final payment to the Contractor after termination for convenience shall not exceed the amounts due and owing under the Agreement at time of termination, including the following:

1. Any actual costs incurred by the Contractor for restocking charges or other costs reasonably incurred in negotiating termination of subcontracts and/or supply contracts;

2. The cost of the Work for protecting the Work in any manner, if any, as directed by the City; and

3. The cost of settling and paying Claims arising out of the termination of the Work under subcontract agreements or orders with the City's approval, as specified above, exclusive of the amounts paid or payable on account of goods delivered or Work furnished by subcontractor prior to the effective date of the termination; and

4. The cost of the Work and Fee allocable to the portion of the Work properly performed or goods supplied by the Contractor as of the date of termination, as determined in accordance with the Contract Documents, reduced by any sums previously paid to the Contractor.

D. The City's right to withhold under Article 12.9, WITHHOLDING OF PAYMENT shall apply to payments made under this article.

ARTICLE 10 - CHANGES IN THE WORK

10.1 Change Orders

10.1.1 Without invalidating the Agreement and without notice to sureties or insurers, the City through the Construction Manager, may at any time or from time to time, order additions, deletions, or revisions in the Work; these will be authorized by Field Directive, Field Order or Change Order. A Change Order will not be issued for a Field Directive unless the Construction Manager agrees that such Field Directive is a change in the scope of the Agreement that causes an increase in the Cost of the Work or an adjustment to the GMP or the Contract Time(s) and therefore warrants development of a Change Order. The Contractor shall comply promptly with the requirements for all Change Orders, Field Orders or Field Directives. The work involved in Change Orders and Field Orders shall be executed under the applicable conditions and requirements of the Contract Documents. By signing a Change Order, the Contractor waives any claim for additional time, not included in the Change Order, for the work covered by that Change Order. Additional or extra work performed by the Contractor without written authorization of a Change Order or Field Order will not entitle the Contractor to an increase in the GMP or an extension of the Contract Time(s).

10.1.2 Extra Work is defined in Contract Documents found in Article 1, DEFINITIONS OF LANGUAGE USED, WORDS AND TERMS. Such work shall be governed by all applicable provisions of the Contract Documents. In giving instructions, the Construction Manager shall have authority to make minor changes in the Work in writing by way of a Field Directive, not involving extra cost, and not inconsistent with the purposes of the Work; but otherwise, except in an emergency endangering life or property, no extra work or change shall be made unless in pursuance of a written order by the City through

the Construction Manager, and no claim for an addition to the GMP and/or Contract Time(s) shall be valid unless so ordered.

10.1.3 In case any authorized change increases or decreases the Work shown in a Change Order, the Contractor shall be paid for the work actually done at a mutually agreed upon adjustment to the GMP, in accordance with the provisions of Section 01 26 00, CONTRACT MODIFICATION PROCEDURES.

10.1.4 If the Contractor refuses to accept a proposed Change Order, the City may issue it unilaterally with a Construction Change Directive in accordance with the provisions of Section 01 26 00, CONTRACT MODIFICATION PROCEDURES. The Contractor shall comply with the requirements of the Construction Change Directive. The City shall provide for an equitable adjustment, if any, to the GMP and/or Contract Time, and compensate the Contractor accordingly. If the Contractor does not agree that the adjustment or refusal to adjust is equitable, it may submit a claim in accordance with ARTICLE 11, DISPUTES.

10.2 Differing Site Conditions

Pursuant to Public Contract Code Section 7104, the Contractor shall promptly, and before such conditions are disturbed, notify the Construction Manager, in writing, of any:

A. Material that the Contractor believes may be material that is hazardous waste, as defined in Section 25117 of the Health and Safety Code, which is required to be removed to a Class I, Class II, or Class III disposal site in accordance with provisions of existing law.

B. Subsurface or latent physical conditions at the Site differing from those indicated by information about the Site made available to Proposers prior to the deadline for submitting bid proposals.

C. Unknown physical conditions at the Site of any unusual nature, differing materially from those ordinarily encountered and generally recognized as inherent in work of the character provided for in the Agreement.

The Contractor's written notice must be furnished to Construction Manager within ten (10) calendar days of Contractor discovering the alleged differing site condition. The Contractor agrees that no claim shall be made for any differing site conditions that is not the subject of a written notice submitted to the attention of the Construction Manager within ten (10) calendar days of their occurrence. The City may accept a claim with more than ten (10) calendar days of notice if the City finds that the Contract was acting in good faith and the City was not Prejudiced by the Contractor's failure to timely provide the required notice.

The City shall promptly investigate the conditions, and if it finds that the conditions do materially differ, or do involve hazardous waste, and cause a decrease or increase in the Contractor's cost of, or the time required for, performance of any part of the Work, the City shall cause to be issued a Change Order under the procedures provided in Article 10.1, CHANGE ORDERS.

In the event that a dispute arises between the City and the Contractor whether the conditions materially differ, or involve hazardous waste, or cause a decrease or increase in the Contractor's cost of, or time required for, performance of any part of the work the Contractor shall not be excused from any scheduled completion date provided for by the Agreement, but shall proceed with all work to be performed under the Agreement. The Contractor shall retain any and all rights provided either by Agreement or by law which pertain to the resolution of disputes and protests between the contracting parties, Article 11.1, RESOLUTION OF DISPUTES.

No claim of the Contractor under this clause shall be allowed unless the Contractor has given the notice required.

10.3 Taxes. A Change Order shall be executed due to any new or increased taxes arising after the date of this Agreement (other than taxes assessed based on the income of Contractor). The Change Order shall consist of the incremental amount of such new or increased taxes only. With respect to reductions in taxes arising after the date of this Agreement (other than taxes assessed based on the income of Contractor), the Change Order shall consist of the difference in amount as a result of such reduced taxes only.

10.4 Permit Fees. With respect to increases or decreases in fees for permits or other governmental certificates or instruments arising after the effective date of this Agreement, a Change Order will be prepared and proposed to Contractor that shall consist of the incremental amount of such increases or decreases. To the extent this Agreement states that a permit or certificate is not required and Contractor is later required to procure such permit or certificate, all out-of-pocket costs reasonably associated therewith shall be included in the Change Order. The fees for permits and related costs associated with permits that was included in the GMP shall be listed in Exhibit C, GUARANTEED MAXIMUM PRICE, COST OF WORK AND FEES.

ARTICLE 11 - DISPUTES

11.1 Resolution of Disputes

It is the intent of this Agreement that disputes regarding the Agreement be resolved promptly and fairly between the Construction Manager and Contractor. However, it is recognized that some disputes will require detailed investigation and review by one or both parties before a determination and resolution can be reached. For the protection of the rights of both the Contractor and City the following provisions are provided for the resolution of disputes which cannot be resolved by the Contractor and Construction Manager.

11.1.1 Notice and Contract Claim. Either party shall provide written notice of disputed or potentially disputed Work to the other party prior to the commencement of and sufficiently in advance of performing the disputed Work to allow both parties joint initial review of the disputed Work. If there is disagreement subsequent to the initial review, the Contractor shall formally request a Contract Interpretation by the Construction Manager in accordance with Article 5.3.9, CONTRACT INTERPRETATION BY THE CONSTRUCTION MANAGER. If the Contractor disagrees with the Construction Manager's decision or in any case where the Contractor deems additional compensation or a time extension to the Contract Time is due the Contractor for work or materials not covered in the Agreement or which the Construction Manager has not recognized as extra work, the Contractor may file a written "Contract Claim" with the Construction Manager within ten (10) days of receipt of the Construction Manager's contract interpretation decision or, if the claim does not involve a Construction Manager contract interpretation decision, within ten (10) days after the date of the occurrence, event or circumstance giving rise to the claim. Additionally, if the claim relates to extra, additional or unforeseen work for which the Contractor intends to demand additional compensation, a time extension, or both, notice shall be given to the Construction Manager prior to the time that the Contractor commences performance of the work giving rise to the potential claim for additional compensation or time extension, and Contractor shall not proceed with that work until so directed by the Construction Manager. A Contract Claim must (a) be in writing, (b) be labeled or clearly indicated as a claim under the Agreement, (c) set forth in detail the reasons why the Contractor believes additional compensation or a time extension is or may be due, the nature of the costs involved, and, insofar as possible, the amount of the claim, and (d) include (or reference earlier provided) documents that support and substantiate the claim as to both entitlement and quantification of time, money, or both. A claim for purposes of this article means a separate demand by the Contractor for (a) a time extension (including a demand for relief from damages or penalties for delay assessed by the City under the Agreement), (b) payment of money or damages arising from work done by, or on behalf of, the Contractor pursuant to the Agreement and payment of which is not otherwise expressly provided for or the Contractor is not otherwise entitled to, or (c) an amount the payment of which is disputed by the City.

Additionally, no claim for additional compensation or extension of time for a delay will be considered unless the provisions of Article 9.3, DELAYS, and Article 9.4, TIME EXTENSIONS, are complied with. No untimely claim or claim filed after the date of final payment will be considered.

Unless a timely Contract Claim is properly given, the Contractor shall not recover costs incurred by it as a result of the alleged extra work, changed work or other situation which had proper notice been given would have supported a claim for additional compensation. The Contractor should understand that timely notice of a Contract Claim is of great importance to the Construction Manager and City, and is not merely a formality. Such notice permits the City to consider preventative action, to monitor the Contractor's increased costs resulting from the situation, to marshal facts, and to plan its affairs. Such notice by the Contractor, and the fact that the Construction Manager has kept account of the work in question, shall not in any way be construed as proving the validity of any claim.

11.1.2 Processing of Claims, Generally. This Agreement provides for three types of Contract Claims, which will be processed and resolved under different terms as described below. Any claim for money or damages of $375,000 or less or for a time extension (i.e., any claim subject to Public Contract Code section 20104) shall be processed and resolved in accordance with Article 11.1.3. Any claim for money or damages of more than $375,000 (i.e., any claim not subject to Public Contract Code section 9204 or 20104) shall be processed and resolved in accordance with Article 11.1.4. Any Contract Claim sent to City by registered mail or certified mail with return receipt requested (i.e., any claim subject to Public Contract Code section 9204) shall be processed and resolved pursuant to Article 11.1.5.

11.1.3 Claims for $375,000 or Less or for Time Extension and Not Sent by Registered or Certified Mail.

11.1.3.1 Application. This article applies to all claims (not sent by registered or certified mail) for $375,000 or less in value, including any claim for a time extension or for a time extension that includes claimed delay damages of $375,000 or less.

11.1.3.2 City Response to Contract Claim. The Construction Manager shall respond in writing to the Contract Claim within 60 days of receipt of the claim (or within 45 days of receipt for claims of less than $50,000), or may request, in writing, within 30 days of receipt of the claim, any additional documentation supporting the claim or relating to defenses to the claim the City may have against the Contractor. If additional information is thereafter required, it shall be requested and provided pursuant to this article, upon mutual agreement of the Construction Manager and the Contractor. The Construction Manager's written response to the claim, as further documented, shall be submitted to the Contractor within 30 days after receipt (or 20 days after receipt for claims of less than $50,000) of the further documentation. The City shall not fail to pay money as to any portion of a Contact Claim that is undisputed except as otherwise provided in the Contract Documents.

11.1.3.3 Meet and Confer. If the Contractor disputes the Construction Manager's written response, or the Construction Manager fails to respond within the time prescribed, the Contractor may notify the City, in writing, either within 15 days of receipt of the Construction Manager's response or within 15 days of the Construction Manager's failure to respond within the time prescribed, respectively, and demand an informal conference to meet and confer for settlement of the issues in dispute. Upon such a demand, the City shall schedule a meet and confer conference within 30 days for the parties to consider settlement of the dispute. If the Contractor fails to timely demand a meet and confer conference within the applicable 15-day period, then the Contractor shall be deemed not to dispute the Construction Manager's written response to the Contract Claim and the Construction Manager's decision on the Contract Claim shall be final, conclusive and binding, and the Contractor shall be deemed to have waived all its rights to further protest, judicial or otherwise.

11.1.3.4 Government Code Claim. Following the meet and confer conference, if the Contract Claim or any portion remains in dispute, the Contractor may file a Government Code Claim as provided in Government Code title 1, division 3.6, part 3, chapters 1 (commencing with section 900) and 2 (commencing with section 910). The running of the period of time within which Contractor must file a Government Code Claim shall be tolled from the time the Contractor submits a timely Contract Claim pursuant to Article 11.1.1, NOTICE AND CONTRACT CLAIM until the time that the Contract Claim is denied as a result of the meet and confer process, including any period of time utilized by the meet and confer process. The City shall respond to any Government Code Claim in accordance with the Government Claims Act.

11.1.3.5 Lawsuit. If the claim is not resolved pursuant to Article 11.1.3.4, GOVERNMENT CODE CLAIM, the Contractor may file a lawsuit on the claim within the limitations period provided by the Government Claims Act. If the Contractor fails to timely file a lawsuit within the limitations period of the Government Claims Act, then the City's response to the Government Code Claim shall be final, conclusive and binding on the Contractor, and the Contractor thereafter shall be barred from filing a lawsuit on the claim.

11.1.3.6 Mediation. If the Contractor timely files a lawsuit, then within 60 days, but no earlier than 30 days, following the filing of responsive pleadings, the court shall submit the matter to non-binding mediation (unless waived by mutual stipulation of both parties). The mediation process shall provide for the selection within 15 days by both parties of a disinterested third person as mediator, shall be commenced within 30 days of the submittal, and shall be concluded within 15 days from the commencement of the mediation unless a time requirement is extended upon a good cause showing to the court or by stipulation of both parties. If the parties fail to select a mediator within the 15-day period, any party may petition the court to appoint the mediator. The mediator's fees and expenses shall be split and paid equally between the parties. The court may, upon request by any party, order any witnesses to participate in the mediation process.

11.1.3.7 Arbitration. If the matter remains in dispute following the mediation or if the parties waive the mediation, then the case shall be submitted to judicial arbitration pursuant to Code of Civil Procedure part 3, title 3, chapter 2.5 (commencing with section 1141.10), notwithstanding section 1141.11 of that code. The Civil Discovery Act of 1986 (Code of Civil Procedure part 4, title 3, chapter 3, article 3 (commencing with section 2016)) shall apply to any proceeding brought under this article consistent with the rules pertaining to judicial arbitration. The arbitrator shall be experienced in public works construction law. The arbitrator's fees and expenses shall be split and paid equally by the parties, except where the arbitrator, for good cause, determines a different division. The court may, upon request by any party, order any witnesses to participate in the arbitration process. Any party who, after receiving an arbitration award, requests a trial de novo but does not obtain a more favorable judgment shall (in addition to payment of any costs and fees under Code of Civil Procedure part 3, title 3, chapter 2.5 (commencing with section 1141.10)) pay the attorney's fees of the other party arising out of the trial de novo.

11.1.3.8 Interest. In any lawsuit filed under this article, the City shall pay interest at the legal rate on any arbitration award or judgment. The interest shall begin to accrue on the date the lawsuit is filed in court.

11.1.4 Claims for More Than $375,000 and Not Sent by Registered or Certified Mail

11.1.4.1 Application. This article applies to all claims (not sent by registered or certified mail) that exceed $375,000 in value, including any claim for a time extension that includes claimed delay damages exceeding $375,000.

11.1.4.2 City's Response to Contract Claim. The Construction Manager shall respond in writing to the Contract Claim within 60 days of receipt of the claim, or may request, in writing, within 30 days of receipt of the claim, any additional documentation supporting the claim or relating to defenses to the claim that the City may have against the Contractor. If additional information is thereafter required, it shall be requested and provided pursuant to this article, upon mutual agreement of the Construction Manager and the Contractor. The Construction Manager's written response to the claim, as further documented, shall be submitted to the Contractor within 30 days after receipt of the further documentation. If the Contractor fails to timely dispute the Construction Manager's decision on the matter in accordance with Article 11.1.4.3, GOVERNMENT CODE CLAIM, then the Contractor shall be deemed not to dispute the Construction Manager's written response to the Contract Claim and the Construction Manager's decision shall be final, conclusive and binding, and the Contractor shall be deemed to have waived all its rights to further protest, judicial or otherwise.

11.1.4.3 Government Code Claim. If the Contractor disputes the Construction Manager's written response to the Contract Claim, the Contractor may file a Government Code Claim as provided in Government Code title 1, division 3.6, part 3, chapters 1 (commencing with section 900) and 2 (commencing with section 910). The City shall respond to any Government Code Claim in accordance with the California Government Claims Act.

11.1.4.4 Lawsuit. If the claim is not resolved pursuant to Article 11.1.4.3, GOVERNMENT CODE CLAIM, the Contractor may file a lawsuit on the claim within the limitations period provided by the Government Claims Act. If the Contractor fails to timely file a lawsuit within the limitations period of the Government Claims Act, then the City's response to the Government Code Claim shall be final, conclusive and binding on the Contractor, and the Contractor thereafter shall be barred from filing a lawsuit on the claim.

11.1.4.5 Judicial Reference. If the Contractor timely files a lawsuit, the case shall be submitted to judicial reference pursuant to California Code of Civil Procedure Sections 638 and 640 through 645.1 (or any successor statute) and California Rules of Court title 3, division 9 (commencing with section 3.900). As authorized by Code of Civil Procedure section 638, a referee will consider and decide all factual and legal issues in the action. Each party acknowledges that it will not have any right to a jury trial or to have any judicial officer besides the referee hear or decide the action. When Contractor initiates the superior court lawsuit, it will, at the same time it files the complaint in the action, also file a motion for appointment of a single referee.

A. Appointment of a referee shall be by mutual agreement within 30 days between the parties, and if unsuccessful, then by the court and will be governed by Code of Civil Procedure Section 640, and subject to objection by either party as provided by Code of Civil Procedure Section 641. The referee must be a retired judge or a licensed attorney with at least ten (10) years substantive experience in public works construction matters.

B. The parties shall be entitled to discovery and the referee shall oversee discovery and may enforce all discovery orders in the same manner as a superior court judge. The referee shall have the authority to consider and rule on appropriate pre-hearing and post-hearing motions in the same manner as a superior court judge. The referee will have the authority to set a briefing and hearing schedule for any such motion or for a hearing on the merits.

C. The referee's statement of decision shall include findings of fact and conclusions of law. The statement of decision will stand as the decision of the superior court and, upon filing of the statement with the clerk of the court, judgment may be entered pursuant to Code of Civil Procedure Section 644, subsection (a). The parties will have rights to appeal the final judgment so entered.

D. (d) Each party will pay half of the costs of the referee and the administrative fees of the reference proceeding, and each party will bear its own costs, expenses and attorney fees for the reference proceeding.

11.1.5 Claims Subject to Public Contract Code Section 9204

11.1.5.1 This article applies to all Contract Claims sent by registered or certified mail with return receipt requested. The Contract Claim will be processed and resolved pursuant to Public Contract Code Section 9204, which is summarized here:

E. City's Review of Claim. Within 45 days after receiving a complete Contract Claim, City shall review the claim and provide the Contractor a written statement identifying what

portion of the claim is disputed and what portion is undisputed. The City will pay any undisputed portion of the claim within 60 days from the date of the written statement. If the City fails to timely issue a written statement, then the claim shall be deemed rejected in its entirety.

F. Meet and Confer Conference. If the Contractor disputes the City's written statement or if the Contract Claim is deemed rejected, the Contractor may demand and the parties will conduct an informal conference to meet and confer regarding settlement in accordance with Section 9204, subsection (d)(2). Within 10 business days following the conclusion of the meet and confer conference, the City shall provide Contractor a written statement identifying the portion (if any) of the claim remaining in dispute and any undisputed portion will be paid by the City within 60 days after this written statement.

G. Non-Binding Mediation. Any remaining disputed portion of the claim shall be submitted to nonbinding mediation in accordance with Section 9204, subsection (d)(2).

H. Interest. Any amount not paid in a timely manner as required by this article shall bear interest at a rate of 7 percent per annum until paid.

The foregoing is a summary of section 9204. In the event of any conflict between the summary and section 9204, the statute will govern.

11.1.5.2 Lawsuit and Reference. If mediation is unsuccessful and all or parts of the Contract Claim remain in dispute, then the Contractor may pursue a lawsuit (with judicial reference) in accordance with the procedures set forth at Articles 11.1.4.4 through 11.1.4.5. Any lawsuit under this Article 11.1.5 will be subject to judicial reference in the same manner as under Article 11.1.4.

11.1.6 Contract Work Pending Claim Resolution. Unless otherwise directed in writing by the Construction Manager, pending resolution of a claim under this article, the Contractor shall continue to diligently prosecute the Work in accordance with the Contract Documents and the instructions of the Construction Manager.

11.1.7 Records of Disputed Work. In proceeding with a disputed portion of the Work, the Contractor shall keep accurate daily records of all costs, including a summary of the hours and classification of equipment and labor utilized on the disputed work, as well as a summary of any materials or any specialized services that are used. Such information shall be submitted to the Construction Manager on a daily basis, receipt of which shall not be construed as an authorization for or acceptance of the disputed work. Failure to comply with this paragraph shall constitute a waiver of the Contractor's claim for additional compensation or a time extension as to that day.

11.1.8 Submission of Claim Costs. Within thirty (30) days after incurring the last cost of work for which the Contractor contends it is due additional compensation is incurred, but if costs are incurred over a span of more than thirty (30) days, then within fifteen (15) days after the thirtieth day and every month thereafter, the Contractor shall submit to the Construction Manager, as best the Contractor is able, its costs incurred for the claimed matter. Claims shall be made in itemized detail, and should the Construction Manager be dissatisfied with the format or detail of presentation, upon request for more or different information, the Contractor will promptly comply, to the satisfaction of the Construction Manager. If the additional costs are not fully ascertainable, they shall be estimated with as much accuracy as possible in the circumstances. The Construction Manager shall have the right as provided in Section 01 26 00-3.4, COST PRICING DATA AND ACCESS TO RECORDS, to review the Contractor's records pertaining to a submitted claim. In case the claim is found to be just, it shall be allowed and paid for as provided in Section 01 26 00, CONTRACT MODIFICATION PROCEDURES.

11.1.9 Claim Meetings. From time to time the Contractor may request or the Construction Manager may call a special meeting to discuss outstanding claims should it deem this a means of possible help in the resolution of the claim. The Contractor shall cooperate and attend prepared to discuss its claims, and make available the personnel, subcontractors and suppliers necessary for resolution, of the claim. In addition, the Contractor shall timely provide all documents relevant to the claim which may reasonably be requested by the Construction Manager.

11.1.10 Tort Claims. The provisions of this Article 11.1 apply only to contract-based claims and they shall not apply to tort claims, and nothing in this Article 11.1 is intended nor shall be construed to change the time periods for filing tort claims or actions specified by Government Code title 1, division 3.6, part 3, chapters 1 (commencing with section 900) and 2 (commencing with section 910).

ARTICLE 12 - PAYMENT AND COMPLETION

12.1 Guaranteed Maximum Price (GMP). The City shall pay for Contractor's performance under this Agreement the Cost of the Work and Fee (as defined in Exhibit C, GUARANTEED MAXIMUM PRICE, COST OF WORK AND FEE, hereto), provided, however, that the sum of the Cost of the Work and Fee shall not exceed the GMP, as adjusted by Change Order and/or Field Order in accordance with the Contract Documents.

12.2 Not Used.

12.3 Applications for Payment. Within ten (10) business days following execution of this Agreement, the City and Contractor shall meet to discuss the format, cost breakdown and level of detail required in each Contractor Payment Application. The cost breakdown shall be generally in the same format as typical CSI Document Divisions and Subdivisions, with major items of work listed individually. The cost breakdown shall be by structure, civil, landscaping, or other logical divisions of work. The cost breakdown for architectural, structural, mechanical, and electrical work shall include separate items for identifiable portions of the structures. The cost breakdown shall include separate items for all testing and startup work required. The cost breakdown shall also have separate items for all mobilization costs, direct job overhead costs, bonds, builder's risk insurance, supervision, subcontractors, special services and major suppliers.

The Contractor's cost breakdown and accounting system to produce the Contractor's Application for Payment must provide the City the means to efficiently substantiate the Cost of the Work completed each month and to date for the timely processing for payment to the Contractor.

Contractor shall deliver to City not more than once each month an Application for Payment covering the Cost of Work and Fee applicable to the Work performed during the immediately preceding month. With each Application for Payment Contractor shall submit a line item detailed billing to demonstrate costs incurred on account of Cost of the Work during such month.

Each progress payment request and the final payment request shall be deemed "proper" only if it is submitted on the form approved by the City, with all of the requested information completely and accurately provided by the Contractor and such completed progress payment request form or final payment request form is accompanied by: (i) certified payrolls of the Contractor and all subcontractors, of any tier, for laborers performing any portion of the Work for which a progress payment or final payment is requested; (ii) duly completed and executed Conditional Waiver and Release Upon Progress Payment or Final Payment forms in accordance with California Civil Code §§ 8132 and 8136 for all subcontractors of any tier, and material suppliers covering the progress payment or final payment requested; (iii) duly completed and executed Unconditional Waiver and Release Upon Progress Payment forms in accordance with California Civil Code §§ 8134 and 8138 for all subcontractors of any tier, and material suppliers covering the progress payment received by the Contractor under the prior progress payment request.

City may reject requests for payment, or portions thereof, for Work, or portions thereof, not performed or completed.

City may request additional detail or breakdown of costs to meet Funding Agency reimbursement requirements.

12.4 Amount of Progress Payments. City shall pay Contractor the actual Cost of the Work and Fee through the period covered by the Application for Payment, less Retention as set forth in Article 12.5, EFFECT OF PAYMENT below. City may additionally withhold from progress payments such amounts pursuant to stop notice claims as required by law and pursuant to Article 12.9, WITHHOLDING OF PAYMENTS.

12.5 Effect of Payment. Payment will be made by City based on the Construction Manager's observations at the Site and the data comprising the progress payment request. Payment will not be a representation that the City has:

A. Made exhaustive or continuous on-site inspections to check the quality or quantity of Work;

B. Reviewed construction means, methods, techniques, sequences or procedures;

C. Reviewed copies of requisitions received from subcontractors and material suppliers and other data requested by City to substantiate Contractor's right to payment;

D. Made examination to ascertain how or for what purpose Contractor has used money previously paid on account of the Contract Sum; or

E. Accepted all or part of the Work.

12.6 Retention; Escrow Agreement; Final Payment. Five percent (5%) Retention shall be withheld from each progress payment until the expiration of 35 days following City's filing of the Notice of Completion for the Project or as required in California Public Contract Code Section 7107, whichever is earlier; provided, however, City shall continue to retain such amount as required by law and City's right to withhold in accordance with Article 12.9, WITHHOLDING OF PAYMENT, herein.

For any retention of amount earned by the Contractor as provided for in this article, the Contractor may substitute securities as provided in Section 22300 of the Public Contract Code, as amended, which states in part as follows:

> "Provisions shall be included in any invitation for bid and in any contract documents to permit the substitution of securities for any moneys withheld by a public agency to ensure performance under a contract, provided that substitution of securities provisions shall not be required where federal regulations or policies, or both, do not allow the substitution of securities. At the request and expense of the Contractor, securities equivalent to the amount withheld shall be deposited with the public agency, or with a state or federally chartered bank as the escrow agent, who shall then pay those monies to the Contractor. Upon satisfactory completion of the contract, the securities shall be returned to the Contractor."
>
> "Alternatively, the contractor may request and the City shall make payment of retentions earned directly to the escrow agent at the expense of the Contractor. At the expense of the contractor, the contractor may direct the investment of the payments into securities and the contractor shall receive the interest earned on the investments upon the same terms provided for in this Article for securities deposited by the Contractor. Upon satisfactory completion of the contract, the Contractor shall receive from the escrow agent all securities, interest and payments received by the escrow agent from the City, pursuant to the terms of this Article. The Contractor shall pay to each subcontractor, not later than 20 days of receipt of the payment, the respective amount of interest earned, net of costs attributed to retention withheld from each subcontractor, on the amount of retention withheld to insure the performance of the Contractor."

"The Contractor shall be the beneficial City of any securities substituted for money withheld and shall receive any interest thereon."

Securities eligible for investment under Section 22300 shall be limited to those listed in Section 16430 of the Government Code and to bank or savings and loan certificates of deposit, interest-bearing demand deposit accounts, standby letters of credit, or any other security mutually agreed to by the Contractor and the City.

The escrow agreement used hereunder shall be null, void, and unenforceable unless it is substantially similar to the form in Exhibit J, ESCROW AGREEMENT FOR SECURITY DEPOSITS IN LIEU OF RETENTION. Release of Retention monies shall constitute the Final Payment.

12.7 Not Used.

12.8 **Title to Construction Work.** Title to all Work covered by an Application for Payment shall pass to City no later than the time of payment. Upon submittal of an Application for Payment, all Work for which Applications for Payment have been previously issued and payments received from City shall, to the best of Contractor's knowledge, information and belief, be free and clear of liens, claims, security interests or encumbrances in favor of Contractor, subcontractors, material suppliers, or other persons or entities, except work, labor, materials or services that are the subject of a Claim.

No material, supplies, or equipment for the Work under this Agreement shall be purchased subject to any chattel mortgage, security agreement, or under a conditional sale or other agreement by which an interest therein or any part thereof is retained by the seller or supplier. The Contractor warrants good title to all material, supplies, and equipment installed or incorporated in the Work and agrees upon completion of all Work to deliver the premises, together with all improvements and appurtenances constructed or placed thereon by the Contractor, to the City free from any third party claims, liens, security interests, or charges.

Nothing contained in this article, however, shall defeat or impair the right of such persons furnishing materials or labor under any bond given by the Contractor for their protection or any rights under any law permitting such persons to look to funds due the Contractor in the hands of the City.

12.9 **Withholding of Payment.** City may withhold payment on account of an Application for Payment if required or authorized by any Applicable Law, or to the extent necessary to protect City from loss because of the following:

A. Defective Work not remedied, irrespective of when any such work be found to be defective.

B. Non adherence to Funding Agency requirements including, but not limited to, the Iron and Steel Requirements.

C. Damage to another contractor or third party, or to property that Contractor has failed to resolve within 30 days after receiving written notice of the damage.

D. A reasonable amount for failure of the Contractor to maintain Record Drawings current as required in Section 01 33 23, AS-BUILT DRAWINGS.

E. Cost of insurance arranged by the City due to cancellation or reduction of the Contractor's insurance.

F. Failure to submit, revise, resubmit or otherwise conform to the requirements herein for preparing and maintaining a construction schedule as required in Section 01 32 16, PROGRESS SCHEDULES AND REPORTS.

G. Failure to provide the required payment documentation, including required waivers, releases, and Funding Agency documentation.

H. Payments due the City from the Contractor as provided for in the Contract Documents.

I. Failure to comply with environmental and other regulatory requirements that Contractor has failed to resolve within 30 days after receiving written notice of the noncompliance.

J. Failure to comply with equipment storage requirements and/or equipment installation guidelines.

K. Provisions of law that enable or require the City to withhold such payments in whole or in part, including, but not limited to California Public Contract Code

L. Stop Payment Notice claims filed by Contractor's subcontractors of any tier, or its material suppliers.

M. Contractor's failure to timely complete its Work, including Punch List items in the time required and issuance of operations and maintenance (O&M) manuals.

N. Any other breach of a material provision of this Agreement if Contractor has failed to respond to the City's written Notice of the alleged breach within 10 days.

When the above reasons for withheld amounts are removed, payment will be made to the Contractor for amount withheld because of them.

12.10 Failure of Payment. In accordance with Public Contract Code § 20104.50, City shall pay Contractor interest on any progress payment, which is made by City more than thirty (30) days after City receives an undisputed and properly submitted written payment request. Any written request for a progress payment which City determines not to be a proper payment request suitable for payment shall be returned to the Contractor within seven (7) days after receipt by City, along with a written statement of the reason or reasons why such request is not proper.

12.11 Occupancy by City Prior to Final Completion. The City reserves the right to Beneficial Occupancy without charge by Contractor. In those areas of the Work, which are deemed substantially completed the City may store materials, equipment, and supplies, and may perform partial operation.

12.12 Substantial Completion. When the Contractor considers the entire Work substantially complete, or a portion of the Work substantially complete as defined by the Contract Milestones or as needed for Beneficial Occupancy is complete and ready for its intended use, the Contractor shall certify in writing to the City through the Construction Manager that the entire Work, or a portion of the Work as defined by the Contract Milestones or needed for Beneficial Occupancy is substantially complete and provide the City with a Certificate of Substantial Completion. If the Construction Manager agrees that an inspection to determine the status of completion is warranted, the City, Construction Manager and Contractor shall make an inspection of the Work to determine the status of completion. Substantial Completion shall be defined as completion of Work in accordance with the Contract Documents, including Extra Work, except for minor punch list items, and suitable for the City's Beneficial Occupancy. Issuance of Substantial Completion requires submittal of associate as-built drawings, operations and maintenance manuals, asset management data and other related submittals for the portion of Work being assessed for Substantial Completion.

If the City does not consider the Work substantially complete, the Construction Manager will notify the Contractor in writing identifying the parts of the Work that the City contends are not substantially complete. If the City considers the Work is substantially complete, the City will accept a corresponding partial Certificate of Substantial Completion. There shall be attached to the Certificate a punch list of items to be completed or corrected before Final Completion and Final Payment.

Upon verification that the Work is substantially complete the Construction Manager shall prepare a Certificate of Substantial Completion and the Punch List. The Certificate shall establish the date of Substantial Completion and the responsibilities of the City and the Contractor for security, maintenance, heat, utilities, damage to the Work and insurance, warranties as defined by the Contract Documents, and shall fix the time, not to exceed 30 days, within which the Contractor shall finish all items on the Punch List or remaining work or administrative requirements accompanying the Certificate. When the preceding provisions have been approved by both the City and the Contractor, they shall sign the Certificate to acknowledge their written acceptance of the responsibilities assigned to them in such Certificate.

12.13 Final Completion. When all the Work is fully completed, Contractor shall provide City with a Certificate of Final Completion and shall request final inspection in writing. Additionally, Contractor shall provide legally effective releases or waivers satisfactory to City of all stop payment notice and payment bond claim rights in connection with the Work. Within ten (10) calendar days of receipt of such completed request form, City shall make final inspection. If following final inspection City determines that the Work (including all punch list items) has been fully completed and performed in accordance with the Contract Documents, the City will accept the Work as finally complete. Acceptance of the Project for Final Completion requires formal acceptance by the City's Representative. If the City's Representative determines that the Work is not complete after receipt of certification, the Contractor shall be notified in writing of deficiencies. After the deficiencies have been corrected, the procedure for final inspection as set forth above shall again be initiated by Contractor.

12.13.1 Waiver of Claims at Final Payment. Acceptance of final payment by Contractor shall constitute a waiver of all claims by Contractor, except those previously made in writing and identified as unsettled at the time of final payment or those related to final payment or items of Work that are incomplete at the time of Final Completion.

12.14 Warranties and Bonds

12.14.1 The Contractor hereby agrees to make, at its sole expense, all repairs or replacements necessitated by defects in materials or workmanship, supplied under terms of the Contract Documents, and pay for any damage to other works resulting from such defects, which becomes evident within the warranty period. Unless otherwise provided in Contract Documents, the one (1) year warranty period is the shortest duration and such duration may be a longer period of time as may be prescribed by law or by the terms of any applicable special guarantee required by the Contract Documents. The Contractor further assumes responsibility for a similar guarantee for all work and materials provided by subcontractors or manufacturers of packaged equipment components. The Contractor also agrees to indemnify, defend, and hold the City harmless from liability of any kind arising from damage due to said defects.

12.14.2 The Contractor shall execute and submit a warranties for the Work, and any portion of the Work possessed in accordance with Article 6.4, CITY'S RIGHT TO USE AND OCCUPY. The warranties shall be submitted within five (5) days of Substantial Completion.

12.14.3 The Contractor shall, upon the receipt of notice in writing from the City, promptly make all repairs arising out of defective materials, workmanship, or equipment. The City is hereby authorized to make such repairs, and the Contractor and its Surety shall be liable for the cost thereof, if ten (10) days after the City giving of such notice to the Contractor, the Contractor has failed to make or undertake the repairs with due diligence. In case of emergency, where in the opinion of the City delay could cause serious loss or damage, repairs may be made without notice being sent to the Contractor, and the expense in connection therewith shall be charged to the Contractor, and/or its Surety shall be liable for the cost thereof.

12.14.4 Prior to the expiration of the warranty period, the City reserves the right to hold a meeting and require the attendance of the Contractor. The purpose of the meeting is to review warranties, bonds and maintenance requirements and determine required repair or replacement of defective items.

12.14.5 For the purpose of this paragraph, acceptance of the Work or a portion of the Work by the City, shall not extinguish any covenant or agreement on the part of the Contractor to be performed or fulfilled

under this Agreement which has not, in fact, been performed or fulfilled at the time of such acceptance. All covenants and agreements shall continue to be binding on the Contractor until they have been fulfilled.

12.14.6 The City and the Contractor agree that warranty on the parts of the Work possessed and used by the City in accordance with Article 6.4, CITY'S RIGHT TO USE OR OCCUPY, shall commence on the date that the City takes possession of such work and so notifies the Contractor in writing. The City and Contractor further agree that such possession, and use of the Work shall not be deemed the Work as receiving Final Acceptance.

12.14.7 If, after installation, the operation or use of the materials or equipment furnished under the Contract Documents proves to be unsatisfactory to the Construction Manager or the City, the City shall have the right to operate and use such materials or equipment until it can, without damage to the City, be taken out of service for correction or replacement. Such period of use of the defective materials or equipment pending correction or replacement shall in no way decrease the warranty period. The warranty period for equipment shall be extended by the number of days from the date the equipment is found by the City to be non-functional or defective to the date the Contractor repairs and makes fully operational the same equipment.

12.14.8 Nothing in the Contract Documents shall be construed to limit, relieve or release the Contractor's, subcontractor's and/or equipment supplier's liability to the City for damages sustained as the result of latent defects in the equipment furnished or work performed. Further, nothing in the Contract Documents shall be deemed to be a waiver by the City of any rights or remedies, or time limits in which to enforce such rights or remedies, that it may have against the Contractor, subcontractors, suppliers of the equipment and Work performed under the Contract Documents.

