Of the 18.640 acres of direct impacts to wetlands and waters of the U.S. proposed by the ARSP, 14.461 acres are potential habitat for the federally listed vernal pool fairy shrimp (*Branchinecta lynchi*). An additional 9.9725 acres of potential habitat for the federally listed vernal pool fairy shrimp may also be indirectly impacted during project implementation. Direct loss and indirect degradation of habitat for federally listed vernal pool crustaceans is considered to be a significant impact.

The 14.461 acres of vernal pool fairy shrimp habitat that will be directly impacted will be mitigated at a 2:1 ratio for preservation (28.922 acres) and 1:1 ratio for creation (14.461 acres). The 9.972 acres of vernal pool fairy shrimp that may be indirectly impacted will be mitigated at a 1:1 ratio for preservation (9.972 acres). This equates to a total of 38.894 acres of preservation and 18.640 acres of creation.

Mitigation is proposed to reduce the impacts to vernal pool habitat. As discussed above, Mitigation Measure 4.8-1 requires vernal pool restoration to be completed in accordance with the “no net loss” performance standard, current USACE and USFWS guidelines, and City General Plan Policy as set forth in the Wetland Mitigation Guidelines. Mitigation Measure 4.8-2 will ensure preservation and creation of vernal pool fairy shrimp habitat at 2:1 and 1:1 ratios, respectively. After mitigation these impacts would be **less than significant**. (DEIR 4.8-50)

Impact 4.8-3 (Loss of Rare Plant Populations): Impacts to special status plant species could result from grading and other ground disturbing activities related to development of the Proposed Project.

Mitigation Measure 4.8-3 Special Status Plant Measures

The following mitigation measures shall be implemented to reduce impacts to special status plant species:

- a) A qualified botanist or biologist shall collect source pool inoculum from the two vernal pools containing dwarf downingia and shall transfer the soil inoculum to the created and/or restored wetlands within the proposed off-site Mitigation Properties. A botanist or qualified biologist shall determine which created pools will provide the best suitable habitat. Created and/or restored wetlands will require monitoring according to Section 404 permit guidelines and therefore transferred inoculum would be covered under such efforts.

- b) Perform focused special-status plant surveys according to CDFW, CNPS, and USFWS protocols (CDFW, 2000; CNPS, 2001; Cypher, 2002; USFWS, 1996b) for the three off-site Mitigation Properties. Surveys shall be timed according to the blooming period for target species and known reference populations will be visited prior to surveys to confirm the species is blooming where known to occur.
- c) The USFWS generally considers survey results valid for approximately three years. Therefore, follow-up surveys may be necessary within the project site to avoid take of any special status plant species. This shall be determined during consultation with USFWS. The presence or absence of special-status plant species shall be determined through rare plant surveys conducted according to CDFW, CNPS and USFWS protocols (CDFW, 2000; CNPS, 2001; Cypher, 2002; USFWS, 1996b). Surveys shall be timed according to the blooming period for target species and known reference populations will be visited prior to surveys to confirm the species is blooming where known to occur.
- d) If no special-status plants are found, no further measures pertaining to special status plants are necessary.
- e) If special-status plant species are found within the project site, avoidance zones shall be established around plant populations to clearly demarcate areas for avoidance. Avoidance measures and buffer distances may vary between species and the specific avoidance zone distance will be determined in coordination with appropriate resource agencies (CDFW and USFWS).
- f) If special-status plant species are found within the project site and avoidance of the species is not possible, then additional measures such as seed collection and/or transplantation shall be developed in consultation with the appropriate agencies (CDFW and USFWS).

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

The project site contains 9.814 acres of vernal pool habitat. Vernal pools represent potential habitat for dwarf dowingia, legenera, Pincushion navarretia, Sacramento Orcutt grass, and other special status plants. Dwarf downingia was observed within two vernal pools within the project site and on the off-site Al Johnson Wildlife Area improvements area. No other special status plants were observed within the project site.

Dwarf dowingia is the only special status plant species known to occur within the impact area, and would be impacted by the Proposed Project. It is not State or federally listed, but is on the CNPS List 2B.2. Although this plant species is relatively common in the project vicinity, removal of these populations would constitute a significant impact due to the cumulative nature of development in the area. Therefore, Mitigation Measure 4.8-3 requires that soil inoculum be collected from the dwarf downingia population and placed at the offsite created and/or restored wetlands to ensure long-term viability of this sensitive plant species.

Impacts to special status plant species could result from grading and other ground disturbing activities related to development of the Proposed Project. Implementation of the ARSP is anticipated to result in the direct loss of vernal pool wetlands. Additionally, some of the remaining vernal pools may be indirectly impacted due to erosion of adjacent uplands, changes in hydrological conditions from grading, or other topographic changes such that precipitation runoff supplies are interrupted and prevent the pools from filling properly. Loss of special status plants would be considered a **significant** impact.

Compliance with FESA would reduce impacts associated with the loss of federally listed vernal pool crustaceans and their habitat and the loss and degradation of rare plant populations by requiring any project that would result in the take of any federally listed threatened or endangered species to obtain authorization from the USFWS. Protection, preservation, and replacement of habitat for special status plants can be achieved through implementation of Mitigation Measure 4.8-1, which ensure no net loss of wetlands. In addition, Mitigation Measure 4.8-3 would require additional special status plant surveys for the off-site improvement areas that may contain listed plant species, and provides protective measures should any special status plants be identified. After implementation of Mitigation Measures 4.8-1 and 4.8-3 this impact would be **less than significant**. (DEIR 4.8-51)

Impact 4.8-4 (Loss of Degradation of Habitat for Western Spadefoot): Loss of potential habitat for the Western spadefoot may result due to grading or other ground disturbance related to development of the Proposed Project.

Mitigation Measure 4.8-4 Relocate Western Spadefoot

The following mitigation measures shall be implemented to reduce impacts to Western spadefoot (*Spea hammondi*):

- a) A qualified biologist shall perform preconstruction surveys for Western spadefoot within the construction area in the appropriate season (generally February) to detect adults, larvae, and/or egg masses, within 14 days prior to the start of construction.
- b) If no Western spadefoots are found, no further measures pertaining to this species are necessary.
- c) Pools that are found to support Western spadefoot shall be avoided if feasible. If avoidance is not feasible, then the CDFW shall be consulted for its recommendation with respect to relocation of adults, larvae, tadpoles, or egg masses. Although there is no set protocol for the relocation of Western spadefoot, the capture and relocation of reptile and amphibian species from habitat that will be impacted to similar areas of protected suitable habitat is a standard part of both USFWS and CDFW procedures and recommendations for mitigating impacts. When done in combination with habitat restoration and preservation, the procedure is known to be successful in reducing potential impacts to special-status amphibian and reptile populations.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Within the project site, potential habitat for the western spadefoot includes vernal pools, seasonal wetlands, and adjacent grassland habitat. Impacts on this species would occur as a result of the loss of vernal pools, seasonal wetlands, and grassland habitat due to grading or other ground disturbance related to development of the Proposed Project. This species is a State species of concern.

Western spadefoots have been detected in the past in the vicinity of the project site. Development on vernal pools, seasonal wetlands, and the adjacent habitat could result in the destruction of individual Western spadefoot and/or its habitat. This would be a **significant** impact.

Prior to grading or other earth moving activities, Mitigation Measure 4.8-4 would be implemented to capture any adult or larval western spadefoots or western spadefoot egg masses, and relocate them to suitable habitat. This mitigation measure would greatly enhance the survival rates of western spadefoots that are displaced during construction by relocating them to protected areas of suitable habitat. Additionally, implementation of Mitigation Measures 4.8-1(a) and 4.8-1(b), which require preservation and protection of existing vernal pools, would protect individual western spadefoots by avoiding impacts on areas that are designated open space. Ensuring no net loss of wetlands would provide protection of potential habitat for western spadefoot by preserving or enhancing and protecting habitat that is capable of supporting this species. After implementation of mitigation this impact would be **less than significant**. (DEIR p. 4.8-52)

Impact 4.8-5 (Loss of Degradation of Habitat for Northwestern Pond Turtle): Construction of the Proposed Project may impact northwestern pond turtles if they are located within an area designated for development.

Mitigation Measure 4.8-5 Relocate Northwestern Pond Turtle

The following mitigation measures shall be implemented to reduce impacts to northwestern pond turtle (*Actinemys armorata*):

- a) A qualified biologist shall perform preconstruction surveys for northwestern pond turtle within the construction area for each phase of the Proposed Project within 24 hours prior to the start of construction.
- b) If no northwestern pond turtles are found, no further measures pertaining to this species are necessary.
- c) If northwestern pond turtles are found within an area proposed for impact, a qualified biologist shall relocate the northwestern pond turtle to a suitable location away from the proposed construction, in consultation with CDFW.

Findings: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

No northwestern pond turtles were found during surveys, and University Creek and the wetlands are considered marginal habitat for this species. The Proposed Project will not have a substantial adverse effect on western pond turtles through habitat modification because University Creek will remain as open space as part of the ARSP. After development, no long-term impacts to northwestern pond turtle will occur. However, construction may impact any turtles if they are located within an area designated for development, and the impact from the Proposed Project is assumed to be **significant**. To prevent turtle mortality, Mitigation Measure 4.8-5 ensures that any turtles present in the development footprint are relocated to a protected area of suitable habitat outside the area of disturbance. Therefore, after mitigation, impacts from the Proposed Project are **less than significant**. (DEIR 4.8-53)

Impact 4.8-6 (Disruption of Swainson's Hawk, Burrowing Owl, and Other Legally Protected Raptors' Nesting and Foraging Habitat): Project implementation would result in the loss and degradation of habitat for Swainson's Hawk, Burrowing Owl, and other legally protected raptors.

Mitigation Measure 4.8-6 Avoid Nesting Sites for Protected Bird Species

To ensure that raptor and other bird species protected under the MBTA are not injured or disturbed by construction in the vicinity of nesting habitat, the project applicant shall implement the following measures:

- a) **Nesting Raptors:** All raptors and their active nests are protected under the California Fish and Game Code and federal MBTA. To ensure that there are no impacts to protected active nests, the following mitigation measures shall be implemented:
 - o A qualified biologist shall conduct a pre-construction nesting bird survey of all suitable habitats within the limits of construction of the project site and all accessible areas within 300 feet of the limits of construction activity. The preconstruction surveys shall occur within 14 days of the initiation of construction activity during the nesting season (February 1 through August 31).
 - o If no active raptor nests are found, no further measures pertaining to raptors nests are necessary.
 - o If active nests are found, the active nests shall be monitored by a qualified biologist for the first 24 hours prior to any construction-related activity to establish a behavioral baseline. A no-disturbance buffer around the nest shall be established. The buffer distance shall be established by a qualified biologist in accordance with CDFW's recommendations for buffer distances relative to the species identified.
 - o Once construction activities commence within the project site, all nests shall be monitored by a qualified biologist to detect any behavioral changes as a result of construction. If behavioral changes are observed that may result in adverse effects to the success of breeding, the work causing that change shall cease and consultation with CDFW shall be initiated to identify potential avoidance and minimization measures.

- o Pre-construction nest surveys are not required for construction activity outside the nesting season.
- b) **Burrowing Owl:** Burrowing owls were detected within the project site during surveys. To minimize impacts to protected burrowing owls and their burrows, the following mitigation measures shall be implemented:
 - o If possible, initiate construction activities during the non-breeding season, September 1 through January 31.
 - o A qualified biologist shall conduct a take avoidance (pre-construction) burrowing owl survey of all suitable habitats within the limits of construction of the project site and all accessible areas within 150 meters (492 feet) of the limits of construction within 14 days of the initiation of construction activity, according to the Staff Report on Burrowing Owl Mitigation (CDFW, 2012). If no burrowing owls or sign are observed, construction may proceed.
 - o If burrowing owls or sign are found, avoidance setbacks shall be implemented in accordance with CDFW Burrowing Owl Mitigation (CDFW, 2012).
 - o If avoidance setbacks are infeasible, the qualified biologist shall coordinate with CDFW to conduct passive relocation according to protocol outlined in the Staff Report on Burrowing Owl Mitigation (CDFW, 2012). If passive relocation methods are employed, the project impact site shall be rendered inhospitable for further burrowing owl reoccupation.
- c) **Swainson's Hawk:** Swainson's hawks have been found nesting on the adjacent CSP Area to the south of the project site (City of Roseville, 2011a). To minimize impacts to protected Swainson's hawks and their nests, the following mitigation measures shall be implemented:
 - o If possible, initiate site construction activities during the non-breeding season, September 1 through February 28.
 - o A qualified biologist shall conduct a pre-construction nesting bird survey of all suitable habitats within the limits of construction of the project site and all accessible areas within 0.5 mile of the limits of construction within 14 days of the initiation of construction activity during the nesting season (March 1 through August 31).
 - o If no active Swainson's hawk nests are found, no further measures pertaining to Swainson's hawk nests are necessary.
 - o If active nests are found, the qualified biologist shall monitor the active nests for the first 24 hours prior to any construction-related activity to establish a behavioral baseline. A no-disturbance buffer around the nest shall be established. The buffer distance shall be established by a qualified biologist in accordance with CDFW's recommendations.

- o Once construction activities commence on-site, all nests shall be monitored by a qualified biologist to detect any behavioral changes as a result of construction within the project site. If behavioral changes are observed that may result in adverse effects to the success of breeding, the work causing that change shall cease and consultation with CDFW shall be initiated to identify potential avoidance and minimization measures.
 - o Pre-construction Swainson's hawk nesting surveys are not required for construction activity outside the nesting season.
- d) **California Black Rail:** There is no potential California black rail habitat with the project site. However, surveys or habitat assessments for this species have not been performed within the off-site Al Johnson Wildlife Area improvements area. To ensure that there are no impacts to California black rail, the following mitigation measures shall be implemented:
- o A qualified biologist shall conduct a habitat assessment of the off-site Al Johnson Wildlife Area improvements area to identify suitable California black rail habitat. The qualified biologist shall prepare a map identifying areas that support suitable habitat.
 - o If suitable habitat is within areas proposed for construction during the breeding season (February 1 through July 31), the qualified biologist shall conduct a pre-construction survey for the California black rail. Three surveys shall be conducted at least seven days apart during peak calling times (one half hour before dawn until three hours after, and three hours before sunset until one half hour after) using playback of taped breeding calls. The last survey shall occur within 14 days of the start of construction.
 - o If no California black rail is detected, no further measures pertaining to this species are necessary.
 - o If a California black rail is detected, impacts shall be avoided by establishing an appropriate buffer, as determined by the qualified biologist in consultation with CDFW. No project activity shall commence within the buffer area until a qualified biologist confirms that the rail has evacuated the area. The size of the buffer shall be determined by the biologist and confirmed by CDFW; buffer size may vary, depending on the nest location, nest stage, and construction activity.
- e) **Western Yellow-billed Cuckoo:** There is no Western yellow-billed cuckoo habitat with the project site. However, surveys or habitat assessments have not been performed within the off-site Al Johnson Wildlife Area improvements area. To ensure that there are no impacts to Western yellow-billed cuckoo, the following mitigation measures shall be implemented:
- o A qualified biologist shall conduct a habitat assessment of the off-site Al Johnson Wildlife Area improvements area and the three off-site Mitigation Properties to

identify suitable Western yellow-billed cuckoo habitat. The qualified biologist shall prepare a map identifying areas that support suitable habitat.

- o If suitable habitat is proposed for construction during the breeding season (June 15 to August 31), prior to construction, the qualified biologist shall conduct a pre-construction survey for Western yellow-billed cuckoo.
- o The survey shall include three visits at least 10 days apart. Each survey shall be conducted during peak activity times (6:30 a.m. to 12:00 noon) by using playback of taped “kowlp” calls. Five taped calls (each at least 30 seconds apart) shall be played every 100 meters of linear habitat.
- o If a Western yellow-billed cuckoo is detected, impacts shall be avoided by establishing an appropriate buffer, as determined by the qualified biologist in consultation with CDFW. No project activity shall commence within the buffer area until a qualified biologist confirms that the cuckoo has evacuated the area. The size of the buffer shall be determined by the biologist and confirmed by CDFW; buffer size may vary, depending on the nest location, nest stage, and construction activity.
- o If no Western yellow-billed cuckoos are detected, no further measures pertaining to Western yellow-billed cuckoos are necessary.

f) **Nuttall’s Woodpecker, Loggerhead Shrike, Yellow-billed Magpie, Oak Titmouse, and Grasshopper Sparrow:** The project site support potential nesting habitat for one special-status woodpecker and five special status passerine bird species: Nuttall’s woodpecker (USFWS conservation concern), loggerhead shrike (USFWS conservation concern and CDFW SSC), yellow-billed magpie (USFWS conservation concern), oak titmouse (USFWS conservation concern), and grasshopper sparrow (CDFW SSC). To ensure that there are no impacts to protected active nests of these species, the following mitigation measures shall be implemented:

- o A qualified biologist shall conduct a pre-construction nesting bird survey of all suitable habitats within the limits of construction within the project site and all accessible areas within 50 feet of the limits of construction within 14 days of the initiation of construction activity during the nesting season (Nuttall’s woodpecker, March-July; loggerhead shrike, March-May; yellow-billed magpie, late February-mid-July; oak titmouse, March-July; grasshopper sparrow, May-July).
- o If no active special-status bird nests are found, no further measures pertaining to special-status birds are necessary.
- o If active nests are found, the active nests will be monitored by a qualified biologist prior to any construction-related activity to establish a behavioral baseline. A no-disturbance buffer around the nest shall be established. The buffer distance shall be established by a qualified biologist in consultation with CDFW.
- o Once construction activities commence on-site, all nests shall be monitored by a qualified biologist to detect any behavioral changes as a result of construction of

the Proposed Project. If behavioral changes are observed that may result in adverse effects to the success of breeding, the work causing that change shall cease and consultation with CDFW shall be initiated to identify potential avoidance and minimization measures.

- o Pre-construction bird nesting surveys are not required for construction activity outside the nesting season.
- g) **Migratory Bird Treaty Act Birds:** Many birds, including commonly occurring species, are protected under the California Fish and Game Code and the Federal MBTA. To ensure that there are no impacts to protected birds or their active nests, the following mitigation measures shall be implemented:
 - o A qualified biologist shall conduct a pre-construction nesting bird survey of all suitable habitats within the limits of construction within the project site and all accessible areas within 50 feet of the limits of construction within 14 days of the initiation of construction activity during the nesting season (February 1 to August 31).
 - o If no protected birds are found, no further measures pertaining to protected birds are necessary.
 - o If active nests are found, a qualified biologist shall monitor the active nests prior to any construction-related activity to establish a behavioral baseline. A no-disturbance buffer around the nest shall be established. The buffer distance shall be established by a qualified biologist in consultation with CDFW.
 - o Once construction activities commence on-site, all nests will be monitored by a qualified biologist to detect any behavioral changes as a result of construction of the Proposed Project. If behavioral changes are observed that may result in adverse effects to the success of breeding, the work causing that change shall cease and consultation with CDFW shall be initiated to identify potential avoidance and minimization measures.
 - o Pre-construction bird nesting surveys are not required for construction activity outside the nesting season.

Mitigation Measure 4.8-7 Off-Site and On-Site Preservation of Grassland Habitat

CDFW recommends that projects that result in the loss of potential foraging habitat for Swainson's hawk (which includes grasslands) within 10-miles of an active nest site provide mitigation for that loss. To the extent feasible, strategies for preserving on-site grasslands as raptor and migratory bird foraging habitat shall be addressed in the Operations and Maintenance Plan prepared pursuant to the Section 404 Permit. Some of these strategies could include; but are not necessarily limited to, grazing for grassland management, monitoring for biological values, and adaptive management. Mitigation for Swainson's hawk foraging habitat would concurrently mitigate for loss of habitat

for a number of other bird species in the region such as burrowing owl, red-tailed hawk, whitetailed kite, northern harrier, Ferruginous hawk, and loggerhead shrike among others.

A Swainson's Hawk Grassland Habitat Mitigation Plan shall be developed to mitigate for the loss of foraging habitat. Therefore, the project applicant shall preserve no less than 595.7 acres of grassland and agricultural foraging habitat for Swainson's hawk. Approximately 91.4 acres of Swainson's hawk foraging habitat shall be maintained and preserved onsite. The remainder of the mitigation shall be accomplished via the preservation of 499.9 acres of grassland communities within the three off-site Mitigation Properties, which will offset the loss of foraging habitat pursuant to the CDFW-established formula for Swainson's hawk foraging habitat replacement.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Grassland and trees within the project site provide suitable foraging habitat and nesting sites for legally protected bird and raptor species including: Swainson's hawk, burrowing owl, Cooper's hawk, whitetailed kite, northern harrier, and ferruginous hawk, among others. Special status species surveys in the project site documented the presence of several legally protected bird and raptor species. As discussed above, the following special status or protected bird species were observed foraging on the project site or within the project site during surveys: tricolored blackbird, oak titmouse, Swainson's hawk, northern harrier, white-tailed kite, loggerhead shrike, yellow-billed magpie, Nuttall's woodpecker, and ferruginous hawk. Only the burrowing owl was observed nesting within the project site. The State-listed threatened Swainson's hawk is known to nest in the CSP Area immediately south of the project site (City of Roseville, 2011a) and in the Placer Ranch area to the east of the project site (ECORP, 2015b).

Construction disturbance as part of project development could result in active nest abandonment, removal of an active nest, or other injury to a protected bird or raptor species. This is considered a **significant** impact. Compliance with the MBTA and CESA would reduce impacts by prohibiting the take of any migratory bird listed, including nests, eggs or products, or the removal of any pertinent shrub or tree that could affect nesting. To ensure that legally protected birds of prey are not taken during project construction, Mitigation Measure 4.8-6 requires that, when feasible, tree removals or excavations near potential burrowing owl burrows occur during the period when these species are not nesting (September through February). In addition, other protected birds and raptors are protected from take through completion of pre-construction surveys and avoidance buffers, if necessary. After mitigation, impacts to protected birds and raptors due to construction of the Proposed Project are **less than significant**.

Compliance with the MBTA and CESA (for Swainson's Hawks), as well as implementation of Mitigation Measure 4.8-6, would reduce impacts on the nesting by preventing disturbance that would cause nest abandonment and subsequent loss of their young. Mitigation Measure 4.8-7 requires a total of 591.3 acres of suitable grassland habitat are permanently preserved both onsite

and offsite that would also reduce impacts to foraging habitat for Swainson's hawk and other protected bird species. After implementation of these mitigation measures, this impact would be **less than significant**. (DEIR 4.8-54)

Impact 4.8-7 (Loss of Grassland Habitat): Implementation of the Proposed Project would result in the loss of an estimated 407 acres of grassland and agricultural foraging habitat through grading and conversion to various urban uses.

Mitigation Measure 4.8-7 Off-Site and On-Site Preservation of Grassland Habitat is set forth in full in Section 3.8.7 in relation to Impact 4.8-6.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Non-native annual grassland is the dominant vegetation community throughout the project site.

Grassland is important for foraging for special status and other legal protected raptors, including the State threatened Swainson's hawk and a wider variety of other wildlife species such as burrowing owls and long-billed curlew. CDFW considers the loss of foraging habitat for Swainson's hawk within 10 miles of an active Swainson's hawk nest site to be detrimental to the breeding success of this species.

Implementation of the Proposed Project would result in the loss of an estimated 407 acres of grassland and agricultural foraging habitat through grading and conversion to various urban uses. This represents approximately 76.4 percent of the grasslands in the 694.4-acre project site. Due to the potential negative effects that loss of foraging habitat could have on wildlife species, this is a **significant** impact.

Implementation of Mitigation Measure 4.8-7 would reduce the impacts from loss of grassland to a **less-than-significant** level by protecting 591.3 acres of similar habitat in southwestern Placer County in perpetuity (499.9 acres will be off-site), according to a CDFW-established mitigation formula for loss of Swainson's hawk foraging habitat, and by ensuring that 91.4 acres of on-site preserved grasslands are managed as raptor and migratory bird foraging habitat. Protection of on- and off-site grasslands will reduce this impact to a **less-than-significant** level. (DEIR 4.8-55)

Impact 4.8-8 (Substantial Interference with the Movement of Resident Migratory Wildlife Species): Development of the project site could impede the movement of wildlife by disturbing and/or blocking local movement corridors. Outdoor lighting may interfere with nocturnal movement. Passive recreational use may interfere with foraging, breeding, or movement.

Mitigation Measure 4.8-8 Wildlife Movement Protection Policies

To protect the long term habitat of the University Creek stream channel and associated riparian corridor as for use as wildlife movement and migration corridors, the project applicants shall ensure that movement corridors are not obstructed. Through compliance with Section 1600 of the

CDFW Code, the applicant(s) shall enter into a Streambed Alteration Agreement prior to conducting any construction activities within the stream corridor, which sets forth mitigation measures that the applicant must implement. These measures shall include, but not be limited to, the use of a bridge and/or culvert for the road crossing that is large enough that wildlife have enough space to pass without having to travel over the road surface, the implementation of bank stabilization measures, and/or restoration and revegetation of stream corridor habitat that has been damaged due to the project's construction. The road crossing feature shall be constructed in a configuration as to provide wildlife with unimpeded passage. Furthermore, recreational use trails shall be lined by post and rail fence and signage shall be posted to direct trail users to stay within the designated trail corridor. The trails shall be closed to use one-half hour after sunset to one-half hour before sunrise and shall not be illuminated.

Mitigation Measure 4.14-3 Avoid Light Spill Over into University Creek and Open Space Areas is set forth in full in Section 3.8.14 in relation to Impact 4.14-2.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Development of the project site could impede the movement of wildlife by disturbing and/or blocking local movement corridors. Additionally, many of those species that would normally use the grasslands as a foraging area would not as easily move across the future urbanized landscapes proposed for development. With development of the Proposed Project, wildlife would be naturally restricted to the remaining areas of designated open space such as the University Creek open space area. Thus, this will become the primary wildlife corridor through the urbanized landscape.

Construction of stream crossings and other activities, as well as the introduction of artificial light, would alter the corridors and disturb the wildlife using them. The potential loss of local travel routes and the potential future restriction of movement through the site due to obstructions to the stream/riparian open space corridor are discussed below.

Wildlife species that are adapted to live in grasslands or that move between isolated pockets of water would not easily move across the future urbanized landscapes, would be displaced, and may concentrate their movements within the remaining open space. The ARSP provides for an open space corridor along University Creek which would allow relatively free access through the site. However, the construction of a road crossing for Westbrook Boulevard could create a barrier that would prevent wildlife passage along this corridor.

Erosion and runoff during construction of project facilities would be controlled by BMPs as required by the City's Improvement Standards and NPDES General Permit. Nonetheless, alterations to the flow, bed, channel, or bank of University Creek within the project site as a result of project improvements would affect the ability of the corridor to provide habitat for the wildlife species that depend upon it for feeding, cover, and nesting, and thus could result in a loss of that habitat.

Outdoor lighting can also have a negative effect on wildlife by interfering with nocturnal movement and causing disorientation, making individuals more vulnerable to predation or making it more difficult for them to capture prey. Passive recreational use along nature or bicycle trails may also have indirect impacts such as interfering with foraging, breeding, or movement. These impacts are **significant**.

Implementation of Mitigation Measure 4.8-8 requires the use of either a bridge or culvert that is large enough that wildlife has enough space to pass through the road crossing without having to travel over the road surface. Mitigation Measure 4.14-3 requires that outdoor lighting be placed, designed, and directed to avoid spillover light into the University Creek and open space preserve areas. After implementation of these mitigation measures, this impact would be **less than significant**. (DEIR 4.8-56)

Impact 4.8-10 (Loss of Riparian Habitat): Deterioration of the creek channel could result from construction activities, intrusion of artificial lighting, non-native invasive plant species, domestic animals, or human activity in or along the creek channel.

Mitigation Measure 4.8-8 Wildlife Movement Protection Policies is set forth in full in Section 3.8.7 in relation to Impact 4.8-8.

Mitigation Measure 4.14-3 Avoid Light Spill Over into University Creek and Open Space Areas is set forth in full in Section 3.8.14 in relation to Impact 4.14-2.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Implementation of the Proposed Project would result in development that would occur in proximity to the riparian habitat and stream corridor along University Creek. The extension of Westbrook Boulevard may include a culvert or bridge crossing that would impact University Creek and its riparian habitat.

Deterioration of the creek channel could result from construction activities, intrusion of artificial lighting, non-native invasive plant species, domestic animals, or human activity (i.e., jogging, walking, and biking) in or along the creek channel. Trampling of stream banks could occur when people descend or climb the banks, which would remove vegetation directly or indirectly by causing soil compaction or erosion. Increased human recreational and residential uses could result in an increase in domestic animals, which could impact native wildlife by reducing habitat and by increasing wildlife mortality. These impacts could also occur during construction of the Proposed Project. This impact is **significant**.

Implementation of Sections 1600-1607 of the Fish and Game Code would reduce impacts associated with the blocking or degradation of stream corridors by regulating activities that would alter the flow, bed, channel, or bank of streams. Implementation of Chapter 9.80 of the Municipal Code (Flood Damage Protection) would control the alteration of natural floodplains stream

channels, and natural protective barriers, which help accommodate or channel flood waters. In addition, the City's Improvement Standards and Floodplain Development Regulations would control fill, grading, dredging, and other development, which may increase flood damage. The Proposed Project would be required to obtain a USACE 404 permit and adhere to any permit requirements included therein. Mitigation Measure 4.8-8 and Mitigation Measure 4.14-3 would reduce this impact to a **less-than-significant** level along University Creek by installing fences and signage to keep trail users within designated trail corridors and limiting lighting within the riparian area. After mitigation, impacts to riparian habitat would be **less than significant**. (DEIR 4.8-59)

Impact 4.8-11 (Potential Impact to Bats): Development of the Proposed Project may impact the foraging and roosting habitats of special status bat species.

Mitigation Measure 4.8-9 Pre-Construction Surveys for Special Status Bats

To ensure that there are no impacts to active bat roosts, the following mitigation measures are recommended:

- a) A qualified biologist shall conduct a dusk emergence survey (start one hour before sunset and last three hours), followed by a pre-dawn re-entry survey (start one hour before sunrise and last for two hours), in addition a daytime visual inspection of all potential bat roosting habitat within the limits of construction within the project site included as part of the pre-construction clearance survey. If no active bat roosts or sign are observed, construction may proceed.
- b) If no active special-species bat roosts are found, no further measures pertaining to special-species bats are necessary.
- c) If roosting special-species bats are found on-site during the surveys, avoid direct and indirect impacts to roosting sites by establishing a no-disturbance buffer of 100 feet around roost sites, in consultation with CDFW.
- d) Clearing and grubbing adjacent to the roost site and lighting use near the roost site where it would shine on the roost or interfere with bats entering or leaving the roost shall be prohibited.
- e) Operation of internal combustion equipment, such as generators, pumps, and vehicles within 100 feet of the roost site shall be prohibited.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Two special status bats potentially occur in the project site: pallid bat and Townsend's big-eared bat, which are both State SSCs. The project site may support suitable foraging habitat, and the dilapidated barn/residences and several trees may support roosting or maternity sites. Development impacts to the foraging and roosting habitats of these special status bat species would be **significant**.

Implementation of Mitigation Measure 4.8-7 to protect grassland habitat will mitigate potential impacts to bat foraging habitat to less-than-significant levels. Mitigation Measure 4.8-9 ensures that a qualified biologist conduct preconstruction surveys at dusk and dawn for potential bat roosting habitat and provides avoidance measures should any special status bats be identified. With implementation of mitigation, this impact would be **less than significant**. (DEIR 4.8-60)

Impact 4.8-12 (Potential Impact to American Badger): Construction of the Proposed Project may impact badgers should they occur within the area designated for development.

Mitigation Measure 4.8-7 Off-Site and On-Site Preservation of Grassland Habitat is set forth in full in Section 3.8.7 in relation to Impact 4.8-6.

Mitigation Measure 4.8-10 Pre-Construction Surveys for American Badger

The annual grasslands within the project site have a low potential to support habitat for American badger. To ensure that there are no impacts to American badgers and their burrows, the following mitigation measures are required:

- a) In conjunction with pre-construction burrowing owl surveys (Mitigation Measure 4.8-6), a qualified biologist shall conduct pre-construction surveys for American badgers, including burrows. If no American badgers or signs are observed, construction may proceed.
- b) If no American badgers/active burrows are found, no further measures pertaining to this species are necessary.
- c) If American badgers are found on-site during the surveys, the qualified biologist shall avoid direct and indirect impacts to burrows by establishing a no-disturbance buffer of 100 feet around burrows, in consultation with CDFW.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Although no American badgers were identified during biological surveys, the annual grasslands within the project site provides marginal habitat to support the American badger (ECORP, 2015c; Appendix P). Any impacts from construction or operation of the Proposed Project to this State species of concern would be **significant**.

Construction may impact any badgers should they occur within an area designated for development. To prevent badger mortality, Mitigation Measure 4.8-10 ensures that any badger burrows present in the development footprint are avoided in consultation with CDFW. Long-term impacts to American badger habitat would occur from conversion of grasslands to urban uses. With implementation of Mitigation Measure 4.8-7 for off-site and on-site preservation of grassland, impacts to badger habitat are reduced to **less-than-significant** levels. Therefore, after mitigation, impacts from the Proposed Project would be **less than significant**. (DEIR 4.8-61)

Impact 4.8-15 (Loss of Biological Resources Due to Construction of Off-Site Infrastructure): Development of infrastructure improvements outside of the project site may result in direct and indirect impacts to biological resources.

Mitigation Measure 4.8-1(a) and (b) is set forth in full in Section 3.8.7 in relation to Impact 4.8-1.

Mitigation Measure 4.8-2 Vernal Pool Fairy Shrimp Measures is set forth in full in Section 3.8.7 in relation to Impact 4.8-2.

Mitigation Measure 4.8-3 Special Status Plant Measures is set forth in full in Section 3.8.7 in relation to Impact 4.8-3.

Mitigation Measure 4.8-4 Relocate Western Spadefoot is set forth in full in Section 3.8.7 in relation to Impact 4.8-4.

Mitigation Measure 4.8-5 Relocate Northwestern Pond Turtle is set forth in full in Section 3.8.7 in relation to Impact 4.8-5.

Mitigation Measure 4.8-6 Avoid Nesting Sites for Protected Bird Species is set forth in full in Section 3.8.7 in relation to Impact 4.8-6.

Mitigation Measure 4.8-7 Off-Site and On-Site Preservation of Grassland Habitat is set forth in full in Section 3.8.7 in relation to Impact 4.8-6.

Mitigation Measure 4.8-8 Wildlife Movement Protection Policies is set forth in full in Section 3.8.7 in relation to Impact 4.8-8.

Mitigation Measure 4.8-9 Pre-Construction Surveys for Special Status Bats is set forth in full in Section 3.8.7 in relation to Impact 4.8-11.

Mitigation Measure 4.8-10 Pre-Construction Surveys for American Badger is set forth in full in Section 3.8.7 in relation to Impact 4.8-12.

Mitigation Measure 4.8-11 Additional Surveys for Off-Site Improvement Areas

Prior to construction of any off-site infrastructure, a qualified biologist shall perform detailed, and if necessary, focused biological surveys of any undisturbed areas that would be affected by infrastructure development. If it is determined that wetland resources or sensitive species would be impacted, Mitigation Measure 4.8-1 (a) and (b), Mitigation Measure 4.8-2, or Mitigation Measure 4.8-3 shall be implemented, as appropriate to the resource. If it is determined that impacts to western spadefoot or northwestern pond turtle may occur due to off-site constructions, Mitigation Measures 4.8-4 and 4.8-5 shall be implemented, respectively. If it is determined that active nests exist within the off-site improvement location, Mitigation Measure 4.8-6 shall be implemented as appropriate to the species. If it is determined the offsite improvement is located within or adjacent to a wildlife movement corridor, Mitigation Measure 4.8-8 shall be

implemented. If any bat roosts are identified, Mitigation Measure 4.8-9 shall be implemented. If any badger burrows are located, Mitigation Measure 4.8-10 shall be implemented.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Development of the Proposed Project would require infrastructure improvements outside of the project site, such as extension of roadways; extension of water, wastewater, and recycled water infrastructure; and the extension of electric and natural gas lines. Potential impacts from these activities include both direct and indirect impacts to:

- Special status species, including State and federally threatened endangered species;
- Wetland and vernal pool habitat;
- Oak trees; and
- Stream and Riparian Habitat.

No formal focused surveys or wetland delineation have been performed within the offsite infrastructure areas (with the exception of the off-site Al Johnson Wildlife Area improvement area) as part of the BRA. Most offsite improvements would be constructed within street ROWs. Because infrastructure for the Proposed Project would be located in road ROWs or undeveloped land similar to the project site, the biological resources that would be expected to occur would not differ substantially from those identified in this EIR. Nonetheless, offsite improvements would result in **potentially significant** impacts to biological resources. Mitigation Measure 4.8-11 requires that surveys be conducted by qualified biologists prior to construction of the offsite infrastructure facilities. The purpose of these surveys will be to determine the presence or absence of sensitive biological resources in the areas that would be disturbed. If such resources are discovered, then appropriate mitigation measures as described in this EIR shall be implemented in the offsite infrastructure areas as explained in Mitigation Measure 4.8-11. These measures will ensure that impacts on special status species or their habitat that occur within the offsite infrastructure areas would be **less than significant**. (DEIR 4.8-63)

Impact 4.8-16 (Loss of Biological Resources Due to Development of Urban Reserve Parcel):

Development of the Urban Reserve parcel may result in direct and indirect impacts to biological resources.

Mitigation Measure 4.8-1(a) and (b) is set forth in full in Section 3.8.7 in relation to Impact 4.8-1.

Mitigation Measure 4.8-2 Vernal Pool Fairy Shrimp Measures is set forth in full in Section 3.8.7 in relation to Impact 4.8-2.

Mitigation Measure 4.8-3 Special Status Plant Measures is set forth in full in Section 3.8.7 in relation to Impact 4.8-3.

Mitigation Measure 4.8-4 Relocate Western Spadefoot is set forth in full in Section 3.8.7 in relation to Impact 4.8-4.

Mitigation Measure 4.8-5 Relocate Northwestern Pond Turtle is set forth in full in Section 3.8.7 in relation to Impact 4.8-5.

Mitigation Measure 4.8-6 Avoid Nesting Sites for Protected Bird Species is set forth in full in Section 3.8.7 in relation to Impact 4.8-6.

Mitigation Measure 4.8-7 Off-Site and On-Site Preservation of Grassland Habitat is set forth in full in Section 3.8.7 in relation to Impact 4.8-6.

Mitigation Measure 4.8-8 Wildlife Movement Protection Policies is set forth in full in Section 3.8.7 in relation to Impact 4.8-8.

Mitigation Measure 4.8-9 Pre-Construction Surveys for Special Status Bats is set forth in full in Section 3.8.7 in relation to Impact 4.8-11.

Mitigation Measure 4.8-10 Pre-Construction Surveys for American Badger is set forth in full in Section 3.8.7 in relation to Impact 4.8-12.

Mitigation Measure 4.8-12 Conduct Biological Surveys of Urban Reserve Parcel

Prior to construction activities within the Urban Reserve parcel, a qualified biologist shall perform detailed, and if necessary, focused biological surveys of any undisturbed areas that would be affected by development. If it is determined that wetland resources or sensitive species would be impacted, Mitigation Measure 4.8-1 (a) and (b), Mitigation Measure 4.8-2, or Mitigation Measure 4.8-3 shall be implemented, as appropriate to the resource. If it is determined that impacts to western spadefoot or northwestern pond turtle may occur, Mitigation Measures 4.8-4 and 4.8-5 shall be implemented, respectively. If it is determined that active nests exist, Mitigation Measure 4.8-6 shall be implemented as appropriate to the species. If development is proposed within or adjacent to a wildlife movement corridor, Mitigation Measure 4.8-8 shall be implemented. If any bat roosts are identified, Mitigation Measure 4.8-9 shall be implemented. If any badger burrows are located, Mitigation Measure 4.8-10 shall be implemented.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Development of the Urban Reserve parcel with a single residential unit could result in both direct and indirect impacts to:

- Special status species, including State and federally threatened endangered species;
- Wetland and vernal pool habitat;
- Oak trees; and
- Stream and Riparian Habitat.

No formal focused surveys or wetland delineations have been performed within the Urban Reserve parcel as part of the BRA. However, University Creek flows through the southern portion of the parcel and habitat types are expected to be substantially similar to those found within the project site. Therefore, construction activities within the Urban Reserve parcel would result in potentially significant impacts to biological resources.

Mitigation Measure 4.8-12 requires that surveys be conducted by qualified biologists prior to construction within the Urban Reserve parcel. The purpose of these surveys will be to determine the presence or absence of sensitive biological resources. If such resources are discovered, then appropriate mitigation measures as described in this EIR shall be implemented as explained in Mitigation Measure 4.8-12. These measures will ensure that impacts on special status species or their habitat that occur within the Urban Reserve parcel would be less than significant.

Impact 4.8-18 (Cumulative Impacts to Biological Resources): Full build out of the ASRP would significantly contribute to the urbanization of western Placer County.

Mitigation Measure 4.8-1(a) and (b) is set forth in full in Section 3.8.7 in relation to Impact 4.8-1.

Mitigation Measure 4.8-2 Vernal Pool Fairy Shrimp Measures is set forth in full in Section 3.8.7 in relation to Impact 4.8-2.

Mitigation Measure 4.8-3 Special Status Plant Measures is set forth in full in Section 3.8.7 in relation to Impact 4.8-3.

Mitigation Measure 4.8-4 Relocate Western Spadefoot is set forth in full in Section 3.8.7 in relation to Impact 4.8-4.

Mitigation Measure 4.8-5 Relocate Northwestern Pond Turtle is set forth in full in Section 3.8.7 in relation to Impact 4.8-5.

Mitigation Measure 4.8-6 Avoid Nesting Sites for Protected Bird Species is set forth in full in Section 3.8.7 in relation to Impact 4.8-6.

Mitigation Measure 4.8-7 Off-Site and On-Site Preservation of Grassland Habitat is set forth in full in Section 3.8.7 in relation to Impact 4.8-6.

Mitigation Measure 4.8-8 Wildlife Movement Protection Policies is set forth in full in Section 3.8.7 in relation to Impact 4.8-8.

Mitigation Measure 4.8-9 Pre-Construction Surveys for Special Status Bats is set forth in full in Section 3.8.7 in relation to Impact 4.8-11.

Mitigation Measure 4.8-10 Pre-Construction Surveys for American Badger is set forth in full in Section 3.8.7 in relation to Impact 4.8-12.

Mitigation Measure 4.8-11 Additional Surveys for Off-Site Improvement Areas is set forth in full in Section 3.8.7 in relation to Impact 4.8-15.

Mitigation Measure 4.8-12 Conduct Biological Surveys of Urban Reserve Parcel is set forth in full in Section 3.8.7 in relation to Impact 4.8-16.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

The cumulative context for the evaluation of impacts on biological resources is regional development, particularly western Placer County, which contains habitat very similar to the project site.

Over the past few decades, tens of thousands of acres of grasslands have been developed or designated for development in western Placer County. Development has occurred in and around the cities of Roseville, Lincoln, and Rocklin. Development has also occurred further north in the grasslands of Sacramento County. Future development would result in the further decline of native plant communities, including vernal pool habitat. The proximity of urban development also would contribute to the distribution of non-native plant and wildlife species, which would further degrade the habitat and available niches for native species in the surrounding region. This impact is **significant and cumulative**.

The full build out of the ARSP would significantly contribute to the urbanization of western Placer County.

Vernal Pool Wetlands/Rare Plants

The Proposed Project would result in the loss of approximately 558.7 acres of grasslands that contain scattered vernal pools. Implementation of the ARSP is anticipated to result in the loss of approximately 18.640 acres of wetlands and waters of the U.S. Within the project site, the Placer Parkway regional transportation project would convert an additional 4.562 acres of wetlands, resulting in a cumulative loss of wetlands within the project site of 23.202 acres. Other development that would convert vernal pool grasslands to urban development includes Placer Vineyards, Regional University, Creekview, Brookfield, and Curry Creek. Cumulative loss of vernal pools is a **significant** impact. The Proposed Project's incremental contribution to the cumulative impact is considerable.

Raptor Species

Based on information from other environmental documents and the CNDDB, potential habitat for Swainson's hawk, burrowing owl, and other species are widely distributed within Placer and adjacent counties. Other projects in the vicinity will convert grassland and cropland, both of which provide foraging habitat. This impact is **significant and cumulative**. The ARSP would result in

the permanent loss of habitat for these species, which are present within the development boundaries. This is a cumulatively considerable contribution to the **significant** impact.

Mitigation measures identified reduce the severity of significant project related impacts to a **less-than-significant** level. However, even with these mitigation measures, a substantial change in habitat conditions would result as a consequence of cumulative development in the region, transitioning from a rural to an urban environment. The amount of undeveloped habitat available for wildlife use will decrease as development occurs and as the amount of habitat decreases, wildlife species that are incompatible with urban development will be displaced.

Cumulative development within the region would result in the loss of grasslands, wetlands, and vernal pool habitat. The loss of this habitat would also result in impacts to special status plant and animal species. Mitigation to a less-than-significant level is not possible while still allowing for implementation of the specific plan. Because it is impossible to allow for development of the Proposed Project without incremental contribution to the impact on loss of grasslands, wetlands and vernal pool habitat and mitigation of this impact to a less-than-significant level is not feasible, the regional impacts would be considered **significant and unavoidable**. (DEIR p. 4.8-63.) As explained in Section 4, “Statement of Overriding Considerations”, the environmental, economic, legal, social, technological, and other benefits outweigh and override the remaining significant impacts related the Proposed Project’s incremental contribution to the impact on loss of grasslands, wetlands, and vernal pool habitat.

3.8.8. Cultural Resources

Impact 4.9-1 (Cause an Adverse Change to Historical or Archaeological Resources):

Development of the Urban Reserve parcel with a single residential unit consistent with allowable uses under the proposed general plan designation could impact historic or archaeological resources.

Mitigation Measure 4.9-1 Conduct Archaeological Survey of UR Parcel

Development proposals for the Urban Reserve parcel shall identify known and/or potential archaeological sites, based on field surveys of the area proposed for development conducted by a qualified archaeologist. If significant resources or significant archaeological sites are present, the development proposal shall designate the area surrounding the site as open space and the site shall be completely avoided.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Urban Reserve Parcel

There are no known structures or previously recorded historic or archaeological resources within the 20-acre Urban Reserve parcel; however, this area has not been subject to a cultural resources survey because no development is proposed at this time. Development of the Urban Reserve parcel

with a single residential unit consistent with allowable uses under the proposed general plan designation could impact historic or archaeological resources. This is considered a **potentially significant** impact. Mitigation Measure 4.9-1 requires that appropriate studies be conducted prior to issuance of building permits for construction within the Urban Reserve parcel, and that if any prehistoric or historical resources are found, that they be evaluated for significance and avoided, preserved, or recorded as appropriate. This mitigation measure would reduce this impact to a **less-than-significant** level. (DEIR 4.9-15)

Impact 4.9-2 (Disturb, Damage, or Destroy Unidentified Subsurface Archaeological or Historical Resources or Human Remains during Project Construction): Buried prehistoric resources or human remains could be encountered during ground disturbing activities.

Mitigation Measure 4.9-2(a) Cease Work and Consult with Qualified Archaeologist

Should any cultural resources, such as wells, foundations, or debris, or unusual amounts of bone, stone or shell, artifacts, burned or baked soils, charcoal, or human remains be encountered during subsurface excavation or construction activities, work shall be suspended within 100 feet of the discovery. The City shall be immediately notified. At that time, a qualified professional archaeologist shall assess the resource and provide recommendations for treatment if the resource appears to be potentially eligible for listing on the NRHP or CRHR. Possible management recommendations could include, but not be limited to, avoidance, construction monitoring, recordation, site testing, or data recovery excavations. The contractor shall implement any measures deemed feasible and necessary by City staff, in consultation with a qualified archaeologist, to avoid or minimize significant effects to the cultural resources prior to resumption of ground-disturbing activities.

Mitigation Measure 4.9-2(b) Cease Work and Consult with Qualified Archaeologist

If human remains are uncovered during project construction, pursuant to PRC Section 5097.98 and Section 7050.5 of the California Health and Safety Code, the Placer County Coroner shall be notified immediately. California law recognizes the need to protect interred human remains, particularly Native American burials and items of cultural patrimony, from vandalism and inadvertent destruction. The procedures for the treatment of discovered human remains are contained in California Health and Safety Code §7050.5 and §7052 and California PRC §5097. If human remains are uncovered during ground-disturbing activities, all such activities within a 100-foot radius of the find shall be halted immediately and the City's designated representative shall be notified. The City shall immediately notify the Placer County coroner. The coroner is required to examine all discoveries of human remains within 48 hours of receiving notice of a discovery on private or state lands (Health and Safety Code Section 7050.5[b]). If the coroner determines that the remains are those of a Native American, he or she must contact the NAHC by phone within 24 hours of making that determination (Health and Safety Code Section 7050[c]). The City shall contact the Most Likely Descendent (MLD), as determined by the NAHC, regarding the remains.

The MLD, in cooperation with the City and a qualified professional archaeologist shall develop a plan of action to avoid or minimize significant effects to the human remains prior to resumption of ground-disturbing activities.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

The only cultural resource identified within the project site is an isolated mano, a prehistoric hand-held grinding tool found during site surveys conducted in 2000. This artifact could not be located during cultural resource surveys of the project site performed in 2008, however (ECORP, 2008b). Historic use of part of the project site as a ranch indicates that there is potential for buried historical resources as well; historical archaeological deposits uncovered during construction would not necessarily be associated with the ranch and would need to be evaluated for their connection to previous use of the project site as a ranch.

The presence of a water source, University Creek, along the southern portion of the Proposed Project, and the previously located mano indicate some sensitivity for prehistoric resources. Buried prehistoric resources or human remains could be encountered during grading, excavation, and or construction as well. If such resources are encountered during construction either on-site or within the off-site improvements areas, they could be damaged, destroyed, or removed, resulting in a loss of integrity or other criteria that could make them eligible to the CRHR or the NRHP. This is considered a **potentially significant** impact.

If evidence of historic or prehistoric artifacts or sites or human remains is uncovered during project development, Mitigation Measure 4.9-2 requires that all work cease within 100 feet of the find so that artifacts or remains are not further damaged by equipment. Mitigation Measure 4.9-2 reduces impacts to unknown cultural resources that qualify as historical resources, unique archaeological resources, historic properties, or human remains by requiring avoidance where feasible, or appropriate study, handling, and recordation of such resources. Mitigation Measure 4.9-2 also outlines the procedures established in the California Health and Safety Code for human remains. Adherence to these measures would reduce potential impacts to these resources or human remains to a **less-than-significant** level. (DEIR 4.9-16)

Impact 3.4.9 (Disturb, Damage, or Destroy As-Yet Unknown Unique Paleontological Resources During Project Construction): The Proposed Project could result in damage or destruction of as-yet unknown paleontological resources.

Mitigation Measure 4.9-3 Monitor for Paleontological Resources, Cease Work and Consult with Qualified Paleontologist

The paleontological report prepared for the Proposed Project included identification of fossiliferous Turlock Lake and Riverbank formations within portions of the project site, beginning approximately two feet below ground surface and continuing up to eight feet below ground surface. Because fossil localities cannot be predicted without actually disturbing a rock unit, a qualified

professional paleontologist (as defined by the Society of Vertebrate Paleontology 2010) shall be retained to provide awareness training for construction personnel involved in earth-moving activities. Construction personnel to be involved with earth-moving activities shall be informed that fossils could be discovered during excavation that these fossils are protected by laws, on the appearance of common fossils, and on proper notification procedures should fossils be discovered.

In addition, a qualified professional paleontologist shall monitor earth-moving during the initial project grading that impacts sediment greater than two feet (0.6 meters) in depth in areas with mapped Turlock Lake or Riverbank formation geologic units to observe the stratigraphy and any fossils exposed by excavation. This shall not be required in areas where sediments will be buried but not otherwise be disturbed. If no evidence of fossils is seen in the initial grading, a program of periodic spot checks of the deepest excavations or those judged most likely to disturb fossils shall be instituted until excavations have been completed. Should any evidence of paleontological resources (e.g., fossils) be encountered, work shall be suspended within 100 feet of the discovery, and the City shall be notified immediately. At that time, the paleontologist shall assess the resource and provide appropriate management recommendations. Recommendations shall include, but are not limited to, salvage and treatment as described by the Society of Vertebrate Paleontology (2010). This treatment shall include preparation, identification, determination of significance, and curation into a public museum.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

In areas where geological formations are not exposed, paleontological resources are typically not visible but may be present. Much of the project site is capped by two feet of plow-disturbed soils. Below this plow zone, the project site is underlain by a one-foot- to six-foot-thick stratum of Turlock Lake and/or Riverbank formation sediments, either of which could include fossil resources.

During the paleontological survey for the Proposed Project in 2011, ichnofossils and fossilized plant fragments were identified in Turlock Lake Formation sediments along University Creek. These fossil discoveries suggest a high potential for additional similar fossil remains to be impacted by project construction.

If exposed, fossils in these formations could be damaged or destroyed during site preparation, similar to archaeological resources. If such resources are encountered during construction either on-site or within the off-site improvements areas, they could be damaged, destroyed, or removed, resulting in a loss of data potential. This is considered a **potentially significant** impact.

Unlike some archaeological resources, which can be identified readily, paleontological resources may not be recognized except by a qualified paleontologist, necessitating a program of worker training and construction monitoring. If evidence of paleontological resources is uncovered during project development, Mitigation Measure 4.9-3 requires that all work cease within 100 feet of the

find so that fossils are not further damaged by equipment. Mitigation Measure 4.9-3 reduces impacts to unique paleontological resources as defined by CEQA. Adherence to these measures would reduce the potential impacts to these resources to a **less-than-significant** level. (DEIR 4.9-17)

Impact 3.4.9 (Damage or Destroy Historical, Archaeological, Prehistoric, or Unique Paleontological Resources during Construction of Off-Site Infrastructure): Historic resources, prehistoric resources, and/or paleontological resources could be located within areas that would be disturbed during construction of off-site infrastructure.

Mitigation 4.9-2 (a) and (b) Cease Work and Consult with Qualified Archaeologist is set forth in full in Section 3.8.8 in relation to Impact 4.9-2.

Mitigation 4.9-3 Monitor for Paleontological Resources, Cease Work and Consult with Qualified Paleontologist is set forth in full in Section 3.8.8 in relation to Impact 4.9-3.

Mitigation Measure 4.9-4 Conduct Appropriate Off-Site Studies

Prior to undertaking construction of off-site infrastructure, the City shall determine whether or not cultural resource surveys have been undertaken for any areas to be disturbed during construction. If surveys were conducted, the City shall document that any identified resources were treated as recommended in the studies. If no studies or surveys were conducted, the City shall ensure that a qualified archaeologist conducts the appropriate level of study. If significant resources or significant archaeological sites are present, they shall be avoided, as feasible. If avoidance of such resources is not feasible, recordation of the sites shall be required, along with treatment as is recommended by the archaeologist after consultation with State Historic Preservation Office (SHPO) and, if the find is prehistoric, NAHC. If unknown resources are encountered during construction, recommendations, including the possible management recommendations listed in Mitigation Measures 4.9-2 and 4.9-3, shall be implemented to ensure that the resources are avoided, protected, and/or recorded.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Development of the Proposed Project would require infrastructure improvements outside of the project site, such as extension of water, wastewater, recycled water, natural gas lines, power lines, and roadway extensions (Westbrook Boulevard). In most cases, offsite infrastructure would be located within existing or planned roadway rights-of-way, and the potential for cultural resources to occur would have been addressed during the planning of those roads, but there may be exceptions.

Although overall infrastructure needs and general off-site infrastructure locations have been identified for the Proposed Project, the precise alignments and design of off-site improvements cannot be determined at the Plan-level phase of development. Project-level plans will be developed

in the future, as overall development in the project site progresses and the need for the infrastructure arises. Because the precise alignments and design of the off-site improvements have yet to be determined—and cannot be determined at the Plan-level phase of analysis—additional cultural resource surveys may need to be completed for small areas of land. Therefore, this analysis assumes that historic resources (both subsurface and buildings), prehistoric resources (primarily sub-surface), and/or paleontological resources could be located within areas that would be disturbed during construction of off-site infrastructure. If encountered during grading, excavation, and construction, such resources could be damaged, destroyed, or removed, resulting in a direct loss and/or loss of integrity. This is a **potentially significant** impact

Mitigation Measure 4.9-4 requires that appropriate studies be conducted prior to construction of off-site infrastructure, and if any historical resources, unique archaeological resources, paleontological resources, or prehistoric resources are found that they be evaluated for significance, and avoided, preserved, and/or recorded as appropriate. This is consistent with Section 15064.5 of the CEQA Guidelines for determining significance and PRC section 21803 (b)-(f) regarding preservation and recording. In addition, Mitigation Measures 4.9-2 and 4.9-3 would ensure that work will cease if cultural or paleontological resources are discovered during construction, until such resources can be evaluated and treated as warranted by their significance. These mitigation measures would reduce this impact to a **less-than-significant** level. (DEIR 4.9-18)

Impact 4.9-5 (Cumulative Impacts to Cultural and Paleontological Resources): Construction of the Proposed Project could result in damage or destruction of as-yet unknown cultural or paleontological resources.

Mitigation 4.9-1 Conduct Archaeological Survey of Urban Reserve Parcel is set forth in full in Section 3.8.8 in relation to Impact 4.9-1.

Mitigation 4.9-2 (a) and (b) Cease Work and Consult with Qualified Archaeologist is set forth in full in Section 3.8.8 in relation to Impact 4.9-2.

Mitigation 4.9-3 Monitor for Paleontological Resources, Cease Work and Consult with Qualified Paleontologist is set forth in full in Section 3.4.8 in relation to Impact 4.9-3.

Mitigation 4.9-4 Conduct Appropriate Off-Site Studies is set forth in full in Section 3.8.8 in relation to Impact 4.9-4.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

The cumulative geographic context for the evaluation of potential cumulative impacts to cultural resources consists of the City of Roseville and western Placer County. Cultural and paleontological resources have been recorded near the project site, and project construction could result in the

damage or destruction of as-yet unknown cultural or paleontological resources. This is considered a **potentially significant** cumulative impact.

Mitigation Measures 4.9-1 and 4.9-4 would reduce the Proposed Project's contributions to cumulative cultural resources impacts by ensuring that appropriate surveys are conducted with the Urban Reserve and off-site improvement areas to identify cultural resources, and that cultural resources discovered during surveys are properly recorded and handled. Mitigation Measure 4.9-2 would further reduce the Proposed Project contributions to cumulative cultural resources impacts by ensuring that unknown cultural resources or human remains discovered within the project site are avoided or properly recorded and handled if discovered during construction. With mitigation, the Proposed Project's contribution to cumulative impacts to historic and archaeological resources would be **less than significant**.

Mitigation Measure 4.9-3 would reduce the Proposed Project's contribution to cumulative paleontological resources impacts by ensuring that fossils discovered within the project site are avoided, recorded, or otherwise treated, if discovered during construction. With mitigation, the Proposed Project's contribution to cumulative impacts to paleontological resources would be **less than significant**. (DEIR 4.9-19)

3.8.9. Hazardous Materials and Public Safety

Impact 4.10-1 (Create a Significant Hazard to the Public or the Environment through the Routine Transport, Use, or Disposal of Hazardous Materials or through Reasonably Foreseeable Upset or Accident Conditions Involving the Release of Hazardous Materials into the Environment): Construction activities could result in the release of hazardous materials, if one or more of the existing hazardous materials are not handled or removed appropriately.

Mitigation Measure 4.10-1 Identify and Remediate Soil Contamination and Existing Hazardous Materials within the ARSP

As a condition of approval of the ARSP, the following recommendations from the Phase I ESA for the project site (ENGEO, 2006) shall be completed prior to issuance of grading permits:

1. Stained soil observed beneath one of the 5-gallon buckets used to store Tech 2000 Mineral Gear Oil shall be removed and properly disposed of at an appropriate disposal facility.
2. Stained soil measuring approximately 1 foot in diameter beneath one of the above-ground fuel storage tanks next to the steel silo in the northern portion of the property shall be removed and properly disposed of at an appropriate disposal facility.
3. The 21 55-gallon steel drums near the farm facility shall be removed and properly disposed of at an appropriate disposal facility.
4. A statistically significant number of soil samples shall be collected from the surface soil within the boundaries of the proposed school site and analyzed for agricultural chemicals per EPA guidelines.

5. Should the results indicate the presence of a statistically significant concentration of agricultural chemicals with the potential to cause harm to sensitive receptors (such as school children), a Phase II ESA shall be conducted to determine the extent of the contamination and provide recommendation to remediate the school site. In consultation with DTSC, the proponent of the school development shall develop a workplan based on the recommendations of the Phase II ESA to remediate the project site.
6. Debris at various locations across the project site shall be removed and properly disposed of.
7. The burn wood pile measuring approximately 500 feet long by 6 feet tall by 6 feet wide along the southern portion of the project site shall be removed prior to construction at the project site.
8. If evidence of further soil contamination, septic tanks, or other underground storage tanks are encountered in the project site, work shall cease until the area can be tested by a qualified professional meeting EPA's definition of an Environmental Professional under the All Appropriate Inquiries Rule in accordance with CERCLA. The qualified professional shall provide recommendations for further remediation in compliance with federal, state, and local regulations. If necessary, contaminated materials shall be removed and properly disposed or remediated, and regulatory site closure obtained. Remediation activities could include removal of contaminated soil, and/or treatment. The City shall ensure that any necessary investigation and/or remediation activities are coordinated with the RFD, PCDEH, and if needed, other appropriate federal, state and local agencies. Once a site is remediated to the satisfaction of the appropriate regulatory agency, construction can continue.

Mitigation Measure 4.10-2 Identify and Remediate Soil Contamination and Existing Hazardous Materials within the Urban Reserve Parcel

Development proposals for the Urban Reserve parcel shall include a Phase I ESA and require that recommended testing and remediation identified in the Phase I ESA be performed. City conditions of approval shall require that, if evidence of soil contamination is encountered in the area of the Urban Reserve proposed to be developed, work shall cease until the area can be tested, and, if necessary, be remediated. As part of this process, the City shall ensure that any necessary investigation and/or remediation activities conducted in the Urban Reserve parcel are coordinated with the RFD, PCDEH, and if needed, other appropriate state and/or local agencies. Once a site is remediated, construction may continue.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Hazardous materials regulations were established at the state level to ensure compliance with federal regulations to reduce the risk to human health and the environment from the routine use of

hazardous substances. These regulations must be implemented by employers and businesses, and are monitored by Cal OSHA in the workplace, DTSC for hazardous waste, and RFD.

Implementation of existing General Plan Safety Element hazardous materials policies that address hazardous materials disclosure, compliance with applicable federal and state laws and regulations that are administered and enforced by the CUPA, and compliance with RFD standards would reduce impacts associated with the routine use, storage, and transportation of hazardous materials to a less-than-significant level.

Hazardous Materials Usage and Handling during Construction

Hazardous materials would be used in varying amounts during construction and operations within the project site. Construction contractors would be required to comply with applicable federal and state environmental and workplace safety laws. In addition, the SWPPP required to be developed for construction activities within the project site will contain provisions to prevent comingling of construction-related hazardous substances with surface waters, including stormwater runoff. Adherence to these regulatory requirements would ensure that the potential for hazardous materials releases during construction would be a less-than-significant impact.

Exposure of construction workers to hazardous materials could occur through improper handling or use of hazardous materials or hazardous wastes during construction or operation of the Proposed Project, particularly by untrained personnel; transportation accidents; improper disposal methods; or fire, explosion, or other emergencies. In addition, construction workers could be exposed to hazardous materials, such as asbestos dust, lead paint chips, and lead dust, through demolition of the existing structures on the project site.

However, project compliance with the CARB and NESHAP requirements for asbestos abatement in structures containing ACMs, as well as implementation of DTSC and Cal OSHA requirements for removing structures with lead-based paint, would prevent release into the environment. Compliance with Cal OSHA and DTSC requirements for employee training and monitoring would reduce potential impacts to construction workers from hazardous materials usage and handling to a less-than-significant level.

Discovery of Contaminated Soil or Groundwater during Construction

Under the Proposed Project the existing wells would be demolished and the existing sewage system would be abandoned. Although no potential environmental concerns were identified at these sites in the Phase I ESA, contaminated soil or groundwater may be present. Hazardous materials could be released during construction if one or more of these existing hazardous materials are not handled or removed appropriately. While the risk is low, there is a potential that soil-disturbing activities could expose construction workers or the environment to contaminated debris or elevated levels of hazardous chemicals or that hazardous substances would be spread inadvertently, resulting in a greater aerial extent of contamination. In addition, with the previous use of the site as agricultural land, widespread use of associated chemicals, including, but not

limited to, herbicides, pesticides, and fertilizers, may have occurred within the designated school site. Soil containing elevated levels of contaminants, if left unmanaged, would pose a health risk to future occupants and users of the site. It is also possible that existing septic tanks, wells, or other underground storage devices that have not been identified could have been installed prior to permitting or closure requirements. The potential for hazardous material contamination is considered a **potentially significant** impact.

Implementation of applicable regulations in Title 40 CFR by the Applicant, under the oversight of the CUPA, DTSC, and/or the RWQCB, would ensure that any soil contamination from past uses would be investigated and disposed of, or remediated, according to established protocols. In addition, Mitigation Measure 4.10-1 requires that the recommendations provided in the Phase I ESA be incorporated as a condition of approval of the ARSP. Mitigation Measure 4.10-2 requires that a Phase I ESA be conducted for the Urban Reserve parcel and recommendations implemented prior to approval of development within that parcel. With the implementation of these measures, impacts associated with the potential release of previously identified hazardous materials within the project site would be reduced to a **less-than-significant** level. (DEIR 4.10-15)

Impact 4.10-4 (Potential for Cumulative Effects Associated with Hazards and Hazardous Materials): The Proposed Project and related projects would all involve the storage, use, disposal, and transport of hazardous materials during construction and operation.

Mitigation Measure 4.10-1 Identify and Remediate Soil Contamination and Existing Hazardous Materials within the ARSP is set forth in full in Section 3.8.9 in relation to Impact 4.10-1.

Mitigation Measure 4.10-2 Identify and Remediate Soil Contamination and Existing Hazardous Materials within the Urban Reserve Parcel is set forth in full in Section 3.8.9 in relation to Impact 4.10-1.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

The Proposed Project and related projects would all involve the storage, use, disposal, and transport of hazardous materials to varying degrees during construction and operation. Impacts related to these activities are extensively regulated by various federal, state, and local agencies, and it is assumed that related projects would also comply with these hazardous materials regulations. Reduction of project-related impacts through compliance with laws and regulations, and implementation of Mitigation Measures 4.10-1 and 4.10-2, as discussed under Impact 4.10-1, would ensure that operation and construction activities would not result in impacts that would be cumulatively considerable. Therefore, this impact is considered **less than significant** with mitigation. (DEIR 4.10-21)

3.8.10. Public Utilities – Water

Impact 4.12.1-1 (Availability of Water Supplies to Meet Demand): The City’s water supply of 58,900 AFY is not sufficient to serve all of the projected demand under full buildout of the General Plan plus the Proposed Project’s demand.

Mitigation Measure 4.12.1-1 Secure Adequate Water Supply

Prior to the approval of building permits, proponents of the Proposed Project will provide their proportionate share of required funding to the City for the acquisition and delivery of treated potable and recycled water supplies to the Proposed Project area. Additionally, prior to the approval of building permits, the City shall enter into agreement with PCWA to acquire water supplies of sufficient quantity to serve the ARSP as described in the EIR and WSA. The identified source would need to be legally available and sufficient to meet the demand of the Proposed Project, consistent with the WFA and City policies and California Water Code Section 10910 et seq. and Government Code Section 66473.7 subject to a completed environmental review, approved by the agency with jurisdiction over the source, and funded.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

The City’s water supply entitlements are allocated to a project at the time they are approved rather than at the time they are constructed, this analysis conservatively bases the availability of water supplies assuming buildout of the City’s General Plan and approved specific plans. At buildout of the City’s General Plan, citywide potable water demands are estimated to be 58,590 AFY. Development of the ARSP in combination with projected potable water demand for buildout of the City would be 59,651 AFY (58,590 AFY + 1,061 AFY). Therefore, in normal/wet years, the City’s water supply of 58,900 AFY (see Table 4.12.1-2) is not sufficient to serve all of the projected demand under full buildout of the General Plan plus the Proposed Project’s demand. When compared to the total projected potable water demand of 59,651 AFY, there is a shortage of 751 AFY of water at buildout. Since there is a shortage during normal/wet years, there would be an even greater shortage during driest (critically dry) years due to the additional restrictions under the WFA. Therefore, as concluded in the WSA (Appendix E) the City does not currently have adequate surface water supplies to meet the additional demands of the Proposed Project at buildout of the General Plan; this is considered a **potentially significant** impact.

The amount of potable water needed to service the project site (1,061 AFY) has been rounded up to 1,500 AFY to give the City some long-term flexibility with its water supply. Mitigation Measure 4.12.1-1 requires that an agreement between the City and PCWA be entered into prior to the approval of any building permits to ensure that sufficient water supplies are acquired before the additional demand of the Proposed Project starts to occur. In the unlikely event that the City is unable to enter into an agreement with PCWA for water to serve ARSP, water will have to be obtained through another source such as the proposed SRWRP, described above. If this occurs,

additional environmental review would be required. The SRWRP alternative is being considered to serve cumulative conditions in 2035; therefore, additional information on the SRWRP is included within Impact 4.12.1-8.

With the proposed acquisition of 1,500 AFY of new surface water supplies obtained from PCWA in accordance with the City's General Plan (Mitigation Measure 4.12.1-1), there would be sufficient water supplies to serve the Proposed Project in all years (Normal, Single Dry, Multiple Dry water years); therefore, water supply impacts are considered **less than significant**. (DEIR 4.12.1-40)

Impact 4.12.1-4 (Capacity of Water Treatment System to Meet Potable Water Demand): ARSP would contribute to the need to develop the Ophir WTP, would result in significant environmental impacts.

Mitigation: In light of known economic, legal, social, technological, or other considerations, no feasible or potentially feasible measures to mitigate this impact is identified in the EIR.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

City of Roseville Water Treatment Plant

Under agreement between PCWA and the City of Roseville, currently available capacity at the Barton Road WTP may be made available for the Proposed Project on an interim basis to allow funding of Ophir WTP at a later date, subject to Ophir WTP being on-line in time for the Barton Road WTP to serve other planned demands. Consequently, near-term impacts are considered less than significant.

PCWA Water Treatment System

The ARSP would require PCWA to treat an additional 1,500 AFY or 1.3 mgd of water to meet Proposed Project buildout water demands. Using the maximum day peaking factor of 2.0 described above, 2.6 mgd of treatment capacity would be needed to serve build out of the Proposed Project. Long-term WTP capacity for the Foothills/Sunset/Ophir Area would be provided by the construction of the future Ophir WTP.

The construction of the Ophir WTP (previously referred to as the Foothill Phase II WTP and Pipeline Project) was addressed in the Foothill Phase II WTP and Pipeline EIR (Ophir WTP EIR). The Ophir WTP EIR is incorporated into this document by reference, as described within Section 1.4 of the DEIR. The findings of the Ophir WTP EIR were that construction-related activities (including site grading) would generate short-term emissions of criteria pollutants, including suspended and inhalable particulate matter and equipment exhaust emissions, which would adversely affect air quality. These impacts to air quality were determined to be significant and unavoidable. However, impacts to the remaining issues analyzed by the EIR were found either to

be less than significant or would be reduced to less than significant through the implementation of adopted mitigation measures.

Because the ARSP would contribute to the need to develop the Ophir WTP, which would result in significant environmental impacts, mitigation to a less-than-significant level is not possible while still allowing for implementation of the specific plan. Because it is impossible to allow development of the Proposed Project without contributing to the need to develop the Ophir WTP and mitigation to a less-than-significant level is infeasible, the short-term cumulative impact is considered **significant and unavoidable**. (DEIR p. 4.12.1-47.) As explained in Section 4, “Statement of Overriding Considerations”, the environmental, economic, legal, social, technological, and other benefits outweigh and override the remaining significant short-term impacts related to the Proposed Project’s incremental impact of development of the Ophir WTP.

Impact 4.12.1-8 (Cumulative Water Supply and Water Treatment Impacts): Development of the Proposed Project, along with foreseeable future development within the City of Roseville, would exceed the City’s currently contracted surface water supply.

Mitigation: In light of known economic, legal, social, technological, or other considerations, no feasible or potentially feasible measures to mitigate this impact is identified in the Final EIR.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

Water Supply

Development of the Proposed Project, along with other foreseeable future development within the City of Roseville (which includes buildout of the City’s existing General Plan, the ARSP Area, the CSP Area, and Hewlett Packard/Campus Oaks Project), would exceed the City’s currently contracted surface water supplies. This is a **significant** impact.

The cumulative analysis for water supply, distribution, and storage considers the potential environmental effects of supplying water to the Proposed Project in addition to regional water demands generated in Sacramento County, South Placer County, and Western El Dorado County under the provisions of the WFA. The analysis also considers other past, present, and reasonably foreseeable future projects and regulations that govern regional water supply operations.

Two scenarios have been identified for securing additional water supplies to meet the buildout demand under future cumulative conditions.

Scenario 1

“Scenario 1” would consist of the full utilization of the City’s American River supply allocated by the WFA, with an additional 10 mgd of water acquired through an agreement with PCWA. Because the City’s WFA allocation is subject to CVP deficiencies under drier year types, the additional

water demands under future cumulative conditions may require groundwater pumping in years when the City receives less than a full surface water allocation.

Impacts that would result from construction of infrastructure necessary to treat and deliver additional PCWA water from the proposed Ophir WTP to the City of Roseville were disclosed in the Ophir WTP EIR and PVSP EIR. These EIRs are incorporated by reference, as discussed in Section 1.4, concluded that there would be potential environmental impacts in the following areas: agricultural resources, aesthetics/light and glare, hydrology and water quality, biological resources, geology and soils, cultural resources, traffic/transportation, air quality, noise, public services, and hazards/hazardous materials. Mitigation measures were developed to reduce all potential impacts to less-than-significant levels with the exception of the following impact to Air Quality, which would remain significant and unavoidable: Direct construction related air emissions (dust from earthmoving and NO_x from construction vehicle exhaust). Because cumulative development would require the development of infrastructure to treat and deliver water, which would result in significant unavoidable impacts, the project's contribution towards the need to construct water delivery infrastructure and potable water treatment for the Proposed Project is conservatively considered to be cumulatively considerable and thus **significant**.

The potential mitigation measures that may be available to reduce the SRWRS-related contributions to significant impacts are unknown at this time. Because demands from the Proposed Project will contribute to overall City demands under the cumulative scenario, the City conservatively assumes that the project's incremental contributions to the above-referenced significant unavoidable cumulative impacts under this scenario are themselves cumulatively considerable and thus significant.

Under Scenario 1, the water demand associated with buildout of the City's General Plan and the Proposed Project would be supplied by existing and assured sources of surface water allocated under its WFA, and groundwater to make up shortfalls in surface water deliveries during drought years. An EIR was prepared for the WFA that addresses impacts and mitigation measures resulting from implementation of the water supply program outlined in the WFA. The WFA EIR listed the flow-related environmental impacts that could occur when implementing water diversions under the WFA and concluded that there was the possibility for environmental impacts in the following areas: groundwater resources, water supply, water quality, fisheries and aquatic habitat, flood control, hydropower supply, vegetation and wildlife, recreation, land use and growth inducement, aesthetics, cultural resources, soils and geology. While mitigation measures were identified and adopted, some impacts remained significant even after feasible mitigation measures would be applied. The following presents the future significant cumulative impacts identified in the WFA EIR, which represents the impacts that would occur as a result of cumulative development in the region, including buildout of the City of Roseville pursuant to its existing General Plan, full development of the project site and development of the cumulative projects and/or development levels identified above.

WFA EIR Significant and Unavoidable Cumulative Impacts

- Water Supply
- Decrease in deliveries to SWP customers
- Decrease in deliveries to CVP customers
- Water Quality
- Sacramento River and Delta Water Quality
- Fishery Resources and Aquatic Habitat
- Impacts to Folsom Reservoir's warm water fisheries
- Impacts to Fall-run Chinook salmon
- Flow and temperature related impacts to splittail (February-May)
- Impacts to Shasta Reservoir's and Trinity Reservoir's warmwater fisheries
- Temperature related impacts to Sacramento River fishery resources
- Impacts to Delta fish populations
- Hydropower Supply
- Reduced CVP hydropower capacity and generation
- Increased energy requirements for diverters pumping from Folsom Reservoir (economic impact)
- Recreation
- Impacts on Lower American recreation opportunities (rafting and boating)
- Reduced Folsom Reservoir boating opportunities
- Reduced availability of Folsom reservoir swimming beaches
- Cultural Resources
- Physical deterioration of cultural resources in Folsom Reservoir

The water demand created by the Proposed Project, which is estimated to be approximately 1,061 AFY, would represent 0.27 percent of the total WFA delivery agreements.

Consequently, the diversion of additional surface water in wet year-types to meet the Proposed Project's demand would contribute negligibly to the overall cumulative impacts assessed in the WFA EIR. Even so, the City conservatively assumes that the Proposed Project's incremental contributions to the above referenced significant unavoidable effects are themselves cumulatively considerable and thus **significant**.

Scenario 2

"Scenario 2" would consist of the City participating in the SRWRS to divert additional water from the Sacramento River. Similar to Scenario 1, due to CVP cutbacks to the City's WFA allocation in drier year types, Scenario 2 also would require groundwater pumping in years when the City receives less than a full surface water allocation in order to meet the City's cumulative demand.

There are four primary alternatives under consideration by the SRWRS. These alternatives were analyzed in the final version of the Sacramento River Water Reliability Study Initial Alternatives

Report (Alternatives Report) dated March 2005. According to the Alternatives Report, the Elverta Diversion Alternative includes the construction of a joint diversion for PCWA, SSWD, and the Cities of Sacramento and Roseville. It would pump water from the Sacramento River to be treated at a proposed Elverta Water Treatment Facility. Under this alternative, new diversion facilities would be constructed near the existing Natomas Mutual Water Company's Elkhorn Diversion. Additionally, the water treatment facility, storage, and pumping facilities would be located near the river with transmission lines connecting to the existing Cooperative Transmission Pipeline/Northridge Transmission Pipeline in Antelope, which serves the SSWD, as well as extend north with service to Roseville and PCWA.

Based on available information, future significant cumulative effects are conservatively expected as a result of implementation of the SRWRS in the following issue areas:

- Biological Resources
- Hydrology and Water Quality
- Recreation
- Land Use

Cumulative impacts in the resource areas listed above are expected to occur as a result of cumulative development in the region under Scenario 2, including buildout of the City of Roseville pursuant to its existing General Plan, full development of the Proposed Project, and development of the cumulative projects and/or development levels identified above. To date these effects have not been fully evaluated in a certified or adopted CEQA document. Because under Scenario 2 cumulative development could require the treatment of water from the SRWRS Project, the construction of which is expected to result in significant unavoidable impacts, the contribution associated with construction of water delivery infrastructure and potable water treatment for ARSP is conservatively considered to be cumulatively considerable and thus **significant**.

The potential mitigation measures that may be available to reduce the SRWRS-related contributions to significant impacts are unknown at this time. Because demands from the Proposed Project will contribute to overall City demands under the cumulative scenario, the City conservatively assumes that the project's incremental contributions to the above-referenced significant unavoidable cumulative impacts under this scenario are themselves cumulatively considerable and thus significant.

Potable Water Treatment

The Proposed Project's impacts to the Barton Road WTP and PCWA WTPs are discussed in Impact 4.12.1-4. The analysis within Impact 4.12.1-4 considered the buildout of the City of Roseville and PCWA's Western Area currently served by the Foothill and Sunset WTPs. Under cumulative conditions, there is insufficient treatment capacity for buildout of PCWA's Western Area. To address this shortfall, PCWA has planned the development and operation of the Ophir WTP. Because the Proposed Project would contribute to the need to develop the Ophir WTP,

which would result in **significant environmental** impacts, long-term impacts are considered **significant and unavoidable**. (DEIR p. 4.12-55)

3.8.11. Public Utilities – Waste Water

Impact 4.12.3-2 (Capacity of Wastewater Treatment Facility): The Proposed Project would contribute to the need to expand the PGWWTP.

Mitigation Measure 4.12.3-1 Treatment Plant Capacity

Prior to issuance of building permits for development in the ARSP, the applicant shall demonstrate to the City that the SPWA has approved expansion of the SPWA 2005 SAB to include the ARSP. All applicants shall participate financially in the construction of additional wastewater treatment capacity sufficient to accommodate projected flows through payment of connection fees. Applicant shall also participate on a fair share basis in other financial mechanisms for any additional environmental review required to secure approvals necessary to increase wastewater discharges from the plant, including approval by the SPWA for expansion of the service area boundary. It is recognized that the ARSP applicant shall rely on the City (on behalf of the SPWA partners) to construct regional treatment and regional transmission facilities needed to treat and discharge wastewater produced within the service area boundary. In the event the City is unable to obtain all required permits (e.g. NPDES permit and WDRs) or is unable to complete the required facility expansion(s), development within the service area boundary may continue until existing capacity has been exhausted, at which time any remaining development shall be curtailed until such time as sufficient wastewater treatment and discharge capacity becomes available.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

The ARSP is projected to generate wastewater flows of 0.554 mgd, while the combined total wastewater flows for the ARSP and Toad Hill Ranches are projected to be 0.606 gmd. This would bring total ADWF at the PGWWTP to 20.036 mgd.

The WRSP Final EIR evaluated wastewater treatment impacts associated with expansion of wastewater treatment facilities up to 24.7 mgd ADWF. The total projected wastewater flows to the PGWWTP listed in the table above would not exceed the flows previously analyzed in Section 4.11, Impact 4.11-7 of the WRSP Final EIR, which is incorporated into this document by reference, as described within Section 1.4 of this EIR, and summarized below.

As disclosed in the WRSP Final EIR, the construction of additional treatment facilities would be needed to accommodate growth. WWTP capacity must be expanded prior to developing residences and nonresidential uses that would cause total wastewater flows from the ARSP together with other projects to exceed the existing treatment capacity of the PGWWTP. Increasing wastewater treatment capacity of the PGWWTP to accommodate planned growth in the regional service area and the ARSP will require expansion of the treatment facilities. As described in General Plan

Policy 3, the City of Roseville will initiate expansion efforts at the time the PGWWTP nears 75 percent capacity. A 20-acre City-owned parcel on the south side of the PGWWTP was identified as part of the WRSP to accommodate future expansion of the PGWWTP. The significant environmental effects of this future expansion was analyzed in the WRSP EIR. The proposed ARSP's contribution to the expansion of PGWWTP, in combination with other development in the region would add to the need to expand the facility. This is a **potentially significant** impact.

The WRSP Final EIR identified mitigation measure WMM 4.11-5 to reduce this impact to a less-than significant level. Implementation of Mitigation Measure 4.12.3-1, Treatment Plant Capacity by the ARSP applicant, which duplicates mitigation measure WMM 4.11-5 adopted with the WRSP, requires the ARSP applicant to pay connection fees for all ARSP development, which will contribute to the planned PGWWTP expansion. This will allow for capacity expansion of the PGWWTP as necessary to accommodate development within the ARSP and will reduce the impact to a **less-than-significant** level. (DEIR 4.12.3-12)

Impact 4.12.3-3 (Construction or Expansion of Wastewater Treatment Facilities): The Proposed Project would contribute to the need to expand the PGWWTP.

Mitigation Measure 4.12.3-2 Treatment Plant Expansion

The City shall implement all relevant construction related mitigation measures for expansion of the PGWWTP listed in Appendix V and all water quality and aquatic resource mitigation measures applicable to this project as listed in DEIR Table 4.12.3-4.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

As identified in Impact 4.12.3-2 above, the capacity of the PGWWTP would need to be expanded to accommodate development within the project site. In accordance with Wastewater and Recycled Water Systems General Plan Policy 3, the City of Roseville will initiate expansion studies to determine necessary improvements to meet projected wastewater treatment demands upon 75 percent utilization of the treatment plants capacity. However, as discussed above, the potential impacts of treating and discharging effluent up to 29.5 mgd ADWF and the impacts of expanding the PGWWTP up to 24.7 mgd ADWF were previously addressed the WWMP EIR and the WRSP Final EIR, incorporated herein by reference, as described within Section 1.4 of this EIR.

As concluded within the WRSP Final EIR, the majority of impacts from construction and operation of expansion of the PGWWTP would be less than significant, or could be reduced to less-than-significant levels with mitigation identified in the WWMP EIR. However, the WRSP Final EIR determined that the following impacts, which were originally identified in the WWMP EIR, may not be reduced to less-than-significant levels after application of recommended mitigation and would, therefore, remain significant:

- Loss of vernal pools/seasonal wetlands, and impacts to vernal pool special status species;
- Loss of raptor habitat;
- Odor and noise emissions at PGWWTP;
- Increased criteria air pollutant emissions due to subsequent development; and
- Disposal of sludge at the Western Regional Sanitary Landfill (WRSL).

Implementation of Mitigation Measure 4.12.3-2, Treatment Plant Expansion, requires that all appropriate construction related mitigation measures identified in the WWMP EIR be implemented as part of expanding the PGWWTP to reduce construction related impacts. Nevertheless, as listed above, some environmental impacts of the expansion would remain significant after mitigation. Because the ARSP would contribute to the need to expand the PGWWTP, which would result in significant environmental impacts, mitigation to a less-than-significant level is not possible while still allowing for implementation of the specific plan. Because it is impossible to allow development of the Proposed Project without expansion of the PGWWTP and mitigation of this impact to a less-than-significant level is not feasible, this impact is considered **significant and unavoidable**. (DEIR p. 4.12.3-14.) As explained in Section 4, “Statement of Overriding Considerations”, the environmental, economic, legal, social, technological, and other benefits outweigh and override the remaining significant impacts related to the Proposed Project’s incremental contribution to need for expansion of the PGWWTP.

Impact 4.12.3-4 (Exceed Wastewater Treatment Requirements of the RWQCB): The ARSP would contribute to water quality impacts associated with discharges to Pleasant Grove Creek

Mitigation Measure 4.12.3-1 Treatment Plant Capacity is set forth in full in Section 3.8.11 in relation to Impact 4.12.3-2.

Mitigation Measure 4.12.3-2 Treatment Plant Expansion is set forth in full in Section 3.8.11 in relation to Impact 4.12.3-3.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Wastewater flows from the ARSP and Toad Hill Ranches plus buildout of the 2005 SAB, including the recently approved Regional University Specific Plan, the ARSP, and CSP are expected to generate 20.036 mgd ADWF of wastewater to be treated at the PGWWTP, which will have sufficient capacity upon expansion. The impacts of discharging up to 29.5 mgd ADWF were previously addressed in the WWMP EIR. In addition, a technical memorandum titled Cumulative Analysis of UGA Impacts on Water Quality and Aquatic Resources in Pleasant Grove Creek, Roseville, California, by Merritt Smith Consulting dated January 15, 2006 (Merritt Smith Tech Memo), was prepared to evaluate the cumulative impacts associated with treatment and discharge from a water quality and aquatic resources perspective of foreseeable wastewater flows from future UGAs (e.g. discharge of flow outside the 2005 SAB) to the PGWWTP including Curry Creek,

Regional University, Orchard Creek, Placer Ranch, Enviro Tech, Sierra Vista, and CSP. The Merritt Smith Tech Memo calculated the estimated future ADWF from the PGWWTP 2005 Service Area plus flow from these UGAs located outside the 2005 SAB as 23.4 mgd. This estimate is 6.1 mgd less than the 29.5 mgd future flow projected for the PGWWTP in the WWMP EIR, but 3.364 mgd more than anticipated from the proposed ARSP calculations.

The ARSP's contribution to these impacts is considered significant. Mitigation Measure 4.12.3-1, Treatment Plant Capacity, requires that prior to issuance of building permits for development in the project site, the applicant shall demonstrate to the City that the SPWA has approved expansion of the SPWA 2005 SAB to include the ARSP. All applicants shall participate financially in the construction of additional wastewater treatment capacity sufficient to accommodate projected flows through payment of connection fees. In addition, City compliance with the measures listed above and with the NPDES permit would reduce impacts associated with an increased demand for discharge of the treated effluent from the PGWWTP by ensuring that water quality standards are met. Mitigation Measure 4.12.3-2, Treatment Plant Expansion, requires that the applicant and/or the City, as specified, shall implement all relevant construction related mitigation measures for expansion of the PGWWTP listed in the Roseville Regional Wastewater Treatment Service Area Master Plan EIR Mitigation Monitoring Program, included in Appendix V, and all water quality and aquatic resource mitigation measures applicable to this project as listed in Table 4.12.3-4. Additionally, Chapter 14.26 of the City's Municipal Code prohibits discharge to any sanitary sewer of any pollutant or wastewater that would interfere with the operation or performance of the City's wastewater collection or treatment facilities. Future expansion(s) of the PGWWTP would require modifications to the plant's NPDES permit. Compliance with the modified permit and enforcement of the City's Municipal Code would reduce water quality impacts associated with increased effluence discharges to a **less-than-significant** level. (DEIR 4.12.3-16)

Impact 4.12.3-5 (Cumulative Wastewater Impacts): Development of the Proposed Project would contribute to the need for expansion of PGWWTP or DCWWTP.

