Title: Housing Authority - FY2016-17 Annual Budget
Contact: Melissa Hagan 916-774-5476 mhagan@roseville.ca.us

Meeting Date: 6/15/2016

Item #: 10.1.

RECOMMENDATION TO COUNCIL

Staff is recommending the City of Roseville Housing Authority approve by resolution the Housing Authority's FY2016-17 budget included as Attachment A.

The Housing Choice Voucher program provides rental assistance to roughly 655 families in the City of Roseville and Rocklin and infuses over \$4 million of federal funds into the local economy through payments to apartment complexes and property owners who participate in the program. The Housing Authority receives its funding from the Department of Housing and Urban Development which covers approximately 76% of its administrative costs with the general fund covering the balance.

BACKGROUND

The Roseville Housing Authority (Housing Authority) was formed in October of 1974 and has provided 40 years of service to its very low and low income residents by helping to ensure access to quality, affordable, and safe housing as well as encourage economic self-sufficiency. To that end, the Housing Authority provides rental assistance vouchers to roughly 655 families through the Housing Choice Voucher (HCV) program; a program administered by the U. S. Department of Housing and Urban Development (HUD) whose budget is appropriated by Congress each year. The HCV program serves low and very low income residents, non-elderly disabled persons, and veterans through the Veterans Affairs Supported Housing program (VASH). Additionally, by administering the HCV program, the Housing Authority's policies and actions are in compliance with State of California Housing Element law which among many other requirements, mandates local governments to adequately plan for and meet their affordable housing goals and needs for workers, families, seniors and the disabled.

Budget Analysis

The Housing Authority has one fund that accounts for its activities with revenues and expenditures presented in the attached Fund Summary (Attachment B). The revenues and expenditures for FY2016-17 are estimated as follows:

--	--

REVENUES	
HUD revenues for rental assistance	\$4,071,800
HUD admin revenues for Admin (Payroll and Supplies)	604,956
Misc revenues (Admin from other Agencies, fraud recovery)	17,622
Total Estimated Available for Appropriation	\$4,694,378

EXPENDITURES	AMOUNT
Salaries and Benefits	509,599
Materials, Services and Supplies & Indirect costs	91,338
Housing Choice Vouchers (rental assistance)	4,071,800
Total Estimated Expenditures & Transfers Out	\$4,672,737

Revenues

Housing Assistance Renewal Funding

HUD funds the rental assistance program based on calculations for the Housing Authority's activity that occurred within the benchmarking period of January 2015 through December 2015. Additionally, HUD takes into account the total amount of funding appropriated by Congress for the entire federal program. Although HUD awards the funding on a calendar year basis, the Housing Authority elects to use this amount for the fiscal year.

HUD has allocated renewal funding of \$4,071,800.00 (down 2.7% from last year) which is comprised of funding for the HCV program of \$3,972,227.00 and \$99,573.00 for the Veterans Affairs Supported Housing program (VASH). The VASH program, in its second year for the Housing Authority, is a joint effort between HUD and the Veterans Affairs to move Veterans and their families out of homelessness and into permanent housing. HUD provides housing assistance through its HCV Program and with the VA provides case managers to assist homeless Veterans in securing and maintaining permanent housing through intensive case management.

Family Self-Sufficiency Program Revenues

Each year, the Housing Authority participates in HUD's Family Self-Sufficiency program which enables families assisted through the HCV program to increase their earned income and reduce their dependency on welfare assistance and rental subsidies. Participants elect to divert a portion of their assistance payments to an interest-bearing account that once having completed the required objectives of the program can be used for a variety of needs such as a down payment on a house, a car or any number of uses. HUD awards grants to Housing Authorities who compete for the funding which covers all or a portion of the salary of the coordinator who administers the program. For FY2016-17, the Housing Authority will receive \$66,212.00 which covers approximately 67% of the salary and benefits for the FSS program coordinator.

Miscellaneous Revenues

The Housing Authority administers the HCV program for tenants that live in Rocklin and charges the City of Rocklin a minimum admin fee in order to recoup costs for this service. The admin fee budgeted for FY2017 is \$17,600.00. Interest earned by the cash reserves in the Housing Authority's bank accounts is expected to be \$22.00 for FY2016-17.

Net Restricted Position and Program Reserves

In contrast to previous years, HUD now analyzes the Housing Authority's HAP expenditures on a quarterly basis and remits only what is needed to fund the housing assistance payments for each month. Any unused budget is held by HUD in a program reserve account and is readily available if needed. The intent is to minimize the amount of funds held in the Housing Authority's bank account as net restricted position (NRP). To that end, the Housing Authority expects to have no fund balance at June 30, 2017 in its NRP account.

Expenditures

Salaries and Benefits / Materials, Services and Supplies & Indirect Costs

The total cost for salaries, wages and benefits, material, services and supplies for the Housing Authority is estimated to be \$788,310.00. This total is net of labor charges out to other funding sources. The general fund covers approximately 24% of the total for non-chargeable time such as paid leave time and general admin for meetings and other admin duties. This nets to an admin budget of \$600,937.00. Admin revenues are estimated to be \$622,578.00 which is sufficient to cover the costs. This budget covers eight full-time employees and one 1500 hr employee all charging a portion of their time to the Housing Authority which calculates to 5.4 FTEs.

	<u>Amount</u>	<u>%</u>
Total SWB (net of Other Funding Sources)	\$696,972	
Materials Services & Supplies	<u>91,338</u>	
TOTAL	\$788,310	
General Fund Subsidy	(46,045)	6%
General Fund non-productive time	<u>(141,327)</u>	18%
Total Admin Budget (5.4 FTEs)	\$600,937	76%

This 24% contribution from the City's general fund provides a guarantee that the Housing Choice Voucher program can continue to provide rental assistance to very low income families in Roseville and Rocklin. The City's funding will also help maintain the admin program reserves estimated to be \$355,130.00 by June 30, 2017; one-time funds the Housing Authority has accumulated over the years and will most likely be needed to offset future increases in operations and personnel costs.

Housing Choice Voucher Payments

The Housing Authority has budgeted \$4,071,800.00 for housing assistance payments (HAP) for roughly 655 families in the City of Roseville and Rocklin. In this program, participating households must find housing that meets program requirements on the private rental market. Written agreements are signed between the owner, tenant and agency outlining their respective rights and responsibilities. Program participants pay a share of the rent based on their household income, and the Housing Authority pays the rental assistance amount directly to the landlord each month. This funding also includes funds estimated to be placed in an escrow account for the individuals who elect to participate in the FSS program previously discussed. Since the program is funded based on actual expenditures, the budgeted expenditures mirror the revenues expected from HUD for the housing assistance payments for the fiscal year.

FISCAL IMPACT

The Housing Choice Voucher program provides rental assistance to roughly 655 families in the

City of Roseville and Rocklin and infuses over \$4 million of federal funds into the local economy through payments to apartment complexes and property owners who participate in the program. The City's \$187,373.00 general fund contribution to this valuable endeavor is greatly outweighed by its benefit to the community.

ECONOMIC DEVELOPMENT / JOBS CREATED

The Housing Authority's Housing Choice Voucher program provides an important social service to ensure safe and affordable housing for our residents. Safe and affordable housing is an essential component to the foundation of our community's economic stability. The Housing Authority provides for a \$4 million influx of investment into the community annually. This influx of capital distributed into the community supports commerce and secondarily supports job creation and retention.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment (CEQA Guidelines §15061(b)(3)). Budgets do not include the potential for a significant environmental effect, and therefore are not subject to CEQA.

Respectfully Submitted,

Melissa Hagan, Financial Analyst II

Chris Robles, Economic Development Director

Rob Jensen, City Manager

Title: 2015 Greenhouse Gas Free Allowance Proceeds Spending Plan
Contact: David Siao 916-746-1613 dsiao@roseville.ca.us

Meeting Date: 6/15/2016
Item #: 10.2.

RECOMMENDATION TO COUNCIL

Recommend City Council adopt a resolution to approve the 2015 Greenhouse Gas Free Allowance Proceeds Spending Plan to comply with the Cap and Trade Regulations developed by the California Air Resources Board (CARB).

BACKGROUND

The City of Roseville receives an annual direct allocation of California Greenhouse Gas (GHG) allowances. CARB distributes allowances to ensure that electricity ratepayers do not experience sudden increases in their electricity bills associated with the Cap and Trade Regulations.

Roseville uses some allowances to meet emissions obligations associated with Roseville's natural gas fueled generation. The remainder is sold at auction, with Roseville receiving the proceeds. The law restricts how the proceeds may be spent. Specifically, the proceeds:

- Must be used for the benefit of retail ratepayers, and not other entities or persons;
- Must be used consistent with the goal of Assembly Bill (AB) 32 (California's Global Warming Solutions Act)—reducing GHG emissions from various sources within California;
- Must not be used to meet compliance obligations for electricity sold into the California Independent System Operator markets.

The Greenhouse Gas Free Allowance Proceeds Spending Plan identifies activities and programs Roseville will fund with auction proceeds. Roseville received slightly over \$2,300,000 in proceeds from the sale of allowances in 2015.

The proposed Plan consists of three parts:

1. EZ Energy House Call Program: This program was initially established in February 2015 using 2013 GHG auction proceeds, and was continued with 2014 proceeds. Staff recommends continuing to fund the program in 2017 using \$350,000 of the 2015 proceeds. The program provides no-cost whole house weatherization for the City's qualifying low income customers. It provides measurable, ongoing, long-term GHG emissions reductions and financial benefits to these customers.

2. Bill Credit: A portion of the 2015 proceeds, \$1,000,000, would be used to provide customer bill credits. A bill credit was also used for part of the 2013 proceeds, and is consistent with CARB's Board Resolution 11-32 and its Cap and Trade Regulations. The table below illustrates proposed bill credit amounts :

Customer Class	Bill Credit Amount	Percent of Average Customer Monthly Cost
Residential Customers	\$8.00	7.2 %
ERAP Customers*	\$16.00	14.4 %
GS1 Commercial Customers	\$12.50	7.4 %
GS2 Commercial Customers	\$250.00	7.1 %
GS3 Commercial Customers	\$2,200.00	7.0 %
GS4 Commercial Customers	\$15,000.00	7.1 %

* Electric Rate Assistance Program – provides assistance to low income customers.

3. Advanced Metering Infrastructure (AMI): The remaining 2015 funds, about \$950,000, would be set aside for AMI in Roseville. A portion of the 2014 proceeds was also set aside for this purpose. AMI will enable Roseville Electric Utility to reduce greenhouse gas emissions by more finely controlling voltages on the electric system and eventually put in place rates to encourage more efficient energy use. Roseville must report annually on the proposed use of these proceeds to CARB, but these funds would be held over multiple years for the comprehensive implementation effort required for AMI.

Per Roseville's GHG Cap and Trade Program, the City Council must approve the use of all allowance proceeds. Roseville must also report to the CARB by June 30 of each year how it has spent, or plans to spend, the proceeds received through auction of its allowances. The next report is due June 30, 2016.

FISCAL IMPACT

This plan envisions spending approximately \$2,300,000 in 2015 Greenhouse Gas Free Allowance Proceeds over the next three fiscal years.

ECONOMIC DEVELOPMENT / JOBS CREATED

There should be a minimal benefit associated with implementation of the EZ Energy House Call and AMI Programs.

ENVIRONMENTAL REVIEW

The 2015 Greenhouse Gas Free Allowance Proceeds Spending Plan is not considered a "project" as defined by the California Environmental Quality Act ("CEQA") (CEQA Guidelines §15378). Consequently no CEQA action is required.

Respectfully Submitted,

David Siao, Electric Resources Analyst

Michelle Bertolino, Electric Utility Director

WHEREAS, the City receives an annual direct allocation of California Greenhouse (GHG) Allowances (free allowances); and

WHEREAS, a portion of the free allowances is used to meet emission obligations associated with operating Roseville's natural gas fueled generation and a portion is auctioned, with the City receiving the proceeds from the auctions; and

WHEREAS, the purpose of the 2015 GHG Free Allowance Proceeds Spending Plan is to identify activities and programs the City will pursue to spend the proceeds received at auction;

WHEREAS, staff recommends using these proceeds for the following three activities:

- EZ Energy House Call Program, which provides no-cost whole house weatherization for the City's low income residents; and
- Bill Credit, to provide customer bill credits; and
- Advanced Metering Infrastructure (AMI), to support the development of a comprehensive multi-year AMI implementation

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Roseville that the 2015 Greenhouse Gas Free Allowance Proceeds Spending Plan is hereby approved.

PASSED AND ADOPTED by the Council of the City of Roseville this ____ day of _____, 20__, by the following vote on roll call:

Title: 2016/2017 Landscape and Lighting Districts Assessments – Public Hearing

Contact: Vanessa Lieberman 916-774-5189 vlieberman@roseville.ca.us

Meeting Date: 6/15/2016

Item #: 11.1.

RECOMMENDATION TO COUNCIL

It is requested that the City Council adopt the following resolutions (attached):

1. Resolution of the City Council of the City of Roseville, California, Amending and/or Approving the Engineer's Annual Levy Report for the Historic District Landscape and Lighting District, Fiscal Year 2016/2017.

Resolution of the City Council of the City of Roseville, California Ordering the Levy and Collection of Assessments within the Historic District Landscaping and Lighting District, for Fiscal Year 2016/2017.

2. Resolution of the City Council of the City of Roseville, California, Amending and/or Approving the Engineer's Annual Levy Report for the Infill Area Landscaping and Lighting District, Fiscal Year 2016/2017.

Resolution of the City Council of the City of Roseville, California Ordering the Levy and Collection of Assessments within the Infill Area Landscaping and Lighting District, for Fiscal Year 2016/2017.

3. Resolution of the City Council of the City of Roseville, California, Amending and/or Approving the Engineer's Annual Levy Report for Johnson Ranch Landscaping and Lighting District, Fiscal Year 2016/2017.

Resolution of the City Council of the City of Roseville, California Ordering the Levy and Collection of Assessments within the Johnson Ranch Landscaping and Lighting District, for Fiscal Year 2016/2017.

4. Resolution of the City Council of the City of Roseville, California, Amending and/or Approving the Engineer's Annual Levy Report for North Central Specific Plan Landscaping and Lighting District, Fiscal Year 2016/2017.

Resolution of the City Council of the City of Roseville, California, Ordering the Levy and Collection of Assessments within the North Central Specific Plan Landscaping and Lighting District, Fiscal Year 2016/2017.

5. Resolution of the City Council of the City of Roseville, California, Amending and/or Approving the Engineer's Annual Levy Report for Northwest Roseville Specific Plan Landscaping and Lighting District, Fiscal Year 2016/2017.

Resolution of the City Council of the City of Roseville, California Ordering the Levy and Collection of Assessments within the Northwest Roseville Specific Plan Landscaping and Lighting District, for Fiscal Year 2016/2017.

6. Resolution of the City Council of the City of Roseville, California, Amending and/or Approving the Engineer's Annual Levy Report for Olympus Pointe Landscaping and Lighting District, Fiscal Year 2016/2017.

Resolution of the City Council of the City of Roseville, California Ordering the Levy and Collection of Assessments within the Olympus Pointe Landscaping and Lighting District, for Fiscal Year 2016/2017.

7. Resolution of the City Council of the City of Roseville, California, Amending and/or Approving the Engineer's Annual Levy Report for the Riverside Avenue Landscaping and Lighting District, Fiscal Year 2016/2017.

Resolution of the City Council of the City of Roseville, California Ordering the Levy and Collection of Assessments within the Riverside Avenue Landscaping and Lighting District, for Fiscal Year 2016/2017.

8. Resolution of the City Council of the City of Roseville, California, Amending and/or Approving the Engineer's Annual Levy Report for the Vernon Street Landscaping and Lighting District, Fiscal Year 2016/2017.

Resolution of the City Council of the City of Roseville, California Ordering the Levy and Collection of Assessments within the Vernon Street Landscaping and Lighting District, for Fiscal Year 2016/2017.

BACKGROUND

The City of Roseville currently has eight active Landscape and Lighting Districts. These districts were formed within the City of Roseville to levy and collect assessments for maintenance of public improvements pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code (the Act), and Article XIID of the California Constitution.

The Historic District Landscaping and Lighting District was formed in 2006 to levy and collect assessments for the maintenance, and operation of improvements benefiting parcels within the District. The cost of maintaining the streetscape improvements is spread equally to the subject properties, based on their percentage of the total front footage of all affected parcels. The District is located in the Historic Old Town area in Downtown Roseville.

The Infill Area Landscaping and Lighting District was formed in 1995 to levy and collect assessments for the maintenance of certain public improvements that benefit parcels within the District. The District is located in the Infill Plan area.

The Johnson Ranch Landscaping and Lighting District was formed in 1989 to levy and collect assessments for the maintenance of certain public landscape, open space, floodway and stream courses located within the Southeast Roseville Specific Plan area.

The North Central Specific Plan Landscaping and Lighting District was formed in 1990 to levy and collect assessments for the maintenance of certain public improvements within the North Central Roseville Specific Plan area. In 2004, the property owners in the district approved, through a mailed ballot, an assessment increase and the addition of an annual escalation factor. This enables the City to keep up with increased costs associated with maintaining the landscaping at proper levels.

The Northwest Roseville Specific Plan Landscaping and Lighting District was formed in 1989 to levy and collect assessments for maintenance of certain public landscape medians and corridors, vernal pool preserves, bike trails, and park improvements. In 2004, the Dunmore Junction subdivision was annexed into the LLD as Zone A and the Legacy subdivision was annexed into Zone B. In 2006, the property owners voted against an assessment increase as well as the addition of an annual escalation factor.

The Olympus Pointe Landscaping and Lighting District was formed in 1989 to levy and collect assessments for the maintenance of certain public improvements within the Northeast Roseville Specific Plan Area. In 2005, the property owners in the district approved through a mailed ballot, an assessment increase and an annual escalation factor. This enables the City to keep up with increased costs associated with maintaining the landscaping at proper levels.

The Riverside Avenue Landscaping and Lighting District was formed in 2007 to levy and collect assessments for the maintenance, and operation of improvements benefiting parcels within the District. The cost of maintaining the streetscape improvements is spread equally to the subject properties, based on their percentage of the total front footage of all affected parcels.

The Vernon Street Landscape and Lighting District was formed in 2001 to levy and collect assessments for maintenance of improvements installed by the Vernon Streetscape. The cost of maintaining the streetscape improvements is spread equally to the subject properties on their percentage of the total front footage of all affected parcels.

Assessment Statistics:

<i>District</i>	<i>FY17 Levy</i>	<i>Max Annual Tax</i>	<i>Levied Parcels</i>	<i>% Change from FY16</i>	<i>FY 16 Levy</i>
<i>Historic District LLD</i>	<i>\$39,618.74</i>	<i>\$39,619.00</i>	<i>56</i>	<i>3% Increase</i>	<i>\$38,464.79</i>
<i>Infill Area LLD</i>	<i>37,427.80</i>	<i>44,132.80</i>	<i>222</i>	<i>42% Increase *</i>	<i>26,247.42</i>
<i>Johnson Ranch LLD</i>	<i>47,706.40</i>	<i>51,680.00</i>	<i>1689</i>	<i>1% Increase</i>	<i>47,412.98</i>
<i>North Central LLD</i>	<i>608,758.37</i>	<i>620,215.00</i>	<i>3481</i>	<i>2.7% Increase</i>	<i>592,528.41</i>
<i>Northwest LLD</i>	<i>481,336.00</i>	<i>481,336.00</i>	<i>4752</i>	<i>no change</i>	<i>481,336.00</i>

<i>Riverside Ave LLD</i>	<i>38,444.00</i>	<i>38,444.00</i>	<i>75</i>	<i>3% Increase</i>	<i>37,324.74</i>

Vernon Street LLD	34,853.83	34,854.00	62	3% Increase	33,780.45
Totals	\$1,505,905.46	\$1,672,669.80	10,805		\$1,472,974.63

** Infill district increase due to each zone being close to or at max tax*

FISCAL IMPACT

All charges are needed to fully fund landscape services in each LLD.

ECONOMIC DEVELOPMENT / JOBS CREATED

Approving the resolutions will have an impact on local economic development and/or job creation. The City's landscaping contracts funded by the LLD assessments support approximately 24,000 production hours of work from hired contractors.

ENVIRONMENTAL REVIEW

This is not considered a "project" as defined by the California Environmental Quality Act (CEQA) and therefore no CEQA action is required.

Respectfully Submitted,

Vanessa Lieberman, Financial Analyst

Monty Hanks, Finance Director

Rob Jensen, City Manager

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, AMENDING AND/OR APPROVING THE ENGINEER'S ANNUAL LEVY REPORT FOR THE HISTORIC DISTRICT LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2016/2017

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, ordered the preparation of the Engineer's Annual Levy Report (hereafter referred to as the "Report") for said district known and designated as: Historic District Landscaping and Lighting District (hereinafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, being Part 2 Division 15, of the Streets and Highways Code of the State of California, beginning with Section 22500* (hereinafter referred to as the "Act"), and,

WHEREAS, there has now been presented to this City Council the Report as required by *Chapter 3, Section 22623* of said Act, and as previously directed by Resolution; and,

WHEREAS, this City Council has carefully examined and reviewed the Report as presented (or amended), and is satisfied with each and all of the items and documents as set forth therein, and is satisfied that the levy has been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed, as set forth in said Report.

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR HISTORIC DISTRICT LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Report as presented, is hereby approved (as amended), and is ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 3 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation and final approval of the Report.

RESOLUTION NO. 16-251

I. OVERVIEW

A. INTRODUCTION

The City of Roseville (“City”) annually levies and collects special assessments in order to maintain the improvements within the Historic District Landscaping and Lighting District (“District”). The District was formed on April 5, 2006 and is levied annual assessments pursuant to *the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code* (“1972 Act”).

The Engineer’s Report (“Report”) describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2016 through June 30, 2017. The special benefit assessments are based on historical and estimated costs to maintain the District improvements. These assessments, which provide a direct and special benefit to properties within the District, will provide funding for the operation and maintenance of District improvements.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (“APN”) by the Placer County Assessor’s Office. The Placer County Auditor/Controller uses Assessor’s Parcel Numbers and specific Tax Code Accounts, to identify on the County’s tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will by resolution order the improvements to be made and confirm the levy and collection of assessments herein pursuant to the Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council defines the assessments to be applied to each parcel within the District for Fiscal Year (“FY”) 2016/17. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the property tax roll for each parcel.

B. COMPLIANCE WITH THE CURRENT LEGISLATION

The City Council, pursuant to the provisions of the “Landscaping and Lighting Act of 1972”, being Division 15, Part 2 of the Streets and Highways Code of the State of California, beginning with Section 22500 (the “1972 Act”); Article XIID of the Constitution of the State of California (“Article XIID”); and the Proposition 218 Omnibus Implementation Act, beginning with Government Code Section 53750 (the “Implementation Act”) (the 1972 Act, Article XIID and the Implementation Act are referred to collectively as the “Assessment Law”) initiated proceedings for the formation of the District on February 15, 2006 and to levy and collect annual assessments against lots and parcels within the District for FY 06/07. On April 5, 2006, pursuant to Assessment Law, the City conducted a Public Hearing and

tabulated the returned ballots. The City determined that a majority protest did not exist and approved the District's maximum assessment rate and annual inflationary adjustment factor.

Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the Act and Assessment Law.

C. DESCRIPTION OF DISTRICT BOUNDARIES

The proposed territory within the District consists of all lots, parcels and subdivisions of land as shown on the Boundary Map titled "Boundary Map of Historic District Landscaping and Lighting District" as referenced in Appendix A-1 of this Report.

The District is located within the City's Historic Old Town, west of Highway 80, south of Pleasant Street, north and east of Washington Boulevard, and north and west of the Union Pacific Railroad. The District consists of mostly commercial parcels in a concentrated area of the Downtown primarily fronting the following streets: Church Street northeast of Washington Boulevard, Main Street between Washington Boulevard and Lincoln Street, Pacific Street and Lincoln Street where the improvements end approximately one block south of Pleasant Street.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to this proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF THE IMPROVEMENTS AND MAINTENANCE

The District, through the levy of special assessments, provides funding for ongoing maintenance, operation and servicing of landscaping and lighting improvements located within the public rights-of-ways and dedicated easements located within the District. These improvements may include, but are not limited to, all materials, equipment, utilities, labor, and appurtenant facilities related to the ongoing maintenance of the improvements.

Maintenance services will be provided by City personnel and/or private contractors. The proposed improvements to be maintained and services are generally described as follows:

Landscaping Improvements

The landscaping improvements have been designed to enhance the area within the District and may include, but are not limited to ground cover, shrubs and plants, trees, irrigation and drainage systems, trash receptacles, ornamental lighting, masonry walls or other fencing, hardscape improvements, monuments and landmarks, recreational facilities and associated appurtenants located within the street right-of-ways and public areas within the District. Specifically, the proposed landscape improvement areas for this District are:

- Parkway landscaping and hardscape improvements within the public right of ways of the streets within the district including, but not limited to, Lincoln Street, Main Street, Church Street, Pacific Street and the northeast side of Washington Boulevard estimated at 14,450 square feet of landscaping;
- Various amenities associated with the landscape improvements and public areas within the District, including, but not limited to, trash receptacles, street furniture, bike racks, entry signs, sidewalks, fencing, and retaining walls.

Specifically not included as District improvements are those improvements located on private property, improvements and facilities that are outside the boundaries of the District and/or are funded by other sources available to the City, including those portions of the median and parkway landscaping on Washington Boulevard (southwest side of the street) that are outside the District boundaries.

Public Lighting Improvements

The lighting improvements may include, but are not limited to, the cost of providing, maintaining and servicing of lighting fixtures, poles, meters, conduits, electrical cable, and associated appurtenant facilities associated with:

- Lighting facilities within the landscaped areas and public areas including safety lights, security lights or ornamental lights installed as part of the District improvements; and
- Public street light improvements located on the streets within the District.

Specifically excluded from the assessment are the street light energy costs. These costs will continue to be paid for by the City from other revenue sources.

Detailed maps of the locations and descriptions of the specific improvements to be maintained by the District are on file in the Office of Public Works and by reference are made part of this Report.

Description of Maintenance and Services

Maintenance means the furnishing of services and materials for the ordinary and usual maintenance, operation and servicing of landscaping and street lighting improvements facilities and appurtenant facilities, including repair, removal or replacement of all or part of any of the landscaping and street lighting improvements, or appurtenant facilities; providing for the life, growth, health and beauty of landscaping improvements including cultivation, irrigation, trimming, mowing, spraying, fertilizing and treating for disease or injury; the removal of trimmings, rubbish, debris and other solid waste; and the cleaning sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Servicing means the furnishing of water and electricity for the irrigation of the landscape improvements or appurtenant facilities and the furnishing of electric current or energy for the operation of the landscaping improvements or appurtenant facilities. The street lighting improvements shall be maintained to provide adequate illumination; however, the City will be paying the actual energy costs to provide illumination.

II. METHOD OF APPORTIONMENT

A. GENERAL

The 1972 Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements which include the construction, maintenance and servicing of public lights, landscaping and appurtenant facilities. The 1972 Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”

The formula used for calculating assessments in the District therefore reflects the composition of the parcels, and the Improvements and services provided, to fairly apportion the costs based on estimated benefit to each parcel.

B. BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments, notably:

Article XIID Section 2d defines District as follows:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service”;

Article XIID Section 2i defines Special Benefit as follows:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4a defines proportional special benefit assessments as follows:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public

improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

This District was formed to establish and provide for the improvements that enhance the presentation of the surrounding properties and developments. These improvements will directly benefit the parcels to be assessed within the District. The assessments and method of apportionment is based on the premise that the assessments will be used to construct and install landscape and lighting improvements within the District as well as provide for the annual maintenance of those improvements, and the assessment revenues generated by District will be used solely for such purposes.

The costs of the proposed improvements have been identified and allocated to properties within the District based on special benefit. The improvements to be provided by this District and for which properties will be assessed have been identified as an essential component and local amenity that provides a direct reflection and extension of the properties within the District which the property owners and residents have expressed a high level of support.

The method of apportionment (method of assessment) set forth in the Report is based on the premise that each assessed property receives special benefits from the landscape and lighting improvements within the District, and the assessment obligation for each parcel reflects that parcel’s proportional special benefits as compared to other properties that receive special benefits.

To identify and determine the proportional special benefit to each parcel within the District, it is necessary to consider the entire scope of the improvements provided as well as the properties that benefit from those improvements. The improvements and the associated costs described in this Report, have been carefully reviewed and have been identified and allocated based on a benefit rationale and calculations that proportionally allocate the net cost of only those improvements determined to be of special benefit to properties within the District. The various public improvements and the associated costs have been identified as either “general benefit” (not assessed) or “special benefit”.

The City initiated and conducted property owner protest ballot proceedings in accordance with Article XIIID. Each of the proposed Improvements, the associated costs and assessments were identified and allocated based on special benefit pursuant to the provisions of Article XIIID and 1972 Act. Additionally, the Improvements and the annual costs of ensuring the maintenance and operation of the Improvements are of direct and special benefit to the properties.

The City annually levies and collects special benefit assessments in order to maintain and service the District Improvements. The District provides for specific Improvements and services that include the maintenance and operation of landscaping and lighting Improvements and associated appurtenances located within the District’s public right-of-ways and dedicated easements. The annual

assessment is based on the historical and estimated costs to maintain the Improvements that provide a benefit to properties within these Districts. The Improvements within the District and the costs of those Improvements are identified and budgeted separately, including all expenditures, deficits, surpluses, revenues, and reserves.

All Improvements within the District and the properties associated with those Improvements were reviewed for benefit prior to the formation of the District. Because the Improvements affront the benefited parcels, it has been determined that there is no measurable general benefit to properties outside the District or to the public at large. In making this determination it should be noted that similar improvements within California are typically maintained by individual property owners, through some type of association or a special district as allowed by State Law since the on-going maintenance of these improvements are a special benefit to the properties associated with those improvements.

The method of apportionment (method of assessment) for the District is based on the premise that each of the assessed parcels within the District receives special benefit from the Improvements maintained and financed by District assessments. The presence of these Improvements and the close proximity of the Improvements to the properties within the District enhance the desirability and security of properties within the District.

The landscape Improvements provided by the District may include landscaped parkways, perimeters, entryways, local medians, slopes, internal amenities and appurtenant facilities. Street lighting Improvements may include all energy costs and necessary maintenance to the facilities related thereto. The annual assessments outlined in this Report are proposed to cover the estimated costs to provide all necessary service, operation, administration, and maintenance required to keep these Improvements in a healthy, vigorous, and satisfactory condition. The special benefits associated with the local landscaping Improvements are specifically:

The special benefits associated with all landscaping Improvements are specifically:

- Enhanced desirability of properties through association with the Improvements.
- Improved aesthetic appeal of properties providing a positive representation of the area and properties.
- Enhanced adaptation of the urban environment within the natural environment from adequate landscaping.
- Environmental enhancement through improved dust and debris control, and fire prevention.
- Increased sense of pride in ownership of property within the District resulting from well-maintained Improvements associated with the properties.

- Enhanced quality of life through well-maintained landscaped areas.
- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the District through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels by moderating temperatures, providing oxygenation and attenuating noise.

The special benefits of street lighting are the convenience, safety, and security of property, improvements, and goods. Specifically:

- Enhanced deterrence of crime and the aid to police protection.
- Increased nighttime safety on streets and roads within the Districts.
- Improved ability of pedestrians and motorists to see.
- Improved ingress and egress to property.
- Reduced vandalism and other criminal acts and damage to Improvements or property.
- Improved traffic circulation and reduced nighttime accidents and personal property loss.
- Increased promotion of business during nighttime hours in the case of commercial properties.

All of the preceding special benefits contribute to a specific enhancement and desirability of each of the assessed parcels within the District.

C. DESCRIPTION OF THE METHOD OF APPORTIONMENT

To establish the special benefit to the individual parcels within the District a formula that spreads the costs of the maintenance based on the special benefit must be established. The improvements have been reviewed and the following formula has been established to apportion the maintenance costs based on benefit.

For purposes of the Assessment Methodology, the terms hereinafter set forth have been the following meanings:

Acreage means the land area of an Assessor's Parcel as shown on an Assessor's Parcel map-, or if the land area is not shown on an Assessor's parcel map, the land area shown on the applicable final map, parcel map, condominium plan, record of survey or other recorded document creating and describing such area of land.

Multi-Family Residential means a residence for which building permits have been issued for more than attached residential units for rental purposes.

Single-Family Residential Unit means a single residential home. This land use includes detached or attached for sale units intended for single-family occupancy.

Commercial means property being used or zoned for either commercial or industrial use.

Three components were used in the methodology to determine each parcels assessment; 1) Front footage of parcels along the proposed street improvements; 2) acreage of benefiting parcels; and 3) Current land use of parcels. Based on these three components the assessments were determined as follows:

First, the parcels Front Footage was determined based on Assessor's Parcel maps or other sources. Only Front footage on streets that will be improved was used. For parcels with Front Footage on more than one side (corner lots), the total Front Footage was divided by two to provide an average Front Footage. It was determined that twenty percent (20%) of the total budget was reasonably attributed to Front Footage; therefore twenty percent (20%) of the budget was spread to Front Footage.

Second, each parcel's Acreage was calculated based on Assessors Parcels map. It was determined that eighty percent (80%) of the budget was reasonably attributed to Acreage; therefore eighty (80%) of the budget was spread on Acreage. In the event that common area parcels are created subsequent to the formation of the District, the acreage of any such common area parcels shall be apportioned to the remaining assessable parcels of the subdivision and/or parcel split(s) related to the creation of the common area parcel(s).

Third, the current land use of the parcel was determined using the County's secured roll. Parcel's currently used as a Single Family Residence or Multi-Family Residences were determined to receive twenty-five (25%) of the benefit in relation to commercial parcels. Additionally, it was determined that single Family Residential Parcels benefit equally from the improvements, therefore the total assessment calculated based on the formula was averaged between the five Single Family Residential parcels to determine a Single Family Residential rate per Unit.

The base year maximum assessment rates approved to be levied in FY 2006/07 are provided in the table below.

Base Year Maximum Assessment Rates (FY 2006/07)			
Land Use	Front Footage	Acreage Rate	Flat Rate
Commercial	\$1.99 per Front Foot	\$2,582.41 per Acre	N/A
Multi-Family Residential	\$0.50 per Front Foot	\$645.60 per Acre	N/A
Single-Family Residential	N/A	N/A	\$132.00 per Unit

The following formula is used to calculate each parcel's assessment (proportional benefit) for those parcels that are not Single-Family Residential parcels.

Front Footage Rate x Parcel's Adjusted Front Footage = Parcel Front Footage Levy

Acreage Rate x Parcel's Adjusted Acreage = Parcel Acreage Levy

Proposed Levy per Parcel = Parcel Front Footage Levy + Parcel Acreage Levy

The Assessment Range Formula shall be applied to all future assessments within the District beginning in fiscal year 2007/08. Generally, if the proposed annual assessment for the current fiscal year is less than or equal to the calculated Maximum Assessment, then the Assessment is equal to the initial Assessment (approved by property owners within the District) adjusted annually by three percent (3%).

Beginning in the second fiscal year (Fiscal Year 2007/08) and each fiscal year thereafter, the Maximum Assessment would be recalculated and a new Maximum Assessment established within the District.

The Maximum Assessment is adjusted annually and is calculated independent of the District's annual budget and proposed annual assessment. Any proposed annual assessment is not considered an increased assessment, even if the proposed assessment is greater than the assessment applied in the prior fiscal year.

Although the Maximum Assessment will increase each year, the actual assessment may remain unchanged. The Maximum Assessment adjustment is designed to establish a reasonable limit on assessments. The Maximum Assessment calculated each year does not require or facilitate an increase to the annual assessment and neither does it restrict assessments to the adjustment maximum amount. If the budget and assessment for the fiscal year do not require an increase, or the increase is less than the adjusted Maximum Assessment, the required budget and assessment may be applied without additional property owner balloting. If the budget and assessments calculated requires an increase greater than the adjusted Maximum Assessment, then the assessment is considered an increased assessment and would be subject to balloting.

D. ANNUAL INFLATIONARY ADJUSTMENT

If the proposed assessment rates increase over the prior fiscal year's maximum assessment rates by a percentage no greater than the 3%, then the proposed assessment rates are not considered an increase.

III. DISTRICT BUDGET

A. 2016/17 BUDGET

DESCRIPTION	AMOUNTS
<u>DIRECT COSTS</u>	
Contract Maintenance - Landscaping	\$8,430.00
Repair & Maintenance - Landscaping	7,200.00
Repair & Maintenance - Lighting	3,200.00

Ending Rehab Reserve Balance 6-30-2017 (est.)	\$67,088.83

D. DESCRIPTION OF BUDGET TERMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping - Includes all regularly scheduled contract labor, required to properly maintain and ensure the satisfactory condition of all landscaping, irrigation and drainage systems and appurtenant facilities.

Repair and Maintenance - Landscaping - This item includes landscape improvement repair and maintenance costs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc. Planned replacements or upgrades that provide a direct benefit to the District during the Current Fiscal Year may also be included. Costs could include the renovation of improvements such as irrigation systems.

Repair and Maintenance - Lighting - This item includes lighting improvement repair and maintenance costs. This may include repair of damaged amenities due to vandalism, storms, etc. Planned replacements or upgrades that provide a direct benefit to the District during the Current Fiscal Year may also be included.

Repair and Maintenance - Streetscape and Signage - This item includes repair and maintenance costs of streetscape and sign improvements. Streetscape improvements include street furniture, sidewalks, curbs, gutters, parking stripes, brick pavers, benches, bike racks, and trash receptacles. This

may include repair of damaged amenities due to vandalism, storms, etc. May include planned replacements or upgrades not listed below that provide a direct benefit to the District.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's' Report.

Public Hearing Publishing Costs –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A “Replenishment” increases the levy in order to replenish the Operating Reserve. On the other hand, a “Use” of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Contribution for /(Use of) Rehab Reserve — A “Contribution” increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a “Use of” of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

APPLIED ASSESSMENT RATE

Number of Assessable Parcels - The total number of parcels that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public right-of-ways or easements, common areas, and/or parcels within the boundaries of the District currently do not benefit from the improvements and are therefore not assessed.

Total Assessable Front Footage – the total number of Front Feet within the District, adjusted for corner parcels, Multi-Family Residential and Single-Family Residential Parcels will be assessed as calculated in accordance with the methodology set out in Section C of this Report.

Total Assessable Acreage – the total Acreage within the District, adjusted for Multi-Family Residential and Single-Family Residential Parcels that will be assessed as calculated in accordance with the methodology set out in Section C of this Report.

Total Single-Family Residential Parcels – the total number of parcels currently being used as Single-Family Residences.

Applied Assessment Rates – The applied assessment rates for each of the District's land use types.

Maximum Assessment Rates per Front Foot – The maximum dollar amount that can be assessed per Adjusted Front Foot for the District's land use type for the current fiscal year.

Maximum Assessment Rates per Acre – The maximum dollar amount that can be assessed per Adjusted Acreage Foot for the District's land use type for the current fiscal year.

Maximum Assessment Rate per SF Residential Unit – The maximum dollar amount that can be assessed per Single Family Unit within the District for the current fiscal year.

Potential Maximum Assessment – The total amount that is expected to be assessed against all parcels within the District for the Current Fiscal Year.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2016 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2016 to December 31, 2016, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 16/17 Levy – This amount is added to the levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2016 (the beginning of the Fiscal Year) through December 31, 2016. If zero, this line item may not be shown in the budget.

Use for FY 16/17 Expenses – The amount of the Operating Reserve to be used to fund FY 16/17 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2016 (the beginning of the Fiscal Year) through December 31, 2016. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2017 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2017. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2016 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2016. Streets and Highways Code 22660 allows the District generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 16/17 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 16/17 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2017 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2017. These funds shall be use to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

Should the District have no Rehabilitation Reserve balances or related activity, no Rehabilitation Reserve information shall be presented in the Report.

E. REHABILITATION RESERVE CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment. A five year Capital Improvement Plan for the rehabilitation, restoration and /or replacement of District improvements and other allowable costs is shown below.

Future funding of District improvements is estimated as follows: repair, replacement and/or refurbishment of street furniture: \$5,000 in FY 2017/18, repair and/or replacement of streetscape and hardscape: \$25,000 in FY 2018/19; replacement, repair, renovation and/or refurbishment of plants, landscaping and related materials: \$10,000 in FY 2016/17 and \$15,000 in FY 2017/18; replacement and/or repair of lighting fixtures: \$4,500 in FY 2017/18 and \$5,500 in FY 2018/19; and, replacement, repair and/or refurbishment of irrigation meter: \$10,000 in FY 2017/18.

From time to time, funds held in a Rehabilitation Reserve may be needed to respond to changing needs due to the condition of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and / or operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map for the District has previously been submitted to the Clerk of the City in the format required under the 1972 Act and is, by reference, hereby made part of this Report. These District Boundary Maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a summary of the District's Boundaries is presented herein.

APPENDIX B — 2016/17 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, shall be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways including public greenbelts and parkways; utility rights-of-ways; common areas; landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed, excepting common area parcels. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2016/17. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2016/17 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 16-252

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA ORDERING THE LEVY AND COLLECTION OF ASSESSMENTS WITHIN THE HISTORIC DISTRICT LANDSCAPING AND LIGHTING DISTRICT, FOR FISCAL YEAR 2016/2017

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, the City Council of City of Roseville, California, has, by previous Resolutions, initiated proceedings, and declared its intention to levy assessments, and approved the Engineer’s Annual Levy Report (hereinafter referred to as the “Report”) that describes the assessments against parcels of land within the Historic District Landscaping and Lighting District (hereinafter referred to as the “District”) for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code, commencing with Section 22500* (hereinafter referred to as the “Act”) to pay for the maintenance and services of all improvements and facilities related thereto; and

WHEREAS, the Engineer selected by the City Council has prepared and filed with the City Clerk, and the City Clerk has presented to the City Council, a Report in connection with the proposed levy and collection of assessments upon eligible parcels of land within the District, and the City Council did by previous Resolution approve such Report; and

WHEREAS, the City Council desires to levy and collect assessments against parcels of land within the District for the Fiscal Year commencing July 1, 2016 and ending June 30, 2017, to pay for the maintenance and services of all improvements and facilities related thereto.

WHEREAS, this City and its legal counsel have reviewed Proposition 218 and found that these assessments comply with applicable provisions of Articles XIIC and XIID of the California State Constitution; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR HISTORIC DISTRICT LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Following notice duly given, the City Council has held a full and fair public hearing regarding the District, the levy and collection of assessments, the Report prepared in connection therewith, and considered all oral and written statements, protests and communications made or filed by interested persons regarding these matters.

Section 2 Based upon its review (and amendments, as applicable) of the Report, a copy of which has been presented to the City Council and which has been filed with the City Clerk, the City Council hereby finds and determines that:

- i) the land within the District will be benefited by the operation, maintenance and servicing of the improvements located within the boundaries of the District;
- ii) the District includes all of the lands receiving such special benefit; and,
- iii) the net amount to be assessed upon the lands within the District in accordance with the assessment for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, is apportioned by a formula and method which fairly distributes the net amount among all eligible parcels in proportion to the estimated benefits to be received by each parcel from the improvements and services.

Section 3 The Report and assessments as presented to the City Council and on file in the Office of the City Clerk are hereby confirmed as filed.

Section 4 The maintenance, operation and servicing of the improvements shall be performed pursuant to the Act. The City Council hereby orders the improvements to be made, which improvements are briefly described as follows: the improvements within the District include: maintenance, servicing, administration and operation of landscape, lighting and streetscape improvements, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer's Annual Levy Report describes all new improvements or substantial changes in existing improvements.

Section 5 The County Auditor of the County of Placer shall enter on the County Assessment Roll, opposite each eligible parcel of land, the amount of levy so apportioned by the formula and method outlined in the Report, and such levies shall be collected at the same time and in the same manner as the County taxes are collected, pursuant to *Chapter 4, Article 2, Section 22646* of the Act. After collection by the County, the net amount of the levy shall be paid to the City Treasurer.

Section 6 The City Treasurer shall deposit all money representing assessments collected by the County for the District to the credit of a fund for the Historic District Landscaping and Lighting District and such money shall be expended only for the maintenance, operation and servicing of the improvements, together with other expenses as described in Section 4.

Section 7 The adoption of this Resolution constitutes the District levy for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017.

Section 8 The City Clerk's designee, Willdan Financial Services, is hereby authorized and directed to file the levy with the County Auditor subsequent to the adoption of this Resolution, pursuant to Chapter 4, Article 1, Section 22641 of the Act. The City Clerk is directed to deliver a certified copy of this adopted Resolution to Willdan Financial Services within two weeks of adoption via either e-mail to mashley@willdan.com or US Mail to: Willdan Financial Services, 27368 Via Industria, Suite 200, Temecula, CA 92590 Attn: Mickey Ashley.

RESOLUTION NO. 16-253

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, AMENDING AND/OR APPROVING THE ENGINEER'S ANNUAL LEVY REPORT FOR THE INFILL AREA LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2016/2017

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, ordered the preparation of the Engineer's Annual Levy Report (hereafter referred to as the "Report") for said district known and designated as: Infill Area Landscaping and Lighting District (hereinafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, being Part 2 Division 15, of the Streets and Highways Code of the State of California, beginning with Section 22500* (hereinafter referred to as the "Act"), and,

WHEREAS, there has now been presented to this City Council the Report as required by *Chapter 3, Section 22623* of said Act, and as previously directed by Resolution; and,

WHEREAS, this City Council has carefully examined and reviewed the Report as presented (or amended), and is satisfied with each and all of the items and documents as set forth therein, and is satisfied that the levy has been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed, as set forth in said Report.

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR INFILL AREA LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Report as presented, is hereby approved (as amended), and is ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 3 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation and final approval of the Report.

RESOLUTION NO. 16-253

I. OVERVIEW

A. INTRODUCTION

The City of Roseville (“City”) annually levies and collects special assessments in order to maintain the improvements within the City’s existing Infill Area Landscaping and Lighting District (“District”). The District was formed and is levied annual assessments pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code (the “Act”).

The Engineer’s Report (“Report”) describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2016 through June 30, 2017. The special benefit assessments are based on historical and estimated costs to maintain the District improvements. These assessments, which provide a direct and special benefit to properties within the District, will provide funding for the operation and maintenance of District improvements.

The District consists of three (3) zones of benefit, Zones A, B and C (individually the “Zone” and collectively the “Zones”). The improvements that benefit properties within each Zone and the costs to maintain and service those improvements are identified and budgeted separately by Zone. The total cost of landscape maintenance within a Zone is equitably spread among only the benefiting parcels.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (“APN”) by the Placer County Assessor’s Office. The Placer County Auditor/Controller uses Assessor’s Parcel Numbers and specific Tax Code Accounts, to identify on the County’s tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will by resolution, order the improvements to be made, if any, and confirm the levy and collection of assessments pursuant to the Act. The assessment rates and method of apportionment described in this Report, as approved or modified by the City Council, defines the assessments to be applied to each parcel within the District and respective Zones for Fiscal Year (“FY”) 2016/17. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the FY 2016/17 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rates approved by the City Council.

B. COMPLIANCE WITH CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the Act and are in compliance with the substantive and procedural requirements of the California State Constitution Articles XIIC and XIID (“Articles XIIC and XIID”) and the provisions of the Proposition 218 Omnibus Implementation Act [Government Code Section 53750 and following] (the “Implementation Act”). Articles XIIC and XIID and the Implementation Act collectively are hereinafter referred to as “Proposition 218”.

Pursuant to the California Constitution Article XIID Section 5, certain existing assessments are exempt from the substantive and procedural requirements of Article XIID Section 4 and property owner balloting for the assessments is not required until such time that the assessments are increased. Specifically, the City determined that all improvements and the annual assessments originally established for the District were part of the conditions of property development and approved by the original property owner (developer). As such, pursuant to Article XIID Section 5(b), all the property owners approved the existing District assessments at the time the assessments were created (originally imposed pursuant to a 100% landowner petition). Therefore, the pre-existing assessment amounts (the maximum assessment rates of Zones A, B, & C identified in this Report) are exempt from the procedural requirements Article XIID Section 4, provided the assessments are not increased above these previously approved maximum assessment rates.

The District and all Zones therein have been formed pursuant to the Act. Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer’s Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the Act.

C. DESCRIPTION OF DISTRICT BOUNDARIES

The three Zones within the District are comprised of three non-contiguous residential subdivisions, namely Pheasant Run, Cirby Oaks II and Reuter Ranch, are located in the southern portion of the City and are within the boundaries of the City’s “Infill Planning Area”. A general depiction of the boundaries of each Zone can be found in Appendix A of this Report.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to this proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.

- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF IMPROVEMENTS AND BENEFITS

This District, by special benefit assessments, provides funding for the maintenance and operation of certain landscaping improvements located within the public right-of-ways and dedicated easements:

The District provides all services necessary to maintain the landscaped corridors adjacent to the privately owned parcels comprising the three subdivisions. Improvements include shrubs, trees and other landscaping vegetation, as well as irrigation controllers, automatic valves and irrigation systems. Services provided include all necessary services, operations, and maintenance required in keeping the improvements in a healthy, vigorous condition and in proper working order.

The District encompasses three subdivisions, each of which is located in a separate Zone. The Zones have specific improvements and costs associated with those improvements that benefit the parcels within each respective Zone. The total cost of landscape maintenance within a Zone is equitably spread among only the benefiting parcels within the Zone and only parcels that receive a special benefit from the improvements are assessed.

The specific locations of the improvements within each Zone of the District are described as follows:

Zone A – Pheasant Run

Maintenance of 6,880 square feet of landscaping and related improvements within the Pheasant Run subdivision.

Zone B – Cirby Oaks

Maintenance of 7,447 square feet of landscaping and related improvements within the Cirby Oaks II subdivision.

Zone C – Reuter Ranch

Maintenance of 24,700 square feet of landscaping and related improvements within the Reuter Ranch subdivision. A larger amount of landscaping benefits the properties within Reuter Ranch and typically results in a larger per parcel assessment for these properties as compared to Zones A and B.

II. METHOD OF APPORTIONMENT

A. RATE AND METHOD OF APPORTIONMENT

Pursuant to the Act, the costs of each Zone of the District must be spread to each parcel based upon a benefit formula. Each assessable parcel in the District receives a direct and special benefit from the improvements in the Zone. This direct and special benefit was determined to be equal for all dwelling units within each Zone; costs for each Zone shall be calculated separately within each respective Zone. Each single-family residence is equal to one dwelling unit (unit) and the formula used to arrive at each parcel's annual assessment is described below. Public parcels lying within the landscape corridors are considered to receive no benefit from the improvements and are therefore not assessed.

Costs associated with each Zone are to be charged only to assessable parcels within the respective Zone as follows:

$$\frac{\text{Balance to Levy in Zone}}{\text{Total Units in Zone}} = \text{Assessment Per Unit in Zone}$$

The Maximum Annual Assessment Rates are not to exceed \$193.32 per unit for Zone A and \$200.00 per unit for Zones B and C.

III. DISTRICT BUDGET

A. 2016/17 BUDGET

DESCRIPTION	ZONE A (Pheasant Run)	ZONE B (Cirby Oaks II)	ZONE C (Reuter Ranch)	TOTAL
<u>DIRECT COSTS</u>				
Contract Maintenance - Landscaping	\$1,760.00	\$1,130.00	\$600.00	\$3,490.00
Repair & Maintenance - Landscaping	1,500.00	3,000.00	3,800.00	8,300.00

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping - Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping corridors, street medians, entryways, irrigation and related drainage systems as well as maintenance of appurtenant facilities (the "improvements").

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Repair & Maintenance – Landscaping - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc. If zero, this line item may not be shown in the budget.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the

future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's' Report.

Public Hearing Publishing Costs –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A "Replenishment" increases the levy in order to replenish the Operating Reserve. On the other hand, a "Use" of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Contribution for /(Use of) Rehab Reserve — A "Contribution" increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a "Use of" of the Rehabilitation

Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

APPLIED ASSESSMENT RATES

Number of Assessable Units - The total number of residential units that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public right-of-ways or easements, common areas, and/or parcels within the boundaries of the District currently do not benefit from the improvements and are therefore not assessed.

Applied Assessment Rate per Unit - The per unit assessment rates to be applied to the non-exempt parcels within the District for the current fiscal year.

Maximum Assessment Rate per Unit - The per unit maximum assessment rates for current fiscal year.

Potential Maximum Assessment Per Zone – The total amount that can be assessed against all parcels within each Zone for the current fiscal year based upon the expected number of units to be assessed.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2016 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2016 to December 31, 2016, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 16/17 Levy – This amount is added to the levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2016 (the beginning of the Fiscal Year) through December 31, 2016. If zero, this line item may not be shown in the budget.

Use for FY 16/17 Expenses – The amount of the Operating Reserve to be used to fund FY 16/17 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2016 (the beginning of the Fiscal Year) through December 31, 2016. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2017 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2017. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All

Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2016 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2016. Streets and Highways Code 22660 allows the District generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 16/17 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 16/17 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2017 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2017. These funds shall be use to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

Should the District have no Rehabilitation Reserve balances or related activity, no Rehabilitation Reserve information shall be presented in the Report.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment. A five year Capital Improvement Plan for the rehabilitation, restoration and /or replacement of District improvements and other allowable costs is shown below for each Zone with a projected ending Rehabilitation Reserve balance.

Zone A – Projections of the Zone's future capital improvement expenditures are as follows: Repair and/or refurbish sound wall improvements: \$5,500 in FY 2018/19; and replace, repair, renovate and/or refurbish plants, landscaping and related materials: \$10,000 in FY 2016/17.

Zone B – Projections of the Zone's future capital improvement expenditures are as follows: Repair and/or refurbish sound wall improvements: \$6,500 in FY 2018/19; and replace, repair, renovate and/or refurbish plants, landscaping and related materials: \$18,000 in FY 2016/17.

Zone C – Projections of the Zone's future capital improvement expenditures are as follows: Repair and/or refurbish sound wall improvements: \$6,500 in FY 2018/19; replace, repair, renovate and/or refurbish plants, landscaping and related materials: \$15,000 in FY 2016/17; and replace or upgrade irrigation controller: \$10,000 in FY 2016/17.

Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The Assessment Diagrams for the District have previously been submitted to the City Clerk in the format required under the Act and are, by reference, made part of this Report. The boundary maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a rendering of the District and Zone Boundaries are presented herein.

**Zone C
(Reuter Ranch)**

APPENDIX B — 2016/17 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, may be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways, including public greenbelts and parkways; utility rights-of-ways; small parcels vacated by the County, bifurcated lots, and other property that cannot be developed, excepting common area parcels. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2016/17. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2016/17 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 16-254

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA ORDERING THE LEVY AND COLLECTION OF ASSESSMENTS WITHIN THE INFILL AREA LANDSCAPING AND LIGHTING DISTRICT, FOR FISCAL YEAR 2016/2017

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, the City Council of City of Roseville, California, has, by previous Resolutions, initiated proceedings, and declared its intention to levy assessments, and approved the Engineer’s Annual Levy Report (hereinafter referred to as the “Report”) that describes the assessments against parcels of land within the Infill Area Landscaping and Lighting District (hereinafter referred to as the “District”) for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code, commencing with Section 22500* (hereinafter referred to as the “Act”) to pay for the maintenance and services of all improvements and facilities related thereto; and,

WHEREAS, the Engineer selected by the City Council has prepared and filed with the City Clerk, and the City Clerk has presented to the City Council, a Report in connection with the proposed levy and collection of assessments upon eligible parcels of land within the District, and the City Council did by previous Resolution approve such Report; and,

WHEREAS, the City Council desires to levy and collect assessments against parcels of land within the District for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, to pay for the maintenance and services of all improvements and facilities related thereto; and,

WHEREAS, this City and its legal counsel have reviewed Proposition 218 and found that these assessments comply with applicable provisions of Articles XIIC and XIID of the California State Constitution.

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR THE INFILL AREA LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Following notice duly given, the City Council has held a full and fair public hearing regarding the District, the levy and collection of assessments, the Report prepared in connection therewith, and considered all oral and written statements, protests and communications made or filed by interested persons regarding these matters.

Section 2 Based upon its review (and amendments, as applicable) of the Report, a copy of which has been presented to the City Council and which has been filed with the City Clerk, the City Council hereby finds and determines that:

- i) the land within the District will be benefited by the operation, maintenance and servicing of the improvements located within the boundaries of the District;

- ii) the District includes all of the lands receiving such special benefit; and,
- iii) the net amount to be assessed upon the lands within the District in accordance with the assessment for the Fiscal Year commencing July 1, 2016 and ending June 30, 2017 is apportioned by a formula and method which fairly distributes the net amount among all eligible parcels in proportion to the estimated special benefits to be received by each parcel from the improvements and services.

Section 3 The Report and assessments as presented to the City Council and on file in the Office of the City Clerk are hereby confirmed as filed.

Section 4 The maintenance, operation and servicing of the improvements and appurtenant facilities shall be performed pursuant to the Act. The City Council hereby orders the improvements to be made, which improvements are briefly described as follows: maintenance, servicing, administration and operation of the landscape corridors adjacent to property within the Pheasant Run, Cirby Oaks II and Reuter Ranch subdivisions, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer's Annual Levy Report describes all new improvements or substantial changes in existing improvements.

Section 5 The County Auditor of the County of Placer shall enter on the County Assessment Roll, opposite each eligible parcel of land, the amount of levy so apportioned by the formula and method outlined in the Report, and such levies shall be collected at the same time and in the same manner as the County taxes are collected, pursuant to *Chapter 4, Article 2, Section 22646* of the Act. After collection by the County, the net amount of the levy shall be paid to the City Treasurer.

Section 6 The City Treasurer shall deposit all money representing assessments collected by the County for the District to the credit of a fund for the Infill Area Landscaping and Lighting District and such money shall be expended only for the maintenance, operation and servicing of the improvements, together with other expenses as described in Section 4.

Section 7 The adoption of this Resolution constitutes the District levy for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017.

Section 8 The City Clerk's designee, Willdan Financial Services, is hereby authorized and directed to file the levy with the County Auditor subsequent to the adoption of this Resolution, pursuant to Chapter 4, Article 1, Section 22641 of the Act. The City Clerk is directed to deliver a certified copy of this adopted Resolution to Willdan Financial Services within two weeks of adoption via either e-mail to mashley@willdan.com or US Mail to: Willdan Financial Services, 27368 Via Industria, Suite 200, Temecula, CA 92590 Attn: Mickey Ashley.

RESOLUTION NO. 16-255

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, AMENDING AND/OR APPROVING THE ENGINEER'S ANNUAL LEVY REPORT FOR JOHNSON RANCH LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2016/2017

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, ordered the preparation of the Engineer's Annual Levy Report (hereafter referred to as the "Report") for said district known and designated as: Johnson Ranch Landscaping and Lighting District (hereinafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, being Part 2 Division 15, of the Streets and Highways Code of the State of California, beginning with Section 22500* (hereinafter referred to as the "Act"), and,

WHEREAS, there has now been presented to this City Council the Report as required by *Chapter 3, Section 22623* of said Act, and as previously directed by Resolution; and,

WHEREAS, this City Council has carefully examined and reviewed the Report as presented (or amended), and is satisfied with each and all of the items and documents as set forth therein, and is satisfied that the levy has been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed, as set forth in said Report.

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR JOHNSON RANCH LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Report as presented, is hereby approved (as amended), and is ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 3 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation and final approval of the Report.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA ORDERING THE LEVY AND COLLECTION OF ASSESSMENTS WITHIN THE JOHNSON RANCH LANDSCAPING AND LIGHTING DISTRICT, FOR FISCAL YEAR 2016/2017

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, the City Council of City of Roseville, California, has, by previous Resolutions, initiated proceedings, and declared its intention to levy assessments, and approved the Engineer’s Annual Levy Report (hereinafter referred to as the “Report”) that describes the assessments against parcels of land within the Johnson Ranch Landscaping and Lighting District (hereinafter referred to as the “District”) for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code, commencing with Section 22500* (hereinafter referred to as the “Act”) to pay for the maintenance and services of all improvements and facilities related thereto; and

WHEREAS, the Engineer selected by the City Council has prepared and filed with the City Clerk, and the City Clerk has presented to the City Council, a Report in connection with the proposed levy and collection of assessments upon eligible parcels of land within the District, and the City Council did by previous Resolution approve such Report; and

WHEREAS, the City Council desires to levy and collect assessments against parcels of land within the District for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, to pay for the maintenance and services of all improvements and facilities related thereto.

WHEREAS, this City and its legal counsel have reviewed Proposition 218 and found that these assessments comply with applicable provisions of Articles XIIC and XIID of the California State Constitution; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR JOHNSON RANCH LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Following notice duly given, the City Council has held a full and fair public hearing regarding the District, the levy and collection of assessments, the Report prepared in connection therewith, and considered all oral and written statements, protests and communications made or filed by interested persons regarding these matters.

Section 2 Based upon its review (and amendments, as applicable) of the Report, a copy of which has been presented to the City Council and which has been filed with the City Clerk, the City Council hereby finds and determines that:

- i) the land within the District will be benefited by the operation, maintenance and servicing of the improvements located within the boundaries of the District.
- ii) the District includes all of the lands receiving such special benefit; and,
- iii) the net amount to be assessed upon the lands within the District in accordance with the assessment for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, is apportioned by a formula and method which fairly distributes the net amount among all eligible parcels in proportion to the estimated benefits to be received by each parcel from the improvements and services.

Section 3 The Report and assessments as presented to the City Council and on file in the Office of the City Clerk are hereby confirmed as filed.

Section 4 The maintenance, operation and servicing of the improvements shall be performed pursuant to the Act. The City Council hereby orders the improvements to be made, which improvements are briefly described as certain landscaping and open space areas, including floodway and stream course areas within the open space and all appurtenant facilities related thereto within the District. The Report describes the specific location of the improvement areas within the district.

Section 5 The County Auditor of the County of Placer shall enter on the County Assessment Roll, opposite each eligible parcel of land, the amount of levy so apportioned by the formula and method outlined in the Report, and such levies shall be collected at the same time and in the same manner as the County taxes are collected, pursuant to *Chapter 4, Article 2, Section 22646* of the Act. After collection by the County, the net amount of the levy shall be paid to the City Treasurer.

Section 6 The City Treasurer shall deposit all money representing assessments collected by the County for the District to the credit of a fund for the Johnson Ranch Landscaping and Lighting District and such money shall be expended only for the maintenance, operation and servicing of the improvements, together with any other expenses as described in Section 4.

Section 7 The adoption of this Resolution constitutes the District levy for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017.

Section 8 The City Clerk's designee, Willdan Financial Services, is hereby authorized and directed to file the levy with the County Auditor subsequent to the adoption of this Resolution, pursuant to Chapter 4, Article 1, Section 22641 of the Act. The City Clerk is directed to deliver a certified copy of this adopted Resolution to Willdan Financial Services within two weeks of adoption via either e-mail to mashley@willdan.com or US Mail to: Willdan Financial Services, 27368 Via Industria, Suite 200, Temecula, CA 92590 Attn: Mickey Ashley.

I. OVERVIEW

A. INTRODUCTION

The City of Roseville (“City”) annually levies and collects special assessments in order to maintain the improvements in the southeast section of the City of Roseville, known as Johnson Ranch Landscaping and Lighting District (“District”). The District was formed and is levied annual assessments pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code (the “Act”).

The Engineer’s Report (“Report”) describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2016 through June 30, 2017. The special benefit assessments are based on historical and estimated costs to maintain the District improvements. These assessments, which provide a direct and special benefit to properties within the District, will provide funding for the operation and maintenance of District improvements.

The District consists of five (5) zones of benefit, Zones A, B, C, D and E (individually the “Zone” and collectively the “Zones”). The improvements that benefit properties within each Zone and the costs to maintain and service those improvements are identified and budgeted separately by Zone. The total cost of landscape maintenance within a Zone is equitably spread among only the benefiting parcels.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (“APN”) by the Placer County Assessor’s Office. The Placer County Auditor/Controller uses Assessor’s Parcel Numbers and specific Tax Code Accounts, to identify on the County’s tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will by resolution, order the improvements to be made, if any, and confirm the levy and collection of assessments pursuant to the Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council defines the assessments to be applied to each parcel within the District and respective Zones for Fiscal Year (“FY”) 2016/17. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the FY 2016/17 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rates approved by the City Council.

B. COMPLIANCE WITH CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the Act and are in compliance with the substantive and procedural requirements of the California State Constitution Articles XIIC and XIID (“Articles XIIC and XIID”) and the provisions of the Proposition 218 Omnibus Implementation Act [Government Code Section 53750 and following] (the “Implementation Act”). Articles XIIC and XIID and the Implementation Act collectively are hereinafter referred to as “Proposition 218”.

Pursuant to the California Constitution Article XIID, Section 5, certain existing assessments are exempt from the substantive and procedural requirements of Article XIID Section 4 and property owner balloting for the assessments is not required until such time that the assessments are increased. Specifically, the City determined that all improvements and the annual assessments originally established for the District were part of the conditions of property development and approved by the original property owner (developer). As such, pursuant to Article XIID Section 5(b), all the property owners approved the existing District assessments at the time the assessments were created (originally imposed pursuant to a 100% landowner petition). Therefore, the pre-existing assessment amounts (the maximum assessment rates of Zones A, B, C & D identified in this Report) are exempt from the procedural requirements of Article XIID Section 4, provided the assessments are not increased above these previously approved maximum assessment rates.

In Fiscal Year 1999/00, the City initiated and conducted property owner protest ballot proceedings in accordance with Article XIID for Zone E in order to increase the assessment to cover additional costs for services. The proposed assessment increase presented to property owners included an annual inflationary factor of 3%. In Fiscal Year 1999/00 the maximum assessment rate was \$623.10 per acre. At the conclusion of the Public Hearing, all property owner ballots returned were tabulated and the City determine that a majority protest did not exist. The City Council then approved the increased assessment and the inflationary factor for maintaining the improvements within the District.

The District and all Zones therein have been formed pursuant to the Act. Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the Act.

C. DISTRICT BOUNDARIES

The District lies within a portion of the Southeast Roseville Specific Plan, which is located in the southeast section of the City of Roseville. The District is generally located east of I-80 on the south side of Douglas Boulevard. See Appendix A for a rendering of the District boundary map.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to this proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;

- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF THE IMPROVEMENTS AND BENEFITS

Zones A, B and C

Zones A, B and C of the District, by special benefit assessments, provide annual funding for the continual maintenance of certain landscaping, open space areas; including floodway and stream course areas as well as any the maintenance of any bike trails. The specific locations of the floodways, stream courses and areas adjacent thereto to be maintained are described below:

- Parcel 70 - Floodway that feeds Cirby Creek and is located between Douglas Boulevard and Eureka Road. (7.76 acres) - Zone C
- Parcel 71 - Strap Ravine floodway between Douglas Boulevard and East Roseville Parkway. (3.38 acres) - Zone A
- Parcel 72 - Floodway between Roseville Parkway east to commercial development. (8.98 acres) - Zone C
- Parcel 73 - Recreational floodway in Strap Ravine between East Roseville Parkway and Sierra College Boulevard. (16.11 acres) - Zone A
- Parcels 74 & 75 - Recreational floodway that eventually feeds Linda Creek, beginning at Sierra College Boulevard then east to the Roseville City limits. (6.2 acres and 10.8 acres, respectively) - Zone B

Zone D

Zone D of the District, by special benefit assessments, provides annual funding for the costs of mitigation monitoring and costs to maintain landscaped open space areas within certain wetland / riparian area(s) to comply with a Section 404 Permit. The issuance of this Section 404 permit was a condition of the development of the Johnson Ranch East Project, which represents the parcels comprising Zone D.

Zone E

Zone E of the District, by special benefit assessments, provides annual funding for the maintenance of certain landscaping, bike trails and open space areas that include floodway and stream course areas and the costs of mitigation monitoring to comply with both a Section 404 Permit (Federal) and a 1603 Permit (State). The issuance of these permits was a condition of the development of Parcel 9. The specific locations of the floodway and stream courses to be maintained are described as:

- Parcel 76 - Streambed and floodway area located at Cirby Creek from the southwest side of Eureka Boulevard to the end of the Coker Development. (2.79 acres)

II. METHOD OF APPORTIONMENT

A. DESCRIPTION OF METHOD OF APPORTIONMENT

Pursuant to the Act, the costs of the District must be spread to each parcel based upon a benefit formula. Each assessable parcel in the District receives a direct and special benefit from the improvements in the District. The formula used to arrive at each parcel's annual levy amount in each zone is as follows:

Zones A and B

Thirty percent (30%) of the total budgeted costs of Zones A & B are to be levied to floodway Parcel 82 (APN 458-020-001). The remaining Seventy percent (70%) of costs are then allocated equally on a per acre basis to all assessable parcels within these Zones. Acreage of common area parcels shall be apportioned to the remaining assessable parcels of a subdivision and/or parcel split(s) related to the creation of the common area parcel(s).

Zones C, D and E

The budgeted costs of Zones C, D and E are to be allocated equally on a per acre basis to all assessable parcels within each respective Zone. Acreage of common area parcels shall be apportioned to the remaining assessable parcels of a subdivision and/or parcel split(s) related to the creation of the common area parcel(s).

B. INFLATIONARY ADJUSTMENT FACTOR

For Zone E only, if the proposed assessment rate increases over the prior fiscal year's maximum assessment rate by a percentage no greater than the 3%, then the proposed assessment rate is not considered an increase.

C. PROPOSITION 218 BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments regarding Zone E, notably:

Article XIID Section 2d defines District as follows:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service”;

Article XIID Section 2i defines Special Benefit as follows:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4a defines proportional special benefit assessments as follows:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

The method of apportionment (method of assessment) set forth in the Report is based on the premise that each assessed property receives special benefits from the improvements within the District, and the assessment obligation for each parcel reflects that parcel’s proportional special benefits as compared to other properties that receive special benefits.

III. DISTRICT BUDGET

A. 2016/17 BUDGET

DESCRIPTION	ZONE A ⁽¹⁾	ZONE B ⁽¹⁾	ZONE C	ZONE D	ZONE E	TOTAL
<u>DIRECT COSTS</u>						
Contract Maintenance - Open Space	\$12,500.00	\$8,000.00	\$4,500.00	\$213.00	\$5,683.00	\$30,896.00

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Open Space – Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition of all open space landscaping, irrigation, drainage systems, lighting, floodplain improvements and appurtenant facilities (the “improvements”).

Mitigation Monitoring – Costs associated with monitoring certain impacts to riparian areas in or near the District under the terms of a Section 404 or 1603 permit. If zero, this line item will not be shown in the budget.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements. If zero, this line item will not be shown in the budget.

Maintenance - Bike Trails - Costs associated with the resurfacing of the Bike trail. If zero, this line item will not be shown in the budget.

Water Hyacinth Eradication – Costs associated with the eradication of the Water Hyacinth plant in the creek beds. If zero, this line item will not be shown in the budget.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year’s assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

Contract Administration – Open Space – Estimated costs of City staff to coordinate and oversee the maintenance contracts and non-contract maintenance of the open space areas of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's Report.

Public Hearing Publishing Costs – Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A "Replenishment" increases the levy in order to replenish the Operating Reserve. On the other hand, a "Use" of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Contribution for /(Use of) Rehab Reserve — A “Contribution” increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a “Use of” of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with applicable adjustments related to the Reserve Fund replenishments or reductions and/or Capital Improvement Fund activity.

Parcel 82 Levy Recap – A recap of the cost breakdown between certain parcels. Thirty percent (30%) of the total budgeted costs of Zones A & B are to be levied to floodway Parcel 82 (APN 458-020-001). 70% of costs are to be assessed to the remaining parcels.

ASSESSMENT RATES:

APPLIED ASSESSMENT RATES

Number of Assessable Parcels - The total number of parcels within each Unit that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public right-of-ways or easements, common areas, and/or parcels within the boundaries of the District that currently do not benefit from the improvements due possibly to development restrictions.

Total Assessable Acres – Non Parcel 82 Properties - The total number of acres within the Zones A and B that are to be assessed on an acreage basis for the current fiscal year; this acreage excludes Parcel 82.

Applied Assessment Rates - The assessment rates to be applied to the non-exempt parcels within the District for the current fiscal year.

Maximum Assessment Rates - The maximum assessment rates for current fiscal year.

Maximum Potential Assessment – The total amount that is expected to be assessed against all parcels within the District for the Current Fiscal Year.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2016 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2016 to December 31, 2016, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 16/17 Levy – This amount is added to the levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2016 (the beginning of the Fiscal Year) through December 31, 2016. If zero, this line item may not be shown in the budget.

Use for FY 16/17 Expenses – The amount of the Operating Reserve to be used to fund FY 16/17 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2016 (the beginning of the Fiscal Year) through December 31, 2016. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2017 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2017. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2016 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2016. Streets and Highways Code 22660 allows the District generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 16/17 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 16/17 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2017 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2017. These funds shall be use to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

Should the District have no Rehabilitation Reserve or related activity, the Rehabilitation Reserve information may not be presented in the Report.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment. A five year Capital Improvement Plan for the rehabilitation, restoration and /or replacement of District improvements and other allowable costs is shown below for each Zone with a projected ending Rehabilitation Reserve balance.