12.15 Audits and Access to Records. The Contractor must maintain all books, records, documents, and other evidence directly pertinent to the performance of the Work in accordance with generally accepted accounting principles and practices. The Contractor must also maintain all financial information and data used by the Contractor in the preparation or support of any cost submission, including the Contractor's estimate, any Change Order, Dispute, Claim, Pay Application, or other request for equitable adjustment. City and its representatives will have access upon five (5) business days advanced written notice, during normal business hours, to all Contractor's books, summary reports, records, accounts, estimates, documents, detailed financial information, certified payroll records, AIS records and all other information and documentation relevant to the Work for the purposes of inspection, audit, and copying. The Contractor will, at no cost to City, provide reasonable facilities for such access, and inspection purposes. The City will arrange for and pay all costs of copying.

The Contractor agrees to include and make the requirements of this article, applicable to all subcontractors listed in Exhibit E, DESIGNATION OF SUBCONTRACTORS.

Audits conducted pursuant to this article, will be in accordance with general accepted auditing standards and established procedures and guidelines of the reviewing or audit agency.

The Contractor agrees to provide requested information and reports resulting from access to records to City, subject to execution of an appropriate confidentiality order if requested.

Records must be maintained and made available during the performance of the Work and for four (4) years after Final Payment, and until final settlement of all Disputes or Claims, whichever occurs later.

The right of access provisions of this article, applies to all financial records pertaining to the Agreement:

A. To the extent the records pertain directly to Agreement performance;

B. To the extent required for verification of the costs incurred where such costs are the basis for billings pursuant to the Agreement including Change Orders;

C. To the extent there is credible evidence that Contractor has violated the federal False Claims Act and the California False Claims Act or that fraud, gross abuse, or corrupt practices may be involved; and

D. If the Agreement is terminated for default or convenience.

Access to records is not limited to the required retention periods. City's Authorized Representative or designee must be granted access to records at any reasonable time for as long as the records are required to be maintained.

In the event that City's audit determines that Contractor has billed for any costs that are ineligible for reimbursement or for any reason should not have been paid, or the Contractor's fee has been improperly applied or calculated, Contractor shall promptly refund all improper payments following receipt of City's written notice and explanation of the alleged overpayments or improper fee and shall be responsible to pay City for the City's reasonable costs to perform the audit unless the Contractor establishes that the overpayment or improper fee was the result of an unintentional, inadvertent clerical error.

12.16 Cash Flow Projection. A cash flow projection covering the entire construction period shall be prepared by the Contractor and submitted to the Construction Manager prior to commencement of the Work. Additional cash flow projections shall be submitted upon request by the Construction Manager if there is a material change in the scope of the Work or a material change in the duration of the Work or if the Construction Manager reasonably believes that the Contractor's financial status has materially changed.

12.17 False Claims Act. All claims for payment from the Contractor to the City shall in all respects be a true and correct representation of services rendered and/or materials delivered to the City pursuant to the California False Claims Act. The penalties under the Federal False Claims Act and the State of California False Claims Act are non-exclusive, and are in addition to any other remedies which the City may have either under contract or law.

12.18 Shared Savings. The Contractor shall be compensated for actual work completed based on the Cost of the Work and Fee up to the amount of the GMP. If the Contractor's actual total Cost of the Work and Fee is less than the GMP upon Final Completion, the Contractor shall receive forty percent (40%) of the GMP Savings. "GMP Savings" shall mean the positive difference, if any, when the Actual Total Cost of the Work is subtracted from the GMP; provided, however, that unused Allowance monies, if any, shall not be subject to shared savings.

ARTICLE 13 - INSURANCE AND INDEMNIFICATION

13.1 Insurance

Contractor shall maintain, at its own expense, all the insurance required by this article and submit coverage verification for approval by the City prior to the City's execution of this Agreement, which shall be included in Exhibit L, CONTRACTOR INSURANCE CERTIFICATES of this Agreement.

This Agreement will not be executed by the City, and the Contractor shall not commence Work, until such insurance has been approved by the City. Such insurance shall remain in full force and effect at all times during the prosecution of the Work and until the Final Completion thereof. In addition, the commercial general liability insurance shall be maintained for a minimum of three (3) years after Final Completion of the Work. The City's issuance of the Notice to Proceed does not relieve the Contractor of the duty to obtain such insurance as required herein.

The Contractor shall not allow any subcontractor to commence work on its subcontract until all similar insurance required of the subcontractor has been obtained and verified by the Contractor and submitted to the Construction Manager for the City's review and records. Subcontractors shall furnish original certificates and required endorsements as verification of insurance coverage. At a minimum amount of coverage, the

insurance liability limits specified in Article 13.1.1.a(2) herein, shall apply for all subcontractors who execute a subcontract with the Contractor for portions of the Work.

Insurance is to be placed with insurers with a current A.M. Best's rating of no less than A-:VII or equivalent and that are admitted to do business and in good standing in California, unless otherwise approved by the City. In the case of workers' compensation and employer's liability insurance, coverage provided by the California State Compensation Insurance Fund is acceptable.

Each insurance policy required by this Agreement shall be endorsed to state that coverage shall not be suspended, voided, canceled by either party, or reduced in coverage or in limits except after thirty (30) days prior written notice has been given to the City by the insurance carrier. Should the insurance carrier refuse to provide this notice, the Contractor shall be obligated to provide to the City thirty (30) days prior written notice of any insurance coverage being suspended, voided, reduced or canceled by either party, or any reduction in coverage or in limits.

The Contractor shall include all costs for insurance in its GMP.

Nothing contained in these insurance requirements is to be construed as limiting the extent of the Contractor's responsibility for payment of damages resulting from its operations under this Agreement. For any claims related to Contractor's Work, as opposed to work City has contracted to parties other than Contractor, the Contractor's insurance coverage shall be primary insurance as respects the City, Construction Manager, Engineer, Funding Agencies and their directors, officers, elected officials, employees, agents, and volunteers. For any claims related to Contractor's Work, any insurance or self-insurance maintained by the City, Construction Manager, Engineer, Funding Agencies and their directors, elected officials, officers, officials, employees, agents, consultants or volunteers shall be in excess of the Contractor's insurance and shall not contribute with it.

Any failure of the Contractor to comply with reporting or other provisions of the policies including breaches of warranties shall not affect coverage provided to the City, Construction Manager, Engineer, Funding Agencies and their directors, elected officials, officers, officials, employees, agents, consultants or volunteers.

The Contractor shall take out, pay for, and maintain throughout the duration of this Agreement and for such additional periods as more specifically required herein the following insurance against claims for injuries to persons or damages to property which may be caused by the performance of the Work hereunder by the Contractor, the Contractor's agents, representatives, employees or subcontractors, or from operations under this Agreement.

13.1.1 Commercial General Liability and Automobile Liability Insurance – This insurance shall protect the Contractor from claims for bodily injury, personal injury and property damage which may be caused by the performance of the Work hereunder by the Contractor, the Contractor's agents, representatives, employees or subcontractors, or from operations under this Agreement. The commercial general liability insurance shall be maintained for three (3) years after Final Completion of the Work and shall provide coverage on an occurrence basis.

A. Additional Insureds – The commercial general liability and automobile policies of insurance shall include as additional insureds or be endorsed to contain the following provisions: the City, Construction Manager, Engineer, Funding Agencies and their directors, elected officials, officers, officials, employees, agents, consultants and volunteers are to be covered as additional insureds as respects: liability arising out of activities performed by or on behalf of the Contractor; products and completed operations of the Contractor; premises owned, occupied or used by the Contractor and or automobiles owned, leased, hired or borrowed by the Contractor. The coverage shall contain no special limitation on the scope of protection afforded to the City, Construction Manager, Engineer, Funding Agency and their directors, elected officials, officers, officials, employees, agents or volunteers and coverage provided to such additional insured. This policy shall provide coverage to each of the said additional

insureds with respect to said work. Said policy shall provide primary coverage to the full limit of liability stated in the declarations.

B. Amount of Coverage (General Contractor) – The bodily injury, personal injury and property damage liability of the Commercial General Liability insurance shall provide coverage in the following minimum limits of liability: $5,000,000 on account of any one occurrence for bodily injury and property damage, $5,000,000 personal and advertising injury limit with an annual general aggregate limit of not less than $10,000,000, and $5,000,000 products and completed operations aggregate, combined single limit, with excess coverage of $10,000,000 per occurrence and in the aggregate. The Automobile Liability insurance policy shall provide minimum limits of $5,000,000 per accident as a combined single limit arising out of the ownership, maintenance, or use of any owned or non-owned vehicles, with excess coverage of $10,000,000 per occurrence and in the aggregate, including coverage for products and completed operation. Any deductibles or self-insured retentions must be declared to and approved by the City.

C. Minimum Amount of Coverage for all Listed Subcontractors included in Exhibit E - The bodily injury, personal injury and property damage liability of the Commercial General Liability insurance shall provide coverage in the following limits of liability: $5,000,000 on account of any one occurrence for bodily injury and property damage, $5,000,000 personal and advertising injury limit with an annual general aggregate limit of not less than $10,000,000, and $5,000,000 products and completed operations aggregate, combined single limit. The Automobile Liability insurance policy shall provide minimum limits of $5,000,000 per accident as a combined single limit arising out of the ownership, maintenance, or use of any owned or non-owned vehicles. These minimum amounts of insurance coverage do not preclude the Contractor from requiring higher limits or additional insurance coverage as it deems necessary.

1. Minimum Amount of Coverage for Subcontractors NOT included in Exhibit E - The bodily injury, personal injury and property damage liability of the Commercial General Liability insurance shall provide coverage in the following limits of liability: $2,000,000 on account of any one occurrence for bodily injury and property damage, $2,000,000 personal and advertising injury limit with an annual general aggregate limit of not less than $4,000,000, and $2,000,000 products and completed operations aggregate, combined single limit. The Automobile Liability insurance policy shall provide minimum limits of $1,000,000 per accident as a combined single limit arising out of the ownership, maintenance, or use of any owned or non-owned vehicles. These minimum amounts of insurance coverage do not preclude the Contractor from requiring higher limits or additional insurance coverage as it deems necessary.

D. Subcontractors – The bodily injury and property damage liability insurance shall not be deemed to require the Contractor to have its subcontractors named as additional insureds in the Contractor's policy, but the policy shall protect the Contractor from contingent liability which may arise from operations of its subcontractors.

E. Included Coverage – The above commercial general liability insurance shall also include the following coverages:

- Premises – Operations
- Independent Contractors
- Products - Completed Operations
- Personal Injury - False Arrest, Libel, Wrongful Eviction, etc.

- Advertising Injury
- Broad Form Property Damage - Including, Completed Operations
- Separation of Insureds/Cross-Liability Provision
- Duty to Defend all Insureds
- Deletion of any Limitation on Coverage for Bodily Injury or Property Damage Arising out of Subsidence or Soil or Earth Movement
- Separate Aggregate – A provision that the annual general aggregate shall apply separately to each project for which Contractor provides services away from premises owned by or rented to Contractor.
- XCU – Explosion, Collapse, Underground Damage
- Blanket Contractual Liability – Provisions or endorsements shall state that the insurance, subject to all of its other terms and conditions, applies to the liability assumed by the Contractor under this Agreement, including, without limitation, insurable liabilities set forth in the indemnity articles of this Agreement.

1. Umbrella Policy – The Contractor may use an umbrella or excess policy to meet the limits requirement of Article 13.1.1.B, and subcontractors may use an umbrella or excess policy to meet the limit of requirements of Article 13.1.1.C. However, any such umbrella/excess policy must be approved by the City and maintain an A.M. Best Rating of no less than A:VII.

13.1.2 Workers' Compensation Insurance – In accordance with the provisions of Article 5, Chapter 1, Part 7, Division 2 (commencing with Section 1860) and Chapter 4, Part 1, Division 4 (commencing with Section 3700) of the Labor Code of the State of California, the Contractor is required to secure the payment of compensation to its employees and for that purpose obtain and keep in effect adequate Workers' Compensation Insurance. In accordance with California Labor Code Section 1861, the Contractor shall sign and include Exhibit K, WORKER'S COMPENSATION INSURANCE CERTIFICATE with this Agreement. If the Contractor, in the sole discretion of the City, satisfies the City of its responsibility and capacity under the applicable Workers' Compensation Laws, if any, to act as self-insurer, the Contractor may so act, and in such case, the insurance required by this article need not be provided.

The Contractor is advised of the provisions of Section 3700 of the Labor Code, which require every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that code, and shall comply with such provisions and have employers' liability limits of $1,000,000 per accident and per employee, and in the aggregate for injury by disease, before commencing the performance of the Work of this Agreement.

Before the Notice to Proceed with the Work under this Agreement is issued, the Contractor shall submit written evidence that the Contractor has obtained for the period of the contract workers' compensation and employer's liability insurance as required for all persons whom it employs or may employ in carrying out the Work under this Agreement. Such evidence of coverage shall be accompanied by an endorsement from the insurer agreeing to waive all rights of subrogation against the City, Construction Manager, Engineer, Funding Agencies and their directors, elected officials, officers, officials, employees, agents and volunteers which might arise by reason of any payment under the policy. This insurance shall be in accordance with the requirements of the most current and applicable State Workers' Compensation Insurance Laws.

13.1.3 Professional Liability Insurance – All submittals required of the Contractor which are to be prepared by a licensed California engineer shall be prepared only by a licensed engineer who is covered by a professional liability insurance policy issued by a California-admitted carrier or a carrier authorized to

do business in California with a Best's rating of A-:VII or better, with an limit per claim of at least $2,000,000, and a $4,000,000 in the aggregate for errors and omissions. Such insurance shall be maintained in effect by said engineer at all times while performing Work on the Project and for at least three (3) years after Final Completion of the Project. Contractor shall submit an insurance certificate for such engineer prior to beginning Work for approval by the City.

13.1.4 Builder's Risk Insurance – Contractor shall provide "Special Form" Builder's Risk Insurance on the replacement cost basis as listed below:

A. Amount of Coverage - Equal to the full replacement cost on a completed value basis, without deduction for depreciation and shall also provide coverage for "soft costs" such as but not limited to design and engineering fees and inspection costs caused by an insured peril, up to a maximum total for all soft costs of $350,000. The builder's risk insurance may contain sub-limits not less than the following:
   - Debris removal - $100,000.
   - Pollution Clean-up cost - $25,000.

B. Additional Insureds/Loss Payees - This insurance shall name the City, Engineer, Construction Manager, the Funding Agencies and Contractor as insureds/loss payees, as their interests may appear. Builder's risk insurance policies shall contain the following provisions:

   1) The City, Contractor and subcontractors of every tier shall be named as insureds.
   2) Each insured shall waive all rights of subrogation against each of the other insureds.

C. Included Coverage – The above builder's risk insurance shall include the following coverages:

   1) Including, but not by way of limitation, for all damages of loss to the Work and to appurtenances, to materials and equipment to be incorporated into the Project while the same are in transit, stored on or off the Site, to construction plant and temporary structures.
   2) Such insurance shall cover, but shall not be limited to, the perils of fire, lightning, windstorm, hail, explosion, riot, riot attending a strike, civil commotion, smoke damage, damage by aircraft or vehicles, vandalism and malicious mischief, theft, collapse, and flood.
   3) The policy shall cover the costs of debris removal, including demolition as may be made reasonably necessary by the application of any law, ordinance, or regulation.
   4) Start-up & testing, and machinery breakdown including electrical arching which are very important coverages and usually have to be requested.
   5) The policy shall provide the City the right to occupy the premises without termination of the policy until Final Completion of the Project.

D. Deductibles - Builder's risk insurance may have a deductible clause not to exceed the amounts below. Contractor shall be responsible for paying any and all deductible costs.

E. All Other Perils - $100,000.

F. Application of Loss Proceeds - In the event of a covered loss, proceeds of builder's risk insurance shall be applied first to reimburse actual costs of demolition, debris removal, reconstruction, and repair or replacement incurred in the discharge of the Contractor's obligations of repair or replacement under this Agreement. Insurance proceeds shall be deposited in a separate account in a local bank satisfactory to the City and shall be withdrawn only with the City's written approval to reimburse such actual costs as the builder's risk carrier has agreed to reimburse. The City shall have no liability for failure of the builder's risk carrier to pay for any particular cost of repairs. In the event of the termination of the Contractor for default, the Contractor shall forfeit all rights to builder's risk insurance proceeds and City may expend such proceeds to complete the Project as if they were unpaid contract monies.

13.1.5 Contractor's Pollution Liability Insurance. The Contractor shall obtain Pollution Liability Insurance. This insurance shall be written in comprehensive form either as a separate policy or as an endorsement to Contractor's general liability coverage and shall cover liability for bodily injury, property damage, and environmental damage resulting from pollution and related cleanup costs incurred, all arising out of any Work to be performed under the Agreement, including liability for and defense of lawsuits and regulatory actions. Coverage shall be provided for both Work performed on Site, as well as during the transport of hazardous materials. Coverage shall apply to sudden as well as gradual pollution conditions, including without limitation conditions resulting from the escape or release of smoke, vapors, fumes, acids, alkalis, toxic chemicals, liquids, or gases, natural gas, waste materials, or other irritants, contaminants, or pollutants, including asbestos. The liability limits shall be not less than:

- Combined Single Limit for each occurrence: $2,000,000.
- General Aggregate: $2,000,000.

If the coverage required is written on a claims-made coverage form:

- The retroactive date must be shown, and this date must be before the award date of the Agreement.
- Insurance must be maintained, and evidence of insurance must be provided for at least five (5) years after final payment.
- If coverage is canceled or non-renewed, and not replaced with another claims-made policy form with a retroactive date prior to the Agreement award date, the Contractor must purchase extended reporting period coverage for a minimum of five (5) years after Final Payment.
- A copy of the claims reporting requirements must be submitted to the City for review.

13.1.6 Proof of Coverage – Before execution this Agreement, the Contractor shall furnish the City with certificate(s) evidencing issuance of all insurance mentioned herein, copies of the policy declaration or information page(s) and additional insured endorsements, which shall be included as Exhibit L, CONTRACTOR'S INSURANCE CERTIFICATES. The certificate(s) and endorsements for each insurance policy are to be signed by a person authorized by that insurer to bind coverage on its behalf. The endorsements are to be on endorsement forms acceptable to the City. The certificate(s), policy declaration or information page(s), and endorsements are to be received and approved by the City before Work commences. Except for the waiver of subrogation rights endorsements, as required herein, no other endorsements are required for workers compensation or excess liability insurance. Such certificates of insurance shall provide that the insurance policy shall be endorsed to state that coverage shall not be suspended, voided, cancelled by either party, reduced in coverage or limits except after thirty (30) days prior written notice has been given to the City. The Contractor shall also provide certificate(s) evidencing renewals of all insurance required herein prior to the expiration date of any such insurance.

For all insurance policy renewals during the term of this Agreement, Contractor shall send insurance certificates reflecting the policy renewals directly to EBIX via email at roseville@ebix.com, or via fax to (770) 325-5727.

Any deductibles or self-insured retentions must be declared to and approved by the City. At the option of the City, either:

- The insurer shall reduce or eliminate such deductibles or self-insured retentions as respects the City, Construction Manager, Engineer, Funding Agencies and their directors, elected officials, officers, officials, employees, agents and volunteers; or

- The Contractor shall procure a bond guaranteeing payment of losses and related investigations, claim administration and defense expenses.

In the event of the breach of any provision of this article, or in the event of any notices received which indicates any required insurance coverage will be diminished or canceled, City, at its option, may, notwithstanding any other provisions of this Agreement to the contrary, declare a material breach of this Agreement and suspend all further work pursuant to this Agreement until Contractor has provided evidence that its insurance coverage meets the requirements of the Contract Documents.

13.1.7 Third Party Insurance Requirements - The Work, as contemplated by the Contract Documents, does not specifically require an encroachment permit from other public agencies or utilities. However, in the event the Contractor chooses a means and method of construction that results in Work requiring an encroachment permit from a public utility, or any other local, state, federal or public agency, Contractor shall ensure that the insurance it obtains in accordance therewith complies with all requirements mandated by each permitting agency from whom permits shall be obtained for the Work and any other third parties from whom third party agreements are necessary to perform the Work (collectively, the "Third Party(ies)"). To the extent there is a conflict between the Third Party(ies)'s Insurance Requirements and those set forth by the City herein, the requirement(s) providing the more protective coverage for both the City and the Third Party(ies) shall control and be purchased and maintained by Contractor.

Contractor shall be responsible to determine what insurance requirements exist as a condition precedent to obtaining permit(s) for the Work, if any. Contractor shall be solely responsible for any delay(s) arising from its failure and/or its subcontractors' failure to timely obtain all required insurance.

All required third party insurance shall be submitted to the City at the same time Contractor submits all other contractually required insurance, which is no later than ten (10) days after Notice of Intent to Award, unless otherwise agreed to in writing by the City prior to this deadline.

13.1.8 Insurance During Guarantee Period - For all work the Contractor or its subcontractors perform during the guarantee period, workers compensation and commercial general liability insurance in the amounts and format required herein shall remain in force and be maintained for three (3) years after Final Completion of the Work.

The Contractor shall be responsible for paying any and all deductible costs for claims against its workers compensation and commercial general liability insurance.

13.2 General Indemnification Obligations

A. The Contractor shall indemnify, defend with counsel acceptable to City, and hold harmless to the full extent permitted by law, at the Contractor's expense, the City, and their directors, elected officials, officers, officials, employees, agents, consultants, design engineers, Funding Agencies and each of them (collectively the "Indemnified Parties"), from and against any and all liability, loss, damage, claims, actions, causes of action, expenses and costs (including, without limitation, reasonable City staff attorney fees and outside attorney fees, and costs and fees of litigation) (collectively, "Liability") of every nature to the extent caused by Contractor's negligent performance of the Work under this Agreement or its failure to comply with any of its obligations contained in this Agreement, except that such obligation to defend and indemnify does not apply to the extent such Liability was caused by the active negligence, sole negligence or willful misconduct of the Indemnified Parties. Such indemnification by the Contractor shall include, but not be limited to, the following:

    1. Liability or claims resulting directly or indirectly from the negligence or carelessness of the Contractor, its subcontractors, employees, or agents in the performance of the Work, or in guarding or maintaining the same, or from any improper materials, implements, or appliances used in its construction, or by or on account of any act or omission of the Contractor, its employees, or agents;

    2. Liability or claims arising directly or indirectly from Contractor's negligent acts that cause bodily injury, occupational sickness or disease, or death of the Contractor's, or supplier's own

employees, or agents engaged in the Work resulting in actions brought against the Indemnified Parties;

3. Liability or claims arising directly or indirectly from or based on the violation of any laws or regulations, whether by the Contractor, its subcontractors, employees, or agents;

4. Liability or claims arising directly or indirectly from the negligent or legally unauthorized use or manufacture by the Contractor, its subcontractors, employees, or agents in the performance of this Agreement of any copyrighted or uncopyrighted composition, secret process, patented or unpatented invention, article, or appliance, unless otherwise specified stipulated in this Agreement.

5. Liability or claims arising directly or indirectly from the breach of any warranties, whether express or implied, made to the City or any other parties by the Contractor, its subcontractors, employees, or agents;

6. Liability or claims arising directly or indirectly from the willful misconduct of the Contractor, its subcontractors, employees, or agents;

7. Liability or claims arising directly or indirectly from any breach of the obligations assumed in this Agreement by the Contractor;

8. Liability or claims arising directly or indirectly from, relating to, or resulting from a hazardous condition created by the Contractor, subcontractors, suppliers, or any of their employees or agents due to Contractor's negligence or breach of any obligation in this Agreement;

9. Liability or claims arising directly, or indirectly, or consequentially out of any action, legal or equitable, brought against the Indemnified Parties, their consultants, subconsultants, and the directors, officers, elected officials, employees, agents and volunteers of each or any of them, to the extent caused by the Contractor's negligent or improper use of any premises acquired by permits, rights of way, or easements, the Site, or any land or area contiguous hereto or its performance of the Work thereon;

10. Liability arising directly or indirectly from exposure to hazards in violation of the California Labor Code that may be asserted by any person or entity, including, but not limited to, the Contractor, arising out of or in connection with the negligent activities of the Contractor, its agents, employees or privities pursuant to this Agreement, whether or not there is concurrent negligence on the part of the Indemnified Parties;

11. Liability or claims arising directly or indirectly from the failure of the Contractor to comply with the Section 01 11 80, ENVIRONMENTAL CONDITIONS, Section 01 12 16, WORK SEQUENCE or Section 01 35 43, ENVIRONMENTAL PROCEDURES; and

12. Liability or claims arising out of the Contractor's performance of the Work.

B. The Contractor shall reimburse the Indemnified Parties for all costs and expenses, (including but not limited to reasonable fees and charges of engineers, architects, attorneys, and other consultants and professionals and court costs of appeal) incurred by said Indemnified Parties arising out of or in enforcing the provisions of this article.

C. The indemnification obligation under this Article 13.2 shall not be limited in any way by any limitation on the amount or type of insurance carried by Contractor or by the amount or type of damages, compensation, or benefits payable by or for the Contractor or any subcontractor or other person or organization under workers' compensation acts, disability benefit acts, or other employee benefit acts.

D. Pursuant to California Public Contract Code Section 9201, City shall timely notify Contractor of receipt of any third-party claim relating to this Agreement.

E. The Contractor's obligations pursuant to this provision will survive the expiration or earlier termination of this Agreement.

F. The Contractor hereby agrees at its expense promptly to assume the defense of and to defend, with counsel acceptable to the City, against any indemnified Claim, suit or other proceeding brought thereon, and promptly to pay any and all costs, charges, attorney's fees, and other expenses and any and all judgments that may be incurred against the City, and each elected officials, officers, representatives, agents, consultants, design engineers or employees, or any of them to the extent arising from any negligent act, error, or omission, or from any willful misconduct of the Contractor in the performance of the Contractor's obligations under this Agreement.

G. The only limitations on this provision shall be those imposed by Civil Code section 2782.

13.3 Hazardous Substance Indemnifications Obligations

Neither the Contractor nor its subcontractors or suppliers shall use, generate, manufacture, store or dispose of on, under or about the Site, or transport to, from, along or across the Site, any flammable, explosive radioactive material, toxic substance, hazardous waste, hazardous material, hazardous substance, or the equivalent, as those terms may now or in the future be defined by common practice or by any federal, state or local statute, ordinance or regulation or any governmental body or agency (hereinafter "Hazardous Substance").

A. Without limiting any remedies the City may have, in the event any disposal, release, discharge or spill of a Hazardous Substance or other contamination occurs within the Site at any time during, or as a result of, the Contractor's use of the Site, except such spills or contamination to the extent directly caused by the sole negligence or willful misconduct of the City, its contractors, officers, representatives, agents, consultants, design engineers or employees, the Contractor shall immediately notify City and take all action to mitigate the effects of such disposal, release, discharge, spill or contamination. The Contractor shall at the Contractor's own expense, unless otherwise directed by the City, remediate such disposal, release, discharge of spill or contamination in compliance with all applicable laws, rules and regulations. The City shall have the option to perform the remediation itself or through any contractor if the Contractor fails to do so. The Contractor shall cooperate with the City to complete the remediation and shall reimburse the City for all costs and expenses incurred in connection with the remediation.

B. In the event that the Contractor observes any material that the Contractor believes or has reason to believe may be a Hazardous Substance or encounters any unknown physical condition of any unusual nature within the Site, other than disposals, releases, discharges, spills or contamination covered in paragraph A, above, the Contractor shall, without disturbing the condition, immediately cease all use of the Site and notify the City. The City shall investigate the condition and take any clean-up or other remedial action City deems necessary in its sole discretion.

C. In the event the City or its contractor elects to perform remediation work, the Contractor shall upon notice from the City, cease use of the Site as directed in the notice. The City will notify the Contractor when the condition has been resolved, at which time, but not before, the Contractor may resume its use of the Site.

D. The Contractor agrees to assume liability for and to defend and hold harmless the Indemnified Parties from and against all injuries or death to any person and damage to any property, and all related expense, including without limitation attorneys' fees, investigators' fees, administrative charges, litigation expenses and any judgments, fines, penalties or other charges assessed against Indemnified Parties, resulting from the Contractor's failure to comply with this article and any laws,

rules or regulations concerning the subject matter hereof. The provisions of this article shall survive the expiration and termination of this Agreement.

The obligations and liabilities arising under the Article 13.3, HAZARDOUS SUBSTANCE INDEMNIFICATIONS OBLIGATIONS, shall be in addition to and independent of those obligations and/or liabilities arising under the other provisions of this Agreement and shall in no way limit, alter, reduce or eliminate the effect of such other provisions.

ARTICLE 14 - MISCELLANEOUS PROVISIONS

14.1 Governing Law. This Agreement and the Contract Documents shall be deemed to have been entered into in the County of Placer, State of California, and governed by California law (excluding choice of law rules).

14.2 Assignment. The Contractor will not assign any rights or delegate duties under this Agreement without the written consent of the City, which consent will not unreasonably be withheld, including, but without limitation, moneys that may become due and moneys that are due may not be assigned without such consent (except to the extent that the effect of this restriction may be limited by law), and unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility under the Contract Documents. City has consented to Contractor's use of subcontractors listed in Exhibit E, DESIGNATION OF SUBCONTRACTORS.

14.3 Severability. If any provision of this Agreement is held to be inoperative or unenforceable as applied in any particular case because it conflicts with any other provision hereof or any constitution, statute, ordinance, rule of law or public policy, or for any other reason, such holding shall not have the effect of rendering the provision in question inoperative or unenforceable in any other case, or of rendering any other provision herein contained inoperative or unenforceable to any extent whatever. The invalidity of any one or more phrases, sentences, clauses or articles contained in this Agreement shall not affect the remaining portions of this Agreement or any part hereof, and they shall otherwise remain in full force and effect.

14.4 Contractor Licensing. For the duration of the Agreement, the Contractor shall possess a valid State of California Class A - General Engineering Contractor's License.

14.5 Permits and Licenses. For the duration of the Agreement, the Contractor shall have a local business license for the work contemplated. All subcontractors will be required to secure the appropriate local business license before they commence Work on the Project. The Contractor shall have all licenses, permits, City Business Operations Tax Certificate, qualifications, and approvals of whatsoever nature legally required for Contractor to practice its profession or provide any Work or services under this Agreement. Contractor shall, at its sole cost and expense, keep in effect or obtain at all times during the term of this Agreement any licenses, permits, and approvals that are legally required for Contractor to practice its profession or provide such Work or services.

14.6 Whole Agreement. This Agreement, the Exhibits hereto, and the other Contract Documents, Specifications and Drawings represents the entire and integrated agreement between the parties hereto and supersedes prior negotiations, representations or agreements, either written or oral, and no inducements, considerations, promises or other references shall be implied in this Agreement that are not expressly addressed herein.

14.7 Conflict of Interest. Contractor covenants that neither it, nor any officer or principal of its firm, has or shall acquire any interest, directly or indirectly, that would conflict in any manner with the interests of City or that would in any way hinder Contractor's performance of Work under this Agreement. Contractor further covenants that in the performance of this Agreement, no person having any such interest shall be employed by it as an officer, employee, agent or subcontractor, without the written consent of the City. Contractor agrees to avoid conflicts of interest or the appearance of any conflicts of interest with the interests of the City at all times during the performance of this Agreement. If Contractor is or employs a former officer or employee of the City, Contractor and any such employee(s) shall both immediately notify the City's

Representative and both shall comply with any City requests pertaining to appearances before the City Council or any City department, board, commission or committee.

14.8 Contractor Not Agent. Except as City may specify in writing, Contractor and Contractor's personnel shall have no authority, express or implied, to act on behalf of City in any capacity whatsoever as an agent. Contractor and Contractor's personnel shall have no authority, express or implied, to bind City to any obligations whatsoever.

14.9 No Waiver. Neither the inspection by City or its agents, nor any order or certificate for payment of money, nor payment for, nor acceptance of the whole or any part of the Work by City, nor any extensions of time, nor any position taken by City or its agents shall operate as a waiver of any provision of this Agreement or of any power herein reserved to City or any right to damages herein provided, nor shall any waiver of any breach of this Agreement be held to be a waiver of any other or subsequent breach.

14.10 Contractor Shall Assume Risks. Until the Final Completion by City of all Work under this Agreement, the Work shall be under Contractor's responsible care and charge. Contractor shall rebuild, repair, restore and make good all injuries, damages, corrections, and repairs occasioned or rendered necessary by accidental causes of any nature except earthquake or flood, to all or any portions of the Work, except as otherwise stipulated and/or as compensated by insurance.

14.11 General Liability of Contractor. Except as otherwise herein expressly stipulated, Contractor shall perform all the Work and furnish all the labor, materials, tools, power and light, and appliances, necessary or proper for performing and completing the Work herein required in the manner within the time herein specified. The mention of any specific duty or liability of Contractor shall not be construed as limitation or restriction of any general liability or duty of Contractor and, any reference to any specific duty or liability shall be construed to be the purpose of explanation.

14.12 Not Used.

14.13 Penalty for Collusion. If, at any time, it is found that the person, firm, or corporation to whom this Agreement has been awarded has, in presenting any proposal, bid or bids, colluded with any other party or parties, then this Agreement shall be null and void, and the Contractor and its sureties shall be liable for loss or damage which the City may suffer thereby.

14.14 Rights and Remedies. The duties and obligations imposed by the Contract Documents and the rights and remedies available thereunder shall be in addition to, and not a limitation of, any duties, obligations, rights, and remedies otherwise imposed or available by law.

No action or failure to act by the City, the Engineer, or the Construction Manager shall constitute a waiver of any right or duty afforded any of them under this Agreement, nor shall any such action or failure to act constitute an approval of or acquiescence in any breach thereunder, except as may be specifically agreed in writing.

14.15 Rights of Action. No right of action shall accrue upon or by reason of this Agreement to or for the use or benefit of anyone other than the parties to this Agreement, except where a third party is identified as an express intended beneficiary of the Contractor's obligations owed to City, including, but not limited to, the indemnification and additional insured requirements contained in the Contract Documents. The parties to this Agreement are the Contractor and the City.

14.16 Notices. Except as otherwise specified herein, all notices to be sent pursuant to this Agreement or the other Contract Documents shall be made in writing, and sent to the Parties at their respective addresses specified below or to such other address as a Party may designate by written notice delivered to the other parties in accordance with this article. All such notices shall be sent by:

A. Personal delivery, in which case notice is effective upon delivery;

B. Certified or registered mail, return receipt requested, in which case notice shall be deemed delivered on receipt if delivery is confirmed by a return receipt;

C. Nationally recognized overnight courier, with charges prepaid or charged to the sender's account, in which case notice is effective on delivery if delivery is confirmed by the delivery service; or

D. Facsimile transmission, in which case notice shall be deemed delivered upon transmittal, provided that (a) a duplicate copy of the notice is promptly delivered by first-class or certified mail or by overnight delivery, or (b) a transmission report is generated reflecting the accurate transmission thereof. Any notice given by facsimile shall be considered to have been received on the next business day if it is received after 5:00 p.m. recipient's time or on a non-business day.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. 19-475, adopted by the Council of the City of Roseville on the 6th day of November, 2019, and CONTRACTOR is duly authorized and has caused this Agreement to be executed.

Dear Ms. Mueller,

W. M. Lyles Co. is pleased to provide the enclosed information in response to your Request for Statement of Pre-Qualification for the above referenced projects.

We are proud to be an integral part of the construction industry since our founding in 1945 and consider the professional relationships we have developed over the years to be stronger than those of our competitors. We currently operate five construction divisions throughout the State of California from Sacramento to Temecula. Our strategic locations provide our customers better service and outstanding centralized construction quality.

W. M. Lyles Co. is a member of Lyles Construction Group (LCG), which is comprised of W. M. Lyles Co., New England Sheet Metal and Mechanical Co., and American Paving Co. LCG is listed in ENR's Top 400 Contractors and Top 200 Environmental Firms and provides contracting services for individual projects up to $200 million. Over the past five years, LCG has averaged over 1 million craft manhours. The companies within LCG have the capacity to self-perform the following types of work: pipelines, earthwork, grading, paving, concrete flatwork, wet and dry utilities, structural concrete, mechanical and civil piping, HVAC, refrigeration, plumbing, and equipment installation.

W. M. Lyles Co. has the financial resources and risk management structure to successfully and responsibly complete major projects. Our bonding limits are $1 billion single project and $2 billion aggregate, and we have ample available bonding capacity to include new projects in our construction portfolio.

Safety is a priority and our experienced safety professionals provide the necessary training and inspection for our management staff and field crews to safely meet the varied demands of our industry. As a result of this commitment to safety we maintain an insurance modification rate of 0.78, which is well below the industry average.

RE: 08-050 Contractor Statements of Pre-Qualification for the Pleasant Grove Wastewater Treatment Plant Expansion Project and/or Pleasant Grove Wastewater Treatment Plant Energy Recovery Project

***************ADDENDUM ONE ***************

- **Adding Mandatory Pre-SOPQ Meeting Agenda document for download from Public Purchase**
- **Adding Mandatory Pre-SOPQ Meeting Slide Deck for download from Public Purchase**
- **Adding Mandatory Pre-SOPQ Meeting Sign-In List for download from Public Purchase**

Please note the following revisions, which represent one attachment:

1. **REVISIONS TO TABLE OF CONTENTS, PAGE i**

   Revise the list of Appendices as shown below:

   APPENDIX A- PGWWTP EXPANSION PROJECT DESCRIPTION
   APPENDIX B- CONTRACTOR PRE-QUALIFICATION SCORING
   APPENDIX C- PGWWTP EXPANSION SITE PLAN
   APPENDIX D- BONDS AND INSURANCE
   APPENDIX E- PGWWTP ERP DESCRIPTION
   APPENDIX F- PGWWTP ERP SITE PLAN
   APPENDIX G – PROSPECTIVE PROPOSER'S CERTIFICATION

2. **REVISION SECTION 1.3, PAGE 3**

   Revise the text at the top of page 3 as shown below:

choose to submit qualifications for a specific branch /division, the scoring requirements for Part II B-CF of the SOPQ, as well as all other submitted information shall be branch/division specific. Financial statements should still be for the total company and parent company even if a Prospective Proposer submits the scoring requirements specific to a company branch or division.