Mitigation Measure 4.12.3-1 Treatment Plant Capacity is set forth in full in Section 3.8.11 in relation to Impact 4.12.3-2.

Mitigation Measure 4.12.3-2 Treatment Plant Expansion is set forth in full in Section 3.8.11 in relation to Impact 4.12.3-3.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

Wastewater from the Proposed Project and other regional projects would be treated at either the PGWWTP or DCWWTP. Potential expansion of both the PGWWTP and DCWWTP were identified in the Roseville WWMP EIR. Additionally expansion at the PGWWTP was identified in the WRSP Final EIR completed in 2004. Expansion of either plant to serve the flows resulting

from regional growth could result in environmental impacts associated with construction to increase the capacity of the plant, loss of natural and other resources to expand the footprint of the facility, and degradation of water quality as a result of increased discharges to Pleasant Grove Creek or Dry Creek. The NPDES discharge permit for either WWTP would need to be amended to reflect higher flows. The construction and operation of additional wastewater treatment facilities, as well as wastewater collection systems to areas where such facilities do not exist, could result in potentially significant environmental effects. Each development proposal that comes forward would be subject to environmental review on a project-by-project basis. Similar to impacts relating to the expansion of the PGWWTP above, the construction of additional wastewater treatment and collection facilities, where such facilities do not exist, could result in indirect growth effects (e.g., traffic, air, and noise), which could be **significant and unavoidable** on a cumulative basis. Therefore, mitigation to a less-than-significant level is not possible while still allowing for implementation of the specific plan. The project's incremental contribution to cumulative environmental impacts associated with expansion of wastewater treatment and collection facilities is considered **significant** even after mitigation. As explained in Section 4, "Statement of Overriding Considerations", the environmental, economic, legal, social, technological, and other benefits outweigh and override the remaining significant impacts associated with expansion of wastewater treatment and collection facilities.

3.8.12. Public Utilities – Solid Waste

Impact 4.12.4-5 (Cumulative Solid Waste Impacts): Waste from the Proposed Project in combination with other cumulative development would shorten the lifespan of the WRSL and MRF.

Mitigation: In light of known economic, legal, social, technological, or other considerations, no feasible or potentially feasible measures to mitigate this impact is identified in the EIR.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

Currently the MRF has permitted processing capacity up to 1,750 tons per day and the WRSL is anticipated to be able to accept waste until 2058. However, the need for processing capacity at the MRF and for a final closure date at the WRSL would be influenced by several factors including: regional growth rates, economic conditions, and the efficiency of waste recovery. Depending on these factors, waste from the Proposed Project in combination with other cumulative development, would shorten the lifespan of the MRF and the WRSL. Similar to the Proposed Project, development within the service area of the WRSL would be required to pay collection fees, a portion of which is used to service bonds necessary to fund WRSL expansions. However, expansion of the WRSL would create environmental effects. Plans for expansion of WRSL capacity beyond 2058 have not been developed; therefore, specific impacts cannot be identified at

this time. Because of the identified expansion site's proximity to the existing WRSL, however, it can be anticipated that the impacts of an expansion would be similar to those attributed to the existing WRSL. There would be construction-related impacts such as air pollutant emissions, noise, and erosion. In addition, agricultural land and biological resources, including wetlands, could be lost. Once constructed, the expanded WRSL could create additional odors; traffic; operational air pollutant emissions, including increased emissions of WRSL gas and combustion flare emissions; litter; night lighting and other changes in visual character; and degradation of surface and groundwater quality. These impacts would be similar to those of the existing WRSL and, where significant, could be reduced by mitigation measures already required of the WRSL and the solid waste facilities permitting process. However, there could be impacts, such as the loss of biological and agricultural resources that would remain significant and unavoidable even after mitigation. Further, since the City of Roseville does not control the WPWMA and the ability to expand the WRSL, the Proposed Project's contribution to this cumulative impact is considered **significant and unavoidable**. (DEIR 4.12.4-12)

3.8.13. Hydrology and Water Quality

Impact 4.13-1 (Erosion and Runoff from Construction Sites Containing Soils or Other Materials Could Degrade Water Quality if Discharged to Local Streams): Development activities associated with the ARSP could cause soil erosion at accelerated rates.

Mitigation Measure 4.13-1 Implementation of Construction Activity Stormwater Standards

Prior to the issuance of a City grading permit and the commencement of construction activities, the Applicant shall demonstrate to the City compliance with the SWRCB NPDES General Permit for Discharges of Storm Water Runoff Associated with Construction Activity (General Permit), the City of Roseville's Construction Standards, and the City's Stormwater BMP Guidance Manual. The SWRCB requires that all construction sites have adequate control measures to reduce the discharge of sediment and other pollutants to streams to ensure compliance with Section 303 of the CWA. To comply with the NPDES permit, the Applicant shall file a Notice of Intent with the SWRCB and prepare a SWPPP prior to construction, which includes a detailed, site-specific listing of the potential sources of stormwater pollution; pollution prevention measures (erosion and sediment control measures and measures to control non-stormwater discharges and hazardous spills) to include a description of the type and location of erosion and sediment control BMPs to be implemented at the project site, and a BMP monitoring and maintenance schedule to determine the amount of pollutants leaving the project site. A copy of the SWPPP must be current and remain on the project site. Control measures are required prior to and throughout the rainy season. Water quality BMPs identified in the SWPPP could include but are not limited to the following:

- Temporary erosion control measures (such as silt fences, staked straw bales, and temporary revegetation) shall be employed for disturbed areas. No disturbed surfaces will be left without erosion control measures in place during the winter and spring months.

- Sediment shall be retained onsite by a system of sediment basins, traps, or other appropriate measures.
- A spill prevention and countermeasure plan shall be developed which would identify proper storage, collection, and disposal measures for potential pollutants (such as fuel, fertilizers, pesticides, etc.) used onsite. The plan would also require the proper storage, handling, use, and disposal of petroleum products.
- Construction activities shall be scheduled to minimize land disturbance during peak runoff periods and to the immediate area required for construction. Soil conservation practices shall be completed during the fall or late winter to reduce erosion during spring runoff. Existing vegetation will be retained where possible. To the extent feasible, grading activities shall be limited to the immediate area required for construction.
- Surface water runoff shall be controlled by directing flowing water away from critical areas and by reducing runoff velocity. Diversion structures such as terraces, dikes, and ditches shall collect and direct runoff water around vulnerable areas to prepared drainage outlets. Surface roughening, berms, check dams, hay bales, or similar devices shall be used to reduce runoff velocity and erosion.
- Sediment shall be contained when conditions are too extreme for treatment by surface protection. Temporary sediment traps, filter fabric fences, inlet protectors, vegetative filters and buffers, or settling basins shall be used to detain runoff water long enough for sediment particles to settle out. Store, cover, and isolate construction materials, including topsoil and chemicals, to prevent runoff losses and contamination of groundwater.
- Topsoil removed during construction shall be carefully stored and treated as an important resource. Berms shall be placed around topsoil stockpiles to prevent runoff during storm events.
- Establish fuel and vehicle maintenance areas away from all drainage courses and design these areas to control runoff.
- Disturbed areas shall be revegetated after completion of construction activities.
- All necessary permits and approvals shall be obtained.
- Provide sanitary facilities for construction workers.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Development activities associated with the ARSP would involve construction of structures, roadways, parking lots, and infrastructure (including off-site infrastructure), which would require grading, excavation, and other construction-related activities that could cause soil erosion at accelerated rates. Sediment from construction activities could accelerate erosion that could have adverse effects on receiving water quality on the project site and within downstream watersheds, including University Creek, Pleasant Grove Creek, and the Sacramento River. Such effects could include increased turbidity, which could result in adverse impacts on fish and wildlife and their

habitats, reduced pump life at Sacramento River water intakes due to abrasion, increased municipal water treatment costs for turbidity removal, and impaired recreation and aesthetic values. Another potential source of water quality degradation during construction activities is heavy machinery and other construction equipment. Construction equipment spills could result in the release of polluting constituents, such as heavy metals, oil, grease, and other petroleum hydrocarbons to University Creek and Pleasant Grove Creek. This is a **significant** impact.

Mitigation Measure 4.13-1 requires the creation and implementation of a SWPPP and use of BMPs to minimize erosion and the risk of polluted runoff leaving the construction site. Further, compliance with the State's General Permit and the City Improvement Standards, combined with the City's inspection efforts under its MS4 Permit requirements, will ensure that construction-related sediment or other contaminants would be reduced to the maximum extent practicable, as required by law. As a result, the Proposed Project would not result in the violation of any water quality standards, would not create substantial sources of polluted runoff, and would not otherwise substantially degrade water quality. Therefore, this impact is **less than significant**. (DEIR 4.13-21)

Impact 4.13-2 (Changes in Surface Water Quality Resulting from Urban Stormwater Runoff and other Operational Activities): Increase in impervious surfaces resulting from development associated with the Proposed Project would increase the rate and amount of stormwater runoff that would carry urban pollutants.

Mitigation Measure 4.13-2 Changes in Surface Water Quality Resulting from Urban Stormwater Runoff and Other Operational Activities

At the tentative map or site development stage, development shall be conditioned to include source control and LID strategies, treatment control measures, including but not limited to bio-retention treatment as required by the City's then current design standards and the City's then current General Phase II MS4 Permit issued by the State. The measures shall include, but are not limited to, the measures identified in the Amoruso Drainage Master Plan. In addition, necessary erosion and sediment control measures for University Creek at Discharge Point E and monitoring of University Creek downstream of the discharge point shall be incorporated into the project design plans and submitted to the City for review and approval prior to receiving building/grading permits.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Development associated with the Proposed Project would result in the conversion of undeveloped land to urban uses including residences, schools, businesses, recreation, roadways, and parking areas. As discussed above, the increase in impervious surfaces resulting from the construction of buildings and paved areas would increase the rate and amount of stormwater runoff that would

carry urban pollutants into University Creek thence Pleasant Grove Creek. It is anticipated that runoff from the project site would be typical of urban runoff water quality.

Pollutants typically associated with urban uses include oil and grease, coliform bacteria, petroleum hydrocarbons, nitrogen, phosphorus, heavy metals, pesticides, herbicides, and other constituents.

Although some of the sediment load of developed areas would be reduced by implementing grassy swales, bio filters, and other measures, sources of pollution to stormwater runoff may still be present due to entrained dust on roadways and parking lots and blow over from open space areas and/or other off-site farming and construction activities. There is the potential that urban runoff from the Proposed Project could contain levels of pollutants that could adversely affect water quality in the local streams or increase sediment loads. Therefore, this impact is considered **significant**.

Compliance with the NPDES regulations and Mitigation Measure 4.13-2, which requires implementation of stormwater management, LID measures, and erosion control measures at University Creek, would ensure stormwater treatment devices specific to the land uses in the ARSP are implemented to the maximum extent practicable. Stormwater treatment devices will be chosen for their effectiveness in reducing urban pollutants in stormwater runoff to meet the Basin Plan and water quality objectives of the City's Phase II MS4 Permit. Taken together, all of these measures will avoid violation of any water quality standards, will avoid the creation of substantial additional sources of polluted runoff, and will avoid any substantial degradation of water quality. As a result, potential negative effects on water quality from urban runoff and project operational activities will be **less than significant**. (DEIR 4.13-23)

Impact 4.13-4 (Altered Drainage Patterns and Increase in the Rate of Stormwater Runoff through the Development of New Impervious Surfaces that Would Result in Flooding or Siltation On- or Off-Site): The increase in impervious surfaces would increase the rate of surface runoff conveyed through the site. In addition, development and grading would alter existing runoff patterns and conveyance capacities on properties.

Mitigation Measure 4.13.5 Erosion Monitoring Plan

At the onset of any grading activities within the ARSP that increase the existing drainage area tributary to the University Creek channel within Al Johnson Wildlife Area, a geomorphologic assessment of University Creek through the Al Johnson Wildlife Area property shall be conducted.

The geomorphologic assessment shall include erosion protection measures, such as stream bank stabilization and velocity reduction measures, and the location for their implementation. The construction of the erosion protection measures shall be triggered by criteria established within the geomorphologic assessment.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Increased stormwater flows and altered drainage patterns as a result of development of the Proposed Project could increase the potential for localized flooding within the developed project site. Potential risks from localized flooding could result in property loss and disruptions of transportation corridors that would disrupt essential services into, out of, and through the project site.

Consistent with the City's design standards, additional considerations would be made for the safe conveyance and overland flow release of the 100-year storm event assuming a total blockage of the storm drain system. Prior to acceptance and issuance of construction documents, the final design for the storm drainage infrastructure and overland conveyance system would be reviewed by the City's Engineering Department to ensure it complies with the City Improvement Standards and the ARSP Drainage Master Plan. Consistency with City standards would avoid the potential for flooding within the project site.

The peak flows exiting the site under Post-Project conditions slightly exceed the Pre-Project peak flows for the 2-year and 10-year events. However, the Proposed Project would include numerous LID measures such as vegetated swales, porous pavement, and interceptor trees. Although these measures are primarily utilized to improve stormwater quality, in small storms such as the 2- and 10-year events, they would also function to slow the rate of runoff leaving the site. Therefore, the results presented in the DEIR are conservative "worst-case" scenarios for stormwater peak flows, as they do not include the reductions in peak flow due to LID measures. Additionally, as discussed above, the deliberate routing of water away from the Gleason property and Toad Hill Ranches is intended to remediate flooding outside of the 100-year floodplain, such as that which occurs in a 2- or 10-year storm event. In Pre-Project conditions, this water would eventually drain to University Creek downstream from the proposed location. Therefore, the Proposed Project would not change the overall amount of water in the system, although it would alter where it enters the creek. These small increases in peak flow from the 2- and 10-year events reflect the addition of flows that would normally negatively impact off-site properties to the north. The slight increases in peak flow in the 2- and 10-year storm events may result in impacts to off-site flooding or siltation, and this is a **potentially significant** impact. Mitigation Measure 4.13-5 requires the Applicant develop a plan to monitor for erosion attributable to the Proposed Project, and to implement measures to remediate and prevent erosion should it occur. After mitigation, the impacts due to the increases in 2- and 10-year peak flows are reduced to **less-than-significant** levels.

The hydraulic model predicts little difference between the Pre-Project and Post-Project [No Storage] conditions for the 100-year storm event (Kimley-Horn, 2016a; Appendix I). Further, as shown in the DEIR, the proposed drainage system would eliminate existing stormwater discharge points along the western site boundary that contribute to ongoing flooding issues caused in part by runoff on the ARSP site overtopping the existing ditch at Discharge Point G. No flooding would

occur on or offsite as a result of altered drainage patterns and increases in the rate of surface runoff. The proposed drainage pattern alterations have been designed to alleviate existing flooding issues both on- and off-site. However, due to the rerouting of flows away from the western boundary and into University Creek, the 2- and 10-year storm events will have a slightly increased peak flow rate as compared to Pre-Project conditions, which is reduced to less-than-significant levels through implementation of Mitigation Measure 4.13-5. There are no increases in peak flow from the 100-year storm event in the Post-Project condition, and therefore, impacts are **less than significant**. (DEIR 4.13-27)

Impact 4.13-5 (Increase in the Amount of Surface Runoff Volume, Which Would Exceed the Capacity of Existing Storm Drainage Systems and Increase the Potential for Downstream Flooding): Increased surface water runoff volume, when combined with the larger watersheds contributing to the Natomas Cross Canal watershed, has the potential to peak with the flood waters of the Sacramento River to cause downstream flooding.

Mitigation Measure 4.13-3 Fair Share Payment to Regional Stormwater Retention

The applicant shall annex into the fee district and pay the Pleasant Grove Drainage fee to the City prior to the approval of each building permit, which would cover the cost of retention for that development's portion of the Pleasant Grove Retention Basin Project at the Al Johnson Wildlife Area.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Development of the Proposed Project would increase the impervious surfaces on approximately 481 acres of the project site, which would increase the volume of stormwater runoff into University Creek and Pleasant Grove Creek compared to existing conditions. In addition, development and grading would alter the existing runoff patterns and conveyance capacities of the properties in the project site. This volume increase, when combined with the larger watersheds contributing to the Natomas Cross Canal watershed, has the potential to peak with the flood waters of the Sacramento River to cause flooding downstream of the project site in Sutter County. Development of the

ARSP is estimated to generate an additional runoff volume of 75.31 AF (Kimley-Horn, 2016a; Appendix I). The ARSP contribution to the increase in volume of runoff in the Natomas Cross Canal watershed would be **significant**.

The increase in volumetric flows from the project site would be managed to minimize the risk of downstream flooding beyond the boundaries in the Natomas Cross Canal watershed. The City of Roseville has approved a regional retention basin on City-owned property at the Al Johnson Wildlife Area. The Regional Pleasant Grove Retention Basin Facility will be located west of the project site. The EIR for the Pleasant Grove Retention Basin Facility was certified in 2003, and evaluated full buildout of the regional flood control project with a storage capacity of 2,350 AF. The flood control project evaluated two retention basins. Although not originally part of the fee

district contributing to the future construction of the flood control project, there is sufficient storage capacity within the design to allow the ARSP to annex into and participate in the fee program. Upon construction of the north basin within the Reason Farms Regional Retention Basin, there will be sufficient capacity for the ARSP stormwater flows. The City currently collects a drainage impact fee from new development projects to fund construction of the regional flood control project, which will be constructed as funds are made available. Following the approval of the Land Use Plan and annexation into the City, the ARSP will be annexed into the fee district area and will contribute their fair share towards the future development of the flood control project. The Proposed Project would require 75.31 AF of volumetric storage within the north retention basin, as detailed in Appendix I. Therefore, implementation of Mitigation Measure 4.13-3, which requires the project applicant annex into the Drainage Fee District and to pay drainage impacts fees for the volumetric storage needs of 75.31 AF, would reduce this impact to a **less-than-significant** level. (DEIR 4.13-34)

Impact 4.13-6 (Construction of Off-Site Stormwater Retention Facilities): The ARSP, in combination with buildout of other projects in the area, would trigger construction of the north retention basin of the Regional Flood Control Project at the Al Johnson Wildlife Area.

Mitigation Measure 4.13-4 North Retention Basin Construction

All relevant construction-related mitigation measures for construction of the north retention basin within the Al Johnson Wildlife Area listed in the adopted Mitigation, Monitoring, and Reporting Program shall be implemented. The City shall monitor the discharge at the western boundary on a yearly basis, to ensure that there are no impacts and that the existing facility within the Al Johnson Wildlife Area is functioning properly.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

The Proposed Project would require 75.31 AF of volumetric storage within the north retention basin of the Regional Flood Control Project at the Al Johnson Wildlife Area. The ARSP, in combination with buildout of other projects in the area, would trigger construction of the north basin. The ARSP will contribute fees toward the construction of the Regional Flood Control Project. The potential impacts of construction of the north and south retention basins within the Al Johnson Wildlife Area were previously addressed in the EIR for the City of Roseville Retention Basin Project (SCH #2002072084) (“Retention Basin EIR”), incorporated by reference.

As concluded within the Retention Basin EIR, the majority of the impacts from construction and operation of the retention basins would be less than significant, or could be reduced to less-than-significant levels with mitigation identified in the Retention Basin EIR. However, the Retention Basin EIR determined that the following impacts may not be reduced to less-than-significant levels after application of recommended mitigation and would therefore remain significant:

- Conversion (direct and indirect) of prime agricultural land to non-agricultural use
- Short-term (construction phase) impacts to air quality
- Short-term (construction phase) impacts due to noise
- Significant cumulative indirect growth inducement

Implementation of Mitigation Measure 4.13-4, North Retention Basin Construction, requires that all appropriate construction related mitigation measures identified in the Retention Basin Project Final EIR be implemented as part of constructing the retention basin to reduce construction related impacts. The ARSP would contribute toward the need to construct the north basin, and the ability to construct the basin is dependent on development fees, the timing of the construction of the basin is uncertain, and therefore would result in the significant impacts identified above; this impact is considered **significant and unavoidable**. As explained in Section 4, “Statement of Overriding Considerations”, the environmental, economic, legal, social, technological, and other benefits outweigh and override the remaining significant impacts related to the increase in the amount of surface water volume.

Impact 4.13-8 (Cumulative Hydrology and Water Quality Impacts): Cumulative development in the Roseville area would contribute to increased peak stormwater runoff flows and increased elevations.

Mitigation Measure 4.13-1 Implementation of Construction Activity Stormwater Standards is set forth in full in Section 3.8.13 in relation to Impact 4.13-1.

Mitigation Measure 4.13-2 Stormwater Management Development Standards is set forth in full in Section 3.8.13 in relation to Impact 4.13-2.

Mitigation Measure 4.13-3 Fair Share Payment to Regional Stormwater Retention is set forth in full in Section 3.8.13 in relation to Impact 4.13-5.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Cumulative development in the Roseville area, which includes the Pleasant Grove Creek watershed, would increase the amount of impervious surfaces which could contribute to increased peak stormwater runoff flows and increased flood elevations. This is a **significant** cumulative impact.

The City currently collects a drainage fee for the future construction of a regional stormwater retention basin at the Al Johnson Wildlife Area to mitigate for volumetric impacts. The Retention Basin EIR evaluated the potential environmental effects of construction and operation of the regional retention basin to mitigate volumetric concerns to downstream properties. The ARSP Drainage Master Plan (2016) analyzed the impacts to University Creek and Pleasant Grove Creek from buildout of the cumulative development in the region, including the ARSP, CSP, WRSP, and the Placer Ranch area, and assessed that against the pre- and post-project impacts of the ARSP.

The buildout of projects within the City of Roseville will be required to purchase credits within the City's retention basins to accommodate the volumetric flow increases modeled (Appendix I). With implementation of mitigation measures requiring in-lieu payments for the Al Johnson Wildlife Area, impacts due to cumulative development are reduced to **less than significant**.

All projects within the City are required to mitigate their peak flows to pre-project levels with the intent that there is no increase to the flood levels either upstream or downstream of the project. As described in the ARSP Drainage Master Plan (Appendix I), the post-development peak flows generated from the Proposed Project precede the peak flow timing of both the University Creek and Pleasant Grove Creek watersheds and, as such, there is no peak flow increase to flood levels as a result of the ARSP. Therefore, impacts due to cumulative development on peak flows are **less than significant**.

The Proposed Project and potential cumulative projects in the vicinity of the project site, including growth resulting from build-out of the City's General Plan and the nearby specific plans, would be required to comply with the general NPDES permit of the SWRCB, which is intended to reduce the potential for cumulative impacts to water quality during construction. Cumulatively considerable projects that would discharge stormwater runoff would be required to comply with NPDES discharge permits from the CVRWQCB and would be subject to subsequent environmental review. Therefore, impacts associated with cumulative construction related water quality effects would be **less than significant**.

Each of the cumulative development projects and the Proposed Project would be subject to local, State, and federal regulations designed to minimize cumulative impacts to water quality from operation. Mitigation measures for the Proposed Project in combination with compliance with City, state, and federal regulations, are expected to reduce cumulatively considerable impacts to a **less-than-significant** level. (DEIR 4.13-8)

3.8.14. Aesthetics

Impact 4.14-1 (Alteration of the Visual Character of the Site and Vicinity): Introduction of residences, commercial uses, and infrastructure in an area that is presently undeveloped would change the existing visual character of the area.

Mitigation: In light of known economic, legal, social, technological, or other considerations, no feasible or potentially feasible measures to mitigate this impact are identified in the EIR.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

The Proposed Project would convert approximately 481 acres of the 694.4-acre project site into urban uses. Approximately 144 acres would remain as open space and 20 acres would remain as Urban Reserve. Conversion of the majority of the site to urban uses would represent a significant

and unavoidable impact for which there are no feasible mitigation measures that would reduce the impacts to a less-than-significant level. Because a majority of the grasslands on the site would be developed, the character of the drainage corridors would change from meandering rural streams to open space corridors in open space preserves within an urban landscape. The permanently designated open space area in the Proposed Project does provide open space linkages between the WRSP, CSP, and Al Johnson Wildlife Area. Underground utility distribution to the majority of the project site is proposed as a part of the Proposed Project; however, one overhead 60 kV electrical line extension is proposed along the east side of the proposed Westbrook Boulevard and south of proposed. Back-yard fences abutting the Sunset right-of-way would be screened by a 10-foot landscaped buffer and residential uses would be set back 20 feet from edge of property to reduce the visual impact experienced by travelers on West Sunset Boulevard and from the residential uses within the Toad Hill Ranches.

The City's General Plan Policies for Community Design serve to promote the visual compatibility of developments through the application of community design standards. Specifically, Policy 6 requires site and building designs that are in scale and compatible with adjacent development. In addition, the ARSP Design Guidelines include specific landscape buffer and screening requirements for utilities, loading areas, and mechanical units. Implementation of the General Plan Policies and the ARSP Design Guidelines would help reduce the significant impacts, but not to less-than-significant levels.

Nevertheless, mitigation to a less-than-significant level is not possible while still allowing for implementation of the specific plan. Thus, because it is impossible to allow new development without impacting scenic vistas, mitigation of this impact to a less-than-significant level is infeasible. The visual alteration of the project site would be **significant and unavoidable**. (DEIR p. 4.14-10)

Impact 4.14-2 (New Sources of Light and Glare): Development of the project site would create light from urban development such as residences and commercial uses, as well as recreational facilities, streetlights, and vehicles.

Mitigation Measure 4.14-1 Sight Lighting to Minimize Nuisance

Light producing uses, such as ball fields, within the project site shall be located and oriented to minimize visual impacts on adjacent residential areas. Lighting shall be shielded and designed to distribute light in the most effective and efficient manner, using the minimum amount of light to achieve the necessary illumination for the use. Light poles shall be designed using either 100 watt or LED light bulbs, and shall use the best technology that maximizes glare and spillage reduction.

Mitigation Measure 4.14-2 Low Glare Materials for New Development

In order to reduce the effects of daytime glare from development of commercial or office uses within the project site, building developers shall utilize, when feasible, low-glare materials.

Mitigation Measure 4.14-3 Avoid Light Spill Over into University Creek and Open Space Areas

Outdoor lighting shall be placed, designed, and directed so as to avoid light spillover into the habitat of University Creek, Open Space Preserve Areas, and the Al Johnson Wildlife Area. These parcels include those immediately adjacent to the open space and shown on the Land Use Map as parcels, AR-3, AR-4, AR-7, AR-8, AR-11, AR-20, AR-24, AR-37, AR-56, AR-57, AR-60, AR-63, and the Urban Reserve parcel AR-110.

Finding: Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.

The project site is currently undeveloped and contains no light sources with the exception of light from the existing residential unit in the northeastern portion of the site. Development of the Proposed Project site would result in a substantial change in the amount of light generated on the project site and would alter nighttime views of the project site. There would be light from residences, businesses, recreational facilities, streetlights, and vehicles, all of which would increase the ambient nighttime illumination level.

In order to ensure impacts associated with exterior building lights, park lights, and street lights would be reduced, Mitigation Measure 4.14-1 requires siting of light-producing uses to minimize impacts on adjacent sensitive uses and shielding of light fixtures. Low-glare materials would be utilized for new buildings to reduce glare impacts as required by Mitigation Measure 4.14-2. To ensure lighting would not adversely affect wildlife in open space areas and along University Creek, Mitigation Measure 4.14-3 would reduce light impacts on nearby open space through design measures and light direction and placement. Further, the Roseville Parks and Recreation Department uses energy efficient low emitting diodes (LED) lights which produce less light spill over.

Daytime glare could result from commercial and office buildings associated with the Proposed Project. Mitigation Measure 4.14-2 would ensure that low-glare materials would be used for development of new large-scale buildings associated with the Proposed Project.

Mitigation Measure 4.14-1 through 4.14-3, the City's Community Design Guidelines, and the ARSP Design Guidelines provide effective methods to reduce light and glare impacts. No other feasible mitigation measures are available to reduce impacts associated with light and glare to a less-than-significant level while still allowing for implementation of the specific plan. The overall change in the level of light and glare on the project site would remain **significant and unavoidable** because the area currently lacks light and glare sources and would still be visibly changed in the context of nighttime lighting and daytime glare. (DEIR 4.14-12)

Impact 4.14-3 (Degradation of Scenic Resources and Scenic Vistas): Implementation of the Proposed Project could impair views of the Sierra Nevada Mountains from within the project site.

Mitigation: In light of known economic, legal, social, technological, or other considerations, no feasible or potentially feasible measures to mitigate this impact to a less-than-significant level are identified in the EIR.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

There are no designated scenic roads, resources, or vistas within or adjacent to the project site. The project site is not a designated scenic area in the City or County General Plans. Long-range views include the Sierra Nevada Mountains to the east, while short-range views include views of the adjacent residential areas within the City, rural residential housing to the north and undeveloped areas to the west. Development within this area would change scenic resources and scenic vistas.

The Proposed Project would result in large-scale development projects that could impair views of the Sierra Nevada Mountains from within the project site by placing buildings within view corridors. While views of the mountains to the east and the rural grasslands to the west are not designated scenic resources, they are a significant part of the visual landscape. The Proposed Project includes open space areas that provide view corridors from within the site, but views would still be obstructed by surrounding development. While these views are not designated scenic vistas, development of the Proposed Project would nonetheless change existing view corridors, which is considered a **significant** impact.

Mitigation to a less-than-significant level is not possible while still allowing for implementation of the specific plan. However, all Proposed Project development would be required to comply with the City's Design Guidelines, General Plan policies, and ARSP Design Guidelines, all of which are intended to reduce aesthetic impacts. This impact would remain **significant and unavoidable**, even with compliance with these policies. (DEIR p. 4.14-14)

Impact 4.14-4 Cumulative Aesthetic Impacts: The Proposed Project would contribute to permanent alteration of visual character of the area.

Mitigation Measure 4.14-1 Sight Lighting to Minimize Nuisance is set forth in full in Section 3.8.14 in relation to Impact 4.14-2.

Mitigation Measure 4.14-2 Low Glare Materials for New Development is set forth in full in Section 3.8.14 in relation to Impact 4.14-2.

Mitigation Measure 4.14-3 Avoid Light Spill Over into University Creek and Open Space Areas is set forth in full in Section 3.8.14 in relation to Impact 4.14-2.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

Cumulative development in southwest Placer County has resulted in the conversion of a primarily rural landscape to urban development, thereby permanently altering the visual character of the area, both during daytime and at night. This trend is anticipated to continue, which could result in a significant cumulative aesthetics impact. In combination with existing, approved and proposed development in the project vicinity, including but not limited to the construction of Placer Parkway, buildout of the Creekview, West Roseville, and Sierra Vista Specific Plans within the City, the Placer Ranch area, and Sunset Industrial Area, a large area would be urbanized. The Proposed Project would have a **significant** contribution to the loss of open space and would introduce new sources of light and glare.

Although development in the City of Roseville would be required to meet the City's Community Design Guidelines, ensuring that proposed development would be visually compatible with surrounding development, it would nonetheless permanently and substantially alter the environment, causing a cumulative aesthetic impact. Mitigation Measure 4.14-1 through 4.14-3 provide effective methods to reduce light and glare impacts. No other feasible mitigation measures are available to reduce impacts associated with light and glare to a less-than-significant level while still allowing for implementation of the specific plan. The project's contribution to this impact is considered cumulatively considerable. With the implementation of identified mitigation measures, the impact would remain **significant and unavoidable**.

3.9. Energy

Impact 4.15-1 (Increased Consumption of Energy): The Proposed Project will result in the consumption of energy, natural gas, and transportation fuel.

Mitigation Measure 4.15-1 Implement Measures to Reduce Energy Consumption

Implementation of the Air Quality Mitigation Measures 4.4-1(d) and (f) and Mitigation Measure 4.4-2 reduce direct and indirect operational energy consumption. The requirements of Mitigation Measures 4.4-1(d) and (f) and Mitigation Measure 4.4-2 are listed below:

MM 4.4-1 Measures to Reduce Short-Term Construction-Related Emissions

d. Prior to approval of Grading or Improvement Plans, whichever occurs first, the applicant shall provide a written calculation to the Placer County Air Pollution Control District (PCAPCD) for approval by the District demonstrating that the heavy-duty (50 horsepower or greater) off-road vehicles to be used in the construction project, including owned, leased and subcontractor vehicles, shall achieve a project wide fleet-average 20 percent NOx reduction and 45 percent particulate reduction as required by CARB. Acceptable options for reducing emissions may include use of late model engines, low-emission diesel products, alternative fuels, engine retrofit technology, after-treatment products, and/or other options as they become available.

f. Include the following standard notes on the Improvement/Grading Plan:

- During construction the contractor shall utilize existing power sources (e.g., power poles) or clean fuel (i.e. gasoline, biodiesel, natural gas) generators rather than temporary diesel power generators.
- During construction the contractor shall minimize idling time to a maximum of 5 minutes for all diesel-powered equipment.

MM 4.4-2 Project Measures to Reduce Operational Emissions

Following receipt of an application for a Tentative Maps (excluding the Large Lot Subdivision Map), Design Review Permit, conditional use permits and/or all discretionary permits, the applicant shall forward an early consultation notice to the PCAPCD. Where the PCAPCD provides comments on a specific development proposal, the applicant shall consult with PCAPCD and the developer to incorporate measures recommended by the PCAPCD and agreed to by the applicant into the Proposed Project. Where the PCAPCD does not provide comment on a specific development proposal, the applicant shall incorporate measures that reduce vehicle emissions and operation emissions from the proposed development. This measure shall be implemented through project design, conditions of approval, noticing and disclosure statements, or through the City's plan check and inspection processes. This process is intended to ensure that best available and practical approaches are used to reduce operational emissions in specific tentative map and design review permit applications. The following is a listing of measures that shall be implemented for the purpose of reducing vehicle and operational emissions, unless the applicant demonstrates to the City's satisfaction that the measure is infeasible. If the applicant demonstrates that any particular measure in the list below is infeasible for a proposed project to which it would otherwise be applicable, the applicant must provide an analysis demonstrating that a replacement measure is comparably effective.

- Provide tree plantings that meet or exceed the requirements of the City's Community Design Guidelines to provide shading of buildings and parking lots.
- Landscape with native drought-resistant plants (ground covers, shrubs, and trees) with particular consideration of plantings that are not reliant on gas-powered landscape maintenance equipment.
- Require all flat roofs on non-residential structures to have a white or silver cap sheet to reduce energy demand, unless a demonstration of infeasibility is made by the applicant.
- Provide conductive/inductive electric vehicle charging station and signage prohibiting parking for non-electric vehicles within designated spaces within non-residential developments.
- Provide vanpool parking only spaces and preferential parking for carpools, to accommodate both carpools and vanpools in employment areas (e.g. community commercial, business-professional uses).

- All truck loading and unloading docks shall be equipped with one 110/208 volt power outlet for every two-dock doors. Signs shall be posted stating “Diesel trucks are prohibited from idling more than five minutes and trucks requiring auxiliary power shall connect to the 110/208-vot outlets to run auxiliary equipment.”
- Design streets to maximize pedestrian/bicycle access to transit stops.
- Require site design to maximize access to transit lines, to accommodate bus travel, and to provide lighted shelters at transit access points.
- Develop the plan consistent with the higher residential densities (within approved residential density ranges of zone) provided around the village nodes and transit corridors.
- Participate in Roseville Electric incentive programs for energy-efficient development where feasible as available.
- Ten percent of the residential units shall be designated as low to very-low income residential units.
- A pedestrian and bicycle access network shall link areas of the project site with other land uses.
- Electric landscape maintenance equipment shall be utilized on parks and public/quasi-public lands.
- Design buildings to meet the 2013 Title 24 Energy Efficiency Standards (which is a 25 percent reduction below 2010 Title 24 Energy Efficiency Standards).
- Ensure that all public street and area lighting installed on the site shall be considered high efficiency lighting.
- Utilize reclaimed water where available for irrigation of all non-single family areas within the project site, including the school, parks, paseos, roadway landscaping, and commercial landscaping.
- Reduce the area of turf allowed consistent with the City’s Water Efficient Landscape Ordinance and the Water Conservation Strategy (see Appendix G). Install water efficient landscape irrigation systems at all public land uses.

Measures for Residential Units:

- Require electrical outlets be installed on the exterior walls of both the front and back of residences to promote the use of electric landscape maintenance equipment.
- Require every garage of each single family home to be considered “Electric Vehicle Ready.” This by definition is not limited to, but includes a conduit raceway to a spare electric box in the garage that is sized for a future 220v outlet. A 220v breaker space must be available in the electrical panel.
- Require installation of a gas outlet in the rear of residential buildings for use of outdoor cooking appliances, such as gas burning barbeques.
- Require installation of low NO_x hot water heaters (beyond District Rule 246 requirements).

- Prior to approval of Tentative Maps: provide notice to homebuyers through conditions, covenants, and restrictions (CC&Rs) or other mechanisms to inform them that only gas fireplaces shall be permitted.
- The applicant shall ensure that builders offer only energy efficient appliances for installation in residential units, including Energy Star refrigerators, clothes washers, dishwashers, and ceiling fans.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

The Proposed Project will result in the consumption of energy, natural gas, and transportation fuel. This is a **potentially significant** impact. As discussed above, various proposed design features and mitigation measures would be implemented to ensure the more efficient use of energy resources during project operation. With mitigation, the Proposed Project would not result in the wasteful, inefficient, or unnecessary consumption of energy resources. Therefore, this impact would be considered **less than significant**. (DEIR p. 4.15-11)

4. STATEMENT OF OVERRIDING CONSIDERATIONS

In determining whether to approve a project, CEQA requires all public agencies to balance the benefits of a project against its unavoidable environmental impacts. The City Council approves the Proposed Project despite the significant unavoidable adverse impacts identified in the EIR. The EIR consists of five text volumes and associated appendices: the Draft EIR and the Draft EIR technical appendices, the Final EIR text, and the Final EIR technical appendices.

The Final EIR identifies and discusses unavoidable significant effects that would occur as a result of implementing the ARSP, in addition to addressing comments received on the DEIR. With implementation of the Mitigation Monitoring and Reporting Program adopted by the City to mitigate or avoid significant impacts on the environment, many of the environmental impacts of the project can be reduced to a less-than-significant level. The Final EIR determined that the project is expected to result in significant and unavoidable impacts as discussed in Section 3.8 above.

4.1. Significant and Unavoidable Impacts of the Proposed Project

The EIR identifies the following significant and unavoidable impacts for the Proposed Project in the following resource areas as identified in Section 3.4:

- Land Use and Agricultural Resources (Impacts 4.1-3 and 4.1-8)
- Population and Housing (Impact 4.2-4)
- Transportation and Circulation (Impacts 4.3-5, 4.3-6, 4.3-8, 4.3-9, 4.3-11, 4.3-12, 4.3-15, 4.3-17, and 4.3-20)
- Air Quality (Impacts 4.4-1, 4.4-2, 4.4-3, 4.4-5, 4.4-6, and 4.4-7)

- Climate Change and Greenhouse Gas Emissions (Impact 4.5-1)
- Noise (Impacts 4.6-1, 4.6-5, 4.6-7, and 4.6-9)
- Vegetation and Wildlife (Impact 4.8-18)
- Public Utilities – Water (Impacts 4.12.1-4 and 4.12.1-8)
- Public Utilities – Wastewater (Impacts 4.12.3-3 and 4.12.3-5)
- Public Utilities – Solid Waste (Impact 4.12.4-5)
- Hydrology and Water Quality (Impact 4.13-6)
- Aesthetics (Impacts 4.14-1, 4.14-2, 4.14-3, 4.14-4)
- Energy (Impact 4.15-1)

4.2. Benefits of the Project

Pursuant to PRC Section 21081 and Section 15093 of the State CEQA Guidelines, the City Council of the City of Roseville adopts and makes the following statement of overriding considerations regarding the remaining significant unavoidable impacts of the project, as discussed above, and the anticipated economic, social, and other benefits of the project.

The City Council finds and determines that (1) the majority of the significant impacts of the project will be reduced to acceptable levels by implementation of the mitigation measures recommended in these findings; (2) the City Council’s approval of the project as proposed will result in certain significant adverse environmental effects that cannot be avoided or reduced to a less-than-significant level even with the incorporation of all feasible mitigation measures into the project; and (3) there are no other feasible mitigation measures or feasible project alternatives that will further mitigate, avoid, or reduce to a less-than-significant level the remaining significant environmental impacts.

In light of the environmental, social, economic, and other considerations identified in the findings above, and the considerations set forth below related to this project, this City Council chooses to approve the project because, in its view, the economic, social, technological, and other benefits resulting from the project substantially outweigh the project’s significant and unavoidable adverse environmental effects.

The following statements identify the reasons why, in the City Council’s judgment, the benefits of the project outweigh the significant and unavoidable impacts. The substantial evidence supporting the enumerated benefits of the project can be found in the preceding findings, which are herein incorporated by reference; in the project itself; and in the record of proceedings as defined above. Each of the overriding considerations set forth below constitutes a separate and independent ground for finding that the benefits of the project outweigh its significant adverse environmental effects and is an overriding consideration warranting approval.

4.2.1. General Plan Policies and Goals

The Proposed Project will further the City’s goals and policies for residential land use, as set forth in its General Plan, by providing a variety of residential land use designations in an area designated

for growth in the City's plan to meet the future needs of the City and the region, while ensuring compatibility with planned land uses.

Specifically, the Proposed Project includes construction of 2,827 dwelling units in three residential land use classifications on 694 acres (DEIR p. 2-12). The three residential land use classifications proposed are LDR (0.5-6.9 du/ac), MDR (7.0-12.9 du/ac), and HDR (13.0-30 du/ac) (DEIR p. 2-13). The LDR neighborhoods will provide market-rate, distinctive, high-quality housing. The ARSP affordable housing program focuses on the HDR parcels within the project site. Of the total number of dwelling units, 10 percent are planned to meet affordability criteria for low- and very-low income households, as set forth in the City's General Plan Housing Element. Providing a mix of housing types promotes for all incomes promotes General Plan Land Use Element Policy 4 and Housing Element Policy 3.

The Proposed Project would expand recreational opportunities within the City by providing 167.7 acres of neighborhood parks and open space which represents 24 percent of the total project site. Planned park facilities include seven neighborhood parks throughout the project site and approximately 134.8 acres of open space. Within the open space area, approximately 98 acres would be designated as permanent on-site open space preserve. In addition, a system of pedestrian and bikeway paths is proposed providing off-street linkages throughout the community connecting to the City's existing and planned regional trail and bicycle network facilities. Two miles of open space paseos will augment and facilitate pedestrian and bicycle movement throughout the project site and de-emphasize the importance of automobile travel. This variety of benefits associated with the Proposed Project would promote General Plan Circulation Element Policy 1, Parks and Recreation Element Goal 2, and Open Space and Conservation Element Goal 4 and Policies 1, 2, 4 and 7.

4.2.2. Jobs/Housing and Economic Development

The Proposed Project would add a new variety of commercial land uses to the City. The Proposed Project includes 51.2 acres of land designated for commercial use, under the commercial classifications of Community Commercial and Community Commercial – Village District (DEIR p. 2-14). The development of commercial uses is anticipated to increase employment within the project site. Based on its approximately 476,000 square feet of new commercial retail and office uses, the Proposed Project is anticipated to generate approximately 1,115 new jobs. In addition to creating long-term employment opportunities through commercial, office, and retail components of the project, development of ARSP would create hundreds of construction-related jobs, as well as jobs related to schools.

The creation and development of mix of land uses that provide linkages between jobs and employment uses is crucial to achieving a well-balanced ratio of jobs and housing identified in Land Use Element, Community Form – Jobs/Housing and Economic Development Policy 1. Given the proximity of employment opportunities and commercial services to residential areas, the

Proposed Project plays a role in achieving the desirable goals set forth in the policy. Overall the Proposed Project is anticipated to add more housing than jobs which will result in a slightly more balanced ratio. Over time, this could mean potential reduction in vehicle trips improves air quality, reduces GHG generation, and provides options for walking/biking to work.

4.2.3. Public Revenues

The Proposed Project is fiscally positive. It would increase tax revenues to the City through increased property values, an expanded housing market, and increased and expanded commercial activities and other job-generating uses, and the overall enhancement of the City's economic base. The Applicant would contribute its fair share toward the cost of transportation improvements outside of the project site (i.e., roads and bridges).

4.2.4. Preferred SACOG Blueprint Scenario

The eastern half of the project site is identified as an appropriate area to accommodate urban growth within the Preferred SACOG Blueprint Scenario. The Sacramento Region Blueprint identifies a way for the region to grow through the year 2050 generally consistent with seven principle of "smart growth." Promoting compact, mixed-use development and more transit choices as an alternative to low density development. The City has adopted its own strategies for implementing the Blueprint Plan, *Smart Choices, Implementation Strategies to Implement the Blueprint Project*. The Proposed Project is consistent with the Blueprint Plan's seven growth principles, as well as the City's nine implementation strategies, including connectivity among neighborhoods, commercial uses, schools and parks, and preservation of open space. The Proposed Project plays a strong role toward achieving the regional benefits identified in the Blueprint Plan.

4.3. Conclusion

Having reduced many of the effects of the Proposed Project by adopting all feasible mitigation measures, and balancing the benefits of the project against the project's significant and unavoidable adverse environmental impacts, the City Council hereby determines that the specific overriding social, environmental, and economic benefits of the project set forth above outweigh the potential unavoidable adverse effects of the project on the environment. The City Council finds that each of the overriding considerations set forth above constitutes a separate and independent basis for finding that the benefits of the project outweigh the unavoidable adverse environmental effects, and warrants approval of the project.

AMORUSO RANCH SPECIFIC PLAN MITIGATION MONITORING AND REPORTING PROGRAM

INTRODUCTION

Section 15097 of the California Environmental Quality Act (CEQA) requires that all state and local agencies establish monitoring or reporting programs for projects approved by a public agency whenever approval involves the adoption of an Environmental Impact Report (EIR).

The mitigation monitoring and reporting program (MMRP) contained herein is intended to satisfy the requirements of CEQA as it relates to the Amoruso Ranch Specific Plan (ARSP or Proposed Project). This MMRP is intended to be used by City Staff and mitigation monitoring personnel to ensure compliance with mitigation measures during project implementation.

The Final EIR for the Proposed Project presents a detailed set of mitigation measures applicable to implementation of the Proposed Project. In addition, the EIR includes program-level mitigation measures for Urban Reserve Area (the area consisting of non-participating property owners that is only the subject of a sphere of influence amendment, annexation, and Urban Reserve pre-zoning at this time). The mitigation measures were initially developed during preparation of the Draft EIR (February 2016) and, in some cases, were refined during preparation of the Final EIR.

The intent of the MMRP is to ensure the effective implementation and enforcement of all adopted mitigation measures. The MMRP will provide for monitoring of construction activities, as necessary, and in the field identification and resolution of environmental concerns.

MITIGATION MONITORING PROGRAM DESCRIPTION

COMPLIANCE

The City of Roseville will coordinate monitoring activities and document the implementation of mitigation measures. The table below identifies the mitigation measures, the monitoring actions, the implementing entities, the responsible parties for monitoring actions, and the timing of mitigation actions. The entity identified as having implementing responsibility has the primary duty to execute the mitigation measures. The “Applicant(s)” shall refer to any entity that seeks entitlements for development of a project in the project area. In some instances this may require contracting for specialized consultant services. In instances where the implementing responsibility is shared between the City and Construction Contractors, the City would be responsible for ensuring that the mitigation requirements are implemented. In instances where the Reviewing Party is identified as a department manager or director, the manager or director may delegate review to appropriate subordinate staff.

FIELD MONITORING OF MITIGATION MEASURES

Prior to the issuance of grading and building permits, while detailed development plans are being prepared for acceptance by City Staff, City Staff will be responsible for ensuring compliance with mitigation monitoring applicable to the project design phase.

During construction and following the Proposed Project, the City's Development Services Department will assign inspectors who will be responsible for monitoring the implementation of the mitigation measures. The inspectors will report to the City's Development Services Department and will be thoroughly familiar with the mitigation measures in the MMRP. In addition, the inspectors will be familiar with construction contract requirements, schedules, standard construction practices, and mitigation techniques. The City will be responsible for onsite, day-to-day monitoring of construction activities, reviewing construction plans and equipment staging/access plans to ensure conformance with adopted mitigation measures. The City will also have the authority to enforce mitigation measures by suspending particular construction activities.

Once construction has been completed, the City will monitor the Proposed Project as necessary.

If any mitigation measures are not being implemented, the City may pursue corrective action. Penalties that may be applied include, but are not limited to, the following: (1) a written notification and request for compliance; (2) withholding of permits; (3) administrative fines; (4) a stop-work order; (5) criminal prosecution and/or administrative fines; (6) forfeiture of security bonds or other guarantees; and (7) revocation of permits or other entitlements.

CHANGES TO MITIGATION MEASURES

Any substantive change in the monitoring plan made by City Staff shall be reported in writing to the Development Services-Planning Division. Modifications to the mitigation may be made by City Staff subject to one of the following findings, documented by evidence included in the record:

- a. The mitigation measure included in the Final EIR and MMRP is no longer required because the significant environmental impact identified in the Final EIR has been found not to exist or to occur at a level which makes the impact less than significant as a result of changes in the project, changes in conditions of the environment or other factors.

Or

- b. The modified or substitute mitigation measure to be included in the MMRP provides a level of environmental protection equal to or greater than that afforded by the mitigation included in the Final EIR and the MMRP; and the modified or substitute mitigation measures do not have significant adverse effects on the environment in addition to or greater than those which were considered by the responsible hearing bodies in their decisions on the Final EIR and the Proposed Project; and the modified or substitute mitigation measures are feasible, and the City through measures included in the MMRP or other City procedures can ensure their implementation.

Findings and related documentation supporting the findings involving modifications to mitigation measures shall be maintained in the project file with the MMRP and shall be made available to the public upon request.

MITIGATION MONITORING PROGRAM

The table presented on the following pages provides the MMRP for the Proposed Project. The MMRP identifies:

1. An explanation of each impact by issue area, summarized as an impact statement;
2. The full text of the mitigation measure(s) applicable to each impact statement;
3. The method and/or process by which the mitigation measure will be implemented;
4. The timing of implementation of each mitigation measure; and
5. The party responsible for ensuring implementation of each mitigation measure.

As individual projects consistent with the specific plan are proposed, City Staff will review the Proposed Project for consistency with the ARSP Final EIR. In doing so all ARSP Final EIR mitigation measures will be reviewed and those that apply to the project will be identified and monitoring and reporting will be conducted consistent with this plan.

Following completion of the monitoring and reporting process, the final monitoring results will then be entered into the City's Mitigation Monitoring and Reporting database maintained by the Environmental Coordinator.

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
Land Use and Agriculture				
MM 4.1-1: Agricultural Compensation A minimum of six hundred thirty-six (636) acres of open space shall be preserved within Placer County to mitigate for the loss of 636 acres of agricultural and grazing lands. This shall be accomplished through the recordation of conservation easements that result in the formation of preserve lands (each a "mitigation property or "preserve site" and collectively, "mitigation lands" or "preserve lands"). For purposes of mitigation, the term "open space" shall include any and all undeveloped land proposed to be preserved by conservation easement or otherwise required by any governmental agency to be preserved for any reason, specifically including all lands preserved for habitat or agricultural mitigation as set forth below and lands in agricultural use. No additional agricultural mitigation is required beyond the 1:1 open space requirement, as long as a substantial portion of the mitigation lands acquired, as determined by the Planning Director, are: (1) in agricultural production, (2) undeveloped and have an Natural Resource Conservation Service (NRCS) soils classification of the same or greater value than lands being affected within the specific plan property at issue, or (3) undeveloped and have the same or higher value California Department of Conservation (DOC) categorization as lands being affected within the specific plan property at issue. In-kind mitigation is not required for agricultural land developed within the ARSP project site.	The Applicant(s) shall be responsible for securing the offsite conservation easement prior to approval of tentative maps proportional to the development proposed.	Prior to approval of tentative map.	The Planning Manager, City Open Space Preserve Manager, and Development Services Director will ensure that the conservation easement is recorded.	
Transportation and Circulation				
MM 4.3-1: Roseville Intersections: Pay Fair Share of Improvements in the CIP The Applicant shall pay fair-share fees toward the following improvements detailed within the CIP: Baseline Road/Fiddymont Road: Addition of a second eastbound left-turn lane. Cirby Way/Riverside Avenue: Addition of a third eastbound through lane. Baseline Road/Foothills Road: Addition of a third northbound through lane. Baseline Road/Woodcreek Oaks Boulevard: Addition of a second eastbound through lane. Blue Oaks Boulevard/Foothills Boulevard: Addition of a third northbound left-turn lane and a third southbound through lane. Cirby Way/Vernon Street: Addition of a second southbound left-turn lane. Foothills Boulevard/Junction Boulevard: Addition of a second eastbound left-turn lane. Roseville Parkway/Galleria Boulevard: Addition of a fourth westbound through lane.	The Development Agreement between the Applicant(s) and the City require the City to update the CIP and the Applicant(s) to pay fair share fees.	In accordance with Development Agreement, the traffic mitigation fees shall be paid on a pro-rata basis prior to the issuance of any building permit.	City of Roseville Public Works Director shall ensure that the mitigation measures are implemented. The Public Works Director will oversee the CIP and ensure that improvements are implemented in a timely fashion.	
MM 4.3-2: Transit Services: Pay Fair Share toward Transit Improvements	The Applicant(s) would be required to pay fair	Prior to issuance of building permits.	City Public Works Director will ensure	

Mitigation Monitoring and Reporting Program

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
The Applicant shall pay its fair share towards the capital improvements for expanded transit services to the project site. This includes bus turn-outs, shelter pads, and shelters.	share fees for transit improvements as determined by the Public Works Director, in accordance with the City's Improvement Standards.		that the improvements are implemented and fair share costs are collected at the time of building permit.	
MM 4.3-3: Placer County Intersections: Pay Fair Share Costs to Placer County Intersection Improvements The Applicant shall pay the fair share cost of improvements to restore acceptable operations during peak hours at the following intersections: a) Watt Avenue/PFE Road: Installation of a traffic signal at this intersection. This improvement is included in the Placer County CIP (December 2014). b) Walerga Road/PFE Road: Widening of Walerga Road to four lanes through the intersection, to consist of two northbound and two southbound travel lanes. The Placer County Countywide CIP (December 2014) includes funding right-of-way (ROW) acquisition for the widening of Walerga Road to six lanes from Baseline Road to the Sacramento County line. However, funding for construction is not provided. c) Cook-Riolo Road/PFE Road Intersection: Development of capacity-enhancing improvements identified by Placer County. This improvement is not included in any existing fee program. d) Fiddymment Road/Sunset Boulevard West: Installation of a traffic signal at this intersection. This improvement is not included in any existing fee program. e) Fiddymment Road/Athens Avenue: Installation of a traffic signal at this intersection. This improvement is not included in any existing fee program. f) Fiddymment Road/Sunset Boulevard West: The addition of a second eastbound left-turn lane at the intersection. This improvement is not included in any existing fee program. g) Fiddymment Road/Athens Avenue: The addition of a second westbound left-turn lane to the intersection. This improvement is not included in any existing fee program. h) N Foothills Boulevard/Athens Avenue: Installation of a traffic signal at this intersection. This improvement is not included in any existing fee program. Consistent with Placer County's Mitigation Measure 4.7-2a for the Placer Vineyards Specific Plan and Mitigation Measure 6.12-1 for the Regional University Specific Plan, the City of Roseville, in working with Placer County to provide funding for improvements not	The City and Placer County shall work in good faith to implement a regional traffic fee that if and when established will fund the identified improvements. Applicant(s) within the ARSP will be required to contribute to the regional fee to fund a portion of the improvements per the Development Agreement. Placer County will be responsible for overseeing the improvements. The City of Roseville will monitor traffic volumes and coordinate with the County regarding traffic mitigation fees to fund regional improvements.	Payment of fees by the Applicant(s) at the time of building permits issuance.	Placer County Public Works Director and the City Engineer will work towards the implementation of a regional traffic fee program that if and when formed will collect fees and implement mitigating improvements. The City of Roseville will monitor traffic volumes and coordinate with Placer County regarding traffic mitigation fees to fund regional improvements.	

Mitigation Monitoring and Reporting Program

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
already subject to an existing interagency fee program, shall negotiate in good faith with Placer County to enter into additional fair and reasonable arrangements with the intention of achieving, within a reasonable time period after approval of the ARSP, commitment for the provision of adequate fair share mitigation from the ARSP for significant impacts on Placer County roadways. In reaching an accommodation with Placer County, the City and Placer County, in order to better ensure an effective sub-regional approach to mitigating transportation-related impacts, may choose to include within the same agreements or Joint Powers Authority (JPA; if a JPA is formed) additional public agencies with whom it must work to mitigate transportation-related impacts, such as Sacramento County, Sutter County, and Caltrans. As the City strives to achieve agreement(s) with one or more of these other agencies, the City shall insist that "fair share" fee obligations be reciprocal, in the sense that the other local agencies, in accepting fair share contributions from the ARSP developers, must agree to require new development occurring in their own jurisdictions to make fair share contributions towards mitigating the significant effects of such development on the City's transportation network. Any such arrangement(s), with just Placer County or with additional agencies, shall account for existing inter-agency fee programs in order to avoid requiring redundant mitigation or fee payments exceeding fair share mitigation levels. The City intends that its arrangement(s) with Placer County and any other agencies shall permit the participating agencies flexibility in providing cross-jurisdictional credits and reimbursements consistent with the general "fair share" mitigation standard, and require an updated model run incorporating the best available information in order to obtain the most accurate, up-to-date impact assessment feasible and to generate the most accurate, up-to-date estimates of regional fair share contributions. These arrangements, moreover, should also include provisions that allow for periodic updates to the traffic modeling on which fair share payment calculations depend in order to account for (i) newly approved projects cumulatively contributing to transportation-related impacts and that therefore should contribute to the funding of necessary improvements (e.g., the Curry Creek Community Plan in Placer County), (ii) additional physical improvements necessitated in whole or in part by newly approved projects, (iii) changing cost calculations for the construction of needed improvements based on changes in the costs of materials, labor, and other inputs. The City will monitor traffic volumes and coordinate with the County regarding traffic mitigation fees to fund regional improvements.				
MM 4.3-4: Sutter County Facilities: Pay Fair Share Costs to Sutter County Intersection Improvements The Applicant shall pay the fair share costs of improvements to restore acceptable operations during peak hours at the following intersections:	The City and Sutter County shall work in good faith to implement a regional traffic fee that if and	Payment of fees by the Applicant(s) at the time of building permits issuance.	Sutter County Public Works Director and the City Engineer will work towards the implementation of a	

Mitigation Monitoring and Reporting Program

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
a) Pleasant Grove Road N/Riego Road: Widening of Riego Road to four lanes through the intersection, to consist of two eastbound and two westbound travel lanes. This improvement is not included in any known fee program. b) Pleasant Grove Road S/Riego Road: Widening of Riego Road to four lanes through the intersection, to consist of two eastbound and two westbound travel lanes. This improvement is not included in any known fee program. The City of Roseville shall negotiate in good faith to enter into a fair agreement with Sutter County regarding the ARSP's fair share mitigation for these improvements. In reaching an accommodation with Sutter County, the City and Sutter County, in order to better ensure an effective sub-regional approach to mitigating transportation-related impacts, may choose to include within the same agreements or JPA additional public agencies with whom it must work to mitigate transportation-related impacts, such as Placer County, Sacramento County, and Caltrans. As the City strives to achieve agreement(s) with one or more of these other agencies, the City shall insist that "fair share" fee obligations be reciprocal, in the sense that the other local agencies, in accepting fair share contributions from the ARSP developers, must agree to require new development occurring in their own jurisdictions to make fair share contributions towards mitigating the significant effects of such development on the City's transportation network. Any such arrangement(s), with just Sutter County or with additional agencies, shall account for existing inter-agency fee programs in order to avoid requiring redundant mitigation or fee payments exceeding fair share mitigation levels. The City intends that its arrangement(s) with Sutter County and any other agencies shall permit the participating agencies flexibility in providing cross-jurisdictional credits and reimbursements consistent with the general "fair share" mitigation standard, and require an updated model run incorporating the best available information in order to obtain the most accurate, up-to-date impact assessment feasible and to generate the most accurate, up-to-date estimates of regional fair share contributions. These arrangements, moreover, should also include provisions that allow for periodic updates to the traffic modeling on which fair share payment calculations depend in order to account for (i) newly approved projects cumulatively contributing to transportation-related impacts and that therefore should contribute to the funding of necessary improvements (e.g., the Curry Creek Community Plan in Placer County), (ii) additional physical improvements necessitated in whole or in part by newly approved projects, (iii) changing cost calculations for the construction of needed improvements based on changes in the costs of materials, labor, and other inputs. Implementation of Mitigation Measure 4.3-4 would reduce impacts to a less-than-significant level; however, these improvements lie outside the jurisdiction of the City of Roseville.	when established will fund the identified improvements. Applicant(s) within the ARSP will be required to contribute to the regional fee to fund a portion of the improvements per the Development Agreement. Sutter County will be responsible for overseeing the improvements.		regional traffic fee program that if and when formed will collect fees and implement mitigating improvements.	
MM 4.3-5: Placer County Segments: Pay Fair Share Costs to Placer County Facilities The Applicant shall pay the fair share costs of improvements to restore acceptable operations on the following roadway segments:	The City and Placer County shall work in good faith to implement a regional	Payment of fees by the Applicant(s) at the time of building permits issuance.	Placer County Public Works Director and the City Engineer will work towards the	

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
a) Walerga Road between Baseline Road and PFE Road: Widening of this roadway to four lanes, consisting of two continuous northbound and southbound travel lanes. The Placer County Countywide Traffic Fee Program (December 2014) includes funding for ROW acquisition for the widening of Walerga Road to size lanes from Baseline to the Sacramento County line. However, funding for construction is not provided. b) Sunset Boulevard West between Fiddymont Road and Westbrook Boulevard: Widening of this roadway to include four lanes. However, only two travel lanes are necessary (based on travel demand) upon construction of Placer Parkway. Therefore, Placer County may request that the fair share contribution cover roadway widening for dedicated turn lanes and/or shoulders, capacity widening, or a contribution toward the construction of Placer Parkway. It should be noted that consistent with Mitigation Measure 4.3-7, the Proposed Project is required to contribute to the construction of Placer Parkway through payment of the South Placer Regional Transportation Authority (SPRTA) fees. Improvements to Sunset Boulevard West are not included in any existing fee program. c) Fiddymont Road from Athens Avenue to Sunset Boulevard West: Widening of this roadway to six lanes. This improvement is not included in any existing fee program. The City shall determine the means of providing the ARSP's fair share to fund these improvements with Placer County through the inter-agency agreement or other arrangement required by Mitigation Measure 4.3-3. Widening of Walerga Road south of Baseline to six lanes is identified in the Dry Creek Community Plan.	traffic fee that if and when established will fund the identified improvements. Applicant(s) within the ARSP will be required to contribute to the regional fee to fund a portion of the improvements per the Development Agreement. Placer County will be responsible for overseeing the improvements.		implementation of a regional traffic fee program that if and when formed will collect fees and implement mitigating improvements.	
MM 4.3-6: Sacramento County Segments: Pay Fair Share Costs to Sacramento County Facilities The Applicant shall pay their fair share cost of improvements to restore operations on the following roadway segment: ▪ Walerga Road between PFE Road and Singing Tree Way: Widening of this roadway to four lanes, consisting of two northbound and southbound travel lanes. The Sacramento County General Plan Circulation Element (amended 2011) shows this segment of Walerga Road as a planned four-lane road. However, the Final Report for the Sacramento County Development Transportation Impact Fee Program (2010) does not include this widening in the fee program. Consistent with Placer County's Mitigation Measure 4.7-2a for the Placer Vineyards Specific Plan and Mitigation Measure 6.12-1 for the Regional University Specific Plan, which require Placer County to attempt to enter into an agreement with Sacramento County in order to mitigate the significant effects of the those two Placer County projects	The City and Sacramento County shall work in good faith to implement a regional traffic fee that if and when established will fund the identified improvements. Applicant(s) within the ARSP shall be required to contribute to the regional fee to fund a portion of the improvements per the Development Agreement.	Payment of fees by the Applicant(s) at the time of each building permit	Sacramento County Public Works Director and the City Engineer will work towards the implementation of a regional traffic fee program that if and when formed will collect fees and implement mitigating improvements.	

Mitigation Monitoring and Reporting Program

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
within Sacramento County, the City of Roseville shall negotiate in good faith to enter into a fair agreement with Sacramento County regarding the ARSP's fair share mitigation for this improvement. In reaching an accommodation with Sacramento County, the City and Sacramento County, in order to better ensure an effective subregional approach to mitigating transportation-related impacts, may choose to include within the same agreements or JPA additional public agencies with whom it must work to mitigate transportation-related impacts, such as Placer County, Sutter County, and Caltrans. As the City strives to achieve agreement(s) with one or more of these other agencies, the City shall insist that "fair share" fee obligations be reciprocal, in the sense that the other local agencies, in accepting fair share contributions from the ARSP developers, must agree to require new development occurring in their own jurisdictions to make fair share contributions towards mitigating the significant effects of such development on the City's transportation network. Any such arrangement(s), with just Sacramento County or with additional agencies, shall account for existing inter-agency fee programs in order to avoid requiring redundant mitigation or fee payments exceeding fair share mitigation levels. The City intends that its arrangement(s) with Sacramento County and any other agencies shall permit the participating agencies flexibility in providing cross-jurisdictional credits and reimbursements consistent with the general "fair share" mitigation standard, and require an updated model run incorporating the best available information in order to obtain the most accurate, up-to-date impact assessment feasible and to generate the most accurate, up-to-date estimates of regional fair share contributions. These arrangements, moreover, should also include provisions that allow for periodic updates to the traffic modeling on which fair share payment calculations depend in order to account for (i) newly approved projects cumulatively contributing to transportation-related impacts and that therefore should contribute to the funding of necessary improvements, (ii) additional physical improvements necessitated in whole or in part by newly approved projects, (iii) changing cost calculations for the construction of needed improvements based on changes in the costs of materials, labor, and other inputs. Implementation of Mitigation Measure 4.3-6 would reduce impacts to a less-than-significant level; however, these improvements lie outside the jurisdiction of the City of Roseville.	Sacramento County will be responsible for overseeing the improvements.			
MM 4.3-7: State Facilities: Payment of Fees for State Roadway Segments No specific improvements have been identified to mitigate project impacts on I-80 or SR 65; however, the City is willing to work with Caltrans & the Placer County Transportation Planning Agency (PCTPA) to establish a regional approach to institute a fee program for the purpose of funding improvements on these facilities. If and when Caltrans and the City enter into an enforceable agreement, the Proposed Project shall pay impact fees to the City of Roseville in amounts that constitute the Proposed Project's fair share contributions to the construction of transportation facilities and/or improvements, consistent with the Mitigation Fee Act (Gov. Code, § 66000 et seq.). The City shall determine the means of providing the project's fair share of the funds for	The City, Caltrans, and PCTPA shall work in good faith to implement a regional traffic fee that if and when established will fund the identified improvements. Applicant(s) within the ARSP will be required to contribute to the regional fee to fund a	Payment of fees by the Applicant(s) prior to issuance of building permits.	Caltrans Director and the City Engineer will work towards the implementation of a regional traffic fee program that if and when formed will collect fees and implement mitigating improvements.	

Mitigation Monitoring and Reporting Program

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
these improvements to Caltrans through the inter-agency agreement or other arrangement. The Applicant shall pay the Highway 65 JPA fee and the SPRTA fee. The Highway 65 JPA Fee assesses fees on new development for the cost of interchange improvements along SR 65. The SPRTA Fee provides funding for regional projects such as the SR 65 Widening Project and Placer Parkway.	portion of the improvements per the Development Agreement. Caltrans will be responsible for overseeing the improvements.			
MM 4.3-8: City of Roseville Facilities: Update the City of Roseville Capital Improvement Plan The City of Roseville shall modify its CIP to include the following improvements: ▪ Blue Oaks Boulevard/Westbrook Boulevard: Provide two left-turn lanes, three through lanes, and one right turn lane on all approaches and operate the westbound right-turn movement with an overlap phase. ▪ Westbrook Boulevard/Vista Grande Boulevard: Redesign the westbound approach (currently proposed to consist of one left-turn, two through lanes, and one right-turn lane) to be striped to consist of two left-turn lanes, one through lane, and one right-turn lane. Once the CIP is modified, the Applicant shall pay fair-share fees toward the above improvements.	The Development Agreement between the Applicant(s) and the City require the City to update the CIP and the Applicant(s) to pay fair share fees.	In accordance with Development Agreement, the traffic mitigation fees shall be paid on a pro-rata basis prior to the issuance of any building permit.	City of Roseville Development Services Director shall confirm that the mitigation measures are integrated into the City's CIP. The Public Works Director will oversee the CIP and confirm that improvements are implemented in a timely fashion.	
Air Quality				
MM 4.4-1: Measures to Reduce Short-Term Construction-Related Emissions The following mitigation measures shall be implemented to reduce short-term construction-related air quality impacts. a. Prior to approval of Grading or Improvement Plans, (whichever occurs first), on project sites greater than five acres, the Applicant shall submit to Placer County Air Pollution Control District (PCAPCD) a Construction Emission / Dust Control Plan within 30 days prior to groundbreaking. If the PCAPCD does not respond within 20 days, the plan shall be considered approved. The Applicant shall provide written evidence, provided by the PCAPCD, to the City that the plan has been submitted to PCAPCD. It is the responsibility of the Applicant to deliver the approved plan to the local jurisdiction. The Applicant shall not break ground prior to receiving PCAPD approval of the Construction Emission / Dust Control Plan, and delivering that approval to the local jurisdiction issuing the permit, unless the PCAPCD does not respond within 20 days of submission of the plan, and the plan is deemed approved. b. The following shall be included in the Dust Control Plan:	Grading and Improvement Plans will be reviewed by the Placer County Air Pollution Control District for compliance with their rules and regulations. The Applicant(s) shall submit a PCAPCD approved Construction Emission/Dust Control Plan as part of the Grading Permit or Improvement Plan application to the City.	Prior to approval of Grading or Improvement Plans.	The City Engineer shall confirm that construction emission and dust control measures are implemented.	

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
▪ During construction, emissions of fugitive dust from any active operation, open storage pile, or disturbed surface area, shall be controlled so that dust does not remain visible in the atmosphere beyond the boundary line of the emission source. ▪ When wind speeds result in dust emissions crossing the property line, and despite the application of dust control measures, grading and earthmoving operations shall be suspended and inactive disturbed surface areas shall be stabilized. ▪ Fugitive dust generated by active operations, open storage piles, or from a disturbed surface area shall not result in such opacity as to obscure an observer's view to a degree equal to or greater than does smoke as dark or darker in shade as that designated as No. 2 on the Ringlemann Chart (or 40 percent opacity). ▪ All exposed soils be watered a minimum of once every two hours of active operation or sufficiently often to keep the area adequately wetted. ▪ Any visible track-out on a paved road where vehicles enter and exit the work area must be removed at the end of the workday or at least on time per day. Removal shall be accomplished by using wet sweeping or a High Efficiency Particulate Air (HEPA) filter equipped vacuum device. Dirt from vehicles exiting shall be removed through the use of a gravel pad, a tire shaker, a wheel wash system, or a pavement extending for not less than 50 feet from the intersection with the paved public road. c. Include the following standard note on the Grading or Improvement Plan: The prime contractor shall submit to the District a comprehensive inventory (i.e., make, model, year, emission rating) of all the heavy-duty off-road equipment (50 horsepower or greater) that will be used in aggregate of 40 or more hours for the construction project. If any new equipment is added after submission of the inventory, the prime contractor shall contact the PCAPCD prior to the new equipment being utilized. At least three business days prior to the use of subject heavy-duty off road equipment, the project representative shall provide the District with the anticipated construction timeline including start date, name and phone number of the property owner, project manager and on-site foreman. d. Prior to approval of Grading or Improvement Plans, whichever occurs first, the Applicant shall provide a written calculation to the PCAPCD for approval by the District demonstrating that the heavy-duty (50 horsepower or greater) off-road vehicles to be used in the construction project, including owned, leased and subcontractor vehicles, will achieve a project wide fleet-average 20 percent NO_x reduction and 45 percent particulate reduction as required by California Air Resources Board (CARB). Acceptable options for reducing emissions may include use of late model engines, low-emission diesel products, alternative fuels, engine	The Development Services Director shall review grading or improvement plans for inclusion of these measures prior to issuance of grading permits. The City Code Enforcement Officer shall respond to complaints.			

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
retrofit technology, after-treatment products, and/or other options as they become available. e. In order to control dust, operational watering trucks shall be on-site during construction hours. In addition, dry, mechanical sweeping is prohibited. Watering of a construction site shall be carried out in compliance with all pertinent PCAPCD rules (or as required by ordinance within each local jurisdiction). f. Include the following standard notes on the Improvement/Grading Plan: ▪ During construction the contractor shall utilize existing power sources (e.g., power poles) or clean fuel (i.e. gasoline, biodiesel, natural gas) generators rather than temporary diesel power generators. ▪ During construction the contractor shall minimize idling time to a maximum of 5 minutes for all diesel-powered equipment. g. Signs shall be posted in the designated queuing areas of the construction site to remind off-road equipment operators that idling time is limited to a maximum of 5 minutes.				
MM 4.4-2: Project Measures to Reduce Operational Emissions Following receipt of an application for a Tentative Map (excluding the Large Lot Subdivision Map), Design Review Permit, conditional use permits and/or any other discretionary permits, the City will forward an early consultation notice to the PCAPCD. Where the PCAPCD provides comments on a specific development proposal, the City shall consult with PCAPCD and the developer to incorporate measures recommended by the PCAPCD and agreed to by the City into the project. Where the PCAPCD does not provide comment on a specific development proposal, the City shall incorporate measures that reduce vehicle emissions and operation emissions from the proposed development. This measure will be implemented through project design, conditions of approval, noticing and disclosure statements, or through the City's plan check and inspection processes. This process is intended to ensure that best available and practical approaches are used to reduce operational emissions in specific tentative map and design review permit applications. The following is a listing of measures that shall be implemented for the purpose of reducing vehicle and operational emissions, unless the Applicant provides an analysis that demonstrates to the City's satisfaction that the measure is infeasible or other measure is comparably effective. If the Applicant demonstrates that any particular measure in the list below is infeasible for a Proposed Project to which it would otherwise be applicable, the Applicant must provide an analysis supported by substantial evidence demonstrating that a replacement measure is comparably effective.	The Applicant(s) shall provide this information as general notes on grading and/or improvement plans submitted with permit applications. The City shall consult with PCAPCD and shall require the incorporation of measures to reduce vehicle emissions prior to issuance of building permits. The City Code Enforcement Officer shall respond to complaints.	Prior to issuance of building permits.	The Development Services Director, the City Engineer and Code Enforcement Officer shall confirm that the operational emission measures are implemented.	

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
▪ Provide tree plantings that meet or exceed the requirements of the City's Community Design Guidelines to provide shading of buildings and parking lots. ▪ Landscape with native drought-resistant plants (ground covers, shrubs and trees) with particular consideration of plantings that are not reliant on gas-powered landscape maintenance equipment. ▪ Require all flat roofs on non-residential structures to have a white or silver cap sheet to reduce energy demand. ▪ Provide conductive/inductive electric vehicle charging station and signage prohibiting parking for non-electric vehicles within designated spaces within non-residential developments. ▪ Provide vanpool parking only spaces and preferential parking for carpools to accommodate carpools and vanpools in employment areas (e.g. community commercial, business-professional uses) ▪ All truck loading and unloading docks shall be equipped with one 110/208 volt power outlet for every two-dock doors. Signs shall be posted stating "Diesel trucks are prohibited from idling more than five minutes and trucks requiring auxiliary power shall connect to the 110/208-vot outlets to run auxiliary equipment". ▪ Design streets to maximize pedestrian access to transit stops. ▪ Require site design to maximize access to transit lines, to accommodate bus travel, and to provide lighted shelters at transit access points. ▪ Develop the plan consistent with the higher residential densities (within approved residential density ranges of zone) provided around the village nodes and transit corridors. ▪ Participate in Roseville Electric incentive programs for energy-efficient development where feasible if available at the time of construction. ▪ Ten percent of the residential units shall be designated as low to very-low income residential units. ▪ A pedestrian access network shall link areas of the project site with other land uses. ▪ Electric landscape maintenance equipment shall be utilized to the extent feasible on parks and public/quasi-public lands. ▪ Design buildings to meet the 2013 Title 24 Energy Efficiency Standards (which is a 25% reduction below 2010 Title 24 Energy Efficiency Standards). ▪ Ensure that all area lighting installed on the site shall be considered high efficiency lighting. All public street lighting shall meet the lighting standards of Roseville Electric at the time of construction. ▪ Utilize reclaimed water for irrigation of all non-single family areas within the project site, including the school, parks, paseos, roadway landscaping and commercial landscaping.				

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
- Reduce the area of turf allowed consistent with the City's Water Efficient Landscape Ordinance and the Water Conservation Strategy (see Appendix G). - Install water efficient landscape irrigation systems at all public land uses. Measures for Residential Units: - Require electrical outlets be installed on the exterior walls of both the front and back of residences to promote the use of electric landscape maintenance equipment. - Require every garage of each single family home to be considered "Electric Vehicle Ready". This by definition is not limited to, but includes a conduit raceway to a spare electric box in the garage that is sized for a future minimum 50-amp 220v outlet. A 220v breaker space must be available in the electrical panel. - Require installation of a gas outlet in the rear of residential buildings for use of outdoor cooking appliances, such as gas burning barbeques. - Require installation of low NO_x hot water heaters (beyond District Rule 246 requirements) - Prior to approval of Tentative Maps: provide notice to homebuyers through CC&Rs or other mechanisms to inform them that only gas fireplaces are permitted. - The Applicant shall ensure that builders offer only energy efficient appliances for installation in residential units, including Energy Star refrigerators, clothes washers, dishwashers, and ceiling fans. - Prior to building permit approval, the Applicant shall show, on the plans submitted to the Building Department, provisions for construction of new residences, and where natural gas is available, the installation of a gas outlet for use with outdoor cooking appliances, such as a gas barbecue or outdoor recreational fire pits.				
MM 4.4-3: Off-Site Mitigation for Operational Emissions Prior to the issuance of building permits, in order to mitigate the contribution to long-term emissions of pollutants, subject to the PCAPCD's review and approval, the Applicant shall either: - Establish mitigation on-site by incorporating design features within the project. This may include, but not be limited to: "green" building features such solar panels, energy efficient heating and cooling, exceeding Title 24 standards, bike lanes, bus shelters, etc as described in Mitigation Measure 4.4-3. The specific amounts of "credits" received shall be established and coordinated through the PCACPD; - Establish mitigation off-site within the same region (i.e., east or west Placer County) by participating in an offsite mitigation program, coordinated through the District. Examples include, but are not limited to: participation in a "Biomass" program that provides emissions benefits; retrofitting, repowering, or replacing heavy duty engines from mobile sources (e.g., buses, construction equipment, on road haulers);	The Applicant(s) shall provide evidence of compliance with this measure in building permit applications submitted to the City. The Development Services Director shall review plans for inclusion of measures prior to issuance of building permits. The City Code Enforcement Officer shall respond to complaints.	Prior to issuance of building permits.	The Development Services Director, the City Engineer and Code Enforcement Officer shall confirm that the operational emission measures are implemented.	

Mitigation Monitoring and Reporting Program

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
or other programs that the project proponent may propose to reduce emissions; c. Participate in the District's Offsite Mitigation Program (Resolution Number 01-06) by paying fees equal to the project's contribution of pollutants (reactive organic gas [ROG] and NO_x) in excess of the threshold of 82 lbs per day. The estimated payment for the Proposed Project is \$885,870 based on a rate of \$18,260 per ton for a one year period. The actual amount to be paid shall be determined, and satisfied pursuant to current California Air Resource Board guidelines, at the time of recordation of the Final Map or issuance of Building Permits; or d. Any combination of a, b, or c, calculated to reduce or off-set the project's emissions above thresholds, and as determined feasible by the Director of the PCAPCD.				
MM 4.4-4: Screen Health Risks. a. The siting of proposed land use types, including fueling facilities and other stationary source/industrial land use types, within the project site shall meet the minimum screening buffer recommendations within the applicable CARB Air Quality and Land Use Handbook in effect at the time of building permit issuance. Within the current (April 2005) Handbook, this would require that sensitive land uses, including residential and school uses, be located greater than 50 feet from the fence line of typical gas dispensing facilities, and greater than 300 feet from large gasoline dispensing facilities, defined as a facility with a throughput of 3.6 million gallons per year or greater. b. For projects that include stationary sources of air pollutants or toxic air contaminants (TACs) e.g., gasoline dispensing facility, auto painting, dry cleaning, large heating, ventilation, and air conditioning [HVAC] units, etc.), a copy of the Authority to Construct permit from PCAPCD shall be provided to the City prior to the issuance of a Certificate of Occupancy.	The Applicant shall submit a Permit to Operate to PCAPCD during the design review process.	Prior to issuance of a certificate of occupancy.	The PCAPCD shall review proposals and notify the Planning Manager should a proposed use exceed the TAC threshold. The Planning Manager and Environmental Coordinator shall determine if additional environmental review is required prior to approval of the use and ensure that measures are implemented to reduce exposure to TACs.	
Climate Change and Greenhouse Gas Emissions				
MM 4.5-1: Measures to Reduce GHG Emissions Implementation of the Air Quality Mitigation Measures 4.4-1 and 4.4-2 would reduce operational and construction-related emissions of criteria air pollutants and precursors, and would also act to reduce GHG emissions associated with project construction and operation. The requirements of Mitigation Measure 4.4-2 are listed below and would achieve a 21 percent reduction in GHG emissions over business as usual (BAU): Refer to MM 4.4-1 and MM 4.4-2.	Refer to MM 4.4-1 and MM 4.4-2 .	Refer to MM 4.4-1 and MM 4.4-2 .	Refer to MM 4.4-1 and MM 4.4-2 .	
Noise				
MM 4.6-1: Construction Noise Reduction The following measures shall be implemented to reduce impacts of construction noise:	These measures shall be included on building	Prior to approval of building permits.	The Chief Building Inspector shall ensure	

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
- Ensure construction activities comply with the requirements of the City of Roseville Noise Ordinance with respect to hours of operation. - Locate fixed construction equipment such as compressors and generators as far as possible from sensitive receptors. Shroud or shield all impact tools, and muffle or shield all intake and exhaust ports on power construction equipment. - Designate a disturbance coordinator and conspicuously post this person's number around the project site and in adjacent public spaces. The disturbance coordinator shall receive all public complaints about construction noise disturbances and shall be responsible for determining the cause of the complaint, and implement any feasible measures to be taken to alleviate the problem. - Well Drilling Construction Noise: - The on-site ASR well shall be drilled prior to the occupancy of residential units within 500 feet of the well site. - Noise curtains shall be utilized during drilling of the well if, at the time of well construction, homes are occupied within 1,000 feet of the well.	plans. The Chief Building Inspector shall review plans for inclusion of these measures prior to issuance of building permits. The Disturbance Coordinator shall respond to complaints.		that appropriate noise control measures are reflected in the building plans. The Building Official shall ensure that construction contractors comply with the measures. The Code Enforcement Inspector shall enforce the City's Noise Ordinance regulations.	
MM 4.6-2: Commercial Noise Controls For all commercial uses within 500 feet of residential uses, the developer shall implement the following or equally effective measures: - Where commercial land uses adjoin residential property lines, the following measures shall be included in the design of the commercial use. If the primary noise sources are parking lot noise, HVAC equipment and light truck deliveries, then 6-7 foot tall masonry walls shall be constructed to provide adequate isolation of parking lot and delivery truck activities. HVAC equipment shall be located either at ground level, or when located on roof-tops the building facades shall include parapets for shielding. - Where commercial uses adjoin common residential property lines, and loading docks or truck circulation routes face the residential areas, the following mitigation measures shall be included in the project design: - Loading docks and truck delivery areas shall be a minimum distance of 211 feet from residential property lines; - Property line barriers shall be eight feet in height. Circulation routes for trucks shall be located a minimum of 80 feet from residential property lines; - Loading dock and truck deliveries shall be limited to daytime hours; - All heating, cooling and ventilation equipment shall be located within mechanical rooms where possible;	The Planning Department shall review development proposals to ensure that the uses are compatible and that these measures have been implemented.	At the time of occupancy.	The Planning Manager shall review all commercial plans and ensure that appropriate measures are implemented.	

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
○ All heating, cooling and ventilation equipment shall be shielded from view with solid barriers; ○ Emergency generators shall comply with the local noise criteria at the nearest noise-sensitive receivers; and ○ In cases where loading docks or truck delivery circulation routes are located less than 211 feet from residential property lines or if nighttime deliveries are required, an acoustical evaluation shall be submitted to the City to verify compliance with the City of Roseville Noise Level Performance Standards. Uses that do not comply with the City of Roseville Noise Level Performance Standards shall not be permitted. ▪ Prior to City approval of conditionally permitted uses which include more substantial exterior noise sources such as car washes, automotive repair, and outdoor recreation, a noise study shall be prepared by an acoustical engineer that identifies the necessary measures required to achieve compliance with the City of Roseville Noise Level Performance Standards at the nearest sensitive receptors. The City shall require that the measures identified in the noise study are implemented as a condition of approval of conditional use permits.				
MM 4.6-3: Traffic Noise Control The following measures would reduce impacts to off-site sensitive receptors from traffic noise levels: ▪ Sunset Boulevard West shall be repaved from Pleasant Grove Road to Westbrook Boulevard using Open Graded Asphalt Concrete (OGAC). ▪ Pleasant Grove Road shall be repaved north of Baseline Road using OGAC.	The City will seek to incorporate this measure into the regional traffic fee program developed with Placer County. If incorporated into the regional traffic fee, the Applicant(s) within the ARSP will be required to contribute to the regional fee on a pro-rata basis. The County will be responsible for overseeing the improvements.	Prior to approval of building permits.	The City Engineer will verify the feasibility of this measure with the Placer County Public Works Director. If feasible, the County Public Works Director will ensure that the regional traffic fee program is implemented, the fees collected, and the improvements implemented.	
MM 4.6-4: Traffic Noise Attenuation within the Project Site The following measure shall be implemented to reduce traffic noise impacts: ▪ A detailed analysis of interior noise levels shall be conducted when building plans are available for the residential uses adjacent to the proposed Placer Parkway	Applicant(s) shall submit site-specific acoustical analyses to the Chief Building Inspector for review	Prior to approval of building permits.	The Chief Building Inspector shall ensure that appropriate noise control measures are reflected in the building plans. The Building	

Mitigation Monitoring and Reporting Program

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
alignment. The analysis shall identify noise control measures that are required to achieve compliance with the City of Roseville 45 decibels (dB) L_{dn} interior noise level standard, such as installation of windows and doors with a sound transmission class (STC) rating of 30 to 35, and these noise control measures shall be implemented to achieve compliance with the City's standard. Such analysis shall be conducted by a qualified acoustical consultant recognized by the City of Roseville. Mechanical ventilation shall be installed in all residential uses adjacent to Placer Parkway to allow residents to keep doors and windows closed, as desired for acoustical isolation.			Official shall ensure that construction contractors comply with the measures. The Code Enforcement Inspector shall enforce the City's Noise Ordinance regulations.	
Vegetation and Wildlife				
MM 4.8-1(a): Ensure No Net Loss of Wetlands The City shall not issue a grading permit for the ARSP unless a Clean Water Act (CWA) Section 404 permit is first obtained from the U.S. Army Corps of Engineers (USACE), or an equivalent approval for waters of the State is obtained from the Regional Water Quality Control Board (RWQCB). The CWA Section 404 permit process (including Section 7 Consultation under Federal Endangered Species Act [FESA]) is the standard method for developing mitigation for projects that affect wetlands and vernal pool species such as special-status plants, vernal pool crustaceans, and Western spadefoot. Through this process, project Applicants shall be required to obtain the necessary permits and approvals to implement their Proposed Project while remaining in compliance with CWA and FESA. If a 404 permit is not obtained, the City shall not issue a grading permit for the Proposed Project. The obligation to obtain the 404 permit shall ensure no net loss to federally protected wetlands. After obtaining such a permit, however, the Applicant shall demonstrate to the City's Planning Director that they have also achieved no net loss of wetlands. Mitigation shall consist of a combination of the preservation of on-site vernal pool and other wetland habitat and the acquisition of off-site property with existing vernal pool and other wetland habitat for preservation. Mitigation shall include off-site creation and/or restoration of vernal pool and other wetland habitat, and/or participation in a mitigation credit program from a wetlands mitigation bank approved by the USACE and U.S. Fish and Wildlife Service (USFWS). These banks charge fees in exchange for credits that are based upon the mitigation obligation of the Applicant. If the Applicant chooses to buy mitigation credits, the Applicant shall pay fees that shall be used to restore, create, enhance, and/or preserve wetlands at an established mitigation bank. The credits shall be in direct proportion to the wetland impacts resulting from the Proposed Project. The project Applicants have identified appropriate off-site mitigation in the form of preservation, as shown in Figure 4.8-3. This off-site mitigation, coupled with on-site preservation and avoidance, shall be a component of the required compensation for the	The Applicants shall obtain appropriate permits from USACE and USFWS to ensure that there is no net loss of wetlands. The Applicant(s) shall coordinate with USFWS to modify as necessary any mitigation plans in an effort to attain mitigation success.	Prior to issuance of grading permit.	The City's Environmental Coordinator shall confirm that a Section 404 Permit has been issued and appropriate mitigation has been implemented for the proposed development areas. The Developer's biological monitor shall ensure that onsite wetlands are preserved and maintained consistent with the Section 404 Permit and applicable management plan.	