Zone B - General Open Space/creek rehabilitation: \$2,000 in FY 2017/18.

Zone D - General Open Space/creek rehabilitation: \$500 in FY 2017/18.

Zone E - General Open Space/creek rehabilitation: \$1,000 in FY 2017/18.

Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the District or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The Assessment Diagrams for the District have previously been submitted to the Clerk of the City in the format required under the Act and are, by reference, made part of this Report. The boundary maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a one-page rendering of the District's Boundaries is presented herein.

APPENDIX B — 2016/17 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, may be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways, including public greenbelts and parkways; utility rights-of-ways; small parcels vacated by the County, bifurcated lots, and other property that cannot be developed, excepting common area parcels. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2016/17. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2016/17 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 16-256

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, AMENDING AND/OR APPROVING THE ENGINEER'S ANNUAL LEVY REPORT FOR JOHNSON RANCH LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2016/2017

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, ordered the preparation of the Engineer's Annual Levy Report (hereafter referred to as the "Report") for said district known and designated as: Johnson Ranch Landscaping and Lighting District (hereinafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, being Part 2 Division 15, of the Streets and Highways Code of the State of California, beginning with Section 22500* (hereinafter referred to as the "Act"), and,

WHEREAS, there has now been presented to this City Council the Report as required by *Chapter 3, Section 22623* of said Act, and as previously directed by Resolution; and,

WHEREAS, this City Council has carefully examined and reviewed the Report as presented (or amended), and is satisfied with each and all of the items and documents as set forth therein, and is satisfied that the levy has been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed, as set forth in said Report.

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR JOHNSON RANCH LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Report as presented, is hereby approved (as amended), and is ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 3 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation and final approval of the Report.

RESOLUTION NO. 16-256

PASSED, APPROVED, AND ADOPTED THIS 15th day of June, 2016.

ENGINEER'S REPORT AFFIDAVIT

Establishment of Annual Rates and Charges for the:

North Central Roseville Specific Plan Landscaping and Lighting District

City of Roseville
Placer County, State of California

This Report describes the District and all relevant zones therein, including the improvements, budgets, parcels and assessments to be levied for Fiscal Year 2016/17 as they existed at the time of the passage of the Resolution of Intention. Reference is hereby made to the Placer County Assessor's maps for a detailed description of the lines and dimensions of parcels within the District. The undersigned respectfully submits the enclosed Report as directed by the City Council.

I. OVERVIEW

A. INTRODUCTION

The City of Roseville (“City”) annually levies and collects special assessments in order to maintain the improvements within the existing North Central Roseville Specific Plan Landscaping and Lighting District (“District”) within the City. The District was formed in 1990. The District was formed and is levied annual assessments pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code (the “Act”).

This Engineer’s Annual Levy Report for Fiscal Year 2016/17 (“Report”) describes the District, any annexations, changes to the District, and the proposed assessments for the period of July 1, 2016 through June 30, 2017. The maintenance, operation and servicing of the improvements associated with specific areas of the City that provide a special benefit to the properties in that area are identified as Zones. The costs of the improvements and services are identified and budgeted separately for each Zone and each parcel within a Zone is assessed proportionately for only those improvements and services that are a direct and special benefit to the properties within the Zone. The budgets and assessments are based on the estimated cost (considering historical costs) to maintain the District improvements that provide a direct and special benefit to properties within the District.

The District consists of four landscaping benefit Zones:

- District Wide Benefit Zone
- Local Benefit Zone
- Zone F
- Zone G

In 2003, the City initiated and conducted property owner protest ballot proceedings, in accordance with the Act and Proposition 218, for the territory now known as Zones F & G. After the results of the ballots were tabulated, the City determined that a majority protest did not exist. The City then approved the annexation of Zones F and G, the maximum assessment rates and annual inflationary adjustment factor.

In 2004, the City initiated and conducted property owner protest ballot proceedings, in accordance with the Act and Proposition 218, to reengineer Zones A, B, C, D & E and approve the maximum assessment rates and annual inflationary adjustment factor. After the results of the ballots were tabulated, the City determined that a majority protest did not exist. The City then approved the

Engineer's Annual Levy Report for FY 2004/05, which reconstituted the reengineered zones into the respective District Wide Benefit Zone or Local Benefit Zone.

Zones A, B, C, D and E were reengineered in order to more accurately identify the Zones and areas of special benefit within this portion of the District. These zones were combined into two new Zones based primarily on level of service, similarity of improvement types, and the proximity to improvements.

The word "parcel," for the purposes of this Report, refers to an individual property assigned its own Assessor's Parcel Number ("APN") by the Placer County Assessor's Office. The Placer County Auditor/Controller uses Assessor's Parcel Numbers and specific Tax Code Accounts, to identify on the County's tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will by resolution, order the improvements to be made, if any, and confirm the levy and collection of assessments pursuant to the Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council defines the assessments to be applied to each parcel within the District and respective Zones for Fiscal Year ("FY") 2016/17. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the FY 2016/17 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rates approved by the City Council.

B. COMPLIANCE WITH CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the Act and are in compliance with the substantive and procedural requirements of the California State Constitution Articles XIIC and XIID ("Articles XIIC and XIID") and the provisions of the Proposition 218 Omnibus Implementation Act [Government Code Section 53750 and following] (the "Implementation Act"). Articles XIIC and XIID and the Implementation Act collectively are hereinafter referred to as "Proposition 218".

In compliance with the provisions of Proposition 218, property owner ballot proceedings have been conducted for all Zones within the District; such proceedings approved and confirmed the Maximum Assessments and the Inflationary Adjustment Factor as described in this Report.

The District and all Zones therein have been formed pursuant to the Act. Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls.

C. DESCRIPTION OF DISTRICT BOUNDARIES

The District is located north of downtown Roseville between Interstate 80 and Washington Boulevard and generally encompasses the area within the North Central Roseville Specific Plan ("NCRSP") and two small residential developments in close proximity to the NCRSP near the corner of Diamond Oaks Road and Washington Boulevard. See Appendix A for District boundary map.

District Wide Zone This Zone includes all assessable property within the District with the exception of Zone F and Zone G.

Local Benefit Zone This Zone includes all single family residential property within the District with the exception of Zone F and Zone G.

Zone F This Zone, which comprises the Diamond Oaks Unit No. 10 development, was created on January 8, 2003 through Resolution 03-2 and was first levied in FY 2003/04. Zone F was comprised of Assessor Parcel Number ("APN") 015-020-040 prior to being subdivided into 39 residential lots.

Zone G This Zone, which comprises the Diamond Oaks Unit No. 14 development, was created on May 28, 2003 through Resolution 03-220 and was first levied in FY 2003/04. Zone G was comprised of APNs 017-041-034 & 015-020-006 prior to being subdivided into 76 residential lots and 1 non-residential parcel.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to this proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.

- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF THE IMPROVEMENTS AND MAINTENANCE

The District provides and ensures the continued maintenance, servicing, administration and operation of various landscaping and lighting improvements, and associated appurtenances that benefit parcels within the District. Services provided include all necessary service, operations, administration and maintenance required to keep the improvements in a healthy, vigorous, and satisfactory condition.

Specific improvements include all ground cover, turf, shrubs, trees, gardens, play areas and play equipment, picnic areas, bike paths, pedestrian trails, walls and fences, park maintenance facilities, irrigation and drainage systems, graffiti removal, and associated appurtenances. Improvements in each Zone include:

District Wide Zone This Zone provides for the maintenance of landscaping, fences, sound walls and other improvements within the arterial parkway right of ways, also described as scenic corridors, including but not limited to Roseville Parkway, Pleasant Grove Boulevard, Harding Boulevard and the east side of Washington Boulevard, pedestrian and bike pathways.

Local Benefit Zone This Zone provides for the maintenance of landscaping and other improvements within the local street right of ways. This Zone is primarily a combination of the old Zone C and Zone D, which provided similar maintenance.

Zone F Maintenance of parkway and perimeter landscaping and block wall adjacent to the development on the west side of Diamond Oaks Road; Parkway and perimeter landscaping, bike trails, block wall and wood fence adjacent to the development on the east side of Washington Boulevard; Open Space designated as Lot

“B”, and; Landscaping within Lot “C”, “E” and “F” within the Diamond Oaks Unit No. 10 project.

Zone G

Maintenance of parkway and perimeter landscaping, bike path and masonry sound wall adjacent to the development on the south side of Pleasant Grove Boulevard; maintenance of parkway and perimeter landscaping, bike path and masonry sound wall adjacent to the development on the west side of Washington Boulevard from Pleasant Grove Boulevard to Emerald Oak Road; maintenance of the masonry sound wall on the western perimeter of the development; installation and maintenance of perimeter landscaping on the west side of the development located on Open Space Parcel C between Emerald Oak Road and the masonry sound wall adjacent to the railroad right of way; and maintenance of Open Space, cobble swale (Lot “B”) and post and cable fencing for Lots “A”, “B”, and “C” within the Diamond Oaks Unit No. 14 project.

All assessable parcels identified as being within each Zone, share in both the cost and the benefits of the improvements. The costs associated with the improvements are equitably spread among all benefiting parcels within each Zone. Only parcels that receive direct and special benefit from the improvements are assessed, and each parcel is assessed in proportion to the estimated benefit received. The funds collected are to be dispersed and used for only the services and operation provided each Zone of the District.

II. METHOD OF APPORTIONMENT

A. GENERAL

The Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements which include the construction, maintenance and servicing of public lights, landscaping and appurtenant facilities. The Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”

The formula used for calculating assessments in each Zone of the District therefore reflects the composition of the parcels, and the improvements and services provided, to fairly apportion the costs based on estimated benefit to each parcel.

B. SPECIAL BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments, notably:

Article XIID Section 2d defines District as follows:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service”;

Article XIID Section 2i defines Special Benefit as follows:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4a defines proportional special benefit assessments as follows:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment

will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

This District was formed to establish and provide for the improvements that enhance the presentation of the surrounding properties and developments. These improvements will directly benefit the parcels to be assessed within the District. The assessments and method of apportionment is based on the premise that the assessments will be used to construct and install landscape and lighting improvements within the District as well as provide for the annual maintenance of those improvements, and the assessment revenues generated by District will be used solely for such purposes.

The City has initiated and conducted property owner protest ballot proceedings in accordance with the Act and Proposition 218 for all Zones within the District. Each of the proposed improvements; the associated costs and assessments have been carefully reviewed, identified and allocated based on special benefit pursuant to the provisions of Article XIID and the Act. All improvements associated with the Zones have been identified as necessary, required and/or desired for the orderly development of the properties to their full potential. As such, these improvements would be necessary and required of individual property owners for the development of such properties and the ongoing operation, servicing and maintenance of these improvements would be the financial obligation of those properties. Therefore, the improvements and the annual costs of ensuring the maintenance and operation of the improvements are of direct and special benefit to the properties.

The method of apportionment (method of assessment) is based on the premise that each assessed parcel within these Zones receives special benefit from the improvements. The desirability and security of properties is enhanced by well-maintained landscaping in close proximity to those properties.

The special benefits associated with all landscaping improvements are specifically:

- Enhanced desirability of properties through association with the improvements.
- Improved aesthetic appeal of properties providing a positive representation of the area and properties.
- Enhanced adaptation of the urban environment within the natural environment from adequate green space and landscaping.
- Environmental enhancement through improved erosion resistance, dust and debris control, and fire prevention.

- Increased sense of pride in ownership of property within the Zones resulting from well-maintained improvements associated with the properties.
- Enhanced quality of life through well-maintained green belts and landscaped areas.
- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the Zones through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels by moderating temperatures, providing oxygenation and attenuating noise.

All of the preceding special benefits allow the property to be developed for the enjoyment of the property owners and contribute to a specific enhancement and desirability of each of the assessed parcels within the Zones.

The improvements are for the special benefit, enhancement and use of properties within the Zones. Although the improvements include public easements, right-of-ways, streets and other amenities available or visible to the public at large, the construction and installation of these improvements are only necessary for the development of properties within the Zones and are not required nor necessarily desired by any properties or developments outside the Zone's boundaries. Therefore, any public access or use of the improvements by others is incidental and there is no measurable general benefit to properties outside the Zones or to the public at large. In making this determination, it should be noted that all parkway and perimeter landscaping within the City is both funded and maintained by a special district, individual property owners or through some type of association.

C. DESCRIPTION OF THE METHOD OF APPORTIONMENT

Pursuant to the Act, the costs of each Zone may be apportioned by any formula or method that fairly distributes the net amount to be assessed, among all assessable parcels within the Zone in proportion to the estimated special benefits to be received by each such parcel from the improvements. The special benefit formula used for each Zone should reflect the composition of the parcels, and the improvements and services provided, to fairly proportion the Zone's costs based on estimated special benefit to each parcel within the Zone. All assessable parcels within each Zone shall receive a direct special benefit from the services and improvements provided by the Zone.

Considering the composition of the parcels within the Zone, each parcel is assigned an Equivalent Dwelling Unit ("EDU"), which reflects each parcel's estimated special benefit from the improvements as compared to other parcels within the Zone. Because all assessable parcels within each Zone are

considered to benefit from the Zone improvements on an EDU basis, the amounts to levy to each Zone is then spread to each assessable parcel within the Zone on an EDU method as shown in the table below. Acreage of common area parcels shall be apportioned to the remaining assessable parcels of a subdivision and/or parcel split(s) related to the creation of the common area parcel(s).

The following formulas are used to calculate the assessment for each parcel:

ASSIGNED EDU	PROPERTY CLASS
1.0 per unit	Single-Family Residential Parcels
0.6 per unit	Multi-Family Residential Parcels
7.0 per acre	Non-Residential Parcels

For each Zone, the Applied Assessment Rate per Equivalent Dwelling Unit for each parcel in the Zone is the result of dividing the total Balance to Levy for each Zone, by the sum of the Zone EDU's for the fiscal year. This Applied Assessment Rate is multiplied by each parcel's individual EDU to determine the parcel's levy amount. The assessment cannot be greater than the current maximum assessment rate, as adjusted for the inflation factor.

$$\text{Total Balance to Levy} / \text{Total EDU} = \text{Rate per EDU}$$

$$\text{Parcel EDU} \times \text{Rate per EDU} = \text{Parcel Levy Amount}$$

D. INFLATIONARY ADJUSTMENT FACTOR

Any new or increase in assessments require certain noticing and meeting requirements by law. Prior to the passage of Proposition 218, legislative changes in the Brown Act defined a new or increased assessment to exclude certain conditions. These conditions included any assessment that does not exceed an assessment formula or range of assessments previously adopted by the agency or approved by the voters in the area where the assessment is imposed. This definition and conditions were later confirmed through Senate Bill 919 (the implementing legislation for Proposition 218).

The purpose of establishing an assessment range formula is to provide for reasonable increases and inflationary adjustment to annual assessments without requiring costly noticing and mailing procedures, which could add to the District costs and assessments. As part of the District formation, balloting of property owners is required, pursuant to Proposition 218. The property owner ballots included an Assessment to be approved, as well as the approval of an assessment range formula.

The assessment range formula shall be applied to all future assessments within the District. Generally, if the proposed annual assessment (levy per unit or rate) for the current fiscal year is less than or equals to the “Maximum Assessment” (or “Adjusted Maximum Assessment”), then the proposed annual assessment is not considered an increased assessment. The Maximum Assessment is equal to the initial Assessment approved by property owners adjusted annually by the following criteria:

1. Beginning in the second fiscal year and each fiscal year thereafter, the Maximum Assessment will be calculated.
2. The new Adjusted Maximum Assessment for the year represents the prior year’s approved Maximum Assessment increased by three percent (3.0%).

The Maximum Assessment is adjusted annually and is calculated independent of the District’s annual budget and proposed annual assessment. Any proposed annual assessment less than or equal to this Maximum Assessment is not considered an increased assessment, even if the proposed assessment is greater than the assessment applied in the prior fiscal year.

The approved base year maximum assessment rates and annual inflationary adjustment factors for all Zones are shown in the table below:

Zone	Year of Approved Maximum Rate and Annual Inflation (Base Year)	Maximum Assessment Rate per EDU (Base Year)	Annual Inflationary Adjustment Factor
District-Wide Benefit Zone	FY 2004/05	\$40.82	3.00%
Local Benefit Zone	FY 2004/05	43.92	3.00%
Zone F	FY 2003/04	481.35	3.00%
Zone G	FY 2003/04	264.22	3.00%

III. DISTRICT BUDGET

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping - Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping improvements, irrigation and related drainage systems, as well as maintenance of appurtenant facilities (the "improvements").

Repair & Maintenance - Landscaping/Parks - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc. If zero, this line item may not be shown in the budget.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Maintenance – Bike Trails – Costs to perform the necessary maintenance of the bike trails within the District. If zero, this line item may not be shown in the budget.

Maintenance – Open Space – Costs to perform the necessary maintenance of the open space areas within the District. If zero, this line item may not be shown in the budget.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's' Report.

Public Hearing Publishing Costs –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A "Replenishment" increases the levy in order to replenish the Operating Reserve. On the other hand, a "Use" of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in

the budget. Further information regarding the function of the Operating Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Contribution for /(Use of) Rehab Reserve — A “Contribution” increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a “Use of” of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected in the District through assessments for the current fiscal year. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

APPLIED ASSESSMENT RATES

Total Assessable Single Family Units - The total number of assessable single family units within the District for the current fiscal year. Since each single family residential parcel is in both the District-Wide Benefit Zone and the Local Benefit Zone, the single family EDUs are only added once to arrive at the "Total Equivalent Dwelling Units"

Total Assessable Multi-Family Units - The total number of assessable multi-family units within the District for the current fiscal year.

Total Assessable Non-Residential Acres - The total assessable non-residential acres within the District for the current fiscal year.

Total Equivalent Dwelling Units (“EDUs”) - Total assessable EDUs within the District for the current fiscal year.

Applied Assessment Rates per EDU - The assessment rates per EDU to be applied to the non-exempt parcels within the applicable Zone for the current fiscal year.

Maximum Assessment Rates per EDU - The maximum assessment rates per EDU to for the parcels of within the applicable Zone for the current fiscal year.

Potential Maximum Assessment Per Zone – The total amount that can be assessed against all parcels within each Zone for the current fiscal year based upon the expected number of parcels to be assessed.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2016 - The District's anticipated beginning balance of cash and receivables net of any unpaid prior year obligations. These beginning balances shall be used to fund the District's expenditures from July 1, 2016 to December 31, 2016, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 16/17 Levy – This amount is added to the levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2016 (the beginning of the Fiscal Year) through December 31, 2016. If zero, this line item may not be shown in the budget.

Use for FY 16/17 Expenses – The amount of the Operating Reserve to be used to fund FY 16/17 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2016 (the beginning of the Fiscal Year) through December 31, 2016. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2017 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2017. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed

the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2016 — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2016. Streets and Highways Code 22660 allows the District generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 16/17 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 16/17 Rehab Projects — The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2017 — The projected balance of funds in the Rehabilitation Reserve as of June 30, 2017. These funds shall be use to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment. Should the District have no Rehabilitation Reserve or related activity, the Rehabilitation Reserve information may not be presented in the Report.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment. A five year Capital Improvement Plan for the rehabilitation, restoration and /or replacement of District improvements and other allowable costs is shown below for each Zone with a projected ending Rehabilitation Reserve balance.

District Wide Zone - Projections of the Zone's future capital improvement expenditures are as follows: Replace, repair, renovate and/or refurbish plants, landscaping, irrigation and related materials: \$20,000 each in FYs 2017/18, 2018/19 and 2019/20; repair, replace and/or refurbish sound wall improvements: \$6,500 in FY 2017/18.

Local Benefit Zone - Projections of the Zone's future capital improvement expenditures are as follows: Replace, repair, renovate and/or refurbish plants, landscaping, irrigation and related materials: \$20,000 each in FYs 2017/18 and 2018/19 and \$15,000 each in FYs 2019/20 and 2020/21.

Zone F – Projections of the Zone's future capital improvement expenditures are as follows: Repair, replace and/or refurbish fencing improvements: \$8,000 in FY 2017/18; replace, repair, renovate and/or refurbish plants, landscaping, irrigation and related materials: \$5,000 each in FYs 2017/18 and 2018/19; and, replace irrigation controller: \$9,000 in FY 2017/18.

Zone G – Projections of the Zone's future capital improvement expenditures are as follows: Repair, replace and/or refurbish sound wall improvements: \$9,000 in FY 2017/18; replace, repair, renovate and/or refurbish plants, landscaping, irrigation and related materials: \$10,000 each in FYs 2017/18 and 2018/19; replace irrigation controller: \$15,000 in FY 2017/18.

Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map for the District has previously been submitted to the Clerk of the City in the format required under the Act and is, by reference, hereby made part of this Report. These District Boundary Maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a rendering of the District's Boundaries is presented herein.

APPENDIX B — 2016/17 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

Due to the size of the Assessment Roll, a listing of parcels to be assessed within this District, along with the proposed assessment amounts, may be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways, including public greenbelts and parkways; utility rights-of-ways; small parcels vacated by the County, bifurcated lots, and other property that cannot be developed, excepting common area parcels. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2016/17. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2016/17 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 16-258

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, ORDERING THE LEVY AND COLLECTION OF ASSESSMENTS WITHIN THE NORTH CENTRAL ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2016/2017

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, the City Council of City of Roseville, California, has, by previous Resolutions, initiated proceedings, and declared its intention to levy assessments, and approved the Engineer's Annual Levy Report (hereinafter referred to as the "Report") that describes the assessments against parcels of land within the North Central Roseville Specific Plan Landscaping and Lighting District (hereinafter referred to as the "District") for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code, commencing with Section 22500* (hereinafter referred to as the "Act") to pay for the maintenance and services of all improvements and facilities related thereto; and,

WHEREAS, the Engineer selected by the City Council has prepared and filed with the City Clerk, and the City Clerk has presented to the City Council, a Report in connection with the levy and collection of assessments upon eligible parcels of land within the District, and the City Council did by previous Resolution approve such Report; and,

WHEREAS, the City Council desires to levy and collect assessments against parcels of land within the District for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, to pay for the maintenance and services of all improvements and facilities related thereto; and,

WHEREAS, the City Council and its legal counsel have reviewed Proposition 218 and found that these assessments comply with applicable provisions of Articles XIII C and XIII D of the California State Constitution.

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR NORTH CENTRAL ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Following notice duly given, the City Council has held a full and fair Public Hearing regarding the District, the levy and collection of assessments, the Report prepared in connection therewith, and considered all oral and written statements, protests and communications made or filed by interested persons regarding these matters.

Section 2 Based upon its review (and amendments, as applicable) of the Report, a copy of which has been presented to the City Council and which has been filed with the City Clerk, the City Council hereby finds and determines that:

- i) the land within the District will be benefited by the operation, maintenance and servicing of the improvements located within the boundaries of the District; and,

- ii) the District includes all of the lands receiving such special benefit; and,
- iii) the net amount to be assessed upon the lands within the District in accordance with the assessment for the Fiscal Year commencing July 1, 2016 and ending June 30, 2017 is apportioned by a formula and method which fairly distributes the net amount among all eligible parcels in proportion to the estimated special benefits to be received by each parcel from the improvements and services.

Section 3 The Report and assessments as presented to the City Council and on file in the Office of the City Clerk are hereby confirmed as filed.

Section 4 The maintenance, operation and servicing of the improvements and appurtenant facilities shall be performed pursuant to the Act. The City Council hereby orders the improvements to be made, which improvements are briefly described as follows: the maintenance and operation of and the furnishing of services, materials or improvements for certain landscaped areas including open space areas, parkways, slopes and medians and other public improvements within the street right of way areas, including, but not limited to trees, shrubs, turf and other ornamental vegetation, drainage and irrigation systems, and other appurtenant facilities. The Engineer's Annual Levy Report, as ordered by previous Resolution, provides a full and complete description of all improvements and any or all substantial changes to the improvements within the District.

Section 5 The County Auditor of the County of Placer shall enter on the County Assessment Roll opposite each eligible parcel of land the amount of levy so apportioned by the formula and method outlined in the Report, and such levies shall be collected at the same time and in the same manner as the County taxes are collected, pursuant to *Chapter 4, Article 2, Section 22646* of the Act. After collection by the County, the net amount of the levy shall be paid to the City Treasurer.

Section 6 The City Treasurer shall deposit all money representing assessments collected by the County for the District to the credit of a fund for the North Central Roseville Specific Plan Landscaping and Lighting District and such money shall be expended only for the maintenance, operation and servicing of the landscaping, lighting and appurtenant facilities, together with other expenses as described in Section 4.

Section 7 The adoption of this Resolution constitutes the District levy for the Fiscal Year commencing July 1, 2016 and ending June 30, 2017.

Section 8 The City Clerk's designee, Willdan Financial Services, is hereby authorized and directed to file the levy with the County Auditor subsequent to the adoption of this Resolution, pursuant to Chapter 4, Article 1, Section 22641 of the Act. The City Clerk is directed to deliver a certified copy of this adopted Resolution to Willdan Financial Services within two weeks of adoption via either e-mail to mashley@willdan.com or US Mail to: Willdan Financial Services, 27368 Via Industria, Suite 200, Temecula, CA 92590 Attn: Mickey Ashley.

RESOLUTION NO. 16-259

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, AMENDING AND/OR APPROVING THE ENGINEER'S ANNUAL LEVY REPORT FOR NORTHWEST ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2016/2017

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, ordered the preparation of the Engineer's Levy Report (hereafter referred to as the "Report") for said district known and designated as: Northwest Roseville Specific Plan Landscaping and Lighting District (hereinafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, being Part 2 Division 15, of the Streets and Highways Code of the State of California, beginning with Section 22500* (hereinafter referred to as the "Act"), and,

WHEREAS, there has now been presented to this City Council the Report as required by *Chapter 3, Section 22623* of said Act, and as previously directed by Resolution; and,

WHEREAS, this City Council has carefully examined and reviewed the Report as presented (or amended), and is satisfied with each and all of the items and documents as set forth therein, and is satisfied that the levy has been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed, as set forth in said Report.

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR NORTHWEST ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Report as presented, is hereby approved (as amended), and is ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 3 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation and final approval of the Report.

RESOLUTION NO. 16-259

PASSED, APPROVED, AND ADOPTED THIS 15th day of June, 2016.

I. OVERVIEW

A. INTRODUCTION

The City of Roseville (“City”) annually levies and collects special assessments in order to provide and maintain the improvements within the Northwest Roseville Specific Plan Area, known as Northwest Roseville Specific Plan Landscaping and Lighting District (“District”) within the City. The District was formed and is levied annual assessments pursuant to *the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code* (the “1972 Act” or the “Act”).

This Engineer’s Levy Report (“Report”) describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2016 through June 30, 2017. The assessments are based on the historical and estimated costs to maintain the improvements that provide a direct and special benefit to properties within the District. The District consists of two (2) benefit zones (“Zones”). The improvements that benefit properties within each Zone and the costs of those improvements are identified and budgeted separately. Each parcel is assessed proportionately for the estimated costs of the parcel’s respective Zone.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number by the Placer County Assessor’s Office. The Placer County Auditor/Controller (“County Auditor/Controller”) uses Assessor’s Parcel Numbers and specific Tax Code Accounts, to identify on the County’s tax roll, properties assessed for special district benefit assessments.

Following consideration of public comments at a public hearing, and a final review of the Report, the City Council may order amendments to the Report or confirm the Report as submitted. After final approval of the Report, and confirmation of the assessments, the assessment information will be submitted to the County Auditor/Controller. The County Auditor/Controller will include the assessments on the property tax roll for fiscal year 2016/17.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved by the City Council.

B. COMPLIANCE WITH CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the 1972 Act and are in compliance with the provisions of the *California Constitution Article XIID* (Proposition 218). Pursuant to the *California Constitution Article XIID* (“Article XIID”) *Section 5*, certain existing assessments are exempt from the substantive and procedural requirements of *Article XIID Section 4* and property owner balloting for the assessments is not required until such time that the assessments are increased. Specifically, the City determined that all improvements and the annual assessments established for the original District were part of the conditions of property development and approved by the original property owner (developer). As such, pursuant to *Article XIID Section 5(b)*, the property owners approved these existing District assessments at the time the assessments were created (originally imposed pursuant to a 100% landowner petition). Therefore, the pre-existing assessment amounts (the maximum assessment rates of the original Zones A and B identified in this Report) are exempt from the procedural requirements *Article XIID Section 4*.

The District and all Zones therein have been formed pursuant to the 1972 Act. Pursuant to the 1972 Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments and to review the Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the 1972 Act.

In November 2004, the City initiated and conducted property owner protest ballot proceedings, in accordance with the 1972 Act and Article XIID, to annex into Zone A, and approve the maximum assessment rates. At the conclusion of the Public Hearing, the City determined that a majority protest did not exist. The City then approved the Engineer’s Report, through the adoption of Resolution No. 04-507, which annexed the Dunmore Junction territory to Zone A. Dunmore Junction was first assessed by the District in FY 2005/06.

In April 2005, the City initiated and conducted property owner protest ballot proceedings, in accordance with the 1972 Act and Article XIID, to annex into Zones B, and approve the maximum assessment rates. At the conclusion of the Public Hearing, the City determined that a majority protest did not exist. The City then approved the Engineer’s Report, through the adoption of Resolution No. 05-165, which annexed the Legacy subdivision territory to Zone B. The Legacy subdivision was first assessed by the District in FY 2005/06.

C. DESCRIPTION OF DISTRICT BOUNDARIES

The Northwest Roseville Specific Plan Landscaping and Lighting District lies west of the existing urban area of the City of Roseville. The District is generally bounded by Baseline Road to the north, Fiddymont Road to the west and Washington Boulevard to the east. The City annexed in Dunmore Junction, which is generally located on the east side of Porter Drive, south of Junction Boulevard and north of Lawton Avenue. The City also annexed in Legacy Subdivision, which is generally located on the northwest corner of Washington Boulevard and Junction Boulevard. For general reference purposes, renderings of the District's Boundaries are presented in Appendix A of the Report.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to this proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;

- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF IMPROVEMENTS AND SERVICES

Zone A

Zone A of the District, by special benefit assessments, is to provide funding for the maintenance of the following improvements: landscaped street medians and landscaped corridors adjacent to property within the District including but not limited to, plantings, sound walls, and project identification signs; the maintenance of the vernal pool preserves identified in the Northwest Roseville Specific Plan; the installation and maintenance of bike trails within the Northwest Roseville Specific Plan Area; and the installation of park improvements and/or the payment of debt service related to the installation of bike trails and/or park improvements within the Northwest Roseville Specific Plan Area.

Zone B

Zone B of the District, by special benefit assessments, is to provide funding for the following:

- The maintenance of the landscaped street buffers or medians, certain natural areas within the subdivision and landscape corridors adjacent to the property within the Zone (including, but not limited to, planting, screen walls, project identification signs, and drainage and wetlands areas within the property).
- The perpetual maintenance of the landscape strips adjacent to the Sierra Crossing subdivision contiguous to Foothills Boulevard and Booth Road, including but not limited to maintenance of the planting, screen walls, and project identification signs.
- The maintenance of the natural border adjoining and contiguous to the westerly border of Sierra Crossing.
- The maintenance of the wetland preserve area.
- The on-going maintenance of the landscape strips adjacent to the Legacy subdivision contiguous to Junction Boulevard, Washington Boulevard and Sawtell Road, including but not limited to maintenance of the planting, screen walls, and project identification signs.
- The maintenance of natural border adjoining and contiguous to the westerly border of the Legacy subdivision.

II. METHOD OF APPORTIONMENT

A. GENERAL

The 1972 Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements, which include the construction, maintenance, and servicing of public lights, landscaping and appurtenant facilities. The 1972 Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”

The formula used for calculating assessments reflects the composition of the parcels, and the improvements and services provided, to fairly apportion the costs based on estimated benefit to each parcel.

B. DESCRIPTION OF METHOD OF APPORTIONMENT

Pursuant to the Act, the costs of the District may be apportioned by any formula or method that fairly distributes the net amount to be assessed, among all assessable parcels in proportion to the estimated special benefits to be received by each such parcel from the improvements. The special benefit formula used for any special benefit assessment should reflect the composition of the parcels, and the improvements and services provided, to fairly apportion the costs based on estimated special benefit to each parcel. All assessable parcels in the District receive a direct special benefit from the services and improvements provided by the District.

Each parcel within this District has been assigned an Equivalent Benefit Unit (EBU), which reflects each parcel's estimated special benefit from the improvements as compared to other parcels within each Zone of Northwest Roseville LLD District. The levy amount is spread evenly to each assessable parcel in the District, on a per benefit unit (per parcel) method.

The Levy per Equivalent Benefit Unit (Rate) applied to each parcel is the result of dividing the total Balance to Levy, by the sum of the District's EBU's, for the fiscal year. This Rate is multiplied by each parcel's individual EBU to determine the parcel's levy amount.

The following formulas are used to calculate the assessment for each parcel:

Zone A

Total number of lots based on final filed maps, divided into the total annual estimated costs of Zone A.

Zone B

Total number of lots based on final filed maps, divided into the total annual estimated costs of Zone B.

C. PROPOSITION 218 BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments regarding the Dunmore Junction subdivision Legacy subdivision annexations to the District, notably:

Article XIID Section 2d defines District as follows:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service”;

Article XIID Section 2i defines Special Benefit as follows:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4a defines proportional special benefit assessments as follows:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

Each of the proposed improvements, the associated costs and assessments have been carefully reviewed, identified and allocated based on special benefit pursuant to the provisions of the Constitution and 1972 Act. All improvements associated with this District have been identified as necessary, required and/or desired for the orderly development of the properties within the District to their full potential, consistent with the proposed development plans and applicable portions of the City General Plan and the Northwest Roseville Specific Plan. As such, the improvements for which each property shall be assessed would be necessary and required of individual property owners for the development of such properties and the ongoing operation, servicing and maintenance of these improvements would be the financial obligation of those properties. Therefore, the improvements and the annual costs of ensuring the maintenance and operation of the improvements are of direct and special benefit to the properties.

The method of apportionment (method of assessment) is based on the premise that each assessed parcel within the District receives benefit from the improvements. Well-maintained landscaping and recreational facilities in close proximity to those properties enhances the desirability of those properties.

The special benefits associated with the landscape improvements and associated appurtenants are specifically:

- Enhanced desirability of properties through association with the improvements.
- Improved aesthetic appeal of properties providing a positive representation of the area and properties.
- Enhanced adaptation of the urban environment within the natural environment from adequate green space and landscaping.
- Environmental enhancement through improved erosion resistance, dust and debris control, and fire prevention.
- Increased sense of pride in ownership of property within the District resulting from well-maintained improvements associated with the properties.
- Enhanced quality of life through well-maintained green belts, landscaped areas and recreational facilities.
- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the District through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels by moderating temperatures, providing oxygenation and attenuating noise.

All of the preceding special benefits allow the property to be developed for the enjoyment of the property owners and contribute to a specific enhancement and desirability of each of the assessed parcels within the District.

The improvements are for the special benefit, enhancement and use of properties within the District and the Northwest Roseville Specific Plan Area. Although the improvements include public easements, right-of-ways and other amenities available or visible to the public at large, it has been determined that the additional improvements installed in connection with this development and those installed as part of the overall Northwest Roseville Specific Plan, are only necessary for the development of properties within the specific plan area and were not required nor necessarily desired by any properties or developments outside the Northwest Roseville Specific Plan Area. Therefore this District being part of that plan, receives similar and proportional special benefits from both the improvements installed in connection with developing properties in this District as well as existing and future shared amenities within the Northwest Roseville LLD. Any public access or use of the improvements by others is incidental and there is no measurable general benefit to properties outside the specific plan area or to the public at large.

III. DISTRICT BUDGET

A. 2016/17 BUDGET

D. DESCRIPTION OF BUDGET ITEMS

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping - Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping corridors, street medians, entryways, irrigation and related drainage systems as well as maintenance of appurtenant facilities (the "improvements").

Repair & Maintenance – Landscaping / Parks - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc. If zero, this line item may not be shown in the budget.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Stormwater Management / Drainage - This line item includes costs to properly maintain certain drainage and / or wetlands areas within the District. If zero, this line item may not be shown in the budget.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's' Report.

Public Hearing Publishing Costs –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A "Replenishment" increases the levy in order to replenish the Operating Reserve. On the other hand, a "Use" of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Contribution for /(Use of) Rehab Reserve — A “Contribution” increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a “Use of” of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

Number of Assessable Units - The total number of assessable units within the District for the Current Fiscal Year.

Applied Assessment Rates per Unit - The assessment rates to be applied to each parcel within the District for the current fiscal year.

Maximum Assessment Rates per Unit - The maximum assessment rates for the current fiscal year.

Potential Maximum Assessment Per Zone – The total amount that can be assessed against all parcels within each Zone for the current fiscal year based upon the expected number of units to be assessed.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2016 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2016 to December 31, 2016, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 16/17 Levy – This amount is added to the levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2016 (the beginning of the Fiscal Year) through December 31, 2016. If zero, this line item may not be shown in the budget.

Use for FY 16/17 Expenses – The amount of the Operating Reserve to be used to fund FY 16/17 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2016 (the beginning of the Fiscal Year) through December 31, 2016. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2017 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2017. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating

Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2016 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2016. Streets and Highways Code 22660 allows the District generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 16/17 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 16/17 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2017 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2017. These funds shall be use to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

Should the District have no Rehabilitation Reserve balances or related activity, no Rehabilitation Reserve information shall be presented in the Report.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment. A five year Capital Improvement Plan for the rehabilitation, restoration and /or replacement of District improvements and other allowable costs is shown below for each Zone with a projected ending Rehabilitation Reserve balance.

Zone A - Projections of the Zone's future capital improvement expenditures are: repair, replacement and/or refurbishment of fencing improvements \$15,000 in FY 2016/17, \$150,000 in FY 2017/18 and \$30,000 in FY 2018/19; replacement, repair, renovation and/or refurbishment of plants, landscape & related materials: \$10,000 in FY 2016/17 and \$35,000 each in FY 2018/19 and FY 2019/20; and, grid tree pruning, removal and replacement of declining trees \$5,000 in FY 2016/17 and \$25,000 in each of FYs 2017/18 to 2020/21.

Zone B - Projections of the Zone's future capital improvement expenditures are repair, replacement and/or refurbishment of fencing improvements: \$25,000 in FY 2017/18.

From time to time, funds held in a Rehabilitation Reserve may be needed to respond to changing needs due to the condition of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and / or operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map of the District and Zones have previously been submitted to the Clerk of the City in the format required under the Act and are, by reference, hereby made part of this Report. The boundary maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a rendering of the District's Boundaries is represented herein.

SHEET 1 OF 1

CITY OF ROSEVILLE
COUNTY OF PLACER
STATE OF CALIFORNIA

JUNCTION BOULEVARD

THE LINES AND DIMENSIONS OF EACH LOT OR PARCEL SHOWN ON THIS DIAGRAM SHALL BE THE SAME AS SHOWN ON THE PLACER COUNTY AGGREGATE MAPS FOR THOSE PARCELS LISTED.

THE PLACER COUNTY AGGREGATE MAPS SHALL GOVERN FOR ALL DETAILS CONCERNING THE LINES AND DIMENSIONS OF EACH LOT OR PARCEL.

(04-111) NOVEMBER 2004

APPENDIX B — 2016/17 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

Due to the size of the Assessment Roll, a listing of parcels to be assessed within this District, along with the proposed assessment amounts, shall be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways including public greenbelts and parkways; utility rights-of-ways; common areas; landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2016/17. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2016/17 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 16-260

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA ORDERING THE LEVY AND COLLECTION OF ASSESSMENTS WITHIN THE NORTHWEST ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, FOR FISCAL YEAR 2016/2017

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, the City Council of City of Roseville, California, has, by previous Resolutions, initiated proceedings, and declared its intention to levy assessments, and approved the Engineer’s Levy Report (hereinafter referred to as the “Report”) that describes the assessments against parcels of land within the Northwest Roseville Specific Plan Landscaping and Lighting District (hereinafter referred to as the “District”) for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code, commencing with Section 22500* (hereinafter referred to as the “Act”) to pay for the maintenance and services of all improvements and facilities related thereto; and

WHEREAS, the Engineer selected by the City Council has prepared and filed with the City Clerk, and the City Clerk has presented to the City Council, a Report in connection with the proposed levy and collection of assessments upon eligible parcels of land within the District, and the City Council did by previous Resolution approve such Report; and

WHEREAS, the City Council desires to levy and collect assessments against parcels of land within the District for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, to pay for the maintenance and services of all improvements and facilities related thereto.

WHEREAS, this City and its legal counsel have reviewed Proposition 218 and found that these assessments comply with applicable provisions of Articles XIIC and XIID of the California State Constitution; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR NORTHWEST ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Following notice duly given, the City Council has held a full and fair public hearing regarding the District, the levy and collection of assessments, the Report prepared in connection therewith, and considered all oral and written statements, protests and communications made or filed by interested persons regarding these matters.

Section 2 Based upon its review (and amendments, as applicable) of the Report, a copy of which has been presented to the City Council and which has been filed with the City Clerk, the City Council hereby finds and determines that:

- i) the land within the District will be benefited by the operation, maintenance and servicing of the improvements located within the boundaries of the District;
- ii) the District includes all of the lands receiving such special benefit; and,
- iii) the net amount to be assessed upon the lands within the District in accordance with the assessment for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, is apportioned by a formula and method which fairly distributes the net amount among all eligible parcels in proportion to the estimated benefits to be received by each parcel from the improvements and services.

Section 3 The Report and assessments as presented to the City Council and on file in the Office of the City Clerk are hereby confirmed as filed.

Section 4 The maintenance, operation and servicing of the improvements shall be performed pursuant to the Act. The City Council hereby orders the improvements to be made, which improvements are briefly described as follows: turf, ground cover, shrubs and trees, irrigation systems, drainage systems, natural areas, open space areas, public pedestrian paths, entry monuments, fencing, lighting systems, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer's Levy Report describes all new improvements or substantial changes in existing improvements.

Section 5 The County Auditor of the County of Placer shall enter on the County Assessment Roll, opposite each eligible parcel of land, the amount of levy so apportioned by the formula and method outlined in the Report, and such levies shall be collected at the same time and in the same manner as the County taxes are collected, pursuant to *Chapter 4, Article 2, Section 22646* of the Act. After collection by the County, the net amount of the levy shall be paid to the City Treasurer.

Section 6 The City Treasurer shall deposit all money representing assessments collected by the County for the District to the credit of a fund for the Northwest Roseville Specific Plan Landscaping and Lighting District and such money shall be expended only for the maintenance, operation and servicing of the improvements, together with other expenses as described in Section 4.

Section 7 The adoption of this Resolution constitutes the District levy for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017.

Section 8 The City Clerk's designee, Willdan Financial Services, is hereby authorized and directed to file the levy with the County Auditor subsequent to the adoption of this Resolution, pursuant to Chapter 4, Article 1, Section 22641 of the Act. The City Clerk is directed to deliver a certified copy of this adopted Resolution to Willdan Financial Services within two weeks of adoption via either e-mail to mashley@willdan.com or US Mail to: Willdan Financial Services, 27368 Via Industria, Suite 200, Temecula, CA 92590 Attn: Mickey Ashley.

RESOLUTION NO. 16-261

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, AMENDING AND/OR APPROVING THE ENGINEER'S ANNUAL LEVY REPORT FOR OLYMPUS POINTE LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2016/2017

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, ordered the preparation of the Engineer's Levy Report (hereafter referred to as the "Report") for said district known and designated as: Olympus Pointe Landscaping and Lighting District (hereinafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, being Part 2 Division 15, of the Streets and Highways Code of the State of California, beginning with Section 22500* (hereinafter referred to as the "Act"); and,

WHEREAS, there has now been presented to this City Council the Report as required by *Chapter 3, Section 22623* of said Act, and as previously directed by Resolution; and,

WHEREAS, this City Council has carefully examined and reviewed the Report as presented (or amended), and is satisfied with each and all of the items and documents as set forth therein, and is satisfied that the levy has been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed, as set forth in said Report.

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR OLYMPUS POINTE LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Report as presented, is hereby approved (as amended), and is ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 3 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation and final approval of the Report.

ENGINEER'S REPORT AFFIDAVIT

Establishment of Annual Rates and Charges for the:

Olympus Pointe Landscaping and Lighting District

City of Roseville
Placer County, State of California

This Report describes the District and all relevant zones therein, including the improvements, budgets, parcels and assessments to be levied for Fiscal Year 2016/17 as they existed at the time of the passage of the Resolution of Intention. Reference is hereby made to the Placer County Assessor's maps for a detailed description of the lines and dimensions of parcels within the District. The undersigned respectfully submits the enclosed Report as directed by the City Council.

I. OVERVIEW

A. INTRODUCTION

The City of Roseville (“City”) annually levies and collects special assessments in order to maintain the certain public improvements within the Olympus Pointe Landscaping and Lighting District (“District”) within the City. The District, which was formed in 1989, is levied annual assessments pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code (the “Act”).

The Engineer’s Report (“Report”) describes the District boundaries, any new annexations, improvements maintained by the District and the proposed assessments for the period of July 1, 2016 through June 30, 2017.

The District consists of two (2) benefit Zones (“Zones”). The improvements that benefit properties within each Zone and the costs associated with those improvements are identified and budgeted separately. Each parcel within a Zone is assessed proportionately for only those improvements and services that are a direct and special benefit to the properties within the respective Zone. The assessments are based on the historical and estimated cost to maintain the improvements that provide a direct and special benefit to properties within the District.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (“APN”) by the Placer County Assessor’s Office.

Following approval of the Report, the City Council will by resolution, order the improvements to be made, if any, and confirm the levy and collection of assessments herein pursuant to the Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council defines the assessments to be applied to each parcel within the District and respective Zones for Fiscal Year (“FY”) 2016/17. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved by the City Council.

B. COMPLIANCE WITH CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the Act and are in compliance with the substantive and procedural requirements of the California State Constitution Articles XIIC and XIID (“Article XIIC” and “Article XIID”) and the provisions of the Proposition 218 Omnibus Implementation Act [Government Code Section 53750 and following] (the “Implementation Act”). Articles XIIC and XIID and the Implementation Act collectively are hereinafter referred to as “Proposition 218”.

The District’s Maximum Assessment Rates for all Zones and the Inflationary Adjustment Factor were previously approved and confirmed through property owner ballot proceedings and as such, comply with the provisions of Proposition 218.

Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer’s Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls.

C. CLARIFICATION OF ZONE DESIGNATIONS

In order to increase consistency with the City’s other districts and to facilitate presentation within the Engineer’s Report, the names of both Zones were redesignated, commencing with FY 2007/2008, as follows:

- The “Non-Residential/Multi-Family Residential Zone” was redesignated to “Zone A”. ⁽¹⁾
- The “Residential Zone” was redesignated to “Zone D”. ⁽²⁾

(1) Prior to FY 2005/2006, this territory was known as “Zone A”. In FY 2005/2006, Zone A was redesignated to the “Non-Residential/Multi-Family Residential Zone”.

(2) Prior to FY 2005/2006, this territory was known as “Zones B & C”. In FY 2005/2006, Zones B & C were combined and redesignated to the “Residential Zone”.

D. GENERAL DESCRIPTION OF DISTRICT

The Olympus Pointe Landscaping and Lighting District is located in the City of Roseville at the southerly edge of Placer County, northeast of the intersection of Interstate 80 and Douglas Boulevard. The site is generally bounded by Interstate 80 on the west, East Roseville Parkway and Olympus Drive to the north, Douglas Boulevard to the south and Sierra College Boulevard to the east. See Appendix A for a rendering of the District boundary map.

The District consists of two zones as described below. These zones were established by the City through a District reengineering commencing with the FY 2005/2006 levy. Additional information regarding the reengineering is provided in Section III of the Report.

Zone A

Zone A includes land zoned for non-residential and multi-family residential uses. The Zone comprises the majority of the District and is primarily west and south of East Roseville Parkway, east of Interstate 80 north of Douglas Boulevard. This Zone contains 581.78 acres of assessable land that was originally designated as “Zone A”. The area was then redesignated as the “Non-Residential/Multi-Family Zone” commencing with the FY 2005/06 and then redesignated back to “Zone A” commencing with the FY 2007/08 levy.

Zone D

Zone D includes two single-family residential developments on the eastern side of the District. The Zone is bisected by Olympus Drive and Sierra College Boulevard on the District’s eastern boundary and includes 468 developed single-family residences. Originally, the each residential development was designated as separate zones (Zones B and C). The area was redesignated as the “Residential Zone” commencing with the FY 2005/2006 levy and then redesignated to the “Zone D” commencing with the FY 2007/2008 levy.

E. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to this proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.

- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

F. DESCRIPTION AND LOCATION OF IMPROVEMENTS

This District, through the levy special assessments, provides funding for the maintenance and operation of the following improvements located within the public right-of-ways and dedicated easements: project identification signs, including surrounding landscape and hardscape; special street materials; sculptures and sculpture park; special street signs; special lighting for the project identification signs and special illuminated street signs; and landscaped street medians (the “Improvements”). The specific locations of the improvements within the district are described as follows:

1. Zone A

a. Landscaped Median Islands:

- Eureka Road from Douglas Boulevard to Taylor Road Connector
- Sunrise Avenue from southern boundary of NERSP to East Roseville Parkway
- East Roseville Parkway from Douglas Boulevard to Rocky Ridge Drive
- Douglas Boulevard from eastern boundary of NERSP to Rocky Ridge Drive

b. Project identification signs (granite entryways) and special paving materials:

- Eureka Road at Douglas Boulevard
- East Roseville Parkway at Douglas Boulevard
- Eureka Road at Taylor Road

c. Sculpture and Sculpture Park:

- Aris Demetrio's original sculpture located on Parcel 14
- Sculpture park (0.85 acres located on Parcel 14)

d. Special street signs:

- Eureka Road at Sunrise Avenue, Rocky Ridge Drive, Lead Hill Drive and Douglas Boulevard
- Lead Hill Drive at Rocky Ridge Drive
- Sunrise Avenue at Auto Mall entrance
- East Roseville Parkway at Taylor Road, Lead Hill Drive, Olympus Drive and Douglas Boulevard
- Olympus Drive at Sierra College Boulevard

2. Zone D

a. Landscaped Frontage:

- Southern side of Olympus Drive from East Roseville Parkway to Sierra College Boulevard, excluding any landscaping not within or adjacent to the Zone
- Northern side of Olympus Drive from the Zone boundary (the former Zone C boundary), which is 175 feet southwest of Corniche Lane, to Sierra College Boulevard, western side of Sierra College Boulevard from Olympus Drive to the Zone boundary (the former Zone C boundary), which is approximately 600 feet.

b. Project identification signs and special paving materials:

- Sierra College Boulevard at Olympus Drive

G. DESCRIPTION OF MAINTENANCE AND SERVICES

Maintenance means the furnishing of services and materials for the ordinary and usual maintenance, operation and servicing of the Improvements and appurtenant facilities, including repair, removal or replacement of all or part of any of Improvements or appurtenant facilities; providing for the life, growth, health and beauty of the Improvements including cultivation, irrigation, trimming, mowing, spraying, fertilizing and treating for disease or injury; the removal of trimmings, rubbish, debris and other solid waste.

Servicing means the furnishing of water and electricity for the Improvements including any decorative lighting and the furnishing of electric current or energy, gas or other illuminating agent for the special street signs.

II. METHOD OF APPORTIONMENT

A. GENERAL

The Act permits the establishment of assessment districts by public agencies for the purpose of providing certain public improvements, which include the construction, maintenance, and servicing of street lights, traffic signals and landscaping facilities. Streets and Highways Code Section 22573 requires that maintenance assessments be levied according to benefit rather than the assessed value.

“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”

In addition, Article XIID and the Implementation Act require that a parcel's assessment may not exceed the reasonable cost for the proportional special benefit conferred to that parcel. Article XIID and the Implementation Act further provide that only special benefits are assessable and the City must separate the general benefits from the special benefits. They also require that publicly owned properties, which specifically benefit from the improvements, be assessed.

B. BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments, notably:

Article XIID Section 2d defines District as follows:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service”;

Article XIID Section 2i defines Special Benefit as follows:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4a defines proportional special benefit assessments as follows:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

The City initiated and conducted a property owner protest ballot proceedings in accordance with Article XIID and the Implementation Act for both the Non-Residential/Multi-Family Zone (Zone A) and the Residential Zone (Zone D). Each Zone's Improvements, the associated costs and assessments had been reviewed, identified and allocated based on special benefit pursuant to the provisions of the Constitution and Act.

All Improvements associated with these Zones have been identified as necessary, required and/or desired for the orderly development of the properties to their full potential. As such, these Improvements would be necessary and required of individual property owners for the development of such properties and the ongoing operation, servicing and maintenance of these Improvements would be the financial obligation of those properties. Therefore, the Improvements and the annual costs of ensuring the maintenance and operation of the Improvements are of direct and special benefit to the properties.

The method of apportionment (method of assessment) is based on the premise that each of the assessed parcels within these Zones receives special benefit from the Improvements maintained and financed by the assessments. Specifically, the assessments associated with the Zones are for the maintenance of the Improvements installed as part of the original development of the parcels within the Zones. The desirability and security of properties within each Zone is enhanced by the close proximity of these amenities to those properties.

The annual assessments outlined in this Report are proposed to cover the estimated costs to provide all necessary service, operation, administration, and maintenance required to keep the Zone Improvements in a healthy, vigorous, and satisfactory condition.

The special benefits associated with these improvements are specifically:

- Enhanced desirability of properties through association with the improvements.
- Improved aesthetic appeal of properties within the Zones providing a positive representation of the area.
- Enhanced adaptation of the urban environment within the natural environment from adequate green space and landscaping.

- Environmental enhancement through improved erosion resistance, and dust and debris control.
- Increased sense of pride in ownership of property within the District resulting from well-maintained improvements associated with the properties.
- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the District through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels within the Zones by moderating temperatures, providing oxygenation and attenuating noise.

All of the preceding special benefits allowed the property to be developed for the enjoyment of the property owners and contribute to an ongoing specific enhancement and desirability of each of the assessed parcels within the Zones.

The improvements are for the special benefit, enhancement and use of properties within the Zones. Although the improvements include public easements, right-of-ways, streets and other amenities available or visible to the public at large, the construction and installation of these Improvements were only necessary for the development of properties within the Zones and were not required nor necessarily desired by any properties or developments outside the Zone's boundaries. Therefore, any public access or use of the Improvements by others is incidental and there is no measurable general benefit to properties outside the Zones or to the public at large. In making this determination, it should be noted that all parkway and perimeter landscaping within the City is both funded and maintained by a special district, individual property owners or through some type of association.

C. ASSESSMENT METHODOLOGY

To establish the special benefit to the individual lots and parcels within the District an Equivalent Benefit Unit ("EBU") system is used. The EBU method of apportioning benefit is typically seen as the most appropriate and equitable assessment methodology for districts formed under the Act, as the benefit to each parcel from the Improvements are apportioned as a function of land use type, size and development. Acreage of common area parcels shall be apportioned to the remaining assessable parcels of a subdivision and/or parcel split(s) related to the creation of the common area parcel(s).

EBU Application Table

Land Use	EBU per Unit/Acre
Single Family Residential	1.00 per Unit
Multi Family Residential	1.00 per Acre
Non-Residential	1.00 per Acre
Exempt	0.00 per Acre

1. Definitions and Formulas Related to the Product Type EBU Method

Single-Family Residential — This land use is defined as a fully subdivided residential parcel that is part of a final tract map.

Multi-Family Residential — This land use is defined as a residential parcel anticipated to have or has more than one residential unit.

Non-Residential — Parcels that are not considered Single Family Residential, Multi- Family Residential or Exempt.

Exempt Parcels — This land use identifies properties that are not assessed and are assigned 0.0 EBU per acre. This land use classification may include, but is not limited, to lots or parcels identified as public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas, greenbelts, parkways, park properties and other publicly owned properties that are part of the District Improvements. These types of parcels are considered to receive little or no benefit from the Improvements and are therefore exempted from assessment.

2. Zone Benefit Formula

The benefit formula applied to parcels within each Zone is based on the preceding Equivalent Benefit Unit (EBU) Application Table. Each parcel's EBU correlates the parcel's special benefit received as compared to all other parcels benefiting from the Improvements.

The following formula is used to calculate the EBU for each parcel (proportional benefit).

$$\text{Parcel Type EBU} \times \text{Units/Acres} = \text{Parcel EBU}$$

The total number of Equivalent Benefit Units (EBUs) is the sum of all individual EBUs applied to parcels within each Zone that receive a special benefit from the Improvements. An assessment amount per EBU (Assessment Rate) for each Zone is established by taking the total costs associated with the Zone's Improvements and dividing that amount by the total number of EBUs within each Zone of all parcels benefiting from those Improvements. This Rate is then applied back to each individual parcel's based on their assigned EBUs to determine the parcel's proportionate special benefit and assessment obligation from those Improvements.

$$\text{Zone Budget} / \text{Total EBU} = \text{Assessment per EBU}$$

$$\text{Assessment per EBU} \times \text{Parcel EBU} = \text{Maximum Parcel Assessment Amount}$$

D. ASSESSMENT RANGE FORMULA

The purpose of establishing an Assessment Range Formula is to provide for reasonable increases and inflationary adjustment to annual assessments rather than initiating protest ballot proceedings to approve small increases in annual costs. This District provides for an annual adjustment to the Maximum Assessment Rate in an amount equal to three percent (3%).

The Maximum Assessment Rate is adjusted annually and is calculated independent of the District's annual budget and proposed annual assessment. Any proposed annual assessment rate (less than or equal to this Maximum Assessment Rate) is not considered an increased assessment, even if the proposed assessment is greater than the assessment applied in the prior fiscal year.

Although the Maximum Assessment Rate will increase each year, the actual assessment rate may go up and down as compared to the previous year(s). The Maximum Assessment Rate adjustment is designed to allow for the adjustment of the annual assessment for inflation in order to maintain the original purchasing power of the District budget. The Maximum Assessment Rate calculated each year does not require or facilitate an increase to the annual assessment and neither does it restrict assessments to the adjusted maximum amount. If the budget and assessment for the fiscal year do not require an increase, or the increase is less than the adjusted Maximum Assessment Rate, then the required budget and assessment may be applied without additional property owner balloting. If the budget and assessments calculated requires an increase greater than the adjusted Maximum Assessment Rate, then the assessment is considered an increased assessment and would be subject to Proposition 218 balloting requirements.

E. BASE MAXIMUM ASSESSMENT RATES

The base assessment rates and the annual inflationary adjustment to each Zone are listed in the table below:

Zone	Base Year	Base Year Maximum Assessment Rate per EBU	Annual Inflationary Adjustment Commencing with FY 2006/07
Zone A	FY 2005/06	\$296.65	3.00%
Zone D	FY 2005/06	99.76	3.00%

III. DISTRICT BUDGET

A. 2016/17 BUDGET

DESCRIPTION	ZONE A	ZONE D	TOTAL
<u>DIRECT COSTS</u>			
Contract Maintenance - Landscaping	\$54,920.00	\$27,590.00	\$82,510.00
Contract Maintenance - Parks	2,670.00	n/a	2,670.00
Repair & Maintenance - Landscaping/Parks	30,000.00	11,000.00	41,000.00

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping – Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping improvements, irrigation and related drainage systems, as well as maintenance of appurtenant facilities (the “improvements”). Cost to maintain improvements within the District’s entryway areas are not included in this amount.

Contract Maintenance – Entryways – Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of entryway improvements, as well as maintenance of appurtenant facilities (the “improvements”).

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's' Report.

Public Hearing Publishing Costs –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A "Replenishment" increases the levy in order to replenish the Operating Reserve. On the other hand, a "Use" of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in

the budget. Further information regarding the function of the Operating Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Contribution for /(Use of) Rehab Reserve — A “Contribution” increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a “Use of” of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

APPLIED ASSESSMENT RATES

Total Assessable Acreage - The total acreage within each zone expected to be assessed in the current fiscal year.

Total Assessable Units - The total number of assessable single family units within each zone expected to be assessed in the current fiscal year.

Total Equivalent Benefit Units (“EBUs”) - Total assessable EBUs within the District for the current fiscal year. Each assessable parcel is assigned EBUs as follows:

Land Use	EBU per Unit/Acre
Single Family Residential	1.00 per Unit
Multi Family Residential	1.00 per Acre
Non-Residential	1.00 per Acre
Exempt	0.00 per Acre

Applied Assessment Rate per Equivalent Benefit Unit (EBU) - The assessment rate per EBU to be applied to the applicable Zone for the current fiscal year.

Maximum Assessment Rate per Equivalent Benefit Unit (EBU) - The maximum assessment rate per EBU that can be applied to the applicable Zone for the current fiscal year.

Potential Maximum Assessment Per Zone – The total amount that can be assessed to all parcels within each Zone for the current fiscal year based upon the expected number of assessable units and acres.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2016 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2016 to December 31, 2016, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 16/17 Levy – This amount is added to the levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2016 (the beginning of the Fiscal Year) through December 31, 2016. If zero, this line item may not be shown in the budget.

Use for FY 16/17 Expenses – The amount of the Operating Reserve to be used to fund FY 16/17 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2016 (the beginning of the Fiscal Year) through December 31, 2016. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2017 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2017. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2016 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2016. Streets and Highways Code 22660 allows the District generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 16/17 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 16/17 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2017 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2017. These funds shall be use to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

Should the District have no Rehabilitation Reserve or related activity, the Rehabilitation Reserve information may not be presented in the Report.

ADVANCES FROM GENERAL FUND

Beginning Balance 7-1-2016 (est.) - Represents the balance owed to the City, as a result of previous loans and/or advances from the City's General Fund, as of July 1, 2016.

General Fund Repayment/(Advance) - A negative amount represents funds advanced from the City's General Fund to pay costs related to Zone improvements that could not be funded by the Zone's assessments; a positive figure represents the amount of a repayment of a previous advance. The City is under no obligation to advance monies from the General Fund or any other source to fund District expenses.

Ending Balance 6-30-2017 (est.) - Represents the projected balance due to the City as of June 30, 2017.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment. A five year Capital Improvement Plan for the rehabilitation, restoration and /or replacement of District improvements and other allowable costs is shown below for each Zone with a projected ending Rehabilitation Reserve balance.

Zone A - Rehabilitation, renovation and/or replacement costs of median improvements are projected to be \$10,000 each in FYs 2017/18 and 2018/19. Repair of stone wall and medians are projected to be \$5,000 in FY 2016/17. Rehabilitation, renovation and/or replacement costs of project entryway improvements are projected to be \$20,000 in FY 2018/19. Rehabilitation of Sculpture Park is projected to be \$30,000 in FY 2017/18. Repainting of Cosmos statue is projected to be \$20,000 in 2016/17. Replacement, renovation, repair and/or refurbishment of plants, landscape & related materials are projected to be \$10,000 for each of FYs 2017/18, 2018/19, 2019/20 and 2020/21. Replacement of illuminated street signs is projected to be up to \$100,000 in FY 2017/18.

Zone D - Rehabilitation, renovation and/or replacement costs of project entryway improvements are projected to be \$5,000 in each FYs 2018/19 and 2020/21. Replacement, repair, renovation and/or refurbishment of plants, landscape & related materials are projected to be \$10,000 in FY 2017/18, \$5,000 in FY 2018/19 and \$15,000 in FY 2019/20.

Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map for the District has previously been submitted to the Clerk of the City in the format required under the Act and is, by reference, hereby made part of this Report. These District Boundary Maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a rendering of the District's Boundaries is presented herein.

APPENDIX B — 2016/17 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, may be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways, including public greenbelts and parkways; utility rights-of-ways; small parcels vacated by the County, bifurcated lots, and other property that cannot be developed, excepting common area parcels. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2016/17. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2016/17 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 16-262

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA ORDERING THE LEVY AND COLLECTION OF ASSESSMENTS WITHIN THE OLYMPUS POINTE LANDSCAPING AND LIGHTING DISTRICT, FOR FISCAL YEAR 2016/2017

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, the City Council of City of Roseville, California, has, by previous Resolutions, initiated proceedings, and declared its intention to levy assessments, and approved the Engineer’s Levy Report (hereinafter referred to as the “Report”) that describes the assessments against parcels of land within the Olympus Pointe Landscaping and Lighting District (hereinafter referred to as the “District”) for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code, commencing with Section 22500* (hereinafter referred to as the “Act”) to pay for the maintenance and services of all improvements and facilities related thereto; and,

WHEREAS, the Engineer selected by the City Council has prepared and filed with the City Clerk, and the City Clerk has presented to the City Council, a Report in connection with the proposed levy and collection of assessments upon eligible parcels of land within the District, and the City Council did by previous Resolution approve such Report; and,

WHEREAS, the City Council desires to levy and collect assessments against parcels of land within the District for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, to pay for the maintenance and services of all improvements and facilities related thereto; and,

WHEREAS, this City and its legal counsel have reviewed Proposition 218 and found that these assessments comply with applicable provisions of Articles XIIC and XIID of the California State Constitution.

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR OLYMPUS POINTE LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Following notice duly given, the City Council has held a full and fair public hearing regarding the District, the levy and collection of assessments, the Report prepared in connection therewith, and considered all oral and written statements, protests and communications made or filed by interested persons regarding these matters.

Section 2 Based upon its review (and amendments, as applicable) of the Report, a copy of which has been presented to the City Council and which has been filed with the City Clerk, the City Council hereby finds and determines that:

- i) the land within the District will be benefited by the operation, maintenance and servicing of the improvements located within the boundaries of the District;

- ii) the District includes all of the lands receiving such special benefit; and,
- iii) the net amount to be assessed upon the lands within the District in accordance with the assessment for the Fiscal Year commencing July 1, 2016 and ending June 30, 2017 is apportioned by a formula and method which fairly distributes the net amount among all eligible parcels in proportion to the estimated special benefits to be received by each parcel from the improvements and services.

Section 3 The Report and assessments as presented to the City Council and on file in the Office of the City Clerk are hereby confirmed as filed.

Section 4 The maintenance, operation and servicing of the improvements and appurtenant facilities shall be performed pursuant to the Act. The City Council hereby orders the improvements to be made, which improvements are briefly described as follows: project identification signs and surrounding landscape and hardscape, special street materials, sculpture and sculpture park, special lighting for the project identification signs, sculpture and sculpture park, landscape street medians, special street signs, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer's Annual Levy Report, as ordered by previous Resolution, provides a full and complete description of all improvements and any or all substantial changes to the improvements within the District.

Section 5 The County Auditor of the County of Placer shall enter on the County Assessment Roll, opposite each eligible parcel of land, the amount of levy so apportioned by the formula and method outlined in the Report, and such levies shall be collected at the same time and in the same manner as the County taxes are collected, pursuant to *Chapter 4, Article 2, Section 22646* of the Act. After collection by the County, the net amount of the levy shall be paid to the City Treasurer.

Section 6 The City Treasurer shall deposit all money representing assessments collected by the County for the District to the credit of a fund for the Olympus Pointe Landscaping and Lighting District and such money shall be expended only for the maintenance, operation and servicing of the improvements, together with any other expenses described in Section 4.

Section 7 The adoption of this Resolution constitutes the District levy for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017.

Section 8 The City Clerk's designee, Willdan Financial Services, is hereby authorized and directed to file the levy with the County Auditor subsequent to the adoption of this Resolution, pursuant to Chapter 4, Article 1, Section 22641 of the Act. The City Clerk is directed to deliver a certified copy of this adopted Resolution to Willdan Financial Services within two weeks of adoption via either e-mail to mashley@willdan.com or US Mail to: Willdan Financial Services, 27368 Via Industria, Suite 200, Temecula, CA 92590 Attn: Mickey Ashley.

RESOLUTION NO. 16-263

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, AMENDING AND/OR APPROVING THE ENGINEER'S ANNUAL LEVY REPORT FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2016/2017

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, ordered the preparation of the Engineer's Annual Levy Report (hereafter referred to as the "Report") for said district known and designated as: Riverside Avenue Landscaping and Lighting District (hereinafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, being Part 2 Division 15, of the Streets and Highways Code of the State of California, beginning with Section 22500* (hereinafter referred to as the "Act"), and,

WHEREAS, there has now been presented to this City Council the Report as required by *Chapter 3, Section 22623* of said Act, and as previously directed by Resolution; and,

WHEREAS, this City Council has carefully examined and reviewed the Report as presented (or amended), and is satisfied with each and all of the items and documents as set forth therein, and is satisfied that the levy has been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed, as set forth in said Report.

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Report as presented, is hereby approved (as amended), and is ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 3 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation and final approval of the Report.

RESOLUTION NO. 16-263

PASSED, APPROVED, AND ADOPTED THIS 15th day of June, 2016.

_____,
Mayor
City of Roseville

_____,
City Clerk

ENGINEER'S REPORT AFFIDAVIT

Establishment of Annual Rates and Charges for the:

Riverside Avenue
Landscaping and Lighting District

City of Roseville
Placer County, State of California

This Report describes the District, including the improvements, budgets, parcels and assessments to be levied for Fiscal Year 2016/17 as they existed at the time of the passage of the Resolution of Intention. Reference is hereby made to the Placer County Assessor's maps for a detailed description of the lines and dimensions of parcels within the District. The undersigned respectfully submits the enclosed Report as directed by the City Council.

Dated this 27th day of APRIL, 2016

I. OVERVIEW

A. INTRODUCTION

The City of Roseville (“City”) annually levies and collects special assessments in order to maintain the improvements within the Riverside Avenue Landscaping and Lighting District (“District”). The District was formed in January of 2007 and is levied annual assessments pursuant to *the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code* (“1972 Act”).

The Engineer’s Report (“Report”) describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2016 through June 30, 2017. The special benefit assessments are based on historical and estimated costs to maintain the District improvements. These assessments, which provide a direct and special benefit to properties within the District, will provide funding for the operation and maintenance of District improvements.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (“APN”) by the Placer County Assessor’s Office. The Placer County Auditor/Controller uses Assessor’s Parcel Numbers and specific Tax Code Accounts, to identify on the County’s tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will by resolution, order the improvements to be made and confirm the levy and collection of assessments herein pursuant to the Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council defines the assessments to be applied to each parcel within the District for Fiscal Year (“FY”) 2016/17. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved by the City Council.

B. COMPLIANCE WITH CURRENT LEGISLATION

The City Council, pursuant to the provisions of the “Landscaping and Lighting Act of 1972”, being Division 15, Part 2 of the Streets and Highways Code of the State of California, beginning with Section 22500 (the “1972 Act”); Article XIID of the Constitution of the State of California (“Article XIID”); and the Proposition 218 Omnibus Implementation Act, beginning with Government Code Section 53750 (the “Implementation Act”) (the 1972 Act, Article XIID and the Implementation Act are referred to collectively as the “Assessment Law”) initiated proceedings for the formation of the District on November 15, 2006 and to levy and collect annual assessments against lots and parcels within the District for FY 2007/08. On January 17, 2007, pursuant to Assessment Law, the City conducted a Public Hearing and tabulated the returned ballots. The City determined that a majority protest did not exist and approved the District’s maximum assessment rate and annual inflationary adjustment factor.

Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer’s Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the Act and Assessment Law.

C. DESCRIPTION OF DISTRICT BOUNDARIES

The proposed territory within the District consists of all lots, parcels and subdivisions of land as shown on the Boundary Map titled “Boundary Map of Riverside Avenue Landscaping and Lighting District” contained within this report in Appendix A-1.

The District is bounded by Douglas Boulevard to the north, Darling Way to the south and includes parcels that front Riverside Avenue. It is centrally located between Interstate 80 and Downtown Roseville, and is east of the Union Pacific Railroad.

The District currently has a mix of different types of land uses including automotive related retail and car lots, community/neighborhood retail, offices, services, and residential units.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to this proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.

- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.

- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF THE IMPROVEMENTS AND MAINTENANCE

The District, through the levy of special assessments, is to provide funding for ongoing maintenance, operation and servicing of landscaping and lighting improvements located within the public rights-of-ways and dedicated easements located within the District. These improvements may include, but are not limited to, all materials, equipment, utilities, labor, and appurtenant facilities related to the ongoing maintenance of the improvements. The improvements to be maintained and services are generally described as follows:

Landscaping Improvements

The general landscaping improvements in the District are to be consistent with the improvements on Vernon Street located north of the District, which intersects Riverside Avenue. As a gateway to downtown Roseville, Riverside Avenue's compatibility with Vernon Street links the downtown area and Riverside Gateway area together.

The landscaping improvements have been designed to enhance the area within the District and may include, but are not limited to ground cover, shrubs and plants, trees, irrigation and drainage systems, ornamental lighting, masonry walls or other fencing, hardscape improvements, monuments and landmarks, mid-block bulbs, bulb-outs, and associated appurtenants located within the street right-of-ways and public areas within the District. Specifically, the proposed landscape improvement areas for this District are:

- Landscaping and hardscape improvements within the public right-of-ways of the streets within the District including, but not limited to, Riverside Avenue including the corners of Riverside Avenue and Second Street, Third Street, Fourth Street, Fifth Street, Sixth Street, Darling Way, Fern Street, Cherry Street, and Bonita Street.
- Decorative banners along Riverside Avenue.
- Transit facilities including bus stop seating and decorative shelters.
- Roundabout improvements including plantings, paving, and landmark feature located at the intersection of Vernon St., Douglas Blvd., and Riverside Ave.
- A Gateway feature located at the intersection of Darling Way and Riverside Avenue.