3. REPLACEMENT PAGES FOR THE SOPQ SUBMITTAL FORM WITH SECTION 3

Replace pages 12, 13, 14, 15, 16 and 20 of the RFPQ with the corresponding attached Addendum 1 pages. The attached pages listed below shall be used in lieu of the original page 12, 23, 14, 15, 16 and 20 and included within the SOPQ Submittal package. Note that these pages have "Addendum 1 page #" included in the footer. The changes within the attached replacement sheets are summarized below:

- Addendum 1 page 12 – Within the first sentence on the top of page 12 for Part I stating "An answer of "No" to any of the Questions 1 through 9…" has been revised to remove question 9.
- Addendum 1 page 13 –
  - Within Part I, question 7 at the top of the page the "Date of finical statement must be 2018." has been revised to "Date of financial statement must be December 2017 or later."
  - Within Part 1, question 9 has been eliminated and replace with the text "NOT USED."
- Addendum 1 page 14 – PART I(A) second sentence from bottom of page stating "Prospective Proposer also certifies that Prospective Proposer self-performed at least 40% of the work and also self-performed all structural concrete on each of the projects listed in Part III, Item 39(A)" has been revise to remove the "and also self-performed all structural concrete".
- Addendum 1 page 15 – PART I(B) second sentence from bottom of page stating "Prospective Proposer also certifies that Prospective Proposer self-performed at least 40% of the work and also self-performed all structural concrete on each of the projects listed in Part III, Item 39(B)" has been revise to remove the "and also self-performed all structural concrete".
- Addendum 1 page 16 – PART I(C) second sentence from bottom of page stating "Prospective Proposer also certifies that Prospective Proposer self-performed at least 40% of the work and also self-performed all structural concrete on each of the projects listed in Part III, Item 39(B)" has been revise to remove the "and also self-performed all structural concrete".
- Addendum 1 page 20 - Part II, B, question 3 bold note that states "NOTE: All Prospective Proposers will be required to submit non-

collusion affidavits" has been revised to require Prospective Proposers to properly execute and submit the certification added as Appendix G within this addendum as Attachment A of the SOPQ Submittal.

4. ADD APPENDIX G, PROSPECTIVE PROPOSER'S CERTIFICATION AS PAGE 86

Add the attached Appendix G cover sheet and Prospective Proposer's Certification form attached as Appendix G to the RFPQ.

5. MANDATORY PRE-SOPQ SUBMITTAL MEETING STATEMENTS AND RESPONSES TO QUESTIONS

General statements made by the City after the City team's presentation, and questions presented at the March 18, 2019 Mandatory Pre-SOPQ Submittal Meeting with City responses are included below:

A. City Statement: A Prospective Proposer shall check all three boxes in the "Declaration of PGWWTP Project(s) SOPQ submission" to be considered for the possibility of being awarded both projects and they must fill out all of the three SOPQ options in the submission packet.

B. City Statement: The timeline for the financial statements will be revised as some contractors will not have their 2018 documents certified in time for the SOPQ Submittal.

C. Question: Has the SRF funding award been received?
Response: Not yet, but the PGWWTP projects moving into construction are not dependent on receiving these funds.

D. Question: What will the California Energy Commission requirements be?
Response: Those requirements are still being developed and will be included in the Request for Bid Proposals.

E. Question: On page 3 it states scoring requirements are for Part II B-F, but is there a D, E and F?
Response: No, this text will be revised via addendum as this was a revision that was not caught and is an error.

F. Question: Is May 13th 2019 a hard date for RFP to be posted?
Response: No, as stated in the RFPQ and presentation it is tentative.

G. Question: Is April 1, 2019 a hard submittal date for the SOPQ Submittal?
Response: Yes, April 1, 2019 by 3:00 PM is still the required SOPQ Submittal due date. The City does not see a reason at this time to extend this deadline.

H. Question: What will be required in the Request for Bid Proposals?
Response: Two envelopes will be required. The first will be the technical project approach which will include things like team description and safety pass/fail exhibits, etc. The second envelope will be for the commercial terms including a Guaranteed Maximum Price (GMP), markups for overhead and profit, proposed cost savings percentages, etc. Envelope 1 will be scored and recorded first and then envelope 2 will be opened and scored.

I. Question: How do we access the Public Purchase website?
Response: www.publicpurchase.com

J. Question: How much will the GMP count in the scoring?
Response: The scoring is still being developed and will be included in the Request for Bid Proposals, but the GMP itself (not including other scoring within the second envelope) will likely not be more than 50%.

K. Question: How complete are the design drawings?
Response: The designs are both at or close to complete and will be provided in the Request for Bid Proposals for Prospective Proposers to review and determine.

L. Does the City use this Design Assist process all the time?
Response: No, but we have used it in the past including most recently for our recent Dry Creek Wastewater Treatment Plant improvement projects that are currently under construction.

Please include a signed copy of the addendum with your proposal.

I acknowledge receipt of Addendum One

Statement of Pre-Qualification with Submittal Form

SECTION 1

INSTRUCTIONS FOR PREPARATION AND SUBMISSION OF STATEMENT OF PRE-QUALIFICATION (SOPQ) PACKAGES

1.1 DEFINITIONS

For the purpose of this Statement of Pre-qualification (SOPQ) submittal, the following definitions shall apply:

Statement of Pre-qualification ("SOPQ") - The documents requested by the City and the information submitted by the Prospective Proposers that form the Pre-Qualification package for the PGWWTP Expansion and/or the PGWWTP ERP and/or both PGWWTP projects.

Prospective Proposer - Any individual, partnership, corporation, limited liability company, or other combination thereof who submits an SOPQ to the City for consideration of contract award for completing the PGWWTP Expansion and/or the PGWWTP ERP and/or both PGWWTP projects, acting directly or through an authorized representative.

City- The City of Roseville, employees acting either directly or through properly authorized agents, such agents acting within the scope of the particular duties entrusted to them.

Pleasant Grove Wastewater Treatment Plant Expansion Project ("PGWWTP Expansion") The project generally consists of construction of four new primary clarifiers with odor control facilities and an electrical building, a solids thickening building, sludge pumping systems, two anaerobic digesters and a digester control building, a ferric chloride dosage and storage facility, a waste gas burner, two boilers, conversion of two waste activated sludge holding tanks to a centrate storage and digested sludge holding tank, a centrate wet well and associated pump system and all other miscellaneous improvements in support of the project, including asset management, start up and testing to provide a complete and operational system in all respects. A more detailed description of the PGWWTP Expansion is included in Appendix A - PGWWTP Expansion Project Description. PGWWTP Expansion Site Plans are included in Appendix C.

Pleasant Grove Wastewater Treatment Plant Energy Recovery Project ("PGWWTP ERP") The completed PGWWTP ERP will provide compressed natural gas (CNG) to be utilized by City vehicles, generate heat and power for the plant, and receive trucked high strength waste materials from local industry. The project will be constructed on undeveloped City-Owned land adjacent to and immediately south of the existing PGWWTP. A new CNG fueling station will be installed to fuel the City's solid waste fleet. The facility includes all the compressors, dispensers, high pressure storage, and fuel management systems required for a fully operational fast-fill station. The CNG vehicle fuel will be derived from biomethane from a new biogas upgrading system. On an as-needed basis, pipeline natural gas may be utilized to supplement CNG demand. The new biogas upgrading system will treat the City's digester gas (from anaerobic digesters constructed as part of the PGWWTP Expansion) to meet CNG engine fuel quality requirements. A new microturbine cogeneration facility will use digester gas or a blend of biogas-upgrading tail gas and natural gas

to produce electricity and heat. A new high strength waste receiving station will allow for offloading of trucked material to be fed to the anaerobic digesters.

A more detailed description of the PGWWTP ERP is included in Appendix E - PGWWTP ERP Project Description. A PGWWTP ERP Site Plan is included in Appendix F.

1.2 DELIVERY OF SUBMITTAL

A total of four (4) bound hard copies of the SOPQ and one electronic (PDF) copy on a USB flash drive shall be submitted no later than **3:00 PM April 1, 2019** to:

City of Roseville
City Clerk Department
311 Vernon Street
Roseville, CA 95678
Re: Pleasant Grove Wastewater Treatment Plant Expansion Project
Pleasant Grove Wastewater Treatment Plant Energy Recovery Project

Attention: Tracie Mueller, P.E., Environmental Utilities- Engineering

SOPQ packages shall be submitted in sealed envelopes marked "Confidential" and shall include the following title on the front of the package, "Contractor SOPQ for the PGWWTP Expansion and/or the PGWWTP ERP and/or both PGWWTP projects".

1.3 PREPARATION OF SUBMITTAL

The bound copies of the SOPQ package shall be assembled in separate binders with a title page, table of contents, and section dividers. The SOPQ package submittal information shall be presented in the same order as in this RFPQ; submitting the whole document beginning with page 1. All pages shall be 3-hole punched and printing shall be arranged so that punching does not obliterate any data. Only one financial statement shall be submitted. A single hard copy of a reviewed or audited company financial statement shall also be provided in a separate sealed envelope with the original SOPQ package submittal.

It is mandatory that all Prospective Proposers who desire to submit a proposal for the PGWWTP Expansion or the PGWWTP ERP or both PGWWTP projects, fully complete the SOPQ questionnaire, provide all materials requested herein, and be approved by the City to be on the final pre-qualified contractors list for each or both PGWWTP projects. Proposals will be rejected from a Prospective Proposer that has failed to comply with these requirements.

The City recognizes that large construction companies (e.g. revenues in excess of $250 million per year) have multiple branches/divisions for geographic and/or type of construction coverages. In such cases, the Prospective Proposer may elect to submit a set of qualifications for a specific company branch or division which shall be clearly identified in a cover letter for the SOPQ package submittal. As such, should a Prospective Proposer

choose to submit qualifications for a specific branch /division, the scoring requirements for Part II B-F of the SOPQ, as well as all other submitted information shall be branch/division specific. Financial statements should still be for the total company and parent company even if a Prospective Proposer submits the scoring requirements specific to a company branch or division.

1.4 WITHDRAWAL OF SUBMITTAL

A SOPQ may be withdrawn by written request to Tracie Mueller, P.E., Environmental Utilities- Engineering, 2005 Hilltop Circle, Roseville, CA 95747 within five business days of submittal.

1.5 LATE SUBMITTAL

Any SOPQ stamped by the City Clerk's office after the scheduled receipt date and time will not be considered and will be returned to the Prospective Proposer unopened.

1.6 INTERPRETATION OF INFORMATION

This RFPQ includes a description of the scope of Pre-Qualification, qualification requirements, and instructions for submitting the SOPQ. Failure to follow these instructions may result in rejection of the Prospective Proposer's SOPQ.

The deadline for questions regarding the RFPQ is per Milestone Table in Notice to General Contractors Section.

No oral representations or interpretations will be made to any proposer as to the meaning of this RFPQ. Direct all inquiries regarding this RFPQ via https://www.publicpurchase.com/.

In the event that it becomes necessary to revise any part of this RFPQ, a written addenda will be issued. Any amendment to this RFPQ is valid only if it is in writing and issued by the Environmental Utilities Department via Public Purchase.

All addenda for this RFPQ will be distributed to Prospective Proposers who have registered with https://www.publicpurchase.com/ and who have downloaded the RFPQ. It is the Prospective Proposer's sole responsibility to monitor this website for possible addenda to this RFPQ. Failure of Prospective Proposer to retrieve addenda from this site shall not relieve the Prospective Proposer of the requirements contained therein. Additionally, failure of the Prospective Proposer to return a signed addendum, with the submittal, will be cause for rejection of the submittal.

1.7 DETERMINATION

Answers to questions contained in the attached questionnaire, information about current bonding capacity, notarized statement from surety, and the most recent reviewed or audited financial statements, with accompanying notes and supplemental information, are required. The City reserves the right to check other sources available. The City's decision will be based on objective evaluation criteria.

The City will determine the Pre-Qualification status of each Prospective Proposer based on the responses to the information requested in Section 3. The City shall be the sole judge as to the adequacy of each Prospective Proposer to perform work on the PGWWTP Expansion or the PGWWTP ERP or both PGWWTP projects, and City's decision shall be final.

The City reserves the right to waive minor irregularities and omissions in the information contained in the SOPQ submitted, and to make all final determinations.

The anticipated schedule for Prospective Proposer Pre-Qualification determination is provided in the Notice to Contractors.

Where a timely and completed application results in a rating below that which is required for Pre-Qualification, an appeal can be made. An appeal is begun by the Prospective Proposer delivering notice to the City Clerk of its appeal of the decision with respect to its Pre-Qualification rating, no later than five business days following notification of not being prequalified. Without a timely appeal, the Prospective Proposer waives any and all rights to challenge the decision of the City, whether by administrative process, judicial process or any other legal process or proceeding.

If the Prospective Proposer gives the required notice of appeal and requests a hearing, an appeals panel hearing shall be conducted. The hearing shall be an informal process conducted by a panel to hear such appeals. At/or prior to the hearing, the Prospective Proposer will be advised of the basis for the City's Pre-Qualification determination. The Prospective Proposer will be given the opportunity to present information and present reasons in opposition to the rating. Within five business days of the conclusion of the hearing, the appeals panel will render its decision.

The list of prequalified contractors will be posted to the City of Roseville's Public Purchase website at: https://www.publicpurchase.com/

Prospective Proposers opposing any other firms on the prequalified list, (based on potential for proposal collusion only), shall deliver written notice to the City within five business days of posting. The City will establish a review panel and conduct a hearing in the same process as identified above for the appeals process. Within five business days of the conclusion of the hearing, the review panel will render its decision.

The City reserves the right to adjust, increase, limit, suspend or rescind the Pre-Qualification rating based on subsequently learned information. Prospective Proposers whose rating decrease enough to disqualify them will be notified, and given an opportunity for a hearing consistent with the hearing procedures described above for appealing a Pre-Qualification rating.

1.8 EXCLUSION OF COST QUOTATIONS

The SOPQ submittal is a request for information, not a cost proposal. Prospective Proposers are advised that a formal or informal cost quotation for either PGWWTP project is not requested by the City and should not be included with the submittal. Any such information furnished will not be considered.

SECTION 2

SCOPE OF PRE-QUALIFICATION

2.1 INTENT

The Pre-Qualification procedure will be used to determine responsible Prospective Proposers for the PGWWTP Expansion, the PGWWTP ERP, and both PGWWTP projects. However, Pre-Qualification is not a conclusive determination of responsiveness and responsibility and a prequalified proposer may be rejected as nonresponsive or non-responsible by the City during the subsequent request for proposal process for each or both PGWWTP projects. In all cases, the Prospective Proposer ultimately awarded the contract shall comply with the requirements of the construction contract documents for each or both respective PGWWTP projects.

2.2 EXPERIENCE REQUIREMENT

The Pre-Qualification procedure involves the review and evaluation of information regarding the proven experience of the Prospective Proposers to construct each or both PGWWTP projects in a manner acceptable to the City. The experience of the Prospective Proposer will be evaluated on the basis of the SOPQ submittal and information gathered by the City from the references (provided by the Prospective Proposer) of related projects. Proven experience is defined as the actual performance of the Prospective Proposer on previous construction projects of a similar nature (see Part III of Section 3 for experience requirements) as corroborated by said references.

The City is not obligated to prequalify or accept a Prospective Proposer with no or un-satisfactory related experience.

2.3 CONFLICT OF INTEREST

The Prospective Proposer shall warrant that no official or employee of the City has an interest, has been employed or retained to solicit or aid in the procuring of the contract for either PGWWTP project contained in this RFPQ, nor that any such person will be employed in the performance of such contract without immediate divulgence of such fact to the City. Prospective Proposers submitting a SOPQ in response to this RFPQ must disclose any actual, apparent, direct, indirect, or potential conflicts of interest that may exist with respect to the Prospective Proposer or the Prospective Proposer's management or employees relative to the services to be provided to the City. Conflict of interest issues may require consultation with legal counsel. If a Prospective Proposer has no conflicts of interest, a statement to that effect must be included in the SOPQ submittal. Violation of this section shall disqualify the Prospective Proposer.

2.4 PROHIBITIONS AGAINST INTEREST IN MORE THAN ONE PROPOSAL ON A SINGLE PROJECT AND PROPOSER COLLUSION

A company, corporation, LLC, or other entity is not permitted to submit more than one proposal on a single project or have a financial interest in more than one proposal on a single project.

If a company, corporation, LLC, or other entity seeking to prequalify is a direct or indirect parent or subsidiary, or otherwise affiliated with another company, corporation or other entity also seeking to prequalify, neither is eligible to prequalify unless they prove to the satisfaction of the City that they satisfy the foregoing requirements by operating separately and independently from each other and that they do not currently, and will not in the future, have any direct interest in the other's proposal or performance of the contract. To so prove, each affiliated company, corporation, LLC, or other entity seeking to prequalify must provide the information required under Part II.B.3-4 and submit such additional documentation as is sufficient to prove to the satisfaction of the City that the foregoing requirements are satisfied. Affiliated companies not providing enough proof will be notified and will be allowed to rescind SOPQ submittal(s) to allow one of the affiliated firms to prequalify.

SECTION 3

SUBMITTAL INFORMATION

3.1 GENERAL

The SOPQ submittal prepared and delivered by a Prospective Proposer shall include as a minimum the information listed herein. Each Prospective Proposer shall review the requirements of this RFPQ Document and provide whatever additional information may be required to allow complete determination of conformance with the evaluation criteria utilized for the basis of determination (Section 4). Incomplete or unclear information may be grounds for rejection of a submittal as nonresponsive.

STATEMENT OF PRE-QUALIFICATION SUBMITTAL FORM	PAGE 9
PART I	PAGE 12
PART II	PAGE 17
PART III	PAGE 30

STATEMENT OF PRE-QUALIFICATION SUBMITTAL FORM

TO: Tracie Mueller, P.E.
City of Roseville Environmental Utilities- Engineering
2005 Hilltop Circle
Roseville, CA 95747

FOR: PLEASANT GROVE WASTEWATER TREATMENT PLANT EXPANSION PROJECT
and/or
PLEASANT GROVE WASTEWATER TREATMENT PLANT ENERGY RECOVERY PROJECT
and/or
BOTH ABOVE PROJECTS INDEPENDENTLY

STATEMENT OF PRE-QUALIFICATION FOR GENERAL CONTRACTORS

THE UNDERSIGNED PROSPECTIVE PROPOSER HEREBY AGREES AND DECLARES THAT:

DETERMINATION OF PRE-QUALIFICATION

Receipt of this submittal by the City does not constitute either a direct or implied guarantee to the Prospective Proposer that Pre-Qualification is or will be granted. The undersigned agrees to the procedures and conditions of the Pre-Qualification requirements described in the RFPQ.

COMPLETENESS AND ACCURACY

All Prospective Proposer statements and information contained in the SOPQ shall be complete and accurate. The submittal contains no false or deliberately misleading information.

DECLARATION OF PGWWTP PROJECT(S) SOPQ SUBMISSION

The undersigned Prospective Proposer is submitting the following SOPQ submission to the City. The Prospective Proposer may submit on Item 1, Item 2, Items 1 & 2, and also Items 1, 2 & 3.

1. SOPQ submission for PGWWTP Expansion by completing Part III, Item 39(A).

   ☒ Yes ☐ No

2. SOPQ submission for PGWWTP ERP by completing Part III, Item 39(B).

   ☒ Yes ☐ No

3. SOPQ submission for both above PGWWTP projects independently by completing Part III, Item 39(C).

☒ Yes ☐ No

Important Note to Prospective Proposer:

The City will evaluate received SOPQs for the PGWWTP Expansion and the PGWWTP ERP independently. After such independent evaluations, if (during the Request for Proposals and Award Phase), the City determines that the Proposals received from the same Contractor obtained the highest score for each project, the City can only award both projects to this Contractor if the Contractor marks "Yes" to item 3 above and was pre-qualified by the City for both projects. If a Prospective Proposer marks "No" to item 3 above, and submits a Proposal for each of the PGWWTP projects, the City can only award one of the two projects to this Contractor, even if the Contractor received the highest score on each project.

CLOSING STATEMENT

A. The undersigned is a legally authorized representative of the contractor.

Legal name of Prospective Proposer: W. M. Lyles Co.
(as it appears on license)

Contact: Joseph B. Lawrence

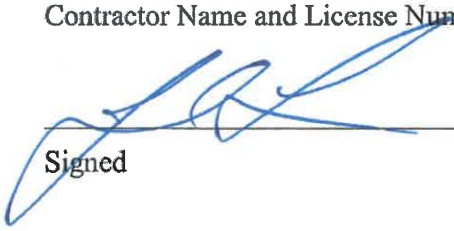
Proposer's Valid California Contractor's License No. 422390

Classification(s) A, B

B. Addenda:

The undersigned acknowledges receipt of the following Addenda Nos.: 1, 2

Failure to acknowledge Addenda will result in the rejection of the Prospective Proposer's SOPQ submittal.



The submission of a SOPQ package shall constitute an acknowledgment upon which the City may rely that the Prospective Proposer has thoroughly examined and is familiar with the RFPQ and that the Prospective Proposer has waived any objections or contentions regarding the SOPQ document and/or the Pre-Qualification requirements set by the City to determine if a Prospective Proposer is approved to submit a proposal for either or both the PGWWTP projects.

By my signature below, I acknowledge receipt of this document and agree to be bound by its terms and agree to submit it as part of the SOPQ package submittal to the City.

I, the undersigned, certify and declare that I have read all of the answers to this SOPQ questionnaire and I know their contents. The matters stated in the questionnaire answers are true of my own knowledge and belief and I declare under penalty of perjury under the laws of the State of California, that the foregoing is correct.

Tab 3

Part I
Essential Requirements for Pre-Qualification

PART I. ESSENTIAL REQUIREMENTS FOR PRE-QUALIFICATION FOR PGWWTP EXPANSION and PGWWTP ERP and both PGWWTP projects

An answer of "No" to any of the Questions 1 through 8 will be rated a "Fail" and the Prospective Proposer will be immediately disqualified.

An answer of "Yes" to any of the Questions 10 through 13 will be rated a "Fail" and the Prospective Proposer will be immediately disqualified. If the answer to question 12 is "yes," and if debarment would be the sole reason for denial of Pre-Qualification, any Pre-Qualification issued will exclude the debarment period.

1. Prospective Proposer possesses a valid and current California Contractor's license (Class A, General Engineering Contractor) for the project for which it intends to submit a Proposal.

   [x] Yes [ ] No

2. Prospective Proposer is registered with the California Department of Industrial Relations pursuant to California Labor Code Section 1725.5.

   [x] Yes [ ] No

3. Prospective Proposer has not had a surety finish the work on any contract in the past five years:

   [x] Yes [ ] No

4. Prospective Proposer will comply with and provide all insurance as defined in **Appendix D, Bonds and Insurance.**

   See tab 8

   [x] Yes [ ] No

   Note: Prospective Proposer shall provide as part of its SOPQ package submittal a notarized statement, from the insurance carrier(s) or insurance broker that the Prospective Proposer will utilize on the PGWWTP project(s), certifying that the specified insurance requirements will be met. Please note that these are preliminary insurance requirements and are subject to change. The contractor will be required to provide insurance as provided for in the PGWWTP projects contract documents.

5. Prospective Proposer has current workers' compensation insurance policy as required by the Labor Code or is legally self-insured pursuant to Labor Code section 3700 et. seq.

   [x] Yes [ ] No

   [ ] Prospective Proposer is exempt from this requirement because it has no employees.

6. Prospective Proposer's Three-Year Average Experience Modification Rate (EMR) is less than or equal to 1.25 (125%) and Prospective Proposer has furnished a letter from its insurance carrier for verification of its three-year average EMR. See Part II- Item 32.

   [x] Yes [ ] No

   See tab 9

7. Has the Prospective Proposer attached the latest complete copy of a **reviewed** or **audited** financial statement with all accompanying notes and supplemental information? Date of financial statement must be December 2017 or later. If Prospective Proposer is a wholly owned subsidiary of another company, Prospective Proposer must also furnish a reviewed or audited financial statement of the parent company with accompanying notes and supplemental information.

See separate sealed envelope

[x] Yes [ ] No

NOTE: A financial statement that is not either reviewed or audited is not acceptable and reason for disqualification. A letter verifying availability of a line of credit may also be attached; however, it will be considered as supplemental information only, and is not a substitute for the required financial statement.

8. Has the Prospective Proposer attached a notarized statement from an admitted surety insurer (approved by the California Department of Insurance) and authorized to issue bonds in the State of California, which states: (a) that your current bonding capacity is sufficient for the project for which you seek Pre-Qualification, and (b) your current available bonding capacity?

See tab 10

[x] Yes [ ] No

NOTE: Notarized statement must be from the surety company, not an agent or broker.

9. **NOT USED.**

10. Has the Prospective Proposer's contractor's license been revoked at any time in the last five years?

[ ] Yes [x] No

11. Has a surety firm completed a contract on the Prospective Proposer's behalf, or paid for completion because the Prospective Proposer's firm was default terminated by the project owner within the last five years?

[ ] Yes [x] No

12. At the time of submitting this SOPQ, is your firm ineligible to bid on or be awarded a public works contract, or perform as a subcontractor on a public works contract, pursuant to either Labor Code section 1777.1 or Labor Code section 1777.7

[ ] Yes [x] No

If the answer is "Yes," state the beginning and ending dates of the period of debarment:

_____

13. At any time during the last five years, has your firm or any of its owners or officers been convicted of a crime involving the awarding of a contract of a government construction project, or the bidding or performance of a government contract?

☐ Yes ☒ No

PART I(A). ESSENTIAL REQUIREMENTS FOR PRE-QUALIFICATION FOR PGWWTP EXPANSION

Important Note to Contractor: Only answer this question and complete Part III, Item 39(A) if you are submitting an SOPQ for the PGWWTP Expansion.

An answer of "No" to any of the Question 1 will be rated a "Fail" and the Prospective Proposer will be immediately disqualified.

1. In accordance with Part III, Item 39(A), Prospective Proposer has listed no more than **six** projects completed since **January 1, 2009** with a combined **$150 million** in construction value on the following types of projects:

   a. Industrial and/or municipal water treatment plants where the structural concrete, excavation, backfill, mechanical and electrical were part of the contractor's contract; or

   b. Industrial and/or municipal wastewater treatment plants where the structural concrete, excavation, backfill, mechanical and electrical were part of the contractor's contract.

   The list of projects may include projects currently under construction, but only the total amount paid by the owner(s) as of **November 1, 2018** on uncompleted project(s) can be included in this summation of construction value. The Prospective Proposer is allowed to list no more than **six** projects of the types listed above, that combined, will add up to at least **$150 million** in completed value of work. In addition, one of the six projects must have a construction value of at least **$45 million.**

   Any projects listed in Part III, Item 39(A), which are not as defined above will not be considered by the City in meeting this pre-requisite experience requirement. For example, pipeline projects and pump station projects are not considered a treatment plant project and would not be eligible.

   Prospective Proposer also certifies that Prospective Proposer self-performed at least 40% of the work on each of the projects listed in Part III, Item 39(A). The City considers this level of past self-performance demonstrates a benefit to the Project in terms of better control of cost, schedule and safety.

   ☒ Yes ☐ No

PART I(B). ESSENTIAL REQUIREMENTS FOR PRE-QUALIFICATION FOR PGWWTP ERP

Important Note to Contractor: Only answer this question and complete Part III, Item 39(B) if you are submitting an SOPQ for the PGWWTP ERP.

An answer of "No" to any of the Question 1 will be rated a "Fail" and the Prospective Proposer will be immediately disqualified.

1. In accordance with Part III, Item 39(B), Prospective Proposer has listed no more than **six** projects completed since **January 1, 2009** with a combined **$80 million** in construction value on the following types of projects:

   a. Industrial and/or municipal water treatment plants where the structural concrete, excavation, backfill, mechanical and electrical were part of the contractor's contract; or

   b. Industrial and/or municipal wastewater treatment plants where the structural concrete, excavation, backfill, mechanical and electrical were part of the contractor's contract.

   The list of projects may include projects currently under construction, but only the total amount paid by the owner(s) as of **November 1, 2018** on uncompleted project(s) can be included in this summation of construction value. The Prospective Proposer is allowed to list no more than **six** projects of the types listed above, that combined, will add up to at least **$80 million** in completed value of work. In addition, one of the six projects must have a construction value of at least **$20 million.**

   Any projects listed in Part III, Item 39(B), which are not as defined above will not be considered by the City in meeting this pre-requisite experience requirement. For example, pipeline projects and pump station projects are not considered a treatment plant project and would not be eligible.

   Prospective Proposer also certifies that Prospective Proposer self-performed at least 40% of the work on each of the projects listed in Part III, Item 39(B). The City considers this level of past self-performance demonstrates a benefit to the Project in terms of better control of cost, schedule and safety.

   [x] Yes [ ] No

PART I(C). ESSENTIAL REQUIREMENTS FOR PRE-QUALIFICATION FOR BOTH THE PGWWTP EXPANSION PROJECT AND THE PGWWTP ENERGY RECOVERY PROJECT

Important Note to Contractor: Only answer this question and complete Part III, Item 39(C) if you are submitting an SOPQ for the both above PGWWTP projects.

An answer of "No" to any of the Question 1 will be rated a "Fail" and the Prospective Proposer will be immediately disqualified.

1. In accordance with Part III, Item 39(C), Prospective Proposer has listed no more than **six** projects completed since **January 1, 2009** with a combined **$200 million** in construction value on the following types of projects:

   a. Industrial and/or municipal water treatment plants where the structural concrete, excavation, backfill, mechanical and electrical were part of the contractor's contract; or

   b. Industrial and/or municipal wastewater treatment plants where the structural concrete, excavation, backfill, mechanical and electrical were part of the contractor's contract.

   The list of projects may include projects currently under construction, but only the total amount paid by the owner(s) as of **November 1, 2018** on uncompleted project(s) can be included in this summation of construction value. The Prospective Proposer is allowed to list no more than **six** projects of the types listed above, that combined, will add up to at least **$200 million** in completed value of work. In addition, one of the six projects must have a construction value of at least **$65 million.**

   Any projects listed in Part III, Item 39(C), which are not as defined above will not be considered by the City in meeting this pre-requisite experience requirement. For example, pipeline projects and pump station projects are not considered a treatment plant project and would not be eligible.

   Prospective Proposer also certifies that Prospective Proposer self-performed at least 40% of the work on each of the projects listed in Part III, Item 39(C). The City considers this level of past self-performance demonstrates a benefit to the Project in terms of better control of cost, schedule and safety.

Part II
Organization, History, Organizational Performance, Compliance with Civil and Criminal Laws

PART II. ORGANIZATION, HISTORY, ORGANIZATIONAL PERFORMANCE, COMPLIANCE WITH CIVIL AND CRIMINAL LAWS

A. Current Organization and Structure of the Business

For Prospective Proposers that are Corporations:

1a. Date incorporated: 5/6/1982

1b. Under the laws of what state: California

1c. Provide all the following information for each person who is either (a) an officer of the corporation (president, vice president, secretary, treasurer), or (b) the owner of at least ten percent of the corporation's stock.

Name	Position	Years with Co.	% Ownership
See attached			

1d. Identify every construction firm that any person listed above has been associated with (as owner, general partner, limited partner or officer) at any time during the last five years.

NOTE: For this question, "owner" and "partner" refer to ownership of ten percent or more of the business, or ten percent or more of its stock, if the business is a corporation.

Person's Name	Construction Firm	Dates of Person's Participation with Firm
N/A		

A. Current Organization and Structure of the Business
For Prospective Proposers that are Corporations:

1c. Provide all the following information for each person who is either (a) an officer of the corporation (president, vice president, secretary, treasurer), or (b) the owner of at least ten percent of the coporation's stock.

W. M. Lyles Co. List of Officers

Name	Position	Years with Co.	% Ownership
Stanley H. Simmons	President/CEO/ Treasurer (CFO)	26	0
Kenneth D. Strosnider	Executive Vice President	29	0
Robert P. Saleen	Senior Vice President	29	0
David H. O'Dear	Asst. Vice President/Asst. Secretary	23	0
Joseph B. Lawrence	Asst. Vice President	16	0
Kevin R. Shigematsu	Asst. Vice President	17	0
Anthony M. Mueller	Asst. Vice President	15	0
Ruben Moreno, Jr.	Secretary	12	0
Scott R. Fults	Asst. Secretary	13	0
Chanel L. Prince	Asst. Secretary	13	0

For Prospective Proposers that are Limited Liability Companies (LLC): N/A

1a. State the name of the LLC exactly as it appears on it appears on file with the California Secretary of State, including the entity ending (ex: "Jones & Company, LLC" or "Smith Construction, a Limited Liability Company").

LLC Name: _____

1b. Date LLC was formed: _____

1c. Under the laws of what state: _____

1d. State the tax classification of LLC by checking the appropriate box below:

☐- Single Entity LLC
☐- C Corporation LLC
☐- S Corporation LLC
☐- Partnership LLC

1e. Provide all the following information for each person who is either (a) an officer of the LLC (president, vice president, secretary, treasurer), or (b) partner of the LLC, or (c) the owner of at least ten percent of the LLC's stock.

Name	Position	Years with Co.	% Ownership

1f. If a Partnership LLC, provide the name of the Managing Partner.

Managing Partner's Full Name: _____

1g. Identify every construction firm that any person listed above has been associated with (as owner, general partner, limited partner or officer) at any time during the last five years.

NOTE: For this question, "owner" and "partner" refer to ownership of ten percent or more of the business, or ten percent or more of its stock, if the business is a corporation.

Person's Name	Construction Firm	Dates of Person's Participation with Firm

For Prospective Proposers that are Partnerships: N/A

1a. Date of formation: _____

1b. Under the laws of what state: _____

1c. Provide all the following information for each partner who owns ten percent or more of the firm.

Name	Position	Years with Co.	% Ownership

1d. Identify every construction company that any partner has been associated with (as owner, general partner, limited partner or officer) at any time during the last five years.

NOTE: For this question, "owner" and "partner" refer to ownership of ten percent or more of the business, or ten percent or more of its stock, if the business is a corporation.

Person's Name	Construction Company	Dates of Person's Participation with Company

For Prospective Proposers that are Sole Proprietorships: N/A

1a. Date of commencement of business. _____

1b. Identify every construction firm that the business owner has been associated with (as owner, general partner, limited partner or officer) at any time during the last 5 years.

NOTE: For this question, "owner" and "partner" refer to ownership of ten percent or more of the business, or ten percent or more of its stock, if the business is a corporation.

Person's Name	Construction Company	Dates of Person's Participation with Company

B. History of the Business and Organizational Performance

2. Has there been any change in ownership of the firm at any time during the last three years?

NOTE: A corporation whose shares are publicly traded is not required to answer this question.

☐ Yes ☒ No

If "yes," explain on a separate signed page.

3. Is the company, corporation, LLC, or other entity seeking to prequalify a parent, subsidiary, in a holding company relationship, or otherwise an affiliate of any other construction company, corporation, LLC, or other entity?

NOTE: All Prospective Proposers will be required to properly execute and submit the Prospective Proposer's Certification included in Appendix G as Attachment A to the SOPQ Submittal.

☒ Yes ☐ No See attached.

If "yes," on a separate signed page, please provide a complete corporate tree showing percentage of ownership. In addition, if any such affiliated company, corporation, LLC, or other entity is seeking to prequalify as well, identify such entity and submit proof satisfactory to the City that the requirements of Section 2.4 are satisfied.

B. History of the Business and Organizational Performance

3. Is the company, corporation, LLC or other entity seeking to prequalify a parent, subsidiary, in a holding company relationship, or otherwise an affiliate of any other construction company, corporation, LLC, or other entity?

Lyles Diversified, Inc. - Parent Company
W.M. Lyles Co., New England Sheet Metal and Mechanical Co., and American Paving Co. - Wholly owned, qualified Subchapter S Subsidiaries of Lyles Diversified, Inc.

Joseph B. Lawrence, Asst. Vice President

4. Are any of your directors, officers, partners or owners also an officer, director, partner or owner of another construction company, corporation, LLC, or other entity?

☐ Yes ☒ No

If "yes," on a separate signed page, please identify such person(s) and the other construction company involved. In addition, if such other construction company is seeking to prequalify as well, submit proof satisfactory to the City that the requirements of Section 2.4 are satisfied.

5. State your firm's gross revenues for each of the last three years:

$211,632,837	$229,996,064	$243,891,673
2018	2017	2016

6. How many years has your organization been in business as a contractor under your present business name and license number? 36 years

7. Is your firm currently the debtor in a bankruptcy case?

☐ Yes ☒ No

If "yes," please attach a copy of the bankruptcy petition, showing the case number, and the date on which the petition was filed.

8. Was your firm in bankruptcy at any time during the last five years? (This question refers only to a bankruptcy action that was not described in answer to question 7, above)

☐ Yes ☒ No

If "yes," please attach a copy of the bankruptcy petition, showing the case number and the date on which the petition was filed, and a copy of the Bankruptcy Court's discharge order, or of any other document that ended the case, if no discharge order was issued.

Licenses

9. List all California construction license numbers, classifications and expiration dates of the California contractor licenses held by your firm:

CSLB No. 422390 / Class A, B / Expiration 5/31/2020

10. If any of your firm's license(s) are held in the name of a corporation, LLC, or partnership, list below the names of the qualifying individual(s) listed on the CSLB records whom meet(s) the experience and examination requirements for each license.

Kenneth Strosnider, RMO

11. Has your firm changed names or license number in the past five years?

☐ Yes ☒ No

If "yes," explain on a separate signed page, including the reason for the change.

12. Has any owner, partner or (for corporations, LLC) officer of your firm operated a construction firm under any other name in the last five years?

☐ Yes ☒ No

If "yes," explain on a separate signed page, including the reason for the change.

13. Has any CSLB license held by your firm or its Responsible Managing Employee or Responsible Managing Officer been suspended within the last five years?

☐ Yes ☒ No

If "yes," please explain on a separate signed sheet.

Disputes

The City recognizes that large construction companies (e.g. revenues in excess of $250 million per year) have multiple branches/divisions for geographic and/or type of construction coverages. In such cases, the Prospective Proposer may elect to submit a set of qualifications for a specific company branch or division which shall be clearly identified in a cover letter to the SOPQ package submittal. As such, should a Prospective Proposer choose to submit qualifications for a specific branch /division, the scoring requirements for Part II B-C of the SOPQ, as well as all other submitted information shall be branch/division specific. Financial statements should still be for the total company and parent company even if a Prospective Proposer submits the scoring requirements specific to a company branch or division.

14. At any time in the last five years, has your firm been assessed and paid liquidated damages after completion of a project under a construction contract with either a public or private owner?

☐ Yes ☒ No

If yes, explain on a separate signed page, identifying all such projects by owner, owner's address, the date of completion of the project, amount of liquidated damages assessed and all other information necessary to fully explain the assessment of liquidated damages.

15. In the last five years has your firm, or any firm with which any of your company's owners, officers or partners was associated, been debarred, disqualified, removed or otherwise prevented from bidding on, or completing, any government agency or public works project for any reason?