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
Proposed Project. All wetland restoration and creation shall be conducted in a manner consistent with applicable USACE and USFWS mitigation guidelines and policies.				
MM 4.8-1(b): Wetland Avoidance/Mitigation Plan For any wetlands to be restored or created outside of an approved mitigation bank, the Applicant shall submit a Wetland Mitigation Plan that describes the specific method(s) to be implemented to mitigate for all on-site or off-site project-related impacts. This detailed Wetland Mitigation Plan shall be prepared in accordance with applicable USACE and USFWS policies and regulations, and the City's Grading and Erosion Control Ordinance. A copy of the 404 permit, the biological opinion, and the Wetland Mitigation Plan shall be provided to the City at the time of specific entitlements (grading permit, tentative map, etc), and the Wetland Mitigation Plan shall ensure the following to the satisfaction of the City: a) Describe the location of the proposed wetland mitigation site(s), including a detailed map showing the acreage, distribution, and type of wetlands to be restored/created to ensure no net loss in wetland habitat acreage, values and functions. The compensation wetlands shall be designed, at a minimum, to meet or exceed the functions of the existing wetlands to be impacted. b) Include a monitoring plan to assess whether the compensation wetlands are functioning as intended. Specific performance standards for hydrologic, floral, and faunal parameters shall be proposed to determine success of the created wetlands. The monitoring plan shall specify the corrective measures/ modifications to be implemented in the event that monitoring indicates that the performance standards are not being met. c) Include a long-term maintenance plan for the wetland preservation/mitigation areas describing the measures implemented to assure that they are maintained as wetland habitat in perpetuity. d) Require that fencing be installed around all existing wetlands that are within 50 feet of any haul route, spoil zone, stockpile zone, creation zone, or other construction area. The fencing shall be of high visibility material. Fencing shall be placed no closer than 10 feet to the delineated, verified perimeter of wetlands. This fencing shall be maintained until all adjacent construction activities are completed. e) A qualified biological resources monitor, approved by the City, shall be on the site(s) at all times when working in the open space corridor or other sensitive areas to ensure compliance with identified mitigation for the duration of all the proposed activities. The biological resources monitor shall submit bi-annual compliance reports to City monitor for review for a period of five years after completion of construction or until all performance standards have been satisfied. f) The wetland mitigation site(s) shall be surveyed by a qualified biologist, no more than 30 days prior to the start of construction, for the presence of raptor and federal	The Applicants shall obtain necessary approvals from USACE and USFWS in accordance with Section 404 of the CWA to ensure that there is no net loss of wetlands and submit a Wetland Mitigation Plan to the City. The Applicant(s) shall coordinate with USACE and USFWS to modify as necessary any mitigation plans in an effort to attain mitigation success.	Prior to issuance of specific entitlements.	The City's Environmental Coordinator shall confirm that wetlands are preserved consistent with the agency approved wetland avoidance and mitigation plan.	

Mitigation Monitoring and Reporting Program

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
and state listed bird nesting sites, unless it is determined that construction will occur outside of the breeding season for all species likely to occur on site or observed present. If active nesting sites are observed, all state and federal guidelines pertaining to active nesting sites shall be strictly adhered to in consultation with a qualified biologist. g) Applicant shall grant full access to the wetland mitigation site(s) to the City for the monitoring of construction activities and mitigation compliance. Access shall be granted during all construction activities and the City monitor may issue stop work orders if mitigation non-compliance is identified. h) Applicant shall specify measures for reuse or disposal of excavated material that is suitable for use in the project site. The plan should minimize the elapsed time between excavation and reuse and provide adequate stockpile coverage and protection from wind and water erosion during the entire storage period. If excavated material is unsuitable for reuse at the project site, the plan shall include specific information regarding the eventual reuse or disposal site, transportation method(s), disposal reuse management, and schedule. i) The Wetland Avoidance Mitigation Plan shall include a spill prevention and response plan to the satisfaction of the City. j) All disturbed areas shall be re-vegetated by the following methods: hydro seeding, drill seeding, or spreading of upland seed bearing soil. The method of re-vegetation shall be approved by a qualified wetland specialist and the City. k) The Applicant shall apply non-toxic soil stabilizers according to manufacturer's specifications to all inactive construction areas. Non-toxic binders shall be applied to exposed areas after cut and fill operations and hydro seeded areas. The wetland mitigation site shall be watered as directed by the City of Roseville Public Works Department. The frequency shall be based on the type of operation, and soil and wind exposure. l) To reduce air emissions, idling time for all construction vehicles shall be limited to a maximum of 10 minutes. The City may curtail construction during high ambient pollutant concentrations, including but not limited to, ceasing construction during peak-hour vehicular traffic on adjacent or nearby roadways. All land clearing, grading, earth moving or excavation activities shall be suspended when winds exceed 15 mph. m) The Applicants shall ensure that all inactive storage/stock piles are adequately covered, and that all trucks hauling dirt, sand, soil, or other loose materials also are adequately covered or maintain at least two feet of freeboard (i.e., minimum vertical distance between the top of the load and top of the trailer) in accordance with the requirements of the California Vehicle Code (CVC) section 23114.				
MM 4.8-2: Vernal Pool Fairy Shrimp Measures The project Applicant shall mitigate the 14.461 acres of vernal pool fairy shrimp habitat	The Applicant(s) shall obtain appropriate	Prior to issuance of grading permit.	The City's Environmental	

Mitigation Monitoring and Reporting Program

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
that will be directly impacted at a 2:1 ratio for preservation (28.922 acres preserved) and 1:1 ratio for creation (14.461 acres created). The 9.972 acres of vernal pool fairy shrimp that may be indirectly impacted will be mitigated at a 1:1 ratio for preservation (9.972 acres). This equates to a total of 38.894 acres of preservation and 18.640 acres of creation. The locations of the preserved and created vernal pool fairy shrimp (<i>Branchinecta lynchi</i>) habitat shall be disclosed in the Wetland Avoidance/Mitigation Plan required in Mitigation Measure 4.8-1 (b).	approvals from the USACE and USFWS to ensure that vernal pool fairy shrimp habitat is preserved. The Applicant(s) shall coordinate with USFWS to modify as necessary any mitigation plans in an effort to attain mitigation success.		Coordinator shall confirm that onsite vernal pool fairy shrimp habitat is preserved and maintained consistent with the Section 404 Permit.	
MM 4.8-3: Special Status Plant Measures The following mitigation measures shall be implemented to reduce impacts to special status plant species: a) A qualified botanist or biologist shall collect source pool inoculum from the two vernal pools containing dwarf downingia and shall transfer the soil inoculum to the created and/or restored wetlands within the proposed off-site Mitigation Properties. A botanist or qualified biologist shall determine which created pools will provide the best suitable habitat. Created and/or restored wetlands will require monitoring according to Section 404 permit guidelines and therefore transferred inoculum would be covered under such efforts. b) Perform focused special-status plant surveys according to California Department of Fish and Wildlife (CDFW), California Native Plant Society (CNPS), and USFWS protocols (CDFW, 2000; CNPS, 2001; Cypher, 2002; USFWS, 1996b) for the three off-site Mitigation Properties. Surveys shall be timed according to the blooming period for target species and known reference populations will be visited prior to surveys to confirm the species is blooming where known to occur. c) The USFWS generally considers survey results valid for approximately three years. Therefore, follow-up surveys may be necessary within the project site to avoid take of any special status plant species. This shall be determined during consultation with USFWS. The presence or absence of special-status plant species shall be determined through rare plant surveys conducted according to CDFW, CNPS and USFWS protocols (CDFW, 2000; CNPS, 2001; Cypher, 2002; USFWS, 1996b). Surveys shall be timed according to the blooming period for target species and known reference populations will be visited prior to surveys to confirm the species is blooming where known to occur. d) If no special-status plants are found, no further measures pertaining to special-status plants are necessary.	The Applicant(s) shall obtain appropriate permits from the USACE and USFWS to ensure that there is no net loss of habitat for special-status plant species. The Applicant(s) shall prepare follow-up reports on the status and success of mitigation and shall submit these responses to USFWS. The Applicant(s) shall coordinate with USFWS to modify as necessary any mitigation plans in an effort to attain mitigation success. The results of pre-construction surveys and transfer of the soil inoculum to the off-site mitigation properties shall be submitted to	Prior to issuance of grading permit.	The City's Chief Building Inspector shall confirm that requirements of MM 4.8-3 have been fulfilled consistent with the Section 404 Permit.	

Mitigation Monitoring and Reporting Program

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
e) If special-status plant species are found within the project site, avoidance zones shall be established around plant populations to clearly demarcate areas for avoidance. Avoidance measures and buffer distances may vary between species and the specific avoidance zone distance will be determined in coordination with appropriate resource agencies (CDFW and USFWS). f) If special-status plant species are found within the project site and avoidance of the species is not possible, then additional measures such as seed collection and/or transplantation shall be developed in consultation with the appropriate agencies (CDFW and USFWS).	the Chief Building Inspector prior to the construction of each phase.			
MM 4.8-4: Relocate Western Spadefoot The following mitigation measures shall be implemented to reduce impacts to Western spadefoot (<i>Spea hammondi</i>): a) A qualified biologist shall perform preconstruction surveys for Western spadefoot within the construction area in the appropriate season (generally February) to detect adults, larvae, and/or egg masses, within 14 days prior to the start of construction. b) If no Western spadefoots are found, no further measures pertaining to this species are necessary. c) Pools that are found to support Western spadefoot shall be avoided if feasible. If avoidance is not feasible, then the CDFW shall be consulted for its recommendation with respect to relocation of adults, larvae, tadpoles, or egg masses. Although there is no set protocol for the relocation of Western spadefoot, the capture and relocation of reptile and amphibian species from habitat that will be impacted to similar areas of protected suitable habitat is a standard part of both USFWS and CDFW procedures and recommendations for mitigating impacts. When done in combination with habitat restoration and preservation, the procedure is known to be successful in reducing potential impacts to special-status amphibian and reptile populations.	The results of pre-construction surveys shall be submitted to the Chief Building Inspector prior to the construction of each phase.	Prior to issuance of grading permit.	The Planning Manager shall verify the results of the pre-construction survey.	
MM 4.8-5: Relocate Northwestern Pond Turtle The following mitigation measures shall be implemented to reduce impacts to northwestern pond turtle (<i>Actinemys armorata</i>): a) A qualified biologist shall perform preconstruction surveys for northwestern pond turtle within the construction area for each phase of the Proposed Project within 24 hours prior to the start of construction. b) If no northwestern pond turtles are found, no further measures pertaining to this species are necessary. c) If northwestern pond turtles are found within an area proposed for impact, a qualified biologist shall relocate the northwestern pond turtle to a suitable location away from	Results of preconstruction surveys shall be submitted to the Chief Building Inspector prior to construction of each phase. Should it be required, a qualified biologist shall relocate northwestern pond turtles prior to construction.	Prior to construction of each phase.	The City's Planning Manager shall ensure that onsite northwestern pond turtle are appropriately relocated.	

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
the proposed construction, in consultation with CDFW.				
MM 4.8-6: Avoid Nesting Sites for Protected Bird Species To ensure that raptor and other bird species protected under the Migratory Bird Treaty Act (MBTA) are not injured or disturbed by construction in the vicinity of nesting habitat, the project Applicant shall implement the following measures: a) Nesting Raptors: All raptors and their active nests are protected under the California Fish and Game Code and federal MBTA. To ensure that there are no impacts to protected active nests, the following mitigation measures shall be implemented: ○ A qualified biologist shall conduct a pre-construction nesting bird survey of all suitable habitats within the limits of construction of the project site and all accessible areas within 300 feet of the limits of construction activity. The preconstruction surveys shall occur within 3 days of the initiation of construction activity during the nesting season (February 1 through August 31). If there is a break in construction activity of more than 2 weeks then subsequent surveys should be conducted; however no additional surveys are required for ongoing construction activities. ○ If no active raptor nests are found, no further measures pertaining to raptors nests are necessary. ○ If active nests are found, the active nests shall be monitored by a qualified biologist for the first 24 hours prior to any construction-related activity to establish a behavioral baseline. A no-disturbance buffer around the nest shall be established. The buffer distance shall be established by a qualified biologist in accordance with CDFW's recommendations for buffer distances relative to the species identified. The exclusionary buffer shall remain in place until the chicks have fledged or as otherwise determined by a qualified biologist. ○ Once construction activities commence within the project site, all nests shall be monitored by a qualified biologist to detect any behavioral changes as a result of construction. If behavioral changes are observed that may result in adverse effects to the success of breeding, the work causing that change shall cease and consultation with CDFW shall be initiated to identify potential avoidance and minimization measures. Should construction activities cause observed stress to nesting birds, the exclusionary buffer shall be adjusted (e.g. increased) based on findings of a qualified biologist. ○ Pre-construction nest surveys are not required for construction activity outside the nesting season.	Results of preconstruction surveys shall be submitted to the Chief Building Inspector prior to the issuance of a grading permit. Applicable construction restrictions shall be reflected within building plans. The Avoidance measures shall be implemented during construction, and consultation with the CDFW shall ensure mitigation is adequate.	Prior to approval of grading and building permits.	The Chief Building Inspector shall ensure that appropriate measures are reflected in the grading permit and/or building plans. The Building Official shall ensure that construction contractors comply with the measures. The Code Enforcement Inspector shall enforce the City's regulations. The City Preserve Manager shall oversee City owned open space areas and the Landowner shall oversee private open space areas for compliance with the Section 404 Permit and applicable Operations and Maintenance Plan(s).	

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
b) Burrowing Owl: Burrowing owls were detected within the project site during surveys. To minimize impacts to protected burrowing owls and their burrows, the following mitigation measures shall be implemented: ○ If possible, initiate construction activities during the non-breeding season, September 1 through January 31. ○ A qualified biologist shall conduct a take avoidance (pre-construction) burrowing owl survey of all suitable habitats within the limits of construction of the project site and all accessible areas within 150 meters (492 feet) of the limits of construction within 14 days of the initiation of construction activity, according to the Staff Report on Burrowing Owl Mitigation (CDFW, 2012). If no burrowing owls or sign are observed, construction may proceed. ○ If burrowing owls or sign are found, avoidance setbacks shall be implemented in accordance with CDFW Burrowing Owl Mitigation (CDFW, 2012). ○ If avoidance setbacks are infeasible, the qualified biologist shall coordinate with CDFW, and prepare and implement a Burrowing Owl Exclusion Plan that will include passive relocation according to protocol outlined in the Staff Report on Burrowing Owl Mitigation (CDFW, 2012). If passive relocation methods are employed, the project impact site shall be rendered inhospitable for further burrowing owl re-occupation in accordance with the Exclusion Plan. c) Swainson's Hawk: Swainson's hawks have been found nesting on the adjacent Creekview Specific Plan (CSP) Area to the south of the project site (City of Roseville, 2011a). To minimize impacts to protected Swainson's hawks and their nests, the following mitigation measures shall be implemented: ○ If possible, initiate site construction activities during the non-breeding season, September 1 through February 28. ○ A qualified biologist shall conduct a pre-construction nesting bird survey of all suitable habitats within the limits of construction of the project site and all accessible areas within 0.5 mile of the limits of construction within 14 days of the initiation of construction activity during the nesting season (March 1 through August 31). ○ If no active Swainson's hawk nests are found, no further measures pertaining to Swainson's hawk nests are necessary. ○ If active nests are found, the qualified biologist shall monitor the active nests for the first 24 hours prior to any construction-related activity to establish a behavioral baseline. A no-disturbance buffer around the nest shall be established. The buffer distance shall be established by a qualified biologist in accordance with CDFW's recommendations.				

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
○ Once construction activities commence on-site, all nests shall be monitored by a qualified biologist to detect any behavioral changes as a result of construction within the project site. If behavioral changes are observed that may result in adverse effects to the success of breeding, the work causing that change shall cease and consultation with CDFW shall be initiated to identify potential avoidance and minimization measures. ○ Pre-construction Swainson's hawk nesting surveys are not required for construction activity outside the nesting season. d) California Black Rail: There is no potential California black rail habitat with the project site. However, surveys or habitat assessments for this species have not been performed within the off-site Al Johnson Wildlife Area improvements area. To ensure that there are no impacts to California black rail, the following mitigation measures shall be implemented: ○ A qualified biologist shall conduct a habitat assessment of the off-site Al Johnson Wildlife Area improvements area to identify suitable California black rail habitat. The qualified biologist shall prepare a map identifying areas that support suitable habitat. ○ If suitable habitat is within areas proposed for construction during the breeding season (February 1 through July 31), the qualified biologist shall conduct a pre-construction survey for the California black rail. Three surveys shall be conducted at least seven days apart during peak calling times (one half hour before dawn until three hours after, and three hours before sunset until one half hour after) using playback of taped breeding calls. The last survey shall occur within 14 days of the start of construction. ○ If no California black rail is detected, no further measures pertaining to this species are necessary. ○ If a California black rail is detected, impacts shall be avoided by establishing an appropriate buffer, as determined by the qualified biologist in consultation with CDFW. No project activity shall commence within the buffer area until a qualified biologist confirms that the rail has evacuated the area. The size of the buffer shall be determined by the biologist and confirmed by CDFW; buffer size may vary, depending on the nest location, nest stage, and construction activity. e) Western Yellow-billed Cuckoo: There is no Western yellow-billed cuckoo habitat with the project site. However, surveys or habitat assessments have not been performed within the off-site Al Johnson Wildlife Area improvements area. To ensure that there are no impacts to Western yellow-billed cuckoo, the following mitigation measures shall be implemented:				

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
- A qualified biologist shall conduct a habitat assessment of the off-site Al Johnson Wildlife Area improvements area and the three off-site Mitigation Properties to identify suitable Western yellow-billed cuckoo habitat. The qualified biologist shall prepare a map identifying areas that support suitable habitat. - If suitable habitat is proposed for construction during the breeding season (June 15 to August 31), prior to construction, the qualified biologist shall conduct a pre-construction survey for Western yellow-billed cuckoo. - The survey shall include three visits at least 10 days apart. Each survey shall be conducted during peak activity times (6:30 a.m. to 12:00 noon) by using playback of taped "kowlp" calls. Five taped calls (each at least 30 seconds apart) shall be played every 100 meters of linear habitat. - If a Western yellow-billed cuckoo is detected, impacts shall be avoided by establishing an appropriate buffer, as determined by the qualified biologist in consultation with CDFW. No project activity shall commence within the buffer area until a qualified biologist confirms that the cuckoo has evacuated the area. The size of the buffer shall be determined by the biologist and confirmed by CDFW; buffer size may vary, depending on the nest location, nest stage, and construction activity. - If no Western yellow-billed cuckoos are detected, no further measures pertaining to Western yellow-billed cuckoos are necessary. f) Nuttall's Woodpecker, Loggerhead Shrike, Yellow-billed Magpie, Oak Titmouse, and Grasshopper Sparrow: The project site support potential nesting habitat for one special-status woodpecker and five special status passerine bird species: Nuttall's woodpecker (USFWS conservation concern), loggerhead shrike (USFWS conservation concern and CDFW species of special interest [SSC]), yellow-billed magpie (USFWS conservation concern), oak titmouse (USFWS conservation concern), and grasshopper sparrow (CDFW SSC). To ensure that there are no impacts to protected active nests of these species, the following mitigation measures shall be implemented: - A qualified biologist shall conduct a pre-construction nesting bird survey of all suitable habitats within the limits of construction within the project site and all accessible areas within 50 feet of the limits of construction within 14 days of the initiation of construction activity during the nesting season (Nuttall's woodpecker, March-July; loggerhead shrike, March-May; yellow-billed magpie, late February-mid-July; oak titmouse, March-July; grasshopper sparrow, May-July).				

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
○ If no active special-status bird nests are found, no further measures pertaining to special-status birds are necessary. ○ If active nests are found, the active nests will be monitored by a qualified biologist prior to any construction-related activity to establish a behavioral baseline. A no-disturbance buffer around the nest shall be established. The buffer distance shall be established by a qualified biologist in consultation with CDFW. ○ Once construction activities commence on-site, all nests shall be monitored by a qualified biologist to detect any behavioral changes as a result of construction of the Proposed Project. If behavioral changes are observed that may result in adverse effects to the success of breeding, the work causing that change shall cease and consultation with CDFW shall be initiated to identify potential avoidance and minimization measures. ○ Pre-construction bird nesting surveys are not required for construction activity outside the nesting season. g) Migratory Bird Treaty Act Birds: Many birds, including commonly occurring species, are protected under the California Fish and Game Code and the Federal MBTA. To ensure that there are no impacts to protected birds or their active nests, the following mitigation measures shall be implemented: ○ A qualified biologist shall conduct a pre-construction nesting bird survey of all suitable habitats within the limits of construction within the project site and all accessible areas within 50 feet of the limits of construction within 3 days of the initiation of construction activity during the nesting season (February 1 to August 31). If there is a break in construction activity of more than 2 weeks then subsequent surveys should be conducted; however no additional surveys are required for ongoing construction activities. ○ If no protected birds are found, no further measures pertaining to protected birds are necessary. ○ If active nests are found, a qualified biologist shall monitor the active nests prior to any construction-related activity to establish a behavioral baseline. A no-disturbance buffer around the nest shall be established. The buffer distance shall be established by a qualified biologist in consultation with CDFW. The exclusionary buffer shall remain in place until the chicks have fledged or as otherwise determined by a qualified biologist. ○ Once construction activities commence on-site, all nests will be monitored by a qualified biologist to detect any behavioral changes as a result of construction of the Proposed Project. If behavioral changes are observed that may result in adverse effects to the success of breeding, the work causing that change shall				

Mitigation Monitoring and Reporting Program

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
cease and consultation with CDFW shall be initiated to identify potential avoidance and minimization measures. Should construction activities cause observed stress to nesting birds, the exclusionary buffer shall be adjusted (e.g. increased) based on findings of a qualified biologist. Pre-construction bird nesting surveys are not required for construction activity outside the nesting season.				
MM 4.8-7: Off-Site and On-Site Preservation of Grassland Habitat CDFW recommends that projects that result in the loss of potential foraging habitat for Swainson's hawk (which includes grasslands) within 10-miles of an active nest site provide mitigation for that loss. To the extent feasible, strategies for preserving on-site grasslands as raptor and migratory bird foraging habitat shall be addressed in the Operations and Maintenance Plan prepared pursuant to the Section 404 Permit. Some of these strategies could include; but are not necessarily limited to, grazing for grassland management, monitoring for biological values, and adaptive management. Mitigation for Swainson's hawk foraging habitat would concurrently mitigate for loss of habitat for a number of other bird species in the region such as burrowing owl, red-tailed hawk, white-tailed kite, northern harrier, Ferruginous hawk, and loggerhead shrike among others. A Swainson's Hawk Grassland Habitat Mitigation Plan shall be developed to mitigate for the loss of foraging habitat. Therefore, the project Applicant shall preserve no less than 595.7 acres of grassland and agricultural foraging habitat for Swainson's hawk. Approximately 91.4 acres of Swainson's hawk foraging habitat shall be maintained and preserved onsite. The remainder of the mitigation shall be accomplished via the preservation of 499.9 acres of grassland communities within the three off-site Mitigation Properties, which will offset the loss of foraging habitat pursuant to the CDFW-established formula for Swainson's hawk foraging habitat replacement.	Applicable construction restrictions shall be reflected within building plans. The Applicant(s) shall coordinate with CDFW to modify as necessary any mitigation plans in an effort to attain mitigation success.	Prior to approval of grading and building permits.	The Chief Building Inspector shall ensure that appropriate measures are reflected in the grading permit and/or building plans. The Building Official shall ensure that construction contractors comply with the measures. The Code Enforcement Inspector shall enforce the City's regulations. The City Preserve Manager shall oversee City owned open space areas and the Landowner shall oversee private open space areas for compliance with the Section 404 Permit and applicable Operations and Maintenance Plan(s).	
MM 4.8-8: Wildlife Movement Protection Policies To protect the long term habitat of the University Creek stream channel and associated riparian corridor as for use as wildlife movement and migration corridors, the project Applicants shall ensure that movement corridors are not obstructed. Through compliance with Section 1600 of the CDFW Code, the Applicant(s) shall enter into a Streambed Alteration Agreement prior to conducting any construction activities within the stream corridor, which sets forth mitigation measures that the Applicant must implement. These measures shall include, but not be limited to, the use of a bridge and/or culvert for the	The Applicant(s) shall enter into a Section 1600 Streambed Alteration Agreement with CDFW. The City's National Pollutant Discharge Elimination System	Prior to approval of grading permits.	The City of Roseville's NPDES Coordinator shall confirm that water quality measures are implemented and the City's Preserve Manager shall ensure that activities are	

Mitigation Monitoring and Reporting Program

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
road crossing that is large enough that wildlife have enough space to pass without having to travel over the road surface, the implementation of bank stabilization measures, and/or restoration and revegetation of stream corridor habitat that has been damaged due to the project's construction. The road crossing feature shall be constructed in a configuration as to provide wildlife with unimpeded passage. Furthermore, recreational use trails shall be lined by post and rail fence and signage shall be posted to direct trail users to stay within the designated trail corridor. The trails shall be closed to use one-half hour after sunset to one-half hour before sunrise and shall not be illuminated.	(NPDES) Coordinator shall ensure measures are included in the Proposed Project to reduce water quality impacts.		consistent with the Section 404 Permit and applicable Operation and Maintenance Plan(s).	
MM 4.8-9: Pre-Construction Surveys for Special Status Bats To ensure that there are no impacts to active bat roosts, the following mitigation measures are recommended: a) A qualified biologist shall conduct a dusk emergence survey (start one hour before sunset and last three hours), followed by a pre-dawn re-entry survey (start one hour before sunrise and last for two hours), in addition a daytime visual inspection of all potential bat roosting habitat within the limits of construction within the project site included as part of the pre-construction clearance survey. If no active bat roosts or sign are observed, construction may proceed. b) If no active special-species bat roosts are found, no further measures pertaining to special-species bats are necessary. c) If roosting special-species bats are found on-site during the surveys, avoid direct and indirect impacts to roosting sites by establishing a no-disturbance buffer of 100 feet around roost sites, in consultation with CDFW. d) Clearing and grubbing adjacent to the roost site and lighting use near the roost site where it would shine on the roost or interfere with bats entering or leaving the roost shall be prohibited. e) Operation of internal combustion equipment, such as generators, pumps, and vehicles within 100 feet of the roost site shall be prohibited.	Results of preconstruction surveys shall be submitted to the Chief Building Inspector prior to the issuance of a grading permit. Avoidance measures, if required, shall be included on grading plans and implemented during construction, and consultation with the CDFW shall ensure mitigation is adequate.	Prior to issuance of grading permit and if bats are found during grading operations	The Construction Inspector shall confirm that onsite special-status bats are appropriately protected consistent with applicable grading permit conditions.	
MM 4.8-10: Pre-Construction Surveys for American Badger The annual grasslands within the project site have a low potential to support habitat for American badger. To ensure that there are no impacts to American badgers and their burrows, the following mitigation measures are required: a) In conjunction with pre-construction burrowing owl surveys (Mitigation Measure 4.8-6), a qualified biologist shall conduct pre-construction surveys for American badgers, including burrows. If no American badgers or signs are observed, construction may proceed. b) If no American badgers/active burrows are found, no further measures pertaining to this species are necessary.	Results of preconstruction surveys shall be submitted to the Chief Building Inspector prior to the issuance of a grading permit. Avoidance measures, if required, shall be included on grading plans and implemented during	Prior to issuance of grading permit	The City's Construction Inspector shall confirm that onsite American badgers are appropriately protected consistent with applicable grading permit conditions.	

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
c) If American badgers are found on-site during the surveys, the qualified biologist shall avoid direct and indirect impacts to burrows by establishing a no-disturbance buffer of 100 feet around burrows, in consultation with CDFW.	construction, and consultation with the CDFW shall ensure mitigation is adequate.			
MM 4.8-11: Additional Surveys for Off-Site Improvement Areas Prior to construction of any off-site infrastructure, a qualified biologist shall perform detailed, and if necessary, focused biological surveys of any undisturbed areas that would be affected by infrastructure development. If it is determined that wetland resources or sensitive species would be impacted, Mitigation Measure 4.8-1 (a) and (b), Mitigation Measure 4.8-2, or Mitigation Measure 4.8-3 shall be implemented, as appropriate to the resource. If it is determined that impacts to western spadefoot or northwestern pond turtle may occur due to off-site constructions, Mitigation Measures 4.8-4 and 4.8-5 shall be implemented, respectively. If it is determined that active nests exist within the off-site improvement location, Mitigation Measure 4.8-6 shall be implemented as appropriate to the species. If it is determined the offsite improvement is located within or adjacent to a wildlife movement corridor, Mitigation Measure 4.8-8 shall be implemented. If any bat roosts are identified, Mitigation Measure 4.8-9 shall be implemented. If any badger burrows are located, Mitigation Measure 4.8-10 shall be implemented.	Refer to MM 4.8-1(a), MM 4.8-1(b), MM 4.8-2, MM 4.8-3, MM 4.8-4, MM 4.8-5, MM 4.8-6, MM 4.8-7, MM 4.8-8, MM 4.8-9, and MM 4.8-10.	Refer to MM 4.8-1(a), MM 4.8-1(b), MM 4.8-2, MM 4.8-3, MM 4.8-4, MM 4.8-5, MM 4.8-6, MM 4.8-7, MM 4.8-8, MM 4.8-9, and MM 4.8-10.	Refer to MM 4.8-1(a), MM 4.8-1(b), MM 4.8-2, MM 4.8-3, MM 4.8-4, MM 4.8-5, MM 4.8-6, MM 4.8-7, MM 4.8-8, MM 4.8-9, and MM 4.8-10.	
MM 4.8-12: Conduct Biological Surveys of the Urban Reserve Parcel Prior to construction activities within the Urban Reserve parcel, a qualified biologist shall perform detailed, and if necessary, focused biological surveys of any undisturbed areas that would be affected by development. If it is determined that wetland resources or sensitive species would be impacted, Mitigation Measure 4.8-1 (a) and (b), Mitigation Measure 4.8-2, or Mitigation Measure 4.8-3 shall be implemented, as appropriate to the resource. If it is determined that impacts to western spadefoot or northwestern pond turtle may occur, Mitigation Measures 4.8-4 and 4.8-5 shall be implemented, respectively. If it is determined that active nests exist, Mitigation Measure 4.8-6 shall be implemented as appropriate to the species. If development is proposed within or adjacent to a wildlife movement corridor, Mitigation Measure 4.8-8 shall be implemented. If any bat roosts are identified, Mitigation Measure 4.8-9 shall be implemented. If any badger burrows are located, Mitigation Measure 4.8-10 shall be implemented.	Refer to MM 4.8-1(a), MM 4.8-1(b), MM 4.8-2, MM 4.8-3, MM 4.8-4, MM 4.8-5, MM 4.8-6, MM 4.8-7, MM 4.8-8, MM 4.8-9, and MM 4.8-10.	Refer to MM 4.8-1(a), MM 4.8-1(b), MM 4.8-2, MM 4.8-3, MM 4.8-4, MM 4.8-5, MM 4.8-6, MM 4.8-7, MM 4.8-8, MM 4.8-9, and MM 4.8-10.	Refer to MM 4.8-1(a), MM 4.8-1(b), MM 4.8-2, MM 4.8-3, MM 4.8-4, MM 4.8-5, MM 4.8-6, MM 4.8-7, MM 4.8-8, MM 4.8-9, and MM 4.8-10.	
Cultural and Paleontological Resources				
MM 4.9-1: Conduct Archaeological Survey of Urban Reserve Parcel Development proposals for the Urban Reserve parcel shall identify known and/or potential archaeological sites, based on field surveys of the area proposed for development conducted by a qualified archaeologist. If significant resources or significant archaeological sites are present, the development proposal shall designate the area surrounding the site as open space and the site shall be completely avoided.	Cultural resource surveys shall be conducted by a qualified archaeologist and any resulting recommendations to protect resources shall be reflected in all	Prior to approval of Grading and Building Permits for the Urban Reserve Parcel.	The City Engineer will confirm that appropriate measures are reflected in the grading permit and/or building plans. The Building Official shall ensure that	

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
	construction and building plans. The City Engineer shall review plans for inclusion of specifications prior to the issuance of building permits.		construction contractors comply with the measures. The Code Enforcement Inspector shall enforce the City's regulations.	
MM 4.9-2: Cease Work and Consult with Qualified Archaeologist (a) Should any cultural resources, such as wells, foundations, or debris, or unusual amounts of bone, stone or shell, artifacts, burned or baked soils, charcoal, or human remains be encountered during subsurface excavation or construction activities, work shall be suspended within 100 feet of the discovery. The City shall be immediately notified. At that time, a qualified professional archaeologist shall assess the resource and provide recommendations for treatment if the resource appears to be potentially eligible for listing on the National Register of Historic Places (NRHP) or California Register of Historical Resources (CRHR). Possible management recommendations could include, but not be limited to, avoidance, construction monitoring, recordation, site testing, or data recovery excavations. The contractor shall implement any measures deemed feasible and necessary by City Staff, in consultation with a qualified archaeologist, to avoid or minimize significant effects to the cultural resources prior to resumption of ground-disturbing activities. (b) If human remains are uncovered during project construction, pursuant to Public Resources Code (PRC) Section 5097.98 and Section 7050.5 of the California Health and Safety Code, the Placer County Coroner shall be notified immediately. California law recognizes the need to protect interred human remains, particularly Native American burials and items of cultural patrimony, from vandalism and inadvertent destruction. The procedures for the treatment of discovered human remains are contained in California Health and Safety Code §7050.5 and §7052 and California PRC §5097. If human remains are uncovered during ground-disturbing activities, all such activities within a 100-foot radius of the find shall be halted immediately and the City's designated representative shall be notified. The City shall immediately notify the Placer County coroner. The coroner is required to examine all discoveries of human remains within 48 hours of receiving notice of a discovery on private or state lands (Health and Safety Code Section 7050.5[b]). If the coroner determines that the remains are those of a Native American, he or she must contact the Native American Heritage Commission (NAHC) by phone within 24 hours of making that determination (Health and Safety Code Section 7050[c]). The City shall contact the Most Likely Descendent (MLD), as determined by the NAHC, regarding the remains. The MLD, in cooperation with the City and a qualified professional archaeologist shall develop a plan of action to avoid or minimize	This condition shall be reflected in all construction and building plans. The City Engineer shall review plans for inclusion of specifications prior to the issuance of building permits.	During construction, as a condition of Grading and Building Permits.	The City Engineer will confirm that appropriate measures are reflected in the grading permit and/or building plans. The Building Official shall ensure that construction contractors comply with the measures. The Code Enforcement Inspector shall enforce the City's regulations.	

Mitigation Monitoring and Reporting Program

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
significant effects to the human remains prior to resumption of ground-disturbing activities.				
MM 4.9-3: Monitor for Paleontological Resources, Cease Work and Consult with Qualified Paleontologist The paleontological report prepared for the Proposed Project included identification of fossiliferous Turlock Lake and Riverbank formations within portions of the project site, beginning approximately two feet below ground surface and continuing up to eight feet below ground surface. Because fossil localities cannot be predicted without actually disturbing a rock unit, a qualified professional paleontologist (as defined by the Society of Vertebrate Paleontology, 2010) shall be retained to provide awareness training for construction personnel involved in earth-moving activities. Construction personnel to be involved with earth-moving activities shall be informed that fossils could be discovered during excavation that these fossils are protected by laws, on the appearance of common fossils, and on proper notification procedures should fossils be discovered. In addition, a qualified professional paleontologist shall monitor earth-moving during the initial project grading that impacts sediment greater than two feet (0.6 meters) in depth in areas with mapped Turlock Lake or Riverbank formation geologic units to observe the stratigraphy and any fossils exposed by excavation. This shall not be required in areas where sediments will be buried but not otherwise be disturbed. If no evidence of fossils is seen in the initial grading, a program of periodic spot checks of the deepest excavations or those judged most likely to disturb fossils shall be instituted until excavations have been completed. Should any evidence of paleontological resources (e.g., fossils) be encountered, work shall be suspended within 100 feet of the discovery, and the City shall be notified immediately. At that time, the paleontologist shall assess the resource and provide appropriate management recommendations. Recommendations shall include, but are not limited to, salvage and treatment as described by the Society of Vertebrate Paleontology (2010). This treatment shall include preparation, identification, determination of significance, and curation into a public museum.	This condition shall be reflected in all construction and building plans and permits. The City Engineer shall review plans for inclusion of specifications prior to the issuance of building permits.	During construction, as a condition of Grading and Building Permits.	The City Engineer will confirm that appropriate measures are reflected in the grading permit and/or building plans. The Building Official shall ensure that construction contractors comply with the measures. The Code Enforcement Inspector shall enforce the City's regulations.	
MM 4.9-4: Conduct Appropriate Off-Site Studies Prior to undertaking construction of off-site infrastructure, the City shall determine whether or not cultural resource surveys have been undertaken for any areas to be disturbed during construction. If surveys were conducted, the City shall document that any identified resources were treated as recommended in the studies. If no studies or surveys were conducted, the City shall ensure that a qualified archaeologist conducts the appropriate level of study. If significant resources or significant archaeological sites are present, they shall be avoided, as feasible. If avoidance of such resources is not feasible, recordation of the sites shall be required, along with treatment as is recommended by the archaeologist after consultation with State Historic Preservation Office (SHPO) and, if the find is prehistoric, NAHC. If unknown resources are encountered during construction, recommendations, including the possible management recommendations listed in	Cultural resource surveys shall be conducted by a qualified archaeologist or paleontologist and any resulting recommendations to protect resources shall be reflected in all construction and building plans. The Public Works Director	Prior to approval of Grading and Building Permits of off-site infrastructure.	The City Engineer will confirm that appropriate measures are reflected in the grading permit and/or building plans. The Building Official shall ensure that construction contractors comply with the measures. The Code	

Mitigation Monitoring and Reporting Program

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
Mitigation Measures 4.9-2 and 4.9-3 , shall be implemented to ensure that the resources are avoided, protected, and/or recorded.	shall review plans for inclusion of specifications prior to the issuance of building permits.		Enforcement Inspector shall enforce the City's regulations. The City Preserve Manager shall oversee City owned open space areas and the Landowner shall oversee private open space areas for compliance with the Section 404 Permit and applicable Operations and Maintenance Plan(s). The Parks and Recreation Director shall ensure that measures to protect and mitigate historic resources are implemented for any historic structures within parks property.	
Hazardous Materials and Public Safety				
MM 4.10-1: Identify and Remediate Soil Contamination and Existing Hazardous Materials within the ARSP As a condition of approval of the ARSP, the following recommendations from the Phase I Environmental Site Assessment (ESA) for the project site (ENGEO, 2006) shall be completed prior to issuance of grading permits: 1. Stained soil observed beneath one of the 5-gallon buckets used to store Tech 2000 Mineral Gear Oil shall be removed and properly disposed of at an appropriate disposal facility. 2. Stained soil measuring approximately 1 foot in diameter beneath one of the above-ground fuel storage tanks next to the steel silo in the northern portion of the property shall be removed and properly disposed of at an appropriate disposal facility. 3. The 21 55-gallon steel drums near the farm facility shall be removed and properly disposed of at an appropriate disposal facility.	The Applicant(s) shall be responsible for conducting soil testing and/or recommendation of the Phase I environmental site assessments.	Prior to approval of Building Permits.	The Roseville Fire Department shall oversee any activities related to hazardous materials.	

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
4. A statistically significant number of soil samples shall be collected from the surface soil within the boundaries of the proposed school site and analyzed for agricultural chemicals per U.S. Environmental Policy Act (EPA) guidelines. 5. Should the results indicate the presence of a statistically significant concentration of agricultural chemicals with the potential to cause harm to sensitive receptors (such as school children), a Phase II ESA shall be conducted to determine the extent of the contamination and provide recommendation to remediate the school site. In consultation with Department of Toxic Substances Control (DTSC), the proponent of the school development shall develop a workplan based on the recommendations of the Phase II ESA to remediate the project site. 6. Debris at various locations across the project site shall be removed and properly disposed of. 7. The burn wood pile measuring approximately 500 feet long by 6 feet tall by 6 feet wide along the southern portion of the project site shall be removed prior to construction at the project site. 8. If evidence of further soil contamination, septic tanks, or other underground storage tanks are encountered in the project site, work shall cease until the area can be tested by a qualified professional meeting EPA's definition of an Environmental Professional under the All Appropriate Inquiries Rule in accordance with Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The qualified professional shall provide recommendations for further remediation in compliance with federal, state, and local regulations. If necessary, contaminated materials shall be removed and properly disposed or remediated, and regulatory site closure obtained. Remediation activities could include removal of contaminated soil, and/or treatment. The City shall ensure that any necessary investigation and/or remediation activities are coordinated with the Roseville Fire Department (RFD), Placer County Department of Environmental Health (PCDEH), and if needed, other appropriate federal, state and local agencies. Once a site is remediated to the satisfaction of the appropriate regulatory agency, construction can continue.				
MM 4.10-2: Identify and Remediate Soil Contamination and Existing Hazardous Materials within the Urban Reserve Parcel Development proposals for the Urban Reserve parcel shall include a Phase I ESA and require that recommended testing and remediation identified in the Phase I ESA be performed. City conditions of approval shall require that, if evidence of soil contamination is encountered in the area of the Urban Reserve proposed to be developed, work shall cease until the area can be tested, and, if necessary, be remediated. As part of this process, the City shall ensure that any necessary investigation and/or remediation activities conducted in the Urban Reserve parcel are coordinated with the RFD, PCDEH, and if needed, other appropriate state and/or local agencies. Once a site is remediated, construction may continue.	The Applicant(s) shall be responsible for conducting soil testing and/or recommendation of the Phase I ESAs.	Prior to approval of building permits for the Urban Reserve Parcel.	The Roseville Fire Department shall oversee any activities related to hazardous materials.	

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
Public Utilities – Water				
MM 4.12.1-1: Secure Adequate Water Supply Prior to the approval of building permits, proponents of the Proposed Project will provide their proportionate share of required funding to the City for the acquisition and delivery of treated potable and recycled water supplies to the Proposed Project area. Additionally, prior to the approval of building permits, the City shall enter into agreement with Placer County Water Agency (PCWA) to acquire water supplies of sufficient quantity to serve the ARSP as described in the EIR and Water Supply Assessment (WSA). The identified source would need to be legally available and sufficient to meet the demand of the Proposed Project, consistent with the WFA and City policies and California Water Code Section 10910 et seq. and Government Code Section 66473.7 subject to a completed environmental review, approved by the agency with jurisdiction over the source, and funded.	The City shall enter into an agreement with PCWA for water supply. The Applicant(s) shall pay their proportionate share of funding costs to the City for the new water supply.	Prior to issuance of building permits.	The Environmental Utilities Director shall confirm execution of the required water supply agreement.	
Public Utilities – Wastewater				
MM 4.12.3-1: Treatment Plant Capacity Prior to issuance of building permits for development in the ARSP, the Applicant shall demonstrate to the City that the South Placer Wastewater Authority (SPWA) has approved expansion of the SPWA 2005 SAB to include the ARSP. All Applicants shall participate financially in the construction of additional wastewater treatment capacity sufficient to accommodate projected flows through payment of connection fees. Applicant shall also participate on a fair share basis in other financial mechanisms for any additional environmental review required to secure approvals necessary to increase wastewater discharges from the plant, including approval by the SPWA for expansion of the service area boundary. It is recognized that the ARSP Applicant shall rely on the City (on behalf of the SPWA partners) to construct regional treatment and regional transmission facilities needed to treat and discharge wastewater produced within the service area boundary. In the event the City is unable to obtain all required permits (e.g. NPDES permit and Waste Discharge Requirements [WDRs]) or is unable to complete the required facility expansion(s), development within the service area boundary may continue until existing capacity has been exhausted, at which time any remaining development shall be curtailed until such time as sufficient wastewater treatment and discharge capacity becomes available.	The Applicant(s) shall demonstrate that the PGWWTP will or has been expanded.	Prior to issuance of building permits.	The Environmental Utilities Director shall monitor the capacity of the PGWWTP and ensure that expansion occurs in advance of the need.	
MM 4.12.3-2: Treatment Plant Expansion The City shall implement all relevant construction related mitigation measures for expansion of the PGWWTP listed in Appendix V and all water quality and aquatic resource mitigation measures applicable to this project as listed in Table 4.12.3-4 .	See applicable mitigation measures in Appendix V and Table 12.3-4 of the Final EIR.	Prior to issuance of building permits.	The Environmental Utilities Director shall monitor the capacity of the PGWWTP and ensure that expansion occurs in advance of the need.	

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
Public Utilities – Solid Waste				
MM 4.12.4-1: Divert Construction Debris Developers of the ARSP shall ensure a 50 percent diversion of the construction waste stream from Western Regional Sanitary Landfill (WRSL) disposal. In developer contracts with construction contractors and their sub-contractors, the developer shall require that the amount of construction waste be diverted from WRSL disposal be no less than 50 percent. The developer shall further require that contractors and sub-contractors submit records of diversion and disposal to the City's Environmental Utilities Department in order to verify compliance with this requirement.	Development contracts shall require 50 percent diversion of construction waste from the WRSL.	At the time of construction debris will be diverted to an appropriate recycling facility.	The Environmental Utilities Director shall ensure that the Applicant(s) are complying with the construction debris diversion requirements.	
Hydrology and Water Quality				
MM 4.13-1: Implementation of Construction Activity Stormwater Standards Prior to the issuance of a City grading permit and the commencement of construction activities, the Applicant shall demonstrate to the City compliance with the State Water Resources Control Board (SWRCB) NPDES General Permit for Discharges of Storm Water Runoff Associated with Construction Activity (General Permit), the City of Roseville's Construction Standards, and the City's Stormwater Best Management Practice (BMP) Guidance Manual. The SWRCB requires that all construction sites have adequate control measures to reduce the discharge of sediment and other pollutants to streams to ensure compliance with Section 303 of the CWA. To comply with the NPDES permit, the Applicant shall file a Notice of Intent with the SWRCB and prepare a Stormwater Pollution Prevention Plan (SWPPP) prior to construction, which includes a detailed, site-specific listing of the potential sources of stormwater pollution; pollution prevention measures (erosion and sediment control measures and measures to control non-stormwater discharges and hazardous spills) to include a description of the type and location of erosion and sediment control BMPs to be implemented at the project site, and a BMP monitoring and maintenance schedule to determine the amount of pollutants leaving the project site. A copy of the SWPPP must be current and remain on the project site. Control measures are required prior to and throughout the rainy season. Water quality BMPs identified in the SWPPP could include but are not limited to the following: - Temporary erosion control measures (such as silt fences, staked straw bales, and temporary revegetation) shall be employed for disturbed areas. No disturbed surfaces will be left without erosion control measures in place during the winter and spring months. - Sediment shall be retained onsite by a system of sediment basins, traps, or other appropriate measures. - A spill prevention and countermeasure plan shall be developed which would identify proper storage, collection, and disposal measures for potential pollutants (such as	This condition shall be reflected in all construction and building plans. The City Engineer shall review plans for inclusion of specifications prior to the issuance of building permits.	Prior to approval of grading or building permits.	The City Engineer will confirm that appropriate measures are reflected in the grading permit and/or building plans. The Building Official shall ensure that construction contractors comply with the measures. The Code Enforcement Inspector shall enforce the City's regulations.	

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
fuel, fertilizers, pesticides, etc.) used onsite. The plan would also require the proper storage, handling, use, and disposal of petroleum products. - Construction activities shall be scheduled to minimize land disturbance during peak runoff periods and to the immediate area required for construction. Soil conservation practices shall be completed during the fall or late winter to reduce erosion during spring runoff. Existing vegetation will be retained where possible. To the extent feasible, grading activities shall be limited to the immediate area required for construction. - Surface water runoff shall be controlled by directing flowing water away from critical areas and by reducing runoff velocity. Diversion structures such as terraces, dikes, and ditches shall collect and direct runoff water around vulnerable areas to prepared drainage outlets. Surface roughening, berms, check dams, hay bales, or similar devices shall be used to reduce runoff velocity and erosion. - Sediment shall be contained when conditions are too extreme for treatment by surface protection. Temporary sediment traps, filter fabric fences, inlet protectors, vegetative filters and buffers, or settling basins shall be used to detain runoff water long enough for sediment particles to settle out. Store, cover, and isolate construction materials, including topsoil and chemicals, to prevent runoff losses and contamination of groundwater. - Topsoil removed during construction shall be carefully stored and treated as an important resource. Berms shall be placed around topsoil stockpiles to prevent runoff during storm events. - Establish fuel and vehicle maintenance areas away from all drainage courses and design these areas to control runoff. - Disturbed areas shall be revegetated after completion of construction activities. - All necessary permits and approvals shall be obtained. - Provide sanitary facilities for construction workers.				
MM 4.13-2: Stormwater Management Development Standards At the tentative map or site development stage, development shall be conditioned to include source control and Low Impact Development (LID) strategies, treatment control measures, including but not limited to bio-retention treatment as required by the City's then current design standards and the City's then current General Phase II Municipal Separate Storm Sewer System (MS4) Permit issued by the State. The measures shall include, but are not limited to, the measures identified in the Amoroso Drainage Master Plan. In addition, necessary erosion and sediment control measures for University Creek at Discharge Point E and monitoring of University Creek downstream of the discharge point shall be incorporated into the project design plans and submitted to the City for review and approval prior to receiving building/grading permits.	This condition shall be reflected in all construction and building plans. The City Engineer shall review plans for inclusion of specifications prior to the issuance of building permits.	Prior to approval of grading or building permits.	The City Engineer will confirm that appropriate measures are reflected in the grading permit and/or building plans. The Building Official shall ensure that construction contractors comply with the measures. The Code Enforcement Inspector	

Mitigation Monitoring and Reporting Program

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
			shall enforce the City's regulations.	
MM 4.13-3: Fair Share Payment to Regional Stormwater Retention The Applicant shall annex into the fee district and pay the Pleasant Grove Drainage fee to the City prior to the approval of each building permit, which would cover the cost of retention for that development's portion of the Pleasant Grove Retention Basin Project at the Al Johnson Wildlife Area.	The City shall collect the Pleasant Grove Drainage fee from Applicant(s).	Prior Building Permits issuance.	The City Engineer shall monitor and confirm that the Pleasant Grove drainage fee is collected.	
MM 4.13-4: North Retention Basin Construction All relevant construction-related mitigation measures for construction of the north retention basin within the Al Johnson Wildlife Area listed in the adopted Mitigation, Monitoring, and Reporting Program shall be implemented. The City shall monitor the discharge at the western boundary on a yearly basis, to ensure that there are no impacts and that the existing facility within the Al Johnson Wildlife Area is functioning properly.	Refer to applicable mitigation measures in the adopted MMRP for the north retention basin. The City shall monitor discharge yearly.	Refer to applicable mitigation measures in the adopted MMRP for the north retention basin.	Public Works Director	
MM 4.13-5: Erosion Monitoring Plan At the onset of any grading activities within the ARSP that increase the existing drainage area tributary to the University Creek channel within Al Johnson Wildlife Area, a geomorphologic assessment of University Creek through the Al Johnson Wildlife Area property shall be conducted. The geomorphologic assessment shall include erosion protection measures, such as stream bank stabilization and velocity reduction measures, and the location for their implementation. The construction of the erosion protection measures shall be triggered by criteria established within the geomorphologic assessment.	A geomorphic assessment of University Creek shall be completed prior to grading. Mitigation measures shall be included based on the results of the assessment.	Prior to approval of grading permits.	The City Engineer shall confirm the geomorphologic assessment is conducted and appropriate erosion protection measures are properly implemented.	
Aesthetics				
MM 4.14-1: Sight Lighting to Minimize Nuisance Light producing uses, such as ball fields, within the project site shall be located and oriented to minimize visual impacts on adjacent residential areas. Lighting shall be shielded and designed to distribute light in the most effective and efficient manner, using the minimum amount of light to achieve the necessary illumination for the use. Light poles shall be designed using either 100 watt or LED light bulbs, and shall use the best technology that maximizes glare and spillage reduction.	The City shall implement policies to reduce the nuisance effects of nighttime/daytime and/or high-intensity illumination from the Proposed Project.	Prior to Building Permit issuance.	The Parks and Recreation Director shall review the proposed plans and ensure that nighttime lighting is directed away from residences and open space corridors.	
MM 4.14-2: Low Glare Materials for New Development In order to reduce the effects of daytime glare from development of commercial or office uses within the project site, building developers shall utilize, when feasible, low-glare materials.	The City shall implement policies to reduce the nuisance effects of	Prior to Building Permit issuance.	The Planning Manager shall review the proposed plans and ensure that nighttime	

Mitigation Monitoring and Reporting Program

Mitigation Measure	Implementation	Timing	Reviewing Party	Initial/Date Complete
	nighttime/daytime and/or high-intensity illumination from the Proposed Project.		lighting is directed away from residences and open space corridors.	
MM 4.14-3: Avoid Light Spill Over into University Creek and Open Space Areas Outdoor lighting shall be placed, designed, and directed so as to avoid light spillover into the habitat of University Creek, Open Space Preserve Areas, and the Al Johnson Wildlife Area. These parcels include those immediately adjacent to the open space and shown on the Land Use Map as parcels, AR-3, AR-4, AR-7, AR-8, AR-11, AR-20, AR-24, AR-37, AR-56, AR-57, AR-60, AR-63, and the Urban Reserve parcel AR-110.	The City shall implement policies to reduce the nuisance effects of nighttime/daytime and/or high-intensity illumination from the Proposed Project.	Prior to Building Permit issuance.	The Parks and Recreation Director and City Preserve Manager shall review the proposed plans and ensure that nighttime lighting is directed away from residences and open space corridors.	
Energy				
MM 4.15-1: Implement Measures to Reduce Energy Consumption Implementation of the Air Quality Mitigation Measures 4.4-1(d) and (f) and Mitigation Measure 4.4-2 reduce direct and indirect operational energy consumption. The requirements of Mitigation Measures 4.4-1(d) and (f) and Mitigation Measure 4.4-2 are listed below: Refer to MM 4.4-1 and MM 4.4-2 .	Refer to MM 4.4-1 and MM 4.4-2 .	Refer to MM 4.4-1 and MM 4.4-2 .	Refer to MM 4.4-1 and MM 4.4-2 .	

RESOLUTION NO. 16-272

AMENDING THE GENERAL PLAN TO CHANGE THE TEXT AND
LAND USE DESIGNATIONS ON CERTAIN PROPERTY IN
THE CITY OF ROSEVILLE RELATED TO THE
AMORUSO RANCH SPECIFIC PLAN

WHEREAS, a proposal has been submitted to amend the General Plan of the City of Roseville by changing the permitted land uses on certain property located within the Amoruso Ranch Specific Plan Area; and

WHEREAS, the Planning Commission held public hearings on the proposed General Plan amendments on March 10, 2016 and April 14, 2016; and

WHEREAS, on June 15, 2016, the City Council held a public hearing at which time the proposed amendments were considered; and

WHEREAS, on June 15, 2016, the City Council certified that the Final Environmental Impact Report for the Amoruso Ranch Specific Plan (State Clearinghouse No. 2013102057), Volumes 1-4, consisting of the Draft EIR, Technical Appendices, Text Changes and Responses to Comments ("Final EIR"), was completed in compliance with the California Environmental Quality Act, Public Resources Code section 21000 *et seq.*; adopted and incorporated into the Amoruso Ranch Specific Plan project all of the mitigation measures within the responsibility and jurisdiction of the City of Roseville that are identified in the Findings; and adopted the Mitigation Monitoring Program for the Amoruso Ranch Specific Plan for all of the mitigation measures within the responsibility and jurisdiction of the City of Roseville; and

WHEREAS, the City Council has independently considered the significant environmental effects of the Amoruso Ranch Specific Plan as shown in the certified Final EIR; and

WHEREAS, the Council desires to approve the proposed amendments to the Roseville General Plan as conducive to public interest, health, safety and welfare, and consistent with the land use practices of the City.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Roseville as follows:

1. The City Council hereby amends the land use map of the City of Roseville General Plan by changing the General Plan text and by changing land use designations as shown in Exhibit "C-1" (hereby described as General Plan 2035), on file with the City Clerk and incorporated herein by reference;.

2. The Development Services Director is hereby directed to retain said General Plan Amendment on permanent public display in the Planning Division of the City of Roseville.

PASSED AND ADOPTED by the Council of the City of Roseville this _____, 20__, by
the following vote on roll call:

RESOLUTION NO. 16-273

ADOPTING THE LAND USE MAP AND TEXT OF THE
AMORUSO RANCH SPECIFIC PLAN

WHEREAS, a proposal for adopting the land use map and text of the Amoruso Ranch Specific Plan of the City of Roseville was submitted to the Planning Commission of the City; and

WHEREAS, the Planning Commission held a public hearing on the proposed land use map on March 10, 2016 and April 14, 2016; and

WHEREAS, on June 15, 2016, the City Council certified the Final Environmental Impact Report for the Amoruso Ranch Specific Plan ("Project") (State Clearinghouse No. 2013102057) Volumes 1-4, consisting of the Draft EIR, Technical Appendices, Text Changes and Responses to Comments ("Final EIR"); adopted the CEQA Findings of Fact and Statement of Overriding Considerations of the City of Roseville ("Findings"); adopted and incorporated into the Project approval all of the mitigation measures within the responsibility and jurisdiction of the City of Roseville which are identified in the Findings; adopted the Mitigation Monitoring Program for the Amoruso Ranch Specific Plan ("Mitigation Monitoring Program") for all of the mitigation measures within the responsibility and jurisdiction of the City of Roseville; and considered the significant environmental effects of the Project as shown in the certified Final EIR; and

WHEREAS, on June 15, 2016, the City Council held a public hearing at which time the proposed land use map was considered; and

WHEREAS, the land use map as proposed is consistent with the adopted City of Roseville General Plan; and

WHEREAS, it is the desire of this City Council to approve said land use map and text of the Amoruso Ranch Specific Plan as conducive to public health, safety and welfare, and consistent with the land use practices of the City; and

WHEREAS, the Final EIR and the Amoruso Ranch Specific Plan are incorporated by this reference as though fully set forth herein.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Roseville that the land use map and text of the Specific Plan is adopted as set forth in the Amoruso Ranch Specific Plan dated June 2016 (attached as Exhibit D-1), which is on file in the City Clerk's Office.

ORDINANCE NO. _____

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE
PREZONING CERTAIN REAL PROPERTY LOCATED WITHIN
UNINCORPORATED PLACER COUNTY
(AMORUSO RANCH SPECIFIC PLAN)

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. That certain real property within unincorporated Placer County located at or about 5101 West Sunset Boulevard (Amoruso Ranch Specific Plan) as shown and so designated in Exhibit "E-1," attached and incorporated herein by reference, is hereby prezoned as follows:

In accordance with the zoning standards designated in the Amoruso Ranch Specific Plan.

SECTION 2. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 3. This zoning shall be effective at the same time that the annexation becomes effective (Gov't. Code section 65859).

SECTION 4. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

ORDINANCE NO. _____

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE ADOPTING
A DEVELOPMENT AGREEMENT REGARDING 525.7 ACRES WITHIN THE AMORUSO
RANCH SPECIFIC PLAN (BROOKFIELD SUNSET, LLC and JENNIFER M. AMORUSO,
SUCCESSOR TRUSTEE OF THE AMORUSO FAMILY LIVING TRUST DATED MARCH
14, 2005) AND AUTHORIZING THE CITY MANAGER TO
EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. In accordance with Chapter 19.84 of Title 19 of the Roseville Municipal Code (the Zoning Ordinance) of the City of Roseville, the City Council has received the recommendation of the Planning Commission that the City of Roseville enter into a Development Agreement for 525.7 acres within the Amoruso Ranch Specific Plan with Brookfield Sunset, LLC and Jennifer M. Amoruso, Successor Trustee of the Amoruso Family Living Trust dated March 14, 2005 (collectively, the “Developer”).

SECTION 2. The Council of the City of Roseville has reviewed the findings of the Planning Commission recommending approval of the Development Agreement, and makes the following findings:

1. The Development Agreement is consistent with the objectives, policies, general land uses and programs specified in the City of Roseville General Plan and the Amoruso Ranch Specific Plan;
2. The Development Agreement is consistent with the City of Roseville Zoning Ordinance and Zoning Map;
3. The Development Agreement is in conformance with the public health, safety and welfare;
4. The Development Agreement will not adversely affect the orderly development of the property or the preservation of property values; and
5. The Development Agreement will provide sufficient benefit to the City to justify entering into said Agreement;

SECTION 3. The Development Agreement by and between Developer and the City of Roseville, a copy of which is on file in the City Clerk’s Department and incorporated herein by reference, is hereby approved and the City Manager is authorized to execute it on behalf of the City of Roseville.

SECTION 4. The City Clerk is directed to record the executed Development Agreement within ten (10) days of the execution of the agreement by the City Manager with the County Recorder's office of the County of Placer.

SECTION 5. This ordinance shall be effective at the expiration of thirty (30) days from the date of its adoption.

SECTION 6. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

**DEVELOPMENT AGREEMENT
BY AND BETWEEN THE CITY OF ROSEVILLE, BROOKFIELD SUNSET,
LLC AND JENNIFER M. AMORUSO, SUCCESSOR TRUSTEE OF THE
AMORUSO FAMILY LIVING TRUST DATED MARCH 14, 2005
RELATIVE TO THE
AMORUSO RANCH SPECIFIC PLAN**

This Development Agreement (the "Agreement") is entered into this ____ day of _____, 2016, by and between the CITY OF ROSEVILLE, a municipal corporation ("City"), BROOKFIELD SUNSET, LLC, a California limited liability company ("Brookfield") and JENNIFER M. AMORUSO, Successor Trustee of the Amoruso Family Living Trust Dated March 14, 2005 ("Amoruso")(collectively, "Landowner"), pursuant to the authority of Sections 65864 through 65869.5 of the Government Code of the State of California.

RECITALS

A. Authorization. To strengthen the public planning process, encourage private participation in comprehensive planning and reduce the economic risk of development, the Legislature of the State of California adopted Section 65864, et seq., of the Government Code (the "Development Agreement Statute"), which authorizes the City of Roseville and an applicant for a development project to enter into a development agreement, establishing certain development rights in the Property which is the subject of the development project application.

B. Property. The subject of this Agreement is the development of those certain parcels of land , consisting of approximately 148.7 acres out of the 674.4± acres owned by Amoruso, as described in Exhibit "A" and shown on Exhibit "B" (hereinafter the "Property"), attached hereto, which constitutes a portion of the larger area comprising 694.4± acres commonly referred to the Amoruso Ranch Specific Plan area ("Specific Plan", " ARSP" or "Plan Area"), which Plan Area is also commonly referred to as the annexation area ("Annexation Area") that includes 20.0± acres designated as Urban Reserve. The Plan Area and Annexation Area are shown in Exhibit "C" attached hereto. The properties of all property owners in the Plan Area as of the date of this Agreement set forth above are shown in Exhibit "D" attached hereto. Amoruso owns the Property, and Brookfield is under contract to purchase the Property from Amoruso. Landowner represents that all persons holding legal or equitable interests in the Property shall be bound by this Agreement.

C. Hearings. On April 14, 2016, the City Planning Commission, designated by Roseville Ordinance No. 3014 as the planning agency for purposes of development agreement review pursuant to Government Code Section 65867, in a duly noticed

public hearing, considered this Agreement and recommended that the City Council approve this Agreement.

D. Specific Plan Environmental Impact Report; Project Environmental Document. On _____, 2016, the City Council, in Resolution No. _____, certified as adequate and complete the Final EIR (the "EIR") (State Clearinghouse #2008032115) for the Specific Plan. EIR mitigation measures are incorporated in the Specific Plan and in the terms and conditions of this Agreement, as reflected by the findings adopted by the City Council concurrently with this Agreement.

E. Entitlements. Following consideration of and certification of the aforementioned EIR and adoption of CEQA related findings, the City Council on _____, 2016, adopted a Statement of Overriding Considerations with respect to and approved the following land use entitlements for the Property, which entitlements are the subject of this Agreement:

- 1) The EIR, as certified by Resolution No. _____, and the Mitigation Monitoring and Reporting Program ("MMRP"), adopted therewith;
- 2) Sphere of Influence Amendment to include the remaining 634.4 acres in the Plan Area in the City's sphere of influence not previously included in the City's sphere of influence;
- 3) The Roseville General Plan, as amended by Resolution No. _____;
- 4) The Amoruso Ranch Specific Plan and Design Guidelines as adopted on _____, _____, by Resolution No. _____;
- 5) The Pre-zoning of the Property pursuant to Ordinance No. _____ dated _____, 2016;
- 6) Zoning Ordinance Amendment to modify Residential Small Lot Development Standards pursuant to Ordinance No. _____ dated _____, 2016;
- 7) This Development Agreement, as adopted by Ordinance No. _____, dated _____, 2016 (the "Adopting Ordinance"); and
- 8) Annexation of 694.4 acres.

The approvals described in paragraphs 1 through 8, inclusive, are referred to herein collectively as the "Entitlements." No other action or approval by City shall be

deemed an "Entitlement," provided, however, that subsequent actions or approvals by City for development of the Property, including, but not limited to, large lot and small lot tentative subdivision maps, major project permits, conditional use permits and design review permits (the "Subsequent Entitlements"), shall be deemed included as part of the Entitlements upon City action or approval thereof. The inclusion of Subsequent Entitlements as part of the Entitlements vested hereunder shall not limit the City's discretion to impose time limits within which such Subsequent Entitlements must be implemented.

F. General and Specific Plans. Development of the Property in accordance with the Entitlements will provide orderly growth and development of the area in accordance with the policies set forth in the General Plan and the Amoruso Ranch Specific Plan. For purposes of the vesting protection granted by this Agreement, except as otherwise provided herein, or by state or federal law, the applicable law shall be as set forth in the Entitlements as of the date hereof.

G. Substantial Costs to Landowner. Landowner has incurred and will incur substantial costs in order to comply with conditions of approval of the Entitlements and to assure development of the Property in accordance with the Entitlements and the terms of this Agreement.

H. Need for Services and Facilities. Development of the Property will result in a need for municipal services and facilities, which services and facilities will be provided by City to such development subject to the performance of Landowner's obligations hereunder.

I. Contribution to Costs of Facilities and Services. Landowner agrees to contribute to the costs of such public facilities and services as required herein to mitigate impacts on the City from the development of the Property, and City agrees to provide such public facilities and services, according to the terms of this Agreement, to assure that Landowner may proceed with and complete development of the Property in accordance with the terms of this Agreement. Landowner will provide as a part of such development a diverse mix of housing meeting a wide range of housing needs for the City, public facilities such as open space, recreational amenities, commercial centers, professional offices, and other services and amenities that are of benefit to the entire City. City and Landowner recognize and agree that but for Landowner's contributions to mitigate the impacts arising as a result of development entitlements granted pursuant to this Agreement, City would not and could not approve the development of the Property as provided by this Agreement and that, but for City's covenant to provide the facilities and services necessary for development of the Property, Landowner would not and could not commit to provide the mitigation as provided by this Agreement. City's vesting of the right to develop the Property as provided herein is in reliance upon and in consideration of Landowner's agreement to make contributions toward the cost

of public improvements as herein provided to mitigate the impacts of development of the Property as such development occurs.

J. Development Agreement Ordinance. City and Landowner have taken all actions mandated by and fulfilled all requirements set forth in the Development Agreement Ordinance of the City of Roseville, Article V, Chapter 19.84 of Ordinance No. 3014 of the Roseville Municipal Code.

AGREEMENT

ARTICLE 1. GENERAL PROVISIONS

1.1 Incorporation of Recitals. The Preamble, the Recitals and all defined terms set forth in both are hereby incorporated into this Agreement as if set forth herein in full.

1.2 Binding Covenants. Upon satisfaction of the conditions to recordation of the Agreement set forth in Section 1.3.1 below, the provisions of this Agreement shall constitute covenants which shall run with the Property and the benefits and burdens hereof shall bind and inure to all successors in interest to and assigns of the parties hereto. Accordingly, all references herein to "Landowner" shall mean and refer to Brookfield Sunset, LLC and Jennifer M. Amoruso, Successor Trustee of the Amoruso Family Living Trust Dated March 14, 2005, and each and every subsequent purchaser or transferee of the Property or any portion thereof from Landowner.

1.3 Term.

1.3.1 Commencement Expiration. The term of this Agreement shall commence upon the Placer County Local Agency Formation Commission ("LAFCO") taking final action approving the annexation of the Property to City (the "Effective Date"), and shall extend for a period of thirty (30) years after the Effective Date, unless said term is terminated, modified or extended by circumstances set forth in this Agreement or by mutual consent of the parties hereto, provided, however, that the terms and conditions of this Agreement shall not be binding on the Property, nor shall Landowner have any development rights or improvements or payment obligations, with the exception of costs incurred by City in the processing of the Entitlements, with respect to any portion of the Property, as contemplated by the Entitlements and this Agreement, until LAFCO takes final action approving the annexation of the Property. The Agreement shall be recorded against the Property within ten (10) days after City enters into the Agreement, as required by California Government Code Section 65868.5. Following expiration of the term, this Agreement shall be deemed terminated and of no further force and effect. As set forth in the Recitals above, the City's agreement to

approve development of the Property (including the zoning of the Property and the annexation of the Property to the City) is being made in consideration of Landowner's covenants under this Agreement. In the event of any such termination prior to recordation of this Agreement, Landowner acknowledges that the Entitlements shall no longer be vested by this Agreement and that the City shall not be required to approve any development of the Property, unless and until an effective development agreement is entered into with the City for the Property.

1.3.2 Automatic Termination Upon Completion and Sale of Residential Unit.

This Agreement shall automatically be terminated, without any further action by either party or need to record any additional document, with respect to any single-family residential lot within a parcel designated by the Specific Plan for residential use, upon completion of construction and issuance by the City of a final inspection for a dwelling unit upon such residential lot and conveyance of such improved residential lot by Landowner to a bona-fide good faith purchaser thereof. In connection with its issuance of a final inspection for such improved lot, City shall confirm that; (i) all improvements which are required to serve the lot, as determined by City, have been accepted by City; (ii) the lot is included within the Public Services CFD required by Section 3.19 or other financing mechanism acceptable to the City, to the extent required hereby; and (iii) if and to the extent applicable to such lot, an affordable purchase or rental housing agreement has been recorded on the lot. Termination of this Agreement for any such residential lot as provided for in this Section 1.3.2 shall not in any way be construed to terminate or modify any assessment district or Mello-Roos Community Facilities District lien affecting such lot at the time of termination.

1.3.3 Termination Upon Landowner Request. This Agreement may also be terminated, at the election of the then property owner, with respect to any legally subdivided parcel designated by the Specific Plan for residential or non-residential use (other than parcels designated for public use), when recording a final residential lot subdivision map for such parcel, or receiving a certificate of occupancy or final inspection, whichever is applicable, for a multi-family or non-residential building within such parcel, by giving written notice to City of its election to terminate the Agreement for such parcel, provided that: (i) all improvements which are required to serve the parcel, as determined by City, have been accepted by City; (ii) the parcel is included within the Public Services CFD required by Section 3.19, or other financing mechanism acceptable to the City, to the extent required hereby; and (iii) with respect to residential parcels, an affordable purchase or rental housing agreement, if required for such parcel pursuant to Section 2.6.1.1, has been recorded on the parcel. City shall cause any written notice of termination approved pursuant to this subsection to be recorded with the County Recorder against the applicable parcel at Landowner's expense. Termination of this Agreement for any such residential or non-residential parcel as provided for in this Section 1.3.3 shall not in any way be construed to terminate or

modify any assessment district or Mello-Roos Community Facilities District lien affecting such parcel at the time of termination.

1.3.4 Tolling During Legal Challenge. In the event that this Agreement or any of the Entitlements are subjected to legal challenge by a third party, and Landowner is unable or elects not to proceed with the Project due to such litigation, the term of and timing for obligations imposed pursuant to this Agreement shall be automatically tolled during such litigation.

1.4 Amendment of Agreement. This Agreement may be amended from time to time by mutual consent of City and Landowner (and/or any successor owner of any portion of the physical area to which the benefit or burden of the amendment would apply), in accordance with the provisions of the Development Agreement Statute. If the proposed amendment affects less than the entirety of the Property, then such amendment need only be approved by the owner(s) in fee of the portion(s) of the Property that is subject to or affected by such amendment. The parties acknowledge that under the City Zoning Code and applicable rules, regulations and policies of the City, the Development Services Director has the discretion to approve minor modifications to approved land use entitlements without the requirement for a public hearing or approval by the City Council. Accordingly, the approval by the Development Services Director of any minor modifications to the Entitlements that are consistent with this Agreement shall not constitute nor require an amendment to this Agreement to be effective or to be subject to this Agreement.

For purposes of this Section, minor modifications shall mean any modification to the Project that does not relate to (i) the term of this Agreement, (ii) permitted uses of the Project, (iii) density or intensity of use, except as allowed pursuant to Section 2.3 of this Agreement, (iv) provisions for the reservation or dedication of land, (v) conditions, terms, restrictions or requirements for subsequent discretionary actions, or (vi) monetary contributions by Landowner, and may be processed under CEQA as exempt from CEQA, or with the preparation of a Negative Declaration or Mitigated Negative Declaration.

1.5 Recordation Upon Amendment or Termination. Except when this Agreement is automatically terminated due to the expiration of the Term or the provisions of Section 1.3.2 above, the City shall cause any amendment hereto and any other termination hereof to be recorded, at Landowner's expense, with the County Recorder within ten (10) days after City executes such amendment or termination. Any amendment or termination of the Agreement to be recorded that affects less than all the Property shall describe the portion thereof that is the subject of such amendment or termination.

1.6 Annexation. The ability to proceed with development of the Property

pursuant to the Entitlements shall be contingent upon the annexation of the Property into the City. Pending such annexation, Landowner, at its own risk, may process tentative parcel maps and tentative subdivision maps, design review permits, Major Project Permits (Stage 1), and improvement or construction plans for improvements and City may conditionally approve such tentative maps, design review permits, Major Project Permits (Stage 1) and/or improvement plans in accordance with the Entitlements, provided City shall not approve any final parcel map or final subdivision map for recordation nor approve the issuance of any grading permit for grading any portion of the Property or building permit for any structure within the Property prior to the annexation of the Property to the City. Prior to annexation of the Property to the City, Landowner may, subject to City's review and approval, seek a grading permit from Placer County for purposes of effectuating other agency permits or approvals on the Property or in the Specific Plan as provided in Sections 2.7.1 and 2.7.2 below, and City shall cooperate in Landowner's efforts to obtain any such grading permit.

City shall use its best efforts and due diligence to initiate such annexation process, obtain the necessary approvals and consummate the annexation of the Property into the City, including entering into any annexation agreement that may be required in relation thereto, subject to the City's review and approval of the terms thereof. Landowner shall be responsible for the costs reasonably and directly incurred by the City to initiate, process and consummate such annexation.

1.7 Pro Rata Share/Fair Share – Defined. Except as specifically provided otherwise in this Agreement, the terms pro-rata share or fair share shall mean a share of the total cost of a facility or facilities based on a dwelling unit equivalent calculation using the total units within the ARSP as the numerator and the total number of unbuilt and entitled units in the Annexation Area, as the case may be, as specified in this Agreement, as the denominator.

ARTICLE 2. DEVELOPMENT OF THE PROPERTY

2.1 Permitted Uses. The permitted uses of the Property, the density and intensity of use, the maximum height and size of proposed buildings, provisions for reservation or dedication of land for public purposes, and location of public improvements, and other terms and conditions of development applicable to the Property shall be those set forth in the Entitlements.

2.2 Vested Entitlements. Subject to the provisions and conditions of this Agreement, City agrees that City is granting, and grants herewith, a fully vested entitlement and right to develop the Property in accordance with the terms and conditions of the Entitlements, including, but not limited to, allocation of residential units to residentially designated parcels in the Specific Plan, minimum lot sizes, street locations and configurations in any approved tentative subdivision maps, and

allocation of building square footage to commercially designated parcels in the Specific Plan. City acknowledges that the Entitlements include the following Specific Plan land use designations and approximate acreages, net of road right of way ("Net Acre") for Low Density Residential and Medium Density Residential land uses (gross acres for all other land uses), for the Property as shown in the Specific Plan Land Plan in Exhibit "E", attached hereto and summarized below:

Low Density Residential	1,302 units on 248.8 Gross Acres;
Medium Density Residential	542 units on 50.3 Gross Acres;
High Density Residential	873 units on 38.1 Gross Acres;
Community Commercial	23.9 Gross Acres;
Community Commercial/Village District	109 units on 27.3 Gross Acres;
Park	22.1 Gross Acres;
Open Space	134.8 Gross Acres;
Open Space (Paseos)	10.7 Gross Acres;
School	9.6 Gross Acres;
Public/Quasi Public	7.6 Gross Acres;
Urban Reserve	20.0 Gross Acres;
Right of Way	52.0 Gross Acres;
NAPOTS (Placer Parkway)	49.2 Gross Acres.

Such uses shall be developed in accordance with the Entitlements, as such Entitlements provide on the Effective Date of this Agreement. Landowner's vested right to proceed with the development of the Property shall be subject to subsequent approvals, provided that any conditions, terms, restrictions and requirements for such subsequent approvals shall not prevent development of the Property for the uses set forth in the Entitlements, and as more fully set forth in Section 2.4.1 below.

2.3 Density Transfer. The number of residential dwelling units planned for the different Parcels within the Project may be transferred to other Parcels within the Project, subject to compliance with the conditions for such transfer as set forth in the Specific Plan. All unused units must be transferred prior to approval by the City Council of the last small lot final map or design review permit for the last high-density residential parcel map for the Property. Any unused units not so approved for transfer shall revert to the City unit pool and Landowner shall have no subsequent claim to such units.

2.4 Rules, Regulations and Official Policies.

2.4.1 Inconsistency. Except as prohibited by Government Code Section 65869.5 or other applicable state or federal law, to the extent any future rules, ordinances, regulations or policies applicable to development of the Property are inconsistent with the land use designations or permitted or conditionally permitted

uses on the Property, density and intensity of use, rate or timing of construction, design requirements, maximum building height and size, or provisions for reservation and dedication of land or other conditions of approval or terms under the Entitlements as defined herein and as provided in this Agreement, the terms of the Entitlements and this Agreement shall prevail, unless the parties mutually agree to alter this Agreement. To the extent any future rules, ordinances, fees, regulations or policies applicable to development of the Property are not inconsistent with the land use designations or permitted or conditionally permitted uses on the Property, density and intensity of use, rate or timing of construction, design requirements, maximum building height and size, or provisions for reservation or dedication of land or other terms or conditions under the Entitlements or under any other terms of this Agreement, such rules, ordinances, fees, regulations or policies shall be applicable to the development of the Property, except as limited by Section 2.5.2 of this Agreement.

2.4.2 Obligation to Meet and Confer. If City attempts to apply to the Project future rules, ordinances, fees, regulations or policies which Landowner believes to conflict with the Entitlements, Landowner shall provide to City in writing a notice describing the legal and factual basis for Landowner's position. The parties shall meet and confer within thirty (30) days after the date of such written notice by Landowner to discuss the matter.

2.4.3 Application of Changes. Nothing in this section shall preclude the application to development of the Property of changes in City laws, regulations, plans or policies, the terms of which are specifically mandated or required by changes in State or Federal laws or regulations. To the extent that such changes in City laws, regulations, plans or policies prevent delay or preclude compliance with one or more provisions of this Agreement, City and Landowner shall take such action as may be required pursuant to Section 4.1 of this Agreement to comply therewith.

2.4.4 Authority of City. This section shall not be construed to limit the authority or obligation of City to hold necessary public hearings, or to limit discretion of City or any of its officers or officials with regard to rules, regulations, ordinances, laws and entitlements of use which require the exercise of discretion by City or any of its officers or officials, provided that subsequent discretionary actions shall not prevent or delay development of the Property for the uses and to the density and intensity of development as provided by the Entitlements and this Agreement, in effect as of the date that City executes this Agreement.

2.5 City Fees, Taxes and Assessments.

2.5.1 Processing Fees and Charges. Landowner shall pay those processing, inspection and plan checking fees and charges required by City under then current regulations for processing applications and requests for permits, approvals and

other actions, and monitoring compliance with any permits issued or approvals granted or the performance of any conditions with respect thereto or any performance required of Landowner hereunder.

2.5.2 Public Financing Limited to Specific Funding Mechanisms. This Agreement includes specific construction, funding and reimbursement obligations of Landowner and specific rights or obligations, as the case may be, to participate in a community facilities district(s) or a similar financing district to fund the acquisition and construction of specific facilities and the maintenance of certain improvements. Landowner's obligation with respect to the participation of the Property in any funding mechanisms to support the construction of any other public facilities and improvements or the provision of public services in relation to development of the Property shall be to pay City fees related to the construction and provision of such public facilities authorized by ordinance to be collected by City as of the date that City executes this Agreement as such fees may be adjusted from time to time in accordance with applicable law, or such other fees as may be duly adopted in the future by City from time to time in accordance with applicable law; provided, however, except as otherwise specifically provided in this Agreement, Landowner's obligation to pay future City fees is limited to those fees adopted on a City-Wide basis or which apply uniformly to all properties within the City of Roseville which are zoned consistent with Landowner's zoning as set forth in the Entitlements, or which apply uniformly to all properties which are similarly situated, whether by geographic location, drainage sheds or other distinguishing circumstances.

2.6 Affordable Housing. Consistent with the goals and policies contained in City's General Plan and the Specific Plan, Landowner shall develop or cause ten percent (10%) of the total residential units which are actually constructed within its Property to be developed as affordable housing. In accordance with the terms of this Section and subject to adjustment based on actual development, Landowner shall provide 283 units affordable to very low and low -income households. The breakdown of percentage of the total number of affordable units to the different income levels shall be 40% for very low and 60% for low income households. Any adjustment based on actual development shall be subject to the approval of the City Manager or his/her designee. Prior to issuance of a building permit for any affordable rental unit on a parcel within the Project, City and Landowner shall enter into an Affordable Rental Housing Agreement giving effect to the requirements and intent of this Agreement.

The term "very low income" means households earning 50% or less of median income, and "low income" means households earning 51% to 80% of median income, as published annually by the U.S. Department of Housing & Urban Development ("HUD"). Income eligibility and asset verification and calculation guidelines shall be determined in accordance with the HUD Handbook 4350.3 Chapter 5. For each of the household income ranges specified herein, household income at the upper limit of the

specified ranges shall be used in determining qualifying rents for affordable rental residential units. Unless a City subsidy is provided, as set forth in Section 2.6.1.3 below regarding any future potential subsidy, or other restrictions are placed on the Parcel due to the type of financing secured by the ultimate developer of the Parcel, qualifying rents for affordable rental residential units shall be based on the upper limit of specified income levels.

Locations of affordable housing sites are shown in the Specific Plan and Exhibit "F". Such locations may be modified pursuant to Section 2.6.1.4 of this Agreement.

2.6.1 Multi Family Affordable Rental Units.

2.6.1.1 Affordable Obligation. Landowner agrees that two hundred and eighty-three (283) affordable rental units will be reserved within the Property, including one hundred and thirteen (113) units for rental to very low income households and one hundred and seventy (170) units for rental to low income households as follows:

Parcel	Total Units In Parcel	Total Affordable Unit Allocation	Very Low Income Rental Units	Low Income Rental Units
AR-19	230	170	68	102
AR-44	150	113	45	68
Total	380	283	113	170

2.6.1.2 Transfer/Satisfaction of Obligation. At the request of Landowner, the affordable rental housing obligation (or any portion thereof), including any excess affordable rental units committed to by Landowner above its allocated affordable rental housing obligation hereunder, may be transferred, with the consent of the Economic Development Director, from one Parcel to another parcel within the Specific Plan, subject to the approval of the owner(s) of both the transferring and receiving parcels. No such transfer shall require an amendment to this Agreement, but City and Landowner and the owner(s) of the receiving parcels shall execute an instrument memorializing such transfer of obligation that shall be recorded against the affected parcels, with reference to this Agreement.

2.6.1.3 Future Potential Compensation by City. If and to the extent funding to subsidize the provision of affordable housing within the City as described herein is or becomes available to City and is not otherwise committed by City to other affordable housing projects, City at its sole discretion may compensate Landowner or its successors from such available funds. Landowner acknowledges that, as of the Effective Date hereof, City does not have and does not anticipate obtaining any such subsidies that would be available to compensate Landowner hereunder, and if City cannot provide or identify any such subsidies, Landowner shall nevertheless be

obligated hereunder to provide the affordable housing as required by this Agreement. In connection herewith, Landowner hereby waives any claims, suits, or actions against City on account of or arising from the Costa-Hawkins Rental Housing Act, California Civil Code Section 1954.50 et seq.

If and to the extent available, to compensate Landowner for providing rental housing affordable to low income households and very low income households, such compensation (hereinafter, "subsidy" or "subsidies") may be issued through a combination of density bonus, fee deferrals or financing, federal, state and/or local programs or any other form agreeable to Landowner and City. Landowner shall join City in any application prepared for federal, state, local or private funding for any potential subsidies, and Landowner shall use its best efforts to cooperate with City to obtain approval thereof, provided any additional costs or liabilities associated with Landowner's participation therein shall be subject to Landowner's reasonable approval.

To the extent that public funds or subsidies are provided to the development of affordable rental units, Landowner shall provide written notice to builder(s) of such affordable units that such construction may be subject to a requirement to pay prevailing wage.

2.6.1.4 Community Facilities Districts. The City Manager or his/her designee shall maintain a list of low and very low-income affordable rental units for each Parcel which is subject to an Affordable Rental Housing Agreement (or applicable City-approved form) and, on or about May 1 of each calendar year, shall send a copy of such Affordable Rental Housing Agreement(s) to the City Finance Director. In reliance thereon, the Finance Director shall, to the extent allowed by law, if and when a Community Facilities District is formed encompassing the Property, set the applicable special tax for such Parcel at a level described in the rate and method for said Community Facilities District.

2.6.1.5 In Lieu Fee – Affordable Housing. In the event City adopts a fee to be paid in lieu of construction rental housing affordable to low or very low income households, Landowner shall be eligible to pay such in lieu fee rather than construct affordable housing units on the Property.

2.6.2 Not a Limitation. Nothing in the foregoing Sections 2.6.1 and 2.6.2 shall be construed to limit Landowner from offering units for rental or purchase to households of very low, low or middle incomes in excess of the number of units specified.

2.7 Wetlands.

2.7.1 404 Permit. Landowner has obtained verification from the U.S. Army Corps of Engineers (the "Army Corps") of the presence of vernal pools and of wetland swales/channels on the Property. Landowner shall obtain from the Army Corps a permit (the "404 Permit") to fill specific wetland resources in conjunction with development of the Property, as well as all offsite improvements required to be constructed by Landowner. Landowner shall diligently pursue and obtain issuance of the 404 Permit and any amendment, modification or supplement thereto, or an additional 404 Permit if required, in order to implement the Project. Such 404 Permit or Permits shall be approved, with conditions satisfactory to the City if such conditions impact any public uses or improvements to be conveyed pursuant to this Agreement, prior to commencement of construction of any improvements on the Property. Landowner shall, in implementation of the 404 Permit, be required to append to the City's Open Space Preserve Overarching Management Plan. Landowner intends to mitigate the impacts of such wetland fills through a combination of on-site preservation ("Preserve Area(s)"), off-site preservation and/or on-site and off-site creation or restoration of wetland resources. Should on-site preservation require monitoring and a corresponding conservation easement recorded in favor of a third party non-profit entity, City shall have the right to approve the conservation easement and third party non-profit entity, and Landowner shall be responsible for any required endowment to fund long-term third party monitoring and reporting as may be required under the conservation easement. In addition, any off-site preservation properties that Landowner obtains to partly or wholly mitigate the impacts of such wetland fills, where such off-site preservation properties (the "Off-Site Preservation Properties") are adjacent to City's Al Johnson Wildlife Area, may be dedicated to City by Landowner, subject to approval by City. The Off-Site Preservation Properties shall be consistent with the requirements of this Section 2.7 of the Agreement, including appending to City's Open Space Preserve Overarching Management Plan, and funding of management, maintenance, monitoring and reporting obligations. Landowner shall use its reasonable best efforts, subject to approval of Federal and State resource agencies, to provide for the establishment of passive recreation opportunities (such as Class I bike trails and wildlife viewing) in such Off-Site Preservation Properties that are adjacent to City's Al Johnson Wildlife Area. Should the Off-Site Preservation Properties to be dedicated to City require monitoring and a corresponding conservation easement recorded against the Off-Site Preservation Properties in favor of a third party non-profit entity, City shall have the right to approve the conservation easement and third party non-profit entity. In addition, Landowner shall be responsible for any required endowment to fund long-term monitoring and reporting by the third party non-profit entity that may be required under the applicable conservation easement.

Landowner shall obtain any amendments to the 404 Permit(s) that are, or may be, required and any other State or Federal permits that may be required in order

to construct improvements specified in the Specific Plan, the 404 Permit and this Agreement, including improvements for the Preserve Area(s). Notwithstanding this obligation of Landowner, City and Landowner shall, to the maximum extent feasible, avoid infrastructure designs and locations that would require Landowner to amend its 404 Permit or any other permit required by State or Federal agencies.

