

AGENDA

May 6, 2020

AMENDED
CITY COUNCIL MEETING
HOUSING AUTHORITY MEETING
6:00 p.m.
Council Chambers
311 Vernon Street
Roseville, California
www.roseville.ca.us

Councilmembers may teleconference pursuant to Executive Order N-29-20. Members of the public may view the meeting on Comcast channel 14, Consolidated Communications channel 73 and AT&T U-verse. City Council meetings are also video streamed live and are available on the City's website and YouTube channel. Members of the public may offer public comment by the following means:

Dial in Phone Number: 916-774-5353
Email: citycouncil@roseville.ca.us

If you need a disability-related modification or accommodation to participate in this meeting, please contact Voice: 916-774-5200, TDD: 916-774-5220. Requests must be made as early as possible.

THE CITY OF ROSEVILLE WELCOMES YOUR PARTICIPATION

If an agenda item is open to public comment, such public comment shall be addressed to the chair of the meeting.

Public Comment - Speakers have three minutes under Public Comment to speak on issues that are not listed on the agenda and are within the City's jurisdiction. The Brown Act does not permit any action or discussion on items not listed on the agenda.

Consent Calendar - If applicable, the Consent Calendar consists of routine items that may be approved by one motion. Any person can remove an item from the Consent Calendar to be discussed separately.

Agenda Items - Speakers have five minutes to address items that are listed on the agenda.

Americans with Disabilities Act - Notify the City Clerk or Secretary at least 72 hours in advance if special assistance is required to participate in a meeting including the need of auxiliary aids or services.

Audio/Visual Presentations - If making a presentation regarding an agenda item, audio/visual materials must be submitted to the City Clerk or Secretary at least 72 hours in advance.

Security procedures are in place to attend Roseville City Council meetings. All attendees must successfully pass through a security metal detector. Any person with a prohibited item will not be allowed entry. Prohibited items include, but are not limited to: firearms (even with valid CCW), knives, pepper spray/mace, explosives of any kind/ any weapons and/or dangerous devices of any kind, illegal drugs and alcohol.

Bids / Purchases / Services

6.1. Vehicle and Equipment Purchases, Budget Adjustment, and Out-of-State Travel Request

Memo from Fleet Manager Brian Craighead and Public Works Director Jason Shykowski recommending the City Council adopt RESOLUTION NO. 20-118 APPROVING A PURCHASE ORDER, BY AND BETWEEN THE CITY OF ROSEVILLE AND DOBBS HEAVY DUTY HOLDINGS, LLC DBA WESTERN TRUCK CENTER, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE; and adopt RESOLUTION NO. 20-119 APPROVING A PURCHASE ORDER, BY AND BETWEEN THE CITY OF ROSEVILLE AND DOBBS HEAVY DUTY HOLDINGS, LLC DBA WESTERN TRUCK CENTER, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE; and adopt ORDINANCE NO. 6213 OF THE COUNCIL OF THE CITY OF ROSEVILLE AUTHORIZING CERTAIN AMENDMENTS TO THE FISCAL YEAR 2019-20 BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY EFFECTIVE AS AN APPROPRIATION MEASURE. Staff requests approval of a purchase order to Dobbs Heavy Duty Holdings LLC dba Western Truck Center for four

Autocar diesel trucks with Bridgeport side loading bodies utilizing RFQ 10-3255 in the amount of \$1,300,217; approval of a purchase order to Dobbs Heavy Duty Holdings LLC dba Western Truck Center for one Autocar Compressed Natural Gas truck with a Bridgeport side loading body utilizing RFQ 10-3257 in the amount of \$365,600; approval of a purchase order to Pacific Material Handling Solutions, Inc. for one Hyundai 80D-9 forklift utilizing RFQ 10-3259 in the amount of \$96,663; approval of a purchase order to Crafcro, Inc. for one trailer mounted sealant melter utilizing Sourcewell contract# 052417-CFC in the amount of \$56,979; and adoption of an ordinance amending the FY2019-20 Auto Replacement budget by \$57,640 from the Auto Replacement Fund for the purchase of the trailer mounted sealant melter. Funding for the remaining vehicles is already included in the FY2019-20 Auto Replacement budget. Staff also requests Council approval for out-of-state travel for Fleet Services and Waste Services staff members to attend a final factory inspection for the Autocar trucks with side loading bodies being built by Bridgeport in Breckenridge, Texas. The estimated schedule for the final inspections is January 2021. Costs related to travel including air fare, lodging and meals are covered by Bridgeport Manufacturing as part of the original purchase price.

6.3. Utility Tree Trimming Services – Contract Purchase Agreement

Memo from Electric Operations Supervisor Jeff Beaubier and Electric Utility Director Michelle Bertolino recommending the City Council adopt RESOLUTION NO. 20-165 APPROVING A CONTRACT PURCHASE AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND WEST COAST ARBORISTS, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE (3000262). This item requests Council approve a contract purchase agreement with West Coast Arborists, Inc. to perform utility tree trimming services for three years, with an option to renew for two additional one-year periods. The cost of the initial agreement will not exceed \$4,299,750 over the three-year period, with up to an additional \$3,142,125 total for the two optional one-year renewals. Funding for the first year of the agreement is \$1,378,125 and will be included in the proposed Electric Department FY2020-21 budget. All future year funding

shall be contingent upon budget approval each year.

6.5. VHF Communication Maintenance - Sole Source Contract Purchase Agreement

Memo from Fire Chief Rick Barte and Assistant Fire Chief Brian Diemer recommending the City Council adopt RESOLUTION NO. 20-120 APPROVING A CONTRACT PURCHASE AGREEMENT BETWEEN THE CITY OF ROSEVILLE AND SILKE COMMUNICATIONS, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE (3000225). Staff recommends approval of a sole source contract purchase agreement with Silke Communications ending June 30, 2020, for the total cost of services in the amount of \$100,000 during FY2019-20. The total costs are related to repairs, modifications, integration and specialized equipment required for the maintenance of the VHF enterprise-wide interoperable radio system. The \$100,000 contract purchase agreement will be funded by \$50,600 in the existing Fire Department operating budget, with additional funding coming from the General Fund Contingency budget.

6.8. Utility Tree Trimming – Service Agreement Amendment

Memo from Electric Operations Supervisor Jeff Beaubier and Electric Utility Director Michelle Bertolino recommending the City Council adopt RESOLUTION NO. 20-127 APPROVING AMENDMENT NO. 1 TO SERVICE AGREEMENT BETWEEN CITY OF ROSEVILLE AND UTILITY TREE SERVICE, LLC, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE (S2003015). Staff recommends approval of Amendment No. 1 to Service Agreement S2003015 with Utility Tree Service, LLC to continue providing high voltage line tree trimming services on an as-needed basis. This amendment increases agreement funding by \$170,000 bringing the total annual amount from \$546,976.34 to \$716,976.34. The increase in cost is due to a new state law that increased wages for tree trimmers. Funding is available in the FY2019-20 Electric Department budget.

6.9. Industrial and Fiddymont Substation Civil Construction - Approval of Plans and Specifications and Authorization to Call for Bids

Memo from Senior Power Engineer Chris Porter and Electric Utility Director Michelle Bertolino recommending the City Council approve the plans and specifications of the Industrial and Fiddymont Substation Civil Construction project and authorize staff to call for bids. The construction work at Industrial Substation is required for the replacement of the existing switchgear that has

reached its end of life. Replacement of this equipment is necessary to maintain system reliability. The construction work at Fiddymment Substation is necessary to support the installation of a new 230/60kV transformer. The cost of the project is estimated at \$400,000. Funds are available in the Electric Department FY2019-20 budget.

6.13. Taser Equipment - Sole Source Purchase Order

Memo from Administrative Analyst Shelly Bracco and Police Chief James Maccoun recommending the City Council authorize the issuance of a sole source purchase order to ProForce for the purchase of replacement taser equipment for a total amount not to exceed \$130,000. A budget adjustment was approved by Council on January 15, 2020, which appropriated \$100,000 in the Citizen's Option for Public Safety Fund for taser equipment replacement. The additional \$30,000 was approved in the Police Department's FY2019-20 budget. There will be no net impact to the General Fund.

Resolutions

6.15. On-Call Qualified Stormwater Pollution Prevention Plan Developer and Practitioner Services - Professional Services Agreement Amendment

Memo from Park Development Analyst Rjahja Canlas and Parks, Recreation & Libraries Director Jill Geller recommending the City Council adopt RESOLUTION NO. 20-135 APPROVING A SECOND AMENDMENT TO ON-CALL PROFESSIONAL SERVICES AGREEMENT, BETWEEN THE CITY OF ROSEVILLE AND HYDROCOMPLIANCE, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE. HydroCompliance provides on-call qualified stormwater pollution prevention plan (SWPPP) developer and qualified SWPPP practitioner services for the Parks, Recreation & Libraries Department. The second amendment will extend the agreement for the second and final one-year renewal and increase the service agreement annual authorization by \$10,000, bringing the total annual amount to \$60,000 and the contract total to \$160,000 for the three-year contract period. Work performed under this service agreement will utilize capital improvement project budgets.

6.16. Richard and Pauline Roccucci Park Project - Notice of Completion

Memo from Park Development Analyst Rjahja Canlas and Parks, Recreation & Libraries Director Jill Geller recommending the City Council adopt RESOLUTION NO. 20-117 ACCEPTING THE PUBLIC WORK KNOWN AS THE RICHARD AND PAULINE ROCCUCCI PARK PROJECT, APPROVING THE "NOTICE OF COMPLETION", AND AUTHORIZING THE PARKS, RECREATION & LIBRARIES DIRECTOR TO EXECUTE SAID NOTICE ON BEHALF OF THE CITY OF ROSEVILLE. The Parks, Recreation & Libraries Department has made a final inspection of the Richard and Pauline Roccucci Park Project (formerly parksite W-51) and has found that all contract work has been completed in accordance with the improvement plans and specifications. The project is now ready for acceptance. This 4.7-acre park site is located on Symphony Avenue at Chorus Avenue in the West Roseville Specific Plan. The project included a children's play area, shaded picnic area, adult fitness equipment, multi-use turf, perimeter walkway that connects to the existing bike trail, basketball half court, two pickleball courts, a zip line swing, landscaping and irrigation. In accordance with City specifications, the contractor shall guarantee the installation of these improvements for a period of twelve (12) months from the date of this Notice of Completion. The project was funded with monies from the West Roseville Citywide Park Fund. Funding for maintenance will be through the Westpark Community Facilities District No. 2 (Public Services). There is no impact to the General Fund.

6.19. Utility Billing System - Software License Agreement Amendment

Memo from Billing Services Manager Andrea Blomquist and Assistant City Manager/Chief Financial Officer Dennis Kauffman recommending the City Council adopt RESOLUTION NO. 20-139 APPROVING A FIRST AMENDMENT TO SOFTWARE LICENSE AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND N. HARRIS CORPORATION, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE. The City currently contracts with N. Harris Computer Corporation for Cayenta, a customer information system used for utility billing. As part of the City's standard operating procedures, Utility Billing staff are executing additional system tools from Cayenta to enhance customer service to both internal and external customers. The annual licensing fees for these tools equal \$9,250. This cost is included in the approved FY2019-20 Finance/Utility Billing operating budgets.

6.20. Main Gas Supplier Agreement - Transaction Confirmation

Memo from Electric Risk and Compliance Officer Petra Wallace and Electric

Utility Director Michelle Bertolino recommending the City Council adopt RESOLUTION NO. 20-130 AUTHORIZING THE CITY MANAGER TO EXECUTE A TRANSACTION CONFIRMATION WITH SHELL ENERGY NORTH AMERICA (US), L.P., ON BEHALF OF THE CITY OF ROSEVILLE. This item is a 5-year Main Gas Supplier Agreement with Shell Energy North America L.P. The agreement sets out the terms and conditions for Shell to provide natural gas balancing services for the electric utility's power plant operations. Transactions under this agreement will be executed pursuant to Roseville's Energy Trading Authority Policy. The fees associated with the services are estimated at \$30,000 per year and are included in the annual budget for the Electric Department.

6.21. Clean Fuel Reward Program - Electric Distribution Utility Joinder to the Clean Fuel Reward Governance Agreement

Memo from Energy Services Account Representative Rachel Radell-Harris and Electric Utility Director Michelle Bertolino recommending the City Council adopt RESOLUTION NO. 20-128 APPROVING AN ELECTRIC DISTRIBUTION UTILITY JOINDER TO THE CLEAN FUEL REWARD GOVERNANCE AGREEMENT, BY AND BETWEEN PACIFIC GAS & ELECTRIC, SAN DIEGO GAS & ELECTRIC COMPANY, SOUTHERN CALIFORNIA EDISON COMPANY, LOS ANGELES DEPARTMENT OF WATER & POWER AND SACRAMENTO MUNICIPAL UTILITY DISTRICT AND THE CITY OF ROSEVILLE, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE. Staff recommends Council approve the Electric Distribution Utility Joinder to the Clean Fuel Reward Governance Agreement. This agreement allows Roseville Electric Utility to continue to participate in the California Air Resources Board Low Carbon Fuel Standard (LCFS) program and generate proceeds to support electric vehicle programs in the community. The utility's initial cost is \$136,614 and is due by January 31, 2021. Following the initial cost, the utility will annually transfer 20% of certain LCFS proceeds to the Clean Fuel Reward program through 2022, and 25% beginning in 2023. Funding for this agreement is available from the LCFS program proceeds and will be included in the utility's proposed FY2020-21 budget.

6.22. Water Capacity Partnership Exploration - Memorandum of Understanding

Memo from Assistant Environmental Utilities Director Sean Bigley and Environmental Utilities Director Richard Plecker recommending the City Council adopt RESOLUTION NO. 20-131 APPROVING A MEMORANDUM OF UNDERSTANDING FOR EXPLORATION INTO A WATER CAPACITY PARTNERSHIP, BY AND BETWEEN THE CITY OF ROSEVILLE AND

THE PLACER COUNTY WATER AGENCY, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE. Staff requests approval of a Memorandum of Understanding (MOU) with the Placer County Water Agency (PCWA) for exploration of shared water conveyance infrastructure alternatives for additional water supply reliability. Under the proposed MOU, PCWA and the City would share in costs of up to \$100,000 (\$50,000 for the City, \$50,000 for PCWA) to explore potential shared water conveyance infrastructure alternatives. The City's \$50,000 is budgeted in the FY2019-20 Water Administration budget, funded within the Water Operations fund, which receives revenue through water utility service sales.

6.23. On-Call Resident Engineering and Inspection Services - Professional Services Agreements Amendments

Memo from Assistant Engineer Beth Taylor and Public Works Director Jason Shykowski recommending the City Council adopt RESOLUTION NO. 20-136 APPROVING A FIRST AMENDMENT TO PROFESSIONAL SERVICES AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND HANNA ENGINEERING, INC. DBA THE HANNA GROUP, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE; and adopt RESOLUTION NO. 20-137 APPROVING A FIRST AMENDMENT TO PROFESSIONAL SERVICES AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND HDR CONSTRUCTION CONTROL CORPORATION, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE; and adopt RESOLUTION NO. 20-138 APPROVING A FIRST AMENDMENT TO PROFESSIONAL SERVICES AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND PSOMAS, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE. Staff recommends approval of the requested agreement amendments as well as the remaining one-year extension without further Council approval. The amendments extend the contracts one year and increase the contract compensation not-to-exceed amount for each amendment by \$1,000,000. These contracts will be funded through various approved Capital Improvement Program project budgets. No General Fund resources will be used. These contract services allow City staff to complete more projects without hiring additional permanent City employees.

6.24. On-Call Material Testing Services - Professional Services Agreements Amendments

Memo from Assistant Engineer Beth Taylor and Public Works Director Jason Shykowski recommending the City Council adopt RESOLUTION NO. 20-

132 APPROVING A FIRST AMENDMENT TO PROFESSIONAL SERVICES AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND BLACKBURN CONSULTING, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE; and adopt RESOLUTION NO. 20-133 APPROVING A FIRST AMENDMENT TO PROFESSIONAL SERVICES AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND HOLDREGE & KULL, CONSULTING ENGINEERS AND GEOLOGISTS, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE; and adopt RESOLUTION NO. 20-134 APPROVING A FIRST AMENDMENT TO PROFESSIONAL SERVICES AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND TWINING, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE. Staff recommends Council approval to execute these amendments, as well as the remaining one-year extension at a later date without Council approval. The amendment extends the contract by one year and increases the contract compensation not-to-exceed fee for each amendment by \$300,000. These contracts will be funded through various Capital Improvement Project budgets. No General Fund resources will be used. These contract services allow existing City staff to complete more projects without hiring additional permanent City employees.

6.25. Resolution Declaring Weeds and Rubbish a Public Nuisance - Setting a Public Hearing Date

Memo from Fire Division Chief Jason Rizzi and Fire Chief Rick Barteo recommending the City Council adopt RESOLUTION NO. 20-125 OF THE COUNCIL OF THE CITY OF ROSEVILLE DECLARING ALL WEEDS, DIRT, RUBBISH OR RANK GROWTHS WITHIN THE CITY OF ROSEVILLE TO BE A PUBLIC NUISANCE; ORDERING THE FIRE CHIEF TO GIVE NOTICE OF THE PASSAGE OF THIS RESOLUTION; AND SETTING A TIME AND PLACE FOR HEARING ANY OBJECTIONS TO THE PROPOSED DESTRUCTION OR REMOVAL OF SUCH WEEDS, DIRT, RUBBISH, OR RANK GROWTHS. To initiate the 2020 Weed Abatement Program, staff recommends approval of a resolution declaring weeds, rubbish, dirt, and/or rank growth within the City to be a public nuisance, as well as ordering the Fire Chief to give notice of the passage and setting a time and place for the required public hearing. The public hearing will be scheduled for the City Council meeting on Wednesday, June 3, 2020.

6.26. Diamond Creek North Roseville Specific Plan DC 30 & 33 Improvement Plan - Notice of Completion

Memo from Construction Inspector Darin Crockett and Development Services

Director Mike Isom recommending the City Council adopt RESOLUTION NO. 20-122 ACCEPTING THE PUBLIC WORK KNOWN AS Diamond Creek North Roseville Specific Plan DC 30 & 33 PROJECT, APPROVING THE "NOTICE OF COMPLETION", AND AUTHORIZING THE CITY ENGINEER TO EXECUTE SAID NOTICE ON BEHALF OF THE CITY OF ROSEVILLE, THEREFORE, AND ACCEPTING ALL DEDICATIONS OFFERED ON THE RECORDED MAP OF THE SUBDIVISION. The Engineering Division has made final inspection of the project and has found the civil improvement work complete in accordance with the improvement plans and City specifications. This action has no impact to the City's General Fund. Construction costs were paid by the developer.

Ordinances (for introduction and adoption - appropriation/urgency measures)

6.28. Downtown Water Mains Replacement Project – Hillcrest Neighborhood - Professional Design Services Agreement and Budget Adjustment

Memo from Senior Engineer Janice Gainey and Environmental Utilities Director Richard Plecker recommending the City Council adopt RESOLUTION NO. 20-123 APPROVING A PROFESSIONAL DESIGN SERVICES AGREEMENT BY AND BETWEEN THE CITY OF ROSEVILLE AND DOMENICHELLI & ASSOCIATES, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE; and adopt ORDINANCE NO. 6214 OF THE COUNCIL OF THE CITY OF ROSEVILLE AUTHORIZING CERTAIN AMENDMENTS TO THE FISCAL

YEAR 2019-20 BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY EFFECTIVE AS AN APPROPRIATION MEASURE. This item requests approval and award of a professional design services agreement with Domenichelli & Associates, Inc. (D&A) to provide design and engineering services during construction for the Downtown Water Mains Replacement project in the Hillcrest Neighborhood. The total contract value of the agreement with D&A is not to exceed \$377,084. Staff also recommends approval of a budget adjustment to transfer funding within the Water Rehabilitation Fund from an operating budget to a newly established capital improvement project with no net impact to the fund's available resources.

6.30. Homeland Security Grant - Budget Adjustment

Memo from Administrative Analyst Shelly Bracco and Police Chief James Maccoun recommending the City Council adopt ORDINANCE NO. 6212 OF THE COUNCIL OF THE CITY OF ROSEVILLE AUTHORIZING CERTAIN AMENDMENTS TO THE FISCAL YEAR 2019-20 BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY EFFECTIVE AS AN APPROPRIATION MEASURE. The Police Department has been awarded \$8,600 from the FY19 Homeland Security Grant Program via the Placer County Office of Emergency Services division. The recommended

budget adjustment will cover the purchase of gas masks and filters. The City will be reimbursed by Placer County Office of Emergency Services upon completion of the purchase. There will be no net impact on the General Fund.

CC #: 0717

6.31. Urgency Ordinance To Extend Certain Land Use Entitlements

Memo from Senior Planner Derek Ogden and Development Services Director Mike Isom recommending the City Council adopt ORDINANCE NO. 6220 OF THE COUNCIL OF THE CITY OF ROSEVILLE GRANTING A ONE YEAR EXTENSION TO CERTAIN LAND USE ENTITLEMENTS AND DECLARING THIS ORDINANCE TO BE EFFECTIVE MAY 6, 2020 AS AN URGENCY ORDINANCE. Staff is recommending that the City Council approve an ordinance to extend all approved but unexpired Zoning Ordinance-related entitlements and Buildings and Construction Ordinance-related grading plans for one additional year. An economic benefit is likely to occur by extending the time development projects have to construct; however, the fiscal impact cannot be quantified.

CC #: 0749

File #: 0800-06

CONTACT: Derek Ogden 916-746-1347 dogden@roseville.ca.us

6.32. Implementation of Recommended Staffing Changes

Memo from Human Resources Manager Linda Hampton and Human Resources Director Stacey Peterson recommending the City Council adopt ORDINANCE NO. 6216 OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING ORDINANCE NO. 6192, THE SALARY ORDINANCE FOR MANAGEMENT EMPLOYEES, AS AMENDED BY APPENDIX "J" TO BE EFFECTIVE MAY 9, 2020, AS AN URGENCY MEASURE; and adopt ORDINANCE NO. 6217 OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING ORDINANCE NO. 6182, THE SALARY ORDINANCE FOR EMPLOYEES REPRESENTED BY THE INTERNATIONAL UNION OF OPERATING ENGINEERS, STATIONARY ENGINEERS, LOCAL 39, AS AMENDED BY APPENDIX "F" TO BE EFFECTIVE MAY 9, 2020, AS AN URGENCY MEASURE; and adopt ORDINANCE NO. 6218 OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING ORDINANCE NO. 6181, THE SALARY ORDINANCE FOR EMPLOYEES REPRESENTED BY ROSEVILLE FIREFIGHTERS, LOCAL 1592, AS AMENDED BY APPENDIX "E", TO BE EFFECTIVE MAY 9, 2020 AS AN URGENCY MEASURE. Staff is recommending Council approve the citywide position allocation schedule reflecting the reclassification of four positions. Staff is also requesting the addition of Police Social Services Practitioner and Senior Utility Billing Analyst and the deletion of Police Social Services Administrator on the Management salary schedules. Also, staff recommends deletion of the Fire Inspector I/II safety classification from the Roseville Firefighters' salary schedules. In addition, staff is requesting to add Organics Truck Driver to the Local 39 salary

schedules. The total impact for FY2019-20 General Fund is a savings of \$14,513. The impact of \$13,616 to the utility funds and the Facility Services Fund was already included in the FY2019-20 budget or will be covered by salary savings.

8. PUBLIC HEARING

NOTICE TO THE PUBLIC

City Council, when considering the matter scheduled for hearing, will take the following actions:

1. Open the Public Hearing

2. Presentation by Staff
3. Presentation by applicant or Appellant
4. Accept Public Testimony
5. Appellant or Applicant Rebuttal Period
6. Close the Public Hearing
7. City Council Comments and Questions
8. City Council Action

In the future, if you wish to challenge in court any of the matters on this agenda for which a public hearing is to be conducted, you may be limited to raising only those issues, which you, or someone else raised orally at the Public Hearing or in written correspondence received by the City or before the hearing

Public Hearings listed for continuance will be continued as noted and posting of this agenda serves as notice of continuation.

8.1. Housing Authority 5-Year Plan FY2020-21

Memo from Housing Analyst Suzanne Acrell and Economic Development Director Laura Matteoli recommending the City Council adopt HOUSING AUTHORITY OF THE CITY OF ROSEVILLE RESOLUTION NO. 1-20 AUTHORIZING THE EXECUTIVE DIRECTOR TO SUBMIT THE ROSEVILLE HOUSING AUTHORITY 5 YEAR PLAN AND ANNUAL PLAN FOR FISCAL YEAR 2020-21 TO THE U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT ALONG WITH THE REQUIRED CERTIFICATIONS, DISCLOSURES AND RELATED DOCUMENTS. Roseville Housing Authority must receive City Council's approval of the Housing Authority's 5-Year Plan for FY2020-21 prior to submitting the report to U.S. Department of Housing and Urban Development. The Housing Authority 5-Year Plan will not have any fiscal impact to the General Fund.

Meeting Date: 5/6/2020

Item #: 6.1.

RECOMMENDATION TO COUNCIL

RFQ 10-3255

Staff recommends Council approve a purchase order to Dobbs Heavy Duty Holdings LLC dba Western Truck Center for four Autocar diesel trucks with Bridgeport side loading bodies utilizing RFQ 10-3255 to replace Fleet ID 12-453, 12-452, 12-325 and 12-324 approved in the FY2019-20 Auto Replacement budget. The total cost including options and sales tax is \$1,300,217. Additionally, adopt a resolution authorizing the City Manager or his designee to approve change order requests in an amount not to exceed 2% of the contract price.

RFQ 10-3257

Staff recommends Council approve a purchase order to Dobbs Heavy Duty Holdings LLC dba Western Truck Center for one Autocar Compressed Natural Gas (CNG) truck with a Bridgeport side loading body utilizing RFQ 10-3257 to replace Fleet ID 12-481 approved in the FY2019-20 Auto Replacement budget. The total cost including options and sales tax is \$365,600. Additionally, adopt a resolution authorizing the City Manager or his designee to approve change order requests in an amount not to exceed 2% of the contract price.

RFQ 10-3259

Staff recommends Council approve a purchase order to Pacific Material Handling Solutions, Inc for one Hyundai 80D-9 forklift utilizing RFQ 10-3259 to replace Fleet ID 00-646 approved in the FY2019-20 Auto Replacement budget. The total cost including options and sales tax is \$96,663.

Sourcewell

Staff recommends Council approve a purchase order to Crafc0, Inc. for one trailer mounted sealant melter utilizing Sourcewell contract# 052417-CFC to replace Fleet ID 11-625. The total cost including options and sales tax is \$56,979. Additionally, adopt an ordinance to amend the budget by \$57,640 to pay for the Crafc0 trailer mounted sealant melter.

Out-of-State Travel

Staff also requests Council approval for out-of-state travel for a total of three Fleet Services and Waste Services staff members to attend a final factory inspection for the Autocar trucks (RFQ's 10-3255 and 10-3257) with side loading bodies being built by Bridgeport in Breckenridge, Texas.

The estimated schedule for the final inspections is January 2021. Costs related to travel including air fare, lodging and meals are covered by Bridgeport Manufacturing as part of the original purchase price.

BACKGROUND

RFQ 10-3255 and RFQ 10-3257

The Environmental Utilities Waste Services division is purchasing five side loading solid waste collection trucks as replacements for Fleet ID 12-453, 12-452, 12-325, 12-324 and 12-481. These trucks are used to collect residential waste up to 5 days per week. The Waste Services division has been able to utilize these vehicles an additional two years beyond their life expectancy without the cost of repairs overriding the need for replacement.

During the production of solid waste collection trucks, it is common to encounter unanticipated or changed conditions which necessitate additions or other modifications to the project and the contract. Due to the complexity of this build, the Fleet Manager requests authorization for the City Manager or his designee to approve change order requests in an amount not to exceed 2% of the contract price.

Purchasing refuse trucks is a large financial investment and final factory inspections are essential for quality control. Three City representatives total from Fleet Services and Waste Services will attend a final inspection trip which is scheduled at times mutually agreed upon between the manufacturer and City representatives. In this case the final inspection is estimated to occur in January 2021.

RFQ 10-3255

A formal bid was issued with the following vendor response:

<u>Vendor</u>	<u>Unit Price (with options)</u>
Western Truck Center Sacramento, CA	\$1,327,458.48

RFQ 10-3257

A formal bid was issued with the following vendor response:

<u>Vendor</u>	<u>Unit Price (with options)</u>
Western Truck Center Sacramento, CA	\$373,759.97

RFQ 10-3259

The Roseville Electric Construction and Maintenance division is purchasing one Hyundai 80D-9 forklift as a replacement for Fleet ID 00-646. The forklift is used by the Electric Operations Warehouse staff to receive and load all electrical equipment that is used to maintain and expand electrical facilities in the City. The Electric department manages its own warehouse containing thousands of items that require a forklift.

A formal bid was issued with the following vendor responses:

<u>Vendor</u>	<u>Unit Price (with options)</u>
---------------	----------------------------------

Octane Forklift
Denver, CO \$87,689.11

Pacific Material Handling
Sacramento, CA \$96,662.70

Brooks Company
Auburn, CA \$103,171.70

H&E Equipment
Sacramento, CA \$119,794.06

The apparent low bidder Octane Forklift took exception to critical items in the bid and was deemed non responsive.

Sourcewell

The Public Works Streets division is purchasing one CrafcO trailer mounted sealant melter as a replacement for Fleet ID 11-625. This equipment is used by the paving staff to repair cracks in asphalt throughout the City.

A budget adjustment is necessary to appropriate funds into the current fiscal year because plans were made to rent a CrafcO melter but the rental rate would cost \$36,000 for a six month period. After two paving seasons, the CrafcO rental would exceed the cost of a new purchase. The current CrafcO equipment has enough replacement funding to purchase a new CrafcO trailer mounted sealant melter and 11-625 will remain in the fleet an additional year.

Vehicle replacements are based on the Fleet Scoring System which considers factors such as age, mileage, reliability, prior maintenance and repair costs, and current condition. Below are the vehicle replacement scores. A score of 23 or more indicates the vehicle is eligible for replacement.

Vehicle ID	Replacement Score	Vehicle Condition
12-453	34	Meets City replacement criteria
12-452	34	Meets City replacement criteria
12-325	33	Meets City replacement criteria
12-324	33	Meets City replacement criteria
12-481	33	Meets City replacement criteria
00-646	28	Meets City replacement criteria
11-625	25	Meets City replacement criteria

FISCAL IMPACT

RFQ 10-3255

The total cost of four Autocar diesel trucks with Bridgeport side loading bodies including options and sales tax is \$1,300,217. Funding is included in the FY2019-20 Auto Replacement budget.

RFQ 10-3257

The total cost of one Autocar CNG truck with Bridgeport side loading body including options and sales tax is \$365,600. Funding is included in the FY2019-20 Auto Replacement budget.

RFQ 10-3259

The total cost of one Hyundai 80D-9 forklift including options and sales tax is \$96,663. Funding is included in the FY2019-20 Auto Replacement budget.

Sourcewell

The total cost of one CrafcO trailer mounted sealant melter including options and sales tax is \$56,979. A budget adjustment of \$57,640 will appropriate funds from the Auto Replacement Fund into the current fiscal year budget to purchase the equipment and cover minor prep work by Fleet staff to get the melter ready for deployment into the field.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The purchase of vehicles and travel meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Respectfully Submitted,

Brian Craighead, Fleet Manager

Jason Shykowski, Public Works Director

Dominick Casey, City Manager

ORDINANCE NO. 6213

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE
AUTHORIZING CERTAIN AMENDMENTS TO THE FISCAL YEAR 2019-20
BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY
EFFECTIVE AS AN APPROPRIATION MEASURE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. The City of Roseville Annual Budget, Fiscal Year 2019-20, is hereby amended by transferring appropriation to and from the activities indicated below:

Appropriate funds for a CrafcO trailer mounted sealant melter, per request of the Public Works Department, as listed on the attached Request for Budget Adjustment in the amount of \$57,640.

SECTION 2. This ordinance is hereby declared to be an appropriation measure, immediately effective pursuant to the provisions of Section 5.03 of the Charter.

SECTION 3. The City Clerk is hereby authorized and directed to post a true copy of the foregoing ordinance in each of three (3) conspicuous locations in the City and she shall immediately after such posting enter in the ordinance book, under the record of the ordinance, a certificate under her hand stating the time and place of such publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville, this

ACCOUNT STRING				BUDGET (\$)	DESCRIPTION
Fund	Account	Center	Project	Adjustment	
4005				(57,640)	Reduction of Fleet repl fund (vehicle #11-625)
TOTAL				(57,640)	

Justification for Budget Adjustment:

1). This is to appropriate \$57,640 in the Fleet Replacement fund to purchase a replacement crack seal machine for 11-625. The machine will be used by the Public Works Street division Paving center 62320. Original plans were to rent an additional unit, but rental costs exceed \$36,000 for six months. Sufficient funds to purchase this machine already exist and will come from vehicle #11-625. Due to current planned paving needs at Sun City and other areas, the existing unit #11-625 will be kept an additional year.

Title: Aquifer Storage and Recovery – Monitoring Wells Project – Approval of Plans and Specifications and Authorization to Call for Bids
Contact: Jason T. Marks 916-342-9573 jtmarks@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.2.

RECOMMENDATION TO COUNCIL

Staff recommends that City Council approve the Aquifer Storage and Recovery – Monitoring Wells Project plans and specifications and authorize approval to advertise for construction bids.

BACKGROUND

The objective of this project is to support Roseville's groundwater program by installing groundwater monitoring wells at up to eight (8) sites in the City. These wells will provide essential geology and groundwater quality data that will validate the technical feasibility of planned Aquifer Storage and Recovery (ASR) production wells at these sites. The primary purpose of this exploratory data collection effort is to provide pre-design information for ASR production wells as described above to limit the fiscal risk to the City, especially if the site is discovered to be unworkable through the less expensive monitoring well drilling process. The monitoring wells will also provide secondary benefits, including groundwater elevation and water quality data that can be used to manage ongoing ASR program implementation and can also be used to support regional efforts to sustainably manage the groundwater basin in accordance with State regulatory requirements. Ultimately, these ASR production well sites and accompanying monitoring wells will allow Roseville to diversify our water supplies, providing water supply reliability benefits to meet the needs of our customers and provide the foundation for a thriving economy.