NOTE: "Associated with" refers to another construction firm in which an owner, partner or officer of your firm held a similar position, and which is listed in response to question 1c or 1d on this form.

☐ Yes ☒ No

If "yes," explain on a separate signed page. State whether the firm involved was the firm applying for Pre-Qualification here or another firm. Identify by name of the company, the name of the person within your firm who was associated with that company, the year of the event, the owner of the project, the project and the basis for the action.

16. In the last 5 years has your firm been denied an award of a public works contract based on a finding by a public agency that your company was not a responsible bidder?

☐ Yes ☒ No

If "yes," explain on a separate signed page. Identify the year of the event, the owner, the project and the basis for the finding by the public agency.

* * * * *

NOTE: The following two questions refer only to disputes between your firm and the owner of a project. You need not include information about disputes between your firm and a supplier, another contractor, or subcontractor. You need not include information about "pass-through" disputes in which the actual dispute is between a sub-contractor and a project owner. Also, you may omit reference to all disputes about amounts of less than $50,000.

17. In the past five years has any claim **against** your firm concerning your firm's work on a construction project been **filed in court or arbitration?**

☒ Yes ☐ No See attached

If "yes," on separate signed sheets of paper identify the claim(s) by providing the project name, date of the claim, name of the claimant, a brief description of the nature of the claim, the court in which the case was filed and a brief description of the status of the claim (pending or, if resolved, a brief description of the resolution). See attached.

18. In the past five years has your firm made any claim against a project owner concerning work on a project or payment for a contract and **filed that claim in court or arbitration**?

☒ Yes ☐ No See attached.

If "yes," on separate signed sheets of paper identify the claim by providing the project name, date of the claim, name of the entity (or entities) against whom the claim was filed, a brief description of the nature of the claim, the court in which the case was filed and a brief description of the status of the claim (pending, or if resolved, a brief description of the resolution).

19. At any time during the past five years, has any surety company made any payments on your firm's behalf as a result of a default, to satisfy any claims made against a performance or payment bond issued on your firm's behalf, in connection with a construction project, either public or private?

☐ Yes ☒ No

If "yes," explain on a separate signed page the amount of each such claim, the name and telephone number of the claimant, the date of the claim, the grounds for the claim, the present status of the claim, the date of resolution of such claim if resolved, the method by which such was resolved if resolved, the nature of the resolution and the amount, if any, at which the claim was resolved.

20. In the last five years has any insurance carrier, for any form of insurance, refused to renew the insurance policy for your firm?

☐ Yes ☒ No

If "yes," explain on a separate signed page. Name the insurance carrier, the form of insurance and the year of the refusal.

Criminal Matters and Related Civil Suits

21. Has your firm or any of its owners, officers or partners ever been found liable in a civil suit or found guilty in a criminal action for making any false claim or material misrepresentation to any public agency or entity?

☐ Yes ☒ No

If "yes," explain on a separate signed page, including identifying who was involved, the name of the public agency, the date of the investigation and the grounds for the finding.

22. Has your firm or any of its owners, officers or partners ever been convicted of a crime involving any federal, state, or local law related to construction?

☐ Yes ☒ No

B. **History of the Business and Organizational Performance**

17 In the past five years has any claim against your firm concerning your firm's work on a construction project been filed in court or arbitration?

Project Name: Tulare Industrial Wastewater Treatment Plant Expansion completed 3/5/10

Completed: 3/5/2010
Date of Claim: 3/28/15

Claimant: City of Tulare vs. Xylem Water Solutions USA, Inc., FKA Sanitaire, W. M. Lyles Co., et al

Filed in Tulare County Superior Court
Claim Status: Settled

Brief:
City of Tulare claimed Breach of Contract, Breach of Warranty and Damages against the parties for failure of the diffuser system lock rings installed in the plant expansion project. Causation was not determined by the Plaintiff. W. M. Lyles Co. did not perform design, or choose the equipment system. Rather, W. M. Lyles Co. installed the equipment that was pre-selected/sole sourced by the Owner as directed and approved by the Manufacturer, and according to the Project specifications. This claim was dismissed as the Parties settled the matter in July 2016.

18 In the past five years has your firm made any claim against a project owner concerning work on a project or payment for a contract and filed that claim in court or arbitration?

Project Name: Tulare Industrial Wastewater Treatment Plant Expansion
Completed: 3/5/2010
Date of Claim: 11/2/2015
Cross Complainant: W. M. Lyles Co.. vs. City of Tulare, Xylem Water Solutions USA, Inc., FKA Sanitaire, et al
Court Filed: Tulare County Superior Court
Claim Status: Settled
Brief: See above.

There are no current claims against W. M. Lyles Co. that if we should lose the claim, would adversely affect our financial position, or our ability to meet our obligations if awarded the contract for this project.

W.M. Lyles Co.

Joseph B. Lawrence, Asst. Vice President

If "yes," explain on a separate signed page, including identifying who was involved, the name of the public agency, the date of the conviction and the grounds for the conviction.

23. Has your firm or any of its owners, officers or partners ever been convicted of a federal or state crime of fraud, theft, or any other act of dishonesty?

☐ Yes ☒ No

If "yes," identify on a separate signed page the person or persons convicted, the court (the county if a state court, the Agency or location of the federal court), the year and the criminal conduct.

Bonding

24. Bonding capacity: Provide documentation from your surety identifying the following:

Name of bonding company/surety: Liberty Mutual Insurance Company

Name of surety agent, address and telephone number:

Alliant Insurance Services, Inc., Steve Edwards, 9 E. Riverpark Place East, Suite 310, Fresno, CA 93720, (559)374-3560

25. If your firm was required to pay a premium of more than one percent for a performance and payment bond on any project(s) on which your firm worked at any time during the last three years, state the percentage that your firm was required to pay. You may provide an explanation for a percentage rate higher than one percent, if you wish to do so.

N/A

26. List all other sureties (name and full address) that have written bonds for your firm during the last five years, including the dates during which each wrote the bonds:

N/A

27. During the last five years, has your firm ever been denied bond coverage by a surety company, or has there ever been a period of time when your firm had no surety bond in place during a public construction project when one was required?

☐ Yes ☒ No

If yes, provide details on a separate signed sheet indicating the date when your firm was denied coverage and the name of the company or companies which denied coverage; and the period during which you had no surety bond in place.

C. Compliance with Occupational Safety and Health Laws and with Other Labor Legislation

28. Has CAL OSHA cited and assessed penalties against your firm for any "serious," "willful" or "repeat" violations of its safety or health regulations in the past five years?

NOTE: If you have filed an appeal of a citation, and the Occupational Safety and Health Appeals Board has not yet ruled on your appeal, you need not include information about it.

☐ Yes ☒ No

If "yes," attach a separate signed page describing the citations, including information about the dates of the citations, the nature of the violation, the project on which the citation(s) was or were issued, the amount of penalty paid, if any. If the citation was appealed to the Occupational Safety and Health Appeals Board and a decision has been issued, state the case number and the date of the decision.

29. Has the federal Occupational Safety and Health Administration cited and assessed penalties against your firm in the past five years?

NOTE: If you have filed an appeal of a citation and the Appeals Board has not yet ruled on your appeal, or if there is a court appeal pending, you need not include information about the citation.

☐ Yes ☒ No

If "yes," attach a separate signed page describing each citation.

30. Has the EPA or any Air Quality Management Agency or any Regional Water Quality Control Board cited and assessed penalties against either your firm or the owner of a project on which your firm was the contractor, in the past five years?

NOTE: If you have filed an appeal of a citation and the Appeals Board has not yet ruled on your appeal, or if there is a court appeal pending, you need not include information about the citation.

☒ Yes ☐ No

If "yes," attach a separate signed page describing each citation. See attached.

B. History of the Business and Organizational Performance

30 Has the EPA or any Air Quality Management District or any Regional Water Quality Control Board cited and assessed penalties against either your firm or the owner of a project on which your firm was the contractor, in the past five years?

On approximately 8/22/2018, W.M. Lyles Co. ("WML") received a Notice of Violation from the San Joaquin Valley Unified Air Pollution Control District ("SJVUAPCD") related to a Carryout and Trackout violation citing, "Failure to prevent carryout and trackout extending over 50 ft. or more from the nearest unpaved surface exit point of a site within an urban area. This was the first offense incurred by WML in its long seventy four (74) year history and the fine incurred was $1,200.00, which has been fully satisfied. No further sanctions and/or clouds have been placed upon WML's CSLB license in regard to this incident and it will have no impact whatsoever upon WML's ability to perform its current work or to provide future services.

Joseph B. Lawrence, Asst. Vice President

31. How often do you require documented safety meetings to be held for construction employees and field supervisors during the course of a project? weekly

32. Experience Modification Rate (EMR): Prospective Proposers shall obtain a letter from your insurance carrier (or state fund if applicable) with your interstate EMR's for the current year, previous year and year prior to previous year. If you do not have an interstate rating, obtain your intrastate EMR's. Attach the letter as part of this SOPQ Package Submittal. The Prospective Proposer shall list below the Experience Modification Rate for the current year, previous year and year prior to previous year as provided by your insurance carrier.

Year	EMR
Current year	2018: 0.78
Previous year	2017: 0.91
Year prior to previous year	2016: 1.02
Three Year Average	0.91

Are the above rates interstate or intrastate? intrastate

If intrastate, which state? California

NOTE: Any of the following methods of "obtaining a letter" are acceptable:

- Furnish a letter from your insurance agent, insurance carrier or state fund (on their letterhead) verifying the EMR data listed above; or See tab 9
- Furnish a Photostat of the applicable Experience Rating Calculation Sheets, which your insurance carrier should forward to you annually.

A Prospective Proposer will be immediately disqualified if its Three-Year Average EMR is greater than 1.25 (125%).

33. Within the last five years has there ever been a period when your firm had employees but was without workers' compensation insurance or state-approved self-insurance?

☐ Yes ☒ No

If "yes," please explain the reason for the absence of workers' compensation insurance on a separate signed page. If "No," please provide a statement by your current workers' compensation insurance carrier that verifies periods of workers' compensation insurance coverage for the last five years. (If your firm has been in the construction business for less than five years, provide a statement by your workers' compensation insurance carrier verifying continuous workers' compensation insurance coverage for the period that your firm has been in the construction business.)

Prevailing Wage and Apprenticeship Compliance Record

34. Has there been more than one occasion during the last five years in which your firm was required to pay either back wages or penalties for your own firm's failure to comply with the **state's** prevailing wage laws?

NOTE: This question refers only to your own firm's violation of prevailing wage laws, not to violations of the prevailing wage laws by a subcontractor.

☐ Yes ☒ No

If "yes," attach a separate signed page or pages, describing the nature of each violation, identifying the name of the project, the date of its completion, the public agency for which it was constructed; the number of employees who were initially underpaid and the amount of back wages and penalties that you were required to pay.

35. During the last five years, has there been more than one occasion in which your own firm has been penalized or required to pay back wages for failure to comply with the **federal** Davis-Bacon prevailing wage requirements?

☐ Yes ☒ No

If "yes," attach a separate signed page or pages describing the nature of the violation, identifying the name of the project, the date of its completion, the public agency for which it was constructed; the number of employees who were initially underpaid, the amount of back wages you were required to pay along with the amount of any penalty paid.

36. Provide the **name, address and telephone number** of the apprenticeship program (approved by the California Apprenticeship Council) from whom you intend to request the dispatch of apprentices to your company for use on any public work project for which you are awarded a contract by the Owner.

See attached.

37. If your firm operates its own State-approved apprenticeship program:

(a) Identify the craft or crafts in which your firm provided apprenticeship training in the past year.

(b) State the year in which each such apprenticeship program was approved, and attach evidence of the most recent California Apprenticeship Council approval(s) of your apprenticeship program(s).

Apprentice Program	Office Location and Phone Number
Northern California Carpenters	2350 Santa Rita Road Pleasanton, CA 94566 Phone: (925) 462-9640
Northern California Cement Masons	2350 Santa Rita Road Pleasanton, CA 94566 Phone: (925) 484-2271
Northern California Laborers	1001 Westside Drive San Ramon, CA 94583 Phone: (925) 556-0858
Northern California Operating Engineers	14738 Cantova Way Sloughhouse, CA 95683 Phone: (916) 354-2029

(c) State the number of individuals who were employed by your firm as apprentices at any time during the past three years in each apprenticeship and the number of persons who, during the past three years, completed apprenticeships in each craft while employed by your firm.

N/A

38. At any time during the last five years, has your firm been found to have violated any provision of California apprenticeship laws or regulations, or the laws pertaining to use of apprentices on public works?

☐ Yes ☒ No

If "yes," provide the date(s) of such findings, and attach copies of the Department's final decision(s).

Recent Construction Projects Completed

PART III. RECENT CONSTRUCTION PROJECTS COMPLETED

Important Note to Contractor: Only complete Part III, Item 39(A) if you are submitting an SOPQ for the PGWWTP Expansion.

39(A) In accordance with Part I, Question 9, and the Prospective Proposer must demonstrate that it has performed at least **$150 million** in construction volume on no more than **six** projects completed since **January 1, 2009** on the following types of projects:

a. Industrial and/or municipal water treatment plants where the structural concrete, excavation, backfill, mechanical and electrical were part of the contractor's contract; or

b. Industrial and/or municipal wastewater treatment plants where structural concrete, excavation, backfill, mechanical and electrical were part of the contractor's contract.

The list of projects may include projects currently under construction, but only the total amount paid by the owner(s) as of **November 1, 2018** on uncompleted projects can be included in this summation of construction value. The Prospective Proposer is allowed to list no more than **six** projects of the types listed above, that combined, will add up to at least **$150 million** in completed value of work. **In addition, one of the six projects must have a construction value of at least $45 million.**

Any projects listed below, which are not as defined above, will not be considered by the City in meeting this pre-requisite experience requirement. For example, pipeline projects, and/or pump station projects are not considered an equivalent project.

An industrial and/or municipal water or wastewater treatment plant project is defined as a project that was engineered and constructed for an industrial or municipally owned and operated facility which is designed to remove contaminants, specific constituents, and/or particulates in water and/or wastewater as required by a State issued discharge permit.

Prospective Proposer also certifies that Prospective Proposer self-performed at least 40% of the Work on each of the projects listed below. The City considers this level of past self-performance demonstrates a benefit to the Project in terms of better control of cost, schedule, and safety.

Prospective Proposers are to complete this form and not attach their own form to their SOPQ submission.

Qualifying Project # 1 Name: Wastewater Treatment Plant Secondary and Tertiary Improvements Project

Prime Contractor: AECOM & WML, a Joint Venture

Project Manager: John Lunsford

Owner: City of Davis

Construction Cost: $ 32,619,341.00

Construction Time: 1,493 Calendar Days

Owner's Representative: Diana Jensen

Owner's Representative Telephone No.: (530) 757-5686

Engineer or On-Site Construction Mgr.: AECOM

Engineer or On-Site CM's Telephone No.: Scott Thibault (978) 905-3217

Date of Substantial Completion: September 28, 2018

Qualifying Project # 2 Name: Southeast Surface Water Treatment Facility - Phase Two

Prime Contractor: W. M. Lyles Co.

Project Manager: Tony Mueller

Owner: City of Fresno

Construction Cost: $ 162,089,360.00

Construction Time: 1,000 Calendar Days

Owner's Representative: Glenn Knapp

Owner's Representative Telephone No.: (559) 621-1624

Engineer or On-Site Construction Mgr.: Carollo Engineers

Engineer or On-Site CM's Telephone No.: Chris Johnson (208) 376-2288

Date of Substantial Completion: August 7, 2018

Qualifying Project # 3 Name: Water Conservation Plant Upgrades

Prime Contractor: W. M. Lyles Co.

Project Manager: Ruben Moreno, Jr.

Owner: City of Visalia

Construction Cost: $ 103,499,235.00

Construction Time: 1,607 Calendar Days

Owner's Representative: Jim Ross

Owner's Representative Telephone No.: (559) 713-4533

Engineer or On-Site Construction Mgr.: Parsons

Engineer or On-Site CM's Telephone No.: Satish Kamath (626) 440-3364

Date of Substantial Completion: March 31, 2017

Qualifying Project # 4 Name: Primary Treatment Renovations

Prime Contractor: W. M. Lyles Co.

Project Manager: John Lunsford

Owner: Central Contra Costa Sanitary District

Construction Cost: $ 11,441,946.00

Construction Time: 1,227 Calendar Days

Owner's Representative: Craig Mizutani

Owner's Representative Telephone No.: (925) 229-7361

Engineer or On-Site Construction Mgr.: Central Contra Costa Sanitary District

Engineer or On-Site CM's Telephone No.: Nathan Morales (925) 229-7126

Date of Substantial Completion: January 22, 2016

Qualifying Project # 5 Name: Wastewater Treatment Plant Upgrade and Expansion Project

Prime Contractor: W. M. Lyles Co. (formerly known as Kaweah Construction Co.)

Project Manager: Matt Cain

Owner: Linda County Water District

Construction Cost: $ 29,547,940.00

Construction Time: 247 Calendar Days

Owner's Representative: Brian Davis

Owner's Representative Telephone No.: (530) 743-2043

Engineer or On-Site Construction Mgr.: Kennedy Jenks Engineering

Engineer or On-Site CM's Telephone No.: Don Barraza (916) 858-2700

Date of Substantial Completion: May 23, 2012

Qualifying Project # 6 Name: Palmdale Water Reclamation Plant Stage 5 Plant Expansion, Phase 1

Prime Contractor: W. M. Lyles Co.

Project Manager: Grant Gourley

Owner: County Sanitation District No. 20 of Los Angeles County

Construction Cost: $ 116,079,180.00

Construction Time: 1,559 Calendar Days

Owner's Representative: Ted Brodeur

Owner's Representative Telephone No.: (626) 962-8605

Engineer or On-Site Construction Mgr.: Los Angeles County Sanitation District

Engineer or On-Site CM's Telephone No.: Jenny Hsu (562) 908-4288

Date of Substantial Completion: June 16, 2012

Total Construction Cost of listed Qualifying Project(s) above: $ 455,277,002.00

Important Note to Prospective Proposer: Only complete Part III, Item 39(B) if you are submitting an SOPQ for the PGWWTP ERP.

39(B) In accordance with Part I, Question 9, and the Prospective Proposer must demonstrate that it has performed at least **$80 million** in construction volume on no more than **six** projects completed since **January 1, 2009** on the following types of projects:

a. Industrial and/or municipal water treatment plants where the structural concrete, excavation, backfill, mechanical and electrical were part of the contractor's contract; or

b. Industrial and/or municipal wastewater treatment plants where structural concrete, excavation, backfill, mechanical and electrical were part of the contractor's contract.

The list of projects may include projects currently under construction, but only the total amount paid by the owner(s) as of **November 1, 2018** on uncompleted projects can be included in this summation of construction value. The Prospective Proposer is allowed to list no more than **six** projects of the types listed above, that combined, will add up to at least **$80 million** in completed value of work. **In addition, one of the six projects must have a construction value of at least $20 million.**

Any projects listed below, which are not as defined above, will not be considered by the City in meeting this pre-requisite experience requirement. For example, pipeline projects, and/or pump station projects are not considered an equivalent project.

An industrial and/or municipal water or wastewater treatment plant project is defined as a project that was engineered and constructed for an industrial or municipally owned and operated facility which is designed to remove contaminants, specific constituents, and/or particulates in water and/or wastewater as required by a State issued discharge permit.

Prospective Proposer also certifies that Prospective Proposer self-performed at least 40% of the Work on each of the projects listed below. The City considers this level of past self-performance demonstrates a benefit to the Project in terms of better control of cost, schedule, and safety.

Prospective Proposers are to complete this form and not attach their own form to their SOPQ submission.

Qualifying Project # 1 Name: CR&R Riverside County Environmental Center

Prime Contractor: W. M. Lyles Co.

Project Manager: Dave O'Dear

Owner: CR & R Incorporated

Construction Cost: $ 34,734,495.33

Construction Time: 1,387 Calendar Days

Owner's Representative: Michael J. Silva

Owner's Representative Telephone No.: (714) 826-9046

Engineer or On-Site Construction Mgr.: J.R. Miller & Associates

Engineer or On-Site CM's Telephone No.: Aric Vanderzee (714) 524-1870

Date of Substantial Completion: March 5, 2018

Qualifying Project # 2 Name: Southeast Surface Water Treatment Facility

Prime Contractor: W. M. Lyles Co.

Project Manager: Tony Mueller

Owner: City of Fresno

Construction Cost: $ 162,089,360

Construction Time: 1,000 Calendar Days

SECTION 4

BASIS OF DETERMINATION

4.1 GENERAL

The determination of prequalified Prospective Proposers will be based on an evaluation of the SOPQ and information gathered by the City from the references of related projects. See Appendix B for scoring criteria. The categories that will be evaluated under the basis of determination are responsiveness and capability.

4.2 RESPONSIVENESS

Prospective Proposers must demonstrate they do not have a conflict of interest in the PGWWTP project(s) SOPQ submitted by Prospective Proposer, nor a direct relationship with another prequalifying firm.

Before evaluation of the Prospective Proposer's capability, the responsiveness of the Prospective Proposer will be assessed. The assessment of responsiveness will determine if adequate information or the minimum prerequisites have been submitted to permit an evaluation under the basis of determination. A SOPQ submittal will be rejected as nonresponsive for lack of adequate information due to incompleteness, illegibility, or disregard of the requested format.

4.3 CAPABILITY

The determination by the City of a Prospective Proposer's capability shall assess the Prospective Proposer's ability, capacity, and skill to construct the subject PGWWTP project(s) in a timely and satisfactory manner, based on the responses to the questions in Section 3 and the scoring system described in Appendix B.

Prospective Proposer's Certification

PROSPECTIVE PROPOSER'S CERTIFICATION

I have carefully examined the Request for Statements of Pre-Qualification from Interested General Contractors (RFPQ) and any other documents accompanying or made a part of this Statement of Pre-Qualifications (SOPQ) packet. The information contained in this SOPQ packet is true and correct to the best of my knowledge and is signed under penalty of perjury under the laws of the State of California. I further certify that I am duly authorized to submit this SOPQ packet on behalf of the firm as its authorized agent and that the firm is ready, willing and able to perform if awarded the contract.

I further certify that this SOPQ packet is made without prior understanding, agreement, connection, discussion, or conspiracy with any other person, contractor or corporation submitting a SOPQ packet for the same service; that this SOPQ packet is fair and made without outside control, collusion, fraud or illegal action; that no officer, employee or agent of the City or any other proposer is financially interested in said SOPQ packet; that no undue influence or pressure was used against or in concert with any officer, employee or agent of the City in connection with the pre-qualification process for the Pleasant Grove Wastewater Treatment Plant projects that will be executed as a result of the Request for Bid Proposals; and that the undersigned executed this Prospective Proposer's Certification with full knowledge and understanding of the matters therein contained and was duly authorized to do so.

Roseville, CA 95678

Re: Pleasant Grove Wastewater Treatment Plant Expansion Project
Pleasant Grove Wastewater Treatment Plant Energy Recovery Project

Dear Ms. Mueller,

W. M. Lyles Co. has submitted herewith a response to the request of Intent to Insure for the above referenced Statement of Prequalification.

The respective insurers are very familiar with W. M. Lyles Co.'s operations and qualifications. Accordingly, upon award of a contract for the above referenced project, based on our standard underwriting practices at that time, the respective insurers anticipate that they would provide the insurance coverages specified in Appendix D, Bonds and Insurance.

EMR Letter

November 15, 2018

RE: W.M. Lyles Co.
2018 Workers' Compensation Experience Modification Rating

To Whom It May Concern,

Alliant Insurance Services, Inc. is the insurance broker handling all lines of coverage for the Lyles group of companies, which includes workers' compensation.

Included within that organization is W.M. Lyles Co. As an integral part of the larger organization, W.M. Lyles Co. shares in the combined experience modification rating promulgated by the State of California. Alliant produces and calculates an individual modification factor which is based solely on the experience of W.M. Lyles Co. using the identical State Factors and formula, as if there were a standalone entity. This individually calculated experience modification factor is much more reflective of their own safety performance as compared to the overall factor published by the State of CA for combined entities.

The most recent published combined experience modification rating effective 5-31-18 is 78%.

The prior published ratings are as follows:

2017 – Combined 91%/Individual 85%
2016 – Combined 102%/Individual 84%

Please advise if you require any further information.

Regards,

Lori Howard

Re: Pleasant Grove Wastewater Treatment Plant Expansion Project
Pleasant Grove Wastewater Treatment Plant Energy Recovery Project

Ms. Mueller,

Liberty Mutual Company (Liberty), acts as surety for W.M. Lyles Co. in its contracting matters. Liberty is a major, national provider of contract surety bonds, is listed in the Federal Register as a surety acceptable for Federal projects, and is a licensed, admitted surety in all fifty United States. Liberty enjoys a Bests Guide rating of A (Excellent).

Alliant Insurance Service Inc. 9 E River Park Place East, Suite 310, Fresno, CA 93720 is the current agent. We currently extend to W.M. Lyles Co. bonding capacity in the $1,000,000,000 per project and $2,000,000,000 aggregate ranges. Current available capacity is $1,500,000,000. No claims have been made. Current rate is $4.00 per thousand.

Should you select W.M. Lyles Co. for the reference project, it is our present intention to provide the required performance and payment bonds, subject to our normal underwriting guidelines. This includes, but is not limited to a review of contract terms, conditions and bond forms.

Should you have any questions, please do not hesitate to contact our office.

Sincerely,
LIBERTY MUTUAL INSURANCE COMPANY

This Power of Attorney is made and executed pursuant to and by authority of the following By-laws and Authorizations of The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company which resolutions are now in full force and effect reading as follows:

ARTICLE IV – OFFICERS: Section 12. Power of Attorney.
Any officer or other official of the Corporation authorized for that purpose in writing by the Chairman or the President, and subject to such limitation as the Chairman or the President may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Corporation to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact, subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Corporation by their signature and execution of any such instruments and to attach thereto the seal of the Corporation. When so executed, such instruments shall be as binding as if signed by the President and attested to by the Secretary. Any power or authority granted to any representative or attorney-in-fact under the provisions of this article may be revoked at any time by the Board, the Chairman, the President or by the officer or officers granting such power or authority.

ARTICLE XIII – Execution of Contracts: Section 5. Surety Bonds and Undertakings.
Any officer of the Company authorized for that purpose in writing by the chairman or the president, and subject to such limitations as the chairman or the president may prescribe, shall appoint such attorneys-in-fact, as may be necessary to act in behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations. Such attorneys-in-fact subject to the limitations set forth in their respective powers of attorney, shall have full power to bind the Company by their signature and execution of any such instruments and to attach thereto the seal of the Company. When so executed such instruments shall be as binding as if signed by the president and attested by the secretary.

Certificate of Designation – The President of the Company, acting pursuant to the Bylaws of the Company, authorizes David M. Carey, Assistant Secretary to appoint such attorneys-in-fact as may be necessary to act on behalf of the Company to make, execute, seal, acknowledge and deliver as surety any and all undertakings, bonds, recognizances and other surety obligations.

Authorization – By unanimous consent of the Company's Board of Directors, the Company consents that facsimile or mechanically reproduced signature of any assistant secretary of the Company, wherever appearing upon a certified copy of any power of attorney issued by the Company in connection with surety bonds, shall be valid and binding upon the Company with the same force and effect as though manually affixed.

I, Renee C. Llewellyn, the undersigned, Assistant Secretary, The Ohio Casualty Insurance Company, Liberty Mutual Insurance Company, and West American Insurance Company do hereby certify that the original power of attorney of which the foregoing is a full, true and correct copy of the Power of Attorney executed by said Companies, is in full force and effect and has not been revoked.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed the seals of said Companies this 8 day of March 2019

VOLUME TWO - PRICE PROPOSAL

GMP Cost Proposal

Fairfield Suisun Sewer District Secondary Treatment Expansion Fairfield, California
CONTRACT VALUE: $21,182,911

Several of our team members have shared working experience from projects very similar to what will be required on the PGWWTP ERP. For example, Project Manager, John Lunsford, Asst. PM/Quality Control Manager, Jon Shugarte, and Lead Estimator/Pre-planner, Pat Van Treeck have recently worked together on several active treatment plants including the treatment expansion for the Fairfield Suisun Sewer District, which involved clarifier construction and facility treatment systems.

PROJECT RELEVANCE:
1. Numerous shut-downs & tie-ins to existing facilities
2. Two (2) clarifiers
3. Included State Revolving Funds
4. Treatment Expansion - 18 MGD to 54 MGD

Re: Request for Bid Proposal (RFBP), For Design-Assist and Construction of Pleasant Grove Wastewater Treatment Plant Energy Recovery Project

Dear Ms. Mueller:

W. M. Lyles Co. (Lyles) is pleased to submit this response to the above referenced RFBP issued by the City of Roseville (City), Environmental Utilities-Engineering Department, as amended through Addendum No. 6. The Energy Recovery Project (ERP) is an integral part of the City's plan to beneficially utilize biogas that will be generated by the Pleasant Grove Wastewater Treatment Plant (PGWWTP) upon completion of the upcoming Expansion Project. In support of that plan, Lyles offers the following:

The Right Team: Lyles currently operates three construction divisions throughout the State of California. While our size provides us with the capacity and resources needed to build even the most challenging of projects, the real source of our strength lies within our people. To capitalize on this, we maintain offices in five strategic locations between Rocklin and Temecula that are staffed by local personnel who can provide the highest quality of service to our clients. The key personnel that will be assigned to the ERP: Joe Lawrence, John Lunsford, Jon Shugarte, and Tony Mueller; are all members of our Rocklin, CA office which is located less than 10 miles from the PGWWTP. They also live in the local community which means they will be invested in the ERP on both a professional and personal level. Please see Section Four for additional information regarding our team.

The Strongest Partners: At Lyles, we understand the importance of strong partnerships and the value that they bring to a project. We also understand the complexity inherent in the electrical and instrumentation scopes of work associated with modern wastewater treatment facilities. For these reasons, we have exclusively partnered with Wade Johnson and his team at San Joaquin Electric, Inc. to provide electrical services, and Tesco Controls, Inc. to provide integration services for the ERP. Our relationships with both Wade and Tesco are built on more than 20 years of shared success and we consider these relationships to be among our best.

The Best Value: Value is often defined as the "importance" of something. With respect to the ERP, the City has identified three goals as having "importance": budget, schedule, and stakeholders' needs. As construction professionals, we strive to excel in these areas on a daily

basis, but as ratepayers and members of the community, our goals will be uniquely and uniformly aligned with the City's for the ERP. This alignment will result in a "project first" mentality wherein collaboration and cooperation towards achieving the project goals will be given the highest priority, resulting in the greatest value for the City and the community at large.

We look forward to the opportunity to share more details about our team and our approach to this project. In the meantime, please contact us should you have any questions regarding the content provided. **On behalf of our entire team, we would like to thank you for the opportunity to present our Proposal for this exciting project.**

RE: RFP 08-053 Design-Assist and Construction of Pleasant Grove Wastewater Treatment Plant Energy Recovery Project

****************ADDENDUM TWO*************

Please note the following revisions:

1. **REVISION TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP)**

   REPLACE the Pre-Qualified Contractor table included on Page 1 with the following:

Pre-Qualified Contractor	Contact Telephone	Contact Email Address
Auburn Constructors LLC	916-924-0344	dbail @auburnconstructors.com
Balfour Beatty Infrastructure, Inc.	707-427-8900	ewr@balfourbeattyus.com
Kiewit Infrastructure West Company	707-439-7300	ncestimating@kiewit.com
Flatiron West, Inc.	707-742-6053	lisimon@flatironcorp.com
W.M. Lyles Company	559-441-1900	ndobids@wmlylesco.com
C. Overaa & Co	510-234-0926	bids@overaa.com
Western Water Constructors, Inc.	707-540-9640	bids@westernwater.com

2. **REVISION TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP)**

   Within the Evaluation Category Table included in Section II Paragraph H, on Page 10 MOVE THE FOLLOWING ROW WITHIN THE TABLE FROM PART ONE TO PART TWO as these forms have cost information included on them:

Section IV.D - Bid Proposal Forms Submitted within 4 Calendar Days after Deadline to Receive Bid Proposals	Pass/Fail

3. **REVISION TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP)**

Revise the title of Section III.A on page 21 as shown in track changes below:

A. ~~SWCRB~~ SWRCB CWSRF PROGRAM REQUIREMENTS

4. **REVISION TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP)**

REVISE Section IV.A fourth paragraph on page 29 as shown in track changes below:

The requirements for each part of the Bid Proposal are further described below. The Bid Proposal will be considered complete only if all of the Bid Proposal section items and Bid Proposal Forms found herein and other required attachment and appendices are included in the submittal and in the order requested. Proposers are required to order the sections and include the required attachments included in Section IV.C in the order described within Part 1 of the sealed Bid Proposal (Technical Proposal). The Bid Proposal Forms described and included in Section IV.D shall be submitted within four (4) calendar days of the deadline to receive Bid Proposals and shall be considered as Part ~~1~~ 2 of the Bid Proposal (~~Technical~~ GMP, Cost Information and Bid Proposal Guarantee). Proposers are required to include the Section IV.E pages including Attachments A, B and C located at the end of this RFBP within Part 2 of the sealed Bid Proposal (GMP, Cost Information and Bid Proposal Guarantee).

5. **REVISION TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP)**

ADD the following paragraph to Section III.A.8 on page 23 as shown in track changes below:

8. Disadvantaged Business Enterprises (40 CFR Part 33).

   a. The Contractor is required to seek and encouraged to utilize Disadvantage Business Enterprise (DBE) businesses and to comply with related requirements included in Appendix B, GUIDELINES FOR CLEAN WATER STATE REVOLVING FUND PROGRAM DBE REQUIREMENTS.

   b. The Contractor shall comply with the requirements of USEPA's Program for Utilization of Small, Minority and Women's Business Enterprises. The DBE rule can be accessed at www.epa.gov/osbp.

   c. The Contractor shall comply with 40 CFR Section 33.301, and submit and retain and submit all records documenting compliance with the six good faith efforts.

   ~~c.~~ d. The Contractor shall create and maintain a Bidders List per the ADMINSTRATION REQUIREMENT section of APPENDIX B that lists all firms that bid or quote on the project including both DBEs and non-DBE business submit to the City within three calendar days of the Notice of Intent to Award. Refer to APPENDIX B for details related to the Bidders List.

   ~~d.~~ e. The Contractor shall provide the City the DBE utilization report (Form DBE UR-334 included in Appendix B) each year no later than October 1st.

   ~~e.~~ f. Refer to Appendix B for additional information on DBE Requirements, Section IV.C, BID PROPOSAL FORM ATTACHMENTS TO BE INCLUDED IN SEALED ENVELOPE ONE, and Section IV.D, BID PROPOSAL FORMS AND INFORMATION TO BE SUBMITTED WITHIN FOUR (4) CALENDAR DAYS AFTER DEADLINE TO RECEIVE PROPOSALS.

6. REVISIONS TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP)

ADD the following text as Section III.B.3 to the bottom of page 27:

3. Budget Forms Requirements

a. The Contractor and any subcontractor which will performing more than $100,000 Work included in the City's CEC funding shall complete, update and submit the CEC Budget Forms as required throughout the duration of the Project (The CEC Budget Forms template is provided as Supplementary Information to the Agreement).

b. The Work requiring Budget Forms include any Work or supply of materials related to the Biogas upgrading, the CNG system including the gas compression system, heater, dryer, control panels, and the related electrical power distribution and motor control systems (collectively referred to as CEC Work).

c. As applicable, the Contractor and any applicable subcontractors should follow the worksheet instructions that are listed on both the Instructions tab and the individual form tabs in CEC's Budget Form Excel document. These Contractor and subcontractors shall fill out the Direct Labor tab with their maximum estimate for labor over the full construction period. When filling out the Direct Labor tab, titles and labor rates are much more important than names. Equipment provided for the CEC Work shall be included as equipment costs on the Equipment tab. Labor provided for the CEC Work shall be included on the Direct Labor tab.

d. The Budget Forms shall be complete and submitted to the City within 14 days of the Contract Award, and updated as requested by the City to meet CEC requirements.

7. REVISIONS TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP)

Replace the existing text on page 73 under Section IV.E.1.a with the following:

"There are not any Mandatory City Required Allowances for this Project."

8. REVISIONS TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP)

On page 79 within Section IV.E.4 CONTRACTOR'S SELF PERFORMANCE, REPLACE within the first sentence "thirty-five percent" with "thirty percent".

Note that replacement pages for Section IV.E will be provided in Addendum 3 as these pages have to be submitted within the Part 2 Sealed Bid Proposal.

9. REVISION TO VOLUME 2 of 4: AGREEMENT

Within ARTICLE 1 – DEFINTIONS on page 4, ADD the following bullet to the definition of "Contract Documents" as shown in the track changes below:

- Request for Bid Proposal (including appendices);
- Agreement (including exhibits A-L attached thereto);
- General Requirements (Division 1);
- Technical Specifications (Divisions 2 through 46);
- Appendices included with Technical Specifications;
- Contract Drawings, prepared by Engineer;
- Addenda issued during the RFBP period; and
- Permits from other agencies specifically required for the performance of the Work as may be required by law.
- City of Roseville's most current version (and Amendments to the current version) of Construction Standards and Design Standards
- Other Referenced Standard Specifications;
- Other Referenced Standard Plans

10. REVISION TO VOLUME 2 of 4: AGREEMENT

Within ARTICLE 1 – DEFINTIONS on page 9, EDIT the Exhibit reference within the definition of "Liquidated Damages" as shown in the track changes below:

Liquidated Damages. The amount of dollars assessed for each and every calendar day required to complete the Agreement in excess of the Contract Time. See Exhibit ~~D~~E, COMPLETION TIMES AND LIQUIDATED DAMAGES.

11. REVISION TO VOLUME 2 of 4: AGREEMENT

Within ARTICLE 4 – CONTRACTOR'S REPRESENATIONS on page 15, ADD the following bullet to the end of the list of Supplementary Information included in paragraph 4.2:

- California Energy Commission Budget Forms Template

12. REVISION TO VOLUME 2 of 4: AGREEMENT

Within ARTICLE 7 – CONTRACTOR on page 23, DELETE paragraph 7.5.4.1 related to Skilled and Trained Workforce Reporting in its entirety.

13. REVISION TO VOLUME 2 of 4: AGREEMENT

Within ARTICLE 12 – PAYMENT AND COMPLETION, paragraph 12.9.K on page 53, EDIT the text as shown in track changes below:

K. Provisions of law that enable or require the City to withhold such payments in whole or in part, including, but not limited to California Public Contract Code ~~section 2602 regarding skilled and trained workforce reporting~~.