- Various amenities associated with the landscape improvements and public areas within the District, including, but not limited to, trash receptacles, street furniture, bike racks, entry signs, sidewalks, fencing, and retaining walls.

Specifically not included as District improvements are those improvements located on private property, improvements and facilities that are outside the boundaries of the District and/or area funded by other sources available to the City.

Public Lighting Improvements

The lighting improvements may include, but are not limited to, the cost of providing, maintaining and servicing of lighting fixtures, poles, meters, conduits, electrical cable, and associated appurtenant facilities associated with:

- Lighting facilities within the landscaped areas and public areas including safety lights, security lights or ornamental lights installed as part of the District improvements; and
- Public street light improvements located on the streets within the District. Specifically excluded from the assessment are the street light energy costs. These costs are to be paid for by the City from other revenue sources.

Detailed maps and descriptions of the location and extent of the specific improvements to be maintained by the District are on file in the Office of Public Works and by reference are made part of this Report.

Description of Maintenance and Services

Maintenance means the furnishing of services and materials for the ordinary and usual maintenance, operation and servicing of landscaping and street lighting improvements facilities and appurtenant facilities, including repair, removal or replacement of all or part of any of the landscaping and street lighting improvements, or appurtenant facilities; providing for the life, growth, health and beauty of landscaping improvements including cultivation, irrigation, trimming, mowing, spraying, fertilizing and treating for disease or injury; the removal of trimmings, rubbish, debris and other solid waste; and the cleaning sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Servicing means the furnishing of water and electricity for the irrigation of the landscape improvements or appurtenant facilities and the furnishing of electric current or energy for the operation of the landscaping improvements or appurtenant facilities. The street lighting improvements shall be maintained to provide adequate illumination; however, the City will be paying the actual energy costs of the street lights.

II. METHOD OF APPORTIONMENT

A. GENERAL

The Implementation Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements, which include the construction, maintenance, and servicing of landscaping improvements, street lights and traffic signals.

Streets and Highways Code Section 22573 requires that maintenance assessments be levied according to benefit rather than the assessed value.

“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”

In addition, Article XIID and the Implementation Act require that a parcel's assessment may not exceed the reasonable cost for the proportional special benefit conferred to that parcel. Article XIID and the Implementation Act further provides that only special benefits are assessable and the City must separate the general benefits from the special benefits. They also require that publicly owned properties that specifically benefit from the improvements be assessed.

B. SPECIAL BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments, notably:

Article XIID Section 2d defines District as follows:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service”;

Article XIID Section 2i defines Special Benefit as follows:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4a defines proportional special benefit assessments as follows:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

This District was formed to establish and provide for the improvements that enhance the presentation of the surrounding properties and developments. These improvements will directly benefit the parcels to be assessed within the District. The assessments and method of apportionment is based on the premise that the assessments will be used to construct and install landscape and lighting improvements within the District as well as provide for the annual maintenance of those improvements, and the assessment revenues generated by District will be used solely for such purposes.

The costs of the proposed improvements have been identified and allocated to properties within the District based on special benefit. The improvements to be provided by this District and for which properties will be assessed have been identified as an essential component and local amenity that provides a direct reflection and extension of the properties within the District which the property owners and residents have expressed a high level of support.

The method of apportionment (method of assessment) set forth in the Report is based on the premise that each assessed property receives special benefits from the landscape and lighting improvements within the District, and the assessment obligation for each parcel reflects that parcel's proportional special benefits as compared to other properties that receive special benefits.

To identify and determine the proportional special benefit to each parcel within the District, it is necessary to consider the entire scope of the improvements provided as well as the properties that benefit from those improvements. The improvements and the associated costs described in this Report, have been carefully reviewed and have been identified and allocated based on a benefit rationale and calculations that proportionally allocate the net cost of only those improvements determined to be of special benefit to properties within the District. The various public improvements and the associated costs have been identified as either “general benefit” (not assessed) or “special benefit”.

Proper maintenance and operation of parkway landscaping and streetlights provides special benefit to adjacent properties by providing community character, security, safety and vitality. In addition, these improvements will enhance the ability of property owners to attract and maintain customers as well as increase the viability of commercial development.

Landscaping Special Benefit

Landscaping and appurtenant facilities, if well maintained, provide beautification, shade and enhancement of the desirability of the surroundings, and therefore increase property value. Specifically they provide a sense of ownership and a common theme in the community providing aesthetic appeal and increased desirability of properties.

Landscaping provides special benefit to those developments that are directly adjacent to the public streets.

Landscaping General Benefit

The Improvements were installed to directly benefit the property owners in the District to enhance business and development opportunities. Therefore, it has been determined that there are no general benefits associated with the landscaping improvements.

Lighting Special Benefit

The operation, maintenance and servicing of lighting along local streets and arterial streets of a development provide the following special benefits:

- Improved security of lots and parcels along the perimeter of the development;
- Improved nighttime visibility for the local access of emergency vehicles; and
- Improved safety and traffic circulation to and from parcels.

Street Lights General Benefit

Similar to the landscaping improvements described above, the Improvements were installed to directly benefit the property owners in the District to enhance business and development opportunities. Therefore, it has been determined that there are no general benefits associated with lighting improvements.

C. ASSESSMENT METHODOLOGY

To establish the special benefit to the individual parcels within the District, a formula that spreads the costs of the maintenance based on the special benefit must be established. The improvements have been reviewed and a formula has been established to apportion the maintenance costs based on benefit.

The method of assessment is based on the front footage of each parcel located within the District. The parcel's Front Footage was determined based on Assessor Parcel maps or other sources. Only Front Footage on Riverside Avenue was used.

Based on the above formula, the FY 2007/08 maximum assessment rate approved on January 17, 2007 through a property owner balloting (the "Initial Assessment Rate" or the "Base Year Maximum Assessment Rate") is \$6.45 per each foot of frontage.

The following formulas were used to first calculate the District's Initial Assessment Rate and then each parcel's FY 2007/2008 assessment (proportional benefit):

Step 1:

$$\text{Balance to Levy} \div \text{Total Front Footage} = \text{Maximum Front Footage Rate}$$

Step 2:

$$\text{Parcel Front Footage} \times \text{Maximum Front Footage Rate} = \text{Maximum Assessment}$$

The Total Front Footage was the sum of all the Front Feet within the District. The Initial Assessment Rate per Front Foot was established by taking the total cost of improvements (Balance to Levy) and dividing that amount by the Total Front Footage within the District. The Initial Assessment Rate per Front Foot, which is also the FY 2007/2008 Maximum Front Footage Rate, is then applied back to each individual parcel's Front Footage to determine the parcel's proportionate special benefit and assessment obligation (The FY 2007/2008 Maximum Assessment).

D. ASSESSMENT RANGE FORMULA

The purpose of establishing an Assessment Range Formula is to provide for reasonable increases and inflationary adjustment to annual assessment rates without requiring the District to go through the requirements of Proposition 218 in order to get a small increase in assessments. This District provides for an annual adjustment to the Maximum Assessment Rate of the lesser of the percentage change in the Local Consumer Price Index of the San Francisco-Oakland-San Jose Area for All Urban Consumers (the "CPI") or three percent (3%) (the "Escalation Percentage"). The CPI in this adjustment shall be determined through CPI data from the Bureau of Labor Statistics from December to December, beginning with the period from December 2006 to December 2007.

The Assessment Range Formula shall be applied to all future assessments within the District beginning in fiscal year 2008/2009. Generally, if the proposed annual assessment rate for the current fiscal year is less than or equal to the calculated Maximum Assessment Rate, then the proposed annual assessment is not considered an increased assessment. The Maximum Assessment Rate is equal to the FY 2007/08 Maximum Assessment Rate, which was approved on January 17, 2007 through a property owner balloting (the “Initial Assessment Rate” or “Base Year Assessment Rate”), and adjusted annually by the Escalation Percentage.

Beginning in the second fiscal year (Fiscal Year 2008/2009) and each fiscal year thereafter, the Maximum Assessment Rate would be recalculated and a new Maximum Assessment Rate established within the District.

The Maximum Assessment Rate is adjusted annually and is calculated independent of the District’s annual budget and proposed annual assessment. Any proposed annual assessment is not considered an increased assessment, even if the proposed assessment is greater than the assessment applied in the prior fiscal year.

Although the Maximum Assessment Rate will increase each year, the actual assessment rate may remain unchanged. The Maximum Assessment Rate adjustment is designed to establish a reasonable limit on assessments. The Maximum Assessment Rate calculated each year does not require or facilitate an increase to the annual assessment rate and neither does it restrict assessments to the adjusted maximum amount. If the budget and assessment for the fiscal year do not require an increase, or the increase is less than the adjusted Maximum Assessment Rate, then the required budget and assessment may be applied without additional property owner balloting. If the budget and assessments calculated requires an increase greater than the adjusted Maximum Assessment, then the assessment is considered an increased assessment and would be subject to balloting.

III. DISTRICT BUDGET

A. 2016/17 BUDGET

DESCRIPTION	AMOUNTS
<u>DIRECT COSTS</u>	
Contract Maintenance - Landscaping	\$4,900.00
Repair & Maintenance - Landscaping	6,500.00
Repair & Maintenance - Lighting	1,000.00
Repair and Maintenance - Streetscape and Signage	2,000.00
Utilities	8,400.00
Rehab Reserve Expenditures - Signage	<u>0.00</u>
Total Direct Costs	\$22,800.00
<u>ADMINISTRATION COSTS</u>	
City Administration	\$1,493.00
Contract Administration - Park's Dept	1,738.00
County Auditor Fees	384.44
Consulting & Professional Services	2,960.00
Public Hearing Publishing Costs	795.00
ERP Project Costs	<u>2,903.65</u>
Total Administrative Costs	\$10,274.09
Total Direct and Administration Costs	\$33,074.09
<u>BUDGET ADJUSTMENTS</u>	
Replenishment/(Use) of Operating Reserve	\$5,370.39
Contribution for /(Use of) Rehab Reserve	0.00
Rounding Adjustment	<u>(0.72)</u>
Total Adjustments	\$5,369.67
BALANCE TO LEVY	\$38,443.76

B. 2016/17 ASSESSMENT RATES

DESCRIPTION	AMOUNTS
<u>FY 2016/17 ASSESSMENT RATES</u>	
Number of Assessable Parcels	75
Total Assessable Front Footage	4,865.76
Assessment Rates	
Applied Assessment Rate per each Foot of Frontage	7.900875
Maximum Assessment Rate per each Foot of Frontage	7.901023
Potential Maximum Assessment	\$38,444

C. 2016/17 FUND BALANCE INFORMATION

DESCRIPTION	AMOUNTS
<u>OPERATING RESERVE</u>	
Beginning Operating Reserve Balance 7-1-2016 (est.)	\$20,534.36
add: Replenish from FY 16/17 Levy	5,370.39
less: Use for FY 16/17 Expenses	
Transfer from/(to) the Rehab Reserve	(9,367.71)
Ending Operating Reserve Balance 6-30-2017 (est.)	\$16,537.05
<u>REHABILITATION RESERVE</u>	
Beginning Rehab Reserve Balance 7-1-2016 (est.)	\$98,725.38
add: Collect from FY 16/17 Levy	
less: Use for FY 16/17 Rehab Projects	0.00
Transfer from/(to) the Operating Reserve	9,367.71
Ending Rehab Reserve Balance 6-30-2017 (est.)	\$108,093.09

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping - Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping improvements, irrigation and related drainage systems, as well as maintenance of appurtenant facilities (the "improvements").

Repair & Maintenance - Landscaping - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc.

Repair & Maintenance - Lighting - This line item includes bulb replacement and repairs that are generally unforeseen. This may include repair of damaged amenities due to vandalism, storms, etc.

Repair & Maintenance - Streetscape/Signage - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's' Report.

Public Hearing Publishing Costs –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A “Replenishment” increases the levy in order to replenish the Operating Reserve. On the other hand, a “Use” of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Contribution for /(Use of) Rehab Reserve — A “Contribution” increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a “Use of” of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

APPLIED ASSESSMENT RATE

Number of Assessable Parcels - The total number of parcels that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public right-of-ways or easements, common areas, and/or parcels within the boundaries of the District currently do not benefit from the improvements and are therefore not assessed.

Total Assessable Front Footage - The total amount of assessable Front Footage within the District in accordance with the Method of Assessment Section of this Report.

Applied Assessment Rate - The assessment rate to be applied to the front footage of each non-exempt parcel within the District for the current fiscal year.

Maximum Assessment Rate - The Maximum Assessment Rate per front foot for the current fiscal year.

Potential Maximum Assessment – The total amount that can be assessed against all non-exempt District parcels for the current fiscal year based upon the expected assessable front footage within the District.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2016 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2016 to December 31, 2016, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 16/17 Levy – This amount is added to the levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2016 (the beginning of the Fiscal Year) through December 31, 2016. If zero, this line item may not be shown in the budget.

Use for FY 16/17 Expenses – The amount of the Operating Reserve to be used to fund FY 16/17 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2016 (the beginning of the Fiscal Year) through December 31, 2016. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2017 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2017. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All

Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2016 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2016. Streets and Highways Code 22660 allows the District generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 16/17 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 16/17 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2017 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2017. These funds shall be use to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

Should the District have no Rehabilitation Reserve balances or related activity, no Rehabilitation Reserve information shall be presented in the Report

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment. A five year Capital Improvement Plan for the rehabilitation, restoration and /or replacement of District improvements and other allowable costs is shown below.

Hardscape improvements, monuments, landmarks, gateway features, street furniture, trash receptacles, bike racks, bus stop shelters, plant replacement, landscaping, irrigation and/or drainage systems, public street lights, lighting fixtures, poles and meters; safety, security and/or ornamental lights; entry signs; decorative banners and hardware are projected to be \$70,000 in FY 2017/18, \$75,000 in FY 2018/19 and \$105,000 in FY 2019/20.

From time to time, funds held in a Rehabilitation Reserve may be needed to respond to changing needs due to the condition of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and / or operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map for the District has previously been submitted to the Clerk of the City in the format required under the Act and is, by reference, hereby made part of this Report. These District Boundary Maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a summary of the District's Boundaries is presented herein.

A

APPENDIX B — 2016/17 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, shall be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways including public greenbelts and parkways; utility rights-of-ways; common areas; landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2016/17. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2016/17 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 16-264

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA ORDERING THE LEVY AND COLLECTION OF ASSESSMENTS WITHIN THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, FOR FISCAL YEAR 2016/2017

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, the City Council of City of Roseville, California, has, by previous Resolutions, initiated proceedings, and declared its intention to levy assessments, and approved the Engineer’s Annual Levy Report (hereinafter referred to as the “Report”) that describes the assessments against parcels of land within the Riverside Avenue Landscaping and Lighting District (hereinafter referred to as the “District”) for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code, commencing with Section 22500* (hereinafter referred to as the “Act”) to pay for the maintenance and services of all improvements and facilities related thereto; and

WHEREAS, the Engineer selected by the City Council has prepared and filed with the City Clerk, and the City Clerk has presented to the City Council, a Report in connection with the proposed levy and collection of assessments upon eligible parcels of land within the District, and the City Council did by previous Resolution approve such Report; and

WHEREAS, the City Council desires to levy and collect assessments against parcels of land within the District for the Fiscal Year commencing July 1, 2016 and ending June 30, 2017, to pay for the maintenance and services of all improvements and facilities related thereto.

WHEREAS, this City and its legal counsel have reviewed Proposition 218 and found that these assessments comply with applicable provisions of Articles XIIC and XIID of the California State Constitution; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Following notice duly given, the City Council has held a full and fair public hearing regarding the District, the levy and collection of assessments, the Report prepared in connection therewith, and considered all oral and written statements, protests and communications made or filed by interested persons regarding these matters.

Section 2 Based upon its review (and amendments, as applicable) of the Report, a copy of which has been presented to the City Council and which has been filed with the City Clerk, the City Council hereby finds and determines that:

- i) the land within the District will be benefited by the operation, maintenance and servicing of the improvements located within the boundaries of the District;
- ii) the District includes all of the lands receiving such special benefit; and,
- iii) the net amount to be assessed upon the lands within the District in accordance with the assessment for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, is apportioned by a formula and method which fairly distributes the net amount among all eligible parcels in proportion to the estimated benefits to be received by each parcel from the improvements and services.

Section 3 The Report and assessments as presented to the City Council and on file in the Office of the City Clerk are hereby confirmed as filed.

Section 4 The maintenance, operation and servicing of the improvements shall be performed pursuant to the Act. The City Council hereby orders the improvements to be made, which improvements are briefly described as follows: the improvements within the District include: maintenance, servicing, administration and operation of landscape, lighting and streetscape improvements, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer's Annual Levy Report describes all new improvements or substantial changes in existing improvements.

Section 5 The County Auditor of the County of Placer shall enter on the County Assessment Roll, opposite each eligible parcel of land, the amount of levy so apportioned by the formula and method outlined in the Report, and such levies shall be collected at the same time and in the same manner as the County taxes are collected, pursuant to *Chapter 4, Article 2, Section 22646* of the Act. After collection by the County, the net amount of the levy shall be paid to the City Treasurer.

Section 6 The City Treasurer shall deposit all money representing assessments collected by the County for the District to the credit of a fund for the Riverside Avenue Landscaping and Lighting District and such money shall be expended only for the maintenance, operation and servicing of the improvements, together with other expenses as described in Section 4.

Section 7 The adoption of this Resolution constitutes the District levy for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017.

Section 8 The City Clerk's designee, Willdan Financial Services, is hereby authorized and directed to file the levy with the County Auditor subsequent to the adoption of this Resolution, pursuant to Chapter 4, Article 1, Section 22641 of the Act. The City Clerk is directed to deliver a certified copy of this adopted Resolution to Willdan Financial Services within two weeks of adoption via either e-mail to mashley@willdan.com or US Mail to: Willdan Financial Services, 27368 Via Industria, Suite 200, Temecula, CA 92590 Attn: Mickey Ashley.

RESOLUTION NO. 16-265

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, AMENDING AND/OR APPROVING THE ENGINEER'S ANNUAL LEVY REPORT FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2016/2017

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, ordered the preparation of the Engineer's Annual Levy Report (hereafter referred to as the "Report") for said district known and designated as: Vernon Street Landscaping and Lighting District (hereinafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, being Part 2 Division 15, of the Streets and Highways Code of the State of California, beginning with Section 22500* (hereinafter referred to as the "Act"), and,

WHEREAS, there has now been presented to this City Council the Report as required by *Chapter 3, Section 22623* of said Act, and as previously directed by Resolution; and,

WHEREAS, this City Council has carefully examined and reviewed the Report as presented (or amended), and is satisfied with each and all of the items and documents as set forth therein, and is satisfied that the levy has been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed, as set forth in said Report.

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Report as presented, is hereby approved (as amended), and is ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 3 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation and final approval of the Report.

RESOLUTION NO. _____

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA ORDERING THE LEVY AND COLLECTION OF ASSESSMENTS WITHIN THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, FOR FISCAL YEAR 2016/2017

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, the City Council of City of Roseville, California, has, by previous Resolutions, initiated proceedings, and declared its intention to levy assessments, and approved the Engineer’s Annual Levy Report (hereinafter referred to as the “Report”) that describes the assessments against parcels of land within the Vernon Street Landscaping and Lighting District (hereinafter referred to as the “District”) for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code, commencing with Section 22500* (hereinafter referred to as the “Act”) to pay for the maintenance and services of all improvements and facilities related thereto; and

WHEREAS, the Engineer selected by the City Council has prepared and filed with the City Clerk, and the City Clerk has presented to the City Council, a Report in connection with the proposed levy and collection of assessments upon eligible parcels of land within the District, and the City Council did by previous Resolution approve such Report; and

WHEREAS, the City Council desires to levy and collect assessments against parcels of land within the District for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, to pay for the maintenance and services of all improvements and facilities related thereto.

WHEREAS, this City and its legal counsel have reviewed Proposition 218 and found that these assessments comply with applicable provisions of Articles XIIC and XIID of the California State Constitution; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Following notice duly given, the City Council has held a full and fair public hearing regarding the District, the levy and collection of assessments, the Report prepared in connection therewith, and considered all oral and written statements, protests and communications made or filed by interested persons regarding these matters.

Section 2 Based upon its review (and amendments, as applicable) of the Report, a copy of which has been presented to the City Council and which has been filed with the City Clerk, the City Council hereby finds and determines that:

- i) the land within the District will be benefited by the operation, maintenance and servicing of the improvements located within the boundaries of the District;
- ii) the District includes all of the lands receiving such special benefit; and,
- iii) the net amount to be assessed upon the lands within the District in accordance with the assessment for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, is apportioned by a formula and method which fairly distributes the net amount among all eligible parcels in proportion to the estimated benefits to be received by each parcel from the improvements and services.

Section 3 The Report and assessments as presented to the City Council and on file in the Office of the City Clerk are hereby confirmed as filed.

Section 4 The maintenance, operation and servicing of the improvements shall be performed pursuant to the Act. The City Council hereby orders the improvements to be made, which improvements are briefly described as follows: the improvements within the District include: maintenance, servicing, administration and operation of landscape, lighting and streetscape improvements, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer's Annual Levy Report describes all new improvements or substantial changes in existing improvements.

Section 5 The County Auditor of the County of Placer shall enter on the County Assessment Roll, opposite each eligible parcel of land, the amount of levy so apportioned by the formula and method outlined in the Report, and such levies shall be collected at the same time and in the same manner as the County taxes are collected, pursuant to *Chapter 4, Article 2, Section 22646* of the Act. After collection by the County, the net amount of the levy shall be paid to the City Treasurer.

Section 6 The City Treasurer shall deposit all money representing assessments collected by the County for the District to the credit of a fund for the Vernon Street Landscaping and Lighting District and such money shall be expended only for the maintenance, operation and servicing of the improvements, together with other expenses as described in Section 4.

Section 7 The adoption of this Resolution constitutes the District levy for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017.

Section 8 The City Clerk's designee, Willdan Financial Services, is hereby authorized and directed to file the levy with the County Auditor subsequent to the adoption of this Resolution, pursuant to *Chapter 4, Article 1, Section 22641* of the Act. The City Clerk is directed to deliver a certified copy of this adopted Resolution to Willdan Financial Services within two weeks of adoption via either e-mail to mashley@willdan.com or US Mail to: Willdan Financial Services, 27368 Via Industria, Suite 200, Temecula, CA 92590 Attn: Mickey Ashley.

ENGINEER'S REPORT AFFIDAVIT

Establishment of Annual Rates and Charges for the:

Vernon Street

Landscaping and Lighting District

City of Roseville

Placer County, State of California

This Report describes the District and any relevant zones therein, including the improvements, budget, parcels and assessments to be levied for Fiscal Year 2016/17 as they existed at the time of the passage of the Resolution of Intention. Reference is hereby made to the Placer County Assessor's maps for a detailed description of the lines and dimensions of parcels within the District. The undersigned respectfully submits the enclosed Report as directed by the City Council.

Dated this 27th day of APRIL, 2016

I. OVERVIEW

A. INTRODUCTION

The City of Roseville (“City”) annually levies and collects special assessments in order to maintain the improvements within the Vernon Street Landscaping and Lighting District (“District”). The District was formed in January of 2001 and is levied annual assessments pursuant to *the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code* (“1972 Act”).

The Engineer’s Report (“Report”) describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2016 through June 30, 2017. The special benefit assessments are based on historical and estimated costs to maintain the District improvements. These assessments, which provide a direct and special benefit to properties within the District, will provide funding for the operation and maintenance of District improvements.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (“APN”) by the Placer County Assessor’s Office. The Placer County Auditor/Controller uses Assessor’s Parcel Numbers and specific Tax Code Accounts, to identify on the County’s tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will by resolution, order the improvements to be made and confirm the levy and collection of assessments herein pursuant to the Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council defines the assessments to be applied to each parcel within the District for Fiscal Year (“FY”) 2016/17. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved by the City Council.

B. COMPLIANCE WITH THE CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the 1972 Act and are in compliance with the provisions of the California Constitution Article XIID (Proposition 218).

The District has been formed pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code. Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the Act.

Prior to FY 2001/02, the City initiated (Resolution 00-523) and conducted property owner protest ballot proceedings (Resolution 01-22) in accordance with Article XIID of the California Constitution ("Article XIID") for the parcels within the District. An annual rate escalator was also included in the ballot that allows for an annual inflationary increase equal to the percentage change in the Consumer Price Index of the San Francisco-Oakland-San Jose Area as of January of each succeeding year (the "Escalation Percentage"). At the conclusion of the Public Hearing held on January 17, 2001, all property owner ballots returned were tabulated to determine if majority protest existed. The result of the protest proceeding was an approval of the assessment rate and the annual inflationary increase for maintaining the improvements within the District.

Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls.

C. DESCRIPTION OF DISTRICT BOUNDARIES

The District is located in downtown Roseville and includes all parcels that front along Vernon Street between Folsom Road and the Riverside/Douglas Boulevard. See Appendix A for District boundary map.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to this proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.

- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.

- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF THE IMPROVEMENTS AND MAINTENANCE

The District ensures the continued maintenance, servicing, administration and operation of various landscape, lighting and streetscape improvements and associated appurtenances that are required to keep the improvements in a healthy, vigorous, and satisfactory condition. The assessable parcels receive benefit from the above improvements within the District.

Specific improvements include installation, maintenance and servicing of public facilities, including, but not limited to street trees, sidewalks, curbs, gutters, parking stripes, turf, brick pavers, planters, gateways, benches, bike racks, signage, trash receptacles, and lighting throughout the boundaries of the District (the “Improvements”).

As applied herein, “installation” means the construction of public Improvements, including, but not limited to, land preparation, such as grading, leveling, cutting and filling, sod, landscaping, irrigation systems, sidewalks and drainage, lights, equipment, turf, brick pavers, planters, gateways, benches, bike racks and signage.

“Maintenance” means the furnishing of services and materials for the ordinary and usual maintenance, operation and servicing of any Improvement, including repair, removal or replacement of all or any part of any Improvement; providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury; the removal of trimmings, rubbish, debris, and other solid waste, and the cleaning, sandblasting, and painting of Improvements to remove or cover graffiti.

“Servicing” means the furnishing of electric current, or energy, gas or other illuminating agent for any public lighting facilities or for the lighting or operation of any other Improvements; or water for the irrigation of any landscaping, the operation of any fountains, or the maintenance of any other Improvements.

Plans and specification for the Improvements to be maintained are on file in the office of the Economic and Community Services Director at 311 Vernon Street, Roseville, CA 95678.

All assessable parcels identified as being within the District share in both the cost and the benefits of the improvements. The costs associated with the Improvements are equitably spread among all benefiting parcels within the District. Only parcels that receive direct benefit from the Improvements are assessed, and each parcel is assessed in proportion to the estimated benefit received. The funds collected are dispersed and used for only the services and operation provided to the District.

II. METHOD OF APPORTIONMENT

A. GENERAL

The 1972 Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements which include the construction, maintenance and servicing of public lights, landscaping and appurtenant facilities. The 1972 Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”

The formula used for calculating assessments in the District therefore reflects the composition of the parcels, and the Improvements and services provided, to fairly apportion the costs based on estimated benefit to each parcel.

B. BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments, notably:

Article XIID Section 2d defines District as follows:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service”;

Article XIID Section 2i defines Special Benefit as follows:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4a defines proportional special benefit assessments as follows:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

This District was formed to establish and provide for the improvements that enhance the presentation of the surrounding properties and developments. These improvements will directly benefit the parcels to be assessed within the District. The assessments and method of apportionment is based on the premise that the assessments will be used to construct and install landscape and lighting improvements within the District as well as provide for the annual maintenance of those improvements, and the assessment revenues generated by District will be used solely for such purposes.

The costs of the proposed improvements have been identified and allocated to properties within the District based on special benefit. The improvements to be provided by this District and for which properties will be assessed have been identified as an essential component and local amenity that provides a direct reflection and extension of the properties within the District which the property owners and residents have expressed a high level of support.

The method of apportionment (method of assessment) set forth in the Report is based on the premise that each assessed property receives special benefits from the landscape and lighting improvements within the District, and the assessment obligation for each parcel reflects that parcel's proportional special benefits as compared to other properties that receive special benefits.

To identify and determine the proportional special benefit to each parcel within the District, it is necessary to consider the entire scope of the improvements provided as well as the properties that benefit from those improvements. The improvements and the associated costs described in this Report, have been carefully reviewed and have been identified and allocated based on a benefit rationale and calculations that proportionally allocate the net cost of only those improvements determined to be of special benefit to properties within the District. The various public improvements and the associated costs have been identified as either “general benefit” (not assessed) or “special benefit”. The City initiated and conducted property owner protest ballot proceedings in accordance with Article XIID. Each of the proposed Improvements, the associated costs and assessments were identified and allocated based on special benefit pursuant to the provisions of Article XIID and 1972 Act. Additionally, the Improvements and

the annual costs of ensuring the maintenance and operation of the Improvements are of direct and special benefit to the properties.

The City annually levies and collects special benefit assessments in order to maintain and service the District Improvements. The District provides for specific Improvements and services that include the maintenance and operation of landscaping and lighting Improvements and associated appurtenances located within the District's public right-of-ways and dedicated easements. The annual assessment is based on the historical and estimated cost to maintain the Improvements that provide a benefit to properties within these Districts. The Improvements within the District and the costs of those Improvements are identified and budgeted separately, including all expenditures, deficits, surpluses, revenues, and reserves.

All Improvements within the District and the properties associated with those Improvements were reviewed for benefit prior to the formation of the District. Because the Improvements affront the benefited parcels, it has been determined that there is no measurable general benefit to properties outside the District or to the public at large. In making this determination it should be noted that similar improvements within California are typically maintained by individual property owners, through some type of association or a special district as allowed by State Law since the on-going maintenance of these improvements are a special benefit to the properties associated with those improvements.

The method of apportionment (method of assessment) for the District is based on the premise that each of the assessed parcels within the District receives special benefit from the Improvements maintained and financed by District assessments. The presence of these Improvements and the close proximity of the Improvements to the properties within the District enhance the desirability and security of properties within the District.

The landscape Improvements provided by the District may include landscaped parkways, perimeters, entryways, local medians, slopes, internal amenities and appurtenant facilities. Street lighting Improvements may include all energy costs and necessary maintenance to the facilities related thereto. The annual assessments outlined in this Report are proposed to cover the estimated costs to provide all necessary service, operation, administration, and maintenance required to keep these Improvements in a healthy, vigorous, and satisfactory condition. The special benefits associated with the local landscaping Improvements are specifically:

The special benefits associated with all landscaping Improvements are specifically:

- Enhanced desirability of properties through association with the Improvements.

- Improved aesthetic appeal of properties providing a positive representation of the area and properties.
- Enhanced adaptation of the urban environment within the natural environment from adequate landscaping.
- Environmental enhancement through improved dust and debris control, and fire prevention.
- Increased sense of pride in ownership of property within the District resulting from well-maintained Improvements associated with the properties.
- Enhanced quality of life through well-maintained landscaped areas.
- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the District through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels by moderating temperatures, providing oxygenation and attenuating noise.

The special benefits of street lighting are the convenience, safety, and security of property, improvements, and goods. Specifically:

- Enhanced deterrence of crime and the aid to police protection.
- Increased nighttime safety on streets and roads within the Districts.
- Improved ability of pedestrians and motorists to see.
- Improved ingress and egress to property.
- Reduced vandalism and other criminal acts and damage to Improvements or property.
- Improved traffic circulation and reduced nighttime accidents and personal property loss.
- Increased promotion of business during nighttime hours in the case of commercial properties.

All of the preceding special benefits contribute to a specific enhancement and desirability of each of the assessed parcels within the District.

C. DESCRIPTION OF THE METHOD OF APPORTIONMENT

Pursuant to the 1972 Act, the costs of the District may be apportioned by any formula or method that fairly distributes the net amount to be assessed, among all assessable parcels within the District in proportion to the estimated special benefits to be received by each such parcel from the Improvements. The special benefit formula used should reflect the composition of the parcels, the Improvements and services provided to fairly proportion the costs based on

estimated special benefit to each parcel within the District. All assessable parcels within the District shall receive a direct special benefit from the services and Improvements provided by the District.

Article XIID of the California Constitution specifies that only special benefits are assessable and that the City must separate the general benefits from the special benefits conferred on any parcel. Since the District is a downtown business area and the Improvements that affront each District parcel primarily attract and retain an increased customer base, these benefits enhance the District parcels and there is no measurable benefit to the public at large. Therefore, 100% of the Improvements are considered special benefit to the District parcels. The cost of maintaining the Improvements is therefore identified as special benefit and has been allocated to the special assessments.

It was determined that a uniform assessment rate per foot of frontage upon Vernon Street would fairly distribute the net amount to be assessed due to the following reasons:

1. The assessments are based upon a specific property owner's special benefit received from the Improvements.
2. The special benefits should be directly related to the extent at which a property fronts the improvements, relative to other properties in the District.

The base assessment rate for the District was \$4.59 per linear foot in FY 2001/02 and was determined using the formula below.

$$\text{Assessment Rate Per Foot} = \frac{\text{Balance to Levy}}{\text{Total Feet of Frontage}}$$

The annual assessment amount for each parcel was then determined using the formula below:

$$\text{Parcel Front Footage} \times \text{Rate per Linear Foot} = \text{Parcel Assessment Amount}$$

D. ANNUAL INFLATIONARY ADJUSTMENT

Commencing with FY 2002/03, the maximum assessment rate shall increase by the percentage change in the Consumer Price Index of the San Francisco-Oakland-San Jose Area ("CPI") as of January of each succeeding year (the "Escalation Percentage"). Since the Department of Labor, Bureau of Labor Statistics does not publish a CPI for January; the CPI for preceding month shall be used since this is the CPI *available* in the month of January. The District's starting CPI Index of 184.1, December of 2000, is hereby established as the base CPI (the "Base Year CPI Index").

If the proposed assessment increases over the prior fiscal year by a percentage no greater than the Escalation Percentage as defined above, then the proposed assessment is not considered an increase. This assessment range formula shall be applied to all future assessments within the District. Generally, if the proposed annual assessment rate for the Current Fiscal Year is less than or equal to the calculated maximum assessment rate, then the proposed annual assessment is not considered an increased assessment.

E. APPEALS AND INTERPRETATION

Any property owner, who believes that the assessment levied on the subject property is in error as a result of incorrect information being used to apply the foregoing method of assessment, may file a written appeal with the Finance Director of the City of Roseville or his or her designee. Any such appeal is limited to correction of an assessment during the then Current Fiscal Year. Upon the filing of any such appeal, the Director of Housing and Redevelopment or his or her designee will promptly review the appeal and any information provided by the property owner. If the Director of Housing and Redevelopment or his or her designee finds that the assessment should be modified, the appropriate changes shall be made to the assessment roll. However, if any such changes are approved after the County of Placer's deadline for adjustments to the tax roll, the Director of Housing and Redevelopment or his or her designee is authorized to approve a refund of the reduction amount to the property owner. Any dispute over the decision of the Director of Housing and Redevelopment or his or her designee, shall be referred to the City Council of the City of Roseville and the decision of the City Council of the City of Roseville shall be final.

F. DETERMINATION OF FRONT FOOTAGE

The front footage of each assessable parcel is subject to revision and/or correction using measurements of front footage found on the then current Placer County Assessor's Parcel Maps or through direct measurement by City personnel. Any such correction that increases a Parcel Assessment shall not be considered an increased assessment subject to the procedural provisions of Article XIID.

III. DISTRICT BUDGET

A. FY 2016/17 BUDGET

DESCRIPTION	AMOUNTS
<u>DIRECT COSTS</u>	
Contract Maintenance - Landscaping	\$4,830.00
Repair & Maintenance - Landscaping	8,400.00
Repair & Maintenance - Lighting	2,500.00
Repair and Maintenance - Streetscape and Signage	2,000.00
Utilities	8,000.00
Rehab Reserve Project Expenditures	<u>15,000.00</u>
Total Direct Costs	\$40,730.00
<u>ADMINISTRATION COSTS</u>	
City Administration	\$1,351.00
Contract Administration - Park's Dept	2,434.00
County Auditor Fees	348.54
Consulting & Professional Services	2,995.00
Public Hearing Publishing Costs	775.00
ERP Project Costs	<u>2,903.65</u>
Total Administrative Costs	\$10,807.19
Total Direct and Administration Costs	\$51,537.19
<u>BUDGET ADJUSTMENTS</u>	
Replenishment/(Use) of Operating Reserve	(\$1,683.36)
Contribution for /(Use of) Rehab Reserve	(15,000.00)
Rounding Adjustment	<u>(0.79)</u>
Total Adjustments	(\$16,684.15)
BALANCE TO LEVY	\$34,853.04

B. FY 2016/17 ASSESSMENT RATES

DESCRIPTION	AMOUNTS
<u>FY 2016/17 ASSESSMENT RATES</u>	
Number of Assessable Parcels	62
Total Assessable Front Footage	5,370.76
Assessment Rates	
Applied Assessment Rates per each Foot of Frontage	\$6.4894
Maximum Assessment Rates per each Foot of Frontage	\$6.4896
Potential Maximum Assessment	\$34,854

C. FY 2016/17 FUND BALANCE INFORMATION

DESCRIPTION	AMOUNTS
<u>OPERATING RESERVE</u>	
Beginning Operating Reserve Balance 7-1-2016 (est.)	26,836.17
add: Replenish from FY 16/17 Levy	
less: Use for FY 16/17 Expenses	(1,683.36)
Transfer from/(to) the Rehab Reserve	615.79
Ending Operating Reserve Balance 6-30-2017 (est.)	\$25,768.60
<u>REHABILITATION RESERVE</u>	
Beginning Rehab Reserve Balance 7-1-2016 (est.)	45,225.70

less: Use for FY 16/17 Rehab Projects	(15,000.00)
Transfer from/(to) the Operating Reserve	(615.79)
Ending Rehab Reserve Balance 6-30-2017 (est.)	\$29,609.91

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping - Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping corridors, street medians, entryways, irrigation and related drainage systems as well as maintenance of appurtenant facilities (the "improvements").

Repair & Maintenance – Landscaping - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc. If zero, this line item may not be shown in the budget.

Repair & Maintenance – Lighting - This line item includes bulb replacement and repairs that are generally unforeseen. This may include repair of damaged amenities due to vandalism, storms, etc.

Repair & Maintenance - Streetscape/Signage - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's' Report.

Public Hearing Publishing Costs –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A “Replenishment” increases the levy in order to replenish the Operating Reserve. On the other hand, a “Use” of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Contribution for /(Use of) Rehab Reserve — A “Contribution” increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a “Use of” of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

APPLIED ASSESSMENT RATE

Number of Assessable Parcels - The total number of parcels that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public right-of-ways or easements, common areas, and/or parcels within the boundaries of the District currently do not benefit from the improvements and are therefore not assessed.

Total Assessable Front Footage - The total linear footage of that portion of each assessable parcel's boundary that is contiguous with Vernon Street.

Applied Assessment Rate per Front Foot - This amount represents the rate being applied to the front footage of each parcel for the Current Fiscal Year.

Maximum Assessment Rate per Front Foot - This amount represents the maximum rate that can be being applied to the front footage of each parcel for the Current Fiscal Year.

Maximum Potential Assessment – The total amount that is expected to be assessed against all parcels within the District for the Current Fiscal Year.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2016 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2016 to December 31, 2016, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 16/17 Levy – This amount is added to the levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2016 (the beginning of the Fiscal Year) through December 31, 2016. If zero, this line item may not be shown in the budget.

Use for FY 16/17 Expenses – The amount of the Operating Reserve to be used to fund FY 16/17 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2016 (the beginning of the Fiscal Year) through December 31, 2016. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2017 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2017. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2016 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2016. Streets and Highways Code 22660 allows the District generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 16/17 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 16/17 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2017 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2017. These funds shall be use to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment. Should the District have no Rehabilitation Reserve balances or related activity, no Rehabilitation Reserve information shall be presented in the Report.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment. A five year Capital Improvement Plan for the rehabilitation, restoration and /or replacement of District improvements and other allowable costs is shown below.

Future District funding is estimated as follows: Repair, replace and/or refurbish Street Furniture: \$5,000 each in FY 2016/17 and FY 2017/18. Repair, replace and/or refurbish Irrigation Meter: \$6,000 in FY 2017/18. Replace, repair, renovate and/or refurbish plants, landscaping & related materials: \$5,000 for each FY 2016/17 to FY 2018/19. Replace, repair, and/or refurbish Light Standard(s): \$5,000 each FYs 2017/18 and FY 2018/19. Replace and/or repair electrical outlets: \$5,000 in FY 2016/17 and \$4,000 in each FY 2017/18 to 2020/21.

From time to time, funds held in a Rehabilitation Reserve may be needed to respond to changing needs due to the condition of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and / or operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map for the District has previously been submitted to the Clerk of the City in the format required under the 1972 Act and is, by reference, hereby made part of this Report. These District Boundary Maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a summary of the District's Boundaries is presented herein.

Assessment diagram

APPENDIX B — 2016/17 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, shall be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways including public greenbelts and parkways; utility rights-of-ways; common areas; landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2016/17. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2016/17 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 16-266

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA ORDERING THE LEVY AND COLLECTION OF ASSESSMENTS WITHIN THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, FOR FISCAL YEAR 2016/2017

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, the City Council of City of Roseville, California, has, by previous Resolutions, initiated proceedings, and declared its intention to levy assessments, and approved the Engineer’s Annual Levy Report (hereinafter referred to as the “Report”) that describes the assessments against parcels of land within the Vernon Street Landscaping and Lighting District (hereinafter referred to as the “District”) for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code, commencing with Section 22500* (hereinafter referred to as the “Act”) to pay for the maintenance and services of all improvements and facilities related thereto; and

WHEREAS, the Engineer selected by the City Council has prepared and filed with the City Clerk, and the City Clerk has presented to the City Council, a Report in connection with the proposed levy and collection of assessments upon eligible parcels of land within the District, and the City Council did by previous Resolution approve such Report; and

WHEREAS, the City Council desires to levy and collect assessments against parcels of land within the District for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, to pay for the maintenance and services of all improvements and facilities related thereto.

WHEREAS, this City and its legal counsel have reviewed Proposition 218 and found that these assessments comply with applicable provisions of Articles XIIC and XIID of the California State Constitution; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Following notice duly given, the City Council has held a full and fair public hearing regarding the District, the levy and collection of assessments, the Report prepared in connection therewith, and considered all oral and written statements, protests and communications made or filed by interested persons regarding these matters.

Section 2 Based upon its review (and amendments, as applicable) of the Report, a copy of which has been presented to the City Council and which has been filed with the City Clerk, the City Council hereby finds and determines that:

- i) the land within the District will be benefited by the operation, maintenance and servicing of the improvements located within the boundaries of the District;
- ii) the District includes all of the lands receiving such special benefit; and,
- iii) the net amount to be assessed upon the lands within the District in accordance with the assessment for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017, is apportioned by a formula and method which fairly distributes the net amount among all eligible parcels in proportion to the estimated benefits to be received by each parcel from the improvements and services.

Section 3 The Report and assessments as presented to the City Council and on file in the Office of the City Clerk are hereby confirmed as filed.

Section 4 The maintenance, operation and servicing of the improvements shall be performed pursuant to the Act. The City Council hereby orders the improvements to be made, which improvements are briefly described as follows: the improvements within the District include: maintenance, servicing, administration and operation of landscape, lighting and streetscape improvements, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer's Annual Levy Report describes all new improvements or substantial changes in existing improvements.

Section 5 The County Auditor of the County of Placer shall enter on the County Assessment Roll, opposite each eligible parcel of land, the amount of levy so apportioned by the formula and method outlined in the Report, and such levies shall be collected at the same time and in the same manner as the County taxes are collected, pursuant to *Chapter 4, Article 2, Section 22646* of the Act. After collection by the County, the net amount of the levy shall be paid to the City Treasurer.

Section 6 The City Treasurer shall deposit all money representing assessments collected by the County for the District to the credit of a fund for the Vernon Street Landscaping and Lighting District and such money shall be expended only for the maintenance, operation and servicing of the improvements, together with other expenses as described in Section 4.

Section 7 The adoption of this Resolution constitutes the District levy for the Fiscal Year commencing July 1, 2016, and ending June 30, 2017.

Section 8 The City Clerk's designee, Willdan Financial Services, is hereby authorized and directed to file the levy with the County Auditor subsequent to the adoption of this Resolution, pursuant to *Chapter 4, Article 1, Section 22641* of the Act. The City Clerk is directed to deliver a certified copy of this adopted Resolution to Willdan Financial Services within two weeks of adoption via either e-mail to mashley@willdan.com or US Mail to: Willdan Financial Services, 27368 Via Industria, Suite 200, Temecula, CA 92590 Attn: Mickey Ashley.

COUNCIL COMMUNICATION

CC #: 7782

File #: 0400-04-15

Title: Amoruso Ranch Specific Plan - Annexation, Sphere of Influence Amendment, General Plan Amendment, Specific Plan, Pre-Zoning, Development Agreements, and Final Environmental Impact Report

Contact: Wayne Wiley 916-774-5283 wwiley@roseville.ca.us

Meeting Date: 6/15/2016

Item #: 11.2.

RECOMMENDATION TO COUNCIL

The Planning Commission recommends that the City Council take the following actions:

- A. Adopt the attached Resolution adopting the Water Supply Assessment (Exhibit A-1) and determining, based on the entire record, that projected water supplies will be sufficient to meet the demands of the Amoruso Ranch Specific Plan project, in addition to existing and planned future uses.
- B. Adopt the attached Resolution certifying the Amoruso Ranch Specific Plan Final Environmental Impact Report (EIR) (Exhibit B-1) as being complete, adequate and in compliance with the California Environmental Quality Act, making findings relating to mitigation measures and project alternatives and adopting the Statement of Overriding Considerations for the significant and unavoidable impacts identified in the EIR (Exhibit B-2), adopting a Mitigation Monitoring Program (Exhibit B-3), and directing staff to apply to the Placer County Local Agency Formation Commission (LAFCO) to annex the project site.
- C. Adopt the attached Resolution amending the General Plan Land Use Map and text as shown in the General Plan 2035 (Exhibit C-1).
- D. Adopt the finding of fact as stated in the attached Resolution and adopt the Resolution adopting the Amoruso Ranch Specific Plan (Exhibit D-1).
- E. Adopt the findings of fact as stated in the attached Ordinance and introduce for first reading the Ordinance to approve the Pre-zoning for the property located within unincorporated Placer County to reflect the zoning for the Amoruso Ranch Specific Plan (Exhibit E-1).
- F. Adopt the findings of fact as stated in the attached Ordinances and introduce for first reading the Ordinances to approve the Development Agreements (Exhibits F-1 & G-1).

BACKGROUND

The proposed Amoruso Ranch Specific Plan (ARSP) is located northwest of the City's corporate boundaries, south of West Sunset Boulevard in unincorporated Placer County, approximately 1.5 miles west of Fiddymont Road and directly north of the Creekview Specific Plan (CSP).

Analysis of the feasibility of the project began in June 2010, which did not identify any fatal flaws in the proposed project; therefore, the applicant (Brookfield Residential) submitted a formal project application in May of 2011. The proposed ARSP is 694 acres and upon approval would be the City's fourteenth specific plan area. The requested project entitlements include an Annexation, Sphere of Influence Amendment, Specific Plan, General Plan Amendment, Rezone (Prezone), Two Development Agreements, and an Environmental Impact Report (EIR). Approval of these entitlements will allow for:

- 2,827 dwelling units
 - o **1302** Low Density Residential
 - o **542** Medium Density Residential
 - o **873** High Density Residential
- 27 acres (**109 units**) Community Commercial – Village District
- 24 acres Community Commercial
- 17 acres Public/Quasi-Public (Elementary School, Electric Substation, etc.)
- 22 acres Neighborhood Parks
 - 22 acres City Park (General Plan obligation to be met through Park in-Lieu fees)
- 145 acres Open Space
- 20 acres (**1 unit**) Urban Reserve
- Right of Way for the future Placer Parkway (approximately 50 acres of right of way has been dedicated for a portion of the future, six-lane, Placer Parkway that will traverse the plan area)

SUMMARY EVALUATION

Staff has prepared an overview and evaluation of the ARSP project (including an evaluation of the requested project entitlements and environmental document) which is provided as Attachment 1 to this report. As ultimately concluded in Attachment 1, the proposed project is consistent with the applicable General Plan standards, and City Codes and Ordinances.

Due to the length of some of the ARSP documents, a link to the proposed General Plan Amendment, Specific Plan, and EIR is provided in place of hard copies. These documents can be found at <http://roseville.ca.us/amoruso/specificplandocuments>.

PUBLIC OUTREACH

Meeting notices were mailed to property owners within a 1000-foot radius of the project site for the neighborhood meeting held at the Martha Riley Community Center and for the public hearings that were held before the City's Transportation Commission, Design Committee, Public Utilities Commission, Parks & Recreation Commission, and Planning Commission. In addition, to the mailed notices, public hearing notices were also published in either the Roseville Press Tribune and/or Sacramento Bee for each of the meetings.

COMMISSION DISCUSSION & PUBLIC COMMENT

As noted above, this project was presented to the City's various commissions and committees. Meeting notes from all meetings are provided as part of the Attachment 1 report package. Attachment 1 also includes a summary of the public hearings and comments received. In short, all commissions and committees recommended the Council's approval of the specific plan and EIR.

FISCAL IMPACT

As with all specific plans, a Fiscal Impact Analysis was prepared for the project to evaluate the impact that Amoruso Ranch would have on the City's General Fund. Based on that analysis, it was determined that the project would not negatively impact the City's General Fund at build out. A more detailed discussion of the fiscal analysis has been included in the attachment to this

summary (Attachment 1).

ECONOMIC DEVELOPMENT / JOBS CREATED

The project proposes two commercial areas, consisting of four parcels totaling 51 acres that will provide services within the ARSP. Commercial land within the plan area could develop with up to 475,000 square feet of local and regional serving retail and office uses, including restaurants, retail services, personal services and professional offices. At build out it is expected that this development could provide 1,115 jobs within the ARSP.

ENVIRONMENTAL REVIEW

On March 1, 2016, a Draft EIR providing project-level analysis for the ARSP project was distributed to the public for review and comment for a period of 45 days. During that time, the Draft EIR was reviewed at public hearings before the City's Transportation Commission, Design Committee, Public Utilities Commission, Parks & Recreation Commission, and Planning Commission. Eight comment letters were received during the public review period addressing issues related to biological resources, impacts on surrounding agricultural uses, Placer Parkway Interchange, regional traffic impacts, air quality impacts, water quality impacts, and Western Placer Waste Management Authority operations. A Final EIR was prepared to respond to the comment letters and to account for changes to the Draft EIR including minor updates to the text and water supply tables. None of the comments received or updates to the EIR resulted in any changes to the original results of the Draft EIR. A copy of the letters received, followed by responses to comments, is provided in Section 12 of the EIR document <http://roseville.ca.us/amoruso/specificplandocuments>.

Respectfully Submitted,

Wayne Wiley, Associate Planner

Kevin Payne, Development Services Director

Rob Jensen, City Manager

COUNCIL COMMUNICATION

City Clerk Use Only

DATE: June 1, 2016

TITLE: AMORUSO RANCH SPECIFIC PLAN: Annexation, Sphere of Influence Amendment, General Plan Amendment, Specific Plan, Pre-zoning, Development Agreements, and Final Environmental Impact Report – FILE # 2011PL-039 (ANN-000007, GPA-000061, SPA-000043, RZ-000058 & DA-000047)

CONTACT: Wayne Wiley, Planning Division, (916) 774-5276, wwiley@roseville.ca.us

Meeting Date: June 15, 2016

This request is for the consideration of the Amoruso Ranch Specific Plan (ARSP), a 694-acre new specific plan project, with associated entitlements including: 1) an Annexation and Sphere of Influence Amendment (ANN & SOI) to incorporate the project site into the City of Roseville; 2) a General Plan Amendment (GPA) to update the General Plan consistent with the proposed project and to amend the horizon year from 2025 to 2035, 3) a Specific Plan (SP) to establish residential, commercial, parks, open space, and public land use designations; 4) a Zoning Map Amendment (ZO) to pre-zone the land; 5) Two Development Agreements between the City and Brookfield Residential (Applicant) and Amoruso Family Trust (Landowner) to vest entitlements and outline Developer and City obligations; and 6) a Final Environmental Impact Report (EIR).

SUMMARY RECOMMENDATION

The Planning Commission recommends that the City Council open the public hearing, accept public testimony and take formal action to:

- Adopt the attached Resolution adopting the Water Supply Assessment prepared for the project and determining, based on the entire record, that projected water supplies will be sufficient to meet the demands of the project, in addition to existing and planned future uses.
- Adopt the attached Resolution certifying the ARSP Final EIR as being complete, adequate and in compliance with the California Environmental Quality Act, making findings relating to mitigation measures and project alternatives, adopting a Mitigation Monitoring Program, adopting a Statement of Overriding Considerations for the significant and unavoidable impacts identified in the EIR.
- Approve the ARSP project entitlements (and adopt the corresponding Resolutions and Ordinances) for the General Plan Amendment, Specific Plan, Pre-zoning, and Development Agreements, which are listed as recommended actions C – G under the Recommendations Section of this Council Communication, and direct staff to apply to the Placer County Local Agency Formation Commission to annex the project site.

Routing Approval:

Figure 1: Location Map

BACKGROUND

In June 2010, a Feasibility Analysis to evaluate the project related to traffic, water, and fiscal impacts was prepared. The conclusions of the Feasibility Analysis were that, while there were some constraints, the City could maintain its current levels of service. Accordingly, in October of 2010, the City Council directed staff to begin a process to evaluate the mixed-use development and annexation proposal for the ARSP.

A formal project application was submitted to the City by Brookfield Residential in May of 2011, and at that time, the City began a detailed evaluation of the project, which included preparation of the technical environmental studies. In 2013, a Notice of Preparation (NOP) was released informing the public and responsible agencies that an Environmental Impact Report (EIR) would be prepared as the environmental document for the project per the California Environmental Quality Act (CEQA). Thereafter, the applicant began preparation of the Specific Plan document while the environmental consultant and staff began working on the Draft EIR.

In order to provide the public with an overview of the proposed project and outline the available opportunities to comment on the Draft EIR, a community meeting was held at the Martha Riley Community Center on February 22, 2016. On March 1, 2016, the Draft EIR was distributed for a 45-day public review period that ended April 15, 2016. There were numerous opportunities for the public to participate in the planning process:

- Planning Commission Public Workshop on the Draft EIR March 10th
- Transportation Commission March 15th
- Design Committee March 17th

- Public Utilities Commission March 22nd
- Parks and Recreation Commission April 11th
- Planning Commission on April 14th

This schedule was intended to provide opportunities for public comment pertaining to the project and to allow the various Commissions the opportunity to receive public testimony and comment on the Draft EIR during the public review period.

PROJECT DESCRIPTION

The project site is located northwest of the City of Roseville's corporate boundaries, south of West Sunset Boulevard in unincorporated Placer County, approximately 1.5 miles west of Fiddymont Road. One 20-acre parcel located near the southeast corner of the site (Wagner Parcel – Figure 2, light blue parcel) is not a participant in the specific plan effort, but is included in the annexation because it is within the existing sphere of influence, and is surrounded on the north by the proposed project, and on all other sides by the Creekview Specific Plan (CSP) (existing City). Annexation of the parcel will avoid creating an unincorporated island of land within the City. The owner of the Urban Reserve parcel is aware and supportive of the annexation request. The ARSP is the fourteenth specific plan to be processed by the City and encompasses approximately 694 acres of land. The proposed specific plan, which is outlined in more detail in this report, addresses aspects of land use, housing, circulation, resource management, infrastructure, public utilities and services, implementation, and design guidelines.

The plan area contains a mixture of land uses as outlined below:

- 2,827 dwelling units
 - **1302** Low Density Residential
 - **542** Medium Density Residential
 - **873** High Density Residential
- 27 acres (**109 units**) Community Commercial – Village District
- 24 acres Community Commercial
- 17 acres Public/Quasi-Public (Elementary School, Electric Substation, etc.)
- 22 acres Neighborhood Parks
- 145 acres Open Space
- 20 acres (**1 unit**) Urban Reserve

Additionally, as described in more detail under the Project Characteristics section of this report, the project includes right of way for the future Placer Parkway. Placer Parkway is a planned six-lane limited access roadway that at buildout, will provide access from Highway 65 to Highway 99 in Sutter County and will serve as a parallel facility to Interstate-80. Placer Parkway is not a part of the project and will be built as part of a separate project.

As noted previously, several entitlements are requested as part of this application to allow for the annexation and development of the ARSP project site. Noted below is a brief overview of each entitlement. In addition, a detailed summary of the project entitlements is included in Section 1 attached to this report.

Annexation: The annexation of 694 acres of land, currently located within unincorporated Placer County, is proposed in order to include the project area into the City's corporate boundaries.

General Plan Amendment: A General Plan Amendment is proposed in order to incorporate the ARSP project into the General Plan. In addition, the General Plan will be updated to:

- Change the General Plan horizon year from 2025 to 2035 as General Plans are long term planning documents that forecast 20 to 30 years out;
- Update the City's traffic model methodology from the Highway Capacity Model to Circular 212, a more widely used and updated model;
- Add an AM peak level of service policy (LOS). Consistent with state law, projects in Roseville have been including an AM and PM peak LOS analysis;
- Revise the affordable housing obligation to eliminate the middle income purchase requirement resulting in 10 percent of the total number of affordable units to be allocated to 60 percent low and 40 percent very low income rental units. It has been determined that market rate housing currently provides sufficient opportunities for affordable middle income purchase.

Specific Plan: Adoption of the ARSP is proposed to establish the development framework and guidelines for the plan area related to land use, housing, circulation, resource management, public utilities, public services, phasing, implementation, and design characteristics. The ARSP document includes development standards and design guidelines that are intended to provide standards and design guidance for the physical form and visual character of the plan area. The Design Guidelines contain criteria and plans for features like landscape corridors, paseos, signs, walls and fences. In addition, there are criteria for residential subdivisions and open space edges. The Design Guidelines include concept plans for commercial and public facility sites as well as Placer Parkway interface with adjacent residential uses.

Zoning Map Amendment: A Zoning Map Amendment is proposed to include the ARSP and associated zoning districts that will apply upon annexation of the specific plan into the City.

Development Agreements: Two identical DA's, distinguished by two geographic areas (a DA for 525 acres and a DA for 148 acres), will establish the obligations of the City, Amoruso Family Trust, and Brookfield Residential, to ensure orderly development of the ARSP area. The purpose of separate DA's is to allow the purchase of the property in two separate phases. Details of the DAs are provided in Section 3 attached to this report.

PROJECT CHARACTERISTICS

Summaries and analysis of the ARSP project is provided in Sections 1-3 attached to this report (Section 1 Entitlements, Section 2 Specific Plan and EIR, and Section 3 DA and Fiscal Analysis). However, there are several unique characteristics of the proposed project that are described below.

Roadways

Westbrook Boulevard - Westbrook Boulevard is a planned six-lane facility that will be the main arterial roadway serving the project area. The construction of the roadway will be extended in phases northward from its future terminus within the CSP and will terminate at West Sunset Boulevard. As planned, Westbrook Boulevard will provide the main north/south access into the ARSP with connections to Blue Oaks Boulevard and future

connections to other arterial roadways along its planned route. Roadway access into the plan area is dependent on development within the CSP area, which provides the only connection point from the existing city boundary.

Placer Parkway - Placer Parkway is a planned six-lane limited access roadway that at buildout, will provide access from Highway 65 to Highway 99 in Sutter County and will serve as a parallel facility to Interstate-80. While construction of the roadway is not a part of this project, this project will provide right of way for its future construction. As proposed, a portion of Placer Parkway will traverse the project site from the northeast corner to the southwest corner of the site. The proposed will help facilitate this important regional facility by providing right-of-way. No interchange is included at the portion of Placer Parkway located within the ARSP; however, the project's land use plan does not preclude an interchange should one be determined to be needed in the future.

Road G - Road G will provide access to the low density residential land uses planned in the northwest corner of the project site and will include a connection to West Sunset Boulevard. Road G has been planned to be below grade so that the need to elevate the future Placer Parkway would be minimized.

Roads B and D - Roads B and D are proposed four-lane minor arterial roadways which will consist of two travel lanes in each direction, on-street Class 2 bike lanes, and a landscaped median that allows for protected left turn lanes. These roads will provide connections from Westbrook Boulevard into the future Placer Ranch area located to the east.

Water Supply

Consistent with City General Plan policies, the proposed project is required to bring a new source and supply of surface water. Staff is working with the Placer County Water Agency (PCWA) which has indicated that it has ample water to serve the proposed project. The water supply source for the project will be PCWA's Middle Fork Project which is water conveyed from the proposed Ophir Water Treatment Plant through PCWA's water system. Water obtained through the wholesale agreement would be delivered to the City through the existing Tinker Intertie and then transported through City infrastructure to the project area. PCWA has stated their intent to complete construction of the Ophir Water Treatment Plant by summer 2020. In the interim period, should the project begin construction before the PCWA infrastructure is in place, the project will be supplied using existing available City supplies and water treatment plant capacity.

Drainage

In its current undeveloped state, portions of the ARSP project area currently drain offsite onto adjacent properties located to the west and north of the project boundaries. As part of the proposed project, these flows will be redirected into a drainage channel located along the western boundary of the project site. This channel is one of three channels that will allow for stormwater runoff to be collected and redirected to the southwestern corner of the project, where the drainage channels converge and discharge into University Creek on the City's Al Johnson Wildlife Area property.

Figure 3: Drainage Channel Locations (shown in dark blue)

Figure 4: Western Drainage Channel Cross Section

The drainage channels will measure approximately 50 to 100 feet in width. In addition to serving the drainage needs for the project, the western drainage channel will also serve as a buffer between the agricultural land uses on the adjacent County properties (Gleason cattle ranch) and the proposed residential uses. The area will be designed to include the drainage channel, a maintenance road, and landscaping. These uses will provide a minimum separation of 100 feet between the existing agricultural and proposed residential uses, which achieves the City's General Plan policy to maintain a separation between City and County land uses for purposes of land use compatibility.

Open Space

The ARSP contains four types of open space consisting of: Open Space Preserve, General Open Space, Transition Zone Open Space and Paseos. These areas are intended to provide a variety of functions including passive recreation, view corridors, resource preservation, stormwater drainage and floodwater conveyance.

The applicant also proposes 643 acres of offsite open space land located south of West Sunset Boulevard and immediately north of the Al Johnson Wildlife Area, as an area for wetland mitigation. The off-site parcels were originally proposed for dedication to the City, however, it is unclear yet whether the City will accept these parcels. The Development Agreements indicate that dedication is possible in the future, subject to the provisions of the federal 404 permit and future approval by the City, once more is known regarding the long term maintenance costs and allowed uses on the parcels.

Figure 5: Al Johnson Wildlife Area (Brookfield Mitigation Land)

Transition Open Space

Transition open space, which serves to provide a transition to the Open Space Preserve and General Open Space designated lands, from adjacent urban areas, would be permitted for wetland fills and would be permanently preserved by a declaration of covenants and restrictions specifically crafted for transition zone uses. Per the City's Open Space Preserve Overarching Management Plan (OSPOMP), this area is typically 50 feet wide; however, the ARSP project proposes reducing the minimum transition zone width to 30 feet (with many areas being substantially wider than 50 feet, as needed). The transition zone provides for recreation amenities like Class 1 trails and also aids in open space preserve management and access. The Transition zone can also accommodate slope grading, outfall/stormwater structures, weed abatement activities, drainage maintenance, and emergency vehicle access.

Parks

Approximately 25 percent of the ARSP area will be dedicated for parkland and open space uses, consisting of approximately 22 acres of active parks and 145 acres of open space (including 10 acres of street side paseos). Seven neighborhood parks are proposed throughout the specific plan, strategically located to provide connectivity to all residential neighborhoods and promote pedestrian and bicycle activity. The park sites range in size from one to ten acres and will include a variety of typical park amenities, such as softball fields, playground equipment, children's play areas, passive recreation spaces, and picnic areas.

In addition, the larger park sites (AR-62 and AR-66) will provide unique amenities for the plan area. Park site AR-62 is the largest neighborhood park within the ARSP and is intended to serve as the recreational hub of the community. The primary use of the park will include lighted sports fields with other possible amenities including a tot lot, basketball court, snack bar and shade structures. The park will include off-street parking similar to other active parks located throughout the City. In addition, park site AR-66 is anticipated to be a social gathering hub for the community and will include a large multipurpose turf area for gatherings and passive/informal recreation. This space is intentionally not over-programmed to provide for flexibility to accommodate a variety of events. It should be noted, that all park plans are conceptual in nature and will require further refinement during the design development phases. Refinement of the designs will be based on community input and available funding.

The City's General Plan Policy also has a Citywide parkland obligation as well. Due to the smaller size of this plan area as well as its location at the edge of the City, the applicant chose not to include a Citywide park site within the plan area. Rather, consistent with the Park In-Lieu Ordinance, and in order to meet parkland dedication requirements, the Development Agreements require the payment of Park In-Lieu fees (land component) and Citywide Park Improvement fees. Park In-lieu fees can be used for the construction and/or rehabilitation of Citywide park facilities throughout the City (with the exception of West Roseville and Sierra Vista Specific Plan areas.) Related to parks, the biggest funding gap is within the City-wide park fund. At this time, the applicant proposes to defer the land in-lieu fee, in the amount of \$2,988,900 (\$135,000/acre x 22.14 ac) for a period of 30 years.

While the City allowed fee deferrals for the Sierra Vista and Creekview plan areas during the economic downturn, it no longer is recommended. In fact as amendments occur that require Development Agreement amendments, the fee deferral is being removed from those plan areas (i.e., the recent Westbrook amendment to the Sierra Vista Specific Plan eliminated the fee deferral). Consistent with General Plan policy, new plan areas must bring a benefit to the community. One of these benefits is that the Citywide Park fees provide a benefit to existing residents by providing funding for Citywide park amenities. Staff is not supportive of the deferral of this in-lieu fee, as it will delay the construction and/or the rehabilitation of existing Citywide park facilities that are slated to serve existing City residents.

Elementary School Site

The land use plan evolved over time and had to respond to changing conditions. As proposed, the ARSP will provide an approximately ten acre site that could accommodate a two story urban style elementary school for up to 800 students. This site was previously planned with a joint use park component, but due to anticipated student generation rates to serve not only the ARSP project area, but also potentially the Placer Ranch area, the School District expressed the need for a larger school facility resulting in the removal of the joint use park site.

Village Center

The ARSP land use plan is shaped by five distinctive districts (Northwest, Northeast, Southeast, Central and Village Districts) that include concept plans for commercial and residential sites. As envisioned, the Village District is the most unique of these districts and will include a Commercial Mixed Use (CMU) area that is located west of Westbrook Boulevard at the intersection of Westbrook Boulevard and Main Street. This area is intended to provide multi-story mixed use buildings with storefronts and tall floor plates that may include retail uses on the ground level and office or residential units above. The design intent is to provide a sense of enclosure to the street, creating a classic small downtown feel that offers a variety of amenities for residents consisting of retail, office, commercial, recreation, and residential uses. In addition, the Village District development pattern will create a subtle block grid that forms connections with the surrounding residential neighborhoods. Chapter 3 of the Specific Plan describes in detail the vision for the districts that make up the plan area.

FISCAL IMPACT

The City is required to evaluate the fiscal impact Amoruso Ranch will have on the City's General Fund. The General Plan includes a policy requiring that all new specific plan projects have a revenue neutral or positive fiscal impact on the General Fund. Funding mechanisms such as Community Facilities Districts (CFDs) will be established to ensure ongoing funding for maintenance obligations, etc. A more detailed discussion of the fiscal analysis has been included in Section 3 attached to this report, and as noted therein, the ARSP project will not impact the City's General Fund at buildout.

ENVIRONMENTAL REVIEW

A Draft Environmental Impact Report (EIR) providing a project-level analysis for the ARSP was prepared and distributed for public review and comment from March 1, 2016 to April 15, 2016. Eight comment letters were submitted on the Draft EIR during the comment period:

- California Department of Fish and Wildlife, which discussed sensitive species
- Central Valley Regional Water Quality Control Board, providing standard language for water quality permits
- adjacent property owners Jim and Gaynell Gleason, expressing concern on drainage and their ongoing agricultural operations
- Roseville resident Jan McKinsey, concerned with the amount of traffic fees
- Western Placer Waste Management Authority, clarify solid waste generation rates
- Placer County Air Pollution Control District, commenting on mitigation
- Placer County commented on traffic and the agricultural buffer, and
- Caltrans provided comments after the comment period but are being included. The comments included traffic and drainage.

After reviewing the letters, it was determined that there were no substantive comments that would result in new impacts. A Final EIR (FEIR) was prepared to respond to the comments and to

account for changes to the Draft EIR including minor updates to text and to the water supply tables. The EIR has been revised to incorporate the Draft EIR into the Final EIR which is made up of Volumes 1 through 4 (see Exhibit B-1). This document was provided via hard copy to the Council on May 27, 2016 and is included as a CD with this packet.

PLANNING COMMISSION REVIEW & RECOMMENDATIONS

At the meeting of April 14, 2016, the Planning Commission reviewed the ARSP and associated Draft EIR. During the meeting, the Commission provided comments on the project and the Draft EIR (notes from this meeting and all public meetings and hearings on the project are included as Attachment 2 of this Council Communication).

After receiving public testimony, the Planning Commission closed the public hearing and discussed the project. The discussion focused on the following items:

- Potential parking issues associated with HDR sites;
- Interface between agricultural and residential uses;
- Mello Roos fee schedule comparison to other plan areas;
- Timing of Westbrook Boulevard construction (from West Sunset Boulevard to Baseline Road);
- SPRTA Fee for Amoruso compared to the other specific plans; and
- Jim and Gaynell Gleason's comment letter related to:
 - Impacts on adjacent agricultural uses;
 - Compatibility of surrounding land uses;
 - Drainage;
 - Aquifer storage & recovery system, and sustainable land water management;
 - Protection from aerial pesticide & herbicide spraying so as not to affect the agricultural operations including the right to farm; and
 - Notification & disclosures to future ARSP residents of potential agricultural operations.

Following the discussion, the Planning Commission made findings and voted unanimously to recommend that the City Council approve the ARSP project.

Since the Planning Commission meeting, minor edits have been made to the ARSP document. Minor edits are not unusual between the Planning Commission meeting and the City Council, and four change pages to the specific plan document have since been incorporated into the specific plan document provided to City Council (see Attachment 3). These pages include open space transition zone exhibits and updated park design for parcels AR-62, AR-66 and AR-67. The open space exhibits show the opportunities for City access into the open space for maintenance purposes, and the Parks plans have been amended to be more conceptual in nature consistent with the Parks Financing Plan.

ADDITIONAL STEPS

After the City Council takes action on the ARSP entitlements and Final EIR, there are several additional steps that must be taken before any construction within the plan area can begin:

- Approval of a tax share agreement between the City and Placer County. Staff is in the process of working on this with the County;

- Application submittal to the Placer Local Agency Formation Commission (LAFCO) for Annexation; and
- Approval by the Army Corps of Engineers of the 404 wetlands Permit.

RECOMMENDATION

It is recommended that the City Council take the actions listed below (A-F):

- A. Adopt the attached Resolution adopting the Water Supply Assessment (Exhibit A-1) and determining, based on the entire record, that projected water supplies will be sufficient to meet the demands of the Amoruso Ranch Specific Plan project, in addition to existing and planned future uses.
- B. Adopt the attached Resolution certifying the Amoruso Ranch Specific Plan Final EIR (Exhibit B-1) as being complete, adequate and in compliance with the California Environmental Quality Act, making findings relating to mitigation measures and project alternatives and adopting the Statement of Overriding Considerations for the significant and unavoidable impacts identified in the EIR (Exhibit B-2), adopting a Mitigation Monitoring Program (Exhibit B-3), and directing staff to apply to the Placer County Local Agency Formation Commission to annex the project site.
- C. Adopt the attached Resolution amending the General Plan Land Use Map and text as shown in the General Plan 2035 (Exhibit C-1).
- D. Adopt the finding of fact as stated in the attached Resolution and adopt the Resolution adopting the Amoruso Ranch Specific Plan (Exhibit D-1).
- E. Adopt the findings of fact as stated in the attached Ordinance and introduce for first reading the Ordinance to approve the Pre-zoning for the property located within unincorporated Placer County to reflect the zoning for the Amoruso Ranch Specific Plan (Exhibit E-1).
- F. Adopt the findings of fact as stated in the attached Ordinances and introduce for first reading the Ordinances to approve the Development Agreements (Exhibits F-1 & G-1).