2.7.2 Westbrook Boulevard. Among the public improvements to be constructed on the Property that will be covered by the 404 Permit is Westbrook Boulevard from the southern boundary of the Plan Area through the ARSP. Unless constructed by another third party, Landowner is also obligated to construct Westbrook Boulevard, including the utilities located within or adjacent to Westbrook Boulevard, from the point that Westbrook Boulevard reaches the southern boundary of Parcels C-51 and C-52 in the Creekview Specific Plan ("CSP") area up to the southern boundary of the ARSP. However, Landowner is not obligated by this Agreement to obtain a 404 Permit for that portion of Westbrook Boulevard between Parcels C-51 and C-52 in the CSP. Rather, Landowner and City acknowledge that property owners in the CSP area have obtained 404 permits that include the portion of Westbrook Boulevard between Parcels C-51 and C-52 in the CSP pursuant to Section 2.7 of the CSP development agreement with City.

The CSP development agreement provides for assignment by the CSP property owners of the 404 Permit or portions of the 404 Permit for the CSP that relate to the portion of Westbrook Boulevard between Parcels C-51 and C-52, along with mitigation therefor, if such mitigation has been acquired and implemented by the CSP landowners at the time that Landowner or third parties are prepared to advance construction of that segment of Westbrook Boulevard. The CSP development agreement further provides that if the property owners in the CSP have not yet acquired and/or implemented the mitigation required to build such segment of Westbrook Boulevard, then the CSP landowners shall reimburse the constructing party for the cost of acquiring and implementing the needed mitigation to construct that segment of Westbrook Boulevard, as set forth in the CSP development agreements and as set forth in this Agreement. Under no circumstances shall Landowner be required to reimburse the CSP property owners for the cost of mitigation and/or implementation of mitigation required for constructing the identified portion of Westbrook Boulevard as set forth herein, including any costs of state and federal permitting, or any mitigation costs for infrastructure in the CSP.

2.7.2.1 Compliance with 404 Permit Conditions. Any violation of the 404 Permit by Landowner arising out of construction of drainage outfalls and other drainage improvements in a Preserve Area shall be the responsibility of Landowner. Following any required establishment periods as provided in this Agreement, outside agency permit(s), and upon City acceptance of such improvements (which shall occur upon completion of such drainage improvements prior to City acceptance of the

Preserve Area(s)), City shall be responsible for the normal operation and maintenance of such outfalls and other drainage improvements within dedicated areas, the cost of which shall be funded through the CFD for Public Services as set forth in Section 3.19 below. Notwithstanding City's acceptance of the drainage improvements, the City shall not be responsible for any 404 Permit or Clean Water Act violations arising from Landowner or third party actions affecting the normal operation of the drainage system. City shall be responsible for any 404 Permit or Clean Water Act violations, and the costs thereof, arising out of actions of the City causing such violation(s). It is also acknowledged that the City's acceptance and normal operation of the public storm drain system does not alter Landowner's obligation and responsibility for compliance with the applicable 404 Permit Preserve Area Establishment Period (as defined in Section 2.7.2.3 below) success criteria.

2.7.2.2 Preserve Area Establishment and Perpetual Monitoring Phases. It is anticipated that the 404 Permit referenced in Section 2.7.1 of this Agreement and subsequent subsections will require preservation and/or creation or restoration of wetland resources within Preserve Areas to be established on the Property as well as on the Off-Site Preservation Properties. City and Landowner shall cooperate with one another in the formation of a financing mechanism as provided for in Section 2.7.4, to fund the costs of monitoring and maintaining the Preserve Area and the Off-Site Preservation Properties in accordance with the 404 Permit. The financing mechanism may be established to address the two separate phases of on-site Preserve monitoring: the Establishment Monitoring Phase and/or Perpetual Monitoring Phase, as described below.

The first phase, or the Establishment Monitoring Phase, would occur during the time that the Preserve property remains under ownership of Landowner and adjacent build-out is occurring in accordance with the Entitlements and 404 Permit(s). During the Establishment Monitoring Phase, created wetlands would be monitored for success in accordance with criteria identified in the 404 Permit, and the balance of the Preserve Areas would be monitored in accordance with City's Open Space Preserve Overarching Management Plan. Prior to City acceptance of the Preserve Areas, all other identified Preserve improvements would have been constructed, including, but not limited to, perimeter fencing, outfalls, drainage swales, and utility lines. The duration of the Establishment Monitoring Phase will be specified in the 404 Permit and will depend in part on the ability of created mitigation wetlands to meet success criteria identified in the 404 Permit. City and Landowner acknowledge and agree that City will take ownership of the Preserve in accordance with the process outlined in the City's then current Open Space Preserve Overarching Management Plan after the Establishment Monitoring Phase has demonstrated that all created habitat has met the required success criteria, any special management conditions related to the Preserve Area as may be identified in the 404 Permit have been implemented, and all required Preserve improvements and/or facilities have been completed to the

satisfaction of the City and applicable Federal permitting agencies.

The second phase, or Perpetual Monitoring Phase, would begin immediately following the Establishment Monitoring Phase. At the outset of the Perpetual Monitoring Phase, on-site Preserve areas would be dedicated to and accepted by the City and then managed by City in accordance with the City's Open Space Preserve Overarching Management Plan and any Perpetual Monitoring Phase or special management conditions identified in the 404 Permit.

2.7.3 Maintenance by Landowner During the Establishment Monitoring Phase. Landowner shall be solely responsible for satisfying all mitigation, monitoring, reporting, and maintenance required for on-site Preserve Areas and Off-Site Preservation Properties, in accordance with the City's then current Open Space Preserve Overarching Management Plan, including, but not limited to, development of any 404 Permit required supplemental Establishment Monitoring Phase Operations and Management ("O&M") Plan, or any extended Establishment Monitoring Phase, as determined by the Army Corps, for the Preserve Area.

Furthermore, during said Establishment Monitoring Phase, Landowner shall indemnify, defend and hold City harmless from any and all costs, liabilities or damages for which the City is held responsible or alleged to be responsible under the 404 Permit, which arise out of or relate to any failure of Landowner to satisfy such 404 Permit and Establishment Monitoring Phase requirements, excluding any such failure caused by the active negligence of City or any employees, agents or contractors thereof. City acknowledges and agrees that any proposed use or improvement of the Preserve Area will be subject to the provisions of the 404 Permit and the City's then current Open Space Preserve Overarching Management Plan (as defined herein and in Section 2.7.4 below). Landowner acknowledges responsibility for obtaining 404 permit coverage for all open space uses specified in the Project and this Agreement.

Funds collected by the Public Services CFD or other financing mechanism for the purpose of maintenance of Preserve Area(s) on the Property and the Off-Site Preservation Properties will be made available to Landowner for on-going Preserve Area maintenance, monitoring, and reporting up to and until such time as City assumes the obligation for Perpetual Monitoring.

2.7.4 Maintenance by City During the Perpetual Monitoring Phase. A PAR Analysis shall be prepared and approved by the City to determine the amount of funding required to manage Preserve Areas during the Perpetual Monitoring Phase. The annual funding needs would be generated via establishment of a Public Services CFD. Following successful completion of the Establishment Monitoring Phase and transfer of applicable Preserve areas to the City, the City, at the expense of the Public Services CFD, shall have sole responsibility to manage the Preserve Area(s) according to

the City's Open Space Preserve Overarching Management Plan and any Perpetual Monitoring Phase or special management conditions identified in the applicable 404 Permit(s). During said Perpetual Monitoring Phase, Landowner shall, to the extent Public Services CFD funds generated by the Property are available to correct such below-referenced failure to comply with the Overarching Management Plan and/or any special management conditions identified in the 404 Permit by Landowner or third party, indemnify, defend and hold City harmless from any and all costs, liabilities or damages for which the City is held responsible or alleged to be responsible under the 404 Permit (of the transferred Preserve), which solely arise out of or relate to any failure of Landowner to satisfy such Overarching Management Plan and/or any special management conditions identified in the 404 Permit and mitigation monitoring requirements, excluding any such failure caused by the active negligence of City or any employees, agents or contractors thereof. City acknowledges and agrees that any proposed use or improvement of the Preserve Area(s) during the Perpetual Monitoring Phase will be subject to the provisions of the 404 Permit and the City's Open Space Preserve Overarching Management Plan and/or any special management conditions identified in the 404 Permit.

2.7.5 Facilities Included in 404 Permit. Landowner shall use its best efforts to ensure that the approval of its 404 Permit includes development of the bike paths, fuel modification areas, water quality structures and drainage and flood control facilities, outfalls, culverts, and ancillary improvements that are described in the Specific Plan and this Agreement. To the extent feasible, these improvements within the Property should be located within the Preserve "transition zone", a separate approximately 30-foot wide open space parcel located between the Preserve Area and development parcels. In this regard, Landowner shall include the location of known proposed bike paths, fuel modification areas, passive recreation areas, vehicular access routes for maintenance of open space, sewer facility maintenance, water quality structures and drainage and flood control facilities on all maps and/or exhibits accompanying all 404 Permit(s) applications to ensure all proposed open space improvements are disclosed and considered by the Army Corps during 404 Permit processing and drafting of permit conditions. Such open space improvements shall include the following:

- (i) Maintenance access ramps from Westbrook Boulevard to the Preserve Area north and south of University Creek (from both the east and west sides of Westbrook Boulevard), as shown in Exhibit "Z-1";
- (ii) A maintenance access crossing of University Creek capable of accommodating a 30,000 pound vehicle (grass fire rig) as part of off-site drainage improvements located west of Parcel AR-92 on the Al Johnson Wildlife Area to access the southwest open space south of University Creek within the Property, as shown in Exhibit "Z-2".

- The bridge design shall be supported by a hydraulic analysis demonstrating no flood plain impacts from the structure;
- (iii) Subject to the results of Landowner's reasonable best efforts as set forth in Section 2.7.1 above, opportunities for passive recreation in the Off-Site Preserve Properties for wildlife viewing and a bike trail linking West Sunset Boulevard and the Al Johnson Wildlife Area.

If any significant modifications are proposed which conflict in any manner with the Entitlements related thereto and to the planned location and improvement of the bike paths as a result of approval of the applicable 404 Permit(s), the revised relocation and/or improvement of such paths or other facilities shall be resubmitted to the City for review. The City shall not unreasonably deny any request to relocate any of the paths or other facilities within or outside of the Open Space Preserves and the review of such modifications shall be made in accordance with CEQA.

2.7.6 Preserve Area Operation and Management Plan Fee. As discussed in this Section 2.7, it is anticipated that the on-site Preserve Area(s) and, if approved by City, the Off-Site Preservation Properties will append to and be managed in accordance with the City's Open Space Preserve Overarching Management Plan, which may include supplemental management requirements and success criteria identified in the 404 Permit. In recognition of efficiencies achieved by appending to City's Open Space Preserve Overarching Management Plan, Landowner shall pay to City a one-time fee of \$20,000. Payment shall be made by Landowner upon effectuation of the 404 Permit and initiation of the Establishment Monitoring Phase management as outlined in City's Open Space Preserve Overarching Management Plan. Should the applicable resource agencies approve an independent preserve area operations and management plan for the Preserve Area(s) and Off-Site Preservation Properties such that City's Open Space Preserve Overarching Management Plan will be not applicable to such preserves, Landowner shall have no obligation to pay the fee referenced in this Section 2.7.6.

2.7.7 Optional Participation in the Placer County Conservation Plan. Landowner may elect to participate in the Placer County Conservation Plan (PCCP) as a Participating Special Entity as a means of obtaining the Project's 404 Permit. Landowner and City recognize that PCCP participation may alter the currently anticipated Federal Clean Water Act and Endangered Species Act mitigation approach set forth in this Agreement, including, but not limited to, on-site and off-site Preserve Area dedication, management, monitoring, maintenance, and funding requirements. Landowner and City shall use their reasonable best efforts and work cooperatively to implement PCCP permitting requirements for the Project, provided, however, that City shall not be responsible for any added costs that may result from Landowner's decision to participate in the PCCP.

2.8 Provision of Off-Site Real Property Interests. In any instance where Landowner is required to construct any public improvement on land not owned by Landowner, Landowner shall as its sole cost and expense provide or cause to be provided, the real property interests necessary for the construction of such public improvements. The public improvements subject to the provisions of this Section 2.8 are as follows:

- (1) Westbrook Boulevard south of the Property, and utility easements adjacent to and/or thereunder, to the extent such real property interests have not previously been dedicated to City;
- (2) Improvements to the Al Johnson Wildlife Area not otherwise owned by City; and,
- (3) any other real property interest pertaining to public improvements which City requires Landowner to construct.

In the event Landowner is unable, after exercising commercially reasonable efforts, including, but not limited to, the rights under Sections 1001 and 1002 of the California Civil Code, to acquire the real property interests necessary for the construction of such public improvements, and if so requested by Landowner and upon Landowner's provision of adequate security as determined by City for costs City may reasonably incur, City shall negotiate for purchase of the necessary real property interest for property within the City to allow Landowner to construct the public improvements as required by this Agreement and, if necessary, in accordance with the procedures established and to the extent allowed by law, use its power of eminent domain to acquire such required real property interest. Landowner shall pay all costs associated with such acquisition or condemnation proceedings. This Section is not intended by the parties to impose upon the Landowner an enforceable duty to acquire land or construct any public improvements on land not owned by Landowner, except to the extent that the Landowner elects to proceed with the development of the Property, and then only in accordance with valid conditions imposed by the City upon the development of the Property under and subject to the Subdivision Map Act or other legal authority.

In those circumstances where the City owns property in fee on or over which development of the Property requires permanent and temporary construction easements, road rights-of-way and/or sites for public facilities, City shall grant such permanent easement or temporary easements, right-of-way, or sites as needed for the timely and efficient development of the Property.

ARTICLE 3. LANDOWNER OBLIGATIONS

3.1 Development, Connection and Mitigation Fees. Except as otherwise provided in Section 2.5 of this Agreement, any and all required payments of development, connection or mitigation fees by Landowner shall be made at the time and in the amount specified by then applicable City ordinances. Wherever this Agreement obligates Landowner to design, construct or install any improvements, the cost thereof may be provided by Landowner, or by traditional assessment district, CFD or other such financing mechanism, subject to and in accordance with the provisions thereof and with City approval.

3.2 Public Improvements To Be Dedicated, Constructed or Financed by Landowner. In conjunction with each phased Final Map, or as otherwise required by this Agreement, Landowner agrees to dedicate, construct or acquire the improvements or facilities and to perform the obligations set forth in this Section 3, at its expense, subject only to reimbursements or credits specified in this Agreement. Prior to dedication of sites to City, Landowner shall obtain and fulfill the terms of any state and federal permits needed for anticipated development (e.g., 404 Permit and CDFW 1600 Streambed Alteration Agreements, RWQCB General Construction Permit, and 401 Certification, as needed) and complete said development if said development is a Landowner responsibility under this Agreement. At the time of City acceptance of any land dedications, all land dedications, except for the NAPOTS Area described in Section 3.3.1 below, shall be free of environmental or other constraints or other encumbrances inconsistent with the intended use of the Property (e.g., all wetlands shall be filled in accordance with applicable 404 Permits), unless expressly waived by the City. In the event, however, that the land dedication by Landowner is triggered by the proposed construction of a third party for a public improvement identified in this Agreement, such third party shall assume the obligation to assure that, at the time of City acceptance, the land dedicated is free and clear of all Encumbrances, unless expressly waived by City. Landowner agrees to cooperate with such third parties to use their best commercially reasonable efforts to remove all Encumbrances, subject to lender or mortgagee consent, as may be required. Such cooperation by Landowner shall be at the sole cost to the third party requesting removal of Encumbrances prior to final dedicating acceptance by City. Title shall be conveyed to City in fee simple and without restriction or limitation on use(s), unless approved otherwise by the City Attorney. Signage shall be installed in accordance with Section 3.25. With respect to the wetland obligation referenced in Section 2.7.1 above, the third party shall assume the obligation to remove such wetland environmental constraint on the Property to be dedicated to City triggered by the third party's construction of the public improvements.

3.3 Project Phasing. Landowner shall develop and construct the infrastructure necessary to serve the Project in Phases 1 through 3 substantially consistent with the Phasing Plan set forth in Exhibit "G" attached hereto. Infrastructure

may be constructed in sub-phases as approved at the discretion of the City, in consultation with all affected City departments.

In the event that sub-phases are proposed within the identified Phases 1 thru 3, the following criteria will be used to establish the conditions and requirements for that portion of work:

- The progression of sub-phase development shall provide the necessary facilities to support the land uses within the proposed sub-phase of development.
- The phase size shall be as mutually agreed upon by Landowner and City, subject to the criteria set forth in this Section 3.3.
- Provide detailed information (maps, analysis, written detail of improvements, etc.), to the satisfaction of City, to support the proposed sub-phase improvements for each utility/public service within the phase.
- Prior to the approval of development of any parcel, the cumulative effect of that increment of development shall be evaluated to determine its impact on existing systems. This may require, as determined by City, that special studies be conducted to demonstrate how the sub-phase is in substantial conformance with infrastructure master plans prepared for the Project.

The sub-phase shall demonstrate to the City's satisfaction that the following performance criteria are met:

- Sanitary Sewer – One point of connection to the sewer outfall required, which may include a sanitary sewer lift station or interim lift station.
- Recycled Water – One point of connection required. A looped system is not required. Potable water may be utilized on an interim basis via a potable water charging station, until such time as the Environmental Utilities Director makes a determination that potable water service can no longer be allowed. At that point in time the system shall be switched over to recycled water by eliminating each potable water charging station and connecting to the West Roseville Specific Plan recycled system, as described in Section 3.9 herein (Recycled Water Facilities). At the time that a water charging station is abandoned, a fire hydrant shall be installed to separate the potable water and recycled water systems. Up to three temporary potable water charging station connections to the recycled water system shall be allowed among the 3 phases 1-3, with one

temporary potable water charging station connection anticipated for Phase 1. The connection of the recycled water pipe to the potable water pipe shall consist of one gate valve and one backflow prevention device between the connections. The charging stations may be relocated within a phase or to another phase and multiple sub-phases can share a single station. Recycled water pipe lines shall be constructed concurrent with roadways construction and paving within a phase or sub-phase. Additional temporary potable water charging station connections to the recycled water system may be utilized subject to the approval of the Environmental Utilities Director.

- Potable Water – Two independent points of connection required to the ARSP Backbone water system to provide system looping.
- Roadway – Two points of access required (one may be a temporary EVA) and reasonable traffic circulation.
- Electric – Any sub-phase shall be consistent with Section 3.11 below.
- Grading – A substantial earthwork effort is required by the ARSP. Sub-phasing plans will be required to demonstrate, through a detailed mass grading plan, that all sites (whether cut or fill) will be able to be constructed over time with an effort to minimize use of retaining walls. Haul roads, stock pile sites and adequate drainage facilities shall be identified on grading plans.
- Drainage – Any sub-phase shall demonstrate that adequate storm water management is provided.
- Streetscape Irrigation – Irrigation systems for streetscapes shall be separated by sub-phase and fully operational.

Landowner acknowledges that modifications to the Phasing Plan as shown in Exhibit “G” shall require additional City review. Special studies including but not limited to, water/recycled water/sewer/storm water systems, grading, traffic, fire response, electric supply, and other environmental review may be required. The Landowner will be responsible for all costs associated with the preparation of special studies, and for the associated costs of time and materials of City Staff for the review and processing of the requested deviation as deemed necessary by City.

3.3.1 Recordation of Large Lot Map(s). One Large Lot Tentative Map (“LLM”) shall be prepared for the entire Plan Area, allowing phasing of the final map (“Large Lot Final Map”). Large Lot Final Maps can record independent of the others

consistent with the LLM. Consistent with Section 3.5.4.2 below, performance security (in a form acceptable to City) shall only be required for small lot subdivision maps being recorded prior to the acceptance of improvements by City. Future public lands within the Plan Area, including the well site, sewer lift station, fire station, open space, drainage channels, and parks shall be dedicated to the City on the face of each Large Lot Final Map as an irrevocable offer to dedicate ("IOD").

With the recordation of the first Final Map, the Landowner shall grant to City separate IODs for (1) rights-of-way ("RoW") for all arterial roadways to include all landscape corridors adjacent to Low Density Residential and Medium Density Residential parcels, (2) open space parcels within the Project, (3) public utility easements ("PUEs") consisting of twenty-five (25) feet adjacent to RoW dedications adjacent to land uses other than Low Density Residential and Medium Density Residential land uses, except as otherwise shown in the Specific Plan, (4) drainage channels, (5) all P/QP parcels (except the school site), and (6) temporary construction easements ("TCEs") with rights of access and rights to construct, covering the combined width of the RoW, PUEs, IODs and open space parcels (subject to any conditions in the 404 Permit). City shall have the right to accept IOD and TCE dedications on behalf of or for use by any third party developer(s), subject to such third parties executing a right of entry agreement, including indemnification provisions, acceptable to Landowner, which acceptance shall not be unreasonably withheld.

In addition, Landowner shall with recordation of the first Final Map grant to City a separate IOD for the future Placer Parkway alignment, including an area for the portion of a potential future interchange at the Placer Parkway/Westbrook Boulevard intersection that would lie within the Project boundaries, area that are designated "not a part of this subdivision" ("NAPOTS" or "NAPOTS Area") on the Land Use Plan. Notwithstanding the provisions below for City acceptance of all RoW IOD's, City shall not be obligated to accept such IOD for the NAPOTS Area until the earlier of the recordation of the final small lot map for Phase 3 of the Project or execution of the contract for the construction of the segment of Placer Parkway including the NAPOTS Area. Landowner shall include the maintenance of the NAPOTS Area in its Community Facilities District – Public Services under Section 3.19 below, until such time as the contract for the construction of the segment of Placer Parkway including the NAPOTS Area is executed. Landowner shall maintain the NAPOTS Area prior to City acceptance, using funding from the CFD – Public Services. Upon City acceptance of the IOD for the NAPOTS Area, City shall be responsible for maintenance of the NAPOTS Area, using funding from the CFD – Public Services, until such time as indicated herein.

City shall accept all RoW and PUE IOD's subject to improvement. IOD's shall remain in force until such time as all Landowner obligations for public improvements and/or Preserve Area Establishment Monitoring Phase monitoring is

complete. Upon issuance of a Certificate of Completion ("COC") for the completed improvements within the IOD's, and following the acceptance of those improvements by the City Council, the City shall accept the dedications. The City is not obligated to accept land dedications for future P/QP, Open Space, Park, or other public improvements until the frontage improvements to such land dedications are completed. Furthermore, Open Space Preserve Area acceptance shall take place as described in Section 3.12.9.1 and the City's Open Space Preserve Overarching Management Plan. Except as provided in Section 3.12.9 below, maintenance of these properties remains a Landowner obligation until accepted by City.

3.4 Public Utilities Within Rights-of-Way. All public utilities shall be located within the rights-of-way to be granted by Landowner to City for the arterials, collectors and other local streets within the Property or within public easements granted by Landowner to City for such purposes. Accordingly, upon approval of any final large lot subdivision map (or any phase of it), or demand of the City based upon service needs, whichever occurs first, Landowner agrees to grant an IOD to City for the rights-of-way, pursuant to Section 3.3.1, for any arterials, collectors, or public easements that include the area within which such public utilities will be located. If such utilities need to be installed prior to the construction of the applicable street(s), Landowner shall grant a temporary public utility easement which shall merge with the rights-of-way upon completion of the applicable street improvements. The width of the rights-of-way, including the area for the applicable roadways, utilities and power line corridors shall be as shown in the Specific Plan.

Nothing in this Agreement shall be construed to limit or restrict the right of the City to require the dedication of an easement for utility, bus shelter, or powerline corridor purposes related to development of any parcel when such requirement would be otherwise consistent with the reasonable exercise of the police powers of the City and is reasonably related to a requirement to serve the parcel or parcels adjacent to the easement.

3.5 Road Improvements. Landowner, at its expense, shall provide the road improvements set forth in this Agreement, the Specific Plan, the Phasing Plan, as may be modified as provided in Section 3.3, the Infrastructure Phasing and Reimbursement Schedule set forth in Exhibit "BB", and as shown in Exhibit "H".

3.5.1 Landowner's Obligations. Landowner obligation for residential and collector roadway improvements shall consist of the construction of curb, gutter, sidewalk, utilities, streetlights, appropriate striping, all necessary drainage improvements including storm water management requirements, fiber optic cable conduit as set forth in Exhibit "T", and pavement section. Except as provided below in Section 3.5.2, Landowner's frontage obligation for arterial roadways shall consist of curb, gutter, sidewalk, one-half of the median landscaping and median curbing,

grading of ½ of the full road section, drainage facilities including storm water management requirements, utilities, street lights, signal interconnect conduits, fiber optic cable conduit as set forth in Exhibit "T", and eighteen feet (18') of asphalt pavement adjacent to the property, including aggregate base and sub-base, striping, and any additional pavement widening at intersections and driveways to accommodate turn lanes and bus turnouts as may be required by the City Engineer (collectively "Frontage Improvements"). Right turn auxiliary lanes, turn flares, decel lanes, tapers, transition lanes, widening at driveways and bus turnouts shall be constructed by Landowner in, and encroach into, the public utility easement/landscape easement corridors per the Specific Plan. Additional RoW dedication is required where multiple left turn lanes are required per City Standards. The area within which such Frontage Improvements are to be located shall be referred to herein as Landowner's frontage. Unless specifically identified within this Agreement, Landowner shall not be entitled to reimbursement or credit towards the City's traffic mitigation fee for any required Frontage Improvements along arterial roadways, or for any residential and/or collector roadway improvements.

Except as set forth below, installation of median landscaping and median curbing shall be constructed concurrent with roadway construction. Landscaping and sidewalks adjacent to roadways may be constructed concurrent with the development of adjacent parcels. Paseo and Bike trail connections will be constructed consistent with Sections 3.12.6 and 3.12.7, respectively, of this Agreement.

3.5.2 Arterial Roadways. Landowner shall grant easements and dedicate all IODs for all arterial roadways as set forth in Sections 3.2 and 3.3.1 above. Arterial roadways wholly within and adjacent to the Project are Westbrook Boulevard, and Roads B and D east of Westbrook Boulevard. City and Landowner acknowledge that the locations of these roadways are schematic in nature and may be revised during the design of the improvement plans based on the final design for such arterials and the final small lot subdivision for the Property. The number of lanes and width of pavement shall be as required within the Specific Plan. The phasing and improvements required for each arterial are shown on Exhibit "H" and described in the Phasing Plan, Exhibit "G". Arterial roadway improvements in excess of required Landowner's Frontage Improvements constructed by Landowner pursuant to this Section 3.5.2 shall be subject to a funding, construction and acquisition agreement (the "Funding, Construction and Acquisition Agreement") between Landowner and City. City shall establish a traffic mitigation fee set-aside fund dedicated to CIP improvements within the Project that are in excess of required Frontage Improvements by withholding 25% (the "TMF Set-Aside Fund") of City traffic mitigation fee ("TMF" or "City TMF Fund") revenues paid by Landowner, provided, however, that if Landowner constructs CIP improvements that are the obligation of the CSP, the TMF Set-Aside Fund percentage for the Project out of the City TMF Fund shall be 50 percent (50%). Payments to Landowner for CIP improvements shall be on a first completed, first paid basis and shall be distributed

from the TMF Set-Aside Fund as improvements are constructed and invoiced pursuant to the Funding, Construction and Acquisition Agreement.

Within thirty (30) days of City acceptance of improvement plans, City and Landowner shall enter into a Funding, Construction and Acquisition Agreement to provide for periodic progress payments to Landowner, based upon invoices for actual work constructed, for stages of the arterial roadway improvements described in this Section 3.5.2 that have been signed off by City inspectors.

Landowner's specific construction obligations for the above referenced arterial roadways, where applicable to Landowner, are as follows:

(a) Roads B and D. Roads B and D are planned as 4-lane arterials east of Westbrook Boulevard. Landowner shall construct the Frontage Improvements, as defined in Section 3.5.1, as well as the adjacent inside lane, i.e., the CIP Improvements, for both sides of Roads B and D east of Westbrook Boulevard to the eastern Plan Area boundary, pursuant to the Phasing Plan set forth in Exhibit "G".

City shall pay Landowner out of the TMF Set-Aside Fund for the cost of the additional inside lane pursuant to the terms of the Funding, Construction and Acquisition Agreement, but if insufficient funds are available for such payment, City shall make payment to the extent funds are available, then provide 25% credits (50% if Landowner constructs CIP improvements that are the obligation of the CSP) against the TMF applied to the building permits on Landowner's Property, for all DUEs on Landowner's Property, up to the amount of the payments due to Landowner, provided, however, that once sufficient TMF Set-Aside Fund revenues are available to pay for such improvements, City shall pay Landowner such amount, less the amount of any payments and credits previously extended to Landowner against the TMF applied to DUEs on Landowner's Property.

(b) Westbrook Boulevard. Westbrook Boulevard is planned as a 6-lane arterial roadway. Landowner shall construct both outside Frontage Improvements to form a continuous roadway from south to north and shall include the full grading of the ultimate roadway section and the construction of a 4-lane road section of the ultimate 6-lane roadway, including specified landscape median (8 feet south of Road A and 14 feet north of Road A), as defined in Section 3.5.1, which 4-lane section includes the frontage improvements as well as the adjacent inside lane, i.e., the CIP Improvements, on each side of Westbrook Boulevard.

City shall pay Landowner out of the TMF Set-Aside Fund for the cost of the additional two inside lanes pursuant to the terms of the Funding, Construction and Acquisition Agreement, but if insufficient funds are available for such payment, City shall make payment to the extent funds are available, then provide 25% credits against

the TMF (50% if Landowner constructs CIP improvements that are the obligation of the CSP) applied to building permits on Landowner's Property, for all DUEs on Landowner's Property, up to the amount of the payments due to Landowner, provided, however, that once sufficient TMF Set-Aside Fund revenues are available to pay for such improvements, City shall pay Landowner such amount, less the amount of any payments and credits previously extended to Landowner against the TMF applied to DUEs on Landowner's Property.

Westbrook Boulevard Frontage Improvements shall be constructed in phases consistent with the Phasing Plan set forth in Exhibit "G". Each phase of such Westbrook Boulevard Frontage Improvements shall be triggered upon on-site development of the specific parcels adjacent to the roadway and shall include the full grading of the ultimate roadway section and the construction of a 4-lane road section of the ultimate 6-lane roadway, including specified landscape median (8 feet south of Road A and 14 feet north of Road A), and frontage improvements on both sides. Limits of construction phases of Westbrook Boulevard shall be determined by the City Engineer at such time as Landowner submits sub-phasing plans as provided for in Section 3.3.

In the event that development of the ARSP precedes the extension of Westbrook Boulevard through the Creekview Specific Plan ("CSP") by the CSP landowners, Landowner shall assume the obligation to extend Westbrook Boulevard through the CSP and into the Plan Area. Within thirty (30) days of City acceptance of Landowner's improvement plans for Westbrook Boulevard, including the portion of Westbrook Boulevard through the CSP, City and Landowner shall enter into a Funding, Construction and Acquisition Agreement to provide for periodic progress payments to Landowner for the CIP portion of Westbrook Boulevard, based upon invoices for actual work constructed, for stages of Westbrook Boulevard that have been signed off by City inspectors. All City reimbursements to Landowner for the CIP portion of Westbrook Boulevard shall be from funds from the TMF Set-Aside Fund. All frontage improvements for that portion of Westbrook Boulevard through the CSP that Landowner constructs shall be reimbursed to Landowner by the CSP at such time when construction of the improvements would have been required had the improvement not been so advanced by Landowner. Reimbursement shall be adjusted annually by the CCI from the date the reimbursable costs were incurred by Landowner to the date of reimbursement, as provided in Section 3.26 of the CSP Development Agreement.

3.5.3 West Sunset Boulevard. Landowner shall have the obligation to construct improvements to West Sunset Boulevard in unincorporated Placer County immediately north of the Annexation Area (the "West Sunset Improvements") to a Rural Secondary Roadway standard pursuant to Placer County standards in effect as of the Effective Date of the Agreement. The West Sunset Improvements shall be constructed as initial improvements and ultimate improvements, as set forth in Exhibits

"H-3-A, -B, and -C" hereto. Initially, the West Sunset Improvements shall consist of an all weather fire access road (emergency vehicle access only) along the future alignment of Westbrook Boulevard from West Sunset Boulevard south to where initial Westbrook Boulevard improvements in the Project have been constructed, including a gate and fencing to restrict public access to the satisfaction of the City Engineer. As set forth in the Phasing Plan in Exhibit "G", the ultimate West Sunset Improvements shall be constructed by Landowner at the time of commencement of construction of Phase 3 of the Project. The West Sunset Improvements shall consist of two 12-foot travel lanes, two 4-foot shoulders, a new 8-foot wide drainage ditch on the south side of roadway, and necessary turn lanes, as shown in Exhibit "H-3-A, -B, and -C", along with a 5-foot sidewalk within a 25-foot landscape corridor along the southern edge of West Sunset Boulevard adjacent to the Property and within the new City boundary to be created by annexation. There shall be no requirement for street lighting along West Sunset Boulevard, and the only electrical facilities along West Sunset Boulevard required of the Project shall be electrical facilities to serve the traffic signal to be constructed at the intersection of Westbrook Boulevard and West Sunset Boulevard, as well as the electrical facilities to serve the landscaping to be constructed by Landowner as part of the West Sunset Improvements. In order for Landowner to construct such West Sunset Improvements, Placer County shall need to abandon a portion of its existing right-of-way on the southern portion of West Sunset Boulevard along the entire northern border of the Project (as shown in Exhibit "H-3-A"). The annexation of the ARSP shall extend north to a point south of the West Sunset Improvements, including land that the County needs to abandon as herein described, as shown in Exhibit "H-3-A". Landowner and City shall work together with Placer County to convey all existing interests in the LSE/PUE within the annexed area to City or to Landowner, who shall in turn offer the dedication of the landscaped corridor as RoW to City.

Should Placer County, or the City and Placer County jointly, develop a fee program that includes the West Sunset Improvements or any portion thereof, which fee program requires payment of traffic impact fees to fund the West Sunset Improvements at the time of issuance of building permits in the Project, Brookfield Sunset, LLC shall be entitled to reimbursement for the cost of the West Sunset Improvements that Brookfield Sunset, LLC or its assignee(s) has constructed pursuant to this Agreement, with reimbursement from such traffic fees collected in the above referenced fee program from the issuance of building permits in the Project or paid by third parties. Such reimbursement shall be personal to Brookfield Sunset, LLC, and does not run with the Property to successors and assigns, unless Brookfield Sunset, LLC provides written notice to Placer County or to City and Placer County, as the case may be, that said reimbursements have been assigned by Brookfield Sunset, LLC to a third party.

3.5.4 Timing of Dedication and Security for Road Improvements.

3.5.4.1 Rights-of-way for the arterial roadways and the NAPOTS

Area shall be dedicated as an IOD to the City as set forth in Sections 3.2 and 3.3.1, and with the recordation of the first Large Lot Map. All other dedications of roadways to the City shall be made with subsequent final small lot subdivision maps and City acceptance of completed improvements.

3.5.4.2 Prior to the recordation of a small lot residential subdivision map for the Property, Landowner shall provide adequate assurances to City, either in the form of subdivision improvement bonds, issuance and sale of bonds by the CFD or other manner acceptable to the City, that adequate funds are available to finance the completion of all improvements to arterial roadways and the single collector street in the Project to serve the portion of the Property which is the subject of the small lot residential subdivision map; provided, however, Landowner shall not be required to post security for the portion of the work associated with Road CIP improvements.

3.5.5 Road Improvement Standards. All improvements to be installed by Landowner shall comply with the City's development standards for public streets in effect as of the date of improvement plan approval unless modifications are otherwise mutually agreed to by Landowner and the City Engineer. The rights-of-way required for such road improvements shall be as set forth in the Specific Plan, or, if not shown in the Specific Plan, then as set forth in the City's Improvement Standards.

3.5.6 Landscape Setbacks. For the roadways within and/or adjacent to the Property, Landowner shall establish the applicable landscape setbacks provided therefore by the Specific Plan and/or Design Guidelines. Such setbacks shall be measured generally from back of curb, except bus turnouts, right turn auxiliary lanes, turn flares, decel lanes, and turn lane tapers may encroach into the landscape setback to the extent permitted by the Specific Plan Design Guidelines. Such landscape setbacks shall be limited to landscaping, streetlights, utilities, sidewalks, traffic control equipment (signs and traffic signals), walls and related uses, and shall be included in the road rights-of-way, adjacent to LDR and MDR parcels. Such setbacks shall not be included within rights-of-way adjacent to High Density Residential and nonresidential uses as set forth in the Specific Plan.

3.5.6.1 Separated Sidewalks. Landowner shall ensure that if a residential property is improved with separated sidewalks, the residential property shall be subject to recorded CC&R's containing a requirement that the owner of a residential unit immediately adjacent to a separated sidewalk is responsible for the maintenance of all landscaping (consistent with City's Water Efficient Landscape Ordinance) within the landscape planter, including, street trees (to be trimmed per City standards) located between the separated sidewalk and curb, except where a Homeowners Association maintains the landscaping within the landscape planter. Individual homeowners shall be notified by any such applicable Homeowners Association of a restriction against replacing landscaping with hard surface

improvements within the above referenced landscape planter.

3.5.7 Traffic Signals. Landowner shall be responsible for the costs of construction of traffic signals as shown on Exhibit "I" and described in the Phasing Plan through the payment of the TMF. Landowner shall construct the traffic signals set forth in Exhibit "I", for which City shall make progress payments to Landowner for the cost of construction of such traffic signals from the City's TMF Set-Aside Fund, as defined in Section 3.5.2 above. At a minimum, and in the case where full signal improvements are not warranted at the time of construction by Landowner, then, at the discretion of the City Engineer, Landowner shall install underground conduit, loops, and poles for those signals, subject to the progress payment and credit provisions set forth in this Section 3.5.7. For those traffic signals to be completed at a later date, City shall be responsible to install mast arms, signals and signal controllers when they are needed. If TMF Set-Aside Fund revenues are not available to fully pay Landowner for any traffic signal improvements constructed by Landowner under this Section 3.5.7, City shall provide 25% credits (50% if Landowner constructs CIP improvements that are the obligation of the CSP) to Landowner against the TMF applied to building permits on Landowner's Property, up to the amount of the reimbursement then un-reimbursed by City to Landowner, provided, however, then once sufficient City revenues are available to fully pay Landowner, City shall so pay Landowner, less the amount of any credits previously extended to Landowner against the TMF applied to DUEs on Landowner's Property. Landowner shall be entitled to reimbursements and/or credits toward the appropriate City traffic mitigation fee for the design and construction of public traffic signals and/or signals warranted by City that are constructed in their ultimate location. Landowner shall not be entitled to any reimbursements or traffic mitigation fee credits for any portion of a traffic signal that serves a private driveway, unless the driveway is the fourth leg of a warranted three legged signal that serves public rights-of-way on three legs, at which time the public legs would be available for reimbursement from the TMF Set-Aside Fund.

3.5.8 Update of City Fee. Landowner acknowledges that as a result of approval of the Project, the City will need to update the Capital Improvement Program and Traffic Mitigation Fee to include the Project. Landowner and City shall use their best efforts to cause such update to be completed within twelve (12) months of the Effective Date hereof. Until such update has been completed and approved by the City, Landowner agrees to pay the fee rate then currently charged to the Creekview Specific Plan Area. To the extent that the Traffic Mitigation Fee adopted for the Project is higher than that charged in the Creekview Specific Plan Area, Landowner shall pay the difference as a surcharge to future Traffic Mitigation Fee obligations on a per-DUE basis for the remaining DUE's within the Project. To the extent that the Traffic Mitigation Fee adopted for the Property is lower than that charged in the Creekview Specific Plan Area, Landowner shall receive a credit against future Traffic Mitigation Fee payments until such time as the amount of the overpayment is exhausted.

3.5.9 Highway 65 Joint Powers Authority. Landowner agrees that the Property shall be subject to and shall pay the Highway 65 Joint Powers Authority Fee ("Highway 65 JPA Fee"). City shall initiate and complete the actions necessary to amend the Highway 65 JPA Fee to include the Property and Landowner hereby consents to and waives any objection to such inclusion.

Landowner agrees that until such time as the Highway 65 JPA Fee is amended to include the Property, Landowner shall pay the fee applicable to the Creekview Specific Plan Area ("Interim Highway 65 JPA Fee") in the amounts and at the times specified by the Highway 65 JPA Fee program. If Landowner pays the Interim Highway 65 JPA Fee and the Interim Highway 65 JPA Fee exceeds the Highway 65 JPA Fee as amended, then the excess amount collected shall be applied as a credit towards Highway 65 JPA Fees on a per DUE basis for the remaining DUE's within the Specific Plan. If the Interim Highway 65 JPA Fee is less than the amended Highway 65 JPA Fee, the total amount of the shortfall shall be added as a surcharge to such future Highway 65 JPA Fee on a per DUE basis.

Nothing in this Section shall be construed as an agreement to an allocation of assessment or benefit to a particular parcel or parcels or to constitute a waiver of the right of Landowner to protest an allocation of a particular assessment burden or benefit associated with the updates of the foregoing fee programs.

3.5.10 South Placer Regional Traffic Fee. Landowner agrees that the Property shall be subject to and pay the South Placer Regional Traffic ("SPRTA") Fee as established by the Placer County Transportation and Planning Agency ("PCTPA") and adopted by the City. City shall initiate and complete the actions necessary to amend the SPRTA Fee to include the Property and Landowner hereby consents to such inclusion.

Landowner agrees that until such time as the SPRTA Fee is amended to include the Property, the fee applicable to the Creekview Specific Plan Area shall apply to the Property and Landowner shall pay such fees ("Interim SPRTA Fee") in the amounts and at the times specified by the SPRTA Fee program. If Landowner pays the Interim SPRTA Fee and the Interim SPRTA Fee exceeds the SPRTA Fee as amended, then the excess amount collected shall be applied as a credit towards SPRTA Fees on a per DUE basis for the remaining DUE's within the Property. If the Interim SPRTA Fee is less than the amended SPRTA Fee, the total amount of the shortfall shall be added as a surcharge to such future SPRTA Fees on a per DUE basis.

Nothing in this Section shall be construed as an agreement to an allocation of assessment or benefit to a particular parcel or parcels or to constitute a waiver of the right of Landowner to protest an allocation of a particular assessment burden or benefit associated with the updates of the foregoing fee programs.

3.5.11 Tier II Traffic Fee. The SPRTA Tier II Fees are administered by the Placer County Transportation Planning Agency ("PCTPA"). Landowner acknowledges and agrees to pay the Tier II Traffic Fee, collected to pay for construction of the Placer Parkway and improvements to the I-80/SR65 interchange. The Tier II Traffic Fee program participants include the jurisdictions of Placer County, and the Cities of Roseville, Rocklin, and Lincoln. The current Tier II Traffic Fee is \$6,332.96 per DUE and will be allocated to the various land uses using a methodology approved by the SPRTA Board. The Tier II Fees shall be adjusted for inflation annually based on the Construction Cost Index ("CCI") shown in the Engineering and News Record in May of each year and based on the average of the 20 Cities average and San Francisco average. Upon approval by the SPRTA Board, SPRTA Tier II Traffic Fees to be paid by the Project shall be subject to a credit per DUE for costs advanced by Landowner applicable to future resource agency permitting for the future alignment of the segment of Placer Parkway within the Project boundaries, as well for any land acquisition component of the SPRTA Tier II Traffic Fee that applies to that segment of Placer Parkway that lies within the Project.

3.5.12 Transit Master Plan Funding. Landowner shall pay, as its fair share on a City-Wide basis, for the update of the City's Long Range Transit Master Plan, Short Range Transit Plan Update, and Bicycle Master Plan Update, the amounts of \$4,166, \$4,998, and \$4,166, respectively, prior to the recordation of any Large Lot Final Map on the Property. Landowner's pro-rata share, based on 148.7.7 acres as the numerator and 674.4 acres as the denominator is 22.05% of \$13,330, or a total of \$2,939.

3.5.13 City-County Fee. Landowner acknowledges that City and Placer County have adopted a funding mechanism (the "City-County Traffic Mitigation Fee") for improving certain roads in the City and County, including Baseline Road and Walegra Road. Landowner agrees that the Property shall be subject to and pay the City-County Traffic Mitigation Fee. Until such time as an update of the City-County Traffic Mitigation Fee has been completed to include the Property, Landowner agrees to pay the fee rate then currently charged in the CSP.

3.5.14 Santucci Boulevard and Vista Grande Boulevard Extension and Traffic Mitigation Fee. If and when the City and County of Placer develop fee programs to mitigate regional traffic concerns, Landowner consents to and agrees that any then-undeveloped portion of the Property, for which no building permit has been issued, shall participate to the extent of its fair share in a City-Wide funding mechanism. Such regional roadway extensions and improvements shall consist only of Santucci Boulevard between the Regional University Specific Plan and the future Placer Parkway and Vista Grande Boulevard west of the Sierra Vista Specific Plan boundary to Baseline Road. At the time of the adoption, Landowner does not waive its right to protest the amount of the fee.

3.5.15 Placer County Traffic Mitigation Fee. Landowner agrees to pay to City a fee of \$215 per DUE (the "Placer County Road Impact Fee") to provide fair share funding to Placer County as full mitigation of impacts on the Placer County roadway circulation system for roadways in the adopted County Capital Improvement Program at the date of approval of this Agreement that are north of Interstate 80, west of Highway 65, and outside of County approved specific plan areas (but excluding Santucci Boulevard, the extension of Vista Grande Boulevard as provided in Section 3.5.14 above), and the West Sunset Boulevard/Fiddymont Road intersection. The Placer County Road Impact Fee shall be adjusted annually after the completion of annexation proceedings for the Specific Plan by the percentage of change in the CCI.

3.5.16 Fee Credits/Reimbursement for Construction of CIP Improvements. Landowner shall be entitled to credits against the City traffic mitigation fees for the cost of constructing roadway improvements that are included in City's roadway capital improvement program ("Roadway CIP") and identified in this Agreement, as more fully set forth in Sections 3.5.1 and 3.5.2 above and Section 4.2 below.

3.5.17 Transportation Systems Management. Landowner shall comply with the City's Transportation Systems Management Ordinance.

3.5.18 Alternative Transportation Marketing. Landowner shall provide educational and marketing materials for alternative modes of transportation (e.g. Roseville Transit Services Guide, Bikeways Map and carpool/vanpool information) to each new homeowner and the first resident of each attached housing unit.

3.5.19 Park and Ride Lot. Twenty-five (25) park and ride spaces shall be provided on Parcel AR-53, as shown in Exhibit "H". Such park and ride spaces shall be included in addition to the parking required for the applicable underlying land use by the City's Zoning Code. Landowner shall install the park and ride spaces at the time of development of the parcel on which the park and ride lot is located. The park and ride lot shall be located proximate to a bus stop location. Park and ride spaces shall allow for exclusive daily weekday parking between the hours of 5:00am and 8:00pm.

3.6 Sewer Facilities. Landowner shall construct on-site sewer facilities as described in this Section, the Phasing Plan, and as shown in Exhibits "J-1" and "J-2", attached hereto. In the event that the WRSP and/or CSP has not constructed sewer facilities necessary to serve the Property, Landowner shall construct the necessary off-site sewer facilities and obtain reimbursement from the WRSP and/or CSP in accordance with Section 4.2.2 herein. Landowner shall, subject to the provisions of Section 2.8 of this Agreement, be solely responsible for obtaining easements and rights-of-way that are required for construction of such improvements. City shall provide

Landowner with any rights-of-entry needed to connect these improvements to the City's existing sewer system. Except for the improvements expressly described herein and as shown on Exhibits "J-1" and "J-2", Landowner shall have no obligations to install or pay for the installation of any off site treatment facilities, except through the payment of sewer connection fees (local, regional and special benefit) levied and collected by the City at the time of development pursuant to City ordinances.

3.6.1 Lift Station Sites. Landowner shall, at its expense, design and construct two sewer lift stations (Parcels AR-56 and AR-57). Landowner shall be responsible for installation of all frontage improvements to Parcels AR-56 and AR-57, including storm drainage, water, wastewater, electric and communication fiber conduit per City standards. Construction of such sewer lift stations shall be consistent with Exhibits "J-1" and "J-2" attached hereto and Figures 9 and 10 of the Sanitary Sewer Master Plan. As disclosure to subsequent purchasers, Landowner shall install signage at both future lift station sites describing the facilities to be constructed on the particular lift station site. Signs shall be provided pursuant to City specifications. The Environmental Utilities Director shall review and approve the signs prior to their installation.

3.6.2 Master Wastewater Plan. Landowner shall construct wastewater conveyance facilities to connect the Project to the Pleasant Grove Wastewater Treatment Plant ("Treatment Plant"). Construction of such facilities shall be consistent with Exhibits "J-1" and "J-2".

Where wastewater conveyance facilities are to be located within roadways, such facilities shall be installed concurrent with the construction of the corresponding road improvements, if not earlier. All weather maintenance access roads shall be provided to provide a single point of access to all manholes that are not located within roadways, to be determined by the Environmental Utilities Director.

3.6.3 Improvement Standards. All sanitary sewer facilities shall be designed and constructed pursuant to City's then current Improvement Standards and shall be subject to City plan review, construction inspection and final approval. Landowner shall pay then current plan check, mapping and inspection costs as incurred by City for review, mapping and inspection of such improvements.

3.6.4 Access to Manholes. Manholes shall be located so that they are accessible by City sewer maintenance vehicles unless otherwise approved by the Environmental Utilities Director. All manholes shall be made watertight during construction. Landowner shall maintain access for City sewer maintenance vehicles to access all selected manholes in the Project, as determined by the Environmental Utilities Director. Where feasible, maintenance roads shall be combined with bikeways.

3.6.5 Public Utility Easements. Where wastewater improvements to be constructed by Landowner are not located within road rights-of-way, as and when Landowner installs such wastewater improvements, Landowner shall grant and City shall accept a non-exclusive public utility easement for the ownership and maintenance of such lines, together with access thereto for maintenance purposes. Easement widths shall be granted in accordance with the City's Improvement Standards.

3.6.6 Wastewater Facilities for Reimbursement. Subject to the provisions of Section 4.2 of this Agreement, Landowner shall be entitled to reimbursement from third parties whose property is benefited by Landowner's construction of wastewater facilities required by City in which there exists capacity in excess of that required to serve the development of the Property (excluding any operational adjustments by City). Such reimbursement shall be pro rata, based on the respective capacity requirements (i.e., flow in the pipes) of the Property and other property benefited by such construction. Specific wastewater facilities subject to reimbursement pursuant to this Section 3.6.6 and Section 4.2 of this Agreement are shown in Exhibits "K-1" and "K-2" and listed in Exhibit "BB". For properties outside of the Plan Area, Landowner shall submit documentation to the City to justify the requested reimbursement.

The timing for the payment of any such reimbursement by such third party/benefiting landowner to Landowner shall be upon the earlier the formation of a CFD and issuance of bonds for such CFD serving development by such third parties or, recordation of the first large lot subdivision map serving the development by such third party.

3.6.7 Wastewater Service Area Boundary. Landowner shall be responsible for its pro rata share, based on acreage (148.7 acres out of 674.4 acres in the ARSP), of all costs associated with obtaining approval from the South Placer Wastewater Authority (SPWA) for expansion of the existing wastewater service area boundary to include the Plan Area.

3.7 Water Supply.

3.7.1 Placer County Water Agency Supply. City is negotiating with the Placer County Water Agency (PCWA) to acquire an additional treated surface water supply from PCWA via a wholesale water agreement, inclusive of 1,067 acre feet per year ("AFY") to serve the Project. Water obtained from PCWA by City through the wholesale agreement would be delivered to the City through PCWA's Tinker Road Pump Station and Reservoir located in the Sunset Industrial Area of unincorporated Placer County (the "Tinker Road Facility"), and then transported through the City's water infrastructure to the Project site. In the interim period before the PCWA infrastructure is in place to provide water to the Project, the Project will be supplied using existing City supplies and water treatment capacity. Additional infrastructure,

including the Ophir Water Treatment Plant and improvements at the Tinker Road Facility, as described below, are needed to provide the PCWA treated surface water to the Project. As set forth in the EIR, prior to the approval of any building permits in the Project, Landowner shall pay its proportionate share of required funding to City for the acquisition and delivery of treated potable water supplies to serve the Project. No building permits shall be issued for the Project until City has entered into the herein described wholesale water agreement with PCWA to acquire sufficient water supplies to serve the Project's water demands.

3.7.2 Financing of Water Supply. To provide the needed surface water supply to serve the Project, and subject to the direction of and at the time City so directs, Landowner is required to participate in the funding of certain PCWA off-site water facilities. Such facilities consist of the future PCWA Ophir Water Treatment Plant ("Ophir WTP"), associated PCWA transmission facilities necessary to wheel treated water to the Tinker Road Facility, and improvements to the PCWA Tinker Road Facility. Landowner is obligated to fund the construction of the off-site water facilities at the Tinker Road Facility such that capacity is increased by 2.7 MGD. Such off-site water facilities include but may not be limited to the following: (i) approximately 800 feet of 24 inch diameter pipe; (ii) a new 2.7 MGD firm capacity booster pump station; and (iii) either a new pipeline connection into the existing fluoride feeder station, or a new fluoride feeder station inside a new pump building. To the extent that the improvements to the Tinker Road Facility constructed by Landowner provide capacity or enhance water supply reliability benefitting third parties, Landowner shall be entitled to reimbursement from such third parties to the extent that they benefit from Landowner's constructed improvements to the Tinker Road Facility. In addition to the improvements required at the PCWA Tinker Road Facility as set forth herein, Landowner agrees that no building permits shall be issued for the Project until such time as City and Landowner agree to a funding source for the PCWA water supply. The funding source for the PCWA water supply may consist of one, or any combination, of the following, without the need to amend this Agreement: (i) a water connection fee representing the required PCWA infrastructure; (ii) CFD proceeds that have been allocated for the Project's water supply; or (iii) any other funding source or strategy mutually agreed to in writing by City and Landowner. If CFD proceeds are used to fund the PCWA water supply, such CFD proceeds shall be provided at such time and amount as jointly agreed to by City and Landowner. In addition to the PCWA water facilities described herein, Landowner shall pay for the installation of any off-site water storage, treatment, and transmission facilities benefitting the Project through the payment of water connection fees levied and collected by City, in accordance with any applicable City ordinances as may be established by City.

3.7.3 Groundwater Well. Landowner shall dedicate to City Parcel AR-55 for one (1) groundwater well at the approximate location shown on Exhibit "L". Landowner shall construct frontage improvements for Parcel AR-55, including water,

recycled water, wastewater, storm drainage, electric and communication fiber conduit. As shown in Exhibit "L", the well site shall be constructed adjacent to the 24" water line to be constructed in Road B, and be connected to that 24" water line with a 16" water line. Landowner shall install a test well in a location mutually agreed upon by Landowner and City to determine if the well location utilized meets desired capacity and water quality. If the desired capacity and water quality are confirmed in the test well, Landowner shall be responsible for drilling and completing the production well (but not above ground well improvements such as pumping and treatment facilities) as further described below. City shall be responsible for the construction and costs of above ground production well (topside) improvements such as pumping and treatment facilities.

It is the intent of this section (and the Parties) that the groundwater well location identified within the Project shall be capable of achieving a yield of approximately 1,800 gallons per minute, be designed for Aquifer Storage and Recovery, and the groundwater water is of such quality that only disinfection will be required to meet California Drinking Water Quality Standards. Should the City determine the available capacity or water quality does not achieve these objectives, Landowners shall, at its own cost, work with the City to relocate the well site within the Project to an alternative site mutually agreed to by City and Landowner until these objectives are satisfied.

Landowner shall contact the City Environmental Utilities Department prior to design and construction of the production well. The production well shall be in operation at the time of occupancy of the 250th residential unit in the Project. Landowner shall receive approval from the City of the well design and drilling method prior to commencement of this work. In addition, notwithstanding the foregoing, the well shall be drilled prior to the time of occupancy of any residential units within 500 feet of the well site. Landowner shall include noise curtains for the well if at the time of construction of the well homes are occupied between 500 feet and 1,000 feet of the well.

If City determines that the production well is required prior to the occupancy of the 250th residential unit in the Project, City has the right to construct the test well and the production well. Landowner shall reimburse City for the actual cost of the below ground improvements for the test well and production well, as set forth above, including annual CCI adjustments of such costs, upon occupancy of the 250th residential unit in the Project. If City constructs the test well and production well prior to the occupancy of the 250th residential unit in the Project, Landowner agrees to construct an all weather access roadway within either the Road A or Road B RoW and all associated infrastructure to serve Parcel AR-55 as specified in this Section 3.7.3 within one (1) year of notification from City if Road B has not otherwise already been constructed by Landowner.

Landowner shall, prior to the issuance of the first building permit in the Project phase where an existing well is located, destroy the well or wells in that particular Project phase from among the two existing agriculture irrigation wells and one domestic well in the Project Area. Landowner shall obtain from City a Well Permit and follow the California Well Standards for the destruction of the wells on the Property. All construction plans shall be designed pursuant to City's then current Standards and mutually agreed to by Landowner and the Environmental Utilities Director, and subject to City plan review, construction inspection and final approval. Landowner shall pay the then current plan check, mapping and inspection costs as incurred by City for review, mapping, and inspection of the destruction of the wells.

3.7.4 Water Conservation Measures. Landowner and its successors shall implement a Water Conservation Plan included as Exhibit "M" to this Agreement. The Water Conservation Plan shall include compliance with the City's then current Water Efficient Landscape Ordinance and outline all water conservation measures being implemented within the Project and measures to ensure water conservation objectives are achieved in perpetuity and shall be approved, at the discretion of, the Environmental Utilities Director prior to issuance of the first building permit. Such water conservation measures shall include, but are not limited to, Smart Timers, re-circulating hot water systems, and turf limitations, and shall be disclosed to each purchaser of real property within the Property. Modifications to the Water Conservation Plan as approved by the Environmental Utilities Director shall not require an amendment to this Agreement.

3.7.5 Periodic Confirmation of Water Conservation Goal. The City has determined, and the Landowner agrees, that the available water supply, as documented in the Water Supply Assessment for the Project, is sufficient to serve all phases of the Project. This determination was the conclusion of a review of the various technical studies completed in connection with the environmental review of the Project. The demand for water at build-out of the Project was determined by reference to the City's current information on water usage by the various land uses included and permitted within the City and the proposed land uses within the Project and by reference to the Landowner's Water Conservation Plan which includes a reduction in water use by approximately 15% over current (i.e., Effective Date of this Agreement) use characteristics.

The sources for water evaluated for the Project includes the addition of a new treated water supply from PCWA which adds to the water source currently used throughout the City; namely, surface water contracts with federal and local agencies and in drought or emergency situations the use of groundwater. City and Landowner are satisfied, based upon detailed technical analysis, that the demand and source assumptions relied upon to assure water from the Project are valid. However, the Parties have agreed to the following procedure to assure the continued validity of the underlying

assumptions and the continued availability of sufficient water to service all phases of the Project.

Upon construction of the dwelling units in the Project that cumulatively utilize 50% of the projected potable water usage at buildout of the Project, and then every three years thereafter during the term of this Agreement, at the same time as the annual review provided for in Section 5.2 of this Agreement, the Parties shall review the underlying assumptions regarding water demands, the achievement of project water conservation goals and sources of water for the Project, all as set forth in the EIR. Water conserved by Landowner pursuant to measures implemented under Section 3.7.4 of this Agreement shall be factored into the review provided hereunder to the benefit of Landowner. If the City determines that the actual demand and sources differ materially from the assumptions in the EIR and that the difference(s) will negatively affect the City's ability to provide water for the Project, then the Parties shall meet and in good faith attempt to implement whatever measures are needed to assure the water supply will meet the Project's demands, provided, however, that should City adopt City-Wide a requirement for a reduction in water use by more than the approximately 15% over current potable water usage as set forth herein, and the then built portion of the Project has met its approximately 15% objective set forth in this Section 3.7.5, the residential units for which building permits have not yet been issued shall be required to implement such measures necessary to achieve such City-Wide requirement, above the approximately 15% objective set forth in this Section 3.7.5. Development and implementation of such measures shall be at Landowner's cost. The foregoing notwithstanding, should City achieve its adopted City-Wide water conservation goals, the Project shall not under any circumstances be deemed out of compliance with its Water Conservation Plan water conservation objective as set forth herein.

3.8 Water System Improvements.

3.8.1 Water Study. Landowner has prepared a Water Study for its on-site water facilities and prepared a general design of the water system as shown on Exhibit "N" that identifies the size and location of waterlines, storage facilities, and pump stations. The timing of construction of such facilities is set forth in the Infrastructure Phasing "Exhibit "BB".

3.8.2 Water Facilities. Landowner shall construct on-site water system facilities as shown on Exhibit "N". In the event that the CSP has not constructed water lines necessary to serve the Project, and it can be demonstrated through the City hydraulic model that the water lines within the CSP are needed to supply water to the Project consistent with City standards, Landowner shall construct the necessary water lines and obtain reimbursement from the CSP in accordance with Section 4.2.2 herein. All such facilities to be constructed by Landowner, including mains, shall be designed and constructed pursuant to City's then current Improvement Standards, unless

modifications are otherwise mutually agreed to by Landowner and the Environmental Utilities Director, and subject to City plan review, construction inspection and final approval. Landowner shall pay then current plan check, mapping and inspection costs as incurred by City for review, mapping and inspection of such improvements. Other than those facilities set forth in Section 3.7.2 above, Landowner will not be responsible for the construction of potable water reservoirs, water storage tanks, topside well improvements, water treatment facilities and pump stations except through the payment of City water connection fees and special benefit fees as may be applicable or otherwise described herein.

3.8.3 Water Facilities for Reimbursement. There are water facilities to be constructed in the CSP for which Landowner has a construction obligation only if City determines the facilities are required to serve the Project, and if Landowner is not obligated to construct, or CSP landowners or other third parties have constructed the facilities, Landowner is obligated to pay its pro-rata share of the costs of such water facilities, as provided in this Section 3.8.3. There are other water facilities which either Landowner or other third party landowners may construct, the costs of which construction are subject to reimbursement to the constructing party, as set forth in Section 3.26 below (where reimbursement is by Landowner to constructing third parties), or in Section 4.2 below (where reimbursement is from third parties to Landowner). Finally, there are water facilities to be constructed by Landowner which the City may in the future determine are eligible for reimbursement from third parties currently outside the City (but excluding the Urban Reserve, which will not be served by water facilities constructed as part of ARSP infrastructure). Reimbursement for water facilities under this Agreement shall be pro-rata, based on the respective capacity requirements of the Property and other property benefited by the construction. Specific water facilities subject to reimbursement pursuant to this Section 3.8.3 and Section 3.26 and Section 4.2 of this Agreement are shown in Exhibits "O-1", "O-2", and "O-3" and listed in Exhibit "BB". Exhibit "O-2" sets forth reimbursements for infrastructure between Landowner and parties within the CSP assuming no other third parties benefit. Exhibit "O-3" sets forth reimbursement for certain water lines between Landowner, the CSP, and other third parties (namely, the Placer Ranch Specific Plan ("PRSP"), should such other third parties connect to or construct identified infrastructure.

With respect to the 24 inch waterline to be installed in Westbrook Boulevard from the southern boundary of the Property and the 24 inch waterlines to be installed in Roads B and D east of Westbrook Boulevard (the "Westbrook Boulevard 24" Water Line"), the Property, and the PRSP will all benefit from the Westbrook Boulevard 24" Water Line.

If the PRSP proceeds with a City development project prior to Landowner, and City determines that the PRSP must construct water facilities in the ARSP to serve the PRSP, then the City shall require in the PRSP development agreement the obligation

to construct such water facilities needed to serve the PRSP that are located in the ARSP, with reimbursement due to the PRSP from Landowner for its pro-rata share of the costs of construction of ARSP water facilities that are constructed by the PRSP, as set forth in this Section 3.8.3.

The timing for the payment of any such reimbursement shall be upon the earlier of the formation of a CFD and issuance of bonds for such CFD serving development by such third parties or recordation of the first large lot subdivision map serving the development by such third party, as set forth in Section 3.26 or Section 4.2, depending on the reimbursing party or parties (i.e., Landowner or PRSP landowners).

3.8.4 Water System Sequencing. Water system facilities shall be constructed as provided in the Phasing Plan concurrently with the construction of the road improvements described in Section 3.5 of this Agreement, and as generally shown on Exhibit "N". Extensions into the neighborhoods will be completed with development of each neighborhood. Water line extensions shall be sequenced to assure looped systems in all developing areas, except as otherwise approved by the Environmental Utilities Director.

3.8.5 Public Utility Easements. Where the water improvements to be constructed by Landowner are not located within road rights-of-way, as and when Landowner installs such water facilities, Landowner shall grant and City shall accept a non-exclusive public utility easement the width of which shall be in accordance with City's then current Improvement Standards, for the ownership and maintenance of such lines, together with access thereto for maintenance purposes only.

3.8.6 Water Softeners. As part of its development of the Project, Landowner and its successors shall not provide water stubouts for the installation of water softeners.

3.8.7 Disclosure to Buyers. Landowner shall disclose to all residential and nonresidential buyers that the Property will be served by both surface water and groundwater supplies and that variations in the appearance, taste and color of water may be noticed from time to time and include such disclosure in the CC&Rs for the Property. The disclosure shall describe the location of groundwater wells and water storage facilities.

As further disclosure Landowner shall install signage at future water facility sites describing the facilities to be constructed on the subject site. Signs shall be provided per City specifications. The Environmental Utilities Director must review and approve sign layouts prior to installation. (See Section 3.24).

3.8.8 Water Service Area Boundary Modification. Landowner shall

reimburse City for all costs associated with modifying City's service area boundary to include the Project with the U.S. Bureau of Reclamation.

3.9 Recycled Water Facilities. Landowner shall construct recycled water system facilities as provided in this Section, the Phasing Plan, and as shown in Exhibit "P", attached hereto and made a part hereof. Recycled water shall be used for irrigation of parks and landscape setbacks, medians, paseos adjacent to collector streets and other landscape areas including all multi-family and non-residential landscaping uses. Landowner shall construct and dedicate upon completion thereof, a recycled water line system as generally shown in Exhibit "P". In the event that the CSP has not constructed recycled water facilities necessary to serve the Project, Landowner shall construct the necessary off-site recycled facilities and obtain reimbursement from the CSP in accordance with Section 4.2.2 herein.

All recycled water system facilities including transmission, distribution and public and private irrigation systems shall be designed and constructed pursuant to City's then current Improvement Standards, unless modifications are otherwise mutually agreed to by Landowner and the Environmental Utilities Director, and shall be subject to City plan review, construction, inspection and final approval and payment of all applicable fees for plan review, mapping and inspection of such improvements.

3.9.1 Non-Exclusive Public Utility Easement. Where the recycled water facilities are not located within road rights-of-way, as and when such facilities are installed, Landowner shall grant and City shall accept a non-exclusive public utility easement for the ownership and maintenance of such facilities, together with access thereto for maintenance purposes only. Easement widths shall be granted in accordance with the City's then current Improvement Standards.

3.9.2 Recycled Water Facilities for Reimbursement. Subject to the provisions of Section 4.2 of this Agreement, Landowner shall be entitled to reimbursement from third parties outside the Project whose property is benefited by Landowner's construction of recycled water facilities required by City in which there exists capacity in excess of that required to serve the development of the Property (excluding any operational adjustments by the City). Such reimbursement shall be pro rata, based on the respective capacity requirements of the Property and other property benefited by the construction. Specific recycled water facilities subject to reimbursement pursuant to this Section 3.9.2 and Section 4.2 of this Agreement are shown in Exhibits "Q-1" and "Q-2" and listed in Exhibit "BB". For properties outside of the Specific Plan, Landowner shall submit documentation to the City to justify the requested reimbursement.

The timing for the payment of any such reimbursement shall be upon the earlier of the formation of a CFD and issuance of bonds for such CFD serving

development by such third parties or recordation of the first large lot subdivision map serving the development by such third party.

Landowner shall likewise be required to contribute its pro-rata share of the cost of expansion of the WRSP recycled water tank and pump station located north of the Pleasant Grove Wastewater Treatment Plant that is required to serve the WRSP, as set forth in Sections 3.27 and 3.28 of this Agreement, and as set forth in Exhibits "Q-1" and "Q-2". Landowner's pro-rata share of the cost of expansion of the WRSP recycled water tank and pump station referenced herein, estimated at \$2.287 million, shall be paid though the CFD for the Project, with payment from the CFD not required until after the 1,000th building permit is issued in the Project.

If City institutes a recycled water connection fee, or such fee is embedded into City's water connection fee, prior to the issuance of any building permits in the Project, Landowner shall not responsible for the payment of the estimated \$2.287 million pro-rata share of the cost of the expansion of the WRSP recycled water tank and pump station except through the payment of the City recycled water connection fee, or City's water connection fee if a recycled water connection fee is embedded into City's water connection fee, or any special benefit fees as may be applicable to the Project to fund the expansion of the WRSP recycled water tank and pump station.

3.9.3 Recycled Water Engineering Report. Landowner shall prepare a Title 22 Recycled Water Engineering Report for submittal to and review by the State Regional Water Quality Control Board and State Department of Public Health documenting the use of recycled water in the Project. Prior to submittal to the State Water Quality Control Board, Landowner shall obtain approval of the City's Environmental Utilities Director. Recycled water shall not be provided for use within the Project until the Title 22 Recycled Water Engineering Report has received all required State approvals.

3.9.4 Recycled Water Use Disclosure to Buyers. Landowner shall disclose to all buyers that recycled water shall be used for irrigation of parks and landscape corridors, medians, paseos adjacent to collector streets and other landscape areas, including all multifamily and non-residential landscaping uses. Such disclosure shall be included in the CC&Rs for all residential buyers and other recorded notice instrument for all non-residential buyers.

3.9.5 Terms and Conditions for Recycled Water Operations, Use, and Service. All private commercial recycled water customers within the Project shall sign a Terms and Conditions for Recycled Water Operations, Use and Service prior to service meter installation and recycled water being introduced to the site per requirements of the City's Municipal Code at the time of connection.

3.10 Drainage Facilities. Landowner shall be responsible for the design and construction of all storm drain facilities required to serve the Property in conformance with the Project Drainage Master Plan (including open space transition areas), the then approved City Improvement Standards, City Storm Water Management Program, the MS4 Permit as issued and modified by the State and Regional Water Quality Control Board, the approved Placer County Storm Water Management Manual, the 404 Permit issued by the Army Corps, and any agency required Establishment Phase Operation and Management Plan and/or City's Preserve Area Overarching Management Plan (whichever Management Plan is in force at the time). Appropriate aspects of the Low Impact Development design, hydromodification, and the Flood Control Plan as specified in the Drainage Master Plan and in the Specific Plan will be the responsibility of each increment of development at the time of development. In general, drainage facilities shall be constructed concurrent with roadway improvements, and shall include permanent outfall structures and open space storm water treatment devices. With any phase that requires the final outfall into University Creek, such outfall shall be designed and constructed with that phase to accommodate ultimate flows from the Project. Prior to approval of any improvement plans for the construction of storm drain facilities within a drainage shed, a master drainage plan shall be prepared and approved by the City Engineer for the entire shed area or sub-area approved by the City Engineer and shall include a rough grading plan of that shed. The Master Drainage Plan for individual sheds shall include pipe sizes, grades, flows, depths of pipe, and cover over and on top of the pipe. Landowner shall provide drainage improvements as provided in this Section, the Phasing Plan and as shown in Exhibit "R", attached hereto and made a part hereof. Except for the improvements expressly described herein and as shown in Exhibit "R," Landowner shall have no obligation to install or pay for the installation of offsite drainage facilities, except through the payment of drainage fees levied and collected by the City at the time of development pursuant to City ordinances.

3.10.1 Other Agency Approval. Prior to issuance of any building permit or grading permit, Landowner shall obtain, at its expense, all permits and agreements as required by other agencies having jurisdiction over drainage, water quality or wetlands issues including, but not limited to, the Regional Water Quality Control Board ("RWQCB"), the Army Corps and the California Department of Fish and Game.

Landowner shall prepare and implement a Storm Water Pollution and Prevention Plan (SWP3), and shall construct and maintain Best Management Practices (BMPs) as required by law, the SWP3 and as approved by the City, concurrently with construction of any improvements. Landowner shall obtain a permit from the RWQCB for the General Construction Storm Water Permit Compliance Program, as required by law, prior to the start of any construction, including grading on the Property.

3.10.2 Storm Drains. Landowner shall construct storm drain mains and

laterals in accordance with the Drainage Master Plan and Phasing Plan and with the City's then current Improvement Standards and shall provide laterals to serve all parcels on the Property, including, but not limited to, park sites. Storm drain laterals shall be constructed to the property line concurrently with the construction of connecting open channels or storm drain mains. Storm drainage system designs shall include applicable Best Management Practices with the goal of preventing or reducing pollutants from entering receiving waters in accordance with the City's Storm Water Management Program and the then current MS4 permit requirements. Should grading alter the natural drainage patterns and it becomes necessary to redirect drainages across lands dedicated to the City, the Landowner shall be responsible for the installation of above ground constructed swales. Where constructed swales cross open space, the constructed swales shall be designed and installed in accordance with City's Open Space Preserve Overarching Management Plan to control and direct runoff to receiving waters as appropriate. Landowner shall be responsible for annual (or more frequent if needed) maintenance of said constructed swales until such time that the City develops the property, or City accepts the open space dedication.

3.10.3 Grant of Floodplain. Prior to or concurrent with approval of any final map containing areas within the 100-year floodplain as shown in Exhibit "S", Landowner shall grant an IOD to the City, or to a conservancy or other non-profit entity acceptable to the City, such areas within the Open Space Preserve Areas as shown in Exhibit "Y" and the land use plan for Property, set forth in Exhibit "E".

3.10.4 Drainage Easements. Where permanent drainage facilities to be owned and maintained by City are to be constructed by Landowner and are not located within road rights-of-way, as and when Landowner installs such drainage improvements, Landowner shall grant and City shall accept a non-exclusive public utility easement or temporary easement for the ownership and maintenance of such lines, together with access thereto for maintenance purposes only. The City shall not be required to accept or maintain any temporary drainage improvements. Easement widths for completed permanent drainage facilities shall be granted in accordance with the City's then current Improvement Standards. When those permanent drainage facilities not located within road rights-of-way and are to be placed on property owned by someone other than the Landowner of those facilities, the Landowner shall secure all necessary rights of entry and third party easements. All drainage outfall structures for storm drain flows leaving the Project shall be built as either temporary or permanent structures wholly on properties in the Project. The City will offer no power of eminent domain for such drainage outfall structures.

3.10.5. Drainage Improvements and Work Upon City Owned Property. The drainage channels shall be generally designed as earthen structures with side slope stabilization and longitudinal slopes that will provide positive storm water flow and minimize standing water. Maintenance vehicle access across the channel in the adjacent

open space will generally be located as shown in the Open Space Transition Plan. Access roads, access ramps, fencing and landscaping shall be constructed per City standards. Where access roads cross the channel, such access roads shall be constructed to allow small tractor loader (such as a Bobcat) to pass under the access road. The channel bottom shall support the wheel loading of maintenance equipment without compromising the integrity and/or flow line of the channel. The channels and storm water pumps for Road "G" shall be maintained by City with funds from the CFD for Public Services. City may program the use of maintenance access roads for pedestrian use.

All drainage improvement work on City property shall be at the expense of Landowner, and there shall be no reimbursements or credits for any off-site channel improvements. Prior to entry upon City property, Landowner shall secure an encroachment permit from City. All outside agency fees, permits, and mitigation for work on City property shall be the responsibility of Landowner. Material excavated from the construction of improvements within City property shall remain on City property.

Where end of pipe storm water management treatment is designed within the open channels as part of the overall storm water management plan, the design of such features shall meet the design objectives and parameters of the generally accepted storm water management design.

3.10.6. Off-Site Monitoring. City acknowledges that the existing drainage channel on City's Al Johnson Wildlife Area property is currently subject to overtopping and erosion during storm events. Landowner acknowledges and takes responsibility for erosion impacts to such City owned property that are attributable to an increase in flow onto the Al Johnson Wildlife Area property. With the design of the channel, Landowner shall produce a report and initial investigation to determine the stability of University Creek across City property. Landowner and City shall work cooperatively to develop a mutually agreed upon monitoring program to assess any future stability degradation of the channel that may result from Landowner's drainage plan and design. Remedial work that is required to maintain or restore the channel to a stable condition resulting from an increase in flows from the Project shall be the responsibility of Landowner. Landowner shall be responsible to secure any necessary permits and shall bear all costs associated with testing, monitoring, and stabilization with funds from the CFD for Public Services.

3.10.7. Annexation Into Regional Flood Control Program. City administers a Regional Flood Control Program within the Pleasant Grove/Curry Creek watershed and collects drainage fees for the future mitigation of volumetric impacts to downstream properties. Landowner acknowledges that as a result of approval of the Project, City shall need to update the Regional Flood Control Program and the Drainage

Mitigation Fee in order to annex the Plan Area into the Regional Flood Control Program benefit area. Landowner and City shall use their best efforts to cause such update to be completed within twelve (12) months of the Effective Date of the Agreement. Until such update has been completed and approved by City, Landowner agrees to pay the then current Drainage Mitigation Fee. When a new Drainage Mitigation Fee is adopted, Landowner shall pay the new Drainage Mitigation Fee for all DUEs for which building permits have not yet been issued.

3.11 Electric. Landowner shall provide electric utility improvements as provided in this Section, the Phasing Plan and as shown in Appendix "B" of the Dry Utility Plan for the Project.

3.11.1 On-Site Electric Facilities. For purposes of this section, "on-site" means within the Property. Concurrently with the construction of the adjacent roadways and as specified in Section 3.3, Landowner agrees to construct, or finance the construction of, on-site 12kV electric distribution facilities as directed by the Electric Utility Director. Landowner shall construct or finance construction of on-site 12kV electric distribution facilities in accordance with final on-site electric distribution designs for the Project as directed by the Electric Utility Director in accordance with applicable City Electric Utility Department Specifications. Design of any final electric utility improvements (off-site, on-site, in-tract), including streetlights, shall commence prior to receipt of approval of improvement plans for the applicable Project roadways. Any costs of re-design of electric improvements due to adopted improvement plans shall be borne by Landowner.

3.11.2 Off-Site Electric Facilities. For purposes of this section, "off-site" means outside of the Project. Concurrently with the construction of any phase of the Project, Landowner agrees to construct, or finance the construction of off-site 12kV electric distribution facilities as directed by the Electric Utility Director. Landowner shall construct or finance construction of off-site 12kV electric distribution facilities in accordance with final off-site electric distribution designs for the Project as directed by the Electric Utility Director in accordance with applicable City Electric Utility Department Specifications. Design of any final electric utility improvements (off-site, on-site, in-tract), including streetlights, shall commence prior to receipt of approval of improvement plans for the applicable Project roadways. Any costs of re-design of electric improvements due to adopted improvement plans shall be borne by Landowner. The City acknowledges that pending construction of final roadways the first developments may be fed by temporary facilities, if there is available electric capacity to serve the Project, subject to the approval of the design by the Electric Utility Director in accordance with applicable City Electric Utility Department Specifications. All costs associated with the design, installation, and removal of the temporary facilities will be borne by the Landowner.

3.11.3 CSP Electric Substation. Pursuant to the development agreement in the CSP, CSP landowners are required to dedicate to City, grade and provide access to a parcel in the CSP (designated Parcel C-81 in the Specific Plan) for an electric substation to serve the CSP (the "Substation Site"). Under the development agreement between CSP landowners and City, such Substation Site must be provided to City prior to issuance of the 500th residential building permit, or combination of building permits, in the CSP. Should the Substation Site not have been dedicated to City, graded with access provided at the time that Landowner wishes to proceed with development of the Project, Landowner shall have the right to cause such dedication, grading and provision of access to the Substation Site for City to construct the electric substation that will serve both the CSP and the Project. Landowner acknowledges that, in the absence of any available capacity utilizing temporary lines that could serve the Project on an interim basis, the CSP electric substation must be in operation and 12kV circuits extended to the Project for electric service to be provided to the Plan Area. In addition to the Substation Site, Landowner shall install an all-weather access road along the south side of Pleasant Grove Creek from the southeast corner of the CSP to the Westbrook Boulevard bridge crossing over Pleasant Grove Creek sufficient to allow the construction and maintenance of the 60kV overhead power line required to feed the CSP electric substation.

3.11.4 60kV Disclosure. Landowner shall include a notice in the project CC&R's and its sales documentation advising property owners adjacent to the existing 60 kV easement areas shown on Exhibit "U" and the future 60kV easement line on the east side of Westbrook Boulevard and the southern Project boundary along Road A that the City may utilize the public utility easements to construct 60kV overhead electric lines.

3.11.5 Streetlights. Concurrent with the construction of the adjacent roadways, Landowner agrees to construct, or finance construction of, streetlights within the Property, as directed by the Electric Utility Director. Except as may otherwise be permitted by the Electric Utility Director, no street shall be accepted by the City unless and until streetlights have been installed in accordance with the Specific Plan and applicable requirements of the Electric Department. Streetlights shall meet Roseville Electric's specifications for residential and/or commercial construction in effect at the time the construction improvement plans are approved and issued by the City.

3.11.6 Electric Efficiency and Demand Reduction. In order to mitigate demand for energy supplies and comply with state mandated energy efficiency goals, the following energy efficiency and load management requirements are hereby established:

1. All residential dwelling units will install residential air conditioning units with the following sets of parameters, as a minimum standard:
 - a. A Seasonal Energy Efficiency Rating (“SEER”) of 2 points above the minimum, as defined by the State of California in the current Title 24 of the Code of California Regulations, up to a total maximum of 18 points including the 2 point premium, an Energy Efficiency Ratio (“EER”) of 12.5 or greater. The SEER rating of 2 points above the minimum, as defined by the current Title 24, up to a maximum of 18 points, and an EER rating of 12.5 or greater will be specified on building plans and Title 24 compliance certificates at the time building permits are requested. If Title 24 of the Code of California Regulations in effect at the time of request for building permits requires higher SEER or EER ratings, residential units in the Plan Area shall comply with such State requirements. The SEER and EER ratings will be verified with appropriate documentation. These requirements shall be utilized in the overall energy compliance calculations required for issuance of a building permit for any residential unit. Any variances must be approved by the Electric Department’s Retail Energy Services Department.
2. All commercial air conditioning units 5 tons or less (<65,000 btu/h) shall meet the current Consortium for Energy Efficiency (“CEE”) Tier I specifications. The SEER/EER ratings will be specified on building plans and Title 24 compliance certificates at the time building permits are requested. The SEER and EER ratings will be verified with appropriate documentation. These requirements shall be utilized in the overall energy compliance calculations required for issuance of any building permit for any commercial building in the Plan Area. Any variances, with the exception of Tier 2 compliance, must be approved by Roseville Electric Utility.
3. Every garage of each Low Density Residential and Medium Density Residential unit must be considered “electric vehicle ready”, which includes, but is not limited to, a ¾” conduit raceway to a spare electric box in the garage that is sized for a future 40-amp, 220-volt outlet. A 40-amp, 220-volt breaker space shall be made available at the residential unit’s electrical panel.

3.12 Parks, Open Space, and Bike Trails. Landowner shall dedicate to City a total of 22.1 acres of active park land and 134.8 acres of open space lands, and 10.7 acres

of paseos, pay fees for construction of park improvements, trail improvements, construct park frontage improvements as set forth in this Section and the Phasing Plan and as shown in Exhibit "V", and install communication conduit to each park site per City standards.

Landowner shall not construct any private single access gates or private access from single homeowner's property onto public spaces, such as parks, preserves, and paseos. Additionally, Landowner shall place the foregoing restriction as applicable to homeowners in the CC&R's for any single family residential subdivision.

3.12.1 Park and Open Space Dedications. Landowner shall dedicate to City a total of 22.14 acres of active neighborhood parkland, and 134.8 acres of open space. The following seven park parcels, and twenty-eight open space parcels shall be dedicated to City as described below and shown in Exhibit "V":

1. A 1.28-acre, more or less, portion of the Property for the purposes of a public park, shown as Parcel AR-60;
2. A 1.87-acre, more or less, portion of the Property for the purpose of a public park, shown as Parcel AR-61;
3. A 10.11-acre, more or less, portion of the Property for the purpose of a public park, shown as Parcel AR-62;
4. A 1.72 acre, more or less, portion of the Property for the purpose of a public park, shown as Parcel AR-63;
5. A 2.12 acre, more or less, portion of the Property for the purpose of a public park, shown as Parcel AR-64;
6. A 3.04 acre, more or less, portion of the Property for the purpose of a public park, shown as Parcel AR-66;
7. A 2.00 acre, more or less, portion of the Property for the purpose of a public park, shown as Parcel AR-67;
8. A 0.58 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-70;
9. A 0.32 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-71;
10. A 0.98 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-72;

11. A 0.98 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-73;
12. A 0.60 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-74;
13. A 0.76 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-75;
14. A 0.36 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-76;
15. A 0.85 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-77;
16. A 0.46 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-78;
17. A 0.39 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-79;
18. A 1.10 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-80;
19. A 1.15 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-81;
20. A 3.81 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-90;
21. A 4.15 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-91;
22. A 28.67 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-92;
23. A 5.99 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-93;
24. A 2.30 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-94;

25. A 2.73 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-95;
26. A 7.72 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-96;
27. A 40.08 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-97;
28. A 7.88 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-98;
29. A 0.49 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-99;
30. A 1.22 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-100;
31. A 0.95 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-101;
32. A 0.65 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-102;
33. A 0.65 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-103;
34. A 0.88 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-104; and
35. A 28.82 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-105.

Landowner shall dedicate any park lands and Open Space Parcels as an IOD on the Large Lot Final Map. The Large Lot Final Map (which can be recorded in phases under Section 3.3.1 above) shall create separate parcels for those park and Open Space lands in the portion of the Property covered by the particular Large Lot Final Map. City shall accept such dedication of any park land Parcels in a particular phase of the Project at the time when all infrastructure improvements (e.g., curb and gutter, roadway, utilities, utility stubs, bike trail grading, parcel grading, etc.) adjacent to the parcels being dedicated, i.e., frontage along the parcel, are substantially complete, and the Public Services CFD formed under Section 3.19.1 below is generating a minimum of

\$1,000 for each acre of park land being accepted by City.

Dedication of Open Space and Preserve parcels shall be in accordance with Section 3.12.9.1 and the City's Open Space Preserve Overarching Management Plan and any 404 Permit conditions.

In the event the Landowner uses any of the above mentioned parcels for temporary construction activity or staging (e.g., detention basins, rock crushing operations, dirt/debris stockpiling, etc.), Landowner shall, prior to acceptance by City, restore the site to a rough graded condition in accordance with an approved grading and drainage plan such that the restored condition is like what existed prior to such temporary construction or staging activity.

3.12.2 Financing for Parks. The construction of improvements to parks within the Property shall be financed from the payment by Landowner of the City-Wide and neighborhood park fees and in lieu park fees established for the Property in the Project's Parks, Bike Trails and Paseos Financing Plan ("Parks Financing Plan," Exhibit "W").

3.12.2.1 Financing for Neighborhood Parks. The construction of the neighborhood park sites within the Property shall be financed from payment by Landowner of the park fees.

The City agrees that the total amount to be financed by Landowner pursuant to this Section 3.12.2.1 for the design, construction and inspection of such neighborhood park improvements shall not exceed the amounts as set forth in the Parks Financing Plan, with amounts distributed among the park sites on the Property, and which amount is adjusted by the percentage change, annually on July 1, utilizing the Engineering News Record, Construction Cost Index for the United States 20-city average.

3.12.2.2 Maintenance District Financing. Pursuant to Section 3.19 below, Landowner shall support the formation of the Community Facilities District - Public Services ("Services CFD") District defined therein. Among other things, the Services CFD shall be authorized to levy special taxes or assessments on the Property and to provide maintenance of the neighborhood parks, streetscapes, and paseos.

3.12.3 Neighborhood Park Fee. In accordance with the park financing plan for the Property, Landowner shall pay a neighborhood park fee (the "Neighborhood Park Fee"), upon the issuance of each residential building permit within the Project, to fund neighborhood park construction. Such Neighborhood Park Fee shall be \$2,900 per Low Density Residential unit, \$2,478 per Medium Density Residential unit, and \$2,055 per High Density Residential unit (but excluding carriage

units, which shall not pay neighborhood park fees), subject to annual adjustment, on July 1, based on the percentage change in the CCI (Construction Cost Index). All such Neighborhood Park Fees shall be deposited into the applicable neighborhood park fee fund.

The Neighborhood Park Fee, as calculated herein, is figured on 100% of the total dwelling units proposed to be entitled in the Property for construction of Neighborhood Parks within the Property. City may conduct an annual re-assessment of Park fees for the Property subject to this Agreement and adjust the fee upward if underutilization of entitled dwelling units for the Property subject to this Agreement exceeds 10%, provided, however, that in the case of any shift of LDR units to MDR parcels in the Property, the annual fee adjustment threshold shall be where the shift of such LDR units to MDR parcels exceeds 5% of the LDR units in the Plan Area. In the event of a rezoning of any parcel(s) in the Property that creates a park funding shortfall, City shall require supplemental neighborhood and City-Wide park fees to fund such shortfall from the rezoned parcel(s).