14. REVISION TO VOLUME 2 of 4: AGREEMENT

Within ARTICLE 13 – INSURANCE AND INDEMNIFICATION, paragraph 13.1.1.G on page 59, EDIT the text as shown in track changes below:

F. Umbrella Policy – The Contractor may use an umbrella or excess policy to meet the limits requirement of Article ~~13.1.1.b(1)~~13.1.1.B. and subcontractors may use an umbrella or excess policy to meet the limit of requirements of Article 13.1.1.C. However, any such umbrella/excess policy must be approved by the City and maintain an A.M. Best Rating of no less than A:VII.

15. REVISIONS TO VOLUME 3 of 4: SPECIFICATIONS, Section 01 52 00

Remove Specification Section 01 52 00, CONSTRUCTION FACILITIES in its entirety from Volume 3 and remove the line for Section 01 52 00 from the Table of Contents (Section 00 00 01).

16. REVISION TO VOLUME 4 of 4: DRAWINGS, Sheet 00-C-005

Add Note 5 to STANDARD DETAIL C0013 PRECAST UTILITY TRENCH:

"THE CONCRETE COVER SHALL BE RATED FOR AASHTO H-20 LOADING."

17. REVISION TO VOLUME 4 of 4: DRAWINGS, Sheet 00-C-110

Add Key Note 1 to sheet cell D1. Add the following corresponding text for Key Note 1 in sheet cell C8:

"THE FINISH SURFACE OF THE AREA BETWEEN THE BIOGAS UPGRADING SYSTEM AND THE ENERGY RECOVERY BUILDING SHALL BE ASPHALT PAVEMENT PER DETAIL C0009."

Add Key Note 2 to sheet cell C1. Add the following corresponding text for Key Note 2 in sheet cell C8:

"THE AREA SURROUNDING THE CNG VEHICLE FUELING SLAB AND BOUNDED BY POINTS 411, 422, 423, AND 424 SHALL BE A 6" THICK CONCRETE SLAB REINFORCED WITH #6 REBAR AT 12", EW. THE

CONTRACTOR SHALL PROVIDE EXPANSION JOINTS BETWEEN THIS SLAB AND THE THICKER, ADJACENT CNG VEHICLE FUELING SLAB."

18. EXHIBIT 1 - PRE-PROPOSAL MEETING AND SITE WALK SIGN-IN SHEETS AND PRESENTATION SLIDES

The Pre-Proposal Meeting and Site Walk sign-in sheets and presentation slides are included as Exhibit 1.

19. PRE-PROPOSAL MEETING AND SITE WALK STATEMENTS AND RESPONSES TO QUESTIONS

General statements made by the City and questions from the Pre-Proposal Meeting and Site Walk with responses are included below:

Question 1: Do the grant agencies require two startups including one on natural gas and another on renewable gas?

Reply: For the Placer County Air Pollution Control District, the focus of the grant is on transferring the City's solid waste collections fleet from diesel to CNG, regardless of whether the CNG is derived from renewable sources or not. Pipeline natural gas operation satisfies the grant startup milestone. Renewable fuel startup is not applicable.

For the CWSRF funding's Green Project Reserve, the ERP project is getting a grant as it is considered a green energy project for the micro-turbine cogeneration system. The microturbines will not operate on 100% natural gas – only digester gas or a blend of tail gas and natural gas. Both operating scenarios are "renewable", and natural gas startup is not applicable.

For the CEC Renewable Fuels Infrastructure grant, the focus is on alternative fuels going into the digester and then upgrading to digester gas to renewable CNG. CEC allows the gases to be blended, but it requires that renewables be put into the system. The project milestones are based starting up first on natural gas (for City's fueling operation), and then on digester gas (rCNG) to satisfy the CEC grant.

Question 2: Is there a skilled and trained work force requirement?

Reply: Please refer to Section 7.5.4 of the Agreement.

Please include a signed copy of this addendum with your proposal.

I acknowledge receipt of Addendum Two

RE: RFP 08-053 Design-Assist and Construction of Pleasant Grove Wastewater Treatment Plant Energy Recovery Project

***************ADDENDUM THREE*************

Please note the following revisions:

1. **REVISION TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP)**

   Within the Pre-Qualified Contractors Table on page 1, REVISE Auburn Constructors LLC contact email address as shown below:

Pre-Qualified Contractor	Contact Telephone	Contact Email Address
Auburn Constructors LLC	916-924-0344	dbailey@auburnconstructors.com
Balfour Beatty Infrastructure, Inc.	707-427-8900	ewr@balfourbeattyus.com
Kiewit Infrastructure West Company	707-439-7300	ncestimating@kiewit.com
Flatiron West, Inc.	707-742-6053	lisimon@flatironcorp.com
W.M. Lyles Company	559-441-1900	ndobids@wmlylesco.com
C. Overaa & Co	510-234-0926	bids@overaa.com
Western Water Constructors, Inc.	707-540-9640	bids@westernwater.com

2. **REVISION TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP)**

   REPLACE the Evaluation Category Part Two scoring formulas in Section II.H on pages 10 and 11 with the formulas shown below:

   The Part Two scoring will be based on the following formulas:

   - Total Proposed GMP Score =
     - Lowest GMP = 40 Points
     - GMP within 2% of Lowest GMP = 40 Points
     - GMP more than 2% and less than or equal to 4% of Lowest GMP = 30 points
     - GMP more than 4% and less than or equal to 6% of Lowest GMP = 20 points
     - GMP more than 6% and less than or equal to 8% of Lowest GMP = 10 points
     - GMP greater than 8% of Lowest GMP = 0 Points

- Total On-Site Management & Administration Positions Hourly Rate Score = Maximum Points x Lowest Average Hourly Rate / Proposer's Average Hourly Rate
- Proposed Total Fee Mark-Up for General Overhead & Profit Score = Maximum Points x Lowest Fee / Proposer's Fee
- Proposed Shared Savings = Maximum Points x Proposer's % to Owner / Highest % to Owner
- Self-Performance of Work Score = Maximum Points x Proposer's Self-Performance / Highest Self-Performance

3. REVISION TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP)

REVISE Section II.H on page 11 within the first paragraph after the equations as shown below:

If City determines that a Proposer cannot be selected based solely on the Bid Proposals submitted, the top ranked Proposers submitting the most highly rated ~~technical~~ bid proposals may be invited for interviews with the selection committee. The Proposer's proposed Project Manager must be present at the interview; up to three others may attend at the discretion of the Proposer. After this process, the proposers will be ranked and notified. City staff will then enter into final negotiations with the highest ranked proposer. Following successful negotiations, a recommendation will be made to City Council to award the Agreement. In the event that negotiations are not successful, the City reserves the right to terminate negotiations and enter into negotiations with the next highest ranked Proposer.

4. REVISION TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP)

REVISE the second paragraph of Section II.O, BID PROPOSAL SECURITY on page 13 as shown in track changes below:

The Bid Proposal guarantees of the ~~three~~ two highest ranked Proposers will be retained until the Agreement is signed, evidence of insurance provided, and satisfactory bonds furnished by one of the ~~two~~three highest ranked Proposers or other disposition made thereof. The Bid Proposal guarantees of all Proposers except the ~~two~~three highest ranked Bid Proposals will be returned within ~~three~~4 months after the Bid Proposals are due. If all Bid Proposals are rejected and no award is made, all Bid Proposal guarantees will be returned within ten (10) calendar days of the decision by the City not to award the Project.

5. REVISION TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP)

At the end of Section III.A.1 on page 21 ADD subparagraphs "a." and "b." as shown below:

a. The Contractor shall comply with all record keeping and reporting requirements under the Clean Water Act, including any reports required

by a Federal agency or the Finance Authority such as performance indicators of program deliverables, information on costs, and project progress. As part of this requirement, the successful Contractor will be required to provide certifications and documentation for AIS compliance. A sample AIS Compliance Certification form is provided in Appendix D. AIS Compliance Certification forms shall be collected from suppliers, fabricators manufacturers and processors to certify that each step in the process was domestically performed, and included in product submittals to the City. AIS Compliance Certification forms and other related AIS documentation such as a De Minimis Waivers (See Appendix C), receipts and/or invoices shall be maintained by the Contractor on the Project Site and shall be shared with City, SWRCB and EPA staff if requested during an audit. Additional documentation may be needed from the Contractor if the Compliance Certification forms and other documents are lacking important information.

b. By submitting a sealed bid proposal, the Proposer acknowledges to and for the benefit of the City and the State of California that it understands the goods and services for this Project are likely being funded with monies made available by the Clean Water State Revolving Fund that have statutory requirements commonly known as "American Iron and Steel;" that requires all of the iron and steel products to be used in the Project to be produced in the United States ("AIS Requirement") including iron and steel products provided by the Contactor pursuant to this Agreement. The Proposer hereby represents and warrants to and for the benefit of the City and the State that (a) the Contractor has reviewed and understands the AIS Requirement, (b) all of the iron and steel products used in the Project will be and/or have been produced in the United States in a manner that complies with the AIS Requirement, unless a waiver of the requirement is approved, and (c) the Contractor will provide any further verified information, certification or assurance of compliance with this paragraph, or information necessary to support a waiver of the American Iron and Steel Requirement, as may be requested by the City or the State. Notwithstanding any other provision of the Project Agreement, any failure to comply with this paragraph by the Contractor shall permit the Purchaser or State to recover as damages against the Contractor any loss, expense, or cost (including without limitation attorney's fees) incurred by the City or State resulting from any such failure (including without limitation any impairment or loss of funding, whether in whole or in part, from the State or any damages owed to the State by the Purchaser).

6. REVISION TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP)

REPLACE Section IV.E pages 73 through 82 with Addendum 2 pages 73 through 82 included in Exhibit 1 to this addendum. Changes to these pages are shown in track changes and include the Addendum 2 changes that were made to these pages.

7. REVISION TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP)

Add the AIS Compliance Certification document included in Exhibit 2 of this addendum as Appendix D of the RFBP and add "D. AIS Compliance Certification" to the Volume 1 – Request for Bid proposal Table of Contents under Appendices on page ii.

8. REVISION TO VOLUME 2 of 4: AGREEMENT

Within ARTICLE 13 – INSURANCE AND INDEMNIFICATION, EDIT paragraph 13.1.1.C on page 58 and add subparagraph "1" as shown in track changes below:

C. Minimum Amount of Coverage for all Listed Subcontractors included in Exhibit E - The bodily injury, personal injury and property damage liability of the Commercial General Liability insurance shall provide coverage in the following limits of liability: $5,000,000 on account of any one occurrence for bodily injury and property damage, $5,000,000 personal and advertising injury limit with an annual general aggregate limit of not less than $10,000,000, and $5,000,000 products and completed operations aggregate, combined single limit. The Automobile Liability insurance policy shall provide minimum limits of $5,000,000 per accident as a combined single limit arising out of the ownership, maintenance, or use of any owned or non-owned vehicles. These minimum amounts of insurance coverage do not preclude the Contractor from requiring higher limits or additional insurance coverage as it deems necessary.

1. Minimum Amount of Coverage for Subcontractors NOT included in Exhibit E - The bodily injury, personal injury and property damage liability of the Commercial General Liability insurance shall provide coverage in the following limits of liability: $2,000,000 on account of any one occurrence for bodily injury and property damage, $5,000,000 personal and advertising injury limit with an annual general aggregate limit of not less than $10,000,000, and $5,000,000 products and completed operations aggregate, combined single limit. The Automobile Liability insurance policy shall provide minimum limits of $5,000,000 per accident as a combined single limit arising out of the ownership, maintenance, or use of any owned or non-owned vehicles. These minimum amounts of insurance coverage do not preclude the Contractor from requiring higher limits or additional insurance coverage as it deems necessary.

9. REVISION TO VOLUME 2 of 4: AGREEMENT

Within ARTICLE 13 – INSURANCE AND INDEMNIFICATION, paragraph 13.1.4.E on page 61, EDIT the text as shown in track changes below:

E. All Other Perils - ~~$25,000~~ $100,000

10. REVISION TO VOLUME 2 of 4: AGREEMENT

REPLACE Exhibit C to the Agreement with the revised Exhibit C included in Exhibit 3 of this addendum. The revisions are shown in track changes.

11. REVISIONS TO VOLUME 3 of 4: Specifications, Section 09 90 00

REPLACE all instances of "Hi Solids Polyurethane 100" with "Hi Solids Polyurethane 250" within Specification Section 09 90 00 PAINTING AND COATING.

12. REVISIONS TO VOLUME 3 of 4: Specifications, Section 33 05 16

ADD Specification Section 33 05 16 PRECAST CONCRETE UTILITY STRUCTURES included in Exhibit 4 of this addendum to Volume 3, SPECIFICATIONS. In addition, ADD a line for Section 33 05 16 PRECAST CONCRETE UTILITY STRUCTURES under the DIVISION 33 header in the Table of Contents (Section 00 00 01).

13. REVISIONS TO VOLUME 3 of 4: Specifications, Section 40 05 02.43

ADD "Sanitary Sewer Force Main" and its corresponding abbreviation, "SSFM," to the Process Service and Process Service Identifier Table at the beginning of Section 40 05 02.43 PRESSURIZED WASTEWATER AND DRAINAGE.

14. REVISIONS TO VOLUME 3 of 4: Specifications, Section 40 05 02.89

ADD "Drain" and its corresponding abbreviation, "D," to the Process Service and Process Service Identifier Table at the beginning of Section 40 05 02.89 BUILDING MECHANICAL DRAINAGE.

15. REVISIONS TO VOLUME 3 of 4: Specifications, Section 40 76 00

Within Section 40 76 00 PROCESS GAS ANALYTICAL MEASUREMENT REVISE the Instrument Specification Sheet for MHS in Section 3.03 on page 9 as follows:

Power Supply: ~~120 volts AC~~ **24 volts DC**, 60 hertz nominal

Product Requirements: Detector shall ~~be lead acetate tape type with rate of reaction sensing system to provide to two parts per billion sensitivity~~ **electrochemical cell sensor type with a monitoring range of 0 – 50 ppm.** A field adjustable alarm relay (SPDT) and a 4-20 MA transmission signal proportional to scheduled range shall be provided. Unit shall be provided in a ~~NEMA 12~~ **NEMA 4X** enclosure ~~and with a 1 year supply of lead acetate tape and 5 percent acetic acid~~. Detector shall be ~~Houston Atlas Model 722R~~ **MSA Model TS4000H, Drager Polytron 8100 EC**, or equal.

16. REVISIONS TO VOLUME 3 of 4: Specifications, Section 43 32 77

Within Specification Section 43 32 77 BIOGAS UPGRADING SYSTEM make the following changes:

In Section 2.02.A.1 (HYDROGEN SULFIDE REMOVAL SYSTEM Table) on page 11, REMOVE the bottom row of the table to delete the "Base" component and corresponding "Galvanized steel" material.

In Section 2.02.A.7 (GAS-TO-GAS HEAT EXCHANGER AND GAS-TO-GLYCOL HEAT EXCHANGER 2 Table) on page 12, REMOVE the bottom row of the table to delete the "Base" component and corresponding "Galvanized steel" material.

In Section 2.02.A.8 (SILOXANE REMOVAL SYSTEM Table) on page 12, REVISE the material for the "Base" component" as shown below:

~~Galvanized Steel~~ **Powder-coated steel**

In Section 2.02.A.10 (TAIL GAS COMPRESSORS Table) on page 13, REMOVE the bottom row of the table to delete the "Base" component and corresponding "Galvanized steel" material.

On page 14 REVISE the MIXED GAS BUFFER VESSEL Table to be Section 2.02.A.15 rather than 2.02.A.2, and REMOVE the bottom row of the table to delete the "Base" component and corresponding "Galvanized steel" material.

REVISE Section 2.07.A.6.a on page 22 (Siloxane Removal System – Features) as follows:

a. Top manway, each vessel:
    1) Type: ~~Flanged~~ **Pull-through**
    2) Size, inches, minimum: elliptical 11 x 15, minimum

In Section 2.04.H.3 on page 17, REVISE the text as follows:

Common steel base shall be ~~hot-dip galvanized~~ **powder-coated**.

In Section 2.11.G.3 on page 28, REVISE the text as follows:

Common steel base shall be ~~hot-dip galvanized~~ **powder-coated**.

17. REVISION TO VOLUME 4 of 4: Drawings, Sheet 00-C-112

On Drawing Sheet 00-C-112 make the following revisions:

REVISE the 6" SSFM to be scaled back (gray) north of N 48451.23

ADD a coupling symbol on the 6" SSFM at the connection point (N 48451.23) in Cell B7.

ADD a Key Note 2 symbol pointing to the 6" SSFM coupling symbol at the connection point.

ADD the following as Key Note 2:
"TIE-IN LOCATION AND DEPTH OF THE 6" SSFM CONNECTION SHALL BE COORDINATIONED BETWEEN THE ENERGY RECOVERY PROJECT CONTRACTOR AND EXPANSION PROJECT CONTRACTOR."

18. REVISION TO VOLUME 4 of 4: Drawings, Sheet 00-C-401

On Drawing Sheet 00-C-401, REVISE the callout on the left side of the 16" DG Profile (Cell C3) as follows:

CONNECT TO BIOGAS UPGRADING FACILITY, SEE DWG ~~88-M-110~~ 88-M-111

19. REVISION TO VOLUME 4 of 4: Drawings, Sheet 00-C-402

On Drawing Sheet 00-C-402, REVISE the vertical scale for both profiles from 1" = 2' to 1" = 4'.

20. REVISION TO VOLUME 4 of 4: Drawings, Sheet 00-C-403

On Drawing Sheet 00-C-403, REVISE the callout on the right site of the 4" SS Drain from Biogas Upgrading Facility Profile (Cell D4) as follows:

CONNECT TO BIOGAS UPGRADING FACILITY PIPING, SEE DWG ~~88-M-110~~ 88-M-111

21. REVISION TO VOLUME 4 of 4: Drawings, Sheet 00-I-010

On Drawing Sheet 00-I-010, REVISE the Key Note attached to the Zero Client in Energy Recovery Building (Cell C4) from Key Note 2 to Key Note 3.

Please include a signed copy of this addendum with your proposal.

I acknowledge receipt of Addendum Three.

Name Joseph B. Lawrence, Asst. Vice President

RE: RFP 08-053 Design-Assist and Construction of Pleasant Grove Wastewater Treatment Plant Energy Recovery Project

***************ADDENDUM FOUR *************

Please note the following revisions:

1. **REVISION TO ADDENDUM 1, 2 AND 3**

   The dated at the top (date of issue) of Addendum 1, Addendum 2 and Addendum 3 shall be revised from 06/04/18 to 06/04/19, 06/18/18 to 06/18/19, and 06/27/18 to 06/27/19, respectively.

2. **REVISION TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP)**

   REVISE the second paragraph on page 2 of the RFBP as shown below:

A total of one (1) hard bound original and seven (7) bound hard copies and an electronic (PDF) copy on a USB flash drive (total of 2 flash drives) for both parts of the Bid Proposal shall be submitted no later than 3:00 PM on ~~July 12, 2019~~ July 17, 2019 to:

City of Roseville
City Clerk's Office
311 Vernon Street
Roseville, CA 95678
Re: Design-Assist and Construction of the
Pleasant Grove Wastewater Treatment Plant Energy Recovery Project
Attention: Tracie Mueller, P.E., Environmental Utilities-Engineering

3. REVISION TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP)

REVISE the Procurement Schedule within Section II.A on page 5 as shown below:

Procurement Schedule

Event	Date
Request for GMP Construction Bid Proposals sent to Invited Contractors	6/1/2019
Mandatory Pre-Proposal Meeting and Site Walk at 1:30 p.m.	6/12/2019
Last Day to Submit Questions	7/1/2019
City Responses to Written Questions	~~7/8/19~~ 7/10/19
Last Addendum Posting Date (if necessary)	~~7/8/19~~ 7/10/19
Bid Proposal Due Date at 3:00 p.m.	~~7/12/2019~~ 7/17/19
Possible Interviews with Proposers who submitted responsive Proposals	8/22/2019 – 8/29/2019
Anticipated Notification of Intent to Award	10/30/2019
Anticipated Award of Agreement by City Council	11/6/2019

4. REVISION TO VOLUME 2 of 4: AGREEMENT

Within ARTICLE 4 – CONTRACTOR'S REPRESENTATIONS, add the following item to the bulleted list in paragraph 4.2 SUPPLEMENTARY INFORMATION on page 15. Note that a copy of the Topographic Survey prepared by KSN, Inc. was uploaded to Public Purchase with this addendum.

- Pleasant Grove Wastewater Treatment Plant Topographic Survey, dated December 2016, prepared by KSN, Inc.

5. REVISION TO VOLUME 2 of 4: AGREEMENT & ADDENDUM 3, ITEM 8

This addendum change shall replace Addendum 3, Item 8. Within ARTICLE 13 – INSURANCE AND INDEMNIFICATION, EDIT paragraph 13.1.1.C on page 58 and add subparagraph "1" as shown in track changes below:

C. Minimum Amount of Coverage for all Listed Subcontractors included in Exhibit E - The bodily injury, personal injury and property damage liability of the Commercial General Liability insurance shall provide coverage in the following limits of liability: $5,000,000 on account of any one occurrence for bodily injury and property damage, $5,000,000 personal and advertising injury limit with an annual general aggregate limit of not less than $10,000,000, and $5,000,000 products and completed operations aggregate, combined single limit. The Automobile Liability insurance policy shall provide minimum limits of $5,000,000 per accident as a combined single limit arising out of the ownership, maintenance, or use of any owned or non-owned vehicles. These minimum amounts of insurance coverage do not preclude the Contractor from requiring higher limits or additional insurance coverage as it deems necessary.

1. Minimum Amount of Coverage for Subcontractors NOT included in Exhibit E - The bodily injury, personal injury and property damage liability of the Commercial General Liability insurance shall provide coverage in the following limits of liability: $2,000,000 on account of any one occurrence for bodily injury and property damage, $2,000,000 personal and advertising injury limit with an annual general aggregate limit of not less than $4,000,000, and $2,000,000 products and completed operations aggregate, combined single limit. The Automobile Liability insurance policy shall provide minimum limits of $5,000,000 per accident as a combined single limit arising out of the ownership, maintenance, or use of any owned or non-owned vehicles. These minimum amounts of insurance coverage do not preclude the Contractor from requiring higher limits or additional insurance coverage as it deems necessary.

6. REVISIONS TO VOLUME 3 of 4: Specifications

In Specifications Section 03 30 00 CAST-IN-PLACE CONCRETE, REVISE Section 1.05.B on page 4 as follows:

B. ~~Quality Control By Contractor:~~ NOT USED

~~1. Where required to demonstrate conformance with the specified requirements for cast in place concrete, the Contractor shall provide the services of an independent testing laboratory which complies with the requirements of ASTM E329. The testing laboratory shall sample and test concrete materials as specified in this section. Costs of testing laboratory services shall be borne by the Contractor.~~

7. REVISIONS TO VOLUME 3 of 4: Specifications, Exhibit 1 – Section 40 06 51 CV09 DETAILED VALVE SPECIFICATION SHEET

Within Section 40 06 51 DETAILED VALVE SPECIFICATION SHEETS, ADD new Detailed Valve Specification Sheet CV09 included in Exhibit 1 of this addendum to the end of Section 40 06 51.

8. REVISIONS TO VOLUME 3 of 4: Specifications

In Section 40 41 13.13 ELECTRICAL RESISTANCE HEAT TRACING make the following revisions:

- **REVISE Section 2.01.A.1 on page 1 as follows:**

  a. Tracer tape shall consis: of self-limiting, parallel circuit construction with a continuous inner core of conductive material between two copper bus wires. The resistance and heating capacity of the heating material shall vary in response to piping temperature changes. Tape shall withstand continuous exposure to 150 degree F temperature. Tracer tape shall operate using ~~480 volt AC~~ **208 volt AC**, 3 phase, 60 Hz power.

- **REVISE Section 2.02.C.1.a on page 2 as follows:**

  b. Rating: 22 amperes at ~~480V AC~~ **208V AC**

- **REVISE Section 2.02.D.1.a on page 2 as follows:**

  a. Rating: 22 amperes at ~~480V AC~~ **208V AC**

9. REVISIONS TO VOLUME 3 of 4: Specifications

In Section 43 10 01 COMPRESSED NATURAL GAS FUELING SYSTEM, REVISE Section 2.11.B (Fast-Fill Dispenser - Specifications) on page 25 as follows:

B. Specifications

1. Dispensers shall be capable of delivering fills of 3600 PSIG temperature compensated to 70°F, based on control logic housed in the dispenser~~, except one hose shall provide 3000 PSIG fills~~. Dispensers shall include one MicroMotion CNG-050 meter, and mechanical vehicle pressure gauge for each hose at exterior of cabinet and shall have a backlit data display. All CNG tubing and fittings shall be minimum 3/4" x .095", grade 316 SS. Vent tubing shall be 3/8" x .049", grade 316 SS. A means of preventing the escape of CNG from the fast-fill system in case the dispenser is knocked off of its base shall be provided, such as a vibration switch connected to the ESD circuit. Dispenser-control valves shall be ball or solenoid valves with flow performance equal to ¾" tubing. Dispensers shall be provided with excess flow switches, pressure gauges that read 1.2 times the system pressure, and ¼ turn manual shut-off valves.

10. REVISIONS TO VOLUME 3 of 4: Specifications

In Section 43 23 80.11 SUBMERSIBLE WASTEWATER PUMPS - CONSTANT SPEED, SUMP PUMPS OR SMALL LIFT STATIONS, made the following revisions:

- **REVISE Section 1.01.A (Scope) on page 1 as follows:**

1. This section specifies submersible pumps suitable for pumping unscreened wastewater at constant speed. Pumps furnished under this specification shall have discharge nozzles from 2 through 4 inches in diameter and motors less than 7.5 horsepower.
2. Pumps ~~will~~ **shall** be installed in a wet-pit configuration **and shall be provided as a complete, packaged wet well pump station. The package shall include pumps, motors, discharge fittings, guide bar and brackets, chain and cable hooks, wet well basin and access hatch, conductivity level probes, discharge valve vault with check valves and isolation valves, and control panel.**

~~3. Pump units shall be complete with motor, discharge fitting, guide bar and brackets, chain and cable hooks and other accessories as specified. Each submersible pump will have a sump access frame, hatch and fall protection system as provided under Section 09 31 20.~~ **Not used.**

4. Manufacturers proposing to furnish equipment specified under this section shall hold current certification under ISO 9001-2001. Application for certification under ISO 9001 shall not be deemed as an acceptable substitute for current certification. Documentation attesting to current certification shall be signed by an officer of the manufacturer's corporation and shall be notarized.

- **ADD the following lines to the bottom of the table in Section 1.01.C (Equipment List) on page 1:**

Item	Equipment Number
Sanitary Sewer High High Level Switch	PG05-LSHH-00051
Sanitary Sewer LEL Detector	PG05-AITx-00052

- **ADD the following line to the list in Section 1.02.A (RELATED SECTIONS) on page 2:**

5. Section 33 05 16 Precast Concrete Utility Structures

- **REVISE Section 1.05.A.7 on page 3 as follows:**

Drawings showing general dimensions and confirming the size of pumps, motors, drives and specified appurtenances; piping connections; construction details of equipment (including bearings and bearing isolators); **pre-cast concrete structures; access hatches;** wiring diagrams; and weight of equipment.

- **ADD the following sub-sections to Section 2.06 (COMPONENTS) on page 9:**

J. Wet Well Basin
   1. The wet well basin shall be constructed from reinforced, pre-cast concrete and shall house the duplex pump assembly and associated components. The wet well shall be provided with an access hatch. Approved manufacturers for the wet well basin include Jensen Precast or equal.
   2. The minimum basin inner diameter shall be 60 inches, and the minimum basin depth shall be 132 inches.
   3. The interior of the wet well basin shall be coated with System EA-3 in conformance with Section 09 90 00.
   4. Access Hatch
      a. A single-leaf galvanized steel access hatch cover and frame shall be provided and shall be set within the concrete basin roof.
      b. The access hatch dimensions shall be minimum 48 inches by 30 inches.
      c. The access hatch shall be rated for AASHTO H-20 loading.

K. Discharge Valve Vault
   1. A valve vault shall be provided to house the discharge check valve and isolation valve for each pump.
   2. The valve vault shall comply with the requirements in Section 33 05 16.
   3. A discharge check valve and isolation valve shall be provided as part of this package for each pump.
   4. Check valves and isolation valves shall comply with the requirements in Sections 40 05 02.43 and 40 06 51.

L. LEL Detector
   1. Provide an LEL detector in the headspace of the wet well basin. The LEL device shall meet the requirements of Sections 40 06 70 and 40 76 00. This detector shall be used to monitor hazardous gas conditions in the wet well.

11. REVISIONS TO VOLUME 3 of 4: Specifications

In Section 43 32 77 BIOGAS UPGRADING SYSTEM, make the following revisions:

- **REVISE Section 1.05.A.19 as follows:**

~~Foundation recommendations and anchor~~ **Anchor** bolt sizing ~~for the vessels, and skids~~ signed and sealed by a California registered structural P.E.

- **ADD the following requirement to Section 1.05.A on page 10:**

27. Copies of Contract Document Structural drawings with check marks indicating no exceptions to the foundation design.

- REVISE Section 2.16.B.6 on pages 30 and 40 as follows:

6. Accessories – **NOT USED**
   ~~a. Resistive strip heaters.~~
   ~~b. Air conditioner.~~

- REVISE Section 2.16.B.7.a as follows:

7. Programable Logic Controllers (PLCs):
   a. Acceptable manufacturer: ~~Allen-Bradley Compactlogix,~~ **Modicon M340 or M580**

12. REVISIONS TO VOLUME 3 of 4: Specifications

In Section 43 42 21 WELDED STEEL PRESSURE VESSEL, make the following revisions:

- ADD the following to Section 1.02.C on page 2:

a. Welds shall have radiographic testing in accordance with RT3 markings per ASME Section VIII, Division 1.

- Revise the header for Section 1.03 follows on page 2:

1.03 ~~WELDS SHALL HAVE RADIOGRAPHIC TESTING IN ACCORDANCE WITH RT3 MARKINGS PER ASME SECTION VIII, DIVISION 1.~~ SUBMITTALS

- Revise Section 1.03.A.15 as follows on page 3:

~~Foundation recommendations for the vessels signed stamped by an engineer registered in the State of California.~~ **Copies of Contract Document structural drawings with check marks indicating no exceptions to the foundation design.**

13. REVISIONS TO VOLUME 4 of 4: Drawings

On Sheet 00-C-112, REMOVE the portion of the 6" SSFM line that extends north of N 48451.23 (past the coupling that was added in Addendum 3). Delete the stationing points and callouts associated with the removed pipeline.

14. REVISIONS TO VOLUME 4 of 4: Drawings

On Sheet 00-C-114, REMOVE all portions of the 6" SSFM line and the associated comments, callouts, and stationing points shown on sheet 00-C-114 (see Cells D4, and E4).

15. REVISIONS TO VOLUME 4 of 4: Drawings

On Sheet 00-C-402, make the following changes:

- Remove the note and corresponding arrow that states "WET WELL PUMPING STATION SEE DWG _/__" (Cell E2).
- End the 6" SSFM PROFILE at the stationing point 2+37. At the end point, add a callout and note that states:
  "TIE-IN LOCATION AND DPETH OF THE 6" SSFM CONNECTION SHALL BE COORDINATED BETWEEN THE ENERGY RECOVERY PROJECT CONTRACTOR AND THE EXPANSION PROJECT CONTRACTOR."
- Remove the second 6" SSFM PROFILE that is shown on the bottom half of the page.

16. REVISIONS TO VOLUME 4 of 4: Drawings

On Sheet 00-E-202, SHOW transformer (87-XFMR-005) mounted below the Heat Trace Control Panel (87-LCPx-005) in the Electrical Room (see Cell B8).

17. REVISIONS TO VOLUME 4 of 4: Drawings

On Sheet 88-E-101, ADD a callout box and corresponding panel number callout "87-XFMR-005" adjacent to and below the callout for the Heat Trace Control Panel (87-LCPx-005). See Cell C6/7.

Please include a signed copy of this addendum with your proposal.

I acknowledge receipt of Addendum Four.

RE: RFP 08-053 Design-Assist and Construction of Pleasant Grove Wastewater Treatment Plant Energy Recovery Project

********** ADDENDUM FIVE **********

Please note the following revisions:

1. **REVISION TO VOLUME 2 of 4: AGREEMENT & ADDENDUM 4, ITEM 5**

   This addendum is a revision to text added as part of Addendum 4, Item 5. Within ARTICLE 13 – INSURANCE AND INDEMNIFICATION, EDIT paragraph 13.1.1.C.1 on page 58 as shown in track changes below:

   1. Minimum Amount of Coverage for Subcontractors NOT included in Exhibit E - The bodily injury, personal injury and property damage liability of the Commercial General Liability insurance shall provide coverage in the following limits of liability: $2,000,000 on account of any one occurrence for bodily injury and property damage, $2,000,000 personal and advertising injury limit with an annual general aggregate limit of not less than $4,000,000, and $2,000,000 products and completed operations aggregate, combined single limit. The Automobile Liability insurance policy shall provide minimum limits of ~~$5,000,000~~ $1,000,000 per accident as a combined single limit arising out of the ownership, maintenance, or use of any owned or non-owned vehicles. These minimum amounts of insurance coverage do not preclude the Contractor from requiring higher limits or additional insurance coverage as it deems necessary.

2. **REVISION TO VOLUME 2 of 4: AGREEMENT**

   Within ARTICLE 13 – INSURANCE AND INDEMNIFICATION, EDIT paragraph 13.1.4.C on page 60 as shown in track changes below:

C. Included Coverage – The above builder's risk insurance shall include the following coverages:

1) Including, but not by way of limitation, for all damages of loss to the Work and to appurtenances, to materials and equipment to be incorporated into the Project while the same are in transit, stored on or off the Site, to construction plant and temporary structures.
2) Such insurance shall cover, but shall not be limited to, the perils of fire, lightning, windstorm, hail, explosion, riot, riot attending a strike, civil commotion, smoke damage, damage by aircraft or vehicles, vandalism and malicious mischief, theft, collapse, and flood.
3) The policy shall cover the costs of debris removal, including demolition as may be made reasonably necessary by the application of any law, ordinance, or regulation.
4) Start-up & testing, and machinery breakdown including electrical arching which are very important coverages and usually have to be requested.
~~5) Consequential losses due to delay in completing the Work. The builder's risk insurance limit for consequential losses is $1,000,000.~~
6)5) The policy shall provide the City the right to occupy the premises without termination of the policy until Final Completion of the Project.

3. REVISIONS TO VOLUME 4 of 4: Drawings

On Sheet 00-E-010, ADD the following text to the end of Key Note 1:

THE EXISTING 480V SWITCHGEAR IS A CUTLER-HAMMER MAGNUM DS (SHOP ORDER # 98Y0745, G.O. # MSF01793, ITEM # 007).

Please include a signed copy of this addendum with your proposal.

I acknowledge receipt of Addendum Five.

RE: RFP 08-053 Design-Assist and Construction of Pleasant Grove Wastewater Treatment Plant Energy Recovery Project

***************ADDENDUM SIX *************

Please note the following revisions:

1. **REVISION TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP), and ADDENDUM 4, ITEM 2**

   REVISE the second paragraph on page 2 of the RFBP as shown below:

   A total of one (1) hard bound original and seven (7) bound hard copies and an electronic (PDF) copy on a USB flash drive (total of 2 flash drives) for both parts of the Bid Proposal shall be submitted no later than 3:00 PM on ~~July 12, 2019~~ ~~July 17, 2019~~ July 22, 2019 to:

   City of Roseville
   City Clerk's Office
   311 Vernon Street
   Roseville, CA 95678
   Re: Design-Assist and Construction of the
   Pleasant Grove Wastewater Treatment Plant Energy Recovery Project
   Attention: Tracie Mueller, P.E., Environmental Utilities-Engineering

2. **REVISION TO VOLUME 1 of 4: REQUEST FOR BID PROPOSAL (RFBP), and ADDENDUM 4, ITEM 3**

   REVISE the Procurement Schedule within Section II.A on page 5 as shown below:

Procurement Schedule

Event	Date
Request for GMP Construction Bid Proposals sent to Invited Contractors	6/1/2019
Mandatory Pre-Proposal Meeting and Site Walk at 1:30 p.m.	6/12/2019
Last Day to Submit Questions	7/1/2019
City Responses to Written Questions	~~7/8/19~~ 7/10/19
Last Addendum Posting Date (if necessary)	~~7/8/19~~ ~~7/10/19~~ 7/15/19
Bid Proposal Due Date at 3:00 p.m.	~~7/12/2019~~ ~~7/17/19~~ 7/22/19
Possible Interviews with Proposers who submitted responsive Proposals	8/22/2019 – 8/29/2019
Anticipated Notification of Intent to Award	10/30/2019
Anticipated Award of Agreement by City Council	11/6/2019

3. REVISIONS TO VOLUME 3 of 4: SPECIFICTIONS, EXHIBIT 1

REPLACE the Instrument List (pages 1 of 11 through 11 of 11) located at the end of Section 40 06 70 SCHEDULES FOR INSTRUMENTATION OF PROCESS SYSTEMS, with the Instrument Index (pages 1 of 12 through 12 of 12) that is included in Exhibit 1 of this addendum.

4. REVISIONS TO VOLUME 4 of 4: DRAWINGS

On Sheet 00-C-007, REVISE the fence fabric height from 8'-0" to 6'-0" in STANDARD DETAILS C0025 AND C0027.

5. REVISION TO VOLUME 4 OF 4: DRAWINGS

On Sheet 00-I-010 NETWORK BLOCK DIAGRAM, REPLACE Key Note 4 with "VIDEO CAMERA SHALL BE SONY MODEL SNC-DH180 OR EQUIVALENT SONY, AXIS, OR VIVATEK."

Please include a signed copy of this addendum with your proposal.

I acknowledge receipt of Addendum Six.

SECTION 1

PROJECT UNDERSTANDING

PROJECT UNDERSTANDING

DELIVERING A SUCCESSFUL PROJECT

The City of Roseville (City) has issued a Request for Bid Proposals (RFBP) to prequalified contractors for Design-Assist and Construction of the Pleasant Grove Wastewater Treatment Plant Energy Recovery Project (ERP or Project). A Best-Value selection process is being utilized by the City to emphasize its desire for a true partner in this Project; one that will provide the best overall benefit to the community.