A competitive bid process will be utilized to select a contractor for this project. The estimated project duration is three (3) months. The estimated cost of the project is \$1,200,000. A complete Request for Bids Package including plans and specifications are available for review in the City Clerk's Office.

FISCAL IMPACT

This project is estimated to cost \$1,200,000. Funding for this project is provided by the Water Construction Fund.

ENVIRONMENTAL REVIEW

The proposed project involves basic data collection and resource evaluation activities which do not result in a disturbance to environmental resources, which is categorically exempt from CEQA as a Class 6 Exemption (State CEQA Guidelines §15306). The project also involves construction of minor facilities, which is categorically exempt from CEQA as a Class 3 Exemption (State CEQA Guidelines §15303) and minor alterations to land, which is categorically exempt from CEQA as a Class 4 Exemption (State CEQA Guidelines §15304). The Exemption has been prepared and no further CEQA action is required.

Respectfully Submitted,

Jason T. Marks, Senior Engineer

Richard D. Plecker, Environmental Utilities Director

Dominick Casey, City Manager

CITY OF ROSEVILLE
DEPARTMENT OF ENVIRONMENTAL UTILITIES
AQUIFER STORAGE AND RECOVERY – MONITORING WELLS PROJECT

NOTICE TO CONTRACTORS

NOTICE IS HEREBY GIVEN THAT sealed Proposals will be received at the Office of the City Clerk, 311 Vernon Street, Roseville, California, until June 9, 2020 at 3:00 p.m. Late Proposals will be rejected. No exceptions.

The Proposals will be publicly opened and read by the City Clerk or designee of the City of Roseville at 3:05 p.m. on June 9, 2020 at the Office of the City Clerk located at 311 Vernon Street, Roseville California for the following project: Aquifer Storage and Recovery – Monitoring Wells Project.

A mandatory pre-bid meeting will be held on Tuesday, May 26, 2020 at 9 AM at 2005 Hilltop Circle Roseville, CA 95747.

A Project Manual, including all Contract Documents and the Proposal forms for bidding this project, may be obtained on-line from the City of Roseville's Public Purchase website at <https://www.publicpurchase.com>. All communications relative to this project shall be conducted through Public Purchase.

Bids shall be submitted on the City's Proposal Forms included in the Project Manual, plainly endorsed with the Bidder's name together with signed acknowledgement of any and all addenda. Proposal Forms shall be securely sealed in a suitable envelope marked with the name and address of the Bidder, and marked in capital letters on the front and back of the envelope as

follows:

PROPOSAL AQUIFER STORAGE AND RECOVERY – MONITORING WELLS PROJECT (Name of Bidder) (Address of Bidder) BID OPENING DATE: June 9, 2020
--

Whether mailed or personally delivered, all bids shall be addressed to the City of Roseville, Office of the City Clerk, 311 Vernon Street, Roseville, California, 95678.

Each bid must be accompanied by a Bid Guaranty in the form of a Certificate of Deposit, Certified or Cashier's Check, Bidder's Bond or Irrevocable Standby Letter of Credit in an amount equal to at least ten percent (10%) of the Bidder's Grand Total Price. The Bid Guaranty will be retained by the City and applied to any and all damages sustained by the City in the event that the successful Bidder fails or refuses to enter into the Contract awarded to it and to furnish all required bonds and Certificates of Insurance. The City intends to award the Contract to the lowest responsible Bidder based on the Grand Total Bid Price for all components of the Project. To the extent allowed by law, the City reserves the right to reject any and all bids and/or to waive any irregularities or informalities in any bid or in the bidding procedure. The City specifically reserves the right to not award the Contract after the opening of bids.

Any bid may be withdrawn at any time prior to the time fixed in the public notice for the deadline submission of bids only by written request for the withdrawal of the bid filed with the City Clerk. The request shall be executed by the Bidder or his or her duly authorized representative. The withdrawal of a bid does not prejudice the right of the Bidder to file a new

bid by the submission deadline. Whether or not bids are opened exactly at the time fixed in the public notice for opening bids, a bid will not be received after the deadline submission of bids nor may any bid be withdrawn after the time fixed in the public notice for deadline for submission of bids. Immediately following the deadline for submission of bids all bids shall become the property of the City of Roseville and the City is under no obligation to return bids.

Bids will be examined and reported to the City Council within sixty (60) business days after the bid opening. Except as permitted by applicable law, no Bidder may withdraw its bid for a period of sixty (60) business days after the date of bid opening. Each Bidder will be notified of any award of the Contract by the City.

The City will affirmatively ensure non-discrimination on the basis of one or more of the following: race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, genetic information, marital status, sex, age, sexual orientation, or military and veteran status in the award and administration of contracts that it awards.

Pursuant to Public Contract Code Section 22300, the successful Bidder may submit certain securities in lieu of the City withholding retention of payments during the Project.

The City has determined that the Contractor shall possess a valid C-57 Well Drilling Contractor's license at the time that the bid is submitted, as well as any other license classification as may be required by the laws of the California for the performance of the work specified in the Contract Documents. Said license shall be maintained during the Contract period. Failure to possess the specified license shall render the bid nonresponsive and will act as a bar to the award of the Contract to any Bidder not possessing such a license at the time of bid submittal. The Contractor shall provide certification of the license, its number and the expiration date on the proposal form.

The work is to be done in Placer County. Pursuant to California Labor Code Section 1773, the City has ascertained the General Prevailing Rate of Wages in the County in which the work is to be done to be as determined by the Director of Industrial Relations of the State of California. The Contractor is hereby made aware that information regarding prevailing wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: <http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm>. The Contractor is required to post a copy of the applicable wage rates at the job site. Attention is directed to Section 5 “Legal Relations and Responsibility” of the General Conditions.

Pursuant to Labor Code Section 1771.1(b), notice is hereby given that a contractor or subcontractor shall not be qualified to bid on, be listed in a bid proposal, subject to the requirements of Section 4104 of the Public Contract Code, or engage in the performance of any contract for public work, as defined in Labor Code Sections 1720, et seq., unless currently registered and qualified to perform public work pursuant to Labor Code Section 1725.5 or exempt from registration requirements pursuant to Labor Code Section 1725.5(f). It is not a violation of Labor Code Section 1771.1 for an unregistered contractor to submit a bid that is authorized by Section 7029.1 of the Business and Professions Code or by Section 10164 or 20103.5 of the Public Contract Code, provided the contractor is registered to perform work pursuant to Labor Code Section 1725.5 at the time the contract is awarded or is exempt from registration requirements pursuant to Labor Code Section 1725.5(f). The Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

All questions prior to the deadline for bid submissions shall be directed to Public Purchase at <https://www.publicpurchase.com>. The deadline for submissions of questions and

INSTRUCTIONS TO BIDDERS

SECTION 1. GENERAL

1-1.01.1 GENERAL. These Instructions to Bidders form a part of the Contract Documents. Capitalized terms are defined in the General Conditions Section 1.

1-1.01.2 EXAMINATION OF PLANS, CONTRACT DOCUMENTS AND SITE OF THE WORK. The Bidder shall examine carefully the site of the Work and all the Contract Documents, including these Instructions to Bidders, and shall inform itself of the conditions relating to the execution of the Work. Failure to do so will not relieve the successful Bidder of its obligation to enter into an Agreement and complete the Work in strict accordance with the Contract Documents. Conditions relating to the execution of the Work include the requirements of federal, state, and local laws, statutes and ordinances relative to the execution of Work, including, but not limited to, applicable regulations concerning prevailing wage rates, non-discrimination in the employment of labor, protection of the public, employee health and safety, and environmental protection.

The submission of a bid shall be conclusive evidence that the Bidder has investigated and is satisfied as to the conditions to be encountered, as to the character, quality, and scope of Work to be performed, the quantities of materials to be furnished, and as to the requirements of all the Contract Documents.

1-1.01.3 EXISTING INFORMATION. Where the Department has made investigations of site conditions, including subsurface conditions in areas where Work is to be performed under the Contract, such investigations are made only for the purpose of study and design. City does not represent that such conditions as found in these investigations or inferences or conclusions drawn as a result of these investigations will represent actual site conditions and hereby

disclaims any liability as a result of Contractor's or Bidder's reliance on such investigations. City will presume that all Bidders have conducted their own site investigations, including investigations of subsurface conditions. Where such investigations have been made, Bidders or Contractors may, upon written request, inspect the records of the Department as to such investigations subject to the conditions set forth in these Instructions to Bidders. Such inspection of records may be made only at the location noted above. The records of such investigations are not a part of the Contract Documents and are shown solely for the convenience of the Bidder or Contractor. The City assumes no responsibility whatsoever with respect to the sufficiency or accuracy of the investigations made, the records thereof, or of the interpretations set forth therein or made by the City in its use thereof. The City makes no warranty or guarantee, either express or implied, that the conditions indicated by such investigations or records are representative of those existing throughout such areas, or any part thereof, or that unforeseen developments may not occur, or that materials other than, or in proportions different from those indicated, may not be encountered. No information derived from such inspection of records of investigations or compilation thereof made by the City, the Department or from the Engineer, or his or her assistants, will in any way relieve the Bidder or Contractor from properly examining the site and making such additional investigations as it may elect, or from properly fulfilling the terms of the Contract.

SECTION 2: BID REQUIREMENTS

2-1.01 PROPOSAL FORMS. The Department will furnish to each Bidder standard Proposal Forms, which, when filled out and executed may be submitted as the bid. Proposals shall include all pages in the Project Manual with page numbers marked “PROP” plus the Addendum acknowledgment form (front sheet) from all Addenda received by the Bidder. Proposals shall be removed from the Project Manual. The full Project Manual shall not be submitted with the proposal. Bids not presented on forms so furnished will be disregarded.

The Proposal and one (1) copy thereof shall be submitted as directed in the “Notice to Contractors” under sealed cover plainly marked as a Proposal, and identifying the project to which the Proposal relates and the date of the bid opening therefor. Proposals which are not properly marked may be disregarded.

All blank spaces in the Proposal must be completed, as required, in ink. All price information shall be shown, clearly legible, in figures where required.

The Bidder shall sign the Proposal in the blank space provided therefor. If the Bidder is the sole owner, the Proposal shall be signed by the owner. If the Bidder is a corporation, the legal name of the corporation and its State of incorporation shall be set forth and the Proposal shall be signed by at least two officers authorized to sign contracts on behalf of the corporation. If the Bidder is a partnership, the true name of the firm shall be set forth, the names and addresses of all partners shall be given and the Proposal shall be signed by a partner in the firm authorized to sign contracts on behalf of the partnership. If the Bidder is a joint venture, the Proposal shall be signed on behalf of each participating company by officers or other individuals who have the full and proper authorization to do so. If the Proposal is signed by an agent of the Bidder other than an officer of a corporation or a member of a partnership, a notarized Power of Attorney must be

on file with the City prior to opening of bids or must be submitted with the Proposal. If requested by the City, the Bidder shall promptly submit evidence satisfactory to the City of the authority of the person signing the Proposal.

2-1.02 SUBMISSION OF BIDS. Bids must be submitted at the prescribed time and location specified in the Notice to Contractors. Any submission received after the prescribed time shall be rejected, regardless of whether or not bids are opened exactly at the prescribed time.

Any unauthorized conditions or qualifications entered on, or changes made to, the Proposal may render it invalid and may cause its rejection.

No telegraphic, telephonic, or facsimile or other electronically transmitted bids will be considered.

2-1.03 REQUIRED LISTING OF PROPOSED SUBCONTRACTORS. Each Proposal shall list the name, address and Contractor license number of each Subcontractor to whom the Bidder proposes to subcontract portions of the Work in an amount in excess of one-half of one percent (0.5%) of its total bid, in accordance with Section 4100 to 4114, inclusive, of the Public Contract Code for the State of California. The Bidder shall list the Subcontractor's license number and the portion of the Work that will be done by each Subcontractor. If the Bidder fails to specify a Subcontractor for any portion of the Work, the Bidder agrees to perform that portion of the Work itself, and represents that it is qualified to perform that portion of the Work itself. The Bidder's attention is invited to other provisions of the Public Contract Code related to the imposition of penalties for a failure to observe its provisions by using unauthorized Subcontractors or by making unauthorized substitutions.

2-1.04 CONTRACTOR'S LICENSING LAWS. Attention is directed to the provisions

of Business and Professions Code Chapter 9 of Division 3 concerning the licensing of Contractors.

All Bidders at the time of bid submittal shall be licensed as Contractors in accordance with the laws of this State. Any Bidder or Contractor not so licensed is subject to the penalties imposed by such laws. The form of Contractor's license required is stated in the Notice to Contractors, provided that the City makes no representation as to whether the State may require other or additional licenses. It is the Bidder's and Contractor's responsibility to obtain the correct Contractor's licenses. Bidders shall be skilled and regularly engaged in the general class or type of Work called for under this Contract.

All Bidders and Contractors, including Subcontractors, shall have a current City business license before undertaking any Work.

2-1.05 NONCOLLUSION DECLARATION. By submitting a bid, the Bidder represents and warrants that such bid is genuine and not a sham or collusive or made in the interest or on the behalf of any person therein named, and that the Bidder has not, directly or indirectly, included or solicited any other Bidder to put in a sham bid, or any other person, firm, or corporation to refrain from bidding, and that the Bidder has not in any manner sought collusion to secure the Bidder an advantage over any other Bidder.

Bidders shall submit a properly completed and executed "Noncollusion Declaration" in the form required by Public Contract Code Section 7106 and provided with the Proposal (PROP-11).

2-1.06 DISQUALIFICATION, REMOVAL OR OTHER PREVENTION OF BIDDING. A bid may be rejected on the basis of a Bidder, any officer of such Bidder, or any employee of such Bidder who has a proprietary interest in such Bidder, having been disqualified,

removed, or otherwise prevented from bidding on, or completing a federal, state, or local project because of a violation of law or a safety regulation.

2-1.07 PROPOSAL GUARANTY. All bids shall be accompanied by one of the following forms of Bidder's security: Cash, a cashier's check, a certified check, or a Bidder's bond executed by an admitted California surety insurer, made payable to the City of Roseville, or any other form of security deemed acceptable by the City Attorney. The security shall be in an amount equal to at least ten percent (10%) of the amount bid. A bid will not be considered unless one of the form of Bidder's security is enclosed with it.

A Bidder's bond shall conform to the City's bond form in the Proposal and shall be properly filled out and executed.

2-1.08 SCHEDULE OF BID ITEMS. Bidders are directed to submit unit and lump sum prices for all Work set forth in the Contract Documents on the Proposal Form entitled "Schedule of Bid Items."

Unit prices and lump sum prices, as indicated, must be entered in the appropriate spaces provided in the Schedule of Bid Items. If applicable, unit prices shall be multiplied by the quantities shown, and the total shall be inserted in the Amount column. In the event of any error or discrepancy between the unit price and the calculated amount, the unit prices shall govern.

The City may correct any mathematical errors apparent on the face of the bid.

The amounts shown in the Amount column must be added together in arriving at the Grand Total Bid Price.

Amounts for Allowance bid items must be entered in the exact amount in the Amount column.

The prices included within the Schedule of Bid Items shall include all costs for labor,

materials, tools, equipment, services, Subcontractors, suppliers, taxes, insurance, shipment, delivery, overhead, profit, and all other costs necessary to perform the Work in accordance with the Contract Documents.

The Grand Total Bid Price shall be indicated in the Summary table form included with the Schedule of Bid Items. The Grand Total Bid Price shall be the sum of the amounts bid for each of the designated portions of the Work, as more specifically described on the Schedule of Bid Items form itself.

Full compensation for complying with the Contract Documents, including requirements of the Standard Specifications, the General Conditions, Supplemental Conditions, and all warranties, shall be considered included in the bid items and no additional compensation shall be allowed therefor.

Full compensation for completion of all work as shown on the plans, as specified in the Specifications, and as directed by the City, shall be considered included in the bid items and no additional compensation shall be allowed.

Bidders are strongly discouraged from submitting unbalanced bids. As used herein, the term “unbalanced bid” is defined as any bid that does not include a reasonable proportionate allocation of indirect costs and profit of each bid item indicated in the Schedule of Bid Items. The City reserves the right to reject any unbalanced bid if the City determines that there is a reasonable doubt that an acceptance of the bid will not result in the lowest ultimate cost to the City with regard to the work or a disproportionate distribution of contract funds.

The City reserves the right to delete any bid item in its entirety and/or significantly reduce the quantity of Work under a bid item. The City makes no representation that any Work under a bid item will be performed during the course of the Project or that the Work will be

performed at the quantities included in the Schedule of Bid Items. As provided in the General Conditions, for any deleted Work, Contractor shall not be entitled to payment of the indirect costs and profit included for said bid item. All bid items shall be considered distinct and severable from the remaining bid items, and each Bidder acts at its peril if its bid is unbalanced.

The City shall compare bids on the basis of the Grand Total Bid Price, which includes the base bid and any alternates designated on the Schedule of Bid Items. Alternates may or may not be awarded, or may be awarded in any combination, at the City's discretion.

2-1.09 WITHDRAWAL OF PROPOSALS. Any bid may be withdrawn at any time prior to the time fixed in the Notice to Contractors for the opening of bids, provided that a request in writing, executed by the Bidder or its duly authorized representative, for the withdrawal of such bid is filed with the City Clerk. Facsimile and electronic mail requests are not acceptable. The withdrawal of a bid shall not prejudice the right of a Bidder to file a new bid. The withdrawal of any bid after the time fixed in the Notice to Contractors for the opening of bids will not be permitted.

2-1.10 ADDENDUM. Proposals shall include all costs and account for all Addenda issued prior to opening of bids. The Bidder is responsible for verifying that all issued Addenda have been received. An Addendum acknowledgment form for each Addendum shall be included as part of the Proposal submittal.

2-1.11 PUBLIC OPENING OF PROPOSALS. Proposals will be publicly opened and read at the time and place indicated in the Notice to Contractors. Bidders or their authorized agents are invited to be present.

2-1.12 TRENCHING AND EXCAVATION WORK. In accordance with the provisions of California Labor Code Section 6707, if the Work involves construction of a

pipeline, sewer, sewage disposal system, boring or jacking pits, or similar trenches or open excavations, which are five feet (5') or deeper, each bid submitted shall contain, as a bid item, adequate sheeting, shoring, and bracing, or equivalent method, for the protection of life or limb, which shall conform to all applicable safety orders.

SECTION 3: EVALUATION OF BIDS

3-1.01 BID EVALUATION PROCESS. Bids will be evaluated to determine the apparent low Bidder. The apparent low Bidder will be determined on the basis of the Grand Total Bid Price, as shown in the Schedule of Bid Items. If additive or deductive alternates are used in the Schedule of Bid Items, the apparent low Bidder will be the Bidder with the lowest total of the bid prices for base contract items plus the alternates designated by the City as those that will be used for determining the lowest bid price. However, the City reserves the right to (1) not award any alternates or (2) award any combination of alternates.

In case of discrepancy between the total of the base contract items and any specified alternates and the stated Grand Total Bid Price, the total of the base contract items plus specified alternates shall prevail. Any mathematical errors that appear on the face of the bid will be corrected by the City and the City will use the mathematically corrected addition. For example, if the mathematical total of Bidder's base contract items plus specified alternates equals \$1,000,000, but the Bidder has written \$1,250,000 as the Grand Total Bid Price, the City will consider \$1,000,000 to be the Bidder's Grand Total Bid Price for purposes of comparison to other Bidders and actual bid award. The City reserves its rights to reject or accept bids based on discrepancies between the stated Grand Total Bid Price and the actual mathematical total of the base contract bid items, plus specified alternates.

3-1.02 REJECTION OF IRREGULAR PROPOSALS. Proposals may be rejected in the City's sole discretion if they show any alterations of form, additions not called for, conditional bids, incomplete bids, erasures, or irregularities of any kind. However, the City reserves the right to waive any minor irregularities and informalities in any bid or in the bid procedure for any reason.

3-1.03 COMPETITIVE BIDDING. If more than one proposal is offered by any individual, firm, partnership, corporation, association, or any combination thereof, under the same or different names, all such proposals may be rejected. A party who has quoted prices on materials or Work to a Bidder is not thereby disqualified from quoting prices to other Bidders, or from submitting a bid directly for the materials or Work.

All Bidders are put on notice that any collusive agreement to control or affect the awarding of this Contract is in violation of the competitive bidding requirements of the City Charter, State Contract Act and the Business and Professions Code and may render void any Contract let under such circumstances.

3-1.04 RELIEF OF BIDDERS. If the Bidder claims a mistake was made in its bid, the Bidder shall give the Department written notice within five (5) Days after the opening of the bids of the alleged mistake, specifying in the notice in detail how the mistake occurred. No relief from a claimed mistaken bid shall be granted unless such mistake clearly appears on the face of the bid submitted to the City. Claimed mistakes on backup worksheets, spreadsheets, computerized bidding programs, or any other similar calculative bidding mistake which is not apparent on the face of the bid shall not under any circumstance be considered as a basis for relief. The burden of proving the occurrence of a mistake entitling a Bidder to relief from its bid rests entirely on the Bidder. Relief from bids shall be in the City's sole discretion.

SECTION 4: AWARD AND EXECUTION OF CONTRACT

4-1.01 AWARD OF CONTRACT. The City reserves the right to reject any and all proposals and to award (or not award) any combination of bid items at its option. Any such award will be to the lowest responsible Bidder whose proposal complies with the requirements prescribed for the bid items awarded. Such award, if made, will be made within sixty (60) business days after the opening of the proposals. If the lowest responsible Bidder refuses or fails to execute the Contract, or provide an acceptable Performance Bond, Payment Bond, and insurance certificate(s), the City may award the Contract to the second lowest responsible Bidder. Such award, if made, will be made within eighty-two (82) business days after the opening of proposals. If the second lowest responsible Bidder refuses or fails to execute the Contract, or provide an acceptable Performance Bond, Payment Bond, and insurance certificate(s), the City may award the Contract to the third lowest responsible Bidder. Such award, if made, will be made within one hundred four (104) business days after the opening of the proposals. The above time periods within which the award of Contract may be made are subject to extension for such further period as may be agreed upon in writing between the City and the Bidder concerned.

4-1.02 RETURN OF BIDDER'S SECURITIES. Within ten (10) Days after the award of the Contract, the City Clerk will return all Bidders' securities, other than Bidders' bonds, accompanying the proposals that are not to be further considered in making the award. Retained Bidders' securities will be held until the Contract has been fully executed, after which all Bidders' securities, except Bidders' bonds and any Bidders' securities that have been forfeited, will be returned.

4-1.03 CONTRACT BONDS. The successful Bidder shall furnish two (2) bonds in the form contained in the section entitled Insurance Broker Information Packet and Bonds. One (1)

bond shall secure the payment of the claims of laborers, mechanics or materialmen employed on the Work under the Contract, and the other bond shall guarantee the faithful performance of the Contract.

Each of the two (2) bonds shall be in a sum equal to one hundred percent (100%) of the Contract Price. If the Contract Price increases by the issuance of Change Orders, the penal amounts of the bonds required shall increase accordingly. Sureties on each of said bonds shall be satisfactory to the City.

All alterations, extensions of time, extra and additional Work, and other changes authorized by the Standard Specifications, the General Conditions, the Supplemental Conditions or any part of the Contract may be made without securing the consent of the surety or sureties on the Contract bonds.

Furthermore, the successful Bidder shall furnish a certificate from the County Clerk as required by California Civil Code of Procedure Section 995.660(a)(3).

4-1.04 INSURANCE. At the time of the execution of the Contract, the Contractor shall, at its own expense, procure, and at all times during the prosecution of the Work maintain in full force and effect Worker's Compensation Insurance, and Liability Insurance as specified in the General Conditions. The Contractor shall provide a Certificate of Insurance in the form contained in the section entitled Insurance Broker Information Packet.

4-1.05 EXECUTION OF CONTRACT. The Contract shall be signed by the successful Bidder and returned, together with all the required Contract bonds and insurance certificates, within ten (10) Working Days after the Contract has been awarded, or as otherwise directed, in writing, by the City.

If the Bidder is an individual, the Contract shall be executed personally by the Bidder. If

the Bidder is a partnership, it is desirable that the Contract be executed by all of the partners, but it may be executed by one of them. If the Bidder is a corporation, it must be executed by two officers of the corporation consisting of (1) the chairman of the board, president or vice president; and (2) the secretary, assistant secretary, chief financial officer, treasurer or assistant treasurer, or by a person authorized by the corporation to execute written contracts on its behalf, and the corporate seal affixed thereto. In the alternative, a person other than an officer may sign the Contract, provided evidence satisfactory to the City is provided indicating the individual's authority to bind the corporation. If the corporate seal is not affixed to the Contract, or if it is executed by a person other than officers, or only by one officer, there must be attached to the Contract a certified copy of a resolution of the corporation authorizing such officer or person to execute written contracts for and on behalf of the corporation. If the Bidder is a joint venture, the Contract must be executed on behalf of each participating firm by officers or other individuals who have the full and proper authorization to do so.

4-1.06 FAILURE TO EXECUTE CONTRACT. Failure of the lowest responsible Bidder, the second lowest responsible Bidder, or the third lowest responsible Bidder to execute the Contract and file acceptable bonds and insurance as provided within ten (10) Working Days after the Contract has been awarded, or as otherwise directed, in writing, by the City, shall be just cause for annulment of the award and forfeiture of the Bidder's security. The successful Bidder may file with the City Clerk a written notice, signed by the Bidder or Bidder's authorized representative, specifying that the Bidder will refuse to execute the Contract if presented to Bidder. The filing of such notice shall have the same force and effect as the failure of the Bidder to execute the Contract and furnish acceptable bonds within the time prescribed.

SECTION 5: BID PROTEST PROCEDURES

5-1.01 POLICY/PROCEDURES. It is the policy of the City to consider fully and adjudicate promptly protests filed by prospective Bidders relating to the City's bidding procedure or award of the Contract. Protests shall be filed and processed in accordance with Section 4.12.150 of the Roseville Municipal Code. A Bidder's failure to follow the bid protest procedures may result in rejection of the protest by the City.

**PROPOSAL TO THE DEPARTMENT OF ENVIRONMENTAL UTILITIES
AQUIFER STORAGE AND RECOVERY – MONITORING WELLS PROJECT**

PROP-1

The undersigned Bidder understands that any clarification made to the above or any new and different conditions or information submitted on or with its Proposal, other than that requested, may render the bid non-responsive.

The undersigned, as Bidder, declares that the only persons or parties interested in this Proposal as principals are those named herein; that this Proposal is made without collusion with any other person, firm, or corporation; that the Bidder has carefully examined the location of the proposed Work, the attached Form of Agreement, and the plans, Specifications, and other Contract Documents; and agrees if this Proposal is accepted, that it will contract with the City of Roseville, in the form of a copy of the Agreement contained in the Project Manual, to provide all necessary machinery, tools, apparatus and other means of construction, and to do all the work and furnish all the materials specified in the Contract Documents, in the manner and time therein prescribed, and according to the requirements of the Director, as therein set forth, and that the Bidder will take in full payment therefore prices indicated in the Schedule of Bid Items, including all work modified by addendum numbers_____. (IF NONE, STATE NONE).

Bids are required for all Bid Items. The amount of the Bid for comparison purposes will be the total of all items awarded.

The Bidder shall set forth for each item of work, in clearly legible figures, an item (“unit”) price and a total for the item in the respective spaces provided for this purpose in the Schedule of Bid Items.

The prices included within the Schedule of Bid Items include all costs for labor, materials, tools, equipment, services, Subcontractors, suppliers, taxes, insurance, shipment, delivery, overhead, profit, and for all other costs necessary to perform the Work in accordance

with the Contract Documents.

Accompanying this Proposal is _____ (Insert the words

“Cash,” “Cashier's Check,” “Certified Check,” or “Bidder's Bond,” as the case may be)

In the Amount of: _____ (an amount equal to at least ten percent (10%) of the total of the Bid.)

The names of all persons interested in the foregoing Proposal as Principals, are as follows:

The names of the following staff persons that will be directly involved in this project are:

END OF SCHEDULE OF BID ITEMS

NONCOLLUSION DECLARATION TO BE EXECUTED BY
BIDDER AND SUBMITTED WITH BID

The undersigned declares:

I am the _____ of _____, the party
making the foregoing bid.

The bid is not made in the interest of, or on behalf of, any undisclosed person, partnership, company, association, organization, or corporation. The bid is genuine and not collusive or sham. The Bidder has not directly or indirectly induced or solicited any other Bidder to put in a false or sham bid. The Bidder has not directly or indirectly colluded, conspired, connived, or agreed with any Bidder or anyone else to put in a sham bid, or to refrain from bidding. The Bidder has not in any manner, directly or indirectly, sought by agreement, communication, or conference with anyone to fix the bid price of the Bidder or any other Bidder, or to fix any overhead, profit, or cost element of the bid price, or of that of any other Bidder. All statements contained in the bid are true. The Bidder has not, directly or indirectly, submitted his or her bid price or any breakdown thereof, or the contents thereof, or divulged information or data relative thereto, to any corporation, partnership, company, association, organization, bid depository, or to any member or agent thereof, to effectuate a collusive or sham bid, and has not paid, and will not pay, any person or entity for such purpose.

Any person executing this declaration on behalf of a Bidder that is a corporation, partnership, joint venture, limited liability company, limited liability partnership, or any other entity, hereby represents that he or she has full power to execute, and does execute, this declaration on behalf of the Bidder.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that this declaration is executed on _____
[date], at _____[city], _____[state].

(Signature of Declarant)

A G R E E M E N T

THIS AGREEMENT, is made and entered into this _____ day of _____, 20____, by and between the City of Roseville, a municipal corporation, (“CITY”), and _____, a _____, (“CONTRACTOR”); and

W I T N E S E T H:

WHEREAS, the City Council of the CITY, at a meeting held on the _____ day of _____, 20____, approved plans and specifications for the:

Aquifer Storage and Recovery – Monitoring Wells Project

and directed the City Clerk to advertise for sealed proposals for doing said work and providing that bids be submitted on the 9th day of June, 2020; and

WHEREAS, the City Clerk, thereafter duly and regularly caused a notice to be published in the manner and for the time prescribed by law; and

WHEREAS, CONTRACTOR, pursuant to the provisions of said notice duly filed a bid with the City Clerk, a true copy of which bid is now on file in the office of the City Clerk, and is hereby referred to and by this reference made a part hereof as fully as if set forth at length herein; and

WHEREAS, all bids received pursuant to said notice were opened and examined and publicly declared at the time specified in said advertisement for bids and at a meeting of the City Council held on the _____ day of _____, 20____, the Council found and declared the bid of CONTRACTOR to be the lowest responsible bid and thereupon awarded a contract to CONTRACTOR to do the work referred to in the aforementioned specifications.

NOW, THEREFORE, the parties agree as follows:

1. THE WORK. CONTRACTOR agrees:

a. To do the work and furnish all the labor, materials, tools, supplies, equipment, superintendence, insurance, and bonds required for the _____

in accordance with the Contract Documents (the Work).

b. To do and perform the Work contemplated hereby in a good and workmanlike manner under the direction of and to the satisfaction of the Director of Public Works of the City of Roseville.

2. PAYMENT. CITY shall pay CONTRACTOR _____ dollars (\$ _____) for the Work to be done under this Agreement in accordance with the Contract Documents.

3. CONTRACT DOCUMENTS. The complete Agreement between the parties hereto consists of the following documents:

a. The advertisement for bids (including the Notice to Bidders, Instructions to Bidders and Proposals);

b. The accepted bid;

c. Plans and specifications (including general conditions, supplemental conditions, special provisions and construction details);

d. Bonds and insurance required by the specifications; and

e. This contract.

All documents specified above are intended to operate so that any work called for in any one and not mentioned in the other, or vice versa, is to be executed the same as if

mentioned in all said documents.

4. LIQUIDATED DAMAGES. In the event CONTRACTOR does not complete the

Work within the time specified, CONTRACTOR agrees that CITY will suffer damages.

Inasmuch as the actual damages which would result from such breach by CONTRACTOR under this Agreement are uncertain, and would be impractical or extremely difficult to fix,

CONTRACTOR agrees that it shall pay, or CITY shall deduct from CONTRACTOR's fee, the amount of \$1,000 per day as liquidated damages, in the event of such delay.

5. TIME OF COMPLETION. Time is of the essence of this Agreement.

CONTRACTOR shall complete all Work under the Contract Documents within 120 Days of the date of this Contract. CONTRACTOR shall begin work by the date specified in the "Notice to Proceed" letter and shall diligently prosecute all of the Work under this Contract in all parts and requirements as defined in the Contract Documents.

6. SERVICE OF NOTICE. Any notice required or permitted to be given under this Agreement shall be deemed given when (a) personally delivered to the recipient identified below; (b) mailed by registered or certified mail, return receipt requested, postage pre-paid, to the address specified below; or (c) sent by facsimile, with confirmation of receipt, to the facsimile number identified below.

CITY OF ROSEVILLE

CONTRACTOR

CITY may also act through either its architect or construction manager if CITY expressly gives notice to CONTRACTOR, in writing, that CITY's designee has authority to act for CITY in a specific capacity.

7. DISPUTES. Disputes arising from this Agreement will be determined in accordance with the Contract Documents and Public Contract Code Sections 10240-10240.13.

8. GOVERNING LAW. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

9. INDEPENDENT CONTRACTOR. CONTRACTOR shall act as an independent contractor, and covenants and agrees that it will conduct itself consistent with such status, that it will neither hold itself out as, nor claim to be, an officer or employee of CITY by reason of this Agreement.

10. SUCCESSORS IN INTEREST. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.

11. MODIFICATION. This Agreement and each provision contained herein may be waived, amended, supplemented or eliminated only by mutual written agreement of the parties.

12. SEVERABILITY. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

13. INTEGRATED AGREEMENT. This is an integrated agreement and contains all of the terms, considerations, understanding and promises of the parties. It shall be read as a whole.

14. CONTRACTORS LICENSE LAW. CONTRACTORS ARE REQUIRED BY LAW TO BE LICENSED AND REGULATED BY THE CONTRACTORS' STATE LICENSE

BOARD WHICH HAS JURISDICTION TO INVESTIGATE COMPLAINTS AGAINST CONTRACTORS IF A COMPLAINT REGARDING A PATENT ACT OR OMISSION IS FILED WITHIN FOUR (4) YEARS OF THE DATE OF THE ALLEGED VIOLATION. A COMPLAINT REGARDING A LATENT ACT OR OMISISON PERTAINING TO STRUCUTRAL DEFECTS MUST BE FILED WITHIN TEN (10) YEARS OF THE DATE OF THE ALLEGED VIOLATION. ANY QUESTIONS CONCERNING A CONTRACTOR MAY BE REFERRED TO THE REGISTRAR, CONTRACTORS' STATE LICENSE BOARD, P.O. BOX 26000, SACRAMENTO, CALIFORNIA 95826.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attestation by its City Clerk under authority of Resolution No., adopted by the Council of the City of Roseville on the _____ day of _____, 20_____, and CONTRACTOR has caused this Agreement to be duly executed.