EXHIBITS TO CC

Exhibit A-1: Water Supply Assessment dated May 2016

Exhibit B-1: Amoruso Ranch Specific Plan Environmental Impact Report (available online at:
www.roseville.ca.us/amoruso/specificplandocuments)

Exhibit B-2: Findings of Fact and Statement of Overriding Considerations

Exhibit B-3: Amoruso Ranch Specific Plan Mitigation Monitoring Program

Exhibit C-1: General Plan (available online at:
www.roseville.ca.us/amoruso/specificplandocuments)

Exhibit D-1: Amoruso Ranch Specific Plan (available online at:
www.roseville.ca.us/amoruso/specificplandocuments)

Exhibit E-1: Zoning Map

Exhibit F-1: Amoruso Ranch Development Agreement for 525.7 acres

Exhibit G-1: Amoruso Ranch Development Agreement for 148.7 acres

The following summarizes the requested entitlements associated with the proposed Amoruso Ranch Specific Plan (ARSP). Each entitlement is followed by a brief discussion of the request and the reviewing bodies that will act upon the proposal.

Environmental Impact Report (EIR): In compliance with the California Environmental Quality Act (CEQA) an Environmental Impact Report (EIR) (SCH# 2013102057) was prepared. The EIR provides the required environmental analysis for all of the entitlements described in this summary, and will form the basis of environmental analysis for future actions in the ARSP area. The Draft EIR was available for public review and comment from March 1, 2016 to April 15, 2016. At the completion of the comment period, a Final EIR was prepared to address comments received on the environmental document and included text changes to clarify information.

Reviewing Bodies: Transportation Commission, Public Utilities Commission, Parks and Recreation Commission, Planning Commission, and City Council

Sphere of Influence Amendment: A portion of the ARSP is within the City's existing Sphere of Influence (SOI) including parcel 017-101-010-000 (the 20-acre urban reserve parcel) and Parcel 017-101-011-000 (the 40-acre parcel directly to the west of the West Roseville Specific Plan). The proposed SOI Amendment is needed to modify the City's Sphere to add the northern 634 acre portion of the ARSP area, which is currently located to the north of the existing sphere. The final approval authority to amend the SOI lies with the Placer County Local Agency Formation Commission (LAFCO) following completion of a Municipal Services Review. The EIR analyzed the entire ARSP area, including the 634-acre sphere amendment area.

Reviewing Bodies: Planning Commission, City Council and Local Agency Formation Commission.

Figure 1: Project & Sphere of Influence Boundary

Annexation: The ARSP project site is located outside the City limits in unincorporated Placer County. Before the project can develop as part of the City, the land must be annexed into the corporate boundaries. The 20-acre Urban Reserve parcel will also be included in the Annexation, to avoid creating an island of unincorporated land within the City. The property owner of the Urban Reserve parcel, referred to as the Wagner Parcel, is aware of the annexation request and is supportive of the proposal. The final approval authority to annex lies with the Placer County Local Agency Formation Commission (LAFCO).

Reviewing Bodies: Planning Commission, City Council, Local Agency Formation Commission

General Plan Amendment, Specific Plan Adoption, and Zoning Map Amendment: The area defined as the ARSP is presently outside the City limits in unincorporated Placer County; therefore, it is necessary to amend the General Plan, adopt a new specific plan, and pre-zone the property to reflect the proposed land use and zoning designations. These entitlements will change the site's present

Placer County General Plan designation of agricultural/80-acre minimum and zoning designation of Farm-Building Site, 80 acres minimum (F-B-X 80 acre) to those identified in the ARSP document.

General Plan Amendment

In addition to the changes to the General Plan that are necessary to address the ARSP project, four additional General Plan amendments are also proposed including updating the General Plan horizon year from 2025 to 2035, revising the affordable housing requirement, updating the traffic model methodology, and adding an AM peak level of service (LOS) policy. A brief summary of each of the General Plan amendment changes are as follows:

- In order to accommodate the proposed ARSP project, changes are included to incorporate the project into the General Plan which includes increasing the residential unit count by 2,827 units and updating text references, figures, maps and tables;
- A change in the horizon year from 2025 to 2035 is proposed as General Plans are long term plans that forecast development 20 to 30 years out;
- A revision to the affordable housing requirement to eliminate the middle income purchase requirement is included. It has been determined that market rate housing currently provides sufficient opportunities for affordable middle income purchase. The greatest need appears to be products for low and very low income rental units, therefore, it is proposed that the General Plan be amended to eliminate the specific requirement for middle income purchase. In the future, applicants could propose middle income purchase to meet the requirements; however, it would not be a General Plan mandate;
- Update the Capital Improvement Program (CIP) study methodology from Circular 212 (evaluating LOS at intersection) to Highway Capacity Manual (pedestrian access, timing, lane utilization); and
- Adding an AM Peak Hour LOS policy in addition to the PM peak LOS that is currently in the General Plan. Projects are currently being evaluated for both AM and PM peak LOS as it is required by CEQA and this change will make the General Plan consistent with current law.

Reviewing Bodies: Transportation Commission, Planning Commission and City Council

Specific Plan Adoption

The City will consider adoption of the ARSP, Development Standards and Design Guidelines. The specific plan establishes a development framework for the area and addresses aspects of land use, housing, circulation, resource management, public utilities, public services, phasing, and implementation. Development Standards have been included as Appendix A of the specific plan document, outlining the development intent of the plan area. The Design Guidelines have been included as Appendix B of the specific plan document for the purpose of addressing special design considerations in ARSP and providing examples of various types of residential and commercial development that could occur in the ARSP.

Reviewing Bodies: Design Committee, Planning Commission and City Council

Zoning Map Amendment

The City will adopt a Zoning Map for the ARSP to reflect the proposed zoning districts that will apply upon annexation of the land (pre-zone for annexation). The various zoning districts are listed by parcel in ARSP Land Use Table (Specific Plan Table 4.2).

Reviewing Bodies: Planning Commission and City Council

Development Agreements: Two Development Agreements will be executed between the City, the developer and the Landowner. The DAs will cover two separate geographic areas of the Specific Plan. The Development Agreements will enforce the obligations between the parties and enable orderly development of the ARSP area. The agreement is a binding contract that sets the terms, rules, conditions, regulations, entitlements, responsibilities, and other provisions relating to the development of the property comprising the ARSP. The agreements may only be amended by mutual consent of all parties.

Reviewing Bodies: Planning Commission and City Council

Note: Upon certification of the Final EIR and approval of the entitlements listed above, subsequent entitlements will be requested in the ARSP area. These will include a Large Lot Tentative and Final Map to create real estate parcels corresponding to the Land Use Plan, individual Subdivision Maps to create single-family lots and smaller commercial parcels, Design Review Permits for commercial buildings, etc. All subsequent entitlements must be consistent with the ARSP and reviewed in accordance with City ordinances.

LAND USE

SECTION REFERENCES

Specific Plan Document: Chapter 4 – Land Use Plan
Draft EIR Document: Section 4.1 – Land Use and Agricultural Resources

SPECIFIC PLAN LAND USE SUMMARY

Location: The Amoruso Ranch Specific Plan (ARSP) project area is located northwest of the West Roseville Specific Plan (WRSP), northeast of the Al Johnson Wildlife Area, east of the Gleason Ranch in unincorporated Placer County and north of the Creekview Specific Plan (CSP) Area. An existing rural residential subdivision referred to as Amoruso Estates or Toad Hill in unincorporated Placer County is located north of ARSP, north of West Sunset Boulevard. The proposed Placer Ranch Specific Plan area is located immediately to the east. Access to the ARSP will be from the future extension of Westbrook Boulevard, through the Creekview Specific Plan (CSP).

Acreage: 694 acres within the annexation boundary, of which, 674 acres include ARSP land uses.

Residential Development: 2,827 units distributed as follows: 1,302 low-density single family units; 542 medium-density units; 873 high-density multi-family units; 109 units located in the Village District; and 1 unit within the Urban Reserve. The land use plan is illustrated in Figure 4.1 and detailed in Table 4.2 of the ARSP specific plan document.

Non-Residential Development: 51 acres of Community Commercial; 145 acres of Open Space (10 acres of which includes paseos); 22 acres of Parks and Recreation; and 17 acres of Public/Quasi Public (includes a 9-acre elementary school site, a 3 acre fire station site, and 5 acres of utilities sites).

Population: Approximately 7,378 residents based on an average of 2.61 persons per household.

Urban Reserve: The annexation boundary includes a 20-acre parcel designated Urban Reserve (UR), known as the Wagner Parcel (Parcel AR-110). No development is being proposed on the UR land at this time. This land is already within the City's Sphere of Influence, so its annexation at the same time as ARSP will avoid creating an unincorporated island of land surrounded by the City, and gives the City jurisdiction over any future proposals for the land.

LAND USE DISCUSSION ITEMS

General Plan Amendment: CEQA requires that the project be consistent with the City's General Plan. The project includes amendments to the General Plan to incorporate the project and project references. The project also includes four additional amendments including updating the General Plan horizon year from 2025 to 2035, updating the traffic model methodology, adding an AM peak level of service (LOS) policy, and a proposal to revise the affordable housing requirement. The EIR found the proposed project and GPAs to be consistent with the plans and policies of the General Plan.

Permitted Uses and Development Standards: The permitted uses and development standards for the ARSP will be consistent with those identified in the City's Zoning Ordinance.

Zoning Map Amendment: The City will adopt a zoning map for the ARSP to reflect the proposed zoning districts (pre-zone for annexation). The various zoning districts are listed by parcel in ARSP Table 4.2.

Specific Plan Phasing: The project is planned to occur in three phases, from south to north, as illustrated in ARSP Figure 10.1. In general, the phasing plan has been structured to ensure that the improvements in each phase can support its respective development in compliance with City policies and standards, and sub-phasing will be available with further City review and concurrence. Development within the plan area is dependent on access and infrastructure being available from the CSP area located to the south. Additional information on project phasing is included in the Implementation chapter of the ARSP document (Chapter 10).

Deed Disclosures: There are several land use items of note in the area, and therefore; it is recommended that future residents be made aware of the following:

Placer Parkway: Placer Parkway is a planned six-lane restricted access roadway facility which would be constructed in the future, and would connect Highway 65 in Placer County with Highway 99 in Sutter County to the west. Placer Parkway bisects the ARSP. Segments of the roadway may be elevated through the project area. Several residential neighborhoods within the ARSP are planned adjacent to the planned roadway. In order to address noise and air quality compatibility adjacent to the Parkway, the Design Guidelines indicate that a masonry wall will be required at the time of tentative map, and that care should be given in including landscaping and building orientation for screening. A deed disclosure would identify the planned roadway alignment and alert future residents to the proximity of the roadway.

Odor: Potential existing sources of odor in the region consist of industrial and agricultural land uses, including but not limited to the WRSL (located approximately 1.5 miles northeast of the site), City of Roseville Pleasant Grove Wastewater Treatment Plant (PGWWTP) (located approximately 1.3 miles south of the project site), the Rio Bravo biomass plant (located approximately 3.3 miles from the project site), Mallard Creek composting facility (located approximately 3.2 miles from the project site), Placer Propane (located approximately 3.2 miles from the project site), Thunder Valley Wastewater Treatment Plant (WWTP) (located approximately 3.4 miles from the project site), and dairy and chicken farms (located greater than 2 miles from project site). Operations of these facilities are likely to generate odors that may be perceived by sensitive receptors as offensive. While these occasional odors would not cause physical harm they can be unpleasant. While these facilities, include the WRSL and MRF are over one mile away and there are no thresholds of significance for odors, the DEIR considered this a significant and unavoidable impact and a deed disclosure is a condition of the project in order to make future residents aware of their proximity to the landfill and MRF and the potential for odor.

Aircraft Overflight: The ARSP area is approximately eight miles northeast of McClellan Airfield which is located in Sacramento County. Aircraft departing and arriving at McClellan fly over the project site at altitudes less than 3,000 feet. While average noise levels are not anticipated to be significant, single event noise may be a nuisance to future residents within the project area. Even though the draft EIR has determined noise impacts from aircraft overflight from McClellan Airfield to be less than significant, a deed disclosure is included as a condition of the project to alert future residents of potential disturbances due to airport noise.

Proximity to Agricultural Use: Notifying purchasers that their properties are located in the vicinity of the Gleason Ranch, a commercial agricultural production, which includes, or may include from time to time, operation of farm machinery, irrigation, noises, odor and dust

generation, electrical and barbwire fencing, and aerial and ground application of pesticides, herbicides and fertilizers, as well as occasional hunting activities, all of which may occur at various times of the day or night.

Agricultural Land Conversion: Of the 694 acres on the project site, a total of 539 acres will be converted from agricultural/rural to urban uses. The agricultural land is mostly fallow, and was used for cattle grazing and 67 acres were irrigated for rice farming in the past. A total of 135 acres would remain in open space. No land within the project area is under a Williamson Act Contract. The CDC Farmland Mapping and Monitoring Program classify the site as “Farmland of Local Importance”. There are no “prime” soils present within the project area. The soils are generally unsuitable for many agricultural uses beyond grazing. Mitigation is included in the project at a 1:1 ratio for the preservation of offsite grassland/open space which would reduce the impact of agricultural land conversion to a less than significant level. In addition, land to the east, northwest and north is currently in unincorporated Placer County.

General Open Space Parcel AR-98 is located on the project’s western boundary. It serves multiple functions which include a drainage channel facility that will carry storm water flow and water runoff from the project site. This is one of three channels in the project that will have a point of confluence at the southwesterly corner of the project area. The drainage facilities are proposed as below grade earthen channels which will be designed to accommodate access for future maintenance of the facilities. The channel on Parcel AR-98 also serves as a buffer between the proposed low density residential uses proposed in the northwestern quadrant of the plan area and the agricultural lands located in the County west of the project area. This buffer will allow for a minimum of 100 feet between the County property and the closest home proposed in the ARSP. This open space parcel serves as a buffer between the land uses and field/post and cable fencing will be located on either side of the channel to deter pedestrian access. Additionally, to further enhance land use compatibility, the project includes landscaping provisions within the specific plan design guidelines for the eastern edge of the channel. The project’s design guidelines call for landscaping between the residential uses and the channel to be non-invasive and native trees and plants as approved by the City. The location, size and design of this open space parcel adequately meets the City’s General Policy to maintain an open space transition edge between the City and County lands.

Potential Placer Ranch Specific Plan: The potential Placer Ranch Specific Plan is immediately east of the ARSP eastern boundary, located within Placer County’s Sunset Industrial Area. Placer Ranch is approximately 2,213 acres and could include approximately 5,400 residential units and 9-million square feet of non-residential uses. A 300-acre satellite campus of California State University, Sacramento could be developed. The ARSP project could provide direct access to Placer Ranch through the connection of two arterials, and two internal residential streets. The current Placer Ranch site is undeveloped and includes cattle grazing. Future residents of ARSP will be notified that development could occur in the future. The Placer County Board of Supervisors recently voted to take Placer Ranch forward for processing as part of an update to the Sunset Industrial Area. A masonry wall is planned along the eastern boundary of the plan area and a deed disclosure will alert future residents to the potential for future development along that boundary.

EIR LAND USE-RELATED SIGNIFICANT UNAVOIDABLE IMPACTS

The ARSP Draft EIR identified the following significant unavoidable impact:

- 4.1-3: Potential Incompatibility with Existing Agricultural and Other Land Uses in Placer County and the City of Roseville; and
- 4.1-8: Cumulative Impacts from Agricultural Resources Conversion

AFFORDABLE HOUSING

SECTION REFERENCES

Specific Plan Document: Chapter 5 – Affordable Housing Plan
Draft EIR Document: Section 4.2 – Population and Housing

HOUSING SECTION SUMMARY

Number of Affordable Units: Consistent with the City of Roseville’s General Plan Housing Element, at least ten percent of the units in the ARSP have been designated for lower income households, specifically low- and very-low income households. This includes rental housing affordable to low- and very-low income households. To provide housing affordable to the income level households with the greatest needs, the ARSP provides a total of 283 rental units affordable to the low- and very-low income households. Sixty percent of affordable units in the ARSP will be affordable to low-income residents and forty percent to very-low income residents.

General Plan Amendment: As part of this project, a General Plan Amendment is also being processed that will update the General Plan Affordable Housing Obligation to provide for 40 percent very-low income rental units and 60 percent low income rental units. It has been determined that market rate housing provides sufficient opportunities for affordable middle income purchase. The greatest need appears to be products for low and very low income purchase, therefore, it is proposed that the General Plan be amended to eliminate the requirement for middle income purchase. In the future, applicants could propose middle income purchase to meet the requirements; however it would not be a General Plan mandate.

Low and Very Low Income Rental Units: A total of 170 units in the ARSP are designated as low-income rental units and a total of 113 units are designated as very-low-income rental units.

HOUSING DISCUSSION ITEMS

The ARSP complies with the General Plan Ten Percent Affordable Housing Goal. Affordable units will be provided as high-density residential. This would be accommodated by unit types that would likely be attached multi-family projects such as apartments or townhomes.

EIR POPULATION AND HOUSING-RELATED SIGNIFICANT UNAVOIDABLE IMPACTS

Converting the project site from rural to urban uses would result in significant population growth as a result the ARSP Draft EIR identified the following significant unavoidable impact:

4.2-4: Inducement of substantial population growth

PUBLIC SERVICES

SECTION REFERENCES

Specific Plan Document: Chapter 8 – Public Services
Draft EIR Document: Section 4.11 – Public Services

PUBLIC SERVICES SECTION SUMMARY

Parks & Recreation: The ARSP is required to dedicate 66.42 acres of land (22.14 acres each for City-wide parks, neighborhood parks and open space). The ARSP proposal provides 22.14 acres of active parkland, and 135 acres of open space land plus 10.71 acres of street side paseos. No Citywide park site has been included in the ARSP due to the size of the plan proposal; rather, the ARSP will pay an in-lieu fee to satisfy its City-wide parkland dedication requirement. Consistent with the City's General Plan, active park sites are granted acre for acre credit. As detailed in ARSP Table 8.4, the total acreage credited is 22.14 acres of parkland along with in-lieu fees, satisfies the neighborhood park and open space dedication requirements.

Seven neighborhood parks are proposed and all residential neighborhoods are in proximity to a park. These parks range in size from one to 10 acres, with the largest located on the north end of the plan area. The neighborhood parks will include a variety of typical park amenities, such as soccer and softball fields, basketball courts, playgrounds, children's play areas, and picnic areas.

Funding for development of the neighborhood parks will be through collection of Neighborhood Park fees. The City-wide park fees are intended to fund City-wide parks located throughout the City of Roseville. All park plans are conceptual in nature and will require further refinement during the design development phases. Refinement of the designs will be based on community input and available funding.

Maintenance funding for the neighborhood parks and paseos will be provided through annual assessments for services through the Community Facilities District. Maintenance funding for the WRSP Citywide parks will be provided through the City's general fund with revenue offsets.

The ARSP open space provides for a variety of functions including passive recreation, view corridors, resource preservation, stormwater drainage and floodwater conveyance. The open space areas follow the Northern Preserve and University Creek corridor. A Class I bikeway is included in a portion of the open space areas, and various Class IA, Class II and Class III bikeways are included throughout, providing interconnectivity throughout the plan area. Residents can jog, walk or bike utilizing these open space areas.

In addition to on-site open space parcels, the applicant proposes 643 acres of offsite open space land located adjacent to the Al Johnson Wildlife Area as an area for wetland mitigation. Off-site parcels are parcels that are not contiguous with the plan area or proposed for annexation. Originally proposed for dedication to the City, it is unclear yet whether the City should accept these parcels. Therefore, it is recommended that the Development Agreement indicate that dedication is possible in the future subject to the provisions of the federal 404 permit and future approval by the City.

A number of factors are to be considered when accepting off-site open space. The main considerations are access and overall public benefit. At this point, discussions are still on-going regarding the public benefit component of the off-site land. In addition, the main goal of these off-site parcels is for wetland mitigation. The offsite lands could be dedicated to the City of Roseville or to a third party land trust. The final disposition of the property will be decided at the time of the federal regulatory approvals. If dedication to the City is proposed in the future it would be subject to approval by the City Council and annexed into the Community Facilities District for Service.

Schools: The ARSP is located within the Roseville City School District and Roseville Joint Union High School District. The ARSP will provide one 9.0-acre elementary school site. The proposal is unique in that it is proposed as a more urban elementary school, potentially two stories. Middle school students from the area will attend Cooley or Chilton schools. High school students will attend either Oakmont or

Roseville High School, and eventually, when constructed, would attend the planned high school on Hayden Parkway in the West Roseville Specific Plan area.

Library: Residents of the ARSP will most likely utilize the Martha Riley Community Library at Mahany Park. This joint-use facility also includes a community TV studio and a utility education center. Public Facility Fees would be collected that would go toward facilities such as libraries. The ARSP would generate approximately 7,378 residents that would contribute to the need for library facilities but would not generate the need for a library on its own. The General Plan standard is one library per 40,000 service population.

Police, Fire and Emergency Services: The ARSP will receive services from the City of Roseville Police Department and Fire Department. A fire station is planned within the ARSP on Parcel AR-54. The Police Department will provide its operations and patrols for the project from its existing station located on Junction Boulevard approximately seven miles from the plan area.

PUBLIC SERVICES DISCUSSION ITEMS

The Parks & Recreation Commission reviewed the size, location and concept for each of the proposed parks at its April 11, 2016 hearing, and unanimously recommended the Council's approval of the parks, recreation and resource management related sections of the Draft EIR and the land use plan as it pertains to the Resource Management and Public Services Chapters of the Amoruso Ranch Specific Plan. Notes from the meeting are provided as an attachment to the Council Communication. The Parks & Recreation Commission meeting video can be viewed via on-line video streaming on the City's website (www.roseville.ca.us/Amoruso).

EIR PUBLIC SERVICES-RELATED SIGNIFICANT UNAVOIDABLE IMPACTS

The ARSP Draft EIR identified no significant unavoidable impacts related to Public Services.

RESOURCE MANAGEMENT

SECTION REFERENCES

Specific Plan Document:	Chapter 6 – Resource Management
Draft EIR Document:	Section 4.7 – Geology, Soils and Seismicity
	Section 4.8 – Vegetation and Wildlife
	Section 4.9 – Cultural and Paleontological Resources
	Section 4.14 – Aesthetics

RESOURCE MANAGEMENT SECTION SUMMARY:

The project site is characterized by relatively flat to gently rolling terrain, with annual grasslands and a limited area of valley oak riparian area along University Creek along the southern boundary, in the planned open space preserve area. University Creek is a small tributary of Pleasant Grove Creek. Wetlands, including vernal pools and seasonal drainages, are dispersed throughout the site. There are 28 native Valley oak trees on the project site, and all of these will be preserved within open space areas.

Wetlands: Approximately 33.9 acres of wetlands and other waters are subject to the requirements of a 404 permit (see DEIR Figure 4.8-5). Wetlands are scattered throughout the ARSP area. The open space preserves are illustrated in Figure 6.2 of the ARSP document, and include the University Creek drainage corridor. In addition there are areas of vernal pools and seasonal wetlands located

predominantly on the southern portion of the plan area. Implementation of the ARSP is anticipated to impact approximately 18.6 acres of wetlands and other waters of the U.S. There are two levels of open space parcels within the project area, Open Space Preserves and open space that will remain as part of the project (*General Open Space (Avoidance Area)*), but would not be covered with preserve restrictions.

Open Space Preserves (Parcels AR-92, AR-97, and AR-105) will be permanently preserved either by a declaration of covenants and restrictions and/or a conservation easement to restrict access and activities within the preserve areas. This area would be managed in accordance with the City's Open Space Preserve Overarching Management Plan (OSPOMP). General Open Space (Avoidance Area) (Parcels AR-90, AR-91, and AR-94) are areas that will be avoided by project development but they may be impacted by the future construction of Placer Parkway and because of this they are not proposed for protection by a deed restriction and/or conservation easement. The ultimate management strategy for these areas will be determined during the future Placer Parkway project federal permitting process. During the interim period, the Avoidance Area will be managed as General Open Space in accordance with the City's OSPOMP.

Approximately 15.3 impacted acres would be preserved as part of the project, within areas designated as open space, while wetlands in other areas are assumed to be filled by development of the project. Loss of wetlands would occur as a result of grading in preparation for development, construction of roads and utility corridors, creation of storm water detention basins along stream corridors, and other ground-disturbing activities related to construction. Impacts would also result from future construction of Westbrook Boulevard northward from the ARSP if and when development occurs there. The impact to wetlands would be considered significant.

Swainson's Hawk: Swainson's Hawk nests have been observed south of the project area in the CSP area. Consistent with California Department of Fish and Wildlife protocol, preservation of off-site foraging grassland and open space habitat will be included as mitigation to reduce potential impacts from the ARSP. This mitigation will also alleviate impacts from loss of farmland to a less than significant level.

Cultural and Paleontological Resources: With the exception of the Urban Reserve Area, the ARSP was surveyed for cultural resources. No archaeological resources were identified during surveys; however, farm equipment was found on the property that postdated 1973. The farm equipment found was not identified as being historically significant. While no significant cultural resources were identified, there is always a potential that prehistoric and historic artifacts or sites could be uncovered during project development. Standard construction mitigation is included that would reduce potential cultural resource impacts, but because it is uncertain as to whether any find would be significant, this is considered a potentially significant unavoidable impact.

Aesthetic and Visual Impacts: The ARSP would convert over 481 acres of currently undeveloped grassland to urban uses. Approximately 135 acres would remain as open space and 20 acres would remain as Urban Reserve. Conversion of the majority of the site to urban uses, the introduction of new sources of light and glare, and degradation of scenic resources would represent a significant and unavoidable impact.

Drainage: Surrounding properties located in unincorporated Placer County are subject to existing drainage impacts during storm events. Residents in the adjacent Amoruso Estates within the County have expressed concerns regarding the existing flooding that occurs to their properties. Amoruso Estates is a rural community without urban levels of stormwater improvements (i.e., there is no existing storm drain system). Because it is a rural community there are no plans at this time by the County to provide storm drain improvements.

Being sensitive to the existing residents' storm drain concerns, the proposed project would redirect flows from the west, northeast and northwest corners of the ARSP property that currently flow offsite, to the south within the project boundaries. Onsite improvements include construction of a drainage channel approximately 60 - 100 feet in width that would collect stormwater throughout a majority of the project site to the channel along the western boundary, where it would ultimately discharge into University Creek on the Al Johnson Wildlife Area property (Section 9.4 of the Specific Plan). The project is conditioned to include yearly monitoring of the discharge area into the channel within Al Johnson Wildlife Area to ensure that there are no impacts.

RESOURCE MANAGEMENT DISCUSSION ITEMS

Wetlands: The ARSP is proposing to mitigate for the loss of vernal pools and other seasonal wetlands through a combination of avoidance (preservation in place) and mitigation strategies including off-site wetland creation and off-site preservation. The ARSP contains four types of open space consisting of Open Space Preserve, General Open Space (Avoided Area), Transition Zone Open Space, and Open Space Paseo. Maintenance funding for Open Space areas will be included in the services CFD. Each type of open space has been designed to accommodate functions including, view corridors, resource preservation, stormwater drainage and floodwater conveyance. Permanent on-site open space has been designed so that all preserved wetland basins (e.g., vernal pools and seasonal wetlands) are located at least 50 feet from the edge of development parcels. This is partially accomplished by designating a minimum 30 foot wide open space transition zone parcel around the open space preserve resulting in most of the preserved wetlands being greater than 50 feet from the edge of development parcels. The transition areas will be used for slope grading, outfall structures, storm water conveyance ditch, bike trails, etc. The landowner is responsible to obtain and comply with a federal 404 permit prior to any development.

Open Space Parcels

Open Space Type	Parcels	Acreage
Open Space Preserve	AR-92, AR-97, AR-105	97.57
General Open Space (Avoided Area)	AR-90, AR-91, AR-94, AR-98	10.26
Transition Zone Open Space	AR-93, AR-95, AR-96, AR-99, AR-100, AR-101	26.98
Open Space Paseo	AR-70 through AR-81, AR-102, AR-103, AR-104	10.71
Grand Total		145.52

In addition to on-site open space parcels, the applicant is in a unique position, in that they are proposing two offsite mitigation parcels, located within the same watershed area, located to the north of the Al Johnson Wildlife area that could provide off-site mitigation. At this point the off-site mitigation lands are not part of the annexation proposal. As discussed above, depending on access and overall public benefit, in the future the off-site lands could be dedicated to the City of

Al Johnson Wildlife Area Vicinity Map

Roseville, or to a third party land trust. The final disposition of the property will be decided at the time of the federal regulatory approvals when public benefit and maintenance, monitoring and reporting requirements are known. If dedication to the City is proposed in the future it would be subject to formation of a services CFD and approval by the City Council.

A separate environmental document is being prepared by the applicants to comply with the federal National Environmental Policy Act (NEPA) requirements. Because the 404 permit would ensure no net loss of wetlands, impacts would be reduced to a less than significant level.

Conversion of Undeveloped Landscape: The conversion of the ARSP site from a natural undeveloped landscape to an urbanized development will substantially alter the characteristic land forms of the site. Specific Plan policies and EIR mitigation measures, such as the preservation of approximately 135 acres of open space, have been incorporated to reduce these impacts to some degree.

EIR RESOURCES MANAGEMENT SIGNIFICANT UNAVOIDABLE IMPACTS

The ARSP Draft EIR identified the following significant unavoidable impacts:

- 4.14-1: Alteration of the visual character of the site and vicinity
- 4.14-2: New sources of light and glare
- 4.14-3: Degradation of scenic resources and scenic vistas
- 4.14-4: Cumulative Aesthetic Impacts

IMPLEMENTATION

SECTION REFERENCES

Specific Plan Document: Chapter 10 – Implementation & Administration

IMPLEMENTATION SUMMARY

Phasing Plan: The ARSP proposes implementation to occur in three phases. Development would proceed in a south to north direction. In general, the phasing plan has been structured to ensure that the improvements in each phase can support its respective development in compliance with City policies and standards, and that the development in each phase can support the costs of the required improvements. The phasing plan is illustrated in Figure 10.1 of the ARSP document, and is described in finer detail in the ARSP Development Agreements.

Project Financing: The ARSP infrastructure improvements and park improvements will be financed by a combination of a Community Facilities District (Mello Roos), developer fees, and other financing mechanisms. Details of the financing are described in the ARSP Development Agreements and the Financing Plan.

Development Approval Process: Development within the ARSP will be subject to the standard permit processes detailed in the City's Zoning Ordinance, except as otherwise noted in the ARSP Development Standards and Design Guidelines. In addition, other permits may be required by the US Army Corps of Engineers, the California Department of Fish and Wildlife, the Local Agency Formation Commission (LAFCO), and other agencies.

Future Changes: The ARSP allows for administrative approval of minor revisions which are in substantial conformance with the overarching vision and design principles of the Specific Plan, the Development Agreements, the General Plan, and the ARSP EIR. Transfers between ARSP parcels of up to 20 percent of residential unit allocations may be approved administratively in certain instances. These transfers must meet conditions including that the transfer does not result in a change in land use designation for either parcel, does not result in increased impacts beyond those in the EIR, does not adversely impact planned infrastructure, public facilities or fee programs. Revisions and transfers that do not meet the criteria in the ARSP for administrative approval would require a Specific Plan Amendment.

IMPLEMENTATION DISCUSSION ITEMS

Impacts from implementation of the ARSP are covered in the Draft EIR including grading, loss of open space, and conversion of the site to urban uses.

OTHER EIR SECTIONS

SECTION REFERENCES

Draft EIR Document:	Section 4.4 – Air Quality
	Section 4.5 – Climate Change and Greenhouse Gas Emissions
	Section 4.6 – Noise
	Section 4.10 - Hazardous Materials and Public Safety
	Section 5.0, 5.6 – CEQA Considerations & Cumulative Impacts
	Section 6.0 – Alternatives

OTHER EIR SECTIONS DISCUSSION ITEMS

Air Quality: The City of Roseville is located within the Sacramento Valley Air Basin (SVAB) which is currently classified as a non-attainment area for ozone and PM₁₀ pollutants since the SVAB region cannot comply with State and Federal standards for air quality. The ARSP will further increase operational air pollutant emissions (ROG, NO_x and PM₁₀) generated by mobile and stationary sources. The ARSP EIR identified an increase of project related operational air pollutant emissions and short-term construction emissions as significant and unavoidable. The ARSP impacts to air quality are consistent with impacts identified under previous specific plan EIRs, which found that these impacts exist with or without the project.

Climate Change/Greenhouse Gas Emissions: The potential effects of climate change from the proposed project's contribution to greenhouse gas emissions, and the potential effects of climate change on the project were analyzed. The proposed net change in land uses would result in a substantial increase in greenhouse gas emissions compared to existing conditions. The project's cumulative contribution to greenhouse gas emission was found to be significant and unavoidable.

Energy and Mineral Resources: There are no significant energy or mineral resources known to exist within the plan area, therefore, the project would have no impact.

Hazards: The EIR identified only the potential for soil contamination and past well use from the prior agricultural uses as the sole potentially significant impact. Typical soil remediation practices would mitigate the potential impact to a less than significant level. There are no new hazard impacts as a

result of the ARSP. The ARSP EIR mitigation measures are adequate to mitigate potential hazards to less than significant levels.

On-site Noise: Development within the ARSP will create short-term sound level increases at noise-sensitive areas near construction activities, thereby resulting in temporary unavoidable impacts. Standard mitigation measures such as limiting hours of construction will help minimize some of the anticipated noise impacts, but not to a less than significant level.

A groundwater well for back up water supply is proposed within the project area. Well drilling, which requires around-the-clock drilling, typically for periods of approximately two-weeks can create impacts when residents are trying to sleep. To minimize drilling noise impacts, mitigation in the form of temporary noise curtains is required if at the time of construction homes are occupied within 1,000 feet of the well site. If the proposed well site does not meet City production requirements, it may require relocation. Depending on the relocation site, this could require around-the-clock drilling in close proximity to occupied residences. Therefore, well drilling noise is conservatively considered a significant unavoidable impact (in recognition of the potential need to relocate the well).

The EIR determined there would be a substantial permanent increase in ambient noise levels as a result of the Existing Plus Project, 2035 CIP Plus Project and 2035 Cumulative Plus Project related to traffic noise for which mitigation measures will not reduce to a less than significant level. Noise levels on Blue Oaks Boulevard west of Fiddymont Road, Pleasant Grove Road north of Baseline, and Sunset Boulevard West from Pleasant Grove Road to Amoruso Way are projected to increase by 8.7 dB, 4.3 dB, and 3.5 dB, respectively (Existing Plus Project). Noise levels on Sunset Boulevard West from Amoruso Way to Westbrook Boulevard are projected to increase by 3.3 dB (2035 CIP Plus Project). Noise levels on Sunset Boulevard West from Amoruso Way to Westbrook Boulevard are projected to increase by 3.4 dB (2035 Cumulative Plus Project). These increase are above the substantial permanent increase threshold of 3.0 dB which is why they are considered significant and unavoidable. Regardless, mitigation measures will be implemented as part of the project.

Aircraft Over-flights: As noted above under land use compatibility, large airplanes on approach or departure from McClellan Airfield may fly over the project area at altitudes lower than 3,000 feet. Although noise from McClellan meets state and local standards (the project site is outside the 60 Community Noise Equivalent Levels (CNEL) contour), single event noise may be a nuisance to future residents within the project area. Even though the Draft EIR has determined noise impacts from aircraft overflight from McClellan Airfield to be less than significant, a deed disclosure is included as a condition of the project to alert future residents of potential disturbances due to airport noise.

Offsite Traffic Noise: The project would increase traffic in the vicinity of the project at buildout in the year 2035.

SIGNIFICANT UNAVOIDABLE IMPACTS

The Draft EIR identified the following significant unavoidable impacts from the ARSP:

- 4.4-1: Generate short term construction related emissions
- 4.4-2: Generate long term operational-related (regional) emissions
- 4.4-5: Exposure of sensitive receptors to odors
- 4.4-6: Consistency with plans and policies
- 4.4-7: Result in a cumulatively considerable net increase in criteria pollutants

- 4.5-1: Generate a substantial contribution to greenhouse gas emissions that conflicts with an applicable plan or policy
- 4.6-1 Short term noise generated by construction activity
- 4.6-2: Commercial noise sources
- 4.6-5: Existing plus project increase in traffic noise in project area
- 4.6-7: Year 2035 plus project increase in traffic noise outside the plan area
- 4.6-9: Year 2035 cumulative plus project increase in traffic noise outside the plan area
- 4.6-10: Traffic noise at future noise sensitive land use developed within site

CEQA Considerations (Cumulative)

In addition to the proposed project's impacts, the ARSP combined with other existing and reasonably foreseeable projects in the region, will contribute to significant unavoidable cumulative impacts. The Draft EIR identified the following significant and unavoidable cumulative impacts:

- 4.1-8: Cumulative Impacts from Agricultural Resources Conversion
- 4.3-9: Increased Traffic at City of Roseville Intersections under 2035 CIP Conditions
- 4.3-11: Increased Traffic on Placer County, Sutter County, Sacramento County, or City of Lincoln Intersections under 2035 CIP Conditions
- 4.3-12: Increased Traffic Volumes on Roadways within Placer County, Sutter County, Sacramento County, or City of Rocklin under 2035 CIP Conditions
- 4.3-15: Increased Traffic on City of Roseville Intersections under 2035 Cumulative Conditions
- 4.3-17: Increased Traffic on Placer County, Sutter County, Sacramento County, or City of Lincoln Intersections under 2035 Cumulative Conditions
- 4.3-20: Increased Traffic Volumes on State Highways under 2035 Cumulative Conditions
- 4.4-7: Result in a Cumulatively Considerable Net Increase in Criteria Pollutants
- 4.5-1: Generate a Substantial Contribution to GHG Emissions that Conflicts with an Applicable Plan or Policy
- 4.6-7: Substantial Permanent Increase in Ambient Noise Levels as a Result of the 2035 CIP Plus Project Increase in Traffic Noise Outside of the Project Site
- 4.6-9: Substantial Permanent Increase in Ambient Noise Levels as a Result of the 2035 Cumulative Plus Project Increase in Traffic Noise Outside the Project Site
- 4.8-18: Cumulative Impacts to Biological Resources
- 4.12.1-8: Cumulative Water Supply and Water Treatment Impacts
- 4.12.3-3: Construction or Expansion of Wastewater Treatment Facilities
- 4.12.3-5: Cumulative Wastewater Impacts
- 4.12.4-5: Cumulative Solid Waste Impacts
- 4.14-4: Cumulative Aesthetic Impacts

CIRCULATION

SECTION REFERENCES

Specific Plan Document: Chapter 7 – Circulation Plan
Draft EIR Document: Section 4.3 – Transportation and Circulation

CIRCULATION SECTION SUMMARY

Main access into the ARSP will be through the Creekview Specific Plan (CSP) area. The ARSP will construct, widen, or extend several major roadway facilities that will provide and improve circulation opportunities on the west side of Roseville. Those improvements include:

Westbrook Boulevard: Westbrook Boulevard is a City-planned north/south six lane arterial roadway that will begin at Baseline Road in the Sierra Vista Specific Plan (SVSP) area that will extend north through the West Plan and CSP areas and into the project site, where it will connect in Phase 3 to West Sunset Boulevard in Placer County. Westbrook Boulevard will be the main arterial roadway serving the site from the south. Westbrook Boulevard will be extended in three phases northward from its terminus within the CSP. The roadway is currently planned to terminate within the CSP at the southern boundary of open space parcels C-51 and C-52. ARSP will be responsible for extending Westbrook north through the CSP open space parcels to the southern boundary of ARSP, and provide an extension through the project site. As part of the ARSP, the proposed project would grade and construct Westbrook Boulevard in phases and construct four of the six lanes. The remaining two lanes will be built as part of a future City Capital Improvement Project, as demand increases, with funds collected by traffic mitigation fees. The Westbrook Boulevard open space crossing will include maintenance ramps from Westbrook Boulevard to the open space preserve north and south of University Creek on both the east and west sides of Westbrook Boulevard.

West Sunset Boulevard – West Sunset Boulevard is a rural County Road that is north of and adjacent to the ARSP. Improvements to this County road include widening the existing 22-foot wide roadway section southerly from its current alignment and will provide turn lanes at the intersections of Westbrook Boulevard and Amoruso Way. It should be noted that this rural roadway will remain in Placer County's jurisdiction. Along the frontage of the project site, within the ARSP project boundary, a 25-foot landscaped corridor will be provided behind a planned drainage ditch and will include a 5-foot wide pedestrian path. Additionally, a maximum 7-foot masonry wall will be constructed between the property boundaries and the landscape corridor.

Roads B & D: Road B and Road D are proposed four-lane minor arterial roadways which will consist of two travel lanes in each direction, on-street Class II bike lanes, and a landscaped median that allows for protected left turn lanes, within a 76-foot right-of-way. Roads B and D will provide connections from Westbrook Boulevard into the future Placer Ranch area (no project currently pending) to/from the east. Public utilities easements would be located along both sides of Road B as well as a Class 1A pedestrian path within a landscape corridor. Stormwater LID facilities may be located within the landscaped corridor between the curb and the pedestrian path. Above ground utility boxes will be located within the landscaped corridor and screened from view as much as possible.

Placer Parkway: Placer Parkway is a planned 15-mile long, high-speed limited access transportation facility, which will connect State Route 65 in western Placer County to State Route 99 in south Sutter County. This facility bisects the northwest portion of the ARSP plan area. As currently planned, Placer Parkway will have six lanes within a 312-foot right of way, with a 100-foot median and two 50-foot landscape corridors on either side. The right-of-way for this planned facility, as it traverses through the

ARSP will be dedicated to the City as part of the planned development. The original Tier 1 EIR/Environmental Impact Statement (EIS) completed for the facility to determine an alignment did not propose an interchange at Westbrook Boulevard. No interchange is currently proposed. However, it is unclear whether an interchange will be needed in the future. Development of the Parkway will develop in phases and is a long term project. At the time the Parkway is proposed through the project site, additional environmental review will be required. Right of way will be set aside as part of the ARSP so an interchange is not precluded, should an interchange be needed in the future. Depending on the final design and traffic needs the connection could be on-grade or grade separated.

Road G: A low density residential neighborhood is planned on the north side of Placer Parkway. It would be accessed by a residential roadway referred to as Road G. In order to reduce costs to Placer Parkway, the applicant has proposed to grade Road G, below grade, so that Placer Parkway would not need to be elevated in the future.

CIRCULATION DISCUSSION ITEMS

Circulation Level of Service

The Draft EIR evaluated future level of service (LOS) with and without the project during both the a.m. and p.m. peak hours. The 2035 CIP analysis concluded that the proposed project would cause cumulatively significant intersection degradations to the seven City of Roseville intersections listed below during the AM and PM peak hours. The recommend mitigation measure for each of these impacts is listed in the Table below, followed by a summary analysis of each intersection listed below.

**Table 4.3-15
Recommended Intersection Mitigation Measures – 2035 CIP Plus Project Conditions**

Intersection	Recommended Intersection Mitigation	Level of Service	
		Before Mitigation	After Mitigation
AM Peak Hour			
McAnally Drive/Woodcreek Oaks Boulevard	No feasible mitigation	D	D
Blue Oaks Boulevard/Westbrook Boulevard	Provide 2 left-turn lanes, 3 through lanes, and 1 right-turn lane on all approaches. Operate WB right-turn movement with an overlap phase.	E	C
PM Peak Hour			
Roseville Parkway/Gibson Drive	No feasible mitigation	E	E
Blue Oaks Boulevard/Westbrook Boulevard	Provide 2 left-turn lanes, 3 through lanes, and 1 right-turn lane on all approaches. Operate WB right-turn movement with an overlap phase.	F	C
Baseline Road/Santucci Boulevard	No feasible mitigation	D	D
Westbrook Boulevard/Vista Grande Boulevard	Restripe WB approach to have 2 left-turn lanes, 1 through lane, and 1 right-turn lane.	D	C
Baseline Road/Westbrook Boulevard	No feasible mitigation	D	D
Source: Fehr & Peers, 2015a (Appendix L).			

A.M. Peak Hour Impacts

McAnally Drive/Woodcreek Oaks Boulevard – Under the 2035 CIP scenario, this intersection would operate at LOS C during the a.m. peak hour. The addition of the project would cause the intersection to degrade to LOS D. The City's CIP includes an additional westbound approach lane at the McAnally Drive/Woodcreek Oaks Boulevard intersection. Further widening is not possible at this intersection due to the surrounding land uses. However, operations at this intersection would be restored to LOS C under the 2035 Cumulative Plus Project scenario due primarily to traffic shifts caused by Placer Parkway. Therefore, this impact would be significant and unavoidable.

Blue Oaks Boulevard/Westbrook Boulevard – Under the 2035 CIP scenario, this intersection would operate at LOS C during the a.m. peak hour. The addition of the project would cause the intersection to degrade to LOS E. The level of service at this intersection could be improved to LOS C by providing two left-turn lanes, three through lanes, and one right-turn lane on all approaches and operating the westbound right-turn movement with an overlap phase. Therefore, this impact would be less than significant.

P.M. Peak Hour Impacts

Roseville Parkway/Gibson Drive – Under the 2035 CIP Plus Project scenario, the LOS at this intersection would degrade from LOS D to LOS E. The project would cause a three-second increase in delay during the PM peak hour, which worsens operations from LOS D to E. The intersection is built to its ultimate configuration. Signal timing adjustments would not restore operations back to LOS D. However, operations are restored to LOS D under the 2035 Cumulative Plus Project scenario. Therefore, the project impact would be significant and unavoidable.

Blue Oaks Boulevard/Westbrook Boulevard - Under the 2035 CIP Plus Project scenario, this intersection would degrade from LOS C to LOS F. This impact can be mitigated by providing two left-turn lanes, three through lanes, and one right-turn lane on all approaches and operating the WB right-turn movement with an overlap phase. This would improve the intersection operation from LOS E to LOS C. This improvement is feasible and will be added to the City of Roseville's Capital Improvement Program. Development within the ARSP will be required to pay fair share costs for this improvement through payment of Traffic Mitigation fees. Therefore, with this mitigation, the project impact would be less than significant.

Baseline Road/Santucci Boulevard - Under the 2035 CIP plus project scenario, this intersection would degrade from LOS C to LOS D. The Proposed Project would cause a two-second increase in delay at this intersection during the PM peak hour. The intersection is planned to include two left-turn lanes, three through lanes, and one right-turn lane on all approaches. Further widening is not possible and signal timing adjustments would not restore operations back to LOS C. However, intersection operations are restored to LOS C at this intersection under the 2035 Cumulative Plus Project scenario due primarily to traffic shifts caused by Placer Parkway. Therefore, this impact would be significant and unavoidable.

Westbrook Boulevard/Vista Grande Boulevard - Under the 2035 CIP Plus Project scenario, the LOS at this intersection would degrade from LOS C to LOS D. The impact can be mitigated by restriping the WB approach to have two left-turn lanes, one through lane, and one right-turn lane. This would improve the intersection operation from LOS D to LOS C. This improvement is feasible and will be added to the City of Roseville's Capital Improvement Program. Development within the ARSP will be required to pay fair share costs for this improvement through payment of Traffic Mitigation fees. Therefore, with this mitigation, this impact would be less than significant.

Baseline Road/Westbrook Boulevard - Under the 2035 CIP Plus Project scenario, the LOS at this intersection would degrade from LOS C to LOS D. The Proposed Project would cause a three-second increase in delay at this intersection during the PM peak hour. The intersection is planned to include two left-turn lanes, three through lanes, and one right-turn lane on all approaches. Further widening is not possible and signal timing adjustments would not restore operations back to LOS C. However, intersection operations are restored to LOS C at this intersection under the 2035 Cumulative Plus Project scenario due primarily to traffic shifts caused by Placer Parkway. Therefore, this impact would be significant and unavoidable.

General Plan Level of Service Consistency: The City's level of service policy requires that the City maintain LOS C at 70 percent of its intersections during the p.m. peak hour. The Draft EIR evaluated the percentage of intersections operating at LOS C or better during the p.m. peak hour, and also during the a.m. peak hour. A comparison of these percentages with and without the proposed project under the 2035 CIP scenario is shown in Table 4. As noted in the table the project will not cause a significant impact on this policy as 89 percent of the City's signalized intersections will operate at LOS C or better during the a.m. peak hour and 78 percent of the City's intersections will operate at LOS C or better during the p.m. peak hour. As such, this impact is considered less than significant.

Table 4 (4.3-16)
City of Roseville Signalized Intersection Operations – 2035 CIP Conditions

Level of Service	2035 CIP Conditions		2035 CIP Plus Project Conditions	
	AM Peak Hour	PM Peak Hour	AM Peak Hour	PM Peak Hour
Total Intersections ¹	221	221	226	226
LOS A-C	198 (89.5%)	175 (79.2%)	198 (89.3%)	174 (77.8%)
LOS D	15 (7%)	22 (10%)	15 (7%)	25 (11%)
LOS E	6 (3%)	18 (8%)	7 (3%)	19 (8%)
LOS F	2 (1%)	6 (3%)	2 (1%)	6 (3%)
Percent Operating at LOS D, E, or F	11.5%	20.8%	11.6%	22.3%
1 - Excludes the eight signalized intersections located in the City's Pedestrian Overlay District (POD). Source: Fehr & Peers, 2015a (Appendix L).				

Adjacent Jurisdiction Impacts

The DEIR also analyzed traffic impacts on adjacent jurisdictions to determine potential impacts on roadways outside the City. This included an analysis of Placer County, the City of Lincoln, Sutter County and Sacramento County roadways and intersections. Operations at all study roadway segments in Sutter County, Sacramento County and Lincoln would operate at acceptable LOS or unacceptable operations would not be exacerbated by the Proposed Project under 2035 CIP Conditions. Therefore, impacts to intersections within Sutter County, Sacramento County, and the City of Lincoln would be less than significant.

Placer County – the Proposed Project would cause cumulatively significant roadway segment or intersection degradations to the below Placer County facilities. This is considered a significant impact.

Roadway Segments:

Sunset Boulevard West between Westbrook Boulevard and Fiddymment Road (LOS A to E)
Fiddymment Road from Athens Avenue to Sunset Boulevard West (LOS E to F)

Implementation of **Mitigation Measure 4.3-5 (b) and (c)** would restore operations on these roadway segments to acceptable levels of service by requiring the Applicant's fair share funding contribution. However, the remaining fair share costs required for construction have not been identified, and the City does not have jurisdiction over improvements on Placer County roadways. Additionally, the proposed Sunset Boulevard West improvements will be built in phases as development occurs. Therefore, this impact is considered significant and unavoidable.

Intersections:

- Fiddymment Road/Sunset Boulevard West: (LOS A to LOS E).
- Fiddymment Road/Athens Avenue: (LOS E to LOS F).

Implementation of **Mitigation Measure 4.3-3** would restore operations at these intersections to acceptable levels of service by requiring the Applicant's fair share funding contribution. However, the remaining fair share costs required for construction have not been identified, and the City does not have jurisdiction over improvements on Placer County roadways. Therefore, this impact is considered significant and unavoidable.

City of Rocklin - The DEIR analysis for Rocklin's roadways indicates that the ARSP would not cause any significant degradation of Rocklin's level of service; as such, this impact was noted as less than significant.

City of Lincoln - The DEIR analysis for Lincoln's roadways indicates that the ARSP would not cause any significant degradation of Lincoln's level of service; as such, this impact was noted as less than significant.

Sutter County - The DEIR analysis indicates as shown in Table 8 that Riego Road in Sutter County would continue to operate at LOS A under the 2035 CIP Plus Project scenario. The recently approved Sutter Pointe Specific Plan and the Placer Vineyards Specific Plan identified the ultimate need for Riego Road to be widened to six lanes to accommodate future traffic volumes. As noted in Table 8, traffic volumes under the 2035 Plus Project scenario would increase by 200 Vehicles per day, and the level of service would not degrade from LOS A. This is considered a less than significant impact.

Table 8
Level of Service at Sutter County Roadway Segment
2035 CIP Plus Proposed Project Scenario

<i>Roadway Segment</i>	<i>LOS Standard</i>	<i>Lanes</i>	<i>2035 CIP Conditions</i>			
			<i>2035</i>		<i>Plus Project</i>	
			<i>ADT</i>	<i>LOS</i>	<i>ADT</i>	<i>LOS</i>
Riego Rd E/O SR 70-99	D	6	22,100	A	22,300	A
Notes: BOLD Locations Do Not Meet LOS Policy						

Sacramento County - The proposed project would result in traffic volume increases on a number of roadways in Sacramento County. The DEIR concluded that none of the Sacramento County intersections would experience a significant level of service degradation with the addition of the proposed project. As such this impact was considered less than significant.

State Highways - The DEIR concludes that I-80, SR 70/99 and SR-65 would experience poor levels of service in 2035 with or without the ARSP. Development of the ARSP would increase traffic densities on portions of these highways as shown in Table 9. While the ARSP would not cause any highway segment or ramp intersection to degrade from LOS E or better to LOS F, it would contribute additional traffic on segments that are already operating at LOS F under 2035 no project conditions. This is considered a significant unavoidable impact.

1 - This segment is analyzed as a basic segment in the AM peak hour because the calculation falls out of the realm of a weave segment. 2 - N/A = Not applicable because density is not calculated for weave segments based on Leisch method. 3 - “ - “= Density not reported for facilities operating at LOS F. Source: Fehr & Peers, 2015a (Appendix L).									

It is important to note that the ARSP will participate in two fee programs for improvements along Highway 65. The Highway 65 JPA Fee Program will fund interchange improvements at Stanford Ranch/Galleria, Pleasant Grove, Blue Oaks, and Sunset. The ARSP will contribute fair share costs for those improvements. In addition, the ARSP will participate in the South Placer Regional Transportation Authority Fee Program which will provide funding for widening Highway 65 to six lanes between Interstate 80 and Sunset Boulevard.

Placer Parkway - The Placer County Transportation Agency (PCTPA) has completed a Tier 1 Environmental Impact Statement (EIS)/EIR for Placer Parkway, a six-lane transportation facility that would connect SR-65 west to SR 70/99 in Sutter County.

The Draft EIR considered two development scenarios with Placer Parkway:

- 2035 Cumulative with a partial Placer Parkway; and
- Super Cumulative with a full Placer Parkway

As shown in Table 4.3-22, under the Cumulative scenario which assumes partial development of the Placer Ranch Specific Plan and construction of Placer Parkway westerly from Foothills Boulevard to

Santucci Boulevard. Because the construction of Placer Parkway is key to circulation in the future, the City Council entered into a Memorandum of Understanding with Placer County, Lincoln, and Rocklin to require all new growth areas to provide a Tier 2 traffic contribution towards the construction of Placer Parkway. Both Placer Vineyards and Regional University, located in Placer County, as well as the SVSP, and the CSP, within the City of Roseville have already committed to this funding. It is expected that funding from all of the potential new growth areas in Placer County will generate in excess of \$450 million towards the construction of Placer Parkway.

**Table 4.3-22

Transportation Commission: The Transportation Commission reviewed the transportation and circulation aspects of the ARSP and took public testimony on the Draft EIR at its March 15, 2016 hearing. The Commission reviewed and provided comments on the project, and unanimously recommended approval of the ARSP and EIR. Notes from the meeting are attached to the Council Communication. The Transportation Commission meeting video can be viewed via on-line video streaming on the City's website (www.roseville.ca.us/Amoruso).

EIR TRANSPORTATION AND CIRCULATION RELATED SIGNIFICANT UNAVOIDABLE IMPACTS

The Draft EIR concluded that the project as proposed would have impacts. However, by implementing the prescribed mitigation measures, most of those impacts would be reduced to a less than significant level. The impacts that cannot be mitigated to a less than significant level are:

- Level of Service Impacts to McAnally/Woodcreek Oaks, Roseville Pkwy/Gibson, Baseline/Santucci and Baseline/Westbrook;
- Placer County roadway segment impacts to Sunset Boulevard West between Westbrook Boulevard and Fiddymont Road and Fiddymont Road between Athens Avenue and Sunset Boulevard; and
- Increased congestion on I-80, SR 70/99 and SR-65.

The City will continue to meet the General Plan Level of Service Policy with the impacts noted above.

The ARSP Draft EIR identified the following significant unavoidable impacts:

- 4.3-1: Increased Traffic Volumes on City of Roseville Existing Conditions
- 4.3-4: Impacts to Transit
- 4.3-5: Increased Traffic Volumes at Intersections within Placer County, Sutter County, Sacramento County, or City of Lincoln Under Existing Conditions
- 4.3-6: Increased Traffic Volumes on Roadways Within Placer County, Sutter County, Sacramento County, or City of Rocklin Under Existing Conditions
- 4.3-8: Increased Traffic Volumes on State Highways Under Existing Conditions
- 4.3-9: Increased Traffic at City of Roseville Intersections Under 2035 CIP Conditions
- 4.3-11: Increased Traffic on Placer County, Sutter County, Sacramento County, City of Rocklin, or City of Lincoln Intersections Under 2035 CIP Conditions.
- 4.3-12: Increased Traffic Volumes on Roadways within Placer County, Sutter County, Sacramento County, or City of Rocklin Under 2035 CIP Conditions.
- 4.3-15: Increased Traffic on City of Roseville Intersections Under 2035 Cumulative Conditions
- 4.3-17: Increased Traffic on Placer County, Sutter County, Sacramento County, or City of Lincoln Intersections Under 2035 Cumulative Conditions
- 4.3-20: Increased Traffic Volumes on State Highways Under 2035 Cumulative Conditions

UTILITIES PLAN

SECTION REFERENCES

Specific Plan Document: Chapter 9 – Utilities Plan
Draft EIR Document: Section 4.12 – Public Utilities, and
Section 4.13 – Hydrology and Water Quality

UTILITIES PLAN SECTION SUMMARY

Water Demands: The water demand for ARSP is 1,503 acre feet per year (AFY). Recycled water will be used in the amount of 272 AFY for landscaping and 165 AFY will be saved through water conservation measures that will be implemented as part of the project. The use of recycled water and water conservation measures results in a potable water demand of 1,066 AFY for the ARSP. The water conservation measures to be implemented within the ARSP are detailed in Chapter 9 of the Specific Plan document and in the project's Water Conservation Plan (Appendix G within the Draft EIR). Water conservation measures include items that are above and beyond state mandated requirements including recirculating hot water systems for residential units.

Water Supply: Consistent with City General Plan policies, the proposed project will be required to bring a new source and supply of surface water. Staff has been working with the Placer County Water Agency (PCWA) which has indicated that it has ample water to serve the proposed project.

The water supply source for the project will be PCWA's Middle Fork Project water conveyed from the proposed Ophir Water Treatment Plant through PCWA's water system. Water obtained through the wholesale agreement would be delivered to the City through the existing Tinker Intertie and then transported through City infrastructure to the project site. PCWA has stated their intent to complete construction of the Ophir Water Treatment Plant by summer 2020. In the interim period, should the project begin construction before the PCWA infrastructure is in place, the project will be supplied using existing available City supplies and water treatment plant capacity.

A benefit of this new PCWA surface water supply is that it would provide increased water reliability Citywide, not just to the project area. This is because the PCWA water supply is available in all hydrologic year types (normal and dry years) and it would be supplied from an existing diversion point on the upper American River, not dependent on Folsom Lake water levels. The City of Roseville is in the process of developing an agreement with PCWA for this new wholesale water supply. Prior to the approval of building permits, the EIR requires the agreement be in place between the City and PCWA. The project will provide its proportionate share of required funding for the acquisition and delivery of the new supply.

A complex analysis of the water related items has occurred since the inception of the project. Analysis has been conducted on water demands, water supply, groundwater impacts, water treatment, and distribution. A summary of the analysis is provided below. Copies of technical studies are included as Appendices to the Draft EIR.

Water Demands – The water demand for ARSP is 1,503 acre-feet per year (AFY). With the incorporation of water conservation measures and recycled water use, the demand for potable water will be reduced by 437 AFY resulting in an overall potable water demand of 1,066 AFY. Water conservation measures that will be implemented in the ARSP include measures such as recirculating hot water systems which would reduce water loss waiting for hot water.

Water demand will be addressed through a combination of potable and non-potable (recycled) water sources. Non-potable (recycled water) will be used for irrigation in both wet and dry years. To address dry year or emergency scenarios, the ARSP is required to include one onsite aquifer storage and recovery (ASR) groundwater well on Parcel AR-55.

Water Supply – A water supply assessment (WSA) has been prepared for the project and is included as Appendix E to the Draft EIR. The potable water demand created by the proposed project was compared to the City's water supply. Because existing City water supply contracts are insufficient to serve the ARSP, a new source of water is needed for the ARSP project. The City is intending to obtain treated surface water supplies from the Placer County Water Agency (PCWA) to serve the ARSP through a future wholesale agreement. This is consistent with the City's General Plan Policy that new annexation areas bring a new surface water supply. As described in the WSA, PCWA has sufficient water supplies available to serve the project.

Groundwater - There are three existing agricultural wells on the project site. As part of this project, those wells will be destroyed at the time the project is constructed. Groundwater is not a primary source of supply to serve the ARSP. It is, however, part of the City's water supply portfolio for meeting demands in emergency and dry year conditions. Even though the new wholesale PCWA water supply is available in all hydrologic year types, the distribution system for the ARSP would include one on-site groundwater well designed with aquifer storage and recovery (ASR) capabilities. At a minimum, the ARSP on-site well is projected to have a delivery capacity of 1,500 to 1,800 gallons per minute (gpm) or 2.16 to 2.59 million gallons per day (MGD). Consistent with existing City practice, groundwater would be used to supplement city-wide supply needs during drier and driest years or be available for use in emergencies such as in the event of a transmission main disruption.

It should be noted that the project will eliminate existing agricultural wells onsite that provided water to an existing residence and a small portion of the site that was in rice farming. The elimination of the wells would result in a benefit to the groundwater basin.

Water Treatment and Distribution - Treated surface water for the project will be delivered to the City from PCWA at the existing Tinker pump station intertie located along Industrial Boulevard. The Tinker pump station is currently designed to wheel 10 MGD of PCWA water supply through the City for delivery to Cal American Water Company. This facility will require future expansion to deliver the additional water to serve this project. The Project will fund the expansion of this facility. Water delivered through the Tinker facility for the ARSP will then be wheeled through existing City infrastructure to the Plan Area through a 24-inch main line that extends from the south (CSP Area) and distributed through an infrastructure system that parallels the collector and arterial roadway system which will consist of 6-inch to 24-inch diameter mains. Connections to potential future development areas will be provided at the southern project boundary along Westbrook Boulevard as well as at the eastern ends of Roads "B" and "D". All water improvements will be constructed to the City's standards and infrastructure improvements will be phased.

Recycled Water: Recycled water is part of the overall water supply strategy for the ARSP as it has been for the other most recently approved specific plan areas (CSP, SVSP, and WRSP). Recycled water will be used for landscape irrigation of parks, sports fields, schools, commercial and village center areas, publicly-landscaped areas (i.e., roadways medians, and paseos), and multi-family residential uses within the ARSP. The only area that will not receive recycled water for landscaping will be for the area north of Placer Parkway. Given the distance, and the relatively small size of that portion of the plan area, the cost to provide recycled water was not feasible. Further, it would have a minimal impact on the overall potable water supply. The City has evaluated the ARSP as one of the several Urban Growth Areas (UGAs) that will require additional recycled water.

The estimated annual recycled water demand in the ARSP is 272 AFY; however, through water conservation measures required within the plan area, this amount will be reduced by approximately 50 AFY.

The City will ultimately provide the ARSP with recycled water from the Pleasant Grove Wastewater Treatment Plant (PGWWTP). Recycled water will be supplied to the plan area via infrastructure within the WRSP and CSP and infrastructure will range from 6-inch to 24-inch lines that run parallel to the collector and arterial roadway system. In order to provide capacity to serve the ARSP, the ARSP is required to provide storage facilities for recycled water during one peak day, which has been determined to be one 24 hour period in July. The project will contribute funding to expand the existing recycled water tank and pump station located adjacent to the City's existing Roseville Energy Park. All recycled water improvements will be constructed to the City's standards and infrastructure improvements will be phased.

Wastewater: Sanitary sewer service will be provided by the City of Roseville. Wastewater generated within the ARSP will be treated at the City's PGWWTP located within the WRSP. The ARSP is projected to generate approximately 0.62 MGD average dry weather flow.

Wastewater flows from the project area will be directed to the PGWWTP through the southern portion of the project area in order to connect with an existing trunk line that will be provided within the CSP area. The designed infrastructure within the CSP was sized to accommodate flow from the ARSP. On-site sewer collection pipes will range in size from 6-inch to 24-inch pipes. Two lift station facilities will be required as part of the ARSP which will be located on Public/Quasi-Public parcels AR-56 and AR-57. All wastewater improvements and wastewater generation rates will be consistent with the South Placer Regional Wastewater and Recycled Water Systems Evaluation and will be constructed to the City's standards using a phased approach.

Solid Waste: The City of Roseville will provide solid waste services to the ARSP. Solid waste will be collected and delivered to the Western Placer Waste Management Authority (WPWMA) facility located north of the City at Athens Avenue and Fiddymont Road. The WPWMA owns a Materials Recovery Facility (MRF) which receives, separates, processes, and markets recyclable materials removed from the waste stream. Any residual waste is transported to the WPWMA landfill that is located on site.

At full buildout, the ARSP is anticipated to generate approximately 8,753 tons of solid waste annually. A solid waste recycling area is planned within the ARSP on AR-55 similar to other facilities located within the City of Roseville. This site will provide residents with a location to off-load recyclable materials.

Electricity: The proposed ARSP is currently within the service area of Pacific Gas & Electric (PG&E). If annexed, Roseville Electric would provide electric service to the ARSP area. Additional electricity resources needed to serve the ARSP, including state and federal mandated renewable electricity resources, will be purchased from outside sources or generated by new Roseville-owned generating facilities. As required by the State, Roseville will use energy efficiency programs to meet electricity demands before acquiring new electricity sources.

Peak electric demand in the plan area is estimated to be 21 megawatts (mW) at full build out. An approximately one acre electric substation is planned as part of the CSP that would be required to serve the ARSP. Easements within the ARSP will be dedicated for a future 60 kilovolt (kV) overhead line extension along the east side of Westbrook Boulevard south of Road "A," on the south side of Road "A" east of Westbrook Boulevard, and on the south side of Road "B" east of Road "A." Underground electrical distribution will be extended to the ARSP through a 12kV system to individual

parcels in conjunction with roadway improvements. Street lighting, signal power and other ancillary power facilities will be provided along all public street frontages as part of the roadway frontage improvements. All electric facilities will be constructed to City's standards.

Natural Gas: PG&E will provide natural gas upon request and in accordance with the rules and tariffs of the California Public Utilities Commission. PG&E's long range plans provide for availability of gas service to accommodate increased demand. Service will be provided to the ARSP through extensions planned through the CSP. Delivery of gas service to individual projects in the ARSP will be reviewed by PG&E at the time of development proposal.

Cable Television and Telephone Services: Voice and data communication services will be provided to the ARSP by AT&T, Comcast and Wave Broadband. Distribution lines to individual parcels will be extended from the south through the CSP and will be installed at the time other dry utilities are installed as development occurs. Individual providers will review project plans for telephone, cable television and high-speed data line services at the time proposed.

UTILITIES DISCUSSION ITEMS

Public Utilities Commission: The Public Utilities Commission reviewed and provided comments on the Utility Plan as well as provided an opportunity for public testimony on the Draft EIR at its meeting on March 22, 2016. At the conclusion of the meeting, the Public Utilities Commission unanimously recommended approval of the ARSP and adoption of the EIR. Notes from the meeting are attached to the Council Communication. Video of the Public Utilities Commission hearing can be viewed via on-line video streaming on the City's website at www.roseville.ca.us/Amoruso.

EIR UTILITIES SIGNIFICANT UNAVOIDABLE IMPACTS

The ARSP Draft EIR identified the following significant unavoidable impacts:

- 4.12.1-4: Capacity of Water Treatment System to Meet Potable Water Demand
- 4.12.1-8: Cumulative Water Supply and Water Treatment Impacts
- 4.12.3-3: Construction or Expansion of Wastewater Treatment Facilities
- 4.12.3-5: Cumulative Wastewater Impacts
- 4.12.4-5: Cumulative Solid Waste Impacts

FINAL ENVIRONMENTAL IMPACT REPORT

The Final EIR (FEIR) incorporates minor Draft EIR text and table changes. The FEIR also addresses eight comment letters received during the public review period between March 1 – April 15, of which six were from State, regional, or local public agencies or service providers, and two letters were from individuals. The comments received addressed issues related to biological resources, impacts on surrounding agricultural uses, Placer Parkway Interchange, regional traffic impacts, air quality impacts, water quality impacts, and Western Placer Waste Management Authority operations. The FEIR incorporates responses to the comments. None of the comments received or updates to the EIR resulted in any changes to the original results of the DEIR. A copy of the letters received, followed by responses to comments, is provided in Section 12 of the EIR document.

The proposed Development Agreements (DAs) address topics related to the development of the ARSP project area. In addition, the DAs identify the various obligations of the landowners (i.e. dedications, improvements, financing) and the City (i.e. cooperation, best efforts, fee credits/reimbursements). Finally, the DAs contain general provisions related to the terms of the agreement, amendment process, and annual review requirements, in order to clearly define the obligations of the vested parties. This project has two DAs, both between the City, Brookfield Residential and the Amoruso Family Trust. The two DAs are identical with the exception that they cover different geographical areas. The first DA covers 525 acres of the plan area and the second DA covers the remaining 169 acres located along the eastern boundary of the plan area. In addition, the second DA includes provisions for a park and ride lot located on Parcel AR-53. The purpose of having two DAs that cover different geographic boundaries within the plan area allows the properties to be purchased (or taken down) by Brookfield Residential from the property owner in two separate phases.

PERMITTED USES & VESTED ENTITLEMENTS

The permitted uses within the Amoruso Ranch Specific Plan (ARSP) are specified in the Specific Plan document, Tables 4.1 and 4.2, and the Land Use Map, Figure 4.1. The vested land use entitlements include:

- 2,827 dwelling units
 - **1302** Low Density Residential
 - **542** Medium Density Residential
 - **873** High Density Residential
- 27 acres (**109 units**) Community Commercial – Village District
- 24 acres Community Commercial
- 17 acres Public/Quasi-Public (Elementary School, Electric Substation, etc.)
- 22 acres Neighborhood Parks
- 145 acres Open Space
- 20 acres (**1 unit**) Urban Reserve

The permitted uses will be developed in accordance with the terms of the ARSP document, the ARSP DAs, and the Zoning Ordinance of the City of Roseville.

The 20-acre Urban Reserve parcel is not a participant in the specific plan process and is not a party to the DAs. The Urban Reserve parcel is included in the land annexation to avoid being left as an island of unincorporated land surrounded by City; however, it will not receive urban land use entitlements.

FISCAL ANALYSIS, IMPACT FEES & FINANCING

Fiscal Analysis: One of the Guiding Principles adopted by the City Council requires that any new development proposal have either a neutral or positive fiscal impact on the City's General Fund. In order to address this issue, evaluation of the ARSP proposal required preparation of a Fiscal Impact Analysis (FIA). The FIA projected General Fund revenues and expenditures related to the ARSP during 5-year cumulative increments of development and at build-out. Based on that analysis, the ARSP is projected to have a neutral fiscal impact on the City at build-out.

Prior to the City's application submittal to LAFCO, a new property tax-sharing agreement between the City and Placer County will need to be agreed upon.

Project Financing: The DAs provide for the establishment of two special tax districts in the ARSP: a Public Services Community Facilities District (CFD) to fund maintenance of public services and improvements within the plan area; and a Municipal Services CFD to offset the ARSP's impact on City-wide general fund services such as public safety. The DAs also provide for a third, optional CFD which may be used to fund construction of project infrastructure. In addition, the DAs establish a Public Benefit Fee and a Public Facilities Fee, to supplement the assessment districts and fund general City programs and facilities throughout Roseville. As mentioned previously, through this funding strategy of assessment districts and fees, the ARSP is projected to have a neutral fiscal impact on the City at build-out. Some of the key funding strategies are described below. This list of fees and funding strategies is not all inclusive, but gives some overview of the DA obligations.

South Placer Regional Transportation Authority (SPRTA) Tier II Fee: The landowners are obligated to pay the Tier II Traffic Impact Fee for the future construction of Placer Parkway. The SPRTA Board approved a limited fee deferral program that allows a portion of the Tier II Traffic Fee to be deferred to the payment from future bond sale proceeds 30-years hence. The current fee deferral program at the time of this writing allows deferrals of 50 percent for the first 7,000 DUEs entering the program region wide, up and until January 1, 2026 (whichever occurs first) and then ratchets down to three percent for the next 7,000 DUE's (region wide) until January 1, 2031, (again, whichever occurs first) with a regional overall cap of 29 million dollars available for deferral. The current fee is currently set at \$6,332.96 per residential unit and is adjusted annually with the Construction Cost Index (CCI).