The selected contractor will become an integral part of the Project Team which will include both the City and Brown & Caldwell (B&C). B&C will serve a dual role as both designer and construction manager. Additional stakeholders include those who will be involved in the Pleasant Grove Wastewater Treatment Plant Expansion Project, which will be constructed concurrent with the ERP; and the citizens of the City of Roseville.

PROJECT OVERVIEW

The City of Roseville is undertaking the task of expanding the Pleasant Grove Wastewater Treatment Plant (PGWWTP) to restore its original treatment capacity of 12 million gallons per day (MGD). In recent years, higher than anticipated organic loading has caused the facility to experience a decrease in its effective treatment capacity from 12 MGD to 9.5 MGD. As part of the Expansion Project, two new anaerobic digesters will be constructed which, once in operation, will generate biogas. It is the City's desire to utilize this biogas in an economically beneficial and environmentally sustainable way. This desire has led to the development of the Energy Recovery Project which will provide for construction of the following major improvements:

- High-Strength Waste Receiving Station consisting of screening equipment and storage tanks for the offloading and management of fats, oils, and greases.
- Odor Control Facility utilizing both activated carbon and biotrickling filter technologies to prevent foul odors from reaching sensitive receptors.
- Biogas Upgrading System for removing moisture, hydrogen sulfide, ammonia, siloxanes, carbon dioxide, and other undesirable elements from biogas as necessary to produce a product suitable for beneficial use.
- Compressed Natural Gas (CNG) Fueling Station consisting of compressors, storage vessels, a fuel management system, and dispensers for the fueling of CNG powered vehicles.
- Cogeneration Facility utilizing four packaged microturbine generators and a thermal recovery system for converting biogas into usable electrical power and heat.
- Civil, structural, mechanical, and electrical infrastructure as needed to support the aforementioned facilities.

These improvements will benefit the City by:

- Producing Renewable Compressed Natural Gas (rCNG) for use by the City's fleet of garbage collection vehicles.
- Reducing greenhouse gas emissions through the replacement of diesel powered garbage trucks with rCNG powered trucks.
- Providing a potential fuel source for other City owned fleet vehicles in the future.
- Converting excess biogas into electricity and heat for plant usage.
- Collecting high strength waste (fats, oils, and grease) generated by local businesses and feeding it directly into the anaerobic digesters thereby boosting gas and electricity production.
- Diverting organic waste that would otherwise be discharged into the sewer system or disposed of at a landfill.

PROJECT STRUCTURE

The selected contractor will enter into a Guaranteed Maximum Price Contract for the construction of the Energy Recovery Project. Payment will be based on actual costs plus a fee for all craft labor, equipment, subcontracted work, and materials. Management and supervision duties will be paid for at an hourly rate.

Throughout the life of the Project, the selected contractor will participate in the Design-Assist process wherein all stakeholders will collaborate to adjust, modify, and finalize the design documents for the greater benefit of the Project. The contractor's participation in this process is inclusive of, but not limited to, the following:

- Constructability review of the Final Design Drawings and Specifications
- Value engineering to identify and quantify cost and time savings opportunities
- Risk review to identify and mitigate potential project disruptors
- Evaluation of alternatives generated by all project stakeholders
- Coordination with the PGWWTP Expansion Project
- Compliance with funding agency requirements including SRF, CEC, and Placer County APCD
- Development and refinement of the Project Schedule for use in evaluation of the items listed above

The primary goal of the Design-Assist process is to increase the value of the Project through positive stakeholder relationships, improved constructability, mitigation of project risks, and reduction of the cost and time needed for construction. Our team has participated in more than 100 projects of similar nature whereby the constructor has participated prior to final design. We have seen cost savings of up to 20% of project cost by using this early participation. For example, our early involvement in the design of the Stockton Regional Wastewater Control Facility Modifications Progressive Design-Build Project provided the opportunity to establish a hydraulic grade line through the plant that reduced pumping of the liquid stream from 6 times to 3 times.

LYLES' APPROACH

Our company was founded on the principle of open dialogue based on trust, honesty, and integrity. These values shape our approach to business with our Clients, the Community, our Subcontractors, and our Suppliers. We manage projects through a proactive approach to problem-solving and by tightly controlling construction costs. As a general rule; we always have a plan, know how much it's going to cost, and quickly recognize if we need to modify our course.

We recognize that a commitment must be made to building relationships between all project stakeholders so that effective communication can be utilized to overcome any community, engineering, or constructability challenges that may arise. Our team has thoroughly reviewed and visited the site to acquaint ourselves with the local conditions, nature, and location of where the work will be performed. We have taken into account and addressed the challenges that have the potential to derail the project. Our solutions are reflected in our baseline CPM schedule for the Project, which can be found in Appendix C.

The Right Experience

Lyles constructed a new thickening and dewatering building and odor control system to replace the existing sludge handling systems for the OCSD 100 MGD Plant 1. Working in an existing plant can be challenging, but working within one of the largest plants in the U.S. can be dangerous if not coordinated correctly. Lyles orchestrated dozens of tie-ins to existing facilities with plant staff to accommodate daily operations and project safety which included a very detailed LOCK OUT/TAG OUT program.

Monthly executive meetings and project team workshops were also held to discuss the challenges associated with the mechanical, electrical and plumbing conflicts that existed on the drawings. Lyles used a combination of AutoCAD and Navisworks to graphically represent each mechanical system and interference to determine a solution prior to installation. This effort at the front end of the project resulted in a very smooth field installation effort. This is the same level of collaboration the City of Roseville can expect when partnering with Lyles on the ERP.

KEY ELEMENTS OF OUR APPROACH

Attention to Safety – Lyles' focus on safety behavior and safety requirements has led to **ZERO OSHA violations** and over the last 5 years our worker's compensation claims, or Total Recordable Injury Rate (TRIR), has routinely fallen well below the industry average both statewide and on a national scale. Scott McElwain will serve as the Safety Director for the PGWWTP ERP. Scott will visit the site weekly and when any critical activities are planned to occur. He will work with our construction team to build safety into our means and methods while considering constructability requirements. Scott will also coordinate any safety special training that is needed on the project. As requested, please find additional information on our safety program in Section 7.

Attention to Quality– This is a key driver for controlling both schedule and cost. During pre-construction, proposed Quality Control Manager, Jon Shugarte will work with the City of Roseville and project team to identify critical quality elements, develop the Quality Management Plan (QMP), and lead sub/supplier quality implementation. During construction, Jon will implement and monitor the QMP, coordinate the inspection and testing program, provide QMP training to subcontractors and suppliers, and coordinate City quality assurance as required.

Community Interaction – Lyles will look for ways to strike the right balance; to effectively address local concerns while also managing expectations. Ensuring community involvement with the City of Roseville, keeping total neutrality, promoting transparency; and developing an effective monitoring, evaluation, and reporting system are some of the actions that Lyles has taken on previous projects. Many of our key personnel live and work within Roseville and the surrounding areas. As members of the community and as ratepayers, we are uniquely invested in ensuring the success of this project.

Experienced Senior Staff – Top-level, experienced, senior staff will be involved and committed to the success of the ERP. This will ensure the Project is never short of the required leadership and know-how that will be necessary to construct the most successful project possible. Proposed Project Manager, John Lunsford, will be the primary point-of-contact for the City. His responsibility will be to ensure the highest standards are maintained with respect to safety, budget, and schedule. Assistant Project Manager, Jon Shugarte, will make sure all activities in the field are properly coordinated, all materials and manpower are available when needed, and all work complies with the quality standards established for the Project.

Risk Management – A risk register will be created by the Lyles staff to identify and address high risk items right away. This risk register will be shared with the entire project team for input and buy -in. It is critical that all stakeholders are involved in the process and have input in the decision making.

Value Engineering

Value engineering sessions will be conducted to provide cost reduction and schedule suggestions for the City of Roseville consideration. At the OCSD Plant 1 project WML suggested over $8M of innovative cost saving ideas. The Owner took advantage of over $6M of the innovative cost savings. See detailed spreadsheet below.

LOCATION	DESCRIPTIO N	VE COST SUBMITTED	VE COST ACCEPTED
PVC Liner Under Structure	Elimination of PVC liner under structures	$ 300,000.00	$ 270,000.00
Xypex in Concrete	$400K assuming OCSD Keeps Xypex in Conc.	$ 400,000.00	
Exterior Waterproofing	Elimination of exterior waterproofing on concrete	$ 30,000.00	
Drilled Piers	Change to displacement piles	$ 2,900,000.00	$ 2,687,985.00
Accoustical Panels	In basement and subbasement ceiling	$ 200,000.00	
Paint on Basement Deck	In basement and subbasement ceiling	$ 46,000.00	$ 41,400.00
Polymer Station	Elimination of Polymer Station except for 1/3 used.	$ 500,000.00	$ 450,000.00
Screen Wall	Elimination of Piles and Precast Wall.	$ 740,000.00	$ 180,000.00
Braced Frame Structure	No cost savings	$ -	
Flow Meter Elimination	Elimination of Flowmeters and valves in basement	$ 80,000.00	
Progressive Cavity Pumps	Spec 11309 Changes to Moyno or Netzsch	$ 900,000.00	$ 773,100.00
Cake Pumps	Spec 11250 changes to Piston Pumps	$ 1,600,000.00	$ 1,574,874.00
Elimination of DAFT UF to Wetwell	Elimination of pipe, manhole and vault	$ 82,000.00	
Elimination of Subbasement	Raises subbasement to elevation 4.5	$ 400,000.00	$ 361,178.00
	tals	$ 8,178,000.00	$ 6,338,537.00

Planning and Sequencing – Our team will proactively manage the entire schedule, with a sharp focus on the critical path. Our goal is to maximize efficiency which will result in an overall lower project cost. Our project team, led by experienced CPM Scheduler, Tony Mueller have taken into account and addressed the challenges that have the potential to derail the ERP. Our solutions are reflected in our baseline CPM schedule for the Project, which as requested can be found in Appendix C.

Tight Project Controls and Accounting – We utilize industry leading cost controls and accounting systems on all of our projects. Our experience in doing this as a standard will ensure that timely, accurate, and transparent cost information is available in a format that all project stakeholders can utilize. See Section 7, for further details on how Lyles will provide the City with personalized access to its accounting system.

Self-Performance – Lyles plans to self-perform over 65% of all work on the ERP. This will benefit the City of Roseville, by reducing projects risks associated with schedule, quality, safety and cost. This will enable us to achieve the target project milestones defined in the RFP. Our ability to self-perform the majority of the scope will provide the City with a proven team that has worked together to deliver similar projects, job after job, and will perform at the highest level possible.

Engage a Team of Proven, Qualified Subcontractors – We select subcontractors that have the qualifications and proven track record to be part of our team. Accountability and ownership are key attributes that we look for.

Because of the critical nature of the electrical and instrumentation scopes of work, those have been assigned to Wade Johnson with San Joaquin Electric (SJE) and Tesco Controls, respectively. The ERP will benefit from our proven partnership and their contributions to both the design and construction of the ERP.

The Right Experience

Lyles' work on the $92M Design-Bid-Build of a 22 MGD Water Recycling Treatment Plant for the City of Visalia included an odor control system for the existing headworks; modification of the existing primary sedimentations basins, a new septage receiving station, a new pump station with fine screens, modifications to the existing aeration system, replacement of the existing secondary and tertiary treatment process with a new GE supplied membrane bioreactor (MBR) system, and an Ozonia supplied ultra-violet (UV) disinfection system.

Lyles worked in partnership with the City of Visalia to overcome project challenges, maintain maximum access, and complete start-up and commissioning services well within the scheduled project completion date. Lyles and the City of Visalia worked closely during construction to provide seamless mechanical operational transfers and process tie-ins so that there were no impacts to the plant or their customers.

ACHIEVING THE CITY'S GOALS

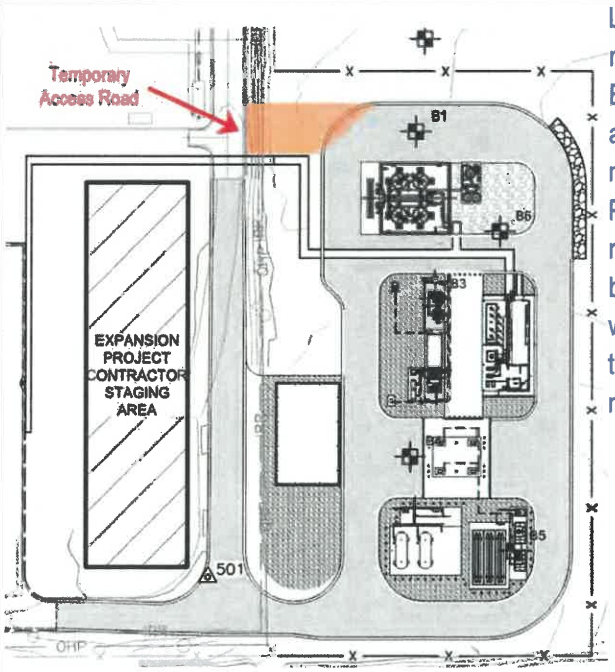
BUDGET

Careful attention has been paid to the details of the ERP and an accurate GMP price has been developed. Utilizing an accurate budget in combination with timely cost reporting will ensure that we identify budgetary opportunities or issues while there is still time to address them. We are proactive with our budget management, not reactive. We employ an open-book approach and provide reporting tools that will give the City complete confidence that budgetary goals are being met and surprises avoided.

SCHEDULE

A detailed CPM schedule has been developed for this Project (Appendix C) which highlights the importance we place on achieving the milestones outlined in the RFP. We have analyzed and compared the project budget against the schedule to further verify that we are in alignment. ***We have a proven history of maintaining project schedule on very difficult and time sensitive projects and, in fact, have never been assessed liquidated damages for exceeding a project deadline.***

STAKEHOLDER NEEDS



Along with maintaining the budget and schedule, the Project must serve the needs of all stakeholders; including the surrounding community. This is achieved by actively planning to minimize community concerns such as sound, traffic, dust, odors, and visual disturbances. At all times, it will be critical that the project site is maintained in a clean and organized fashion. In addition to the productivity and quality benefits, this will ensure that the City and the neighboring community experience a professionally managed project.

OVERCOMING CHALLENGES

Lyles is committed to identifying challenges and developing the most advantageous solutions for the City of Roseville from the very beginning of the project. To give some structure to a discussion of key challenges that we believe will require special consideration, we have developed the list below. Our strategies for mitigating these challenges have been provided as well.

Challenge 1: Startup, Commissioning, and Performance Testing of the Biogas Upgrading System (BUS) and the Cogeneration System	
Impact:	Section 01 12 16, Paragraph 4.02.G indicates that digester gas will be provided by the Expansion Project within 750 days of NTP. Substantial Completion of all work is required within 790 days of NTP. In order to achieve the Substantial Completion Milestone, commissioning and performance testing of the BUS and the Cogeneration System will have to be successfully completed within 40 calendar days. Based on the testing durations required in Sections 01 91 14 and 43 32 77, 40 calendar days may not be adequate. There is reasonable uncertainty regarding both the quantity and quality of biogas that will be generated by the new Digesters as they will introduce a biological process that does not currently exist at the PGWWTP. This uncertainty, coupled with the inherent complexity of the systems in question, makes it unlikely that the commissioning process will be fully completed within the 40 calendar days allowed. The potential for liquidated damages further complicates the issue.
Mitigation Measure:	It will be necessary to develop a comprehensive solution to ensure that expectations and challenges are well communicated and understood by all stakeholders. To that effort, Lyles will: • Participate early on in joint discussions with the City, the Engineer, and the BUS Supplier to identify potential barriers to success • Participate in the early development of a contingency plan that identifies possible solutions in the event that unforeseen circumstances occur • Prioritize development and submission of the BUS submittals and participate in submittal review meetings to achieve early release to fabrication • Require early and frequent communication between the BUS Supplier, San Joaquin Electric, and TESCO to ensure that all potential electrical and instrumentation items are well coordinated

Challenge 1 Continued...
Additional actions that the City might consider taking include: • Performing tests on the biogas produced at the Dry Creek Facility once the High Strength Waste Receiving Station is in steady-state operation to better characterize the likely raw gas conditions • Consider alternatives to the requirement to test the BUS system at maximum flowrates in the event that sufficient gas in unavailable • Consider an alternative milestone specific to the BUS and Cogeneration System that would allow for Substantial Completion to be attained prior to the completion of testing • Expedite construction of the expansion to allow for the delivery of biogas at an earlier date

Challenge 2: Site Logistics and Access	
Impact:	The ERP site is relatively small and will need to be accessed by numerous trades during construction. In addition, the Expansion Project Contractor will be occupying the available space just north of the ERP site which will increase traffic in the area. By design, access to the ERP site is limited to a single roadway at the northwest corner of the site. The congestion in this area will be further compounded once the CNG Fueling Station is being utilized by City vehicles. Congestion and traffic may lead to coordination issues, inefficiency, and lost production.
Mitigation Measure:	 Lyles will construct a temporary access roadway at the northeast corner of the ERP site to provide for two points of access and egress. Doing so will also reduce traffic near the Expansion Project Contractor's staging area. The road will consist of aggregate road base over imported fill material which will be removed and incorporated into the surrounding areas to be graded near the end of construction.

SECTION 2

APPROACH TO THE PROJECTS SCOPE OF WORK/SPECIAL PROJECT CONSIDERATIONS

APPROACH TO THE PROJECT'S SCOPE OF WORK / SPECIAL PROJECT CONSIDERATIONS

Our project approach began with developing an understanding of the project drivers, followed by identifying the greatest challenges and their potential solutions. We look forward to collaborating with the City of Roseville to combine these individual project elements into an overall scope of work and proposed plan to meet the City of Roseville's needs.

To outline our approach, we have broken the project into the following major components:

- Design-Assistance
- Pre-Planning & Site Logistics
- Site Preparation & Earthwork
- Underground Utilities
- Structural Concrete
- Electrical Building
- Site Concrete & Paving
- Electrical Panels & Controls
- Compressed Natural Gas Fueling Station
- High Strength Waste Receiving Station
- Cogeneration System
- Biogas Upgrading System
- Project Closeout

Our outlined approach is as follows:

TASK ONE: DESIGN-ASSISTANCE
TIMELINE: NTP THROUGH DAY 90 / DECEMBER 2019 THROUGH FEBRUARY 2020

Sub-task 1: Value Engineering

One of the benefits of the Design-Assist process is the intentional commitment of time to the development of value engineering ideas throughout the life of the project. In support of this process, we have already identified several potential opportunities which we believe will enhance the value and reduce the risks inherent in the ERP. These opportunities include revising the layout of some of the proposed equipment, leveraging existing plant assets to reduce life-cycle costs, and combining the ERP with the Expansion Project to take advantage of economies of scale. Please see Section 3 for a more detailed discussion.

Sub-task 2: Constructability Review

Lyles and its subcontractors are in a position to share the lessons-learned through the execution of hundreds of construction projects with the entire project team. This insight will be furnished to the benefit of the Project and will provide City

CITY OF ROSEVILLE CALIFORNIA + W.M. LYLES CO. CONTRACTOR Since 1945 *Progress Through Performance®*

A Committed and Integrated Team

Monthly Executive Meetings

We suggest holding monthly executive meetings where respective principals from the City of Roseville and Lyles can openly discuss the performance of their respective teams. This approach has worked well on other projects and has resulted in maximum collaboration, proactive problem solving of issues before they become project complications, organizational alignment, and "common goal" project execution.

stakeholders with an opportunity to evaluate construction methods and techniques that may not have been considered. Lyles also has real-time access to current material pricing and will be able to provide alternative options for aggregates, pipe materials, structural materials, and other commodities than can meet or exceed the project requirements at a lower overall cost. We expect this entire process to be collaborative, transparent, and focused on delivering added value to the ERP.

Sub-task 3: Contractor Furnished Design Elements

The Specifications require the Contractor to furnish a number of design elements which include, but are not limited to: piping supports, conduit supports, anchorage for electrical equipment, anchorage for process equipment, tanks, and storage vessels. Many of these elements have the potential to affect the final Construction Plans and Specifications. For example, preferential pipe routing identified during value engineering and constructability review would influence the number, size, and type of pipe supports required. Our goal will be to identify these elements early so that they are incorporated into the Plans and Specs at this stage, rather than having to update the drawings later through the submittal and record drawing processes. These actions will reduce the potential for construction errors and reduce the amount of effort required by the Engineer and the City.

History of Successful Partnering

The City of Roseville can trust that our Team will be proactive. With decades of experience working together on similar WWTP expansion and upgrade projects, the winning combination of W. M. Lyles Co., Wade Johnson and TESCO will provide the City with a collaborative, respectful, and trustworthy Design-Assist partner. A few of the projects we have collaborated on include:

City of Galt, Wastewater Treatment Plant Tertiary Filtration, UV Disinfection & Biosolids Improvements

CONTRACT VALUE: $11,828,000
% OF SELF-PERFORMANCE: 68 %
PROJECT RELEVANCE:
1. Numerous shut-downs & tie-ins to existing facilities
2. Included State Revolving Funds
3. Plant remained fully operational during construction
4. Biosolids Dewatering /Transfer Facilities

City of Davis, Wastewater Treatment Plant Secondary Treatment and Tertiary Improvements

CONTRACT VALUE: $72,202,131
% OF SELF-PERFORMANCE: 67 %
PROJECT RELEVANCE:
1. Numerous shut-downs & tie-ins to existing facilities
2. Included State Revolving Funds
3. Plant remained fully operational during construction

Hi-Desert Water District, Wastewater Reclamation Facility
CONTRACT VALUE: $30,003,509
% OF SELF-PERFORMANCE: 70 %
PROJECT RELEVANCE:
1. Numerous shut-downs & tie-ins to existing facilities
2. Included State Revolving Funds
3. Plant remained fully operational during construction

Water, Wastewater and Reuse Program, Tesoro Viejo Master Mutual Water Company
CONTRACT VALUE: $38,000,000
% OF SELF-PERFORMANCE: 69 %
PROJECT RELEVANCE:
1. Complex WWTP with extensive value engineering
2. Expansion

Task 1 Key Participants:

- Joe Lawrence – Project Sponsor – Value engineering, constructability review, and resource allocation
- John Lunsford – Sr. PM – Value engineering, constructability review, and subcontractor procurement
- Reece Berger – Pre-Plan Mgr. – Design- assist estimating support
- Pat Van Treeck – Pre-Plan Eng. – Design-assist estimating support
- Electrician – Value engineering and constructability review
- Integrator – Value engineering and constructability review

Task 1 Critical Components:

- Partnering and team building
- Implementation of value enhancing concepts and ideas
- Finalization of Construction Plans and Specifications

TASK 2: PRE-PLANNING & SITE LOGISTICS TIMELINE: DAY 45 THROUGH DAY 120 / JANUARY 2020 THROUGH MARCH 2020

Sub-task 1: Critical Path Management

Identification and management of the critical path is the first step in maintaining and expediting a project schedule (step two is managing risks and step three is managing near-critical activities). The critical path of the ERP flows through the early submittals, implementation of the SWPPP Plan, and into site preparation. It then continues through earthwork, the installation of underground utilities, and structural concrete. This is followed by construction of the electrical building, the installation of equipment, and finally, commissioning and testing of the facility.

Schedule risks exist that will need to be carefully monitored and mitigated throughout the life of the project. One such risk is the achievement of Milestone 4 – Roadway Connection. Based on the procurement schedule provided in the RFBP, we anticipate that a Notice to Proceed will be issued in December of 2019. Looking forward 420 days from December, the required completion date for Milestone 4 will occur in February of 2021. There are several challenges involved with paving during the winter months which means that the roadway work will need to be prioritized and performed in the fall in order to ensure that the quality of the paving remains high (See Task 3 for further discussion).

Sub-task 2: Procurement of Long Lead Items

Through coordination with our subcontractors and suppliers, we have identified all of the long-lead items and incorporated their procurement into the overall project schedule. Based on this effort, the CNG Fueling System, the Cogeneration System, and the Biogas Upgrading System submittals will need to be prioritized and expedited. To assist with the review and approval process, we will require our subcontractors and suppliers to participate in joint submittal review meetings which should include the City and the Engineer. The purpose of these meetings is to address any concerns and facilitate approvals to ensure that a release to fabrication can be provided upon completion of the first submittal review cycle. Mitigating the need for multiple review cycles will save the project both time and money.

Sub-task 3: Site Logistics

The site is not spacious and is congested. We have a well thought out site layout and staging plan which will be further developed and implemented. This will contribute to safe and efficient project performance. As discussed in Section 1, one of the actions we will take to improve logistics is to construct a temporary access road at the northeast corner of the site. Another action that we will take will be to carefully schedule "just-in-time" delivery of the major process equipment. By limiting the number of pieces that are onsite at any one time we will prevent double handling of the equipment and free up space for construction, as much of the process equipment is large, heavy, and will require a crane for installation.

Task 2 Key Participants:

- John Lunsford – PM – Overall project planning and coordination, and critical early submittal management
- Jon Shugarte – Asst. PM – QC plan development and SWPPP development
- Tony Mueller – Scheduler – CPM schedule
- development and refinement
- Reece Berger – Pre-Plan Mgr. – Civil and structural procurement
- Pat Van Treeck – Pre-Plan Eng. – Mechanical procurement
- Electrician – Electrical sequencing and schedule input

Task 2 Critical Components:

- Finalization of the CPM Schedule
- Procurement of major process equipment
- Development of an effective plan for site access, organization, and staging
- Partnering and team building
- Implementation of value enhancing concepts and ideas
- Finalization of Construction Plans and Specifications

TASK 3: SITE PREPARATION & EARTHWORK TIMELINE: DAY 120 THROUGH DAY 150 / APRIL 2020

Sub-task 1: Stormwater Management

The rainy season typically begins to wane near the end of March. Once fair weather is on the horizon, site preparation efforts will begin. The site is a little over three acres in size and, as such, will require coverage under the State Water Resources Control Board Construction General Permit. Development of a Stormwater Pollution Prevention Plan (SWPPP) will be performed by a Qualified SWPPP Developer and will occur during Task 2; implementation of the SWPPP will occur at the onset of Task 3.

Prior to disturbing the existing soils, we will furnish and install the Best Management Practices (BMPs) identified in the SWPPP. These BMPs will remain in place for the duration of construction and will be monitored to ensure effectiveness and compliance with the SWPPP. Upon completion of the project, the construction BMPs will be removed and any permanent BMPs identified in the Plans will be installed.

Sub-task 2: Fencing & Access

The ERP site is located outside of the PGWWTP's current fence line. In order to ensure continuous security and containment of the facility, we will install the new fencing which will enclose the ERP site prior to removal of the existing fencing. Once the new fencing is in place, the old fence will be demolished and removed from the site. With the existing fencing out of the way, we will proceed with constructing temporary access roads at both the northwest and northeast corners of the site, as proposed in Section 1- Overcoming Challenges, to provide for safe construction access and egress.

Sub-task 3: Earthwork and Subgrade Preparation

Earthwork efforts can begin in earnest once both security and access have been established. Based on the Plans, the site will require more cut than fill, resulting in a surplus of soil. It is assumed that the surplus soils generated by the ERP can be made available and incorporated into the Expansion Project as it will have a need for fill material at the new Primary Clarifier area.

Task 3 Key Participants:

- John Lunsford – PM – Overall project planning and coordination
- Jon Shugarte – Asst. PM – Underground utility preplanning and QC plan implementation
- Electrician – Underground utility coordination
- Fencing Sub – Site fencing installation

Task 3 Critical Components:

- Establishment of site perimeter and subgrade
- Implementation of SWPPP and QC Plans
- Continued preplanning for utility trench, underground piping, and electrical

TASK 4: UNDERGROUND UTILITIES
TIMELINE: DAY 130 THROUGH DAY 245 / APRIL 2020 THROUGH AUGUST 2020

Sub-task 1: Sanitary Sewer Pumping Station

The deepest element of the ERP is the new Sanitary Sewer Pumping Station. Therefore, excavation of the Pumping Station wetwell and installation of the precast concrete elements will take first priority in this Task.

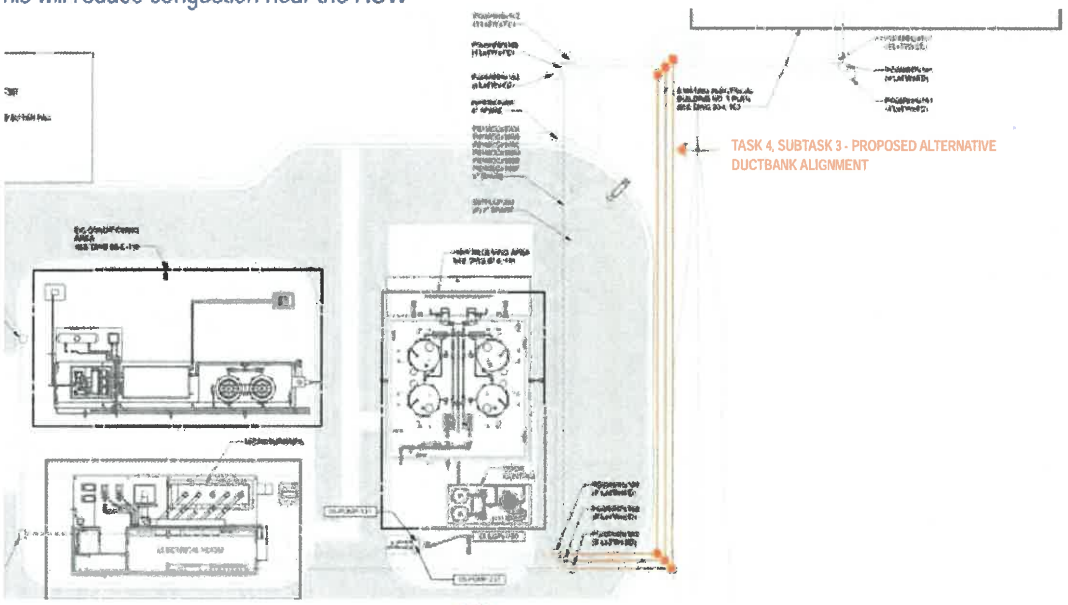
Sub-task 2: Buried Piping and Underslab Electrical

There are numerous buried piping and electrical elements which are to be located beneath concrete slabs and/or asphalt paving. These elements include natural gas piping, digester gas piping, water piping, sewer piping, drain piping, and electrical conduit. Substantial effort will be spent coordinating all of the critical connection points associated with each of the major equipment packages to ensure that no rework is required after the concrete slabs have been placed.

Sub-task 3: Electrical Ductbanks

Power and control for the ERP originates in Electrical Building No. 1. The new electrical ductbanks that will be installed between these two facilities are currently designed to be routed around the east side of the HSW Receiving Area. Lyles recommends shifting the alignment eastward to a location just outside of the paved area but still within the fence, in order to better facilitate the construction and long term maintenance of the new ductbanks. This will reduce congestion near the HSW Receiving Area and keep the new utility vaults clear of any future surface drainage issues without increasing the quantity or cost of the ductbank. An additional benefit to this alternative alignment is that it will support Cost Reduction Opportunity No. 2, should the City decide to incorporate it into the Project (see Section 3 for details).

Sub-task 4: Precast Utility Trench



Installation of the Precast Utility Trench is on the critical path of Milestone 4 (Roadway Connection). We anticipate that the fabrication and delivery of the Precast Utility Trench will take between 12 and 14 weeks. In order to meet the installation schedule necessary to comply with Milestone 4, it will be imperative that the submittal for the Utility Trench gets furnished, reviewed, and approved near the beginning of Task 2. Lyles will prioritize this process and work with the City and the Engineer as needed to ensure that this timeframe is met.

Task 4 Key Participants:

- Pat Van Treeck – Pre-Plan Eng. – Mechanical procurement and support
- Electrician – Ductbank installation

Task 4 Critical Components:

- Fabrication and delivery of the Precast Utility Trench to support timely installation

TASK 4, SUBTASK 3 - PROPOSED ALTERNATIVE DUCTBANK ALIGNMENT

TASK 5: STRUCTURAL CONCRETE
TIMELINE: DAY 195 THROUGH DAY 255 / JUNE 2020 THROUGH AUGUST 2020

Sub-task 1: Electrical Building Foundation

Concrete construction will commence as soon as the underground and underslab utilities are complete. The foundation for the Electrical Building will be prioritized to allow subsequent construction of the Building to begin as soon as possible. This priority is based on weather, not the critical path. If the building is not constructed, closed in, and made weatherproof during the summer and fall of 2020 then it will have to be completed during the winter months as the following spring will be consumed by the installation of electrical and mechanical equipment. Working in the winter significantly increases the risk of cost impacts and scheduling issues as the building trade subcontractors become affected by weather delays.

Sub-task 2: CNG Fueling System Foundations

The second highest priority will be given to the CNG Fueling System Area. Work will begin at the gas compressor slab, followed by the high pressure and medium pressure storage tank slabs. The final slab to be placed in this area will be the driveway around the CNG Fueling Dispensers.

Sub-task 3: All Other Foundations

The balance of the concrete will be completed moving from west to east, beginning with the Biogas Upgrading System Area and finishing up at the High Strength Waste Receiving Area. Work closest to the Electrical Building will be completed first to reduce construction congestion in the area and maximize access for our Masonry subcontractor.

Task 5 Key Participants:

- John Lunsford – PM – Structural concrete planning and coordination
- Reece Berger – Pre-Plan Mgr. – Structural procurement and support
- Rebar Sub – Reinforcing steel installation

Task 5 Critical Components:

- Completion of the Electrical Building foundation to permit building construction to begin as early as possible
- Equipment anchorage coordination, layout, and installation

TASK 6: ELECTRICAL BUILDING
TIMELINE: DAY 255 THROUGH DAY 405 / AUGUST 2020 THROUGH JANUARY 2020

Sub-task 1: Structural Elements

The first order of business at the Electrical Building will be to construct the CMU walls. The CMU will be installed by our Masonry Subcontractor with the coordination and installation of door openings, window openings, and miscellaneous wall penetrations being performed by Lyles' craftspeople. Lyles will also be responsible for locating and installing all of the structural embeds necessary to support the roofing system.

Sub-task 2: Roofing

Completion of the roofing structure and installation of the single-ply membrane will not occur until late fall, based on the schedule. Lyles will install all of the structural roof columns, beams, and metal decking while the insulation and roofing membrane itself will be installed by a specialty subcontractor. This work will be expedited to ensure that there is adequate time to complete the work prior to the beginning of the rainy season. The weather forecast will be monitored and, if necessary, overtime will be utilized to achieve success.

Sub-task 3: Architectural Elements

Installation of the architectural elements can begin once the Building has been closed in and the roof is complete. These elements include the decorative metal cladding, doors, windows, and restroom finishes, among others. With the building dry, temporary climate controls can be provided as necessary to complete this work, including painting, during the winter months.

Task 6 Key Participants:

- John Lunsford – PM – Structural planning and coordination
- Reece Berger – Pre-Plan Mgr. – Structural procurement and support
- Masonry Sub – CMU installation
- Roofing Sub – Roofing membrane installation

Task 6 Critical Components:

- Completion of building roofing and weatherproofing elements prior to the rainy season

TASK 7: SITE CONCRETE & PAVING
TIMELINE: DAY 300 THROUGH DAY 360 / SEPTEMBER 2020 THROUGH NOVEMBER 2020

Sub-task 1: Subgrade Preparation

Similar to the Electrical Building, completion of the site concrete and paving is being planned to accommodate the potential for adverse weather, not the Contract Milestones. Although Milestone 4 requires the Roadway Connection to be complete within 420 days, this duration will expire at the end of January which is typically unsuitable for paving operations. Accordingly, our plan is to complete all of the site concrete and paving work by early November.

Once the CMU wall construction is complete at the Electrical Building, subgrade preparation and final grading around the perimeter of the Building will commence. Careful coordination will need to occur in the vicinity of the Building, however, as access to the Building must be maintained in order to support the balance of the Building's construction.

Sub-task 2: Curbs, Gutters, and Paving

When preparation and grading of the site is complete, Lyles will begin work on the site concrete including the curbs and gutters. Depending on weather forecast and/or site coordination, this work may also need to be expedited. It is possible that weekend work may also be utilized to avoid congestion of the site. Paving operations will commence upon completion of all site concrete. All other work at the site will be paused during paving operations to allow this work to be completed in a single operation, without interruption, to ensure that a high quality product is provided.

Sub-task 3: Site Finishes

Final site finish work will be performed after the completion of site concrete and paving operations. This work will consist of slope finishing, rip-rap installation, and vegetation restoration. All final BMPs will be completed in advance of the rainy season ensuring that any potential for erosion is mitigated.

Task 7 Key Participants:

- John Lunsford – PM – Site finishes planning and coordination
- Paving Sub – Asphalt paving installation

Task 7 Critical Components:

- Completion of paving work in compliance with Milestone 4 - Roadway Connection
- Completion of all site work in preparation for the rainy season

TASK 8: COMPRESSED NATURAL GAS (CNG) FUELING STATION
TIMELINE: DAY 375 THROUGH DAY 480 / DECEMBER 2020 THROUGH MARCH 2021

Sub-task 1: System Installation

Installation of the CNG Fueling System will require a coordinated joint effort between our CNG System Subcontractor, San Joaquin Electric, and Lyles. Equipment installation will be performed by the CNG System Sub and the process and electrical connections will be performed by Lyles and San Joaquin, respectively. Special attention will be given to testing of the piping and pressure vessels by Lyles, as part of our routine Quality Control duties, to ensure that the System's integrity and safety are 100% intact prior to commissioning.

Sub-task 2: Startup & Commissioning

Startup and commissioning of the CNG Fueling System is currently scheduled to occur in the spring of 2021. The system will be commissioned on pipeline gas provided by PG&E as biogas will not yet be available from the Expansion Project. Compliance with Milestone 5 will have been achieved and the system will be available for beneficial use by the City when commissioning is complete.

Based on this schedule, the CNG Fueling Facility will be ready nearly 2 months in advance of its Contract Milestone, and 8 months in advance of the Project Completion End Date identified in the Placer County Air Pollution Control District - Carl Moyer Grant Agreement.