INSURANCE BROKER INFORMATION PACKET

Project: AQUIFER STORAGE AND RECOVERY – MONITORING WELLS PROJECT

NOTICE TO CONTRACTOR:

For your convenience, this package contains the Requirements for Insurance and Bonds for this project, including the necessary City forms. You are required to return these forms in addition to the executed Contract within fifteen (15) calendar days after the award of the Bid, unless otherwise directed by City in writing. (See the Instructions to Bidders.)

Please insert the dollar amount of your accepted Bid into the blank on page INS-1 and present this entire package to your insurance broker if you are awarded the Bid.

NOTICE TO INSURANCE BROKER

Your client has been awarded a bid by the City Council of the City of Roseville to perform a public works project known as AQUIFER STORAGE AND RECOVERY – MONITORING WELLS PROJECT. The Contract Conditions for that project require your client (“the Contractor”) to return certain evidence of insurance and bonds to the City Attorney of the City within fifteen (15) days after the Bid award, unless otherwise directed by the City in writing, or else the Bid award may be terminated and awarded to another company.

This package contains the information you will need as an insurance broker to provide the appropriate insurance and bonds to the City. The insurance coverages the Contractor needs are specified in the section entitled “Insurance Requirements.” Please note that, in addition to the insurance certificate itself, copies of several endorsements must be actually furnished.

Please refer to the Supplemental Conditions for modifications of the General Conditions, if any, and the requirements of this insurance packet.

Please use the standard City of Roseville Bond Forms provided in this package.

The Bonds required must each be in the penal amount of: \$ _____

Bonds must be sent to the following staff person:

Jason Marks
2005 Hilltop Circle
Roseville, CA 95747

Insurance documents must be provided using one of the following methods:

- a. By email to roseville@ebix.com and riskmanagement@roseville.ca.us
- b. By fax to (770) 335-5727 and (916) 774-5461

After using one of these methods, please **DO NOT** send the insurance certificate(s) by mail.

When forwarding the documents, please refer to the project name so that the documents can be matched with the Contract for which they are submitted.

Thank you.

INSURANCE REQUIREMENTS

The following sections are quoted from the General Conditions:

5-1.23 INSURANCE COVERAGE.

A. Evidence of Maintenance Required. The Contractor shall, at its expense, procure and at all times maintain in full force and effect at a minimum the insurance required by this section on all of its operations; and the Contractor shall not allow any Subcontractor to commence work until similar insurance required of the Subcontractor has been obtained and filed. An original Certificate of Insurance, and copies of all required endorsements, all in a form approved by the Risk Manager, evidencing all required coverage or policies shall be filed after the award of the bid and prior to approval of the Contract by the City Council. Contractor shall provide ten (10) days prior written notice to the City of any reduction of coverage limits or cancellation of the coverage or policies shall be given to the City of Roseville as Certificate holder.

B. Qualifying Insurers. With the exception of the State Compensation Insurance Fund, all required insurance policies shall be issued by companies acceptable to the City and licensed to do business in the State of California and who hold a current policy holders alphabetic and financial size category rating of not less than AVII according to the most recent issue of Best's Insurance Reports.

C. Insurance Required.

1. **Commercial General Liability (CGL):** Insurance Services Office Form CG 00 01 covering CGL on an “occurrence” basis, including products and completed operations with limits of no less than Two Million Dollars (\$2,000,000) per occurrence for bodily injury, personal injury and property damage for projects under One Million Dollars (\$1,000,000) and

limits of no less than Five Million Dollars (\$5,000,000) per occurrence for bodily injury, personal injury and property damage for projects over One Million Dollars (\$1,000,000). If a general aggregate limit applies, either the aggregate limit shall apply separately to this project or the general aggregate limit shall be twice the required occurrence limit.

The Commercial General Liability insurance shall include the following, copies of which shall be provided:

a. Inclusion of the City of Roseville, and its officers, agents, employees, and volunteers, as additional insureds (except for workers' compensation) as respects services or operations under the Contract. The additional insured endorsement for the general liability policy shall be at least as broad as the ISO CG 2010 10 01 combined with ISO CGL Endorsement CG 2037 10 01. Any other endorsement must be approved in writing by the City. Endorsements must include coverage for on-going and completed operations, which coverage shall be maintained for four (4) years following completion of the Project. Endorsements shall cover the City of Roseville, its officers, agents, employees, and volunteers.

b. The insurance shall provide coverage for claims by one insured against another insured and the policies shall not contain any cross-suits exclusions, cross-liability exclusions, or insured versus insured exclusions. The policies shall not contain any classification exclusions purporting to deny coverage for any work to be performed by Contractor or any of its Subcontractors.

c. Stipulation that the insurance is primary and noncontributory, as evidenced by a separate endorsement (CG 20 01 04 13 or an equivalent) or section of the policy, and that neither the City nor its insurers will be called upon to contribute to a loss.

d. Such insurance shall specifically cover the contractual liability of the Contractor.

e. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds.

Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

f. Waiver of subrogation endorsement.

g. The Contractor shall furnish a certificate for the period covered.

2. Automobile Liability: Insurance Services Office Form Number CA 0001 covering Code 1 (any auto), or if Contractor has no owned autos, Code 8 (hired) and Code 9 (non-owned), with limits of no less than One Million Dollars (\$1,000,000) per accident for bodily injury and property damage.

3. Workers' Compensation: In accordance with the provisions of the California Labor Code, Contractor is required to be insured against liability for Workers' Compensation or to undertake self-insurance. Statutory Workers' Compensation and Employers' Liability of at least One Million Dollars (\$1,000,000) shall cover all Contractors staff while performing any work incidental to the performance of this Agreement.

4. Professional Liability: Professional Liability (Errors and Omission) Insurance appropriate to Contractor's profession, with a limit of liability not less than One Million Dollars (\$1,000,000) per occurrence or claim and Two Million Dollars (\$2,000,000) aggregate to cover all design and engineering services rendered by Contractor pursuant to the Agreement. Coverage must commence from the first day that Contractor or any of its Subcontractors provided any design or engineering services in connection with the Project.

5. Builder's Risk/Course of Construction Insurance Is Required by Risk

Management: The Contractor shall be responsible for all loss, damage or destruction whatsoever to the work called for by this Contract until the approval of a Notice of Completion or acceptance of the Work if no Notice of Completion is to be recorded.

The Contractor shall secure "All Risk" type of builder's Risk Insurance of the type covering one hundred percent (100%) of the value of the work performed under this Contract (the value is presumed to be the Contract amount unless otherwise stated in Supplemental Conditions) and all materials, equipment, or other items to be incorporated therein while the same are located at the construction site, a bonded warehouse, or its place of manufacture. At any time, the policy shall cover the value of the work completed. The policy shall cover hazards including the losses due to fire, explosion, hail, rain, lightning, flood (separate insurance as needed), vandalism, malicious mischief, wind, collapse, aircraft, and smoke.

The policies providing such insurance shall name the City as a loss payee as its respective interests may appear, and certified copies of such policies shall be filed with the City. The maximum deductible allowable under the Builder's All Risk policy shall be five percent (5%) of the Contract amount.

Builder's Risk Insurance is not required for coverage of losses in excess of five percent (5%) of the Contract amount for damages resulting from earthquake in excess of a magnitude of 3.5 on the Richter scale, or tidal waves. Coverage in the amount of five percent (5%) of the Contract amount for such losses is required.

6. Pollution Coverage: Contractor shall procure pollution liability coverage or other insurance covering claims for bodily injury or property damage arising out of the abatement, removal, storage, transportation, or other exposure to hazardous materials or pollutants, in limits

not less than Two Million Dollars (\$2,000,000). Contractor shall add the City and all parties required to be indemnified by Contractor as additional insured on all pollution liability policies.

7. **Higher Coverage Limits:** If Contractor maintains higher coverage limits than the amounts shown above, then the City requires and shall be entitled to coverage for the higher coverage limits maintained by Contractor. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the City.

8. **Claims Made Coverage:** Liability insurance coverage may not be written on a “claims made” or modified occurrence basis. The Certificate of Insurance must clearly provide that the coverage is on an “occurrence” basis.

5-1.24 OTHER INSURANCE PROVISIONS.

A. The requirements of the Standard Specifications as to types and limits of insurance coverage to be maintained by the Contractor, and any approval of insurance by the City, are not intended to, and shall not in any manner limit or qualify the liabilities and obligations otherwise assumed by the Contractor pursuant to the Contract, including, but not limited to, the provisions concerning indemnification, nor preclude the City from taking any other action available to it under any other provision of the Contract or law.

B. The City acknowledges that some insurance requirements contained in these Standard Specifications may be fulfilled by self-insurance on the part of the Contractor. However, this shall not in any way limit liabilities assumed by Contractor under the Contract. Any self-insurance must be approved in writing by the City, in its sole discretion and shall not reduce the limits of liability. Any deductibles or self-insured retentions (“SIR”) must be declared on the certificate of insurance and approved by City in writing. Policies containing any

SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

C. The Contractor agrees to include in its contracts with all subcontractors the same requirements and provisions of this Contract, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, the Contractor shall require its subcontractors to agree to be bound to the Contractor and the City in the same manner and to the same extent as the Contractor is bound to the City under this Contract. Additionally, the Contractor shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of the City's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request. Alternatively, the Contractor may insure subcontractor(s) under its own policy.

D. The City, its officers, agents, employees, and volunteers are to be covered as insureds with respect to liability arising out of automobiles owned, leased, hired or borrowed by or on behalf of the Contractor; and with respect to liability arising out of work or operations performed by or on behalf of the Contractor including materials, parts or equipment furnished in connection with such work or operations. Coverage shall not extend to any indemnity coverage for the active negligence of the additional insured in any case where an agreement to indemnify the additional insured would be invalid under California Insurance Code Section 11580.04.

E. The limits of insurance required in this Contract may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a

provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of the City (if agreed to in a written contract) before the City's own insurance shall be called upon to protect it as a named insured.

F. The insurance procured by Contractor shall be subject to the approval of the City, but any acceptance of insurance certificates by the City shall in no way limit or relieve Contractor of its duties and responsibilities under the Agreement.

G. Contractor shall be responsible for all premiums, deductibles, and self- insured retention applicable to the insurance it is required to procure under the Contract. All deductibles or self-insured retentions over five hundred thousand dollars (\$500,000) must be approved by the City, in writing. Contractor shall be responsible for all deductibles, self-insured retention payments, and/or increased premiums incurred if the City's policies of insurance are forced to cover damages or respond to claims for which Contractor or its Subcontractors were obligated to provide insurance under the Contract.

H. Failure of the City to enforce in a timely manner any of the requirements of these insurance provisions shall not act as a waiver to enforcement of any of these provisions at a later date.

I. Contractor's indemnity obligations shall not be limited by these insurance provisions and shall survive the expiration of the Contract and the insurance provisions of the Contract shall likewise not be limited by the indemnity provisions of the Contract.

J. THE CITY RESERVES THE RIGHT TO WITHHOLD ANY PROGRESS PAYMENTS TO THE CONTRACTOR IN THE EVENT OF NONCOMPLIANCE WITH ANY INSURANCE REQUIREMENTS.

PUBLIC WORKS FAITHFUL PERFORMANCE BOND
AQUIFER STORAGE AND RECOVERY – MONITORING WELLS PROJECT

WHEREAS, the City of Roseville (“CITY”) has awarded a bid and contract to

as contractor (“PRINCIPAL”) for the public work described as AQUIFER STORAGE AND RECOVERY – MONITORING WELLS PROJECT (the “WORK”). The contract (“AGREEMENT”), for the public work described above, and all of its terms and conditions are incorporated by reference and made a part hereof; and

WHEREAS, the PRINCIPAL is required to furnish a bond in connection with the AGREEMENT guaranteeing its faithful performance; and

NOW, THEREFORE, we the undersigned PRINCIPAL and _____, a _____, admitted and duly authorized to transact business under the laws of the State of California, as SURETY (“SURETY”), are held and firmly bound unto the CITY or its successors and assigns in the sum of _____ dollars (\$ _____) (which amount is not less than 100% of the AGREEMENT price) to be paid to the CITY or its successors and assigns; and for which payment, well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors or assigns jointly and severally, firmly by these presents.

The condition of this obligation is such that if the PRINCIPAL, or its heirs, executors, administrators, successors or assigns, shall abide by, and in all respects promptly and faithfully perform the covenants, conditions and provisions in said AGREEMENT and any alteration thereof made as therein provided, notice of which alterations to Surety being hereby waived, on its part to be kept and performed at the time and in the manner therein specified, and in all respects according to their true intent and meaning, and shall indemnify and save harmless

CITY, its officers, agents, employees, volunteers as therein stipulated, then this obligation shall be null and void; otherwise, this obligation shall be and remain in full force and effect.

As condition precedent to the satisfactory completion of the contract, the obligation of the PRINCIPAL and SURETY under this Bond shall remain in effect for a period of one (1) year after the completion and acceptance of the WORK. During that time, if the PRINCIPAL, its heirs, executors, administrators, successors or assigns fails to make full, complete and satisfactory repair and replacement or totally protect the CITY from any loss or damage made evident during that year which results from or is caused by either defective materials or faulty workmanship in the prosecution of the WORK, then the obligation shall remain in full force and effect. However, anything in this paragraph to the contrary notwithstanding, the obligation of the SURETY shall continue so long as any obligation of the PRINCIPAL remains.

No prepayment or delay in payments, and no change, extension, addition or alteration of any provision of the AGREEMENT or in the specifications agreed to between the PRINCIPAL and the CITY, or any forbearance on the part of the CITY shall operate to relieve the SURETY. The SURETY hereby waives the provisions of Section 2819 of the California Civil Code. The SURETY waives all rights of subrogation against the CITY or any person employed by the CITY. If the contract price increases by the issuance of change orders, the amount specified in this bond shall increase by the same amount.

Whenever PRINCIPAL shall be and declared by CITY to be in default under the AGREEMENT, SURETY shall promptly remedy the default, or shall promptly do one of the follow at CITY's election:

1. Undertake through its agents or independent contractors, reasonably acceptable to CITY, to complete the AGREEMENT in accordance with its terms and conditions and to pay and perform all obligations of PRINCIPAL under the AGREEMENT, including without limitation, all obligations with respect to warranties, guarantees, and the payment of liquidated damages.
2. Reimburse CITY for all costs CITY incurs in completing the AGREEMENT, and in correcting,

repairing or replacing defects in materials or workmanship and/or materials and workmanship which do not conform to the specifications in the AGREEMENT.

SURETY's obligations hereunder are independent of the obligations of any other surety for the performance of the AGREEMENT, and suit may be brought against SURETY and such other sureties, jointly and severally, or against any one or more of them, or against less than all of them without impairing CITY's rights against the others.

No right of action shall accrue on this bond to or for the use of any person or corporation other than CITY or its successors or assigns.

As part of the obligation secured hereby and in addition to the face amount specified therefore, there shall be included costs and reasonable expenses and fees, including reasonable attorneys' fees, incurred by CITY in successfully enforcing such obligation, all to be taxed as costs and included in any judgment rendered.

**PUBLIC WORKS
LABOR AND MATERIALS PAYMENT BOND**

(Project: AQUIFER STORAGE AND RECOVERY – MONITORING WELLS PROJECT)

WHEREAS, the City of Roseville (“CITY”), has awarded a bid and contract to

_____ as contractor (“PRINCIPAL”), for the public work described as AQUIFER STORAGE AND RECOVERY – MONITORING WELLS PROJECT (the “WORK”). The contract (“AGREEMENT”), for the public work described above, and all of its terms and conditions are incorporated by reference and made a part hereof; and

WHEREAS, the PRINCIPAL is required to furnish a bond in connection with the AGREEMENT guaranteeing payment of persons who provide labor and material; and

NOW, THEREFORE, we the undersigned PRINCIPAL and _____

_____, a _____, admitted and duly authorized to transact business under the laws of the State of California, as SURETY (“SURETY”), are held and firmly bound unto the CITY or its successors and assigns in the sum of _____ dollars (\$ _____) (which amount is not less than 100% of the AGREEMENT price) to be paid to the CITY or its successors and assigns; and for which payment, well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors or assigns jointly and severally, firmly by these presents.

The condition of the obligation is such that if the PRINCIPAL, its subcontractors, heirs, executors, administrators, successors or assigns fails to pay any of the persons named in Section 8004 or 9100 of the Civil Code of the State of California, or the amounts due under the Unemployment Insurance Code of the State of California, or any amounts required to be deducted, withheld and paid over to the Employment Development Department from the wages of employees of the PRINCIPAL and its subcontractors pursuant to Section 13020 of the Unemployment Insurance Code, with respect to work or labor performed by any such claimant, that the SURETY will pay for the same, in an amount not exceeding the sum specified in this bond, and also, in case suit is brought upon the bond, shall pay reasonable attorneys’ fees, to be fixed by the Court.

This bond shall inure to the benefit of any and all persons, companies, and corporations entitled to file a Stop Payment Notice pursuant to the provisions of Section 9350 et seq. of the Civil Code of the State of California, so as to give a right of action to

them or their assigns in any suit brought upon this bond. No prepayment or delay in payments, and no change, extension, addition or alteration of any provision of the AGREEMENT or in the specifications agreed to between the PRINCIPAL and the CITY, or any forbearance on the part of the CITY shall operate to relieve the SURETY. The SURETY hereby waives the provisions of Section 2819 of the California Civil Code. The SURETY waives all rights of subrogation against the CITY or any person employed by the CITY. If the contract price increases by the issuance of change orders, the amount specified in this bond shall increase by the same amount.

As part of the obligation secured hereby and in addition to the face amount specified therefore, there shall be included costs and reasonable expenses and fees, including reasonable attorneys' fees, incurred by CITY in successfully enforcing such obligation, all to be taxed as costs and included in any judgment rendered.

SECTION 1 DEFINITIONS AND TERMS

1-1.01 **GENERAL.** When the following abbreviations and terms or pronouns in place of them appear in the Contract Documents, the intent and meaning shall be interpreted as provided in this Section 1.

1-1.02 **ACCEPTANCE.** Formal Acceptance by resolution by the Roseville City Council of the Contract when completed in all respects in accordance with the Contract Documents and any modifications previously approved.

1-1.03 **ADDENDUM.** Written interpretation or revision to any of the Contract Documents issued by the City before the bid opening.

1-1.04 **AS-BUILT DOCUMENTS, AS-BUILT DRAWINGS AND RECORD DOCUMENTS.** As-Built Documents, As-Built Drawings and Record Documents are all contract documents modified to reflect changes during the construction phase. Specifically, As-Built Documents/Drawings are a revised set of drawings submitted by the Contractor upon Final Completion of a project. They reflect changes made in the Specifications and Working Drawings during the construction process, and show the exact dimensions, geometry, and location of all elements of the work completed under the Contract. Record Documents, on the other hand, are compiled by the Engineer or Architect based on the As-Built Documents/Drawings submitted by the Contractor. They reflect the Engineer or Architect's concurring review of what changes were denoted, why they were made and where they occurred and create a record set of drawings.

1-1.05 **ASSESSMENT.** A cost imposed on the Contractor for non-compliance

with certain contractual requirements.

1-1.06 **BENEFICIAL OCCUPANCY.** The taking possession of a portion of the Work by the City for its use and/or occupancy on other than a temporary or emergency basis. 1-

1.07 **BID GUARANTY.** The cashier's, certified check, irrevocable standby letter of credit, deposit of securities, or Bidder's Bond, accompanying the bid submitted by the Bidder, as a guaranty that the Bidder will enter into an agreement with the City for the performance of the Work, if the Agreement is awarded to Bidder, and the Bidder will submit the required Contract Bonds and Certificate of Insurance. Also referred to as the Bidder's Security.

1-1.08 **BIDDER.** Individual, firm, partnership, limited liability company, corporation, joint venture, or any combination thereof, submitting a Proposal for the Work, acting directly, or through a duly authorized representative.

1-1.09 **BIDDING DOCUMENTS.** Includes the Notice to Bidders, Bidding Requirements, Contract Conditions, Drawings, and Addenda.

1-1.10 **CHANGE ORDER.** Any written order to the Contractor directing an addition, deletion, or modification of the Work, or an adjustment in the Contract Price or Contract Time provided in the Contract Documents and issued after the Agreement has been signed.

1-1.11 **CITY.** The City of Roseville.

1-1.12 **CITY ATTORNEY.** The City Attorney of the City.

1-1.13 **CITY CLERK.** The City Clerk of the City.

1-1.14 **CLAIM.** A separate demand by Contractor sent by registered mail or certified mail with return receipt requested, for one or more of the following: (a) a time extension, including, without limitation, for relief for damages or penalties for delay assessed by

the City; (b) payment by the City of money or damages arising from work done by, or on behalf of, Contractor pursuant to the Contract Documents and payment for which is not otherwise expressly provided or to which Contractor is not otherwise entitled; and (c) payment of an amount that is disputed by the City.

1-1.15 **CONSTRUCTION SCHEDULE.** A list or graphic display of construction activities required for completing the Work, in a format required by the Contract Documents. The duration, start and finish date, and sequence of significant activities, critical path, float and milestones must be indicated in the Construction Schedule.

1-1.16 **CONTRACT OR AGREEMENT.** The written agreement relating to the Work to be performed, the labor, materials, and equipment to be furnished, and the payment to be made therefor. The Agreement/Contract is part of and incorporates all of the Contract Documents.

1-1.17 **CONTRACT CONDITIONS.** Includes the General Conditions, Supplemental Conditions, and Specifications.

1-1.18 **CONTRACT DOCUMENTS.** Includes those documents that form the basis of the Contract, including but not limited to, Bidding Documents, the Bid or Proposal, Contract Bonds, the Contract, all required insurance certificates or endorsements, all bonds, all required certifications or statements, Change Orders, any Contract Amendment, any City Standard which is incorporated by reference and these City of Roseville General Conditions for Buildings and Grounds.

1-1.19 **CONTRACT DRAWINGS.** The official drawings including plans, elevations, sections, detail drawings, diagrams, plated, General Notes, information and schedules thereon, or exact reproductions thereof, showing the location, character, dimension, and details

of the Work. The Contract Drawings include any drawings or plates bound within the Supplemental Conditions.

1-1.20 **CONTRACT PRICE.** The total compensation to be paid to the Contractor in accordance with the terms of the Agreement.

1-1.21 **CONTRACT TIME.** The number of Days, or portion thereof, allowed for completion of the Work, including all authorized time extensions. The effective date for commencement of the Work specified in the Notice to Proceed shall define the beginning of the Contract Time.

1-1.22 **CONTRACTOR.** Individual, firm, partnership, limited liability company, corporation, joint venture, or any combination thereof, who has entered into the Agreement with City.

1-1.23 **DAY OR DAYS.** Unless otherwise designated, Day or Days as used in the Contract Documents will be understood to mean calendar Day or Days.

1-1.24 **DEPARTMENT.** The Department for Contract Administration, as identified in the Supplemental Conditions.

1-1.25 **DIRECT COSTS.** Those cost items (including labor, materials, equipment and any subcontractor's work) that are used in the actual performance of, and are specifically and uniquely attributable to the Work or changed Work. Direct Costs do not include Overhead. Direct Costs only include the following:

A. Payroll costs for employees in the direct employ of Contractor in the performance of the Work under schedules of job classifications agreed upon by City and Contractor. Payroll costs for employees not employed full time on the Work shall be apportioned on the basis of their time spent on the Work. Payroll costs shall include salaries and

wages plus the cost of fringe benefits which shall include social security contributions, unemployment, excise and payroll taxes, workers' compensation, health and retirement benefits, sick leave, vacation and holiday pay applicable thereto. Such employees may include superintendents and foremen at the site. The expenses of performing work after regular working hours, on Saturday, Sunday or legal holidays shall be included in the above only to the extent authorized by City in writing.

B. Cost of all materials and equipment furnished and incorporated in the Work, including costs of transportation and storage thereof, and suppliers' field services required in connection therewith. All trade discounts, rebates and refunds and all returns from sale of surplus materials and equipment shall accrue to City, and Contractor shall make provisions so that they may be obtained.

C. Payments made by Contractor to the subcontractors for work performed by subcontractors. If required by City, Contractor shall obtain competitive bids from subcontractors acceptable to Contractor and shall deliver such bids to City who will then determine which bids will be accepted. If a subcontract provides that the subcontractor is to be paid on the basis of cost of the work plus a fee, the subcontractor's cost of the work shall be determined in the same manner as Contractor's cost of the work. All subcontracts shall be subject to the other provisions of the Contract Documents insofar as applicable.

D. Costs of special consultants (including engineers, architects, testing laboratories, surveyors, and accountants) employed for services specifically, and only, related to the Work.

E. Supplemental costs including the following:

1. The proportion of necessary transportation, travel and subsistence

expenses of Contractor's employees incurred in discharge of duties connected with the Work.

2. Cost, including transportation and maintenance, of all materials, supplies, equipment, machinery, appliances, office and temporary facilities at the site and hand tools not owned by the workers, which are consumed in the performance of the Work, and cost, less market value of such items used but not consumed which remain the property of Contractor.

3. Rentals of all construction equipment and machinery and the parts thereof whether rented from Contractor or others in accordance with rental agreements approved by City, and the costs of transportation, loading, unloading, installation, dismantling and removal thereof, all in accordance with terms of said rental agreements. The rental of any such equipment, machinery or parts shall cease when the use thereof is no longer necessary for the Work.

4. Sales, consumer, use or similar taxes related to the Work, and for which Contractor is liable, imposed by laws and regulations.

5. The cost of utilities (including the meter and all associated installation costs), fuel and sanitary facilities at the site.

6. Cost of premiums for additional bonds and insurance required because of changes in the Work.

1-1-26 **DIRECTOR.** Director of the Department for Contract Administration or his or her designee.

1-1.27 **EMERGENCY.** Any sudden generally unforeseen occurrence (such as a fire, flood, storm, earthquake, civil disorder, or other natural and/or man-made disaster) that has the potential to adversely affect the safety of life, the Work, and/or adjacent property; to interrupt

contracts essential to the performance of the Work; and/or to cause catastrophic failure of City of Roseville, CA equipment and/or facilities.

1-1.28 **ENGINEER OR ARCHITECT.** Professional Engineer or Architect designated for a particular project responsible for signing and sealing the permit drawings, interpretation of the drawings where ambiguities exist, review of requests for information, design Change requests and Shop Drawings, resolution of errors and omissions, and finalization of Record Documents.

1-1.29 **FINAL COMPLETION.** When the project has been completed according to the terms and conditions set forth in the Contract Documents. Final Completion is not the same as Acceptance.

1-1.30 **FORCE ACCOUNT.** Payment by force account shall mean payment on the basis of the Contractor's time and materials.

1-1.31 **GENERAL NOTES.** The written instructions, provisions, conditions or other requirements appearing on the Contract Drawings and so identified thereon, which pertain to the performance of the Work.

1-1.32 **INSTALLATION, INSTALL.** Completely assembling, erecting, and/or connecting materials, parts, components, supplies, and related equipment specified or required for the completion of the Work.

1-1.33 **LABORATORY.** Established professional laboratories authorized by the City to test materials and Work involved in the Contract.

1-1.34 **LEGAL HOLIDAYS.** Those days designated as Federal holidays or declared by the City, or otherwise specified in the Contract Documents.

1-1.35 **LIQUIDATED DAMAGES.** The amount prescribed in the Contract

Documents to be paid to the City or to be deducted from any payments due or to become due the Contractor for each day's delay in completing the whole or any specified portion of the Work beyond the time allowed in the Supplemental Conditions.

1-1.36 **NOTICE OF COMPLETION.** A legal notice filed by the City with the Placer County Recorder's Office stating that construction has been completed and accepted by the City.

1-1.37 **NOTICE TO PROCEED.** A written notice given by the City to the Contractor fixing the date on which the Contract Time will commence to run.

1-1.38 **NOTICE OF TERMINATION.** Written notice from the City to the Contractor and/or its Surety terminating the Agreement, or a portion thereof, either for convenience of the City or for default due to the Contractor's failure to perform its contractual obligations.

1-1.39 **OVERHEAD.** Business or administrative expenses (including but not limited to office expenses, administrative staff, rent, insurance, utilities) not chargeable to a particular part of the Work. The term "Overhead" shall include all of the following:

- A. Payroll costs and other compensation of Contractor's officers, executives, principals (of partnerships and sole proprietorships), general managers, engineers, architects, estimators, attorneys, auditors, accountants, purchasing and contracting agents, expeditors, timekeepers, clerks, and other personnel employed by Contractor whether at the Work Site or in Contractor's principal or a branch office for general administration of the Work and not specifically included in the agreed upon schedule of job classifications, all of which are to be considered administrative costs covered by the Contractor's fee.
- B. Expenses of Contractor's principal and branch offices other than Contractor's office at the site.

C. Any part of Contractor's capital expenses, including interest on Contractor's capital employed for the Work and charges against Contractor for delinquent payments.

D. Cost of premiums for all bonds and for all insurance whether or not Contractor is required by the Contract Documents to purchase and maintain the same, except as provided in section 1-1.25.

E. Other overhead or general expense costs of any kind.

1-1.40 **PREMISES.** Shall mean the area within construction easements, easements, rights of entry and City owned property which surrounds the Work Site, limited by the property lines thereof. In some cases Premises may coincide with the Work Site.

1-1.41 **PROFESSIONAL ENGINEER.** An engineer licensed by the Board of Registration for Professional Engineers, State of California.

1-1.42 **PROJECT MANUAL.** A book containing all Contract Documents.

1-1.43 **PROPOSAL FORMS.** The approved forms upon which the City requires that each Bidder submit its bid with regard to the Agreement.

1-1.44 **REQUEST FOR INFORMATION (RFI).** A document issued by the Contractor requesting information concerning the Contract Documents.

1-1.45 **SAFETY.** Includes the practice of identifying potential hazards, assessing their risk, taking corrective action where possible, including and providing control measures such as engineering design, written procedures, and the personal protective equipment for workers in order to eliminate or reduce the risk for exposure in the workplace.

1-1.46 **SCHEDULE OF VALUES.** The breakdown of the Contract Price that will serve as the basis for Contractor's Applications of Payment. Any lump sum bid item

included within the Contract Price will be apportioned among values relating to specific components of the Work covered by said lump sum.

1-1.47 **SHOP DRAWINGS.** Drawings, plans, diagrams, schedules, and other data specifically prepared and submitted to the City by the Contractor, showing in detail: (a) the proposed fabrication and assembly of a special component of the Work; and (b) the Installation (form, fit and attachment details) of a special component of the Work. Shop Drawings shall be deemed to include Working Drawings, Product Data, literature, and applicable performance and test data.

1-1.48 **SPECIFICATIONS.** The technical Specifications for the Work prepared by the Director or an Engineer or Architect describing in detail the nature of the Work, its components, any performance standards, and how the Work is to be constructed.

1-1.49 **SUBCONTRACTOR.** Any individual, firm, partnership, limited liability company, corporation, joint venture, or combination thereof, other than employees of the Contractor, engaged by the Contractor to furnish services, labor, equipment and materials for a portion of the Work.

1-1.50 **SUBMITTALS.** Those documents required to be submitted by the Contractor for review by the City in accordance with the Contract Documents.

1-1.51 **SUPPLEMENTAL CONDITIONS.** The Supplemental Conditions are specific clauses modifying or supplementing these General Conditions.

1-1.52 **SUPPLIER.** Any individual, firm, partnership, limited liability company, corporation, joint venture, or combination thereof, other than employees of the Contractor, that supplies a tangible product as a portion of the Work, with services usually limited to delivery and/or required testing, and with manufacturing, fabrication, or production facilities located off

the Work Site.

1-1.53 **WORK.** The furnishing of all labor, and the furnishing and Installing of all materials, articles, supplies and equipment as specified, designated, or required by the Contract Documents.

1-1.54 **WORK SITE.** All or portion of the Premises that the Work is limited to as shown on the Contract Drawings or designated by the Director. Public streets are not included unless Work is being done within the street right-of-way.

1-1.55 **WORKING DRAWINGS.** Original drawings prepared by the Contractor and/or its Subcontractors or Suppliers, of any tier, illustrating Work required for construction that will not become an integral part of the completed Work. This includes, but is not limited to, drawings for temporary structures such as decking, bulkheads, excavation supports, utility support, groundwater control, forming, falsework, access roads, staging areas, staging plans, and diversion plans. A Working Drawing is one type of a Shop Drawing.

SECTION 2

CONTROL AND SCOPE OF THE WORK

2-1.01 **AUTHORITY OF DIRECTOR.** The Contract shall be performed in a manner satisfactory to the Director who shall decide all questions which may arise as to the quality or acceptability of materials furnished and Work performed and as to the manner of performance and rate of progress of the Work; all questions which may arise as to the interpretation of the Contract Documents; all questions as to the acceptable fulfillment of the Contract on the part of the Contractor; and all questions as to compensation. The Director shall have authority to enforce and make effective such decisions and orders in the event the Contractor fails to promptly carry out the same.

2-1.02 **INTENT OF CONTRACT DOCUMENTS.** The Contract Documents are complementary, and what is called for by one shall be as binding as if called for by all. The intent of the Contract Documents is to describe the details for the construction and completion of the Work. Where the Contract Documents describe portions of the Work in general terms, but not in complete detail, it is understood that only the best general practice shall be followed and that only materials and workmanship of the best quality are to be used. Any Work, materials, or equipment that are customarily provided, or that are reasonably inferable from the Contract Documents as being required to produce the intended result, shall be supplied, whether or not specifically called for. When words, which have a well-known technical or trade meaning are used to describe work, materials, or equipment, such words shall be interpreted in accordance with that meaning. Unless otherwise specified, the Contractor shall furnish all labor, materials, tools, equipment, and incidentals, and do all the Work involved in executing the Contract in a

satisfactory and workmanlike manner.