Community Facilities District (CFD) for Public Services: This CFD will be used to provide on-going, annual funding for the maintenance within the ARSP of neighborhood parks, paseos, landscape corridors, bikeways, flood control facilities, and open space preserves, including environmental mitigation monitoring and management. Should the City find that offsite preserve areas provide a public benefit in the form of passive recreation opportunities (for example Class I trails) and related management costs are reasonable, this CFD could be expanded to also include long-term management of these offsite areas (as discussed further below under WETLANDS).

CFD for Municipal Services: This CFD will be used to offset the ARSP's impact on the general fund for City-wide services provided to the ARSP including police, fire, City-wide parks and libraries.

CFD for Project Infrastructure and Public Facilities: The DAs provide for a third CFD at the landowners' option, which would be used for the construction and/or acquisition of public backbone infrastructure and public facilities within the plan area. The DAs also provide for certain fees to be paid from the CFD bond sale. Historically, these fees were collected at issuance of each building permit. In the event this CFD is not formed, the infrastructure would be financed through traditional assessment districts and private financing, and the fees would be paid at building permit.

Public Facilities Fee: Upon the issuance of each residential building permit within the Project, the landowner shall pay the City Public Facilities Fee (Roseville Municipal Code Chapter 4.52).

Public Benefit Fee: As required by the Guiding Principles, new development is required to contribute a significant public benefit to the City. To that end, the DAs provide for the landowners to pay a Public Benefit Fee to offset a portion of the project's impacts and the tax sharing agreement with Placer County. The DAs provide the potential for the landowners to pay the Public Benefit Fee from CFD bond sales. The Public Benefit Fee for each low density and medium density residential unit shall be \$1,280. The Public Benefit Fee for each high density residential unit shall be \$845.

Fire Facilities Fee: The DAs provide for the landowners to pay a fee equal to the discontinued Fire Service Construction Tax upon issuance of each building permit.

Placer County Capital Facilities Fee: The DAs provide for the landowners to pay a Placer County Capital Facilities Fee upon issuance of each building permit.

AFFORDABLE HOUSING

The ARSP will provide a total of 283 affordable rental units, which is consistent with the City's ten percent Affordable Housing Goal outlined in the Housing Element of the General Plan. As part of this project, a General Plan Amendment is also being processed that will update the General Plan Affordable Housing Obligation to provide for 40 percent very-low income rental units and 60 percent low income rental units. As such, the affordable units within the Plan area will be allocated as follows:

- Very-low income rental units: 113 units (40% of total affordable units)
- Low income rental units: 170 units (60% of total affordable units)

The DAs specify details such as: income range definitions, affordable unit transfers, subsidies for rental units and prevailing wage requirements, Affordable Housing Regulatory Agreement requirements, and reduced Community Facilities District levies. The DAs also provide for the landowners to pay an in-lieu fee instead of constructing affordable housing units, in the event the City adopts such an in-lieu fee program.

INFRASTRUCTURE IMPROVEMENTS

Backbone infrastructure improvements to be constructed by the ARSP include: roadways; water, recycled water, sewer, drainage, and electric facilities; flood control improvements; and site work for two sewer lift stations, a potable water well and pump, and a recycle drop off site. The DAs stipulate the backbone infrastructure areas will be dedicated to the City and upon satisfactory completion will be accepted as public roads, public sites, and open space parcels.

In-tract (e.g. subdivision) improvements like local streets and utility facilities will be installed with individual developments as the project builds out.

DRAINAGE IMPROVEMENTS

The ARSP drainage system will collect onsite storm water and convey it to two discharge points. Storm water generated from the northerly 300 acres of the site (including the areas that presently drain towards Toad Hill Ranches and the Gleason property) and portions of the southern area will be redirected within open channels and discharged into University Creek at the southwest corner of the site. The remaining storm water generated from the eastern portion of the site will be directed to a second discharge location to the southwest and into University Creek. As a result of the proposed ARSP improvements, the post project drainage sheds will be altered to the benefit of the neighboring properties.

Drainage improvements including the construction of a 60-100-foot wide drainage channel is proposed on the western side of the property, which includes some offsite improvements in the Al Johnson Wildlife area (AJWA). The DAs outline the requirements of the channel including acceptance by the City for future maintenance obligations and ongoing monitoring within the AJWA to ensure that the off-site conveyance channel operates sufficiently in the future.

PROJECT PHASING

The ARSP is anticipated to build out in three phases and the DAs identify improvements needed to provide access, utility services, and public services to each phase, consistent with City standards. A phasing plan and related DA exhibits outline the needed improvements. It is expected that development will proceed in a south to north fashion. Connection to West Sunset Boulevard would not occur until Phase 3 in order to reduce the increase in traffic on that rural roadway in the near-term, prior to completion of Placer Parkway. While sub-phasing is currently not proposed, the DAs include conditions and performance criteria which must be met in order to proceed with sub-phasing. Timing and extent of public improvements and services are key components in evaluating any proposal for sub-phasing.

Development of ARSP will be dependent upon the completion of the extension of roadway and utilities through the Creekview Specific Plan including an electrical substation in the Creekview Specific Plan (CSP) area. Should ARSP decide to proceed prior to CSP, the DA outlines the obligations for going first and reimbursements.

WETLANDS

Federally regulated wetlands are located within the ARSP and the landowners must obtain a Section 404 Permit to fill or otherwise impact these resources. An Environmental Impact Statement (EIS) consistent with the National Environmental Policy Act (NEPA) will be prepared. The Army Corps of Engineers is the lead agency and recently published the Notice of Intent to prepare an EIS for the project. The project area is within Placer County's Conservation Plan area (PCCP). The project will be consistent with the PCCP and could move forward as a special entity under the PCCP, or secure individual permits.

Impacts to wetlands related to this project will be mitigated through a combination of on-site preservation ("Preserve Area(s)"), off-site preservation and/or on-site and off-site creation or restoration of wetland resources. The applicant's proposed mitigation plan includes preservation of two offsite parcels adjacent to the Al Johnson Wildlife Area, south of West Sunset Boulevard. The applicant has expressed interest in dedicating these areas to the City. However, until the federal wetland permits are secured and the required obligations for maintenance are established, the City is unsure whether it makes sense at this time to agree to accept the properties. Therefore, the DAs (Section 3.19.2.7) stipulates that off-site preserve properties may be accepted by the City and included in the Public Services CFD, but such action would require future City Council approval. If dedication occurs, it would need to be consistent with the requirements of Section 2.7 of the DAs (including appending to City's Open Space Preserve Overarching Management Plan and funding of management, maintenance, monitoring and reporting obligations).

A number of factors are to be considered when accepting off-site open space. The main considerations are access, overall public benefit and related CFD costs. At this point, discussions are still on-going regarding the public benefit and cost component of the off-site preserves. As an option to City ownership, because the primary purpose of the offsite preserves is for wetland mitigation, should it be determined that management costs outweigh public benefit, these lands could alternatively be conveyed to and managed by a third party land trust. The final disposition of the offsite preserve properties will be decided following federal regulatory approvals when related public benefit and CFD management costs are known.

WATER SUPPLY ASSESSMENT & CONSERVATION

The existing City water supply is insufficient to serve the ARSP and a new source of water is needed for the project. Accordingly, treated surface water for the project will be delivered to the City from PCWA at the existing Tinker pump station intertie located along Industrial Boulevard.

Placer County Water Agency Supply – The City is negotiating with the Placer County Water Agency (PCWA) to acquire an additional treated surface water supply from PCWA via a wholesale water agreement, inclusive of 1,066 acre-feet per year (“AFY”) to serve the Project. Water obtained from PCWA by the City through the wholesale agreement would be delivered to the City through PCWA’s Tinker Road Pump Station and Reservoir located in the Sunset Industrial Area of unincorporated Placer County (the “Tinker Road Facility”), and then transported through the City’s water infrastructure to the Project site. Because the agreement is not in place yet, the exact dollar amount is not known yet. A place holder has been included indicating the project will be required to pay the PCWA connection fee. This amount may be adjusted once an agreement is in place. The agreement with PCWA must be in place prior to the first building permit.

The Tinker pump station is currently designed to wheel 10 MGD of PCWA water supply through the City for delivery to Cal American Water Company. This facility will require future expansion to deliver the additional water to serve this project. The project will fund the expansion of this facility. Water delivered through the Tinker facility for the ARSP will then be wheeled through existing City infrastructure located along Industrial and Baseline Roads and then supplied to the plan area through a 24-inch main line that extends from the south (CSP Area) and distributed through an infrastructure system that parallels the collector and arterial roadway system which will consist of 6-inch to 24-inch diameter mains. Connections to potential future development areas will be provided at the southern project boundary along Westbrook Boulevard as well as at the eastern ends of Roads “B” and “D”. All water improvements will be constructed to the City’s standards and infrastructure improvements will be phased. This is consistent with the City’s General Plan Policy that new annexation areas bring a new surface water supply.

In addition, the DAs require that a production well be in operation at the time of occupancy of the 250th residential unit, in order to provide a backup water supply. The landowners shall receive approval from the City regarding well design and drilling method, prior to commencement of this work. The City and landowners are satisfied that these sources of supply are adequate to assure water for the ARSP.

The DAs also require implementation of a Water Conservation Plan which includes measures such as smart/centrally controlled irrigation timers, re-circulating hot water systems, and turf limitations. The goal for ARSP is to reduce water consumption compared to current City-wide use characteristics. Per the DAs, the property owners and the City will periodically reassess the Water Conservation Plan and the continued availability of water supply. After the project utilizes 50 percent of its projected potable water allocation and then every three years thereafter, the effect of the assumptions, the water sources, and the actual water demands of the ARSP will be reviewed. If the City determines that any of these factors have changed to the extent they materially affect the City’s ability to provide sufficient water to the project, the parties will consider additional measures to ensure water supply will meet the demands of the project.

RECYCLED WATER INFRASTRUCTURE

The ARSP will have recycled water infrastructure for irrigation throughout the project for all areas south of Placer Parkway, for parks and landscape setbacks, medians, paseos adjacent to collector streets and other landscape areas including all multi-family and non-residential landscaping uses. The small

residential area north of Placer Parkway is planned for low density residential uses, and therefore, recycled water is not planned to serve this area. Sufficient potable water supplies would be available to serve this neighborhood.

The DAs stipulate that landowners will construct recycled water lines as part of the backbone infrastructure consistent with the phasing plan. The City will provide the ARSP with recycled water from the Pleasant Grove Wastewater Treatment Plant (PGWWTP) through the CSP. In the event that the CSP has not constructed recycled water facilities necessary for the project area, the ARSP landowners shall construct the necessary off-site facilities and obtain reimbursement from the CSP, consistent with DA Section 4.2.2. All recycled water improvements will be constructed to the City's standards and infrastructure improvements will be phased. In addition, the project will contribute its pro rata share to fund the expansion of the existing recycled water tank and pump station located at the Pleasant Grove Wastewater Treatment Plant.

SEWER LIFT PUMP SITES

Parcels AR-56 and AR-57 are being dedicated for sewer lift stations. The landowners are required to improve the site and construct the stations and related infrastructure prior to dedication.

ELECTRIC SUBSTATION

There is no power available to the project site until the Creekview Electric Substation site is constructed. The CSP DA stipulates that by the 500th residential building permit, the landowners will dedicate a 0.90-acre graded, buildable electric substation site on Westbrook Boulevard (C-81). If the substation site is not dedicated to the city by the time the landowners wish to proceed with development of the ARSP, they shall have the right to cause such dedication, grading and provision of access to the substation site for City to construct the electric substation that will serve both the CSP and ARSP.

PARKS, PASEOS AND OPEN SPACE

Parks – The ARSP provides for the development of seven neighborhood park sites within the plan area. Land for the park sites will be dedicated by the landowners, with park construction financed through payment of Neighborhood Park Fees. The following parks are included in the plan area:

- 1.28-acre neighborhood park, shown as Parcel AR-60
- 1.87-acre neighborhood park, shown as Parcel AR-61
- 10.11-acre neighborhood park, shown as Parcel AR-62
- 1.72-acre neighborhood park, shown as Parcel AR-63
- 2.12-acre neighborhood park, shown as Parcel AR-64
- 3.04-acre neighborhood park, shown as Parcel AR-66
- 2-acre neighborhood park, shown as Parcel AR-67

Citywide Parks – No Citywide park site has been included in the ARSP. Consistent with the Park In-Lieu ordinance, and in order to meet parkland dedication requirements, the Development Agreement requires the payment of Park In-Lieu fees (land component) and Citywide Park Improvement fees. Park In-lieu fees can be used for the construction and/or rehabilitation of citywide park facilities throughout the City (with the exception of West Roseville and Sierra Vista Specific Plan areas.) Related to parks, the biggest funding gap is within the city-wide park fund. At this time, the applicant proposes to defer the land in-lieu fee, in the amount of \$2,988,900 (\$135,000/acre x 22.14 ac) for a period of 30 years. While the City allowed fee deferrals for the Sierra Vista and Creekview plan areas during the economic downturn, it no longer is recommended. In fact as amendments occur that require

Development Agreement amendments, the fee deferral is being removed from those plan areas (i.e., the recent Westbrook amendment to the Sierra Vista Specific Plan eliminated the fee deferral). Consistent with General Plan policy, new plan areas must bring a benefit to the community. One of these benefits is that the Citywide Park fees provide a benefit to existing residents by providing funding for citywide park amenities. Staff is not supportive of the deferral of this in-lieu fee, as it will delay the construction and/or the rehabilitation of existing Citywide park facilities that are slated to serve existing City residents.

Neighborhood Parks – The required 22.14 acres of Neighborhood Parks will be provided through the inclusion of seven parks strategically located throughout the plan to provide accessibility to residents. These park sites will range in size from one to ten acres and will include a variety of park amenities (i.e. youth ball fields, basketball courts, children's play equipment, passive recreation spaces, and picnic areas). Recycled water will be used for all parks (with the exception of Park Parcel AR-60) and will be developed in compliance with the City's water efficient landscape (WELO Ordinance).

Parks Maintenance – Funding for ongoing, long-term maintenance of all neighborhood parks within the ARSP will be generated through the CFD for Public Services. This tax will be levied against all residential properties in the ARSP, and the tax will be calculated to ensure that ongoing maintenance can be provided to these parks consistent with City standards at no cost to the General Fund.

Open Space – Initially 98 acres of open space within the plan area will be dedicated to the City for use as open space preserves with an additional 10 acres of paseos. Upon completion of phase 3, an additional 38 acres will be deeded to the City. All open space parcels and paseos will be owned by the City and maintained by funds generated by the CFD for Public Services, the same funding mechanism used to maintain neighborhood parks (not a General Fund obligation).

Bike Trails – It is anticipated that bike trails will be constructed as development occurs as is typical in other specific plans. The landowners will construct the bike trail in segments and will be responsible for the construction cost associated with development.

SCHOOLS

The ARSP is located within the Roseville City School District and Roseville Joint Unified High School District. The landowners have been in negotiations on separate funding agreements with the districts, which are intended to provide 100 percent funding of school impacts.

REIMBURSEMENTS

The DAs stipulate that backbone improvements and facilities needed for the project will be constructed and dedicated at the expense of the project, with some credits or reimbursements specified in the DAs. Certain backbone improvements in the CSP Plan were planned in anticipation of future development outside the plan area. Accordingly, the ARSP landowners have an obligation to reimburse the CSP for its improvements to the extent they benefit ARSP. The City must use its best efforts to facilitate this reimbursement.

**Planning Commission Meeting
March 10, 2016 – 7:00 p.m.
Approved Minutes**

I. ROLL CALL

Planning Commissioners Present

Krista Bernasconi, Chair
Bruce Houdesheldt, Vice-Chair
Justin Caporusso
Julie Hirota
Charles Krafka
Joseph McCaslin

Staff Present

Kathy Pease, Planning Manager
Derek Ogden, Senior Planner
Gina McColl, Associate Planner
Wayne Wiley, Associate Planner
Chris Kraft, Engineering Manager
Michelle Sheidenberger, Assistant City Attorney
Lupe Nelson, Recording Secretary

Planning Commissioners Absent

David Larson, *Excused*

II. PLEDGE OF ALLEGIANCE

Commissioner McCaslin led those in attendance in the Pledge of Allegiance.

III. ORAL COMMUNICATION

Chair Bernasconi opened the Oral Communication. Hearing none, Chair Bernasconi closed the Oral Communication.

IV. CONSENT CALENDAR

Chair Bernasconi asked if anyone wished to remove any of the items from the Consent Calendar for discussion.

Commissioner Caporusso requested that item IV-B. **MAJOR PROJECT PERMIT (STAGE 1 MODIFICATION & STAGE 2) – 254 GIBSON DRIVE – NCRSP PCL 40 REVOLUTIONS NATUROPATHIC MEDICAL OFFICE – FILE# PL15-0421** be pulled from the Consent Calendar.

Chair Bernasconi asked for a motion to approve the Consent Calendar as listed below:

A. MINUTES OF FEBRUARY 25, 2016

MOTION

Commissioner Hirota made the motion, which was seconded by Commissioner Caporusso, to approve the Consent Calendar item.

The motion passed with the following vote:

Ayes: Caporusso, Hirota, Houdesheldt, Krafka, McCaslin, Bernasconi

Noes: None

Abstain: None

B. MAJOR PROJECT PERMIT (STAGE 1 MODIFICATION & STAGE 2) – 254 GIBSON DRIVE – NCRSP PCL 40 REVOLUTIONS NATUROPATHIC MEDICAL OFFICE – FILE# PL15-0421

Associate Planner, Gina McColl, presented the staff report and responded to questions.

Chair Bernasconi opened the public hearing and invited comments from the applicant and/or audience.

Applicant, Karenda MacDonald, and owner, Justin Raithel, addressed the Commission and responded to questions. They stated they were in agreement with staff's recommendations.

Public Comment:

- None

Commission Discussion:

- Parking concerns
- Business' hours of operation
- Can the applicant provide a description of the medical use?

MOTION

Commissioner Caporusso made the motion, which was seconded by Commissioner Hirota, to approve the conditions of approval as submitted in the staff report.

The motion passed with the following vote:

Ayes: Caporusso, Hirota, Houdesheldt, Krafka, McCaslin, Bernasconi

Noes: None

Abstain: None

V. SPECIAL PRESENTATIONS/WORKSHOP/REPORTS

A. PUBLIC WORKSHOP DRAFT ENVIRONMENTAL IMPACT REPORT (DEIR) – ANNEXATION, SPHERE OF INFLUENCE AMENDMENT, GENERAL PLAN AMENDMENT, SPECIFIC PLAN, PREZONING AND DEVELOPMENT AGREEMENT – AMORUSO RANCH SPECIFIC PLAN – 5101 SUNSET BOULEVARD – FILE #2011PL-039 (ANN-000007, GPA-000061, SPA-00043, RZ-000058 & DA-000047)

Planning Manager, Kathy Pease, and Associate Planner, Wayne Wiley, presented the staff report and responded to questions.

Applicant represented by Marcus Lo Duca provided an overview of benefits of the project and transportation fees that would aid in regional traffic improvements.

Chair Bernasconi opened the public hearing and invited comments from the audience.

Public Comment:

- None

Commission Discussion:

- Is a library planned for the area?
- Due to the proximity of the landfill, will odors be an issue?
- Can the Amoruso Ranch Specific Plan documents be found on the City's website?
- Is this the first plan to change the General Plan horizon date?
- What is the timing of Placer Parkway?
- Is W. Sunset a part of the annexation or the improvement plans?
- Will aquifer storage and recovery be used?

- Schools services: Elementary? Population of the high school? Timing of the construction of schools? What will be the impact to the high school?
- Is Amoroso Ranch the last piece of western development for the City?
- What will Placer Parkway look like? Number of lanes? Locally funded?
- Is a right-of-way reserved for three (3) lanes of traffic in each direction?
- What is the development construction timeframes?
- Federal permits required?
- Financed by transportation fee?

This item was informational only.

VI. REPORTS: COMMISSION/STAFF

None

VII. ADJOURNMENT

Commissioner Bernasconi asked for a motion to adjourn the meeting.

MOTION

Commissioner McCaslin made the motion, which was seconded by Commissioner Caporusso, to adjourn to the meeting.

The motion passed unanimously at 8:11 p.m.

Transportation Commission

Regular Meeting

March 15, 2016 – 7:00 p.m.

Draft Minutes

1. Call to Order

The meeting was called to order at 7:00 p.m. by Commissioner Nelson.

2. Roll Call

Commissioners Present

David Nelson – *Chair*
Jeff Short – *Vice-Chair*
Tracy Mendonsa
Joe Horton
Chinnaian Jawahar
Ryan Schrader – *Absent*
Richard DeMarchi
Emily Nunez, *Youth Commissioner - Absent*

Staff Present

Eileen Bruggeman, Alternative Transportation Analyst II
Mike Dour, Alternative Transportation Analyst II
Sue Schooley, Alternative Transportation Analyst II/TSM Coordinator
Michael Christensen, Deputy City Attorney
Kathy Pease, Planning Manager
Wayne Wiley, Associate Planner
Patricia Stewart, Senior Planner
Scott Gandler, Senior Engineer
Debbie Dion, Recording Secretary

3. Pledge of Allegiance

Commissioner Mendonsa led those in attendance in the Pledge of Allegiance.

4. Meeting Minutes

a. February 16, 2015 – *Action required*

MOTION:

Commissioner Mendonsa made the motion, which was seconded by Commissioner Demarchi to approve the meeting minutes of February 16, 2016.

Ayes: Nelson, Short, Mendonsa, Horton, Jawahar, DeMarchi
Noes: None
Abstain: None
Absent: Schrader, Nunez

5. Oral Communications

Commissioner Nelson opened the Public Comment period.

Mike Barnbaum, Ride Downtown 916 Organization, addressed the Commission on approval by the Sacramento Regional Transit District Board of Directors for increases of SacRT bus and light rail system fares. Fare increases become effective on Friday, July 1, 2016.

Commissioner Mendonsa closed the Public Comment period.

6. Consent Calendar

a. The 316 Vernon Street Office Building Transportation Systems Management (TSM) Plan – *Action required*

b. The Falls Event Center Transportation Systems Management (TSM) Plan –
Action required

MOTION:

Commissioner Jawahar made the motion, which was seconded by Commissioner Horton to approve the Consent Calendar.

Ayes: Nelson, Short, Mendonsa, Horton, Jawahar, DeMarchi
Noes: None
Abstain: None
Absent: Schrader, Nunez

7. Special Presentation/Reports

a. Amoruso Ranch Specific Plan (ARSP) and Draft Environmental Report (DEIR) *Action required*

Commissioner Nelson reviewed the Public Hearing process.

Kathy Pease, Planning Manager and Wayne Wiley, Associate Planner, made the presentation.

A discussion between Commissioners and staff ensued.

Scott Gandler, Senior Engineer, responded to questions on fair share distribution of costs for roadways.

Mike Dour, Alternative Transportation Analyst II, responded to questions and reviewed mitigation measures for Capital improvements and spoke on short and long range transit plans to extend transit service when funding is available.

Eileen Bruggeman, Alternative Transportation Analyst II, responded to questions on transit thresholds; stated that population density and level of development are considered in transit planning as well as comments received from businesses and employment centers.

Commissioner Nelson opened the Public Hearing period.

Marcus LoDuca, representing the Brookfield project team, addressed the Commission on planning and design details of the ARSP.

Linda DiBiase, Amoruso Estates resident, addressed the Commission on concerns of traffic increase in the area, wildlife safety, potential flooding, and quality of life issues.

Staff responded and outlined mitigation measures and services provided to residents.

Mr. LoDuca spoke on the planned fire station that will serve the area and help with home owners insurance rates.

Chuck Lenny, new resident in Amoruso Estates, addressed the Commission on flooding/drainage concerns and urged working with Placer County to address this concern.

Commissioner Mendonsa closed the Public Hearing period.

Michael Christensen, Deputy City Attorney, confirmed that this is not an action item by roll call vote. Comments will automatically be forwarded on to the Planning Commission and to the City Council.

Staff and Commissioners discussed.

Commissioners submitted comments as follows:

City staff to work with Placer County on drainage issues.
Reflect in DEIR that Westbrook Blvd is a truck route.
Add turn lanes at W Sunset Blvd/Road G.
Take one more look at possible roundabout to facilitate left turns at Roads D/G and E/G.
Add Class I bike trails into paseos in Road G area.
Continue to monitor LOS for roadways in plan.

Comments will be forwarded on to the Planning Commission and to the City Council.

8. Staff and/or Commission Reports/Comments

a. 2nd Quarter FY16 Transit Performance Report

MOTION:

Commissioner Short made the motion, which was seconded by Commissioner Mendonsa to continue this item off-calendar to the next Transportation Commission meeting.

Vote: All ayes

b. Alternative Transportation Division

- 1.** Fixed Routes D, I and M Modifications Update
- 2.** Share the Road Campaign
- 3.** Free 2016 Cycling Clinics and Events
- 4.** Celebrate the Earth Day – April 16th
- 5.** May is Bike Month

Eileen Bruggeman, Alternative Transportation Analyst II, made the presentation on Item 1.

Mike Dour, Alternative Transportation Analyst II, made the presentation on Item 2.

Sue Schooley, Alternative Transportation Analyst II/TSM Coordinator, made the presentation on Items 3, 4 and 5.

Staff provided this item as informational only. No action required.

9. Pending Agenda

None

10. Adjournment

MOTION

Commissioner Mendonsa made the motion, which was seconded by Commissioner Jawahar, to adjourn the meeting.

Vote: All ayes

The meeting was adjourned at 8:23 p.m.

David Nelson, Chair

Debbie Dion, Recording Secretary

**Design Committee Meeting
March 17, 2016 – 4:30 p.m.
Draft Minutes**

I. ROLL CALL – *Silent*

Committee Members Present

Julie Hirota, Chair
Daniel Wesp

Committee Members Absent

Michael Motroni, Vice-Chair - *Excused*

Staff Present

Kathy Pease, Planning Manager
Wayne Wiley, Associate Planner
Scott Gandler, Sr. Engineer
Joe Mandell, Sr. Deputy Attorney
Lupe Nelson, Recording Secretary

II. CONSENT CALENDAR

Chair Hirota asked if anyone wished to remove any of the items from the Consent Calendar for discussion.

Chair Hirota asked for a motion to approve the Consent Calendar as listed below:

A. MINUTES OF FEBRUARY 18, 2016

MOTION

Committee Member Wesp made the motion to approve the Consent Calendar item as submitted.

The motion passed with the following vote:

Ayes: Wesp

Noes: None

Abstain: Hirota

III. NEW BUSINESS

A. REVIEW OF THE DESIGN GUIDELINES OF THE AMORUSO RANCH SPECIFIC PLAN

Associate Planner, Wayne Wiley, presented the staff report and responded to questions. Planning Manager, Kathy Pease, and Sr. Engineer, Scott Gandler, were also in attendance to respond to questions.

Chair Hirota opened the public hearing and invited comments from the applicant and/or audience.

Applicant, Brookfield Residential, addressed the Committee and responded to questions.

Public Comment:

- None

Committee Discussion:

- Does the General Plan need to be amended?
- Is there an overpass connection to the north?
- Where is the majority of traffic expected to come from?
- Are any improvements expected to be made to W. Sunset Blvd.?
- When is the plan expected to be done?
- Will Westbrook Boulevard have commercial amenities – shopping centers?

- Will all the neighborhoods be gated communities? Will any of the neighborhoods be gated communities?
- Will all the walls be masonry?
- What is the timing of Placer Parkway? Due to the delay in Placer Parkway being built, won't it cause a lot of traffic? At 5 p.m. Pleasant Grove and Blue Oaks is backed up almost to Washington.
- Which areas will the housing samples shown in the PowerPoint presentation be located in?
- Due to the proximity of the landfill, will odors be an issue?
- Is development proposed between the casino and this specific plan?
- How will residents in the low density housing safely crossover Placer Parkway to the school?
- Will the monuments be proportional to street size? Chair Hirota asked that the monuments be of appropriate scale. She cited some existing monuments as being a hazard to traffic and out of character with the neighborhood.
- Will there be enough parking? Will individuals be parking on the street? Will parking be available on Westbrook?

Chair Hirota closed the public hearing.

This item was provided as informational.

IV. REPORTS: COMMISSION/STAFF

None

V. ORAL COMMUNICATION

None

VI. ADJOURNMENT

Chair Hirota asked for a motion to adjourn the meeting.

MOTION

Committee Member Wesp made the motion, which was seconded by Chair Hirota, to adjourn the meeting.

The motion passed unanimously at 5:10 p.m.

MINUTES
Public Utilities Commission

March 22, 2016

7:00 p.m.

Council Chambers
311 Vernon Street
Roseville, CA 95678

1. Roll Call

PUC Commissioners Present: Gretchen Hildebrand
James McHan
Kerry Schmitz
John Speight (Acting Chair)
Jim Viele
John Vertido

PUC Commissioners Absent: Blandon Granger

Staff Present: Kathy Pease, Development Services Planning Manager
Tricia Stewart, Development Services Senior Planner
Michelle Bertolino, Electric Utility Director
David Bradford, Energy Services Account Representative
Rich Plecker, Environmental Utilities Director
Dale Olson, Environmental Utilities Principal Engineer
Sean Bigley, Public Affairs Administrator
Kelye McKinney, Assistant Environmental Utilities Director
Jim Mulligan, Water Utility Manager
Mike Bloom, Assistant Electric Utility Director
Sonny Person, Assistant Electric Utility Director
Vonette McCauley, Electric Public Information Officer
Philip McAvoy, Electric Finance & Administration Manager
Rick Corral, Electric Engineering Technical Supervisor
Joe Mandell, Senior Deputy Attorney
Karen Sainsbury, Recording Secretary

2. Pledge of Allegiance

3. Minutes of February 23, 2016

The minutes of February 23, 2016 were approved as amended.

4. Oral Comments/Public Comment

None.

5. New Business

a. Review of the Amoruso Ranch Specific Plan and Draft EIR

Report by Development Services Senior Planner Tricia Stewart on the Amoruso Ranch Specific Plan and Draft EIR, for recommendation.

Tricia Stewart and Kathy Pease presented the Public Utilities section of the Draft EIR and the Public Utilities Plan of the Amoruso Ranch Specific Plan and answered Commissioner questions.

- Who pays to relocate or underground electric facilities such as 12kV lines?
- Were electric conservation measures analyzed in the EIR for the developer to initiate renewable energy use?
- Concerned about growth that encroaches on undesirable things. Glad to see deed disclosures for odors from the Material Recovery Facility.
- Describe the Tinker Intertie on Industrial Boulevard and how water from PCWA is wheeled through the City. Is infrastructure adequate?
- Will PCWA water be supplied during early demands and is PCWA committed to building the Ophir plant?
- How is fair share of costs determined? Is that included in the Development Agreement?
- What areas will be supplied with Recycled Water?
- Has the Pleasant Grove Wastewater Treatment Plant expansion project taken this project into account, or will it need to be redesigned?
- In the area where Recycled Water is not available, what is there requiring irrigation and will the city pay the cost of potable water?

Item was opened for public comment.

Marcus Lo Duca, Counsel for the Brookfield Residential project team spoke thanking staff for their thoroughness on the staff report and presentation, and thanked the Commissioners for their time.

MOTION: Commissioner Vertido made the motion, which was seconded by Commissioner Schmitz, to accept all comments received tonight regarding the Public Utilities section of the Draft Environmental Impact Report and the Public Utilities Plan included in the Amoruso Ranch Specific Plan and forward a recommendation of approval to the Planning Commission and City Council regarding the Public Utilities portion of the Amoruso Ranch Specific Plan Draft EIR

Ayes: Hildenbrand, McHan, Schmitz, Speight, Viele, Vertido

Noes:

Absent: Granger

- b. Environmental Utilities Monthly Update
Report by Environmental Utilities Director Richard Plecker summarizing monthly status of Environmental Utilities issues, for information.
- c. Environmental Utilities Legislative Update
Presentation by Public Affairs Administrator Sean Bigley on the Legislative Update, for information.
- d. Roseville Electric Utility Monthly Report
Report by Electric Utility Director Michelle Bertolino summarizing monthly status of Electric issues, for information.
- e. Roseville Electric Utility New Solar Calculator Tool for Customers
Presentation by Energy Services Account Representative David Bradford on the New Solar Calculator Tool for Customers, for information.

6. Reports – Commission/Staff

None.

7. Proposed Future Agenda Items

Commissioner McHan requested a presentation on the water testing program at the treatment plant, groundwater pumps and residential properties.

8. Adjournment

Commissioner Viele moved for adjournment of the March 22, 2016 Public Utilities Commission meeting. Commissioner Vertido seconded the motion. The motion passed unanimously at 8:48 p.m.

John Speight
Acting Chairperson

Karen Sainsbury
Recording Secretary

City of Roseville
Parks and Recreation Commission – **Minutes**
April 11, 2016

Commissioners Present: Nick Alexander, Scott Alvord, Paul Frank, Audrey Huisking, Doyle Radford Jr., Andrae Randolph, Roy Stearns, Logan Cole

Absent Excused: N/A

Staff Present: Dion Louthan, Director
Tara Gee, Park Planning and Development Superintendent
Kathy Barsotti, Recreation Manager
Mark Murphy, Interpretive Service Supervisor
Kathy Pease, Development Services – Planning Manager
Wayne Wiley, Development Services – Associate Planner
Mike Christensen, Deputy City Attorney
Ellen Worland, Recording Secretary

I. ROLL CALL – Chair Frank called the meeting to order at 7:00 P.M.

II. PLEDGE OF ALLEGIANCE –Commissioner Randolph led all in the Pledge of Allegiance.

III. APPROVAL OF MINUTES – *A motion to approve minutes for **March 7, 2016** with corrections noting Logan Cole in attendance (removing Epsa Sharma) was made by Commissioner Stearns; Commissioner Alvord seconded; the motion was passed unanimously.*

IV. PUBLIC COMMENT – None.

V. SPECIAL REQUESTS/ REPORTS/ PRESENTATIONS

A. Maidu Museum & Historic Site – Mark Murphy

Mr. Murphy updated the Commission on events happening at the Maidu Museum & Historic Site. Some of the upcoming events included Friday Night Campfires, 3rd Saturday Cultural events, historic site tours, and of course the annual Yomen – Spring Celebration which will take place on April 30, 10am-2pm. You can find further information at www.roseville.ca.us/indianmuseum

Commissioner had questions about the wildlife present at the Historic Site, Yomen event highlights, and docent tours and thanked Mr. Murphy for his presentation.

B. Amoruso Ranch Specific Plan – Wayne Wiley, Tara Gee, Kathy Pease, Dion Louthan

Ms. Gee introduced the staff involved with the presentation on the Amoruso Ranch Specific Plan (ARSP) Project. Mr. Wiley reviewed the purpose of the meeting which was for the Commission to consider the ARSP and to provide comments on the project elements related to Parks and Open Space and receive public testimony related to the project and Draft Environmental Impact Report (EIR). Mr. Wiley also provided the history of Roseville Planning, planning areas and the location of ARSP, the 14th specific plan to be developed. Ms. Gee explained the General Plan requirement for park dedication of 9 acres per 1000 residents and explained the ARSP requirement. Ms. Gee reviewed the land use plan, neighborhood park locations and designs, open space, the bike path system and the paseo system in ARSP. Mr. Wiley reviewed the Environmental Review Analysis. He also informed the

Parks and Recreation Commission about the public hearings that have taken place regarding ARSP to date as of April 11, 2016.

Public Comments: Marcus LoDuca, spoke on behalf of John Norman and the Brookfield Project Team regarding the ARSP and highlighted the key components of the plan.

Commission Comments/Questions: The commission was pleased with the project. They liked that most homes were within a ¼ mile of a park found the plan to be very comprehensive. They also liked the spread of parks and open space, the passive recreation theme, the “grand lawn” and bike paths. Commissioners were very complimentary of the overall plan. Commissioners inquired about:

1. Why the Land Use Plan did not include a school/park joint use facility?
2. Why there is not a City-wide park included in the plan?
3. Will there be off-street parking for the large 10 acre park?
4. Will the City consider relocating the play area to be away from the dog park planned?
5. Are restrooms included in the park plans?
6. Will the paseos have amenities?
7. How will programming for the 3 acre park occur and how will that be funded?
8. What is the Urban Reserve noted in the plan?

Mr. Norman, Brookfield Residential, thanked the Commission for review of the plan and City staff for all of the hard work throughout the several years of planning.

Motion: *Commissioner Alexander introduced a motion to accept all public and Commission comments and recommend approval to the Planning Commission and City Council of the parks, recreation and resource management elements of the DRAFT EIR and the land use plan as it pertains to the Resource Management and Public Services Chapters of the Amoroso Ranch Specific Plan; Commissioner Randolph seconded and the motion carried unanimously.*

VI. REPORTS / COMMENTS/ COMMISSION/STAFF

Updates and Reports from Department Staff:

- Mr. Louthan provided an update on the Placer Valley Sports Complex and the two processes: Master Plan Design and CEQA steps. The Ground Lease is almost completed with the Operations Agreement process to start next. As staff has more information, the Commission will be updated.
- Mr. Louthan thanked all involved in the ARSP, staff, the applicant team and Commissioners.
- Ms. Barsotti advised the Commission about our current hiring process for Summer. She also provided all with a flier of upcoming events in the Square.

VII. Adjournment

Motion to adjourn was introduced by Commissioner Radford; Commissioner Alvord seconded and the motion passed unanimously. The meeting was adjourned at 8:30PM. The next meeting is scheduled on May 2, 2016.

Respectfully Submitted,

Ellen Worland

Ellen Worland

Planning Commission Meeting April 14, 2016 – 7:00 p.m. Draft Minutes

I. ROLL CALL

Planning Commissioners Present

Krista Bernasconi, Chair
Bruce Houdesheldt, Vice-Chair
Justin Caporusso
Julie Hirota
Charles Krafka
David Larson

Staff Present

Kathy Pease, Planning Manager
Tricia Stewart, Senior Planner
Wayne Wiley, Associate Planner
Chris Kraft, City Engineer
Kelye McKinney, Assistant E.U. Director
Michelle Sheidenberger, Assistant City Attorney
Julie Pistone, Recording Secretary

Planning Commissioners Absent

Joseph McCaslin - *Excused*

II. PLEDGE OF ALLEGIANCE

Commissioner Larson led those in attendance in the Pledge of Allegiance.

III. ORAL COMMUNICATION

Chair Bernasconi opened the Oral Communication.

Hearing none, Chair Bernasconi closed the Oral Communication.

IV. CONSENT CALENDAR

Chair Bernasconi asked if anyone wished to remove any of the items from the Consent Calendar for discussion.

Hearing none, Chair Bernasconi asked for a motion to approve the Consent Calendar as listed below:

A. MINUTES OF MARCH 24, 2016.

MOTION

Commissioner Larson made the motion, which was seconded by Commissioner Caporusso, to approve the Consent Calendar as submitted.

The motion passed with the following vote:

Ayes: Larson, Caporusso, Houdesheldt, Krafka, Bernasconi

Noes: None

Abstain: Hirota

V. NEW BUSINESS

A. ANNEXATION, SPHERE OF INFLUENCE AMENDMENT, GENERAL PLAN AMENDMENT, SPECIFIC PLAN, PREZONING AND DEVELOPMENT AGREEMENTS – AMORUSO RANCH SPECIFIC PLAN – 5101 SUNSET BOULEVARD – FILE #2011PL-039.

Senior Planner, Tricia Stewart, and Associate Planner, Wayne Wiley, presented the staff report and responded to questions. Planning Manager, Kathy Pease, was also available to respond to questions.

Chair Bernasconi opened the public hearing and invited comments from the applicant and/or audience.

Applicant, John Norman, Brookfield Residential, represented by Marcus Lo Duca, addressed the Commission and responded to questions. He stated he had received a copy of the staff report and was in agreement with staff's recommendations.

Public Comment:

- Keith Schmidt, Western Placer Waste Management Authority, addressed the Commission to state that he will be providing comments on the DEIR via letter the following day.

Commission Discussion:

- Clarification of any parking and safety measures that were discussed at the Transportation Commission Meeting related to the development.
- Parking reduction for HDR projects and parking impacts on adjacent uses with regards to Assembly Bill 744. Parking is a concern of the Planning Commission so they wanted their concern in the record.
- Staff clarified that the high density residential uses are proposed adjacent to commercial uses so there will be opportunities for shared parking.
- Design Review for Residential Subdivision and Design Review Permit requirement for HDR and MDR.
- Is it typical to have a court reporter at a Specific Plan meeting?
- Interface between agricultural and residential uses.
- Mello Roos fee schedule comparison to other plan areas.
- Timing of the Westbrook construction from W. Sunset Bl to Baseline Rd.
- The Sparta Fee for Amoruso compared to the other specific plans.
- Not enough time to review the letter received at the last minute from residents, Jim and Gaynell Gleason.
- Comments regarding the letter received from the Gleason's:
 1. Impact on adjacent agricultural uses, drainage, and aquifer storage and recovery system.
 2. Compatibility of land uses, sustainable land water management, surface water captured and stored in the ground.
 3. Benefits to the adjacent property owners if and when we do the aquifer storage and recovery system.
 4. Safeguards that the sustainable land water management will provide to ensure the Gleason's are not impacted by the time Amoruso Ranch is under construction.
 5. Protection from aerial pesticide and herbicide spraying so as not to affect the agricultural operations including the right to farm.

6. Notification and disclosures to adjacent neighbors as well as the entire specific plan area of potential agricultural operations taking place are included in the Development Agreements.

Kelye McKinney, Assistant Environmental Utilities Director, addressed the Commission to respond to questions regarding the sustainable land water management plan.

Ryan Sawyer, Analytical Environmental Services, whose firm prepared the DEIR, addressed the Commission and responded to questions regarding the aerial spraying of pesticides.

Chair Bernasconi closed the public hearing and asked for a motion.

MOTION

Commissioner Hirota made the motion, which was seconded by Commissioner Larson, to

- A. Forward all comments received on the Draft EIR during the public review period for inclusion in the Final EIR for City Council review.
- B. Recommend that the City Council authorize staff to make and execute any and all necessary documents and applications to the Placer County Local Agency Formation Commission for annexation.
- C. Recommend that the City Council amend the General Plan Land Use Map and text as shown in the General Plan 2035 Redline (Exhibit C).
- D. Recommend that the City Council adopt the following finding and approve the Amoruso Ranch Specific Plan (Exhibit B):
 1. The Amoruso Ranch Specific Plan is consistent with the objectives, policies, general land uses and programs specified in the General Plan.
- E. Recommend that the City Council adopt the following findings and approve the Prezone for the land located within unincorporated Placer County, amending the zoning map to reflect the zoning as indicated in Amoruso Ranch Specific Plan Table 4.1:
 1. The proposed Prezone is consistent with the General Plan as amended, and
 2. The proposed Prezone will not be detrimental to the public interest, health, safety, or welfare of the City.
- F. Recommend that the City Council adopt the following findings and approve the Amoruso Ranch Specific Plan Development Agreements (Exhibit D):
 1. The ARSP Development Agreements are consistent with the objectives, policies, general land uses and programs specified in the General Plan;

2. The ARSP Development Agreements are consistent with the provisions of Chapter 19.84 of the Roseville Zoning Ordinance;
3. The ARSP Development Agreements will not be detrimental to the health, safety, or general welfare of the residents of the City of Roseville;
4. The ARSP Development Agreements will not adversely affect the orderly development of property or the preservation of property values; and
5. The ARSP Development Agreements will provide sufficient benefit to the City to justify entering into the Development Agreement.

The motion passed with the following vote:

Ayes: Hirota, Larson, Caporusso, Krafka, Bernasconi

Noes: None

Abstain: Houdesheldt

VI. REPORTS: COMMISSION/STAFF

Commissioner Larson mentioned there was a recent fatality on Blue Oaks Blvd. near Washington Blvd. He asked staff to consider a divider from Industrial Bridge towards Washington Blvd. to eliminate the opportunity for drivers being able to make a U-turn. Staff stated a project is underway that includes a concrete median on Blue Oaks Blvd. that will eliminate the ability to make U-turns. There is a 3 month timeline for the installation of the concrete median on Blue Oaks Blvd. between Washington Blvd. and Alantown Dr.

Commissioner Caporusso and Commissioner Hirota have a conflict for the May 5th Planning Commission City tour. Commissioner Larson requested it be done before he terms out in July 2016.

VII. ADJOURNMENT

Commissioner Bernasconi asked for a motion to adjourn the meeting.

MOTION

Commissioner Houdesheldt made the motion, which was seconded by, Commissioner Larson to adjourn to the meeting.

The motion passed unanimously at 8:14 p.m.

AR-62:

The largest neighborhood park is the 10-acre park (AR-62) which is intended to serve as the active/programmable recreational hub of the community. It provides for multiple active and passive uses for all ages. This site focuses on programmed sports fields clustered into one larger park, and includes support facilities and minimize the impacts to the surrounding neighborhoods.

The primary use at the park will be field sports which may include soccer, baseball and/or softball. Sports Fields may be lit. The park can accommodate various sized fields as well as a central concession and restroom building. As illustrated, promenades provide ample room for informal game viewing, formal bleacher set-up, and team staging areas.

Other amenities in the park could include a tot lot, half-court basketball courts, and multiple shade and picnic areas throughout the park. The park also includes on and off-street parking, to serve the intended uses and similar to parking provided at other active parks throughout Roseville.

Figure 8.6: AR -62 Conceptual Plan.

Final designs will be developed prior to construction and will consider recreational trends and available budget for both development and maintenance. Curb adjacent sidewalks maybe constructed, at the direction of the Parks Department, along neighborhood park frontage.

AR-64:

This long linear park is envisioned as a series of outdoor rooms that are linked from one to another to create a variety of experiences. Widths of these outdoor rooms will accommodate a variety of uses.

Located within this park are expanses of turf which could be used for passive activities such as, tossing the ball around. Other areas within this park contain shaded seating for picnicking. These could occur adjacent to the open turf areas. Where cul-de-sacs or side yard conditions occur, children's play areas or similar uses could be planned to minimize conflicts with adjacent residences. Additional uses in this park could be a series of small landscaped areas with benches for reading or quiet reflection.

Figure 8.8: Park Rendering (AR-64)

Figure 8.9: AR-64 Conceptual Plan.

Final designs will be developed prior to construction and will consider recreational trends and available budget for both development and maintenance. Curb adjacent sidewalks maybe constructed, at the direction of the Parks Department, along neighborhood park frontage.

AR-67:

The Park is located on the eastern edge of the community and mainly serves the neighborhoods east of Westbrook Boulevard. The park is separated into two areas by a long, promenade style walk under an alley of trees linking the two ends of the park.

The west portion of the park contains a tot lot with shaded seating, benches and picnic tables. The east portion of the park contains an open lawn area that could contain a tot lot and can be used for passive play or as a place to picnic, or throw frisbees.

Figure 8.11: AR-67 Conceptual Plan.

Final designs will be developed prior to construction and will consider recreational trends and available budget for both development and maintenance. Curb adjacent sidewalks maybe constructed, at the direction of the Parks Department, along neighborhood park frontage.

RESOLUTION NO. 16-270

APPROVING A WATER SUPPLY ASSESSMENT

WHEREAS, the City of Roseville (CITY) proposes to annex and develop the 694± acres of property known as the Amoruso Ranch Specific Plan (Project); and

WHEREAS, a Water Supply Assessment for the Project, dated May 2016, was prepared by the City of Roseville in accordance with Water Code section 10910 *et seq.*, and the Water Supply Assessment determined that the City of Roseville will secure sufficient water for the Project and the public water system will have sufficient water supplies to meet projected water demands for the Project as well as provide reliability to existing service areas; and

WHEREAS, the City Council of Roseville is the governing body of the City's public water system; and

WHEREAS, the Water Supply Assessment is incorporated into the Final Environmental Impact Report for the Amoruso Ranch Specific Plan (State Clearinghouse No. 2013102057) ("Final EIR") as "Appendix E;" and

WHEREAS, approval of the Water Supply Assessment is a prerequisite to certification of the Final EIR.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Roseville as follows:

1. It is hereby determined, based on the Water Supply Assessment, that projected water supplies will be sufficient to meet the demands of the Project (as set forth in the Final EIR), in addition to existing and planned future uses.

2. No changes have occurred since completion of the Water Supply Assessment involving the following: A substantial increase in water demand for the Project, changes in circumstances or conditions substantially affecting the ability of the City to provide a sufficient supply of water for the Project, or significant new information.

3. The Water Supply Assessment for the Amoruso Ranch Specific Plan, dated May 2016, prepared by the City of Roseville and incorporated into the Final EIR as "Appendix E," is hereby approved.

PASSED AND ADOPTED by the Council of the City of Roseville this ____ day of _____, 20____, by the following vote on roll call:

AYES COUNCILMEMBERS:

NOES COUNCILMEMBERS:

ABSENT COUNCILMEMBERS:

City of Roseville Amoruso Ranch Specific Plan Water Supply Assessment

EXECUTIVE SUMMARY

The proposed Amoruso Ranch Specific Plan Project (Proposed Project), if approved, would be constructed on property to the northwest of, but to be annexed into, the City of Roseville (City). An Environmental Impact Report (EIR) is being prepared for the Project. The purpose of this Water Supply Assessment (WSA) is to support the Environmental Impact Report (EIR) for the Proposed Project and to perform the evaluation required by Water Code sections 10910 through 10915 in connection with the City's Proposed Project. This WSA is not intended to reserve water, or to function as a "will serve" letter or any other form of commitment to supply water (see Water Code section 10914). The provision of water service will continue to be undertaken in a manner consistent with applicable City policies and procedures, consistent with existing law.

This WSA includes discussion of the projected potable and recycled water demands of the Proposed Project (Section 2), determinations required under applicable regulations (Section 3), the City and Placer County Water Agency (PCWA) water service areas (Section 4), the City and PCWA projected potable and recycled water demands through the year 2035 (Section 5), and the City and PCWA projected water supply sources and reliability through the year 2035 (Section 6). This WSA also documents the plan to ensure that sufficient water supplies will be available to serve the Proposed Project and the other planned development in the City water service area through the planning period (Section 7). Finally, the water supply assessment approval process (Section 8) and additional information in support of the California Environmental Quality Act (CEQA) process (Section 9) are discussed.

The projected potable water demand and supplies documented in this WSA are based on the City's adopted 2010 Urban Water Management Plan (UWMP), the PCWA 2010 UWMP, and additional documents provided by the City and PCWA. Water Code section 10910(c)(4) states that:

"...the water supply assessment for the project shall include a discussion with regard to whether the total projected water supplies, determined to be available by the city or county for the project during normal, single dry, and multiple dry water years during a 20-year projection, will meet the projected water demand associated with the proposed project, in addition to existing and planned future uses, including agricultural and manufacturing uses."

Based on the technical analyses described in this WSA, the City finds that this requirement is not met. Therefore, the City is proposing to contract with PCWA to provide the necessary additional surface water and associated treatment of water supplies to serve the Proposed Project. Documentation of the availability of this water to be allocated is provided in this WSA. The City and PCWA do find that, with the additional allocation, the City's revised total projected water supplies will meet the above requirement from Water Code section 10910(c)(4), as documented in this WSA.

1.0 INTRODUCTION

The Proposed Project, if approved, would be constructed on property northwest of, and to be annexed into, the City. The purpose of this Water Supply Assessment is to support the EIR for the Proposed Project. Key topics covered in this introduction include:

- Legal Requirements for the Water Supply Assessment
- Need for and Purpose of Water Supply Assessment
- Water Supply Assessment Preparation, Format and Organization

1.1 Legal Requirements for the Water Supply Assessment

California Senate Bill 610 (SB 610) and Senate Bill 221 (SB 221) amended state law, effective January 1, 2002, to improve the link between information on water supply availability and certain land use decisions made by cities and counties. SB 610 and SB 221 were companion measures that sought to promote more collaborative planning between local water suppliers and cities and counties. Both statutes require that detailed information regarding water availability be provided to the city and county decision-makers prior to approval of large development projects. The purpose of providing such information is to ensure that prudent water supply planning has been conducted, and that planned water supplies are adequate to meet existing demands, anticipated demands from approved projects, and the demands of proposed projects.

SB 610 amended California Water Code sections 10910 through 10915 to require agencies responsible for land use decisions:

1. To identify the public water purveyor(s) that may supply water for a proposed development project; and
2. To request a WSA from the identified water purveyor(s).

The City is the identified water purveyor for the Proposed Project. The purpose of the WSA is to demonstrate the sufficiency of the purveyor's water supplies to satisfy the water demands of the proposed project, while still meeting the water purveyor's obligations with regard to existing and planned future uses. Water Code sections 10910 through 10915 delineate the specific information that must be included in the WSA.

SB 221 amended State law (California Government Code section 66473.7) to require that approval by a city or county of certain residential subdivisions¹ requires an affirmative written verification of sufficient water supply. SB 221 was intended as a fail-safe mechanism to ensure that collaboration on finding the needed water supplies to serve a new large residential subdivision occurs before construction begins.

¹ Per Government Code Section 66473.7(a)(1) subdivision means a proposed residential development of more than 500 dwelling units.

1.2 Need for and Purpose of Water Supply Assessment

The purpose of this WSA is to perform the evaluation required by Water Code Sections 10910 through 10915 in connection with the City's Proposed Project. This WSA is not intended to reserve water, or to function as a "will serve" letter or any other form of commitment to supply water (see Water Code section 10914). The provision of water service will continue to be undertaken in a manner consistent with applicable City policies and procedures, consistent with existing law.

1.3 Water Supply Assessment Preparation, Format and Organization

The format of this WSA is intended to clearly delineate compliance with the specific requirements for a WSA, per Water Code sections 10910 through 10915. This WSA includes the following sections:

- Section 1: Introduction
- Section 2: Description of Proposed Project
- Section 3: Required SB 610 Determinations
- Section 4: City of Roseville and PCWA Water Service Area
- Section 5: City of Roseville and PCWA Water Demands
- Section 6: City of Roseville and PCWA Water Supplies
- Section 7: Determination of Water Supply Sufficiency Based on the Requirements of SB 610
- Section 8: Water Supply Assessment Approval Process
- Section 9: Additional Material to Support CEQA Analyses
- Section 10: References

Relevant citations of Water Code sections 10910 through 10915 are included throughout this WSA to demonstrate compliance with the specific requirements of SB 610.

2.0 DESCRIPTION OF PROPOSED PROJECT

A general description of the Proposed Project location, proposed land uses, projected water demand, and proposed water supply is provided below.

2.1 Proposed Project Location

The location of the Proposed Project in relation to the current City Limits is shown on Figure 2-1. The Proposed Project is located outside the existing City limits and consists of approximately 694-acres that includes 20 acres of urban reserve.

Historically, the parcel had been used as a cattle ranch. The primary use was open grazing land, but included a small ranch house and outbuildings. An agricultural well is located on site and was used for rice farming on a portion of the site.

 City of Roseville
 Water Supply Assessment
 for Amoruso Ranch

(THIS PAGE LEFT BLANK INTENTIONALLY)

The land is gently rolling terrain, with the elevation decreasing from the northeast to the southwest. Minor drainages flow in a radial pattern from a slight rise in the northeast quadrant of the property. Site vegetation is generally limited to short, seasonal grasses. There are several oak trees located along University Creek and a number of non-native trees located around the former ranch house. Wetland conditions and associated flora and fauna are located in small areas typically along the drainage corridors and in flats along the southern boundary.

To the north is agricultural land and the existing Amoruso Estates, a rural subdivision of two to five acre parcels. To the northeast, approximately one mile away, is the Placer County Regional Landfill operation. The City of Lincoln Sphere of Influence (SOI) extends south to approximately one-mile north of the Proposed Project.

To the east of the Proposed Project is another potential development area known as Placer Ranch. Placer Ranch is comprised of 2,213 acres, and, if approved, would be comprised of both residential and non-residential land uses. This project was under review by the City of Roseville, but the development application for Placer Ranch was withdrawn as of September 22, 2015. East of Fiddymont Road, encompassing a portion of the Placer Ranch project area, is the existing Sunset Industrial Area. Placer County is currently updating the master plan for that area.

To the southwest of the Proposed Project is the Al Johnson Wildlife Area project planned by the City of Roseville. The City will develop the Al Johnson Wildlife Area as a major storm water detention facility and future open space recreation facility. In addition, west of the project area is an active cattle ranch (Gleason property).

Immediately south of the Proposed Project is the Creekview Specific Plan area, and the existing City of Roseville corporate boundary. The Creekview project consists of 2,011 residential units, an elementary school and parks and open space. Access and infrastructure connections to serve the Proposed Project will be through the Creekview Specific Plan area.

The Proposed Project consists of a mixture of residential, commercial and mixed-use areas, with supporting public facilities, including parks and schools. The project will require an approval by the Placer County Local Agency Formation Commission of an annexation to the City of Roseville.

2.2 Proposed Land Uses

Proposed land uses for the Proposed Project are shown in Figure 2-2 and summarized in Table 2-1. The goal of the Proposed Project is to provide a livable community where housing, recreation, education, retail and employment opportunities are integrated into an urban village. This village is envisioned as a contemporary version of a small walkable town, where walking and biking to recreation opportunities and to perform everyday errands such that automobile use can be minimized.

Proposed Land Uses for Proposed Project

City of Roseville
Water Supply Assessment
for Amoruso Ranch

(THIS PAGE LEFT BLANK INTENTIONALLY)

The Proposed Project includes up to 2,827 residential dwelling units, with housing types including low density residential (LDR), medium density residential (MDR), and high density residential (HDR). Non-residential land uses include 145 acres set aside for permanent open space; 22 acres for parks; 17 acres of public/quasi-public uses (elementary school, substation, well site, and recycling drop off areas); and 27 acres for a mixed use commercial (commercial, office, residential) village center. One non-participating parcel is located on the south end of the site and is referred to as the Wagner Property. It is proposed that this parcel be designated for urban reserve, and would be annexed as part of the Proposed Project.

Table 2-1. Proposed Land Uses for the Proposed Project^(a)

Proposed Land Use	Land Use Abbreviation	Amoruso Ranch Specific Plan Land Use, Acres	Dwelling Units
Low Density Residential/Single Family	LDR	248.77	1,302
Medium Density Residential/Single Family	MDR	50.27	542

Total Proposed Project		694.39	2,827
^(a) Land Use area and Development Intensity as included in Table 3 of the Water Conservation Master Plan, Kimley Horn, September 2015.			

2.3 Proposed Project Projected Water Demand

Water use factors and assumptions, and the projected water demand for the Proposed Project, were based on the Amoruso Ranch Water Master Plan (Kimley Horn, February 2015, Appendix A), Water Conservation Plan (Kimley Horn, September 2015, Appendix B), and Recycled Water Master Plan (Kimley Horn, September 2015, Appendix C) and are described below. City standard land use based water use factors shown in Table 2-2 were applied to the proposed land uses shown in Table 2-1 to develop total water demands.

Table 2-2. City of Roseville Unit Water Demand Factors	
Residential Land Use Categories	Unit Demand Factor, gpd/DU
LDR1 (<3.5 DUs / Acre)	728
LDR2 (3.5 to 5 DUs / Acre)	600
LMDR1 (>5.0 to 6.0 DUs / Acre)	521
LMDR2 (>6.0 to 8.0 DUs / Acre)	430
MDR (>8.0 to 12.0 DUs / Acre)	323
HDR1 (>12.0 to 16.0 DUs / Acre)	288
HDR2 (>16.0 DUs / Acre)	177
Non Residential Land Use Categories	Unit Demand Factor, gpd/AC
Community Commercial / Retail	2,598
Business Professional	2,598
Light Industrial	2,598
Industrial	2,562
Railyard	109
Elementary School	3,454
High School	4,069
Public / Quasi-Public	1,780
Parks	2,988
Open Space / Right of Way	0

The Proposed Project total water demand projection is shown in Table 2-3. As shown in that table, the total water demand is 1,503 acre-feet per year (af/yr), based on the City's water demand factors and an assumed water loss factor of 2 percent. The total water demand was then modified to account for proposed potable and recycled water conservation measures and recycled water use, as shown in Table 2-4. The result is a projected net potable water demand of approximately 1,067 af/yr using a projected recycled water use of approximately 272 af/yr and potable water conservation of approximately 165 af/yr.

Table 2-3. Amoruso Ranch Total Water Demand Projection^(a)

Land Use	Abbreviation/Zoning	Total Area, acres	Dwelling Unit Count	Water Use Factor, gpd/du or gpd/acre	Daily Water Demand, gpd	Annual Water Demand, af/yr

Unaccounted for System Losses (2%)	29.5							29.5 ^(g)
Total Water Supply Required	1,503.2	54.1	86.9	23.7	271.9	49.5	222.4	1,066.6

^(a) See Table 2-3.

^(b) From Amoruso Ranch Water Conservation Plan, Kimley Horn, September 2015.

^(c) From Amoruso Ranch Recycled Water Master Plan, Kimley Horn, September 2015.

^(d) Base Recycled Water Use minus Recycled Water Conservation.

^(e) Total Annual Water Demand minus Potable Water Conservation and Base Recycled Water Use.

^(f) Total Annual Water Demand for Rights-of-Way is included in all other land use types and not itemized, but recycled water demand for Rights-of-Way is itemized. Therefore, the Net Potable Water Demand for Rights-of-way results in a negative value.

^(g) System Loss is based on Total Annual Water Demand.

2.4 Projected Water Supply for Proposed Project

The water demands for the Proposed Project will be served using the City's existing and future portfolio of potable and non-potable (recycled) water supplies, as discussed below. As documented herein, the City does not have sufficient water supply contracts in place to serve the Proposed Project. For projects where existing City water supply contracts are inadequate, the City's General Plan Land Use Element, on page II-52, states:

“Any development proposal west of Roseville that does not have a sufficient supply of surface water shall secure additional supplies above what the City currently has available. Development proposals shall also provide financial assistance to incorporate the new source of supply into the City's water supply portfolio (surface water, groundwater and recycled water); and development proposals shall include measures to reduce water demand by implementing the use of conservation best management practices, recycled water and other off-sets.”

Therefore, this provision requires the Proposed Project proponents to seek additional sources of surface water supplies. PCWA has determined that it has sufficient water supplies to serve the Proposed Project. The City and PCWA intend to enter into an agreement such that PCWA will wholesale potable water to serve the Proposed Project.

3.0 REQUIRED DETERMINATIONS

The following determinations must be made, pursuant to SB 610.

3.1 Does SB 610 apply to the Proposed Project?

Water Code sections 10910 and 10912 state:

10910 (a) Any city or county that determines that a project, as defined in Section 10912, is subject to the California Environmental Quality Act (Division 13 (commencing with Section 21000) of the Public Resources Code) under Section 21080 of the Public Resources Code shall comply with this part.

10912 (a) “Project” means any of the following:

- (1) A proposed residential development of more than 500 dwelling units.*
- (2) A proposed shopping center or business establishment employing more than 1,000 persons or having more than 500,000 square feet of floor space.*
- (3) A proposed commercial office building employing more than 1,000 persons or having more than 250,000 square feet of floor space.*
- (4) A proposed hotel or motel, or both, having more than 500 rooms.*
- (5) A proposed industrial, manufacturing, or processing plant, or industrial park planned to house more than 1,000 persons, occupying more than 40 acres of land, or having more than 650,000 square feet of floor area.*

- (6) *A mixed-use project that includes one or more of the projects specified in this subdivision.*
- (7) *A project that would demand an amount of water equivalent to, or greater than, the amount of water required by a 500-dwelling unit project.*

Based on the following, SB 610 does apply to the Proposed Project.

1. The City of Roseville has determined that the Proposed Project is subject to the CEQA and that an EIR is required.
2. The Proposed Project, with its proposed 2,827 residential dwelling units, and other non-residential land uses, meets the definition of a “Project” as specified in Water Code section 10912(a) paragraph (1) as defined for residential development.

The Proposed Project has not been the subject of a previously adopted WSA and has not been included in an adopted WSA for a larger project. Therefore, according to Water Code section 10910(a), a WSA is required for the Proposed Project.

3.2 Does SB 221 apply to the Proposed Project?

In 2001, SB 221 amended State law to require that approval by a city or county of certain residential subdivisions requires an affirmative written verification of sufficient water supply. Per California Government Code section 66473.7(a)(1), a subdivision means a proposed residential development of more than 500 dwelling units. The Proposed Project, with its proposed 2,827 residential dwelling units, is therefore subject to the requirements of SB 221.

3.3 Who is the identified public water system?

Water Code sections 10910 and 10912 state:

10910(b) The city or county, at the time that it determines whether an environmental impact report, a negative declaration, or a mitigated negative declaration is required for any project subject to the California Environmental Quality Act pursuant to Section 21080.1 of the Public Resources Code, shall identify any water system that is, or may become as a result of supplying water to the project identified pursuant to this subdivision, a public water system, as defined by Section 10912, that may supply water for the project

10912 (c) “Public water system” means a system for the provision of piped water to the public for human consumption that has 3,000 or more service connections...

As shown on Figure 2-1, the Proposed Project is not currently located within the City of Roseville City Limits. The property is proposed to be annexed into the City limits as part of the approval process. The City’s water system service area includes all areas within the City Limits as they are annexed into the City. Therefore, the City is the identified public water system for the Proposed Project.

3.4 Does the City have an adopted Urban Water Management Plan (UWMP) and does the UWMP include the projected water demand for the Proposed Project?

Water Code section 10910 states:

10910(c)(1) The city or county, at the time it makes the determination required under Section 21080.1 of the Public Resources Code, shall request each public water system identified pursuant to subdivision (b) to determine whether the projected water demand associated with a proposed project was included as part of the most recently adopted urban water management plan adopted pursuant to Part 2.6 (commencing with Section 10610).

The City's most recently adopted UWMP (the City's 2010 UWMP) was adopted in August 2011 and is incorporated by reference into this WSA². The City's 2010 UWMP included existing and projected water demands for existing and projected future land uses to be developed within the City's General Plan SOI through the year 2035. The water demand projections in the City's 2010 UWMP included existing City water demands (as of 2010), plus projected water demands for future developments, but did not include water demand projections for the Proposed Project because the Proposed Project was not yet part of the City's development planning process. Therefore, the City will contract with PCWA to provide additional water to serve the Proposed Project, as described in Section 6.

PCWA's most recently adopted UWMP (PCWA's 2010 UWMP) was adopted in June 2011³. PCWA's 2010 UWMP included existing and projected water demands for existing and projected future land uses to be developed within the PCWA water service area, which encompasses the entire Placer County area. The water demand projections in PCWA's 2010 UWMP included existing PCWA water demands (as of 2010), plus projected water demands for future developments. The Proposed Project was not specifically included in PCWA's UWMP, but the demand projections in that document do include sufficient capacity to accommodate the Proposed Project. A technical memoranda, described below, provides greater detail on the volume of water and the area that has been included in the PCWA 2010 UWMP.

The City's and PCWA's ability to meet the projected water demands for the Proposed Project is described in Section 7.0 of this WSA.

² City of Roseville 2010 Urban Water Management Plan, August 2011.

³ Placer County Water Agency 2010 Urban Water Management Plan, Adopted June 16, 2011, prepared by Tully & Young.

4.0 CITY OF ROSEVILLE AND PCWA WATER SERVICE AREAS

Because the Proposed Project will be served from the City's water system, but with water to be provided by PCWA, brief descriptions of both the City's and PCWA water service areas are included in this section.

4.1 City of Roseville Water Service Area

The City of Roseville is located approximately 16 miles northeast of Sacramento and has an estimated population of 128,382 residents (as of January 1, 2015). Roseville incorporated on April 10, 1909 and is a charter city operating under a City Manager-Council form of government.

Roseville is bordered on the east by the City of Rocklin and Granite Bay and on the south by the Sacramento County line and the Dry Creek West Placer Community Plan Area. The north and west city boundaries are bordered by mostly undeveloped and unincorporated Placer County land that has the potential for future development and annexation.

As documented in the City's 2010 UWMP, projections for population, employment, and dwelling units within the City's water service area were completed for buildout as part of the City's General Plan. Those projections are only for the current City of Roseville Water Service Area boundary, including the newly annexed Sierra Vista and Creekview Specific Plan areas.

According to the City's 2010 UWMP, most of the residents within the City Limits are served by the City's water system. There are a few small areas within the City that are served by Placer County Water Agency, San Juan Water District (SJWD), and Citrus Heights Water District.

The City's water service area is currently divided into six pressure zones. With the exception of Pressure Zone 4, which utilizes pressure reducing stations, all other pressure zones (Pressure Zones 1, 2, 3, and 5) are either served by gravity, require boosting, or are served by adjacent water agencies that have sufficient pressure to serve these areas. The Proposed Project area would be located in City Pressure Zone 4. As noted above, the Proposed Project is located north of and outside the City's existing City limits, but is expected to be annexed into the City as part of the land use approval process.

There are two primarily residential areas on the east side of the City that are within the incorporated City limits but are not within the Water Service Area boundary. Department of Finance and Roseville General Plan estimates for dwelling units were adjusted to account for areas within the City limits but outside the City Water Service Area boundary.

The historical and projected water service area populations are summarized in Table 4-1.

Table 4-1. Historical and Projected Population for City of Roseville Water Service Area

Calendar Year	Estimated Population ^(a)
1995	56,026
2000	77,627
2005	95,143
2010	114,078
2015	122,946
2020	135,317
2025	160,938
2030	166,021
2035	168,718
^(a) Data from City's 2010 UWMP, Tables 2.6 (2010-2035), 3.2 (1995, 2000), and 3.3 (2005). Updated value from City staff for 2015.	

4.2 PCWA Water Service Area

As documented in PCWA's 2010 UWMP, PCWA is a public water agency that provides untreated, treated, and irrigation water directly and indirectly to wholesale and retail customers throughout Placer County and a portion of Sacramento County.

PCWA's Eastern Water System provides groundwater to the Martis Valley area of Placer County adjacent to the City of Truckee. This service area is also designated as PCWA Zone 4.

The area served by the Western Water System extends from the community of Alta on the east, down the Interstate 80 corridor, to the Sutter and Sacramento county lines on the west and south. The service area includes retail treated water deliveries to the communities of Alta, Monte Vista, Applegate, Colfax, Auburn, Loomis and Rocklin and much of the surrounding unincorporated areas. PCWA also provides wholesale treated water to the City of Lincoln, California American Water Company for use in their franchise area west of Roseville and south of Baseline Road, and to several relatively small mutual water companies throughout PCWA's western service area.

In addition to treated water service, PCWA provides irrigation water through its extensive canal system to individual customers, and untreated water for treatment and resale by other retail water purveyors, including the City of Roseville. Irrigation water comprises about two-thirds of PCWA's Western Water System deliveries.

The Western Water System is a financial and operational amalgamation of four separate systems acquired or developed over time. Each of these underlying systems is designated as a PCWA Zone; numbered 1, 2, 3 and 5.

PCWA also provides untreated water from its Middle Fork American River Project into Folsom Lake for delivery to the SJWD, the City of Roseville, and Sacramento Suburban Water District (SSWD), each of which are required to prepare their own UWMPs. Deliveries to these customers are grouped under the general term of “Sales to Other Agencies.” PCWA’s Place of Use for its Middle Fork American River Project water rights extends outside of the PCWA/Placer County boundary and includes groundwater recharge areas in northern Sacramento County that are partially overlain by the San Juan Water District and the SSWD.

5.0 CITY OF ROSEVILLE AND PCWA WATER DEMANDS

Water Code section 10910 states:

10910(c)(2) If the projected water demand associated with the proposed project was accounted for in the most recently adopted urban water management plan, the public water system may incorporate the requested information from the urban water management plan in preparing the elements of the assessment required to comply with subdivisions (d), (e), (f), and (g).

The descriptions provided below for the City’s and PCWA’s water demands have been primarily taken from the City’s 2010 UWMP, which was adopted in August 2011, and PCWA’s 2010 UWMP, which was adopted in June 2011. As indicated above, the Proposed Project was not included in the City’s 2010 UWMP, but the demand projections in PCWA’s 2010 UWMP include sufficient capacity to accommodate the Proposed Project.

The following topics are covered in this section:

- City of Roseville Existing and Projected Water Demand
- PCWA Existing and Projected Water Demand
- Dry Year Water Demand

5.1 City of Roseville Existing and Projected Water Demand

The projected total (potable and recycled) water demand for the City at buildout, based on the 2015 HPCO WSA⁴, without and with the ARSP water demands is shown in Table 5-1. The projected future total water demand in 5-year increments through 2035 and at buildout, without and with the ARSP, is shown in Table 5-2.

5.2 PCWA Existing and Projected Water Demand

The projected untreated water demand for wholesale water supply customers located within the PCWA western area (Zones 1 and 5), including the City are shown in Table 5-3.

Potable Water Demand ^(b)	39,342	37,097	39,416	41,908	44,771	57,418	58,456
Potable Water System Unaccounted-for System Losses ^(c)	787	742	788	838	895	1,172	1,201
Total Potable Water Demand ^(d)	40,129	37,839	40,204	42,746	45,666	58,590	59,657
Total Recycled Water Demand ^(d)	2,216	2,722	3,071	3,481	3,653	4,491	4,713
Total Water Demand	47,957	52,164	58,051	59,904	61,625	63,081	64,370

^(a) Demand for 2015 is a projected value assuming no demand reductions (see footnote c). With Stage 3 demand reductions, the City's actual 2015 total water use was 22,991 af/yr.