Task 8 Key Participants:

- Jon Shugarte – Asst. PM – CNG Fueling System planning and coordination, QC plan implementation
- Pat Van Treeck – Pre-Plan Eng. – Mechanical procurement and support
- CNG Fueling System Sub – Installation of fueling system
- Electrician – System connection to power and controls
- Integrator – Interface with system controls and communication
- City of Roseville – O&M Staff – Receive training and prepare for full-time operation

Task 8 Critical Task Components:

- Completion of equipment installation
- Testing of tanks and piping

TASK 9: ELECTRICAL AND CONTROL SYSTEMS TIMELINE: DAY 405 THROUGH DAY 465 / FEBRUARY 2021 THROUGH MARCH 2021

Sub-task 1: Equipment Installation

The installation of the motor control center, variable frequency drives, PLC panels, and local control panels will commence once the interior finishes within the Electrical Building are complete. All of the electrical equipment will be factory tested prior to installation to ensure proper operation in the field.

Sub-task 2: Exposed Conduit and Wire Installation

Installation of the exposed conduit and wire within the building will commence once the electrical equipment is set. Similarly, the exposed electrical components for the CNG Fueling System will be installed as the CNG equipment installation nears completion. These two areas will be prioritized to support early startup and commissioning of the CNG Fueling System as discussed in Task 8. The balance of the exposed electrical components will be installed in coordination with the installation of the HSW, Cogeneration, and BUS system equipment.

Sub-task 3: Electrical System Testing and Validation

Testing and validation (loop checking) of the electrical systems will occur in a staged fashion to support the sequential startup of the each of the process mechanical systems. The CNG Fueling Facility electrical system will be tested first as described above.

Sub-task 4: 12kV Switchgear Modifications

The modifications to the 12kV Switchgear (MVSA) located in Electrical Building No. 1 will require careful coordination with Roseville Electric and Plant Operations Staff. Power to the facility will need to be interrupted for up to 8-hours to allow the MVSA to be de-energized so that the required protective relay and breaker modifications can be performed safely. During this outage, critical operations will need to be powered by the PGWWTP's existing standby generators to ensure that the facility's discharge requirements are met at all times. Fortunately, we have great flexibility with respect to the scheduling of this work and will coordinate with Plant Staff to perform the modifications during a dry-weather, low-flow period.

Task 9 Key Participants:

- John Lunsford – PM – Overall project planning and coordination
- Electrician – Installation of motor control centers, panelboards, conduit, and wiring
- Integrator – Instrumentation and controls testing and validation

Task 9 Critical Components:

- Installation and testing of all wiring and controls necessary to support operation of the CNG Fueling System
- Completion of lighting, outlets, and misc. building support systems

TASK 10: HIGH STRENGTH WASTE (HSW) RECEIVING STATION TIMELINE: DAY 465 THROUGH DAY 525 /MARCH 2021 THROUGH MAY 2021

Sub-task 1: System Installation

Installation of the HSW Receiving Station will be preferentially scheduled to occur after the successful commissioning and turnover of the CNG Fueling System. Completion of this work does not fall on the critical path of the project and will be coordinated accordingly.

Sub-task 2: Startup & Commissioning

Startup and commissioning of the HSW Receiving Station will occur upon completion of the mechanical and electrical installation. Final testing of the system will be contingent upon the availability of feedstock from the City and confirmation that the new Digesters being constructed by the Expansion Project are ready to receive the waste.

Task 10 Key Participants:

- Jon Shugarte – Asst. PM – HSW Receiving Station planning and coordination, QC plan implementation
- Pat Van Treeck – Pre-Plan Eng. – Mechanical procurement and support
- Electrician – System connection to power and controls
- Integrator – Interface with system controls and communication
- City of Roseville – O&M Staff – Receive training and prepare for full-time operation

Task 10 Critical Components:

- Identification of a High Strength Waste feedstock source
- Operational readiness at the new Digesters

TASK 11: COGENERATION SYSTEM TIMELINE: DAY 525 THROUGH DAY 790 / MAY 2021 THROUGH JANUARY 2022

Sub-task 1: System Installation

The Cogeneration System consists of four microturbines for the production of electrical power, and a heat exchanging system for the recovery of heat produced by the microturbines. Installation of this system will be preferentially scheduled to just preceed the availability of biogas, which is not expected occur until late in the project. This will be done to limit congestion on the site as discussed in Task 2 and, more importantly, to eliminate any potential for a gap in warranty coverage that could result from taking early delivery of the equipment.

Sub-task 2: Startup & Checkout

Mechanical and electrical startup of the Cogeneration System will be coordinated to occur just prior to the completion of Milestone 6. The system manufacturer will inspect all components for proper installation prior to functional testing.

Sub-task 3: Performance Testing

Commissioning and performance testing of the Cogeneration System will be dependent upon the ability of the digesters to produce an adequate amount of quality fuel (biogas). The digesters are being constructed as part of the Expansion Project and, as such, the ERP Project will be reliant upon their performance. Please reference the discussion on "Commissioning Challenges and Opportunities" for more details regarding the coordination that will be required during this Task.

Task 11 Key Participants:

- Jon Shugarte – Asst. PM – Cogeneration System planning and coordination, QC plan implementation
- Pat Van Treeck – Pre-Plan Eng. – Mechanical procurement and support
- Electrician – System connection to power and controls
- Integrator – Interface with system controls and communication
- City of Roseville – O&M Staff – Receive training and prepare for full-time operation

Task 11 Critical Components:

- Manufacturer's certification of installation
- Performance testing coordination with biogas availability

TASK 12: BIOGAS UPGRADING SYSTEM (BUS) TIMELINE: DAY 615 THROUGH DAY 790 / AUGUST 2021 THROUGH JANUARY 2022

Sub-task 1: System Installation

Installation of the BUS will occur later in the project. It will be preferentially scheduled to align with the availability of biogas from the Expansion Project, like the Cogeneration System. Once the equipment has been set, the manufacturer will be engaged to furnish and supervise the installation of the specialized media that will serve to remove contaminants from the biogas.

Sub-task 2: Startup & Checkout

Mechanical and electrical startup of the BUS will be coordinated to occur concurrently with the Cogeneration System, just prior to the completion of Milestone 6. The system manufacturer will inspect all components for proper installation prior to functional testing.

Sub-task 3: Performance Testing

Commissioning and performance testing of the BUS will be highly dependent upon the availability and quality of the biogas produced by the Expansion Project. Lyles has coordinated the requirements found in the Specifications for both Projects with the CPM Schedule and would like to draw attention to the following:

- Milestone 6 dictates that the ERP must be ready to receive biogas within 700 days, but ERP Specification Section 01 12 16 indicates that it may take up to 750 days for the Expansion Project to deliver. No guarantees are made regarding the quantity or quality of gas to be provided.
- Milestone 7 (Substantial Completion) is set at 790 days for the ERP. This Milestone includes successful commissioning and performance testing of the BUS and Cogeneration System. Based on this, only 40 days are guaranteed to be available to accomplish this goal. This poses a significant risk to the Project.
- Expansion Project Specification Section 01 12 16 indicates that as part of that Project's Milestone E, "Digester gas (biogas) shall be generated by the new Anaerobic Digestion system and conveyed to the Energy Recovery Project". No requirements are stated regarding the quantity or quality of gas to be delivered.

Lyles' experience with the startup of new digesters is extensive. In our experience, achieving steady state operation of a digester typically takes several weeks, but can take longer depending on various conditions (proper heating, time of year, sludge quality and biology, etc.). If the biogas, in terms of both quantity and quality, made available at the 750 day mark is not capable of supporting the full range of performance tests required by the ERP Specifications, Milestones 7 and 8 (Substantial and Final Completion, respectively) of the ERP will likely be delayed.

Lyles' plan to mitigate this delay currently includes all of the measures identified in Section 1 – Overcoming Challenges. It also includes the significant application of overtime and weekend work as needed to complete commissioning and performance testing of the BUS and Cogeneration System within the time allowed. Lyles has identified several alternative approaches to this issue and looks forward to developing a collaborative solution with the City.

Task 12 Key Participants:

- Jon Shugarte – Asst. PM – BUS planning and coordination, QC plan implementation
- Pat Van Treeck – Pre-Plan Eng. – Mechanical procurement and support Electrician – System connection to power and controls
- Integrator – Interface with system controls and communication
- City of Roseville – O&M Staff – Receive training and prepare for full-time operation

Task 12 Critical Components:

- Startup and check-out of all equipment in preparation for the delivery of biogas from the Expansion Project
- Testing of biogas in advance of commissioning and performance testing
- Completion of requirements in compliance with Milestone 7 – Substantial Completion

TASK 13: PROJECT CLOSEOUT
TIMELINE: DAY 700 THROUGH DAY 820 / OCTOBER 2021 THROUGH FEBRUARY 2022

Sub-task 1: Project Record Documents

The record documents will be maintained throughout the life of the ERP. Lyles will review all of the documents to ensure that they are accurate, up to date, complete, and in compliance with the project requirements.

Sub-task 2: Demobilization

Our final Task will be to demobilize from the project. Our project office, storage containers, and temporary utilities will all be disassembled and removed from the site, restoring the area to its previous condition.

Task 13 Key Participants:

- John Lunsford – PM – Overall planning and coordination
- Jon Shugarte – Asst. PM – Record document preparation and coordination
- Electrican – Record document preparation
- Integrator – Record document preparation

Task 13 Critical Components:

- Completion of requirements in compliance with Milestone 8 – Final Completion

TURNING A CHALLENGE INTO AN OPPORTUNITY

THE CHALLENGE:

Lyles has developed a full CPM Schedule for both the ERP and Expansion Projects. These actions allowed us to identify all of the critical coordination points between the two Projects and to develop the following unique observations:

- The longest path through the ERP Project is through the installation of the BUS and Cogeneration System equipment in preparation for the receipt of biogas. The minimum amount of time required to complete this work is significantly less than the 700 days allowed. However, the ERP Contractor has no inherent motivation to expedite the work due to the unavailability of biogas.
- The longest path through the Expansion Project is through construction of the new Digesters and their supporting systems. The Expansion Project Contractor has no inherent motivation to expedite this work, because 1) the time allowed for this work is sufficient, 2) there is no incentive to do so.
- Given the opportunity, the ERP Contractor would expedite the early delivery of biogas in order to mitigate the risks identified in Task 12 of this Section. Unfortunately, there is no mechanism for accomplishing this. Both Contractors will naturally consume the allotted time, resulting in the longest possible overall schedule with the fewest number of days allowed for commissioning and performance testing. This will (unnecessarily) increase the ERP Contractors' performance risk.
- If the delivery of biogas is delayed, the ERP will need to be extended. Extending the ERP will increase the risk to the ERP Contractor and the City, and extend job overhead and supervision costs.

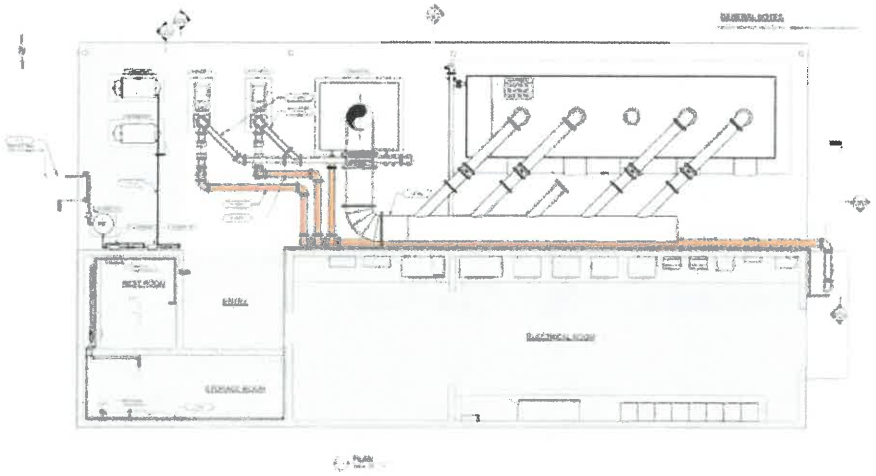
In summary: 1) the ERP Contractor has no ability to beneficially expedite the delivery of biogas, 2) the Expansion Project Contractor has no inherent motivation to provide it early, and 3) the City will take on additional risk if it attempts to either expedite the Expansion Project or extend the ERP.

THE OPPORTUNITY:

Lyles has developed numerous lessons-learned through the delivery of over 100 Alternative Delivery projects. One of the most important lessons is related to the allocation of risk. Ideally, project risks are always assigned to the party in the best position to mitigate them. This is not the case in the challenge identified above unless the City capitalizes on an opportunity to have both projects delivered by a single Contractor, which Lyles can provide. Should the City elect to award both the ERP and the Expansion Project to Lyles, all of the identified challenges will be resolved before they have an opportunity to create problems. Lyles will have both the motivation and the control necessary to optimize the schedule for both Projects, thereby reducing risk and delivering the best possible value to the City of Roseville.

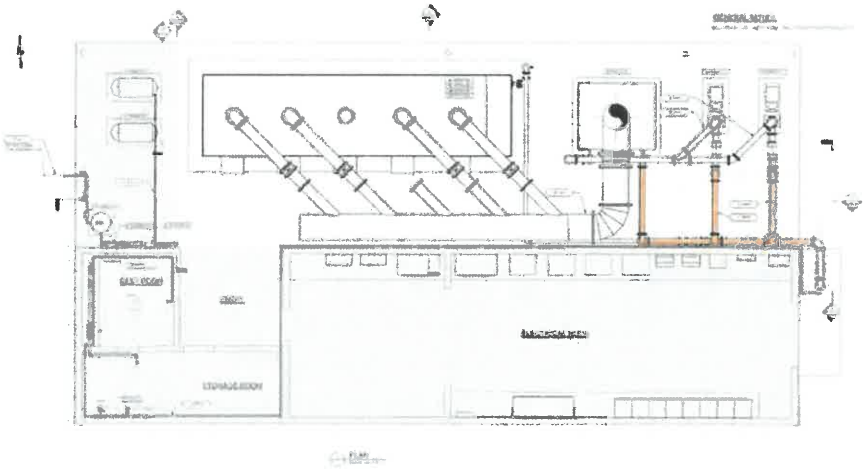
SECTION 3

PROJECT COST REDUCTION OPPORTUNITIES



PROJECT COST REDUCTION OPPORTUNITIES

After thorough review of the ERP scope of work, we have identified key items we believe will enhance the existing plan for the new facilities and provide cost savings opportunities during construction. Below is a sample of proposed project cost reduction opportunities.



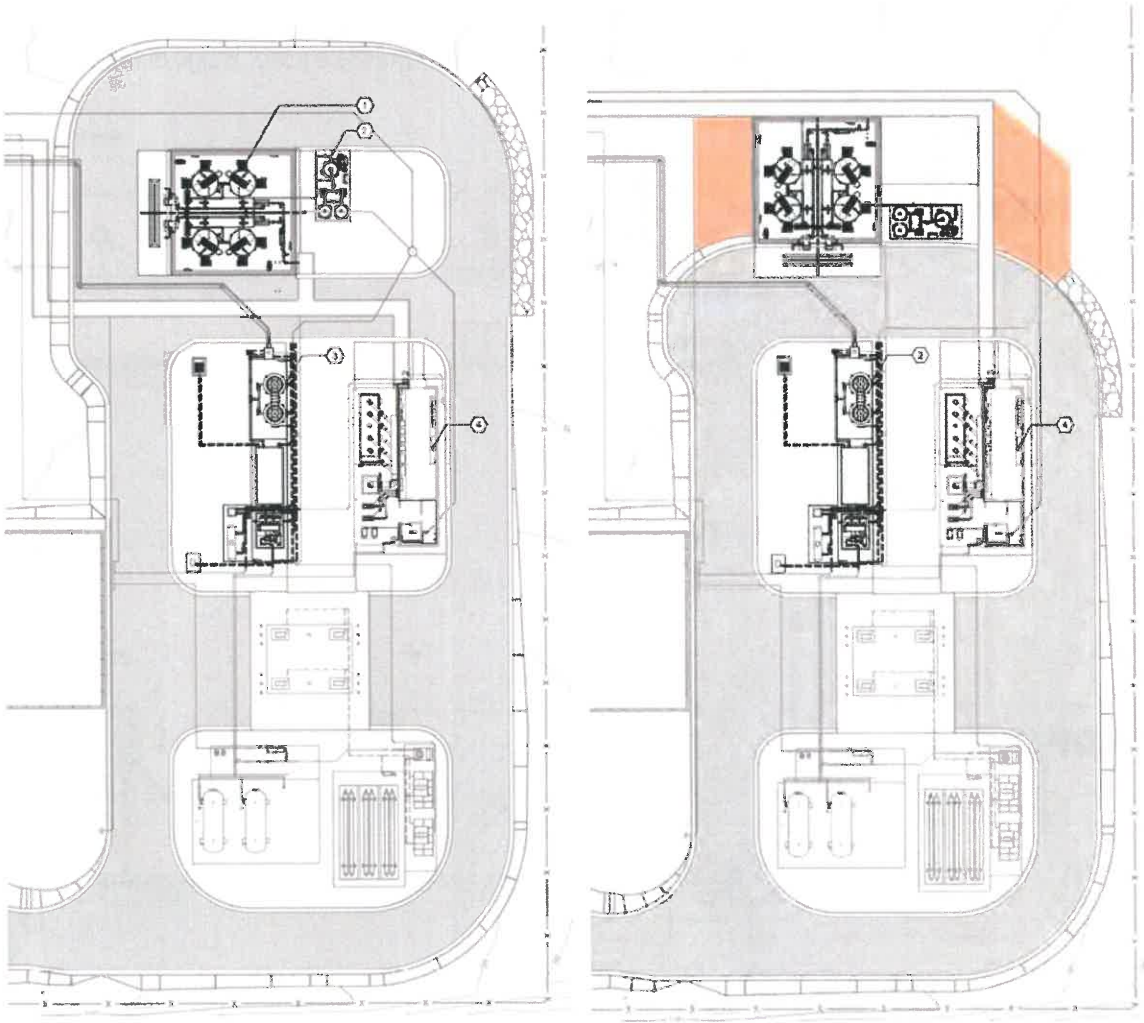
Opportunity No. 1: Optimize Cogeneration Equipment Layout

The current layout for the Cogeneration Area equipment from east to west is as follows: Microturbines, Exhaust Heat Exchanger, and then Hot Water Pumps. We suggest revising the layout to a mirror image of the current design in order to optimize pipe routing.

CURRENT

PROPOSED

Cost Reduction Ingredients: Approximately 100' less exposed HWR/HWS piping including insulation and supports



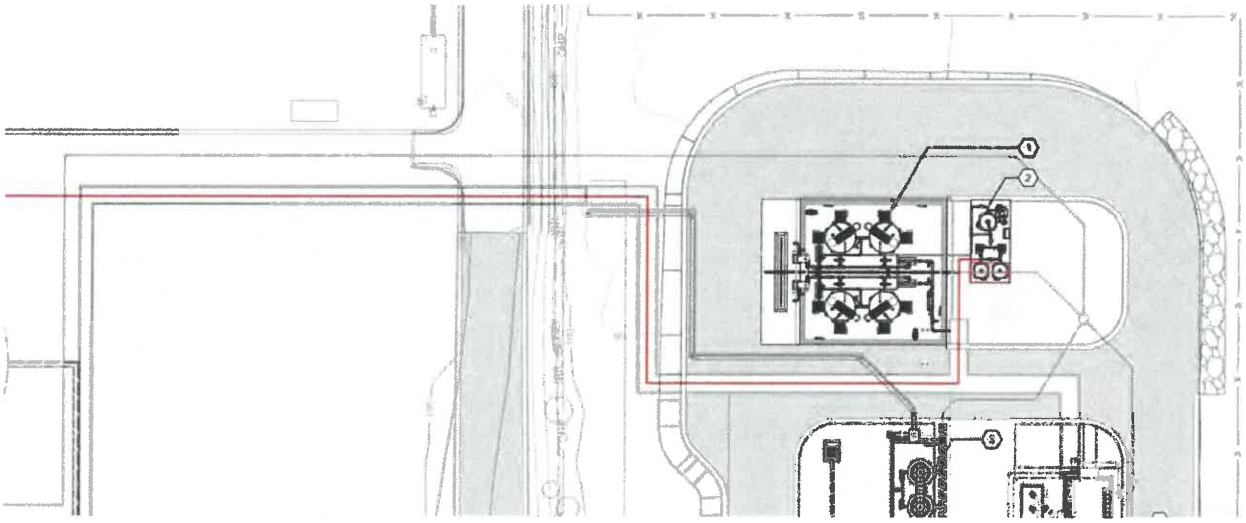
Additional Benefits: Reduced heat loss due to shorter piping runs

Opportunity No. 2: Optimize High Strength Waste Receiving Station Layout

The current layout for the High Strength Waste Receiving Station and related Odor Control Equipment includes paving on all four sides. We suggest revising the layout to include paved access on one side only with aggregate base roadway for maintenance access on two of the remaining three (3) sides.

CURRENT

PROPOSED



Cost Reduction Ingredients: Approximately 10,000 SF less paving

Additional Benefits:

- Reduced length of precast utility trench within the traffic zone
- Improved drainage within the paved area
- Fewer piping conflicts
- Improved construction schedule

Opportunity No. 3: Utilize Existing Biofilters In-Lieu of Carbon Vessels The Odor Control System being provided for the High Strength Waste Receiving Station includes one (1) BioTrickling Filter and two (2) Activated Carbon Odor Control Units. The media in the Activated Carbon Odor Control Units will require periodic replacement. We suggest routing the foul air from the outlet of the BioTrickling Filter, via the utility trench, to the existing Biofilters located south of the Dewatering Building.

Cost Reduction Ingredients:

- Replacement of the Activated Carbon Odor Control Units with PVC piping
- No periodic removal and replacement of media required

Additional Benefits:

- Fewer pieces of equipment to maintain

Opportunity No. 4: Combine the Energy Recovery and Expansion Projects The Energy Recovery Project and the Expansion Project will be constructed concurrently. We suggest the City consider the intrinsic value of having a single point of responsibility for both projects.

Cost Reduction Ingredients:

- Reduced job overhead costs through the avoidance of duplicate field offices, temporary utilities, etc.
- Reduced coordination effort for the Engineer, Construction Manager, and Plant Operations staff

Additional Benefits:

- Improved coordination between projects
- Reduced risk of delay and/or conflict between multiple contractors
- **Opportunity to mitigate start-up and commissioning risks identified in Section 2 'Commissioning Challenges and Opportunities'**

SECTION 4

PROJECT TEAM QUALIFICATIONS AND EXPERIENCE

PROJECT TEAM QUALIFICATIONS AND EXPERIENCE

CITY OF ROSEVILLE CALIFORNIA

STAN SIMMONS
Principal

JOE LAWRENCE
Project Sponsor

JOHN LUNSFORD
Senior Project Manager

SCOTT MCELWAIN
Safety Director

JON SHUGARTE
Assistant Project Manager/
Quality Control Manager

If Lyles were to receive award of both the ERP and the Expansion projects, we have the local manpower available to staff both projects as soon as the award is given.

Scheduling

TONY MUELLER
CPM Scheduler

Pre-Planning

REECE BERGER
Estimating/Scheduling

PAT VAN TREECK
Estimating/Scheduling

Subcontractors

SAN JOAQUIN ELECTRIC
Electrical and Instrumentation

TESCO CONTROLS
Control Systems Integrator

EFS WEST
CNG Fueling Station Subcontractor

CMC REBAR
Rebar Subcontractor

The organizational structure will effectively:

- Support the ERP during both phases with individuals having expertise in the complex planning and execution of construction work.
- Provide executive commitment to communication with the City to ensure all needed resources are provided to the team from Lyles' staff, craft and technical support divisions.

INCLUDED IN THE SIX (6) QUALIFYING PROJECTS IDENTIFIED IN OUR SOQ

STAN SIMMONS - Principal

Mr. Simmons has been involved with Alternative Delivery projects since 1981, including an integral role from the initial conceptual development stage through final construction of more than $1.5 Billion of Water and Wastewater Design-Build Projects, routinely serving as Pre-Construction Services Manager and Executive Sponsor for most of the 100 plus alternative delivery projects delivered at Lyles. This experience with similar projects will provide the City of Roseville with useful early cost and schedule certainty to ensure all information is provided in a timely manner to effectively make value based decisions.

AVAILABILITY: ON DEMAND AND WILL ATTEND MONTHLY EXECUTIVE MEETINGS

RELEVANT PROJECT EXPERIENCE

- City of Davis WWTP Secondary and Tertiary Improvements, DB, Executive Sponsor/Estimator, 2018, $71,558,825
- CR&R Anaerobic Digestion Facility, DB, 2017, Executive Sponsor/Chief Estimator, $33,000,000
- City of Fresno - SE Surface WTP, DBB, Executive Sponsor/Estimator, 2018, $162,089,360

JOE LAWRENCE - Project Sponsor

Joe has 17 years of industry experience in the construction of water and wastewater treatment facilities. During this time, he has overseen numerous Alternative Delivery construction projects with a total value in excess of $200 million. During pre-construction, Joe will channel his previous sponsorship experience to ensure that the project goals are achieved, commit resources to the project, and monitor team performance with the City of Roseville. During construction, he will serve as the first line of off-site management working with John to coordinate project resources and will meet with the City of Roseville on a scheduled basis to review status and performance. Joe will also lend his expertise to assist the team in identifying savings opportunities and avoiding constructability concerns.

AVAILABILITY: 25%

RELEVANT PROJECT EXPERIENCE

- City of Stockton Regional Wastewater Control Facilities Project , DB, Project Sponsor, In Progress +/- $190,000,000
- City of Davis WWTP Secondary and Tertiary Improvements, DB, Construction Manager/Project Sponsor, 2018, $71,558,825
- Linda County Water District – WWTP Upgrade & Expansion, DBB, Project Sponsor, 2012, $29,547,940

JOHN LUNSFORD - Senior Project Manager

John Lunsford has over 29 years of industry experience in the wastewater/water market. John's creative problem-solving capabilities combined with his extensive experience managing self-performed work will ensure that construction advances safely and efficiently. During pre-construction, John will serve as the primary point of contact with the City of Roseville, manage pre-construction services, lead the development of technical solutions and critical decisions. John will also track daily progress to ensure that both the cost report and the schedule have the most up-to-date information. During construction, John will serve as the on-site, primary point of contact with the City and have overall responsibility for team performance including safety, quality, cost, and schedule.

AVAILABILITY: 100%

- Linda County Water District – WWTP Upgrade & Expansion, Sr. Project Manager, 2012, $29,547,940

JON SHUGARTE - Asst. PM / QC Manager

Jon is a safety-minded PM and Quality Control Manager with 14 years experience in the construction industry and extensive experience in wastewater treatment expansion projects. Working in existing plants has provided Jon the ability to collaborate with owners and project teams and plan work to minimize impacts to operations. During pre-construction, Jon will participate in design support task groups, constructability and value engineering workshops, and work planning and packaging. During construction, Jon will maintain overall responsibility for project quality, of field-worker safety, subcontract coordination, and process equipment installation.

AVAILABILITY: 100%

- Fairfield Suisun Sewer District Secondary Treatment Expansion, DBB, Project Manager, 2009 $21,182,911

SCOTT MCELWAIN - Safety Director
Scott McElwain will serve as the Safety Manager for the PGWWTP ERP. He will be responsible for the planning and implementation of site safety during all field operations of the project. Scott or a Lyles Safety Technician will visit the PGWWTP site weekly and when any critical activities are planned to occur. He will work with our construction team to build safety into our means and methods while considering constructability requirements. Scott is the Lyles Corporate Safety Director and has been involved in construction safety for almost 20 years, with ten of those years at Lyles. Under his leadership, the Lyles Construction Group has received numerous safety awards from various industry groups, and Scott will ensure that this project meets those award winning standards.

AVAILABILITY: 20%

INDUSTRY RECOGNITION

- Fresno Builders Exchange, 2006 Safety Leadership Award
- Cal OSHA Golden Gate Recognition, Calgren Pixley Ethanol Project, November 2007
- Cal OSHA Golden Gate Recognition, City of Tulare IWWTP Project, February 2009

TONY MUELLER - CPM Scheduler
Tony's involvement in the ERP will be in identifying major decision points that have the largest potential to impact the overall project cost and schedule. Over his 16 years of construction experience, he has developed the schedule for nearly every project he has been involved with. Tony will work closely with the City of Roseville and the Project Team to ensure that critical path activities are well identified so that they receive the focus that they deserve. He will also be responsible for updating the schedule to reflect the actual work performed, preparing monthly reports and narratives for distribution, and assisting with critical path analysis so that all parties understand the implications of schedule revisions and/or change order work.

- Moreno Valley RWRF Preliminary Treatment and Acid Phase Anerobic Digestion, Estimator, 2012, $30,925,375

PAT VAN TREECK - Pre-plan Engineer (Mechanical & Equipment)
Pat will participate in constructability reviews; develop work plans, sequencing, and resources; and provide input for cost and schedule. As the Estimator on the WWTP Secondary and Tertiary Improvements Project for the City of Davis, Pat was responsible for preparing the GMP estimate for all piping and mechanical equipment based on a 60% design package. Pat's extensive knowledge and understanding of treatment plant processes and construction enabled a complete and accurate estimate from the 60% conceptual design. During construction, Pat worked closely with the Design team and Client to value engineer the piping systems, which resulted in significant project cost savings. This knowledge and experience will assist the City of Roseville in delivering a high-quality project that is on schedule and within budget.

WADE JOHNSON - Principal
San Joaquin Electric

His 30 years of experience in the industry has given him many insights into the electrical construction field. His experience in managing complex installations is second-to-none and includes: water and wastewater treatment plants, industrial projects, commercial buildings, food processing plants, agricultural installations, automation, PLC control systems, SCADA systems, process instrumentation, pneumatics, petro-chemical facilities, refineries, industrial lighting systems, lighting controls, fiber optics, and security systems. On this project, Wade will take the lead in identifying electrical challenges and opportunities during the design-phase, and ensuring that Fred Lozo, his project manager, has the resources needed to meet the City of Roseville's expectations during the construction phase.

AVAILABILITY: 50%

JOSH OAKS - Project Manager
TESCO

With over 20 years of experience in automation systems, Mr. Oaks is an accomplished automation professional who possesses the skills, tact, and experience to lead a project to successful completion. His direct experience in system installation enables him to relate with field implementation teams on project needs, allowing him to efficiently navigate the needs of a project and its deliverables in the most proficient manner. He communicates and coordinates resources while managing contractual obligations and project schedules.

AVAILABILITY: 50%

RELEVANT PROJECT EXPERIENCE

- City of Roseville – SCADA System Replacement Project, Project Manager - experience with the City's automation, SCADA, and PLC standards.
- San Francisco Public Utilities Commission (SFPUC), WW-613 Southeast WPCP SEP 521/522 & Disinfection Upgrades - Project Manager
- San Jose -Santa Clara Regional Wastewater Authority Digesters and Thickener Facilities Upgrade Project - Project Manager

San Joaquin Electric

Wade Johnson has successfully completed three large Design-Assist projects for the city of Roseville along with many hard bid jobs. His extensive knowledge of the City`s electrical and instrumentation specifications and standards make him a valuable asset to the ERP. Wade has 15 years of experience coordinating with the City`s I&C department and Roseville Electric with great success. Wade and his project management team are proactive in discovering potential problems long before they become significant issues and can provide timely and cost effective solutions that prevent schedule delays.

San Joaquin Electric (SJE) has been a leader in the commercial electric contracting market since 1980. They have specific expertise in PLC control systems, SCADA systems, process instrumentation, pneumatics, lighting controls, fiber optics, and security systems, all of which are applicable to the ERP. Overall, SJE and its leadership set an example of dedication, diligence, and fine workmanship that makes them successful industry professionals.

Tesco Controls Inc.

TESCO has a longstanding relationship with the City of Roseville and has successfully completed numerous projects for the City since 2003. Over the last 15+ years, TESCO has provided the City with control system planning, design, equipment builds, and implementation; including the design, manufacture, assembly, and integration of Industrial Control Panels, Motor Control Centers, and switchgear. These services have been provided by TESCO for all of the City's treatment plants, including Barton Water Treatment Plant, Dry Creek Wastewater Treatment Plant, and Pleasant Grove Wastewater Treatment Plant.

Most recently, TESCO completed a multi-million-dollar design-assist project for the City that involved all of the City's treatment plants. TESCO worked collaboratively with Roseville Environmental Utilities Department (EUD) to bring this project to successful completion. Additionally, TESCO assisted the City in developing their automation standards, including hardware assets such as Motor Control Centers, pump controls, and automation systems. TESCO's history of working collaboratively with the City coupled with their intimate knowledge of the City's system integration requirements makes TESCO the ideal system integrator for this project.

CMC REBAR - Rebar Subcontractor

For over 60 years, CMC Rebar has fabricated, furnished, and installed rebar and accessories for all construction markets. They operate state-of-the-art fabrication facilities in over 90 locations throughout the U.S. With almost 2.5 million tons of fabricating capacity, they have the national presence and capacity to serve all of our rebar needs with the same consistent level of customer service, no matter where the project is located.

CMC Rebar has provided reinforcing steel to many of America's largest landmark construction projects. At each of their facilities, CMC has the estimating, detailing and fabricating experience to manage any project, no matter what the size or schedule demands may be. For the Pleasant Grove Wastewater Treatment Plant Energy Recovery Project, this means that Lyles will have a proven performance partner with the experience that is required in today's demanding construction environment.

EFS WEST - CNG Fueling Station Subcontractor

EFS West is a design-build construction firm specializing in the construction of CNG, LNG, and conventional fuel facilities for commercial and government customers. These customers include Federal and State governments, municipalities, transit agencies, trucking firms, waste haulers, retail gasoline, ports and airports. They combine their design expertise with field construction capabilities to provide comprehensive, turnkey services for design-build fuel system projects. In business since 1993, EFS West is headquartered in Santa Clarita, California. Their management and construction staff includes over 50 construction professionals with experience in all aspects of alternative and conventional fuel system planning, design, permitting, and construction. They can field multiple construction crews capable of ground-up fuel system construction. This capacity allows them to meet the requirement of many of their customers for work at multiple sites concurrently. Their long and successful history is due to very simple concepts: Provide quality work, meet deadlines, and perpetuate their business through satisfied customers. With extensive experience in fuel system projects combined with the long list of repeat business advocates, EFS West was an easy choice to partner with for this project.

ATTACHMENT 1

PROPOSER'S CERTIFICATION OF PROJECT MANAGER EXPERIENCE
PLEASANT GROVE WASTEWATER TREATMENT PLANT ERP
To be submitted with Sealed Bid Proposal

The Proposer shall name below their chosen Project Manager who will be assigned to this Project and will be personally present on-site full-time during construction. This named Project Manager must have completed three (3) water and/or wastewater projects since January 1, 2009. One of the listed water and/or wastewater projects must have a contract amount greater than or equal to $20 million. The Project Manager's demonstrated project experience must be on one or more of the following types of projects:

a. Industrial and/or Municipal Water Treatment Plants where the earthwork, structural concrete, mechanical, electrical, and instrumentation systems were part of the Contractor's contract; or

b. Industrial and/or Municipal Wastewater Treatment Plants where the earthwork, structural concrete, mechanical, electrical, and instrumentation systems were part of the Contractor's contract.

Any projects listed below, which are not as defined above, will not be considered by the City in meeting this pre-requisite experience requirement. For example, pipeline projects, and/or pump station projects are not considered an equivalent project.

An industrial and/or municipal water or wastewater treatment plant project is defined as a project that was engineered and constructed for an industrial or municipally owned and operated facility which is designed to remove contaminants, specific constituents, and/or particulates in water and/or wastewater as required by a State issued discharge permit.

Name of Project Manager: John Lunsford

Number of Years of Total Construction experience as a Project Manager assigned to the types of projects as defined above: 29 years

Number of Years as a Project Manager for your Company: 29 years

List three (3) completed water and/or wastewater treatment plant projects as defined above where the individual named above held the position of Project Manager. One of the projects must have a contract value greater than or equal to $20 million.

Project #1 Name: Wastewater Treatment Plant Secondary and Tertiary Improvements Project

Owner: City of Davis

Construction Cost: $ 32,619,341

Construction Time: 1,493 calendar days

Owner's Representative: Diana Jensen

Owner's Representative Telephone No.: (530) 757-5686

Engineer or On-Site Construction Mgr.: AECOM

Engineer or On-Site CM's Telephone No.: Scott Thibault (978) 905-3217

Date of Substantial Completion (must be on or before Jan. 1, 2009): September 28, 2018

Duration of Project (in months) 49

Project #2 Name: Primary Treatment Renovations

Owner: Central Contra Costa Sanitary District

Construction Cost: $ 11,441,946

Construction Time: 1,229 calendar days

Owner's Representative: Craig Mizutani

Owner's Representative Telephone No.: (925) 229-7361

Engineer or On-Site Construction Mgr.: Central Contra Costa Sanitary District

Engineer or On-Site CM's Telephone No.: Nathan Morales (925) 229-7125

Date of Substantial Completion (must be on or before Jan. 1, 2009): January 22, 2016

Duration of Project (in months) 41

Project #3 Name: Linda County Wastewater Treatment Plant Upgrade

Owner: Linda County Water District

Construction Cost: $ 29,547,940

Construction Time: 335 calendar days

Owner's Representative: Brian Davis

Owner's Representative Telephone No.: (530) 743-2043

Engineer or On-Site Construction Mgr.: Kennedy Jenks Engineering

Engineer or On-Site CM's Telephone No.: Don Barraza (916) 858-2700

Date of Substantial Completion(must be on or before Jan. 1, 2009) : May 23, 2012

Duration of Project (in months) 12

This form shall be fully completed and submitted by the Proposer with the Technical Proposal (Part 1). Proposer is not allowed to provide a substitute form of similar information.

The City may check project references listed above to verify the Project Manager's project experience information provided. The City may also discuss the Project Manager's performance with project references provided above.

It is very important that the Proposer verify that all contact information is current for each name listed above. Failure of the Proposer to provide current and valid project contact information and/or all information required by this certification may be grounds for the City to determine the Proposer to be non-responsive and/or non-responsible and therefore ineligible for consideration of Project award.

PAGE INTENTIONALLY LEFT BLANK

ATTACHMENT 2

PROPOSER'S STATEMENT OF SUBCONTRACTORS
PLEASANT GROVE WASTEWATER TREATMENT PLANT ERP
To be submitted with Sealed Technical Proposal (Part 1)

The undersigned Proposer submits herewith a list of subcontractors the Contractor proposes to employ on the Work. Said subcontractors will each perform Work in an amount greater than one half of one percent (0.5%) of the Total GMP submitted in their Cost Proposal (Part 2). This list shall include the proper firm name, their license number and class, city and state of each subcontractor, and the portion of the Work to be done by each subcontractor with the understanding that failure to name such subcontractors shall be witness that the Contractor shall have agreed to perform such portion of the Work; and that the Contractor shall not subcontract said portion of the Work; and if a subcontractor is listed, there shall be no substitution of that subcontractor without first obtaining written permission of City Council pursuant to the provisions of Section 4107 of the Public Contract Code. The Contractor shall list only one subcontractor for each portion of the Work to be done as defined by the Contract Documents.