Reference to standard specifications, manuals or codes of any technical society, organization or association, or to the laws or regulations of any governmental authority, whether such reference be specific or by implication, shall mean the latest standard specification, manual, code, laws, or regulations in effect on the first published date of the Notice to Contractors, except as may be otherwise specifically stated. However, no provision of any referenced standard specification, manual or code (whether or not specifically incorporated by reference in the Contract Documents) shall be effective to change the duties and responsibilities of City or Contractor, or any of their consultants, agents, or employees from those set forth in the Contract Documents, nor shall it be effective to assign to City, or City's designated representative, any duty or authority to supervise or direct the furnishing or performance of the Work or any duty or authority to undertake responsibility contrary to other provisions of the Contract Documents.

The Contract Documents are divided into parts, divisions, sections and articles for convenience, organization and reference. Generally, there has been no attempt to divide the Specifications sections into work performed by the various building trades, work by separate Subcontractors, or work required for separate facilities in the project.

2-1.03 **EXAMINATION AND VERIFICATION OF CONTRACT**

DOCUMENTS. The Contractor shall thoroughly examine and become familiar with all of the various parts of the Contract Documents and shall determine the nature and location of the Work, the general and local conditions (including applicable laws) and all other matters which can in any way affect the cost, progress or performance of the Work under this Agreement. Failure to make an examination necessary for this determination shall not release the Contractor from the obligations of the Agreement. No oral agreement or conversation with any officer, or employee

of the City, or with the City's designated representative either before or after the execution of the Agreement, shall affect or modify any of the terms or obligations contained in the Contract Documents.

2-1.04 **CONTRACT DRAWINGS.** The Contract Drawings consist of general drawings and show such plans, elevations, sections, details and schedules as are necessary to give a graphic and pictorial description of the contemplated construction. All authorized alterations affecting the requirements and information given on the Contract Drawings shall be in writing.

2-1.05 **COORDINATION AND INTERPRETATION OF CONTRACT**

DOCUMENTS. All Contract Documents are essential parts of the Contract, and a requirement occurring in one is as binding as though occurring in all. They are intended to be complementary, and to describe and provide for a complete Work.

In the event of inconsistencies between requirements contained in different components of the Contract Documents, the precedence of the Contract Documents shall be as follows to resolve conflicts:

1. Change Orders
2. The Contract (including Addenda)
3. The Supplemental Conditions
4. Specifications
5. Contract Drawings
6. The General Conditions

Should it appear that the Work to be done or any of the matters relative thereto are not sufficiently detailed or explained in the Contract Documents, the Contractor shall submit a

Request for Information (“RFI”) to the Director for such further explanations as may be necessary and shall conform to the written explanation given as if part of the Contract Documents. The decisions of the Director shall be final.

Contractor shall anticipate that it will be necessary to prepare and submit RFIs regarding the Contract Documents. The City will respond to each RFI by no later than fourteen (14) Days after receipt of the RFI, unless the RFI is of significant complexity. Furthermore, in the event that there are numerous RFIs pending, Contractor shall cooperate with the City in establishing a priority for responding to the RFIs, and potentially some RFIs may be responded to beyond the fourteen (14) Day period.

Each RFI prepared by Contractor shall be full and complete. Contractor shall prepare RFIs so as to not cause any delay to the progress of the Work and to not cause any impact to Contractor’s labor productivity in the field. Contractor shall not assert any Claims for delay or interference against the City if Contractor fails to timely submit any RFI to the City, after consideration of the response period allowed for by the City.

The response to an RFI shall not, by itself, constitute a writing that authorizes Contractor to perform any Work that causes an adjustment to either the Contract Price or the Contract Time. If Contractor believes that any response to any RFI should constitute a compensable change, Contractor shall provide a Notice of Potential Claim as provided in Section 7-1.03, below. Contractor’s failure to provide the required written notice shall constitute a waiver of the Contractor’s right to seek a compensable change based on the RFI response.

The Contractor shall examine all Contract Documents; shall verify all figures in the Contract Documents before laying out the Work; shall promptly notify the City of all errors, inconsistencies, and/or omissions that it discovers; and, in instances where such non-

conformities are discovered, shall obtain specific instructions in writing from the City before proceeding with the Work. Contractor's performance of any Work affected by such non-conformities prior to the City's decision shall be at the Contractor's risk. Any Work that is customarily provided or that is reasonably inferable shall not relieve the Contractor from performing such work at no additional expense and/or delay, and such Work shall be performed as if fully set forth in the Contract Documents.

2-1.06 **INDEPENDENT CONTRACTOR STATUS.** The Contractor shall independently perform all Work required by the Contract Documents and shall not be considered as an agent or employee of the City, nor shall the Contractor's Subcontractors or employees be considered as subagents of the City.

The Contractor and Contractor's Subcontractors shall be licensed in accordance with the laws of the State of California and as more particularly described in the bidding documents or elsewhere in the Contract Documents.

2-1.07 **ORDER OF WORK.** When required by the Contract Documents, the Contractor shall follow the sequence of operations set forth therein. Full compensation for conforming to such requirements will be considered as included in the prices paid for the various Contract items of work, and no additional compensation will be allowed therefor.

2-1.08 **SUBMITTALS.** It shall be the Contractor's responsibility to timely submit, so as to cause no delay in the Work, all Shop Drawings, descriptive data, manuals, instructions, affidavits, samples for the various trades as required by the Supplemental Conditions and Specifications, and offers of alternatives, if any. Such Submittals shall be checked and coordinated by the Contractor with the Work of other trades involved before they are submitted to the Director for examination.

The Contractor shall deliver at least one (1) electronic copy of the Submittals to the Director, and one (1) hard copy if requested. Work requiring the submittal of working drawings, descriptive data or samples shall not begin prior to approval of said Submittal by the Director.

The time allowed for review of each Submittal will be as indicated in the Supplemental Conditions. Review time will start upon receipt of the Submittal by the Director and will end upon the Director's mailing of the Submittals to the Contractor. Defective, incomplete or partial Submittals will be returned to the Contractor unreviewed.

Submittals shall be made by a letter of transmittal that shall contain a list of all matter submitted and identification of all variations from the Contract Documents contained in the Submittal. The letter and all items accompanying the same shall be fully identified as to project name and location, Contractor's name, district, county, and Contract number, with ample cross-references to the Contract Documents, to facilitate identification of items and their location in the Work.

All Shop Drawings and supporting data, catalogs, schedules, shall be submitted as the instruments of the Contractor, who shall be responsible for their accuracy and completeness. These Submittals may be prepared by the Contractor, Subcontractors, or Suppliers, but the Contractor shall ascertain that Submittals meet all of the requirements of the Contract Documents, while conforming to structural, space, and access conditions at the point of Installation. The Contractor shall check all Submittals before submitting them to the Director.

2-1.08A **SHOP DRAWINGS.** The Contractor shall submit an electronic copy (searchable PDF) of all Shop Drawings required by the Supplemental Conditions or Specifications, and one (1) hard copy, if requested by the Director. Shop Drawings shall also be provided separately in AutoCAD format using the latest version of AutoCAD. An electronic

copy will be returned to the Contractor either approved for use, as demonstrated by a stamp, or returned for correction and resubmittal. Materials, colors and/or samples will not be returned to the Contractor. Shop Drawings include any drawing, which requires execution by a draftsman as distinguished from printed matter. The size of Shop Drawings shall not exceed twenty-four inches (24”) by thirty-six inches (36”).

2-1.08B **DESCRIPTIVE DATA.** The Contractor shall submit an electronic copy (searchable PDF) of each set of manufacturer's brochures or other data required by the Supplemental Conditions or Specifications, and one (1) hard copy, if requested by the Director. The City will examine such Submittals and return either an electronic copy or a hard copy approved for use or returned for correction and resubmittal.

2-1.08C **SAMPLES.** The Contractor shall submit samples of articles, materials or equipment as required by the Supplemental Conditions or Specifications. The Work shall be in accordance with the approved samples. Samples shall be removed from City property when directed or may be incorporated in the Work if approved by the Director. Samples not removed by the Contractor will become the property of the City or, at the City's option, will be removed or disposed of by the City at the Contractor's expense.

2-1.08D **MANUALS, INSTRUCTIONS AND AFFIDAVIT.**

- A. **Manuals and Instructions.** Where operation and maintenance manuals are required by the Supplemental Conditions, the Contractor shall submit two (2) sets of manuals, suitably bound, along with two (2) electronic copies in an approved format, to the Director within forty-five (45) Days after favorable review of the equipment or facilities. If operation and maintenance manuals are approved to be provided in PDF format, text shall be provided in searchable PDF format, making proper use of PDF for headings and heading levels,

paragraphs, tables, and lists. Submitted operation and maintenance manuals shall be a collected, organized, and indexed set of bookmarked PDF documents comprising each operation and maintenance manual that corresponds to a hardcopy binder. All manuals shall be marked to indicate the specific equipment furnished for this project and shall include at a minimum:

1. Equipment summary form
2. Cover/Title page
3. Table of contents
4. Operating procedures including start-up, shutdown, normal operation, all operating modes, emergency shutdown, and safety precautions
5. Lubrication instructions (if required)
6. Preventative maintenance procedures
7. Troubleshooting and corrective maintenance procedures
8. Reinstallation instructions
9. Overhaul instructions (if applicable)
10. Parts identification list with exploded view and associated cross references
11. Recommended spare parts list
12. Operator safety requirements
13. Electrical and control system wiring drawings, including panel wiring control (ladder) diagrams, logic diagrams, loop diagrams, and interconnection diagrams
14. Panel layout and assembly drawings

15. Mechanical drawings
16. Printouts of all software programs and configuration files

17. Factory and field test procedures and results

Operation and maintenance manuals for complex equipment shall also include:

18. Alternate specified operating modes
19. Emergency shutdown instructions
20. Normal shutdown instructions
21. Long term shutdown instructions

Operation and maintenance manuals for systems comprised of separate pieces of equipment shall include a system explanation of items 4, 7, 18, 19, 20, and 21 as well as the instructions for the separate pieces of equipment.

B. Affidavits. Where required in the Supplemental Conditions or

Specifications, manufacturers of equipment shall provide field service as a part of this project.

Equipment shall not be considered ready for full time operation until after the authorized factory-trained and qualified manufacturer's representative for the specific equipment has checked and adjusted the equipment and certified by written affidavit that the equipment has been properly Installed, tested, adjusted, lubricated, and calibrated, and is ready for full time operation.

Acceptable affidavits shall be submitted prior to completion of the Work. Affidavits shall contain the following specific wording:

“The (Name of Equipment) has been properly installed, tested, adjusted, lubricated, and calibrated, and is ready for full time operation. The installation has been inspected and has been found to be in conformance with our (the manufacturer's) standards and requirements.”

No amplification, dilution, or modification of this specific wording will be permitted.

2-1.08E **ALTERNATIVES.** For convenience in designation in the Contract Documents, certain materials, articles, or equipment may be designated by a brand or a trade name or the name of the manufacturer together with catalog designation or other identifying information, hereinafter referred to generically as “designated by brand name.” Except in those instances where the product is designated to match others in use in a particular improvement, either completed or in the course of completion, an alternative material, article, or equipment which is of equal quality and of the required characteristics for the purpose intended may be proposed for use provided the Contractor complies with the following requirements:

A. The Contractor shall submit its proposal for an alternative in writing. Such request shall be made in ample time to permit review and approval without delaying the Work. The Contractor shall not be entitled to an adjustment of the Contract Time or an increase in the Contract Price based on any Contractor-proposed substitution.

B. No such proposal will be considered unless accompanied by complete information and descriptive data, necessary to determine the equality of the offered materials. The Contractor shall satisfy the Director as to the comparative quality, suitability, or performance of the offered material, articles, or equipment. In the event that the Director rejects the use of such alternative materials, articles, or equipment, then one of the particular products designated by brand name shall be furnished.

C. The burden of proof as to the quality and suitability of alternatives shall be upon the Contractor and it shall furnish all information necessary as required by the Director. The Director shall be the sole judge as to the quality and suitability of alternative articles or materials and such decisions shall be final. Where use of an alternative material

involves redesign of, or changes to, other parts of the Work, the cost and time required to effect such redesign or changes will be considered in evaluating the suitability of the alternative material. Cost of redesign by the City will be borne by the Contractor.

D. Whenever classification, rating or other certification by a body such as Underwriters Laboratories (UL) or the National Electrical Manufacturers Association (NEMA) is a part of the specification for any material, Contractor's request for use of alternative articles or materials shall be accompanied by reports from the listed or equivalent independent testing Laboratory indicating compliance with the Contract Documents. The cost of all testing required to prove equality of the material proposed shall be borne by the Contractor. Approval of an alternative shall be only for the characteristics or use named in such approval, and shall not be used to change or modify any requirement of the Contract Documents.

E. At its election, the City reserves the right to consider any Contractor proposed substitution as a Cost Reduction Proposal under Section 3-1.07 of these General Conditions in the event that there is a significant savings resulting from the substitution.

The Director will examine, with reasonable promptness, such Submittals, and return of Submittals to the Contractor shall not relieve the Contractor from responsibility for deviations and alternatives from the Contract Documents, nor shall it relieve the Contractor from responsibility for errors in the Submittals. A failure by the Contractor to identify in its letter of transmittal material deviations from the Contract Documents shall void the Submittal and any action taken thereon by the Director. When specifically requested by the Director, the Contractor shall resubmit such Shop Drawings, descriptive data and samples as may be required.

If any mechanical, electrical, structural, or other changes are required for the proper Installation and fit of alternative materials, articles, or equipment, or because of deviations from

the Contract, such changes shall not be made without the approval of the Director and shall be made without additional cost to the City.

2-1.09 **DISPOSAL OF MATERIAL OUTSIDE THE WORK SITE.** Unless otherwise stated elsewhere in the Contract Documents, the Contractor shall, at its own cost and expense, make its own arrangements for disposing of materials outside the Work Site.

Except when material is to be disposed of at a landfill or recycling center, when any material is to be disposed of outside the Work Site, the Contractor shall first obtain written permission from the City to dispose of the material at the intended location. The City's approval will be contingent upon the Contractor obtaining a written permit from the property owner on whose property the disposal is to be made. Prior to the disposal of any material at the intended location, the Contractor shall submit such permit or a certified copy thereof to the City, together with a written release from the property owner absolving the City from any and all responsibility related to the disposal of material on said property.

Disposal of Hazardous Materials must be done in accordance with all laws and regulations. Copies of all required regulatory documentation including copies of final manifests shall be supplied to the City.

2-1.10 **ACCESS TO THE WORK.** The Contractor shall satisfy itself that the jurisdictions through which its operations and haul routes pass will permit such operations with respect to the type of vehicle, laden weights, frequency and dimensions of loads, hours of operation and required traffic control. All necessary permits, licenses or bonds shall be obtained and paid for by the Contractor.

2-1.11 **TEMPORARY UTILITIES.** The Contractor shall make its own arrangements with utility companies for any temporary services it may require in performance of

the Work and shall pay all costs of these services directly to these utility organizations.

2-1.12 **UTILITY FACILITIES.** The Contractor shall protect from damage

those utility facilities that are to remain in place, be Installed, relocated or otherwise arranged. The

Contractor's attention is directed to the possible existence of facilities not shown,

and of facilities in a location different from that, which is indicated. The Contractor shall take

steps to ascertain the exact location of all facilities prior to doing any Work, which may damage

such facilities or interfere with their service. Where the location of a facility is indicated or

inferred from the presence of visible facilities such as buildings, meters, and junction boxes, the

Contractor shall make such excavations and explorations as are necessary to ascertain the correct

location. Unless provided for elsewhere in the Contract Documents, the cost of such excavations

and explorations will be considered as a part of the cost of other items of Work and no additional

payment will be made. Such excavations and exploratory Work shall not entitle the Contractor

to an extension of time.

If the Contractor discovers underground facilities not indicated or inferred from the Contract Documents, the Contractor shall immediately give the Director written notification of

the existence of those facilities. The Contractor shall determine the exact location of the

underground facilities and the cost of the work will be paid for in accordance with the Contract

Documents. The underground facilities shall be protected from damage as directed by the

Director and the cost of that work will be paid for as extra work. The Contractor shall, if directed

by the Director, repair any damage, which may occur to the underground facilities. The cost of

that repair work, not due to the failure of the Contractor to exercise reasonable care, will be paid

for as extra work. Damage due to the Contractor's failure to exercise reasonable care shall be

repaired at the Contractor's cost and expense.

Where it is determined by the City that the rearrangement of an underground facility, the existence of which is not shown on the Contract Drawings, is essential in order to accommodate the Work, the City will provide for the rearrangement of such facility by other forces or, when so ordered by Change Order, such rearrangement shall be performed by the Contractor and will be paid for as provided under a Change Order.

The Contractor shall be responsible for the maintenance of all utility facilities placed by the Contractor in temporary locations, and all utilities within the construction area not required to be relocated but which are required to be shored or supported during the construction period. The cost of such maintenance shall be borne by the Contractor, and no other compensation shall be due the Contractor for this Work.

The cost of providing and maintaining all necessary or required temporary structures, of making any necessary repairs, replacements, or similar operations, or furnishing indemnity or other bonds, if required, and all costs required by this Section shall be paid by the Contractor and shall be included in the prices bid in the schedule for other items of work.

2-1.13 **PRESERVATION AND CLEANING.** The Contractor shall clean up the Work at frequent intervals and at other times when directed by the Director. While finish Work is being accomplished, floors, Work areas and finished areas shall be kept clean, free of dust, construction debris and trash. Upon completion of the Work, the Contractor shall remove from the Premises its construction equipment and any waste materials not previously disposed of, leaving the Premises thoroughly clean and ready for final inspection.

2-1.14 **LIMITATIONS ON WORK SITE AND PREMISES.** The Contractor shall limit its construction operations to the Work Site unless otherwise shown on the Contract Drawings or specified. The Contractor shall perform no operation of any nature over or on the

Premises except such operations as are authorized by the Contract Documents or as authorized by the Director.

2-1.15 **DUST CONTROL.** During the performance of all Work under this Contract, the Contractor shall assume all responsibility for dust control and shall furnish all labor, equipment, and means required to carry out proper and efficient measures wherever and whenever dust control is necessary to prevent the operations from producing dust damage and nuisance to persons and property. Any claims resulting from dust damage or nuisance shall be borne solely by the Contractor. The Contractor shall comply with all applicable Air Quality Act requirements.

2-1.16 **SANITATION.** The Contractor shall provide sanitary facilities for all persons working on the Work.

2-1.17 **NIGHT WORK AND NORMAL WORKING HOURS.** Normal working hours at the construction site shall be between the hours of 7:00 a.m. and 7:00 p.m. Monday through Friday. Legal holidays are excluded. Certain utility connections and street operations are anticipated to require night Work by the Contractor during low usage periods. The Contractor may also be required to prosecute the Work at night if, at any time, the Director shall deem it necessary for the progress of the Work, or if emergencies arise. The Contractor shall promptly comply with any such requirements made in writing by the Director. The Contractor will also be permitted to Work at night if Contractor satisfies the Director of the need therefor, in order to maintain the required progress or protect the Work from the elements. Certain activities are required to be performed at night for nominal progress of the Work and/or are specified to be performed at night by other portions of the Supplemental Conditions. When required, ordered, or permitted to Work at night, the Contractor shall provide sufficient and

satisfactory lighting and other facilities therefor. The Contractor shall receive no extra payment for night Work, if specified or if required to be performed during the normal progress of the Work, but compensation shall be considered as having been included in the price stipulated for the Work.

If Contractor performs work during weekends, holidays or any non-normal work hours, Contractor shall pay for required City Inspectors.

2-1.18 **LINES AND GRADES.** Unless otherwise provided in the Supplemental Conditions, the Contractor shall lay out all Work, including structures and pipelines, and shall be responsible for any errors resulting therefrom. In all questions arising as to proper location of lines and grades, the Director's decision will be final.

As part of the bid price for the construction of the improvements, the Contractor shall provide and be responsible for the layout of all Work on this project. The Contractor shall provide all necessary surveys, field staking, and positioning for the construction of all components at the proper alignment, elevations, grades, and positions, as indicated on the Contract Drawings and as required for the proper operation and function. The Contractor shall stake its Work area limits. Contractor shall perform all construction staking using a land surveyor licensed in the State of California. Contractor shall provide a staking plan prior to commencement of Work for the City's review and maintain monuments, stakes, and marks, and shall update the plan as necessary. Director, or Director's designated representative, may verify the field condition. Errors or inconsistencies in the Contract Documents discovered by the Contractor shall be reported to the Director within twenty-four (24) hours and prior to constructive forms or related improvements. Any work Installed with this requirement shall be subject to removal and replacement at the Contractor's expense.

The Contractor's lay-out shall be based on existing structures, property lines, survey control, and bench marks established by the City. All structures and pipeline connections shall be Installed based on actual elevation of existing structures to which connections are made.

The Contractor shall supply such labor as required, at no extra charge, to aid and assist the Director in checking location and grades of the Work as set by the Contractor if the Director desires to perform this checking. This shall include moving materials and equipment located between monuments and the construction Work.

2-1.19 **ARCHEOLOGICAL DISCOVERIES.** Upon discovery of prehistoric or historic artifacts, or other indicators or examples of cultural resources discovered during the course of site preparation, grading, excavation, construction or other development activities, all operations within fifty feet (50') of the find shall cease until such time as the City provides the services of a qualified archeologist to evaluate the finds and recommend appropriate action.

Prehistoric materials can include flaked stone tools (e.g., projectile points, knives and choppers) or tool making debris of obsidian, chert, quartzite and other materials, culturally darkened soil (i.e., midden, which often contains heat affected rock, ash and charcoal, shellfish remains, and cultural materials), and stone milling equipment such as mortars, pestles and hand stones. Historic material may include wood, stone, concrete or adobe footings, walls and other structural remains; debris filled wells or privies; and deposits of wood, metal, glass, ceramics and other refuse.

2-1.20 **PRESERVATION OF MONUMENTS.** Any monuments or bench marks disturbed by construction operations shall be repaired per the City's standard and promptly re-established by a registered land surveyor or civil engineer. A plat for each monument shall be furnished to the Director after the plat has been recorded with the Placer

County Recorder's Office at no additional cost to the City. The recorded plat shall serve as a record of the re-establishment of said existing survey points.

2-1.21 **CONFORMITY WITH CONTRACT DOCUMENTS.** Work and materials shall conform to the lines, grades, cross sections, dimensions and material requirements, including tolerances, required by the Contract Documents. Although measurement, sampling and testing may be considered evidence as to such conformity, the City shall be the sole judge as to whether the Work or materials deviate from the Contract Documents. At its option, the City may elect to accept deviations from the Contract Documents with appropriate backcharge Assessments against the Contractor, and, if such an election is made, the City will provide written notice to the Contractor of such acceptance.

2-1.22 **FINAL CLEANUP.** Prior to final Acceptance of the Work, the Contractor shall thoroughly clean the Premises, remove all temporary structures built by or for the Contractor, and remove all equipment and surplus construction material and debris from the area. The entire project, before Acceptance by the City, shall be left in a neat and clean condition. All Work areas and temporary construction areas shall be returned to essentially the same conditions existing before the commencing of project construction.

2-1.23 **AS-BUILT DOCUMENTS AND DRAWINGS.** The Contractor shall maintain one set of the full size prints furnished by the City and mark thereon in color any deviations from plan dimensions, elevations, or orientations. Also, the Contractor shall locate on said prints, all underground facilities, such as piping, conduits and tanks by accurate field measurement from structure walls, corners, etc. The Contractor shall submit the prints and an electronic CD (searchable PDF or source file format such as AutoCAD) in good condition to the Director upon completion of the job as a condition of Acceptance of the project. Marked prints

shall be updated at least once each week and shall be available to the Director for review as to currency prior to developing partial payment estimates. After the completion of testing, but prior to Acceptance, the Contractor shall submit As-Built electrical drawings in color and an electronic CD showing all components and their wiring, and as specified in the Supplemental Conditions.

2-1.24 **SUPERINTENDENCE.** The Contractor shall supervise and direct the Work, which shall be performed in accordance with the requirements of the Contract Documents. The Contractor shall be solely responsible for implementation of all construction means, methods, techniques, sequences, and procedures and for coordination of all portions of the Work under the Agreement. The Contractor shall be solely responsible for the safety of its employees, Subcontractors of any tier, Suppliers, visitors to the Contractor, and other third parties associated with the Contractor.

The Contractor shall designate in writing before starting Work, an authorized representative who shall have the authority to represent and act for the Contractor.

When the Contractor is comprised of two (2) or more persons, firms, partnerships, or corporations functioning on a joint venture basis, said Contractor shall designate in writing before starting Work, the name of one authorized representative who shall have the authority to represent and act for the Contractor. Instances of misconduct, contract non-compliance, unsatisfactory performance, or incompetence by these personnel shall be grounds for the City to direct Contractor to dismiss them from the Project. Contractor shall immediately comply with the City's request for dismissal, at no cost to the City, and shall designate a replacement, which shall be subject to approval by the City.

Said authorized representative shall be present at the site of the Work at all times while Work is actually in progress on the Contract. When Work is not in progress and during periods

when Work is suspended, arrangements acceptable to the Director shall be made for any Emergency Work that may be required.

Whenever the Contractor or its authorized representative is not present on any particular part of the Work where it may be desired to give direction, orders will be given by the Director, which shall be received and obeyed by the superintendent or foremen who may have charge of the particular Work in reference to which the orders are given.

Any order given by the Director, not otherwise required by the Supplemental Conditions to be in writing, will on request of the Contractor, be given or confirmed by the Director in writing.

2-1.25 **CHARACTER OF WORKER.** If any Subcontractor or person employed by the Contractor shall appear to the Director to be incompetent or to act in a disorderly or improper manner, he or she shall be removed immediately on the requisition of the Director, and such person shall not again be employed on the Work.

2-1.26 **INSPECTION.** The Contractor shall at all times permit the Director to inspect the Work or any part thereof. The Contractor shall maintain proper facilities and provide safe access for such inspection by the Director to all parts of the Work, and to the shops where the Work is in preparation. Work shall not be covered up until authorized by the Director and the Contractor shall be solely responsible for notifying the Director where and when such Work is in readiness for inspection and testing. Should any such Work be covered without authorization, it shall, if so ordered, be uncovered at the Contractor's expense.

Unless otherwise designated as normal working hours, whenever the Contractor intends to perform Work on Saturday, Sunday, or a Legal Holiday, the Contractor shall give notice to the Director of such intention forty-eight (48) hours prior to performing such Work, or such longer

period as may be specified so that the Director may make necessary arrangements.

The observation and/or approval of the workmanship or materials by the City shall not relieve the Contractor of any obligations to fulfill the requirements of the Contract Documents. Workmanship and materials not meeting such requirements shall be corrected and unsuitable Work or material may be rejected, notwithstanding that such Work or materials have been previously observed and/or approved by the City, or payment therefor has been included in a progress estimate.

The City may order re-examination of questioned Work at any time before final Acceptance. If so ordered, the Contractor shall uncover the Work. If such work is found to be in accordance with the Contract Documents, the City will pay for the cost of uncovering, removing, recovering and replacing the parts removed; but if such Work so exposed or examined is not in accordance with the Contract Documents, the uncovering, removal, recovering and replacement shall be at the Contractor's expense. Work that has been covered prior to observation by the City does not qualify as re-examined work; the City may order such work uncovered for observation without payment of any costs.

2-1.27 REMOVAL OF REJECTED AND UNAUTHORIZED WORK. All

Work which has been rejected shall be remedied, or removed and replaced by the Contractor in a manner acceptable to the Director and no compensation will be allowed the Contractor for such removal, replacement, or remedial Work.

Any Work done beyond the lines shown on the Contract Drawings or established by the Director, or any Work done without written authority will be considered as unauthorized Work and will not be paid for. Upon order of the Director, unauthorized Work shall be remedied, removed, or replaced at the Contractor's expense.

Upon failure of the Contractor to comply promptly with any order of the Director made under this section, the Director may cause rejected or unauthorized Work to be remedied, removed, or replaced, and the costs thereof will be deducted from any moneys due or to become due the Contractor.

SECTION 3 CHANGES IN THE WORK

3-1.01 **CHANGES.** The Director, without invalidating this Agreement and without notice to Contractor's surety, may order changes in the Work, consisting of additions or deletions, or other revisions. The Contract Price and the Contract Time shall be adjusted accordingly. All such changes in the Work, including in the Contract Price and the Contract Time, shall be authorized only by Contract Change Order, signed by the Director.

If Contractor claims that performance of any work entitles it to additional compensation or to an extension of time for performance of the Work, Contractor shall provide written notice to the City of any such claim prior to undertaking such work. Contractor shall provide written notice of any anticipated impacts to the Contract Price or Contract Time within three (3) Days of discovering such impact, by submitting a Notice of Potential Claim described in Section 7-1.03 below, or notice of delay as described in Section 6-1.09 below. If the Director refuses to issue a Change Order for such work, Contractor shall perform that work if directed or obligated to do so and shall submit a complete and specific Claim for additional compensation and/or extension of time for performance within fifteen (15) Days after such work is performed, as described in Section 7-1.03 below. Failure to provide written notice of claims prior to undertaking such work, failure to provide a timely Notice of Potential Claim, or failure to submit timely a complete and specific Claim for additional compensation and/or extension of the time for performance, shall be deemed a waiver and abandonment of any such Claim. No Claim, dispute or controversy shall interfere with the progress or performance of the Work and the Contractor shall proceed with the Work as directed by the Director. Failure to so proceed shall amount to a

default under this Agreement.

3-1.02 PROPOSED CHANGE ORDERS. The Contractor will be notified in writing of a proposed Change Order describing the intended change. Within fifteen (15) Days after receipt of a written request, the Contractor shall submit its proposed price to be added or deducted from the Contract Price due to the change and its estimate of the extent of the adjustment in the Contract Time, if any. The Contractor's proposed price to be added to or deducted from the Contract Price shall be supported by a detailed estimate of cost prepared by the Contractor, vendor or Supplier. The Contractor's proposed price submittal shall be accompanied by a statement of the time necessary for the changed Work, together with a description of how this time will be incorporated into the current Construction Schedule. The Contractor shall upon request by the Director permit inspection of its original Contract estimate, subcontract agreements or purchase orders relating to the change.

If agreement is reached on the adjustment in compensation as provided in Section 3-1.05, "Contract Price Adjustment," of these General Conditions, the Contractor shall proceed with the Work as changed at the agreed price.

If the Contractor and the Director fail to agree as to the adjustment in compensation for the performance of the changed Work, the Contractor, upon written order from the Director, shall proceed immediately with the changed Work and the Contract Price shall be adjusted in accordance with Section 3-1.06, "Force Account Payment," of these General Conditions.

If the Contractor fails to submit its cost estimate within such fifteen (15) Day period, the Contractor shall commence the Work as changed immediately upon receipt of written order of the Director, and the Contract Price will be adjusted in accordance with the Director's cost estimate for the changed Work.

3-1.03 **EMERGENCY AND INDETERMINATE TYPE CHANGE**

ORDERS. Changes in the Work made necessary by an Emergency, as determined by the Director, or changes of a kind where the extent of the Work cannot be determined until completed, may be authorized by the Director in writing. The Change Order shall state that it is issued pursuant to this Section 3-1.03. Upon receipt of an authorized Change Order or other written order of the Director, the Contractor shall proceed with the ordered Work and the Director will maintain a daily job record containing a detailed summary of all labor, materials and equipment required for the changed Work.

Within fifteen (15) Days after receiving a written request, the Contractor shall submit a detailed estimate of cost for the change and any requested change in Contract Time in the same manner as required for proposed Change Orders in Section 3-1.02 of these General Conditions.

3-1.04 **EXECUTED CHANGE ORDER.** A Contract Change Order signed by both the Director and the Contractor is an “executed Contract Change Order.” By signing the Contract Change Order, the Contractor agrees that the specified compensation constitutes full compensation for the changed Work, including payment for interruption, disruption, acceleration, extended Overhead, delay or any other “impact” claim or “ripple effect” claim. The Contractor specifically understands and agrees that its execution of the Contract Change Order shall constitute a waiver of any right for the Contractor to claim any additional compensation with respect to the subject matter of the Contract Change Order.

3-1.05 **CONTRACT PRICE ADJUSTMENT.** If a Contract Change Order provides for an adjustment to the Contract Price, the amount of such adjustment shall be determined by one of the following methods, or a combination thereof, as determined by the City and in its sole discretion:

- A. Lump sum. The Contractor and the City may agree on a lump sum amount for the Change Order. At the City's request, the Contractor will provide pricing for the work. Maximum markups for Contract Change Orders paid for using lump sum pricing shall be paid for in the same manner and in the same amounts as markups for Force Account work, as described in Section 3-1.06 below.
- B. Unit Prices. The unit prices set forth in the Contractor's Schedule of Bid Prices will be utilized where they are applicable and acceptable to the City. The Contractor's unit prices shall remain firm and shall not be subject to adjustment unless and until the actual quantity of work is increased or decreased by Contract Change Order in an amount greater than twenty-five percent (25%) from the estimated quantity indicated for such item. No markups will be given for Contract Change Orders paid for using unit prices.
- Unit prices for new items included in the Contract Change Order but not included in the original bid shall be as mutually agreed upon or, in the absence of agreement, as determined by the City in the same manner as if the work were to be paid for on a Force Account basis, as described in Section 3-1.06 below.
- C. Force Account. Where the City and the Contractor are unable to agree on lump sum pricing and if the City does not elect to utilize the unit prices in Contractor's bid, or such unit prices are not applicable, the changed work will be performed and tracked by the Contractor as Force Account work, as described in Section 3-1.06 below. The City will pay for such work, including markups, properly attributable to the change in accordance with those Force Account provisions.
- D. Eliminated Items. The City reserves the right to delete any bid item of Work in its entirety. The City makes no representation that any work under a bid item of Work

will be performed, and all work may be subject to a Contract Change Order that deletes such work. Bid items are distinct and severable from the other bid items, and the Contractor shall not be entitled to any anticipated profit, unabsorbed Overhead, or other indirect expense attributable to the deleted item, except as provided immediately below with regard to Force Account mark-ups on the direct and verifiable costs incurred prior to the City's order that deletes the work.