^(b) Potable water demand is Total Potable Water Demand minus Potable Water System Unaccounted-for System Losses.

^(c) Unaccounted-for system losses are assumed to be 2 percent of Total Potable Water Demand.

^(d) Based on Table 10 of Hewlett Packard Campus Oaks Water Supply Assessment for 2015 through 2035; HPCO WSA page 22 for Buildout w/out ARSP; Buildout w/ ARSP includes values from Table 2-4. All values assume no demand reductions (Normal Year).

Table 5-3. PCWA Untreated Water Demand for Western Area Wholesale Customers, af/yr^(a)

Wholesale Customer	2015	2020	2025	2030	2035	2040	Buildout
San Juan Water District	14,967	15,652	16,370	16,411	17,941	19,470	21,000
San Juan Water District to City of Roseville ^(b)	4,000	4,000	4,000	4,000	4,000	4,000	4,000
Sacramento Suburban Water District ^(c)	29,000	29,000	29,000	29,000	29,000	29,000	29,000
City of Roseville ^(d)	10,000	20,000	30,000	30,000	30,000	30,000	30,000
Normal Year Total	57,967	68,652	79,370	79,411	80,941	82,470	84,000

^(a) Based on PCWA 2010 UWMP, Table 4-9.

^(b) Deliveries from SJWD to Roseville are zero in Single Dry and Multi-Dry years.

^(c) PCWA deliveries to SSWD are zero in Single Dry and Multi-Dry years.

^(d) City of Roseville demand values represent the contracted volume.

The water supply to SSWD effectively goes to zero during dry years when the unimpaired flow into Folsom Reservoir is less than 1.6 million acre-feet (af). Similarly, flow deliveries to Roseville from SJWD also go to zero during dry years when the unimpaired flow into Folsom Reservoir is less than 950,000 af, although this restriction does not affect deliveries from PCWA to SJWD.

Prior to 2010, the City's contract with PCWA provided for 10,000 af, with options for an additional 20,000 af. In 2010, the City exercised the options and entered a new consolidated contract with PCWA. This contract identified an agreed-upon increase in the contract quantity over the next several years, capping at 30,000 acre-feet annually after July 1, 2024. Between now and July 2024, the contract has several incremental steps that do not directly correspond to the 5-year planning increments of this UWMP. For purposes of long-term planning, PCWA has represented the City's contracted volume as the demand shown in Table 5-3.

In addition to wholesale customers, PCWA provides retail water service to meet other water demands within western Placer County. Total projected demand for all PCWA water supply types and customers in the Western Area are summarized in Table 5-4. The values for Zone 1 wholesale untreated in Table 5-4 match the Normal Year Total in Table 5-3.

Because the planning horizon assumed by the land-planning authorities throughout the County is not always consistent (e.g., projections vary from 2030 to 2050), future land-planning updates may identify growth in the Western Area not currently contemplated. To accommodate this potential additional demand, PCWA has established a placeholder "buffer" value of 10,000 af of annual demand beginning in 2040. This value is also shown in Table 5-4 as a separate line item.

Table 5-4. PCWA Summary of Normal Year Western Area Water Demands, af/yr^(a)							
Water Type by Zone	2015	2020	2025	2030	2035	2040	Buildout
Zone 1 Water Demands							
Retail Treated	32,166	33,854	36,039	38,238	41,309	44,400	69,701
Irrigation	56,295	56,295	56,295	56,295	56,295	56,295	56,295
Wholesale Treated	16,515	20,944	25,374	29,805	31,608	33,410	35,213
Wholesale Untreated ^(b)	57,967	68,652	79,370	79,411	80,941	82,470	84,000
Subtotal Zone 1 Demand	162,944	179,745	197,078	203,749	210,152	216,575	245,209
Zone 5 Demand	11,038	9,483	7,928	6,373	4,803	3,263	1,699
Zone 1 and 5 Buffer	--	--	--	--	--	10,000	10,000
Total Western Area Demand	173,981	189,228	205,005	210,122	214,955	229,838	256,908
^(a) From PCWA 2010 UWMP, Table 4-10, with math corrected for 2040 and Buildout conditions.							
^(b) From Table 5-3.							

In 2012, PCWA prepared a memorandum (2012 PCWA Memo⁵ in Appendix D) further clarifying the demand projections documented in the PCWA 2010 UWMP. In the 2012 PCWA Memo, Table 7 indicates that the projected water demand for the Sunset Industrial Area (SIA) was 12,701 af/yr (8,086 af/yr in Zone 1 and 4,615 af/yr in Zone 5). This demand was projected to be served through the Zone 1 Retail Treated Water Demand found in Table 4-10 of the PCWA 2010 UWMP, and shown in Table 5-4 above. At that time, the Proposed Project had not been included in the SIA water demand projection.

In 2015, PCWA prepared a memorandum (2015 PCWA Memo⁶ in Appendix E) documenting the revised water demand projections for the SIA and indicating that, because the revised water demand projections for the SIA are lower than projected for the PCWA 2010 UWMP, the projected potable water demand of the Proposed Project is now considered to be part of the water demand projected for the SIA. This reasoning is summarized in Table 5-5, which is based on the 2015 PCWA Memo.

⁵ Memorandum - PCWA demand development information, from Greg Young of Tully & Young to Placer County Water Agency, May 11, 2012.

⁶ Memorandum – Sunset Industrial Area Water Allocation, from Brian Rickards and Tony Firenzi of PCWA to Michele Kingsbury of PCWA and Kelye McKinney of City of Roseville, November 25, 2015.

Table 5-5. Comparison of PCWA 2010 UWMP Demand Projections and Revised Projections for Sunset Industrial Area^(a)				
Planning Area	Area, acres	Dwelling Units	Existing and Projected Annual Water Demand, af/yr	Existing and Projected Total Annual Water Demand with Losses, af/yr ^(b)
Revised SIA Projection, 2015				
Existing SIA	490	—	1,300	1,404
Formica Plant ^(c)	209	—	455	491
Existing WPWMA ^(d)	314	—	48	52
Future Industrial	1,122	—	2,352	2,540
Future Public (WPWMA)	70	—	157	169
Future Landfill (WPWMA)	553	—	9	10
SIA Undevelopable	3,346	—	—	—
Placer Ranch Specific Plan ^(e)	2,213	5,400	4,500	4,860
Amoruso Ranch Specific Plan ^(f)	674	2,785	1,100	1,188
Total Revised SIA Projection, 2015	8,991	8,185	9,921	10,714
SIA Water Demand Projection from PCWA 2010 UWMP^(g)	8,100	—	11,760	12,701
Difference (Revised minus PCWA 2010 UWMP)	891^(h)	8,185	-1,839	-1,987
^(a) Based on 2015 PCWA Memo, Table 2-3 and 2-4, and 2012 PCWA Memo Table 7. ^(b) Includes an 8 percent unaccounted-for system loss factor. ^(c) The Formica plant closed in 2006, but the property retains the entitlement to 455 af/yr water use (491 af/yr including 8 percent unaccounted-for system losses). ^(d) WPWMA = Western Placer Waste Management Authority ^(e) The application for Placer Ranch Specific Plan has recently been withdrawn. ^(f) Proposed Project. Note that projected potable water demand in the 2015 PCWA Memo is greater than projected in Table 2-4 of this WSA. ^(g) Sunset Industrial Area (SIA) as documented in 2012 PCWA Memo. ^(h) Formica Plant and Proposed Project had not been included in previous SIA planning documents.				

As indicated in Table 5-5, the revised water demand projection for the SIA, including the Formica Plant and the Proposed Project, is 1,987 af/yr less than had been included in the PCWA 2010 UWMP. Much of the difference is caused by the determination that a large portion of the SIA planning area cannot be developed. The reasons for the determination of portions of the SIA being unavailable for development vary. Some of the land is already developed, other land is assumed to be undevelopable due to the higher cost of wetlands mitigation, and the remainder is allocated to right-of-way for the planned Placer Parkway and for other purposes.

5.3 Dry Year Water Demand

The City currently has a Water Shortage Contingency Plan in place, as described in Section 5 of the City's 2010 UWMP. The City's Water Shortage Contingency Plan describes five stages of short-term water demand reduction measures that would be required during years when potable water supply is reduced. The water shortage stages, and their respective anticipated reduction in potable water demand, are shown in Table 5-6.

Table 5-6. Water Shortage Contingency Plan Projected Demand Reduction^(a)	
Water Shortage Stage Description	Projected Demand Reduction, percent
Baseline Water Conservation	0
Stage 1 Drought	10
Stage 2 Drought	20
Stage 3 Drought	30
Stage 4 Drought	40
Stage 5 Drought	50
^(a) See Table 5.3 and Appendix H of the City's 2010 Urban Water Management Plan.	

The City entered a Drought Stage 3 in May 2015, which was precipitated by a State-wide mandate for water conservation. Specifically, a 28 percent demand reduction target relative to 2013 water usage was imposed by the State.

The projected future water demand shown above in Table 5-2 included continued implementation of the City's existing water conservation program, and is based on future normal hydrologic years. Any demand reduction requirements in dry years will be based on available water supplies being insufficient to meet projected demand.

6.0 CITY OF ROSEVILLE AND PCWA WATER SUPPLIES

Key topics addressed in this section include:

- Regulatory Background
- Roseville Existing and Projected Potable Water Supplies
- Roseville Existing and Projected Non-Potable Water Supplies
- PCWA Existing and Projected Potable Water Supplies
- PCWA Existing and Projected Non-Potable Water Supplies

6.1 Regulatory Background

Water Code section 10910 states:

10910(c)(2) If the projected water demand associated with the proposed project was accounted for in the most recently adopted urban water management plan, the public water system may incorporate the requested information from the urban water management plan in preparing the elements of the assessment required to comply with subdivisions (d), (e), (f) and (g).

10910(d)(1) The assessment required by this section shall include an identification of any existing water supply entitlements, water rights, or water service contracts relevant to the identified water supply for the proposed project, and a description of the quantities of water received in prior years by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), under the existing water supply entitlements, water rights, or water service contracts.

10910(d)(2) An identification of existing water supply entitlements, water rights, or water service contracts held by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), shall be demonstrated by providing information related to all of the following:

- (A) Written contracts or other proof of entitlement to an identified water supply.*
- (B) Copies of a capital outlay program for financing the delivery of a water supply that has been adopted by the public water system.*
- (C) Federal, state, and local permits for construction of necessary infrastructure associated with delivering the water supply.*
- (D) Any necessary regulatory approvals that are required in order to be able to convey or deliver the water supply.*

10910(e) If no water has been received in prior years by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), under the existing water supply entitlements, water rights, or water service contracts, the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), shall also include in its water supply assessment pursuant to subdivision (c), an identification of the other public water systems or water service contract-holders that receive a water supply or have existing water supply entitlements, water rights, or water service contracts, to the same source of water as the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), has identified as a source of water supply within its water supply assessments.

It is anticipated that water supply for the Proposed Project would be made available through an agreement between the City and PCWA for treated surface water. The Proposed Project would also use recycled water supplies provided from the City. The City and PCWA are currently developing an agreement whereby PCWA will wholesale treated surface water to the City in sufficient volume to meet all water supply needs and at a level of reliability to serve the Proposed Project during normal, dry and multiple dry year conditions. The availability of surface water from PCWA to serve the Proposed Project is documented later in this section.

Proponents of the Proposed Project will provide their proportionate share of required funding to the City for the acquisition and delivery of treated potable and recycled water supplies to the Proposed Project area. This arrangement will be outlined within the Development Agreement between the project landowners and the City. The Development Agreement will be completed and approved as part of the City's formal land use actions.

The summaries of the City and PCWA water supplies provided below have been taken, for the most part, from the City's 2010 UWMP, which was adopted in August 2011, and the PCWA 2010 UWMP, which was adopted in June 2011.

6.2 Roseville Existing and Projected Potable Water Supplies

The City currently receives potable water supplies from Folsom Lake, and is also developing a groundwater supply to be used in drier and driest years when surface water supplies are insufficient to meet overall potable water demands. Key topics of interest described herein include:

- Surface Water from Folsom Lake
- Surface Water Reliability
- Additional Planned Future Potable Water Supplies
- Groundwater Supply

6.2.1 Surface Water from Folsom Lake

Folsom Lake has been the primary source of water for the City since 1971. Through the Folsom Lake Municipal and Industrial intake, the City receives untreated water from the U.S. Bureau of Reclamation (USBR) and from PCWA. Additionally, through this same delivery point, the City receives a normal/wet year water supply from SJWD. The untreated surface water is delivered to the City's Barton Road Water Treatment Plant. The City also maintains interties with PCWA, SJWD, the California American Water Company, SSWD, and the Citrus Heights Water District. These interties allow existing distribution systems to be used to deliver treated water between purveyors in the event of water treatment plant or conveyance system disruptions. The City's three surface water contract entitlements for American River water total 66,000 af/yr, as summarized in Table 6-1. Additionally, the City, as part of the Water Forum, has agreed to limit its diversions off of the American River 58,900 af/yr during Normal/Wet Years and to between 54,900 af/yr and 39,800 af/yr in Drier and Driest Years. This is further described below.

Table 6-1. City of Roseville Surface Water Contracts, af/yr^(a)	
Contracted Water Supply	Contract Amount, af/yr
USBR (Central Valley Project Supply)	32,000
PCWA (Middle Fork Supply)	30,000
SJWD (Middle Fork Supply) ^(b)	4,000
Total Contracted Supplies	66,000
Diversion Limitations Per Water Forum Agreement:	
Normal/Wet Years	58,900
Drier and Driest Years (Critically Dry)	Ranges from 54,900 to 39,800
^(a) American River diversion limitations as outlined in the City's Water Forum Agreement. From City's UWMP Table 4.1.	
^(b) San Juan Water District is only available as a normal/wet year supply, thus it is not available in drier or driest years.	

The Sacramento Water Forum is a diverse group of business and agricultural leaders, citizen groups, environmentalists, water managers, and local governments working together to balance two co-equal objectives:

- To provide a reliable and safe water supply for the Sacramento region's long-term growth and economic health; and
- To preserve the fishery, wildlife, recreational, and aesthetic values of the lower American River.

The City, along with several other Sacramento-area water suppliers are signatory to the January 2000 Water Forum Agreement which includes Purveyor Specific Agreements. The Water Forum Agreements provide the framework for how water resources, including surface water and groundwater supplies would be used in the region, through the year 2030. The City's Purveyor Specific Agreement includes limitations on City surface water diversions from the American River under various hydrologic conditions. The Water Forum categorized water years into three types,

all of which are defined in terms of the projected March through November unimpaired flow into Folsom Reservoir. These hydrologic year types are defined as follows:

- Normal/Wet Years: When the projected unimpaired flow into Folsom Reservoir is greater than or equal to 950,000 af
- Drier Years: When the projected unimpaired flow into Folsom Reservoir is between 400,000 af and 950,000 af
- Driest Years: When the projected unimpaired flow into Folsom Reservoir is less than 400,000 af

Although Roseville's water contract entitlements total 66,000 af/yr, the City's diversions from the American River are limited by the WFA in normal/wet years, drier and driest years. In normal/wet years, the City has agreed to limit surface water diversions from the American River to 58,900 af/yr. In driest years (also called critically dry years), the maximum diversion from the American River is limited to 39,800 af/yr. In drier years, the City may divert an amount between 39,800 and 54,900 af/yr from the American River, depending on the unimpaired flow into Folsom Lake.

It is important to note that during the drier and driest years, the City agreed to have PCWA release an additional 20,000 af/yr of water down the American River on the City's behalf through re-operation of PCWA's American River Middle Fork Project (MFP). This 20,000 af/yr of water is not part of the City's contracted supply of 66,000 af/yr. The intent of MFP re-operational releases during drier and driest years is to mitigate environmental impacts resulting from increased diversions above 1995 baseline levels.

Table 6-2 below, shows how the City intends to make use of its current water supply contracts over time.

Table 6-2. City of Roseville Surface Water Contracts, af/yr					
Contracted Water Supply	2015	2020	2025	2030	2035+
USBR (Central Valley Project supply)	32,000	32,000	32,000	32,000	32,000
PCWA (Middle Fork supply)	15,000	20,000	30,000	30,000	30,000
SJWD (Middle Fork supply) ^(a)	4,000	4,000	4,000	4,000	4,000
Total Contracted Supplies	51,000	56,000	66,000	66,000	66,000
^(a) San Juan Water District is only available as a Normal or wetter year supply.					

6.2.2 Surface Water Reliability

Tables 5.6 and 5.7 of the City's 2010 UWMP provide the basis for the City's water use projections through 2030. Because of the water supply uncertainty arising from the current drought, however, a more conservative approach to water supply reliability is provided in this WSA. The anticipated reliability of the surface water supplies in Normal, Single Dry, and Multi-Dry hydrologic conditions, as a percentage of contracted volume, is shown in Table 6-3. Those same results are expressed as volumes in Table 6-4. For purposes of this WSA, the WFA definitions of normal/wet,

drier, and driest years will be used as surrogates for the SB 610 required definitions of Normal, Single Dry, and Multi-Dry hydrologic conditions.

**Table 6-3. City of Roseville Surface Water Supply Reliability,
Percent of Contracted Amount^(a)**

Contracted Water Supply	Normal Year	Single Dry Year ^(b)	Multiple Dry Years ^(c)		
			Year 1	Year 2	Year 3
USBR (Central Valley Project supply)	100	25 ^(d)	75	75	50
PCWA (Middle Fork supply)	100	100	100	100	100
SJWD (Normal year only – Middle Fork supply) ^(e)	100	—	—	—	—

^(a) See Table 6-1.
^(b) Minimum American River diversion as outlined in the City's Water Forum Agreement is 39,800 af/yr (See City 2010 UWMP Table 5.11). PCWA 2010 UWMP assumes full delivery of 30,000 af/yr in Single Dry Years. Although the City's 2010 UWMP assumed total American River water supply would match the WFA, the actual lowest historical allocation of USBR supply was 25% in 2015, which would not provide for the full WFA volume as shown in Table 6-1.
^(c) Based on the 1990-1992 historical hydrologic conditions.
^(d) Lowest historical allocation was 25% in 2015.
^(e) SJWD is available only as a normal or wetter year supply.

Table 6-4. City of Roseville Surface Water Supply Reliability, af/yr

Contracted Water Supply	Normal Year	Single Dry Year ^(a)	Multiple Dry Years ^(b)		
			Year 1	Year 2	Year 3
USBR (Central Valley Project supply)	32,000	8,000	24,000	24,000	16,000
PCWA (Middle Fork supply)	30,000	30,000	30,000	30,000	30,000
SJWD (Normal year only – Middle Fork supply) ^(c)	4,000	—	—	—	—
Total Surface Water Supply Available	66,000	38,000	54,000	54,000	46,000
WFA Limitation Based on Hydrologic Record	58,900	39,800	51,394	58,900	45,426

^(a) Minimum American River diversion as outlined in the City's Water Forum Agreement is 39,800 af/yr (See City 2010 UWMP Table 5.11). PCWA 2010 UWMP assumes full delivery of 30,000 af/yr in Single Dry Years. USBR supplies vary and reached a minimum of 8,000 af/yr in 2015. Total 2015 supplies were therefore 38,000 af/yr, which is less than the WFA allowed American River diversions in critical dry years. Bold text denotes which factor (surface water supply availability or Water Forum diversion limitations) drives available water supply.
^(b) Based on the 1990-1992 historical hydrologic conditions. Unimpaired inflows during these years are used as the basis for determining water availability based on the WFA.
^(c) SJWD is available only as a normal or wetter year supply.

As noted in Table 6-4 by the bolded supply values, either total surface water supply availability or Water Forum diversion limitations drive available water reliability. For example, in a Normal Year condition, the City currently has 66,000 af/yr of water supply contracts, but the City's WFA limits diversion from the American River to 58,900 af/yr. Therefore, in a Normal Wet Year the Water Forum drives City supplies. Comparatively, in a Single Dry Year, where it is assumed the City

could receive up to a 75 percent reduction in its Central Valley Project (CVP) contracted supply (as seen during 2015), surface water allocations (38,000 af/yr) drive supplies over the City's WFA that would limit surface water diversions to 39,800 af/yr.

Based on the historical hydrologic record the Water Forum used for their analysis (and for the WFA restrictions), the 58,900 af/yr contract surface water supply is assumed to be available to the City in about 83 percent of the years. In the remaining 17 percent of years, supply quantities ranging from 54,900 af/yr to 39,800 af/yr of surface water would be available per the WFA or between 54,900 af/yr to 38,000 af/yr based on potential CVP water supply allocations. Thus, in drier and driest years; demands will be reduced through increased conservation measures and supplemental supplies (groundwater or other supplies) potentially totaling up to 20,900 af/yr (the difference between the normal/wet year supply and the single dry year supply allocation) would be needed to make up for the deficiencies in drier or critically dry years.

6.2.3 Additional Planned Future Potable Water Supplies

To serve the Proposed Project, the City will contract with PCWA to provide a new wholesale treated water supply. Currently, the City is planning to acquire from PCWA up to 1,500 af/yr (see Table 6-5).

In addition to obtaining new supplies from PCWA's future Ophir water treatment plant, the City is evaluating the possibility of participating with other water suppliers in a regional water supply project from the Sacramento River. Participation in a Sacramento River project would provide increased water supply and supply reliability for the City through the addition of a new surface water diversion point that is not on the American River. However, for purposes of this assessment, future supply from a Sacramento River project is not included.

A summary of the City's existing and additional planned future potable water supplies during hydrologic Normal, Single Dry, and Multiple Dry Years, including the full contracted volumes and the proposed wholesale water supply from PCWA to serve the Proposed Project, is shown in Table 6-5. PCWA has plans to construct a new Ophir water treatment plant which will be the source for this new supply. Planning for the Ophir facility is currently underway. It is likely to be available by 2025, however for purposes of this document the supply is not shown to be available until 2030.

6.2.4 Groundwater Supply

Water Code section 10910 states:

10910(f) If a water supply for a proposed project includes groundwater, the following additional information shall be included in the water supply assessment.

10910(f)(1) A review of any information contained in the urban water management plan relevant to the identified water supply for the proposed project.

**Table 6-5. City of Roseville Projected Surface Water Contract and Supply Reliability
During Hydrologic Normal, Single Dry, and Multiple Dry Years^(a)**

Wholesale Sources	Projected Volume, af/yr					
	2015	2020	2025	2030	2035	Buildout
Existing and Planned Sources of Water - Contracted Volume, af/yr						
U.S. Bureau of Reclamation (CVP supply)	32,000	32,000	32,000	32,000	32,000	32,000
PCWA (Middle Fork supply)	30,000	30,000	30,000	30,000	30,000	30,000

^(a) Includes additional supply to serve Proposed Project.

^(b) Adjusted from City's 2010 UWMP to account for actual 2015 allocation of 25%.

^(c) No supply in Single and Multi-Dry hydrologic conditions.

^(d) See Table 6-4.

10910(f)(2) A description of any groundwater basin or basins from which the proposed project will be supplied. For those basins for which a court or the board has adjudicated the rights to pump groundwater, a copy of the order or decree adopted by the court or the board and a description of the amount of groundwater the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), has the legal right to pump under the order or decree. For basins that have not been adjudicated, information as to whether the department has identified the basin or basins as overdrafted or has projected that the basin will become overdrafted if present management conditions continue, in the most current bulletin of the department that characterizes the condition of the groundwater basin, and a detailed description by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), of the efforts being undertaken in the basin or basins to eliminate the long term overdraft condition.

10910(f)(3) A detailed description and analysis of the amount and location of groundwater pumped by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), for the past five years from any groundwater basin from which the proposed project will be supplied. The description and analysis shall be based on information that is reasonably available, including, but not limited to, historical use records.

A detailed description and analysis of the amount and location of groundwater that is projected to be pumped by the public water system, or the city or county if either is required to comply with this part pursuant to subdivision (b), from any basin from which the proposed project will be supplied. The description and analysis shall be based on information that is reasonably available, including, but not limited to, historical use records.

10910(f)(4) An analysis of the sufficiency of the groundwater from the basin or basins from which the proposed project will be supplied to meet the projected water demand associated with the proposed project.

A water assessment shall not be required to include the information required by this paragraph if the public water system determines, as part of the review required by paragraph (1), that the sufficiency of groundwater necessary to meet the initial and projected water demand associated with the project was addressed in the description and analysis required by paragraph (4) of subdivision (b) of Section 10631.

Because of the expected reliability of the 1,500 af/yr PCWA water supply, the water supply for the Proposed Project will not include groundwater. However, the use of groundwater is part of the City of Roseville's long-term water supply strategy, to be potentially used as a back-up supply during dry years or for increased operational flexibility.

In August 2007, the Cities of Roseville and Lincoln, along with PCWA and the California American Water Company, completed the Western Placer Groundwater Management Plan (GMP). The GMP was prepared in an effort to maintain a safe, sustainable and high-quality groundwater resource to meet backup, emergency and peak demands within a zone of the North American River Groundwater sub-basin.

The City has recently adopted an aquifer storage and recovery (ASR) program, under which treated surface water can be injected into the aquifer during wet times (normal / wet years or during the rainy season), and withdrawn when the City needs additional water supplies. Uses include augmenting surface water supplies during droughts or to shave peak water demand periods, like those that occur during summer months. In 2013, the City received an operational permit from the Central Valley Regional Water Quality Control Board for the ASR program. The land use plan for the Proposed Project includes a dedicated groundwater well that will also be equipped to function as an ASR well so that the City has full operational flexibility.

The City currently operates six-groundwater wells, which are capable of delivering approximately 15,970 af/yr (1,650 gpm per well) if run continuously. A more realistic production amount is 40 af/day (1,500 gpm per well) over limited time frames to augment the water supply. The wells are primarily used as a backup water supply, thus improving water supply reliability. The City has plans to expand its groundwater well network to include ten additional groundwater well sites that have been identified. Once constructed, the City's groundwater facilities (16 wells) are projected to deliver of up to 106.07 af/day (6.63 af/day per well) or 38,715 af/yr, if run on a continuous basis.

6.3 Roseville Existing and Projected Non-Potable Water Supplies

The City of Roseville, along with the South Placer Municipal Utility District and Placer County, formed the South Placer Wastewater Authority (SPWA). SPWA was created in 2000 to oversee funding for regional wastewater and recycled water infrastructure. The City owns and operates two regional wastewater treatment facilities on behalf of the regional partners. These treatment facilities are the Dry Creek wastewater treatment plant and the Pleasant Grove wastewater treatment plant. Both plants produce Title 22 quality effluent that is available for recycled water applications. Recycled water for the Proposed Project will be obtained from the Pleasant Grove wastewater treatment plant.

Recycled water supply for the Proposed Project was not included in the City's 2010 UWMP; however, as documented in the Proposed Project's Recycled Water Master Plan, sufficient wastewater flow will be generated by the project in each month to satisfy the projected recycled water demands, assuming the proposed recycled water conservation practices listed in Table 2-4 are put into practice. Recycled water is expected to be available in all hydrologic year types.

The City has no other planned future sources of non-potable and recycled water except as described above.

6.4 PCWA Existing and Projected Potable Water Supplies

PCWA uses surface water as its primary supply. PCWA also produces a limited amount of groundwater for use in Zone 4, and may produce groundwater in dry hydrologic conditions to meet demands in the Zone 1 service area. As described in PCWA's 2010 UWMP, PCWA's primary surface water supplies consist of MFP water from the American River, water purchased from Pacific Gas & Electric Company (PG&E) from the Yuba and Bear Rivers, and Central Valley Project water from the American River. PCWA also uses a limited amount of surface water from small creeks under pre-1914 water rights. Historically, PCWA has purchased surplus water from the South Sutter Water District for service to PCWA Zone 5 customers under Nevada Irrigation District's water rights. Accordingly, the following topics are discussed below:

- American River Middle Fork Project
- Pacific Gas and Electric Contracts
- Central Valley Project
- Impacts of Water Forum Agreement
- Groundwater
- Additional Planned Future Potable Water Supplies

A summary of PCWA's existing and additional planned future potable water supplies during hydrologic Normal, Single Dry, and Multiple Dry Years, including the full contracted volumes, is shown in Table 6-6. The water supply source for the Proposed Project will be the Middle Fork Project, which is projected to have 100 percent reliability in all hydrologic conditions, as shown in Table 6-6. American River Middle Fork Project

The MFP began operation in 1967 and primarily provides a water supply to PCWA wholesale customers that are currently able to take delivery from Folsom Reservoir. PCWA's MFP water right allows it to divert water from the American River at both Auburn and Folsom Lake for irrigation, domestic, municipal, industrial, and recreational purposes. PCWA has signed an agreement with the USBR limiting its diversions under these permitted rights to 120,000 af/yr. PCWA may divert water directly from the American River between November and June and also re-divert water released from its MFP reservoirs during the remainder of the year.

6.4.1 Pacific Gas and Electric Contracts

PCWA has two water supply contracts with PG&E, which provide options to purchase up to 125,400 af/yr for irrigation and domestic purposes. The underlying rights for the PG&E supply are PG&E's pre-1914 appropriative rights to water in the Yuba and Bear Rivers, which were established prior to the time that PG&E developed hydroelectric facilities throughout the Yuba and Bear River watersheds.

**Table 6-6. PCWA Projected Potable Water Supply Reliability
During Hydrologic Normal, Single Dry, and Multiple Dry Years^(a)**

Wholesale Sources	Projected Volume, af/yr

Total	197,000	220,250	220,250	220,250	220,250

^(a) Based on PCWA 2010 UWMP Table 3-8 and supply reduction discussion in PCWA 2010 UWMP text.

^(b) Assumes 50% supply reduction in Single Dry Years, and 25% supply reduction in Multi-Dry Years.

^(c) Assumes no supply reduction in Single Dry Years or Multi-Dry Years. Proposed Project will be served from the Middle Fork water supply.

^(d) Assumes 25% supply reduction in Single Dry Years and in Multi-Dry Years.

^(e) Assumes 50% supply reduction in Single Dry Years and Multi-Dry Years due to lack of flow in streams.

6.4.2 Central Valley Project

PCWA has a CVP water contract with the USBR for delivery of no more than 35,000 af/yr. This long-term renewal contract provides an indication of the reliability of the CVP water supply by stating that, for modeling purposes, the average quantity of water made available to PCWA in the most recent five years was 32,000 af/yr. According to the agreement, the CVP water may be used for municipal and industrial purposes. PCWA's point of diversion for CVP water is Folsom Dam, but it has taken minimal amounts of CVP water to date.

The current CVP contract expired in 2011. A Long Term Renewal Contract is awaiting formal approval by the USBR.

6.4.3 Water Forum Agreement

PCWA approved the *Memorandum of Understanding for the Water Forum Agreement* in the year 2000. The WFA has two stated objectives: (1) to provide a reliable and safe water supply for the region's economic health and planned development to the year 2030, and (2) to preserve the fish, wildlife, recreational, and aesthetic values of the lower American River. Under the WFA, PCWA has agreed to limit its annual diversions of MFP water to 35,500 af in Normal Years. In normal years, PCWA will also divert and use 35,000 af from the Sacramento and/or Feather Rivers if exchanges of equal amounts can be made with others. If PCWA is unable to develop a diversion from the Sacramento and/or Feather Rivers, the Water Forum members will negotiate with PCWA to find a mutually agreeable solution.

In the drier and driest years, when Folsom Reservoir inflow is less than 950,000 af, PCWA agreed to divert and use 35,500 af from the American River. The WFA commits PCWA to additional releases of water from MFP reservoirs to mitigate for additional diversions at its Auburn and Folsom Lake points of diversion above WFA baseline volumes.⁷ The releases are made on a sliding scale basis and begin when projected March through November Folsom inflow is 950,000 af or less, and PCWA diversions increase above the baseline volumes. The releases are only made if there is a water transfer agreement in place with an entity that can divert the water for beneficial use below the confluence of the American and Sacramento Rivers. The maximum additional volume potentially released for Water Forum purposes in the driest year on record (1977) at PCWA's maximum use of MFP water is 47,000 af. PCWA will also divert and use 35,000 af from the Sacramento and/or Feather River if it can secure exchanges as described under normal conditions.

6.4.4 Groundwater

PCWA does not plan on using groundwater to provide water to the City of Roseville and is not proposing to use groundwater to serve the Proposed Project.

⁷ PCWA's baseline volume is 8,500 af/yr. The City of Roseville's baseline volume is 19,800 af/yr.

PCWA has historically produced a limited quantity of groundwater. Historical pumping by PCWA in western Placer County has been limited to pumping for Bianchi Estates (Zone 2) and for the Sunset Industrial Area. Pumping for Bianchi Estates ceased in 2004, and since that time, PCWA has served Bianchi Estates with surface water under PCWA's PG&E and MFP water supplies. PCWA maintains the Sunset Industrial well, though it has not been used for several years due to customer concerns regarding water quality related to industrial use.

PCWA has historically produced groundwater for Zone 4 in eastern Placer County, and continues to do so. Zone 4 is physically separate from the water service area that includes the City of Roseville, the Proposed Project, and the Sunset Industrial Area.

6.4.5 Additional Planned Future Potable Water Supplies

PCWA is pursuing a transfer of a portion of its American River supplies to the Sacramento River, such that it would be able to divert water from the Sacramento River for service in PCWA Zone 1. While PCWA projects that it is possible that water might be available from a Sacramento River diversion by 2020, this potential future water supply source is not included in PCWA's projections of available water supply.

6.5 PCWA Existing and Projected Non-Potable Water Supplies

As documented in its 2010 UWMP, PCWA is projecting a recycled water supply and demand of 9,089 af/yr in its retail service area by 2040, provided by the cities of Lincoln and Roseville. However, recycled water from PCWA is not projected to be a water supply source for the Proposed Project and is therefore not discussed in detail in this WSA.

7.0 DETERMINATION OF WATER SUPPLY SUFFICIENCY BASED ON THE REQUIREMENTS OF SB 610

Water Code section 10910 states:

10910(c)(4) If the city or county is required to comply with this part pursuant to subdivision (b), the water supply assessment for the project shall include a discussion with regard to whether the total projected water supplies, determined to be available by the city or county for the project during normal, single dry, and multiple dry water years during a 20-year projection, will meet the projected water demand associated with the proposed project, in addition to existing and planned future uses, including agricultural and manufacturing uses.

To address this requirement, the following topics are covered in this section:

- Potable Water Supply and Demand
- Recycled Water Supply and Demand

7.1 Potable Water Supply and Demand

The comparison of projected potable water demand and supplies for the 20-year planning period, and at Buildout, is shown in Table 7-1. Depending on the water supply available from USBR, and in accordance with the WFA, potential deficits in water supply will occur in Single Dry Years beginning in 2025 and Multi-Dry Years at Buildout. To alleviate the potential deficits, the City will require short term demand reductions (water conservation) and/or pump groundwater. The City would prefer to not require water conservation greater than 20 percent of Normal Year demands. However, as evident by actions taken by the State Water Resources Control Board in 2015, the City was mandated a 28 percent conservation target during the 2015 water year. To date the City has exceeded this water conservation target.

One potential strategy to alleviate the potential water deficits shown in Table 7-1 is indicated in Tables 7-2 and 7-3. In Table 7-2, water demand reductions of up to 20 percent of Normal Year demands are shown. The remaining deficit would be alleviated by groundwater pumping, as shown in Table 7-3. The City will determine the needed balance between water conservation and groundwater pumping on a case-by-case basis.

**Table 7-1. Summary of Potable Water Demand Versus Supply During Hydrologic Normal,
Single Dry, and Multiple Dry Years for City of Roseville, af/yr^(a)**

Hydrologic Condition		Supply and Demand Comparison					
		2015	2020	2025	2030	2035	Buildout
Normal Year							
	Available Surface Water Supply	58,900	58,900	58,900	60,400	60,400	60,400
	Potable Water Demand without Proposed Project	40,129	37,839	40,204	42,746	45,666	58,590
	Proposed Project Demand	0	1,067	1,067	1,067	1,067	1,067
	Potential Surplus (Deficit)	18,771	19,994	17,629	16,587	13,667	743
Single Dry Year							
	Available Surface Water Supply	38,000	38,000	38,000	39,500	39,500	39,500
	Potable Water Demand without Proposed Project	40,129	37,839	40,204	42,746	45,666	58,590
	Proposed Project Demand	0	1,067	1,067	1,067	1,067	1,067
	Potential Surplus (Deficit)	(2,129)	(906)	(3,271)	(4,313)	(7,233)	(20,157)
Multiple Dry Years							
Multiple-Dry Year First Year Supply	Available Surface Water Supply	51,394	51,394	51,394	52,894	52,894	52,894
	Potable Water Demand without Proposed Project	40,129	37,839	40,204	42,746	45,666	58,590
	Proposed Project Demand	0	1,067	1,067	1,067	1,067	1,067
	Potential Surplus (Deficit)	11,265	12,488	10,123	9,081	6,161	(6,763)
Multiple-Dry Year Second Year Supply	Available Surface Water Supply	54,000	54,000	54,000	55,500	55,500	55,500
	Potable Water Demand without Proposed Project	40,129	37,839	40,204	42,746	45,666	58,590
	Proposed Project Demand	0	1,067	1,067	1,067	1,067	1,067
	Potential Surplus (Deficit)	13,871	15,094	12,729	11,687	8,767	(4,157)
Multiple-Dry Year Third Year Supply	Available Surface Water Supply	45,426	45,426	45,426	46,926	46,926	46,926
	Potable Water Demand without Proposed Project	40,129	37,839	40,204	42,746	45,666	58,590
	Proposed Project Demand	0	1,067	1,067	1,067	1,067	1,067
	Potential Surplus (Deficit)	5,297	6,520	4,155	3,113	193	(12,731)

^(a) Demands from Table 5-2 and 5-5, Supply from Table 6-4. Note that the demand value for 2015 is based on a projected value, assuming no demand reductions. In 2015, the City actually entered into Stage 3 demand reductions and reduced its total water use by 33 percent compared to 2013 water use. Total actual water use for 2015 was 22,991 af/yr.

**Table 7-2. Potential Water Conservation, af/yr
(up to 20 percent of Normal Year Demand)**

Hydrologic Condition	2020	2025	2030	2035	Buildout
Normal	-	-	-	-	-
Single Dry	900	3,271	4,313	7,233	11,931
Multi-Dry (Year 1)	-	-	-	-	6,763
Multi-Dry (Year 2)	-	-	-	-	4,157
Multi-Dry (Year 3)	-	-	-	-	11,931

Table 7-3. Potential Groundwater Use to Relieve Remaining Deficit, af/yr

Hydrologic Condition	2020	2025	2030	2035	Buildout
Normal	-	-	-	-	-
Single Dry	-	-	-	-	8,225
Multi-Dry (Year 1)	-	-	-	-	-
Multi-Dry (Year 2)	-	-	-	-	-
Multi-Dry (Year 3)	-	-	-	-	799

Pursuant to Water Code section 10910(c)(4), and based on the technical analyses described in this Water Supply Assessment, the City finds that the total projected water supplies determined to be available for the Proposed Project during Normal, Single Dry, and Multiple Dry water years during a 20-year projection will meet the projected water demand associated with the Proposed Project, in addition to existing and planned future uses, including agricultural and manufacturing uses.

The City is intending to receive up to 1,500 af/yr of additional PCWA MFP treated water supply to serve the Proposed Project. As documented in PCWA's 2010 UWMP, this water supply source is expected to have full (100 percent) reliability in all hydrologic conditions.

7.2 Recycled Water Supply and Demand

As described in this WSA and in the Proposed Project's Recycled Water Master Plan, approximately 222 af/yr of recycled water supplies will be used to meet the landscape irrigation demands at buildout of the Proposed Project (see Net Recycled Water Demand column in Table 2-4). Although the Proposed Project was not included in the City's 2010 UWMP, the projected average dry weather wastewater flow for the Proposed Project of 51.8 af/month is greater than the Proposed Project's projected maximum month irrigation demand of 47.7 af/month for July at buildout. Therefore, there is sufficient recycled water supply to serve the projected recycled water demand of the Proposed Project, assuming the irrigation water conservation practices described in the Proposed Project's Recycled Water Master Plan and Water Conservation Plan are implemented.

8.0 WATER SUPPLY ASSESSMENT APPROVAL PROCESS

Water Code sections 10910 and 10911 state:

10910 (g)(1) Subject to paragraph (2), the governing body of each public water system shall submit the assessment to the city or county not later than 90 days from the date on which the request was received. The governing body of each public water system, or the city or county if either is required to comply with this act pursuant to subdivision (b), shall approve the assessment prepared pursuant to this section at a regular or special meeting.

10911 (b) The city or county shall include the water supply assessment provided pursuant to Section 10910, and any information provided pursuant to subdivision (a), in any environmental document prepared for the project pursuant to Division 13 (commencing with Section 21000) of the Public Resources Code.

The Roseville City Council must approve this WSA at a regular or special meeting. Furthermore, the City must include this WSA in the Draft EIR being prepared for the Project.

The purpose of SB 610 is to document the plan to provide potable water to proposed developments. As described above, the Project Proponents have developed a plan to acquire additional water supply from PCWA to serve the Proposed Project.

SB 221 applies to residential subdivisions of over 500 dwelling units and requires that the water supplier (the City) provide a written verification that the water supply for the project is sufficient, prior to issuance of the final permits. Because the Project includes 2,827 residential dwelling units, it is subject to the requirements of SB 221 (Government Code section 66473.7).

9.0 ADDITIONAL MATERIAL TO SUPPORT CEQA ANALYSES

SB 610 requires an analysis of water supply impacts of the proposed Amoruso Ranch development for a range of hydrologic conditions. The City, in preparing EIRs for proposed projects, expands the range of hydrologic conditions to include “what if” scenarios to determine water conservation requirements and potential groundwater use during severe dry periods. In addition, the City has conducted analyses of the potential for USBR supply reductions under the USBR CVP Operations Criteria and Plan (OCAP).

The following topics are addressed in this section:

- Surface Water Delivery Scenarios
- Demand Reduction Scenarios
- Balancing Water Supplies and Demands
- Groundwater Supplies

9.1 Surface Water Delivery Scenarios

As discussed in section 6.1.1 above, under the WFA, the availability of untreated surface water to the City equals 58,900 af/yr in normal years, and ranges from 39,800 to 54,900 af/yr in drier and driest years. In addition, the proposed project would bring up to 1,500 af/yr of additional treated PCWA water, in all hydrologic year types, that is not currently available to the City.

In addition to WFA limitations, the City’s CVP supplies with USBR are subject to shortage provisions. In severe droughts the shortage provisions could result in City supplies falling below the lowest WFA limitations. If USBR calls for shortages in excess of 73 percent of the contracted USBR total of 32,000 af/yr, then available untreated surface water availability would fall below the WFA threshold of 38,900 af/yr. In 2015, USBR CVP allocation to the City was 25 percent of historical use, or nearly 25 percent of the City’s full contracted amount. For this analysis, five different delivery scenarios from USBR CVP supplies are considered: 100 percent, 75 percent, 50 percent, 25 percent, and zero percent. The total amount of surface water available under each of these scenarios for both existing and buildout conditions is summarized in Table 9-1.

Table 9-1. Available Water Supplies, af/yr, Existing and Buildout Conditions						
Source	Time Frame	Percent Availability of USBR CVP Supply				
		100%	75%	50%	25%	0%
USBR Raw Water	Existing and Buildout	32,000	24,000	16,000	8,000	0
PCWA Raw Water	Existing and Buildout	30,000	30,000	30,000	30,000	30,000
PCWA Treated Water	Buildout Only	1,500	1,500	1,500	1,500	1,500
Total, Existing	Existing	62,000	54,000	46,000	38,000	30,000
Total, Buildout	Buildout	63,500	55,500	47,500	39,500	31,500

9.2 Demand Reduction Scenarios

As discussed in section 5.3 above, demand reduction scenarios from 10 to 50 percent (Stage 1 through Stage 5) are allowed by the City's Municipal Code, depending on the severity of drought conditions. The relationship between water demands and available surface water supplies is summarized in Table 9-2 for existing conditions and in Table 9-3 for buildout conditions. It should be noted that the indicated combinations of demand reductions and supply availability become increasingly improbable toward the lower left and upper right corners of the tables. For example, it is highly unlikely that a 50 percent demand reduction would ever be imposed in a normal water year, or that no demand reduction would be imposed in a year when USBR CVP deliveries were reduced to zero.

Table 9-2. Water Supplies versus Demands, Existing Demand Conditions						
Demand Condition	Potable Water Demand, af/yr	Supply Surplus, af/yr				
		100% of CVP	75% of CVP	50% of CVP	25% of CVP	0% of CVP
Normal	40,129 ^(a)	21,871	13,871	5,871	-2,129	-10,129
Stage 1: 10% Reduction	36,116	25,884	17,884	9,884	1,884	-6,116
Stage 2: 20% Reduction	32,103	29,897	21,897	13,897	5,897	-2,103
Stage 3: 30% Reduction	28,090	33,910	25,910	17,910	9,910	1,910
Stage 4: 40% Reduction	24,077	37,923	29,923	21,923	13,923	5,923
Stage 5: 50% Reduction	20,065	41,936	33,936	25,936	17,936	9,936
Total Available Supply	--	62,000	54,000	46,000	38,000	30,000
^(a) Note that the demand value for Existing Conditions is based on a projected value, assuming no demand reductions. In 2015, the City actually entered into Stage 3 demand reductions and reduced its total water use by 33 percent compared to 2013 water use. Total actual water use for 2015 was 22,991 af/yr.						

Table 9-3. Water Supplies versus Demands, Buildout Demand Conditions (with Project)						
Demand Condition	Potable Water Demand, af/yr	Supply Surplus, af/yr				
		100% of CVP	75% of CVP	50% of CVP	25% of CVP	0% of CVP
Normal	59,657	3,843	-4,157-	-12,157-	-20,157-	-28,157-
Stage 1: 10% Reduction	53,691	9,809	1,809	-6,191-	-14,191-	-22,191-
Stage 2: 20% Reduction	47,725	15,775	7,775	-225-	-8,225-	-16,225-
Stage 3: 30% Reduction	41,760	21,740	13,740	5,740	-2,260-	-10,260-
Stage 4: 40% Reduction	35,794	27,706	19,706	11,706	3,706	-4,294-
Stage 5: 50% Reduction	29,828	33,672	25,672	17,672	9,672	1,672
Total Available Supply	--	63,500	55,500	47,500	39,500	31,500

9.3 Balancing Water Supplies and Demands

The balancing of water supplies and demands in any given year can be achieved through some combination of surface water usage, recycled water usage, groundwater usage, and demand reduction. The specific untreated surface water supply delivery scenarios under consideration in this analysis include the following:

- Normal: Conditions in a normal water year
- WFA-Max: Dry year conditions with maximum WFA deliveries (54,900 af/yr)
- WFA-Mid: Dry year conditions with midpoint WFA deliveries (46,900 af/yr)
- WFA-Min: Dry year conditions with minimum WFA deliveries (38,900 af/yr)
- 2015 Delivery: Dry year conditions with 2015 25% CVP allocation (38,000 af/yr)
- Zero USBR: Dry year conditions with zero CVP allocation (30,000 af/yr)

The buildout potable water demands shown in Table 9-3 are depicted graphically in Figure 9-1, along with the maximum anticipated recycled water usage, with the remainder being met through demand reduction. The results in Figure 9-1 are based on the assumption of zero groundwater usage.

With the addition of the proposed project up to 1,500 af/yr of treated surface water would become available to the City, and an estimated recycled water volume 4,713 af/yr would also be available to meet city-wide water demands. Assuming both of these sources are put to full use, the demand reductions needed (in the absence of groundwater usage) are depicted in Figure 9-2. As indicated in the figure, Stage 1 demand reductions would be adequate for the WFA-Max scenario, and Stage 2 reductions would be adequate for the WFA-Mid scenario. For the more severe delivery curtailment scenarios (WFA-Min, 2015 Delivery, and Zero USBR), demand reductions of Stage 4 or 5 would be needed in the absence of groundwater supplies.

It should be noted, however, that the implementation of demand reductions is a highly imprecise proposition. Stage 2 reductions should be readily achievable in severe drought conditions, but beyond that, it is difficult to predict the effectiveness of demand reduction measures. If it is assumed that demand reduction measures beyond Stage 2 could not be guaranteed, then it would be necessary to use groundwater to make up any demand deficits. Accordingly, Figure 9-3 shows the amount of groundwater that would be needed if demand reductions were implemented preferentially to groundwater usage, but were limited to Stage 2 demand reductions. As indicated in the figure, groundwater volumes in excess of 16,000 af/yr would be needed to meet demands in a zero USBR delivery year with Stage 2 demand reductions in force.

(THIS PAGE LEFT BLANK INTENTIONALLY)

9.4 Groundwater Supplies

As show on Figure 9-3, groundwater required to meet build out water demands range from 0 af/yr to as much as 16,225 af/yr if USBR were to issue a complete shortage of the City's CVP supplies. It is important to note that Figure 9-3 represents single-event scenarios. In support of the CEQA analysis this section further evaluates the number of years in which groundwater could be needed based upon historic regional hydrologic records.

9.4.1 Groundwater Needs under USBR CVP OCAP and Life of the Proposed Project

In its 2015 Hewlett Packard/Campus Oaks Rezone & Master Plan Project Water Supply Assessment (HPCO WSA) (see Appendix F), the City analyzed USBR supply reliability under the USBR CVP OCAP. The analyses indicate that the USBR water supply would be less reliable than provided for in the WFA (expanding the numbers of years when some cut-back in water supply from USBR would occur), although minimum delivery under OCAP is expected to be the same as the minimum WFA supply of 38,900 af/yr.

The HPCO WSA also provides a detailed analysis of the number of years in which groundwater could be needed based upon historic hydrologic records for the American River. The analysis indicates that at buildout of the City groundwater would be required under the CVP OCAP scenario in 10 out of 100 years in volumes ranging from 0 af/yr in a single year to as much as 16,805 af/yr in a single year. The analysis also shows that over a 100-year period, the life of the project, a total of 51,227 af of groundwater would be needed. Because a new water supply, available in all hydrologic year types, is being added to the city's water supply portfolio with this project (1,500 af/yr of PCWA treated water supply), the volume of groundwater needed over the life of the Proposed Project is expected to be nearly the same or slightly less than documented within the HPCO WSA.

RESOLUTION NO. 16-271

CERTIFYING A FINAL ENVIRONMENTAL IMPACT REPORT RELATING TO THE
AMORUSO RANCH SPECIFIC PLAN, ADOPTING FINDINGS OF FACT AND
STATEMENT OF OVERRIDING CONSIDERATIONS, ADOPTING MITIGATION
MEASURES, ADOPTING A MITIGATION MONITORING PROGRAM, AND DIRECTING
STAFF TO APPLY TO THE PLACER COUNTY LOCAL AGENCY FORMATION
COMMISSION

WHEREAS, the City of Roseville (City) proposes to annex and provide for the development of 694[±] acres of property (a portion of which is designated Urban Reserve) known as the Amoruso Ranch Specific Plan (Project); and

WHEREAS, the City determined that an environmental impact report (EIR) should be prepared for the Project pursuant to the California Environmental Quality Act (CEQA), Public Resources Code sections 21000 *et seq.*; and

WHEREAS, in October 2013, the City issued a Notice of Preparation (“NOP”) of the EIR; and

WHEREAS, the NOP was circulated for comment by responsible and trustee agencies and the public for a total of 30 days, from October 30, 2013 through December 2, 2013, during which time the City held a public scoping meeting on November 18, 2013; and

WHEREAS, on March 1, 2016, the Draft EIR for the Project (State Clearinghouse No. 2013102057), consisting of Volumes 1 through 4, was distributed to the public for review and comment for a 46-day period that ended April 15, 2016; and

WHEREAS, during the public review and comment period, the Draft EIR was reviewed by the Planning Commission at public hearings on March 10, 2016 and April 14, 2016; and

WHEREAS, written and oral comments on the Draft EIR were received, and responses to those comments have been prepared and are presented in Volume 4 of the Final EIR, which was issued on May 24, 2016 and in staff reports; and

WHEREAS, the Final EIR, consisting of Volumes 1 through 4 and all documents incorporated therein, has been presented to the City Council and the City Council has reviewed and considered the information in the Final EIR; and

WHEREAS, a Water Supply Assessment for the Project dated May 2016 (Appendix E to the Final EIR) was prepared by the City of Roseville and determined that the City of Roseville will secure sufficient water for the Project and the public water system will have sufficient water supplies to meet projected water demands for the Project as well as provide reliability to existing service areas.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Roseville, having independently considered the environmental effects of the Project as shown in the Final EIR, as follows:

1. It is hereby certified that the City Council has reviewed the Final EIR prepared for the Project, all staff reports pertaining to the Project, and all other pertinent documents relating to the preparation of the Final EIR, including the Draft EIR and all comments received thereon, and finds that the Final EIR is adequate, complete and has been prepared in compliance with CEQA and any related laws.

2. It is hereby certified that the Final EIR reflects the independent judgment and analysis of the City Council of the City of Roseville and that the City Council reviewed and considered the information contained in the Final EIR, on file with the City Clerk as “Exhibit B-1” prior to approving the Project.

3. The City Council hereby adopts the CEQA Findings of Fact and Statement of Overriding Considerations of the City Council of the City of Roseville for the Amoruso Ranch Specific Plan (“Findings”), on file with the City Clerk as “Exhibit B-2,” pursuant to Public Resources Code section 21081.

4. The City Council hereby adopts and incorporates into the Project all of the mitigation measures for the Project that are within the responsibility and jurisdiction of the City that are identified in the Findings.

5. The City Council hereby adopts a Mitigation Monitoring Program for the Amoruso Ranch Specific Plan, on file with the City Clerk as “Exhibit B-3.”

6. The City Council specifies that the documents and other material that constitute the record of the proceedings on which the City Council’s decision is based shall be located in the offices of the Planning Division and in the custody of the Development Services Director.

7. Direction to Staff:

A. The City Clerk is directed to file a Notice of Determination, together with this Resolution and its exhibits, if any, in the Office of the County Clerk of Placer County and, in accordance with Public Resources Code Section 21152, shall cause such Notice to be posted in the County Clerk’s Office, all within five working days after City Council action to approve the Project.

B. The City Manager is directed to apply to the Placer Local Agency Formation Commission (LAFCo) to annex the Project site (including the Urban Reserve area as defined therein) to the City, as described in the staff report and consistent with the Final EIR, and is authorized to execute any and all documents necessary to complete the annexation.

PASSED AND ADOPTED by the Council of the City of Roseville this _____ day of _____, 20____, by the following vote on roll call:

CEQA FINDINGS OF FACT

and

**STATEMENT OF OVERRIDING
CONSIDERATIONS**

**OF THE CITY COUNCIL OF
THE CITY OF ROSEVILLE**

for the

AMORUSO RANCH SPECIFIC PLAN

June 15, 2016

1. INTRODUCTION

This document constitutes the findings of fact (Findings) and associated statement of overriding considerations (SOC) for the Amoruso Ranch Specific Plan (“ARSP” or “Proposed Project”). The Findings have been prepared pursuant to the requirements of Public Resources Code (PRC) section 21081(a) and State California Environmental Quality Act (CEQA) Guidelines (Guidelines) Section 15091, and the SOC has been prepared pursuant to PRC Section 21081(b) and State CEQA Guidelines Section 15093.

In accordance with CEQA Guidelines Section 15082, the City of Roseville (“City”) circulated a Notice of Preparation (NOP) for the Environmental Impact Report (EIR) through the State Clearinghouse, to the public, local, state, and federal agencies and other known interested parties to solicit written comments concerning the Proposed Project from October 30, 2013 through December 2, 2013.

On March 1, 2016, the City released the Draft Environmental Impact Report (“DEIR”) for public review and comment. The comment period closed on April 15, 2016. The DEIR/DEIS evaluated the potential environmental impacts of the Proposed Project and four alternatives: No Project/No Build Alternative, Reduced Density, Similar Development Footprint Alternative, Compact Development Footprint Alternative, and Minimum Wetland Impact Alternative. A public workshop was held at Roseville City Council Chambers on March 10, 2016 and public hearings to receive public input on the DEIR were held at Roseville City Council Chambers as follows:

March 15, 2016	Transportation Commission
March 17, 2016	Design Committee
March 22, 2016	Public Utilities Commission
April 11, 2016	Parks and Recreation Commission
April 14, 2016	Planning Commission

The public hearings were recorded and archived videos of these meetings (with the exception of the Design Committee meeting) are available. Written comments were received from state, regional and local agencies, and from a few individuals; comments were also received during the public hearing(s). The City considered all of the substantive comments received on the DEIR.

The Final EIR (“FEIR”) was published on May 24, 2016, and consists of the DEIR and associated appendices and the comments, responses to comments, and revisions to the DEIR. On June 15, 2016, the Roseville City Council held a public meeting to consider certification of the EIR and to decide whether or not to approve the Proposed Project or another alternative, at which time the public and interested agencies and organizations were invited to comment on the project.

2. DESCRIPTION OF THE PROJECT

2.1. Proposed Project

Brookfield Residential, the project applicant, is seeking adoption by the City of the proposed ARSP, Sphere of Influence Amendment, Annexation, General Plan Amendment, Rezone (Pre-Zone), and Development Agreements. The proposed ARSP would result in the development of a mix of uses, including 2,827 dwelling units within the project site. Land uses include a total of approximately 134.8 acres set aside permanently for open space; 10.7 acres of paseo open space; 22.1 acres of parks; 17.2 acres of public/quasi-public uses (elementary school, fire station, sewer lift stations, and well site); 337.2 acres of low, medium, and high density residential (LDR, MDR, and HDR, respectively); a 27.3-acre Village District (mixed commercial, office, residential); and 23.9 acres of community commercial. Within the project site, approximately 101 acres would be used for roadway and transportation facilities, including a right-of-way dedication of approximately 49.2 acres for the future Placer Parkway Regional Transportation Improvement project (Placer Parkway) which is not part of the Proposed Project (Not a Part of this Project [NAPOTS]). Placer Parkway, although located within the overall project site, is a separate project anticipated to be further planned by the South Placer Regional Transportation Authority.

The project site consists of four parcels, which are County Assessor's parcel numbers (APNs) 017-020-016-510, 017-020-017-510, 017-010-054-000, and 017-010-010-000. APN 017-010-010-000 is the Wagner Parcel, which is designated as Urban Reserve because it is not a participating property, and no development is proposed on the parcel at this time. The remaining parcels are considered the Development Area.

The EIR evaluates the effects of annexing the Urban Reserve parcel at a programmatic level. For the purpose of this EIR, it is assumed that rural agricultural uses would continue, and that a single residential unit may be established as allowable under the Urban Reserve land use designation of the City's General Plan. If development is proposed in the future, it would require general plan and specific plan amendments, additional environmental review, and applicable approvals/permits.

2.2. Project Location

The Proposed Project, annexation and sphere of influence (SOI) amendment area (project site) consists of approximately 694.4 acres located in unincorporated Placer County, immediately north of the City of Roseville's existing City limits. The project site is directly north of the approved Creekview Specific Plan (CSP) and northeast of the City's Al Johnson Wildlife Area (a.k.a. Reason Farms) in the "Pleasant Grove, CA" United States Geological Survey 7.5 Minute Topographic Quadrangle, Township 11 North (T11N) Range 5 East (R5E), and Sections 11 and 14, Mt. Diablo Baseline and Meridian.

The project site is located approximately 6.5 miles west of Interstate 80 and State Route (SR) 65, approximately 9.8 miles northeast of the City of Sacramento, 8 miles east of SR 99, 5 miles northwest of downtown Roseville, and 4 miles east of the Sutter County Line. The project site is

currently accessed from West Sunset Boulevard, an unincorporated County road that runs west/east along the northern border of the site. Proposed access to the project site would be to/from the south, via an extension of Blue Oak Boulevard west, and Westbrook Boulevard north, through the CSP area. Access would also be provided to/from the north via two roadway connections to West Sunset Boulevard. The future year scenarios include Placer Parkway through the site, and adding two potential connections from Westbrook Boulevard into the Placer Ranch area (to/from the east).

2.3. Project Description

The Proposed Project would include a range of housing types, commercial uses, open space, and recreation opportunities, as well as support services such as roadway improvements, support infrastructure, and utilities. Land uses are described below and shown in Table 2-1 (Table 2-1 of the DEIR).

DISCRETIONARY APPROVALS

Project approval requires the City, as lead agency, as well as certain “responsible agencies” to take discrete planning and regulatory actions to approve the Specific Plan. Described below are the discretionary actions necessary to fully implement the Specific Plan. In addition to certifying the Final EIR, adopting the Mitigation Monitoring and Reporting Plan, and adopting these Findings and the associated Statement of Overriding Considerations (CEQA requirements), the project applicant requested the following entitlements and approvals from the City:

- approval of general plan amendments,
- adoption of the ARSP and Amoruso Ranch Design Guidelines,
- pre-zoning of property to be consistent with the ARSP land uses,
- approval of development agreements between the City, landowner, and the project applicant,
- approval of Community Facilities District and/or other financing mechanisms,
- amendment of the Urban Water Master Plan,
- approval of the Water Supply Assessment,

- amendment of the Capital Improvement Program,
- amendment of the Bicycle Master Plan,
- allocation of 1066 acre-feet per year of City surface water to the ARSP area, and
- condemnation or acquisition of property and right of way for City and public improvements.

Other Project approvals and associated entitlements that must be granted by responsible agencies and federal agencies include or may include the following:

- approval of a permit under Section 404 of the Clean Water Act from the U.S. Army Corps of Engineers, Sacramento District, for discharges of dredged or fill material into waters of the United States,
- expansion of the 2005 Service Area Boundary by the South Placer Wastewater Authority to include the ARSP area,
- approval of a Section 401 Certification from the Regional Water Quality Control Board (“RWQCB”),
- approval of a Municipal Services Report by the Placer County Local Area Formation Commission (“LAFCO”),
- approval by LAFCO of a Sphere of Influence Amendment,
- approval by LAFCO of annexation of the ARSP area to the City and reorganization of the City’s corporate boundaries, consultation pursuant to Section 7 of the federal Endangered Species Act,
- approval of a General Construction permit, including the development of a Stormwater Pollution Prevention Plan, by the State Water Resources Control Board (“SWRCB”),
- approval of a Master Reclamation permit by SWRCB to address recycled water delivery from the Pleasant Grove Wastewater Treatment Plant (“PGWWTP”),

- approval by RWQCB for the modification of the National Pollutant Discharge Elimination System (“NPDES”) permit for the PGWWTP,
- approval of a Streambed Alteration Agreement from the California Department of Fish and Game, and
- a permit to operate from the Placer County Air Pollution Control District (“PCAPCD”)

2.3.1. Land Use Plan

As shown in Figure 2-4 of the DEIR, the proposed ARSP land use plan consists of LDR, MDR, and HDR uses; community commercial uses; public/quasi-public uses; parks and recreation areas; open space; paseos; urban reserve area; and roadways.

Residential Neighborhoods

The Proposed Project provides for construction of approximately 2,827 dwelling units in three density ranges, LDR, MDR, and HDR on 337.2 acres consistent with the residential density ranges in the Roseville General Plan. The proposed densities are as follows:

- **Low Density Residential** – Approximately 248.8 acres of the ARSP are proposed as LDR with a permitted density range of 0.5 to 6.9 dwelling units per acre (du/ac). Table 2-1 assumes a density of 5 du/ac for a total of 1,302 dwelling units.
- **Medium Density Residential** – Approximately 50.3 acres of the ARSP are proposed as MDR with a permitted density range of 7.0 to 12.9 du/ac. Table 2-1 assumes a density of 11 du/ac for a total of 542 dwelling units.
- **High Density Residential** – Approximately 38.1 acres of the ARSP are proposed as HDR with a permitted density range of 13.0 to 30 du/ac. Table 2-1 assumes a density of 22.9 dwelling units per acre for a total of 873 dwelling units.

Table 2-1: Land Use Summary

General Plan Land Use Designation / Description		Applied Zoning Districts ¹	Acres	Units

¹ The zoning districts are defined in the City's Zoning Ordinance that can be viewed at the Civic Center Permit Center or online at www.roseville.ca.us .				

Commercial

The Proposed Project includes 51.2 acres of land designated for commercial use, under the commercial land use classifications of Community Commercial – Village District and Community Commercial.

- **Community Commercial – Village District** – The ARSP includes one centrally located 27.3-acre site with a proposed general plan designation of Community Commercial – Village District (CC-VC) and zoning district of Commercial Mixed Use – Special Area overlay (CMU-SA). The area is proposed as the “Village District”, and is intended to

provide a mix and density of land uses common to an urban setting or traditional downtown. The CC-VC land use designation is intended to develop mixed-use centers that allow for a combination of commercial, office, and residential uses. These sites are intended to promote a variety of commercial use types and the flexible siting of other uses that are typically considered to be compatible with commercial development. The Proposed Project has a residential allocation of 109 residential uses (i.e. lofts, condominiums, etc.).

- **Community Commercial** – The ARSP includes one large commercial site on the north end of the project site totaling approximately 23.9 acres. This land use category is intended to provide a broad range of goods, services, and employment opportunities to an expanded service area. Commercial buildings would likely range from 50,000 to 250,000 square feet. The Community Commercial parcel is located adjacent to a possible future interchange along Placer Parkway that would support regional commercial and business park uses.

Parks and Open Space

A combination of active and passive parkland would be provided within two categories described below.

- **Neighborhood Parks** – Seven sites totaling 22.1 acres are designated for neighborhood parks ranging in size from 1.28 to 10.1 acres. Neighborhood are planned in locations adjacent to open space, where possible, and to serve residential neighborhoods. Park sites would include passive and active recreation facilities and would be linked to a system of paseos, providing a comprehensive network of pedestrian and bikeway connections to the ASRP’s parks and open space system. Proposed parks include a 3.04-acre park in the Village District (AR-66), five distinct neighborhood parks (AR-60, -61, -63, -64, and -67), and a 10-acre park in the northern portion of the site (AR-62).
- **Open Space** – Approximately 134.8 acres of the ARSP are proposed as open space. The largest area located along the southern boundary of the project site that captures the University Creek corridor, a tributary to Pleasant Grove Creek, located to the south would be maintained as an open space preserve in perpetuity. Within the open space area, approximately 98 acres would be designated as a permanent on-site open space preserve (AR92, AR97, and AR95). The open space areas are intended to serve a variety of functions including providing floodwater conveyance, stormwater treatment, aesthetic amenities, recreational facilities (trails) and habitat preservation (seasonal wetlands, vernal pool complexes). Open space areas are proposed to abut other regional open space areas, including portions of the CSP’s open space preserve to the south, portions of the West Roseville Specific Plan’s open space preserve to the southeast, and the City’s Al Johnson Wildlife Area to the west.

Public/Quasi Public

The ARSP would include 17.2 acres of Public/Quasi Public (P/QP). The P/QP land use designation accommodates a variety of public-serving uses and facilities. These sites would provide for an elementary school, fire station, and areas for specific infrastructure related items such as a groundwater well and any other facility required of the ARSP. These areas are discussed in more detail below.

Urban Reserve

The 20-acre Wagner parcel located in the south-central portion of the Proposed Project site would be designated Urban Reserve. The Urban Reserve land use designation is applied to lands that may receive urban land use approvals at some time in the future, but are currently constrained by growth management policies or other limitations. Allowable uses include agriculture, open space, passive recreation, resource protection, and a caretaker's residence.

Masonry Walls

Masonry walls will be constructed within the project site to provide security, screening, privacy, and/or sound attenuation where appropriate. At a minimum, masonry walls will be located along the project boundary on West Sunset Boulevard, along the property boundary of residential uses adjacent to Placer Parkway, and the eastern edge of the property boundary adjacent to the Placer Ranch area within the County.

2.3.2. Circulation

Roadways

As shown in Exhibit 2-7 of the DEIR, the Proposed Project includes the development of transportation infrastructure improvements. Access and circulation within the ARSP would be provided through construction of the following primary roadways:

- Westbrook Boulevard is the proposed main arterial roadway serving the site from the south extending northward from its future terminus within the CSP. As part of the Proposed Project, four of the planned six lanes would be constructed, including three signalized intersections, a landscaped median separating northbound and southbound travel lanes and a striped bike lane on both sides of Westbrook Boulevard.
- Road B and Road D are proposed minor four-lane arterial roadways which will consist of two travel lanes in each direction, on-street Class 2 bike lanes, and a landscaped median that allows for protected left turn lanes.
- Road A is a proposed modified collector that provides for one travel lane and on-street striped bike lanes in each direction, separated by a striped center turn lane along with a landscaped parkway and sidewalk or pedestrian path on each side.

- The ARSP provides several types of local roadways depending on the location and the desired interface between land uses and the roadway system. The typical standard for a local street would include two travel lanes with space for on-street parallel parking and a detached sidewalk.
- A total of six new signals are anticipated within the project site located at the following intersections: Westbrook Boulevard/Road A, Westbrook Boulevard/Road B, Westbrook Boulevard Road D, Westbrook Boulevard/West Sunset Boulevard, Road B/Road A, and Road D/Road A.

Pedestrian and Bikeway Facilities

As shown in Figure 2-12 of the DEIR, a system of pedestrian and bikeway paths is proposed throughout the ARSP. The pedestrian and bikeway network includes a combination of Class 1 bike trails, Class 1A sidewalks, Class 2 bike lanes, and Class 3 bike routes.

All streets within Amoruso Ranch will have sidewalks on both sides, or a sidewalk on one side and a multipurpose trail on the other. Sidewalks within residential neighborhoods will be predominantly five feet wide and separated from the street by a landscaped parkway strip.

As shown in Figure 2-5 of the DEIR, approximately two miles of open space paseos are proposed to connect various destinations, including the Village District, school, and park sites. Paseos will be ten-foot wide paved pathways within the landscaped corridors.

Transit

Bus Rapid Transit (BRT) facilities would be included along Westbrook Boulevard within the ARSP to accommodate a proposed route that may extend from Sacramento Regional Transit's Light Rail Station at Watt Avenue/I-80 north along Watt Avenue through the Sierra Vista Specific Plan (SVSP) and CSP to the ARSP. Bus turnouts and shelters, which can be utilized as BRT transit stops, shall be constructed in accordance with City Improvement Standards. A total of 25 parking spaces within the commercial uses of Parcel AR-53 will be designated for park and ride users. Proposed transit facility locations are identified on Figure 2-13 of the DEIR.

2.3.3. Public Facilities and Services

The ARSP would include public facilities and services required to serve the project site in accordance with the City's General Plan. The on-site utility infrastructure would be constructed and installed in phases to coincide with development approvals, and would be designed to accommodate buildout of the ARSP. Easements and dedications of improvements would be provided consistent with the ARSP, the project Development Agreements, and other applicable standards and requirements of the City.

Water Service and Potable Water

Once annexed, the City would be responsible for the acquisition, development, treatment, transmission, and delivery of potable and irrigation water supplies to the ARSP. As part of the project, a new source and supply of surface water would be acquired from the Placer County Water Agency (PCWA), through its Ophir Water Treatment facility. Onsite components would consist of distribution pipe networks and a groundwater well to meet demands in drier conditions. All water improvements will be constructed to City standards using a phased approach. Two existing wells will be decommissioned as part of the Proposed Project.

The ARSP would include construction of one on-site groundwater well designed with aquifer storage and recovery (ASR) capabilities to augment city water supplies during emergency situations and for back up water supplies. The ARSP would connect to the City's existing water infrastructure through a single point connection extending from the CSP Area along the extension of Westbrook Boulevard and making allowances for future connections to provide looping within the system. The Proposed Project includes utility infrastructure required to maintain an acceptable level of service to the project site.

Wastewater

The City provides regional wastewater treatment services to areas within the City's wastewater service area boundaries. Wastewater flows from the ARSP will be directed to the PGWWTP through the southern portion of the site, where it will connect with a transmission line to be provided by the CSP. Infrastructure within the CSP Area was planned and sized to accommodate flow from the ARSP. A small sewer lift station facility is required to pump wastewater under the proposed Placer Parkway alignment from the northwest corner of the project site. The lift station would be a "typical" neighborhood lift station designed with submersible pumps in a manhole-type wet well. The remainder of the Proposed Project would be designed to flow by gravity to a proposed central lift station located along the southern boundary of the project site (P/QP parcel AR-57). The existing sewage disposal system will be located, pumped, and properly abandoned as part of the demolition of the existing ranch-house.

Recycled Water

Recycled water use within the project site would be limited to irrigation demands of HDR and all non-residential land uses within the exception of the small area north of Placer Parkway. The City would provide the ARSP with recycled water from the PGWWTP. As shown in Figure 2-16 of the DEIR, a looped backbone system of dedicated non-potable water lines ranging in size from 6 inches to 12 inches would be constructed running parallel to the collector and arterial roadway system, south of the future Placer Parkway. Recycled water pipelines heading to the east from Westbrook Boulevard are located within Roads B and D. The City's existing tank and pumping facilities are slated for expansion to meet the needs of the region, including ARSP, CSP, and SVSP Areas.