At the end of the development phase, City shall review development progress of Neighborhood Parks to determine if development is on target as it relates to collection of park fees by phase or sub-phase. City shall review the development phase with overall neighborhood park development and any impacts, particularly if subsequent phases will need to utilize funding previously collected for development. At the completion of all residential and neighborhood park development, according to the park financing plan for the Project, if there are any remainder fees, City shall, within thirty (30) days of filing a notice of completion of the last neighborhood park for the Project, refund to Landowner a pro-rata share of any remainder fees.

3.12.3.1 Neighborhood Park Frontage Improvements. When installing road improvements adjacent to neighborhood park sites, Landowner shall construct the frontage improvements (excluding landscaping), which include curb, gutter, and stub utilities for the park site, subject to direction from City on the location of such utility stubs. At the time Landowner installs infrastructure frontage improvements for the neighborhood parks, Landowner may construct the sidewalks, as specified in the Specific Plan and upon mutual consent of the City and Landowner.

3.12.4 City-Wide Park Fee. Upon issuance of each residential building permit within the Project, Landowner shall pay a City-Wide park fee (the "City-Wide Park Fee") to fund the construction of City-Wide park facilities in the City. The City-Wide Park Fee, as described in Section 3.12.5 below, shall be \$1,670 per Low Density Residential unit, \$1,426 per Medium Density Residential unit, and \$1,183 per High Density Residential unit (but excluding carriage units, which shall not pay City-Wide Park Fees), subject to annual adjustment, on July 1, based on the percentage change in the CCI.

3.12.5 City-Wide Park In-Lieu Fee. In accordance with the park financing plan for the Property, Landowner shall pay a city-wide park in-lieu fee for the land dedication component of the Project's City-Wide Park obligation (the "City-Wide Park In-Lieu Fee"), upon the issuance of each residential building permit within the Project, to fund improvements to the City-wide park in the WRSP or other city-wide parks within the City. Such City-Wide Park In-Lieu Fee shall be \$1,215 per Low Density Residential unit, \$1,038 per Medium Density Residential unit, and \$861 per High Density Residential unit (but excluding carriage units, which shall not pay City-Wide Park In-Lieu fees), subject to annual adjustment, on July 1, based on the percentage change in the CCI.

3.12.6 Paseo Facilities. Paseo facilities within the Project are located on modified primary residential streets with streetside paseos in the ARSP, consistent with the Specific Plan and Design Guidelines, and include a 10-foot wide Class 1A bikeway within a 35 foot landscaped/paseo corridor. The development of the paseos and streetscapes in the Project shall be in compliance with the then current WELO requirements. At the time of adjacent development, Landowner shall construct the entire landscape/paseo corridor and 10-foot wide Class 1A bikeway. Depending on the phased development requirements, once the elementary school in the Project is built and open, safe routes to the school shall be identified and implemented by Landowner at the small lot subdivision map stage. The costs of paseos shall be paid by Landowner.

3.12.7 Bike Trail Construction. The ARSP's Class 1 bike trails are only located either adjacent to drainage ways, an open space-fronting roadway, or along a P/QP parcel in the Specific Plan. Landowner shall design, secure necessary permits, and construct certain Class 1 bike trail improvements within the Property as shown on Exhibit "X" (the "Bikeway Master Plan") and as further described below. As more fully set forth in Exhibit "BB" hereto, the ARSP's Class I bike trails shall be constructed in the following segments, unless otherwise jointly agreed to by City and Landowner:

- (i) Segment 1 is located along the southern development portion of the ARSP from AR-63 to the connection point with the Al Johnson Wildlife Area, and shall be constructed by Landowner as part of the drainage structure maintenance road;
- (ii) Segment 2 is a Class 1 bike trail located along the east side of Westbrook Boulevard south of Road A and shall be constructed by Landowner when that portion of Westbrook Boulevard is constructed;
- (iii) Segment 3 is a Class 1 bike trail located along Road A east of Westbrook Boulevard, and shall be constructed by Landowner when that portion of Road A is constructed;
- (iv) Segment 4 is a Class 1 bike trail located along Road A adjacent to the P/QP parcel (AR-55) and shall be constructed when the City constructs

- the improvements on Parcel AR-55; and
- (v) Segment 5 is located along the western property line within or adjacent to Parcel AR-98 with an off-site connection extending southward to a connection with the drainage structure maintenance road in AR-93 as shown in the Specific Plan Design Guidelines. Segment 5 shall be constructed by Landowner as part of the drainage structure maintenance road and could be used as a Class 1 bike trail.

If a bike trail is completed prior to City's acceptance of open space within which the bike trail is located, City shall be responsible for bike trail maintenance. City shall enter into an agreement with Landowner memorializing such obligations and indemnifying Landowner for the public's use of the bike trail prior to City's acceptance of the open space, which shall include the recordation of a temporary maintenance and pedestrian access easement on and across the bike trail. Preparation of easement documents shall be the responsibility of Landowner. Upon completion of the bike trail and City's acceptance of open space within which the bike trail is located, City shall continue to be responsible for bike trail maintenance.

3.12.8 Entire Park Land Obligation. The City agrees that the provisions of the Specific Plan and the commitments contained herein satisfy Landowner's General Plan park obligations for the dedication and improvement of neighborhood and City-Wide parks and open space related to development of the Property.

3.12.9 Open Space Preserve Areas. Landowner shall obtain from the Army Corps a 404 Permit to fill wetland resources in conjunction with development of the Property. It is anticipated that the 404 Permit will include a condition that requires the preservation of certain environmental habitat. The areas in which such habitat will be preserved are known as Open Space Preserve Areas, as shown on Exhibit "Y" and consist of the following three parcels:

1. A 28.67-acre, more or less, portion of the Property for the purposes of drainage, flood control, fuel modification (not fire breaks), and preservation of wetland habitat and open space, shown as Parcel AR-92;
2. A 40.08 acre, more or less, portion of the Property for the purposes of drainage, flood control, fuel modification (not fire breaks), and preservation of wetland habitat and open space, shown as Parcel AR-97; and
3. A 28.82 acre, more or less, portion of the Property for the purposes of drainage, flood control, fuel modification (not fuel breaks), and preservation of wetland habitat and open space, shown as Parcel AR-105.

3.12.9.1 Conveyance of Open Space Preserve Area. Upon the satisfaction by Landowner of all conditions of the 404 Permit, and completion of any corresponding monitoring and reporting that may be required by the 404 Permit during the Establishment Monitoring phase and subject to the formation of the Perpetual Monitoring Phase Public Services CFD as described in Sections 2.7.3, 2.7.4 and 3.19 of this Agreement, and following completion of all Preserve improvements, including, but not limited to, utility crossings, outfalls, bike trail grading, flood control facilities, open space perimeter fencing as may be required by the 404 Permit, maintenance access ramps, and water quality features, Landowner shall convey to the City, in accordance with the City's Open Space Preserve Overarching Management Plan, and City shall accept, in fee, the property comprising the Open Space Preserve Area shown in Exhibit "Y". Landowner shall use its commercially reasonable best efforts, including, but not limited to, retention of consultants that specialize in Army Corps consultations, to obtain written verification from the Army Corps that success criteria for the on-site Preserve Area Establishment Monitoring Phase have been met. In lieu of obtaining written approval from the Army Corps, the Establishment Monitoring Phase can be deemed complete upon receipt of a letter from Landowner to the Army Corps with a copy provided to City on the same date notifying the Army Corps that the Establishment Monitoring Phase of the particular Preserve is complete. Any such letter shall indicate that the Army Corps' concurrence with the Landowner's determination will be assumed unless the Army Corps responds to the contrary within thirty (30) days. If the Army Corps does not respond within thirty (30) days, the Establishment Monitoring Phase will be considered complete. Upon completion of the Preserve improvements set forth above, Preserve ownership and perpetual management responsibilities can then be transferred to the City in accordance with the process identified in the City of Roseville Open Space Preserve Overarching Management Plan.

3.12.9.2 Open Space Frontage Improvements. When installing road improvements adjacent to the open space, Landowner shall construct the frontage improvements. Frontage improvements shall include sidewalks, split rail fencing and landscaping/irrigation.

3.13 School Fee Agreements. Landowner has entered or will enter into separate written agreements with the Roseville City School District and the Roseville Joint Union High School District (collectively "the Districts"), to mitigate the impacts of development of the Property on said Districts. Such agreements outline the timing and delivery of school sites and the timing and obligation for school construction. With the execution thereof, City agrees that City shall process and approve any subdivision maps or other such entitlements for the Property and issue any building permits for development thereof consistent with the Entitlements.

3.14 Miscellaneous Public Facilities and Services.

3.14.1 Fire Tax Equivalent Fee. The Fire Service Construction Tax set forth in Chapter 4.46 of the Roseville Municipal Code is no longer in effect. Landowner or its respective successors shall pay a fee equal in amount to the discontinued Fire Service Construction Tax at issuance of building permit. Landowner hereby consents to and waives any objection to the imposition of such substitute fee.

3.14.2 Placer County Capital Facilities Fee. In consideration of the annexation of the Property to City, Landowner shall pay the Placer County Capital Facilities Fee adopted by the City, in the amount then being assessed by the City; provided, however, if such impact fee is not effective or is for any reason suspended by the City, then Landowner shall pay such fee in the amount previously and most recently assessed by the City. Such fee shall be paid upon the issuance of each building permit within the Property.

3.14.2.1 City Public Facilities Fee. Upon the issuance of each residential building permit within the Project, Landowner shall pay the City Public Facilities Fee (Roseville Municipal Code Chapter 4.52) .

3.14.3 Public Benefit Fee. As partial consideration for this Agreement, to offset a portion of the impact of the Project and the associated tax sharing agreement with Placer County, and to ensure that the Project will benefit current and future residents of Roseville, Landowner, upon the issuance of each residential building permit within the Project, shall pay a Public Benefit Fee for each residential unit in the Project. The Public Benefit Fee for each low density and medium density residential unit shall be \$1,280. The Public Benefit Fee for each high density residential unit shall be \$845.

3.14.4 Liens, Encumbrances, Covenants, Conditions and Restrictions. Except as approved by City or provided for by this Agreement, all property to be conveyed in fee to City pursuant to this Agreement shall be free of any liens, financial encumbrances, special taxes, hazardous materials or assessments. Landowner shall, for each such conveyance, provide to City, at Landowner's expense, a current preliminary title report and preliminary site assessment for hazardous waste in a form approved by the City Attorney. Any policy of title insurance required by City shall be at City's expense.

3.14.5 Signage for Future Public Facilities. Landowner shall provide and install signage at the following public facility sites to alert residents of future facilities: fire station site (AR-54), well site (AR-55), two sewer lift station sites (AR-56 and AR-57), park sites (AR-60, AR-61, AR-62, AR-63, AR-64, AR-66, AR-67), solid waste recycling site (AR-55), bike trails where they will abut residential property, the NAPOTS Area

(where it abuts residential land uses), and the school site (AR-50), per City specifications and applicable sign permits.

3.14.6 Library Facilities. Landowner agrees to participate and pay its fair share of the capital cost of library services in the event that the City should amend its current City-Wide Public Facilities fee to include library facilities or adopts any other equitable financing mechanism for the provision of library facilities.

3.14.7 Construction Waste. Landowner shall require construction contractors and subcontractors to reduce construction waste by recycling a minimum of 50% of construction materials or that all construction debris be delivered to the Placer County Western Regional Materials Recovery Facility where recyclable material will be removed. Landowner shall require that contractors and subcontractors submit to the City Environmental Utilities Department annual records of waste diversion and disposal in order to verify compliance with this requirement.

3.14.8 Weed Abatement on P/QP Parcels. Prior to dedication of any P/QP parcel to City, Landowner shall maintain such P/QP parcel to meet City's weed abatement standards and to keep such parcel free from property transformation, either whole or in part, into a wetland or other legally protected area.

3.14.9 Orthophotography of Plan Area and GIS Support. Landowner agrees to pay its fair share of the cost of orthophotography of the Plan Area. The total cost for the Plan Area is \$351.54. The above payment shall be due within ten (10) days after the first Large Lot Final Map approval for the Property.

3.14.10. Solid Waste Recycling Site (AR-55). Landowner shall be responsible to grade Parcel AR-55, and provide Parcel AR-55 to City without environmental or other constraints as provided in this Agreement. At Landowner's expense, all site grading shall be completed prior to the dedication of the solid waste recycling site to City consistent with City's Grading Ordinance. Where retaining walls are required, the retaining wall shall be a split-faced keystone style wall or comparable quality and design, to be installed by Landowner. This work shall be completed with the construction of the roadway fronting Parcel AR-55.

3.15 EIR Mitigation Measures. Notwithstanding any other provision in this Agreement to the contrary, as and when Landowner elects to develop the Property, Landowner shall be bound by, and shall perform, all mitigation measures contained in the EIR related to such development which are adopted by City and are identified in the mitigation monitoring plan or the EIR as being a responsibility of Landowner, and shall be subject to any fees which may be enacted by City to implement any mitigation measures contained in the EIR.

3.16 Waiver. In consideration of the benefits received pursuant to this Agreement, Landowner, on behalf of itself and its respective heirs, successors in interests and assigns, waives any and all causes of action which it might have under the ordinances of the City of Roseville or the laws of the State of California or the United States with regard to any otherwise uncompensated or under-compensated conveyance or dedication of land or easements over the Property or improvements that are specifically provided for in this Agreement that are required in conjunction with changes to this Agreement or the Specific Plan that are requested by Landowner, or that are logically implied by this Agreement. This waiver shall not apply to any conveyances or dedications of land or easements that are not specifically contained in this Agreement and are subsequently desired by the City.

3.17 Community Facilities District – Public Facilities (Project Infrastructure).

3.17.1 Formation. Landowner and City may form a Community Facilities District or Districts for the purpose of financing the construction and/or acquisition of public infrastructure and facilities within the Property ("Project CFD(s)"). If requested by Landowner, City and Landowner, shall use their best efforts to cause to be formed the Project CFD(s) for the purpose of financing the acquisition or construction of some or all of the improvements and facilities eligible for CFD financing (the "CFD Eligible Improvements") within and associated with the Project, including those improvements which will mitigate impacts of the Project upon areas inside and outside of the Project, and will be owned, operated and maintained by the City or another public agency.

More specifically, the CFD Eligible Improvements are those improvements including, but not limited to arterials, collectors, roadways serving bus transfer facilities, and unloaded primary residential roads; traffic signals; right of way acquisitions; bridges/culverts, water, sewer, recycled water, and drainage improvements and appurtenances; landscape and landscape irrigation and drainage facilities; environmental mitigation and remediation; bicycle and pedestrian facilities; parks, paseos, schools, park and ride facilities, bus facilities, police protection, fire protection, modification to and or undergrounding of existing improvements; wetlands; electrical and dry utility improvements; transit improvements; masonry walls; development impact fees; design, engineering, surveying, construction management, and security for CFD Eligible Improvements; and other improvements as which are defined as authorized improvements under the Project CFD(s) selected by the City or any ordinance under the City.

Formation of the Project CFD(s) shall be pursuant to and consistent with the requirements of this Agreement and Government Code Section 53311, *et seq.* Landowner shall be allocated a share of infrastructure costs and assessed special taxes as specified in a tax formula agreed to by City and Landowner, in accordance with the financing plan for the Project, provided, however, that City agrees that, to the extent

permitted by law, City shall allow for separate improvement areas in the Project CFD boundary and/or separate CFDs such that default by one portion of the Project that may no longer be owned by Landowner of its CFD obligations does not place Landowner in default. The rights and obligations under this Section 3.17 shall survive the termination or expiration of this Agreement.

3.17.1.1 Nothing in this section shall be construed to require Landowner to form a CFD nor, if formed, to preclude the payment by an owner of any of the Parcels to be included within the CFD a cash amount equivalent to its proportionate share of costs for the CFD Improvements, or any portion thereof, prior to the issuance of bonds.

3.17.1.2 If Landowner desires to pursue a Community Facilities District, City and Landowner agree that, with the consent of Landowner and to the extent permitted by law, City and Landowner shall use their best efforts to cause bonds to be issued and in amounts sufficient to affect the purposes of this section. City and Landowner further agree that, with the consent of Landowner or their successor(s) in interest, and to the extent permitted by law, the City agrees to the following:

- (a) Maximum Annual Taxes for residential units, when aggregated with all other existing or expected taxes and assessments (excluding homeowners association assessments), shall not exceed 2.00% of the assessed valuation, net of the homeowner's exemption (2% Test).
- (b) The Special Tax shall be levied for as long as needed to service the principal and interest on bond debt, and to pay for any additional authorized facilities not reimbursed with bond proceeds as defined in the Funding, Construction, and Acquisition Agreement. However, the Special Tax shall be levied for a period that allows for at least two non-overlapping bond sales to cover deferred fees as set forth in (i) below. The Special Tax levied may exceed 50 years.
- (c) City shall not unreasonably deny the Maximum Annual Tax escalating at 2% per year.
- (d) Authorized facilities shall include, among other items, development impact fees for public improvements.
- (e) Annual Costs shall provide that special taxes not used for debt service and City administration be paid to Landowner, for any authorized facilities not reimbursed with bond

proceeds (pay-as-you-go). City shall reasonably consider a reasonable interest component for any authorized facilities reimbursed with pay-as-you-go provided for in the Funding, Construction and Acquisition Agreement defined below.

- (f) Landowner may utilize the Statewide Community Infrastructure Program ("SCIP") program for any eligible impact fees.
- (g) Landowner may utilize a phased bond sale or sales.
- (h) Landowner may utilize private placement of bonds.

Bonds proceeds from bond sales commencing in the year 31 timeframe shall, subject to SPRTA agreeing to the deferral of the SPRTA Tier II Traffic Fee, include an amount no greater than fifty percent (50%) of the SPRTA Tier II Traffic Fee, currently set at \$6,332.96 per residential unit, adjusted as the SPRTA Tier II Traffic Fee may be subsequently adjusted, that would normally be paid at the time of issuance of building permits for low, medium, and high density residential dwelling units.

Notwithstanding any provision in this Agreement to the contrary, any amount exceeding fifty percent of \$6,332.96, adjusted as the SPRTA Tier II Traffic Fee may be subsequently adjusted (or exceeding such actual lesser amount for MDR or HDR units determined by City), per residential unit shall be due and payable to City upon issuance of a building permit commencing with the first applicable building permit for the Project. Notwithstanding any other provision in this Agreement to the contrary, the SPRTA Tier II Traffic Fee required by City for non-residential development shall be collected upon issuance of building permit commencing with the first applicable building permit.

- (j) If a Project CFD(s) is formed, then, where adjustments (increases or reductions) in the number of allocated residential units or non-residential acreage involve transfer of residential units or non-residential acreage from one Large Lot parcel to another Large Lot parcel in the Plan Area, City may, in its sole discretion, allow for the transfer of

the assigned special tax from one Large Lot parcel to another, but only if (i) all such proposed special tax adjustments are agreed to in writing by the affected Large Lot parcel owners and City's Finance Director, and (ii) there is no reduction in the CFD maximum special tax revenue as a result of the transfer between Large Lot parcels. Should such a transfer of special taxes from Large Lot parcel to another Large Lot parcel result in an amendment to attachments 1 or 2 of the notice of special tax lien for the CFD(s), the Large Lot parcel owner requesting the transfer of special taxes shall bear the cost to affect the transfer in the CFD documents, and that property owner shall prepare the required amendments to the notice of special tax lien, including amendments to attachments 1 and 2 thereto.

Should the Project CFD(s) including the Property not be formed at the time that any particular building permit is issued within a large lot map parcel on the Property, or any property owner in the Project desires to pay all of the SPRTA Tier II Traffic Fee rather than defer payment to such future CFD bond proceeds, then all of the SPRTA Tier II Traffic Fee shall be paid at the time of issuance of such building permit(s). Upon formation of the Project CFD(s) including the Property, fifty percent of the SPRTA Tier II Traffic Fee for unbuilt residential units shall be paid from bond proceeds in such bond sales commencing in the year 31 timeframe, unless a Project property owner desires to pay such fee at the time of issuance of building permit(s).

3.17.1.3 Concurrent with any formation of a CFD, Landowner and City shall enter into a shortfall agreement as defined in the Funding, Construction, and Acquisition Agreement, in form and substance acceptable to City, whereby Landowner shall covenant to finance its fair share of the costs of the CFD Eligible Improvements, to the extent that the bonds issued by the CFD do not provide sufficient funding for the completion of such Improvements, subject to reimbursement/acquisition by pay-as-you-go proceeds, to the extent available.

3.17.1.4 Nothing herein shall be construed to limit Landowner's option to install the public improvements through the use of traditional assessment districts or private financing.

3.17.2 Effect of CFD Financing on Credits and Reimbursements.

Wherever the terms of this Agreement provide for (a) credits or (b) reimbursements to Landowner for construction of certain improvements, and such improvements are financed by the CFD, development fees otherwise applicable to such improvements shall be adjusted as necessary to reflect construction with CFD funds. Credits or reimbursements owed to Landowner shall not be affected or reduced because

improvements for which credits or reimbursements are due were financed with CFD special taxes or bond proceeds.

3.18 Completion of Improvements. City generally requires that all improvements necessary to service new development be completed prior to issuance of building permits (except model home permits as may be provided by the City's Subdivision Ordinance). However, the parties hereto acknowledge that some of the CFD Eligible Improvements associated with the development of the Property may not need to be completed to adequately service portions of the Property as such development occurs. Therefore, as and when portions of the Property are developed, all CFD Eligible Improvements required to service such portion of the Property in accordance with the Entitlements (e.g., pursuant to specific tentative map conditions or other land use approvals) shall be completed prior to issuance of any building permits within such portion of the Property (except permits for model homes, which may be issued sooner in accordance with the City's Subdivision Ordinance). Provided, however, the Public Works Director may approve the issuance of building permits prior to completion of all such CFD Eligible Improvements if the improvements necessary to provide adequate service to the portion of the Property being developed are substantially complete to the satisfaction of the Public Works Director.

All wet utilities to be installed by Landowner will be subject to the review and approval of the City Environmental Utilities Department. In connection therewith, Landowner shall be responsible for coordinating the alignment of all such planned and future utilities within the applicable rights-of-way to the satisfaction of the City Environmental Utilities Director.

3.19 Community Facilities District – Public Services (Services CFD).

3.19.1 Formation.

3.19.1.1 Consent, Waiver and Special Benefit. No residential building permit, excluding permits for model homes, or certificate of occupancy for non-residential uses, shall be issued until a Community Services District - Public Services has been formed to include the Property ("Public Services CFD"). Landowner consents to and shall cooperate in such formation or other such financing mechanism for maintenance purposes and consent herewith to the levy of such special taxes as are necessary to fund the maintenance obligations described in Section 3.19.2. Formation of the Public Services CFD shall be pursuant to and consistent with the requirements of this Agreement and Government Code Section 53111, *et seq.* The Public Services CFD will fund maintenance of street frontage and median landscaping, open space and neighborhood parks. The assessment amounts shall be defined in the Parks Financing Plan for street and median landscaping and neighborhood parks in the Project. The open space management and maintenance costs shall be determined prior to formation

of the Public Services CFD based on the final 404 permit, for the Project and other federal and state permits and approvals, the amount of Open Space Preserve, vehicle access into the Open Space parcels for maintenance, the quality and quantity of sensitive resources, the amount of residential interface along the open space edges, the final drainage channel design, and consistency with the City's Open Space Preserve Overarching Management Plan. The rate and method for the Public Services CFD shall reflect differential tax rates between low density residential, medium density residential, high density residential, and non-residential land uses.

3.19.1.2 Zones of Benefit. The Services CFD may be divided as necessary into zones of benefit and between which the amount of assessment may vary.

3.19.2 Public Services. The Public Services CFD shall provide the funds required for the performance of maintenance, monitoring and reporting obligations and may include, but not limited to, the following:

3.19.2.1 Autumn leaf cleanup for collector and local streets;

3.19.2.2 Maintain neighborhood parks;

3.19.2.3 Maintain paseos and sidewalks along collector streets and modified primary residential streets, medians and landscape corridors and all masonry walls along roadways within the Project, the masonry wall on the Project's eastern boundary and northern boundary, and the non-private property owner side of masonry walls and property between those walls and the NAPOTS Area;

3.19.2.4 Maintain bikeways and their appurtenances (drainage [limited to culverts or outfall pipes from adjacent subdivisions or roads], signs, benches, and striping);

3.19.2.5 Maintain City and neighborhood entry features within the Property, public rights-of-way and ancillary landscaping;

3.19.2.6 Conduct the environmental mitigation monitoring, and the annual review thereof, as required by the Mitigation Monitoring Plan related to the EIR;

3.19.2.7 Conduct all monitoring, reporting and adaptive management for Open Space Preserve areas, including the Off-Site Preservation Areas if accepted by City, described in Section 2.7.1 above. These tasks shall include any special management and monitoring actions identified in the 404 Permit (for created habitat success criteria) and as determined by a PAR analysis described in Section 2.7.4 (including any tasks required by any required Establishment Monitoring phase O&M Plan and during Perpetual Monitoring per the City's Open Space Preserve Overarching

Management Plan);

3.19.2.8 Maintain all water quality structural controls, storm management facilities (and programs) within RoW's and Open Space, including open channels and drainage swales constructed between storm drain outfalls and receiving waters, and conduct all monitoring, reporting and compliance measures as required by City's MS4 Permit;

3.19.2.9 Maintain flood control and drainage facilities including storm water channels, storm water pump stations, detention basins and created wetlands;

3.19.2.10 Maintain open space areas including general maintenance, signage and City-owned fence maintenance, and trash and debris collection;

3.19.2.11 Maintain fire breaks within open space areas, including during any required Establishment Monitoring Phase;

3.19.2.12 Maintain a Replacement Reserve Fund for repair and replacement of entry features, signage, lighting, and other special features including park features, structures, etc. included in the areas to be maintained through the Public Services CFD, as indicated in the Design Guidelines;

3.19.2.13 Maintain the bus shelters, bus stops, the park and ride lot, and bus signs; and

3.19.2.14 Maintain the NAPOTS Area referenced in Section 3.3.1 above until such time as the contract for the construction of the segment of Placer Parkway including the NAPOTS Area is executed.

3.19.3 Public Parcel Exclusion. Landowner expressly agrees that Parcels conveyed or to be conveyed to the City, Roseville City School District or Roseville Joint Union High School District shall be excluded from any assessment imposed by the Public Services CFD.

3.20 Community Facilities District – Municipal Services.

3.20.1 Formation.

3.20.1.1 Consent, Waiver and Special Benefit. No residential building permit, excluding permits for model homes, shall be issued until a Community Facilities District – Municipal Services (Municipal Services CFD) has been formed or

annexed to the City's existing Municipal Services CFD. Landowner consents to and shall cooperate in such formation or other such financing mechanism for services purposes and consent herewith to the levy of such special taxes as are necessary to fund the maintenance obligations described in Section 3.20.2. Formation of the Municipal Services CFD shall be pursuant to and consistent with the requirements of this Agreement and Government Code Section 53311, *et seq.* The initial amount of the maximum special tax shall be in accordance with the Municipal Services District Rate, Method, and Apportionment ("RMA"), and adjusted annually for inflation. The initial amount of the maximum special tax (for the 2015/16 City fiscal year, and as subsequently adjusted annually) shall be \$289.68 for LDR units, \$289.68 for MDR units, \$179.60 for HDR units, \$871 per acre for business professional land uses, and \$960 per acre for commercial land uses. City shall initiate the necessary steps to revise the RMA in the City's existing Municipal Services CFD to conform to the above-referenced initial amounts of maximum special taxes.

3.20.2 Municipal Services. The Municipal Services CFD shall provide the funds required to offset the Project's impact on City general fund resources available to pay for municipal services citywide, including the Project. The funds shall be utilized for general fund purposes.

3.20.3 Public Parcel Exclusion. Landowner expressly agrees that Parcels conveyed or to be conveyed to the City, Roseville City School District or Roseville Joint Union High School District shall be excluded from any assessment, imposed by the Services CFD.

3.21 Encroachment Permits, Landscape Maintenance Easements. Landowner and City agree to grant encroachment permit(s) or maintenance easements for all Services CFD's to Landowner or City or their agents, employees, successors, assigns, agents and employees, for the purpose of entry into the landscape easement and setback areas or City property (including streets and rights-of-way) to perform the maintenance obligations described herein.

3.22 Grading Permit. Prior to the onset of any construction activities, the Landowner shall apply for and obtain a grading permit from the City. All plans shall meet or exceed the intent of the then approved City Standards, the State Water Quality Control Board SWP3 requirements, and the State General Construction Permit. It is the Landowners responsibility to meet all criteria of any outside agency for grading adjacent to or within the Open Spaces.

Mass grading and the bulk movement of earthen material is encouraged. Where practical, and at the Direction of the City Engineer, a balanced mass grading plan shall be prepared for all that land within a disturbed water shed. Bulk material shall be moved on the onset of construction to ensure that future development sites balance, and

reduce the amount of future on-street transportation of bulk material on newly paved and existing City roads. The fee referenced below shall not apply to hauling of earthen material crossing in a perpendicular manner, or parallel, to newly paved or existing City roads. In the event that bulk material is transported on or over newly paved and/or existing City roads (but not across in a perpendicular manner or parallel to such City roads), a premium of \$0.10 fee per yard of material shall be assessed at the issuance of the grading permit to compensate the City for deterioration of the road caused by the excessive loads, provided, however, that the City Engineer shall have the discretion to waive such fee in recognition of particular circumstances, including environmental constraints, faced when hauling bulk movement of earthen material.

With regard to any and all P/QP parcel dedications to City and at Landowner's expense, all site grading shall be completed prior to the dedication of the site consistent with City's Grading Ordinance, and where retaining walls are required, the retaining wall shall be a split faced key stone style wall or comparable quality/design to be installed by the Landowner.

3.22.1 Contour Grading Plan. Landowner shall submit a contour grading plan (the "Preliminary Contour Grading Plan") for City review and acceptance for the overall Project concurrently with the application for the first residential small lot tentative subdivision map in the Project. The Preliminary Contour Grading Plan shall serve as an informational tool to demonstrate how the overall earth work for the Project will balance and coincide with future improvements.

The Preliminary Contour Grading Plan shall consider underground utilities and facilities outlined in the Drainage and Sewer Master Plans. Edge conditions along the proposed developed areas and overland release points shall be delineated per City standards. The Preliminary Contour Grading Plan shall also identify cut and fill quantities for each phase and shall include a mass diagram for earthwork movement between phases and an identification of any import required to complete the Preliminary Contour Grading Plan. The Preliminary Contour Grading Plan Exhibit shall include existing topography and proposed finished grade contours in one foot (1') intervals along with depths of cut and fill in a grid pattern throughout the Project Area.

3.23 Fire Station Site. City and Landowner acknowledge that City is responsible for funding, construction, and operation of fire facilities necessary to serve the ARSP. Landowner shall dedicate to City a 3.02 acre site (AR-54) for use as a fire station (the "Fire Station Site") at the location shown in the ARSP and as shown in Exhibit "E" attached hereto. The net buildable area (i.e., an area of land which may be fully and completely utilized for structures and other improvements) shall be no less than 3.0 acres. Except as stated below, the timing of such dedication shall be subsequent to acceptance by City of all necessary infrastructure and utility

improvements to serve the Fire Station Site and completion of the grading requirements stated below or at such later time as determined by City.

By the time of issuance of the 1200th building permit in the Project, City may request that Landowner construct all infrastructure and utility improvements, including communication conduit per City SIC standards, to the Fire Station Site to accommodate construction of the fire station and that Landowner dedicate the Fire Station Site to City. At Landowner's expense, site grading shall be completed prior to dedication of the Fire Station Site and consistent with City's Grading Ordinance, and where retaining walls are required, the retaining walls shall be split faced key stone style or comparable quality/design, to be installed by Landowner. Upon dedication of the Fire Station Site to City as provided in this Section 3.23., there shall be no further restrictions on or requirements of City approvals or permits anywhere in the Plan Area related to the provision of fire facilities in the Plan Area.

3.24 Disclosures to Subsequent Purchasers. This Agreement shall constitute notice to all successors to Landowner hereunder, and to all subsequent purchasers of any lots and/or residential units within the Property, of the following matters:

1. Designation of Westbrook Boulevard as a truck route.
2. The existence of a Development Agreement on the Property. However, this notice shall not extend to the purchaser of a completed individual single family residential unit
3. The Project will be served by surface water supplies, with groundwater serving as the backup supply.
4. Recycled water will be used to irrigate parks and landscape setbacks, medians, paseos and other landscape areas including all multi-family and non-residential landscaping uses.
5. Requirement to implement water conservation measures per the project Water Conservation Plan (Exhibit "R"), which may include such measures as Smart Timers.
6. 60kV overhead power line easement on Parcels AR-96 and AR-55.
7. Aircraft overflights and associated noise.
8. Requirement for fifty percent (50%) reduction in construction waste stream.

9. Location of schools and parks within one mile.
10. Parcels adjacent to Open Space and storm water channels may have a public bike trail and appurtenances adjacent to said parcels.
11. Location of the well site.
12. Location of wastewater treatment plant and sewer lift stations, and proximity to the Western Regional Sanitary Landfill and Materials Recovery Facility, whose operations create the potential for occasional odors associated with operations of these facilities.
13. Owners of residential units adjacent to separated sidewalks shall be responsible to maintain area between curb and sidewalks.
14. Masonry walls adjacent to landscape corridors on arterial roadways abutting Low and Medium Density Residential land uses and other public facilities are owned by the City, which is responsible for their maintenance, repair and replacement. The private property side of masonry walls adjacent to Low and Medium Density Residential lands abutting the NAPOTS Area shall be located within private property and is to be maintained by private property owners. The outside of such walls adjacent to the NAPOTS Area and any property between the masonry walls and the NAPOTS Area may be maintained by the CFD for Public Services.
15. Solar envelope impact: Landowner shall disclose to all residential and nonresidential buyers that certain properties, specifically those adjacent to major arterials and collector streets where City-maintained landscaping is installed, may impact the buyer's opportunity to install solar panels or structures or the efficiency or effectiveness of such solar panels or structures and that this is primarily due to the trees within the street landscapes as being generally medium to large shade trees, which may cast shade, leaf litter, or other natural affects onto the adjacent property.
16. Demand cycle control units operated by Roseville Electric on residential air conditioner units.
17. To the west of the northwestern portion of the Property is a parcel of land commonly known as the Gleason Ranch, APN 017-020-029-000, which is in commercial agricultural production. Should CC&Rs not be recorded against the Property as provided for

herein, a separate notice of the presence of the Gleason Ranch and its commercial agricultural production next to the northwestern portion of the Property will be recorded against the Property by Landowner, including a separate recorded notice to the purchaser of all completed individual single family residential units located within the Property, notifying all such subsequent purchasers that their properties are located in the vicinity of the Gleason Ranch commercial agricultural production, which includes, or may include from time to time, operation of farm machinery, irrigation, noises, odor and dust generation, electrical and barbwire fencing, and aerial and ground application of pesticides, herbicides and fertilizers, as well as occasional hunting activities, all of which may occur at various times of the day or night. The notice will also notify future residents of the Property of the possibility of commercial and/or residential development on the Gleason Ranch property in the future.

18. Parcels adjacent to the NAPOTS Area shall be notified of the future Placer Parkway project and the potential for air quality and noise impacts.
19. Parcels adjacent to the Project's eastern boundary shall be notified of the potential for a future Placer Ranch Specific Plan.

If Landowner records any Property CC&Rs, such CC&Rs shall include the foregoing disclosures and the foregoing disclosures shall not be omitted or deleted from the CC&Rs without the City Attorney's prior written approval, with the exception of disclosure 17, which may not be omitted or deleted from CC&Rs.

3.25 General Signage.

A) Utility Sites (see Section 3.14.5): Landowner shall install signage at all future utility sites (including, but not limited to, the well, sewer lift stations, pumping stations, aquifer storage and recovery facilities, and public facility sites describing the facilities to be constructed on the subject site. Signs shall be provided per City specifications. The Environmental Utilities Director, City Engineer, and Electric Director, as appropriate, must review and approve sign layouts prior to installation/construction of any utility sites. The City Manager or his/her designee must review and approve sign layouts prior to installation/construction of any public facilities.

B) Affordable Housing: Landowner shall install signage at future affordable rental housing sites (excluding carriage units) describing the facilities to be constructed on the subject site. Signs shall be provided per City specifications. The City

Manager or his/her designee must review and approve sign layouts prior to installation by Landowner.

3.26 Masonry Walls. Landowner agrees to construct masonry walls, a minimum of 6-feet high, between the future Placer Parkway right-of-way (the NAPOTS Area) where Low Density Residential and Medium Density Residential land uses abut the future Placer Parkway right-of-way, prior to the occupancy of such residential land uses. The masonry walls shall be located on private property and, for the private lot owner side of the masonry wall, shall be maintained by the private property owners. CC&Rs for those subdivisions shall inform the private property owners of their maintenance responsibilities and shall require such walls to remain in place and maintained at all times.

3.27 Reimbursement to West Roseville Specific Plan.

A. In the event the ARSP constructs improvements in the CSP Area, Landowner acknowledges that the West Roseville Specific Plan ("WRSP") developer(s) have constructed and/or will construct improvements as set forth in Exhibits "II" and "OO" to the WRSP development agreements, which have been and/or will be oversized for the benefit of third parties such as the CSP. Landowner further acknowledges that City is obligated to use its best efforts in requiring reimbursement to WRSP from benefiting third parties. Such oversized improvements as specified in such Exhibits "II" and "OO" to the WRSP development agreements may include sewer, water, and recycled water. The reimbursements due the WRSP from the Project are also set forth in Exhibit "BB" to this Agreement. As set forth in this Section 3.27, Landowner shall pay its pro-rata share based on the number of DUEs allocated at the date of Project approval, as set forth in Exhibit "AA", to Landowner's Property in a large lot parcel. Landowner's pro-rata share for a large lot parcel shall be based on the following

LDR/MDR residential units allocated to a large lot
parcel at the date of Project approval (or DUEs for HDR
projects/non-residential projects)

Such payment for the DUEs in a large lot parcel in which a final small lot residential subdivision map or building permit (for high density residential or non-residential uses), is approved, as the case may be, shall be due and payable on the earlier of the formation of a CFD and issuance of bonds for such CFD serving that large lot parcel in Landowner's Property, or recordation of the first final small lot residential subdivision map, in the case of low density and medium density residential projects, or issuance of the first building permit for high density residential or non-residential projects, in such large lot parcel, subject to the following considerations:

- Landowner's pro-rata reimbursement to WRSP (as defined in this

Section 3.27) shall be required until such time Landowner's pro-rata reimbursement owed to WRSP has been fully satisfied or Landowner's Property has been fully built out.

- Once Landowner has made payments for reimbursement to the WRSP as set forth in this Section 3.27 for infrastructure and environmental and planning costs, respectively, for a large lot parcel, Landowner shall have no further reimbursement obligation to the WRSP for that large lot parcel.
- Reimbursements for WRSP improvements that have been constructed shall be paid as set forth in Section 3.27.D, subject to confirmation and approval by City of costs for work completed by the WRSP, according to the following hierarchy in determining costs for WRSP improvements for which the WRSP seeks reimbursement:
 - (1) Invoices for construction of WRSP improvements submitted by the WRSP to City; or
 - (2) if such invoices are not available, documentation of payment from the WRSP CFD for WRSP improvements; or,
 - (3) if such documentation of payment from the WRSP CFD is not available, the cost estimates for WRSP improvements as set forth in Exhibits "II" and "OO" to the WRSP development agreements and Exhibit "BB" to this Agreement.

Prior to City approval, Landowner shall have the right to review such requests for reimbursement from the WRSP, including all such documentation.

B. So as to not delay implementation of the Project, no final small lot residential subdivision map, any building permit for high density residential or non-residential uses, nor any certificates or occupancy regardless of use type, shall be withheld or delayed by City in the Project due to any delay in submission of requests for reimbursement, and documentation justifying such reimbursement, by the WRSP to City.

C. At the time that Landowner seeks recordation of a final small lot residential subdivision map, or issuance of a building permit for high density residential or non-residential uses, on any portion of a large lot parcel on Landowner's Property, WRSP developers may not yet have submitted invoices for the costs of WRSP

improvements completed and accepted by City (hereinafter, "completed WRSP Improvements") for which reimbursement from the Project is sought by the WRSP, or provided documentation supporting payment for such by the WRSP CFD, as set forth in Section 3.27.A, and, as set forth in Section 3.27.E, certain WRSP improvements for which reimbursement is sought may not have been constructed. Landowner shall, at the time of recordation of a final small lot residential subdivision map or issuance of a building permit for a high density residential or non-residential use, pay to City Landowner's pro-rata share of costs of such completed WRSP improvements (both invoiced or documented as set forth in Section 3.27.A and yet to be invoiced or documented as set forth in this Section 3.27.C.) and the yet to be constructed WRSP improvements for the DUEs allocated to such large lot parcel, as defined in Section 3.27.A (and as set forth in Exhibit "AA"), based on the actual costs or cost estimates of such infrastructure, as the case may be, set forth in Exhibits "II" and "OO" to the WRSP development agreements and Exhibit "BB" to this Agreement, and as described in this Section 3.27.C. City shall pay to the WRSP developers 100% of such reimbursements from the amounts paid by Landowner, until such time as the actual costs of completed WRSP improvements, as provided for in Section 3.27.A, have been paid in full, with reimbursed funds paid by Landowner, over and above the cost of completed WRSP Improvements, placed into an escrow account, as set forth (or as may be modified, as the case may be) in Section 3.27.D.

D. At the time that Landowner seeks recordation of a final small lot residential subdivision map, or issuance of a building permit for high density residential or non-residential uses, on any portion of a large lot parcel on Landowner's Property, some WRSP improvements for which reimbursement is provided for in Exhibits "II" and "OO" to the WRSP development agreements and Exhibit "BB" to this Agreement may not have been completed and accepted by City. In such case, Landowner shall have the option of making payment to City for such yet-to-be built WRSP improvements as set forth in Section 3.27.C., or posting security acceptable to City, which could include a security bond. Such reimbursement funds shall be paid either to (1) the WRSP developer constructing such improvements, based on actual costs, as set forth in Section 3.27A, or (2) to Landowner or any other landowner(s) should such landowner(s) construct such improvements.

E. All P/QP parcels to be dedicated to City or to another public agency, e.g., school districts, shall not be subject to reimbursement to the WRSP. All reimbursements for improvements to the WRSP shall be subject to annual adjustment for CCI from the date that the WRSP Developer incurred the reimbursable cost to the date of reimbursement.

3.28 Reimbursement to Creekview Specific Plan.

A. Landowner acknowledges that the Creekview Specific Plan developer(s) have an obligation to construct improvements as set forth in Exhibits "Q", "V", "Y" and "KK" to the CSP development agreement, which will be oversized for the benefit of third parties such as Landowner. Landowner further acknowledges that City is obligated to use its best efforts in requiring reimbursement to the CSP from benefiting third parties. Such oversized improvements as specified in Exhibits "Q", "V", "Y" and "KK" to the CSP development agreement are for sewer, water and recycled water. The reimbursements due the CSP from the Project are set forth in Exhibit "BB" to this Agreement, and Exhibits "K-1", "K-2", "O-1", "O-2", "O-3", "Q-1", and "Q-2" to this Agreement.

The Project's share of costs based on "flow in the pipe" shall be reimbursable to the constructing CSP developer(s) pursuant to this Section 3.28. That share of costs shall be fixed as a percentage based on the number of DUEs ("EDUs" in Exhibit "AA") allocated to Landowner's large lot parcel at the time of ARSP approval and set forth in Exhibit "AA" to this Agreement. The percentage shall be calculated using the allocated DUEs for each large lot parcel as provided in Exhibit "AA" as the numerator, and the total number of DUEs in the ARSP, including the Urban Reserve parcel, as the denominator.

Any reimbursement payment required to this Section 3.28 shall be due and payable to the constructing CSP developer(s), unless otherwise stated herein, upon the earlier of the formation of a CFD and issuance of bonds for such CFD serving that large lot parcel, or recordation of the first final small lot residential subdivision map, in the case of low density or medium density residential projects, or issuance of the first building permit for high density residential or non-residential projects, in such large lot parcel. Once Landowner has made its reimbursement payment(s) in full pursuant to this Section 3.28 for a large lot parcel in the Project, Landowner shall have no further reimbursement obligation to the constructing CSP developer(s) for that large lot parcel.

Reimbursements shall be paid directly to the constructing CSP developer(s) and not the City, unless (1) the reimbursement is owed to a CFD, in which case the reimbursements would pass through the City to the applicable CFD, or (2) the improvements have not yet been constructed, or constructed but not yet accepted by the City. If the improvements are not yet constructed, and Landowner must construct the improvements to serve the Project, then no reimbursement is owed by Landowner to the CSP, but rather the CSP developer(s) owe reimbursement to Landowner according to the same terms applicable to Landowner in this Section 3.28. For such reimbursable improvements that are constructed by the CSP, reimbursements shall be paid as set forth in this Section 3.28, subject to confirmation and approval by City of costs for work completed by the CSP, based only on invoices for construction of CSP improvements

submitted by the CSP to the City. Prior to City approval of such requests for reimbursements from the CSP, Landowner shall have the right to review such requests for reimbursements, including all required documentation. Actual costs of construction include those items set forth in Section 4.2.3.

B. So as to not delay implementation of the Project, no final small lot residential subdivision map, any building permit for high density residential or non-residential uses, nor any certificates of occupancy regardless of use type, shall be withheld or delayed by City in the Project due to any delay in submission of requests for reimbursement and/or documentation justifying such reimbursement by the CSP to City.

C. At the time that Landowner seeks recordation of a final small lot residential subdivision map, or issuance of a building permit for high density residential or for non-residential uses, on any portion of the Property, CSP developer(s) may not yet have submitted invoices for the costs of CSP improvements completed and accepted by the City (hereinafter, "Completed CSP Improvements") for which reimbursement from the Project is sought by the CSP, or provided documentation supporting payment for such reimbursement, as set forth in Section 3.28.A. In addition, certain CSP improvements for which reimbursement is sought may not have been constructed at the time that Landowner seeks recordation of a final small lot residential subdivision map or issuance of a building permit for high density residential or for non-residential uses on the Property. In the instances described in this Section 3.28.C., Landowner shall, at the time of recordation of a final small lot residential subdivision map or issuance of a building permit for a high density residential use or non-residential use, pay to City Landowner's pro-rata share of costs of such Completed CSP Improvements (both invoiced or documented as set forth in Section 3.28.A., or yet to be invoiced or documented as set forth in this Section 3.28.C.) and the yet to be constructed CSP improvements for the DUEs allocated to the particular large lot parcel in the Project, as defined in Section 3.28.A. (and as set forth in Exhibit "BB"), based on the actual costs or costs estimates of such infrastructure, as the case may be, set forth in Exhibits "Q", "V", "Y" and "KK" to the CSP development agreement and Exhibits "K-1", "K-2", "O-1", "O-2", "O-3", "Q-1", "Q-2", and "BB" to this Agreement, and as described in this Section 3.28.C. City shall pay to the CSP developer(s) 100% of such reimbursements from the amounts paid by Landowner, until such time as the actual costs of Completed CSP Improvements, as provided for in Section 3.28.A., have been paid in full, with reimbursed funds paid by Landowner or other parties, over and above the cost of Completed CSP Improvements, placed in an escrow account controlled by City, as set forth or as may be modified, as the case may be, in Section 3.28.D.

D. At the time Landowner seeks recordation of a final small lot residential subdivision map, or issuance of a building permit for high density

residential uses or non-residential uses, on any portion of a large lot parcel on the Property, some CSP improvements for which reimbursement is provided for in Exhibits "Q", "V", "Y" and "KK" to the CSP development agreement and Exhibits "K-1", "K-2", "O-1", "O-2", "O-3", "Q-1", "Q-2", and "BB" to this Agreement may not have been completed and accepted by City. In such case, Landowner shall have the option of making to City for such yet-to-be-built CSP improvements as set forth in Section 3.28.C., or posting security acceptable to City, which could include a security bond.

E. All P/QP parcels to be dedicated to City or to another public agency, e.g., school districts, shall not be subject to reimbursement to the CSP. All reimbursements for improvements to the CSP shall be subject to annual adjustment for CCI from the date that the CSP developer(s) incurred the reimbursable cost to the date of reimbursement.

3.29 Reimbursements to Third Parties. In the event that third parties construct sewer, water and/or recycled facilities in Westbrook Boulevard through the Property, and/or the ARSP fire station site, that are either required of or by Landowner or for which Landowner has responsibility for a pro-rata share, Landowner shall provide reimbursement to third parties for Landowner's share of the costs of such improvements as set forth in this Section 3.29. To effectuate reimbursement to such constructing third parties, Landowner shall pay to City a per DUE fee, to be paid large lot by large lot based on the ratio set forth below and the percentages set forth in Exhibits "K-1", "K-2", "O-1", "O-2", "O-3", "Q-1" and "Q-2", comprised of the following components, all as set forth in Exhibit "BB" to this Agreement: (i) Landowner's share of wet utilities in Westbrook Boulevard; (ii) Landowner's share of the ARSP fire station site. References herein to payments on a "large lot by large lot basis" shall mean payments based on the number of DUEs planned for such large lot, as more fully described in the ratio set forth below, which payments shall be due upon the recordation of the first final small-lot map for LDR/MDR residential units or issuance of the first building permit for HDR projects or non-residential projects within such large lot.

Payments by Landowner based on estimates set forth in Exhibit "K-1", "K-2", "O-1", "O-2", "O-3", "Q-1", and "Q-2" to this Agreement for the wet utilities in Westbrook Boulevard shall be annually adjusted by the CCI from the Effective Date of this Agreement to the date of payment. Payments by Landowner based on estimates set forth in Exhibit "CC" to this Agreement for the ARSP fire station site (excluding land value), shall be adjusted annually by the CCI from the Effective Date of the ARSP development agreements, to the date of payments.

Reimbursable costs shall include costs associated with design, engineering, construction management, staking, plan check and inspection fees, habitat mitigation (excluding any costs of state and federal permitting), and construction. Reimbursement

for costs for design, engineering, construction management and staking shall equal twenty percent (20%) of identifiable costs of construction, as set forth in Section 4.2.3.

(i) In the case of the on-site sewer, water and recycled water facilities in Westbrook Boulevard in the ARSP, if third parties are required by City to construct such facilities, City shall pay to such third parties, as such construction costs are incurred by such third parties and approved by City, the fees described herein that have been paid, large lot by large lot, by Landowner, which Landowner shall continue to pay, large lot by large lot, until such time as City determines that such wet utilities would have otherwise have been required to support development of the Property, at which time Landowner shall pay, in one single payment, the unpaid balance of Landowner's share of the actual costs of construction of such facilities, adjusted annually as set forth in Section 4.2.5 of this Agreement, after the fees previously paid by Landowner to City as described in this Section 3.29 have been paid to the constructing third parties. All reimbursements to and from third parties for wet utilities shall be based on the percentages as set forth in Exhibit "AA".

(ii) For Landowner's pro-rata share of the ARSP fire station site Landowner, via the fee described in this Section 3.29, shall pay to City, to be paid to the constructing third parties at the time of construction as construction costs are incurred by such other constructing third parties and approved by City, its pro-rata share, as set forth in Exhibit "CC", of the estimated costs for grading, any required access road, any frontage improvements as defined in Exhibit "CC", and any other improvements specified in Exhibit "CC", adjusted annually by the CCI (but excluding the land value of the fire station site, whose costs shall not be adjusted annually by the CCI) from the Effective Date of the ARSP development agreements, to the date of payment, according to the pro-rata shares therefore set forth in Exhibit "CC". After the ARSP fire station site has been constructed by such other third parties (or, in the case of the CSP electric substation site, by Landowner, as set forth in Section 4.2.2.1 below), Landowner's payment, large lot by large lot, of its pro-rata share of the fire station site to such other constructing third parties shall be based on actual costs of construction, adjusted annually as provided for in Section 4.2.5.

Payment by Landowner for reimbursements due for the facilities set forth in Exhibit "BB" shall satisfy in full Landowner's obligation for payment of its pro-rata share of the costs of improvements due from Landowner to CSP developer(s). For all reimbursement payments by Landowner to third parties or to City to be paid to third parties provided for in this Section 3.28, once such payment by Landowner has been made for residential units or DUEs, as the case may be, for a large lot based on estimated costs of improvements, Landowner shall have no further obligation for those residential units or DUEs, as the case may be, should actual costs of construction for the improvements exceed the estimated costs. Likewise, if actual costs of construction are less than the estimated costs of improvements for which reimbursement has been made

by Landowner for residential units or DUEs, as the case may be, for a large lot, there shall be no repayment of the overpayment from the reimbursed party or parties to Landowner for those residential units or DUEs for which reimbursement payments were previously made based on estimated costs.

In all cases of payment by Landowner for its pro-rata share of costs for improvements as provided in this Section 3.29, Landowner shall pay its pro-rata share of costs based on estimates set forth in Exhibits "K-1", "K-2", "O-1", "O-2", "O-3", "Q-1", and "Q-2" and "CC" to this Agreement until such time as actual costs of construction have been reviewed and confirmed by City.

ARTICLE 4. CITY OBLIGATIONS

4.1 City Cooperation. City agrees to cooperate with Landowner in securing all permits that may be required by City and, to the extent applicable, state and federal agencies. In the event State or Federal laws or regulations enacted after this Agreement has been executed, or action of any governmental jurisdiction, prevent, delay or preclude compliance with one or more provisions of this Agreement, or require changes in plans, maps or permits approved by City, the parties agree that the provisions of this Agreement shall be modified, extended or suspended as may be necessary to comply with such State and Federal laws or regulations or the regulations of other governmental jurisdictions. Each party agrees to extend to the other its prompt and reasonable cooperation in so modifying this Agreement or approved plans.

4.2 Credits and Reimbursements. Landowner may, pursuant to this Agreement, finance construction of certain improvements, including but not limited to roadways, sewer, water, recycled water, solid waste, park, bike trails, drainage and/or electrical facilities which would otherwise be paid for by the City or other parties and which serve and benefit other properties or which would be financed by existing or future City fees.

City and Landowner agree that, in consideration of Landowner financing of such improvements that may be part of a City project for which the City is collecting development impact fees, Landowner, upon entering into an improvement agreement with City and posting security for improvements, shall be entitled to credits and/or reimbursements (reimbursements are applicable when improvements are completed, or as otherwise provided in Sections 3.5.2, and 3.5.7), as set forth below, which credits and reimbursements are owned personally by Landowner and do not run with the Property to successors and assigns, unless Landowner provides written notice to City that said credits and reimbursements have been assigned by Landowner to a third party.

City shall make best efforts to collect reimbursements from third parties outside the ARSP that have been financed by the Landowner, for infrastructure improvements

benefiting those third parties, as set forth in Sections 4.2.2 – 4.2.7.

Such personal ownership of credits and reimbursements by Landowner apply to all credits and reimbursements set forth in this Section 4.2 and all subsections thereto, and all other credits and reimbursements provided under this Agreement. City shall use its reasonable best efforts to establish a program to track credits owned by Landowner as provided in this Section 4.2, provided that Landowner hereby agrees to hold the City harmless for any credits that are misapplied by City.

4.2.1 City Extension of Credits. To the extent Landowner advances the cost for the construction of infrastructure included within existing, or to be included in future, City fee programs, City shall provide, if funds are available, reimbursement to Landowner, and if funds are not available for reimbursement, then City shall grant to Landowner a credit for such costs applied against their respective fee obligations for the Project, subject to the provisions of Sections 3.5.2, 3.5.7, 3.12.8 and 3.12.9 above, and provided that in no case shall the amount of credits exceed Landowner's costs of construction of such infrastructure, as defined in Section 4.2.3 below.

4.2.2 Reimbursement by Third Parties. In the case of public road, sewer, water, recycled water, drainage or electric improvements which abut property or traverse through property owned by third persons and other public improvements which are oversized or are constructed by Landowner, even if not oversized, to benefit property owned by third persons outside of the Project, including property designated Urban Reserve, Landowner shall be entitled to receive a reimbursement from the benefited property owner(s) (and not the City) for the pro rata cost of the improvements, and, in the case of any over sizing, the pro rata cost of the improvements which exceed Landowner's obligation.

Reimbursement may be provided directly from the owner abutting such improvements or from a community facilities district or any such other infrastructure financing district if such a district is formed by or includes such properties and includes monies for the construction of said improvements. Exhibit "BB" contains a listing of improvements subject to reimbursement to Landowner from benefited property owners for improvements, including improvements that exceed Landowner's obligations.

City shall use its best efforts, to the extent City has the authority to do so, to impose the foregoing obligation to pay said reimbursement, as a condition of development of such benefited property owned by third parties, at the time such property owner requests a discretionary approval or other such entitlement from City for development of the benefited property whereby such condition can be imposed. Such reimbursement shall be due and payable on the earlier of the formation of a CFD and issuance of bonds for such CFD serving development by such third parties or recordation of the first large lot subdivision map serving the development by such third

party.

4.2.3 Reimbursable Hard Costs. The "hard costs" of construction to be credited to Landowner by the City, and to be reimbursed to Landowner by a third party, shall consist of the identifiable costs of construction, plus 20% assumed for the "soft costs" of design, engineering, construction, construction management, permitting, environmental mitigation requirements, staking, and plan check and inspection fees as set forth in Exhibit "BB," and, as to the "hard costs" of construction, confirmed by City for the reimbursable or credited work.

4.2.4 [Reserved].

4.2.5 Increased Amount of Reimbursements. Reimbursements from third parties for improvements shall be annually increased by the CCI from the date that Landowner incurred the reimbursable cost to the date of reimbursement.

4.2.6 Term for Credits and Reimbursements. City's obligation to provide any credits or to pay or assist in obtaining any reimbursements to Landowner that accrues hereunder shall terminate thirty (30) years after the Effective Date of this Agreement.

4.2.7 Not a Limitation. Nothing in the foregoing Section 4.2 shall be construed to limit Landowner from receiving, in consideration of the improvements to be constructed by Landowner hereunder, any other credits or reimbursements from City otherwise provided under then existing City policy, rule, regulation or ordinance.

4.3 Applications for Permits and Entitlements.

4.3.1 Action by City. City agrees that it will accept, in good faith, for processing review and action, all applications for development permits or other entitlements for use of the Property in accordance with the Entitlements and this Agreement, and shall exercise its best efforts to act upon such applications in an expeditious manner.

4.3.2 Maps and Permits. Provided that the Public Facilities CFD, if applicable, has been formed and is duly authorized to levy the special tax therefore in accordance with Section 3.17 hereof, and further provided that the Public Services CFD and Municipal Services CFD have been or will at the time of the requested final approval be formed and authorized to levy the special taxes against the applicable portion of the Property in accordance with this Agreement, and further provided that Landowner is not in default of this Agreement, City shall not refrain from approving final residential lot subdivision maps nor shall it cease to issue building permits, certificates of occupancy or final inspections for development of the Property that is

consistent with the Entitlements. The acceptance, review and approval of any application for a final residential lot subdivision map, final non-residential subdivision map or building permit may be conditioned upon the formation of the Public Facilities CFD, if applicable, and the submission of petitions to form the Public Services CFD and Municipal Services CFD or annex the Property into the Public Services CFD and/or Municipal Services CFD, as applicable. Prior to such formation and/or annexation, City shall accept, for review, processing and approval, consistent with the Entitlements, applications for tentative residential lot and non-residential subdivision maps and for tentative and final large lot subdivision or parcel maps consistent with the Parcels described by the Specific Plan for the Property.

City acknowledges that under Government Code Section 66452.6, the term of a tentative subdivision map will be automatically extended for a period of time where a sub-divider is obligated to install certain improvements located outside the boundaries of the subdivision. In determining the term of any tentative subdivision map approved by the City for the Property, or any portion thereof, and without limiting the effect of any other provisions of the Government Code dealing with map extensions, the City agrees that the CFD Improvements described hereunder shall be treated as such off-site improvements for purposes of applying Section 66452.6 of the Government Code.

A subdivision, as defined in Government Code Section 66473.7, shall not be approved unless any tentative map prepared for the subdivision complies with the provisions of said Section 66473.7; this provision is included in this Agreement to comply with Government Code Section 65867.5.

4.3.3 Personnel. Nothing in this Agreement shall be construed to require City to hire or retain personnel for the purposes of evaluating, processing or reviewing applications for permits, maps or other entitlements or for the design, engineering or construction of public facilities in excess of those for which provision is made in the normal and customary budgeting process or fee schedules of City.

4.4 Subdivision Map Act Waiver. Notwithstanding any other provisions of this Agreement, or of Sections 66452.1, 66452.2, 66456.2 and 66458, of the Government Code (or any successor or replacement statute), Landowner expressly waives the time limits for review and approval by City of tentative subdivision maps to the extent that each such period does not exceed one hundred fifty (150) days beyond the time otherwise provided by law, unless Landowner and City mutually agree to another time limit.

4.5 Limited Waiver of Protest Rights. In conjunction with any proceedings creating an assessment district or other applicable financing mechanism for which provision is made in this Agreement, Landowner waives herewith any right to protest

which it may have under Section 2825 of the Streets and Highways Code to the extent that such protest would arise under Section 2825(a) through 2825(f) and Section 2825(h); but expressly retains the right of protest with respect to Section 2825(g).

4.6 Moratorium, Quotas, Restrictions or Other Growth Limitations. Subject to applicable law relating to the vesting provisions of development agreements, Landowner and City intend that except as otherwise provided herein, this Agreement shall vest the Entitlements against subsequent City resolutions, ordinances, growth control measures and initiatives or referenda, other than a referendum that specifically overturns City's approval of the Entitlements, that would directly or indirectly limit the rate, timing or sequencing of development, or would prevent or conflict with the land use designations, permitted or conditionally permitted uses on the Property, design requirements, density and intensity of uses as set forth in the Entitlements, and as further set forth in Section 2.4.1 above, and that any such resolution, ordinance, initiative or referendum shall not apply to the Entitlements and the Project. Notwithstanding any other provision of this Agreement, Landowner shall, to the extent allowed by the laws pertaining to development agreements, be subject to any growth limitation ordinance, resolution, rule, regulation or policy which is adopted and applied on a uniform, City-Wide basis and directly concerns an imminent public health or safety issue. In such case, City shall apply such ordinance, resolution, rule, regulation or policy uniformly, equitably and proportionately to Landowner and the Property and to all other public or private owners and properties directly affected thereby. By way of example only, an ordinance which would preclude the issuance of a building permit due to a City-Wide lack of adequate sewage treatment capacity to meet additional demand would directly concern an imminent public health issue under the terms of this paragraph and would support a denial of a building permit within the Property or anywhere else in the City if approval would require additional sewage treatment capacity. However, an effort to limit the issuance of building permits because of a general increase in traffic congestion levels in the City would not be deemed to directly concern an imminent public health or safety issue under the terms of this paragraph.

4.7 Subsequent Proposed Development. City and Landowner acknowledge that the terms of this Agreement provide for substantial financial commitments by Landowner to ensure that the Project results in a net positive fiscal effect on the City and its residents. City agrees to use its best efforts to assure that the development agreements in connection with any subsequent annexation and associated specific plan shall be subject to financial commitments of the same or greater magnitude as those made by Landowner under this Agreement, to the extent allowed by law. This provision shall not apply to development of infill areas within the City.

4.8 Essence of Agreement. Sections 2, 3, 4, 5 and 6 are the essence of this Agreement.

ARTICLE 5. DEFAULT, REMEDIES, TERMINATION

5.1 General Provisions. Subject to extensions of time by mutual consent in writing, failure or unreasonable delay by either party to perform any term or provisions of this Agreement shall constitute a default. In the event of alleged default or breach of any term or condition of this Agreement, the party alleging such default or breach shall give the other party not less than thirty (30) days notice in writing specifying the nature of the alleged default and the manner in which said default may be satisfactorily cured. During any such thirty (30) day period, the party charged shall not be considered in default for purposes of termination or institution of legal proceedings.

After notice and expiration of the thirty-day period, the other party to this Agreement at its option may institute legal proceedings pursuant to this Agreement or give notice of intent to terminate the Agreement pursuant to California Government Code Section 65868 and regulations of City implementing said Government Code Section. Following notice of intent to terminate, the matter shall be scheduled for consideration and review by the City Council within thirty (30) calendar days in the manner set forth in Government Code Sections 65865, 65867 and 65868 and City regulations implementing such Sections.

Following consideration of the evidence presented in said review before the City Council, either party alleging the default by the other party may give written notice of termination of this Agreement to the other party.

Evidence of default may also arise in the course of a regularly scheduled periodic review of this Agreement pursuant to Government Code Section 65865.1. If either party determines that the other party is in default following the completion of the normally scheduled periodic review, said party may give written notice of default of this Agreement as set forth in this section, specifying in said notice the alleged nature of the default, and potential actions to cure said default and shall specify a reasonable period of time in which such default is to be cured. If the alleged default is not cured within thirty (30) days or within such longer period specified in the notice, or if the defaulting party waives its right to cure such alleged default, the other party may terminate this Agreement.

No building permit shall be issued or building permit application accepted for any structure on the Property if the permit applicant owns and controls any property subject to this Agreement, and if such applicant or entity or person controlling such applicant is in default of the terms of this Agreement.

5.2 Annual Review. City shall, at least every twelve (12) months, per Roseville Municipal Code Chapter 19.84, as such period may be amended, during the term of this Agreement, review the extent of good faith substantial compliance by Landowner with

the terms of this Agreement. Such periodic review shall be limited in scope to compliance with the terms of this Agreement pursuant to Section 65865.1 of the Government Code and the monitoring of mitigation in accordance with Section 210816 of the Public Resources Code of the State of California. Notice of such review shall include the statement that any review of obligations of Landowner as set forth in this Agreement may result in termination of this Agreement. A finding by City of good faith compliance by Landowner with the terms of the Agreement shall be conclusive with respect to the performance of Landowner during the period preceding the review. Landowner shall be responsible for the cost reasonably and directly incurred by the City to conduct such review, the payment of which shall be due within thirty (30) days after conclusion of the review and receipt from the City of the bill for such costs.

Upon not less than thirty (30) days written notice by the City, Landowner shall provide such information as may be reasonably requested and deemed to be required by the City in order to ascertain compliance with this Agreement.

In the same manner prescribed in Section 10, the City shall deposit in the mail to Landowner a copy of all staff reports and related exhibits concerning contract performance and, to the extent practical, at least ten (10) calendar days prior to any such periodic review. Landowner shall be permitted an opportunity to be heard orally or in writing regarding its performance under this Agreement before the City Council or, if the matter is referred to the Planning Commission, before the Planning Commission.

If City takes no action within thirty (30) days following the hearing required under Roseville Municipal Code Section 19.94.080, or any successor thereof or amendment thereto, Landowner shall be deemed to have complied in good faith with the provisions of the Agreement.

5.3 Enforced Delay, Extension of Times of Performance. In addition to specific provisions of this Agreement, performance by either party hereunder shall not be deemed to be in default where delays or default are due to war, insurrection, strikes, walkouts, riots, floods, drought, earthquakes, fires, casualties, acts of God, acts of terrorism, governmental restrictions imposed or mandated by other governmental entities, enactment of conflicting state or federal laws or regulations, new or supplementary environmental regulation, litigation, or similar bases for excused performance. If written notice of such delay is given to City within thirty (30) days of the commencement of such delay, an extension of time for such cause shall be granted in writing for the period of the enforced delay, or longer as may be mutually agreed upon.

5.4 Legal Action. In addition to any other rights or remedies, either party may institute legal action to cure, correct or remedy any default, to enforce any covenant or agreement herein, or to enjoin any threatened or attempted violation.

Provided, however, that the Landowner, its successors and assigns hereby waive any and all claims for monetary damages against City arising out of this Agreement at any time. All legal actions shall be initiated in the Superior Court of the County of Placer, State of California, or in the Federal District Court in the Eastern District of California.

5.5 Effect of Termination. If this Agreement is terminated following any event of default of Landowner or for any other reason, such termination shall not affect the validity of any building or improvement within the Property which is completed as of the date of termination, provided that such building or improvement has been constructed pursuant to a building permit issued by the City. Furthermore, no termination of this Agreement shall prevent Landowner from completing and occupying any building or other improvement authorized pursuant to a valid building permit previously issued by the City that is under construction at the time of termination, provided that any such building or improvement is completed in accordance with said building permit in effect at the time of such termination.

5.6 Applicable Law and Attorneys' Fees. This Agreement shall be construed and enforced in accordance with the laws of the State of California. Should any legal action be brought by either party for breach of this Agreement, or to enforce any provisions herein, the prevailing party to such action shall be entitled to reasonable attorneys' fees, court costs and such other costs as may be fixed by the Court.

ARTICLE 6. HOLD HARMLESS AGREEMENT

Landowner and its successors-in-interest and assigns, hereby agrees to, and shall defend and hold City, its elective and appointive boards, commissions, officers, agents, and employees harmless from any liability for damage or claims for damage for personal injury, or bodily injury including death, as well as from claims for property damage which may arise from the operations of Landowner, or of Landowner's contractors, subcontractors, agents, or employees under this Agreement, whether such operations be by Landowner, or by any of Landowner's contractors or subcontractors, or by any one or more persons directly or indirectly employed by, or acting as agent for, Landowner or Landowner's contractors or subcontractors, unless such damage or claim arises from the negligence or willful misconduct of City. The foregoing indemnity obligation of Landowner shall not apply to any liability for damage or claims for damage with respect to any damage to or use of any public improvements after the completion and acceptance thereof by City. In addition to the foregoing indemnity obligation, Landowner agrees to and shall defend, indemnify and hold City, its elective and appointive boards, commissions, officers, agents and employees harmless from any suits or actions at law or in equity arising out of the execution, adoption or implementation of this Agreement, exclusive of any such actions brought by Landowner, its successors-in-interests or assigns. City acknowledges hereby that the foregoing liability of Landowner shall be limited to its interest in the Property and that

neither Landowner nor any of its partners, officers, shareholders, employees or agents shall have any personal liability therefore.

ARTICLE 7. PROJECT AS A PRIVATE UNDERTAKING

It is specifically understood and agreed by and between the parties hereto that the subject project is a private development. No partnership, joint venture or other association of any kind is formed by this Agreement.

ARTICLE 8. COOPERATION IN THE EVENT OF LEGAL CHALLENGE

In the event of any legal action instituted by a third party or other governmental entity or official challenging the validity of any provision of this Agreement, the parties hereby agree to cooperate in defending said action.

ARTICLE 9. GENERAL

9.1 Enforceability. The City agrees that unless this Agreement is amended or canceled pursuant to the provisions of this Agreement and the Adopting Ordinance, this Agreement shall be enforceable by any party hereto notwithstanding any change hereafter in any applicable general plan, specific plan, zoning ordinance, subdivision ordinance or building regulation adopted by City, or by initiative, which changes, alters or amends the rules, regulations and policies applicable to the development of the Property at the time of approval of this Agreement, as provided by Government Code Section 65866.

9.2 City Finding. The City hereby finds and determines that execution of this Agreement is in the best interest of the public health, safety and general welfare and is consistent with the General Plan.

9.3 Third Party Beneficiaries. This Agreement is made and entered into for the sole protection and benefit of Landowner and City and their successors and assigns, no other person shall have any right of action based upon any provision in this Agreement.

9.4 Severability. Except as set forth herein, if any term, covenant or condition of this Agreement or the application thereof to any person, entity or circumstance shall, to any extent, be invalid or unenforceable, the remainder of this Agreement, or the application of such term, covenant or condition to persons, entities or circumstances other than those as to which it is held invalid or unenforceable, shall not be affected thereby and each term, covenant or condition of this Agreement shall be valid and be enforced to the fullest extent permitted by law; provided, however, if any provision of this Agreement is determined to be invalid or unenforceable and the effect

thereof is to deprive a party hereto of an essential benefit of its bargain hereunder, then such party so deprived shall have the option to terminate this entire Agreement from and after such determination.

9.5 Construction. This Agreement shall be subject to and construed in accordance and harmony with the Roseville Municipal Code, as it may be amended, provided that such amendments do not impair the rights granted to the parties by this Agreement.

9.6 Other Necessary Acts. Each party shall execute and deliver to the other all such other further instruments and documents as may be reasonably necessary to carry out this Agreement in order to provide and secure to the other party the full and complete enjoyment of its rights and privileges hereunder.

9.7 Estoppel Certificate. Either party may, at any time, and from time to time, deliver written notice to the other party requesting such party to certify in writing that, to the knowledge of the certifying party, (i) this Agreement is in full force and effect and a binding obligation of the parties, (ii) this Agreement has not been amended or modified either orally or in writing, or if so amended, identifying the amendments, and (iii) the requesting party is not in default in the performance of its obligations under this Agreement, or if in default, to describe therein the nature of such default. The party receiving a request hereunder shall execute and return such certificate within thirty (30) days following the receipt thereof. City acknowledges that a certificate hereunder may be relied upon by transferees and mortgagees of Landowner.

9.8 Mortgagee Protection. The parties hereto agree that this Agreement shall not prevent or limit Landowner, in any manner, at Landowner's sole discretion, from encumbering the Property or any portion thereof or any improvement thereon by any mortgage, deed of trust or other security device securing financing with respect to the Property, except as limited by the provisions of this section. City acknowledges that the lenders providing such financing may require certain Agreement interpretations and modifications and agrees upon request, from time to time, to meet with Landowner and representatives of such lenders to negotiate in good faith any such request for interpretation or modification. City will not unreasonably withhold its consent to any such requested interpretation or modification provided such interpretation or modification is consistent with the intent and purposes of this Agreement. Any Mortgagee of the Property shall be entitled to the following rights and privileges:

- a. Neither entering into this Agreement nor a breach of this Agreement shall defeat, render invalid, diminish or impair the lien of any mortgage on the Property made in good faith and for value, unless otherwise required by law.

- b. The Mortgagee of any mortgage or deed of trust encumbering the Property, or any part thereof, which Mortgagee has submitted a request in writing to City in the manner specified herein for giving notices, shall be entitled to receive written notification from City of any default by Landowner in the performance of Landowner's obligations under this Agreement.
- c. If City receives a timely request from a Mortgagee requesting a copy of any notice of default given to Landowner under the terms of this Agreement, City shall provide a copy of that notice to the Mortgagee within ten (10) days of sending the notice of default to Landowner. The Mortgagee shall have the right, but not the obligation, to cure the default during the remaining cure period allowed to Landowner under this Agreement.
- d. Any Mortgagee who comes into possession of the Property, or any part thereof, by any means, whether pursuant to foreclosure of the mortgage deed of trust, or deed in lieu of such foreclosure or otherwise, shall take the Property, or part thereof, subject to the terms of this Agreement. Notwithstanding any other provision of this Agreement to the contrary, no Mortgagee shall have an obligation or duty under this Agreement to perform any of Landowner's obligations or other affirmative covenants of Landowner hereunder, or to guarantee such performance; provided, however, that to the extent that any covenant to be performed by Landowner is a condition precedent to the performance of a covenant by City, the performance thereof shall continue to be a condition precedent to City's performance hereunder, and further provided that any sale, transfer or assignment by any Mortgagee in possession shall be subject to the provisions of Article 11 of this Agreement.

ARTICLE 10. NOTICES

All notices required by this Agreement, the enabling legislation, or the procedure adopted pursuant to Government Code Section 65865, shall be in writing and delivered in person or sent by certified mail, postage prepaid.

Notice required to be given to the City shall be addressed as follows:

Development Services Director
City of Roseville
311 Vernon Street
Roseville, California 95678

Notice required to be given to the Landowner shall be addressed as follows:

Brookfield Sunset, LLC
2271 Lava Ridge Court, Suite 220
Roseville, CA 95661
Attention: John Norman

Jennifer M. Amoruso, Successor Trustee of the
Amoruso Family Living Trust Dated March 14, 2005
P.O. Box 640
Plymouth, CA 95669

With a copy to:

Marcus J. Lo Duca, Esq.
Law Office Of Marcus J. Lo Duca, P.C.
3200 Douglas Boulevard, Suite 300
Roseville, CA 95661

Steve Crosbie
Crosbie Real Estate
2545 E. Bidwell Street
Folsom, CA 95630-6440

Any of the parties may change the address stated herein by giving notice in writing to the other parties, and, thereafter, notices shall be addressed and delivered to the new address.

ARTICLE 11. ASSIGNMENT

From and after recordation of this Agreement against the Property, Landowner shall have the full right to assign this Agreement as to the Property, or any portion thereof, in connection with any sale, transfer or conveyance thereof, and upon the express written assignment by Landowner and assumption by the assignee of such assignment in the form attached hereto as Exhibit "DD" and the conveyance of Landowner's interest in the Property related thereto, Landowner shall be released from any further liability or obligation hereunder related to the portion of the Property so conveyed and the assignee shall be deemed to be the "Landowner", with all rights and obligations related thereto, with respect to such conveyed property.

ARTICLE 12. FORM OF AGREEMENT, EXHIBITS

This Agreement is executed in two duplicate originals, each of which is deemed

to be an original. This Agreement, inclusive of its Recitals and Exhibits, constitutes the entire understanding and agreement of the parties.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Ordinance No.____, adopted by the Council of the City of Roseville on the ____day of _____, 2016.

PARCEL 1

ALL THAT REAL PROPERTY SITUATED IN THE COUNTY OF PLACER, STATE OF CALIFORNIA, BEING A PORTION OF SECTION 11, TOWNSHIP 11 NORTH, RANGE 5 EAST, M.D.M. AND BEING A PORTION OF THAT REAL PROPERTY DESCRIBED IN THAT GRANT DEED TO PETER AMORUSO & JENNIFER M. AMORUSO, TRUSTEES OF THE AMORUSO FAMILY LIVING TRUST DATED MARCH 14, 2005, RECORDED AS INSTRUMENT NO. 2005-0105020, OFFICIAL RECORDS OF PLACER COUNTY, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCING AT THE SOUTHEAST CORNER OF SAID SECTION 11; THENCE ALONG THE EAST LINE THEREOF, NORTH 00°12'11" WEST, 880.57 FEET TO THE TRUE POINT OF BEGINNING; THENCE LEAVING SAID EAST LINE ALONG THE FOLLOWING 12 COURSES:

1. THENCE SOUTH 76°07'24" WEST, 104.21 FEET;
2. THENCE NORTH 77°38'46" WEST, 331.04 FEET;
3. THENCE TO THE LEFT, ALONG THE ARC OF A 476.00 FOOT RADIUS, NON-TANGENT CURVE, CONCAVE TO THE EAST, HAVING A RADIAL BEARING OF NORTH 80°31'50" WEST, A CENTRAL ANGLE OF 06°47'22", AND AN ARC LENGTH OF 56.40 FEET;
4. THENCE TO THE RIGHT ALONG THE ARC OF A 524.00 FOOT RADIUS, REVERSE CURVE, HAVING A CENTRAL ANGLE OF 85°05'31", AND AN ARC LENGTH OF 778.21 FEET;
5. THENCE SOUTH 87°46'19" WEST, 204.70 FEET;
6. THENCE NORTH 01°46'01" WEST, 1,554.79 FEET;
7. THENCE SOUTH 88°13'59" WEST, 773.11 FEET;
8. THENCE TO THE LEFT, ALONG THE ARC OF A 743.51 FOOT RADIUS, NON-TANGENT CURVE, CONCAVE TO THE WEST, HAVING A RADIAL BEARING OF SOUTH 86°54'36" EAST, A CENTRAL ANGLE OF 04°51'25", AND AN ARC LENGTH OF 63.03 FEET;
9. THENCE NORTH 01°46'01" WEST, 1,018.17 FEET;
10. THENCE TO LEFT, ALONG THE ARC OF A 93.88 FOOT RADIUS, NON-TANGENT CURVE, CONCAVE TO THE NORTHWEST, HAVING A RADIAL BEARING OF SOUTH 14°45'43" EAST, A CENTRAL ANGLE OF 56°11'20", AND AN ARC LENGTH OF 92.07 FEET;
11. THENCE NORTH 88°13'59" EAST, 703.80 FEET;
12. THENCE NORTH 01°46'01" WEST, 2,183.68 FEET TO THE SOUTH LINE OF SUNSET BOULEVARD WEST, COUNTY ROAD NO. (A3042) AS CONVEYED TO THE COUNTY OF PLACER BY DEED RECORDED AUGUST 18, 1966 IN BOOK 1123, AT PAGE 612, OFFICIAL RECORDS OF PLACER COUNTY; THENCE ALONG SAID SOUTH LINE, NORTH 89°21'05" EAST, 1,273.09 FEET TO A POINT ON SAID EAST LINE OF SECTION 11; THENCE ALONG SAID EAST LINE, SOUTH 00°12' 11" EAST, 4,372.54 FEET TO THE TRUE POINT OF BEGINNING.

CONTAINING 148.710 ACRES, MORE OR LESS.

THE BEARINGS AND DISTANCES USED ALONG THE BOUNDARY OF THE PROPERTY DESCRIBED IN DOC. NO. 2005- 0105020 ARE NOT BASED UPON A FIELD SURVEY AS DESCRIBED IN L.S. ACT SECTION 8762. THEY DO NOT ESTABLISH THE BOUNDARY OF SAID PROPERTY AND ARE INCLUDED TO ASSIST IN LOCATING THE NEW BOUNDARY APPROVED BY MINOR BOUNDARY LINE ADJUSTMENT NO. PLN15-00351 ONLY.

INTRODUCTION

The Amoruso Ranch Specific Plan (ARSP) Area Water Conservation Plan (Plan) has been prepared at the request of Brookfield Residential Properties, Inc. (Brookfield) to meet the City of Roseville's (City) requirements and in support of the ARSP process.

WATER CONSERVATION PLAN PURPOSE

In February 2008, then California Governor Arnold Schwarzenegger introduced a seven-part comprehensive plan for improving the Sacramento-San Joaquin Delta. As part of this effort, the Governor directed state agencies to develop a plan to reduce statewide per capita urban water use by 20 percent by the year 2020. In February 2010, the State Water Resources Control Board issued the 20x2020 Water Conservation Plan.

As part of the response to the 20x2020 Plan, the City has a requirement that all new specific plan projects incorporate water conservation measures into the overall project design such that the overall water demands (both potable and recycled) are reduced. The City has an overall conservation goal of 20% for potable and irrigation water usage throughout the City.

This Plan presents potentially feasible measures and guidance that can result in a reduction of the projected overall water usage within the ARSP Area, which will contribute towards the City-wide conservation goal. The projected reduction in water use will be established as part of this Plan through a process of: estimating the baseline water demands without conservation measures; identification of potentially feasible conservation measures; and estimation of the resultant water demands with application of the identified conservation measures. This Plan has been developed in conformance with the Water Efficient Landscape Ordinance (WELO) as a minimum.

ARSP AREA LOCATION AND DESCRIPTION

Project Vicinity

The ARSP Area consists of approximately 694.4 acres located in the northwest edge for the City of Roseville. Prior to the Specific Plan's adoption, the plan area was recognized as a logical growth extension for the City. The Specific Plan Area is bounded on the southwest by the Al Johnson Wildlife Area, to the west by the Gleason property, to the south by the Creekview Specific Plan Area, to the east by the future proposed Placer Ranch Specific Plan Area and to the north by the existing Toad Hills Ranches #1 area and unincorporated Placer County. The project vicinity is shown on Figure 1.

Figure 1 – ARSP Area Project Vicinity

Kimley»»Horn

Pre-Development Conditions

The pre-development conditions of the ARSP Area were as a cattle ranch and for irrigated crops. The primary use was open grazing land, but included a small ranch house and out buildings. The land is gently rolling terrain generally trending to the west and south. Minor drainages flow in a radial pattern from a slight rise in the northeast quadrant of the property. The elevation changes from approximately 115 feet to 71 feet gently from the northeast down to the southwest.

The site vegetation is generally limited to short, seasonal grasses. There are several oak trees located along University Creek and a number of non-native trees located around the former ranch house. Wetland conditions and their associated flora and fauna are located in small areas typically along the drainage corridors and in flats along the southern boundary. Figure 2 highlights the ARSP Area pre-development conditions.

Figure 2 – ARSP Area Pre-Development Conditions

ARSP Area Development Opportunities and Constraints

The proposed ARSP Area land use plan is influenced by several factors, including the physical setting, land use and circulation conditions, and public policies. Two significant aspects that influence the development of the land plan are described below and depicted on Figure 3.

Placer Parkway

The proposed Placer Parkway will be a dominant feature that sweeps through the ARSP Area. Interchanges at Fiddymont Road and Santucci Boulevard will provide access to the ARSP Area.

Open Space and Resources Preservation

The ARSP Area will support open space and resource preservation by providing permanent open space. In combination with the 1,700-acre open space afforded by the City of Roseville Al Johnson Wildlife Area, this open space provides connectivity with open space within the Creekview Specific Plan Area, and lands to the east of the ARSP Area.

The Amoruso Ranch Specific Plan will provide an open space corridor that includes a pedestrian and bike path linkage between this major open space area and the City's regional trail system. In addition, the corridor will provide a permanent preservation area for wetland resources.

Figure 3 – ARSP Area Opportunities and Constraints

ARSP Area Land Use Plan

The ARSP Area provides for a mix of land uses to achieve the desired community form and objectives. These land use designations include low-, medium- and high density residential uses; commercial and office uses; which in some cases are sited with one another and/or with residential uses, public and quasi-public uses for the schools and civic activities such as a fire station, parks and open space uses, and an urban reserve.

At buildout, the ARSP Area will provide for 2,827 dwelling units, it adds approximately 51 acres of commercial retail and office land uses, and provides approximately 22-acres of parks and 146-acres of open space. The ARSP Area Land Use Plan is shown in Figure 4.

BASELINE WATER USE ESTIMATION

The calculation of the baseline water use estimation was established based on the land use designations developed as part of the ARSP Area Land Use Plan shown on Figure 4.

The baseline water use for the project was established using the City's standard water use factors, as developed for the City by MWH in 2006. The City of Roseville employs standard demand factors for residential land uses of varying densities, as well as standard demand factors for commercial/other land uses. The residential demands are presented as gallons per day (GPD) per dwelling unit (DU), and the commercial/other demands are presented as GPD per acre. The City's demand factors are listed in Table 1.

Table 1
Amoruso Ranch Specific Plan
Water Conservation Plan
City of Roseville Demand Factors

General Plan Land Use Category	Average Day Demand
Residential GPD/DU	
LDR1: < 3.5 DU / Acre	728 GPD/DU
LDR2: > 3.5 to 5 DU / Acre	600 GPD/DU
LMDR1: > 5 to 6 DU / Acre	521 GPD/DU
LMDR2: > 6 to 8 DU / Acre	430 GPD/DU
MDR: > 8 to 12 DU / Acre	323 GPD/DU
HDR1: > 12 to 16 DU / Acre	288 GPD/DU
HDR2: > 16 DU / Acre	177 GPD/DU
Non-Residential GPD/Acre	
Commercial / Retail	2598 GPD/Acre
Business Professional	2598 GPD/Acre
Light Industrial	2598 GPD/Acre
Industrial	2562 GPD/Acre
Railroad Yard	109 GPD/Acre
Elementary School	3454 GPD/Acre
High School	4068 GPD/Acre
Public (Fire Station, etc)	1780 GPD/Acre
Park / Recreation	2988 GPD/Acre
Open Space / ROW	0 GPD/Acre
Vacant	0 GPD/Acre

Utilizing the City's demand factors, the estimated annual water use for the Low-, Medium- and High-Density Residential units proposed within the ARSP Area have been calculated. The basis of the Low-, Medium- and High-Density Residential water use is presented within Table 2.

Table 2
Amoruso Ranch Specific Plan
Water Conservation Plan
Water Use Estimation – LDR, MDR and HDR

Land Use Category Density	Number of Units	Average Day Demand (GPD/DU)	Total Average Day Demand (GPD)	Total Average Day Demand (AFY)	Total Average Day Demand with 2% (AFY) ¹
LDR1: < 3.5 DU / Acre	148	728	107,744	120.7	123.1
LDR2: > 3.5 to 5 DU / Acre	116	600	69,600	78.0	79.5
LMDR1: > 5 to 6 DU / Acre	401	521	208,921	234.0	238.7
LMDR2: > 6 to 8 DU / Acre	757	430	325,510	364.6	371.9
MDR: > 8 to 12 DU / Acre	155	323	50,065	56.1	57.2
HDR1: > 12 to 16 DU / Acre	380	288	109,440	122.6	125.0
HDR2: > 16 DU / Acre	760	177	134,520	150.7	153.7
Community Commercial - Village Center – Residential	109	288	31,392	35.2	35.9
Urban Reserve	1	728	728	0.8	0.8
Total	2,827	-	1,037,920	1,162.6	1,185.9

The water use estimation, as established by the City for purposes of water conservation does not distinguish between potable water and recycled water. Table 3 includes a summary of the estimated baseline water demands. Consistent with previous similar analyses completed by the City, a factor for water system losses has not been included in the water conservation calculations. It has, however, been included for informational purposes in both Tables 2 and 3.

¹ Demand accounts for 2% system losses.

SINGLE FAMILY RESIDENTIAL WATER USE DISTRIBUTION

Single family residential water use for land use designations for Low-, Medium- and High-Density (LDR, MDR and HDR) parcels can be further divided by the use within the home and the landscape irrigation demands outside of the home.

Table 4 represents the typical single family residential water usage that would be attributable to residential units within the land use designation of LDR and MDR. The percentage of total use will have a different distribution for HDR primarily attributable to the reduction in irrigated landscaped area.