Should any bid item of Work be eliminated in its entirety and not accounted for as described immediately above and, in the absence of an executed Contract Change Order covering such elimination, payment will be made to the Contractor for actual direct and verifiable costs incurred in connection with such eliminated bid item if incurred prior to the date of notification in writing by the City of such elimination. If acceptable material is ordered by the Contractor for the eliminated item prior to the date of notification of such elimination by the City, and if orders for such material cannot be canceled, it will be paid for at the actual direct and verifiable cost to the Contractor. Actual direct costs shall include documented vendor shipping fees, Supplier restocking fees, if applicable, and Contractor handling costs directly related to the eliminated item(s). In such case, the material paid for shall become the property of the City and the actual cost of any further handling will be paid for by the City. If the material is returnable to the vendor and if the City so directs, the material shall be returned and the Contractor will be paid for the actual direct cost of charges made by the vendor for returning the material. The actual direct cost of handling returned materials will also be paid for by the City. The actual direct and verifiable costs to be paid by the City as provided herein will be computed in the same manner as if the work were to be paid for on a Force Account basis, including the application of Force Account mark-ups to said costs.

3-1.06 **FORCE ACCOUNT PAYMENT.** When Work performed pursuant to a

Change Order is to be paid for on a Force Account basis, the Contractor's labor, materials and equipment used in the performance of such Work shall be subject to the approval of the City, and the compensation will be determined as set forth below in this section.

3-1.06A **LABOR.** The Contractor will be paid an amount based on the actual cost for the workers (including foremen when authorized by the Director) used in the actual and direct performance of the Work. All labor costs associated with Overhead, whether field or home office, are specifically excluded herein, as those labor costs are covered by the below mark-ups. The cost of labor, whether the employer is the Contractor, Subcontractor or other forces, shall include employer payments; assessment of benefits required by lawful labor union collective bargaining agreements; compensation insurance payments; contributions made to the State pursuant to the Unemployment Insurance Code; and for taxes paid to the Federal Government pursuant to the Social Security Act of August 14, 1935, as amended. No labor cost will be recognized at a rate in excess of the wages prevailing in the locality at the time the Work is performed, nor will the use of a labor classification, which would increase the cost, be permitted unless the Contractor establishes to the complete satisfaction of the Director the necessity for payment at a higher rate.

3-1.06B **MATERIALS.** Only materials furnished by the Contractor and necessarily used in the performance of the Work will be paid for. Such cost of materials may include the costs of procurement, transportation and delivery if necessarily incurred. If a cash or trade discount by the actual supplier is available to the Contractor, it shall be credited to the City. If materials are procured by the purchaser by any method which is not a direct purchase from and a direct billing by the actual supplier to such purchaser, the cost of such materials shall be deemed to be the price paid to the actual supplier plus the actual costs, if any, incurred in the

handling of such materials. If the materials are obtained from a supply or source owned wholly or in part by the purchaser, the cost of such materials shall not exceed the price paid by the purchaser for similar materials furnished from said source on Bid items or the current wholesale price for such materials delivered to the job site, less any discounts as provided herein, whichever is lower. If, in the opinion of the Director, the cost of materials is excessive, or if the Contractor fails to furnish satisfactory evidence of the cost to it from the actual supplier within sixty (60) Days after the date of delivery of the materials or within fifteen (15) Days after Acceptance of the Agreement, whichever occurs first, the cost of the materials shall be deemed to be the lowest current wholesale price at which similar materials are available in the quantities required, less any discounts provided herein. The Department reserves the right to furnish such materials required by the Change Order as it deems advisable, and the Contractor shall have no claim for cost or markups on material furnished by the Department.

3-1.06C **EQUIPMENT.** The Contractor will be paid an amount based on the actual cost for the use of equipment directly required and approved by the Director in the performance of the changed Work. No payment will be made for time while equipment is inoperative due to breakdowns or on Days when no Work is performed. In addition, the rental time shall include the time required to move the equipment to the Work from the nearest available source of such equipment, and to return it to the source. If such equipment is not moved by its own power, then loading and transportation costs will be paid. Moving time, loading and transportation costs will only be paid if the equipment is used exclusively on the changed Work during the time between move in and move out. Individual pieces of equipment having a replacement value of One Thousand Dollars (\$1000) or less shall be considered to be tools or small equipment, and no payment will be made therefore. For equipment owned,

furnished, or rented by the Contractor, no cost therefore shall be recognized in excess of the equipment rental rates published by Caltrans at the following website address:

<http://www.dot.ca.gov/hq/construc/equipmnt.html>. Equipment located at a Work Site and utilized on non-Force Account work shall not be eligible for standby payment, and shall be charged on a Force Account basis only when solely performing pre-approved Force Account work tasks.

3-1.06D **MARKUPS.** When a Change Order increases the cost of the Work, the Contractor may add the following maximum markups to its actual costs of labor, materials, or equipment rental:

15 percent for labor;

10 percent for materials; and

5 percent for equipment rental.

The above markups include full compensation, covering the costs of all supervision, bonds, profit, Overhead, and other general expenses not specifically designated as a direct cost in Sections 3-1.06A through 3-1.06C above. The total payment (i.e., direct cost plus applicable markups) shall be deemed to be the actual cost of such work and shall constitute full compensation therefor. The Contractor specifically understands and agrees that such payment shall include any Contractor costs for interruption, disruption, and acceleration, extended Overhead, Change Order management, delay or other “impact” claim or “ripple effect” claim.

When work paid for on a Force Account basis is performed by forces other than the Contractor’s own forces, the maximum allowable mark-ups for the Subcontractors’ costs shall be fifteen percent (15%) for the cost of labor, ten percent (10%) for the cost of materials, and five percent (5%) for the cost of rented equipment. In these situations where the work is being performed by Subcontractors, the Contractor will only be entitled to an additional five percent

(5%) mark-up and will not be entitled to receive the additional mark-ups specified in this section.

When a Change Order decreases the cost of the Work, the reduction in cost shall include a five percent (5%) markup on the estimated cost for furnishing the labor, materials and equipment, which would have been used on such Work, had the Change Order not been issued.

When a Change Order involves both added Work and deleted Work, the markup or markups to be used shall be as follows:

The actual costs of labor, materials, and equipment rental for added and deleted Work shall be calculated separately without adding markups. If the difference between the calculated costs for labor results in an increased cost, a markup of fifteen percent (15%) shall be applied to the increased cost. If the difference between the calculated costs of materials or equipment rental results in an increased cost, a markup of ten percent (10%) and five percent (5%) respectively, shall be applied to the increased costs of materials or equipment rental, as the case may be. If the difference between the calculated costs for labor, materials or equipment rental results in a decreased cost, a markup of five percent (5%) shall be applied to the decreased costs of labor, materials or equipment rental, as the case may be.

Contractor shall not add mark-ups on work performed and billed by City staff nor add mark-ups to successive iterations of proposed Change Order cost proposals returned to Contractor by the City due to incomplete or inaccurate information being originally submitted by the Contractor. If the Contract Price increases by the issuance of Change Orders, the penal amounts of the bonds required shall increase accordingly.

3-1.06E **RECORDS.** The Contractor shall maintain its records in such a manner as to provide a clear distinction between the direct costs of extra work paid for on a Force Account basis and the costs of other operations.

From the above records, the Contractor shall furnish the City completed daily extra work reports, on forms acceptable to the City, for each Day's extra work to be paid for on a Force Account basis. The daily extra work reports shall itemize the materials used, and shall cover the direct cost of labor and the charges for equipment rental, whether furnished by the Contractor, Subcontractor, or other forces. The daily extra work reports shall provide names and identifications and classifications of workers, the hourly rate of pay and hours worked, and also the size, type, and identification number of equipment, and hours operated. Daily extra work and Force Account reports (actual or claimed) shall be signed by both the City's and the Contractor's representatives within twenty-four (24) hours of the performance of the work.

Valid copies of vendor's invoices shall substantiate material charges. Such invoices shall be submitted with the daily extra work reports, or if not available, they shall be submitted with subsequent daily extra work reports. Should said vendor's invoices not be submitted within sixty (60) Days after the date of delivery of the material or within fifteen (15) Days after the Acceptance of the Agreement, whichever occurs first, the City reserves the right to establish the cost of such materials at the lowest current wholesale prices at which said materials were available in the quantities, less any discounts.

The City will compare its records with the completed daily extra work reports furnished by the Contractor and make any necessary adjustments. When these daily extra work reports are agreed upon and signed by both parties, said reports shall become the basis of payment for the work performed, but shall not preclude subsequent adjustment based on a later audit by the City.

The Contractor's cost records pertaining to Work paid for on a Force Account basis shall be open to inspection or audit by representatives of the City during the life of the Agreement and for a period of not less than three (3) years after the date of Agreement completion and the

Contractor shall retain such records for that period. Where payment for materials or labor is based on the cost thereof to forces other than the Contractor, the Contractor shall make every reasonable effort to insure that the cost records of such other forces will be open to inspection and audit by representatives of the City on the same terms and conditions as the cost records of the Contractor. If an audit is to be commenced more than sixty (60) Days after the date of Acceptance of the Agreement, the Contractor will be given fifteen (15) Days' notice of the time when such audit is to begin.

3-1.07 **COST REDUCTION PROPOSALS.** The City encourages the Contractor to submit Cost Reduction Proposals whenever the Contractor identifies areas and/or instances in which there can be savings to the Work. Contractor may submit to the City, in writing, proposals for modifying the plans, Specifications or other requirements of the Agreement for the sole purpose of reducing the total cost of construction, including the time for completion of the Work. The City may consider such Cost Reduction Proposals and, if accepted, the Agreement will be equitably adjusted. The City has no obligation to consider or accept Cost Reduction Proposals.

SECTION 4 CONTROL OF MATERIALS

4-1.01 **MATERIALS.** The Contractor shall furnish all materials required to complete the Work, except materials that are designated in the Supplemental Conditions to be furnished by the City and materials furnished by the City in accordance with Section 3, “Changes in the Work,” of these General Conditions.

Unless otherwise specified in the Supplemental Conditions, materials furnished by the Contractor for incorporation into the Work shall be new. When the quality or kind of materials, articles, or equipment is not particularly indicated, then the quality or kind thereof shall be similar to those that are indicated.

Articles or materials to be incorporated in the Work shall be stored in such a manner as to insure the preservation of their quality and fitness for the Work, and to facilitate inspection.

All materials which do not conform to the requirements of the Contract Documents as determined by the Director, will be rejected whether in place or not. Rejected material shall be removed immediately from the site of the Work, unless otherwise permitted by the Director. No rejected material, the defects of which have been subsequently corrected, shall be used in the Work, unless approval in writing has been given by the Director. Upon failure of the Contractor to comply promptly with any order of the Director made under these provisions, the Director shall have the authority to cause the removal and replacement of rejected material and to deduct the cost thereof from any moneys due or to become due the Contractor.

Manufacturer's warranties, guaranties, instruction sheets and parts lists, which are furnished with certain materials incorporated in the Work, shall be delivered to the Director

before Acceptance of the Contract.

Unless otherwise designated in the Supplemental Conditions or Specifications, materials furnished by the City will be delivered to the job site. Materials furnished by the City that are designated in the Supplemental Conditions as available at locations other than the job site shall be hauled to the site of the Work by the Contractor at its expense, including any necessary loading and unloading that may be involved.

The Contractor will be held responsible for all materials furnished to it, and shall pay all demurrage and storage charges. City-furnished materials lost or damaged from any cause whatsoever shall be replaced by the Contractor. The Contractor will be liable to the Department for the cost of replacing City-furnished material and such costs may be deducted from any moneys due or to become due the Contractor.

4-1.02 **PRODUCT AND REFERENCE STANDARDS.** When descriptive catalog designations, including manufacturer's name, product brand name, or model number are referred to in the Contract Documents, such designations shall be considered as being those found in industry publications in effect on the day the Notice to Contractors for the Work is dated, except as may be otherwise stated.

When standards or test designations of the Federal Government, trade societies, or trade associations are referred to in the Contract Documents by specific date of issue, these shall be considered as part of the Contract. When such references do not bear a date of issue, the edition in effect on the day the Notice to Contractors for the Work is dated shall be considered as part of the Contract.

4-1.03 **SAMPLING AND TESTING OF MATERIALS.** Unless otherwise specified, all tests shall be performed in accordance with the methods used by the State

Department of Transportation (Caltrans) and shall be made by the Director or his or her designated representative.

The State Department of Transportation has developed test methods for testing the quality of materials and Work. These test methods are identified by a California Test followed by the serial number. Copies of individual tests are available at the State Department of Transportation Laboratory, Sacramento, California, and will be furnished to interested persons upon request.

Whenever a reference is made in the Supplemental Conditions to a California Test by number, it shall mean the California test in effect on the day the Notice to Contractors for the Work is dated.

Whenever the Supplemental Conditions provide an option between two (2) or more test methods, the Director will determine the test method to be used.

Whenever a Supplemental Condition, manual, or test designation provides for test reports (such as certified mill test reports) from the manufacturer, copies of such reports, identified as to the lot of material, shall be furnished to the Director. The manufacturer's test reports shall supplement the inspection, sampling and testing provisions of this Section 4-1.03 and shall not constitute a waiver of the City's right to inspect. When material which cannot be identified with specific test reports is proposed for use, the Director may at his or her discretion, select random samples from the lot for testing. Testing specimens from the random samples, including those required for retest, shall be prepared in accordance with the referenced Supplemental Conditions and furnished by the Contractor at its expense. The number of such samples and test specimens shall be entirely at the discretion of the Director.

When requested by the Director, the Contractor shall furnish, without charge, samples of

all material entering into the Work, and no material shall be used prior to approval by the Director, except as provided in Section 4-1.04, "Certificates of Compliance," of these General Conditions.

- A. Inspection and Access for Testing. The Contractor shall provide safe access for the Director and his or her inspectors to adequately inspect the quality of Work and conformance with the General and Supplemental Conditions. The Contractor shall provide adequate lighting, ventilation, ladders and other protective facilities as may be necessary for the safe performance of inspections.

The Contractor shall submit samples or specimens of such materials to be furnished or used in the Work as the Director may require. The Contractor shall furnish the Director all necessary labor and facilities for such things as excavation in the compacted fill to depths required to take samples.

Inspections, tests, or favorable review by the Director or others shall not relieve the Contractor from its obligations to perform the Work in accordance with the requirements of the Contract Documents.

Work covered without the favorable review or consent of the Director shall, if required by the Director, be uncovered for examination at the Contractor's expense.

If the Engineer, Architect, or Director considers it necessary or advisable that covered Work be inspected or tested by others, the Contractor, at the Director's request, will uncover, expose or otherwise make available for observation, inspection or testing as the Director may require, that portion of the Work in question, furnishing all necessary labor, materials, tools, and equipment. If it is found that such Work is defective, the Contractor will bear all the expenses of such uncovering, exposure, observation, inspection and testing and of

satisfactory reconstruction. If, however, such Work is not found to be defective and the Work was not covered without favorable review of the Director, the Contractor will be allowed an increase in the Contract Price or an extension of the Contract Time, or both, to cover its costs directly attributable to such uncovering, exposure, observation, inspection, testing, and reconstruction and an appropriate Change Order shall be issued.

Whenever the Contractor varies the period during which Work is carried on each Day, the Contractor shall give due notice to the Director so that proper inspection may be provided. Any Work done in the absence of the Director may be subject to rejection. Proper facilities for safe access for inspection to all parts of the Work shall at all times be maintained for the necessary use of the Director and other agents of the City. Authorized representatives and agents of the Director shall be permitted access to inspect all Work and materials wherever it is required for preparation of progress reports, and the Contractor shall provide proper facilities for such access and inspection.

It is the Contractor's responsibility to supervise the Work and complete the project in accordance with the Contract Documents. In the course of managing that effort, the Contractor shall generate its own punch lists as deemed necessary. The Director may prepare punch lists for the Director's own use in communicating with the Contractor; however, the Director shall be under no obligation to prepare punch lists for the Contractor. In general, the Director will prepare punch lists only after the Contractor has given the Director written notice that the subject Work is completed and tested in accordance with the Contract Documents and is ready for operation and/or use and/or occupancy. Failure of the Director to include an item in a punch list shall not relieve the Contractor of its duty to satisfactorily complete all Work required by the Contract Documents.

Upon Final Completion of the construction Work and request by the Contractor, the Director will conduct a final inspection as a basis for recommending to the City that the Work be accepted.

- B. Field and Materials Testing. Where the Supplemental Conditions require Work to be specially field tested or approved, it shall be tested only in the presence of the Director after timely notice of its readiness for inspection and test, and the Work after testing shall be covered up only upon the consent thereto of the Director.

The results of any tests made are for the information of the Director. Regardless of any test results, the Contractor is solely responsible for the quality of workmanship and materials and for compliance with the requirements of the Contract Drawings and Supplemental Conditions.

Except as specifically required under the Supplemental Conditions, all tests by the Director of materials furnished by the Contractor will be done in accordance with commonly recognized standards of national organizations. The Contractor shall furnish such samples of all materials as required by the Director without charge. No material shall be used unless it has been favorably reviewed by the Director.

Where such inspection and testing are to be conducted by an independent Laboratory or agency, the sample or samples of materials to be tested shall be selected by such Laboratory or agency, or the Director, and not by the Contractor.

- C. Costs of Testing.

1. Initial Services: The City shall furnish and pay for all initial testing services required by the Contract Documents. When initial tests indicate non-compliance with the Contract Documents, the cost of initial tests associated with that non-

compliance will be

deducted by the City from the balance owed the Contractor. The Contractor shall furnish samples of materials for testing as may be required by the Director. Such samples shall be furnished without cost to the City.

2. Retesting: When initial tests indicate non-compliance with the Contract Documents, all subsequent retesting occasioned by the non-compliance shall be performed by the same testing Laboratory and the cost thereof will be deducted by the City from the balance owed the Contractor. Contractor shall be billed for each additional test.

3. Contractor Convenience Testing: Inspection or testing performed exclusively for the Contractor's convenience shall be the sole responsibility of the Contractor.

4. Additional Tests and Inspections: When in the opinion of the Director additional tests or inspections are required because of the manner in which the Contractor executes its Work, such tests and inspections shall be paid for by the City, but will be deducted from the Contract Price. Examples of such tests and inspections are tests of materials substituted for previously accepted materials or substituted for specified materials, retests made necessary by failure of material to comply with the requirements of the Specifications, load tests made necessary because of portions of the structure not fully meeting Specifications or plan requirements, etc.

4-1.04 **CERTIFICATES OF COMPLIANCE.** A Certificate of Compliance shall be furnished prior to the use of any materials for which the Supplemental Conditions require that such a Certificate be furnished. In addition, the Director may permit the use of certain materials or assemblies prior to sampling and testing if accompanied by a Certificate of Compliance. The Certificate shall be signed by the manufacturer of the material or the

manufacturer of assembled materials and shall state that the materials involved comply in all

respects with the requirements of the Supplemental Conditions. A Certificate of Compliance shall be furnished with each lot of such materials delivered to the Work and the lot so certified shall be clearly identified in the Certificate.

All materials used on the basis of a Certificate of Compliance may be sampled and tested at any time. The fact that material is used on the basis of a Certificate of Compliance shall not relieve the Contractor of responsibility for incorporating material in the Work which conforms to the requirements of the Contract Documents and any such material not conforming to such requirements will be subject to rejection whether in place or not.

The Department reserves the right to refuse to permit the use of material on the basis of a Certificate of Compliance.

The form of the Certificate of Compliance and its disposition shall be as directed by the Director.

SECTION 5

LEGAL RELATIONS AND RESPONSIBILITY

5-1.01 **LAWS TO BE OBSERVED.** The Contractor shall keep informed of and observe, and comply with and cause all of its agents and employees to observe and comply with, all prevailing Federal and State laws, and rules and regulations made pursuant to said Federal and State laws, and county and municipal ordinances, and regulations, which in any way affect the conduct of the Contract. If any conflict arises between provisions of the Contract and any such law above referred to, the Contractor shall notify the Director at once in writing. To the fullest extent allowed by law, the Contractor shall defend, indemnify, and save and hold harmless the City or any of its officers, agents, employees, and volunteers against any claim or liability arising from or based on the violation of any such law, rule, or regulation, whether by itself or its agents or employees.

5-1.02 **HOURS OF LABOR.** Eight (8) hours labor constitutes a legal Day's work. The Contractor or Subcontractor shall, as a penalty to City, forfeit Twenty-five Dollars (\$25) for each worker employed in the execution of the contract by the respective Contractor or Subcontractor for each calendar day during which such worker is required or permitted to work more than eight (8) hours in any one (1) calendar day and forty (40) hours in any one (1) calendar week in violation of the provisions of the Labor Code, and in particular, Section 1810 to Section 1815, thereof, inclusive, except that Work performed by employees of Contractors in excess of eight (8) hours per day, and forty (40) hours during any one (1) week, shall be permitted upon public work upon compensation for all hours worked in excess of eight (8) hours per day at not less than one and one-half (1-1/2) times the basic rate of pay, as provided in said

Section 1815. In addition, Contractor and/or its Subcontractors may be required to pay double the basic rate of pay for all hours worked in excess of twelve (12) hours in any workday and under other circumstances. (See California Code of Regulations, Title 8, Sections 16100(c)(6) and (16200(a)(3)(F) and applicable Department of Industrial Relations prevailing wage determinations.)

5-1.03 **NONDISCRIMINATION.**

A. Attention is directed to Labor Code Section 1735, which reads as follows: “A contractor shall not discriminate in the employment of persons upon public works on any basis listed in subdivision (a) of Section 12940 of the Government Code, as those bases are defined in Sections 12926 and 12926.1 of the Government Code, except as otherwise provided in Section 12940 of the Government Code. Every Contractor for public works who violates this section is subject to all the penalties imposed for a violation of this chapter.”

B. During the performance of this Contract, Contractor and its Subcontractors shall not unlawfully discriminate against any employee or applicant for employment because of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, genetic information, marital status, sex, gender, gender identity, gender expression, age, sexual orientation, or military and veteran status. The Contractor and Subcontractors shall insure that the evaluation and treatment of their employees and applicants for employment are free of such discrimination. The Contractor and Subcontractors shall comply with the provisions of the California Fair Employment and Housing Act (Government Code §12900, et seq.) and the applicable regulations promulgated thereunder (California Code of Regulations, Title 2, §7285.0 et seq.) and other applicable State and Federal regulations and City

policies pertaining to nondiscrimination and affirmative action which are incorporated into this Agreement by reference and made a part hereof as if set forth in full. The Contractor and its Subcontractors shall give written notice of their obligations under this clause to labor organizations with which they have a collective bargaining or other agreement.

C. Contractor shall include the nondiscrimination and compliance provisions of this clause in all subcontracts to perform Work under the agreement.

5-1.04 **PREVAILING WAGE.** The Contractor and any Subcontractor shall comply with Labor Code Sections 1770 et seq. In accordance with said Section 1775 the Contractor and any Subcontractor under the Contractor shall, as a penalty, forfeit to the state or City not more than \$200 for each calendar day or portion thereof, for each worker paid less than the prevailing rate as determined by the Director of Industrial Relations for the work or craft in which such worker is employed for under the Contract by the Contractor or by any Subcontractor under the Contractor.

The amount of the penalty shall be determined by the Labor Commissioner based on consideration of both of the following: (a) whether the failure to pay the correct rate of per diem wages was a good-faith mistake and, if so, whether the error was promptly and voluntarily corrected when brought to the attention of the Contractor or Subcontractor; and (b) whether the Contractor or Subcontractor has a prior record of failing to meet its prevailing wage obligations.

The penalty may not be less than forty dollars (\$40) for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rate, unless the failure of the Contractor or Subcontractor to pay the correct rate of per diem wages was a good faith mistake and, if so, the error was promptly and voluntarily corrected when brought to the attention of the Contractor or Subcontractor.

The penalty may not be less than eighty dollars (\$80) for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rate, if the Contractor or Subcontractor has been assessed penalties within the previous three (3) years for failing to meet its prevailing wage obligations on a separate contract, unless those penalties were subsequently withdrawn or overturned.

The penalty may not be less than one hundred twenty dollars (\$120) for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rate, if the Labor Commissioner determines that the violation was willful, as defined in subdivision (c) of Section 1777.1 of the Labor Code.

If the amount due under this section is collected from the Contractor or Subcontractor, any outstanding wage claim under Chapter 1 (commencing with Section 1720) of Part 7 of Division 2 of the Labor Code against the Contractor or Subcontractor shall be satisfied before applying that amount to the penalty imposed on that Contractor or Subcontractor pursuant to this section.

The determination of the Labor Commissioner as to the amount of the penalty shall be reviewable only for an abuse of discretion.

In addition to said penalty, the difference between such stipulated prevailing wage rates and the amount paid to each worker for each calendar day or portion thereof for which each worker was paid less than the stipulated prevailing wage shall be paid to each worker by the Contractor or Subcontractor.

If a worker employed by a Subcontractor on a public works project is not paid the general prevailing per diem wages by the Subcontractor, the Contractor is not liable for any penalties described above unless the Contractor had knowledge of that failure of the Subcontractor to pay

the specified prevailing rate of wages to those workers or unless the Contractor fails to comply with all of the following requirements:

1. The contract executed between the Contractor and the Subcontractor for the performance of work on the public works project shall include a copy of the provisions of Sections 1771, 1776, 177.5, 1813, and 1815 of the Labor Code.
2. The Contractor shall monitor the payment of the specified general prevailing rate of per diem wages by the Subcontractor to the employees, by periodic review of the certified payroll records of the Subcontractor.
3. Upon become aware of the Subcontractor's failure to pay its workers the specified prevailing rate of wages, the Contractor shall diligently take corrective action to halt or rectify the failure, including, but not limited to, retaining sufficient funds due the Subcontractor for work performed on the public works project.
4. Prior to making final payment to the Subcontractor for work performed on the public works project, the Contractor shall obtain an affidavit signed under penalty of perjury from the Subcontractor that the Subcontractor has paid the specified general prevailing rate of per diem wages to its employees on the public works project and any amount due pursuant to 1813 of the Labor Code.

Pursuant to Section 1775 of the Labor Code, the Division of Labor Standards Enforcement shall notify the Contractor on a public works project within fifteen (15) Days of the receipt by the Division of Labor Standards Enforcement of a complaint of the failure of a Subcontractor on that public works project to pay workers the general prevailing rate per diem wages.

Pursuant to the provisions of California Labor Code Section 1773, the City has obtained

the general prevailing rate of wages applicable to the categories of workers the City anticipates will be utilized for this project for straight time, overtime, Saturday, Sunday, and holiday Work. The holiday wage rate listed shall be applicable to all holidays recognized in the collective bargaining agreement of the particular craft, classification or type of worker concerned or, if no collective bargaining applies, those holidays identified in Government Code Section 6700. These wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: <http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm>, which is incorporated herein as a part of this Contract.

Pursuant to Labor Code Section 1773.2, the general prevailing wage rates set forth above, which forms a part of this Contract, shall be posted by the Contractor at a prominent place at the site of the Work.

Pursuant to Labor Code Section 1773.6 and California Code of Regulations Section 16204, Title 8, changes in general prevailing wage determinations shall apply to the project only if issued by the Director of Industrial Relations prior to the City's bid issuance date.

The City will not recognize any claim for additional compensation because of the payment by the Contractor of any wage rate in excess of the prevailing wage rate set forth in the Contract. The possibility of wage increases is one of the elements to be considered by the Contractor in determining its Bid, and will not under any circumstances be considered as the basis of a claim against the City or Contract.

When both California and Federal prevailing wage rates apply, the Contractor and any Subcontractors shall pay their workers the higher of the two rates. The Contractor and any Subcontractors shall insert this clause in any lower tier contract.

5-1.05 REGISTRATION REQUIRED AS QUALIFICATION TO BID.

Pursuant to Labor Code Section 1771.1(b), notice is hereby given that a Contractor or Subcontractor shall not be qualified to bid on, be listed in a bid proposal, subject to the requirements of Section 4104 of the Public Contract Code, or engage in the performance of any contractor for public work, as defined in Labor Code Sections 1720, et seq., unless currently registered and qualified to perform public work pursuant to Labor Code Section 1725.5. It is not a violation of Labor Code Section 1771.1 for an unregistered contractor to submit a bid that is authorized by Section 7029.1 of the Business and Professions Code or by Section 10164 or 20103.5 of the Public Contract Code, provided the contractor is registered to perform public work pursuant to Section 1725.5.

5-1.06 **PAYROLL RECORDS.** The Contractor's attention is directed to the following provisions of Labor Code Section 1776. The Contractor shall be responsible for the compliance with these provisions by its Subcontractors.

A. The Contractor and each Subcontractor shall keep accurate and current payroll records, showing the name, address, social security number, work classification, straight time and overtime hours worked each day and week, and the actual per diem wages paid to each journeyman, apprentice, worker, or other employee employed by it in connection with the public work. Each payroll record shall contain or be verified by a written declaration that is made under penalty of perjury, stating both of the following:

1. The information contained in the payroll record is true and correct.
2. The employer has complied with the requirements of Section 1771, 1811, and 1815 for any work performed by his or her employees on the public works project.

B. The payroll records enumerated under subdivision (A) shall be

available for inspection at all reasonable hours at the principal office of the Contractor on the following

basis:

1. A certified copy of an employee's payroll record shall be made available for inspection or furnished to such employee or his or her authorized representative on request.

2. A certified copy of all payroll records enumerated in subdivision (A) shall be made available for inspection or furnished upon request to a representative of the City, the Division of Labor Standards Enforcement, and the Division of Apprenticeship Standards of the Department of Industrial Relations. The City reserves the right to withhold any progress payments to the Contractor in the event of noncompliance with the subsection.

3. A certified copy of all payroll records enumerated in subdivision (A) shall be made available upon request by the public for inspection or for copies thereof. However, a request by the public shall be made through either the City, the Division of Apprenticeship Standards, or the Division of Labor Standards Enforcement. The public shall not be given access to such records at the principal office of the Contractor.

C. The certified payroll records shall be on forms provided by the Division of Labor Standards Enforcement or shall contain the same information as the forms provided by the Division.

D. Each Contractor shall file a certified copy of the records enumerated in subdivision (A) with the entity that requested the records within ten (10) Days after receipt of a written request.

E. Any copy of the records made available for inspection as copies and furnished upon request to the public or any public agency by the City, the Division of

Apprenticeship Standards or the Division of Labor Standards Enforcement shall be marked or

obliterated to prevent disclosure of an individual's name, address and social security number. The name and address of the Contractor awarded the Contract or Subcontractor performing the Contract shall not be marked or obliterated. Any copy of records made available for inspection by, or furnished to, a joint labor-management committee established pursuant to the federal Labor Management Cooperation Act of 1978 (Section 175a of Title 29 of the United States Code) shall be marked or obliterated only to prevent the disclosure of an individual's name and social security number. A joint labor-management committee may maintain an action in a court of competent jurisdiction against an employer who fails to comply with Section 1774. The court may award restitution to an employee for unpaid wages and may award the joint labor-management committee reasonable attorneys' fees and costs incurred in maintaining the action. An action under this subdivision may not be based on the employer's misclassification of the craft of a worker on its certified payroll records. Nothing in this subdivision limits any other available remedies for a violation of this section.

F. The Contractor shall inform the City of the location of the records enumerated under subdivision (A), including the street address, city and county, and shall, within five (5) business days, provide a notice of a change of location and address.

G. The Contractor shall have ten (10) Days in which to comply subsequent to receipt of written notice requesting the records enumerated in subdivision (A). In the event that the Contractor or Subcontractor fails to comply within the ten (10) Day period, the Contractor shall, as a penalty to the State or City, forfeit twenty-five (\$25) Dollars for each calendar day, or portion thereof, for each worker, until strict compliance is effectuated. Upon the request of the Division of Apprenticeship Standards or the Division of Labor Standards Enforcement, these penalties shall be withheld from any progress payment or final payment then

due. A contractor

is not subject to a penalty assessment pursuant to this section due to the failure of a Subcontractor to comply with this section.

5-1.07 SAFETY REQUIREMENTS. It is the intent of the parties that the City is not an exposing, creating, controlling, or correcting employer under California Labor Code Section 6400. In accordance with generally accepted construction practices and State law, the Contractor shall have the authority and be solely and completely responsible for conditions on the Work Site, including safety of all persons and property during performance of the Work. Moreover, the Contractor shall be the controlling employer and has the authority and responsibility to enforce Work Site safety. The Contractor shall be responsible for conducting daily safety inspections and assuring all hazards and violations are abated. The Contractor is responsible for assuring that all Subcontractors adhere to the minimum Cal/OSHA safety requirements and that each Subcontractor has an effective Cal/OSHA IIPP (Illness and Injury Prevention Program) in place that specifically addresses all potential exposures, such as, but not limited to, fall protection, confined space, and trenching/shoring. These requirements shall apply continuously and not be limited to normal working hours. The Contractor shall be responsible for any delay costs or damages in the event the progress of Work is slowed or stopped due to a safety violation.

The Contractor shall designate a safety officer and have in place a health and safety plan in accordance with the laws of State of California and conduct safety meetings and document them in accordance with the law. The Contractor shall have the safety record available for inspection during working hours and shall submit job site safety meeting reports with each Application for Payment.

Prior to Contractor commencing construction project work on City property, Contractor

shall make available copies of its Health and Safety Plan (HASP) that meets or exceeds applicable Cal/OSHA regulations. The Contractor's HASP shall also meet or exceed the requirements of any applicable City-wide or departmental specific Injury and Illness Prevention Programs (IIPP) and other HASP programs, procedures, and plans. Potentially applicable HASP programs, procedures, and plans include, but are not limited to, the following:

1. Bloodborne Pathogens Exposure Control Plan;
2. Confined Space Entry Procedure;
3. Electrical Safety Program (Lockout/Tagout);
4. Emergency Action Plans (Site Specific);
5. Fire Prevention Plans (Site Specific);
6. Hazardous Waste Operations Emergency Response Plan (or Equivalent);
7. Hazard Communication Program (SDS's and Right-to-Know training);
8. Heat Illness & Prevention Plan;
9. Hearing Conservation Program;
10. Hot Work/Welding Procedure;
11. Job Hazard Analyses/Standard Operating Procedures;
12. Traffic Control & Flagging;
13. Excavation/Dig Safe Procedure;
14. Fall Protection Plan;
15. Personal Protective Equipment Plan;
16. Respirable Crystalline Silica Exposure Control Plan;
17. Respirator Program;
18. Soils Management Plan (for contaminated soils); and

19. Transite (Asbestos) Pipe Work Procedure.

Additionally, Contractor shall be responsible for complying with all City-wide and departmental specific safety requirements as identified in the Supplemental Conditions or presented at a pre-construction meeting.

Contractor shall inform City in advance of the quantity of chemical(s) to be used for the project and the total quantity of chemical(s) that will be brought onto City property. In addition, Contractor shall provide City with one copy of the Safety Data Sheet (SDS) for each chemical expected to be used to complete the project and for each chemical brought to the Work Site, regardless of whether such chemicals are ultimately used for the project.