Solid Waste

The City would provide solid waste services to the ARSP. A solid waste recycling area is planned within the ARSP on parcel AR-55, which is a larger utility site that also includes a municipal well. The recycling area and well will be encompassed by a masonry wall. This site will provide residents with a location to drop off-load recyclable materials. Vehicular access to the site is at the intersection of Road A and Road B, east of Westbrook Boulevard.

Electrical Service

The project site currently is within the service area of Pacific Gas & Electric (PG&E). If it is annexed to the City, Roseville Electric would provide electric service to the project site. Proposed electrical backbone facilities are shown in Figure 2-17 of the DEIR. Roseville Electric has no existing distribution facilities immediately adjacent to the site. The ARSP would be served from the Creekview electrical substation planned to be constructed within the CSP Area. Underground electrical distribution will be extended to the project site through a 12 kV system to individual parcels in conjunction with roadway improvements or as phasing requirements dictate. Street lighting, signal power and other ancillary power facilities will be provided along all public street frontages as part of the overall roadway frontage improvements.

Natural Gas

PG&E would provide natural gas upon request and in accordance with the rules and tariffs of the California Public Utilities Commission. PG&E's long-range plans provide for availability of gas service to accommodate increased demand. Service would be provided to the project site from existing and planned infrastructure adjacent to the project site. Delivery of gas service to individual projects in the ARSP will be reviewed by PG&E at the time of proposal.

Communications

The project site is within the service areas of AT&T, Comcast, and Wave Broadband. Together, these providers offer both voice and data communication services. Distribution lines to individual parcels would be extended from existing infrastructure adjacent to the project site in accordance with the phasing approach for dry utilities. The appropriate providers would deliver telephone, cable television, and high-speed data line services to individual projects in the ARSP.

Street Lighting

Street lighting would be provided along all public roadways in the ARSP as part of the roadway frontage improvements at intervals in accordance with City standards. All electric and street light facilities would be constructed to the City's standards.

Police and Fire Protection

The Roseville Police Department would serve the project site. The Roseville Police Department provides all operations and patrols out of its central station on Junction Boulevard, approximately seven miles from the southern boundary of the project site.

The Roseville Fire Department would provide fire protection, fire suppression, emergency medical, and hazardous materials management services to the ARSP. As shown on Figure 2-18 of the DEIR, a three-acre fire station site is proposed in the southeast portion of the project site. This station will provide first response within the project site. Timing of construction and staffing of the fire station will be consistent with the Fire Department Standards of Response Coverage Study. Stations located outside the project site will provide interim and secondary response.

Schools

The Proposed Project includes one 9.6-acre school site (AR-50) to accommodate the future demand for new elementary school that would be generated by residential development in this area. The location of the elementary school site can be seen on Figure 2-18 of the DEIR. It is anticipated the school will be a two-story, 800- student urban school that supports the community character of an urban village. Facility planning and the sequencing of development of the school would be determined by the Roseville City School District. Middle school and high school students will attend existing schools outside of the project site.

Libraries

The public library at Mahany Park, operated by the City provides services to the western portion of the City including the ARSP. No additional library facilities are planned as a part of the ARSP.

2.3.4. Stormwater

The project site is wholly contained within the Pleasant Grove Creek watershed. University Creek, a tributary to Pleasant Grove Creek, meanders westerly near the southern border of the ARSP, crossing both the southeast and southwest corners of the ARSP before and after passing through the proposed CSP Area. An area around and including this tributary is covered by Zone A on the currently effective Flood Insurance Rate Map panel 0601C0400F dated June 8, 1998.

As a result of past farming practices that created leveled fields and drainage diversions, the existing site drainage is constricted in two locations along the western boundary. One is within the University Creek shed and the other is a minor tributary to the University Creek shed located in the central portion of the project site. These constrictions are manmade and create bottlenecks in the conveyance of floodwaters. As a result, water surface elevations are higher on portions of the project site, as compared to the more natural and historic drainage patterns.

Proposed Drainage System

As described in the *Drainage Master Plan* included as Appendix I of the DEIR, stormwater flows from the project site will be directed to Low Impact Development (LID) features to improve the water quality before entering the proposed storm drain network. This storm drain system will have a network of underground storm drainage pipes ranging in size from 18 inches to 72 inches in diameter and surface collector channels. The three open channel drainage facilities will drain the majority of the project site on the western and southwestern borders. As shown on Figure 2-19 of the DEIR, the proposed stormwater drainage system collects runoff from the developed areas into subsurface drain pipes of varying sizes, which then outfall to either the open space areas near University Creek or to the proposed open channel drainage facilities.

Stormwater Quality

The ARSP provides a comprehensive plan for the management of urban runoff for flow control and water quality improvement. The proposed stormwater management system would fulfill the requirements of the City's NPDES Phase II Permit applicable at the time of development, as issued by the State Water Resources Control Board (SWRCB), and would minimize the negative effects of urban stormwater runoff on the natural open space areas, including wetland areas and principal drainage corridors. LID measures would be incorporated throughout both pre and post phases of the site development.

Stormwater management during construction activities will be addressed through a Stormwater Pollution Prevention Plan (SWPPP) document specific to and prepared for the ARSP. The use of BMPs during the construction process will generally incorporate erosion controls and sediment controls. Erosion and sediment control BMPs include such things as applying straw mulch to disturbed areas, the use of fiber rolls and silt fences, sedimentation basins, drain inlet protection, stabilized construction accesses, and material management.

The ARSP will address the requirements set forth by the Stormwater Manual and NPDES regulations for post construction BMP requirements by implementing measures associated with source control, runoff reduction, and treatment control for the post construction conditions.

2.3.5. Off-Site Improvements

The majority of infrastructure improvements necessary to serve the ARSP will extend north from the CSP, and thus were previously analyzed within the certified Final EIR for that project. The following additional off-site improvements (shown on Figure 2-20 and 2-21 of the DEIR) are proposed as part of the ARSP and are covered by this EIR.

- Drainage improvements planned within the approximately 17-acre off-site Al Johnson Improvements Area include the excavation of existing University Creek along the western boundary of the ARSP, and the installation of conveyance infrastructure (piping and/or ditching) along the future alignment of Placer Parkway within the project site and the Reason Farms Property.

- Construction of new infrastructure to deliver additional water required by ARSP includes a new self-contained pump adjacent to the Tinker Pump Station, new pipeline connection or new feeder stations, and new pipeline along Tinker Road.
- Improvements to West Sunset Boulevard include widening the existing 22-foot wide roadway section to the south, construction of a drainage ditch for the length of the project site and providing turn lanes at the intersections of Westbrook Boulevard and Amoruso Way. Along the frontage of the project site, a landscaped corridor will be provided behind the drainage ditch and will have a five-foot wide pedestrian path. Additionally, a maximum seven-foot masonry wall will be constructed between the property boundaries and the landscape corridor.

2.4. Project Objectives

The purpose of the Proposed Project is to implement a large-scale, mixed-use, mixed-density master planned community in the City consistent with the City's Guiding Principles related to new development west of Roseville and the City's Blueprint Implementation Strategies. The ultimate development pattern and urban framework for the ARSP are guided by the following project objectives:

- **Complete Comprehensive Planning for the Project Site** - Formulate a specific plan and related land use planning documents that respond to the City's need to provide housing and services in an orderly growth pattern, accommodate the City's regional share of population growth, are compatible with adjacent land uses, and provide new benefits to the City.
- **Mix of Land Uses** - Design a comprehensively planned, residential-based community with a mix of land uses within the ARSP to create a balanced community with approximately 3,000 residential units, commercial and business professional uses, parks and open space, and supporting public/quasi-public uses.
- **Existing Policies** - Satisfy the City policies, regulations, and expectations as defined in the City's General Plan, City/Placer County MOU/USFWS MOU, Growth Management Visioning Committee recommendations, Zoning Ordinance, Community Design Standards, Improvement Standards, and any other applicable plans, documents, and programs adopted by the City.
- **Blueprint Consistency** - Provide for development which meets the City's nine identified Blueprint Implementation Strategies adopted by the Council in June of 2005. Achieve project design characteristics reflective of the general policy direction embodied in the City's adopted General Plan and Blueprint Implementation Strategies, including connectivity among neighborhoods, commercial uses, schools and parks, and preservation of open space.
- **Employment Opportunities** - Provide for multiple retail and office opportunities that would provide employment opportunities within the project site.
- **Housing Opportunities** - Plan for approximately 3,000 units to provide housing choices in varying densities to respond to a range of market segments, including a mix of single-

family homes, and multi-family homes and affordable housing opportunities consistent with the City's General Plan.

- **Regional Housing Needs Allocation** - Aid the City in meeting its obligation to accommodate a percentage of future population growth in the region (as embodied in the Regional Housing Needs Allocation [RHNA] identified by SACOG and the California Department of Housing and Community Development [HCD]).
- **Community Form** - Shape the physical form and character of development that is functional and creates a sense of place in order to:
 - Clearly define the northwestern edge for the City;
 - Create a land use transition and connection from existing City northerly, and westerly to the Al Johnson Wildlife Area and unincorporated Placer County;
 - Organize neighborhoods to be appropriately sized and walkable;
 - Provide a network of trails and parks that link together gathering places such as commercial areas, parks, and schools; and
 - Provide adequate school services to students generated in the project site.
- **Mixed-Use Nodes** - Provide neighborhoods that are within a short walking distance to the commercial areas, which provide for a variety of services such as restaurants, shops, neighborhood serving uses, and offices.
- **Regional and Area Roadways** - Facilitate the extension of Westbrook Boulevard to West Sunset Boulevard and connections to future development to the east, and provide land for the future Placer Parkway alignment. Provide a safe and efficient circulation system which interconnects uses and promotes pedestrian circulation and alternative transportation options. Create a circulation network which complements north/south and east/west circulation routes.
- **Park Facilities** - Provide a network of parks and trails that link together all aspects of the community.
- **Pedestrian & Bicycle Connections** – Provide an extensive network of trails and sidewalks that link neighborhoods, parks, paseos, and local and regional open space areas.
- **Public Transportation Options** - Through implementation of City arterial and collector street improvement standards, provide the opportunity to install fixed-route bus stops and transit facilities in support of the City's overall transit planning efforts.
- **Resource Management** - Ensure open space preserve areas are managed consistent with the City's policies and Open Space Preserve Overarching Management Plan.
- **Contribute to Regional Preserve Planning** - Create open space preserves that provide regional benefit for habitat, resources, and open space amenities consistent with the proposed Placer County Conservation Plan (PCCP).
- **Habitat Conservation & Creation** - Balance development with resource protection, including preservation of the creek corridor, sensitive habitat with wetland resources in an

inter-connected, permanent open space. Create multi-functional habitat with water quality benefits within the open space corridors.

- **Fiscal Contribution** - Include a mix of land uses and facilities which are fiscally feasible and implement funding mechanisms to maintain a neutral / positive fiscal impact to the City's General Fund.
- **Long Term Growth** - Plan for long term growth to be positioned to react to market demand. The ARSP is intended to guide development over a 20-year to 30-year horizon.
- **Program-Level Parcel Objectives** - The Wagner parcel is intended to remain in an Urban Reserve land use and has one residential unit allocated to it. No additional or specific project objectives for this parcel have been identified as there are no specific development plans for this parcel at this time.

3. FINDINGS REQUIRED UNDER CEQA

CEQA requires public agencies to consider the potential effects of their discretionary activities on the environment and, when feasible, to adopt and implement mitigation measures that avoid or substantially lessen the effects of those activities on the environment. Specifically, Public Resources Code section 21002 provides that “public agencies should not approve projects as proposed if there are feasible alternatives or feasible mitigation measures available which would substantially lessen the significant environmental effects of such projects[.]” The same statute states that the procedures required by CEQA “are intended to assist public agencies in systematically identifying both the significant effects of proposed projects and the feasible alternatives or feasible mitigation measures which will avoid or substantially lessen such significant effects.” Section 21002 goes on to state that “in the event [that] specific economic, social, or other conditions make infeasible such project alternatives or such mitigation measures, individual projects may be approved in spite of one or more significant effects thereof.”

The mandate and principles announced in Public Resources Code Section 21002 are implemented, in part, through the requirement that agencies must adopt findings before approving projects for which EIRs are required. (See Pub. Resources Code, § 21081, subd. (a); CEQA Guidelines, § 15091, subd. (a).) For each significant environmental effect identified in an EIR for a proposed project, the approving agency must issue a written finding reaching one or more of three permissible conclusions. The three possible findings are:

- 1) Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.
- 2) Changes or alterations which avoid or substantially lessen the significant environmental effect as identified in the final EIR are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.

- 3) Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.

(Public Resources Code section 21081, subd (a); see also CEQA Guidelines section 15091, subd. (a).)

Public Resources Code section 21061.1 defines “feasible” to mean “capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, social and technological factors.” CEQA Guidelines section 15364 adds another factor: “legal” considerations. (See also *Citizens of Goleta Valley v. Board of Supervisors (Goleta II)* (1990) 52 Cal.3d 553, 565.) The concept of “feasibility” also encompasses the question of whether a particular alternative or mitigation measure promotes the underlying goals and objectives of a project. (*City of Del Mar v. City of San Diego* (1982) 133 Cal.App.3d 410, 417 (*City of Del Mar*).) “[F]easibility” under CEQA encompasses ‘desirability’ to the extent that desirability is based on a reasonable balancing of the relevant economic, environmental, social, and technological factors.” (*Ibid.*; see also *Sequoyah Hills Homeowners Assn. v. City of Oakland* (1993) 23 Cal.App.4th 704, 715 (*Sequoyah Hills*); see also *California Native Plant Society v. City of Santa Cruz* (2009) 177 Cal.App.4th 957, 1001 [after weighing “‘economic, environmental, social, and technological factors’ ... ‘an agency may conclude that a mitigation measure or alternative is impracticable or undesirable from a policy standpoint and reject it as infeasible on that ground’”].)

With respect to a project for which significant impacts are not avoided or substantially lessened, a public agency, after adopting proper findings, may nevertheless approve the project if the agency first adopts a statement of overriding considerations setting forth the specific reasons why the agency found that the project's “benefits” rendered “acceptable” its “unavoidable adverse environmental effects.” (CEQA Guidelines, Sections 15093, 15043, subd. (b); see also Pub. Resources Code, section 21081, subd. (b).) The California Supreme Court has stated, “[t]he wisdom of approving . . . any development project, a delicate task which requires a balancing of interests, is necessarily left to the sound discretion of the local officials and their constituents who are responsible for such decisions. The law as we interpret and apply it simply requires that those decisions be informed, and therefore balanced.” (*Goleta II, supra*, 52 Cal.3d at p. 576.)

Because the EIR identified significant effects that may occur as a result of the project, and in accordance with the provisions of the Guidelines presented above, the City hereby adopts these findings as part of the approval of the Proposed Project. These findings reflect the independent judgment of the City and constitute its best efforts to set forth the evidentiary and policy bases for its decision to approve the Project in a manner consistent with the requirements of CEQA. These findings, in other words, are not merely informational, but rather constitute a binding set of obligations that come into effect with the City’s approval of the Proposed Project.

3.1. Evidentiary Basis for Findings

These Findings are based upon substantial evidence in the record before the City. The references to the DEIR and Final EIR set forth in the Findings are for ease of reference and are not intended to provide an exhaustive list of the evidence relied upon for these Findings.

3.2. Procedural Findings

The City Council of the City of Roseville finds as follows:

Based on the nature and scope of the Amoruso Ranch Specific Plan, the City of Roseville determined, based on substantial evidence, that the project may have a significant impact on the environment and prepared an EIR for the Proposed Project. The EIR was prepared, noticed, published, circulated, reviewed and completed in full compliance with CEQA (PRC Sections 21000 et seq.) and the State CEQA Guidelines (14 CCR Sections 15000 et seq.), as follows:

- A NOP of the DEIR was filed with the Office of Planning and Research and was circulated for public comments from October 30, 2013 through December 2, 2013.
- A notice of availability (NOA) of the DEIR was mailed to all interested groups, organizations, and individuals who had previously requested notice in writing as of February 22, 2016. The NOA stated that the City had completed the DEIR and that copies were available for public review at the City of Roseville Planning Division located at 311 Vernon Street, and online at www.roseville.ca.us/amoruso.
- A public notice was placed in the Roseville Press-Tribune on February 26, 2016, which stated that the DEIR was available for public review and comment.
- A public notice was posted in the office of the City of Roseville Planning Division on February 22, 2016.
- Following closure of the public comment period, all comments received on the DEIR during the comment period, the City's written responses to the significant environmental points raised in those comments, and additional information added by the City were added to the DEIR to produce the Final EIR.

3.3. Certification of the EIR

In accordance with CEQA, the City has considered the effects of the project on the environment, as shown in the Final EIR, and the whole of the administrative record, prior to taking any action to approve the Proposed Project. The Final EIR was released for public review on March 1, 2016. The City reviewed the Final EIR and, at the June 15, 2016 public hearing, recommended that the EIR be certified. The City has reviewed and considered the EIR and the information relating to the

environmental impacts of the proposed project and has certified that the EIR has been prepared and completed in compliance with CEQA. By these Findings, the City ratifies and adopts the conclusions of the Final EIR as set forth in these Findings, except where such conclusions are specifically modified by these Findings. The Final EIR and these Findings represent the independent judgment and analysis of the City.

3.4. Findings Regarding Mitigation Measures

Mitigation Measures Adopted

Except as otherwise noted, the mitigation measures referenced herein are those identified in the Final EIR and adopted by the City as set forth in the MMRP.

Impacts After Implementation of Mitigation Measures

Except as otherwise stated in these Findings, in accordance with CEQA Guidelines Section 15092, the City finds that environmental effects of the Proposed Project will not be significant or will be mitigated to a less-than-significant level by the adopted mitigation measures. All significant environmental effects have been eliminated or substantially lessened to the extent feasible. The City has determined that any remaining significant effects on the environment that are found to be unavoidable are acceptable due to overriding considerations described in Section 4. These overriding considerations consist of specific social, environmental, and economic benefits of the project that justify its approval and outweigh its unavoidable adverse environmental effects, as more fully stated in Section 4. Except as otherwise stated in these Findings, the City finds that the mitigation measures incorporated into and imposed upon the Proposed Project will not have new significant environmental impacts that were not analyzed in the EIR.

Relationship of Findings and MMRP to Final EIR

These Findings and the MMRP are intended to summarize and describe the contents and conclusions of the Draft and Final EIR for policymakers and the public. In the event that there is any inconsistency between the descriptions of mitigation measures in these Findings or the MMRP and the Final EIR, the City and/or the Applicant will implement the measures as they are described in these Findings and the attached MMRP. In the event a mitigation measure recommended in the Final EIR has inadvertently been omitted from these Findings or from the MMRP, such mitigation measure is hereby adopted and incorporated into the Findings and/or MMRP, as applicable.

3.5. Location and Custodian of Records

Pursuant to PRC section 15091, the City is the custodian of the documents and other materials that constitute the record of proceedings upon which the decision is based, and such documents and other materials are located at the City of Roseville Planning Division at 311 Vernon Street, Roseville, CA 95678. Additionally, many of the documents and materials are available online at:

http://www.roseville.ca.us/gov/development_services/planning/specific_plans_n_planning_area/s/amoruso_ranch_specific_plan.asp.

3.6. Findings Related to Project Alternatives

CEQA requires that an EIR describe and analyze the relative environmental impacts of alternatives to the proposed project and evaluate their comparative impacts and merits (see State CEQA Guidelines Section 15126.6 [a-c]). The EIR must consider a range of reasonable alternatives that can feasibly attain most of the basic project objectives and avoid or substantially lessen one or more significant impacts. Alternatives that would impede to some degree the attainment of the project objectives or would be more costly may also be considered. The environmentally superior alternative must be identified among the alternatives considered.

The alternatives analysis must identify the potential alternatives, and include sufficient information about each to allow meaningful evaluation, analysis, and comparison with the proposed project. The discussion must focus on potentially feasible alternatives that can avoid or substantially reduce the significant impacts of the proposed project.

Qualitative and quantitative measures of alternative feasibility may include site suitability, economic viability, availability of infrastructure, general plan consistency, consistency or conflict with other plans or regulatory limitations, jurisdictional boundaries, and whether the project applicant can reasonably acquire, control, or otherwise have access to an alternative site. Similarly, if an alternative would cause one or more significant impacts, in addition to those that would be caused by the project, the significant impacts of the alternative must be discussed, but in less detail than the project analysis.

As required by CEQA, the alternatives analysis must include evaluation of the “no project” alternative. “No project” is defined as what would occur within the project site if the project were not to be approved. The “no project” alternative “would be reasonably expected to occur in the foreseeable future if the project were not approved, based on current plans and consistent with available infrastructure and community services.” CEQA also requires that an EIR identify an “environmentally superior alternative” from among the range of reasonable alternatives that are evaluated.

The City finds that a good faith effort was made to evaluate all feasible alternatives in the EIR that are reasonable alternatives to the project and could feasibly obtain the basic objectives of the project, even when the alternatives might impede the attainment of the projected objectives or might be more costly. The City also finds that all reasonable alternatives were reviewed, analyzed, and discussed in the review process of the EIR and the ultimate decision on the project.

3.6.1. Alternatives Rejected and Reasons for Rejection

Pursuant to the requirements of CEQA Guidelines Section 15126.6 and in light of the project objectives, the following alternatives to the project were identified and evaluated in the DEIR:

- Alternative 1: No Project/No Build Alternative
- Alternative 2: Reduced Density, Similar Development Footprint Alternative

- Alternative 3: Compact Development Footprint Alternative
- Alternative 4: Minimum Wetland Impact Alternative

The City Council rejects the alternatives set forth and evaluated in the EIR because the City finds that there is substantial evidence, including evidence of economic, legal, social, technological, and other considerations described under CEQA Guidelines 15091(a)(3), that make these alternatives infeasible. In making these determinations, the City Council is aware that CEQA defines “feasibility” to mean “capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, social, legal, and technological factors.”

In addition to a comparison of impacts to the environment, an economic feasibility analysis was prepared that determines the impact of each of the alternatives and the associated development costs on the feasibility of developing the ARSP. (DPFG, Environmental Impact Report Alternatives, Amoruso Ranch Specific Plan Economic Feasibility Analysis, 2016.)

ALTERNATIVE 1: NO PROJECT/NO BUILD ALTERNATIVE

Under CEQA, the No Project Alternative must consider the effects of foregoing the Proposed Project. The purpose of analyzing the No Project Alternative is to allow decision-makers to compare the impacts of the Proposed Project to the action of no project. The No Project Alternative describes the environmental conditions that exist at the time that the NOP circulated, as well as what would reasonably be expected to occur in the foreseeable future if the project were not approved, based on current plans and consistent with available infrastructure and community services (CEQA Guidelines 15126[e][2]).

Under the No Project Alternative, the project site would remain in its current agricultural/rural use and minimum 80-acre farming zoning. It is reasonably foreseeable that under the No Project Alternative, Placer Parkway would be extended through the northern portion of the project site under future conditions, similar to the Proposed Project. Without annexation, general plan amendments, a specific plan, rezoning, and other approvals such as those sought as part of the Proposed Project, it is not reasonably foreseeable that the area would develop with urban land uses. While as many as eight farms at 80 acres each could theoretically occupy the project site, such subdivision of agricultural land is not common in south Placer County. Therefore, it is assumed that no development would occur and existing uses (seasonal cattle grazing) would continue.

Impacts related to the Proposed Project identified in Sections 4.0 and 5.0 of the DEIR would not occur under the No Project Alternative, because the project site would remain in its current agricultural use. None of the identified mitigation measures would be required, and none of the significant and unavoidable impacts identified in the EIR would occur under this alternative.

Based on impact analyses, the No Project Alternative would be environmentally superior to the Proposed Project. However, the No Project Alternative would not achieve any of the project objectives because it does not include a development project. Most notably, the No Project

Alternative is inconsistent with the objective that seeks to meet the City's share of regional housing needs and with the regional planning goals of the SACOG Blueprint. Because of its inconsistency with SACOG Blueprint principles, the No Project Alternative, while environmentally superior to the Proposed Project in the short term, could, over time, become environmentally inferior.

For all of the reasons set forth above, and each of them individually, the City Council hereby rejects the No Project Alternative because it is infeasible.

Alternative 2: Reduced Density, Similar Development Footprint

Under the Reduced Density, Similar Development Footprint Alternative (Alternative 2), open space would remain the same as the Proposed Project, but residential densities would be reduced by approximately 18 percent. As a result, the number of units and population associated with this alternative would be less than under the Proposed Project. The acreage of all other uses, including commercial, parks, public/quasi-public (including the school), and right-of-way would be identical to the Proposed Project.

Environmental Impacts Compared to Proposed Project. Unavoidable impacts associated with Alternative 2 would be similar to the Proposed Project. Many impacts would remain the same as the Proposed Project with the exception of traffic, air quality, GHG emissions, operational noise, potential buried archaeological and paleontological resources, public services, public utilities, and storm water runoff rates and volumes, which would be incrementally reduced.

Although Alternative 2 would generally meet most project objectives, the City rejects this alternative as infeasible within the meaning of CEQA for the following reasons:

Consistency with Adopted City Policies. Alternative 2 is not consistent with the SACOG Blueprint principles. Because fewer residential units would be accommodated within the project site, Alternative 2 would divert residential development to other locations in the region or farther away from the existing urban footprint, which could create additional environmental impacts, including increased long-term per capita consumption of land, water, electricity, natural gas, and vehicle fuels, increased per capita wastewater generation, and increased per capita air pollutant and GHG emissions.

Economic Feasibility. An economic feasibility analysis was prepared by Development Planning & Financing Group, Inc. (DPFG) (dated May 17, 2016), which estimated the infrastructure cost burden based on the total infrastructure cost per developable acre and the ratio of total cost burden per home. The infrastructure cost burden, expressed as a percentage of the estimated average home price, is a generally accepted indicator of whether a reasonable and prudent developer would proceed with development. Based on a review of public agency financial planning documents, a cost burden of 15 percent is optimal, but cost burdens between 10 and 20 percent are considered acceptable. As described in the *ARSP Economic Feasibility Analysis*, Alternative 2 is economically infeasible (DPFG 2016). Alternative 2 increases the cost per developable acre to \$269,843, which causes the land value to decrease by \$2,416 per acre from the Proposed Project. Nevertheless, it is

above the feasible range with a 22.7 percent average cost burden per home. Alternative 2 would impose the highest total cost burden per unit of all of the alternatives considered in the EIR, at \$88,824 (compared to \$79,624 for the Proposed Project). Alternative 2 would also not generate a high enough internal rate of return (IRR) to attract private equity investors, which would be necessary due to limitations associated with other types of financing such as bank loans, bonds, or government loans. Without the ability to obtain funding for the construction of the required infrastructure, Alternative 2 is considered economically infeasible.

For all of the reasons set forth above, and each of them individually, the City Council hereby rejects further consideration of Alternative 2 as infeasible.

ALTERNATIVE 3: HIGH DENSITY, COMPACT DEVELOPMENT FOOTPRINT

Under the High Density/Compact Development Alternative (Alternative 3), open space would be increased as shown in Figure 6-2 of the EIR. Alternative 3 was developed by increasing open space in the areas of the site that contain the greatest concentrations of vernal pools or drainage areas. Developed areas would be reduced to 420.5 acres (compared to 479.7 acres in the Proposed Project), and open space would increase to 205 acres (compared to 145.5 acres in the Proposed Project). The number of residential units would be approximately the same (109 unit increase); however, the residential footprint would be decreased by 18 percent (60 acres) through an increase in high density units offset by a corresponding decrease in the number of medium and low density units. The acreage of all other uses, including commercial, parks, public/quasi-public (including the school), and right-of-way would be similar to the Proposed Project.

Environmental Impacts Compared to Proposed Project. Alternative 3 would be environmentally superior to the Proposed Project due to the reduced development footprint. Because a similar level of development is proposed, most impacts would be the same as the Proposed Project, with the exception of impacts to biological resources, potential buried archaeological and paleontological resources, storm water runoff rates and volumes, and visual character, which would be incrementally reduced. Alternative 3 would meet most of the project objectives.

Although Alternative 3 would meet most of the project objectives and is environmentally superior to the Proposed Project, the City Council rejects this alternative as infeasible within the meaning of CEQA for the following reasons:

Population, Employment and Housing. By decreasing the number of medium and low density units, Alternative 3 would provide fewer housing opportunities in varying densities to respond to a range of market segments compared to the Proposed Project.

Economic Feasibility. As described in the *ARSP Economic Feasibility Analysis*, Alternative 3 is economically infeasible (DPFG 2016). Compared to the Proposed Project, the cost per developable acre of Alternative 3 is 6.7 percent higher at \$285,227, which is illustrated as a decrease in land value of \$17,800 per acre, even though the cost burden per home is 21.2 percent, which is comparable to the Proposed Project. However, taking into consideration the time value of money,

residual land value and cash flow as reflected by the IRR, Alternative 3, at 5.6 percent, does not come close to meeting the 20 percent IRR minimum threshold needed to attract private equity investors. Without the ability to obtain funding for the construction of the required infrastructure, Alternative 3 is economically infeasible.

For all of the reasons set forth above, and each of them individually, the City hereby rejects further consideration of Alternative 3 as infeasible.

ALTERNATIVE 4: MINIMUM WETLAND IMPACT

Under the Minimum Wetland Impact Footprint Alternative, open space would be substantially increased. Alternative 4 was conceptualized by minimizing development in areas of the site that contain delineated jurisdictional wetlands. Developed areas would be reduced to 346.9 acres (compared to 479.7 acres in the Proposed Project), and open space would increase to 278.6 acres (compared to 145.5 acres in the Proposed Project). As a result, the number of units and population associated with this alternative would be less than under the Proposed Project, as would acreage dedicated to parks, public/quasi-public uses and roadways.

Environmental Impacts Compared to Proposed Project. Alternative 4 would be environmentally superior to the Proposed Project because substantially fewer acres would be developed and less development is proposed. In most cases, the impacts of Alternative 4 would be reduced compared to the Proposed Project. Impacts to vernal pool habitats would be avoided. Alternative 4 would meet most of the project objectives.

Although Alternative 4 would generally meet most project objectives, the City rejects this alternative as infeasible within the meaning of CEQA for the following reasons:

Consistency with Adopted City Policies. The reduced internal connectivity and cohesion under Alternative 4 is inconsistent with SACGO Blueprint Principles for development design. Because of its inconsistency with SACOG Blueprint Principles, Alternative 4, while environmentally superior to the Proposed Project in the short term, may be environmentally inferior to the Proposed Project in the long-term compared to future baseline conditions assuming all 2050 regional growth anticipated by SACOG. Under the future scenario, the Proposed Project would be superior to Alternative 4 with respect to long-term per capita consumption of land, water, electricity, natural gas, and vehicle fuels, long-term per capita wastewater generation, and long-term per capita air pollutant and GHG emissions.

Population, Employment and Housing. Under Alternative 4 only 1,979 residential units would be developed compared to 2,827 residential units under the Proposed Project. Because approximately 25 percent fewer HDR units would be developed under Alternative 4, it provides the City with fewer options to meet its Regional Housing Needs Allocation of 10 percent affordable units and its need to accommodate lower income households.

Economic Feasibility. As described in the *ARSP Economic Feasibility Analysis*, Alternative 4 is economically infeasible (DPFG 2016). Compared to the Proposed Project, the cost per developable acre of Alternative 4 is slightly higher at \$269,233, thus reducing the land value by \$1,806, even though the cost burden per home is 21.3 percent, which is slightly lower than the Proposed Project. However, taking into consideration the time value of money, residual land value and cash flow as reflected by the IRR, Alternative 4, at 10.4 percent, does not meet the 20 percent IRR minimum threshold needed to attract private equity investors. Without the ability to obtain funding for the construction of the required infrastructure, Alternative 4 is economically infeasible.

For all of the reasons set forth above, and each of them individually, the City Council hereby rejects further consideration of Alternative 4 as infeasible.

3.6.2. Environmentally Superior Alternative

According to Section 15126.6 (d) (2) of the CEQA Guidelines, an EIR is required to identify an environmentally superior alternative from among the range of reasonable alternatives that are evaluated. The environmentally superior alternative would be the alternative that results in the fewest significant environmental impacts compared to the Proposed Project. If the environmentally superior alternative is the no project alternative, the EIR shall also identify an environmentally superior alternative from among the other alternatives.

The No Project Alternative would reduce the greatest number of project impacts, and would, therefore, be environmentally superior to the Proposed Project. Among the other alternatives, Alternative 4, Minimum Wetland Impact Alternative, would be considered the environmentally superior alternative because it reduces more of the project's significant project impacts compared to the other project alternatives, and creates no additional significant impacts. Alternative 4 would result in reduced impacts with respect to:

- 1) traffic and transportation;
- 2) construction and operational air quality emissions;
- 3) climate change and GHG emissions;
- 4) construction and operational noise;
- 5) wetlands and grasslands;
- 6) potential buried archaeological and paleontological resources;
- 7) public services (police, fire, schools, and libraries);
- 8) public utilities (water, recycled water, wastewater, electricity, and natural gas);
- 9) storm water runoff rates and volumes; and
- 10) alterations to the visual character.

Alternative 4 also would preserve the most open space.

For all of the reasons explained above in section 3.6.1 and each of them individually, however, the City Council concludes that Alternative 4 is infeasible and declines to adopt it.

3.7. Effects Found Not to be Significant

Effects of the Proposed Project found to be less than significant, and which require no mitigation, are identified in Table 3-1 of the DEIR. The City has reviewed the record and agrees with the conclusion that such impacts would be less than significant, and therefore no additional findings are needed.

3.8. Significant Impacts Associated with the Proposed Project

The Proposed Project has potentially significant environmental impacts in the areas discussed below. The DEIR identified feasible mitigation measures to avoid or substantially reduce some or all of the environmental impacts in these areas, although some impacts remain significant even with implementation of all feasible mitigation.

3.8.1. Land Use and Agricultural Resources

Impact 4.1-2 (Potential Incompatibility of Internal Land Uses): The ASRP provides for locating residential uses immediately adjacent to commercial uses, which can cause conflicts such as noise from equipment, operations, music, parking and traffic, and the Proposed Project would result in temporary disturbances during construction.

Mitigation Measure 4.6-1: Construction Noise Reduction is set forth in full in Section 3.8.6 in relation to Impact 4.6-1.

Mitigation Measure 4.6-2: Commercial Noise Controls is set forth in full in Section 3.8.6 in relation to Impact 4.6-2.

Mitigation Measure 4.4-1: Measures to Reduce Short-term Construction-related Emissions is set forth in full in Section 3.8.4 in relation to Impact 4.4-1.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final EIR.*

Commercial and Business Professional Uses

The ASRP includes 27.3 acres associated with a Community Commercial Village District and 23.9 acres associated with Community Commercial. All Community Commercial uses would be located off of Westbrook Boulevard. The City of Roseville Community Design Guidelines includes specific requirements for commercial development, multi-family residential and compact residential development. Commercial development adjacent to residential areas must include side and rear setbacks with a sufficient planter area to screen views and/or for the placement of sound barriers or fencing (according to City of Roseville Community Design Guidelines, March 2008). The Guidelines also require that lighting sources include cut-off lenses to avoid light spillage and glare on adjacent properties. In addition, the Design Guidelines prepared for the ARSP include specific requirements to ensure that landscaping, building setbacks, and berming would be appropriate to screen noise and other visual intrusions from commercial uses on nearby residential

areas. Further, the ARSP would be required to comply with the Zoning Ordinance, which mandates proper screening, building setbacks, landscaping requirements, and light intensities, which would promote compatibility between residential and adjacent businesses. Mitigation Measure 4.6-2 Commercial Noise Controls, which requires that any commercial development demonstrate that it meets the City noise standards. Therefore, with mitigation this impact would be **less than significant**. (DEIR 4.1-35)

Temporary Disturbances During Construction

The ASRP would be constructed in phases. Therefore, residents that move during early phases may be subject to construction-related impacts such as noise, dust, and truck traffic over a period of time. In addition, there are two areas of the site plan that propose residential uses adjacent to Placer Parkway. Because Placer Parkway would be constructed in the future likely after residential areas have been occupied, residents would be subject to construction-related impacts such as noise, dust, and truck traffic from construction activities. Potential short-term disturbances associated with construction are addressed in Section 2.4, Air Quality, and Section 2.6, Noise. This is considered a **significant** impact. Mitigation Measure 4.6-1, Construction Noise Reduction (set forth in full in Section 2.6, Noise), and Mitigation Measure 4.4-1, Construction Control Measures (set forth full in Section 2.4, Air Quality) would reduce construction impacts to a **less-than-significant** level. (DEIR 4.1-38)

Impact 4.1-3 (Potential Incompatibility with Existing Agricultural and Other Land Uses in Placer County and the City of Roseville): Proposed Project may expose sensitive receptors to objectionable odors from industrial and municipal uses in the vicinity.

Mitigation: In light of known economic, legal, social, technological, or other considerations, no feasible or potentially feasible measures to mitigate this impact is identified in the EIR.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

Industrial and municipal uses in the vicinity of the project site include the Roseville Energy Park (REP) and the PGWWTP located two miles south of the project site, and the Western Regional Sanitary Landfill (WRSL) and Materials Recovery Facility (MRF) operated by the Western Placer Waste Management Authority located approximately 1.8 miles northeast of the project site. Operation of these facilities generates noise and potential odors that may be perceived by sensitive receptors within the project site. Occasionally depending on atmospheric conditions, operations at the PGWWTP, WRSL, and MRF would emit odors that may be detectable within the project site.

Although there are no health standards that regulate odor, the Placer County Air Pollution Control District (PCAPCD) Air Quality Handbook includes a recommended buffer of two miles between residential land uses and sanitary landfills and WWTPs (PCAPCD, 2012). This buffer is intended to be used as a screening tool, not a significance threshold. The proximity of the project site to

odor-generating land uses is closer than the recommended buffer distances. Disclosures will be provided to all buyers and occupants of the project site (as embodied in the CC&Rs), to ensure that residents and property owners are informed of the proximity of the adjacent agricultural uses, the PGWWTP, WRSL, and MRF and the associated potential for occasional nuisance odors. Nonetheless, this is considered a **significant** impact. Mitigation to a less-than-significant level is not possible while still allowing for implementation of the specific plan. Thus, because it is impossible to allow development of the Proposed Project without exposure of sensitive receptors to potential odor nuisances, mitigation of this impact to a less-than-significant level would be infeasible and this impact is **significant and unavoidable**. (DEIR p. 4.1-41.) As explained in Section 4, "Statement of Overriding Considerations," the environmental, economic, legal, social, technological, and other benefits outweigh and override the remaining significant impacts related to odorous emissions.

Impact 4.1-5 (Conversion of Agricultural Land to Developed Uses): The Proposed Project would result in the loss of approximately 636 acres of grazing and irrigated pasture lands.

Mitigation Measure 4.1-1 Agricultural Compensation A minimum of 636 acres of open space shall be preserved within Placer County to mitigate for the loss of 636 acres of agricultural and grazing lands. This shall be accomplished through the recordation of conservation easements that result in the formation of preserve lands (each a "mitigation property or "preserve site" and collectively, "mitigation lands" or "preserve lands"). For purposes of mitigation, the term "open space" shall include any and all undeveloped land proposed to be preserved by conservation easement or otherwise required by any governmental agency to be preserved for any reason, specifically including all lands preserved for habitat or agricultural mitigation as set forth below and lands in agricultural use. No additional agricultural mitigation is required beyond the 1:1 open space requirement, as long as a substantial portion of the mitigation lands acquired, as determined by the Development Services Director, are: (1) in agricultural production, (2) undeveloped and have an NRCS soils classification of the same or greater value than lands being affected within the specific plan property at issue, or (3) undeveloped and have the same or higher value DOC categorization as lands being affected within the specific plan property at issue. In-kind mitigation is not required for agricultural land developed within the ARSP project site.

Mitigation Measure 4.8-7 Off-site and On-site Preservation of Grassland Habitat is set forth in full in Section 3.8.7 in relation to Impact 4.8-6.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the Final EIR.*

While the project site is designated for agricultural use under the County's General Plan, it does not provide opportunities for prime agricultural production. The land is generally unsuitable for agricultural uses beyond grazing. Ninety-four percent of the project site contains soils considered Grade 4 (poor) soils, which have severe limitations for agricultural production. There are no Grade

1 (excellent) soils in the project site. Implementation of Mitigation Measure 4.1-1 and Mitigation Measure 4.8-7 would provide 1:1 ratio mitigation for open space preservation that will ensure that grazing opportunities remain in the region, mitigating this potential impact to a **less-than-significant** level. (DEIR p. 4.1-44)

3.8.2. Population and Housing

Impact 4.2-4 (Inducement of Substantial Population Growth): The Proposed Project would accommodate approximately 7,379 additional residents, which represents an approximately six percent increase in the City's current population.

Mitigation: In light of known economic, legal, social, technological, or other considerations, no feasible or potentially feasible measures to mitigate this impact is identified in the EIR.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the Final EIR.*

The Proposed Project involves the development of 2,827 residential units in the project site. This new housing could accommodate approximately 7,379 additional residents. This represents an approximately six percent increase in the City's current population. The General Plan anticipates a total of 73,392 dwelling units at buildout. With the implementation of the ARSP, the total number of units in the City would be increased by 2,827 and would require a General Plan amendment; which is part of the Proposed Project. The commercial and business professional uses proposed in the ARSP would generate approximately 1,115 additional jobs. While most of these jobs would be held by City residents, it would be anticipated that some workers would also live outside of the City.

A lead agency should not assume that growth in an area is necessarily beneficial, detrimental, or of little significance to the environment (CEQA Guidelines, section 15126.2, subd. [d]). As a result, the prospect of growth, by itself, does not create an adverse effect on the environment. Instead, growth may result in physical impacts to various kinds of natural or environmental resources, such as air, water, or land. As described in the DEIR, the ARSP will result in a number of significant adverse environmental impacts. As a result, population growth resulting from the ARSP is considered **significant**. While many impacts can be reduced to a less-than-significant level through the implementation of mitigation measures recommended in this EIR, a number of environmental impacts are unavoidable. Mitigation to a less-than-significant level is not possible while still allowing for implementation of the specific plan. Thus, because it is impossible to allow new development without impacting on-site population growth, and mitigation of this impact to a less-than-significant level would be infeasible, this impact is **significant and unavoidable**. (DEIR p. 4.2-12.) As explained in Section 4, "Statement of Overriding Considerations", the environmental, economic, legal, social, technological, and other benefits outweigh and override the remaining significant impacts related to inducement of population growth.

3.8.3. Transportation and Circulation

Impact 4.3-1 (Increased Traffic Volumes on City of Roseville Existing Conditions): The Proposed Project would cause operations to degrade below LOS C for intersections operating at LOS C or better; or cause operations to degrade by one or more service level for intersections operating at LOS D or worse during AM and PM peak hours.

Mitigation Measure 4.3-1 Roseville Intersections: Pay Fair Share of Improvements in the CIP

The Applicant shall pay fair-share fees toward the following improvements detailed within the CIP:

- **Baseline Road/Fiddymment Road:** Addition of a second eastbound left-turn lane.
- **Cirby Way/Riverside Avenue:** Addition of a third eastbound through lane.
- **Baseline Road/Foothills Road:** Addition of a third northbound through lane.
- **Baseline Road/Woodcreek Oaks Boulevard:** Addition of a second eastbound through lane.
- **Blue Oaks Boulevard/Foothills Boulevard:** Addition of a third northbound left-turn lane and a third southbound through lane.
- **Cirby Way/Vernon Street:** Addition of a second southbound left-turn lane.
- **Foothills Boulevard/Junction Boulevard:** Addition of a second eastbound left-turn lane.
- **Roseville Parkway/Galleria Boulevard:** Addition of a fourth westbound through lane.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

For AM and PM peak hour conditions, significant impacts are identified for intersections in which the project would cause operations to degrade below LOS C for intersections operating at LOS C or better; or cause operations to degrade by one or more service level for intersections operating at LOS D or worse.

The Proposed Project would cause significant intersection degradation to the below intersections during the AM and PM peak hours. This is considered a **significant** impact.

AM Peak Hour

- Baseline Rd/Fiddymment Rd (LOS C to D)
- Cirby Way/Riverside Ave (LOS C to D)
- Baseline Rd/Foothills Blvd (LOS C to D)
- Baseline Rd/Woodcreek Oaks Blvd (LOS C to D)

PM Peak Hour

- Antelope Creek Blvd/Galleria Blvd (LOS C to D)
- Baseline Rd/Fiddymment Rd (LOS D to E)

- Blue Oaks Road/Foothills Blvd (LOS C to D)
- Cirby Way/Vernon Street (LOS C to D)
- Junction Blvd/Foothills Blvd (LOS C to D)
- Roseville Parkway/Galleria Blvd (LOS D to E)

Mitigation Measure 4.3-1 would restore operations to an LOS C at the Baseline Road/Fiddymont Road, Baseline Road/Foothills Boulevard, Baseline Road/Woodcreek Oaks Boulevard, Blue Oaks Boulevard/Foothills Boulevard, Cirby Way/Riverside Avenue, Cirby Way/Vernon Street, Foothills Boulevard/Junction Boulevard, and Roseville Parkway/Galleria Boulevard intersections under Existing Plus Project conditions. Each of these improvements is included within the City's CIP, and the Proposed Project's payment of the applicable TMF constitutes a fair-share payment toward these improvements. Therefore, impacts to these intersections would be considered **less than significant**.

The Antelope Creek Boulevard/Galleria Boulevard intersection is constructed to its ultimate lane configuration. Operations are projected to worsen to LOS E under 2035 CIP conditions during the PM peak hour. By virtue of the City Council adopting an exception to the LOS C standard for this intersection, this impact is considered **less than significant**. (DEIR p. 4.3-50)

Impact 4.3-4 (Impacts to Transit): Increased transit demand resulting from the Proposed Project could impact Dial-A-Ride Service.

Mitigation Measure 4.3-2 Pay Fair Share toward Transit Improvements

The Applicant shall pay its fair share toward the capital improvements for expanded transit services to the project site. This includes bus turn-outs, shelter pads, and shelters.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

The addition of residential units and commercial square footage would increase the demand for transit within the City of Roseville. There are currently no Local Service routes directly serving the project site.

Roseville Transit is funded primarily by local Transportation Development Act (TDA) funding sources, which are derived from a statewide one-quarter cent sales tax. Additional funding sources include Federal Transit Administration (FTA) funds and local transit fares. General funds are not used to support Roseville Transit and are not expected to be used to support transit services for the Proposed Project. As TDA revenues rise or fall during various economic conditions, transit services are expected to reflect the amount of funding available in consideration of the unmet transit needs which are evaluated annually by PCTPA.

Due to funding constraints it is anticipated that Local Service (and thus ADA Paratransit Service) will not be extended to the project site upon initial development. Roseville Transit regularly reviews and, as needed and feasible, adjusts its services in consideration of unmet transit needs

within the City of Roseville, the Long Range Transportation Plan (LRTP), the SRTP and available funding. Future service adjustments may include service to the ARSP area. Until that time, Dial-A-Ride Service is the only transit service that will be available to the project site. As a result, the increased transit demand resulting from the project could impact Dial-A-Ride Service due to extended travel times and increased demand. This would result in a **potentially significant** impact to existing transit services, as well as a **potentially significant** impact to future residents within the project site due to unmet transit demand.

Pursuant to **Mitigation Measure 4.3-2, Pay Fair Share toward Transit Improvements**, the project would be required to create transit stops at key arterial intersections and at other locations as determined by the Public Works Director, in accordance with the City's Improvement Standards. Roseville Transit will provide transit services in accordance with the SRTP and LRTP as funding allows. The requirement that the Proposed Project develop transit stops at key arterial intersections and other locations determined by Public Works will be sufficient to allow service to be extended to the project site. Payment of a fair share fee is proposed that will enable transit services to be extended to the project site, and will ensure that existing services are expanded to account for the increased demand on existing services that would result from development of the Proposed Project. For these reasons, Mitigation Measure 4.3-2 would reduce impacts to a **less-than-significant** level. (DEIR p. 4.3-54)

Impact 4.3-5 (Increased Traffic Volumes at Intersections Within Placer County, Sutter County, Sacramento County, or City of Lincoln Under Existing Conditions): Increased Traffic Volumes at Intersections Within Placer County, Sutter County, Sacramento County, or City of Lincoln Under Existing Conditions

Mitigation Measure 4.3-3 Placer County Intersections: Pay Fair Share Costs to Placer County Intersection Improvements

The Applicant shall pay the fair share cost of improvements to restore acceptable operations during peak hours at the following intersections:

- a) **Watt Avenue/PFE Road:** Installation of a traffic signal at this intersection. This improvement is included in the Placer County CIP (December 2014).
- b) **Walerga Road/PFE Road:** Widening of Walerga Road to four lanes through the intersection, to consist of two northbound and two southbound travel lanes. The Placer County Countywide CIP (December 2014) includes funding ROW acquisition for the widening of Walerga Road to six lanes from Baseline Road to the Sacramento County line. However, funding for construction is not provided.
- c) **Cook-Riolo Road/PFE Road Intersection:** Development of capacity-enhancing improvements identified by Placer County. This improvement is not included in any existing fee program.

- d) **Fiddymment Road/West Sunset Boulevard:** Installation of a traffic signal at this intersection. This improvement is not included in any existing fee program.
- e) **Fiddymment Road/Athens Avenue:** Installation of a traffic signal at this intersection. This improvement is not included in any existing fee program.
- f) **Fiddymment Road/West Sunset Boulevard:** The addition of a second eastbound left-turn lane at the intersection. This improvement is not included in any existing fee program.
- g) **Fiddymment Road/Athens Avenue:** The addition of a second westbound left-turn lane to the intersection. This improvement is not included in any existing fee program.
- h) **N Foothills Boulevard/Athens Avenue:** Installation of a traffic signal at this intersection. This improvement is not included in any existing fee program.

Consistent with Placer County's Mitigation Measure 4.7-2a for the Placer Vineyards Specific Plan and Mitigation Measure 6.12-1 for the Regional University Specific Plan, the City of Roseville, in working with Placer County to provide funding for improvements not already subject to an existing interagency fee program, shall negotiate in good faith with Placer County to enter into additional fair and reasonable arrangements with the intention of achieving, within a reasonable time period after approval of the ARSP, commitment for the provision of adequate fair share mitigation from the ARSP for significant impacts on Placer County roadways. In reaching an accommodation with Placer County, the City and Placer County, in order to better ensure an effective sub-regional approach to mitigating transportation-related impacts, may choose to include within the same agreements or JPA (if a JPA is formed) additional public agencies with whom it must work to mitigate transportation-related impacts, such as Sacramento County, Sutter County, and Caltrans. As the City strives to achieve agreement(s) with one or more of these other agencies, the City shall insist that "fair share" fee obligations be reciprocal, in the sense that the other local agencies, in accepting fair share contributions from the ARSP developers, must agree to require new development occurring in their own jurisdictions to make fair share contributions towards mitigating the significant effects of such development on the City's transportation network. Any such arrangement(s), with just Placer County or with additional agencies, shall account for existing inter-agency fee programs in order to avoid requiring redundant mitigation or fee payments exceeding fair share mitigation levels.

The City intends that its arrangement(s) with Placer County and any other agencies shall permit the participating agencies flexibility in providing cross-jurisdictional credits and reimbursements consistent with the general "fair share" mitigation standard, and require an updated model run incorporating the best available information in order to obtain the most accurate, up-to-date impact assessment feasible and to generate the most accurate, up-to-date estimates of regional fair share contributions. These arrangements, moreover, should also include provisions that allow for periodic updates to the traffic modeling on which fair share payment calculations depend in order to account for (i) newly approved projects cumulatively contributing to transportation-related impacts and that therefore should contribute to the funding of necessary improvements (e.g., the

Curry Creek Community Plan in Placer County), (ii) additional physical improvements necessitated in whole or in part by newly approved projects, (iii) changing cost calculations for the construction of needed improvements based on changes in the costs of materials, labor, and other inputs.

The City will monitor traffic volumes and coordinate with the County regarding traffic mitigation fees to fund regional improvements.

Mitigation Measure 4.3-4 Sutter County Facilities: Pay Fair Share Costs to Sutter County Intersection Improvements

The Applicant shall pay the fair share costs of improvements to restore acceptable operations during peak hours at the following intersections:

- a) **Pleasant Grove Road N/Riego Road:** Widening of Riego Road to four lanes through the intersection, to consist of two eastbound and two westbound travel lanes. This improvement is not included in any known fee program.
- b) **Pleasant Grove Road S/Riego Road:** Widening of Riego Road to four lanes through the intersection, to consist of two eastbound and two westbound travel lanes. This improvement is not included in any known fee program.

The City of Roseville shall negotiate in good faith to enter into a fair agreement with Sutter County regarding the ARSP's fair share mitigation for these improvements. In reaching an accommodation with Sutter County, the City and Sutter County, in order to better ensure an effective sub-regional approach to mitigating transportation-related impacts, may choose to include within the same agreements or JPA additional public agencies with whom it must work to mitigate transportation-related impacts, such as Placer County, Sacramento County, and Caltrans. As the City strives to achieve agreement(s) with one or more of these other agencies, the City shall insist that "fair share" fee obligations be reciprocal, in the sense that the other local agencies, in accepting fair share contributions from the ARSP developers, must agree to require new development occurring in their own jurisdictions to make fair share contributions towards mitigating the significant effects of such development on the City's transportation network. Any such arrangement(s), with just Sutter County or with additional agencies, shall account for existing inter-agency fee programs in order to avoid requiring redundant mitigation or fee payments exceeding fair share mitigation levels. The City intends that its arrangement(s) with Sutter County and any other agencies shall permit the participating agencies flexibility in providing cross-jurisdictional credits and reimbursements consistent with the general "fair share" mitigation standard, and require an updated model run incorporating the best available information in order to obtain the most accurate, up-to-date impact assessment feasible and to generate the most accurate, up-to-date estimates of regional fair share contributions. These arrangements, moreover, should also include provisions that allow for periodic updates to the traffic modeling on which fair share payment calculations depend in order to account for (i) newly approved projects cumulatively contributing

to transportation-related impacts and that therefore should contribute to the funding of necessary improvements (e.g., the Curry Creek Community Plan in Placer County), (ii) additional physical improvements necessitated in whole or in part by newly approved projects, (iii) changing cost calculations for the construction of needed improvements based on changes in the costs of materials, labor, and other inputs. Implementation of Mitigation Measure 4.3-4 would reduce impacts to a less-than-significant level; however, these improvements lie outside the jurisdiction of the City of Roseville.

Finding: *Changes or alterations which avoid or substantially lessen the significant environmental effect as identified in the final EIR are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.*

The Proposed Project would cause significant intersection degradations to the below Placer County intersections during the AM and PM peak hours. This is considered a **significant** impact.

AM Peak Hour

- Watt Avenue/PFE Road (LOS E to F)
- Walerga Road/PFE Road (LOS D to E)
- Cook-Riolo/PFE Road (LOS B to D)
- Fiddymment Road/West Sunset Boulevard (LOS B to F)

PM Peak Hour

- Walerga Road/PFE Road (LOS C to D)
- Fiddymment Road/West Sunset Boulevard (LOS C to F)
- Fiddymment Road/Athens Avenue (LOS B to E)

Mitigation Measures 4.3-3 and 4.3-4 would restore intersection operations to acceptable levels at the Placer and Sutter County intersections. Implementation of these measures will facilitate the construction of such improvements by requiring the City of Roseville to negotiate in good faith with Sutter County to enter into fair and reasonable arrangements with the intention of achieving within a reasonable time period after approval of the Proposed Project, commitment for the provision of adequate fair share mitigation from the Proposed Project for impacts on Placer and Sutter County roadways. Mitigation Measure 4.3-3 (a) is fully funded through an adopted fee program and is therefore considered feasible. Since this would restore acceptable operations during the AM and PM peak hours, it would mitigate the intersection impacts at Watt Avenue/PFE Road to **less than significant**.

Mitigation Measure 4.3-3 (b) is also in a fee program. However, the fee program only covers ROW acquisition and not funding for construction. Mitigation Measures 4.3-3 (b) through (e) and 4.3-4 (a) and (b) would require the City of Roseville to negotiate in good faith with Placer County to

identify the Proposed Project's fair share funding contribution. These mitigations would require ROW acquisition and approvals from other agencies.

However, since none of these improvements are included and fully funded in an existing fee program, there is no assurance that the remaining funds necessary for construction will be collected. As such, the operational impact to the identified intersections would remain **significant and unavoidable**.

This conclusion reflects the reality that successful implementation of the proposed improvements on Placer County and Sutter County roadways is outside the control of the City of Roseville. For this reason, the City of Roseville is conservatively acknowledging the possibility that, despite its own commitment to work with Placer County and Sutter County, mutually acceptable accommodations may not be reached. Consistent with CEQA Guidelines section 15091, subdivision (a)(2) the City concludes that other agencies can and should cooperate with the City in implementing the mitigation. The City would not have control or authority over the timing or implementation of Mitigation Measure 4.3-3 and Mitigation Measure 4.3-4. The agencies with jurisdiction over these off-site elements can and should implement Mitigation Measure 4.3-3 and Mitigation Measure 4.3-4, which would mitigate this potential impact to a less-than-significant level. (DEIR 4.3-55)

Impact 4.3-6 (Increased Traffic Volumes on Roadways Within Placer County, Sutter County, Sacramento County, or City of Rocklin Under Existing Conditions): The Proposed Project would cause operational degradations to roadway segments in Placer County and Sacramento County.

Mitigation Measure 4.3-3 Placer County Intersections: Pay Fair Share Costs to Placer County Intersection Improvements is set forth in full in Section 3.4.3 in relation to Impact 4.3-5.

Mitigation Measure 4.3-5 Placer County Segments: Pay Fair Share Costs to Placer County Facilities

The Applicant shall pay its fair share costs of improvements to restore acceptable operations on the following roadway segments:

- a) **Walerga Road between Baseline Road and PFE Road:** Widening of this roadway to four lanes, consisting of two continuous northbound and southbound travel lanes. The Placer County Countywide Traffic Fee Program (December 2014) includes funding for ROW acquisition for the widening of Walerga Road to size lanes from Baseline to the Sacramento County line. However, funding for construction is not provided.
- b) **West Sunset Boulevard between Fiddymont Road and Westbrook Boulevard:** Widening of this roadway to include four lanes. However, only two travel lanes are necessary (based on travel demand) upon construction of Placer Parkway. Therefore, Placer County may request that the fair share contribution cover roadway widening for

dedicated turn lanes and/or shoulders, capacity widening, or a contribution toward the construction of Placer Parkway. It should be noted that consistent with Mitigation Measure 4.3-7, the Proposed Project is required to contribute to the construction of Placer Parkway through payment of the SPRTA fees. Improvements to West Sunset Boulevard are not included in any existing fee program.

- c) **Fiddymment Road from Athens Avenue to West Sunset Boulevard:** Widening of this roadway to six lanes. This improvement is not included in any existing fee program.

The City shall determine the means of providing the ARSP's fair share to fund these improvements with Placer County through the inter-agency agreement or other arrangement required by Mitigation Measure 4.3-3. Widening of Walerga Road south of Baseline to six lanes is identified in the Dry Creek Community Plan.

Mitigation Measure 4.3-6 Sacramento County Segments: Pay Fair Share Costs to Sacramento County Facilities

The Applicant shall pay their fair share cost of improvements to restore operations on the following roadway segment:

- **Walerga Road between PFE Road and Singing Tree Way:** Widening of this roadway to four lanes, consisting of two northbound and southbound travel lanes. The Sacramento County General Plan Circulation Element (amended 2011) shows this segment of Walerga Road as a planned four-lane road. However, the Final Report for the Sacramento County Development Transportation Impact Fee Program (2010) does not include this widening in the fee program.

Consistent with Placer County's Mitigation Measure 4.7-2a for the Placer Vineyards Specific Plan and Mitigation Measure 6.12-1 for the Regional University Specific Plan, which require Placer County to attempt to enter into an agreement with Sacramento County in order to mitigate the significant effects of the those two Placer County projects within Sacramento County, the City of Roseville shall negotiate in good faith to enter into a fair agreement with Sacramento County regarding the ARSP's fair share mitigation for this improvement. In reaching an accommodation with Sacramento County, the City and Sacramento County, in order to better ensure an effective subregional approach to mitigating transportation-related impacts, may choose to include within the same agreements or JPA additional public agencies with whom it must work to mitigate transportation-related impacts, such as Placer County, Sutter County, and Caltrans. As the City strives to achieve agreement(s) with one or more of these other agencies, the City shall insist that "fair share" fee obligations be reciprocal, in the sense that the other local agencies, in accepting fair share contributions from the ARSP developers, must agree to require new development occurring in their own jurisdictions to make fair share contributions towards mitigating the significant effects of such development on the City's transportation network. Any such arrangement(s), with just Sacramento County or with additional agencies, shall account for

existing inter-agency fee programs in order to avoid requiring redundant mitigation or fee payments exceeding fair share mitigation levels. The City intends that its arrangement(s) with Sacramento County and any other agencies shall permit the participating agencies flexibility in providing cross-jurisdictional credits and reimbursements consistent with the general “fair share” mitigation standard, and require an updated model run incorporating the best available information in order to obtain the most accurate, up-to-date impact assessment feasible and to generate the most accurate, up-to-date estimates of regional fair share contributions. These arrangements, moreover, should also include provisions that allow for periodic updates to the traffic modeling on which fair share payment calculations depend in order to account for (i) newly approved projects cumulatively contributing to transportation-related impacts and that therefore should contribute to the funding of necessary improvements, (ii) additional physical improvements necessitated in whole or in part by newly approved projects, (iii) changing cost calculations for the construction of needed improvements based on changes in the costs of materials, labor, and other inputs. Implementation of Mitigation Measure 4.3-6 would reduce impacts to a less-than-significant level; however, these improvements lie outside the jurisdiction of the City of Roseville.

Finding: *Changes or alterations which avoid or substantially lessen the significant environmental effect as identified in the final EIR are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.*

The Proposed Project would cause significant roadway segment degradations to the below Placer County roadway. This is considered a **significant** impact.

- Walerga Road south of Baseline Road (LOS E to F)

The Proposed Project would cause significant roadway segment degradations to the below Sacramento County roadway. This is considered a **significant** impact.

- Walerga Road south of PFE Road (LOS F operations exacerbated by a 0.07 v/c ratio increase)

Mitigation Measures 4.3-5 would restore operations on Walerga Road south of Baseline Road to LOS A through the construction of a second northbound and southbound through lane. The City of Roseville currently participates in a joint fee program with Placer County for improvements along Walerga Road, including the construction of this improvement along with other improvements consistent with the Dry Creek Specific Plan, which includes the widening of Walerga Road to four lanes south of Baseline Road. Development within the project site will be required to participate in this fee program and pay fair share costs for this improvement consistent with Mitigation Measure 4.3-3 and 4.3-5.

Mitigation Measure 4.3-6 would restore operations on Walerga Road south of PFE Road to LOS A through facilitating the construction of a second northbound and southbound through lane by requiring the City to negotiate in good faith with Sacramento County to enter into fair and

reasonable arrangements with the intention of achieving within a reasonable time period after approval of the Proposed Project, a commitment for the provision of adequate fair share mitigation from the Proposed Project for impacts on Sacramento County roadways.

Construction of improvements described in Mitigation Measures 4.3-3, 4.3-5, and 4.3-6 would reduce project impacts to less-than-significant levels. However, since the City does not have control over improvements on Placer or Sacramento County roadways, the City must conservatively assume that, at the time of project approval by the City, this impact would be **significant and unavoidable**, despite the City's own commitment to work with Placer and Sacramento Counties. The City would not have control or authority over the timing or implementation of Mitigation Measure 4.3-3, 4.3-5 and Mitigation Measure 4.3-6. Consistent with CEQA Guidelines section 15091, subdivision (a)(2) the City concludes that other agencies can and should cooperate with the City in implementing the a fair share fee program to mitigate the impacts occurring in areas under the County's control. The City is committed to and will initiate contact with Placer and Sacramento County officials to explore the feasibility of such a program, wherein the effects of development across jurisdictional boundaries are addressed. The agencies with jurisdiction over these off-site elements can and should implement Mitigation Measure 4.3-3, 4.3-5 and Mitigation Measure 4.3-6, which would mitigate this potential impact to a less-than-significant level. If adopted, mitigation requires the Proposed Project to be made part of such a fee program. (DEIR 4.3-58)

Impact 4.3-8 (Increased Traffic Volumes on Existing State Highways Under Existing Conditions): Increased traffic volumes under Existing Plus Project Conditions would result in degradation of operations on freeway segments on SR 65.

Mitigation Measure 4.3-7 State Facilities: Payment of Fees for State Roadway Segments

No specific improvements have been identified to mitigate project impacts on I-80 or SR 65; however, the City is willing to work with Caltrans & the PCTPA to establish a regional approach to institute a fee program for the purpose of funding improvements on these facilities. If and when Caltrans and the City enter into an enforceable agreement, the Proposed Project shall pay impact fees to the City of Roseville in amounts that constitute the Proposed Project's fair share contributions to the construction of transportation facilities and/or improvements, consistent with the Mitigation Fee Act (Gov. Code, § 66000 et seq.).

The City shall determine the means of providing the project's fair share of the funds for these improvements to Caltrans through the inter-agency agreement or other arrangement.

The Applicant shall pay the Highway 65 JPA fee and the SPRTA fee. The Highway 65 JPA Fee assesses fees on new development for the cost of interchange improvements along SR 65. The SPRTA Fee provides funding for regional projects such as the SR 65 Widening Project and Placer Parkway.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

Degradation of a freeway segment from an acceptable LOS (LOS E or better) to an unacceptable LOS (LOS F) as a result of the Proposed Project would be considered a significant impact. Additionally, impacts are identified when a freeway segment already operating at an unacceptable level is worsened to a significant degree. Therefore, impacts to the SR 65 freeway segments identified above are considered **significant**.

AM Peak Hour

- SB SR 65 weave from Blue Oaks Boulevard to Pleasant Grove Boulevard (LOS F operations exacerbated)
- SB SR 65 diagonal on-ramp at Pleasant Grove Boulevard (LOS E to F)
- SB SR 65 off-ramp at Galleria Boulevard (LOS F operations exacerbated)

PM Peak Hour

- NB SR 65 from I-80 to Galleria Boulevard (LOS F operations exacerbated)
- NB SR 65 off-ramp at Galleria Boulevard (LOS F operations exacerbate)
- NB SR 65 on-ramp at Galleria Boulevard (LOS E to F)
- NB SR 65 off-ramp at Pleasant Grove Boulevard (LOS F operations exacerbated)
- SB SR 65 weave from Blue Oaks Boulevard to Pleasant Grove Boulevard (LOS F operations exacerbated)

Mitigation Measure 4.3-7 would reduce impacts on the above-listed freeway segments to acceptable levels by requiring the Applicant to pay the Highway 65 JPA and the SPRTA fees. The Highway 65 JPA Fee assesses fees on new development for the cost of interchange improvements along SR 65. The SPRTA Fee provides funding for regional projects such as the SR 65 Widening Project and Placer Parkway. However, the remaining funding necessary to construct such improvements remains unidentified. No improvements within the SR 65 study area are included in the Tier 1 project list in SACOG's MTP/SCS. The PCTPA website indicates that funding is currently being sought for the SR 65 Widening Project. Without funding for the SR 65 Widening Project, mitigation to less-than-significant level is not possible while still allowing for implementation of the specific plan. Because it is impossible to allow the Proposed Project without impacting the identified freeway segments and mitigation of this impact to a less-than-significant level is infeasible, impacts to SR 65 would remain **significant and unavoidable**. (DEIR p. 4.3-61.) As explained in Section 4, "Statement of Overriding Considerations," the environmental, economic, legal, social, technological, and other benefits outweigh and override the remaining significant impacts related to increased highway traffic volumes.

Impact 4.3-9 (Increased Traffic at City of Roseville Intersections Under 2035 CIP Conditions): Increased traffic volumes under 2035 CIP Plus Project Conditions would cause intersection degradations during the AM and PM peak hours at specific intersections.

Mitigation Measure 4.3-1 Roseville Intersections: Pay Fair Share of Improvements in the CIP is set forth in full in Section 3.8.3 in relation to Impact 4.3.1.

Mitigation Measure 4.3-8 City of Roseville Facilities: Update the City of Roseville Capital Improvement Plan

The City of Roseville shall modify its CIP to include the following improvements:

- **Blue Oaks Boulevard/Westbrook Boulevard:** Provide two left-turn lanes, three through lanes, and one right turn lane on all approaches and operate the westbound right-turn movement with an overlap phase.
- **Westbrook Boulevard/Vista Grande Boulevard:** Redesign the westbound approach (currently proposed to consist of one left-turn, two through lanes, and one right-turn lane) to be striped to consist of two left-turn lanes, one through lane, and one right-turn lane.

Once the CIP is modified, the Applicant shall pay fair-share fees toward such improvements.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

For AM and PM peak hour conditions, significant impacts are identified for intersections in which the Proposed Project would cause operations to degrade below LOS C for intersections operating at LOS C or better; or cause operations to degrade by one or more service level for intersections operating at LOS D or worse.

The Proposed Project would cause cumulatively significant degradations to the below intersections during the AM and PM peak hours. This is considered a **significant** impact.

AM Peak Hour

- McAnally Drive/Woodcreek Oaks Boulevard (LOS C to D)
- Blue Oaks Boulevard/Westbrook Boulevard (LOS C to E)

PM Peak Hour

- Roseville Parkway/Gibson Drive (LOS D to E)
- Blue Oaks Boulevard/Westbrook Boulevard (LOS C to F)
- Baseline Road/Santucci Boulevard (LOS C to D)
- Westbrook Boulevard/Vista Grande Boulevard (LOS C to D)
- Baseline Road/Westbrook Boulevard (LOS C to D)

Mitigation Measure 4.3-8 would restore operations at the Blue Oaks Boulevard/Westbrook Boulevard and Westbrook Boulevard/Vista Grande Boulevard intersections to acceptable levels of service through addition of intersection improvements to the City's CIP. These intersection improvements, as described in Mitigation Measure 4.3-8 would restore the Blue Oaks Boulevard/Westbrook Boulevard intersection to LOS C during the AM and PM peak hours and restore the Westbrook Boulevard/Vista Grande Boulevard intersection to LOS C during PM peak hour. Further, Mitigation Measure 4.3-1 would require the Applicant to pay fair share costs of improvements in the City's CIP. Therefore, impacts to these intersections would be **less than significant**.

In light of known economic, legal, social, technological, or other considerations, no feasible or potentially feasible measures are available to mitigate for the remaining impacted intersections. The City's CIP includes an additional westbound approach lane at the McAnally Drive/Woodcreek Oaks Boulevard intersection. Further widening is not possible at this intersection due to the surrounding land uses. However, operations at this intersection would be restored to LOS C under the 2035 Cumulative Plus Project scenario (Impact 4.3-14 set forth below) due primarily to traffic shifts caused by Placer Parkway. The Proposed Project would cause a three-second increase in delay during the PM peak hour at Roseville Parkway/Gibson Drive, which would degrade operations from LOS D to E. This intersection is built to its ultimate design and signal timing adjustments would not restore operations back to LOS D. However, operations are restored to LOS D under the 2035 Cumulative Plus Project scenario (Impact 4.3-14 set forth below). The Proposed Project would cause a two- to three-second increase in delay at both the Baseline Road/Santucci Boulevard and Baseline Road/Westbrook Boulevard intersections during the PM peak hour; operations are degraded from LOS C to D. Both intersections are planned to include two left-turn lanes, three through lanes, and one right-turn lane on all approaches. Further widening is not possible and signal timing adjustments would not restore operations back to LOS C. However, intersection operations are restored to LOS C at each intersection under the 2035 Cumulative Plus Project scenario (Impact 4.3-14 below) due primarily to traffic shifts caused by Placer Parkway. Mitigation to a less-than-significant level is not possible while still allowing for implementation of the specific plan. Because it is impossible to allow development of the Proposed Project without impacting the McAnally Drive/Woodcreek Oaks Boulevard, Roseville Parkway/Gibson Drive, Baseline Road/Santucci Boulevard, Baseline Road/Westbrook Boulevard intersections and mitigation of this impact to a less-than-significant level would be infeasible, impact to these four intersections is **significant and unavoidable**. (DEIR 4.3-64.) As explained in Section 4, "Statement of Overriding Considerations," the environmental, economic, legal, social, technological, and other benefits outweigh and override the remaining significant impacts related to this impact.

Impact 4.3-11 (Increased Traffic on Placer County, Sutter County, Sacramento County or City of Lincoln Intersections Under 2035 CIP Conditions): Traffic volumes from the Proposed

Project would cause intersection degradation to identified Placer County facilities during the AM and PM peak hours.

Mitigation Measure 4.3-3(c), (f), (g), and (h) Placer County Intersections: Pay Fair Share Costs to Placer County Intersection Improvements is set forth in full in Section 3.8.3 in relation to Impact 4.3-5.

Finding: *Changes or alterations which avoid or substantially lessen the significant environmental effect as identified in the final EIR are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.*

The Proposed Project would result in traffic volume increases on a number of roadways in surrounding jurisdictions under 2035 CIP Conditions. The Proposed Project would cause significant intersection degradations to the below Placer County Facilities during the AM and PM peak hours. This is considered a **significant** impact.