The Proposer's attention is directed to the provisions found in Section IV.B, Section 4 - PROJECT TEAM QUALIFICATIONS AND EXPERIENCE, which stipulates the percent of the Work to be performed with the Proposer's own forces. The City will determine the percentage of the Work self-performed by the Proposer, by subtracting the total percentage of below listed subcontractors work from 100%.

Work to be done by Subcontractor	Percent of Total GMP	Name of Subcontractor	Place of Business (City and State)	CSLB Contractor License Number	DIR Registration Number, and Expiration Date
Asphalt Paving	0.8%	Martin Brothers Construction	Sacramento, CA	726454	10000000174 Exp. 6/30/2022
Reinforcing Steel	0.8%	CMC Rebar West	Tracy, CA	778010	1000000298 Exp. 6/30/2022
Masonry	1.0%	Townsend & Schmidt Masonry	Sacramento, CA	186559	1000000879 Exp. 6/30/2020
Painting & Coatings	0.8%	Mason Painting, Inc.	Orangevale, CA	819987	1000008947 Exp. 6/30/2020
CNG Fueling System	14.3%	EFS West	Valencia, CA	826003	1000011646 Exp. 6/30/2020
HVAC	0.5%	Blocka Construction, Inc.	Fremont, CA	679326	1000000447 Exp. 6/30/2022
Pipe Insulation, Sheet Metal Framing, & Gypsum Board	1.6%	Performance Contracting, Inc.	North Highlands, CA	474795	1000004922 Exp. 6/30/2022

Work to be done by Subcontractor	Percent of Total GMP	Name of Subcontractor	Place of Business (City and State)	CSLB Contractor License Number	DIR Registration Number, and Expiration Date
Electrical & Instrumentation	13.0%	San Joaquin Electric, Inc.	Sacramento, CA	410103	1000002857 Exp. 6/30/2020

Add additional sheets, if necessary.

ATTACHMENT 3

PROPOSER'S SCHEDULE OF MAJOR EQUIPMENT AND MATERIAL SUPPLIERS
PLEASANT GROVE WASTEWATER TREATMENT PLANT ERP
To be submitted with Sealed Bid Proposal

1. The undersigned Proposer represents that, if awarded the Agreement, the items of major equipment and materials specified below will be supplied by the manufacturers or suppliers specified below. By so indicating, Proposer warrants that the equipment and materials manufactured and/or supplied by the named manufacturer or supplier will be provided on the Project unless review of submittal information or performance tests reveal that the equipment or material does not meet Contract Document requirements or the manufacturer or supplier is unable to meet the delivery requirements necessary to maintain progress of the Project based upon the accepted baseline CPM construction schedule. Failure to indicate a manufacturer or supplier listed in the following schedule may render the Bid Proposal non-responsive and may be the basis for rejection of the Bid Proposal.

2. All major Equipment shall be included in the bid proposal according to the following:

(a) Not used.

(b) The following Major Equipment Schedule Table designates major equipment items to be provided. All costs for providing these equipment items shall be included in the Bid Proposal (Part 2). The Proposer shall indicate which Manufacturer/Supplier of equipment they propose to provide, by checking ONE of the named, listed items and, if the Proposer desires to propose an "or equal" equipment item, by writing in a proposed "or equal." If the Proposer writes in a proposed "or equal," the Proposer shall also check one of the named, listed items. It is the Proposer's responsibility that all equipment to be provided, either checked or proposed "or equal" write-in, meet the requirements of the Specifications.

(c) The opinion of the City's Representative will be the final determination of whether a write-in "or-equal" meets the design intent. In the event that the City's Representative allows the Proposer's proposed "or equal" material or equipment item for use as an "or equal", the proposed "or equal" material or equipment item shall be provided for the amount included in the GMP with NO change in GMP. Should the write-in proposed "or equal" item be determined "not equal" by the City's Representative, then the Proposer hereby agrees to provide the checked Manufacturer/Supplier item for the amount included in the Proposer's GMP. Should a Proposer fail to indicate which named manufacturer or supplier the Proposer's GMP is based on, or checks more than one named Manufacturer/Supplier per listed equipment item, the Proposer hereby agrees to provide the Manufacturer/Supplier item noted as "A" for the amount included in the Proposer's GMP with NO change in the GMP.

(d) Allowances of proposed "or equal" equipment does not constitute a waiver of the Specifications. Proposed "or equal" equipment is defined as equipment proposed and named by the Proposer under the Manufacturer/Supplier column in the Major Equipment Schedule Table as equal and equivalent to the specified equipment.

(e) Proposed "or equal" equipment will only be considered after award and execution of Agreement by the City Council. For each "or equal" (write-in) equipment item, Contractor shall submit a properly completed, MATERIAL/PRODUCT SUBSTITUTION REQUEST FORM (PER SECTION 01 60 00.01) within thirty-five (35) calendar days after the date of the Notice to Proceed. Proposed "Or Equal" Substitution Form must be completely filled out, certified and include all required supporting documentation to allow the City's Representative and Engineer to assess the "or equal" acceptability of the product or system. Failure to submit all the required information within the established time limit shall be grounds for determination that the proposed "or equal" major equipment item is "not equal" to the named, listed Manufacturer/Supplier equipment item.

(f) Within 30 calendar days after receiving the proposed "or equal" major equipment submittals, the City's Representative will notify Contractor, in writing, as to whether or not the submitted proposed "or equal" equipment, if any, are accepted as meeting the general specification requirements. The consideration of this equipment shall not be construed to indicate final acceptance by the City, nor relieve the Contractor and/or Manufacturer/Supplier of the equipment from providing the post-Agreement award submittal information.

(g) To be deemed equal, the proposed "or equal" equipment shall be the same or better than the specified named product with respect to features, materials of construction, function, performance, reliability, quality, general dimensional configuration, operations and maintenance access and costs, and static and dynamic loads. Determination of equality in reference to the project design requirements will be made by the City's Representative.

(h) No proposed "or equal" major equipment will be considered unless, in the opinion of the City's Representative and Engineer, it conforms to the Contract Drawings and Specifications in all respects, except for make and manufacturer and minor details.

(i) Design of this Project is based upon the Manufacturer/Supplier equipment item noted as the "A" item in the Major Equipment Schedule Table. When a "B," "C," or "D" named item is named in the Major Equipment Schedule Table, the equipment or product of this "B," "C," or "D" named manufacturer or supplier is deemed "or equal" in quality; however, should a Proposer propose providing a "B," "C," or "D" named item, or proposed "or equal" (write-in) equipment, the Proposer shall comply with the following:

1) The Proposer shall include in the GMP all additional costs (including all general construction, process mechanical, HVAC, plumbing, electrical, and instrumentation and control work), required to accommodate, furnish, and install the proposed equipment or material, training, and spare parts.

(2) Contractor shall reimburse the City for Engineer's time and expense charges associated with the review of proposed "or equal" Major Equipment or System submittals, subsequent notification to Contractor of disposition, and any associated modifications to the Drawings.

SECTION 5

CONTRACTOR'S QUALITY CONTROL PROGRAM

CONTRACTOR'S QUALITY CONTROL PROGRAM

OVERVIEW

In construction, a Quality Control Program (QCP) can be defined simply as "a systematic Program employed by a Contractor to fulfill a project's requirements for quality as defined by the Contract Documents". At W.M. Lyles Co., (Lyles) we believe that the Contractor always has complete responsibility for the quality of the work and our experience has taught us that in order for a QCP to be successful, it must include the following ingredients:

Program Organization - Identification of the personnel responsible for implementation of the QCP, their individual responsibilities, and the requirements for communication between project stakeholders

Program Standards - Identification and definition of the specific quality standards to be met

Preparatory Controls - Description of the proactive actions that will be taken to ensure that the Program Standards are met

Confirmation Procedures – Description of the specific actions that will be taken to inspect the work and document activities affecting quality

Corrective Controls - Description of the corrective actions that will be taken in the event that the Program Standards are not met

Based on this, the following QCP outline has been developed specifically for the ERP. This outline describes both the methodology and procedures that will be utilized by Lyles to ensure that our finished product complies with all of the Project's quality standards.

QUALITY CONTROL PROGRAM

I. Program Organization

A. Authority and Responsibilities of QC Manager

1. Establishment of the QCP

a. Develop the procedures and controls needed to assure optimum quality throughout all phases of the Project.

b. Assign responsibility for the execution of various QC functions to members of the Project Team.

c. Develop the checklists and forms necessary to document verification that the Work is in compliance with the Contract Documents.

d. Develop the reports and documentation necessary to record the enforcement and effectiveness of the QCP.

2. Implementation and enforcement of the QCP

a. Conduct Pre-Installation Conferences prior to the start of each Division, Section, or major item of Work.

b. Supervise the execution of the various QC functions by members of the Project Team.

c. Verify that all materials, equipment, and procedures utilized in the execution of the work are in conformance with the Program Standards

d. Perform initial, in-process, and final inspections on each segment of work.

e. Identify, report, and reject defective and/or non-conforming work and identify and monitor corrective actions.

f. Generate Monthly QC Report.

II. Program Standards

A. Contract Documents

1. Prescriptive and/or performance based requirements identified in the Specifications

2. Prescriptive and/or performance based requirements identified in the City of Roseville Standard Drawings

3. Prescriptive and/or performance based requirements identified in applicable Building Codes

B. Stakeholder Requirements

1. Quality outcomes desired by the City and its Operations and Maintenance Staff

2. Quality outcomes desired by the Neighborhood and the Community at large

3. Quality outcomes desired by the Engineer

4. Quality outcomes desired by Lyles and its sub-

contractors and suppliers

III. Preparatory Controls

A. Submittal Control

1. Under the supervision of the QC Manager, the Project Team will review all Submittals prior to them being forwarded to the Engineer for approval. This review will consist of verifying that the Submittals are complete, that they are in conformance with the Contract Documents, and that they have been coordinated with any related and/or affected work.

B. Off-site Quality Control, Inspection, and Material Certification

1. When required by the Contract Documents, Source Quality Control Programs and/or Material Certifications will be furnished by various suppliers. These items, as well as other required qualifications, certifications and test results will be furnished to the Engineer via Submittals under separate cover.

2. When deemed necessary by the QC Manager due to the identification of poor quality material or equipment, copies of a manufacturer's Quality Control Program(s) and/or visits to their off-site facilities may be required.

C. Pre-Work Activities

1. Completion of a Pre-Installation Conference to ensure that the required preparations for the execution of upcoming work have been performed.

2. Review of all relevant Contract Documents, Submittals, RFI's, Change Orders, and the CPM Schedule.

3. Review of all relevant QC procedures, testing and/or inspection requirements, and notification requirements.

4. Verification that all preceding work has been properly completed and accepted by the QC Manager and/or the City's Representative.

5. Physical review to confirm that all materials and equipment needed to execute the work to be performed is on-site, available, and ready to be incorporated.

IV. Confirmation Procedures

A. Initial Inspection

1. Prior to proceeding with additional work of the affected scope, the Initial Inspection must be successfully completed and any related QC Field Observation Memos must be signed-off by the QC Manager

B. In-Process Inspection

1. Once a specific item of work has successfully passed its initial inspection, work may continue to completion. During execution of the work additional reviews will be performed to assure that the quality present during the accepted Initial Inspections is maintained.

2. Noted deficiencies which are repetitive in nature will be brought to the attention of the responsible party for immediate correction via a Field Observation Memo. The QC Team will suspend the work in question until a plan for correction, including a recovery schedule, is submitted and approved by the QC Manager.

C. Final Inspection

1. Once the work of a specific scope has been completed, Final Inspection will be called for by the installing party. The scheduling of this inspection will be accomplished by the installing party's completion of a Final Inspection Request (FIR) which is to be submitted to the QC Manager. Upon receipt of this FIR and prior to performance of the final inspection, the QC Team will verify that all previously issued Field Observation Memos have been cleared and that any required testing has been performed.

2. During the Final inspection, all deficiencies will be recorded on a follow-up Field Observation Memo which will be returned to the responsible party for immediate implementation of any required corrections.

D. Confirmation Tests

1. All confirmation tests required to be performed by the Contractor will be done in accordance with the requirements of the Contract Documents and the applicable Program Standards.

2. All confirmation tests required to be performed by the City will be coordinated and scheduled with the City Representative.

E. Documentation Procedures

1. Upon completion of each inspection and/or test, a record (checklist, form, Field Observation Memo, etc.) will be generated in accordance with the QCP.

V. Corrective Controls

A. Identification and Documentation

1. Deficiencies identified during each phase of the project will be documented through the use of Submittal Review Forms, Daily Inspection Logs, Testing Records, and Field Observation Memos, as applicable.

B. Notification

1. Immediately following the identification and documentation of a deficiency, all responsible parties will be notified and a copy of all relative documentation will be provided.

C. Execution

1. Upon notification, the responsible parties will coordinate with the QC Manager to identify the corrective actions to be taken. Corrective work will not commence without the approval of the QC Manager. All corrective work will be subject to the Confirmation Procedures outlined above.

D. Recurrence Prevention

1. Recurrence of deficiencies is to be avoided at all cost. At the discretion of the QC Manager, parties responsible for repetitive deficiencies may be required to perform more significant corrective actions including, but not limited to, the following:

a. Create modified and/or specialized Quality Control Plans outlining revised techniques for preventing the subject deficiencies.

b. Replace the specific individuals responsible for the deficiencies with qualified staff (includes both craft and management).

c. Have the work performed by a 3rd party at the responsible party's expense.

The Right Experience

Linda County Water District – WWTP Upgrade & Expansion

CONTRACT VALUE: $29,547,940

% OF SELF-PERFORMANCE: 65 %

PROJECT RELEVANCE:

1. Numerous shut-downs & tie-ins to existing facilities
2. Included State Revolving Funds
3. Plant remained fully operational during construction
4. Clarifiers

Upgrade and expansion of the existing 1 MGD wastewater plant to a 5 MGD Title 22 Reclaimed Water Facility on a 27 acre site. Work included conversion of an existing clarifier to a storage tank, new Influent Diversion Structure, Headworks, Primary Clarifiers, Activated Sludge Basins, Secondary Clarifiers, Filter Feed Pump Station, Tertiary Filters, Control / Blower / Laboratory Building, Sludge Drying Beds, HDPE-lined and concrete-lined Sludge Lagoons, Stormwater Detention Basins, Sludge Thickening Facility, electrical and instrumentation with SCADA integration, site grading, paving and yard piping.

Proposed Quality Control Manager for the ERP, Jon Shugarte was responsible for ensuring the highest quality standards were met with respect to safety, budget and schedule. John worked in collaboration with Linda County Water District to get the project up and running, on-time and under budget. We perform all Quality Control on many projects especially for our many private clients. This approach has further enhanced our ability of our field forces to deliver unparalled quality with limited oversight. In addition, we work for clients on the other end of the spectrum that have extremely rigid inspection. The combination of these experiences has resulted in the best quality in the business delivered by a "do it right the first time" mentality.

SECTION 6

CONTRACTOR'S CONSTRUCTION SCHEDULER QUALIFICATIONS

FIRM/TITLE
W. M. Lyles Co.

TENURE WITH FIRM
16 years

EDUCATION
- Bachelor of Science, Construction Management, Northern Arizona University, 2003

BUSINESS EXPERIENCE
- W. M. Lyles Co., Southern Division, Assistant Vice President, 2003 to Present

RESPONSIBILITIES
- Prepares iterative schedules as part of GMP
- Works with project team on logic, duration, resources
- Develops and maintains pre-construction schedule
- Prepares Project Schedule updates
- Evaluates re-sequence options, schedule savings

TONY MUELLER
CPM Scheduler

16 Years Experience

Anthony (Tony) Mueller is W. M. Lyles Co.'s (WML) proposed CPM Scheduler for the Pleasant Grove WWTP Energy Recover Project. He brings over 16 year of construction experience and has been responsible for developing the schedule on near every project that he has managed. As both Project Manager and CPM Scheduler on this Project, Tony will work closely with both City Staff and the Project Team to ensure that critical path activities are well identified so that they receive the focus that the deserve. He will also be responsible for updating the schedule to reflect actual work performed, preparing monthly reports and narratives for distribution, and assisting with critical path analysis so that all parties understand the implications of schedule revisions and/or change order work.

One great example of Tony's scheduling capability can be found in Appendix C – Baseline CPM Schedule. The sample CPM schedule included in the Appendix is, in fact, a preliminary schedule for the Energy Recover Project as developed by Tony.

WHY TONY?
- Proven experience developing CPM schedules for many of Lyles qualifying projects, including; City of Fresno, SE Surface Water Treatment Facility, and the Moreno Valley Regional Water Reclamation Plant
- 16 years of CPM scheduling experience dealing exclusively in the wastewater market
- Lives and works local to the City of Roseville, so he is invested in the successful completion of the ERP Project

RELEVANT PROJECT EXPERIENCE

City of Fresno - SE Surface Water Treatment Facility, DBB, 2018, $162,089,360 Project Executive
Project Relevance:
- CPM Schedule created by Tony
- Two (2) secondary clarifiers
- Included State Revolving Funds

Construction of a complete and operable 80 MGD surface water treatment facility to produce potable drinking water that meets the requirements of California Administrative Code, Title 22 for potable drinking water including; construction of temporary construction facilities, construction of 72" raw water and treated water transmission piping, two conventional flocculation/ sedimentation pretreatment basins with inclined plate settlers, two concrete intermediate ozone contact basins and an ozone generation facility, eight dual media GAC filters, 8 million gallon treated water reservoir, treated water pump station, chemical building, maintenance building, wash water recovery and solids handling lagoons, wash water recovery pump station, standby generators, electrical substation, site grading and paving, process and utility piping, and site fencing and landscaping. Created and maintained a 3800 activity P6 scheduling for an accelerated 33 month construction schedule. This schedule was cost and

resource loaded.

Moreno Valley Regional Water Reclamation Plant, DBB, 2012, $29,761,402, Senior Project Manager/CPM Scheduler
Project Relevance:
- Plant Expansion
- Odor control facility
- Anerobic digesters

Upgrade of existing 15.8MGD water reclamation plant to 18.5MGD, including yard structures, headworks, influent pump station, grit basins, power and blower buildings, chemical scrubber odor control facility, secondary effluent pump station, tertiary effluent/utility water pump station, tertiary effluent meter vault, acid-phase digester and flare, methane-phase digester, digested sludge storage tanks, low pressure digester gas holder, 15KW generator, boiler facility, electrical buildings, and related appurtenances.

Palmdale Water Reclamation Plant Stage Five Plant Expansion, Phase I, DBB, 2012, $114,116,000, Project Manager
Project Relevance:
- Plant Expansion Upgrade
- Diegesters
- Included State Revolving Funds
- Plant remained fully operational during construction

Expansion of existing 9MGD water reclamation plant to 15MGD, including final sedimentation tanks, aeration tanks, chlorine contact tank, digester, digester cleaning bed, Title 22 tertiary cloth disk filters, dissolved air flotation units, RAS pump station, digester transfer and sludge recirculation pump station, chemical facilities, generator and air compressor buildings, boiler house, switchboard building, operations and lab building, and associated pipelines.

Linda County Water District – Wastewater Treatment Plant Upgrade & Expansion, DBB, 2012, Executive Sponsor, $29,149,127
Project Relevance:
- Two (2) primary clarifiers
- Two (2) secondary clarifiers
- Electrical & Instrumentation systems
- WWTP upgrade and expansion

Construction of a new 5MGD Wastewater Treatment Plant on a 27 acre site adjacent to an existing treatment plant. New facilities include a headworks, two primary clarifiers, four activated sludge basins, two secondary clarifiers, filter pump station, six effluent filters, sludge thickening system, sludge drying beds, sludge lagoons, site grading, and associated piping, electrical, and instrumentation systems. Upgrades to the existing plant include the demolition of existing facilities and modifications to the existing effluent pump station.

City of Galt WWTP – Tertiary Filtration, UV Disinfection, & Biosolids Improvements, DBB, Estimator, 2010, $11,732,000
Project Relevance:
- Numerous shut-downs & tie-ins to existing facilities
- WWTP expansion
- Included State Revolving Funds
- Plant remained fully operational during construction
- Key Personnel: Stan Simmons, Joe Lawrence, John Lunsford, Jon Shugarte, Tony Mueller, Wade Johnson and TESCO

Expansion of an existing Wastewater Treatment Plant to 6MGD including tertiary filtration and ultraviolet disinfection capabilities, a biosolids dewatering facility, biosolids storage and transfer facilities, operations and electrical building, pump stations, backup power generation, and additional infrastructure. American Public Works Association (APWA) Project of the Year 2010. Expedited delivery: 12 month contract time.

SECTION 12

IRAN CONTRACTING ACT DISCLOSURE

ATTACHMENT 6

IRAN CONTRACTING ACT DISCLOSURE FORM
To be submitted with Sealed Technical Proposal (Part 1)

GENERAL

GENERAL REQUIREMENTS

PURSUANT TO THE IRAN CONTRACT ACT OF 2010 (CALIFORNIA PUBLIC CONTRACT CODE, SECTIONS 2202-2208), PROPOSERS ARE INELIGIBLE TO PROPOSE ON PROJECTS WITH A PUBLIC ENTITY FOR GOODS OR SERVICES OF ONE MILLION DOLLARS ($1,000,000) OR MORE IF THE PROPOSER ENGAGES IN INVESTMENT ACTIVITIES IN IRAN.

PROPOSERS MUST PROVIDE THE BELOW DISCLOSURE FORM AS A MANDATORY SUBMITTAL FOR ALL PROJECTS IN EXCESS OF $1,000,000. THE IRAN CONTRACTING ACT DISCLOSURE FORM SHALL BE SUBMITTED BY ALL PROPOSERS AS A MANDATORY SUBMITTAL.

(California Public Contract, Sections 2202-2208)

When responding to a bid or proposal or executing a contract or renewal for a City contract for goods or services of $1,000,000 or more, a vendor must either: a) certify it is **not** on the current list of persons engaged in investment activities in Iran created by the California Department of General Services ("DGS") pursuant to Public Contract Code section 2203(b) and is not a financial institution extending twenty million dollars ($20,000,000) or more in credit to another person, for 45 days or more, if that other person will use the credit to provide goods or services in the energy sector in Iran and is identified on the current list of persons engaged in investment activities in Iran created by DGS; or b) demonstrate it has been exempted from the certification requirement for that solicitation or contract pursuant to Public Contract Code Section 2203(c) or (d).

To comply with this requirement, please provide your vendor or financial institution name and complete **one** of the options on the following page. Please note: California law establishes penalties for providing false certifications, including civil penalties equal to the greater of $250,000 or twice the amount of the contract for which the false certification was made; contract termination; and three-year ineligibility to bid on contracts. (Public Contract Code section 2205.)

OPTION #1 – CERTIFICATION

I, the official named below, certify I am duly authorized to execute this certification on behalf of the vendor/financial institution identified below, and the vendor/financial institution identified below is **not** on the current list of persons engaged in investment activities in Iran created by DGS and is not a financial institution extending twenty million ($20,000,000) or more in credit to another person/vendor, for 45 days or more, if that other person/vendor will use the credit to provide goods or services in the energy sector in Iran and is identified on the current list of persons engaged in investment activities in Iran created by DGS.

SECTION 13

PROPOSER CERTIFICATIONS AND SIGNATURES PROPOSAL FORM

ATTACHMENT 7

PROPOSER'S CERTIFICATIONS AND SIGNATURES
PLEASANT GROVE WASTEWATER TREATMENT PLANT ERP
To be submitted with Sealed Technical Proposal (Part 1)

In response to the Request for Bid Proposals (RFBP), Section I, dated June 3, 2019 and in accordance with the accompanying SELECTION PROCESS AND INSTRUCTIONS TO PROPOSERS, Section II, the undersigned hereby proposes to City to furnish all plant, labor, technical and professional services, supervision, materials, and equipment (other than materials and equipment specified as furnished by City), and to perform all operations necessary and required for construction of the Pleasant Grove Wastewater Treatment Plant Energy Recovery Project, in accordance with the Contract Documents, and any Addenda thereto, for the Total Guaranteed Maximum Price (GMP) and all other terms submitted in the Bid Proposal.

This Bid Proposal constitutes a firm offer to City, which cannot be withdrawn for 120 days from and after the date set for receiving Bid Proposals, or until the Agreement is fully executed by City, whichever is earlier.

The undersigned Proposer hereby certifies that it has examined and is fully familiar with all of the provisions of the Contract Documents; has carefully checked all of the words and figures shown on its Bid Proposal; has carefully reviewed the accuracy of all statements in this Bid Proposal and attachments hereto; and understands and agrees that City will not be responsible for any errors or omissions on the part of the undersigned in preparing this Bid Proposal.

The undersigned Proposer has, by careful examination of the Contract Documents, and by examination of the actual Site conditions, satisfied itself as to the nature and location of all Work, the general and local conditions to be encountered in the performance of any Work, the requirements of the Contract Documents, and all other matters that can in any way affect the Work or the cost thereof.

The undersigned agrees to execute the Agreement and provide City the executed Agreement, the required insurance certificates, endorsements, and waivers of subrogation, and the required surety bonds within fifteen (15) calendar days after the undersigned's receipt of the City's notice that the undersigned will be recommended for Project award and prior to award of the Agreement by the City Council.

The undersigned Proposer certifies that it is now licensed in accordance with the provisions of the Contractor's License Law of the State of California, and the number of said license is 422390 and the classification of said license is A, B, and the said license expires 5/31/2020.

The undersigned Proposer certifies that it is now registered with the Department of Industrial Relations (DIR) to do public work pursuant to California Labor Code Section 1725.5. The number of said registration is 1000001448, and the said registration expires 6/30/2022.

The undersigned Proposer certifies that no official or employee of the City has an interest, has been employed or retained to solicit or aid in the procuring of the resulting agreement, nor that any such person will be employed in the performance of such work without immediate divulgence of such fact to the City. Proposers submitting a Bid Proposal in response to this RFBP must disclose any actual, apparent, direct, indirect, or potential conflicts of interest that may exist with respect to the Proposer or the Proposer's management or employees relative to the services to be provided to the City. Conflict of interest issues may require consultation with legal counsel. **If a Proposer has no conflicts of interest, a statement to that effect must be added to this ATTACHMENT 7.** Violation of this section shall be a material breach of the Agreement entitling the City to any and all remedies by law or in equity.

The undersigned Proposer certifies that no undue influence or pressure is used against or in concert with any officer or employee of the City in connection with the award or terms of the Agreement that will be executed as a result of this RFBP, including any method of coercion, confidential financial arrangement or financial

inducement. No officer or employee of the City shall receive compensation, directly or indirectly, from the Proposer, or from any officer, employee or agent of the Proposer, in connection with the award of the Agreement or any Work to be conducted as a result of this RFBP. Violation of these requirements shall be a material breach of the contract entitling the City to any and all remedies by law or in equity.

The undersigned Proposer certifies that the designated project team, including subcontractors, will be used for this Project. Departure or reassignment of, or substitution for, any member of the designated project team or subcontractors shall not be made without the prior written approval of the City.

The undersigned Proposer acknowledges receipt, understanding, and full consideration of the following Addenda:

CERTIFICATION

This is to certify that I, Ruben Moreno, Jr., am the Secretary of W. M. Lyles Co., that W. M. Lyles Co. (formerly known as Pac-Nine Construction), is a California Corporation incorporated May 6, 1982, and that the attached Sections 7, 8, 9, and 10 from Article IV of the Bylaws are true and accurate copies, and that said Bylaws were duly adopted by the Board of Directors of the Corporation at its meeting on December 14, 1983, and Sections 7, 8, 9, and 10 of Article IV have not been amended to this date.

I further certify that at various duly called meetings of the Board of Directors of W. M. Lyles Co. held on October 4, 2010, October 11, 2012, June 17, 2013, October 1, 2013, May 19, 2017, March 29, 2018, and October 1, 2018, the following officers were elected:

Stanley H. Simmons – President/CEO/Treasurer (CFO)
Kenneth D. Strosnider – Executive Vice President
Robert P. Saleen – Senior Vice President
David H. O'Dear – Assistant Vice President/Assistant Secretary
Joseph B. Lawrence – Assistant Vice President
Kevin R. Shigematsu – Assistant Vice President
Anthony M. Mueller – Assistant Vice President
Ruben Moreno, Jr. - Secretary
Scott R. Fults – Assistant Secretary
Chanel L. Prince – Assistant Secretary

I also certify as of the date of this certification no changes have occurred.

DATED: July 22, 2019

Ruben Moreno, Jr.
Secretary

all members of the Board shall individually or collectively consent in writing to such action. Such written consent or consents shall be filed with the minutes of the proceedings of the Board.

ARTICLE IV

OFFICERS

Section 1. OFFICERS. The officers of the corporation shall be a Chief Executive Officer, a President, a Secretary and a Chief Financial Officer. The corporation may also have, at the discretion of the Board of Directors, a Chairman of the Board, one or more vice presidents, and one or more assistant secretaries or treasurers and such other officers as may be appointed in accordance with the provisions of Section 3 of this Article. Officers other than the Chairman of the Board need not be directors. One person may hold two or more offices.

Section 2. ELECTION. The officers of the corporation, except such officers as may be appointed in accordance with the provisions of Section 3 or Section 5 of this Article, shall be chosen annually by the Board of Directors, and each shall hold his office until he shall resign or shall be removed or otherwise disqualified to serve, or his successor shall be elected and qualified. Officers need not be shareholders of the corporation.

Section 3. SUBORDINATE OFFICERS, ETC. The Board of Directors may appoint such other officers as the business of the corporation may require, each of whom shall hold office for such period, have such authority and perform such duties as are provided in the By-laws or as the Board of Directors may from time to time determine.

Section 4. REMOVAL AND RESIGNATION. Any officer may be removed, either with or without cause, by a majority of the directors at the time in office, at any regular or special meeting of the Board or by any officer upon whom such power of removal may be conferred by the Board of Directors.

Any officer may resign at any time by giving written notice to the Board of Directors or to the Chief Executive Officer or to the Secretary of the corporation. Any such resignation shall take effect at the date of the receipt of such notice or at any later time specified therein; and, unless otherwise specified therein, the acceptance of such resignation shall not be necessary to make it effective.

Section 5. VACANCIES. A vacancy in any office because of death, removal, resignation, disqualification or any other cause shall be filled in the manner prescribed in the By-laws for regular appointments to such office.

Section 6. CHAIRMAN OF THE BOARD. The Chairman of the Board, if there shall be such an officer, shall, if present, preside at all meetings of the Board of Directors and exercise and perform such other powers and duties as may be from time to time assigned to him by the Board of Directors or prescribed by the By-laws.

Section 7. CHIEF EXECUTIVE OFFICER. Subject to such supervisory powers, if any, as may be given by the Board of Directors to the Chairman of the Board, if there be such an officer, the Chief Executive Officer shall, subject to the control of the Board of Directors, have general supervision, direction and control of the business and officers of the corporation. He shall preside at all meetings of the shareholders and, in the absence of the Chairman of the Board, or if there be none, at all meetings of the Board of Directors. He shall be ex officio a member of all the standing committees, including the Executive Committee, if any, and shall have the general powers and duties of management usually vested in the office of president of a corporation and shall have such other powers and duties as may be prescribed by the Board of Directors or the By-laws.

Section 8. PRESIDENT. In the absence or disability of the Chief Executive Officer, the President shall perform all of the duties of the Chief Executive Officer and when so acting shall have all of the powers of and be subject to all of the restrictions on the Chief Executive Officer. The President shall have such other powers and perform such other duties as from time to time may be prescribed by the Chief Executive Officer, the Board of Directors or the By-Laws.

Section 9. VICE PRESIDENT. In the absence or disability of the President, the vice presidents in order of their rank as fixed by the Board of Directors or, if not ranked, the Vice President designated by the Board of Directors, shall perform all the duties of the President, and when so acting shall have all the powers of and be subject to all the restrictions upon the President. The vice presidents shall have such other powers and perform such other duties as from time to time may be prescribed for them, respectively, by the Board of Directors or the By-laws.

Section 10. SECRETARY. The Secretary shall keep, or cause to be kept, a book of minutes at the principal

office or such other place as the Board of Directors may order of all meetings of directors and shareholders, with the time and place of holding, whether regular or special, and, if special, how authorized, the notice thereof given, the names of those present at directors' meetings, the number of shares present or represented at shareholders' meetings and the proceedings thereof.

The Secretary shall keep, or cause to be kept, at the principal office or at the office of the corporation's transfer agent a share register or a duplicate share register showing the names of the shareholders and their addresses, the number and classes of shares held by each, the number and date of certificates issued for the same, and the number and date of cancellation of every certificate surrendered for cancellation.

The Secretary shall give, or cause to be given, notice of all meetings of the shareholders and of the Board of Directors required by law or by the By-laws to be given, and he shall keep the seal of the corporation in safe custody and shall have such other powers and perform such other duties as may be prescribed by the Board of Directors or the By-laws.

Section 11. CHIEF FINANCIAL OFFICER. The Chief Financial Officer shall keep and maintain, or cause to be kept and maintained, adequate and correct accounts of the properties and business transactions of the corporation, including accounts of its assets, liabilities, receipts, disbursements, gains, losses, capital, surplus and shares. Any surplus, including earned surplus, paid-in surplus and surplus arising from a reduction of stated capital, shall be classified according to source and shown in a separate account. The books of account shall at all times be open to inspection by any director.

The Chief Financial Officer shall deposit all moneys and other valuables in the name and to the credit of the corporation with such depositaries as may be designated by the Board of Directors. He shall disburse the funds of the corporation as may be ordered by the Board of Directors, shall render to the Chief Executive Officer and directors, whenever they request it, an account of all of his transactions as Chief Financial Officer and of the financial condition of the corporation and have such other powers and perform such other duties as may be prescribed by the Board of Directors or by the By-laws.

Attachment 7

Conflict of Interest

We hereby certify that no official or employee of the City has an interest, has been employed or retained to solicit or aid in the procuring of the resulting agreement, nor that any such person will be employed in the performance of such without immediate divulgence of such fact to the City.

W. M. Lyles Co.

Joseph B. Lawrence, Asst. Vice President

ATTACHMENT 10

CONSOLIDATED APPROPRIATIONS ACT
BUY AMERICAN IRON AND STEEL CERTIFICATION

Project: PLEASANT GROVE WASTEWATER TREATMENT PLANT ERP

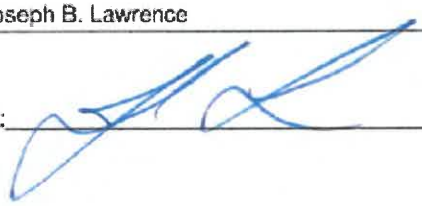
1. Identification of American-made Iron, Steel, and Manufactured Goods: Consistent with the terms of the Purchaser's bid solicitation and provisions of Section 436 of the Consolidated Appropriations Act of 2014, the Proposer certifies that this Bid Proposal reflects the Proposer's best, good faith effort to identify domestic sources of iron, steel, and manufactured goods for every component contained in the bid solicitation where such American-made components are available on the schedule and consistent with deadlines prescribed in or required by the bid solicitation.

2. Verification of U.S. Production: The Proposer certifies that all components contained in the bid solicitation that are American-made have been so identified, and if this bid is accepted, the Bidder agrees that it will provide reasonable, sufficient, and timely verification to the Purchaser of the U.S. production of each component so identified.

3. Documentation Regarding Non-American-made Iron, Steel, or Manufactured Goods: The Proposer certifies that for any component or components that are not American-made and are so identified in this Bid Proposal, the Proposer has included in or attached to this Bid Proposal one or both of the following, as applicable:

    a. Identification of and citation to a categorical waiver published by the U.S. Environmental protection Agency in the Federal Register that is applicable to such component or components, and an analysis that supports its applicability to the component or components;

    b. Verifiable documentation sufficient to the Purchaser, as required in the bid solicitation or otherwise, that the Proposer has sought to secure American-made components but has determined that such components are not available on the schedule and consistent with the deadlines prescribed in the bid solicitation, with assurance adequate for the Proposer under the applicable conditions stated in the bid solicitation or otherwise.



- Information and Detailed Justification Regarding Non-American-made Iron, Steel, or Manufactured Goods: The Proposer certifies that for any such component or components that are not so available, the Proposer has also provided in or attached to this bid information, including but not limited to the verifiable documentation and a full description of the bidder's effort to secure any such American-made component or components, that the Bidder believes are sufficient to provide and as far as possible constitute the detailed justification required for a waiver under section 1605 with respect to such component or components. The Bidder further agrees that, if this bid is accepted, it will assist the Purchaser in amending, supplementing, or further supporting such information as required by the Purchaser to request and, as applicable, implement the terms of a waiver with respect to any such component or components.

THE UNDERSIGNED CERTIFIES THAT THE CONTRACTOR WILL COMPLY WITH THE ABOVE REQUIREMENTS.

CONTRACTOR OR

CONSOLIDATED APPROPRIATIONS ACT
BUY AMERICAN IRON AND STEEL CERTIFICATION

Project: PLEASANT GROVE WASTEWATER TREATMENT PLANT ERP

1. Identification of American-made Iron, Steel, and Manufactured Goods: Consistent with the terms of the Purchaser's bid solicitation and provisions of Section 436 of the Consolidated Appropriations Act of 2014, the Proposer certifies that this Bid Proposal reflects the Proposer's best, good faith effort to identify domestic sources of iron, steel, and manufactured goods for every component contained in the bid solicitation where such American-made components are available on the schedule and consistent with deadlines prescribed in or required by the bid solicitation.

2. Verification of U.S. Production: The Proposer certifies that all components contained in the bid solicitation that are American-made have been so identified, and if this bid is accepted, the Bidder agrees that it will provide reasonable, sufficient, and timely verification to the Purchaser of the U.S. production of each component so identified.

3. Documentation Regarding Non-American-made Iron, Steel, or Manufactured Goods: The Proposer certifies that for any component or components that are not American-made and are so identified in this Bid Proposal, the Proposer has included in or attached to this Bid Proposal one or both of the following, as applicable:

    a. Identification of and citation to a categorical waiver published by the U.S. Environmental protection Agency in the Federal Register that is applicable to such component or components, and an analysis that supports its applicability to the component or components;