The services of the Director in conducting construction review of the Contractor's performance is not intended to include review of the adequacy of the Contractor's Work methods, equipment, bracing or scaffolding, or safety measures, in, on, or near the construction site. If a City employee observes a safety violation, the City employee will report the violation to the Contractor who is then responsible for assuring the violation is abated.

The Contractor is hereby informed that Work on this project could be hazardous. The Contractor shall carefully instruct all personnel working in potentially hazardous Work areas as to potential dangers and shall provide such necessary safety equipment and instructions as are necessary to prevent injury to personnel and damage to property. Special care shall be exercised relative to Work underground.

All Work and materials shall be in strict accordance with all applicable State, City, County, and Federal Rules, Regulations, and Codes, and attention is drawn to the requirements of Cal/OSHA. The Contractor shall be solely responsible for compliance with all City, County and State blasting requirements and for any damages caused by its operations.

To ensure compliance with California Labor Code Section 6705, the Contractor shall submit to the City, at least five (5) Days in advance of excavation of any trench five feet (5') or more in depth, Working Drawings to the Director showing the design of shoring, bracing, sloping and other provisions to be made for worker protection from the hazard of caving ground during the excavation of such trench or trenches. If such Working Drawings vary from the shoring system standards established by the Cal/OSHA Construction Safety Orders of the Division of Industrial Safety, the plan shall be prepared and signed by a registered civil or structural engineer in the State of California. This in no way relieves the Contractor from the requirement of maintaining safety in all operations performed by the Contractor or the Contractor's Subcontractors and nothing in this section shall be deemed to allow the use of a shoring, sloping or protective system less effective than that required by the Cal/OSHA Construction Safety Orders of the Division of Industrial Safety Contractor's Working Drawings shall be subject to approval insofar as the details affect the character of the finished Work and for compliance with design requirements applicable to the construction when specified or called for, but details of the design will be left to Contractor who shall be responsible for the successful construction of the Work. The City shall approve Working Drawings before any Work involving such drawings is performed. Approval and/or acceptance by the City or its designated agent only constitutes acknowledgment of the submission and does not constitute review or approval of the designs, design assumptions or criteria, completeness of submissions, applicability to areas of intended use, nor implementation of the plans, which are solely the responsibility of the Contractor and its registered engineer.

The Contractor shall perform its Work as not to expose personnel to, or to discharge into the atmosphere from any source whatever, smoke, dust, asbestos, toxic chemicals or other air

contaminants in violation of the laws, rules, and regulations of the governmental entities having jurisdiction and shall bear full and exclusive responsibility for any release of hazardous or non-hazardous chemicals or substances during the course of the Work. The Contractor shall immediately report any such release to the City. The Contractor shall be solely responsible for all claims and expenses associated with the response to, removal and remediation of the release, including, without limitation, payment of any fines or penalties levied against the City by any agency as a result of such release and shall defend, indemnify, and save and hold harmless the City, its officers, agents, employees, and volunteers from any claims arising from such release. For purposes of this section only, the term “claims” shall include:

1. All notices, orders, directives, administrative or judicial proceedings, fines, penalties, fees, or charges imposed by any governmental agency with jurisdiction; and
2. Any claim, cause of action, or administrative or judicial proceeding brought against the City, its officers, agents, employees, and volunteers for any loss, cost (including reasonable attorneys’ fees), damage or liability, sustained or suffered by any person or entity, including the City.

If the performance of the Work creates any hazardous wastes, those wastes shall be properly disposed of according to federal, state, and local laws, at the expense of the Contractor. The Contractor shall dispose of the wastes under its own EPA Generator Number. In no event shall the City be identified as the generator. The Contractor shall notify the City of any such hazardous wastes and the City reserves the right to a copy of the results of any tests conducted on the wastes, and, at its cost, to perform additional tests or examine those wastes, prior to disposition. The Contractor shall defend, indemnify, and save and hold harmless the City, its

officers, agents, employees, and volunteers from any claims arising from the disposal of the hazardous wastes, regardless of the absence of negligence or other malfeasance by the Contractor. Disposal of all Hazardous Materials must be done in accordance with all laws and regulations. Copies of required regulatory documentation including copies of final manifests shall be supplied to the City.

Contractors or Subcontractors removing one hundred or more square feet (100') of asbestos must be "Certified" in accordance with State law. All Work involving exposure to asbestos and all other hazardous materials shall be performed with protection of personnel in compliance with all applicable regulations and safety requirements including, but not limited to, California Code of Regulations Section 1529, Title 8.

Nothing in these General Conditions is to be construed to permit Work not conforming to governing codes. When Contract Documents differ from governing codes, the Contractor shall furnish and Install the higher standards called for without extra charge.

5-1.08 **SUBSURFACE EXCAVATIONS. NOTIFICATION.** The Contractor shall contact the regional notification center, "Underground Service Alert," and schedule its Work to allow ample time for the center to notify its members and, if necessary, for any member to field locate and mark its facilities. Without limiting the foregoing, the Contractor's attention is directed to Government Code Sections 4216 to 4216.9, and in particular Section 4216.2.

5-1.09 **PUBLIC SAFETY.** The Contractor shall assume all responsibility for public safety during the performance of its Work, and all costs arising therefrom shall be included in the Contract Price. Whenever the Contractor's operations create a condition hazardous to traffic or to the public, it shall furnish, erect and maintain, at its expense, such fences, barricades, lights, signs, and other devices and take such other protective measures as are

necessary to prevent accidents or damage or injury to the public. The Contractor shall establish the pedestrian detours with comparable lighting to the original pedestrian areas. The Contractor shall arrange for such flaggers as are necessary to give adequate warning to traffic or to the public of any dangerous conditions affecting traffic. For Work in a public right-of-way, the Contractor shall comply with the rules and regulations of the State, County, or local agency that owns the right-of-way.

The Contractor shall promptly and fully comply with and carry out, and shall without separate charge therefor to the City, all safety and first aid requirements prescribed by all applicable Federal, State, and local laws and regulations, rules, and orders. The Work shall be done in a safe manner; and the Contractor shall safeguard the safety and health of its employees, Subcontractors, and the people of local communities. The Contractor shall also be reasonable for ensuring that its Subcontractors comply with the provisions of this section.

Upon the failure of the Contractor to comply with any of the requirements of this section, the City shall have the authority, but not the duty, to stop the Work until such failure is remedied. The Contractor shall not be entitled to an adjustment of the Contract Time or an increase in the Contract Price due to any such suspensions.

When required by the Contract Documents, the Contractor shall construct, maintain, and remove detours for use of public traffic, without additional cost to the City, unless separate payment is specified in the Special Provisions.

The failure or refusal of the Contractor to construct and maintain detours at the proper time shall be sufficient cause for closing down the work until such detours are in satisfactory condition for use by public traffic.

Due care shall be exercised to avoid injury to existing improvements or facilities, utility

facilities, adjacent property and trees, shrubs, and other plants that are not to be removed.

Trees, shrubs and other plants that are not to be removed, and pole lines, fences, signs, survey markers and monuments, buildings and structures, conduits, pipe lines, sewer and waterlines, highway facilities, and any other improvements or facilities, under or above ground, that are within or adjacent to the work limit line shall be protected from injury or damage, and the Contractor shall provide and Install suitable safeguards to protect such objects from injury or damage. If such objects are injured or damaged by reason of the Contractor's operations, they shall be replaced or restored at the Contractor's expense. The facilities shall be replaced or restored to a condition as good as when the Contractor entered upon the Work Site, or as good as required by the Contract Documents if any such objects are part of the Work. The City may make or cause to be made such temporary repairs as are necessary to restore to service any damaged facility. The cost of such repairs shall be borne by the Contractor, and the costs may be deducted from any monies due or to become due to the Contractor under the Agreement.

The fact that any underground facilities is not shown on the Contract Drawings shall not relieve the Contractor of its responsibility pursuant to "Utility Facilities" in Section 2-1.12 elsewhere in the Contract Documents. It shall be the Contractor's responsibility, pursuant thereto, to ascertain the location of such underground improvements or facilities, which may be subject to damage by reason of its operations.

Full compensation for furnishing all labor, materials, tools, equipment and incidentals, and for doing all the Work involved in protecting or repairing property as specified in this section, shall be considered as included in the prices paid for the various Contract items of work and no additional compensation will be allowed therefor.

5-1.10 **EMERGENCIES.** In an Emergency affecting the safety of life, the

Work, or adjoining property, the Contractor, without special instructions or authorization from the City, shall act at its discretion to prevent such threatened loss or injury. In such an Emergency, the Contractor may perform such additional work as is reasonably required. Any compensation claimed by the Contractor on account of Work performed to an Emergency shall be determined in accordance with the provisions relating to Force Account payment contained elsewhere in the Contract Documents.

5-1.11 **APPRENTICES.** Attention is directed to Labor Code Sections 1777.5, 1777.6 and 1777.7 and Title 8, California Code of Regulations Section 200 et seq. In accordance with Section 1777.5, the Contractor shall secure the necessary certificates and shall contribute to the apprenticeship fund or funds, as provided therein. The Contractor shall require each Subcontractor who will perform work or labor or render service to the Contractor in or about the construction of the work to fully comply with Sections 1777.5 and 1777.6 of the Labor Code. To insure compliance and complete understanding of the law regarding apprentices, and specifically the required ratio thereunder, each Contractor or Subcontractor should, where some questions exist, contact the Division of Apprenticeship Standards, , or one of its branch offices prior to commencement of Work on the public works Contract. Responsibility for compliance with this section lies with the prime Contractor.

It is State and City policy to encourage the employment and training of apprentices on public works Contracts as may be permitted under local apprenticeship standards.

5-1.12 **FAIR LABOR STANDARDS ACT.** Attention is invited to the fact that the City has been advised by the Wage and Hour Division, U.S. Department of Labor, that Contractors engaged in construction Work are required to meet the provisions of the Fair Labor Standards Act of 1958 and as amended (52 Stat. 1060).

5-1.13 **WORKERS' COMPENSATION.** Pursuant to the requirements of Labor Code Section 1860, the Contractor will be required to secure the payment of workers' compensation to its employees in accordance with the provisions of Labor Code Section 3700.

Prior to the commencement of Work, the Contractor shall sign and file with the Director a certification in the following form:

“I am aware of the provisions of Labor Code Section 3700 which require every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that code, and I will comply with such provisions before commencing the performance of the Work of this Contract.”

5-1.14 **AIR POLLUTION CONTROL AND ASBESTOS.** The Contractor shall comply with all air pollution control rules, regulations, ordinances and statutes which apply to any Work performed pursuant to the Contract, including any air pollution control rules, regulations, ordinances and statutes, specified in Government Code Section 11017.

In the absence of any applicable air pollution control rules, regulations, ordinances or statutes governing solvents, all solvents, including but not limited to the solvent portions of paints, thinners, curing compounds, and liquid asphalt used on the project shall comply with the applicable material requirements of the applicable Air Quality Management District. All containers of solvent, paint, thinner, curing compound, or liquid asphalt shall be labeled to indicate that the contents fully comply with said requirements.

Unless otherwise provided in the Supplemental Conditions, material to be disposed of shall not be burned, either inside or outside the Premises.

The Contractor shall also comply with all rules, regulations, statutes and ordinances

regarding asbestos removal and disposal, including but not limited to, 42 U.S.C. Sections 7401, 7412 and 7601, 40 C.F.R. Part 61, Subpart M, and California Code of Regulations Section 1529, Title 8.

If the Contractor discovers that a building to be demolished or renovated contains asbestos containing material, the Contractor shall immediately cease Work and notify the City.

5-1.15 **USE OF PESTICIDES.** The Contractor shall comply with all local, state and federal rules and regulations of the Department of Food and Agriculture, the Department of Health, the Department of Industrial Relations and all other agencies which govern the use of pesticides required in the performance of the Work.

Pesticides shall include but shall not be limited to herbicides, insecticides, fungicides, rodenticides, germicides, nematocides, bactericides, inhibitors, fumigants, defoliants, desiccants, soil sterilants, and repellents.

Any substance or mixture of substances intended for preventing, repelling, mitigating, or destroying weed, insects, diseases, rodents, or nematodes and any substance or mixture of substances intended for use as a plant regulator, defoliant or desiccant shall be considered as pesticide.

5-1.16 **SOUND AND LIGHT CONTROL REQUIREMENTS.** The Contractor shall comply with all local sound control, light control, and noise level rules, regulations and ordinances which apply to any Work performed pursuant to the Contract. Work shall not begin before 7 a.m. nor occur after 7 p.m., unless otherwise permitted by the City.

Each internal combustion engine, used for any purpose on the Work or related to the Work, shall be equipped with a muffler, in good working order, of a type recommended by the manufacturer. No internal combustion engine shall be operated on the project without said

muffler.

5-1.17 **WEIGHT LIMITATIONS.** Unless expressly permitted elsewhere in the Contract Documents, the Contractor shall not operate construction equipment or vehicles of any kind which, laden or unladen, exceed the maximum weight limits set forth in Division 15 of the Vehicle Code over completed or existing base, surfacing, pavement or structures.

5-1.18 **ENVIRONMENTAL CLEARANCES; MITIGATION**

MONITORING PROGRAMS; AND REGULATORY AGENCY PERMIT

REQUIREMENTS. The Department will obtain all environmental clearances and other authorizations necessary for this project as set forth in the Contract Documents. The Contractor shall comply with the provisions, including giving notices during construction when required, of said authorizations. In the event the obtaining of said authorizations delays completion of all or any portion of the Work, an extension of time determined pursuant to the provisions in Section 6-1.08, "Liquidated Damages," of these General Conditions will be granted.

Contractor shall comply with: (1) all mitigation identified in the mitigation monitoring program (attached to and adopted as a component of the mitigated negative declaration or Environmental Impact Report) to mitigate impacts to protected natural resources; and (2) all related permit requirements issued by the regulatory agencies authorizing the project. Contractor shall defend, indemnify, and save and hold harmless the City, its officers, agents, employees, and volunteers from any fines, claims, suits, actions or regulatory sanctions of every name, kind and description brought forth, or on account of, damage to protected natural resources from or arising out of Contractor's negligence or willful misconduct in the performance of this Agreement.

5-1.19 **PERMITS AND LICENSES.** The Contractor acknowledges and agrees that, prior to the submission of its bid for the Work, it fully familiarized itself with the

requirements of all applicable federal, state, county and municipal laws, codes, rules, and regulations, as well as the conditions of any required licenses and permits.

The Contractor shall procure all permits and licenses, including any applicable building permits (except those procured or to be procured by the City which are listed elsewhere in the Contract Documents), in coordination with the Director, pay all charges and fees, and give all notices necessary and incident to the due and lawful prosecution of the Work. Contractor shall be responsible for applying, paying all fees, and coordination for obtaining all permits for completion of the Work. All permits and licenses shall be obtained in sufficient time to prevent delays to the Work. Contractor will apply to the City for reimbursement for such permits costs. Accordingly, Contractor should not include the anticipated costs for permits in its bid, as the necessary permit costs will be reimbursed by the City.

The California Environmental Quality Act (Public Resources Code, Section 21000 to 21177) may be applicable to permits, licenses and other authorizations which the Contractor must obtain from State or local agencies in connection with performing the Work. The Contractor shall comply with the provisions of that Act in obtaining such permits, licenses and other authorizations, and all permits, licenses and other authorizations shall be obtained in sufficient time to prevent delays to the Work.

The Contractor shall maintain the applicable Contractor's license as identified in the Notice to Contractors and City business license for the duration of the Work.

5-1.20 **WATER POLLUTION.** The Contractor shall comply with all water pollution control rules, regulations, ordinances and statutes which apply to any Work performed pursuant to the Contract, including any water pollution control rules, regulations, and statutes, specified by the most current State of California NPDES General Permit for Stormwater

Discharges Associated with Construction Activity.

The Contractor shall take all necessary precaution to protect streams, vernal pools, ponds, reservoirs, and lakes from pollution with fuels, oils, bitumen, calcium chloride, and other harmful materials as consistent with the law. Also, the Contractor shall conduct and schedule operations so as to avoid discharging pollutants, such as but not limited to: sediment and silt to the storm drain system. The storm drain system consists of all facilities that are designed to convey stormwater to the Waters of the State as defined in the California Water Code. The storm drain system includes, but is not limited to, all streets, gutters, drain inlets, roadside ditches, streams, vernal pools, ponds, and lakes. Care shall be exercised to preserve roadside vegetation beyond the limits of construction.

5-1.21 **PROTECTION AND USE OF PROPERTY.** The Contractor shall be responsible for and provide and maintain all proper temporary walkways, covered walkways, barriers, roads, guards, railings, lights, warning signs, and take precaution at all times to avoid injury or damage to any person or any property, and upon completion of the Work, or at other times as directed, restore Premises and adjacent property to a proper condition. In the event of such injury or damage, Contractor shall report such injury and damage to City within forty-eight (48) hours of occurrence.

The Contractor shall protect adjoining property and nearby buildings, including City buildings, City roads, and public streets or roads, from dust, dirt, debris, or the nuisance arising out of the Contractor's operations or storage practices, and, if ordered by the Director, the Contractor shall provide and Install suitable safeguards, approved by the Director, to protect such objects from damage. If such objects are damaged by reason of the Contractor's operations, they shall be replaced or restored at the Contractor's expense.

If the Contractor damages any buildings, roads, utilities, or other property which belong to the City, or any Department or agency thereof, then the Director, at his or her option, may retain from the money due under the Contract an amount sufficient to insure repair of the damage.

The Director may make or cause to be made such temporary repairs as are necessary to restore to service any such damaged facility. The cost of such repairs shall be borne by the Contractor and may be deducted from any moneys due or to become due the Contractor under the Contract.

5-1.22 RESPONSIBILITY FOR DAMAGE AND INDEMNIFICATION.

The City of Roseville, its officers, agents, employees, and volunteers, including but not limited to the Director and his or her designee, shall not be answerable or accountable in any manner: for any loss or damage that may happen to the Work or any part thereof; for any loss or damage to any of the materials or other things used or employed in performing the Work; for injury to or death of any person, either workers or the public; or for damage to property from any cause which might have been prevented by the Contractor, its workers, or anyone employed by the Contractor or the Contractor's Subcontractors.

The Contractor shall be responsible for any liability imposed by law and for injuries to, or death of, any person including, but not limited to, workers and the public, or damage to property resulting from defects or obstructions, or from any cause whatsoever during the progress of the Work or at any time before its completion and final Acceptance.

To the fullest extent allowed by law, the Contractor shall defend (through counsel acceptable to the City), indemnify, and save and hold harmless the City, and its respective officers, agents, Subcontractors, employees, and volunteers, and the successors and assigns of

any of them, (hereinafter referred to as “Indemnitees”) from and against all claims, demands, liability, suits, actions, costs or expenses for any and all loss or damage, including but not limited to, personal injury, property damage, or economic loss, arising out of or resulting from allegations of (1) Contractor’s use of the City’s property or any activities or Work performed hereunder by the Contractor; (2) the Contractor’s performance of the Work under the Agreement; or (3) the Contractor’s breach of any provision of the Agreement. The duty of the Contractor to indemnify and save harmless includes the duties to defend as set forth in Civil Code Section 2778. The only exception to these provisions is that the Contractor’s obligations under this section will not apply to the extent that the claims, demands, liability, suits, actions, costs or expenses are caused by Indemnitees’ active negligence, willful misconduct, criminal acts, or for defects in design furnished by the Indemnitees, misconduct, criminal acts, or for defects in design furnished by the Indemnitees.

The Contractor waives any and all rights to any type of express or implied indemnity against the City, its officers, agents, employees, or volunteers.

The Contractor’s responsibility for such defense and indemnity obligations shall survive the termination or completion of this Contract for the full period of time allowed by law. The defense and indemnity obligations of this Contract are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Contract. The parties intend that the defense and indemnity obligations in this Contract shall be broadly construed.

Any person, firm or corporation that Contractor authorizes to Work on the City’s property including Subcontractors, shall be deemed to be an agent of the Contractor for purposes herein, shall be subject to all the applicable terms herein, and shall be within the scope of the Contractor’s indemnity obligation described herein.

In addition to any remedy authorized by law, so much of the money due the Contractor under and by virtue of the Contract as shall be considered necessary by the Department may be retained by the City until disposition has been made of such suits or claims for damages.

The retention of money due the Contractor shall be subject to the following:

A. The City will give the Contractor thirty (30) Days' notice of its intention to retain funds from any partial payment which may become due to the Contractor prior to Acceptance of the Contract. Retention of funds from any payment made after Acceptance of the Contract may be made without such prior notice to the Contractor.

B. No retention of additional amounts out of partial payments will be made if the amount to be retained does not exceed the amount being withheld from partial payments pursuant to Section 7-1.07, "Progress Payments," of these General Conditions.

C. If the City has retained funds and it is subsequently determined that the City is not entitled to be indemnified and saved harmless by the Contractor in connection with matter for which such retention was made, the Department shall be liable for interest on the amount retained at the legal rate of interest for the period of such retention.

5-1.23 **INSURANCE COVERAGE.**

A. Evidence of Maintenance Required. The Contractor shall, at its expense, procure and at all times maintain in full force and effect at a minimum the insurance required by this section on all of its operations; and the Contractor shall not allow any Subcontractor to commence work until similar insurance required of the Subcontractor has been obtained and filed. An original Certificate of Insurance, and copies of all required endorsements, all in a form approved by the Risk Manager, evidencing all required coverage or policies shall be filed after the award of the bid and prior to approval of the Contract by the City Council. Contractor shall

provide ten (10) days prior written notice to the City of any reduction of coverage limits or cancellation of the coverage or policies shall be given to the City of Roseville as Certificate holder.

B. Qualifying Insurers. With the exception of the State Compensation

Insurance Fund, all required insurance policies shall be issued by companies acceptable to the City and licensed to do business in the State of California and who hold a current policy holders alphabetic and financial size category rating of not less than AVII according to the most recent issue of Best's Insurance Reports.

C. Insurance Required.

1. Commercial General Liability (CGL): Insurance Services Office Form CG 00 01 covering CGL on an "occurrence" basis, including products and completed operations with limits of no less than Two Million Dollars (\$2,000,000) per occurrence for bodily injury, personal injury and property damage for projects under One Million Dollars (\$1,000,000) and limits of no less than Five Million Dollars (\$5,000,000) per occurrence for bodily injury, personal injury and property damage for projects over One Million Dollars (\$1,000,000). If a general aggregate limit applies, either the aggregate limit shall apply separately to this project or the general aggregate limit shall be twice the required occurrence limit.

The Commercial General Liability insurance shall include the following, copies of which shall be provided:

a. Inclusion of the City of Roseville, and its officers, agents, employees, and volunteers, as additional insureds (except for workers' compensation) as respects services or operations under the Contract. The additional insured endorsement for the

general liability policy shall be at least as broad as the ISO CG 2010 10 01 combined with ISO CGL

Endorsement CG 2037 10 01. Any other endorsement must be approved in writing by the City. Endorsements must include coverage for on-going and completed operations, which coverage shall be maintained for four (4) years following completion of the Project. Endorsements shall cover the City of Roseville, its officers, agents, employees, and volunteers.

b. The insurance shall provide coverage for claims by one insured against another insured and the policies shall not contain any cross-suits exclusions, cross- liability exclusions, or insured versus insured exclusions. The policies shall not contain any classification exclusions purporting to deny coverage for any work to be performed by Contractor or any of its Subcontractors.

c. Stipulation that the insurance is primary and noncontributory, as evidenced by a separate endorsement (CG 20 01 04 13 or an equivalent) or section of the policy, and that neither the City nor its insurers will be called upon to contribute to a loss.

d. Such insurance shall specifically cover the contractual liability of the Contractor.

e. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

f. Waiver of subrogation endorsement.

g. The Contractor shall furnish a certificate for the period covered.

2. Automobile Liability: Insurance Services Office Form Number CA 0001 covering Code 1 (any auto), or if Contractor has no owned autos, Code 8 (hired) and Code 9

(non-owned), with limits of no less than One Million Dollars (\$1,000,000) per accident for bodily injury and property damage.

3. Workers' Compensation: In accordance with the provisions of the California Labor Code, Contractor is required to be insured against liability for Workers' Compensation or to undertake self-insurance. Statutory Workers' Compensation and Employers' Liability of at least One Million Dollars (\$1,000,000) shall cover all Contractors staff while performing any work incidental to the performance of this Agreement.

4. Professional Liability: Professional Liability (Errors and Omission) Insurance appropriate to Contractor's profession, with a limit of liability not less than One Million Dollars (\$1,000,000) per occurrence or claim and Two Million Dollars (\$2,000,000) aggregate to cover all design and engineering services rendered by Contractor pursuant to the Agreement. Coverage must commence from the first day that Contractor or any of its Subcontractors provided any design or engineering services in connection with the Project.

5. Builder's Risk/Course of Construction Insurance (If Required by Risk Management): The Contractor shall be responsible for all loss, damage or destruction whatsoever to the work called for by this Contract until the approval of a Notice of Completion or acceptance of the Work if no Notice of Completion is to be recorded.

The Contractor shall secure "All Risk" type of builder's Risk Insurance of the type covering one hundred percent (100%) of the value of the work performed under this Contract (the value is presumed to be the Contract amount unless otherwise stated in Supplemental Conditions) and all materials, equipment, or other items to be incorporated therein while the same are located at the construction site, a bonded warehouse, or its place of manufacture. At any time, the policy shall cover the value of the work completed. The policy shall cover hazards

including the losses due to fire, explosion, hail, rain, lightning, flood (separate insurance as needed), vandalism, malicious mischief, wind, collapse, aircraft, and smoke.

The policies providing such insurance shall name the City as a loss payee as its respective interests may appear, and certified copies of such policies shall be filed with the City. The maximum deductible allowable under the Builder's All Risk policy shall be five percent (5%) of the Contract amount.

Builder's Risk Insurance is not required for coverage of losses in excess of five percent (5%) of the Contract amount for damages resulting from earthquake in excess of a magnitude of 3.5 on the Richter scale, or tidal waves. Coverage in the amount of five percent (5%) of the Contract amount for such losses is required.

6. Pollution Coverage: Contractor shall procure pollution liability coverage or other insurance covering claims for bodily injury or property damage arising out of the abatement, removal, storage, transportation, or other exposure to hazardous materials or pollutants, in limits not less than Two Million Dollars (\$2,000,000). Contractor shall add the City and all parties required to be indemnified by Contractor as additional insured on all pollution liability policies.

7. Higher Coverage Limits: If Contractor maintains higher coverage limits than the amounts shown above, then the City requires and shall be entitled to coverage for the higher coverage limits maintained by Contractor. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the City.

8. Claims Made Coverage: Liability insurance coverage may not be written on a "claims made" or modified occurrence basis. The Certificate of Insurance must

clearly provide that the coverage is on an “occurrence” basis.

5-1.24 **OTHER INSURANCE PROVISIONS.**

A. The requirements of the Standard Specifications as to types and limits of insurance coverage to be maintained by the Contractor, and any approval of insurance by the City, are not intended to, and shall not in any manner limit or qualify the liabilities and obligations otherwise assumed by the Contractor pursuant to the Contract, including, but not limited to, the provisions concerning indemnification, nor preclude the City from taking any other action available to it under any other provision of the Contract or law.

B. The City acknowledges that some insurance requirements contained in these Standard Specifications may be fulfilled by self-insurance on the part of the Contractor. However, this shall not in any way limit liabilities assumed by Contractor under the Contract. Any self-insurance must be approved in writing by the City, in its sole discretion and shall not reduce the limits of liability. Any deductibles or self-insured retentions (“SIR”) must be declared on the certificate of insurance and approved by City in writing. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

C. The Contractor agrees to include in its contracts with all subcontractors the same requirements and provisions of this Contract, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor’s work. Furthermore, the Contractor shall require its subcontractors to agree to be bound to the Contractor and the City in the same manner and to the same extent as the Contractor is bound to the City under this Contract. Additionally, the Contractor shall obligate its subcontractors to

comply with these

same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of the City's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request. Alternatively, the Contractor may insure subcontractor(s) under its own policy.

D. The City, its officers, agents, employees, and volunteers are to be covered as insureds with respect to liability arising out of automobiles owned, leased, hired or borrowed by or on behalf of the Contractor; and with respect to liability arising out of work or operations performed by or on behalf of the Contractor including materials, parts or equipment furnished in connection with such work or operations. Coverage shall not extend to any indemnity coverage for the active negligence of the additional insured in any case where an agreement to indemnify the additional insured would be invalid under California Insurance Code Section 11580.04.

E. The limits of insurance required in this Contract may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of the City (if agreed to in a written contract) before the City's own insurance shall be called upon to protect it as a named insured.

F. The insurance procured by Contractor shall be subject to the approval of the City, but any acceptance of insurance certificates by the City shall in no way limit or relieve Contractor of its duties and responsibilities under the Agreement.

G. Contractor shall be responsible for all premiums, deductibles, and self-insured retention applicable to the insurance it is required to procure under the Contract. All deductibles or self-insured retentions over five hundred thousand dollars (\$500,000) must be

approved by the City, in writing. Contractor shall be responsible for all deductibles, self-insured

retention payments, and/or increased premiums incurred if the City's policies of insurance are forced to cover damages or respond to claims for which Contractor or its Subcontractors were obligated to provide insurance under the Contract.

H. Failure of the City to enforce in a timely manner any of the requirements of these insurance provisions shall not act as a waiver to enforcement of any of these provisions at a later date.

I. Contractor's indemnity obligations shall not be limited by these insurance provisions and shall survive the expiration of the Contract and the insurance provisions of the Contract shall likewise not be limited by the indemnity provisions of the Contract.

J. THE CITY RESERVES THE RIGHT TO WITHHOLD ANY PROGRESS PAYMENTS TO THE CONTRACTOR IN THE EVENT OF NONCOMPLIANCE WITH ANY INSURANCE REQUIREMENTS.

5-1.25 **THIRD PARTY BENEFICIARY.** No provisions in the Contract

Documents shall in any way inure to the benefit any third party (including the public at large or any member thereof) so as to constitute such person a third party beneficiary of the Contract, or of any term or condition or other provision of the Contract or otherwise give rise to any cause of action in any person not a party to the Agreement, except as expressly provided elsewhere in the Contract Documents.

5-1.26 **COORDINATION AND ACCESS.** The Contractor acknowledges that the City may award, or has already awarded, other construction contracts for additional work or may perform additional work with its own forces and that such work may affect the Work under this Agreement. Additionally, the Contractor acknowledges that the State and other public and private agencies may be granted a right-of-entry by the City for the purpose of constructing

facilities within and adjacent to the Work Site. It is the obligation of the Contractor to coordinate its Work with the work of others working within or adjacent to the City's property.

During performance of its Work, the Contractor shall not have exclusive access to or use of the work areas. The City may also require that certain facilities and areas be used concurrently by the Contractor and by other contractors working in the area. When two (2) or more contractors are employed on related or adjacent City work, each shall conduct its operations in such a manner as not to cause any unnecessary delay or hindrance to the other.

Each contractor shall be responsible to the other for all damage to any work, to persons or property caused to the other by its operations, and for loss caused the other due to any unnecessary delays or failure to finish the work within the time specified for completion.

If any party of the Contractor's Work depends on the work of any other contractor and/or the City for proper execution and/or results, the Contractor shall promptly notify the City of any discrepancies and/or defects in said other work that would render its work unsuitable for proper execution and/or results prior to proceeding with the Contractor's own Work. If it becomes necessary, the City will resolve coordination and access problems.

The Contractor and its representative in charge of the Work shall familiarize themselves with the City's property and Work Site, and adjacent surroundings in the vicinity of said Work, and any private or public operations on adjoining properties.

5-1.27 OCCUPANCY BY THE DEPARTMENT PRIOR TO

ACCEPTANCE. The City may at any time notify the Contractor in writing that it intends to take Beneficial Occupancy of any portion of the Work even though the Work may not be substantially complete. Unless the reason for the City's taking Beneficial Occupancy is that the Contractor has not completed the Work (or portions thereof) in accordance with the Contract

Time, the City's Beneficial Occupancy shall relieve the Contractor from its responsibility for maintenance, loss or damage to that portion of the Work for which the City has taken Beneficial Occupancy other than that resulting from the Contractor's act or omission, negligence, willful misconduct or breach of warranty.

Should the Work (or portion thereof) not be completed in accordance with the Construction Schedule within the Contract Time (as adjusted under the terms of the Contract Documents), the City shall have the right, but not the obligation, to take Beneficial Occupancy of the Work. In such event, the Contractor shall not be entitled to any additional compensation on account of said occupancy by the City, nor shall the Contractor be relieved of any of its responsibilities under the Contract Documents, including, without limitation, Contractor's obligation to complete the Work in accordance with the Construction Schedule.

Beneficial Occupancy shall not be deemed an Acceptance by the City either of the Work or of any portion thereof, nor will it relieve the Contractor of full responsibility for correcting defective Work or materials found at any time before the formal written Acceptance of the entire Contract by the Director or during the full warranty period after such Acceptance, as provided in Section 7-1.12, "Warranty," of these General Conditions.

The City's Beneficial Occupancy shall not relieve the Contractor of its responsibility to maintain all insurance and bonds required under the Contract Documents until the entire project is accepted by the City.

5-1.28 RIGHT TO OPERATE UNSATISFACTORY FACILITIES AND

EQUIPMENT. If, after Installation, the operation or use of the facilities or equipment to be furnished under this Contract proves to be unsatisfactory to the Director, the City shall have the right to operate and use such facilities or equipment until they can, without damage to the City,

be taken out of service for correction or replacement. Such period of use of the defective facilities or equipment, pending correction or replacement, shall in no way decrease the warranty period required for the acceptable corrected or replaced facilities or equipment.

5-1.29 **CONTRACTOR'S RESPONSIBILITY FOR THE WORK.** Except as otherwise provided herein, the Contractor shall have the charge and care of the Work and shall bear the risk of injury or damage to any part of the Work by the action of the elements or from any other cause whether arising from the execution or from the nonexecution of the Work until the Acceptance of the Contract by the Director. The Contractor shall rebuild, repair, restore, and make good all injuries or damages to any portion of the Work occasioned by any cause before its completion and Acceptance, and shall bear the expense thereof. In case of suspension of Work from any cause whatever, the Contractor shall be responsible for the Work and it shall also be responsible for all materials, and shall properly store them if necessary, and shall provide suitable drainage and erect temporary structures where necessary.