Table 4
Amoruso Ranch Specific Plan
Water Conservation Plan
Single Family Residential Water Usage

Residential Use	Percentage of Total¹
Landscaping	51%
Toilets	13%
Faucets, Cooking, Cleaning	10%
Showers	9%
Clothes Washing	8%
Bath	6%
Toilet Leaks	2%
Dishwasher	1%

Based on historic data the typical split between backyard and front yard irrigation of typical LDR and MDR parcels is approximately sixty-forty, with 60% of the landscape irrigation demand attributable to the backyard and 40% of the landscape irrigation attributable to the front yard. This is the result of typically smaller front yards than backyards along with less

¹ Percentage of total water use was derived from information obtained from the City of Roseville Frequently Asked Questions (FAQ) on the subject of water conservation.

landscape area in the front yard due to driveways and walks. Utilizing this ratio of front yard to backyard irrigation use, results in a further breakdown of the 51% total water use to 20.4% for the front yards and 30.6% for the backyards. The separation of front yard and backyard irrigation demands for LDR and MDR parcels allows analysis and application of different conservation measures between the two distinct areas.

The HDR units typically do not have front yard and backyard irrigation demand; however, there are common area irrigation demands that are attributable to HDR units. Average planning numbers for irrigation demands for HDR units is 20% of the estimated overall water usage. This value is expressed as 20% of the annual irrigation demand and not based on designation of demands split between front and back yard area designations. Table 5 presents a summary of demands based on the assumptions listed above.

Table 5
Amoruso Ranch Specific Plan
Water Conservation Plan
Residential Irrigation Water Demands

Land Use	Annual Demand (AFY)	Annual Demand Front Yard (AFY)	Annual Demand Backyard (AFY)	Annual Total Irrigation Demand (AFY)
Low Density Residential	739.5	150.86	226.29	377.15
Medium Density Residential	200.0	40.80	61.20	102.00
High Density Residential ¹	187.1	N/A	N/A	37.42
Urban Reserve	0.8	0.16	0.24	0.40
Total	1,127.4	191.82	287.73	516.97

¹ Demand for HDR parcels was calculated differently from LDR and MDR parcels, as described above. Demand for HDR parcels was not separated into front yard and backyard demand since traditional front and back yards are not present on HDR parcels.

WATER USE REDUCTION STRATEGIES

A series of implementable water use reduction strategies have been identified for the ARSP Area. These strategies are discussed in more detail in the following subsections of this document, including the estimated percentage of water use reduction.

The water use reduction strategies identified for the ARSP Area include:

- Reduction of Residential Turf Areas
- Reduction of Park and Recreation and Common Area Turf (Non-Residential)
- Irrigation Management
- Water Conservation Methods

REDUCTION OF RESIDENTIAL TURF AREAS

As represented in the previous sections and tables, turf areas account for a significant portion of the water demand of the residential development. In turn, this correlates to one of the greatest opportunities to reduce the projected water demands. The ARSP project will adopt a strategy to encourage the new residential developments to reduce the magnitude of front yard turf areas and plant these areas with vegetation that uses far less water.

The City of Roseville estimates that for a same sized area of turf, in comparison to utilization of low-water consumption vegetation, could result in a savings of up to 70% in the amount of water required. Therefore, 30% of the amount of water would be required for the low consumption vegetation as compared to the lawn area's water demand.

Low water consumption vegetation, benefits not only from the reduced requirement for uptake by the plants, it also benefits from more efficient landscape irrigation systems. Low water consumption vegetation is typically irrigated by drip systems, as opposed to overhead spray systems for lawn and turf areas.

Typical front yard landscaping generally ranges between 75% and 85% irrigated area. For purposes of this analysis, the low-point of 75% irrigated area has been selected with 70% being lawn area and the remaining irrigated area being lower water using plants and planters.

It is reasonable to reduce irrigated lawn areas from 70% of the typical front yard for LDR and MDR, as well as reduce the common area lawns on HDR, to 42%. This results in an increase of low water consumption vegetation from 5% to 33%. An example of the potential reductions in turf area is shown in Figure 5. The comparisons of water demands for irrigation are shown in Table 6.

Figure 5 – Front Yard Water Conservation Comparison

Table 6
Amoruso Ranch Specific Plan
Water Conservation Plan
Reduced Landscape Turf Area

Land Use	Front Yard Irrigated Area ¹	Base Condition		Base Condition with Water Conservation	
		Turf Area	Low Water Use Area	Turf Area	Low Water Use Area ²
LDR, MDR and HDR ³	75%	70%	5%	42%	33%

Table 7 is a comparison of the water use efficiencies that result from reduction in front yard turf areas. Since assumptions are based on similar reductions in turf areas for LDR, MDR and HDR product types, the water demands have been combined for presentation.

Table 7
Amoruso Ranch Specific Plan
Water Conservation Plan
Front Yard Irrigated Area Water Efficiencies

Land Use	Annual Demand Front Yard (AFY) ⁴	New Front Yard Demand (AFY)	Annual Demand Savings (AFY)	Annual Demand Savings (%)	Water System Savings
Residential Properties LDR and MDR	191.82	139.24	52.58	27.4%	Potable
HDR	37.42	27.16	10.26	27.4%	Recycled
Total	229.24	166.40	62.84	27.4%	

As an example of how these values were calculated, the calculation for the annual front yard turf demand and the reduced annual front yard demand is presented below.

For the annual front yard turf demand, as calculated for low and medium density residential land uses, 75% of the front yard is landscaped with 70% turf and 5% low water use plantings. Since low water use plantings use 30% of the water required for turf, this 5%

¹ As a percentage of the front yard.

² Includes 5% existing low water use plantings plus 28% new low water use plantings.

³ Represents the percentage of the entire exterior area for HDR.

⁴ Front yard demand from Table 5. HDR is total since there is not a distinction between front and back yards.

Kimley»Horn

area is equal to 1.5% turf area water demand. This results in the following annual front yard demands:

Turf (LDR & MDR):

$$191.82 \text{ AFY} * \left(\frac{70\%}{71.5\%} \right) = 187.80 \text{ AFY}$$

Low Water Use (LDR & MDR):

$$191.82 \text{ AFY} * \left(\frac{1.5\%}{71.5\%} \right) = 4.02 \text{ AFY}$$

For the reduced annual front yard demand, as calculated for low and medium density residential uses, reducing the base turf area in the front yards from 70% to 42% and replacing that (equivalent to 28%) with low water use plantings resulted in the following annual demands:

Reduced Demand Equation (LDR & MDR):

$$187.80 \text{ AFY} * \left(\frac{42\%}{70\%} + \frac{28\% * 30\%}{70\%} \right) + 4.02 \text{ AFY} = 139.24 \text{ AFY}$$

The same equations were generated for the HDR parcels as follows:

Turf (HDR):

$$37.42 \text{ AFY} * \left(\frac{70\%}{71.5\%} \right) = 36.63 \text{ AFY}$$

Low Water Use (HDR):

$$37.42 \text{ AFY} * \left(\frac{1.5\%}{71.5\%} \right) = 0.79 \text{ AFY}$$

Reduced Demand Equation (HDR):

$$36.63 \text{ AFY} * \left(\frac{42\%}{70\%} + \frac{28\% * 30\%}{70\%} \right) + 0.79 \text{ AFY} = 27.16 \text{ AFY}$$

REDUCTION OF PARK AND RECREATION AND COMMON AREA TURF (NON-RESIDENTIAL)

In addition to the turf areas for residential properties there are additional and significant turf areas throughout a typical development. These areas include the parks, irrigated paseos, commercial centers and school play fields. The estimated turf irrigation demand at each of these uses is as follows:

- It is estimated that parks utilize approximately 98% of their water demand for irrigation and 80% of their irrigated area for turf. This area is assumed to be reduced to 60% with the conversion of turf area (20%) to low water consumption vegetation or other uses.
- For the Roseville area, low water plantings were assumed to use 30% of the water used on turf (a 70% water savings).
- Low water use areas will utilize low volume irrigation systems like a drip or spray system (such as Netafim) designed to achieve a uniformity of 90% rather than an overhead spray irrigation system.
- Paseos are estimated to utilize 100% of their water demand for landscape irrigation. 80% of the paseo area is irrigated turf area. This area is assumed to be reduced to 60% with the conversion of turf area (20%) to low water consumption vegetation or other uses.

Based on these assumptions the water use efficiencies for the parks and paseos have been calculated and are presented in Table 8.

Table 8
Amoruso Ranch Specific Plan
Water Conservation Plan

Non-Residential Irrigated Area Water Efficiencies

Land Use	Annual Water Demand (AFY) ¹	Annual Irrigation Demand (AFY)	Base Turf Area	New Turf Area	Low Water Use Area	New Irrigation Demand (AFY)	Annual Demand Savings (AFY)	Annual Demand Savings (%)	Water System Savings
Park	4.3	4.21	80%	60%	20%	3.48	0.73	17.3%	Potable
Parks	69.8	68.40	80%	60%	20%	56.43	11.97	17.5%	Recycled
Paseos	4.8	4.80	80%	60%	20%	3.96	0.84	17.5%	Potable
Paseos	31.0	31.00	80%	60%	20%	25.58	5.42	17.5%	Recycled
Total	109.9	108.41				89.45	18.96	17.5%	

The new irrigation demand for the Parks is calculated as follows:

$$\frac{68.40 \text{ AFY} * 60\%}{80\%} = 51.30 \text{ AFY}$$

Demand remaining after turf reduction:

$$68.40 \text{ AFY} - 51.30 \text{ AFY} = 17.10 \text{ AFY}$$

Low water plants use 30% of turf demand:

$$17.10 \text{ AFY} * 30\% = 5.13 \text{ AFY}$$

New irrigation demand:

$$51.30 \text{ AFY} + 5.13 \text{ AFY} = 56.43 \text{ AFY}$$

Similarly the new irrigation demand for the Paseos is calculated as follows:

$$\frac{31.00 \text{ AFY} * 60\%}{80\%} = 23.25 \text{ AFY}$$

¹Annual water demand derived from Table 3.

Demand remaining after turf reduction:

$$31.00 \text{ AFY} - 23.25 \text{ AFY} = 7.75 \text{ AFY}$$

Low water plants use 30% of turf demand:

$$7.75 \text{ AFY} * 30\% = 2.33 \text{ AFY}$$

New irrigation demand:

$$23.25 \text{ AFY} + 2.33 \text{ AFY} = 25.58 \text{ AFY}$$

IRRIGATION MANAGEMENT

Smart and centrally located irrigation controllers restrict irrigation to times and rates necessary to maintain landscaping. They account for changes in the demand for water, which varies with weather patterns, seasonal influences and soil moisture content. In the ARSP, smart irrigation controllers, as defined in WELO, will be required for residential, commercial, and quasi-public parcels subject to turf reduction measures, and centrally controlled irrigation controllers for larger commercial and publicly maintained parcels.

As referenced in previous studies for the City of Roseville, a number of studies have been completed specifically on the conversion to smart irrigation controllers and the resultant water savings. Those studies suggest that water use reductions can be expected between 7% and 41%. This is a wide range of variability. Since ARSP is an entirely new development all significant irrigation applications will employ the use of smart irrigation controllers (per WELO). Therefore, a water use reduction value of 20% has been estimated for purposes of this analysis, consistent with previous analyses completed for similar developments within the City of Roseville. The sample calculation is presented below and the values are summarized in Table 9.

Smart Irrigation Equation:

$$139.24 \text{ AFY} * (80\%) = 111.39 \text{ AFY}$$

Table 9
Amoruso Ranch Specific Plan
Water Conservation Plan
Smart Irrigation Controller Water Efficiencies

Land Use	Annual Irrigation Demand (AFY)	New Irrigation Demand w/Controller (AFY)	Annual Demand Savings (AFY)	Annual Demand Savings (%)	Water System Savings
Residential Properties (Front) ¹	139.24	111.39	27.85	20%	Potable
Residential Properties (Back) ²	287.73	230.18	57.55	20%	Potable
Residential Properties (HDR) ³	27.16	21.73	5.43	20%	Recycled
Parks ⁴	3.48	2.78	0.70	20%	Potable
Parks ⁵	56.43	45.14	11.29	20%	Recycled
Paseos ⁶	3.96	3.17	0.79	20%	Potable
Paseos ⁷	25.58	20.46	5.12	20%	Recycled
Total	543.58	434.85	108.73	20%	

WATER CONSERVATION METHODS

There are many water conservation measures that can be implemented throughout the ARSP project. The reality is that a majority of the typical water conservation measures are already required or anticipated to be included in any new projects. These include low flow toilets, low flow shower heads, faucet aerators, etc.

One additional water conservation measure that will be considered for the ARSP project is the inclusion of recirculating hot water systems. Recirculating hot water systems feature a pump on a residential hot water line system which reduces the time necessary to receive hot water at any hot water faucet throughout the home. They provide hot water at the tap

¹ Annual irrigation demand derived from Table 7.

² Annual irrigation demand derived from Table 5.

³ Annual irrigation demand derived from Table 7.

⁴ Annual irrigation demand derived from Table 8.

⁵ Annual irrigation demand derived from Table 8.

⁶ Annual irrigation demand derived from Table 8.

⁷ Annual irrigation demand derived from Table 8.

Kimley»Horn

immediately upon engaging the hot water faucet, eliminating the waste of water as you wait for the water to transition from the cold water in the pipes to hot water. This type of system can be included on all residential units to generate additional water conservation. The amount of water savings with these systems varies based on the number of times hot water is utilized throughout the day. A typical conservative estimate indicates a water savings of approximately 1.25 gallons per use is saved by having “instant” hot water from the recirculation system. We have estimated that on average this would occur six times per day per residential unit, consistent with previous studies for the City of Roseville.

Re-Circulating Hot Water Equation:

$$2,827 \text{ DU} * 7.5 \frac{\text{gal}}{\text{day}} * \frac{\text{AF}}{325851 \text{ gal}} * 365 \text{ day/yr} = 23.75 \text{ AFY}$$

The estimated savings based on the installation of recirculating hot water systems is shown in Table 10.

Table 10
Amoruso Ranch Specific Plan
Water Conservation Plan
Recirculating Hot Water System Water Efficiencies

Land Use	Dwelling Unit Count	Savings per Dwelling Unit (Gal)	Annual Demand Savings (AFY)	Annual Demand Savings (%)	Water System Savings
Residential Units	2,827	7.5	23.75	1.6%	Potable

SUMMARY

A series of water conservation methods have been proposed for implementation as part of the ARSP project. These methods are readily implemented and are consistent with the goals and objectives of the Amoruso Ranch Specific Plan and the City of Roseville.

Table 11 provides a summary of the water conservation measures and their estimated savings in water use. As shown on Table 11, with implementation of all of the measures an estimated conservation of 14.5% of the projected water use would be realized within the ARSP Area.

Table 11
Amoruso Ranch Specific Plan
Water Conservation Plan
Summary of Water Efficiencies

Water Conservation Opportunity	Total Water Demand (AFY)	Potable Water Savings (AFY)	Recycled Water Savings (AFY)	Annual Demand Savings (AFY)	Annual Demand Savings (%)
Residential Properties Irrigation – Front ¹	1,473.7	52.58	10.26	62.84	4.3%
Non-Residential (Parks, ROW, School) ²		1.57	17.39	18.96	1.3%
Smart Irrigation Controllers ³		86.89	21.84	108.73	7.4%
Recirculating Hot Water System ⁴		23.75	0	23.75	1.6%
Total		164.79	49.49	214.28	14.5%

The actual water conservation savings will be dependent on a number of factors including the participation and adherence by the actual homeowners. Constructing the residential units with a number of these measures already integrated (such as the hot water recirculation systems) will be beneficial to achieving the objective.

For the single family residential land uses there is anticipated to be ongoing outreach by the City to remind and reinforce the need for water conservation. This can include attachments to the water bill, water audits that can be made available to homeowners, the promotion of the City's water conservation website, and the availability of City water conservation staff to respond to specific questions. In addition, outreach can include educating homeowners on how to use and set up smart irrigation controllers along with including the installation and integration into their backyard irrigation system.

Guidance and education for the homeowners with regards to the landscaping of front and backyards will also be part of the overall plan including education in conformance with WELO.

¹ Annual demand savings derived from Table 7.

² Annual demand savings derived from Table 8.

³ Annual demand savings derived from Table 9.

⁴ Annual demand savings derived from Table 10.

I. Introduction

Purpose of Report

This Parks Financing Plan was prepared for the Amoruso Ranch Specific Plan (“Project”) by Development Planning and Financing Group, Inc. (“DPFG”) as a strategy to fund and maintain the parks, bike trails, and paseos that are proposed in the Project. This document is an expansion of the Amoruso Ranch Public Facilities Financing Plan, and provides additional details regarding the costs and funding of neighborhood parks, citywide parks, bike trails, and paseos. The findings will provide a clear understanding of how the parks plan is feasible, the funding structure, and overall costs associated with the Project.

II. Amoruso Ranch Specific Plan

Parks and Open Space

The City of Roseville’s Parks and Recreation Master Plan requires a ratio of 9 acres of parkland per 1,000 residents. The 9 acres of parkland includes; 3 acres/1,000 residents for neighborhood parks, 3 acres/1,000 residents for citywide parks, and 3 acres/1,000 residents for open space.

The parks program developed for Amoruso Ranch includes 157 acres of parkland on-site, including open space. The Project meets the neighborhood park and open space dedication requirement with at least 22.14 acres of each, but does not provide a citywide park. The project will pay a Citywide Park Fee which includes funding for park improvements and land (through an in-lieu calculation). Through the Citywide Park Fee, Amoruso Ranch will contribute its fair share to the creation of other planned facilities in the City. **Table 1** shows the required park acreage under the City’s current Master Plan and project population assumptions. The developer is responsible for the budgeted park costs and the developer or City will be responsible for the construction of all the parks.

Seven neighborhood parks have been distributed throughout the Project. **Map 1** shows the location of all the neighborhood parks in the Amoruso Ranch project.

Bike Trails and Paseos

The bike trails and paseos planned within the Project are mainly located along roadways. Bike trails take the form of Class 1, Class 1A, Class 2, and Class 3. Only the Class 1 bike trails are located away from a roadway, and this bike trail class occurs on the south western portion of the Project and along Westbrook Boulevard through the southern open space. The paseos are expanded areas in addition to the normal landscaping along roadways. **Map 1** illustrates the paseos, while **Map 2** shows the bike trails.

III. Neighborhood Park Improvements

Facility Costs

Table 2 shows the total estimated neighborhood park facility costs. The parks program costs are estimated at roughly \$7.1 million. The cost of the parks and recreation facilities include, but are not limited to, the following types of facilities:

- Landscaping
- Restrooms
- Parking
- Recreational fields
- Playgrounds
- Picnic areas

Detailed park improvements and costs are provided by The Collaborative West, and are attached as **Appendix A**.

Phasing

The development of Phase 1 would have park improvements that correspond to the amount of initial residential development. These improvements include five neighborhood parks at a size of 1.72 acres, 1.87 acres, 2.12 acres, 2.0 acres, and 3.04 acres, for a total of 10.75 acres. The estimated facilities cost for the park improvements for Phase 1 is approximately \$3.9 million.

Funding Strategy – Existing Fee Programs

The neighborhood park impact fee funds the neighborhood park improvements in Amoruso Ranch. **Table 3** creates an updated fee for the Project by allocating the total neighborhood park improvement costs on a per residential unit basis. The costs were spread to the different residential land uses based on the persons per household that vary by unit size, using the same methodology as previous specific plans. This was done to create a tiered rate so that an HDR unit is not paying the same amount as an LDR unit.

Table 4 shows the neighborhood park impact fee revenues for Phase 1 and Build out.

IV. Citywide Park Improvements

The Citywide Park Improvement Fee funds the Project's fair share of the construction costs of a citywide park and the Citywide Park Land In-Lieu Fee will provide funding for the purchase of land that was not provided on site for a citywide park.

Facility Costs

Table 5 shows the total facility improvement costs and estimated in-lieu land costs. The Project's share of the citywide facilities costs are calculated by using the current Citywide Park Fee. The base fee for citywide park development is \$2,111. A credit of \$657 has been applied making the citywide park fee for ARSP \$1,454 per unit.

Land Component

The Citywide Park land in-lieu was calculated using the acreage requirement determined in **Table 1**, multiplied by the land appraisal value of \$135,000 per acre. This is the same value used in previous specific plans. A total in-lieu estimate of \$2,988,900 was calculated for the ARSP. The land in-lieu fee per unit for citywide is \$1,058 per unit.

Summary

The total citywide park improvement fee for facility costs and land in-lieu is \$2,512 per unit.

The Citywide Park funds will be used to purchase land and/or build citywide park facilities in other locations throughout the City. Amoruso Ranch is currently not planned for citywide facilities to be built within the plan area.

Funding Strategy - Existing Fee Programs

The Citywide Park fee will fund the citywide park facilities throughout the City, and the in-lieu component will fund future land acquisitions or additional construction. **Table 6** creates the Citywide Park fee for the Amoruso Ranch project by allocating the total costs (construction and in-lieu) on a per residential unit. The costs were spread to the different residential land uses based on the persons per household that vary by unit size, using the same methodology as previous specific plans. This was done to create a tiered rate so that an HDR unit is not paying the same amount as an LDR unit.

Table 7 shows the citywide park fee revenues for Phase 1 and Build out.

V. Bike Trail Improvements

In the Amoruso Ranch project the Class 1 bike trail system is integrated with open space along the south west corner of the development and along Westbrook Boulevard in the open space on the south end of the development. **Map 2** illustrates the proposed bike trails in the project. The Class 1 bike trail system along with the other bike trails incorporated with the roadways (Class 1A, 2, and 3) are all included in the roadway backbone infrastructure costs outlined in the Amoruso Ranch Public Facilities Financing Plan. The developer will build these improvements as required, and as development progresses.

Phasing

The development of the Class 1 bike trail will occur entirely with the Phase 1 development.

Funding Strategy – Developer Built

The bike trail facilities will be built by the developer, without the formation of a fee program. These improvements will be an eligible facility to be funded and/or reimbursed by the project CFD when formed.

VI. Paseo Improvements

The paseos in Amoruso Ranch run along some segments of collector roadways. Paseos are expanded areas, in addition to landscape corridors with grass, trees, landscaping, and contain no facilities. **Map 1** illustrates the proposed layout of the paseos in the project. All of the paseo costs are included in the roadway backbone infrastructure costs outlined in the Amoruso Ranch Public Facilities Financing Plan. The developer will build these improvements as required, and as development progresses.

Phasing

The development of Phase 1 includes paseo improvements within the residential area on Road “E”, “F”, and Road “A”, while the remaining improvements will be built in Phase 2 and 3 along Roads “F”, “G”, “E”, and “D”.

Funding Strategy – Developer Built

The paseo facilities will be built by the developer, without the formation of a fee program. These improvements will be an eligible facility to be funded and/or reimbursed by the project CFD when formed.

VII. Community Facilities District for Maintenance

The Developer will form a CFD for maintenance to finance the cost of operating and maintaining streets, landscaping, open space, parks, trails, paseos and storm water in the Project. A Rate and Method of Apportionment will be required in establishing a method of tax, a maximum special tax amount, and any escalation factors that will be implemented to allow the annual special tax to keep pace with inflation. **Table 8** details the quantities and cost assumptions to be used in the formation of the CFD with the exception of open space related items, while **Table 9** allocates the costs across the various product types to estimate the special tax amount. An updated Property Analysis Record (“PAR”) will be required prior to CFD formation and based on 404 permit conditions, an inventory of all environmentally sensitive/protected areas within the open space, approved improvements, any mitigation requirements, final drainage channel design, vehicular access for maintenance, ultimate width of transition area, all ARSP specific permits, and other requirements/improvements outlined in the Overarching Open Space Management Plan and consistent with state/federal permits.

The maintenance CFD does not include the 645.5 acres of off-site open space. These parcels will be either conveyed to the City, pending agreed upon parameters for acceptance or deeded to a third party entity. If the City accepts these parcels, landowner shall annex these sites into the CFD for maintenance prior to formation. A PAR analysis for the cost of service shall be prepared prior to annexation.

Cost Allocated to Use			\$3,776,051.65	\$1,342,926.51	\$1,794,237.69	\$224,022.80
Neighborhood Parks Allocation per Unit/Sq.Ft.			\$2,900.19	\$2,477.72	\$2,055.26	\$2,055.26

Footnotes:

¹The persons per household ("PPH") use factor assumed here, matches the average PPH of the City with an LDR unit. To create a tiered fee, the assumed PPH for the MDR and HDR land uses are then shown at a reduced amount. This methodology is consistent with what was done in the prior SVSP and CSP. The prior specific plans used an average PPH of 2.54, and thus land uses were assigned a PPH of 2.54 (LDR), 2.17 (MDR), and 1.8 (HDR). The updated factors assume the same percentage allocation of costs by land use as the prior specific plans, by using a PPH of 2.61 (LDR), 2.23 (MDR), and 1.85 (HDR).

Source: City of Roseville, ECORP, and Kimley Horn.

Footnotes:

¹Cost estimates derived from indepth analysis of City costs done for SVSP. Those costs have then been applied to all specific plans since.

²1/3 of streetsweeping miles.

³The Cost per Unit for Open Space placeholder of \$575 per year was derived by simply averaging the City's proposed annual open space cost per acre of \$1,000 and the Developer proposed annual open space cost per acre of \$150. The actual annual open space cost per acre will be determined at the time of the formation of the maintenance CFD for this project as outlined in the Development Agreement. The ultimate cost per acre could be above or below the aforementioned range, depending upon the 404 permit conditions, an inventory of all environmentally sensitive/protected areas within the open space, approved improvements, any mitigation requirements, vehicular access for maintenance, final drainage channel design, ultimate width of transition area, all ARSP specific permits, other improvements outlined in the Overarching Open Space Management Plan, state and federal permits, and established city maintenance standards.

⁴Includes developed and undeveloped.

ASSIGNMENT AND ASSUMPTION AGREEMENT
RELATIVE TO THE
AMORUSO RANCH SPECIFIC PLAN DEVELOPMENT AGREEMENT
[BROOKFIELD SUNSET, LLC]

THIS ASSIGNMENT AND ASSUMPTION AGREEMENT (hereinafter, the "Agreement") is entered into this ____ day of _____, 20__, by and between _____, a _____ (hereinafter "Landowner"), and _____, a _____ (hereinafter "Assignee").

RECITALS

A. On _____, 2016, the City of Roseville and Landowner entered into that certain agreement entitled "Development Agreement By and Between The City of Roseville, Brookfield Sunset, LLC, and Jennifer M. Amoruso, Successor Trustee of the Amoruso Family Living Trust Dated March 14, 2005 (hereinafter the "Development Agreement"). Pursuant to the Development Agreement, Landowner agreed to develop certain property more particularly described in the Development Agreement (hereinafter, the "Subject Property"), subject to certain conditions and obligations as set forth in the Development Agreement. The Development Agreement was recorded against the Subject Property in the Official Records of Placer County on _____, 2016 [Instrument No. _____].

B. Landowner intends to convey a portion of the Subject Property to Assignee, commonly referred to as Parcel _____, and more particularly identified and described in Exhibit A, attached hereto and incorporated herein by this reference (hereinafter the "Assigned Parcel"), or all of the Subject Property, as defined in the Development Agreement.

C. Landowner desires to assign and Assignee desires to assume all of Landowner's right, title, interest, burdens and obligations under the Development Agreement with respect to and as related to the Assigned Parcel.

ASSIGNMENT AND ASSUMPTION

NOW, THEREFORE, Landowner and Assignee hereby agree as follows:

1. Landowner hereby assigns, effective as of Landowner conveyance of the Assigned Parcel to Assignee, all of the rights, title, interest, burdens and obligations of Landowner under the Development Agreement with respect to the Assigned Parcel. Landowner retains all the rights, title, interest, burdens and obligations under the Development Agreement with respect to all other property within the Subject Property owned by Landowner.

2. Assignee hereby assumes all of the rights, title, interest, burdens and obligations of Landowner under the Development Agreement with respect to the Assigned Parcel, and agrees to observe and fully perform all of the duties and obligations of Landowner under the Development Agreement with respect to the Assigned Parcel, and to be subject to all the terms and conditions thereof with respect to the Assigned Parcel. The parties intend hereby that, upon the execution of this Agreement and conveyance of the Assigned Parcel to Assignee, Assignee shall become substituted for Landowner as the "Landowner" under the Development Agreement with respect to the Assigned Parcel.

3. All of the covenants, terms and conditions set forth herein shall be binding upon and shall insure to the benefit of the parties hereto and their respective heirs, successors and assigns.

4. The Notice Address described in Article 11 of the Development Agreement for the Landowner with respect to the Assigned Parcel shall be:

Attn: _____

IN WITNESS HEREOF, the parties hereto have executed this Agreement as of the day and year first above written. This Agreement may be signed in identical counterparts.

ORDINANCE NO. _____

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE ADOPTING
A DEVELOPMENT AGREEMENT REGARDING 148.7 ACRES WITHIN THE AMORUSO
RANCH SPECIFIC PLAN (BROOKFIELD SUNSET, LLC and JENNIFER M. AMORUSO,
SUCCESSOR TRUSTEE OF THE AMORUSO FAMILY LIVING TRUST DATED MARCH
14, 2005) AND AUTHORIZING THE CITY MANAGER TO
EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. In accordance with Chapter 19.84 of Title 19 of the Roseville Municipal Code (the Zoning Ordinance) of the City of Roseville, the City Council has received the recommendation of the Planning Commission that the City of Roseville enter into a Development Agreement for 148.7 acres within the Amoroso Ranch Specific Plan with Brookfield Sunset, LLC and Jennifer M. Amoroso, Successor Trustee of the Amoroso Family Living Trust dated March 14, 2005 (collectively, the “Developer”).

SECTION 2. The Council of the City of Roseville has reviewed the findings of the Planning Commission recommending approval of the Development Agreement, and makes the following findings:

1. The Development Agreement is consistent with the objectives, policies, general land uses and programs specified in the City of Roseville General Plan and the Amoroso Ranch Specific Plan;
2. The Development Agreement is consistent with the City of Roseville Zoning Ordinance and Zoning Map;
3. The Development Agreement is in conformance with the public health, safety and welfare;
4. The Development Agreement will not adversely affect the orderly development of the property or the preservation of property values; and
5. The Development Agreement will provide sufficient benefit to the City to justify entering into said Agreement;

SECTION 3. The Development Agreement by and between Developer and the City of Roseville, a copy of which is on file in the City Clerk’s Department and incorporated herein by reference, is hereby approved and the City Manager is authorized to execute it on behalf of the City of Roseville.

SECTION 4. The City Clerk is directed to record the executed Development Agreement within ten (10) days of the execution of the agreement by the City Manager with the County Recorder's office of the County of Placer.

SECTION 5. This ordinance shall be effective at the expiration of thirty (30) days from the date of its adoption.

SECTION 6. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville this ____ day of _____, 20__, by the following vote on roll call:

**DEVELOPMENT AGREEMENT
BY AND BETWEEN THE CITY OF ROSEVILLE, BROOKFIELD SUNSET,
LLC AND JENNIFER M. AMORUSO, SUCCESSOR TRUSTEE OF THE
AMORUSO FAMILY LIVING TRUST DATED MARCH 14, 2005
RELATIVE TO THE
AMORUSO RANCH SPECIFIC PLAN**

This Development Agreement (the "Agreement") is entered into this ____ day of _____, 2016, by and between the CITY OF ROSEVILLE, a municipal corporation ("City"), BROOKFIELD SUNSET, LLC, a California limited liability company ("Brookfield") and JENNIFER M. AMORUSO, Successor Trustee of the Amoruso Family Living Trust Dated March 14, 2005 ("Amoruso")(collectively, "Landowner"), pursuant to the authority of Sections 65864 through 65869.5 of the Government Code of the State of California.

RECITALS

A. Authorization. To strengthen the public planning process, encourage private participation in comprehensive planning and reduce the economic risk of development, the Legislature of the State of California adopted Section 65864, et seq., of the Government Code (the "Development Agreement Statute"), which authorizes the City of Roseville and an applicant for a development project to enter into a development agreement, establishing certain development rights in the Property which is the subject of the development project application.

B. Property. The subject of this Agreement is the development of those certain parcels of land , consisting of approximately 148.7 acres out of the 674.4± acres owned by Amoruso, as described in Exhibit "A" and shown on Exhibit "B" (hereinafter the "Property"), attached hereto, which constitutes a portion of the larger area comprising 694.4± acres commonly referred to the Amoruso Ranch Specific Plan area ("Specific Plan", " ARSP" or "Plan Area"), which Plan Area is also commonly referred to as the annexation area ("Annexation Area") that includes 20.0± acres designated as Urban Reserve. The Plan Area and Annexation Area are shown in Exhibit "C" attached hereto. The properties of all property owners in the Plan Area as of the date of this Agreement set forth above are shown in Exhibit "D" attached hereto. Amoruso owns the Property, and Brookfield is under contract to purchase the Property from Amoruso. Landowner represents that all persons holding legal or equitable interests in the Property shall be bound by this Agreement.

C. Hearings. On April 14, 2016, the City Planning Commission, designated by Roseville Ordinance No. 3014 as the planning agency for purposes of development agreement review pursuant to Government Code Section 65867, in a duly noticed

public hearing, considered this Agreement and recommended that the City Council approve this Agreement.

D. Specific Plan Environmental Impact Report; Project Environmental Document. On _____, 2016, the City Council, in Resolution No. _____, certified as adequate and complete the Final EIR (the "EIR") (State Clearinghouse #2008032115) for the Specific Plan. EIR mitigation measures are incorporated in the Specific Plan and in the terms and conditions of this Agreement, as reflected by the findings adopted by the City Council concurrently with this Agreement.

E. Entitlements. Following consideration of and certification of the aforementioned EIR and adoption of CEQA related findings, the City Council on _____, 2016, adopted a Statement of Overriding Considerations with respect to and approved the following land use entitlements for the Property, which entitlements are the subject of this Agreement:

- 1) The EIR, as certified by Resolution No. _____, and the Mitigation Monitoring and Reporting Program ("MMRP"), adopted therewith;
- 2) Sphere of Influence Amendment to include the remaining 634.4 acres in the Plan Area in the City's sphere of influence not previously included in the City's sphere of influence;
- 3) The Roseville General Plan, as amended by Resolution No. _____;
- 4) The Amoruso Ranch Specific Plan and Design Guidelines as adopted on _____, _____, by Resolution No. _____;
- 5) The Pre-zoning of the Property pursuant to Ordinance No. _____ dated _____, 2016;
- 6) Zoning Ordinance Amendment to modify Residential Small Lot Development Standards pursuant to Ordinance No. _____ dated _____, 2016;
- 7) This Development Agreement, as adopted by Ordinance No. _____, dated _____, 2016 (the "Adopting Ordinance"); and
- 8) Annexation of 694.4 acres.

The approvals described in paragraphs 1 through 8, inclusive, are referred to herein collectively as the "Entitlements." No other action or approval by City shall be

deemed an "Entitlement," provided, however, that subsequent actions or approvals by City for development of the Property, including, but not limited to, large lot and small lot tentative subdivision maps, major project permits, conditional use permits and design review permits (the "Subsequent Entitlements"), shall be deemed included as part of the Entitlements upon City action or approval thereof. The inclusion of Subsequent Entitlements as part of the Entitlements vested hereunder shall not limit the City's discretion to impose time limits within which such Subsequent Entitlements must be implemented.

F. General and Specific Plans. Development of the Property in accordance with the Entitlements will provide orderly growth and development of the area in accordance with the policies set forth in the General Plan and the Amoruso Ranch Specific Plan. For purposes of the vesting protection granted by this Agreement, except as otherwise provided herein, or by state or federal law, the applicable law shall be as set forth in the Entitlements as of the date hereof.

G. Substantial Costs to Landowner. Landowner has incurred and will incur substantial costs in order to comply with conditions of approval of the Entitlements and to assure development of the Property in accordance with the Entitlements and the terms of this Agreement.

H. Need for Services and Facilities. Development of the Property will result in a need for municipal services and facilities, which services and facilities will be provided by City to such development subject to the performance of Landowner's obligations hereunder.

I. Contribution to Costs of Facilities and Services. Landowner agrees to contribute to the costs of such public facilities and services as required herein to mitigate impacts on the City from the development of the Property, and City agrees to provide such public facilities and services, according to the terms of this Agreement, to assure that Landowner may proceed with and complete development of the Property in accordance with the terms of this Agreement. Landowner will provide as a part of such development a diverse mix of housing meeting a wide range of housing needs for the City, public facilities such as open space, recreational amenities, commercial centers, professional offices, and other services and amenities that are of benefit to the entire City. City and Landowner recognize and agree that but for Landowner's contributions to mitigate the impacts arising as a result of development entitlements granted pursuant to this Agreement, City would not and could not approve the development of the Property as provided by this Agreement and that, but for City's covenant to provide the facilities and services necessary for development of the Property, Landowner would not and could not commit to provide the mitigation as provided by this Agreement. City's vesting of the right to develop the Property as provided herein is in reliance upon and in consideration of Landowner's agreement to make contributions toward the cost

of public improvements as herein provided to mitigate the impacts of development of the Property as such development occurs.

J. Development Agreement Ordinance. City and Landowner have taken all actions mandated by and fulfilled all requirements set forth in the Development Agreement Ordinance of the City of Roseville, Article V, Chapter 19.84 of Ordinance No. 3014 of the Roseville Municipal Code.

AGREEMENT

ARTICLE 1. GENERAL PROVISIONS

1.1 Incorporation of Recitals. The Preamble, the Recitals and all defined terms set forth in both are hereby incorporated into this Agreement as if set forth herein in full.

1.2 Binding Covenants. Upon satisfaction of the conditions to recordation of the Agreement set forth in Section 1.3.1 below, the provisions of this Agreement shall constitute covenants which shall run with the Property and the benefits and burdens hereof shall bind and inure to all successors in interest to and assigns of the parties hereto. Accordingly, all references herein to "Landowner" shall mean and refer to Brookfield Sunset, LLC and Jennifer M. Amoruso, Successor Trustee of the Amoruso Family Living Trust Dated March 14, 2005, and each and every subsequent purchaser or transferee of the Property or any portion thereof from Landowner.

1.3 Term.

1.3.1 Commencement Expiration. The term of this Agreement shall commence upon the Placer County Local Agency Formation Commission ("LAFCO") taking final action approving the annexation of the Property to City (the "Effective Date"), and shall extend for a period of thirty (30) years after the Effective Date, unless said term is terminated, modified or extended by circumstances set forth in this Agreement or by mutual consent of the parties hereto, provided, however, that the terms and conditions of this Agreement shall not be binding on the Property, nor shall Landowner have any development rights or improvements or payment obligations, with the exception of costs incurred by City in the processing of the Entitlements, with respect to any portion of the Property, as contemplated by the Entitlements and this Agreement, until LAFCO takes final action approving the annexation of the Property. The Agreement shall be recorded against the Property within ten (10) days after City enters into the Agreement, as required by California Government Code Section 65868.5. Following expiration of the term, this Agreement shall be deemed terminated and of no further force and effect. As set forth in the Recitals above, the City's agreement to

approve development of the Property (including the zoning of the Property and the annexation of the Property to the City) is being made in consideration of Landowner's covenants under this Agreement. In the event of any such termination prior to recordation of this Agreement, Landowner acknowledges that the Entitlements shall no longer be vested by this Agreement and that the City shall not be required to approve any development of the Property, unless and until an effective development agreement is entered into with the City for the Property.

1.3.2 Automatic Termination Upon Completion and Sale of Residential Unit.

This Agreement shall automatically be terminated, without any further action by either party or need to record any additional document, with respect to any single-family residential lot within a parcel designated by the Specific Plan for residential use, upon completion of construction and issuance by the City of a final inspection for a dwelling unit upon such residential lot and conveyance of such improved residential lot by Landowner to a bona-fide good faith purchaser thereof. In connection with its issuance of a final inspection for such improved lot, City shall confirm that; (i) all improvements which are required to serve the lot, as determined by City, have been accepted by City; (ii) the lot is included within the Public Services CFD required by Section 3.19 or other financing mechanism acceptable to the City, to the extent required hereby; and (iii) if and to the extent applicable to such lot, an affordable purchase or rental housing agreement has been recorded on the lot. Termination of this Agreement for any such residential lot as provided for in this Section 1.3.2 shall not in any way be construed to terminate or modify any assessment district or Mello-Roos Community Facilities District lien affecting such lot at the time of termination.

1.3.3 Termination Upon Landowner Request. This Agreement may also be terminated, at the election of the then property owner, with respect to any legally subdivided parcel designated by the Specific Plan for residential or non-residential use (other than parcels designated for public use), when recording a final residential lot subdivision map for such parcel, or receiving a certificate of occupancy or final inspection, whichever is applicable, for a multi-family or non-residential building within such parcel, by giving written notice to City of its election to terminate the Agreement for such parcel, provided that: (i) all improvements which are required to serve the parcel, as determined by City, have been accepted by City; (ii) the parcel is included within the Public Services CFD required by Section 3.19, or other financing mechanism acceptable to the City, to the extent required hereby; and (iii) with respect to residential parcels, an affordable purchase or rental housing agreement, if required for such parcel pursuant to Section 2.6.1.1, has been recorded on the parcel. City shall cause any written notice of termination approved pursuant to this subsection to be recorded with the County Recorder against the applicable parcel at Landowner's expense. Termination of this Agreement for any such residential or non-residential parcel as provided for in this Section 1.3.3 shall not in any way be construed to terminate or

modify any assessment district or Mello-Roos Community Facilities District lien affecting such parcel at the time of termination.

1.3.4 Tolling During Legal Challenge. In the event that this Agreement or any of the Entitlements are subjected to legal challenge by a third party, and Landowner is unable or elects not to proceed with the Project due to such litigation, the term of and timing for obligations imposed pursuant to this Agreement shall be automatically tolled during such litigation.

1.4 Amendment of Agreement. This Agreement may be amended from time to time by mutual consent of City and Landowner (and/or any successor owner of any portion of the physical area to which the benefit or burden of the amendment would apply), in accordance with the provisions of the Development Agreement Statute. If the proposed amendment affects less than the entirety of the Property, then such amendment need only be approved by the owner(s) in fee of the portion(s) of the Property that is subject to or affected by such amendment. The parties acknowledge that under the City Zoning Code and applicable rules, regulations and policies of the City, the Development Services Director has the discretion to approve minor modifications to approved land use entitlements without the requirement for a public hearing or approval by the City Council. Accordingly, the approval by the Development Services Director of any minor modifications to the Entitlements that are consistent with this Agreement shall not constitute nor require an amendment to this Agreement to be effective or to be subject to this Agreement.

For purposes of this Section, minor modifications shall mean any modification to the Project that does not relate to (i) the term of this Agreement, (ii) permitted-uses of the Project, (iii) density or intensity of use, except as allowed pursuant to Section 2.3 of this Agreement, (iv) provisions for the reservation or dedication of land, (v) conditions, terms, restrictions or requirements for subsequent discretionary actions, or (vi) monetary contributions by Landowner, and may be processed under CEQA as exempt from CEQA, or with the preparation of a Negative Declaration or Mitigated Negative Declaration.

1.5 Recordation Upon Amendment or Termination. Except when this Agreement is automatically terminated due to the expiration of the Term or the provisions of Section 1.3.2 above, the City shall cause any amendment hereto and any other termination hereof to be recorded, at Landowner's expense, with the County Recorder within ten (10) days after City executes such amendment or termination. Any amendment or termination of the Agreement to be recorded that affects less than all the Property shall describe the portion thereof that is the subject of such amendment or termination.

1.6 Annexation. The ability to proceed with development of the Property

pursuant to the Entitlements shall be contingent upon the annexation of the Property into the City. Pending such annexation, Landowner, at its own risk, may process tentative parcel maps and tentative subdivision maps, design review permits, Major Project Permits (Stage 1), and improvement or construction plans for improvements and City may conditionally approve such tentative maps, design review permits, Major Project Permits (Stage 1) and/or improvement plans in accordance with the Entitlements, provided City shall not approve any final parcel map or final subdivision map for recordation nor approve the issuance of any grading permit for grading any portion of the Property or building permit for any structure within the Property prior to the annexation of the Property to the City. Prior to annexation of the Property to the City, Landowner may, subject to City's review and approval, seek a grading permit from Placer County for purposes of effectuating other agency permits or approvals on the Property or in the Specific Plan as provided in Sections 2.7.1 and 2.7.2 below, and City shall cooperate in Landowner's efforts to obtain any such grading permit.

City shall use its best efforts and due diligence to initiate such annexation process, obtain the necessary approvals and consummate the annexation of the Property into the City, including entering into any annexation agreement that may be required in relation thereto, subject to the City's review and approval of the terms thereof. Landowner shall be responsible for the costs reasonably and directly incurred by the City to initiate, process and consummate such annexation.

1.7 Pro Rata Share/Fair Share - Defined. Except as specifically provided otherwise in this Agreement, the terms pro-rata share or fair share shall mean a share of the total cost of a facility or facilities based on a dwelling unit equivalent calculation using the total units within the ARSP as the numerator and the total number of unbuilt and entitled units in the Annexation Area, as the case may be, as specified in this Agreement, as the denominator.

ARTICLE 2. DEVELOPMENT OF THE PROPERTY

2.1 Permitted Uses. The permitted uses of the Property, the density and intensity of use, the maximum height and size of proposed buildings, provisions for reservation or dedication of land for public purposes, and location of public improvements, and other terms and conditions of development applicable to the Property shall be those set forth in the Entitlements.

2.2 Vested Entitlements. Subject to the provisions and conditions of this Agreement, City agrees that City is granting, and grants herewith, a fully vested entitlement and right to develop the Property in accordance with the terms and conditions of the Entitlements, including, but not limited to, allocation of residential units to residentially designated parcels in the Specific Plan, minimum lot sizes, street locations and configurations in any approved tentative subdivision maps, and

allocation of building square footage to commercially designated parcels in the Specific Plan. City acknowledges that the Entitlements include the following Specific Plan land use designations and approximate acreages, net of road right of way ("Net Acre") for Low Density Residential and Medium Density Residential land uses (gross acres for all other land uses), for the Property as shown in the Specific Plan Land Plan in Exhibit "E", attached hereto and summarized below:

Low Density Residential	1,302 units on 248.8 Gross Acres;
Medium Density Residential	542 units on 50.3 Gross Acres;
High Density Residential	873 units on 38.1 Gross Acres;
Community Commercial	23.9 Gross Acres;
Community Commercial/Village District	109 units on 27.3 Gross Acres;
Park	22.1 Gross Acres;
Open Space	134.8 Gross Acres;
Open Space (Paseos)	10.7 Gross Acres;
School	9.6 Gross Acres;
Public/Quasi Public	7.6 Gross Acres;
Urban Reserve	20.0 Gross Acres;
Right of Way	52.0 Gross Acres;
NAPOTS (Placer Parkway)	49.2 Gross Acres.

Such uses shall be developed in accordance with the Entitlements, as such Entitlements provide on the Effective Date of this Agreement. Landowner's vested right to proceed with the development of the Property shall be subject to subsequent approvals, provided that any conditions, terms, restrictions and requirements for such subsequent approvals shall not prevent development of the Property for the uses set forth in the Entitlements, and as more fully set forth in Section 2.4.1 below.

2.3 Density Transfer. The number of residential dwelling units planned for the different Parcels within the Project may be transferred to other Parcels within the Project, subject to compliance with the conditions for such transfer as set forth in the Specific Plan. All unused units must be transferred prior to approval by the City Council of the last small lot final map or design review permit for the last high-density residential parcel map for the Property. Any unused units not so approved for transfer shall revert to the City unit pool and Landowner shall have no subsequent claim to such units.

2.4 Rules, Regulations and Official Policies.

2.4.1 Inconsistency. Except as prohibited by Government Code Section 65869.5 or other applicable state or federal law, to the extent any future rules, ordinances, regulations or policies applicable to development of the Property are inconsistent with the land use designations or permitted or conditionally permitted

uses on the Property, density and intensity of use, rate or timing of construction, design requirements, maximum building height and size, or provisions for reservation and dedication of land or other conditions of approval or terms under the Entitlements as defined herein and as provided in this Agreement, the terms of the Entitlements and this Agreement shall prevail, unless the parties mutually agree to alter this Agreement. To the extent any future rules, ordinances, fees, regulations or policies applicable to development of the Property are not inconsistent with the land use designations or permitted or conditionally permitted uses on the Property, density and intensity of use, rate or timing of construction, design requirements, maximum building height and size, or provisions for reservation or dedication of land or other terms or conditions under the Entitlements or under any other terms of this Agreement, such rules, ordinances, fees, regulations or policies shall be applicable to the development of the Property, except as limited by Section 2.5.2 of this Agreement.

2.4.2 Obligation to Meet and Confer. If City attempts to apply to the Project future rules, ordinances, fees, regulations or policies which Landowner believes to conflict with the Entitlements, Landowner shall provide to City in writing a notice describing the legal and factual basis for Landowner's position. The parties shall meet and confer within thirty (30) days after the date of such written notice by Landowner to discuss the matter.

2.4.3 Application of Changes. Nothing in this section shall preclude the application to development of the Property of changes in City laws, regulations, plans or policies, the terms of which are specifically mandated or required by changes in State or Federal laws or regulations. To the extent that such changes in City laws, regulations, plans or policies prevent delay or preclude compliance with one or more provisions of this Agreement, City and Landowner shall take such action as may be required pursuant to Section 4.1 of this Agreement to comply therewith.

2.4.4 Authority of City. This section shall not be construed to limit the authority or obligation of City to hold necessary public hearings, or to limit discretion of City or any of its officers or officials with regard to rules, regulations, ordinances, laws and entitlements of use which require the exercise of discretion by City or any of its officers or officials, provided that subsequent discretionary actions shall not prevent or delay development of the Property for the uses and to the density and intensity of development as provided by the Entitlements and this Agreement, in effect as of the date that City executes this Agreement.

2.5 City Fees, Taxes and Assessments.

2.5.1 Processing Fees and Charges. Landowner shall pay those processing, inspection and plan checking fees and charges required by City under then current regulations for processing applications and requests for permits, approvals and

other actions, and monitoring compliance with any permits issued or approvals granted or the performance of any conditions with respect thereto or any performance required of Landowner hereunder.

2.5.2 Public Financing Limited to Specific Funding Mechanisms. This Agreement includes specific construction, funding and reimbursement obligations of Landowner and specific rights or obligations, as the case may be, to participate in a community facilities district(s) or a similar financing district to fund the acquisition and construction of specific facilities and the maintenance of certain improvements. Landowner's obligation with respect to the participation of the Property in any funding mechanisms to support the construction of any other public facilities and improvements or the provision of public services in relation to development of the Property shall be to pay City fees related to the construction and provision of such public facilities authorized by ordinance to be collected by City as of the date that City executes this Agreement as such fees may be adjusted from time to time in accordance with applicable law, or such other fees as may be duly adopted in the future by City from time to time in accordance with applicable law; provided, however, except as otherwise specifically provided in this Agreement, Landowner's obligation to pay future City fees is limited to those fees adopted on a City-Wide basis or which apply uniformly to all properties within the City of Roseville which are zoned consistent with Landowner's zoning as set forth in the Entitlements, or which apply uniformly to all properties which are similarly situated, whether by geographic location, drainage sheds or other distinguishing circumstances.

2.6 Affordable Housing. Consistent with the goals and policies contained in City's General Plan and the Specific Plan, Landowner shall develop or cause ten percent (10%) of the total residential units which are actually constructed within its Property to be developed as affordable housing. In accordance with the terms of this Section and subject to adjustment based on actual development, Landowner shall provide 283 units affordable to very low and low -income households. The breakdown of percentage of the total number of affordable units to the different income levels shall be 40% for very low and 60% for low income households. Any adjustment based on actual development shall be subject to the approval of the City Manager or his/her designee. Prior to issuance of a building permit for any affordable rental unit on a parcel within the Project, City and Landowner shall enter into an Affordable Rental Housing Agreement giving effect to the requirements and intent of this Agreement.

The term "very low income" means households earning 50% or less of median income, and "low income" means households earning 51% to 80% of median income, as published annually by the U.S. Department of Housing & Urban Development ("HUD"). Income eligibility and asset verification and calculation guidelines shall be determined in accordance with the HUD Handbook 4350.3 Chapter 5. For each of the household income ranges specified herein, household income at the upper limit of the

specified ranges shall be used in determining qualifying rents for affordable rental residential units. Unless a City subsidy is provided, as set forth in Section 2.6.1.3 below regarding any future potential subsidy, or other restrictions are placed on the Parcel due to the type of financing secured by the ultimate developer of the Parcel, qualifying rents for affordable rental residential units shall be based on the upper limit of specified income levels.

Locations of affordable housing sites are shown in the Specific Plan and Exhibit “F”. Such locations may be modified pursuant to Section 2.6.1.4 of this Agreement.

2.6.1 Multi Family Affordable Rental Units.

2.6.1.1 Affordable Obligation. Landowner agrees that two hundred and eighty-three (283) affordable rental units will be reserved within the Property, including one hundred and thirteen (113) units for rental to very low income households and one hundred and seventy (170) units for rental to low income households as follows:

Parcel	Total Units In Parcel	Total Affordable Unit Allocation	Very Low Income Rental Units	Low Income Rental Units
AR-19	230	170	68	102
AR-44	150	113	45	68
Total	380	283	113	170

2.6.1.2 Transfer/Satisfaction of Obligation. At the request of Landowner, the affordable rental housing obligation (or any portion thereof), including any excess affordable rental units committed to by Landowner above its allocated affordable rental housing obligation hereunder, may be transferred, with the consent of the Economic Development Director, from one Parcel to another parcel within the Specific Plan, subject to the approval of the owner(s) of both the transferring and receiving parcels. No such transfer shall require an amendment to this Agreement, but City and Landowner and the owner(s) of the receiving parcels shall execute an instrument memorializing such transfer of obligation that shall be recorded against the affected parcels, with reference to this Agreement.

2.6.1.3 Future Potential Compensation by City. If and to the extent funding to subsidize the provision of affordable housing within the City as described herein is or becomes available to City and is not otherwise committed by City to other affordable housing projects, City at its sole discretion may compensate Landowner or its successors from such available funds. Landowner acknowledges that, as of the Effective Date hereof, City does not have and does not anticipate obtaining any such subsidies that would be available to compensate Landowner hereunder, and if City cannot provide or identify any such subsidies, Landowner shall nevertheless be

obligated hereunder to provide the affordable housing as required by this Agreement. In connection herewith, Landowner hereby waives any claims, suits, or actions against City on account of or arising from the Costa-Hawkins Rental Housing Act, California Civil Code Section 1954.50 et seq.

If and to the extent available, to compensate Landowner for providing rental housing affordable to low income households and very low income households, such compensation (hereinafter, "subsidy" or "subsidies") may be issued through a combination of density bonus, fee deferrals or financing, federal, state and/or local programs or any other form agreeable to Landowner and City. Landowner shall join City in any application prepared for federal, state, local or private funding for any potential subsidies, and Landowner shall use its best efforts to cooperate with City to obtain approval thereof, provided any additional costs or liabilities associated with Landowner's participation therein shall be subject to Landowner's reasonable approval.

To the extent that public funds or subsidies are provided to the development of affordable rental units, Landowner shall provide written notice to builder(s) of such affordable units that such construction may be subject to a requirement to pay prevailing wage.

2.6.1.4 Community Facilities Districts. The City Manager or his/her designee shall maintain a list of low and very low-income affordable rental units for each Parcel which is subject to an Affordable Rental Housing Agreement (or applicable City-approved form) and, on or about May 1 of each calendar year, shall send a copy of such Affordable Rental Housing Agreement(s) to the City Finance Director. In reliance thereon, the Finance Director shall, to the extent allowed by law, if and when a Community Facilities District is formed encompassing the Property, set the applicable special tax for such Parcel at a level described in the rate and method for said Community Facilities District.

2.6.1.5 In Lieu Fee – Affordable Housing. In the event City adopts a fee to be paid in lieu of construction rental housing affordable to low or very low income households, Landowner shall be eligible to pay such in lieu fee rather than construct affordable housing units on the Property.

2.6.2 Not a Limitation. Nothing in the foregoing Sections 2.6.1 and 2.6.2 shall be construed to limit Landowner from offering units for rental or purchase to households of very low, low or middle incomes in excess of the number of units specified.

2.7 Wetlands.

2.7.1 404 Permit. Landowner has obtained verification from the U.S. Army Corps of Engineers (the "Army Corps") of the presence of vernal pools and of wetland swales/channels on the Property. Landowner shall obtain from the Army Corps a permit (the "404 Permit") to fill specific wetland resources in conjunction with development of the Property, as well as all offsite improvements required to be constructed by Landowner. Landowner shall diligently pursue and obtain issuance of the 404 Permit and any amendment, modification or supplement thereto, or an additional 404 Permit if required, in order to implement the Project. Such 404 Permit or Permits shall be approved, with conditions satisfactory to the City if such conditions impact any public uses or improvements to be conveyed pursuant to this Agreement, prior to commencement of construction of any improvements on the Property. Landowner shall, in implementation of the 404 Permit, be required to append to the City's Open Space Preserve Overarching Management Plan. Landowner intends to mitigate the impacts of such wetland fills through a combination of on-site preservation ("Preserve Area(s)"), off-site preservation and/or on-site and off-site creation or restoration of wetland resources. Should on-site preservation require monitoring and a corresponding conservation easement recorded in favor of a third party non-profit entity, City shall have the right to approve the conservation easement and third party non-profit entity, and Landowner shall be responsible for any required endowment to fund long-term third party monitoring and reporting as may be required under the conservation easement. In addition, any off-site preservation properties that Landowner obtains to partly or wholly mitigate the impacts of such wetland fills, where such off-site preservation properties (the "Off-Site Preservation Properties") are adjacent to City's Al Johnson Wildlife Area, may be dedicated to City by Landowner, subject to approval by City. The Off-Site Preservation Properties shall be consistent with the requirements of this Section 2.7 of the Agreement, including appending to City's Open Space Preserve Overarching Management Plan, and funding of management, maintenance, monitoring and reporting obligations. Landowner shall use its reasonable best efforts, subject to approval of Federal and State resource agencies, to provide for the establishment of passive recreation opportunities (such as Class I bike trails and wildlife viewing) in such Off-Site Preservation Properties that are adjacent to City's Al Johnson Wildlife Area. Should the Off-Site Preservation Properties to be dedicated to City require monitoring and a corresponding conservation easement recorded against the Off-Site Preservation Properties in favor of a third party non-profit entity, City shall have the right to approve the conservation easement and third party non-profit entity. In addition, Landowner shall be responsible for any required endowment to fund long-term monitoring and reporting by the third party non-profit entity that may be required under the applicable conservation easement.

Landowner shall obtain any amendments to the 404 Permit(s) that are, or may be, required and any other State or Federal permits that may be required in order

to construct improvements specified in the Specific Plan, the 404 Permit and this Agreement, including improvements for the Preserve Area(s). Notwithstanding this obligation of Landowner, City and Landowner shall, to the maximum extent feasible, avoid infrastructure designs and locations that would require Landowner to amend its 404 Permit or any other permit required by State or Federal agencies.

2.7.2 Westbrook Boulevard. Among the public improvements to be constructed on the Property that will be covered by the 404 Permit is Westbrook Boulevard from the southern boundary of the Plan Area through the ARSP. Unless constructed by another third party, Landowner is also obligated to construct Westbrook Boulevard, including the utilities located within or adjacent to Westbrook Boulevard, from the point that Westbrook Boulevard reaches the southern boundary of Parcels C-51 and C-52 in the Creekview Specific Plan ("CSP") area up to the southern boundary of the ARSP. However, Landowner is not obligated by this Agreement to obtain a 404 Permit for that portion of Westbrook Boulevard between Parcels C-51 and C-52 in the CSP. Rather, Landowner and City acknowledge that property owners in the CSP area have obtained 404 permits that include the portion of Westbrook Boulevard between Parcels C-51 and C-52 in the CSP pursuant to Section 2.7 of the CSP development agreement with City.

The CSP development agreement provides for assignment by the CSP property owners of the 404 Permit or portions of the 404 Permit for the CSP that relate to the portion of Westbrook Boulevard between Parcels C-51 and C-52, along with mitigation therefor, if such mitigation has been acquired and implemented by the CSP landowners at the time that Landowner or third parties are prepared to advance construction of that segment of Westbrook Boulevard. The CSP development agreement further provides that if the property owners in the CSP have not yet acquired and/or implemented the mitigation required to build such segment of Westbrook Boulevard, then the CSP landowners shall reimburse the constructing party for the cost of acquiring and implementing the needed mitigation to construct that segment of Westbrook Boulevard, as set forth in the CSP development agreements and as set forth in this Agreement. Under no circumstances shall Landowner be required to reimburse the CSP property owners for the cost of mitigation and/or implementation of mitigation required for constructing the identified portion of Westbrook Boulevard as set forth herein, including any costs of state and federal permitting, or any mitigation costs for infrastructure in the CSP.

2.7.2.1 Compliance with 404 Permit Conditions. Any violation of the 404 Permit by Landowner arising out of construction of drainage outfalls and other drainage improvements in a Preserve Area shall be the responsibility of Landowner. Following any required establishment periods as provided in this Agreement, outside agency permit(s), and upon City acceptance of such improvements (which shall occur upon completion of such drainage improvements prior to City acceptance of the

Preserve Area(s)), City shall be responsible for the normal operation and maintenance of such outfalls and other drainage improvements within dedicated areas, the cost of which shall be funded through the CFD for Public Services as set forth in Section 3.19 below. Notwithstanding City's acceptance of the drainage improvements, the City shall not be responsible for any 404 Permit or Clean Water Act violations arising from Landowner or third party actions affecting the normal operation of the drainage system. City shall be responsible for any 404 Permit or Clean Water Act violations, and the costs thereof, arising out of actions of the City causing such violation(s). It is also acknowledged that the City's acceptance and normal operation of the public storm drain system does not alter Landowner's obligation and responsibility for compliance with the applicable 404 Permit Preserve Area Establishment Period (as defined in Section 2.7.2.3 below) success criteria.

2.7.2.2 Preserve Area Establishment and Perpetual Monitoring Phases. It is anticipated that the 404 Permit referenced in Section 2.7.1 of this Agreement and subsequent subsections will require preservation and/or creation or restoration of wetland resources within Preserve Areas to be established on the Property as well as on the Off-Site Preservation Properties. City and Landowner shall cooperate with one another in the formation of a financing mechanism as provided for in Section 2.7.4, to fund the costs of monitoring and maintaining the Preserve Area and the Off-Site Preservation Properties in accordance with the 404 Permit. The financing mechanism may be established to address the two separate phases of on-site Preserve monitoring: the Establishment Monitoring Phase and/or Perpetual Monitoring Phase, as described below.

The first phase, or the Establishment Monitoring Phase, would occur during the time that the Preserve property remains under ownership of Landowner and adjacent build-out is occurring in accordance with the Entitlements and 404 Permit(s). During the Establishment Monitoring Phase, created wetlands would be monitored for success in accordance with criteria identified in the 404 Permit, and the balance of the Preserve Areas would be monitored in accordance with City's Open Space Preserve Overarching Management Plan. Prior to City acceptance of the Preserve Areas, all other identified Preserve improvements would have been constructed, including, but not limited to, perimeter fencing, outfalls, drainage swales, and utility lines. The duration of the Establishment Monitoring Phase will be specified in the 404 Permit and will depend in part on the ability of created mitigation wetlands to meet success criteria identified in the 404 Permit. City and Landowner acknowledge and agree that City will take ownership of the Preserve in accordance with the process outlined in the City's then current Open Space Preserve Overarching Management Plan after the Establishment Monitoring Phase has demonstrated that all created habitat has met the required success criteria, any special management conditions related to the Preserve Area as may be identified in the 404 Permit have been implemented, and all required Preserve improvements and/or facilities have been completed to the

satisfaction of the City and applicable Federal permitting agencies.

The second phase, or Perpetual Monitoring Phase, would begin immediately following the Establishment Monitoring Phase. At the outset of the Perpetual Monitoring Phase, on-site Preserve areas would be dedicated to and accepted by the City and then managed by City in accordance with the City's Open Space Preserve Overarching Management Plan and any Perpetual Monitoring Phase or special management conditions identified in the 404 Permit.

2.7.3 Maintenance by Landowner During the Establishment Monitoring Phase. Landowner shall be solely responsible for satisfying all mitigation, monitoring, reporting, and maintenance required for on-site Preserve Areas and Off-Site Preservation Properties, in accordance with the City's then current Open Space Preserve Overarching Management Plan, including, but not limited to, development of any 404 Permit required supplemental Establishment Monitoring Phase Operations and Management ("O&M") Plan, or any extended Establishment Monitoring Phase, as determined by the Army Corps, for the Preserve Area.

Furthermore, during said Establishment Monitoring Phase, Landowner shall indemnify, defend and hold City harmless from any and all costs, liabilities or damages for which the City is held responsible or alleged to be responsible under the 404 Permit, which arise out of or relate to any failure of Landowner to satisfy such 404 Permit and Establishment Monitoring Phase requirements, excluding any such failure caused by the active negligence of City or any employees, agents or contractors thereof. City acknowledges and agrees that any proposed use or improvement of the Preserve Area will be subject to the provisions of the 404 Permit and the City's then current Open Space Preserve Overarching Management Plan (as defined herein and in Section 2.7.4 below). Landowner acknowledges responsibility for obtaining 404 permit coverage for all open space uses specified in the Project and this Agreement.

Funds collected by the Public Services CFD or other financing mechanism for the purpose of maintenance of Preserve Area(s) on the Property and the Off-Site Preservation Properties will be made available to Landowner for on-going Preserve Area maintenance, monitoring, and reporting up to and until such time as City assumes the obligation for Perpetual Monitoring.

2.7.4 Maintenance by City During the Perpetual Monitoring Phase. A PAR Analysis shall be prepared and approved by the City to determine the amount of funding required to manage Preserve Areas during the Perpetual Monitoring Phase. The annual funding needs would be generated via establishment of a Public Services CFD. Following successful completion of the Establishment Monitoring Phase and transfer of applicable Preserve areas to the City, the City, at the expense of the Public Services CFD, shall have sole responsibility to manage the Preserve Area(s) according to

the City's Open Space Preserve Overarching Management Plan and any Perpetual Monitoring Phase or special management conditions identified in the applicable 404 Permit(s). During said Perpetual Monitoring Phase, Landowner shall, to the extent Public Services CFD funds generated by the Property are available to correct such below-referenced failure to comply with the Overarching Management Plan and/or any special management conditions identified in the 404 Permit by Landowner or third party, indemnify, defend and hold City harmless from any and all costs, liabilities or damages for which the City is held responsible or alleged to be responsible under the 404 Permit (of the transferred Preserve), which solely arise out of or relate to any failure of Landowner to satisfy such Overarching Management Plan and/or any special management conditions identified in the 404 Permit and mitigation monitoring requirements, excluding any such failure caused by the active negligence of City or any employees, agents or contractors thereof. City acknowledges and agrees that any proposed use or improvement of the Preserve Area(s) during the Perpetual Monitoring Phase will be subject to the provisions of the 404 Permit and the City's Open Space Preserve Overarching Management Plan and/or any special management conditions identified in the 404 Permit.

2.7.5 Facilities Included in 404 Permit. Landowner shall use its best efforts to ensure that the approval of its 404 Permit includes development of the bike paths, fuel modification areas, water quality structures and drainage and flood control facilities, outfalls, culverts, and ancillary improvements that are described in the Specific Plan and this Agreement. To the extent feasible, these improvements within the Property should be located within the Preserve "transition zone", a separate approximately 30-foot wide open space parcel located between the Preserve Area and development parcels. In this regard, Landowner shall include the location of known proposed bike paths, fuel modification areas, passive recreation areas, vehicular access routes for maintenance of open space, sewer facility maintenance, water quality structures and drainage and flood control facilities on all maps and/or exhibits accompanying all 404 Permit(s) applications to ensure all proposed open space improvements are disclosed and considered by the Army Corps during 404 Permit processing and drafting of permit conditions. Such open space improvements shall include the following:

- (i) Maintenance access ramps from Westbrook Boulevard to the Preserve Area north and south of University Creek (from both the east and west sides of Westbrook Boulevard), as shown in Exhibit "Z-1";
- (ii) A maintenance access crossing of University Creek capable of accommodating a 30,000 pound vehicle (grass fire rig) as part of off-site drainage improvements located west of Parcel AR-92 on the Al Johnson Wildlife Area to access the southwest open space south of University Creek within the Property, as shown in Exhibit "Z-2".

- The bridge design shall be supported by a hydraulic analysis demonstrating no flood plain impacts from the structure;
- (iii) Subject to the results of Landowner's reasonable best efforts as set forth in Section 2.7.1 above, opportunities for passive recreation in the Off-Site Preserve Properties for wildlife viewing and a bike trail linking West Sunset Boulevard and the Al Johnson Wildlife Area.

If any significant modifications are proposed which conflict in any manner with the Entitlements related thereto and to the planned location and improvement of the bike paths as a result of approval of the applicable 404 Permit(s), the revised relocation and/or improvement of such paths or other facilities shall be resubmitted to the City for review. The City shall not unreasonably deny any request to relocate any of the paths or other facilities within or outside of the Open Space Preserves and the review of such modifications shall be made in accordance with CEQA.

2.7.6 Preserve Area Operation and Management Plan Fee. As discussed in this Section 2.7, it is anticipated that the on-site Preserve Area(s) and, if approved by City, the Off-Site Preservation Properties will append to and be managed in accordance with the City's Open Space Preserve Overarching Management Plan, which may include supplemental management requirements and success criteria identified in the 404 Permit. In recognition of efficiencies achieved by appending to City's Open Space Preserve Overarching Management Plan, Landowner shall pay to City a one-time fee of \$20,000. Payment shall be made by Landowner upon effectuation of the 404 Permit and initiation of the Establishment Monitoring Phase management as outlined in City's Open Space Preserve Overarching Management Plan. Should the applicable resource agencies approve an independent preserve area operations and management plan for the Preserve Area(s) and Off-Site Preservation Properties such that City's Open Space Preserve Overarching Management Plan will be not applicable to such preserves, Landowner shall have no obligation to pay the fee referenced in this Section 2.7.6.

2.7.7 Optional Participation in the Placer County Conservation Plan. Landowner may elect to participate in the Placer County Conservation Plan (PCCP) as a Participating Special Entity as a means of obtaining the Project's 404 Permit. Landowner and City recognize that PCCP participation may alter the currently anticipated Federal Clean Water Act and Endangered Species Act mitigation approach set forth in this Agreement, including, but not limited to, on-site and off-site Preserve Area dedication, management, monitoring, maintenance, and funding requirements. Landowner and City shall use their reasonable best efforts and work cooperatively to implement PCCP permitting requirements for the Project, provided, however, that City shall not be responsible for any added costs that may result from Landowner's decision to participate in the PCCP.

2.8 Provision of Off-Site Real Property Interests. In any instance where Landowner is required to construct any public improvement on land not owned by Landowner, Landowner shall as its sole cost and expense provide or cause to be provided, the real property interests necessary for the construction of such public improvements. The public improvements subject to the provisions of this Section 2.8 are as follows:

- (1) Westbrook Boulevard south of the Property, and utility easements adjacent to and/or thereunder, to the extent such real property interests have not previously been dedicated to City;
- (2) Improvements to the Al Johnson Wildlife Area not otherwise owned by City; and,
- (3) any other real property interest pertaining to public improvements which City requires Landowner to construct.

In the event Landowner is unable, after exercising commercially reasonable efforts, including, but not limited to, the rights under Sections 1001 and 1002 of the California Civil Code, to acquire the real property interests necessary for the construction of such public improvements, and if so requested by Landowner and upon Landowner's provision of adequate security as determined by City for costs City may reasonably incur, City shall negotiate for purchase of the necessary real property interest for property within the City to allow Landowner to construct the public improvements as required by this Agreement and, if necessary, in accordance with the procedures established and to the extent allowed by law, use its power of eminent domain to acquire such required real property interest. Landowner shall pay all costs associated with such acquisition or condemnation proceedings. This Section is not intended by the parties to impose upon the Landowner an enforceable duty to acquire land or construct any public improvements on land not owned by Landowner, except to the extent that the Landowner elects to proceed with the development of the Property, and then only in accordance with valid conditions imposed by the City upon the development of the Property under and subject to the Subdivision Map Act or other legal authority.

In those circumstances where the City owns property in fee on or over which development of the Property requires permanent and temporary construction easements, road rights-of-way and/or sites for public facilities, City shall grant such permanent easement or temporary easements, right-of-way, or sites as needed for the timely and efficient development of the Property.

ARTICLE 3. LANDOWNER OBLIGATIONS

3.1 Development, Connection and Mitigation Fees. Except as otherwise provided in Section 2.5 of this Agreement, any and all required payments of development, connection or mitigation fees by Landowner shall be made at the time and in the amount specified by then applicable City ordinances. Wherever this Agreement obligates Landowner to design, construct or install any improvements, the cost thereof may be provided by Landowner, or by traditional assessment district, CFD or other such financing mechanism, subject to and in accordance with the provisions thereof and with City approval.

3.2 Public Improvements To Be Dedicated, Constructed or Financed by Landowner. In conjunction with each phased Final Map, or as otherwise required by this Agreement, Landowner agrees to dedicate, construct or acquire the improvements or facilities and to perform the obligations set forth in this Section 3, at its expense, subject only to reimbursements or credits specified in this Agreement. Prior to dedication of sites to City, Landowner shall obtain and fulfill the terms of any state and federal permits needed for anticipated development (e.g., 404 Permit and CDFW 1600 Streambed Alteration Agreements, RWQCB General Construction Permit, and 401 Certification, as needed) and complete said development if said development is a Landowner responsibility under this Agreement. At the time of City acceptance of any land dedications, all land dedications, except for the NAPOTS Area described in Section 3.3.1 below, shall be free of environmental or other constraints or other encumbrances inconsistent with the intended use of the Property (e.g., all wetlands shall be filled in accordance with applicable 404 Permits), unless expressly waived by the City. In the event, however, that the land dedication by Landowner is triggered by the proposed construction of a third party for a public improvement identified in this Agreement, such third party shall assume the obligation to assure that, at the time of City acceptance, the land dedicated is free and clear of all Encumbrances, unless expressly waived by City. Landowner agrees to cooperate with such third parties to use their best commercially reasonable efforts to remove all Encumbrances, subject to lender or mortgagee consent, as may be required. Such cooperation by Landowner shall be at the sole cost to the third party requesting removal of Encumbrances prior to final dedicating acceptance by City. Title shall be conveyed to City in fee simple and without restriction or limitation on use(s), unless approved otherwise by the City Attorney. Signage shall be installed in accordance with Section 3.25. With respect to the wetland obligation referenced in Section 2.7.1 above, the third party shall assume the obligation to remove such wetland environmental constraint on the Property to be dedicated to City triggered by the third party's construction of the public improvements.

3.3 Project Phasing. Landowner shall develop and construct the infrastructure necessary to serve the Project in Phases 1 through 3 substantially consistent with the Phasing Plan set forth in Exhibit "G" attached hereto. Infrastructure

may be constructed in sub-phases as approved at the discretion of the City, in consultation with all affected City departments.

In the event that sub-phases are proposed within the identified Phases 1 thru 3, the following criteria will be used to establish the conditions and requirements for that portion of work:

- The progression of sub-phase development shall provide the necessary facilities to support the land uses within the proposed sub-phase of development.
- The phase size shall be as mutually agreed upon by Landowner and City, subject to the criteria set forth in this Section 3.3.
- Provide detailed information (maps, analysis, written detail of improvements, etc.), to the satisfaction of City, to support the proposed sub-phase improvements for each utility/ public service within the phase.
- Prior to the approval of development of any parcel, the cumulative effect of that increment of development shall be evaluated to determine its impact on existing systems. This may require, as determined by City, that special studies be conducted to demonstrate how the sub-phase is in substantial conformance with infrastructure master plans prepared for the Project.

The sub-phase shall demonstrate to the City's satisfaction that the following performance criteria are met:

- Sanitary Sewer – One point of connection to the sewer outfall required, which may include a sanitary sewer lift station or interim lift station.
- Recycled Water – One point of connection required. A looped system is not required. Potable water may be utilized on an interim basis via a potable water charging station, until such time as the Environmental Utilities Director makes a determination that potable water service can no longer be allowed. At that point in time the system shall be switched over to recycled water by eliminating each potable water charging station and connecting to the West Roseville Specific Plan recycled system, as described in Section 3.9 herein (Recycled Water Facilities). At the time that a water charging station is abandoned, a fire hydrant shall be installed to separate the potable water and recycled water systems. Up to three temporary potable water charging station connections to the recycled water system shall be allowed among the 3 phases 1-3, with one

temporary potable water charging station connection anticipated for Phase 1. The connection of the recycled water pipe to the potable water pipe shall consist of one gate valve and one backflow prevention device between the connections. The charging stations may be relocated within a phase or to another phase and multiple sub-phases can share a single station. Recycled water pipe lines shall be constructed concurrent with roadways construction and paving within a phase or sub-phase. Additional temporary potable water charging station connections to the recycled water system may be utilized subject to the approval of the Environmental Utilities Director.

- Potable Water – Two independent points of connection required to the ARSP Backbone water system to provide system looping.
- Roadway – Two points of access required (one may be a temporary EVA) and reasonable traffic circulation.
- Electric – Any sub-phase shall be consistent with Section 3.11 below.
- Grading -- A substantial earthwork effort is required by the ARSP. Sub-phasing plans will be required to demonstrate, through a detailed mass grading plan, that all sites (whether cut or fill) will be able to be constructed over time with an effort to minimize use of retaining walls. Haul roads, stock pile sites and adequate drainage facilities shall be identified on grading plans.
- Drainage – Any sub-phase shall demonstrate that adequate storm water management is provided.
- Streetscape Irrigation – Irrigation systems for streetscapes shall be separated by sub-phase and fully operational.

Landowner acknowledges that modifications to the Phasing Plan as shown in Exhibit “G” shall require additional City review. Special studies including but not limited to, water/recycled water/sewer/storm water systems, grading, traffic, fire response, electric supply, and other environmental review may be required. The Landowner will be responsible for all costs associated with the preparation of special studies, and for the associated costs of time and materials of City Staff for the review and processing of the requested deviation as deemed necessary by City.

3.3.1 Recordation of Large Lot Map(s). One Large Lot Tentative Map (“LLM”) shall be prepared for the entire Plan Area, allowing phasing of the final map (“Large Lot Final Map”). Large Lot Final Maps can record independent of the others

consistent with the LLM. Consistent with Section 3.5.4.2 below, performance security (in a form acceptable to City) shall only be required for small lot subdivision maps being recorded prior to the acceptance of improvements by City. Future public lands within the Plan Area, including the well site, sewer lift station, fire station, open space, drainage channels, and parks shall be dedicated to the City on the face of each Large Lot Final Map as an irrevocable offer to dedicate ("IOD").

With the recordation of the first Final Map, the Landowner shall grant to City separate IODs for (1) rights-of-way ("RoW") for all arterial roadways to include all landscape corridors adjacent to Low Density Residential and Medium Density Residential parcels, (2) open space parcels within the Project, (3) public utility easements ("PUEs") consisting of twenty-five (25) feet adjacent to RoW dedications adjacent to land uses other than Low Density Residential and Medium Density Residential land uses, except as otherwise shown in the Specific Plan, (4) drainage channels, (5) all P/QP parcels (except the school site), and (6) temporary construction easements ("TCEs") with rights of access and rights to construct, covering the combined width of the RoW, PUEs, IODs and open space parcels (subject to any conditions in the 404 Permit). City shall have the right to accept IOD and TCE dedications on behalf of or for use by any third party developer(s), subject to such third parties executing a right of entry agreement, including indemnification provisions, acceptable to Landowner, which acceptance shall not be unreasonably withheld.

In addition, Landowner shall with recordation of the first Final Map grant to City a separate IOD for the future Placer Parkway alignment, including an area for the portion of a potential future interchange at the Placer Parkway/Westbrook Boulevard intersection that would lie within the Project boundaries, area that are designated "not a part of this subdivision" ("NAPOTS" or "NAPOTS Area") on the Land Use Plan. Notwithstanding the provisions below for City acceptance of all RoW IOD's, City shall not be obligated to accept such IOD for the NAPOTS Area until the earlier of the recordation of the final small lot map for Phase 3 of the Project or execution of the contract for the construction of the segment of Placer Parkway including the NAPOTS Area. Landowner shall include the maintenance of the NAPOTS Area in its Community Facilities District - Public Services under Section 3.19 below, until such time as the contract for the construction of the segment of Placer Parkway including the NAPOTS Area is executed. Landowner shall maintain the NAPOTS Area prior to City acceptance, using funding from the CFD - Public Services. Upon City acceptance of the IOD for the NAPOTS Area, City shall be responsible for maintenance of the NAPOTS Area, using funding from the CFD - Public Services, until such time as indicated herein.

City shall accept all RoW and PUE IOD's subject to improvement. IOD's shall remain in force until such time as all Landowner obligations for public improvements and/or Preserve Area Establishment Monitoring Phase monitoring is

complete. Upon issuance of a Certificate of Completion ("COC") for the completed improvements within the IOD's, and following the acceptance of those improvements by the City Council, the City shall accept the dedications. The City is not obligated to accept land dedications for future P/QP, Open Space, Park, or other public improvements until the frontage improvements to such land dedications are completed. Furthermore, Open Space Preserve Area acceptance shall take place as described in Section 3.12.9.1 and the City's Open Space Preserve Overarching Management Plan. Except as provided in Section 3.12.9 below, maintenance of these properties remains a Landowner obligation until accepted by City.

3.4 Public Utilities Within Rights-of-Way. All public utilities shall be located within the rights-of-way to be granted by Landowner to City for the arterials, collectors and other local streets within the Property or within public easements granted by Landowner to City for such purposes. Accordingly, upon approval of any final large lot subdivision map (or any phase of it), or demand of the City based upon service needs, whichever occurs first, Landowner agrees to grant an IOD to City for the rights-of-way, pursuant to Section 3.3.1, for any arterials, collectors, or public easements that include the area within which such public utilities will be located. If such utilities need to be installed prior to the construction of the applicable street(s), Landowner shall grant a temporary public utility easement which shall merge with the rights-of-way upon completion of the applicable street improvements. The width of the rights-of-way, including the area for the applicable roadways, utilities and power line corridors shall be as shown in the Specific Plan.

Nothing in this Agreement shall be construed to limit or restrict the right of the City to require the dedication of an easement for utility, bus shelter, or powerline corridor purposes related to development of any parcel when such requirement would be otherwise consistent with the reasonable exercise of the police powers of the City and is reasonably related to a requirement to serve the parcel or parcels adjacent to the easement.

3.5 Road Improvements. Landowner, at its expense, shall provide the road improvements set forth in this Agreement, the Specific Plan, the Phasing Plan, as may be modified as provided in Section 3.3, the Infrastructure Phasing and Reimbursement Schedule set forth in Exhibit "BB", and as shown in Exhibit "H".

3.5.1 Landowner's Obligations. Landowner obligation for residential and collector roadway improvements shall consist of the construction of curb, gutter, sidewalk, utilities, streetlights, appropriate striping, all necessary drainage improvements including storm water management requirements, fiber optic cable conduit as set forth in Exhibit "T", and pavement section. Except as provided below in Section 3.5.2, Landowner's frontage obligation for arterial roadways shall consist of curb, gutter, sidewalk, one-half of the median landscaping and median curbing,

grading of ½ of the full road section, drainage facilities including storm water management requirements, utilities, street lights, signal interconnect conduits, fiber optic cable conduit as set forth in Exhibit "T", and eighteen feet (18') of asphalt pavement adjacent to the property, including aggregate base and sub-base, striping, and any additional pavement widening at intersections and driveways to accommodate turn lanes and bus turnouts as may be required by the City Engineer (collectively "Frontage Improvements"). Right turn auxiliary lanes, turn flares, decel lanes, tapers, transition lanes, widening at driveways and bus turnouts shall be constructed by Landowner in, and encroach into, the public utility easement/landscape easement corridors per the Specific Plan. Additional RoW dedication is required where multiple left turn lanes are required per City Standards. The area within which such Frontage Improvements are to be located shall be referred to herein as Landowner's frontage. Unless specifically identified within this Agreement, Landowner shall not be entitled to reimbursement or credit towards the City's traffic mitigation fee for any required Frontage Improvements along arterial roadways, or for any residential and/or collector roadway improvements.

Except as set forth below, installation of median landscaping and median curbing shall be constructed concurrent with roadway construction. Landscaping and sidewalks adjacent to roadways may be constructed concurrent with the development of adjacent parcels. Paseo and Bike trail connections will be constructed consistent with Sections 3.12.6 and 3.12.7, respectively, of this Agreement.

3.5.2 Arterial Roadways. Landowner shall grant easements and dedicate all IODs for all arterial roadways as set forth in Sections 3.2 and 3.3.1 above. Arterial roadways wholly within and adjacent to the Project are Westbrook Boulevard, and Roads B and D east of Westbrook Boulevard. City and Landowner acknowledge that the locations of these roadways are schematic in nature and may be revised during the design of the improvement plans based on the final design for such arterials and the final small lot subdivision for the Property. The number of lanes and width of pavement shall be as required within the Specific Plan. The phasing and improvements required for each arterial are shown on Exhibit "H" and described in the Phasing Plan, Exhibit "G". Arterial roadway improvements in excess of required Landowner's Frontage Improvements constructed by Landowner pursuant to this Section 3.5.2 shall be subject to a funding, construction and acquisition agreement (the "Funding, Construction and Acquisition Agreement") between Landowner and City. City shall establish a traffic mitigation fee set-aside fund dedicated to CIP improvements within the Project that are in excess of required Frontage Improvements by withholding 25% (the "TMF Set-Aside Fund") of City traffic mitigation fee ("TMF" or "City TMF Fund") revenues paid by Landowner, provided, however, that if Landowner constructs CIP improvements that are the obligation of the CSP, the TMF Set-Aside Fund percentage for the Project out of the City TMF Fund shall be 50 percent (50%). Payments to Landowner for CIP improvements shall be on a first completed, first paid basis and shall be distributed

from the TMF Set-Aside Fund as improvements are constructed and invoiced pursuant to the Funding, Construction and Acquisition Agreement.

Within thirty (30) days of City acceptance of improvement plans, City and Landowner shall enter into a Funding, Construction and Acquisition Agreement to provide for periodic progress payments to Landowner, based upon invoices for actual work constructed, for stages of the arterial roadway improvements described in this Section 3.5.2 that have been signed off by City inspectors.

Landowner's specific construction obligations for the above referenced arterial roadways, where applicable to Landowner, are as follows:

(a) Roads B and D. Roads B and D are planned as 4-lane arterials east of Westbrook Boulevard. Landowner shall construct the Frontage Improvements, as defined in Section 3.5.1, as well as the adjacent inside lane, i.e., the CIP Improvements, for both sides of Roads B and D east of Westbrook Boulevard to the eastern Plan Area boundary, pursuant to the Phasing Plan set forth in Exhibit "G".

City shall pay Landowner out of the TMF Set-Aside Fund for the cost of the additional inside lane pursuant to the terms of the Funding, Construction and Acquisition Agreement, but if insufficient funds are available for such payment, City shall make payment to the extent funds are available, then provide 25% credits (50% if Landowner constructs CIP improvements that are the obligation of the CSP) against the TMF applied to the building permits on Landowner's Property, for all DUEs on Landowner's Property, up to the amount of the payments due to Landowner, provided, however, that once sufficient TMF Set-Aside Fund revenues are available to pay for such improvements, City shall pay Landowner such amount, less the amount of any payments and credits previously extended to Landowner against the TMF applied to DUEs on Landowner's Property.

(b) Westbrook Boulevard. Westbrook Boulevard is planned as a 6-lane arterial roadway. Landowner shall construct both outside Frontage Improvements to form a continuous roadway from south to north and shall include the full grading of the ultimate roadway section and the construction of a 4-lane road section of the ultimate 6-lane roadway, including specified landscape median (8 feet south of Road A and 14 feet north of Road A), as defined in Section 3.5.1, which 4-lane section includes the frontage improvements as well as the adjacent inside lane, i.e., the CIP Improvements, on each side of Westbrook Boulevard.

City shall pay Landowner out of the TMF Set-Aside Fund for the cost of the additional two inside lanes pursuant to the terms of the Funding, Construction and Acquisition Agreement, but if insufficient funds are available for such payment, City shall make payment to the extent funds are available, then provide 25% credits against

the TMF (50% if Landowner constructs CIP improvements that are the obligation of the CSP) applied to building permits on Landowner's Property, for all DUEs on Landowner's Property, up to the amount of the payments due to Landowner, provided, however, that once sufficient TMF Set-Aside Fund revenues are available to pay for such improvements, City shall pay Landowner such amount, less the amount of any payments and credits previously extended to Landowner against the TMF applied to DUEs on Landowner's Property.

Westbrook Boulevard Frontage Improvements shall be constructed in phases consistent with the Phasing Plan set forth in Exhibit "G". Each phase of such Westbrook Boulevard Frontage Improvements shall be triggered upon on-site development of the specific parcels adjacent to the roadway and shall include the full grading of the ultimate roadway section and the construction of a 4-lane road section of the ultimate 6-lane roadway, including specified landscape median (8 feet south of Road A and 14 feet north of Road A), and frontage improvements on both sides. Limits of construction phases of Westbrook Boulevard shall be determined by the City Engineer at such time as Landowner submits sub-phasing plans as provided for in Section 3.3.