AM Peak Hour

- Cook-Riolo/PFE Road (LOS F operations exacerbated)
- N. Foothills Boulevard/Athens Avenue (LOS F operations exacerbated)

PM Peak Hour

- Cook-Riolo/PFE Road (LOS F operations exacerbated)
- Fiddymment Road/West Sunset Boulevard (LOS A to E)
- Fiddymment Road/Athens Avenue (LOS E to F)
- N. Foothills Boulevard/Athens Avenue (LOS F operations exacerbated)

Implementation of Mitigation Measure 4.3-3 (c) would reduce impacts at the Cook-Riolo/PFE Road intersection. Mitigation Measure 4.3-3 (f) would restore operations at the Fiddymment Road/West Sunset Boulevard to LOS C during the PM peak hour. Mitigation Measure 4.3-3 (g) would restore operations at the Fiddymment Road/Athens Avenue intersection to LOS C during the AM peak hour and LOS E during the PM peak hour. Mitigation Measure 4.3-3 (h) would restore operations at the N. Foothills Boulevard/Athens Avenue intersection to LOS C during the AM peak hour and LOS D during the PM peak hour. Thus, impacts to these intersections would be reduced to **less-than-significant** levels.

However, since the City does not have jurisdiction over the improvements on Placer County intersections, the City must conservatively assume that, this impact remains **significant and unavoidable**, despite the City's own commitment to work with Placer County. The

Furthermore, since none of these improvements are included in an existing fee program, there is no assurance that the remaining funds necessary for construction will be collected. Therefore, this impact is considered **significant and unavoidable**. The City would not have control or authority

over the timing or implementation of Mitigation Measure 4.3-3(c), (f), (g) and (h). Consistent with CEQA Guidelines section 15091, subdivision (a)(2) the City concludes that other agencies can and should cooperate with the City in implementing the fair share fee program to mitigate the impacts occurring in areas under the County's control. The agencies with jurisdiction over these off-site elements can and should implement Mitigation Measure 4.3-3(c), (f), (g), and (h) which would mitigate this potential impact to a less than significant level. (DEIR p. 4.3-75)

Impact 4.3-12 (Increased Traffic Volumes on Roadways within Placer County, Sutter County, Sacramento County or City of Rocklin Under 2035 CIP Conditions): Increased traffic volumes under 2035 CIP Conditions would cause roadway segment degradations to specific Placer County facilities.

Mitigation Measure 4.3-5(b) and (c) is set forth in full in Section 3.8.3 in relation to Impact 4.3-6.

Finding: *Changes or alterations which avoid or substantially lessen the significant environmental effect as identified in the final EIR are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.*

The Proposed Project would result in traffic volume increases on a number of roadways in surrounding jurisdictions under 2035 CIP Conditions. The Proposed Project would cause cumulatively significant roadway degradations to the below Placer County facilities. This is considered a **significant** impact.

- West Sunset Boulevard between Westbrook Boulevard and Fiddymment Road (LOS A to E)
- Fiddymment Road from Athens Avenue to Sunset Boulevard West (LOS E to F)

Implementation of Mitigation Measure 4.3-5 (b) and (c) would restore operations on these roadway segments to acceptable levels of service by requiring the Applicant's fair share funding contribution. However, since the City does not have control over improvements on Placer County facilities and the remaining fair share costs required for construction have not been identified, the City must conservatively assume that this impact would be **significant and unavoidable**, despite the City's own commitment to work with Placer County. The City would have control or authority over the timing or implementation of Mitigation Measure 4.3-5(b) and (c). Consistent with CEQA Guidelines section 15091, subdivision (a)(2) the City concludes that other agencies can and should cooperate with the City in implementing the fair share fee program to mitigate the impacts occurring in areas under Placer County's control. The agencies with jurisdiction over these off-site elements can and should implement Mitigation Measure 4.3-5(b) and (c) which would mitigate this potential impact to a less-than-significant level. (DEIR p. 4.3-77)

Impact 4.3-15 (Increased Traffic on City of Roseville Intersections Under 2035 Cumulative Conditions): The Proposed Project would result in operational degradation at specific intersections during the PM peak hour under 2035 cumulative conditions.

Mitigation: In light of known economic, legal, social, technological, or other considerations, no feasible or potentially feasible measures to mitigate this impact is identified in the EIR.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

The Proposed Project would cause cumulatively significant degradations to the intersections identified above during the PM peak hour. This is considered a **significant impact**.

PM Peak Hour

- Blue Oaks Blvd/Collector C (LOS C to D)
- Blue Oaks Blvd/Washington Blvd/SR 65 SB Ramps (LOS D to E)
- Eureka Rd/Taylor Rd/I-80 EB Ramps (LOS D to E)

Blue Oaks Boulevard/Collector

The planned Blue Oaks Boulevard/Collector C intersection would be located approximately 1,175 feet west of the Blue Oaks Boulevard/Foothills Boulevard intersection. The Proposed Project would add approximately 300 eastbound through vehicles during the PM peak hour. The Traffic Study predicted that queued vehicles on the eastbound Blue Oaks Boulevard approach would spill back through this intersection, thereby causing the LOS D condition. Due to the level of project-added traffic and the degree of delay increase (32 to 55 seconds), it is unlikely that signal timing modifications would restore operations to LOS C. Further, no additional widening beyond what is assumed is possible.

Blue Oaks Boulevard/Washington Boulevard/SR 65 SB Ramps

The Blue Oaks Boulevard/Washington Boulevard/SR 65 SB Ramps intersection was modified within the last two years to add additional capacity. The 2035 Cumulative scenario assumes additional planned widening, and no additional widening beyond what was assumed is possible.

Eureka Road/Taylor Road/I-80 EB Ramps

The Eureka Road/Taylor Road/I-80 EB Ramps intersection was rebuilt within the last three years to add additional capacity. A second westbound right-turn lane is planned on Taylor Road, which is assumed in-place for the 2035 Cumulative scenario. No additional widening at this intersection is possible.

Mitigation to a less-than-significant level is not possible while still allowing for implementation of the specific plan. Because it is impossible to allow for development of the Proposed Project without impacting the Blue Oaks Boulevard/Collector C, Blue Oaks Boulevard/Washington

Boulevard/SR 65 SB Ramps, or Eureka Road/Taylor Road/I-80 EB Ramps intersections and mitigation of this impact to a less-than-significant level is not feasible, impact to these intersections would be **significant and unavoidable**. (DEIR p. 4.3-82.) As explained in Section 4, “Statement of Overriding Considerations”, the environmental, economic, legal, social, technological, and other benefits outweigh and override the remaining significant impacts related increased traffic on City of Roseville intersections under 2035 cumulative conditions.

Impact 4.3-17 (Increased Traffic on Placer County, Sutter County, Sacramento County, or City of Lincoln Intersections Under 2035 Cumulative Conditions): The Proposed Project would result in operational degradation at two intersections in Placer County during the AM peak hour under 2035 cumulative conditions.

Mitigation Measure 4.3-3(c) and (h) is set forth in full in Section 3.8.3 in relation to Impact 4.3-5.

Finding: *Changes or alterations which avoid or substantially lessen the significant environmental effect as identified in the final EIR are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.*

The Proposed Project would result in traffic volume increases on a number of intersections in surrounding jurisdictions under 2035 Cumulative Conditions. The Proposed Project would cause significant intersection degradations to the below Placer County facilities during the AM peak hour. This is considered a **significant** impact.

AM Peak Hour

- Cook Riolo Rd/PFE Rd (LOS F operations exacerbated)
- N. Foothills Blvd/Athens Avenue (LOS F operations exacerbated)

Mitigation Measure 4.3-3(c) would reduce impacts at the Cook-Riolo Road/PFE Road intersection under 2035 Cumulative Plus Project Conditions. Mitigation Measure 4.3-3(h) would restore operations at the N. Foothills Boulevard/Athens Avenue intersection to LOS A during the AM peak hour and LOS D during the PM peak hour under 2035 Cumulative Plus Project Conditions. However, these improvements are not included in any existing fee program. Further, this mitigation requires the City of Roseville to negotiate in good faith with Placer County to identify the Proposed Project’s fair share funding contribution. Because the City does not have control over improvements on Placer County facilities, the City must conservatively assume that the impact to Cook Riolo Road/PFE Road and N. Foothills Boulevard/Athens Avenue intersections would be **significant and unavoidable**, despite the City’s own commitment to work with Placer County. The City would not have control or authority over the timing or implementation of Mitigation Measure 4.3-3(c) and (h). Consistent with CEQA Guidelines section 15091, subdivision (a)(2) the City concludes that other agencies can and should cooperate with the City in implementing the mitigation. The agencies with jurisdiction over these off-site elements can and should implement

Mitigation Measure 4.3-3(c) and (h) which would reduce impacts or mitigate impacts to a less-than-significant level. (DEIR 4.3-92)

Impact 4.3-20 (Increased Traffic Volumes on State Highways Under 2035 Cumulative Conditions): Increased traffic volumes from the Proposed Project would result in freeway operation degradation during the AM peak hour.

Mitigation Measure 4.3-7 State Facilities: Payment of Fees for State Roadway Segments is set forth in full in Section 3.8.3 in relation to Impact 4.3-8.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

The Proposed Project would cause cumulatively significant free segment degradations to the below Caltrans facilities. This is considered a **significant** impact.

AM Peak Hour

- SB SR 65 from Ferrari Ranch Road to Lincoln Boulevard (LOS E to F)
- SB SR 65 from Twelve Bridges Drive to Placer Parkway (LOS E to F)

Mitigation Measure 4.3-7 would reduce impacts on the above-listed freeway segments to acceptable levels by requiring the Applicant to pay the Highway 65 JPA and the SPRTA fees. The Highway 65 JPA Fee assesses fees on new development for the cost of interchange improvements along SR 65 and the SPRTA fee provide funding for regional projects such as the SR 65 Widening and Placer Parkway. However, the remaining funding necessary to construct the SR 65 Widening Project has not been identified. No improvements within the SR 65 study area are included in the Tier 1 project list in SACOG's MTP/SCS. Without funding for the improvements identified in Mitigation Measure 4.3-7, mitigation to a less-than-significant level is not possible while still allowing implementation for the specific plan. Because it is impossible to allow development of the Proposed Project without impacting the identified freeway segments and mitigation of this impact to a less-than-significant level is infeasible, impacts to SR 65 would remain **significant and unavoidable**. (DEIR p. 4.3-61.) As explained in Section 4, "Statement of Overriding Considerations," the environmental, economic, legal, social, technological, and other benefits outweigh and override the remaining significant impacts related to increased highway traffic volumes.

3.8.4. Air Quality

Impact 4.4-1 (Generate Short-Term Construction Related Emissions of Criteria Air Pollutants): Emission of construction-related criteria air pollutants could violate or contribute substantially to an existing or projected air quality violation, and/or expose sensitive receptors to substantial pollutant concentrations.

Mitigation Measure 4.4-1: Measures to Reduce Short-Term Construction-Related Emissions requires the following mitigation measures shall be implemented to reduce short-term construction-related air quality impacts:

- a. Prior to approval of Grading or Improvement Plans, (whichever occurs first), on project sites greater than five acres, the Applicant shall submit to PCAPCD a Construction Emission / Dust Control Plan within 30 days prior to groundbreaking. If the PCAPCD does not respond within 20 days, the plan shall be considered approved. The applicant shall provide written evidence, provided by the PCAPCD, to the City that the plan has been submitted to PCAPCD. It is the responsibility of the Applicant to deliver the approved plan to the local jurisdiction. The applicant shall not break ground prior to receiving District approval of the Construction Emission / Dust Control Plan, and delivering that approval to the local jurisdiction issuing the permit, unless the PCAPCD does not respond within 20 days of submission of the plan, and the plan is deemed approved.
- b. The following shall be included in the Dust Control Plan:
 - During construction, emissions of fugitive dust from any active operation, open storage pile, or disturbed surface area, shall be controlled so that dust does not remain visible in the atmosphere beyond the boundary line of the emission source.
 - When wind speeds result in dust emissions crossing the property line, and despite the application of dust control measures, grading and earthmoving operations shall be suspended and inactive disturbed surface areas shall be stabilized.
 - Fugitive dust generated by active operations, open storage piles, or from a disturbed surface area shall not result in such opacity as to obscure an observer's view to a degree equal to or greater than does smoke as dark or darker in shade as that designated as No. 2 on the Ringlemann Chart (or 40 percent opacity).
 - All exposed soils be watered a minimum of once every two hours of active operation or sufficiently often to keep the area adequately wetted.
 - Any visible track-out on a paved road where vehicles enter and exit the work area must be removed at the end of the workday or at least on time per day. Removal shall be accomplished by using wet sweeping or a HEPA filter equipped vacuum device. Dirt from vehicles exiting shall be removed through the use of a gravel pad, a tire shaker, a wheel wash system, or a pavement extending for not less than 50 feet from the intersection with the paved public road.
- c. Include the following standard note on the Grading or Improvement Plan: The prime contractor shall submit to the District a comprehensive inventory (i.e., make, model, year, emission rating) of all the heavy-duty off-road equipment (50 horsepower or greater) that will be used in aggregate of 40 or more hours for the construction project. If any new equipment is added after submission of the

inventory, the prime contractor shall contact the PCAPCD prior to the new equipment being utilized. At least three business days prior to the use of subject heavy-duty off road equipment, the project representative shall provide the District with the anticipated construction timeline including start date, name and phone number of the property owner, project manager and on-site foreman.

- d. Prior to approval of Grading or Improvement Plans, whichever occurs first, the applicant shall provide a written calculation to the PCAPCD for approval by the District demonstrating that the heavy-duty (50 horsepower or greater) off-road vehicles to be used in the construction project, including owned, leased and subcontractor vehicles, will achieve a project wide fleet-average 20 percent NOx reduction and 45 percent particulate reduction as required by CARB. Acceptable options for reducing emissions may include use of late model engines, low-emission diesel products, alternative fuels, engine retrofit technology, after-treatment products, and/or other options as they become available.
- e. In order to control dust, operational watering trucks shall be on-site during construction hours. In addition, dry, mechanical sweeping is prohibited. Watering of a construction site shall be carried out in compliance with all pertinent PCAPCD rules (or as required by ordinance within each local jurisdiction).
- f. Include the following standard notes on the Improvement/Grading Plan:
 - During construction the contractor shall utilize existing power sources (e.g., power poles) or clean fuel (i.e. gasoline, biodiesel, natural gas) generators rather than temporary diesel power generators.
 - During construction the contractor shall minimize idling time to a maximum of 5 minutes for all diesel-powered equipment.
- g. Signs shall be posted in the designated queuing areas of the construction site to remind off-road equipment operators that idling time is limited to a maximum of 5 minutes.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

Construction-related emissions are intermittent and temporary in nature. Construction-related activities associated with the Proposed Project would generate emissions of criteria air pollutants (PM10 and PM2.5) and ozone precursors (ROG and NOx) from site preparation (e.g., excavation, grading, and clearing), off- road equipment, material transport, and worker vehicles, vehicle travel on unpaved roads, paving, and application of architectural coatings.

Emissions of fugitive PM10 and PM2.5 are associated primarily with earth-moving activities during site preparation and grading. The generation of dust during construction activities could adversely affect sensitive receptors and construction workers by exacerbating existing respiratory

problems such as asthma. Dust can also adversely affect children and the elderly who are more susceptible to respiratory illnesses. The quantity of PM₁₀ and PM_{2.5} emissions vary with the soil silt content, soil moisture, wind speed, acreage of disturbance area, and on- and off-site vehicle miles traveled. Exhaust from diesel equipment and worker commute trips contribute to project-related PM₁₀ and PM_{2.5} emissions. Emissions of ozone precursors (NO_x and ROG) are emitted by off-road construction equipment exhaust. Worker commute trips and other construction-related activities (application of architectural coatings, such as paint) also contribute to project-related construction emissions.

Construction-related air quality impacts were determined by comparing project-related emissions with applicable PCAPCD significance thresholds. Unmitigated construction-related activities would result in ROG and NO_x emissions that exceed PCAPCD's significance thresholds of 82 lb/day; therefore, construction-related criteria air pollutants emissions could violate or contribute substantially to an existing or projected air quality violation, and/or expose sensitive receptors to substantial pollutant concentrations. This is considered a **significant** impact.

Mitigation Measure 4.4-1 specifies dust and construction control measures that would reduce emissions from construction activities. ROG, NO_x, CO, PM₁₀, and PM_{2.5} emissions would be reduced with the implementation of Mitigation Measure 4.4-1, but ROG and NO_x emissions would not be reduced to levels that are below PCAPCD thresholds. Therefore, mitigation to a less-than-significant level is not possible while still allowing for implementation of the specific plan. Because it is not possible to allow development of the Proposed Project without short-term impacts to air quality and mitigation of this impact to a less-than-significant level would be infeasible, this impact is **significant and unavoidable**. (DEIR, p. 4.4-26.) As explained in the "Statement of Overriding Considerations", the environmental, economic, legal, social, technological, and other benefits outweigh and override the remaining significant impacts related to construction-related emissions.

Impact 4.4-2 (Generate Long-Term Operational Related (Regional) Emissions of Criteria Air Pollutants): NO_x, ROG and PM₁₀ emissions from area, energy, and mobile sources associated with operation of the Proposed Project at full buildout would exceed the PCAPCD thresholds of 82 pounds per day. Emissions from stationary sources would be additive to mobile source emissions, which exceed PCAPCD thresholds for NO_x, ROG and PM₁₀.

Mitigation Measure 4.4-2 Project Measures to Reduce Operational Emissions

Following receipt of an application for a Tentative Map (excluding the Large Lot Subdivision Map), Design Review Permit, conditional use permits and/or any other discretionary permits, the City will forward an early consultation notice to the PCAPCD. Where the PCAPCD provides comments on a specific development proposal, the City shall consult with PCAPCD and the developer to incorporate measures recommended by the PCAPCD and agreed to by the City into the project. Where the PCAPCD does not provide comment on a specific development proposal,

the City shall incorporate measures that reduce vehicle emissions and operation emissions from the proposed development. This measure will be implemented through project design, conditions of approval, noticing and disclosure statements, or through the City's plan check and inspection processes. This process is intended to ensure that best available and practical approaches are used to reduce operational emissions in specific tentative map and design review permit applications. The following is a listing of measures that shall be implemented for the purpose of reducing vehicle and operational emissions, unless the applicant provides an analysis that demonstrates to the City's satisfaction that the measure is infeasible or other measure is comparably effective. If the applicant demonstrates that any particular measure in the list below is infeasible for a proposed project to which it would otherwise be applicable, the applicant must provide an analysis supported by substantial evidence demonstrating that a replacement measure is comparably effective.

- Provide tree plantings that meet or exceed the requirements of the City's Community Design Guidelines to provide shading of buildings and parking lots.
- Landscape with native drought-resistant plants (ground covers, shrubs and trees) with particular consideration of plantings that are not reliant on gas-powered landscape maintenance equipment.
- Require all flat roofs on non-residential structures to have a white or silver cap sheet to reduce energy demand.
- Provide conductive/inductive electric vehicle charging station and signage prohibiting parking for non-electric vehicles within designated spaces within non-residential developments.
- Provide vanpool parking only spaces and preferential parking for carpools to accommodate carpools and vanpools in employment areas (e.g. community commercial, business-professional uses)
- All truck loading and unloading docks shall be equipped with one 110/208 volt power outlet for every two-dock doors. Signs shall be posted stating "Diesel trucks are prohibited from idling more than five minutes and trucks requiring auxiliary power shall connect to the 110/208-vot outlets to run auxiliary equipment".
- Design streets to maximize pedestrian access to transit stops.
- Require site design to maximize access to transit lines, to accommodate bus travel, and to provide lighted shelters at transit access points.
- Develop the plan consistent with the higher residential densities (within approved residential density ranges of zone) provided around the village nodes and transit corridors.
- Participate in Roseville Electric incentive programs for energy-efficient development where feasible if available at the time of construction.
- Ten percent of the residential units shall be designated as low to very-low income residential units.
- A pedestrian access network shall link areas of the project site with other land uses.

- Electric landscape maintenance equipment shall be utilized to the extent feasible on parks and public/quasi-public lands.
- Design buildings to meet the 2013 Title 24 Energy Efficiency Standards (which is a 25% reduction below 2010 Title 24 Energy Efficiency Standards).
- Ensure that all area lighting installed on the site shall be considered high efficiency lighting. All public street lighting shall meet the lighting standards of Roseville Electric at the time of construction.
- Utilize reclaimed water for irrigation of all non-single family areas within the project site, including the school, parks, paseos, roadway landscaping and commercial landscaping.
- Reduce the area of turf allowed consistent with the City's Water Efficient Landscape Ordinance and the Water Conservation Strategy (see Appendix G).
- Install water efficient landscape irrigation systems at all public land uses.

Measures for Residential Units:

- Require electrical outlets be installed on the exterior walls of both the front and back of residences to promote the use of electric landscape maintenance equipment.
- Require every garage of each single family home to be considered "Electric Vehicle Ready". This by definition is not limited to, but includes a conduit raceway to a spare electric box in the garage that is sized for a future minimum 50-amp 220v outlet. A 220v breaker space must be available in the electrical panel.
- Require installation of a gas outlet in the rear of residential buildings for use of outdoor cooking appliances, such as gas burning barbeques.
- Require installation of low NOx hot water heaters (beyond District Rule 246 requirements)
- Prior to approval of Tentative Maps: provide notice to homebuyers through CC&Rs or other mechanisms to inform them that only gas fireplaces are permitted.
- The applicant shall ensure that builders offer only energy efficient appliances for installation in residential units, including Energy Star refrigerators, clothes washers, dishwashers, and ceiling fans.
- Prior to building permit approval, the applicant shall show, on the plans submitted to the Building Department, provisions for construction of new residences, and where natural gas is available, the installation of a gas outlet for use with outdoor cooking appliances, such as a gas barbecue or outdoor recreational fire pits.

Mitigation Measure 4.4-3 Off-Site Mitigation for Operational Emissions

Prior to the issuance of building permits, in order to mitigate the contribution to long-term emissions of pollutants, subject to the PCAPCD's review and approval, the applicant shall either:

- a. Establish mitigation on-site by incorporating design features within the project. This may include, but not be limited to: “green” building features such solar panels, energy efficient heating and cooling, exceeding Title 24 standards, bike lanes, bus shelters, etc as described in Mitigation Measure 4.4-3. The specific amounts of “credits” received shall be established and coordinated through the PCACPD; or
- b. Establish mitigation off-site within the same region (i.e., east or west Placer County) by participating in an offsite mitigation program, coordinated through the District. Examples include, but are not limited to: participation in a “Biomass” program that provides emissions benefits; retrofitting, repowering, or replacing heavy duty engines from mobile sources (e.g., buses, construction equipment, on road haulers); or other programs that the project proponent may propose to reduce emissions; or
- c. Participate in the District’s Offsite Mitigation Program (Resolution Number 01-06) by paying fees equal to the project’s contribution of pollutants (ROG and NOx) in excess of the threshold of 82 lbs per day. The estimated payment for the Proposed Project is \$885,870 based on a rate of \$18,260 per ton for a one year period. The actual amount to be paid shall be determined, and satisfied pursuant to current California Air Resource Board guidelines, at the time of recordation of the Final Map or issuance of Building Permits; or
- d. Any combination of a, b, or c, calculated to reduce or off-set the project’s emissions above thresholds, and as determined feasible by the Director of the PCAPCD.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

Area and Mobile Source Emissions

Project-related NO_x, ROG and PM₁₀ emissions from area and mobile sources would exceed the PCAPCD thresholds of 82 pounds per day. Therefore, area and mobile source emissions from project operation would result in a **significant impact** to air quality.

The project design is consistent with SACOG’s Blueprint planning principles and incorporates new urbanism design concepts that increase the walkability and accessibility of land uses and results in land uses that are more proximate to one another and accessible to services and jobs. A new urbanism community such as this is more accessible by non-automotive transportation methods i.e., walking, bicycling) than a more conventional suburban community, and thus results in fewer project-wide vehicle miles traveled than a more conventional community.

Mitigation Measure 4.4-2 would establish mitigation on-site by incorporating design features within the project including but not limited to “green” building features such solar panels, energy efficient heating and cooling, exceeding Title 24 standards, bike lanes, and bus shelters. However, as shown in Table 4.4-8, it is estimated that project related emissions would still exceed PCAPCD recommended significance thresholds after on-site mitigation. Mitigation Measure 4.4-3 is

recommended to off-set project emissions by establishing mitigation off-site or through participation in PCAPCD's mitigation program. While Mitigation Measures 4.4-2 and 4.4-3 would reduce operational emissions, mitigation to a less-than-significant level is not possible while still allowing for implementation of the specific plan. Because it is impossible to allow for development of the Proposed Project without exceeding PCAPCD recommended significance threshold for criteria air pollutants and mitigation of this impact to a less-than-significant level would be facially infeasible, this impact is **significant and unavoidable**. As explained in Section 4, "Statement of Overriding Considerations", the environmental, economic, legal, social, technological, and other benefits outweigh and override the remaining significant impacts related to criteria air pollutants from area and mobile sources.

Stationary Source Emissions

The Proposed Project may include commercial stationary sources of pollutants that would be required to obtain permits to operate under PCAPCD Rule 501-General Permit Requirements and Rule 507-Federal Operating Permit Program. These sources include, but are not limited to, diesel-engine generators for emergency power generation; central heating boilers; kitchen equipment in restaurants; and dry cleaning equipment. The permit process would assure that these sources would be equipped with the required emission controls and individually would comply with permitting requirements. However, collectively, these stationary sources would be additive with the above-described area and mobile source emissions estimates. This would result in a **significant** impact.

As described above, Mitigation Measure 4.4-2 would establish mitigation on-site through design features, and Mitigation Measure 4.4-3 is recommended to off-set project emissions by establishing mitigation off-site through participation in PCAPCD's mitigation program. Mitigation Measures 4.4-2 and 4.4-3 represent all feasible mitigation. Therefore, mitigation to a less-than-significant level is not possible while still allowing for implementation of the specific plan. PCAPCD recommended significance threshold for criteria air pollutants and mitigation of this impact to a less-than-significant level would be facially infeasible, this impact is **significant and unavoidable**. (DEIR p. 4.4-29.) As explained in Section 4, "Statement of Overriding Considerations", the environmental, economic, legal, social, technological, and other benefits outweigh and override the remaining significant impacts related to criteria air pollutants from stationary sources.

Impact 4.4-4 (Exposure to Toxic Air Contaminants): The Community Commercial areas within the project site could include facilities that would emit TACs, such as fueling stations, in close proximity to proposed or existing sensitive receptors.

Mitigation Measure 4.4-4 Screen Health Risks

- a. The siting of proposed land use types, including fueling facilities and other stationary source/industrial land use types, within the project site shall meet the minimum screening

buffer recommendations within the applicable CARB Air Quality and Land Use Handbook in effect at the time of building permit issuance. Within the current (April 2005) Handbook, this would require that sensitive land uses, including residential and school uses, be located greater than 50 feet from the fence line of typical gas dispensing facilities, and greater than 300 feet from large gasoline dispensing facilities, defined as a facility with a throughput of 3.6 million gallons per year or greater.

- b. For projects that include stationary sources of air pollutants or TACs e.g., gasoline dispensing facility, auto painting, dry cleaning, large HVAC units, etc.), a copy of the Authority to Construct (ATC) permit from PCAPCD shall be provided to the City prior to the issuance of a Certificate of Occupancy.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

The Community Commercial areas within the project site could include facilities that would emit TACs, such as fueling stations, in close proximity to proposed or existing sensitive receptors. This is considered a **potentially significant** impact.

Mitigation Measure 4.4-4 requires that any large gas station (defined as a facility with a throughput of 3.6 million gallons per year or greater) to be established within the project site be located a certain distance from proposed sensitive receptors that meets the applicable CARB Land Use Planning Handbook recommendations. Under the current CARB Land Use Planning Handbook, this would require a separate of 300 feet. Additionally, any future proposed facility or equipment that may emit pollutants from a stationary source into the atmosphere must first obtain an Authority to Construct permit from the PCAPCD. The PCAPCD reviews each proposed use and if it is determined that there are potential risks, a risk assessment and menu of site specific measures that would lessen impacts associated with TACs would be required. The PCAPCD issues permits and monitors new and modified sources of air pollutants to ensure compliance with national, state, and local emission standards that govern TAC sources. Therefore, because new sensitive land uses within the project site, including the elementary school, would meet the siting recommendations within the CARB Land Use Planning Handbook with respect to buffer distances from potential TAC sources, and future sources of TACs would be subject to compliance with existing rules and regulations that govern TACs through the PCAPCD permitting and monitoring process, this impact would be **less than significant** after mitigation. (DEIR 4.4-33)

Impact 4.4-5 (Exposure of Sensitive Receptors to Odors): The Proposed Project would result in the establishment of sensitive receptors in proximity to existing and future odor sources.

Mitigation: In light of known economic, legal, social, technological, or other considerations, no feasible or potentially feasible measures to mitigate this impact is identified in the EIR.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

The occurrence and severity of odor impacts depend on numerous factors, including the nature, frequency, and intensity of the source; wind speed and direction; and the presence of sensitive receptors. Although offensive odors rarely cause any physical harm, they still can be unpleasant, leading to considerable distress and often generating citizen complaints to local governments and regulatory agencies.

The Proposed Project would result in the establishment of sensitive receptors in proximity to existing and future odor sources, including the PGWWTP, WRSL, Materials Recovery Facility (MRF), industrial land uses, and agricultural uses. PCAPCD Rule 205 provides that air contaminants emitted by any person shall not cause annoyances, and the PCAPCD provides an on-line complaint website and phone number if any resident experiences odor concerns. Also, disclosures will be provided to buyers and occupants of property in the project site (as embodied in the conditions, covenants, and restrictions [CC&Rs]), to ensure that residents and property owners are informed of the proximity of the PGWWTP, WRSL, and agricultural uses and the associated potential for nuisance odors. The proximity of the project site to odor-generating land uses is closer than the buffer distances recommended within the PCAPCD CEQA Air Quality Handbook; therefore, it is possible that the Proposed Project could expose sensitive receptors to objectionable odors. This is considered a significant impact. There is no feasible mitigation to reduce this impact while still allowing for implementation of the specific plan. Because it is impossible to allow development of the Proposed Project without exposing sensitive receptors to odor nuisances and mitigation of this impact to a less-than-significant level would be infeasible, this impact is considered to be **significant and unavoidable**. (DEIR p. 4.4-35.) As explained in Section 4, “Statement of Overriding Considerations”, the environmental, economic, legal, social, technological, and other benefits outweigh and override the remaining significant impacts related to exposure of sensitive receptors to odors.

Impact 4.4-6 (Consistency with Plans and Policies): Emissions associated with development of the Proposed Project area are not accounted for in the SIP and has the potential to hinder PCAPCD’s ability to have the region re-designated as in attainment with regards to the NAAQs and CAAQs.

Mitigation Measure 4.4-1 Measures to Reduce Short-Term Construction Related Emissions is set forth in full in Section 3.8.4 in relation to Impact 4.4-1.

Mitigation Measure 4.4-2 Project Measures to Reduce Operational Emissions is set forth in full in Section 3.8.4 in relation to Impact 4.4-2.

Mitigation Measure 4.4-3 Off-Site Mitigation for Operational Emissions is set forth in full in Section 3.8.4 in relation to Impact 4.4-3.

Finding: *Changes or alterations which avoid or substantially lessen the significant environmental effect as identified in the final EIR are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.*

Operational emissions associated with development of the Proposed Project would exceed the PCAPCD thresholds for criteria pollutants. The Proposed Project is not currently included in the City of Roseville or Placer County General Plans. As a result, the emissions associated with the development of the Proposed Project area are not accounted for in the SIP. Therefore, growth associated with the annexation area has the potential to hinder the PCAPCD's ability to have the region re-designated as in attainment with regards to the NAAQS and CAAQS. This is considered a **significant** impact.

Mitigation measures described in the previous impact discussions would reduce air quality emissions, but not to levels consistent with the current SIP. If the Proposed Project is approved and included in the City's General Plan, it will eventually be included in the SIP when it is next updated so that a revised emissions budget and attainment strategy can be implemented. However, CARB is the lead agency for all purposes with regard to the SIP, and the City would have not have control or authority over the timing or implementation of the amendment of the SIP. With mitigation this impact remains **significant and unavoidable** because amending the SIP is not within the jurisdiction or control of the City. (DEIR p. 4.4-38)

Impact 4.4-7 (Result in a Cumulatively Considerable Net Increase in Criteria Pollutants): Emissions associated with development of the Proposed Project area are not accounted for in the SIP and has the potential to hinder PCAPCD's ability to have the region re-designated as in attainment with regards to the NAAQS and CAAQS.

Mitigation Measure 4.4-1 Measures to Reduce Short-Term Construction Related Emissions is set forth in full in Section 3.8.4 in relation to Impact 4.4-1.

Mitigation Measure 4.4-2 Project Measures to Reduce Operational Emissions is set forth in full in Section 3.8.4 in relation to Impact 4.4-2.

Mitigation Measure 4.4-3 Off-Site Mitigation for Operational Emissions is set forth in full in Section 3.8.4 in relation to Impact 4.4-3.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

Past, present, and future development projects contribute to a region's air quality conditions on a cumulative basis. Therefore, by its very nature, air pollution is largely a cumulative impact. No single project is sufficient in size to by itself result in non-attainment of the NAAQS or CAAQS.

Implementation of the Proposed Project combined with the proposed developments within the region could lead to cumulative impacts to air quality. Operational activities of the Proposed Project in the year 2034 would result in emissions of ROG, NO_x, PM₁₀, and PM_{2.5} emissions, which are assumed to be pollutants of concern in the year 2034. The majority of ROG, NO_x, PM₁₀, and PM_{2.5} emissions would be generated by vehicle trips associated with residents, visitors, and workers at the project site. Consumer products (e.g., cleaning products, aerosol sprays, automotive products) used by residents, visitors, and workers would also contribute ROG and NO_x emissions. Lesser sources of precursors would include energy use (fuel combustion for heating and cooling of buildings).

Project-related NO_x and ROG emissions would exceed the PCAPCD project specific thresholds of 82 pounds per day. Additionally, as discussed above, the Proposed Project is not consistent with the SIP. Therefore, the Proposed Project's contribution to cumulative air quality impacts is potentially **significant**. With the implementation of Mitigation Measure 4.4-2 cumulative emissions of NO_x and ROG would not be reduced to below the PCAPCD thresholds. Mitigation Measure 4.4-3 is recommended below to further reduce project-related emissions.

Implementation of Mitigation Measures 4.4-2 and 4.4-3, which require a number of measures to reduce vehicular and area source emissions, would reduce the amount of emissions generated by the Proposed Project. The ARSP also includes a variety of policies that would promote the use of alternative forms of transportation and pedestrian access to commercial and office uses within the project site. However, because air emissions associated with the Proposed Project are not accounted for in regional air quality attainment plans, and Proposed Project emissions would still exceed PCAPCD thresholds, development would contribute considerably to the regional degradation of air quality. Therefore, mitigation to a less-than-significant level is not possible while still allowing for implementation of the specific plan. This, because it is impossible to allow for development of the Proposed Project without contributing to cumulative air quality impacts and mitigation of this impact to a less-than-significant level would be infeasible, the Proposed Project's contribution in combination with other reasonably foreseeable development would be cumulatively considerable and would result in a **significant and unavoidable** impact to air quality. (DEIR p. 4.4-39.)

3.8.5. Climate Change and Greenhouse Gas Emissions

Impact 4.5-1 (Generate a Substantial Contribution to GHG Emissions that Conflicts with an Applicable Plan or Policy): GHG emissions from construction and operation of the Proposed Project would contribute to the cumulative impact of global climate change.

Mitigation Measure 4.5-1 Measures to Reduce GHG Emissions

Implementation of the Air Quality Mitigation Measures 4.4-1 (set forth in full in Section 3.8.4 in relation to Impact 4.4-1 and 4.4-2) would reduce operational and construction-related emissions of criteria air pollutants and precursors, and would also act to reduce GHG emissions associated

with project construction and operation. The requirements of Mitigation Measure 4.4-2 would achieve a 21 percent reduction in GHG emissions over BAU.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

The Placer County General Plan currently designates the project site as agriculture/timberland. The majority of the project site is undeveloped and has historically been used for agricultural or grazing activities. Because the project site is largely undeveloped, and there currently are no significant GHG-producing agricultural operations other than seasonal cattle grazing, the existing GHG emissions on the project site are conservatively considered zero. The Proposed Project would result in the urbanization of the project site and development of residential, commercial and recreational uses that would generate short-term construction and long-term operational emissions of GHGs. Construction emissions would be associated with vehicle engine exhaust from construction equipment, vendor trips, and employee commute trips. Operational emissions would be associated with area, mobile, and stationary sources. Area-source emissions would be associated with activities such as natural gas use for space and water heating, maintenance of landscaping and grounds, waste disposal, and other sources. Mobile-source emissions of GHGs would include project-generated vehicle trips for residents and employees of, and visitors to the project site. In addition, increases in stationary-source emissions could occur by off-site utility providers in order to generate electricity to supply power to the proposed uses within the Plan Area (power produced and/or secured by Roseville Electric). This would result in a contribution to the cumulative impact of global climate change and may result in a **potentially significant** impact.

In 2004 SACOG adopted the Preferred Blueprint Scenario for 2050 (Blueprint), which examined how transportation and land use planning could be better linked to accommodate future growth while reducing transportation congestion. In support of this regional effort and to help foster development patterns that incorporate Blueprint smart growth principles, in May 2005, the City adopted implementation strategies to achieve Blueprint project objectives to guide development projects in Roseville. These implementation strategies to give the City a means to implement the “smart growth” principles derived from the Blueprint effort in newly developing areas. To this end, the Proposed Project incorporates smart growth elements, consistent with the Blueprint smart growth principles and the City’s Blueprint implementation strategies. In addition to density, other objectives include connectivity of neighborhoods, adjacencies of uses, and opportunities for alternative modes of travel.

The total annual 2020 BAU Project emissions would be approximately 70,434 MT of CO₂e per year. As described above, the 2020 BAU Project emissions reflect the basic characteristics of the Proposed Project and do not account for GHG emission reductions that would result from plans, programs and policies implemented as a result of CARB’s AB 32 Scoping Plan. The 2020 ABAU Project Emissions, which do account for GHG emission reductions that would result from plans,

programs and policies implemented as a result of CARB's AB 32 Scoping Plan, are estimated to be 57,132 MT of CO₂ per year, which is 18.9 percent lower than 2020 BAU Project emissions. ABAU emission reductions from the BAU scenario would be accomplished through a combination of energy efficiency measures that have been implemented by the CEC and CARB (California Building Efficiency Standards [2013 Title 24], and Low Carbon Fuel Standards). Since the ABAU Project emissions would not meet the 21 percent less than BAU threshold, this is considered a significant impact. With the incorporation of Mitigation Measure 4.5-1, which includes various project design measures consistent with the City's Blueprint implementation strategies, the total annual 2020 ABAU Project Mitigated emissions would be reduced by approximately 5,659 MT of CO₂e per year, or an additional 8.1 percent.

With implementation of Mitigation Measure 4.5-1, the Proposed Project's reduction in GHG emissions would exceed the 21 percent reduction over BAU for the year 2020 established within the CARB 2011 reapproved Scoping Plan.

In addition to the GHG reduction goals for 2020 established by AB 32, EO S-3-05 establishes a GHG reduction target of 80 percent below 1990 levels by 2050, and EO B-30-15 establishes a California GHG reduction target of 40 percent below 1990 levels by 2030 as an intermediate target to meet the ultimate 2050 goals. The CalEEMod model does not account for future programs that may be developed by the state in an effort to meet these targets, so it is not possible to accurately calculate emission estimates for these years. There are several local land use plans that have been adopted in part to reduce GHG emissions within the region; in particular, the Sacramento Region Blueprint, SACOG MTS/SCS, and the City of Roseville Communitywide Action Plan. While the Proposed Project includes many features that meet the objectives of these plans, it was not included in the growth assumptions of these plans, and thus has not been factored in to regional GHG emission estimates and reduction strategies.

Because the Proposed Project has not been factored into regional plans established to meet the goals of AB 32, including the MTP/SCS, and due to the current disparity between the amount of existing global GHG emissions and the goals of AB 32 and EO S-3-05, even with mitigation measures incorporated, the Proposed Project would contribute a cumulatively considerable, incremental contribution to global GHG emissions and, therefore, would result in a **significant and unavoidable** impact. (DEIR p. 4.5-22)

3.8.6. Noise

Impact 4.6-1 (Short-Term Noise Generated by Construction Activity): Construction activities could potentially expose sensitive receptors to noise levels in excess of the applicable noise standards.

Mitigation Measure 4.6-1 Construction Noise Reduction

The following measures shall be implemented to reduce impacts of construction noise:

- Ensure construction activities comply with the requirements of the City of Roseville Noise Ordinance with respect to hours of operation.
- Locate fixed construction equipment such as compressors and generators as far as possible from sensitive receptors. Shroud or shield all impact tools, and muffle or shield all intake and exhaust ports on power construction equipment.
- Designate a disturbance coordinator and conspicuously post this person's number around the project site and in adjacent public spaces. The disturbance coordinator shall receive all public complaints about construction noise disturbances and shall be responsible for determining the cause of the complaint, and implement any feasible measures to be taken to alleviate the problem.
- Well Drilling Construction Noise:
 - To the extent feasible, the on-site ASR well shall be drilled prior to the occupancy of residential units within 500 feet of the well site.
 - Noise curtains shall be utilized during drilling of the well if, at the time of well construction, homes are occupied within 1,000 feet of the well.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

Implementation of the Proposed Project would result in short-term construction activities associated with individual development projects in the project site. These construction activities could potentially expose sensitive receptors to noise levels in excess of the applicable noise standards and/or result in a noticeable increase in ambient noise levels. Construction activities would affect residences south and southeast of the project site. In addition, because construction would occur in phases, some on-site residential uses built during the early phases of the development would be exposed to construction activity noise levels during the latter phases of development. Further, future construction of Placer Parkway would likely occur well after after occupancy of residences within the project site.

Activities involved in construction would generate maximum noise levels, as indicated in Table 4.6-9, ranging from 76 to 90 dB at a distance of 50 feet. Construction activities would be temporary in nature and are anticipated to occur during normal daytime working hours. Noise impacts resulting from construction depend on the noise generated by various pieces of construction equipment, the timing and duration of noise generating activities, and the distance between construction noise sources and noise-sensitive areas. Construction activities would be temporary in nature and are anticipated to occur during normal daytime working hours. A primary project-generated noise source would be truck traffic associated with transport of heavy materials and equipment to and from construction sites. This noise increase would be of short duration, and would occur during daytime hours, pursuant to the requirements of the City of Roseville Noise Ordinance, as outlined below, with the exception of 24-hour drilling activities for the proposed on-

site Aquifer Storage and Recovery (ASR) well. Compliance with the City's Noise Ordinance would ensure that impacts are reduced.

Mitigation Measure 4.6-1 would reduce potential noise impacts associated with construction of the Proposed Project. Construction activities would be temporary in nature, and will comply with the requirements of the City of Roseville Noise Ordinance. In accordance with the Noise Ordinance, construction activities will occur during normal daytime working hours, with the exception of drilling activities for the proposed ASR well, which will require 24-hour drilling activities. Mitigation Measure 4.6-1 requires that, to the extent feasible, the on-site ASR well shall be drilled prior to the occupancy of residential units within 500 feet of the well site, and noise curtains shall be utilized during drilling of the well if, at the time of well construction, homes are occupied within 1,000 feet of the well. However, because the location of the well may shift in the future due to well testing and water quality requirements, implementation of this measure cannot be guaranteed. Therefore, mitigation to a less-than-significant level is not possible while still allowing for implementation of the specific plan. Because it is impossible to allow for the development of the Proposed Project without potentially exposing future residences to noise levels that exceed the City's acceptable noise level standards as a result of 24-hour drilling operations for the ASR well and mitigation of this impact to a less-than significant level would be infeasible, this impact is **significant and unavoidable**. (DEIR p. 4.6-20)

Impact 4.6-2 (Commercial Noise Sources): Commercial uses as part of the Proposed Project could result in off-site noise impacts.

Mitigation Measure 4.6-2 Commercial Noise Controls

For all commercial uses within 500 feet of residential uses, the developer shall implement the following or equally effective measures:

- Where commercial land uses adjoin residential property lines, the following measures shall be included in the design of the commercial use. If the primary noise sources are parking lot noise, HVAC equipment and light truck deliveries, then 6-7 foot tall masonry walls shall be constructed to provide adequate isolation of parking lot and delivery truck activities. HVAC equipment shall be located either at ground level, or when located on roof-tops the building facades shall include parapets for shielding.
- Where commercial uses adjoin common residential property lines, and loading docks or truck circulation routes face the residential areas, the following mitigation measures shall be included in the project design:
 - o Loading docks and truck delivery areas shall be a minimum distance of 211 feet from residential property lines;
 - o Property line barriers shall be eight feet in height. Circulation routes for trucks shall be located a minimum of 80 feet from residential property lines;
 - o Loading dock and truck deliveries shall be limited to daytime hours;

- o All heating, cooling and ventilation equipment shall be located within mechanical rooms where possible;
- o All heating, cooling and ventilation equipment shall be shielded from view with solid barriers;
- o Emergency generators shall comply with the local noise criteria at the nearest noise-sensitive receivers; and
- o In cases where loading docks or truck delivery circulation routes are located less than 211 feet from residential property lines or if nighttime deliveries are required, an acoustical evaluation shall be submitted to the City to verify compliance with the City of Roseville Noise Level Performance Standards. Uses that do not comply with the City of Roseville Noise Level Performance Standards shall not be permitted.
- o Prior to City approval of conditionally permitted uses which include more substantial exterior noise sources such as car washes, automotive repair, and outdoor recreation, a noise study shall be prepared by an acoustical engineer that identifies the necessary measures required to achieve compliance with the City of Roseville Noise Level Performance Standards at the nearest sensitive receptors. The City shall require that the measures identified in the noise study are implemented as a condition of approval of conditional use permits.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Within the project site, commercial uses are proposed on the northeastern corner of Westbrook Boulevard and Road “D,” as well as on the northwestern corner of Westbrook Boulevard and Road “A.” Adjacent to the northern commercial area is a proposed high density residential (HDR) area to the east. The southern commercial area is located adjacent to a proposed medium density residential (MDR) area to the west and HDR area to the north. These commercial areas will be zoned as Community Commercial (CC). The permitted uses under Title 19 (Zoning) of the Roseville Municipal Code primarily include indoor activities, with a few exterior noise sources that could exceed the City’s exterior noise level standards at the boundary line of sensitive residential uses. Examples of exterior noise sources include parking lots, mechanical equipment, drive-through speakers.

No specific site designs are proposed for the commercial center at this time; therefore, noise levels cannot be estimated with any specificity and the effectiveness of specific mitigation cannot be determined at this time. However, exterior noise levels from commercial sources may exceed the City’s 50 dB Leq daytime and 45 dB Leq nighttime noise level standards at distances of up to 376 feet. The exact degree of noise exposure will depend on the specific use. Because the zoning of the commercial uses would allow for certain uses which could generate significant noise levels,

the potential for off-site adverse noise impacts exists, even though it cannot be completely quantified at this time. This is considered a potentially **significant** impact.

Mitigation Measure 4.6-2 requires measures such as shielding (e.g., berms, masonry walls, landscaping), restriction of delivery hours, and screening of heating, ventilation, and air conditioning (HVAC) equipment, to be used to reduce noise levels at residences within 500 feet of commercial uses. Additionally, Mitigation Measure 4.6-2 requires that individual noise studies be prepared for conditionally permitted uses in commercial areas that include more substantial exterior noise sources and measures are implemented as necessary to achieve compliance with the City of Roseville Noise Level Performance Standards at the nearest sensitive receptors. Therefore, with mitigation, this is considered a **less-than-significant** impact. (DEIR 4.6-22)

Impact 4.6-5 (Substantial Permanent Increase in Ambient Noise Levels as a Result of the Existing Plus Project Increase in Traffic Noise): Noise levels on Blue Oaks Boulevard west of Fiddymont Road; Pleasant Grove Road, north of Baseline; and Sunset Boulevard West from Pleasant Grove Road to Amoruso Way, are projected to increase by 8.7 dB, 4.3 dB, and 3.5 dB, respectively, due to development of the Proposed Project.

Mitigation Measure 4.6-3 Traffic Noise Control

The following measures would reduce impacts to off-site sensitive receptors from traffic noise levels:

- West Sunset Boulevard shall be repaved from Pleasant Grove Road to Westbrook Boulevard using OGAC.
- Pleasant Grove Road shall be repaved north of Baseline Road using OGAC.

Finding: *Specific economic, legal, social, technological, other considerations, including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternatives identified in the final EIR.*

The projected noise level increases associated with development of the Proposed Project range from 0.1 to 8.7 dB. Noise levels on Blue Oaks Boulevard west of Fiddymont Road; Pleasant Grove Road, north of Baseline; and West Sunset Boulevard from Pleasant Grove Road to Amoruso Way, are projected to increase by 8.7 dB, 4.3 dB, and 3.5 dB, respectively. These predicted noise level increases would exceed the substantial permanent increase threshold of 3.0 dB. This is a **significant** impact.

A landscaped sound wall/earthen berm combination has already been constructed as part of the West Roseville Specific Plan (WRSP) for the existing residential receptors located along the south side of Blue Oaks Boulevard, west of Fiddymont Road. These noise barriers were based upon projected traffic volumes for cumulative roadway conditions and ensure that exterior and interior traffic noise levels at these sensitive receptors under future conditions do not exceed the City's exterior noise level limits. However, even with these measures, existing receptors would still

experience an 8.7 dB increase in traffic noise levels under Existing Plus Project conditions due to increased traffic volumes on Blue Oaks Boulevard as result of the Proposed Project and this increase cannot be mitigated further. Therefore, mitigation to a less-than-significant level is not possible while still allowing for implementation of the specific plan. Because it is impossible to allow development of the Proposed Project without impacting residential receptors located along the south side of Blue Oaks Boulevard, west of Fiddymont Road, mitigation of this impact to a less-than-significant level is infeasible and this impact is **significant and unavoidable**.

Additional Finding: *Changes or alterations which avoid or substantially lessen the significant environmental effect as identified in the final EIR are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.*

Access to existing residential receptors located adjacent to West Sunset Boulevard from Pleasant Grove Road to Amoruso Way and adjacent to Pleasant Grove Road north of Baseline Road, is provided directly from West Sunset Boulevard and Pleasant Grove Road, respectively. Therefore, the use of noise barriers to mitigate traffic noise is not feasible because the access driveway opening would negate any noise reduction that could otherwise be achieved by a sound wall. However, Mitigation Measure 4.6-3 would achieve a reduction in noise level increases along West Sunset Boulevard and Pleasant Grove Road north of Baseline Road through use of Open Graded Asphalt Concrete (OGAC) along these sections of the roadways.

Mitigation Measure 4.6-3 would reduce the total increase in traffic noise levels along these roadway segments by a minimum of 3.0 dB, reducing the Proposed Project's noise level increase to approximately 0.5 dB on West Sunset Boulevard and 1.3 on Pleasant Grove Road. Because increases of 0.5 dB and 1.3 dB are less than the established 3.0 dB increase threshold, impacts along these roadway segments would be less than significant after mitigation. However, use of OGAC requires improvements to West Sunset Boulevard and Pleasant Grove Road, which are not within the responsibility and jurisdiction of the City. Despite the City's own commitment to work with the appropriate agencies, the City would have control or authority over the timing or implementation of Mitigation Measure 4.6-3. Therefore, the City cannot reasonably assume that Mitigation Measure 4.6-3 would be implemented by the time that the impact would occur. For these reasons, impacts associated with substantial increases in ambient noise levels along West Sunset Boulevard from Pleasant Grove Road to Amoruso Way and Pleasant Grove Road north of Baseline are considered **significant and unavoidable**. Consistent with CEQA Guidelines section 15091, subdivision (a)(2) the City concludes that other agencies can and should cooperate with the City in the use of OGAC to mitigate the impacts occurring in areas under their control. The agencies with jurisdiction over these off-site elements can and should implement Mitigation Measure 4.6-3, which would mitigate this potential impact to a less-than-significant level. (DEIR p. 4.6-29)

Impact 4.6-7 (Substantial Permanent Increase in Ambient Noise Levels as a Result of the 2035 CIP Plus Project Increase in Traffic Noise Outside the Project Site): Noise levels on Sunset Boulevard from Amoruso Way to Westbrook Boulevard are projected to increase by 3.3 dB due to development of the Proposed Project.

Mitigation Measure 4.6.3 Traffic Noise Control is set forth in full in Section 3.8.6 in relation to Impact 4.6.5.

Finding: *Changes or alterations which avoid or substantially lessen the significant environmental effect as identified in the final EIR are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.*

The projected noise level increases associated with development of the Proposed Project range from 0.1 to 3.3 dB. Noise levels on West Sunset Boulevard from Amoruso Way to Westbrook Boulevard are projected to increase by 3.3 dB. This predicted noise level increase would exceed the substantial permanent increase threshold of 3.0 dB. This is a **significant** impact.

Mitigation Measure 4.6-3 would reduce impacts on West Sunset Boulevard by reducing the traffic noise level increase to 0.3 dB or less, resulting in a **less-than-significant** impact along this roadway segment. However, use of OGAC requires improvements to West Sunset Boulevard, which are not within the responsibility and jurisdiction of the City. Despite the City's own commitment to work with the appropriate agencies, the City would have control or authority over the timing or implementation of Mitigation Measure 4.6-3. Therefore, the City cannot reasonably assume that Mitigation Measure 4.6-3 would be implemented by the time that the impact would occur. For these reasons, impacts associated with substantial increases in ambient noise levels along West Sunset Boulevard from Amoruso Way to Westbrook Boulevard under 2035 CIP Plus Project Conditions are considered **significant and unavoidable**. Consistent with CEQA Guidelines section 15091, subdivision (a)(2) the City concludes that other agencies can and should cooperate with the City in the use of OGAC to mitigate the impacts occurring in areas under their control. The agencies with jurisdiction over these off-site elements can and should implement Mitigation Measure 4.6-3, which would mitigate this potential impact to a less-than-significant level. (DEIR 4.6-35)

Impact 4.6-9 (Substantial Permanent Increase in Ambient Noise Levels as a Result of the 2035 Cumulative Plus Project Increase in Traffic Noise Outside the Project Site): Noise levels on Sunset Boulevard from Amoruso Way to Westbrook Boulevard are projected to increase by 3.4 dB due to development of the Proposed Project.

Mitigation Measure 4.6.3 Traffic Noise Control is set forth in full in Section 3.8.6 in relation to Impact 4.6-5.

Finding: *Changes or alterations which avoid or substantially lessen the significant environmental effect as identified in the final EIR are within the responsibility and jurisdiction of another public*

agency and not the agency making the finding. Such changes have been adopted by such other agency or can and should be adopted by such other agency.

The projected noise level increases associated with development of the Proposed Project range from 0.1 to 3.4 dB. Noise levels on West Sunset Boulevard from Amoruso Way to Westbrook Boulevard are projected to increase by 3.4 dB. This predicted noise level increase would exceed the substantial permanent increase threshold of 3.0 dB. This is a **significant** impact.

Mitigation Measure 4.6-3 would reduce impacts on West Sunset Boulevard by reducing the traffic noise level increase to 0.4 dB or less, resulting in a **less-than-significant** impact along this roadway segment. However, use of OGAC requires improvements to West Sunset Boulevard, which are not within the responsibility and jurisdiction of the City. Despite the City's own commitment to work with the appropriate agencies, the City would have control or authority over the timing or implementation of Mitigation Measure 4.6-3. Therefore, the City cannot reasonably assume that Mitigation Measure 4.6-3 would be implemented by the time that the impact would occur. For these reasons, impacts associated with substantial increases in ambient noise levels along West Sunset Boulevard from Amoruso Way to Westbrook Boulevard under 2035 CIP Plus Project Conditions are considered **significant and unavoidable**. Consistent with CEQA Guidelines section 15091, subdivision (a)(2) the City concludes that other agencies can and should cooperate with the City in the use of OGAC to mitigate the impacts occurring in areas under their control. The agencies with jurisdiction over these off-site elements can and should implement Mitigation Measure 4.6-3, which would mitigate this potential impact to a less-than-significant level. (DEIR 4.6-40)

Impact 4.6-10 (Traffic Noise Impacts at Future Noise-Sensitive Land Uses Developed within the Project Site): Residential uses along the future Placer Parkway alignment are predicted to be exposed to interior noise levels of up to 46 dB L_{dn}.

Mitigation Measure 4.6-4 Traffic Noise Attenuation within the Project Site

The following measure shall be implemented to reduce traffic noise impacts:

- A detailed analysis of interior noise levels shall be conducted when building plans are available for the residential uses adjacent to the proposed Placer Parkway alignment. The analysis shall identify noise control measures that are required to achieve compliance with the City of Roseville 45 dB L_{dn} interior noise level standard, such as installation of windows and doors with a STC rating of 30 to 35, and these noise control measures shall be implemented to achieve compliance with the City's standard. Such analysis shall be conducted by a qualified acoustical consultant recognized by the City of Roseville.
- Mechanical ventilation shall be installed in all residential uses adjacent to Placer Parkway to allow residents to keep doors and windows closed, as desired for acoustical isolation.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Noise levels would be above 60 dB along future Placer Parkway in the low density residential (LDR) and MDR areas west of Westbrook Boulevard and the HDR area east of Westbrook Boulevard. However, it is anticipated that noise barriers ranging in height from six to nine feet could be used to reduce exterior noise levels to approximately 61 to 63 dB Ldn at the proposed residential uses located along the future Placer Parkway. The location and final design of noise barriers to address potential impacts from Placer Parkway on future residences within the project site will be determined as part of the environmental review process for the future Placer Parkway project. Although the anticipated noise levels with noise barriers would still exceed the City's 60 dB Ldn exterior noise level standard, they would comply with the City's conditionally acceptable noise level standard of 75 dB Ldn. Achieving the City's 60 dB Ldn standard will not likely be considered feasible using any other practical noise reduction measures because the City has a sound wall height limit of seven feet, so taller sound walls are prohibited in the City. Noise barrier locations will be determined at the time of the final design of Placer Parkway with consideration of access to open space.

Interior noise levels of residential units could exceed the City's 45 dB Ldn interior noise level standard. Modern residential construction typically provides an exterior-to-interior noise level reduction of 25 dB. First floor noise exposures at the residential uses along the project roadways are predicted to range between 18 and 43 dB Ldn. Noise levels at second and third floor levels are typically two to three dB louder, or 21 to 46 dB Ldn. The highest noise levels would occur at the residential uses along the future Placer Parkway alignment. These uses are predicted to be exposed to interior noise levels of up to 46 dB Ldn at second or third floor elevations, which exceeds the City's 45 dB Ldn interior noise level standard. This is considered a **significant** impact.

Mitigation Measure 4.6-4 would reduce interior noise impacts by requiring that detailed interior noise analysis be conducted for residential receptors constructed adjacent to the future Placer Parkway alignment and requiring that mechanical ventilation be installed in residential uses to allow residents to keep doors and windows closed, as desired for acoustical isolation. As described in Mitigation Measure 4.6-4, the interior noise analysis would detail noise control measures required to achieve compliance with the City's 45 dB Ldn interior noise level standard, such as requiring windows and doors on second or third floor residential facades facing Placer Parkway to have a sound transmission class (STC) rating of 30 to 35. With implementation of Mitigation Measure 4.6-4, interior noise levels from traffic within the project site would be **less than significant**. (DEIR 4.6-41)

3.8.7. Vegetation and Wildlife

Impact 4.8-1 (Loss of Federally Protected Wetlands and "Other Waters" of the United States): Construction of the Proposed Project would result in a loss of 18.640 acres of wetlands.

Mitigation Measure 4.8-1(a) Ensure No Net Loss of Wetlands

The City shall not issue a grading permit for the ARSP unless a CWA Section 404 permit is first obtained from the USACE, or an equivalent approval for waters of the State is obtained from the RWQCB. The CWA Section 404 permit process (including Section 7 Consultation under FESA) is the standard method for developing mitigation for projects that affect wetlands and vernal pool species such as special-status plants, vernal pool crustaceans, and Western spadefoot. Through this process, project applicants shall be required to obtain the necessary permits and approvals to implement their Proposed Project while remaining in compliance with CWA and FESA. If a 404 permit is not obtained, the City shall not issue a grading permit for the Proposed Project. The obligation to obtain the 404 permit shall ensure no net loss to federally protected wetlands. After obtaining such a permit, however, the applicant shall demonstrate to the City's Planning Director that they have also achieved no net loss of wetlands. Mitigation shall consist of a combination of the preservation of on-site vernal pool and other wetland habitat and the acquisition of off-site property with existing vernal pool and other wetland habitat for preservation.

Mitigation shall include off-site creation and/or restoration of vernal pool and other wetland habitat, and/or participation in a mitigation credit program from a wetlands mitigation bank approved by the USACE and USFWS. These banks charge fees in exchange for credits that are based upon the mitigation obligation of the applicant. If the applicant chooses to buy mitigation credits, the applicant shall pay fees that shall be used to restore, create, enhance, and/or preserve wetlands at an established mitigation bank. The credits shall be in direct proportion to the wetland impacts resulting from the Proposed Project.

The project applicants have identified appropriate off-site mitigation in the form of preservation, as shown in DEIR Figure 4.8-3. This off-site mitigation, coupled with on-site preservation and avoidance, shall be a component of the required compensation for the Proposed Project. All wetland restoration and creation shall be conducted in a manner consistent with applicable USACE and USFWS mitigation guidelines and policies.

Mitigation Measure 4.8-1(b) Wetland Avoidance/Mitigation Plan

For any wetlands to be restored or created outside of an approved mitigation bank, the Applicant shall submit a Wetland Mitigation Plan to that describes the specific method(s) to be implemented to mitigate for all on-site or off-site project-related impacts. This detailed Wetland Mitigation Plan shall be prepared in accordance with applicable USACE and USFWS policies and regulations, and the City's Grading and Erosion Control Ordinance. A copy of the 404 permit, the biological opinion, and the Wetland Mitigation Plan shall be provided to the City at the time of specific entitlements (grading permit, tentative map, etc), and the Wetland Mitigation Plan shall ensure the following to the satisfaction of the City:

- a) Describe the location of the proposed wetland mitigation site(s), including a detailed map showing the acreage, distribution, and type of wetlands to be restored/created to ensure no net loss in wetland habitat acreage, values and functions. The compensation wetlands shall

be designed, at a minimum, to meet or exceed the functions of the existing wetlands to be impacted.

- b) Include a monitoring plan to assess whether the compensation wetlands are functioning as intended. Specific performance standards for hydrologic, floral, and faunal parameters shall be proposed to determine success of the created wetlands. The monitoring plan shall specify the corrective measures/modifications to be implemented in the event that monitoring indicates that the performance standards are not being met.
- c) Include a long-term maintenance plan for the wetland preservation/mitigation areas describing the measures implemented to assure that they are maintained as wetland habitat in perpetuity.
- d) Require that fencing be installed around all existing wetlands that are within 50 feet of any haul route, spoil zone, stockpile zone, creation zone, or other construction area. The fencing shall be of high visibility material. Fencing shall be placed no closer than 10 feet to the delineated, verified perimeter of wetlands. This fencing shall be maintained until all adjacent construction activities are completed.
- e) A qualified biological resources monitor, approved by the City, shall be on the site(s) at all times when working in the open space corridor or other sensitive areas to ensure compliance with identified mitigation for the duration of all the proposed activities. The biological resources monitor shall submit bi-annual compliance reports to City monitor for review for a period of five years after completion of construction or until all performance standards have been satisfied.
- f) The wetland mitigation site(s) shall be surveyed by a qualified biologist, no more than 30 days prior to the start of construction, for the presence of raptor and federal and state listed bird nesting sites, unless it is determined that construction will occur outside of the breeding season for all species likely to occur on site or observed present. If active nesting sites are observed, all state and federal guidelines pertaining to active nesting sites shall be strictly adhered to in consultation with a qualified biologist.
- g) Applicant shall grant full access to the wetland mitigation site(s) to the City for the monitoring of construction activities and mitigation compliance. Access shall be granted during all construction activities and the City monitor may issue stop work orders if mitigation non-compliance is identified.
- h) Applicant shall specify measures for reuse or disposal of excavated material that is suitable for use in the project site. The plan should minimize the elapsed time between excavation and reuse and provide adequate stockpile coverage and protection from wind and water erosion during the entire storage period. If excavated material is unsuitable for reuse at the project site, the plan shall include specific information regarding the eventual reuse or disposal site, transportation method(s), disposal reuse management, and schedule.
- i) The Wetland Avoidance Mitigation Plan shall include a spill prevention and response plan to the satisfaction of the City.

- j) All disturbed areas shall be re-vegetated by the following methods: hydro seeding, drill seeding, or spreading of upland seed bearing soil. The method of re-vegetation shall be approved by a qualified wetland specialist and the City.
- k) The applicant shall apply non-toxic soil stabilizers according to manufacturer's specifications to all inactive construction areas. Non-toxic binders shall be applied to exposed areas after cut and fill operations and hydro seeded areas. The wetland mitigation site shall be watered as directed by the City of Roseville Public Works Department. The frequency shall be based on the type of operation, and soil and wind exposure.
- l) To reduce air emissions, idling time for all construction vehicles shall be limited to a maximum of 10 minutes. The City may curtail construction during high ambient pollutant concentrations, including but not limited to, ceasing construction during peak-hour vehicular traffic on adjacent or nearby roadways. All land clearing, grading, earth moving or excavation activities shall be suspended when winds exceed 15 mph.
- m) The applicants shall ensure that all inactive storage/stock piles are adequately covered, and that all trucks hauling dirt, sand, soil, or other loose materials also are adequately covered or maintain at least two feet of freeboard (i.e., minimum vertical distance between the top of the load and top of the trailer) in accordance with the requirements of the California Vehicle Code (CVC) section 23114.

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Implementation of the Proposed Project is anticipated to result in the total loss of an estimated 18.640 acres of wetlands and "other waters" of the U.S. The majority of impacts from the Proposed Project will be to seasonal wetland swales, seasonal wetlands, and vernal pools.

Approximately 13.584 acres would be preserved as part of the Proposed Project within areas designated as open space preserve and 1.710 acres of wetlands are avoided by project development; wetlands in other areas are assumed to be filled by development of the Proposed Project. Loss of wetlands would occur as a result of grading in preparation for development, construction of roads and utility corridors, creation of storm water detention basins along stream corridors, and other ground-disturbing activities related to construction. The loss of 18.640 acres of wetlands would have a significant impact to wetlands and waters of the U.S.

Mitigation is proposed to reduce the impacts to waters of the U.S., including vernal pool habitat. The mitigation proposed is typical of minimum requirements of the USACE and USFWS. Mitigation Measure 4.8-1(a), discussed in more detail below, requires vernal pool restoration to be completed in accordance with the "no net loss" performance standard, current USACE and USFWS guidelines, and City General Plan policy as set forth in the Wetlands Mitigation Guidelines. Mitigation Measure 4.8-1 (b) requires the developer to prepare and submit a Wetland Avoidance/Mitigation Plan for any wetlands to be restored or created outside of an approved mitigation bank.

The overall proposed restoration/creation mitigation would be at a minimum ratio of 1:1 which meets or exceeds the City's standards for no net loss. The goal of the ARSP conservation strategy is to achieve no net loss of wetlands through a combination of onsite avoidance and preservation, offsite acquisition, restoration and preservation of existing vernal pool complexes, and purchase of vernal pool credits at an agency-approved mitigation bank. These wetlands, both onsite and offsite, would be preserved and managed in perpetuity to provide for the long-term viability of the protected wetlands.

The components that make up the wetland mitigation include:

Onsite Avoidance and Preservation

The 15.294 acres of on-site avoidance and preservation includes 1.710 acres wetlands and "other waters" of the U.S. within the ARSP Avoidance Area and 13.584 acres of wetlands and "other waters" of the U.S. within the ARSP Open Space Preserve. The wetlands within the preservation areas that are considered to be occupied by vernal pool fairy shrimp shall be located a minimum of 250 feet from all project development. The onsite preservation areas were identified during early discussions with the USFWS, USACE, and CDFW, and these areas were selected to preserve the highest quality wetland resources present within the project site. The preserved areas will be preserved with a Conservation Easement and resources would be managed according to the City's Preserve Area Overarching Management Plan.

Off-Site Compensatory Mitigation

As detailed in the Preliminary Wetland Mitigation Proposal for the ARSP (ECORP, 2014e), mitigation for impacts to waters of the U.S. is proposed to occur at three off-site mitigation properties. These three properties include Mourier East, Mourier West, and Skover (collectively, "Mitigation Properties;" DEIR Figure 4.8-3). The Mitigation Properties were selected for the following reasons: close proximity to the impact sites (within three miles); identical watershed Hydrologic Unit Code as the project site; appropriate soils characteristics; wetland restoration potential; similar habitat function as the project site; the presence of vernal pool fairy shrimp; and the landscape connectivity and proximity to other regional conservation areas. Additionally, the proposed mitigation is consistent with the draft PCCP regional open space planning goals, which strives to make 50,000 to 60,000 acres within the proposed PCCP plan area part of a reserve system to preserve approximately 50 percent of County's remaining vernal pool habitat.

Because the USACE has a no-net loss policy for wetlands subject to its jurisdiction, satisfaction of the "no net loss" performance standard in Mitigation Measure 4.8-1 (a) can be achieved through the 404 permit process. The Section 404 Individual Permit Application has been submitted by the ARSP applicants to the USACE for review. The basic premise of the 404 permit program is that no discharge of material can be permitted into the waters of the U.S. if a practicable alternative exists that is less damaging to the aquatic environment, or if the nation's waters would be significantly degraded. Therefore, applicants for Section 404 permits must show that they have:

- Taken steps to avoid wetland impacts where practicable;
- Minimize potential impacts to wetlands; and
- Provide compensation for any remaining unavoidable impacts through activities to restore or create wetlands.

Under the USACE mitigation policy, restoration of wetland habitats is normally preferred over wetland creation. This approach is consistent with the City/USFWS MOU. The USACE will determine the adequacy of the proposed wetland mitigation, and will require modification of the mitigation plan if it is deemed inadequate. The applicants must obtain a 404 permit prior to discharging any dredged or fill material into any waters of the U.S. Because the 404 permit, in addition to Mitigation Measures 4.8-1(a) and 4.8-1(b), would ensure no net loss of wetlands, impacts would be **less than significant**. (DEIR 4.8-46)

Impact 4.8-2 (Loss of Federally Listed Vernal Pool Crustaceans and their Habitat): Construction of the Proposed Project would result in direct loss and indirect degradation of habitat for federally listed vernal pool crustaceans.

Mitigation Measure 4.8-1(a) Ensure No Net Loss of Wetlands is set forth in full in Section 3.8.7 in relation to Impact 4.8-1

Mitigation Measure 4.8-1(b) Wetland Avoidance/Mitigation Plan is set forth in full in Section 3.8.7 in relation to Impact 4.8-1

Mitigation Measure 4.8-2 Vernal Pool Fairy Shrimp Measures

The project applicant shall mitigate the 14.461 acres of vernal pool fairy shrimp habitat that will be directly impacted at a 2:1 ratio for preservation (28.922 acres preserved) and 1:1 ratio for creation (14.461 acres created). The 9.972 acres of vernal pool fairy shrimp that may be indirectly impacted will be mitigated at a 1:1 ratio for preservation (9.972 acres). This equates to a total of 38.894 acres of preservation and 18.640 acres of creation. The locations of the preserved and created vernal pool fairy shrimp (*Branchinecta lynchi*) habitat shall be disclosed in the Wetland Avoidance/Mitigation Plan required in Mitigation Measure 4.8-1 (b).

Finding: *Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.*

Suitable habitat for vernal pool crustaceans, such as vernal pool fairy shrimp and vernal pool tadpole shrimp, is present in the project site. Vernal pool fairy shrimp have been observed within the project site. Loss of wetland habitat would occur as a result of grading and other ground disturbing activities related to the development of the Proposed Project. Approximately 14.461 acres of vernal pools and wetlands that provide habitat for vernal pool crustaceans would be directly impacted by the Proposed Project. Indirect impacts to on-site habitat could impact 8.151 acres, and off-site indirect impacts could impact 1.820 impacts of vernal pool fairy shrimp habitat. Potential impacts to avoided vernal pool habitat include possible disturbance resulting from

passive recreation, changes to hydrological conditions, or erosion of adjacent uplands that could result in the deposition of sediment within the wetlands. Additionally, after project construction, vernal pool habitat that is avoided could be subject to further indirect impacts resulting from urban runoff, increased human access (i.e., proximity to development, trails, etc.), vandalism or other human disturbances, and an increase in exotic weed species. Maintenance activities such as fire break maintenance, weed abatement, and construction and maintenance of trails and utilities could also degrade habitat.