The Contractor will be relieved of responsibility for any injury or damage to the Work caused by the following:

- A. An earthquake in excess of a magnitude of 3.5 on the Richter Scale or a tidal wave, when the effect of such has been proclaimed a disaster or state of emergency by the Governor of the State of California or by the President of the United States, or was of such magnitude at the site of the Work as to have been sufficient to have caused a proclamation of disaster or state of emergency, had it occurred in a populated area.
- B. Occupancy and use by the Department or the public prior to the completion of the entire project.
- C. Acts of the Federal Government or the public enemy.

5-1.30 **RESPONSIBILITY FOR UTILITIES.** The Contractor shall be responsible at its own cost for any and all Work, expense or special precautions caused or required by the existence or proximity of utilities encountered in performing the Work, including without limitation, repair of any or all damage and all hand or exploratory excavation required. The Contractor is cautioned that such utilities may include communication cables or electrical cables which may be high voltage, and when working or excavating in the vicinity of such cables, or the ducts enclosing such cables, the Contractor shall undertake at its own cost any special precautions required. Suitable warning signs, barricades, and safety devices shall be erected as necessary or required.

However, if during the course of the Work the Contractor encounters utility Installations which are not shown or indicated in the Contract Documents or which are found in a location substantially different from that shown, and such utilities are not reasonably apparent from visual examination, then the Contractor shall promptly notify the Director in writing. Where necessary for the Work of the Contract, the Director shall issue a written order to the Contractor to make such adjustments, rearrangement, repair, removal, alteration, or special handling of such utility, including repair of the damaged utility. The Contractor shall perform the Work described in such written order, and compensation therefor will be made in accordance with Section 3 of these General Conditions relating to changes in the Work. Except for the items of cost specified in said Section 3, the Contractor shall receive no compensation for any other cost, damage, delay, interference, or hindrance to him or her due to the presence of such utility. If the Contractor fails to give the notice specified above and thereafter acts without instructions for the Director, then the Contractor shall be liable for any or subsequent to discovery thereof, and the Contractor shall repair and make good such damage at its own cost.

The precise location of underground facilities can only be determined by careful probing or hand digging in compliance with Article 6 of the Cal/OSHA Construction Safety Orders which states in part:

“Prior to opening an excavation, effort shall be made to determine whether underground installations, i.e., sewer, water, fuel, electric lines, etc., will be encountered, and if so, where such underground installations are located. When the excavation approaches the approximate location of such an installation, the exact location shall be determined by careful probing or hand digging, and, when it is uncovered, adequate protection shall be provided for the existing installation.” The location of known existing utilities and pipelines are shown on the Contract Drawings in their approximate locations. Some of the locations include multiple conduits. The Contractor shall exercise care in avoiding damage to those facilities which are to remain in service subsequent to the construction of the particular new facility involved and the Contractor will be held responsible for any repairs if damaged. The Contractor shall also exercise care in maintaining those pipes and facilities required for continuing operation of the existing facilities until such time as they can be abandoned. There is no guarantee that all utilities or obstructions are shown on the Contract Drawings or that the locations indicated are accurate.

The Contractor shall exercise extreme caution in working in the area adjacent to the existing pipelines and utility services. It is essential that all the existing facilities be maintained in service. Construction of the connections between the existing facilities and the new facilities shall be at times and during periods acceptable to the City. The Contractor shall advise the Director in writing of its proposed Construction Schedule for these connections at least forty-eight (48) hours in advance.

The Contractor shall uncover all piping and conduits, to a point one foot (1') below the pipe, where crossings, interferences, or connections are shown on the Contract Drawings, prior to trenching or excavating for any pipe or structures, to determine actual elevations. New pipelines shall be laid to such grade as to clear all existing facilities which are to remain in service. If the Contractor does not expose all required utilities, it shall not be entitled to additional compensation for Work necessary to avoid interferences nor for repair to damaged utilities. Excavations around underground electrical ducts and conduits shall be performed using extreme caution to prevent injury or damage to workers and to the electrical ducts or conduits.

5-1.31 **PROPERTY RIGHTS IN MATERIALS.** Nothing in the Contract shall be construed as vesting in the Contractor any right of property in the materials used after they have been attached or affixed to the Work or soil or after partial payment has been made as provided in Section 7-1.07, "Progress Payments," of these General Conditions for material delivered on the ground or stored subject to or under the control of the City and unused. All such material shall become the property of the City upon being so attached or affixed or upon payment for materials delivered on the ground or stored subject to or under the control of the City and unused, as provided in said Section 7-1.07.

5-1.32 **COURT ORDERED DELAY.** If, pursuant to court order, the Department temporarily suspends performance of all or any portion of the Work, an extension of time determined pursuant to the provisions in Section 6-1.08, "Liquidated Damages," of these General Conditions will be granted.

5-1.33 **NO PERSONAL LIABILITY.** Neither the Director, nor any other officer or authorized employee of the City, shall be personally responsible for any liability arising under or by virtue of the Contract.

5-1.34 **RIGHTS IN LAND AND IMPROVEMENTS.** The Contractor shall make no arrangements with any person or entity to permit occupancy or use of any land, structure or building within the limits of the Work, for any purpose whatsoever, either with or without compensation, in conflict with any agreement between the City and any third party owner, former owner, or tenant of such land, structure or buildings. The Contractor shall not occupy City-owned property outside the limit of the Work shown on the Contract Drawings unless it obtains prior approval.

5-1.35 **ANTITRUST CLAIMS.** The Contractor's attention is directed to the following provision of Public Contract Code Section 7103.5(b), which is applicable to the Contractor and its Subcontractors:

“ In entering into a public works contract or a subcontract to supply goods, services, or materials pursuant to a public works contract, the contractor or subcontractor offers and agrees to assign to the awarding body all rights, title, and interest in and to all causes of action it may have under Section 4 of the Clayton Act (15 U.S.C. Sec. 15) or under the Cartwright Act (Chapter 2 [commencing with Section 16700] of Part 2 of Division 7 of the Business and Professions Code), arising from purchases of goods, services, or materials pursuant to the public works contract or the subcontract. This assignment shall be made and become effective at the time the awarding body tenders final payment to the contractor, without further acknowledgement by the parties.”

5-1.36 **RIGHTS TO DRAWINGS, TECHNICAL DATA PATENTS.** Shop

Drawings and Working Drawings submitted to the City by the Contractor, Subcontractor or any lower tier Subcontractor pursuant to the Agreement, are the property of the City and the City may use, and disclose in any manner and for any purpose, Shop Drawings and Working Drawings delivered under the Contract.

Technical Data including manuals or instructional materials, computer or microprocessor software which are delivered or submitted to the City by the Contractor, Subcontractor, or any lower tier Subcontract pursuant to the Contract are the property of the City, and the City may use or disclose same in any manner and for any purpose.

The Contractor shall assume all costs arising from the use of patented materials, equipment, devices, or processes used on or incorporated in the Work, and shall defend, indemnify and save and hold harmless the City, and its duly authorized representatives, from all suits at law, or in equity, and actions of every nature for, or on account of the use of any patented materials, equipment, devices or processes. In case some materials, equipment, devices or processes are held to constitute an infringement and their use enjoined, the Contractor, at its expense, shall:

1. Secure for the City the right to continue using said materials, equipment, devices or processes by suspension of the injunction or by procuring a license or licenses; or
2. Replace such materials, equipment, devices, processes; or
3. Modify them so that they become non-infringing or remove the enjoined materials, equipment, devices or processes and refund the sums paid therefor without prejudice to any other rights of the City.

5-1.37 **PAYMENT OF TAXES.** Contractor shall pay all taxes and duties applicable to and assessable against any Work, equipment, materials, services, processes, and

operations incidental to or involved in the Agreement, including but not limited to, retail sales and use, transportation, export, import, business, and special taxes. The Contractor is responsible for ascertaining and acquainting itself with such taxes and making all necessary arrangements to pay them. The Contractor will maintain records that are auditable records, and these records shall be subject to the City's review to verify that Contractor's tax payments are current at all times.

The Contract Price paid for the Work shall include full compensation for all taxes which the Contractor is required to pay, whether imposed by Federal, State or local government, including, without being limited to, Federal excise tax. No tax exemption certificate nor any document designed to exempt the Contractor from payment of any tax will be furnished to the Contractor by the Department, as to any tax on labor, services, materials, transportation, or any other items furnished pursuant to the Contract.

The Contractor shall withhold and pay any and all sales and use taxes, withholding taxes, whether Federal, State, or local, Social Security taxes, State Unemployment Insurance charges and all other taxes which are now or hereafter may be required to be paid or withheld under any laws.

5-1.38 **GRATUITIES AND CONFLICT OF INTEREST.** The Contractor shall not offer or provide gratuities in the form of gifts, entertainment, loans, meals, rewards, and/or services to representatives of the City, including but not limited to, officers, employees, agents, Engineering Service Consultants, Consulting Engineers and Architects, Inspectors and/or Testing Agencies retained by the City. If it is found that the Contractor has violated this provision, the Contract may be subject to termination for default as defined elsewhere in these General Conditions.

During the term of the Contract and until the final payment has been made to the Contractor, the Contractor shall not employ or compensate in any manner whatsoever, the City's officers, employees and authorized representatives, agents, and any Engineering Service Consultants, Consulting Engineers and Architects, Inspectors, and/or Testing Agencies retained by the City. Any exception to the employment or compensation to any of the above named parties must be made in writing by the City. If the Contractor offers or provides employment or compensation to those named above during the term of the Contract, the Contract may be subject to termination for default.

5-1.39 **COOPERATION.** Should construction be under way by City forces or other forces or by other Contractors within or adjacent to the limits of the Work or should Work of any other nature be under way by such forces within or adjacent to said limits, the Contractor shall cooperate with all such forces to the end that any delay, interference or hindrance to their Work will be avoided. The right is reserved to perform other or additional Work at or near the site at any time, by the use of such forces.

5-1.40 **DIGGING TRENCHES OR OTHER EXCAVATIONS.** In the event any work involves digging trenches or other excavations that extend deeper than four feet (4') below the surface, City and Contractor shall comply with the following:

A. The Contractor shall promptly, and before the following conditions are disturbed, notify City in writing of any:

1. Material that the Contractor believes may be material that is hazardous waste, as defined in Section 25117 of the Health and Safety Code, that is required to be removed to a Class I, Class II, or Class III disposal site in accordance with provisions of existing law.

2. Subsurface or latent physical conditions at the site differing from those made available to Contractor for inspection as provided in the project proposal.

3. Unknown physical conditions at the site of any unusual nature, different materially from those ordinarily encountered and generally recognized as inherent in Work of the character provided for in the Contract.

B. The City shall promptly investigate the conditions, and if it finds that the conditions do materially so differ, or do involve hazardous waste, and cause a decrease or increase in the Contractor's cost of, or the time required for, performance of any part of the Work shall issue a Change Order under the procedures described in the Contract.

C. In the event that a dispute arises between the City and the Contractor whether the conditions materially differ, or involve hazardous waste, or cause a decrease or increase in the Contractor's cost of, or time required for, performance of any part of the Work, the Contractor shall not be excused from any scheduled completion date provided for by the Contract, but shall proceed with all work to be performed under the Contract. The Contractor shall retain any and all rights provided either by contract or by law which pertain to the resolution of disputes and protests between the contracting parties. However, no claim of the Contractor under this clause shall be allowed unless the Contractor has given the notice required by this Section. No claim by the Contractor for an equitable adjustment hereunder shall be allowed if asserted after final payment under this Contract.

5-1.41 **CONTRACTOR REGISTRATION.** No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this Contract, the

Contractor and its subcontractors shall have a continuing legal obligation to maintain current

registration with the Department of Industrial Relations. The Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

5-1.42 **CITY OF ROSEVILLE ENCROACHMENT PERMITS AND**

RIGHTS-OF-WAY. The Contractor need not obtain a separate encroachment permit from the City prior to construction within street rights-of-way or other City rights-of-way. Execution of the Contract by the City shall be deemed an encroachment permit for work required by the Contract within rights-of-way. All work shall conform to the rules and regulations of encroachment permits and shall be subject to the inspection and approval of the Director and City Engineer.

To the extent indicated in the Contract Drawings, the City will provide the rights-of-way over private lands or the site to enable the Contractor to perform its work. The Contractor shall be solely responsible for securing any additional rights-of-way desired by the Contractor. The City will not be a party to nor assume any liability for any separate agreements reached between the Contractor and any third parties with respect to these additional rights-of-way. The Contractor shall procure evidence that agreements are in place with said third parties before the Contractor uses those areas covered by the agreements. Any damage to such private lands caused by the Contractor's operations shall be the sole responsibility of the Contractor.

SECTION 6 PROSECUTION AND PROGRESS

6-1.01 **SUBLETTING AND SUBCONTRACTING.** The Contractor shall be responsible for all Work performed under the Contract. The Contractor shall give its personal attention to the fulfillment of the Contract and shall keep the Work under its control. Nothing in the Contract Documents shall create any contractual relationship between the City and any Subcontractor. The Contractor is fully responsible to the City for the acts and omissions of its Subcontractors of any tier. When any Subcontractor fails to prosecute a portion of the Work in a manner satisfactory to the Director, that Subcontractor shall not again be employed on the Work. Although the sections of the Contract may be arranged according to various trades, or general grouping of the Work, the Contractor is not obligated to sublet the Work in such manner. The Director will not arbitrate disputes among Subcontractors or between Contractor and one or more Subcontractors concerning responsibility for performing any part of the Work.

The on-site production of materials produced by other than the Contractor's own forces shall be considered as subcontracted. The erection, establishment or reopening of on-site plants for production of materials and the operation thereof in the production of materials for use on the Work shall conform to the requirements relating to labor set forth in the Contract Documents.

The Contractor shall also be responsible for coordinating the Work performed by Subcontractors and Suppliers.

The Contractor shall not substitute any person as Subcontractor in place of a Subcontractor listed on its bid proposal without the written approval of the Director. Substitutions must be in accordance with the provisions of the "Subletting and Subcontracting

Fair Practices Act” beginning with Public Contract Code Section 4100. Violations of this Act by the Contractor may subject it to penalties which may include cancellation of Contract, Assessment of ten percent (10%) of the Subcontractor's bid, and disciplinary action by the Contractors State License Board.

The Contractor shall pay any Subcontractors approved by the City for work that has been satisfactorily performed no later than seven (7) Days from the date of Contractor’s receipt of progress payments by the City. Within seven (7) Days after receipt from the City of funds attributable to work performed by a Subcontractor, Contractor shall release any retainage payments withheld to the Subcontractor. In the event Contractor does not make progress payments or release retention to Subcontractors in accordance with the time period specified herein, Contractor may be subject to prompt payment penalties per statute.

6-1.02 **ASSIGNMENT.** The performance of this Contract may not be assigned, except upon the written consent of the City Council of the City of Roseville. Consent will not be given to any proposed assignment which would relieve the original Contractor or its surety of their responsibilities under the Contract nor will the City consent to any assignment of a part of the Work under the Contract.

The Contractor may assign moneys due or to become due to it under the Contract and such assignment will be recognized by the City, if given proper notice thereof, to the extent permitted by law, but any assignment of moneys shall be subject to all proper set-offs in favor of the City and to all deductions provided for in the Contract and particularly all money withheld, whether assigned or not, shall be subject to being used by the City for the completion of the Work in the event that the Contractor should be in default therein.

6-1.03 **BEGINNING OF WORK.** After the execution of the Contract by both

parties, the City will issue the Notice to Proceed upon its determination that it is appropriate for the Contract Time to commence.

The Contractor shall begin Work within fifteen (15) Days after receiving the Notice to Proceed from the Director, subject to the requirements stated elsewhere in the Contract Documents regarding, among other things, the submittal of Baseline Schedule, and shall diligently prosecute the same to completion within the time limit provided in the Supplemental Conditions. Contractor shall also achieve any and all Contract milestones as described elsewhere in the Contract Documents.

The Contractor shall notify the Director, in writing, of its intent to begin Work at least seventy-two (72) hours before Work is begun. The notice shall be delivered to the Director and shall specify the date the Contractor intends to start. If the project has more than one (1) location of Work, a separate notice shall be given for each location.

The Contractor is not authorized to perform any Work until it has received a Notice to Proceed from the City. Should the Contractor begin Work in advance of receiving notice that the Contract has been approved as above provided, any Work performed by it in advance of the said date of approval shall be considered as having been done by the Contractor at its own risk and as a volunteer unless said Contract is so approved thereafter.

6-1.04 **PROGRESS SCHEDULE.**

A. Preliminary Progress Schedule. The Contractor shall submit to the Director, within twenty (20) Days after date of the Notice to Proceed, a Preliminary Progress Schedule covering the Contractor's activities over the first three (3) months of operation in detail and the remainder of the project in summary. The Preliminary Progress Schedule shall schedule the project within the Contract Time for completion of the Work, and shall be subject to

favorable review by the Director.

B. CPM Schedule. The Contractor shall submit an acceptable Critical Path

Method (CPM) Schedule to the Director within thirty (30) Days after the receipt of the Notice to Proceed. Subsequent revisions to said schedule shall be submitted as set forth hereinafter. The requirement for the CPM schedule is included to allow for adequate planning and execution of the Work, to determine the critical nature of delays, and to assist the Director in appraising the reasonableness of the proposed schedule and evaluating progress of the Work. The CPM schedule submitted under this Section shall utilize a CPM format, either the precedence or arrow diagramming method. The definitions of CPM terms and functions shall be as provided in the Associated General Contractors of America book *CPM in Construction, A Manual for General Contractors*, or a favorably reviewed alternative publication or reference. No progress payment will be made prior to submission and acceptance of the CPM Schedule.

1. The CPM schedule system shall consist of diagrams and accompanying mathematical analyses. The diagrams shall show elements of the project in detail and an entire project summary. Diagrams shall show the order and interdependence of activities and sequence in which the Work is to be accomplished as planned by the Contractor. The basic concept of a network analysis diagram shall be followed to show how the start of a given activity is dependent on the completion of preceding activities and its completion restricts the start of following activities. Detailed network activities shall include, in addition to construction activities, the submittal and favorable review of samples of material and Shop Drawings, the procurement of critical materials and equipment, fabrication of special material and equipment, and their Installation and testing. All activities of the City and the Director that affect progress and required Contract dates for completion of all or parts of the Work shall be shown. The

selection and number of activities shall be subject to favorable review by the Director. Summary networks shall be time scaled. Durations shall be in Days and shall not exceed fifteen (15) Days, except for submittal and delivery items. Where the duration of continuous Work exceeds fifteen (15) Days, Work items in the Construction Schedule shall be subdivided by location, approximate stationing or other sub-element of the Work.

The graphic network diagram shall include for each activity, the description, activity number, the estimated duration in Days, and all activity relationship lines. The network diagram shall be drawn for the early start of activities. All significant Submittals shall be scheduled along with manual Submittals and training on all large or critical pieces of equipment. If the precedence technique is utilized, the schedule project shall include a calendar in Work Days, a network report sorted by early start and a logic table report sorted by preceding Work item. If the arrow technique is utilized, the schedule report shall include a calendar in Work Days, a network report sorted by early start, a network report sorted by I-J numbers, and a network sorted by slack time and I-J numbers.

2. The critical path shall be shown on all reports and on the graphic network diagram. The activities which constitute the critical path shall be identified.

3. The mathematical analysis of the network diagram shall include a tabulation of each activity. The following information shall be furnished as a minimum for each activity:

- (a) preceding and following event numbers
- (b) activity description and number
- (c) estimated duration of activities
- (d) earliest start date (by calendar date)

- (e) earliest finish date (by calendar date)
- (f) actual start date (by calendar date)
- (g) actual finish date (by calendar date)
- (h) latest start date (by calendar date)
- (i) latest finish date (by calendar date)
- (j) slack or float
- (k) percentage of activity completed

4. The program shall be capable of accepting revised completion dates as modified by approved time adjustments and recomputations of all tabulation dates and float accordingly.

5. Submission and review of the system shall be as follows:

(a) The complete network analysis system, consisting of the detailed network mathematical analysis and network diagrams, shall be submitted within thirty (30) Days after receipt of the Notice to Proceed.

(b) The Contractor shall participate in a review and evaluation of the proposed network diagrams and analysis by the Director. Any revisions necessary as a result of this review shall be resubmitted for review by the Director within ten (10) Days. When completed, the favorably reviewed schedule shall then be the schedule to be used by the Contractor for planning, organizing and directing the Work and for reporting progress. If the Contractor thereafter desires to make significant changes in its method of operating and scheduling, the Contractor shall notify the Director in writing stating the reasons for the change.

(c) The Contractor shall submit at monthly intervals a report

of the actual construction progress. Each monthly report shall cover a period of approximately thirty

(30) Days ending around the 20th of each month. The monthly reports shall be submitted within ten (10) Days of the end of the reporting period.

(1) If the project is proceeding on schedule, the monthly update report may consist of a marked-up copy of the graphical network diagram. This submittal shall clearly indicate the status of any minor shifts in sequence or schedule and the estimated completion date or percent complete of all activities currently in progress. The Contract completion date shall also be indicated. The Contractor shall submit a narrative report relating to status of construction, the schedule, and factors which may affect the remainder of the schedule. The report shall show the activities or portions of activities completed during the reporting period. The report shall state the percentage of the Work actually completed and scheduled as of the report date and the progress along the critical path in terms of Days ahead or behind the allowable dates.

(2) If, in the opinion of the Director, the project is behind schedule, the monthly report shall include a revised network diagram and/or mathematical analysis showing the Contractor's proposed revised schedule. An analysis of the effect that the delay has on progress along other paths shall also be included in the report. The Contractor shall also submit a narrative report with each updated analysis which shall include but not be limited to a description of current and anticipated problem areas, delaying factors and their impact, and an explanation of corrective actions taken or proposed.

(3) Periodic report shall be submitted in sufficient copies to cover Contractor needs plus five (5) copies and an available electronic copy to be retained by the Director.

6. To the extent that the favorably reviewed initial Construction Schedule, or revisions thereto, indicate anything not jointly agreed upon, it shall be deemed to be not favorably reviewed by the Director. Any omission of Work from the detailed schedule, otherwise required for Contract compliance, will not excuse the Contractor from completing such Work within any applicable completion date. The CPM schedule shall be generated by computer methods.

C. Schedule Review. Once each month, on a date mutually agreed upon, but no later than seven (7) business days after the monthly schedule progress report date, a Work Site meeting will be held to review the Construction Schedule and job progress. The Contractor shall also attend weekly meetings scheduled by the Director to review the progress of the Work in the preceding week and in the subsequent week, coordinate the Work with public agencies or other Contractors as required, and allow the Director to plan his or her activities for testing, inspection, etc.

D. Schedule Revisions. The conditions under which the Director will require revisions of the Construction Schedule include the following:

1. When delay in completion of any Work item or sequence of Work items results in an estimated extension of project completion by either twenty (20) business days or by ten percent (10%) of the remaining duration of time to complete the Contract, whichever is less.

2. When delays in Submittals or deliveries make replanning or rescheduling of the Work necessary.

3. When the schedule does not represent actual prosecution and

progress of the Work.

4. When any change to the sequence of activities, the completion date for major portions of the Work, or when changes occur which affect the critical path.

5. When Contract Amendments or a Change Order necessitates schedule revision, the Contractor shall submit a schedule analysis of all Change Order Work with its proposal.

E. Cash Flow Projection. A cash flow projection shall be submitted with the Construction Schedule. This cash flow projection shall be revised and resubmitted when revisions of the Construction Schedule will result in changes to the projected cash flow.

F. Schedules showing project completion dates earlier than specified in the Supplemental Conditions will be rejected unless justification can be provided for early completion.

6-1.05 **SCHEDULE OF VALUES.** Prior to preparation of the first estimate for a progress payment, the Contractor shall submit for favorable review by the Director a detailed Schedule of Values or cost breakdown of the Work under each bid item awarded. The breakdown will then become the basis for partial payment determination. Elements of Work shall be grouped by structure, pipeline, system, etc. Within each grouping, Work should be itemized by readily measurable quantities of Work complete in place. For example, concrete should be in units of cubic yards including form Work and reinforcing steel. Move-on costs, bond and insurance costs, and Overhead costs shall not be considered an item of cost for this purpose but shall be prorated over items of Work. In the event the Schedule of Values is not favorably reviewed by the Director, another Schedule of Values shall be submitted that is mutually acceptable to the Contractor and the Director.

6-1.06 **CITY'S RIGHT TO STOP WORK.** The Director shall have the

authority to order the Contractor, in writing, to suspend the Work wholly or in part, for such period as the Director may deem necessary due to the failure on the part of the Contractor to correct Work that is not in accordance with the requirements of the Contract Documents or if Contractor persistently fails to carry out Work in accordance with the Contract Documents.

The Contractor shall immediately comply with the written order of the Director to suspend the Work wholly or in part. The suspended Work shall be resumed when conditions are favorable and methods are corrected, as ordered or approved in writing by the Director.

Any stoppage of work under this section shall be at the Contractor's sole expense, and the Contractor shall have no claim against the City based on the Contractor's failure to perform the Work in accordance with the Contract Documents.

In addition to the City's right to stop Work, the City may order the Contractor to submit to the City at no additional cost to the City, additional information concerning Contractor's planned Work if the Contractor fails to promptly correct Work that is not in accordance with the requirements of the Contract Documents or persistently fails to carry out Work in accordance with the Contract Documents. The additional information ordered by the City may include, but is not limited to, preparation of Submittals or Working Drawings not otherwise required to be submitted under the Contract Documents.

In the event the City discovers that the Contractor has created an unsafe condition the City may arrange for other work forces to remedy the condition. Such remedial work shall be at the sole discretion of the City. If this action is required, the City may unilaterally terminate Work under the Contract, and will pay only for the quantities of Work actually performed, less the cost of the City's remedial Work. In the event that Work is not halted, the Contractor must take immediate steps to correct the situation. There will be no extra payment for Work required

to correct unsafe conditions.

The right of the City to suspend the Work shall not give rise to a duty on the part of the City to exercise this right for the benefit of the Contractor or any other person or entity. This right shall be in addition to and not in restriction or derogation of the City's other rights under the Contract Documents.

In the event of a suspension of Work under any of the conditions set forth in this Section 6-1.06, such suspension of Work shall not relieve the Contractor of its legal responsibilities as set forth in these General Conditions.

6-1.07 **TIME OF COMPLETION.** The Contractor shall complete the entire Work, including Installation, repairs, startup, troubleshooting, painting, and touchup, training, submittal or record drawings, and manuals, cleanup, demobilization, and all other Work within the number of Days set forth in the Supplemental Conditions. The time for completion includes an allowance for working time lost due to normal inclement weather.

Extensions of time may be allowed for unusual inclement weather under the provisions hereinafter described. Unusual inclement weather is weather which adversely affects "controlling" operations or the critical path of construction and which meets one of the following criteria:

A. For the particular calendar month in question, the number of individual Days with rainfall exceeding 0.10 inches exceeds the average number of such Days for that month over the immediately preceding five (5) years of record by at least three (3) Days.

B. For the particular calendar month in question, the total cumulative rainfall for that month exceeds the average cumulative rainfall for that month over the immediately preceding five (5) years of record by at least two inches (2").

Rainfall shall be measured at a publicly operated, maintained, and reported station in reasonable proximity to the construction site. A claim for delay shall indicate the period of rainfall which is claimed as “unusual,” the specific dates during which the unusual rainfall and subsequent wet soil conditions prevented Work, and the specific critical path tasks adversely affected by such unusual weather. A claim for delay due to unusual inclement weather shall be filed within ten (10) Days of the apparent end of the unusual inclement rainfall period, whether or not the monthly totals are available at that time. The burden of proof that weather meets the criteria for unusual weather shall be solely the responsibility of the Contractor.

It is the responsibility of the Contractor to order materials required for the Work properly and promptly on a Notice to Proceed. If evidence presented demonstrates that, in spite of the Contractor's efforts, government-established priorities controls delay material deliveries, suitable extension of time will be made.

If performance of extra Work ordered by the City or failure of the City to provide the necessary site for Installation affects construction tasks which are “controlling” or which are on the “critical path” of the Construction Schedule, suitable extensions of time will be made.

The Contractor shall not be entitled to a time extension for delays in activities on non-critical paths of the favorably reviewed schedule unless the duration of the excusable delay exceeds the total float of the activities being delayed. If the duration of an excusable delay does exceed the total float of the activities affected by the delay, the Contractor shall be entitled to an extension equal to the difference.

C. Determination that a day is a non-working day by reason of inclement weather or conditions resulting immediately therefrom, shall be made by the Director.

6-1.08 **LIQUIDATED DAMAGES.** It is agreed by the parties to the Contract

that in case all the Work called for under the Contract in all parts and requirements is not completed within the number of Days as set forth in the Supplemental Conditions, damage will be sustained by the City and that it is and will be impracticable and extremely difficult to ascertain and determine the actual damage which the City will sustain in the event of and by reason of such delay; and it is therefore agreed that the Contractor will pay to the City, the monetary amount indicated in the Supplemental Conditions in dollars (U.S.) per day for each and every calendar day of delay in completing the Work in excess of the number of Days prescribed and the number of additional calendar days, if any, authorized by Contract Change Order; and the Contractor agrees to pay said Liquidated Damages herein provided for, and further agrees that the City may deduct the amount thereof from any moneys due or that may become due the Contractor under the Contract.

It is further agreed that in case the Work is not finished and completed in all parts and requirements within the number of Days specified, the City shall have the right to increase the number of Days or not, as it may deem best to serve the interest of the City, and if it decides to increase the said number of Days, it shall further have the right to charge to the Contractor, its heirs, assigns or sureties and to deduct from the final payment for the Work all of any part, as it may deem proper, of the actual cost of engineering, inspection, superintendence, and other Overhead expenses which are directly chargeable to the Contract, and which accrue during the period of such extension, except that cost of preparation of final statement shall not be included in such charges.

6-1.09 **DELAYS AND EXTENSIONS TO THE WORK.** The Contractor must complete all Work within the time specified in the Agreement. The Contractor will be granted an extension of time and will not be assessed with liquidated damages or the cost of engineering

and inspection for any delay in substantially completing the Work (or parts thereof) beyond the time set forth in the Agreement, provided that such delay was caused by unforeseeable causes beyond the control and without the fault or negligence of the Contractor. Examples of such causes include acts of public enemy, fire, floods, abnormal weather (as described below), earthquakes, epidemics, quarantine restrictions, strikes, labor disputes and freight embargoes, fire, changes made pursuant to the provisions of “Changes in the Work” under Section 3 of these General Conditions or acts or neglect of the City not contemplated by the Contract Documents. In all cases, any extension of time is conditioned on the following:

1. That the cause is not due to the fault or negligence of the Contractor, and the Contractor has taken reasonable precautions to prevent and minimize the effects thereof; and
2. That the Contractor notifies the Director in writing within three (3) Days from the beginning of such delay specifying the nature of the delay and the measures that have been or will be taken to prevent or minimize the delay. Failure to submit written notice within this time period shall constitute an absolute waiver of any claim for a time extension.

No extension of time will be granted for a delay caused by a shortage of materials, unless the Contractor furnishes to the City documentary proof that it has diligently made every effort to obtain such materials from all known sources within reasonable reach of the work and further proof, as acceptable to the Director, that the inability to obtain such materials when originally planned did in fact cause a delay in Final Completion of the entire Work which could not be compensated for by revising the sequence of the Contractor’s operations. Only the physical shortage of material will be considered as a cause for extension of time, and no consideration

will be given to any claim that material could not be obtained at a reasonable, practical or economical cost or price, unless it is shown to the satisfaction of the City that such material could have been obtained only at exorbitant prices entirely out of line with current rates, taking into account the quantities involved and the usual practices in obtaining such quantities.

No extension of time will be granted for a delay caused by Contractor's staff turnovers, understaffing or insufficient quantity of qualified staff able to perform the necessary work.

The term "shortage of materials," as used in this section, shall apply only to materials, articles, parts or equipment which are standard items and shall not apply to materials, parts, articles or equipment which are processed, made, constructed, fabricated or manufactured to meet the specific requirements of the Contract Documents.

No extensions of time will be granted for delays that have no measureable impact on the completion of the Work (or parts thereof) under the Contract Documents. When extensions of time are granted, they will be limited to the period equivalent to the actual number of Days lost on the critical path or controlling operations of the Construction Schedule, taking into account the extent to which that delay could be decreased by reasonable mitigation measures by the Contractor. All requests for extensions of time must be supported with a critical path analysis showing the critical path and impacts to it. Contractor's failure to submit this analysis will be sufficient cause for denial of any request for a time extension.

Within a reasonable period of time after the Contractor submits the notice and information required by this section, the City will determine whether an extension of time is justified and, if so, the number of days for the extension.

Abnormal weather may be a valid basis for a time extension under the Agreement. "Abnormal Weather" occurs when the number of days of rain above 0.5 inches in a 24 hour

period exceeds the average for such rainfall in a particular month as determined by the National Weather Service. The Contractor will only be entitled to, at most, a time extension for the number of days of rain exceeding the average for that month in the locale where the Work is to be performed. If delays are caused by the Contractor or those for whom the Contractor is responsible, the Contractor will only be entitled to, at most, a time extension for the number of rain days exceeding the average for the month when the Work should have been performed.

In addition, before a time extension may be granted for abnormal weather, the Contractor must establish that the rain either significantly impacted at least sixty percent (60%) of the planned work of the controlling operations for a particular day or prohibited at least five (5) hours of work on the controlling operations planned for that day. Contractor shall employ reasonably methods to mitigate the impact of abnormal weather (i.e., dewatering, protection of site, etc.) The occurrence of rain during non-work hours or having minimal impact to work on the controlling operation shall not constitute a day of abnormal weather.

In the event that the project experiences favorable weather for a particular month (e.g., the number of actual rain days in a month less than that indicated above for allowable rain days per months), the additional float resulting from such favorable weather shall accrue to the project.

Any Contractor claim for damages or additional compensation based on delay shall be limited to only those circumstances where the Contractor has fulfilled each of the following three (3) requirements:

1. Contractor has established its entitlement to a time extension pursuant to the provisions described above regarding delay and extensions to the Work.
2. The delay was caused solely by the City's issuance of changes made pursuant to the

provisions of “Changes in the Work” under Section 3 of these General Conditions or by acts or neglect of the City.