In the event that development of the ARSP precedes the extension of Westbrook Boulevard through the Creekview Specific Plan ("CSP") by the CSP landowners, Landowner shall assume the obligation to extend Westbrook Boulevard through the CSP and into the Plan Area. Within thirty (30) days of City acceptance of Landowner's improvement plans for Westbrook Boulevard, including the portion of Westbrook Boulevard through the CSP, City and Landowner shall enter into a Funding, Construction and Acquisition Agreement to provide for periodic progress payments to Landowner for the CIP portion of Westbrook Boulevard, based upon invoices for actual work constructed, for stages of Westbrook Boulevard that have been signed off by City inspectors. All City reimbursements to Landowner for the CIP portion of Westbrook Boulevard shall be from funds from the TMF Set-Aside Fund. All frontage improvements for that portion of Westbrook Boulevard through the CSP that Landowner constructs shall be reimbursed to Landowner by the CSP at such time when construction of the improvements would have been required had the improvement not been so advanced by Landowner. Reimbursement shall be adjusted annually by the CCI from the date the reimbursable costs were incurred by Landowner to the date of reimbursement, as provided in Section 3.26 of the CSP Development Agreement.

3.5.3 West Sunset Boulevard. Landowner shall have the obligation to construct improvements to West Sunset Boulevard in unincorporated Placer County immediately north of the Annexation Area (the "West Sunset Improvements") to a Rural Secondary Roadway standard pursuant to Placer County standards in effect as of the Effective Date of the Agreement. The West Sunset Improvements shall be constructed as initial improvements and ultimate improvements, as set forth in Exhibits

“H-3-A, -B, and -C” hereto. Initially, the West Sunset Improvements shall consist of an all weather fire access road (emergency vehicle access only) along the future alignment of Westbrook Boulevard from West Sunset Boulevard south to where initial Westbrook Boulevard improvements in the Project have been constructed, including a gate and fencing to restrict public access to the satisfaction of the City Engineer. As set forth in the Phasing Plan in Exhibit “G”, the ultimate West Sunset Improvements shall be constructed by Landowner at the time of commencement of construction of Phase 3 of the Project. The West Sunset Improvements shall consist of two 12-foot travel lanes, two 4-foot shoulders, a new 8-foot wide drainage ditch on the south side of roadway, and necessary turn lanes, as shown in Exhibit “H-3-A, -B, and -C”, along with a 5-foot sidewalk within a 25-foot landscape corridor along the southern edge of West Sunset Boulevard adjacent to the Property and within the new City boundary to be created by annexation. There shall be no requirement for street lighting along West Sunset Boulevard, and the only electrical facilities along West Sunset Boulevard required of the Project shall be electrical facilities to serve the traffic signal to be constructed at the intersection of Westbrook Boulevard and West Sunset Boulevard, as well as the electrical facilities to serve the landscaping to be constructed by Landowner as part of the West Sunset Improvements. In order for Landowner to construct such West Sunset Improvements, Placer County shall need to abandon a portion of its existing right-of-way on the southern portion of West Sunset Boulevard along the entire northern border of the Project (as shown in Exhibit “H-3-A”). The annexation of the ARSP shall extend north to a point south of the West Sunset Improvements, including land that the County needs to abandon as herein described, as shown in Exhibit “H-3-A”. Landowner and City shall work together with Placer County to convey all existing interests in the LSE/PUE within the annexed area to City or to Landowner, who shall in turn offer the dedication of the landscaped corridor as RoW to City.

Should Placer County, or the City and Placer County jointly, develop a fee program that includes the West Sunset Improvements or any portion thereof, which fee program requires payment of traffic impact fees to fund the West Sunset Improvements at the time of issuance of building permits in the Project, Brookfield Sunset, LLC shall be entitled to reimbursement for the cost of the West Sunset Improvements that Brookfield Sunset, LLC or its assignee(s) has constructed pursuant to this Agreement, with reimbursement from such traffic fees collected in the above referenced fee program from the issuance of building permits in the Project or paid by third parties. Such reimbursement shall be personal to Brookfield Sunset, LLC, and does not run with the Property to successors and assigns, unless Brookfield Sunset, LLC provides written notice to Placer County or to City and Placer County, as the case may be, that said reimbursements have been assigned by Brookfield Sunset, LLC to a third party.

3.5.4 Timing of Dedication and Security for Road Improvements.

3.5.4.1 Rights-of-way for the arterial roadways and the NAPOTS

Area shall be dedicated as an IOD to the City as set forth in Sections 3.2 and 3.3.1, and with the recordation of the first Large Lot Map. All other dedications of roadways to the City shall be made with subsequent final small lot subdivision maps and City acceptance of completed improvements.

3.5.4.2 Prior to the recordation of a small lot residential subdivision map for the Property, Landowner shall provide adequate assurances to City, either in the form of subdivision improvement bonds, issuance and sale of bonds by the CFD or other manner acceptable to the City, that adequate funds are available to finance the completion of all improvements to arterial roadways and the single collector street in the Project to serve the portion of the Property which is the subject of the small lot residential subdivision map; provided, however, Landowner shall not be required to post security for the portion of the work associated with Road CIP improvements.

3.5.5 Road Improvement Standards. All improvements to be installed by Landowner shall comply with the City's development standards for public streets in effect as of the date of improvement plan approval unless modifications are otherwise mutually agreed to by Landowner and the City Engineer. The rights-of-way required for such road improvements shall be as set forth in the Specific Plan, or, if not shown in the Specific Plan, then as set forth in the City's Improvement Standards.

3.5.6 Landscape Setbacks. For the roadways within and/or adjacent to the Property, Landowner shall establish the applicable landscape setbacks provided therefore by the Specific Plan and/or Design Guidelines. Such setbacks shall be measured generally from back of curb, except bus turnouts, right turn auxiliary lanes, turn flares, decel lanes, and turn lane tapers may encroach into the landscape setback to the extent permitted by the Specific Plan Design Guidelines. Such landscape setbacks shall be limited to landscaping, streetlights, utilities, sidewalks, traffic control equipment (signs and traffic signals), walls and related uses, and shall be included in the road rights-of-way, adjacent to LDR and MDR parcels. Such setbacks shall not be included within rights-of-way adjacent to High Density Residential and nonresidential uses as set forth in the Specific Plan.

3.5.6.1 Separated Sidewalks. Landowner shall ensure that if a residential property is improved with separated sidewalks, the residential property shall be subject to recorded CC&R's containing a requirement that the owner of a residential unit immediately adjacent to a separated sidewalk is responsible for the maintenance of all landscaping (consistent with City's Water Efficient Landscape Ordinance) within the landscape planter, including, street trees (to be trimmed per City standards) located between the separated sidewalk and curb, except where a Homeowners Association maintains the landscaping within the landscape planter. Individual homeowners shall be notified by any such applicable Homeowners Association of a restriction against replacing landscaping with hard surface

improvements within the above referenced landscape planter.

3.5.7 Traffic Signals. Landowner shall be responsible for the costs of construction of traffic signals as shown on Exhibit "I" and described in the Phasing Plan through the payment of the TMF. Landowner shall construct the traffic signals set forth in Exhibit "I", for which City shall make progress payments to Landowner for the cost of construction of such traffic signals from the City's TMF Set-Aside Fund, as defined in Section 3.5.2 above. At a minimum, and in the case where full signal improvements are not warranted at the time of construction by Landowner, then, at the discretion of the City Engineer, Landowner shall install underground conduit, loops, and poles for those signals, subject to the progress payment and credit provisions set forth in this Section 3.5.7. For those traffic signals to be completed at a later date, City shall be responsible to install mast arms, signals and signal controllers when they are needed. If TMF Set-Aside Fund revenues are not available to fully pay Landowner for any traffic signal improvements constructed by Landowner under this Section 3.5.7, City shall provide 25% credits (50% if Landowner constructs CIP improvements that are the obligation of the CSP) to Landowner against the TMF applied to building permits on Landowner's Property, up to the amount of the reimbursement then un-reimbursed by City to Landowner, provided, however, then once sufficient City revenues are available to fully pay Landowner, City shall so pay Landowner, less the amount of any credits previously extended to Landowner against the TMF applied to DUEs on Landowner's Property. Landowner shall be entitled to reimbursements and/or credits toward the appropriate City traffic mitigation fee for the design and construction of public traffic signals and/or signals warranted by City that are constructed in their ultimate location. Landowner shall not be entitled to any reimbursements or traffic mitigation fee credits for any portion of a traffic signal that serves a private driveway, unless the driveway is the fourth leg of a warranted three legged signal that serves public rights-of-way on three legs, at which time the public legs would be available for reimbursement from the TMF Set-Aside Fund.

3.5.8 Update of City Fee. Landowner acknowledges that as a result of approval of the Project, the City will need to update the Capital Improvement Program and Traffic Mitigation Fee to include the Project. Landowner and City shall use their best efforts to cause such update to be completed within twelve (12) months of the Effective Date hereof. Until such update has been completed and approved by the City, Landowner agrees to pay the fee rate then currently charged to the Creekview Specific Plan Area. To the extent that the Traffic Mitigation Fee adopted for the Project is higher than that charged in the Creekview Specific Plan Area, Landowner shall pay the difference as a surcharge to future Traffic Mitigation Fee obligations on a per-DUE basis for the remaining DUE's within the Project. To the extent that the Traffic Mitigation Fee adopted for the Property is lower than that charged in the Creekview Specific Plan Area, Landowner shall receive a credit against future Traffic Mitigation Fee payments until such time as the amount of the overpayment is exhausted.

3.5.9 Highway 65 Joint Powers Authority. Landowner agrees that the Property shall be subject to and shall pay the Highway 65 Joint Powers Authority Fee ("Highway 65 JPA Fee"). City shall initiate and complete the actions necessary to amend the Highway 65 JPA Fee to include the Property and Landowner hereby consents to and waives any objection to such inclusion.

Landowner agrees that until such time as the Highway 65 JPA Fee is amended to include the Property, Landowner shall pay the fee applicable to the Creekview Specific Plan Area ("Interim Highway 65 JPA Fee") in the amounts and at the times specified by the Highway 65 JPA Fee program. If Landowner pays the Interim Highway 65 JPA Fee and the Interim Highway 65 JPA Fee exceeds the Highway 65 JPA Fee as amended, then the excess amount collected shall be applied as a credit towards Highway 65 JPA Fees on a per DUE basis for the remaining DUE's within the Specific Plan. If the Interim Highway 65 JPA Fee is less than the amended Highway 65 JPA Fee, the total amount of the shortfall shall be added as a surcharge to such future Highway 65 JPA Fee on a per DUE basis.

Nothing in this Section shall be construed as an agreement to an allocation of assessment or benefit to a particular parcel or parcels or to constitute a waiver of the right of Landowner to protest an allocation of a particular assessment burden or benefit associated with the updates of the foregoing fee programs.

3.5.10 South Placer Regional Traffic Fee. Landowner agrees that the Property shall be subject to and pay the South Placer Regional Traffic ("SPRTA") Fee as established by the Placer County Transportation and Planning Agency ("PCTPA") and adopted by the City. City shall initiate and complete the actions necessary to amend the SPRTA Fee to include the Property and Landowner hereby consents to such inclusion.

Landowner agrees that until such time as the SPRTA Fee is amended to include the Property, the fee applicable to the Creekview Specific Plan Area shall apply to the Property and Landowner shall pay such fees ("Interim SPRTA Fee") in the amounts and at the times specified by the SPRTA Fee program. If Landowner pays the Interim SPRTA Fee and the Interim SPRTA Fee exceeds the SPRTA Fee as amended, then the excess amount collected shall be applied as a credit towards SPRTA Fees on a per DUE basis for the remaining DUE's within the Property. If the Interim SPRTA Fee is less than the amended SPRTA Fee, the total amount of the shortfall shall be added as a surcharge to such future SPRTA Fees on a per DUE basis.

Nothing in this Section shall be construed as an agreement to an allocation of assessment or benefit to a particular parcel or parcels or to constitute a waiver of the right of Landowner to protest an allocation of a particular assessment burden or benefit associated with the updates of the foregoing fee programs.

3.5.11 Tier II Traffic Fee. The SPRTA Tier II Fees are administered by the Placer County Transportation Planning Agency ("PCTPA"). Landowner acknowledges and agrees to pay the Tier II Traffic Fee, collected to pay for construction of the Placer Parkway and improvements to the I-80/SR65 interchange. The Tier II Traffic Fee program participants include the jurisdictions of Placer County, and the Cities of Roseville, Rocklin, and Lincoln. The current Tier II Traffic Fee is \$6,332.96 per DUE and will be allocated to the various land uses using a methodology approved by the SPRTA Board. The Tier II Fees shall be adjusted for inflation annually based on the Construction Cost Index ("CCI") shown in the Engineering and News Record in May of each year and based on the average of the 20 Cities average and San Francisco average. Upon approval by the SPRTA Board, SPRTA Tier II Traffic Fees to be paid by the Project shall be subject to a credit per DUE for costs advanced by Landowner applicable to future resource agency permitting for the future alignment of the segment of Placer Parkway within the Project boundaries, as well for any land acquisition component of the SPRTA Tier II Traffic Fee that applies to that segment of Placer Parkway that lies within the Project.

3.5.12 Transit Master Plan Funding. Landowner shall pay, as its fair share on a City-Wide basis, for the update of the City's Long Range Transit Master Plan, Short Range Transit Plan Update, and Bicycle Master Plan Update, the amounts of \$4,166, \$4,998, and \$4,166, respectively, prior to the recordation of any Large Lot Final Map on the Property. Landowner's pro-rata share, based on 148.7.7 acres as the numerator and 674.4 acres as the denominator is 22.05% of \$13,330, or a total of \$2,939.

3.5.13 City-County Fee. Landowner acknowledges that City and Placer County have adopted a funding mechanism (the "City-County Traffic Mitigation Fee") for improving certain roads in the City and County, including Baseline Road and Walegra Road. Landowner agrees that the Property shall be subject to and pay the City-County Traffic Mitigation Fee. Until such time as an update of the City-County Traffic Mitigation Fee has been completed to include the Property, Landowner agrees to pay the fee rate then currently charged in the CSP.

3.5.14 Santucci Boulevard and Vista Grande Boulevard Extension and Traffic Mitigation Fee. If and when the City and County of Placer develop fee programs to mitigate regional traffic concerns, Landowner consents to and agrees that any then-undeveloped portion of the Property, for which no building permit has been issued, shall participate to the extent of its fair share in a City-Wide funding mechanism. Such regional roadway extensions and improvements shall consist only of Santucci Boulevard between the Regional University Specific Plan and the future Placer Parkway and Vista Grande Boulevard west of the Sierra Vista Specific Plan boundary to Baseline Road. At the time of the adoption, Landowner does not waive its right to protest the amount of the fee.

3.5.15 Placer County Traffic Mitigation Fee. Landowner agrees to pay to City a fee of \$215 per DUE (the "Placer County Road Impact Fee") to provide fair share funding to Placer County as full mitigation of impacts on the Placer County roadway circulation system for roadways in the adopted County Capital Improvement Program at the date of approval of this Agreement that are north of Interstate 80, west of Highway 65, and outside of County approved specific plan areas (but excluding Santucci Boulevard, the extension of Vista Grande Boulevard as provided in Section 3.5.14 above), and the West Sunset Boulevard/Fiddymont Road intersection. The Placer County Road Impact Fee shall be adjusted annually after the completion of annexation proceedings for the Specific Plan by the percentage of change in the CCI.

3.5.16 Fee Credits/Reimbursement for Construction of CIP Improvements. Landowner shall be entitled to credits against the City traffic mitigation fees for the cost of constructing roadway improvements that are included in City's roadway capital improvement program ("Roadway CIP") and identified in this Agreement, as more fully set forth in Sections 3.5.1 and 3.5.2 above and Section 4.2 below.

3.5.17 Transportation Systems Management. Landowner shall comply with the City's Transportation Systems Management Ordinance.

3.5.18 Alternative Transportation Marketing. Landowner shall provide educational and marketing materials for alternative modes of transportation (e.g. Roseville Transit Services Guide, Bikeways Map and carpool/vanpool information) to each new homeowner and the first resident of each attached housing unit.

3.5.19 Park and Ride Lot. Twenty-five (25) park and ride spaces shall be provided on Parcel AR-53, as shown in Exhibit "H". Such park and ride spaces shall be included in addition to the parking required for the applicable underlying land use by the City's Zoning Code. Landowner shall install the park and ride spaces at the time of development of the parcel on which the park and ride lot is located. The park and ride lot shall be located proximate to a bus stop location. Park and ride spaces shall allow for exclusive daily weekday parking between the hours of 5:00am and 8:00pm.

3.6 Sewer Facilities. Landowner shall construct on-site sewer facilities as described in this Section, the Phasing Plan, and as shown in Exhibits "J-1" and "J-2", attached hereto. In the event that the WRSP and/or CSP has not constructed sewer facilities necessary to serve the Property, Landowner shall construct the necessary off-site sewer facilities and obtain reimbursement from the WRSP and/or CSP in accordance with Section 4.2.2 herein. Landowner shall, subject to the provisions of Section 2.8 of this Agreement, be solely responsible for obtaining easements and rights-of-way that are required for construction of such improvements. City shall provide

Landowner with any rights-of-entry needed to connect these improvements to the City's existing sewer system. Except for the improvements expressly described herein and as shown on Exhibits "J-1" and "J-2", Landowner shall have no obligations to install or pay for the installation of any off site treatment facilities, except through the payment of sewer connection fees (local, regional and special benefit) levied and collected by the City at the time of development pursuant to City ordinances.

3.6.1 Lift Station Sites. Landowner shall, at its expense, design and construct two sewer lift stations (Parcels AR-56 and AR-57). Landowner shall be responsible for installation of all frontage improvements to Parcels AR-56 and AR-57, including storm drainage, water, wastewater, electric and communication fiber conduit per City standards. Construction of such sewer lift stations shall be consistent with Exhibits "J-1" and "J-2" attached hereto and Figures 9 and 10 of the Sanitary Sewer Master Plan. As disclosure to subsequent purchasers, Landowner shall install signage at both future lift station sites describing the facilities to be constructed on the particular lift station site. Signs shall be provided pursuant to City specifications. The Environmental Utilities Director shall review and approve the signs prior to their installation.

3.6.2 Master Wastewater Plan. Landowner shall construct wastewater conveyance facilities to connect the Project to the Pleasant Grove Wastewater Treatment Plant ("Treatment Plant"). Construction of such facilities shall be consistent with Exhibits "J-1" and "J-2".

Where wastewater conveyance facilities are to be located within roadways, such facilities shall be installed concurrent with the construction of the corresponding road improvements, if not earlier. All weather maintenance access roads shall be provided to provide a single point of access to all manholes that are not located within roadways, to be determined by the Environmental Utilities Director.

3.6.3 Improvement Standards. All sanitary sewer facilities shall be designed and constructed pursuant to City's then current Improvement Standards and shall be subject to City plan review, construction inspection and final approval. Landowner shall pay then current plan check, mapping and inspection costs as incurred by City for review, mapping and inspection of such improvements.

3.6.4 Access to Manholes. Manholes shall be located so that they are accessible by City sewer maintenance vehicles unless otherwise approved by the Environmental Utilities Director. All manholes shall be made watertight during construction. Landowner shall maintain access for City sewer maintenance vehicles to access all selected manholes in the Project, as determined by the Environmental Utilities Director. Where feasible, maintenance roads shall be combined with bikeways.

3.6.5 Public Utility Easements. Where wastewater improvements to be constructed by Landowner are not located within road rights-of-way, as and when Landowner installs such wastewater improvements, Landowner shall grant and City shall accept a non-exclusive public utility easement for the ownership and maintenance of such lines, together with access thereto for maintenance purposes. Easement widths shall be granted in accordance with the City's Improvement Standards.

3.6.6 Wastewater Facilities for Reimbursement. Subject to the provisions of Section 4.2 of this Agreement, Landowner shall be entitled to reimbursement from third parties whose property is benefited by Landowner's construction of wastewater facilities required by City in which there exists capacity in excess of that required to serve the development of the Property (excluding any operational adjustments by City). Such reimbursement shall be pro rata, based on the respective capacity requirements (i.e., flow in the pipes) of the Property and other property benefited by such construction. Specific wastewater facilities subject to reimbursement pursuant to this Section 3.6.6 and Section 4.2 of this Agreement are shown in Exhibits "K-1" and "K-2" and listed in Exhibit "BB". For properties outside of the Plan Area, Landowner shall submit documentation to the City to justify the requested reimbursement.

The timing for the payment of any such reimbursement by such third party/benefiting landowner to Landowner shall be upon the earlier the formation of a CFD and issuance of bonds for such CFD serving development by such third parties or, recordation of the first large lot subdivision map serving the development by such third party.

3.6.7 Wastewater Service Area Boundary. Landowner shall be responsible for its pro rata share, based on acreage (148.7 acres out of 674.4 acres in the ARSP), of all costs associated with obtaining approval from the South Placer Wastewater Authority (SPWA) for expansion of the existing wastewater service area boundary to include the Plan Area.

3.7 Water Supply.

3.7.1 Placer County Water Agency Supply. City is negotiating with the Placer County Water Agency (PCWA) to acquire an additional treated surface water supply from PCWA via a wholesale water agreement, inclusive of 1,067 acre feet per year ("AFY") to serve the Project. Water obtained from PCWA by City through the wholesale agreement would be delivered to the City through PCWA's Tinker Road Pump Station and Reservoir located in the Sunset Industrial Area of unincorporated Placer County (the "Tinker Road Facility"), and then transported through the City's water infrastructure to the Project site. In the interim period before the PCWA infrastructure is in place to provide water to the Project, the Project will be supplied using existing City supplies and water treatment capacity. Additional infrastructure,

including the Ophir Water Treatment Plant and improvements at the Tinker Road Facility, as described below, are needed to provide the PCWA treated surface water to the Project. As set forth in the EIR, prior to the approval of any building permits in the Project, Landowner shall pay its proportionate share of required funding to City for the acquisition and delivery of treated potable water supplies to serve the Project. No building permits shall be issued for the Project until City has entered into the herein described wholesale water agreement with PCWA to acquire sufficient water supplies to serve the Project's water demands.

3.7.2 Financing of Water Supply. To provide the needed surface water supply to serve the Project, and subject to the direction of and at the time City so directs, Landowner is required to participate in the funding of certain PCWA off-site water facilities. Such facilities consist of the future PCWA Ophir Water Treatment Plant ("Ophir WTP"), associated PCWA transmission facilities necessary to wheel treated water to the Tinker Road Facility, and improvements to the PCWA Tinker Road Facility. Landowner is obligated to fund the construction of the off-site water facilities at the Tinker Road Facility such that capacity is increased by 2.7 MGD. Such off-site water facilities include but may not be limited to the following: (i) approximately 800 feet of 24 inch diameter pipe; (ii) a new 2.7 MGD firm capacity booster pump station; and (iii) either a new pipeline connection into the existing fluoride feeder station, or a new fluoride feeder station inside a new pump building. To the extent that the improvements to the Tinker Road Facility constructed by Landowner provide capacity or enhance water supply reliability benefitting third parties, Landowner shall be entitled to reimbursement from such third parties to the extent that they benefit from Landowner's constructed improvements to the Tinker Road Facility. In addition to the improvements required at the PCWA Tinker Road Facility as set forth herein, Landowner agrees that no building permits shall be issued for the Project until such time as City and Landowner agree to a funding source for the PCWA water supply. The funding source for the PCWA water supply may consist of one, or any combination, of the following, without the need to amend this Agreement: (i) a water connection fee representing the required PCWA infrastructure; (ii) CFD proceeds that have been allocated for the Project's water supply; or (iii) any other funding source or strategy mutually agreed to in writing by City and Landowner. If CFD proceeds are used to fund the PCWA water supply, such CFD proceeds shall be provided at such time and amount as jointly agreed to by City and Landowner. In addition to the PCWA water facilities described herein, Landowner shall pay for the installation of any off-site water storage, treatment, and transmission facilities benefitting the Project through the payment of water connection fees levied and collected by City, in accordance with any applicable City ordinances as may be established by City.

3.7.3 Groundwater Well. Landowner shall dedicate to City Parcel AR-55 for one (1) groundwater well at the approximate location shown on Exhibit "L". Landowner shall construct frontage improvements for Parcel AR-55, including water,

recycled water, wastewater, storm drainage, electric and communication fiber conduit. As shown in Exhibit "L", the well site shall be constructed adjacent to the 24" water line to be constructed in Road B, and be connected to that 24" water line with a 16" water line. Landowner shall install a test well in a location mutually agreed upon by Landowner and City to determine if the well location utilized meets desired capacity and water quality. If the desired capacity and water quality are confirmed in the test well, Landowner shall be responsible for drilling and completing the production well (but not above ground well improvements such as pumping and treatment facilities) as further described below. City shall be responsible for the construction and costs of above ground production well (topside) improvements such as pumping and treatment facilities.

It is the intent of this section (and the Parties) that the groundwater well location identified within the Project shall be capable of achieving a yield of approximately 1,800 gallons per minute, be designed for Aquifer Storage and Recovery, and the groundwater water is of such quality that only disinfection will be required to meet California Drinking Water Quality Standards. Should the City determine the available capacity or water quality does not achieve these objectives, Landowners shall, at its own cost, work with the City to relocate the well site within the Project to an alternative site mutually agreed to by City and Landowner until these objectives are satisfied.

Landowner shall contact the City Environmental Utilities Department prior to design and construction of the production well. The production well shall be in operation at the time of occupancy of the 250th residential unit in the Project. Landowner shall receive approval from the City of the well design and drilling method prior to commencement of this work. In addition, notwithstanding the foregoing, the well shall be drilled prior to the time of occupancy of any residential units within 500 feet of the well site. Landowner shall include noise curtains for the well if at the time of construction of the well homes are occupied between 500 feet and 1,000 feet of the well.

If City determines that the production well is required prior to the occupancy of the 250th residential unit in the Project, City has the right to construct the test well and the production well. Landowner shall reimburse City for the actual cost of the below ground improvements for the test well and production well, as set forth above, including annual CCI adjustments of such costs, upon occupancy of the 250th residential unit in the Project. If City constructs the test well and production well prior to the occupancy of the 250th residential unit in the Project, Landowner agrees to construct an all weather access roadway within either the Road A or Road B RoW and all associated infrastructure to serve Parcel AR-55 as specified in this Section 3.7.3 within one (1) year of notification from City if Road B has not otherwise already been constructed by Landowner.

Landowner shall, prior to the issuance of the first building permit in the Project phase where an existing well is located, destroy the well or wells in that particular Project phase from among the two existing agriculture irrigation wells and one domestic well in the Project Area. Landowner shall obtain from City a Well Permit and follow the California Well Standards for the destruction of the wells on the Property. All construction plans shall be designed pursuant to City's then current Standards and mutually agreed to by Landowner and the Environmental Utilities Director, and subject to City plan review, construction inspection and final approval. Landowner shall pay the then current plan check, mapping and inspection costs as incurred by City for review, mapping, and inspection of the destruction of the wells.

3.7.4 Water Conservation Measures. Landowner and its successors shall implement a Water Conservation Plan included as Exhibit "M" to this Agreement. The Water Conservation Plan shall include compliance with the City's then current Water Efficient Landscape Ordinance and outline all water conservation measures being implemented within the Project and measures to ensure water conservation objectives are achieved in perpetuity and shall be approved, at the discretion of, the Environmental Utilities Director prior to issuance of the first building permit. Such water conservation measures shall include, but are not limited to, Smart Timers, re-circulating hot water systems, and turf limitations, and shall be disclosed to each purchaser of real property within the Property. Modifications to the Water Conservation Plan as approved by the Environmental Utilities Director shall not require an amendment to this Agreement.

3.7.5 Periodic Confirmation of Water Conservation Goal. The City has determined, and the Landowner agrees, that the available water supply, as documented in the Water Supply Assessment for the Project, is sufficient to serve all phases of the Project. This determination was the conclusion of a review of the various technical studies completed in connection with the environmental review of the Project. The demand for water at build-out of the Project was determined by reference to the City's current information on water usage by the various land uses included and permitted within the City and the proposed land uses within the Project and by reference to the Landowner's Water Conservation Plan which includes a reduction in water use by approximately 15% over current (i.e., Effective Date of this Agreement) use characteristics.

The sources for water evaluated for the Project includes the addition of a new treated water supply from PCWA which adds to the water source currently used throughout the City; namely, surface water contracts with federal and local agencies and in drought or emergency situations the use of groundwater. City and Landowner are satisfied, based upon detailed technical analysis, that the demand and source assumptions relied upon to assure water from the Project are valid. However, the Parties have agreed to the following procedure to assure the continued validity of the underlying

assumptions and the continued availability of sufficient water to service all phases of the Project.

Upon construction of the dwelling units in the Project that cumulatively utilize 50% of the projected potable water usage at buildout of the Project, and then every three years thereafter during the term of this Agreement, at the same time as the annual review provided for in Section 5.2 of this Agreement, the Parties shall review the underlying assumptions regarding water demands, the achievement of project water conservation goals and sources of water for the Project, all as set forth in the EIR. Water conserved by Landowner pursuant to measures implemented under Section 3.7.4 of this Agreement shall be factored into the review provided hereunder to the benefit of Landowner. If the City determines that the actual demand and sources differ materially from the assumptions in the EIR and that the difference(s) will negatively affect the City's ability to provide water for the Project, then the Parties shall meet and in good faith attempt to implement whatever measures are needed to assure the water supply will meet the Project's demands, provided, however, that should City adopt City-Wide a requirement for a reduction in water use by more than the approximately 15% over current potable water usage as set forth herein, and the then built portion of the Project has met its approximately 15% objective set forth in this Section 3.7.5, the residential units for which building permits have not yet been issued shall be required to implement such measures necessary to achieve such City-Wide requirement, above the approximately 15% objective set forth in this Section 3.7.5. Development and implementation of such measures shall be at Landowner's cost. The foregoing notwithstanding, should City achieve its adopted City-Wide water conservation goals, the Project shall not under any circumstances be deemed out of compliance with its Water Conservation Plan water conservation objective as set forth herein.

3.8 Water System Improvements.

3.8.1 Water Study. Landowner has prepared a Water Study for its on-site water facilities and prepared a general design of the water system as shown on Exhibit "N" that identifies the size and location of waterlines, storage facilities, and pump stations. The timing of construction of such facilities is set forth in the Infrastructure Phasing "Exhibit "BB".

3.8.2 Water Facilities. Landowner shall construct on-site water system facilities as shown on Exhibit "N". In the event that the CSP has not constructed water lines necessary to serve the Project, and it can be demonstrated through the City hydraulic model that the water lines within the CSP are needed to supply water to the Project consistent with City standards, Landowner shall construct the necessary water lines and obtain reimbursement from the CSP in accordance with Section 4.2.2 herein. All such facilities to be constructed by Landowner, including mains, shall be designed and constructed pursuant to City's then current Improvement Standards, unless

modifications are otherwise mutually agreed to by Landowner and the Environmental Utilities Director, and subject to City plan review, construction inspection and final approval. Landowner shall pay then current plan check, mapping and inspection costs as incurred by City for review, mapping and inspection of such improvements. Other than those facilities set forth in Section 3.7.2 above, Landowner will not be responsible for the construction of potable water reservoirs, water storage tanks, topside well improvements, water treatment facilities and pump stations except through the payment of City water connection fees and special benefit fees as may be applicable or otherwise described herein.

3.8.3 Water Facilities for Reimbursement. There are water facilities to be constructed in the CSP for which Landowner has a construction obligation only if City determines the facilities are required to serve the Project, and if Landowner is not obligated to construct, or CSP landowners or other third parties have constructed the facilities, Landowner is obligated to pay its pro-rata share of the costs of such water facilities, as provided in this Section 3.8.3. There are other water facilities which either Landowner or other third party landowners may construct, the costs of which construction are subject to reimbursement to the constructing party, as set forth in Section 3.26 below (where reimbursement is by Landowner to constructing third parties), or in Section 4.2 below (where reimbursement is from third parties to Landowner). Finally, there are water facilities to be constructed by Landowner which the City may in the future determine are eligible for reimbursement from third parties currently outside the City (but excluding the Urban Reserve, which will not be served by water facilities constructed as part of ARSP infrastructure). Reimbursement for water facilities under this Agreement shall be pro-rata, based on the respective capacity requirements of the Property and other property benefited by the construction. Specific water facilities subject to reimbursement pursuant to this Section 3.8.3 and Section 3.26 and Section 4.2 of this Agreement are shown in Exhibits "O-1", "O-2", and "O-3" and listed in Exhibit "BB". Exhibit "O-2" sets forth reimbursements for infrastructure between Landowner and parties within the CSP assuming no other third parties benefit. Exhibit "O-3" sets forth reimbursement for certain water lines between Landowner, the CSP, and other third parties (namely, the Placer Ranch Specific Plan ("PRSP")), should such other third parties connect to or construct identified infrastructure.

With respect to the 24 inch waterline to be installed in Westbrook Boulevard from the southern boundary of the Property and the 24 inch waterlines to be installed in Roads B and D east of Westbrook Boulevard (the "Westbrook Boulevard 24" Water Line"), the Property, and the PRSP will all benefit from the Westbrook Boulevard 24" Water Line.

If the PRSP proceeds with a City development project prior to Landowner, and City determines that the PRSP must construct water facilities in the ARSP to serve the PRSP, then the City shall require in the PRSP development agreement the obligation

to construct such water facilities needed to serve the PRSP that are located in the ARSP, with reimbursement due to the PRSP from Landowner for its pro-rata share of the costs of construction of ARSP water facilities that are constructed by the PRSP, as set forth in this Section 3.8.3.

The timing for the payment of any such reimbursement shall be upon the earlier of the formation of a CFD and issuance of bonds for such CFD serving development by such third parties or recordation of the first large lot subdivision map serving the development by such third party, as set forth in Section 3.26 or Section 4.2, depending on the reimbursing party or parties (i.e., Landowner or PRSP landowners).

3.8.4 Water System Sequencing. Water system facilities shall be constructed as provided in the Phasing Plan concurrently with the construction of the road improvements described in Section 3.5 of this Agreement, and as generally shown on Exhibit "N". Extensions into the neighborhoods will be completed with development of each neighborhood. Water line extensions shall be sequenced to assure looped systems in all developing areas, except as otherwise approved by the Environmental Utilities Director.

3.8.5 Public Utility Easements. Where the water improvements to be constructed by Landowner are not located within road rights-of-way, as and when Landowner installs such water facilities, Landowner shall grant and City shall accept a non-exclusive public utility easement the width of which shall be in accordance with City's then current Improvement Standards, for the ownership and maintenance of such lines, together with access thereto for maintenance purposes only.

3.8.6 Water Softeners. As part of its development of the Project, Landowner and its successors shall not provide water stubouts for the installation of water softeners.

3.8.7 Disclosure to Buyers. Landowner shall disclose to all residential and nonresidential buyers that the Property will be served by both surface water and groundwater supplies and that variations in the appearance, taste and color of water may be noticed from time to time and include such disclosure in the CC&Rs for the Property. The disclosure shall describe the location of groundwater wells and water storage facilities.

As further disclosure Landowner shall install signage at future water facility sites describing the facilities to be constructed on the subject site. Signs shall be provided per City specifications. The Environmental Utilities Director must review and approve sign layouts prior to installation. (See Section 3.24).

3.8.8 Water Service Area Boundary Modification. Landowner shall

reimburse City for all costs associated with modifying City's service area boundary to include the Project with the U.S. Bureau of Reclamation.

3.9 Recycled Water Facilities. Landowner shall construct recycled water system facilities as provided in this Section, the Phasing Plan, and as shown in Exhibit "P", attached hereto and made a part hereof. Recycled water shall be used for irrigation of parks and landscape setbacks, medians, paseos adjacent to collector streets and other landscape areas including all multi-family and non-residential landscaping uses. Landowner shall construct and dedicate upon completion thereof, a recycled water line system as generally shown in Exhibit "P". In the event that the CSP has not constructed recycled water facilities necessary to serve the Project, Landowner shall construct the necessary off-site recycled facilities and obtain reimbursement from the CSP in accordance with Section 4.2.2 herein.

All recycled water system facilities including transmission, distribution and public and private irrigation systems shall be designed and constructed pursuant to City's then current Improvement Standards, unless modifications are otherwise mutually agreed to by Landowner and the Environmental Utilities Director, and shall be subject to City plan review, construction, inspection and final approval and payment of all applicable fees for plan review, mapping and inspection of such improvements.

3.9.1 Non-Exclusive Public Utility Easement. Where the recycled water facilities are not located within road rights-of-way, as and when such facilities are installed, Landowner shall grant and City shall accept a non-exclusive public utility easement for the ownership and maintenance of such facilities, together with access thereto for maintenance purposes only. Easement widths shall be granted in accordance with the City's then current Improvement Standards.

3.9.2 Recycled Water Facilities for Reimbursement. Subject to the provisions of Section 4.2 of this Agreement, Landowner shall be entitled to reimbursement from third parties outside the Project whose property is benefited by Landowner's construction of recycled water facilities required by City in which there exists capacity in excess of that required to serve the development of the Property (excluding any operational adjustments by the City). Such reimbursement shall be pro rata, based on the respective capacity requirements of the Property and other property benefited by the construction. Specific recycled water facilities subject to reimbursement pursuant to this Section 3.9.2 and Section 4.2 of this Agreement are shown in Exhibits "Q-1" and "Q-2" and listed in Exhibit "BB". For properties outside of the Specific Plan, Landowner shall submit documentation to the City to justify the requested reimbursement.

The timing for the payment of any such reimbursement shall be upon the earlier of the formation of a CFD and issuance of bonds for such CFD serving

development by such third parties or recordation of the first large lot subdivision map serving the development by such third party.

Landowner shall likewise be required to contribute its pro-rata share of the cost of expansion of the WRSP recycled water tank and pump station located north of the Pleasant Grove Wastewater Treatment Plant that is required to serve the WRSP, as set forth in Sections 3.27 and 3.28 of this Agreement, and as set forth in Exhibits “Q-1” and “Q-2”. Landowner’s pro-rata share of the cost of expansion of the WRSP recycled water tank and pump station referenced herein, estimated at \$2.287 million, shall be paid through the CFD for the Project, with payment from the CFD not required until after the 1,000th building permit is issued in the Project.

If City institutes a recycled water connection fee, or such fee is embedded into City’s water connection fee, prior to the issuance of any building permits in the Project, Landowner shall not be responsible for the payment of the estimated \$2.287 million pro-rata share of the cost of the expansion of the WRSP recycled water tank and pump station except through the payment of the City recycled water connection fee, or City’s water connection fee if a recycled water connection fee is embedded into City’s water connection fee, or any special benefit fees as may be applicable to the Project to fund the expansion of the WRSP recycled water tank and pump station.

3.9.3 Recycled Water Engineering Report. Landowner shall prepare a Title 22 Recycled Water Engineering Report for submittal to and review by the State Regional Water Quality Control Board and State Department of Public Health documenting the use of recycled water in the Project. Prior to submittal to the State Water Quality Control Board, Landowner shall obtain approval of the City’s Environmental Utilities Director. Recycled water shall not be provided for use within the Project until the Title 22 Recycled Water Engineering Report has received all required State approvals.

3.9.4 Recycled Water Use Disclosure to Buyers. Landowner shall disclose to all buyers that recycled water shall be used for irrigation of parks and landscape corridors, medians, paseos adjacent to collector streets and other landscape areas, including all multifamily and non-residential landscaping uses. Such disclosure shall be included in the CC&Rs for all residential buyers and other recorded notice instrument for all non-residential buyers.

3.9.5 Terms and Conditions for Recycled Water Operations, Use, and Service. All private commercial recycled water customers within the Project shall sign a Terms and Conditions for Recycled Water Operations, Use and Service prior to service meter installation and recycled water being introduced to the site per requirements of the City’s Municipal Code at the time of connection.

3.10 Drainage Facilities. Landowner shall be responsible for the design and construction of all storm drain facilities required to serve the Property in conformance with the Project Drainage Master Plan (including open space transition areas), the then approved City Improvement Standards, City Storm Water Management Program, the MS4 Permit as issued and modified by the State and Regional Water Quality Control Board, the approved Placer County Storm Water Management Manual, the 404 Permit issued by the Army Corps, and any agency required Establishment Phase Operation and Management Plan and/or City's Preserve Area Overarching Management Plan (whichever Management Plan is in force at the time). Appropriate aspects of the Low Impact Development design, hydromodification, and the Flood Control Plan as specified in the Drainage Master Plan and in the Specific Plan will be the responsibility of each increment of development at the time of development. In general, drainage facilities shall be constructed concurrent with roadway improvements, and shall include permanent outfall structures and open space storm water treatment devices. With any phase that requires the final outfall into University Creek, such outfall shall be designed and constructed with that phase to accommodate ultimate flows from the Project. Prior to approval of any improvement plans for the construction of storm drain facilities within a drainage shed, a master drainage plan shall be prepared and approved by the City Engineer for the entire shed area or sub-area approved by the City Engineer and shall include a rough grading plan of that shed. The Master Drainage Plan for individual sheds shall include pipe sizes, grades, flows, depths of pipe, and cover over and on top of the pipe. Landowner shall provide drainage improvements as provided in this Section, the Phasing Plan and as shown in Exhibit "R", attached hereto and made a part hereof. Except for the improvements expressly described herein and as shown in Exhibit "R," Landowner shall have no obligation to install or pay for the installation of offsite drainage facilities, except through the payment of drainage fees levied and collected by the City at the time of development pursuant to City ordinances.

3.10.1 Other Agency Approval. Prior to issuance of any building permit or grading permit, Landowner shall obtain, at its expense, all permits and agreements as required by other agencies having jurisdiction over drainage, water quality or wetlands issues including, but not limited to, the Regional Water Quality Control Board ("RWQCB"), the Army Corps and the California Department of Fish and Game.

Landowner shall prepare and implement a Storm Water Pollution and Prevention Plan (SWP3), and shall construct and maintain Best Management Practices (BMPs) as required by law, the SWP3 and as approved by the City, concurrently with construction of any improvements. Landowner shall obtain a permit from the RWQCB for the General Construction Storm Water Permit Compliance Program, as required by law, prior to the start of any construction, including grading on the Property.

3.10.2 Storm Drains. Landowner shall construct storm drain mains and

laterals in accordance with the Drainage Master Plan and Phasing Plan and with the City's then current Improvement Standards and shall provide laterals to serve all parcels on the Property, including, but not limited to, park sites. Storm drain laterals shall be constructed to the property line concurrently with the construction of connecting open channels or storm drain mains. Storm drainage system designs shall include applicable Best Management Practices with the goal of preventing or reducing pollutants from entering receiving waters in accordance with the City's Storm Water Management Program and the then current MS4 permit requirements. Should grading alter the natural drainage patterns and it becomes necessary to redirect drainages across lands dedicated to the City, the Landowner shall be responsible for the installation of above ground constructed swales. Where constructed swales cross open space, the constructed swales shall be designed and installed in accordance with City's Open Space Preserve Overarching Management Plan to control and direct runoff to receiving waters as appropriate. Landowner shall be responsible for annual (or more frequent if needed) maintenance of said constructed swales until such time that the City develops the property, or City accepts the open space dedication.

3.10.3 Grant of Floodplain. Prior to or concurrent with approval of any final map containing areas within the 100-year floodplain as shown in Exhibit "S", Landowner shall grant an IOD to the City, or to a conservancy or other non-profit entity acceptable to the City, such areas within the Open Space Preserve Areas as shown in Exhibit "Y" and the land use plan for Property, set forth in Exhibit "E".

3.10.4 Drainage Easements. Where permanent drainage facilities to be owned and maintained by City are to be constructed by Landowner and are not located within road rights-of-way, as and when Landowner installs such drainage improvements, Landowner shall grant and City shall accept a non-exclusive public utility easement or temporary easement for the ownership and maintenance of such lines, together with access thereto for maintenance purposes only. The City shall not be required to accept or maintain any temporary drainage improvements. Easement widths for completed permanent drainage facilities shall be granted in accordance with the City's then current Improvement Standards. When those permanent drainage facilities not located within road rights-of-way and are to be placed on property owned by someone other than the Landowner of those facilities, the Landowner shall secure all necessary rights of entry and third party easements. All drainage outfall structures for storm drain flows leaving the Project shall be built as either temporary or permanent structures wholly on properties in the Project. The City will offer no power of eminent domain for such drainage outfall structures.

3.10.5. Drainage Improvements and Work Upon City Owned Property. The drainage channels shall be generally designed as earthen structures with side slope stabilization and longitudinal slopes that will provide positive storm water flow and minimize standing water. Maintenance vehicle access across the channel in the adjacent

open space will generally be located as shown in the Open Space Transition Plan. Access roads, access ramps, fencing and landscaping shall be constructed per City standards. Where access roads cross the channel, such access roads shall be constructed to allow small tractor loader (such as a Bobcat) to pass under the access road. The channel bottom shall support the wheel loading of maintenance equipment without compromising the integrity and/or flow line of the channel. The channels and storm water pumps for Road "G" shall be maintained by City with funds from the CFD for Public Services. City may program the use of maintenance access roads for pedestrian use.

All drainage improvement work on City property shall be at the expense of Landowner, and there shall be no reimbursements or credits for any off-site channel improvements. Prior to entry upon City property, Landowner shall secure an encroachment permit from City. All outside agency fees, permits, and mitigation for work on City property shall be the responsibility of Landowner. Material excavated from the construction of improvements within City property shall remain on City property.

Where end of pipe storm water management treatment is designed within the open channels as part of the overall storm water management plan, the design of such features shall meet the design objectives and parameters of the generally accepted storm water management design.

3.10.6. Off-Site Monitoring. City acknowledges that the existing drainage channel on City's Al Johnson Wildlife Area property is currently subject to overtopping and erosion during storm events. Landowner acknowledges and takes responsibility for erosion impacts to such City owned property that are attributable to an increase in flow onto the Al Johnson Wildlife Area property. With the design of the channel, Landowner shall produce a report and initial investigation to determine the stability of University Creek across City property. Landowner and City shall work cooperatively to develop a mutually agreed upon monitoring program to assess any future stability degradation of the channel that may result from Landowner's drainage plan and design. Remedial work that is required to maintain or restore the channel to a stable condition resulting from an increase in flows from the Project shall be the responsibility of Landowner. Landowner shall be responsible to secure any necessary permits and shall bear all costs associated with testing, monitoring, and stabilization with funds from the CFD for Public Services.

3.10.7. Annexation Into Regional Flood Control Program. City administers a Regional Flood Control Program within the Pleasant Grove/Curry Creek watershed and collects drainage fees for the future mitigation of volumetric impacts to downstream properties. Landowner acknowledges that as a result of approval of the Project, City shall need to update the Regional Flood Control Program and the Drainage

Mitigation Fee in order to annex the Plan Area into the Regional Flood Control Program benefit area. Landowner and City shall use their best efforts to cause such update to be completed within twelve (12) months of the Effective Date of the Agreement. Until such update has been completed and approved by City, Landowner agrees to pay the then current Drainage Mitigation Fee. When a new Drainage Mitigation Fee is adopted, Landowner shall pay the new Drainage Mitigation Fee for all DUEs for which building permits have not yet been issued.

3.11 Electric. Landowner shall provide electric utility improvements as provided in this Section, the Phasing Plan and as shown in Appendix “B” of the Dry Utility Plan for the Project.

3.11.1 On-Site Electric Facilities. For purposes of this section, “on-site” means within the Property. Concurrently with the construction of the adjacent roadways and as specified in Section 3.3, Landowner agrees to construct, or finance the construction of, on-site 12kV electric distribution facilities as directed by the Electric Utility Director. Landowner shall construct or finance construction of on-site 12kV electric distribution facilities in accordance with final on-site electric distribution designs for the Project as directed by the Electric Utility Director in accordance with applicable City Electric Utility Department Specifications. Design of any final electric utility improvements (off-site, on-site, in-tract), including streetlights, shall commence prior to receipt of approval of improvement plans for the applicable Project roadways. Any costs of re-design of electric improvements due to adopted improvement plans shall be borne by Landowner.

3.11.2 Off-Site Electric Facilities. For purposes of this section, “off-site” means outside of the Project. Concurrently with the construction of any phase of the Project, Landowner agrees to construct, or finance the construction of off-site 12kV electric distribution facilities as directed by the Electric Utility Director. Landowner shall construct or finance construction of off-site 12kV electric distribution facilities in accordance with final off-site electric distribution designs for the Project as directed by the Electric Utility Director in accordance with applicable City Electric Utility Department Specifications. Design of any final electric utility improvements (off-site, on-site, in-tract), including streetlights, shall commence prior to receipt of approval of improvement plans for the applicable Project roadways. Any costs of re-design of electric improvements due to adopted improvement plans shall be borne by Landowner. The City acknowledges that pending construction of final roadways the first developments may be fed by temporary facilities, if there is available electric capacity to serve the Project, subject to the approval of the design by the Electric Utility Director in accordance with applicable City Electric Utility Department Specifications. All costs associated with the design, installation, and removal of the temporary facilities will be borne by the Landowner.

3.11.3 CSP Electric Substation. Pursuant to the development agreement in the CSP, CSP landowners are required to dedicate to City, grade and provide access to a parcel in the CSP (designated Parcel C-81 in the Specific Plan) for an electric substation to serve the CSP (the "Substation Site"). Under the development agreement between CSP landowners and City, such Substation Site must be provided to City prior to issuance of the 500th residential building permit, or combination of building permits, in the CSP. Should the Substation Site not have been dedicated to City, graded with access provided at the time that Landowner wishes to proceed with development of the Project, Landowner shall have the right to cause such dedication, grading and provision of access to the Substation Site for City to construct the electric substation that will serve both the CSP and the Project. Landowner acknowledges that, in the absence of any available capacity utilizing temporary lines that could serve the Project on an interim basis, the CSP electric substation must be in operation and 12kV circuits extended to the Project for electric service to be provided to the Plan Area. In addition to the Substation Site, Landowner shall install an all-weather access road along the south side of Pleasant Grove Creek from the southeast corner of the CSP to the Westbrook Boulevard bridge crossing over Pleasant Grove Creek sufficient to allow the construction and maintenance of the 60kV overhead power line required to feed the CSP electric substation.

3.11.4 60kV Disclosure. Landowner shall include a notice in the project CC&R's and its sales documentation advising property owners adjacent to the existing 60 kV easement areas shown on Exhibit "U" and the future 60kV easement line on the east side of Westbrook Boulevard and the southern Project boundary along Road A that the City may utilize the public utility easements to construct 60kV overhead electric lines.

3.11.5 Streetlights. Concurrent with the construction of the adjacent roadways, Landowner agrees to construct, or finance construction of, streetlights within the Property, as directed by the Electric Utility Director. Except as may otherwise be permitted by the Electric Utility Director, no street shall be accepted by the City unless and until streetlights have been installed in accordance with the Specific Plan and applicable requirements of the Electric Department. Streetlights shall meet Roseville Electric's specifications for residential and/or commercial construction in effect at the time the construction improvement plans are approved and issued by the City.

3.11.6 Electric Efficiency and Demand Reduction. In order to mitigate demand for energy supplies and comply with state mandated energy efficiency goals, the following energy efficiency and load management requirements are hereby established:

1. All residential dwelling units will install residential air conditioning units with the following sets of parameters, as a minimum standard:
 - a. A Seasonal Energy Efficiency Rating (“SEER”) of 2 points above the minimum, as defined by the State of California in the current Title 24 of the Code of California Regulations, up to a total maximum of 18 points including the 2 point premium, an Energy Efficiency Ratio (“EER”) of 12.5 or greater. The SEER rating of 2 points above the minimum, as defined by the current Title 24, up to a maximum of 18 points, and an EER rating of 12.5 or greater will be specified on building plans and Title 24 compliance certificates at the time building permits are requested. If Title 24 of the Code of California Regulations in effect at the time of request for building permits requires higher SEER or EER ratings, residential units in the Plan Area shall comply with such State requirements. The SEER and EER ratings will be verified with appropriate documentation. These requirements shall be utilized in the overall energy compliance calculations required for issuance of a building permit for any residential unit. Any variances must be approved by the Electric Department’s Retail Energy Services Department.
2. All commercial air conditioning units 5 tons or less (<65,000 btu/h) shall meet the current Consortium for Energy Efficiency (“CEE”) Tier I specifications. The SEER/EER ratings will be specified on building plans and Title 24 compliance certificates at the time building permits are requested. The SEER and EER ratings will be verified with appropriate documentation. These requirements shall be utilized in the overall energy compliance calculations required for issuance of any building permit for any commercial building in the Plan Area. Any variances, with the exception of Tier 2 compliance, must be approved by Roseville Electric Utility.
3. Every garage of each Low Density Residential and Medium Density Residential unit must be considered “electric vehicle ready”, which includes, but is not limited to, a ¾” conduit raceway to a spare electric box in the garage that is sized for a future 40-amp, 220-volt outlet. A 40-amp, 220-volt breaker space shall be made available at the residential unit’s electrical panel.

3.12 Parks, Open Space, and Bike Trails. Landowner shall dedicate to City a total of 22.1 acres of active park land and 134.8 acres of open space lands, and 10.7 acres

of paseos, pay fees for construction of park improvements, trail improvements, construct park frontage improvements as set forth in this Section and the Phasing Plan and as shown in Exhibit "V", and install communication conduit to each park site per City standards.

Landowner shall not construct any private single access gates or private access from single homeowner's property onto public spaces, such as parks, preserves, and paseos. Additionally, Landowner shall place the foregoing restriction as applicable to homeowners in the CC&R's for any single family residential subdivision.

3.12.1 Park and Open Space Dedications. Landowner shall dedicate to City a total of 22.14 acres of active neighborhood parkland, and 134.8 acres of open space. The following seven park parcels, and twenty-eight open space parcels shall be dedicated to City as described below and shown in Exhibit "V":

1. A 1.28-acre, more or less, portion of the Property for the purposes of a public park, shown as Parcel AR-60;
2. A 1.87-acre, more or less, portion of the Property for the purpose of a public park, shown as Parcel AR-61;
3. A 10.11-acre, more or less, portion of the Property for the purpose of a public park, shown as Parcel AR-62;
4. A 1.72 acre, more or less, portion of the Property for the purpose of a public park, shown as Parcel AR-63;
5. A 2.12 acre, more or less, portion of the Property for the purpose of a public park, shown as Parcel AR-64;
6. A 3.04 acre, more or less, portion of the Property for the purpose of a public park, shown as Parcel AR-66;
7. A 2.00 acre, more or less, portion of the Property for the purpose of a public park, shown as Parcel AR-67;
8. A 0.58 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-70;
9. A 0.32 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-71;
10. A 0.98 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-72;

11. A 0.98 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-73;
12. A 0.60 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-74;
13. A 0.76 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-75;
14. A 0.36 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-76;
15. A 0.85 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-77;
16. A 0.46 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-78;
17. A 0.39 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-79;
18. A 1.10 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-80;
19. A 1.15 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-81;
20. A 3.81 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-90;
21. A 4.15 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-91;
22. A 28.67 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-92;
23. A 5.99 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-93;
24. A 2.30 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-94;

25. A 2.73 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-95;
26. A 7.72 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-96;
27. A 40.08 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-97;
28. A 7.88 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-98;
29. A 0.49 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-99;
30. A 1.22 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-100;
31. A 0.95 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-101;
32. A 0.65 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-102;
33. A 0.65 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-103;
34. A 0.88 acre, more or less, portion of the Property for the purposes of open space (paseo), shown as Parcel AR-104; and
35. A 28.82 acre, more or less, portion of the Property for the purposes of open space, shown as Parcel AR-105.

Landowner shall dedicate any park lands and Open Space Parcels as an IOD on the Large Lot Final Map. The Large Lot Final Map (which can be recorded in phases under Section 3.3.1 above) shall create separate parcels for those park and Open Space lands in the portion of the Property covered by the particular Large Lot Final Map. City shall accept such dedication of any park land Parcels in a particular phase of the Project at the time when all infrastructure improvements (e.g., curb and gutter, roadway, utilities, utility stubs, bike trail grading, parcel grading, etc.) adjacent to the parcels being dedicated, i.e., frontage along the parcel, are substantially complete, and the Public Services CFD formed under Section 3.19.1 below is generating a minimum of

\$1,000 for each acre of park land being accepted by City.

Dedication of Open Space and Preserve parcels shall be in accordance with Section 3.12.9.1 and the City's Open Space Preserve Overarching Management Plan and any 404 Permit conditions.

In the event the Landowner uses any of the above mentioned parcels for temporary construction activity or staging (e.g., detention basins, rock crushing operations, dirt/debris stockpiling, etc.), Landowner shall, prior to acceptance by City, restore the site to a rough graded condition in accordance with an approved grading and drainage plan such that the restored condition is like what existed prior to such temporary construction or staging activity.

3.12.2 Financing for Parks. The construction of improvements to parks within the Property shall be financed from the payment by Landowner of the City-Wide and neighborhood park fees and in lieu park fees established for the Property in the Project's Parks, Bike Trails and Paseos Financing Plan ("Parks Financing Plan," Exhibit "W").

3.12.2.1 Financing for Neighborhood Parks. The construction of the neighborhood park sites within the Property shall be financed from payment by Landowner of the park fees.

The City agrees that the total amount to be financed by Landowner pursuant to this Section 3.12.2.1 for the design, construction and inspection of such neighborhood park improvements shall not exceed the amounts as set forth in the Parks Financing Plan, with amounts distributed among the park sites on the Property, and which amount is adjusted by the percentage change, annually on July 1, utilizing the Engineering News Record, Construction Cost Index for the United States 20-city average.

3.12.2.2 Maintenance District Financing. Pursuant to Section 3.19 below, Landowner shall support the formation of the Community Facilities District - Public Services ("Services CFD") District defined therein. Among other things, the Services CFD shall be authorized to levy special taxes or assessments on the Property and to provide maintenance of the neighborhood parks, streetscapes, and paseos.

3.12.3 Neighborhood Park Fee. In accordance with the park financing plan for the Property, Landowner shall pay a neighborhood park fee (the "Neighborhood Park Fee"), upon the issuance of each residential building permit within the Project, to fund neighborhood park construction. Such Neighborhood Park Fee shall be \$2,900 per Low Density Residential unit, \$2,478 per Medium Density Residential unit, and \$2,055 per High Density Residential unit (but excluding carriage

units, which shall not pay neighborhood park fees), subject to annual adjustment, on July 1, based on the percentage change in the CCI (Construction Cost Index). All such Neighborhood Park Fees shall be deposited into the applicable neighborhood park fee fund.

The Neighborhood Park Fee, as calculated herein, is figured on 100% of the total dwelling units proposed to be entitled in the Property for construction of Neighborhood Parks within the Property. City may conduct an annual re-assessment of Park fees for the Property subject to this Agreement and adjust the fee upward if underutilization of entitled dwelling units for the Property subject to this Agreement exceeds 10%, provided, however, that in the case of any shift of LDR units to MDR parcels in the Property, the annual fee adjustment threshold shall be where the shift of such LDR units to MDR parcels exceeds 5% of the LDR units in the Plan Area. In the event of a rezoning of any parcel(s) in the Property that creates a park funding shortfall, City shall require supplemental neighborhood and City-Wide park fees to fund such shortfall from the rezoned parcel(s).

At the end of the development phase, City shall review development progress of Neighborhood Parks to determine if development is on target as it relates to collection of park fees by phase or sub-phase. City shall review the development phase with overall neighborhood park development and any impacts, particularly if subsequent phases will need to utilize funding previously collected for development. At the completion of all residential and neighborhood park development, according to the park financing plan for the Project, if there are any remainder fees, City shall, within thirty (30) days of filing a notice of completion of the last neighborhood park for the Project, refund to Landowner a pro-rata share of any remainder fees.

3.12.3.1 Neighborhood Park Frontage Improvements. When installing road improvements adjacent to neighborhood park sites, Landowner shall construct the frontage improvements (excluding landscaping), which include curb, gutter, and stub utilities for the park site, subject to direction from City on the location of such utility stubs. At the time Landowner installs infrastructure frontage improvements for the neighborhood parks, Landowner may construct the sidewalks, as specified in the Specific Plan and upon mutual consent of the City and Landowner.

3.12.4 City-Wide Park Fee. Upon issuance of each residential building permit within the Project, Landowner shall pay a City-Wide park fee (the "City-Wide Park Fee") to fund the construction of City-Wide park facilities in the City. The City-Wide Park Fee, as described in Section 3.12.5 below, shall be \$1,670 per Low Density Residential unit, \$1,426 per Medium Density Residential unit, and \$1,183 per High Density Residential unit (but excluding carriage units, which shall not pay City-Wide Park Fees), subject to annual adjustment, on July 1, based on the percentage change in the CCI.

3.12.5 City-Wide Park In-Lieu Fee. In accordance with the park financing plan for the Property, Landowner shall pay a city-wide park in-lieu fee for the land dedication component of the Project's City-Wide Park obligation (the "City-Wide Park In-Lieu Fee"), upon the issuance of each residential building permit within the Project, to fund improvements to the City-wide park in the WRSP or other city-wide parks within the City. Such City-Wide Park In-Lieu Fee shall be \$1,215 per Low Density Residential unit, \$1,038 per Medium Density Residential unit, and \$861 per High Density Residential unit (but excluding carriage units, which shall not pay City-Wide Park In-Lieu fees), subject to annual adjustment, on July 1, based on the percentage change in the CCI.

3.12.6 Paseo Facilities. Paseo facilities within the Project are located on modified primary residential streets with streetside paseos in the ARSP, consistent with the Specific Plan and Design Guidelines, and include a 10-foot wide Class 1A bikeway within a 35 foot landscaped/paseo corridor. The development of the paseos and streetscapes in the Project shall be in compliance with the then current WELO requirements. At the time of adjacent development, Landowner shall construct the entire landscape/paseo corridor and 10-foot wide Class 1A bikeway. Depending on the phased development requirements, once the elementary school in the Project is built and open, safe routes to the school shall be identified and implemented by Landowner at the small lot subdivision map stage. The costs of paseos shall be paid by Landowner.

3.12.7 Bike Trail Construction. The ARSP's Class 1 bike trails are only located either adjacent to drainage ways, an open space-fronting roadway, or along a P/QP parcel in the Specific Plan. Landowner shall design, secure necessary permits, and construct certain Class 1 bike trail improvements within the Property as shown on Exhibit "X" (the "Bikeway Master Plan") and as further described below. As more fully set forth in Exhibit "BB" hereto, the ARSP's Class I bike trails shall be constructed in the following segments, unless otherwise jointly agreed to by City and Landowner:

- (i) Segment 1 is located along the southern development portion of the ARSP from AR-63 to the connection point with the Al Johnson Wildlife Area, and shall be constructed by Landowner as part of the drainage structure maintenance road;
- (ii) Segment 2 is a Class 1 bike trail located along the east side of Westbrook Boulevard south of Road A and shall be constructed by Landowner when that portion of Westbrook Boulevard is constructed;
- (iii) Segment 3 is a Class 1 bike trail located along Road A east of Westbrook Boulevard, and shall be constructed by Landowner when that portion of Road A is constructed;
- (iv) Segment 4 is a Class 1 bike trail located along Road A adjacent to the P/QP parcel (AR-55) and shall be constructed when the City constructs

- the improvements on Parcel AR-55; and
- (v) Segment 5 is located along the western property line within or adjacent to Parcel AR-98 with an off-site connection extending southward to a connection with the drainage structure maintenance road in AR-93 as shown in the Specific Plan Design Guidelines. Segment 5 shall be constructed by Landowner as part of the drainage structure maintenance road and could be used as a Class 1 bike trail.

If a bike trail is completed prior to City's acceptance of open space within which the bike trail is located, City shall be responsible for bike trail maintenance. City shall enter into an agreement with Landowner memorializing such obligations and indemnifying Landowner for the public's use of the bike trail prior to City's acceptance of the open space, which shall include the recordation of a temporary maintenance and pedestrian access easement on and across the bike trail. Preparation of easement documents shall be the responsibility of Landowner. Upon completion of the bike trail and City's acceptance of open space within which the bike trail is located, City shall continue to be responsible for bike trail maintenance.

3.12.8 Entire Park Land Obligation. The City agrees that the provisions of the Specific Plan and the commitments contained herein satisfy Landowner's General Plan park obligations for the dedication and improvement of neighborhood and City-Wide parks and open space related to development of the Property.

3.12.9 Open Space Preserve Areas. Landowner shall obtain from the Army Corps a 404 Permit to fill wetland resources in conjunction with development of the Property. It is anticipated that the 404 Permit will include a condition that requires the preservation of certain environmental habitat. The areas in which such habitat will be preserved are known as Open Space Preserve Areas, as shown on Exhibit "Y" and consist of the following three parcels:

1. A 28.67-acre, more or less, portion of the Property for the purposes of drainage, flood control, fuel modification (not fire breaks), and preservation of wetland habitat and open space, shown as Parcel AR-92;
2. A 40.08 acre, more or less, portion of the Property for the purposes of drainage, flood control, fuel modification (not fire breaks), and preservation of wetland habitat and open space, shown as Parcel AR-97; and
3. A 28.82 acre, more or less, portion of the Property for the purposes of drainage, flood control, fuel modification (not fire breaks), and preservation of wetland habitat and open space, shown as Parcel AR-105.

3.12.9.1 Conveyance of Open Space Preserve Area. Upon the satisfaction by Landowner of all conditions of the 404 Permit, and completion of any corresponding monitoring and reporting that may be required by the 404 Permit during the Establishment Monitoring phase and subject to the formation of the Perpetual Monitoring Phase Public Services CFD as described in Sections 2.7.3, 2.7.4 and 3.19 of this Agreement, and following completion of all Preserve improvements, including, but not limited to, utility crossings, outfalls, bike trail grading, flood control facilities, open space perimeter fencing as may be required by the 404 Permit, maintenance access ramps, and water quality features, Landowner shall convey to the City, in accordance with the City's Open Space Preserve Overarching Management Plan, and City shall accept, in fee, the property comprising the Open Space Preserve Area shown in Exhibit "Y". Landowner shall use its commercially reasonable best efforts, including, but not limited to, retention of consultants that specialize in Army Corps consultations, to obtain written verification from the Army Corps that success criteria for the on-site Preserve Area Establishment Monitoring Phase have been met. In lieu of obtaining written approval from the Army Corps, the Establishment Monitoring Phase can be deemed complete upon receipt of a letter from Landowner to the Army Corps with a copy provided to City on the same date notifying the Army Corps that the Establishment Monitoring Phase of the particular Preserve is complete. Any such letter shall indicate that the Army Corps' concurrence with the Landowner's determination will be assumed unless the Army Corps responds to the contrary within thirty (30) days. If the Army Corps does not respond within thirty (30) days, the Establishment Monitoring Phase will be considered complete. Upon completion of the Preserve improvements set forth above, Preserve ownership and perpetual management responsibilities can then be transferred to the City in accordance with the process identified in the City of Roseville Open Space Preserve Overarching Management Plan.

3.12.9.2 Open Space Frontage Improvements. When installing road improvements adjacent to the open space, Landowner shall construct the frontage improvements. Frontage improvements shall include sidewalks, split rail fencing and landscaping/irrigation.

- 3.13 School Fee Agreements. Landowner has entered or will enter into separate written agreements with the Roseville City School District and the Roseville Joint Union High School District (collectively "the Districts"), to mitigate the impacts of development of the Property on said Districts. Such agreements outline the timing and delivery of school sites and the timing and obligation for school construction. With the execution thereof, City agrees that City shall process and approve any subdivision maps or other such entitlements for the Property and issue any building permits for development thereof consistent with the Entitlements.

3.14 Miscellaneous Public Facilities and Services.

3.14.1 Fire Tax Equivalent Fee. The Fire Service Construction Tax set forth in Chapter 4.46 of the Roseville Municipal Code is no longer in effect. Landowner or its respective successors shall pay a fee equal in amount to the discontinued Fire Service Construction Tax at issuance of building permit. Landowner hereby consents to and waives any objection to the imposition of such substitute fee.

3.14.2 Placer County Capital Facilities Fee. In consideration of the annexation of the Property to City, Landowner shall pay the Placer County Capital Facilities Fee adopted by the City, in the amount then being assessed by the City; provided, however, if such impact fee is not effective or is for any reason suspended by the City, then Landowner shall pay such fee in the amount previously and most recently assessed by the City. Such fee shall be paid upon the issuance of each building permit within the Property.

3.14.2.1 City Public Facilities Fee. Upon the issuance of each residential building permit within the Project, Landowner shall pay the City Public Facilities Fee (Roseville Municipal Code Chapter 4.52) .

3.14.3 Public Benefit Fee. As partial consideration for this Agreement, to offset a portion of the impact of the Project and the associated tax sharing agreement with Placer County, and to ensure that the Project will benefit current and future residents of Roseville, Landowner, upon the issuance of each residential building permit within the Project, shall pay a Public Benefit Fee for each residential unit in the Project. The Public Benefit Fee for each low density and medium density residential unit shall be \$1,280. The Public Benefit Fee for each high density residential unit shall be \$845.

3.14.4 Liens, Encumbrances, Covenants, Conditions and Restrictions. Except as approved by City or provided for by this Agreement, all property to be conveyed in fee to City pursuant to this Agreement shall be free of any liens, financial encumbrances, special taxes, hazardous materials or assessments. Landowner shall, for each such conveyance, provide to City, at Landowner's expense, a current preliminary title report and preliminary site assessment for hazardous waste in a form approved by the City Attorney. Any policy of title insurance required by City shall be at City's expense.

3.14.5 Signage for Future Public Facilities. Landowner shall provide and install signage at the following public facility sites to alert residents of future facilities: fire station site (AR-54), well site (AR-55), two sewer lift station sites (AR-56 and AR-57), park sites (AR-60, AR-61, AR-62, AR-63, AR-64, AR-66, AR-67), solid waste recycling site (AR-55), bike trails where they will abut residential property, the NAPOTS Area

(where it abuts residential land uses), and the school site (AR-50), per City specifications and applicable sign permits.

3.14.6 Library Facilities. Landowner agrees to participate and pay its fair share of the capital cost of library services in the event that the City should amend its current City-Wide Public Facilities fee to include library facilities or adopts any other equitable financing mechanism for the provision of library facilities.

3.14.7 Construction Waste. Landowner shall require construction contractors and subcontractors to reduce construction waste by recycling a minimum of 50% of construction materials or that all construction debris be delivered to the Placer County Western Regional Materials Recovery Facility where recyclable material will be removed. Landowner shall require that contractors and subcontractors submit to the City Environmental Utilities Department annual records of waste diversion and disposal in order to verify compliance with this requirement.

3.14.8 Weed Abatement on P/QP Parcels. Prior to dedication of any P/QP parcel to City, Landowner shall maintain such P/QP parcel to meet City's weed abatement standards and to keep such parcel free from property transformation, either whole or in part, into a wetland or other legally protected area.

3.14.9 Orthophotography of Plan Area and GIS Support. Landowner agrees to pay its fair share of the cost of orthophotography of the Plan Area. The total cost for the Plan Area is \$351.54. The above payment shall be due within ten (10) days after the first Large Lot Final Map approval for the Property.

3.14.10. Solid Waste Recycling Site (AR-55). Landowner shall be responsible to grade Parcel AR-55, and provide Parcel AR-55 to City without environmental or other constraints as provided in this Agreement. At Landowner's expense, all site grading shall be completed prior to the dedication of the solid waste recycling site to City consistent with City's Grading Ordinance. Where retaining walls are required, the retaining wall shall be a split-faced keystone style wall or comparable quality and design, to be installed by Landowner. This work shall be completed with the construction of the roadway fronting Parcel AR-55.

3.15 EIR Mitigation Measures. Notwithstanding any other provision in this Agreement to the contrary, as and when Landowner elects to develop the Property, Landowner shall be bound by, and shall perform, all mitigation measures contained in the EIR related to such development which are adopted by City and are identified in the mitigation monitoring plan or the EIR as being a responsibility of Landowner, and shall be subject to any fees which may be enacted by City to implement any mitigation measures contained in the EIR.

3.16 Waiver. In consideration of the benefits received pursuant to this Agreement, Landowner, on behalf of itself and its respective heirs, successors in interests and assigns, waives any and all causes of action which it might have under the ordinances of the City of Roseville or the laws of the State of California or the United States with regard to any otherwise uncompensated or under-compensated conveyance or dedication of land or easements over the Property or improvements that are specifically provided for in this Agreement that are required in conjunction with changes to this Agreement or the Specific Plan that are requested by Landowner, or that are logically implied by this Agreement. This waiver shall not apply to any conveyances or dedications of land or easements that are not specifically contained in this Agreement and are subsequently desired by the City.

3.17 Community Facilities District – Public Facilities (Project Infrastructure).

3.17.1 Formation. Landowner and City may form a Community Facilities District or Districts for the purpose of financing the construction and/or acquisition of public infrastructure and facilities within the Property ("Project CFD(s)"). If requested by Landowner, City and Landowner, shall use their best efforts to cause to be formed the Project CFD(s) for the purpose of financing the acquisition or construction of some or all of the improvements and facilities eligible for CFD financing (the "CFD Eligible Improvements") within and associated with the Project, including those improvements which will mitigate impacts of the Project upon areas inside and outside of the Project, and will be owned, operated and maintained by the City or another public agency.

More specifically, the CFD Eligible Improvements are those improvements including, but not limited to arterials, collectors, roadways serving bus transfer facilities, and unloaded primary residential roads; traffic signals; right of way acquisitions; bridges/culverts, water, sewer, recycled water, and drainage improvements and appurtenances; landscape and landscape irrigation and drainage facilities; environmental mitigation and remediation; bicycle and pedestrian facilities; parks, paseos, schools, park and ride facilities, bus facilities, police protection, fire protection, modification to and or undergrounding of existing improvements; wetlands; electrical and dry utility improvements; transit improvements; masonry walls; development impact fees; design, engineering, surveying, construction management, and security for CFD Eligible Improvements; and other improvements as which are defined as authorized improvements under the Project CFD(s) selected by the City or any ordinance under the City.

Formation of the Project CFD(s) shall be pursuant to and consistent with the requirements of this Agreement and Government Code Section 53311, *et seq.* Landowner shall be allocated a share of infrastructure costs and assessed special taxes as specified in a tax formula agreed to by City and Landowner, in accordance with the financing plan for the Project, provided, however, that City agrees that, to the extent

permitted by law, City shall allow for separate improvement areas in the Project CFD boundary and/or separate CFDs such that default by one portion of the Project that may no longer be owned by Landowner of its CFD obligations does not place Landowner in default. The rights and obligations under this Section 3.17 shall survive the termination or expiration of this Agreement.

3.17.1.1 Nothing in this section shall be construed to require Landowner to form a CFD nor, if formed, to preclude the payment by an owner of any of the Parcels to be included within the CFD a cash amount equivalent to its proportionate share of costs for the CFD Improvements, or any portion thereof, prior to the issuance of bonds.

3.17.1.2 If Landowner desires to pursue a Community Facilities District, City and Landowner agree that, with the consent of Landowner and to the extent permitted by law, City and Landowner shall use their best efforts to cause bonds to be issued and in amounts sufficient to affect the purposes of this section. City and Landowner further agree that, with the consent of Landowner or their successor(s) in interest, and to the extent permitted by law, the City agrees to the following:

- (a) Maximum Annual Taxes for residential units, when aggregated with all other existing or expected taxes and assessments (excluding homeowners association assessments), shall not exceed 2.00% of the assessed valuation, net of the homeowner's exemption (2% Test).
- (b) The Special Tax shall be levied for as long as needed to service the principal and interest on bond debt, and to pay for any additional authorized facilities not reimbursed with bond proceeds as defined in the Funding, Construction, and Acquisition Agreement. However, the Special Tax shall be levied for a period that allows for at least two non-overlapping bond sales to cover deferred fees as set forth in (i) below. The Special Tax levied may exceed 50 years.
- (c) City shall not unreasonably deny the Maximum Annual Tax escalating at 2% per year.
- (d) Authorized facilities shall include, among other items, development impact fees for public improvements.
- (e) Annual Costs shall provide that special taxes not used for debt service and City administration be paid to Landowner, for any authorized facilities not reimbursed with bond

proceeds (pay-as-you-go). City shall reasonably consider a reasonable interest component for any authorized facilities reimbursed with pay-as-you-go provided for in the Funding, Construction and Acquisition Agreement defined below.

- (f) Landowner may utilize the Statewide Community Infrastructure Program ("SCIP") program for any eligible impact fees.
- (g) Landowner may utilize a phased bond sale or sales.
- (h) Landowner may utilize private placement of bonds.

Bonds proceeds from bond sales commencing in the year 31 timeframe shall, subject to SPRTA agreeing to the deferral of the SPRTA Tier II Traffic Fee, include an amount no greater than fifty percent (50%) of the SPRTA Tier II Traffic Fee, currently set at \$6,332.96 per residential unit, adjusted as the SPRTA Tier II Traffic Fee may be subsequently adjusted, that would normally be paid at the time of issuance of building permits for low, medium, and high density residential dwelling units.

Notwithstanding any provision in this Agreement to the contrary, any amount exceeding fifty percent of \$6,332.96, adjusted as the SPRTA Tier II Traffic Fee may be subsequently adjusted (or exceeding such actual lesser amount for MDR or HDR units determined by City), per residential unit shall be due and payable to City upon issuance of a building permit commencing with the first applicable building permit for the Project. Notwithstanding any other provision in this Agreement to the contrary, the SPRTA Tier II Traffic Fee required by City for non-residential development shall be collected upon issuance of building permit commencing with the first applicable building permit.

- (j) If a Project CFD(s) is formed, then, where adjustments (increases or reductions) in the number of allocated residential units or non-residential acreage involve transfer of residential units or non-residential acreage from one Large Lot parcel to another Large Lot parcel in the Plan Area, City may, in its sole discretion, allow for the transfer of

the assigned special tax from one Large Lot parcel to another, but only if (i) all such proposed special tax adjustments are agreed to in writing by the affected Large Lot parcel owners and City's Finance Director, and (ii) there is no reduction in the CFD maximum special tax revenue as a result of the transfer between Large Lot parcels. Should such a transfer of special taxes from Large Lot parcel to another Large Lot parcel result in an amendment to attachments 1 or 2 of the notice of special tax lien for the CFD(s), the Large Lot parcel owner requesting the transfer of special taxes shall bear the cost to affect the transfer in the CFD documents, and that property owner shall prepare the required amendments to the notice of special tax lien, including amendments to attachments 1 and 2 thereto.

Should the Project CFD(s) including the Property not be formed at the time that any particular building permit is issued within a large lot map parcel on the Property, or any property owner in the Project desires to pay all of the SPRTA Tier II Traffic Fee rather than defer payment to such future CFD bond proceeds, then all of the SPRTA Tier II Traffic Fee shall be paid at the time of issuance of such building permit(s). Upon formation of the Project CFD(s) including the Property, fifty percent of the SPRTA Tier II Traffic Fee for unbuilt residential units shall be paid from bond proceeds in such bond sales commencing in the year 31 timeframe, unless a Project property owner desires to pay such fee at the time of issuance of building permit(s).

3.17.1.3 Concurrent with any formation of a CFD, Landowner and City shall enter into a shortfall agreement as defined in the Funding, Construction, and Acquisition Agreement, in form and substance acceptable to City, whereby Landowner shall covenant to finance its fair share of the costs of the CFD Eligible Improvements, to the extent that the bonds issued by the CFD do not provide sufficient funding for the completion of such Improvements, subject to reimbursement/acquisition by pay-as-you-go proceeds, to the extent available.

3.17.1.4 Nothing herein shall be construed to limit Landowner's option to install the public improvements through the use of traditional assessment districts or private financing.

3.17.2 Effect of CFD Financing on Credits and Reimbursements.

Wherever the terms of this Agreement provide for (a) credits or (b) reimbursements to Landowner for construction of certain improvements, and such improvements are financed by the CFD, development fees otherwise applicable to such improvements shall be adjusted as necessary to reflect construction with CFD funds. Credits or reimbursements owed to Landowner shall not be affected or reduced because

improvements for which credits or reimbursements are due were financed with CFD special taxes or bond proceeds.

3.18 Completion of Improvements. City generally requires that all improvements necessary to service new development be completed prior to issuance of building permits (except model home permits as may be provided by the City's Subdivision Ordinance). However, the parties hereto acknowledge that some of the CFD Eligible Improvements associated with the development of the Property may not need to be completed to adequately service portions of the Property as such development occurs. Therefore, as and when portions of the Property are developed, all CFD Eligible Improvements required to service such portion of the Property in accordance with the Entitlements (e.g., pursuant to specific tentative map conditions or other land use approvals) shall be completed prior to issuance of any building permits within such portion of the Property (except permits for model homes, which may be issued sooner in accordance with the City's Subdivision Ordinance). Provided, however, the Public Works Director may approve the issuance of building permits prior to completion of all such CFD Eligible Improvements if the improvements necessary to provide adequate service to the portion of the Property being developed are substantially complete to the satisfaction of the Public Works Director.

All wet utilities to be installed by Landowner will be subject to the review and approval of the City Environmental Utilities Department. In connection therewith, Landowner shall be responsible for coordinating the alignment of all such planned and future utilities within the applicable rights-of-way to the satisfaction of the City Environmental Utilities Director.

3.19 Community Facilities District – Public Services (Services CFD).

3.19.1 Formation.

3.19.1.1 Consent, Waiver and Special Benefit. No residential building permit, excluding permits for model homes, or certificate of occupancy for non-residential uses, shall be issued until a Community Services District - Public Services has been formed to include the Property ("Public Services CFD"). Landowner consents to and shall cooperate in such formation or other such financing mechanism for maintenance purposes and consent herewith to the levy of such special taxes as are necessary to fund the maintenance obligations described in Section 3.19.2. Formation of the Public Services CFD shall be pursuant to and consistent with the requirements of this Agreement and Government Code Section 53111, *et seq.* The Public Services CFD will fund maintenance of street frontage and median landscaping, open space and neighborhood parks. The assessment amounts shall be defined in the Parks Financing Plan for street and median landscaping and neighborhood parks in the Project. The open space management and maintenance costs shall be determined prior to formation

of the Public Services CFD based on the final 404 permit, for the Project and other federal and state permits and approvals, the amount of Open Space Preserve, vehicle access into the Open Space parcels for maintenance, the quality and quantity of sensitive resources, the amount of residential interface along the open space edges, the final drainage channel design, and consistency with the City's Open Space Preserve Overarching Management Plan. The rate and method for the Public Services CFD shall reflect differential tax rates between low density residential, medium density residential, high density residential, and non-residential land uses.

3.19.1.2 Zones of Benefit. The Services CFD may be divided as necessary into zones of benefit and between which the amount of assessment may vary.

3.19.2 Public Services. The Public Services CFD shall provide the funds required for the performance of maintenance, monitoring and reporting obligations and may include, but not limited to, the following:

3.19.2.1 Autumn leaf cleanup for collector and local streets;

3.19.2.2 Maintain neighborhood parks;

3.19.2.3 Maintain paseos and sidewalks along collector streets and modified primary residential streets, medians and landscape corridors and all masonry walls along roadways within the Project, the masonry wall on the Project's eastern boundary and northern boundary, and the non-private property owner side of masonry walls and property between those walls and the NAPOTS Area;

3.19.2.4 Maintain bikeways and their appurtenances (drainage [limited to culverts or outfall pipes from adjacent subdivisions or roads], signs, benches, and striping);

3.19.2.5 Maintain City and neighborhood entry features within the Property, public rights-of-way and ancillary landscaping;

3.19.2.6 Conduct the environmental mitigation monitoring, and the annual review thereof, as required by the Mitigation Monitoring Plan related to the EIR;

3.19.2.7 Conduct all monitoring, reporting and adaptive management for Open Space Preserve areas, including the Off-Site Preservation Areas if accepted by City, described in Section 2.7.1 above. These tasks shall include any special management and monitoring actions identified in the 404 Permit (for created habitat success criteria) and as determined by a PAR analysis described in Section 2.7.4 (including any tasks required by any required Establishment Monitoring phase O&M Plan and during Perpetual Monitoring per the City's Open Space Preserve Overarching

Management Plan);

3.19.2.8 Maintain all water quality structural controls, storm management facilities (and programs) within RoW's and Open Space, including open channels and drainage swales constructed between storm drain outfalls and receiving waters, and conduct all monitoring, reporting and compliance measures as required by City's MS4 Permit;

3.19.2.9 Maintain flood control and drainage facilities including storm water channels, storm water pump stations, detention basins and created wetlands;

3.19.2.10 Maintain open space areas including general maintenance, signage and City-owned fence maintenance, and trash and debris collection;

3.19.2.11 Maintain fire breaks within open space areas, including during any required Establishment Monitoring Phase;

3.19.2.12 Maintain a Replacement Reserve Fund for repair and replacement of entry features, signage, lighting, and other special features including park features, structures, etc. included in the areas to be maintained through the Public Services CFD, as indicated in the Design Guidelines;

3.19.2.13 Maintain the bus shelters, bus stops, the park and ride lot, and bus signs; and

3.19.2.14 Maintain the NAPOTS Area referenced in Section 3.3.1 above until such time as the contract for the construction of the segment of Placer Parkway including the NAPOTS Area is executed.

3.19.3 Public Parcel Exclusion. Landowner expressly agrees that Parcels conveyed or to be conveyed to the City, Roseville City School District or Roseville Joint Union High School District shall be excluded from any assessment imposed by the Public Services CFD.

3.20 Community Facilities District – Municipal Services.

3.20.1 Formation.

3.20.1.1 Consent, Waiver and Special Benefit. No residential building permit, excluding permits for model homes, shall be issued until a Community Facilities District – Municipal Services (Municipal Services CFD) has been formed or

annexed to the City's existing Municipal Services CFD. Landowner consents to and shall cooperate in such formation or other such financing mechanism for services purposes and consent herewith to the levy of such special taxes as are necessary to fund the maintenance obligations described in Section 3.20.2. Formation of the Municipal Services CFD shall be pursuant to and consistent with the requirements of this Agreement and Government Code Section 53311, *et seq.* The initial amount of the maximum special tax shall be in accordance with the Municipal Services District Rate, Method, and Apportionment ("RMA"), and adjusted annually for inflation. The initial amount of the maximum special tax (for the 2015/16 City fiscal year, and as subsequently adjusted annually) shall be \$289.68 for LDR units, \$289.68 for MDR units, \$179.60 for HDR units, \$871 per acre for business professional land uses, and \$960 per acre for commercial land uses. City shall initiate the necessary steps to revise the RMA in the City's existing Municipal Services CFD to conform to the above-referenced initial amounts of maximum special taxes.

3.20.2 Municipal Services. The Municipal Services CFD shall provide the funds required to offset the Project's impact on City general fund resources available to pay for municipal services citywide, including the Project. The funds shall be utilized for general fund purposes.

3.20.3 Public Parcel Exclusion. Landowner expressly agrees that Parcels conveyed or to be conveyed to the City, Roseville City School District or Roseville Joint Union High School District shall be excluded from any assessment, imposed by the Services CFD.

3.21 Encroachment Permits, Landscape Maintenance Easements. Landowner and City agree to grant encroachment permit(s) or maintenance easements for all Services CFD's to Landowner or City or their agents, employees, successors, assigns, agents and employees, for the purpose of entry into the landscape easement and setback areas or City property (including streets and rights-of-way) to perform the maintenance obligations described herein.

3.22 Grading Permit. Prior to the onset of any construction activities, the Landowner shall apply for and obtain a grading permit from the City. All plans shall meet or exceed the intent of the then approved City Standards, the State Water Quality Control Board SWP3 requirements, and the State General Construction Permit. It is the Landowners responsibility to meet all criteria of any outside agency for grading adjacent to or within the Open Spaces.

Mass grading and the bulk movement of earthen material is encouraged. Where practical, and at the Direction of the City Engineer, a balanced mass grading plan shall be prepared for all that land within a disturbed water shed. Bulk material shall be moved on the onset of construction to ensure that future development sites balance, and

reduce the amount of future on-street transportation of bulk material on newly paved and existing City roads. The fee referenced below shall not apply to hauling of earthen material crossing in a perpendicular manner, or parallel, to newly paved or existing City roads. In the event that bulk material is transported on or over newly paved and/or existing City roads (but not across in a perpendicular manner or parallel to such City roads), a premium of \$0.10 fee per yard of material shall be assessed at the issuance of the grading permit to compensate the City for deterioration of the road caused by the excessive loads, provided, however, that the City Engineer shall have the discretion to waive such fee in recognition of particular circumstances, including environmental constraints, faced when hauling bulk movement of earthen material.

With regard to any and all P/QP parcel dedications to City and at Landowner's expense, all site grading shall be completed prior to the dedication of the site consistent with City's Grading Ordinance, and where retaining walls are required, the retaining wall shall be a split faced key stone style wall or comparable quality/design to be installed by the Landowner.

3.22.1 Contour Grading Plan. Landowner shall submit a contour grading plan (the "Preliminary Contour Grading Plan") for City review and acceptance for the overall Project concurrently with the application for the first residential small lot tentative subdivision map in the Project. The Preliminary Contour Grading Plan shall serve as an informational tool to demonstrate how the overall earth work for the Project will balance and coincide with future improvements.

The Preliminary Contour Grading Plan shall consider underground utilities and facilities outlined in the Drainage and Sewer Master Plans. Edge conditions along the proposed developed areas and overland release points shall be delineated per City standards. The Preliminary Contour Grading Plan shall also identify cut and fill quantities for each phase and shall include a mass diagram for earthwork movement between phases and an identification of any import required to complete the Preliminary Contour Grading Plan. The Preliminary Contour Grading Plan Exhibit shall include existing topography and proposed finished grade contours in one foot (1') intervals along with depths of cut and fill in a grid pattern throughout the Project Area.

3.23 Fire Station Site. City and Landowner acknowledge that City is responsible for funding, construction, and operation of fire facilities necessary to serve the ARSP. Landowner shall dedicate to City a 3.02 acre site (AR-54) for use as a fire station (the "Fire Station Site") at the location shown in the ARSP and as shown in Exhibit "E" attached hereto. The net buildable area (i.e., an area of land which may be fully and completely utilized for structures and other improvements) shall be no less than 3.0 acres. Except as stated below, the timing of such dedication shall be subsequent to acceptance by City of all necessary infrastructure and utility

improvements to serve the Fire Station Site and completion of the grading requirements stated below or at such later time as determined by City.

By the time of issuance of the 1200th building permit in the Project, City may request that Landowner construct all infrastructure and utility improvements, including communication conduit per City SIC standards, to the Fire Station Site to accommodate construction of the fire station and that Landowner dedicate the Fire Station Site to City. At Landowner's expense, site grading shall be completed prior to dedication of the Fire Station Site and consistent with City's Grading Ordinance, and where retaining walls are required, the retaining walls shall be split faced key stone style or comparable quality/design, to be installed by Landowner. Upon dedication of the Fire Station Site to City as provided in this Section 3.23., there shall be no further restrictions on or requirements of City approvals or permits anywhere in the Plan Area related to the provision of fire facilities in the Plan Area.

3.24 Disclosures to Subsequent Purchasers. This Agreement shall constitute notice to all successors to Landowner hereunder, and to all subsequent purchasers of any lots and/or residential units within the Property, of the following matters:

1. Designation of Westbrook Boulevard as a truck route.
2. The existence of a Development Agreement on the Property. However, this notice shall not extend to the purchaser of a completed individual single family residential unit
3. The Project will be served by surface water supplies, with groundwater serving as the backup supply.
4. Recycled water will be used to irrigate parks and landscape setbacks, medians, paseos and other landscape areas including all multi-family and non-residential landscaping uses.
5. Requirement to implement water conservation measures per the project Water Conservation Plan (Exhibit "R"), which may include such measures as Smart Timers.
6. 60kV overhead power line easement on Parcels AR-96 and AR-55.
7. Aircraft overflights and associated noise.
8. Requirement for fifty percent (50%) reduction in construction waste stream.

9. Location of schools and parks within one mile.
10. Parcels adjacent to Open Space and storm water channels may have a public bike trail and appurtenances adjacent to said parcels.
11. Location of the well site.
12. Location of wastewater treatment plant and sewer lift stations, and proximity to the Western Regional Sanitary Landfill and Materials Recovery Facility, whose operations create the potential for occasional odors associated with operations of these facilities.
13. Owners of residential units adjacent to separated sidewalks shall be responsible to maintain area between curb and sidewalks.
14. Masonry walls adjacent to landscape corridors on arterial roadways abutting Low and Medium Density Residential land uses and other public facilities are owned by the City, which is responsible for their maintenance, repair and replacement. The private property side of masonry walls adjacent to Low and Medium Density Residential lands abutting the NAPOTS Area shall be located within private property and is to be maintained by private property owners. The outside of such walls adjacent to the NAPOTS Area and any property between the masonry walls and the NAPOTS Area may be maintained by the CFD for Public Services.
15. Solar envelope impact: Landowner shall disclose to all residential and nonresidential buyers that certain properties, specifically those adjacent to major arterials and collector streets where City-maintained landscaping is installed, may impact the buyer's opportunity to install solar panels or structures or the efficiency or effectiveness of such solar panels or structures and that this is primarily due to the trees within the street landscapes as being generally medium to large shade trees, which may cast shade, leaf litter, or other natural affects onto the adjacent property.
16. Demand cycle control units operated by Roseville Electric on residential air conditioner units.
17. To the west of the northwestern portion of the Property is a parcel of land commonly known as the Gleason Ranch, APN 017-020-029-000, which is in commercial agricultural production. Should CC&Rs not be recorded against the Property as provided for

herein, a separate notice of the presence of the Gleason Ranch and its commercial agricultural production next to the northwestern portion of the Property will be recorded against the Property by Landowner, including a separate recorded notice to the purchaser of all completed individual single family residential units located within the Property, notifying all such subsequent purchasers that their properties are located in the vicinity of the Gleason Ranch commercial agricultural production, which includes, or may include from time to time, operation of farm machinery, irrigation, noises, odor and dust generation, electrical and barbwire fencing, and aerial and ground application of pesticides, herbicides and fertilizers, as well as occasional hunting activities, all of which may occur at various times of the day or night. The notice will also notify future residents of the Property of the possibility of commercial and/or residential development on the Gleason Ranch property in the future.

18. Parcels adjacent to the NAPOTS Area shall be notified of the future Placer Parkway project and the potential for air quality and noise impacts.
19. Parcels adjacent to the Project's eastern boundary shall be notified of the potential for a future Placer Ranch Specific Plan.

If Landowner records any Property CC&Rs, such CC&Rs shall include the foregoing disclosures and the foregoing disclosures shall not be omitted or deleted from the CC&Rs without the City Attorney's prior written approval, with the exception of disclosure 17, which may not be omitted or deleted from CC&Rs.

3.25 General Signage.

A) Utility Sites (see Section 3.14.5): Landowner shall install signage at all future utility sites (including, but not limited to, the well, sewer lift stations, pumping stations, aquifer storage and recovery facilities, and public facility sites describing the facilities to be constructed on the subject site. Signs shall be provided per City specifications. The Environmental Utilities Director, City Engineer, and Electric Director, as appropriate, must review and approve sign layouts prior to installation/construction of any utility sites. The City Manager or his/her designee must review and approve sign layouts prior to installation/construction of any public facilities.

B) Affordable Housing: Landowner shall install signage at future affordable rental housing sites (excluding carriage units) describing the facilities to be constructed on the subject site. Signs shall be provided per City specifications. The City

Manager or his/her designee must review and approve sign layouts prior to installation by Landowner.

3.26 Masonry Walls. Landowner agrees to construct masonry walls, a minimum of 6-feet high, between the future Placer Parkway right-of-way (the NAPOTS Area) where Low Density Residential and Medium Density Residential land uses abut the future Placer Parkway right-of-way, prior to the occupancy of such residential land uses. The masonry walls shall be located on private property and, for the private lot owner side of the masonry wall, shall be maintained by the private property owners. CC&Rs for those subdivisions shall inform the private property owners of their maintenance responsibilities and shall require such walls to remain in place and maintained at all times.

3.27 Reimbursement to West Roseville Specific Plan.

A. In the event the ARSP constructs improvements in the CSP Area, Landowner acknowledges that the West Roseville Specific Plan ("WRSP") developer(s) have constructed and/or will construct improvements as set forth in Exhibits "II" and "OO" to the WRSP development agreements, which have been and/or will be oversized for the benefit of third parties such as the CSP. Landowner further acknowledges that City is obligated to use its best efforts in requiring reimbursement to WRSP from benefiting third parties. Such oversized improvements as specified in such Exhibits "II" and "OO" to the WRSP development agreements may include sewer, water, and recycled water. The reimbursements due the WRSP from the Project are also set forth in Exhibit "BB" to this Agreement. As set forth in this Section 3.27, Landowner shall pay its pro-rata share based on the number of DUEs allocated at the date of Project approval, as set forth in Exhibit "AA", to Landowner's Property in a large lot parcel. Landowner's pro-rata share for a large lot parcel shall be based on the following

LDR/MDR residential units allocated to a large lot
parcel at the date of Project approval (or DUEs for HDR
projects/non-residential projects)

Such payment for the DUEs in a large lot parcel in which a final small lot residential subdivision map or building permit (for high density residential or non-residential uses), is approved, as the case may be, shall be due and payable on the earlier of the formation of a CFD and issuance of bonds for such CFD serving that large lot parcel in Landowner's Property, or recordation of the first final small lot residential subdivision map, in the case of low density and medium density residential projects, or issuance of the first building permit for high density residential or non-residential projects, in such large lot parcel, subject to the following considerations:

- Landowner's pro-rata reimbursement to WRSP (as defined in this

Section 3.27) shall be required until such time Landowner's pro-rata reimbursement owed to WRSP has been fully satisfied or Landowner's Property has been fully built out.

- Once Landowner has made payments for reimbursement to the WRSP as set forth in this Section 3.27 for infrastructure and environmental and planning costs, respectively, for a large lot parcel, Landowner shall have no further reimbursement obligation to the WRSP for that large lot parcel.
- Reimbursements for WRSP improvements that have been constructed shall be paid as set forth in Section 3.27.D, subject to confirmation and approval by City of costs for work completed by the WRSP, according to the following hierarchy in determining costs for WRSP improvements for which the WRSP seeks reimbursement:
 - (1) Invoices for construction of WRSP improvements submitted by the WRSP to City; or
 - (2) if such invoices are not available, documentation of payment from the WRSP CFD for WRSP improvements; or,
 - (3) if such documentation of payment from the WRSP CFD is not available, the cost estimates for WRSP improvements as set forth in Exhibits "II" and "OO" to the WRSP development agreements and Exhibit "BB" to this Agreement.

Prior to City approval, Landowner shall have the right to review such requests for reimbursement from the WRSP, including all such documentation.

B. So as to not delay implementation of the Project, no final small lot residential subdivision map, any building permit for high density residential or non-residential uses, nor any certificates or occupancy regardless of use type, shall be withheld or delayed by City in the Project due to any delay in submission of requests for reimbursement, and documentation justifying such reimbursement, by the WRSP to City.

C. At the time that Landowner seeks recordation of a final small lot residential subdivision map, or issuance of a building permit for high density residential or non-residential uses, on any portion of a large lot parcel on Landowner's Property, WRSP developers may not yet have submitted invoices for the costs of WRSP

improvements completed and accepted by City (hereinafter, “completed WRSP Improvements”) for which reimbursement from the Project is sought by the WRSP, or provided documentation supporting payment for such by the WRSP CFD, as set forth in Section 3.27.A, and, as set forth in Section 3.27.E, certain WRSP improvements for which reimbursement is sought may not have been constructed. Landowner shall, at the time of recordation of a final small lot residential subdivision map or issuance of a building permit for a high density residential or non-residential use, pay to City Landowner’s pro-rata share of costs of such completed WRSP improvements (both invoiced or documented as set forth in Section 3.27.A and yet to be invoiced or documented as set forth in this Section 3.27.C.) and the yet to be constructed WRSP improvements for the DUEs allocated to such large lot parcel, as defined in Section 3.27.A (and as set forth in Exhibit “AA”), based on the actual costs or cost estimates of such infrastructure, as the case may be, set forth in Exhibits “II” and “OO” to the WRSP development agreements and Exhibit “BB” to this Agreement, and as described in this Section 3.27.C. City shall pay to the WRSP developers 100% of such reimbursements from the amounts paid by Landowner, until such time as the actual costs of completed WRSP improvements, as provided for in Section 3.27.A, have been paid in full, with reimbursed funds paid by Landowner, over and above the cost of completed WRSP Improvements, placed into an escrow account, as set forth (or as may be modified, as the case may be) in Section 3.27.D.

D. At the time that Landowner seeks recordation of a final small lot residential subdivision map, or issuance of a building permit for high density residential or non-residential uses, on any portion of a large lot parcel on Landowner’s Property, some WRSP improvements for which reimbursement is provided for in Exhibits “II” and “OO” to the WRSP development agreements and Exhibit “BB” to this Agreement may not have been completed and accepted by City. In such case, Landowner shall have the option of making payment to City for such yet-to-be built WRSP improvements as set forth in Section 3.27.C., or posting security acceptable to City, which could include a security bond. Such reimbursement funds shall be paid either to (1) the WRSP developer constructing such improvements, based on actual costs, as set forth in Section 3.27A, or (2) to Landowner or any other landowner(s) should such landowner(s) construct such improvements.

E. All P/QP parcels to be dedicated to City or to another public agency, e.g., school districts, shall not be subject to reimbursement to the WRSP. All reimbursements for improvements to the WRSP shall be subject to annual adjustment for CCI from the date that the WRSP Developer incurred the reimbursable cost to the date of reimbursement.

3.28 Reimbursement to Creekview Specific Plan.

A. Landowner acknowledges that the Creekview Specific Plan developer(s) have an obligation to construct improvements as set forth in Exhibits "Q", "V", "Y" and "KK" to the CSP development agreement, which will be oversized for the benefit of third parties such as Landowner. Landowner further acknowledges that City is obligated to use its best efforts in requiring reimbursement to the CSP from benefiting third parties. Such oversized improvements as specified in Exhibits "Q", "V", "Y" and "KK" to the CSP development agreement are for sewer, water and recycled water. The reimbursements due the CSP from the Project are set forth in Exhibit "BB" to this Agreement, and Exhibits "K-1", "K-2", "O-1", "O-2", "O-3", "Q-1", and "Q-2" to this Agreement.

The Project's share of costs based on "flow in the pipe" shall be reimbursable to the constructing CSP developer(s) pursuant to this Section 3.28. That share of costs shall be fixed as a percentage based on the number of DUEs ("EDUs" in Exhibit "AA") allocated to Landowner's large lot parcel at the time of ARSP approval and set forth in Exhibit "AA" to this Agreement. The percentage shall be calculated using the allocated DUEs for each large lot parcel as provided in Exhibit "AA" as the numerator, and the total number of DUEs in the ARSP, including the Urban Reserve parcel, as the denominator.

Any reimbursement payment required to this Section 3.28 shall be due and payable to the constructing CSP developer(s), unless otherwise stated herein, upon the earlier of the formation of a CFD and issuance of bonds for such CFD serving that large lot parcel, or recordation of the first final small lot residential subdivision map, in the case of low density or medium density residential projects, or issuance of the first building permit for high density residential or non-residential projects, in such large lot parcel. Once Landowner has made it reimbursement payment(s) in full pursuant to this Section 3.28 for a large lot parcel in the Project, Landowner shall have no further reimbursement obligation to the constructing CSP developer(s) for that large lot parcel.

Reimbursements shall be paid directly to the constructing CSP developer(s) and not the City, unless (1) the reimbursement is owned to a CFD, in which case the reimbursements would pass through the City to the applicable CFD, or (2) the improvements have not yet been constructed, or constructed but not yet accepted by the City. If the improvements are not yet constructed, and Landowner must construct the improvements to serve the Project, then no reimbursement is owed by Landowner to the CSP, but rather the CSP developer(s) owe reimbursement to Landowner according to the same terms applicable to Landowner in this Section 3.28. For such reimbursable improvements that are constructed by the CSP, reimbursements shall be paid as set forth in this Section 3.28, subject to confirmation and approval by City of costs for work completed by the CSP, based only on invoices for construction of CSP improvements

submitted by the CSP to the City. Prior to City approval of such requests for reimbursements from the CSP, Landowner shall have the right to review such requests for reimbursements, including all required documentation. Actual costs of construction include those items set forth in Section 4.2.3.

B. So as to not delay implementation of the Project, no final small lot residential subdivision map, any building permit for high density residential or non-residential uses, nor any certificates of occupancy regardless of use type, shall be withheld or delayed by City in the Project due to any delay in submission of requests for reimbursement and/or documentation justifying such reimbursement by the CSP to City.

C. At the time that Landowner seeks recordation of a final small lot residential subdivision map, or issuance of a building permit for high density residential or for non-residential uses, on any portion of the Property, CSP developer(s) may not yet have submitted invoices for the costs of CSP improvements completed and accepted by the City (hereinafter, "Completed CSP Improvements") for which reimbursement from the Project is sought by the CSP, or provided documentation supporting payment for such reimbursement, as set forth in Section 3.28.A. In addition, certain CSP improvements for which reimbursement is sought may not have been constructed at the time that Landowner seeks recordation of a final small lot residential subdivision map or issuance of a building permit for high density residential or for non-residential uses on the Property. In the instances described in this Section 3.28.C., Landowner shall, at the time of recordation of a final small lot residential subdivision map or issuance of a building permit for a high density residential use or non-residential use, pay to City Landowner's pro-rata share of costs of such Completed CSP Improvements (both invoiced or documented as set forth in Section 3.28.A., or yet to be invoiced or documented as set forth in this Section 3.28.C.) and the yet to be constructed CSP improvements for the DUEs allocated to the particular large lot parcel in the Project, as defined in Section 3.28.A. (and as set forth in Exhibit "BB"), based on the actual costs or costs estimates of such infrastructure, as the case may be, set forth in Exhibits "Q", "V", "Y" and "KK" to the CSP development agreement and Exhibits "K-1", "K-2", "O-1", "O-2", "O-3", "Q-1", "Q-2", and "BB" to this Agreement, and as described in this Section 3.28.C. City shall pay to the CSP developer(s) 100% of such reimbursements from the amounts paid by Landowner, until such time as the actual costs of Completed CSP Improvements, as provided for in Section 3.28.A., have been paid in full, with reimbursed funds paid by Landowner or other parties, over and above the cost of Completed CSP Improvements, placed in an escrow account controlled by City, as set forth or as may be modified, as the case may be, in Section 3.28.D.

D. At the time Landowner seeks recordation of a final small lot residential subdivision map, or issuance of a building permit for high density

residential uses or non-residential uses, on any portion of a large lot parcel on the Property, some CSP improvements for which reimbursement is provided for in Exhibits "Q", "V", "Y" and "KK" to the CSP development agreement and Exhibits "K-1", "K-2", "O-1", "O-2", "O-3", "Q-1", "Q-2", and "BB" to this Agreement may not have been completed and accepted by City. In such case, Landowner shall have the option of making to City for such yet-to-be-built CSP improvements as set forth in Section 3.28.C., or posting security acceptable to City, which could include a security bond.

E. All P/QP parcels to be dedicated to City or to another public agency, e.g., school districts, shall not be subject to reimbursement to the CSP. All reimbursements for improvements to the CSP shall be subject to annual adjustment for CCI from the date that the CSP developer(s) incurred the reimbursable cost to the date of reimbursement.

3.29 Reimbursements to Third Parties. In the event that third parties construct sewer, water and/or recycled facilities in Westbrook Boulevard through the Property, and/or the ARSP fire station site, that are either required of or by Landowner or for which Landowner has responsibility for a pro-rata share, Landowner shall provide reimbursement to third parties for Landowner's share of the costs of such improvements as set forth in this Section 3.29. To effectuate reimbursement to such constructing third parties, Landowner shall pay to City a per DUE fee, to be paid large lot by large lot based on the ratio set forth below and the percentages set forth in Exhibits "K-1", "K-2", "O-1", "O-2", "O-3", "Q-1" and "Q-2", comprised of the following components, all as set forth in Exhibit "BB" to this Agreement: (i) Landowner's share of wet utilities in Westbrook Boulevard; (ii) Landowner's share of the ARSP fire station site. References herein to payments on a "large lot by large lot basis" shall mean payments based on the number of DUEs planned for such large lot, as more fully described in the ratio set forth below, which payments shall be due upon the recordation of the first final small-lot map for LDR/MDR residential units or issuance of the first building permit for HDR projects or non-residential projects within such large lot.

Payments by Landowner based on estimates set forth in Exhibit "K-1", "K-2", "O-1", "O-2", "O-3", "Q-1", and "Q-2" to this Agreement for the wet utilities in Westbrook Boulevard shall be annually adjusted by the CCI from the Effective Date of this Agreement to the date of payment. Payments by Landowner based on estimates set forth in Exhibit "CC" to this Agreement for the ARSP fire station site (excluding land value), shall be adjusted annually by the CCI from the Effective Date of the ARSP development agreements, to the date of payments.

Reimbursable costs shall include costs associated with design, engineering, construction management, staking, plan check and inspection fees, habitat mitigation (excluding any costs of state and federal permitting), and construction. Reimbursement

for costs for design, engineering, construction management and staking shall equal twenty percent (20%) of identifiable costs of construction, as set forth in Section 4.2.3.

(i) In the case of the on-site sewer, water and recycled water facilities in Westbrook Boulevard in the ARSP, if third parties are required by City to construct such facilities, City shall pay to such third parties, as such construction costs are incurred by such third parties and approved by City, the fees described herein that have been paid, large lot by large lot, by Landowner, which Landowner shall continue to pay, large lot by large lot, until such time as City determines that such wet utilities would have otherwise have been required to support development of the Property, at which time Landowner shall pay, in one single payment, the unpaid balance of Landowner's share of the actual costs of construction of such facilities, adjusted annually as set forth in Section 4.2.5 of this Agreement, after the fees previously paid by Landowner to City as described in this Section 3.29 have been paid to the constructing third parties. All reimbursements to and from third parties for wet utilities shall be based on the percentages as set forth in Exhibit "AA".

(ii) For Landowner's pro-rata share of the ARSP fire station site Landowner, via the fee described in this Section 3.29, shall pay to City, to be paid to the constructing third parties at the time of construction as construction costs are incurred by such other constructing third parties and approved by City, its pro-rata share, as set forth in Exhibit "CC", of the estimated costs for grading, any required access road, any frontage improvements as defined in Exhibit "CC", and any other improvements specified in Exhibit "CC", adjusted annually by the CCI (but excluding the land value of the fire station site, whose costs shall not be adjusted annually by the CCI) from the Effective Date of the ARSP development agreements, to the date of payment, according to the pro-rata shares therefore set forth in Exhibit "CC". After the ARSP fire station site has been constructed by such other third parties (or, in the case of the CSP electric substation site, by Landowner, as set forth in Section 4.2.2.1 below), Landowner's payment, large lot by large lot, of its pro-rata share of the fire station site to such other constructing third parties shall be based on actual costs of construction, adjusted annually as provided for in Section 4.2.5.

Payment by Landowner for reimbursements due for the facilities set forth in Exhibit "BB" shall satisfy in full Landowner's obligation for payment of its pro-rata share of the costs of improvements due from Landowner to CSP developer(s). For all reimbursement payments by Landowner to third parties or to City to be paid to third parties provided for in this Section 3.28, once such payment by Landowner has been made for residential units or DUEs, as the case may be, for a large lot based on estimated costs of improvements, Landowner shall have no further obligation for those residential units or DUEs, as the case may be, should actual costs of construction for the improvements exceed the estimated costs. Likewise, if actual costs of construction are less than the estimated costs of improvements for which reimbursement has been made

by Landowner for residential units or DUEs, as the case may be, for a large lot, there shall be no repayment of the overpayment from the reimbursed party or parties to Landowner for those residential units or DUEs for which reimbursement payments were previously made based on estimated costs.

In all cases of payment by Landowner for its pro-rata share of costs for improvements as provided in this Section 3.29, Landowner shall pay its pro-rata share of costs based on estimates set forth in Exhibits "K-1", "K-2", "O-1", "O-2", "O-3", "Q-1", and "Q-2" and "CC" to this Agreement until such time as actual costs of construction have been reviewed and confirmed by City.

ARTICLE 4. CITY OBLIGATIONS

4.1 City Cooperation. City agrees to cooperate with Landowner in securing all permits that may be required by City and, to the extent applicable, state and federal agencies. In the event State or Federal laws or regulations enacted after this Agreement has been executed, or action of any governmental jurisdiction, prevent, delay or preclude compliance with one or more provisions of this Agreement, or require changes in plans, maps or permits approved by City, the parties agree that the provisions of this Agreement shall be modified, extended or suspended as may be necessary to comply with such State and Federal laws or regulations or the regulations of other governmental jurisdictions. Each party agrees to extend to the other its prompt and reasonable cooperation in so modifying this Agreement or approved plans.

4.2 Credits and Reimbursements. Landowner may, pursuant to this Agreement, finance construction of certain improvements, including but not limited to roadways, sewer, water, recycled water, solid waste, park, bike trails, drainage and/or electrical facilities which would otherwise be paid for by the City or other parties and which serve and benefit other properties or which would be financed by existing or future City fees.

City and Landowner agree that, in consideration of Landowner financing of such improvements that may be part of a City project for which the City is collecting development impact fees, Landowner, upon entering into an improvement agreement with City and posting security for improvements, shall be entitled to credits and/or reimbursements (reimbursements are applicable when improvements are completed, or as otherwise provided in Sections 3.5.2, and 3.5.7), as set forth below, which credits and reimbursements are owned personally by Landowner and do not run with the Property to successors and assigns, unless Landowner provides written notice to City that said credits and reimbursements have been assigned by Landowner to a third party.

City shall make best efforts to collect reimbursements from third parties outside the ARSP that have been financed by the Landowner, for infrastructure improvements

benefiting those third parties, as set forth in Sections 4.2.2 – 4.2.7.

Such personal ownership of credits and reimbursements by Landowner apply to all credits and reimbursements set forth in this Section 4.2 and all subsections thereto, and all other credits and reimbursements provided under this Agreement. City shall use its reasonable best efforts to establish a program to track credits owned by Landowner as provided in this Section 4.2, provided that Landowner hereby agrees to hold the City harmless for any credits that are misapplied by City.

4.2.1 City Extension of Credits. To the extent Landowner advances the cost for the construction of infrastructure included within existing, or to be included in future, City fee programs, City shall provide, if funds are available, reimbursement to Landowner, and if funds are not available for reimbursement, then City shall grant to Landowner a credit for such costs applied against their respective fee obligations for the Project, subject to the provisions of Sections 3.5.2, 3.5.7, 3.12.8 and 3.12.9 above, and provided that in no case shall the amount of credits exceed Landowner's costs of construction of such infrastructure, as defined in Section 4.2.3 below.

4.2.2 Reimbursement by Third Parties. In the case of public road, sewer, water, recycled water, drainage or electric improvements which abut property or traverse through property owned by third persons and other public improvements which are oversized or are constructed by Landowner, even if not oversized, to benefit property owned by third persons outside of the Project, including property designated Urban Reserve, Landowner shall be entitled to receive a reimbursement from the benefited property owner(s) (and not the City) for the pro rata cost of the improvements, and, in the case of any over sizing, the pro rata cost of the improvements which exceed Landowner's obligation.

Reimbursement may be provided directly from the owner abutting such improvements or from a community facilities district or any such other infrastructure financing district if such a district is formed by or includes such properties and includes monies for the construction of said improvements. Exhibit "BB" contains a listing of improvements subject to reimbursement to Landowner from benefited property owners for improvements, including improvements that exceed Landowner's obligations.

City shall use its best efforts, to the extent City has the authority to do so, to impose the foregoing obligation to pay said reimbursement, as a condition of development of such benefited property owned by third parties, at the time such property owner requests a discretionary approval or other such entitlement from City for development of the benefited property whereby such condition can be imposed. Such reimbursement shall be due and payable on the earlier of the formation of a CFD and issuance of bonds for such CFD serving development by such third parties or recordation of the first large lot subdivision map serving the development by such third

party.

4.2.3 Reimbursable Hard Costs. The "hard costs" of construction to be credited to Landowner by the City, and to be reimbursed to Landowner by a third party, shall consist of the identifiable costs of construction, plus 20% assumed for the "soft costs" of design, engineering, construction, construction management, permitting, environmental mitigation requirements, staking, and plan check and inspection fees as set forth in Exhibit "BB," and, as to the "hard costs" of construction, confirmed by City for the reimbursable or credited work.

4.2.4 [Reserved].

4.2.5 Increased Amount of Reimbursements. Reimbursements from third parties for improvements shall be annually increased by the CCI from the date that Landowner incurred the reimbursable cost to the date of reimbursement.

4.2.6 Term for Credits and Reimbursements. City's obligation to provide any credits or to pay or assist in obtaining any reimbursements to Landowner that accrues hereunder shall terminate thirty (30) years after the Effective Date of this Agreement.

4.2.7 Not a Limitation. Nothing in the foregoing Section 4.2 shall be construed to limit Landowner from receiving, in consideration of the improvements to be constructed by Landowner hereunder, any other credits or reimbursements from City otherwise provided under then existing City policy, rule, regulation or ordinance.

4.3 Applications for Permits and Entitlements.

4.3.1 Action by City. City agrees that it will accept, in good faith, for processing review and action, all applications for development permits or other entitlements for use of the Property in accordance with the Entitlements and this Agreement, and shall exercise its best efforts to act upon such applications in an expeditious manner.

4.3.2 Maps and Permits. Provided that the Public Facilities CFD, if applicable, has been formed and is duly authorized to levy the special tax therefore in accordance with Section 3.17 hereof, and further provided that the Public Services CFD and Municipal Services CFD have been or will at the time of the requested final approval be formed and authorized to levy the special taxes against the applicable portion of the Property in accordance with this Agreement, and further provided that Landowner is not in default of this Agreement, City shall not refrain from approving final residential lot subdivision maps nor shall it cease to issue building permits, certificates of occupancy or final inspections for development of the Property that is

consistent with the Entitlements. The acceptance, review and approval of any application for a final residential lot subdivision map, final non-residential subdivision map or building permit may be conditioned upon the formation of the Public Facilities CFD, if applicable, and the submission of petitions to form the Public Services CFD and Municipal Services CFD or annex the Property into the Public Services CFD and/or Municipal Services CFD, as applicable. Prior to such formation and/or annexation, City shall accept, for review, processing and approval, consistent with the Entitlements, applications for tentative residential lot and non-residential subdivision maps and for tentative and final large lot subdivision or parcel maps consistent with the Parcels described by the Specific Plan for the Property.

City acknowledges that under Government Code Section 66452.6, the term of a tentative subdivision map will be automatically extended for a period of time where a sub-divider is obligated to install certain improvements located outside the boundaries of the subdivision. In determining the term of any tentative subdivision map approved by the City for the Property, or any portion thereof, and without limiting the effect of any other provisions of the Government Code dealing with map extensions, the City agrees that the CFD Improvements described hereunder shall be treated as such off-site improvements for purposes of applying Section 66452.6 of the Government Code.

A subdivision, as defined in Government Code Section 66473.7, shall not be approved unless any tentative map prepared for the subdivision complies with the provisions of said Section 66473.7; this provision is included in this Agreement to comply with Government Code Section 65867.5.

4.3.3 Personnel. Nothing in this Agreement shall be construed to require City to hire or retain personnel for the purposes of evaluating, processing or reviewing applications for permits, maps or other entitlements or for the design, engineering or construction of public facilities in excess of those for which provision is made in the normal and customary budgeting process or fee schedules of City.

4.4 Subdivision Map Act Waiver. Notwithstanding any other provisions of this Agreement, or of Sections 66452.1, 66452.2, 66456.2 and 66458, of the Government Code (or any successor or replacement statute), Landowner expressly waives the time limits for review and approval by City of tentative subdivision maps to the extent that each such period does not exceed one hundred fifty (150) days beyond the time otherwise provided by law, unless Landowner and City mutually agree to another time limit.

4.5 Limited Waiver of Protest Rights. In conjunction with any proceedings creating an assessment district or other applicable financing mechanism for which provision is made in this Agreement, Landowner waives herewith any right to protest

which it may have under Section 2825 of the Streets and Highways Code to the extent that such protest would arise under Section 2825(a) through 2825(f) and Section 2825(h); but expressly retains the right of protest with respect to Section 2825(g).

4.6 Moratorium, Quotas, Restrictions or Other Growth Limitations. Subject to applicable law relating to the vesting provisions of development agreements, Landowner and City intend that except as otherwise provided herein, this Agreement shall vest the Entitlements against subsequent City resolutions, ordinances, growth control measures and initiatives or referenda, other than a referendum that specifically overturns City's approval of the Entitlements, that would directly or indirectly limit the rate, timing or sequencing of development, or would prevent or conflict with the land use designations, permitted or conditionally permitted uses on the Property, design requirements, density and intensity of uses as set forth in the Entitlements, and as further set forth in Section 2.4.1 above, and that any such resolution, ordinance, initiative or referendum shall not apply to the Entitlements and the Project. Notwithstanding any other provision of this Agreement, Landowner shall, to the extent allowed by the laws pertaining to development agreements, be subject to any growth limitation ordinance, resolution, rule, regulation or policy which is adopted and applied on a uniform, City-Wide basis and directly concerns an imminent public health or safety issue. In such case, City shall apply such ordinance, resolution, rule, regulation or policy uniformly, equitably and proportionately to Landowner and the Property and to all other public or private owners and properties directly affected thereby. By way of example only, an ordinance which would preclude the issuance of a building permit due to a City-Wide lack of adequate sewage treatment capacity to meet additional demand would directly concern an imminent public health issue under the terms of this paragraph and would support a denial of a building permit within the Property or anywhere else in the City if approval would require additional sewage treatment capacity. However, an effort to limit the issuance of building permits because of a general increase in traffic congestion levels in the City would not be deemed to directly concern an imminent public health or safety issue under the terms of this paragraph.

4.7 Subsequent Proposed Development. City and Landowner acknowledge that the terms of this Agreement provide for substantial financial commitments by Landowner to ensure that the Project results in a net positive fiscal effect on the City and its residents. City agrees to use its best efforts to assure that the development agreements in connection with any subsequent annexation and associated specific plan shall be subject to financial commitments of the same or greater magnitude as those made by Landowner under this Agreement, to the extent allowed by law. This provision shall not apply to development of infill areas within the City.

4.8 Essence of Agreement. Sections 2, 3, 4, 5 and 6 are the essence of this Agreement.

ARTICLE 5. DEFAULT, REMEDIES, TERMINATION

5.1 General Provisions. Subject to extensions of time by mutual consent in writing, failure or unreasonable delay by either party to perform any term or provisions of this Agreement shall constitute a default. In the event of alleged default or breach of any term or condition of this Agreement, the party alleging such default or breach shall give the other party not less than thirty (30) days notice in writing specifying the nature of the alleged default and the manner in which said default may be satisfactorily cured. During any such thirty (30) day period, the party charged shall not be considered in default for purposes of termination or institution of legal proceedings.

After notice and expiration of the thirty-day period, the other party to this Agreement at its option may institute legal proceedings pursuant to this Agreement or give notice of intent to terminate the Agreement pursuant to California Government Code Section 65868 and regulations of City implementing said Government Code Section. Following notice of intent to terminate, the matter shall be scheduled for consideration and review by the City Council within thirty (30) calendar days in the manner set forth in Government Code Sections 65865, 65867 and 65868 and City regulations implementing such Sections.

Following consideration of the evidence presented in said review before the City Council, either party alleging the default by the other party may give written notice of termination of this Agreement to the other party.

Evidence of default may also arise in the course of a regularly scheduled periodic review of this Agreement pursuant to Government Code Section 65865.1. If either party determines that the other party is in default following the completion of the normally scheduled periodic review, said party may give written notice of default of this Agreement as set forth in this section, specifying in said notice the alleged nature of the default, and potential actions to cure said default and shall specify a reasonable period of time in which such default is to be cured. If the alleged default is not cured within thirty (30) days or within such longer period specified in the notice, or if the defaulting party waives its right to cure such alleged default, the other party may terminate this Agreement.

No building permit shall be issued or building permit application accepted for any structure on the Property if the permit applicant owns and controls any property subject to this Agreement, and if such applicant or entity or person controlling such applicant is in default of the terms of this Agreement.

5.2 Annual Review. City shall, at least every twelve (12) months, per Roseville Municipal Code Chapter 19.84, as such period may be amended, during the term of this Agreement, review the extent of good faith substantial compliance by Landowner with

the terms of this Agreement. Such periodic review shall be limited in scope to compliance with the terms of this Agreement pursuant to Section 65865.1 of the Government Code and the monitoring of mitigation in accordance with Section 210816 of the Public Resources Code of the State of California. Notice of such review shall include the statement that any review of obligations of Landowner as set forth in this Agreement may result in termination of this Agreement. A finding by City of good faith compliance by Landowner with the terms of the Agreement shall be conclusive with respect to the performance of Landowner during the period preceding the review. Landowner shall be responsible for the cost reasonably and directly incurred by the City to conduct such review, the payment of which shall be due within thirty (30) days after conclusion of the review and receipt from the City of the bill for such costs.

Upon not less than thirty (30) days written notice by the City, Landowner shall provide such information as may be reasonably requested and deemed to be required by the City in order to ascertain compliance with this Agreement.

In the same manner prescribed in Section 10, the City shall deposit in the mail to Landowner a copy of all staff reports and related exhibits concerning contract performance and, to the extent practical, at least ten (10) calendar days prior to any such periodic review. Landowner shall be permitted an opportunity to be heard orally or in writing regarding its performance under this Agreement before the City Council or, if the matter is referred to the Planning Commission, before the Planning Commission.

If City takes no action within thirty (30) days following the hearing required under Roseville Municipal Code Section 19.94.080, or any successor thereof or amendment thereto, Landowner shall be deemed to have complied in good faith with the provisions of the Agreement.

5.3 Enforced Delay, Extension of Times of Performance. In addition to specific provisions of this Agreement, performance by either party hereunder shall not be deemed to be in default where delays or default are due to war, insurrection, strikes, walkouts, riots, floods, drought, earthquakes, fires, casualties, acts of God, acts of terrorism, governmental restrictions imposed or mandated by other governmental entities, enactment of conflicting state or federal laws or regulations, new or supplementary environmental regulation, litigation, or similar bases for excused performance. If written notice of such delay is given to City within thirty (30) days of the commencement of such delay, an extension of time for such cause shall be granted in writing for the period of the enforced delay, or longer as may be mutually agreed upon.

5.4 Legal Action. In addition to any other rights or remedies, either party may institute legal action to cure, correct or remedy any default, to enforce any covenant or agreement herein, or to enjoin any threatened or attempted violation.

Provided, however, that the Landowner, its successors and assigns hereby waive any and all claims for monetary damages against City arising out of this Agreement at any time. All legal actions shall be initiated in the Superior Court of the County of Placer, State of California, or in the Federal District Court in the Eastern District of California.

5.5 Effect of Termination. If this Agreement is terminated following any event of default of Landowner or for any other reason, such termination shall not affect the validity of any building or improvement within the Property which is completed as of the date of termination, provided that such building or improvement has been constructed pursuant to a building permit issued by the City. Furthermore, no termination of this Agreement shall prevent Landowner from completing and occupying any building or other improvement authorized pursuant to a valid building permit previously issued by the City that is under construction at the time of termination, provided that any such building or improvement is completed in accordance with said building permit in effect at the time of such termination.

5.6 Applicable Law and Attorneys' Fees. This Agreement shall be construed and enforced in accordance with the laws of the State of California. Should any legal action be brought by either party for breach of this Agreement, or to enforce any provisions herein, the prevailing party to such action shall be entitled to reasonable attorneys' fees, court costs and such other costs as may be fixed by the Court.

ARTICLE 6. HOLD HARMLESS AGREEMENT

Landowner and its successors-in-interest and assigns, hereby agrees to, and shall defend and hold City, its elective and appointive boards, commissions, officers, agents, and employees harmless from any liability for damage or claims for damage for personal injury, or bodily injury including death, as well as from claims for property damage which may arise from the operations of Landowner, or of Landowner's contractors, subcontractors, agents, or employees under this Agreement, whether such operations be by Landowner, or by any of Landowner's contractors or subcontractors, or by any one or more persons directly or indirectly employed by, or acting as agent for, Landowner or Landowner's contractors or subcontractors, unless such damage or claim arises from the negligence or willful misconduct of City. The foregoing indemnity obligation of Landowner shall not apply to any liability for damage or claims for damage with respect to any damage to or use of any public improvements after the completion and acceptance thereof by City. In addition to the foregoing indemnity obligation, Landowner agrees to and shall defend, indemnify and hold City, its elective and appointive boards, commissions, officers, agents and employees harmless from any suits or actions at law or in equity arising out of the execution, adoption or implementation of this Agreement, exclusive of any such actions brought by Landowner, its successors-in-interests or assigns. City acknowledges hereby that the foregoing liability of Landowner shall be limited to its interest in the Property and that

neither Landowner nor any of its partners, officers, shareholders, employees or agents shall have any personal liability therefore.

ARTICLE 7. PROJECT AS A PRIVATE UNDERTAKING

It is specifically understood and agreed by and between the parties hereto that the subject project is a private development. No partnership, joint venture or other association of any kind is formed by this Agreement.

ARTICLE 8. COOPERATION IN THE EVENT OF LEGAL CHALLENGE

In the event of any legal action instituted by a third party or other governmental entity or official challenging the validity of any provision of this Agreement, the parties hereby agree to cooperate in defending said action.

ARTICLE 9. GENERAL

9.1 Enforceability. The City agrees that unless this Agreement is amended or canceled pursuant to the provisions of this Agreement and the Adopting Ordinance, this Agreement shall be enforceable by any party hereto notwithstanding any change hereafter in any applicable general plan, specific plan, zoning ordinance, subdivision ordinance or building regulation adopted by City, or by initiative, which changes, alters or amends the rules, regulations and policies applicable to the development of the Property at the time of approval of this Agreement, as provided by Government Code Section 65866.

9.2 City Finding. The City hereby finds and determines that execution of this Agreement is in the best interest of the public health, safety and general welfare and is consistent with the General Plan.

9.3 Third Party Beneficiaries. This Agreement is made and entered into for the sole protection and benefit of Landowner and City and their successors and assigns, no other person shall have any right of action based upon any provision in this Agreement.

9.4 Severability. Except as set forth herein, if any term, covenant or condition of this Agreement or the application thereof to any person, entity or circumstance shall, to any extent, be invalid or unenforceable, the remainder of this Agreement, or the application of such term, covenant or condition to persons, entities or circumstances other than those as to which it is held invalid or unenforceable, shall not be affected thereby and each term, covenant or condition of this Agreement shall be valid and be enforced to the fullest extent permitted by law; provided, however, if any provision of this Agreement is determined to be invalid or unenforceable and the effect

thereof is to deprive a party hereto of an essential benefit of its bargain hereunder, then such party so deprived shall have the option to terminate this entire Agreement from and after such determination.

9.5 Construction. This Agreement shall be subject to and construed in accordance and harmony with the Roseville Municipal Code, as it may be amended, provided that such amendments do not impair the rights granted to the parties by this Agreement.

9.6 Other Necessary Acts. Each party shall execute and deliver to the other all such other further instruments and documents as may be reasonably necessary to carry out this Agreement in order to provide and secure to the other party the full and complete enjoyment of its rights and privileges hereunder.

9.7 Estoppel Certificate. Either party may, at any time, and from time to time, deliver written notice to the other party requesting such party to certify in writing that, to the knowledge of the certifying party, (i) this Agreement is in full force and effect and a binding obligation of the parties, (ii) this Agreement has not been amended or modified either orally or in writing, or if so amended, identifying the amendments, and (iii) the requesting party is not in default in the performance of its obligations under this Agreement, or if in default, to describe therein the nature of such default. The party receiving a request hereunder shall execute and return such certificate within thirty (30) days following the receipt thereof. City acknowledges that a certificate hereunder may be relied upon by transferees and mortgagees of Landowner.

9.8 Mortgagee Protection. The parties hereto agree that this Agreement shall not prevent or limit Landowner, in any manner, at Landowner's sole discretion, from encumbering the Property or any portion thereof or any improvement thereon by any mortgage, deed of trust or other security device securing financing with respect to the Property, except as limited by the provisions of this section. City acknowledges that the lenders providing such financing may require certain Agreement interpretations and modifications and agrees upon request, from time to time, to meet with Landowner and representatives of such lenders to negotiate in good faith any such request for interpretation or modification. City will not unreasonably withhold its consent to any such requested interpretation or modification provided such interpretation or modification is consistent with the intent and purposes of this Agreement. Any Mortgagee of the Property shall be entitled to the following rights and privileges:

- a. Neither entering into this Agreement nor a breach of this Agreement shall defeat, render invalid, diminish or impair the lien of any mortgage on the Property made in good faith and for value, unless otherwise required by law.

- b. The Mortgagee of any mortgage or deed of trust encumbering the Property, or any part thereof, which Mortgagee has submitted a request in writing to City in the manner specified herein for giving notices, shall be entitled to receive written notification from City of any default by Landowner in the performance of Landowner's obligations under this Agreement.
- c. If City receives a timely request from a Mortgagee requesting a copy of any notice of default given to Landowner under the terms of this Agreement, City shall provide a copy of that notice to the Mortgagee within ten (10) days of sending the notice of default to Landowner. The Mortgagee shall have the right, but not the obligation, to cure the default during the remaining cure period allowed to Landowner under this Agreement.
- d. Any Mortgagee who comes into possession of the Property, or any part thereof, by any means, whether pursuant to foreclosure of the mortgage deed of trust, or deed in lieu of such foreclosure or otherwise, shall take the Property, or part thereof, subject to the terms of this Agreement. Notwithstanding any other provision of this Agreement to the contrary, no Mortgagee shall have an obligation or duty under this Agreement to perform any of Landowner's obligations or other affirmative covenants of Landowner hereunder, or to guarantee such performance; provided, however, that to the extent that any covenant to be performed by Landowner is a condition precedent to the performance of a covenant by City, the performance thereof shall continue to be a condition precedent to City's performance hereunder, and further provided that any sale, transfer or assignment by any Mortgagee in possession shall be subject to the provisions of Article 11 of this Agreement.

ARTICLE 10. NOTICES

All notices required by this Agreement, the enabling legislation, or the procedure adopted pursuant to Government Code Section 65865, shall be in writing and delivered in person or sent by certified mail, postage prepaid.

Notice required to be given to the City shall be addressed as follows:

Development Services Director
City of Roseville
311 Vernon Street
Roseville, California 95678

Notice required to be given to the Landowner shall be addressed as follows:

Any of the parties may change the address stated herein by giving notice in writing to the other parties, and, thereafter, notices shall be addressed and delivered to the new address.

ARTICLE 11. ASSIGNMENT

From and after recordation of this Agreement against the Property, Landowner shall have the full right to assign this Agreement as to the Property, or any portion thereof, in connection with any sale, transfer or conveyance thereof, and upon the express written assignment by Landowner and assumption by the assignee of such assignment in the form attached hereto as Exhibit "DD" and the conveyance of Landowner's interest in the Property related thereto, Landowner shall be released from any further liability or obligation hereunder related to the portion of the Property so conveyed and the assignee shall be deemed to be the "Landowner", with all rights and obligations related thereto, with respect to such conveyed property.

ARTICLE 12. FORM OF AGREEMENT, EXHIBITS

This Agreement is executed in two duplicate originals, each of which is deemed

to be an original. This Agreement, inclusive of its Recitals and Exhibits, constitutes the entire understanding and agreement of the parties.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Ordinance No.____, adopted by the Council of the City of Roseville on the ____day of _____, 2016.

LEGAL DESCRIPTION

PARCEL 1

ALL THAT REAL PROPERTY SITUATED IN THE COUNTY OF PLACER, STATE OF CALIFORNIA, BEING A PORTION OF SECTION 11, TOWNSHIP 11 NORTH, RANGE 5 EAST, M.D.M. AND BEING A PORTION OF THAT REAL PROPERTY DESCRIBED IN THAT GRANT DEED TO PETER AMORUSO & JENNIFER M. AMORUSO, TRUSTEES OF THE AMORUSO FAMILY LIVING TRUST DATED MARCH 14, 2005, RECORDED AS INSTRUMENT NO. 2005-0105020, OFFICIAL RECORDS OF PLACER COUNTY, BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

COMMENCING AT THE SOUTHEAST CORNER OF SAID SECTION 11; THENCE ALONG THE EAST LINE THEREOF, NORTH 00°12'11" WEST, 880.57 FEET TO THE TRUE POINT OF BEGINNING; THENCE LEAVING SAID EAST LINE ALONG THE FOLLOWING 12 COURSES:

1. THENCE SOUTH 76°07'24" WEST, 104.21 FEET;
2. THENCE NORTH 77°38'46" WEST, 331.04 FEET;
3. THENCE TO THE LEFT, ALONG THE ARC OF A 476.00 FOOT RADIUS, NON-TANGENT CURVE, CONCAVE TO THE EAST, HAVING A RADIAL BEARING OF NORTH 80°31'50" WEST, A CENTRAL ANGLE OF 06°47'22", AND AN ARC LENGTH OF 56.40 FEET;
4. THENCE TO THE RIGHT ALONG THE ARC OF A 524.00 FOOT RADIUS, REVERSE CURVE, HAVING A CENTRAL ANGLE OF 85°05'31", AND AN ARC LENGTH OF 778.21 FEET;
5. THENCE SOUTH 87°46'19" WEST, 204.70 FEET;
6. THENCE NORTH 01°46'01" WEST, 1,554.79 FEET;
7. THENCE SOUTH 88°13'59" WEST, 773.11 FEET;
8. THENCE TO THE LEFT, ALONG THE ARC OF A 743.51 FOOT RADIUS, NON-TANGENT CURVE, CONCAVE TO THE WEST, HAVING A RADIAL BEARING OF SOUTH 86°54'36" EAST, A CENTRAL ANGLE OF 04°51'25", AND AN ARC LENGTH OF 63.03 FEET;
9. THENCE NORTH 01°46'01" WEST, 1,018.17 FEET;
10. THENCE TO LEFT, ALONG THE ARC OF A 93.88 FOOT RADIUS, NON-TANGENT CURVE, CONCAVE TO THE NORTHWEST, HAVING A RADIAL BEARING OF SOUTH 14°45'43" EAST, A CENTRAL ANGLE OF 56°11'20", AND AN ARC LENGTH OF 92.07 FEET;
11. THENCE NORTH 88°13'59" EAST, 703.80 FEET;
12. THENCE NORTH 01°46'01" WEST, 2,183.68 FEET TO THE SOUTH LINE OF SUNSET BOULEVARD WEST, COUNTY ROAD NO. (A3042) AS CONVEYED TO THE COUNTY OF PLACER BY DEED RECORDED AUGUST 18, 1966 IN BOOK 1123, AT PAGE 612, OFFICIAL RECORDS OF PLACER COUNTY; THENCE ALONG SAID SOUTH LINE, NORTH 89°21'05" EAST, 1,273.09 FEET TO A POINT ON SAID EAST LINE OF SECTION 11; THENCE ALONG SAID EAST LINE, SOUTH 00°12'11" EAST, 4,372.54 FEET TO THE TRUE POINT OF BEGINNING.

CONTAINING 148.710 ACRES, MORE OR LESS.

THE BEARINGS AND DISTANCES USED ALONG THE BOUNDARY OF THE PROPERTY DESCRIBED IN DOC. NO. 2005- 0105020 ARE NOT BASED UPON A FIELD SURVEY AS DESCRIBED IN L.S. ACT SECTION 8762. THEY DO NOT ESTABLISH THE BOUNDARY OF SAID PROPERTY AND ARE INCLUDED TO ASSIST IN LOCATING THE NEW BOUNDARY APPROVED BY MINOR BOUNDARY LINE ADJUSTMENT NO. PLN15-00351 ONLY.

INTRODUCTION

The Amoruso Ranch Specific Plan (ARSP) Area Water Conservation Plan (Plan) has been prepared at the request of Brookfield Residential Properties, Inc. (Brookfield) to meet the City of Roseville's (City) requirements and in support of the ARSP process.

WATER CONSERVATION PLAN PURPOSE

In February 2008, then California Governor Arnold Schwarzenegger introduced a seven-part comprehensive plan for improving the Sacramento-San Joaquin Delta. As part of this effort, the Governor directed state agencies to develop a plan to reduce statewide per capita urban water use by 20 percent by the year 2020. In February 2010, the State Water Resources Control Board issued the 20x2020 Water Conservation Plan.

As part of the response to the 20x2020 Plan, the City has a requirement that all new specific plan projects incorporate water conservation measures into the overall project design such that the overall water demands (both potable and recycled) are reduced. The City has an overall conservation goal of 20% for potable and irrigation water usage throughout the City.

This Plan presents potentially feasible measures and guidance that can result in a reduction of the projected overall water usage within the ARSP Area, which will contribute towards the City-wide conservation goal. The projected reduction in water use will be established as part of this Plan through a process of: estimating the baseline water demands without conservation measures; identification of potentially feasible conservation measures; and estimation of the resultant water demands with application of the identified conservation measures. This Plan has been developed in conformance with the Water Efficient Landscape Ordinance (WELO) as a minimum.

ARSP AREA LOCATION AND DESCRIPTION

Project Vicinity

The ARSP Area consists of approximately 694.4 acres located in the northwest edge for the City of Roseville. Prior to the Specific Plan's adoption, the plan area was recognized as a logical growth extension for the City. The Specific Plan Area is bounded on the southwest by the Al Johnson Wildlife Area, to the west by the Gleason property, to the south by the Creekview Specific Plan Area, to the east by the future proposed Placer Ranch Specific Plan Area and to the north by the existing Toad Hills Ranches #1 area and unincorporated Placer County. The project vicinity is shown on Figure 1.

Figure 1 – ARSP Area Project Vicinity

Pre-Development Conditions

The pre-development conditions of the ARSP Area were as a cattle ranch and for irrigated crops. The primary use was open grazing land, but included a small ranch house and out buildings. The land is gently rolling terrain generally trending to the west and south. Minor drainages flow in a radial pattern from a slight rise in the northeast quadrant of the property. The elevation changes from approximately 115 feet to 71 feet gently from the northeast down to the southwest.

The site vegetation is generally limited to short, seasonal grasses. There are several oak trees located along University Creek and a number of non-native trees located around the former ranch house. Wetland conditions and their associated flora and fauna are located in small areas typically along the drainage corridors and in flats along the southern boundary. Figure 2 highlights the ARSP Area pre-development conditions.

Figure 2 – ARSP Area Pre-Development Conditions

ARSP Area Development Opportunities and Constraints

The proposed ARSP Area land use plan is influenced by several factors, including the physical setting, land use and circulation conditions, and public policies. Two significant aspects that influence the development of the land plan are described below and depicted on Figure 3.

Placer Parkway

The proposed Placer Parkway will be a dominant feature that sweeps through the ARSP Area. Interchanges at Fiddymment Road and Santucci Boulevard will provide access to the ARSP Area.

Open Space and Resources Preservation

The ARSP Area will support open space and resource preservation by providing permanent open space. In combination with the 1,700-acre open space afforded by the City of Roseville Al Johnson Wildlife Area, this open space provides connectivity with open space within the Creekview Specific Plan Area, and lands to the east of the ARSP Area.

The Amoruso Ranch Specific Plan will provide an open space corridor that includes a pedestrian and bike path linkage between this major open space area and the City's regional trail system. In addition, the corridor will provide a permanent preservation area for wetland resources.

Figure 3 – ARSP Area Opportunities and Constraints

ARSP Area Land Use Plan

The ARSP Area provides for a mix of land uses to achieve the desired community form and objectives. These land use designations include low-, medium- and high density residential uses; commercial and office uses; which in some cases are sited with one another and/or with residential uses, public and quasi-public uses for the schools and civic activities such as a fire station, parks and open space uses, and an urban reserve.

At buildout, the ARSP Area will provide for 2,827 dwelling units, it adds approximately 51 acres of commercial retail and office land uses, and provides approximately 22-acres of parks and 146-acres of open space. The ARSP Area Land Use Plan is shown in Figure 4.

- LOW DENSITY RESIDENTIAL (LDR) (0.5-6.9 D.U./AC)
- MEDIUM DENSITY RESIDENTIAL (MDR) (7.0-12.9 D.U./AC)
- HIGH DENSITY RESIDENTIAL (HDR) (13.0-30.0 D.U./AC)
- COMMUNITY COMMERCIAL (CC)
- PUBLIC/QUASI PUBLIC (P/QP)
- PARKS AND RECREATION (P/R)
- OPEN SPACE (OS)
- (PRESERVED OPEN SPACE/GENERAL OPEN SPACE)
- URBAN RESERVE (UR)
- MISC. ROADS
- NAPOTS (NOT A PART OF THIS SUBDIVISION)

Figure 4 – ARSP Area Land Use Plan

BASELINE WATER USE ESTIMATION

The calculation of the baseline water use estimation was established based on the land use designations developed as part of the ARSP Area Land Use Plan shown on Figure 4.

The baseline water use for the project was established using the City's standard water use factors, as developed for the City by MWH in 2006. The City of Roseville employs standard demand factors for residential land uses of varying densities, as well as standard demand factors for commercial/other land uses. The residential demands are presented as gallons per day (GPD) per dwelling unit (DU), and the commercial/other demands are presented as GPD per acre. The City's demand factors are listed in Table 1.

HDR2: > 16 DU / Acre	760	177	134,520	150.7	153.7
Community Commercial - Village Center – Residential	109	288	31,392	35.2	35.9
Urban Reserve	1	728	728	0.8	0.8
Total	2,827	-	1,037,920	1,162.6	1,185.9

The water use estimation, as established by the City for purposes of water conservation does not distinguish between potable water and recycled water. Table 3 includes a summary of the estimated baseline water demands. Consistent with previous similar analyses completed by the City, a factor for water system losses has not been included in the water conservation calculations. It has, however, been included for informational purposes in both Tables 2 and 3.

¹ Demand accounts for 2% system losses.

Table 3

¹ Demand accounts for 2% system losses.

SINGLE FAMILY RESIDENTIAL WATER USE DISTRIBUTION

Single family residential water use for land use designations for Low-, Medium- and High-Density (LDR, MDR and HDR) parcels can be further divided by the use within the home and the landscape irrigation demands outside of the home.

Table 4 represents the typical single family residential water usage that would be attributable to residential units within the land use designation of LDR and MDR. The percentage of total use will have a different distribution for HDR primarily attributable to the reduction in irrigated landscaped area.

Table 4
Amoruso Ranch Specific Plan
Water Conservation Plan
Single Family Residential Water Usage

Residential Use	Percentage of Total¹
Landscaping	51%
Toilets	13%
Faucets, Cooking, Cleaning	10%
Showers	9%
Clothes Washing	8%
Bath	6%
Toilet Leaks	2%
Dishwasher	1%

Based on historic data the typical split between backyard and front yard irrigation of typical LDR and MDR parcels is approximately sixty-forty, with 60% of the landscape irrigation demand attributable to the backyard and 40% of the landscape irrigation attributable to the front yard. This is the result of typically smaller front yards than backyards along with less

¹ Percentage of total water use was derived from information obtained from the City of Roseville Frequently Asked Questions (FAQ) on the subject of water conservation.

landscape area in the front yard due to driveways and walks. Utilizing this ratio of front yard to backyard irrigation use, results in a further breakdown of the 51% total water use to 20.4% for the front yards and 30.6% for the backyards. The separation of front yard and backyard irrigation demands for LDR and MDR parcels allows analysis and application of different conservation measures between the two distinct areas.

The HDR units typically do not have front yard and backyard irrigation demand; however, there are common area irrigation demands that are attributable to HDR units. Average planning numbers for irrigation demands for HDR units is 20% of the estimated overall water usage. This value is expressed as 20% of the annual irrigation demand and not based on designation of demands split between front and back yard area designations. Table 5 presents a summary of demands based on the assumptions listed above.

Table 5
Amoruso Ranch Specific Plan
Water Conservation Plan
Residential Irrigation Water Demands

Land Use	Annual Demand (AFY)	Annual Demand Front Yard (AFY)	Annual Demand Backyard (AFY)	Annual Total Irrigation Demand (AFY)
Low Density Residential	739.5	150.86	226.29	377.15
Medium Density Residential	200.0	40.80	61.20	102.00
High Density Residential ¹	187.1	N/A	N/A	37.42
Urban Reserve	0.8	0.16	0.24	0.40
Total	1,127.4	191.82	287.73	516.97

¹ Demand for HDR parcels was calculated differently from LDR and MDR parcels, as described above. Demand for HDR parcels was not separated into front yard and backyard demand since traditional front and back yards are not present on HDR parcels.

WATER USE REDUCTION STRATEGIES

A series of implementable water use reduction strategies have been identified for the ARSP Area. These strategies are discussed in more detail in the following subsections of this document, including the estimated percentage of water use reduction.

The water use reduction strategies identified for the ARSP Area include:

- Reduction of Residential Turf Areas
- Reduction of Park and Recreation and Common Area Turf (Non-Residential)
- Irrigation Management
- Water Conservation Methods

REDUCTION OF RESIDENTIAL TURF AREAS

As represented in the previous sections and tables, turf areas account for a significant portion of the water demand of the residential development. In turn, this correlates to one of the greatest opportunities to reduce the projected water demands. The ARSP project will adopt a strategy to encourage the new residential developments to reduce the magnitude of front yard turf areas and plant these areas with vegetation that uses far less water.

The City of Roseville estimates that for a same sized area of turf, in comparison to utilization of low-water consumption vegetation, could result in a savings of up to 70% in the amount of water required. Therefore, 30% of the amount of water would be required for the low consumption vegetation as compared to the lawn area's water demand.

Low water consumption vegetation, benefits not only from the reduced requirement for uptake by the plants, it also benefits from more efficient landscape irrigation systems. Low water consumption vegetation is typically irrigated by drip systems, as opposed to overhead spray systems for lawn and turf areas.

Typical front yard landscaping generally ranges between 75% and 85% irrigated area. For purposes of this analysis, the low-point of 75% irrigated area has been selected with 70% being lawn area and the remaining irrigated area being lower water using plants and planters.

It is reasonable to reduce irrigated lawn areas from 70% of the typical front yard for LDR and MDR, as well as reduce the common area lawns on HDR, to 42%. This results in an increase of low water consumption vegetation from 5% to 33%. An example of the potential reductions in turf area is shown in Figure 5. The comparisons of water demands for irrigation are shown in Table 6.

Figure 5 – Front Yard Water Conservation Comparison

Table 6
Amoruso Ranch Specific Plan
Water Conservation Plan
Reduced Landscape Turf Area

Land Use	Front Yard Irrigated Area ¹	Base Condition		Base Condition with Water Conservation	
		Turf Area	Low Water Use Area	Turf Area	Low Water Use Area ²
LDR, MDR and HDR ³	75%	70%	5%	42%	33%

Table 7 is a comparison of the water use efficiencies that result from reduction in front yard turf areas. Since assumptions are based on similar reductions in turf areas for LDR, MDR and HDR product types, the water demands have been combined for presentation.

Table 7
Amoruso Ranch Specific Plan
Water Conservation Plan
Front Yard Irrigated Area Water Efficiencies

Land Use	Annual Demand Front Yard (AFY) ⁴	New Front Yard Demand (AFY)	Annual Demand Savings (AFY)	Annual Demand Savings (%)	Water System Savings
Residential Properties LDR and MDR	191.82	139.24	52.58	27.4%	Potable
HDR	37.42	27.16	10.26	27.4%	Recycled
Total	229.24	166.40	62.84	27.4%	

As an example of how these values were calculated, the calculation for the annual front yard turf demand and the reduced annual front yard demand is presented below.

For the annual front yard turf demand, as calculated for low and medium density residential land uses, 75% of the front yard is landscaped with 70% turf and 5% low water use plantings. Since low water use plantings use 30% of the water required for turf, this 5%

¹ As a percentage of the front yard.

² Includes 5% existing low water use plantings plus 28% new low water use plantings.

³ Represents the percentage of the entire exterior area for HDR.

⁴ Front yard demand from Table 5. HDR is total since there is not a distinction between front and back yards.

area is equal to 1.5% turf area water demand. This results in the following annual front yard demands:

Turf (LDR & MDR):

$$191.82 \text{ AFY} * \left(\frac{70\%}{71.5\%} \right) = 187.80 \text{ AFY}$$

Low Water Use (LDR & MDR):

$$191.82 \text{ AFY} * \left(\frac{1.5\%}{71.5\%} \right) = 4.02 \text{ AFY}$$

For the reduced annual front yard demand, as calculated for low and medium density residential uses, reducing the base turf area in the front yards from 70% to 42% and replacing that (equivalent to 28%) with low water use plantings resulted in the following annual demands:

Reduced Demand Equation (LDR & MDR):

$$187.80 \text{ AFY} * \left(\frac{42\%}{70\%} + \frac{28\% * 30\%}{70\%} \right) + 4.02 \text{ AFY} = 139.24 \text{ AFY}$$

The same equations were generated for the HDR parcels as follows:

Turf (HDR):

$$37.42 \text{ AFY} * \left(\frac{70\%}{71.5\%} \right) = 36.63 \text{ AFY}$$

Low Water Use (HDR):

$$37.42 \text{ AFY} * \left(\frac{1.5\%}{71.5\%} \right) = 0.79 \text{ AFY}$$

Reduced Demand Equation (HDR):

$$36.63 \text{ AFY} * \left(\frac{42\%}{70\%} + \frac{28\% * 30\%}{70\%} \right) + 0.79 \text{ AFY} = 27.16 \text{ AFY}$$

REDUCTION OF PARK AND RECREATION AND COMMON AREA TURF (NON-RESIDENTIAL)

In addition to the turf areas for residential properties there are additional and significant turf areas throughout a typical development. These areas include the parks, irrigated paseos, commercial centers and school play fields. The estimated turf irrigation demand at each of these uses is as follows:

- It is estimated that parks utilize approximately 98% of their water demand for irrigation and 80% of their irrigated area for turf. This area is assumed to be reduced to 60% with the conversion of turf area (20%) to low water consumption vegetation or other uses.
- For the Roseville area, low water plantings were assumed to use 30% of the water used on turf (a 70% water savings).
- Low water use areas will utilize low volume irrigation systems like a drip or spray system (such as Netafim) designed to achieve a uniformity of 90% rather than an overhead spray irrigation system.
- Paseos are estimated to utilize 100% of their water demand for landscape irrigation. 80% of the paseo area is irrigated turf area. This area is assumed to be reduced to 60% with the conversion of turf area (20%) to low water consumption vegetation or other uses.

Based on these assumptions the water use efficiencies for the parks and paseos have been calculated and are presented in Table 8.

Table 8
Amoruso Ranch Specific Plan
Water Conservation Plan
Non-Residential Irrigated Area Water Efficiencies

Land Use	Annual Water Demand (AFY) ¹	Annual Irrigation Demand (AFY)	Base Turf Area	New Turf Area	Low Water Use Area	New Irrigation Demand (AFY)	Annual Demand Savings (AFY)	Annual Demand Savings (%)	Water System Savings
Park	4.3	4.21	80%	60%	20%	3.48	0.73	17.3%	Potable
Parks	69.8	68.40	80%	60%	20%	56.43	11.97	17.5%	Recycled
Paseos	4.8	4.80	80%	60%	20%	3.96	0.84	17.5%	Potable
Paseos	31.0	31.00	80%	60%	20%	25.58	5.42	17.5%	Recycled
Total	109.9	108.41				89.45	18.96	17.5%	

The new irrigation demand for the Parks is calculated as follows:

$$\frac{68.40 \text{ AFY} * 60\%}{80\%} = 51.30 \text{ AFY}$$

Demand remaining after turf reduction:

$$68.40 \text{ AFY} - 51.30 \text{ AFY} = 17.10 \text{ AFY}$$

Low water plants use 30% of turf demand:

$$17.10 \text{ AFY} * 30\% = 5.13 \text{ AFY}$$

New irrigation demand:

$$51.30 \text{ AFY} + 5.13 \text{ AFY} = 56.43 \text{ AFY}$$

Similarly the new irrigation demand for the Paseos is calculated as follows:

$$\frac{31.00 \text{ AFY} * 60\%}{80\%} = 23.25 \text{ AFY}$$

¹Annual water demand derived from Table 3.

Demand remaining after turf reduction:

$$31.00 \text{ AFY} - 23.25 \text{ AFY} = 7.75 \text{ AFY}$$

Low water plants use 30% of turf demand:

$$7.75 \text{ AFY} * 30\% = 2.33 \text{ AFY}$$

New irrigation demand:

$$23.25 \text{ AFY} + 2.33 \text{ AFY} = 25.58 \text{ AFY}$$

IRRIGATION MANAGEMENT

Smart and centrally located irrigation controllers restrict irrigation to times and rates necessary to maintain landscaping. They account for changes in the demand for water, which varies with weather patterns, seasonal influences and soil moisture content. In the ARSP, smart irrigation controllers, as defined in WELO, will be required for residential, commercial, and quasi-public parcels subject to turf reduction measures, and centrally controlled irrigation controllers for larger commercial and publicly maintained parcels.

As referenced in previous studies for the City of Roseville, a number of studies have been completed specifically on the conversion to smart irrigation controllers and the resultant water savings. Those studies suggest that water use reductions can be expected between 7% and 41%. This is a wide range of variability. Since ARSP is an entirely new development all significant irrigation applications will employ the use of smart irrigation controllers (per WELO). Therefore, a water use reduction value of 20% has been estimated for purposes of this analysis, consistent with previous analyses completed for similar developments within the City of Roseville. The sample calculation is presented below and the values are summarized in Table 9.

Smart Irrigation Equation:

$$139.24 \text{ AFY} * (80\%) = 111.39 \text{ AFY}$$

Table 9
Amoruso Ranch Specific Plan
Water Conservation Plan
Smart Irrigation Controller Water Efficiencies

Land Use	Annual Irrigation Demand (AFY)	New Irrigation Demand w/Controller (AFY)	Annual Demand Savings (AFY)	Annual Demand Savings (%)	Water System Savings
Residential Properties (Front) ¹	139.24	111.39	27.85	20%	Potable
Residential Properties (Back) ²	287.73	230.18	57.55	20%	Potable
Residential Properties (HDR) ³	27.16	21.73	5.43	20%	Recycled
Parks ⁴	3.48	2.78	0.70	20%	Potable
Parks ⁵	56.43	45.14	11.29	20%	Recycled
Paseos ⁶	3.96	3.17	0.79	20%	Potable
Paseos ⁷	25.58	20.46	5.12	20%	Recycled
Total	543.58	434.85	108.73	20%	

WATER CONSERVATION METHODS

There are many water conservation measures that can be implemented throughout the ARSP project. The reality is that a majority of the typical water conservation measures are already required or anticipated to be included in any new projects. These include low flow toilets, low flow shower heads, faucet aerators, etc.

One additional water conservation measure that will be considered for the ARSP project is the inclusion of recirculating hot water systems. Recirculating hot water systems feature a pump on a residential hot water line system which reduces the time necessary to receive hot water at any hot water faucet throughout the home. They provide hot water at the tap

¹ Annual irrigation demand derived from Table 7.

² Annual irrigation demand derived from Table 5.

³ Annual irrigation demand derived from Table 7.

⁴ Annual irrigation demand derived from Table 8.

⁵ Annual irrigation demand derived from Table 8.

⁶ Annual irrigation demand derived from Table 8.

⁷ Annual irrigation demand derived from Table 8.

immediately upon engaging the hot water faucet, eliminating the waste of water as you wait for the water to transition from the cold water in the pipes to hot water. This type of system can be included on all residential units to generate additional water conservation. The amount of water savings with these systems varies based on the number of times hot water is utilized throughout the day. A typical conservative estimate indicates a water savings of approximately 1.25 gallons per use is saved by having “instant” hot water from the recirculation system. We have estimated that on average this would occur six times per day per residential unit, consistent with previous studies for the City of Roseville.

Re-Circulating Hot Water Equation:

$$2,827 \text{ DU} * 7.5 \frac{\text{gal}}{\text{day}} * \frac{\text{AF}}{325851 \text{ gal}} * 365 \text{ day/yr} = 23.75 \text{ AFY}$$

The estimated savings based on the installation of recirculating hot water systems is shown in Table 10.

Table 10
Amoruso Ranch Specific Plan
Water Conservation Plan
Recirculating Hot Water System Water Efficiencies

Land Use	Dwelling Unit Count	Savings per Dwelling Unit (Gal)	Annual Demand Savings (AFY)	Annual Demand Savings (%)	Water System Savings
Residential Units	2,827	7.5	23.75	1.6%	Potable

SUMMARY

A series of water conservation methods have been proposed for implementation as part of the ARSP project. These methods are readily implemented and are consistent with the goals and objectives of the Amoruso Ranch Specific Plan and the City of Roseville.

Table 11 provides a summary of the water conservation measures and their estimated savings in water use. As shown on Table 11, with implementation of all of the measures an estimated conservation of 14.5% of the projected water use would be realized within the ARSP Area.

Table 11
Amoruso Ranch Specific Plan
Water Conservation Plan
Summary of Water Efficiencies

Water Conservation Opportunity	Total Water Demand (AFY)	Potable Water Savings (AFY)	Recycled Water Savings (AFY)	Annual Demand Savings (AFY)	Annual Demand Savings (%)
Residential Properties Irrigation – Front ¹	1,473.7	52.58	10.26	62.84	4.3%
Non-Residential (Parks, ROW, School) ²		1.57	17.39	18.96	1.3%
Smart Irrigation Controllers ³		86.89	21.84	108.73	7.4%
Recirculating Hot Water System ⁴		23.75	0	23.75	1.6%
Total		164.79	49.49	214.28	14.5%

The actual water conservation savings will be dependent on a number of factors including the participation and adherence by the actual homeowners. Constructing the residential units with a number of these measures already integrated (such as the hot water recirculation systems) will be beneficial to achieving the objective.

For the single family residential land uses there is anticipated to be ongoing outreach by the City to remind and reinforce the need for water conservation. This can include attachments to the water bill, water audits that can be made available to homeowners, the promotion of the City’s water conservation website, and the availability of City water conservation staff to respond to specific questions. In addition, outreach can include educating homeowners on how to use and set up smart irrigation controllers along with including the installation and integration into their backyard irrigation system.

Guidance and education for the homeowners with regards to the landscaping of front and backyards will also be part of the overall plan including education in conformance with WELO.

¹ Annual demand savings derived from Table 7.

² Annual demand savings derived from Table 8.

³ Annual demand savings derived from Table 9.

⁴ Annual demand savings derived from Table 10.

I. Introduction

Purpose of Report

This Parks Financing Plan was prepared for the Amoruso Ranch Specific Plan (“Project”) by Development Planning and Financing Group, Inc. (“DPFG”) as a strategy to fund and maintain the parks, bike trails, and paseos that are proposed in the Project. This document is an expansion of the Amoruso Ranch Public Facilities Financing Plan, and provides additional details regarding the costs and funding of neighborhood parks, citywide parks, bike trails, and paseos. The findings will provide a clear understanding of how the parks plan is feasible, the funding structure, and overall costs associated with the Project.

II. Amoruso Ranch Specific Plan

Parks and Open Space

The City of Roseville’s Parks and Recreation Master Plan requires a ratio of 9 acres of parkland per 1,000 residents. The 9 acres of parkland includes; 3 acres/1,000 residents for neighborhood parks, 3 acres/1,000 residents for citywide parks, and 3 acres/1,000 residents for open space.

The parks program developed for Amoruso Ranch includes 157 acres of parkland on-site, including open space. The Project meets the neighborhood park and open space dedication requirement with at least 22.14 acres of each, but does not provide a citywide park. The project will pay a Citywide Park Fee which includes funding for park improvements and land (through an in-lieu calculation). Through the Citywide Park Fee, Amoruso Ranch will contribute its fair share to the creation of other planned facilities in the City. **Table 1** shows the required park acreage under the City’s current Master Plan and project population assumptions. The developer is responsible for the budgeted park costs and the developer or City will be responsible for the construction of all the parks.

Seven neighborhood parks have been distributed throughout the Project. **Map 1** shows the location of all the neighborhood parks in the Amoruso Ranch project.

Bike Trails and Paseos

The bike trails and paseos planned within the Project are mainly located along roadways. Bike trails take the form of Class 1, Class 1A, Class 2, and Class 3. Only the Class 1 bike trails are located away from a roadway, and this bike trail class occurs on the south western portion of the Project and along Westbrook Boulevard through the southern open space. The paseos are expanded areas in addition to the normal landscaping along roadways. **Map 1** illustrates the paseos, while **Map 2** shows the bike trails.

III. Neighborhood Park Improvements

Facility Costs

Table 2 shows the total estimated neighborhood park facility costs. The parks program costs are estimated at roughly \$7.1 million. The cost of the parks and recreation facilities include, but are not limited to, the following types of facilities:

- Landscaping
- Restrooms
- Parking
- Recreational fields
- Playgrounds
- Picnic areas

Detailed park improvements and costs are provided by The Collaborative West, and are attached as **Appendix A**.

Phasing

The development of Phase 1 would have park improvements that correspond to the amount of initial residential development. These improvements include five neighborhood parks at a size of 1.72 acres, 1.87 acres, 2.12 acres, 2.0 acres, and 3.04 acres, for a total of 10.75 acres. The estimated facilities cost for the park improvements for Phase 1 is approximately \$3.9 million.

Funding Strategy – Existing Fee Programs

The neighborhood park impact fee funds the neighborhood park improvements in Amoruso Ranch. **Table 3** creates an updated fee for the Project by allocating the total neighborhood park improvement costs on a per residential unit basis. The costs were spread to the different residential land uses based on the persons per household that vary by unit size, using the same methodology as previous specific plans. This was done to create a tiered rate so that an HDR unit is not paying the same amount as an LDR unit.

Table 4 shows the neighborhood park impact fee revenues for Phase 1 and Build out.

IV. Citywide Park Improvements

The Citywide Park Improvement Fee funds the Project's fair share of the construction costs of a citywide park and the Citywide Park Land In-Lieu Fee will provide funding for the purchase of land that was not provided on site for a citywide park.

Facility Costs

Table 5 shows the total facility improvement costs and estimated in-lieu land costs. The Project's share of the citywide facilities costs are calculated by using the current Citywide Park Fee. The base fee for citywide park development is \$2,111. A credit of \$657 has been applied making the citywide park fee for ARSP \$1,454 per unit.

Land Component

The Citywide Park land in-lieu was calculated using the acreage requirement determined in **Table 1**, multiplied by the land appraisal value of \$135,000 per acre. This is the same value used in previous specific plans. A total in-lieu estimate of \$2,988,900 was calculated for the ARSP. The land in-lieu fee per unit for citywide is \$1,058 per unit.

Summary

The total citywide park improvement fee for facility costs and land in-lieu is \$2,512 per unit.

The Citywide Park funds will be used to purchase land and/or build citywide park facilities in other locations throughout the City. Amoruso Ranch is currently not planned for citywide facilities to be built within the plan area.

Funding Strategy - Existing Fee Programs

The Citywide Park fee will fund the citywide park facilities throughout the City, and the in-lieu component will fund future land acquisitions or additional construction. **Table 6** creates the Citywide Park fee for the Amoruso Ranch project by allocating the total costs (construction and in-lieu) on a per residential unit. The costs were spread to the different residential land uses based on the persons per household that vary by unit size, using the same methodology as previous specific plans. This was done to create a tiered rate so that an HDR unit is not paying the same amount as an LDR unit.

Table 7 shows the citywide park fee revenues for Phase 1 and Build out.

V. Bike Trail Improvements

In the Amoruso Ranch project the Class 1 bike trail system is integrated with open space along the south west corner of the development and along Westbrook Boulevard in the open space on the south end of the development. **Map 2** illustrates the proposed bike trails in the project. The Class 1 bike trail system along with the other bike trails incorporated with the roadways (Class 1A, 2, and 3) are all included in the roadway backbone infrastructure costs outlined in the Amoruso Ranch Public Facilities Financing Plan. The developer will build these improvements as required, and as development progresses.

Phasing

The development of the Class 1 bike trail will occur entirely with the Phase 1 development.

Funding Strategy – Developer Built

The bike trail facilities will be built by the developer, without the formation of a fee program. These improvements will be an eligible facility to be funded and/or reimbursed by the project CFD when formed.

VI. Paseo Improvements

The paseos in Amoruso Ranch run along some segments of collector roadways. Paseos are expanded areas, in addition to landscape corridors with grass, trees, landscaping, and contain no facilities. **Map 1** illustrates the proposed layout of the paseos in the project. All of the paseo costs are included in the roadway backbone infrastructure costs outlined in the Amoruso Ranch Public Facilities Financing Plan. The developer will build these improvements as required, and as development progresses.

Phasing

The development of Phase 1 includes paseo improvements within the residential area on Road “E”, “F”, and Road “A”, while the remaining improvements will be built in Phase 2 and 3 along Roads “F”, “G”, “E”, and “D”.

Funding Strategy – Developer Built

The paseo facilities will be built by the developer, without the formation of a fee program. These improvements will be an eligible facility to be funded and/or reimbursed by the project CFD when formed.

VII. Community Facilities District for Maintenance

The Developer will form a CFD for maintenance to finance the cost of operating and maintaining streets, landscaping, open space, parks, trails, paseos and storm water in the Project. A Rate and Method of Apportionment will be required in establishing a method of tax, a maximum special tax amount, and any escalation factors that will be implemented to allow the annual special tax to keep pace with inflation. **Table 8** details the quantities and cost assumptions to be used in the formation of the CFD with the exception of open space related items, while **Table 9** allocates the costs across the various product types to estimate the special tax amount. An updated Property Analysis Record (“PAR”) will be required prior to CFD formation and based on 404 permit conditions, an inventory of all environmentally sensitive/protected areas within the open space, approved improvements, any mitigation requirements, final drainage channel design, vehicular access for maintenance, ultimate width of transition area, all ARSP specific permits, and other requirements/improvements outlined in the Overarching Open Space Management Plan and consistent with state/federal permits.

The maintenance CFD does not include the 645.5 acres of off-site open space. These parcels will be either conveyed to the City, pending agreed upon parameters for acceptance or deeded to a third party entity. If the City accepts these parcels, landowner shall annex these sites into the CFD for maintenance prior to formation. A PAR analysis for the cost of service shall be prepared prior to annexation.

Cost Allocated to Use		\$3,776,051.65	\$1,342,926.51	\$1,794,237.69	\$224,022.80	-	-
Neighborhood Parks Allocation per Unit/Sq.Ft.		\$2,900.19	\$2,477.72	\$2,055.26	\$2,055.26	-	-

Footnotes:

¹The persons per household ("PPH") use factor assumed here, matches the average PPH of the City with an LDR unit. To create a tiered fee, the assumed PPH for the MDR and HDR land uses are then shown at a reduced amount. This methodology is consistent with what was done in the prior SVSP and CSP. The prior specific plans used an average PPH of 2.54, and thus land uses were assigned a PPH of 2.54 (LDR), 2.17 (MDR), and 1.8 (HDR). The updated factors assume the same percentage allocation of costs by land use as the prior specific plans, by using a PPH of 2.61 (LDR), 2.23 (MDR), and 1.85 (HDR).

Source: City of Roseville, ECORP, and Kimley Horn.

Footnotes:

¹Cost estimates derived from indepth analysis of City costs done for SVSP. Those costs have then been applied to all specific plans since.

²1/3 of streetsweeping miles.

³The Cost per Unit for Open Space placeholder of \$575 per year was derived by simply averaging the City's proposed annual open space cost per acre of \$1,000 and the Developer proposed annual open space cost per acre of \$150. The actual annual open space cost per acre will be determined at the time of the formation of the maintenance CFD for this project as outlined in the Development Agreement. The ultimate cost per acre could be above or below the aforementioned range, depending upon the 404 permit conditions, an inventory of all environmentally sensitive/protected areas within the open space, approved improvements, any mitigation requirements, vehicular access for maintenance, final drainage channel design, ultimate width of transition area, all ARSP specific permits, other improvements outlined in the Overarching Open Space Management Plan, state and federal permits, and established city maintenance standards.

⁴Includes developed and undeveloped.

Infrastructure Reimbursement Schedule

Roadway Improvements:

1. Construct roadway (Westbrook Boulevard) between C-51 and C-52 (R1, on Exhibit H-1) within the Creekview Specific Plan.
 - a. Construction Responsibility: Amoruso
 - b. Cost Sharing: City CIP

Wastewater Improvements:

1. Construct 18-inch sewer line (WW1, on Exhibit K-1) and appurtenances (390± LF) in Westbrook and Blue Oaks Boulevards.
 - a. Construction Responsibility: Creekview
 - b. Cost Sharing: Amoruso and Creekview
2. Construct 18-inch sewer line (WW2, on Exhibit K-1) and appurtenances (Per WRSP DA) in Westbrook Boulevard.
 - a. Construction Responsibility: WRSP
 - b. Cost Sharing: Amoruso and Creekview
3. Construct 24-inch sewer line (WW3, on Exhibit K-1) and appurtenances (Per WRSP DA) in Phillip Road.
 - a. Construction Responsibility: WRSP
 - b. Cost Sharing: Amoruso and Creekview

Water Improvements:

1. Construct 24-inch water line (DW1, on Exhibit O-2) and appurtenances (1,210± LF) in Westbrook Boulevard.
 - a. Construction Responsibility: Creekview
 - b. Cost Sharing: Amoruso and Creekview
2. Construct 24-inch water line (DW2, on Exhibit O-2) and appurtenances (2,790± LF) in Westbrook Boulevard.
 - a. Construction Responsibility: Creekview
 - b. Cost Sharing: Amoruso and Creekview

3. Construct 24-inch water line (DW3, on Exhibit O-2) and appurtenances (2,390± LF) in Blue Oaks Boulevard.
 - a. Construction Responsibility: Creekview
 - b. Cost Sharing: Amoruso, Creekview, WRSP, and Other 3rd Parties
4. Construct 24-inch water line (DW4, on Exhibit O-2) and appurtenances (Per WRSP DA) in West Park Drive.
 - c. Construction Responsibility: WRSP
 - d. Cost Sharing: Amoruso, Creekview, WRSP, and Other 3rd Parties
5. Construct 24-inch water line (DW5, on Exhibit O-1) and appurtenances (1,610± LF) in Road "D".
 - a. Construction Responsibility: Amoruso
 - b. Cost Sharing: Amoruso and Other 3rd Party
6. Construct 24-inch water line (DW6, on Exhibit O-1) and appurtenances (1,280± LF) in Road "B".
 - e. Construction Responsibility: Amoruso
 - f. Cost Sharing: Amoruso and Other 3rd Party

Recycled Water Improvements:

1. Construct 12-inch recycled water line (RW1, on Exhibit Q-1) and appurtenances (1,210± LF) in Westbrook Boulevard.
 - a. Construction Responsibility: Creekview
 - b. Cost Sharing: Amoruso and Creekview
2. Construct 16-inch recycled water line (RW2, on Exhibit Q-1) and appurtenances (2,820± LF) in Westbrook and Blue Oaks Boulevard.
 - a. Construction Responsibility: Creekview
 - b. Cost Sharing: Amoruso and Creekview
3. Construct 24-inch recycled water line (RW3, on Exhibit Q-1) and appurtenances (2,400± LF) in Blue Oaks Boulevard.
 - c. Construction Responsibility: Creekview
 - d. Cost Sharing: Amoruso , Creekview, WRSP and Other 3rd Parties

4. Construct 24-inch recycled water line (RW4, on Exhibit Q-1) and appurtenances (Per WRSP DA) in West Park Drive.
 - e. Construction Responsibility: WRSP
 - f. Cost Sharing: Amoruso , Creekview, WRSP and Other 3rd Parties

ASSIGNMENT AND ASSUMPTION AGREEMENT
RELATIVE TO THE
AMORUSO RANCH SPECIFIC PLAN DEVELOPMENT AGREEMENT
[BROOKFIELD SUNSET, LLC]

THIS ASSIGNMENT AND ASSUMPTION AGREEMENT (hereinafter, the "Agreement") is entered into this ____ day of _____, 20__, by and between _____, a _____ (hereinafter "Landowner"), and _____, a _____ (hereinafter "Assignee").

RECITALS

A. On _____, 2016, the City of Roseville and Landowner entered into that certain agreement entitled "Development Agreement By and Between The City of Roseville, Brookfield Sunset, LLC, and Jennifer M. Amoruso, Successor Trustee of the Amoruso Family Living Trust Dated March 14, 2005 (hereinafter the "Development Agreement"). Pursuant to the Development Agreement, Landowner agreed to develop certain property more particularly described in the Development Agreement (hereinafter, the "Subject Property"), subject to certain conditions and obligations as set forth in the Development Agreement. The Development Agreement was recorded against the Subject Property in the Official Records of Placer County on _____, 2016 [Instrument No. _____].

B. Landowner intends to convey a portion of the Subject Property to Assignee, commonly referred to as Parcel _____, and more particularly identified and described in Exhibit A, attached hereto and incorporated herein by this reference (hereinafter the "Assigned Parcel"), or all of the Subject Property, as defined in the Development Agreement.

C. Landowner desires to assign and Assignee desires to assume all of Landowner's right, title, interest, burdens and obligations under the Development Agreement with respect to and as related to the Assigned Parcel.

ASSIGNMENT AND ASSUMPTION

NOW, THEREFORE, Landowner and Assignee hereby agree as follows:

1. Landowner hereby assigns, effective as of Landowner conveyance of the Assigned Parcel to Assignee, all of the rights, title, interest, burdens and obligations of Landowner under the Development Agreement with respect to the Assigned Parcel. Landowner retains all the rights, title, interest, burdens and obligations under the Development Agreement with respect to all other property within the Subject Property owned by Landowner.

2. Assignee hereby assumes all of the rights, title, interest, burdens and obligations of Landowner under the Development Agreement with respect to the Assigned Parcel, and agrees to observe and fully perform all of the duties and obligations of Landowner under the Development Agreement with respect to the Assigned Parcel, and to be subject to all the terms and conditions thereof with respect to the Assigned Parcel. The parties intend hereby that, upon the execution of this Agreement and conveyance of the Assigned Parcel to Assignee, Assignee shall become substituted for Landowner as the "Landowner" under the Development Agreement with respect to the Assigned Parcel.

3. All of the covenants, terms and conditions set forth herein shall be binding upon and shall insure to the benefit of the parties hereto and their respective heirs, successors and assigns.

4. The Notice Address described in Article 11 of the Development Agreement for the Landowner with respect to the Assigned Parcel shall be:

Attn: _____

IN WITNESS HEREOF, the parties hereto have executed this Agreement as of the day and year first above written. This Agreement may be signed in identical counterparts.