3. The delay was unreasonable under the circumstances and not within the contemplation of the parties.

It is expressly understood and agreed that delays caused by the City will be non-compensable when there are concurrent delays caused by the Contractor. Also, the Contractor shall have no entitlement to additional compensation for any delay where there have been concurrent delays caused by non-compensable delays, including, but not limited to, fire, floods, earthquakes, epidemics, quarantine restrictions, strikes, labor disputes, and freight embargoes.

Contractor’s damages and/or additional compensation for delays will consist solely of the extended costs of maintaining the Contractor’s Work Site presence. The Contractor will not be entitled to any extended home office overhead.

Compensation for idle time of equipment will be determined in the same manner as determinations are made for equipment used in the performance of extra work paid for on a Force Account basis with the following exceptions:

1. The time for which compensation will be paid will be the actual normal working hours during which such delay conditions exists, but in no case will exceed eight (8) hours in any one day.
2. The days for which compensation will be paid will be each calendar day of the work week (defined elsewhere in the Contract Documents) and Legal Holidays, during the existence of such delay, except that when rental of the equipment is paid for under the provisions in Section 3-1.06C, “Force Account Payment – Equipment,” of these General Conditions, no payment will be made for delays in accordance with the

provisions of this section.

Actual loss shall be understood to include no items of expense other than idle time of personnel, cost of extra moving of equipment, and cost of longer hauls. Compensation for idle time of equipment will be determined as provided in this section and compensation for idle time of personnel will be determined pursuant to Section 3-1.06A, "Force Account Payment – Labor," of these General Conditions. No markup will be added in either case for Overhead and profit. The cost of extra moving of equipment and the cost of longer hauls will be paid for as extra work as provided pursuant to "Changes to the Work" elsewhere in the Contract Documents.

6-1.10 **TERMINATION.**

6-1.10A **TERMINATION OF AGREEMENT – CONVENIENCE OF**

CITY. The Department reserves the right to terminate the Contract at any time and for any reason if the Director determines that to do so would be in the best interest of the City. Any termination which is not based on the circumstances set forth in Section 6.1-10B below shall be effected by delivery to the Contractor of a Notice of Termination specifying the extent to which performance of Work under the Contract is terminated, and the date upon which such termination becomes effective.

Upon the Contractor's receipt of a written Notice of Termination for convenience, the Contractor shall cease Work as to those portions of the project so terminated and shall undertake the steps outlined in Section 6-1.10B below.

1. Acceptance of the Contract as hereinafter specified shall not relieve the Contractor of responsibility for damage to materials except as follows:
 - a. The Contractor's responsibility for damage to materials for which partial payment has been made as provided in Section 7-1.07, "Progress

Payments,” of these General Conditions and for materials furnished by the City for use in the Work and unused shall terminate when the Director certifies that such materials have been stored in the manner and at the locations he or she has directed.

- b. The Contractor's responsibility for damage to materials purchased by the City subsequent to the issuance of the notice that the Contract is to be terminated shall terminate when title and delivery of such materials has been taken by the City.
- c. When the Director determines that the Contractor has completed the Work under the Contract directed to be completed prior to termination and such other Work as may have been ordered to secure the project for termination, the Contractor will recommend that the City formally accept the Work, and immediately upon and after such Acceptance by the City, the Contractor will not be required to perform any further Work thereon and shall be relieved of its contractual responsibilities for injury to persons or damage to property which occurs after the formal Acceptance of the project by the City.

2. The total compensation to be paid to the Contractor shall be determined by the Director on the basis of the following:

- a. The reasonable cost to the Contractor, without profit, for all Work performed under the Contract, including mobilization, demobilization and Work done to secure the project for termination. Reasonable cost will include a reasonable allowance for project Overhead and general

administrative Overhead not to exceed a total of seven percent (7%) of Direct Costs of such Work.

- b. A reasonable allowance for profit on the cost of the Work performed as determined under subsection (a), provided the Contractor establishes to the satisfaction of the Director that it is reasonably probable that it would have made a profit had the Contract be completed and provided further, that the profit allowed shall in no event exceed four percent (4%) of said cost.
- c. The reasonable cost to the Contractor of handling material returned to the vendor, delivered to the Department or otherwise disposed of as directed by the Director.
- d. A reasonable allowance for the Contractor's administrative costs in determining the amount payable due to termination of the Contract.

All records of the Contractor and the Contractor's Subcontractors, necessary to determine compensation in accordance with this Section, shall be open to inspection or audit by representatives of the Department at all times after issuance of the notice that the Contract is to be terminated and for a period of three (3) years, and such records shall be retained for that period.

After Acceptance of the Work by the Director, the Director may make payments on the basis of interim estimates pending issuance of the Final Statement, when in his or her opinion the amount thus paid, together with all amounts previously paid or allowed, will not result in total compensation in excess of that to which the Contractor will be entitled. All payments, including payment upon the Final Statement, shall be subject to deduction for prior payments and amounts, if any, to be kept or retained under the provisions of the Contract.

In the event that the City terminates this Contract under Section 6-1.10B below and it is determined for any reason that there was not sufficient cause to do so, the City's termination automatically will convert to a termination for convenience under this section and the terms and conditions outlined in this section automatically will be applied to effectuate the Contract termination. Thus, damages to which a Contractor may be entitled as a result of an improper default termination will be limited to the amounts provided for in this section.

The provisions of this section shall be included in all subcontracts.

6-1.10B **TERMINATION OF AGREEMENT - FOR CAUSE.** An

“Event of Default” as referred to in this section shall occur if the Contractor:

1. Fails to maintain progress of the Work in accordance with the requirements of the Contract Documents; or
2. Fails to prosecute the Work or any of its components in accordance with the Contract Documents; or
3. Persistently or repeatedly fails or refuses to supply sufficient properly skilled workers or proper material to permit the performance of the Work in accordance with the Contract Documents; or
4. Fails to make prompt payment to Subcontractors or Suppliers in accordance with the respective agreements between the Contractor and the Subcontractor and Contractor and Supplier; or
5. Fails to comply with applicable laws, ordinances or rules, regulations or orders of a public authority having jurisdiction over the Work; or
6. Abandons, assigns or sublets the Contract without approval of the City; or
7. Becomes bankrupt or is subject to appointment of a receiver on behalf of the

Contractor; or

8. Otherwise is guilty of a substantial breach of a provision of the Contract Documents.

Upon the City's reasonable belief that there has been an Event of Default by the Contractor, the City may elect to give the Contractor written notice thereof. The Contractor thereafter shall cure the default as soon as possible and in no event after ten (10) Days from the Contractor's receipt of the City's written notice.

If the Contractor does not timely cure its default, the City may, without waiver of any of its other rights and remedies, elect to terminate the Contract, or portion thereof.

Upon the City's election to terminate the Contract, or portion thereof, the City shall have the right to complete the Work, or portion involved, by whatever means and methods it deems expedient, including the hiring of others on such terms as the City deems advisable. The City shall have the right to take possession of the Contractor's materials, plant, tools, equipment and property of any kind provided by or on behalf of the Contractor for the purpose of the Work, or a portion of them, without being responsible to the Contractor for wear and tear. The Contractor shall have no rights in such property during its use by the City. The City shall not be required to obtain the lowest prices for completing the Work or a portion of it but shall make such expenditures as, in the City's sole judgment, best accomplish such completion.

The expense of completing such Work or portion thereof, together with a reasonable charge for engineering, managerial and administrative services, as certified by the City, shall be charged to the Contractor, and the expense so charged shall be deducted by the City out of such monies as may be due or may at any time thereafter become due to the Contractor. In case such expense is more than the sum which otherwise would have been payable to the Contractor under the Agreement, then the Contractor or its surety or sureties shall promptly pay the amount of

such excess so due. When the City terminates the Contract under this section, the Contractor shall not be entitled to receive any further payments until the Work is completed and there has been a final settlement of costs of completing the Work covered by such notice of default.

The City will issue to the Contractor a written notice specifying that the Contract, or portion thereof, is terminated. Upon receipt of said written notice and, except as otherwise directed in writing by the City, the Contractor shall:

1. Stop all Work under the Contract; or if partial termination, stop Work relating to the terminated portion of the Agreement;
2. Perform Work the City deems necessary to secure the Work Site for termination including measures to leave the Work Site in a safe condition;
3. Remove equipment from the site of Work, as specified by the City;
4. Take such action as is reasonably necessary to protect materials from damage;
5. Notify all Subcontractors and Suppliers that the Contract or portion thereof is being terminated and that their contracts or orders are not to be further performed unless otherwise authorized in writing by the City;
6. Provide the City with an inventory list of all materials previously produced, purchased or ordered from Suppliers for use in the Work and not yet used in the Work, including its storage location, and such other information as the City may request;
7. Dispose of materials not used in the Work as directed by the Director. It shall be the Contractor's responsibility to provide the City (a) with good title to all materials purchased by the City hereunder, including materials for which partial payment has been made by the City and (b) with bills of sale or other documents of title for such

materials;

8. Subject to the prior written approval of the City, settle all outstanding liabilities and all claims arising out of Subcontractors or orders for materials terminated hereunder. To the extent directed by the City, the Contractor shall assign to the City all rights, title and interests of the Contractor under subcontracts or orders for materials terminated hereunder. The City shall be at liberty to negotiate with and engage any Subcontractors who had contracted with the Contractor for the Work;
9. Furnish the City with the documentation required to be furnished by the Contractor under the provisions of the Contract Documents, including, on projects as to which Federal funds are involved, all documentation required under the Federal requirements included in the Agreement; and
10. Take such other actions as the City may direct.

If only a portion of the Work has been terminated, the Contractor shall perform the remainder of the Work in conformity with the Contract Documents and in such a manner as not to interfere with the City or others in their performance and completion of the portion of the Work which was terminated.

The City may recover from the Contractor the amount of any loss or damage, including consequential damages, suffered or incurred as a result of the Contractor's default.

SECTION 7 ACCEPTANCE AND PAYMENT

7-1.01 **ACCEPTANCE.** When the Contractor believes that the entire Work is fully and finally completed, including the satisfactory completion of inspections, tests, and documentation specified in the Contract Documents and completion of all punch list and clean-up items, the Contractor shall submit to the City a written request for final Acceptance within fifteen (15) Days thereafter, specifying that the Work is fully and finally completed and the date on which it was completed. Within thirty (30) Days after receipt of the request for final Acceptance, the City will inspect the Work and will either:

1. Reject the request for final Acceptance, specifying the defective and/or uncompleted portions of the Work; or
2. Notify the Contractor that the Work will be accepted by Resolution of the City Council of the City of Roseville, and a Notice of Completion will be caused to be recorded by the City Clerk; or
3. Notify the Contractor that the Work has been accepted by the City but no Notice of Completion will be recorded.

If the City rejects the request for final Acceptance, the Contractor shall promptly remedy the defective and/or uncompleted portions of the Work. Thereafter, the Contractor shall again submit a written request for final Acceptance of the Work, specifying a new date based on the date the defective and/or uncompleted portions of the Work were corrected. Thereafter, the foregoing procedure shall apply successively until the City has verified that the Work is fully and finally completed and accepted the Work by Resolution of the City Council or by written

notification from the Director. Immediately upon such Acceptance, the Contractor shall be relieved of the duty of maintaining the Work as a whole.

All warranties commence upon final Acceptance of the Work. The City's final Acceptance of the Work shall not be construed as an acceptance by the City of any latent defects discovered with regard to the Contractor's work. Furthermore, Contractor's obligations under Section 5-1.22 "Responsibility for Damage and Indemnification" shall still remain applicable after the City's grant of final Acceptance of the Work.

Prior to final Acceptance, the Contractor shall submit to the City the Record Documents and Operation and Maintenance Manuals as specified in the Contract Documents.

7-1.02 **SCOPE OF PAYMENT.** The Contractor shall accept the compensation provided in the Contract as full payment for furnishing all labor, materials, tools, equipment, and incidentals necessary to the completed Work and for performing all Work contemplated and embraced under the Contract; also for loss or damage arising from the nature of the Work, or from the action of the elements, or from any unforeseen difficulties which may be encountered during the prosecution of the Work until the Acceptance by the Director and for all risks of every description connected with the prosecution of the Work, also for all expenses incurred in consequence of the suspension or discontinuance of the Work as provided in the Contract; and for completing the Work according to the Contract. Neither the payment of any estimate nor of any retained percentage shall relieve the Contractor of any obligation to make good any defective Work or material.

No compensation will be made in any case for loss of anticipated profits.

7-1.03 **NOTICE OF POTENTIAL CLAIM.** The Contractor shall not be entitled to the payment of any additional compensation for any act or failure to act by the City,

including failure or refusal to issue a Change Order, or for the happening of any event, thing, occurrence or other cause unless the Contractor has given the City due written Notice of Potential Claim as hereinafter specified, provided, however, that compliance with this Section 7-1.03 shall not be a prerequisite as to matters within the scope of the notice provisions in Section 6-1.07, "Time of Completion," or the notice provisions in Section 6-1.08, "Liquidated Damages," of these General Conditions, nor to any claim which is based on differences in measurement or errors of computation as to correct quantities.

The written Notice of Potential Claim shall set forth the reasons for which the Contractor believes additional compensation will or may be due, the nature of the costs involved, and, insofar as possible, the amount of the potential claim. The said Notice as above required must have been given to the Director prior to the time that the Contractor shall have performed the Work giving rise to the potential claim for additional compensation, if based on an act or failure to act by the Director, or in all other cases within seven (7) Days after the happening of the event, thing, occurrence or other cause giving rise to the potential claim.

If the Notice of Potential Claim does not include complete information about the claim or the parties do not execute a Contract Change Order in connection with the Notice of Potential Claim, Contractor shall submit complete information about its claim for additional compensation and/or extension of time for performance within fifteen (15) Days after such work is performed. Failure to provide written notice of claim prior to undertaking such work or failure to timely submit a complete and specific information about the claim for additional compensation and/or extension of the time for performance shall be deemed a waiver and abandonment of such claim.

If there is a dispute over any claim, the Contractor shall continue to Work during the dispute resolution process in a diligent and timely manner as directed by the City, and shall be

governed by all applicable provision of the Agreement.

The Contractor shall maintain cost records of all Work that is the basis of any dispute.

On a daily basis, Contractor shall submit to City completed daily forms, the format of which will be acceptable to the City, with respect to the Contractor's costs of performing the disputed work.

These daily forms shall itemize all of Contractor's costs in performing the disputed work, including, but not limited to, all costs relating to materials, labor and equipment with respect to the disputed work. These daily forms shall provide names or identification and classification of affected workers, the hourly rate of pay and hours worked, and also the size, type, and identification number of equipment and hours operated. Said daily work forms shall be duly signed and verified by the Contractor or its authorized representative. The City's receipt of the Contractors' daily forms shall not constitute an approval of the Contractor's claim. Contractor's failure to submit the daily forms on a daily basis shall constitute a waiver of the Contractor's right to claim any additional compensation for the disputed work.

Each Contractor claim shall include full and complete information concerning the Claim.

Contractor shall provide a clear, concise recital of the basis, upon which the claim is asserted, including a designation of the provisions of the Contract Documents upon which the claim is based. Contractor shall also include a statement as to the amount of time and/or compensation sought pursuant to the claim; if Contractor's claim arises from an ongoing occurrence, Contractor shall so state in its claim, including a description of the specific Work activities affected by the claim. All costs, expenses or damages and extensions of time claimed shall be described in reasonable detail under the circumstances together with complete supporting documentation.

The City will review any timely Notice of Potential Claim and supporting information

submitted by Contractor. In conducting this review, the City shall have the right to require the Contractor to submit such additional or supporting documents, data and other information as the City may require.

If an agreement can be reached which resolves the Contractor's claim, the parties will execute a Contract Change Order to document the resolution of the claim. If the parties cannot reach agreement with respect to the Contractor's claim, the Contractor shall still be obligated to comply with the claim identification provisions identified in these General Conditions, including but not limited to Section 7-1.04.

It is the intention of this Section 7-1.03 that differences between the parties arising under and by virtue of the Contract be brought to the attention of the Director at the earliest possible time in order that such matters may be settled, if possible, or other appropriate action promptly taken. The Contractor hereby agrees that it shall have no right to additional compensation for any Claim that may be based on any such act, failure to act, event, thing or occurrence for which no timely written Notice of Potential Claim as herein required was filed.

7-1.04 **CLAIMS.** Contractor must submit all Claims, for which it has previously submitted a Notice of Potential Claim, prior to Acceptance of the Work. Each such Claim must be sent to the City by registered mail or certified mail with return receipt requested and must contain reasonable documentation to support the Claim.

Upon receipt of a Claim, the City shall conduct a reasonable review of the Claim and, within a period not to exceed forty-five (45) Days, or such further time as mutually agreed upon or necessary pursuant to Public Contract Code Section 9204, the City shall provide the Contractor a written statement identifying what portion of the Claim is disputed and what portion is undisputed. If the City does not respond to a Claim from the Contractor within the time

specified herein, such Claim shall be deemed rejected in its entirety.

Any payment due on an undisputed portion of the Claim shall be processed and made within sixty (60) Days after the City issues its written statement.

If the Contractor disputes the City's written response, or if the City does not respond within the time specified herein, the Contractor may demand in writing an informal conference to meet and confer for settlement of the issues in dispute. Upon receipt of a demand in writing sent by registered mail or certified mail, return receipt requested, the City shall schedule a meet and confer conference within thirty (30) Days for settlement of the dispute.

Within ten (10) business days following the conclusion of the meet and confer conference, if the claim or any portion of the claim remains in dispute, the City shall provide the Contractor a written statement identifying the portion of the Claim that remains in dispute and the portion that is undisputed. Any payment due on an undisputed portion of the Claim shall be processed and made within sixty (60) Days after the City issues its written statement. Any disputed portion of the Claim, as identified by the Contractor in writing, shall be submitted to nonbinding mediation, with the City and the Contractor sharing the associated costs equally. The City and the Contractor shall mutually agree to a mediator within ten (10) business days after the disputed portion of the Claim has been identified in writing. If the parties cannot agree upon a mediator, each party shall select a mediator and those mediators shall select a qualified neutral third party to mediate with regard to the disputed portion of the Claim. Each party shall bear the fees and costs charged by its respective mediator in connection with the selection of the neutral mediator. If mediation is unsuccessful, the parts of the Claim remaining in dispute shall be resolved in accordance with Section 7-1.05 below.

7-1.05 **DISPUTE RESOLUTION PROCEDURE**. All Claims not resolved

pursuant to Section 7-1.04, shall be resolved pursuant to Public Contract Code Section 10240, et seq.

7-1.06 **STOP PAYMENT NOTICES.** The City, by and through the Department or other appropriate office or officers, may at its option and at any time retain out of any amounts due the Contractor, sums sufficient to cover claims, filed pursuant to Civil Code Section 9350, et seq., including an amount to provide for the reasonable cost of any litigation thereunder.

7-1.07 **PROGRESS PAYMENTS.** Within fifteen (15) Days after the effective date in the Notice to Proceed, but in any event prior to Contractor's first Application for Payment, the Contractor shall submit to the City a detailed Schedule of Values.

Upon its approval, the Schedule of Values will form a basis for determining the compensation payable to the Contractor based on its actual progress of Work with respect to each Lump Sum bid item. The City, prior to any progress payment being made, must approve the Schedule of Values.

At the Director's discretion the approved Schedule of Values may be used as the basis for calculating the adjustment in compensation for a lump sum bid item due to changes ordered by the Director. When an ordered change increases or decreases the quantities shown in an approved Schedule of Values, at the Director's discretion, the adjustment in compensation may be determined in the same manner specified for increases and decreases in the quantity of a bid item of work in accordance with Section 3-1.05(B), "Contract Price Adjustment," of these General Conditions.

The Contractor once in each month shall submit an Application for Payment, for approval by the Director. Contractor's Applications shall be based on the Schedule of Values submitted to the City. These applications shall be supported by: (1) documentation requested by the City to

substantiate the payment request; (2) statutory releases from Contractor and all Subcontractors and suppliers pursuant to Civil Code Sections 8132 and 8138; and (3) certified payroll records for the period for which payment is requested. Specifically, the Contractor will submit conditional waivers upon progress payment executed by all contractors and suppliers that will be receiving sums sought in the instant payment request and also submit unconditional waivers upon progress payment executed by all contractors and suppliers that have been paid to the date of the payment request. The Contractor shall certify that the Work for which payment is requested has been accomplished. When requested by the City, the Contractor shall submit receipts, invoices and other documentation that the City requires to be furnished for purpose of evaluating the application.

The City will pay the Contractor within thirty (30) Days after its receipt of an undisputed and properly submitted Application for Payment, after deducting all previous payments, retention, and other sums as described in the Contract Documents. Within seven (7) Days of its receipt of the Contractor's Application for Payment, the City will determine whether it complies with the provisions of the Contract Documents. As appropriate, the City will return the application to the Contractor accompanied by a document prepared by the City setting forth the reasons for the rejection. Thereafter, the Contractor shall correct and resubmit the Application for Payment. Progress payments may be withheld for Work that is not performed in accordance with the Contract Documents.

The City may deduct the following from each progress payment:

1. An amount equal to one hundred and twenty-five percent (125%) of the amount claimed under any stop payment notice or other lien filed against the Contractor, which includes an amount to provide for the reasonable cost of any litigation

thereunder.

2. Any Liquidated Damages or Assessments that have accrued as of the date of the Application for Payment.
3. Any sums expended by the City in performing any of the Contractor's obligations under the Agreement that the Contractor has failed to perform.
4. Any other sums that the City is entitled to recover from the Contractor under the terms of the Contract including damages to the City's property.
5. The failure of the City to deduct any of the above identified sums from a progress payment shall not constitute a waiver of the City's right to such sums.

No such estimate or payment shall be construed to be an acceptance of any defective Work or improper materials.

Under no circumstances will the City make payment to unlicensed Contractors. As a condition of payment, the Contractor is required to maintain the applicable Contractor's license as identified in the Notice to Contractors for the duration of the Work.

7-1.08 **PAYMENT FOR MATERIALS AND EQUIPMENT ON HAND.**

Partial payments may be made to the extent of seventy-five percent (75%) of the cost of materials and equipment plus delivery to be incorporated in the Work, provided that such materials and equipment meet the requirements of the Contract Documents and are delivered to acceptable sites on the plant site or at other sites in the vicinity that are acceptable to the City and only with the prior written approval by the City. Such delivered costs of stored or stockpiled materials and equipment may be included in the next progress payment after the following conditions are met:

A. Equipment and materials will only be eligible if given conditional or final

Acceptance by the Director and are in apparent compliance with favorably reviewed Submittals.

B. Only equipment or materials which have received favorable review of Shop Drawings will qualify.

C. The material or equipment has been stored or stockpiled adequately protected against damage in a manner acceptable to the Director at an approved site.

D. The Contractor has furnished the Director with acceptable evidence of the quantity and the quality of such stored or stockpiled materials or equipment with identification of where they will be incorporated into the project with Specification reference.

E. The Contractor has furnished the Director with satisfactory evidence that the material or equipment and transportation costs have been paid.

F. The Contractor has furnished the City legal title (free of liens or encumbrances of any kind) and lien releases to the material or equipment so stored or stockpiled.

G. The Contractor has furnished the City evidence that the material or equipment so stored or stockpiled is insured against loss by damage to or disappearance of such materials at any time prior to use in the Work.

It is understood and agreed that the transfer of title and the City payment for such stored or stockpiled materials or equipment shall in no way relieve the Contractor of its responsibility for furnishing and placing such materials or equipment in accordance with the requirements of the Contract Documents.

In no case will the amount of progress payments for materials or equipment on hand exceed the Contract Price for such materials or equipment or the Contract Price for the Contract item in which the material is intended to be used.

No partial payment will be made for stored or stockpiled living or perishable plant

materials.

The Contractor shall bear all costs associated with the progress payment of stored or stockpiled materials or equipment in accordance with the provisions of this Section.

7-1.09 **RETENTION ON PROGRESS PAYMENTS.** From each progress payment estimate, five percent (5%) will be deducted and held in retention by the City. The remainder, less any deductions described in Section 7-1.07, "Progress Payments," of these General Conditions, will be paid to the Contractor as progress payments.

Pursuant to Public Contract Code Section 22300, the successful Bidder may submit Securities in lieu of retention payments by the City. Upon the Contractor's request, the City will make payment of funds withheld from progress payments, pursuant to the requirements of California Public Contract Code Section 22300, if the Contractor deposits in escrow with the City or with a bank acceptable to the City, securities eligible for investment under California Government Code Section 16430, bank or savings and loan certificates of deposit, interest bearing demand deposit accounts, standby letters of credit, or any other security mutually agreed to by the Contractor and the City, upon the following conditions:

1. The Contractor shall bear the expenses of the City and the escrow agent in connection with the escrow deposit made.
2. Securities or certificates of deposit to be placed in escrow shall be of a value at least equivalent to the amounts of retention to be paid to the Contractor pursuant to this section.
3. Contractor shall enter into an escrow agreement satisfactory to the City, which agreement shall be substantially similar to the form provided in California Public Contract Code section 22300.

4. The Contractor shall obtain the written consent of the surety to such agreement.

7-1.10 **FINAL PAYMENT.** Final payment will be made only after Contractor has achieved Final Completion of the Work pursuant to the provisions of Section 7-1.01, “Acceptance,” of these General Conditions. Before final payment can be made, the Contractor shall have furnished the City with the following:

1. All Record Documents, catalogues, instruction sheets and information as required by the Contract Documents.
2. Conditional Waivers and Releases Upon Final Payment executed by Contractor and all Subcontractors and Suppliers, as provided by Civil Code Section 8136. Unconditional Waivers and Releases Upon Final Payment, as provided in Civil Code Section 8138, executed by Contractor and all Subcontractors and Suppliers, must be provided for all Subcontractors and Suppliers that have been paid in full.

Within thirty (30) Days of the date of the City’s Acceptance of the Work, the Contractor shall prepare and submit a Final Invoice, showing the proposed total amount due the Contractor, segregated by Bid item quantities, Change Order Work, and other basis for payments; deductions made or to be made for prior payment; and amounts previously retained. Prior invoices and payments shall be subject to correction in the proposed Invoice for Final Payment. Payments to the Contractor will be made only for actual quantities of the Contract items of work constructed in accordance with the Contract Documents.

The City will review the Contractor’s proposed Final Invoice and necessary changes or corrections will be forwarded to the Contractor. Within ten (10) Days thereafter, the Contractor

shall submit a revised proposed Final Invoice incorporating changes or corrections made by the City together with any new claims resulting therefrom. Upon approval by the City, the corrected proposed Final Invoice will become the approval Final Invoice.

If agreements are reached on all questions regarding the Final Invoice, the City will pay the entire sum found due on the approved application. However, the City will withhold sums sufficient to pay all unsettled claims for which stop payment notices have been filed pursuant to Section 9350, et seq. of the California Civil Code, together with the reasonable cost of any litigation thereunder.

Final payment will be made within thirty (30) Days after receipt of an approved Final Invoice and other required Submittals referenced above or within sixty (60) Days after Acceptance of the work by the City, whichever is later, provided, however, that if an approved Final Invoice has not been submitted within sixty (60) Days after Acceptance of the Work by the City, the City may elect to make payment of sums not in dispute without prejudice to the right of either the City or the Contractor in connection with such disputed sums. Notwithstanding the foregoing, if a Notice of Completion is recorded, final payment shall not be made prior to the expiration of the thirty-five (35) calendar day lien period. The start of this lien period is the date the Placer County Recorder's Office records the Notice of Completion.

The City may withhold from the Final Payment an amount not to exceed one hundred fifty percent (150%) of any amount in dispute between the City and the Contractor.

The making of Final Payment shall not operate to release the Contractor or its sureties from obligations arising under the Contract, the Contract bonds and warranties as herein provided. Specifically, the making of final payment shall not constitute a waiver and release of claims by the City arising from:

1. Unsettled or future liens;
2. Failure of the Work to comply with the requirements of the Contract Documents;
3. The terms of any warranties required by or contained in the Contract Documents;
4. The right to any insurance proceeds or the right to make any insurance or bond claims;
5. Any claims with respect to Contractor's obligations of indemnity with respect to claims asserted by third parties; or
6. Any latent deficiencies with the Work or Contractor's fraud.

7-1.11 **CLERICAL ERRORS.** Notwithstanding the provisions of Section 7-

1.10, "Final Payment," of these General Conditions, for a period of three (3) years after Acceptance of the Work, all estimates and payments made pursuant to said Section 7-1.10, are subject to correction for clerical errors in the calculations involved in the determination of quantities and payments. The Contractor and the City agree to pay to the other any sum due under the provisions of this Section 7-1.11, provided, however, if the total sum to be paid is less than \$100, no such payment shall be made.

7-1.12 **WARRANTY.** Notwithstanding inspections and Acceptance by the City of Work furnished under the Contract Documents, the Contractor hereby unconditionally guarantees that all materials and equipment furnished will be of good quality and new, that the Work will be free from defects in workmanship and materials and that the Work will conform to the requirements of the Contract Documents. Work not conforming to these requirements, including substitutions not properly approved and authorized, may be considered defective.

This warranty by the Contractor is in addition to any warranties or guarantees required elsewhere in the Contract Documents. This warranty shall be in effect notwithstanding any disclaimers, or limiting or conditional terms contained in such separate warranties furnished by manufacturers or suppliers.

The Contractor hereby agrees to repair or replace any and all Work, together with any other adjacent Work which may be displaced in so doing, that may prove to be not in accordance with the requirements of the Contract or that may be defective in its workmanship or material during the greater of a period of one (1) year after Acceptance of the Work by the City or the period specified in the Special Conditions, without any expense whatsoever to the City, ordinary wear and tear and unusual abuse or neglect excepted.

The Contractor further agrees, that within ten (10) Days after being notified in writing by the Department of any Work not in accordance with the requirements of the Contract Documents or of any defects in the Work, the Contractor will commence and prosecute with due diligence all Work necessary to fulfill the terms of this warranty, and to complete such Work within a reasonable period of time. In the event Contractor fails to comply, it does hereby authorize the Department to proceed to have such Work done at the Contractor's expense and the Contractor will honor and pay the cost and charges therefore upon demand. The Department shall be entitled to all costs and expenses, including reasonable attorneys' fees, necessarily incurred upon the Contractor's refusal to honor and pay the above costs and charges.

All warranties set forth in the Contract Documents shall be deemed cumulative and not alternative or exclusive. Nothing contained in this section shall be construed to establish a period of limitation with respect to any other obligation, which Contractor has under the Contract Documents or under any separate warranty or guaranty required thereby. The establishment of a

specific warranty period relates only to the specific obligation of Contractor to correct defective Work, and it has no relationship to the time within which its obligation to comply with the Contract Documents or applicable provision of law may be sought to be enforced, nor to the time within which proceedings may be commenced to establish Contractor's liability with respect to its obligations other than specifically to correct the Work. Without limiting the foregoing, it is understood and agreed that Contractor shall remain responsible for latent defects with its work, regardless of the expiration of any warranty period set forth in the Contract Documents.

7-1.13 **WARRANTY OF TITLE.** No material, supplies, or equipment for the Work under this Contract shall be purchased subject to any chattel mortgage, security agreement, or under a conditional sale or other agreement by which an interest therein or any part thereof is retained by the seller or supplier. The Contractor warrants good title to all material, supplies, and equipment Installed or incorporated in the Work and agrees upon completion of all Work to deliver the Premises, together with all improvements and appurtenances constructed or placed thereon by it, to the City free from any claim, liens, security interest, or charges, and further agrees that neither the Contractor nor any person, firm, or corporation furnishing any materials or labor for any Work covered by this Contract shall have any right to a lien upon the Premises or any improvement or appurtenances thereon. Provided, that this shall not preclude the Contractor from Installing metering devices and other equipment of utility companies, the title of which is commonly retained by the utility company. In the event of the Installation of any such metering device or equipment, the Contractor shall advise the City as to the legal owner thereof. Nothing contained in this paragraph, however, shall defeat or impair the right of such persons furnishing materials or labor under any bond given by the Contractor for their protection or any rights under any law permitting such persons to look to funds due the Contractor in the hands of the City.

The provisions of this paragraph shall be inserted in all subcontracts and material Contracts, and notice of its provisions shall be given to all persons furnishing materials for the Work when no formal Contract is entered into for such materials.

[END OF GENERAL CONDITIONS]

TEXT OF AB 626

Assembly Bill No. 626

CHAPTER 810

An act to add and repeal Section 9204 of the Public Contract Code, relating to public contracts.

[Approved by Governor September 29, 2016. Filed with Secretary of State September 29, 2016.]

LEGISLATIVE COUNSEL'S DIGEST

AB 626, Chiu. Public contracts: claim resolution.

Existing law prescribes various requirements regarding the formation, content, and enforcement of state and local public contracts. Existing law applicable to state public contracts generally requires that the resolution of claims related to those contracts be subject to arbitration. Existing law applicable to local agency contracts prescribes a process for the resolution of claims related to those contracts of \$375,000 or less.

This bill would establish, for contracts entered into on or after January 1, 2017, a claim resolution process applicable to any claim by a contractor in connection with a public works project. The bill would define a claim as a separate demand by the contractor for one or more of the following: a time extension for relief from damages or penalties for delay, payment of money or damages arising from work done pursuant to the contract for a public work, or payment of an amount disputed by the public entity, as specified.

This bill would require a public entity, defined to exclude certain state entities, upon receipt of a claim sent by registered or certified mail, to review it and, within 45 days, provide a written statement identifying the disputed and undisputed portions of the claim. The bill would authorize the 45-day period to be extended by mutual agreement. The bill would require any payment due on an undisputed portion of the claim to be processed within 60 days, as specified. The bill would require that the claim be deemed rejected in its entirety if the public entity fails to issue the written statement.

This bill would authorize, if the claimant disputes the public entity's written response or if the public entity fails to respond to a claim within the time prescribed, the claimant to demand to meet and confer for settlement of the issues in dispute. The bill would require any disputed portion of the claim that remains in dispute after the meet and confer conference to be subject to nonbinding mediation, as specified. The bill would provide that unpaid claim amounts accrue interest at 7% per annum. The bill would prescribe a procedure by which a subcontractor or lower tier contractor may make a claim through the contractor.

This bill would require the text of these provisions, or a summary, to be set forth in the plans or specifications for any public work which may give rise to a claim. The bill would specify that a waiver of these rights is void and contrary to public policy, except as specified. The bill would also specify that it does not impose liability on a public entity that makes loans or grants available through a competitive application process, for the failure of an awardee to meet its contractual obligations.

By increasing the duties of local agencies and officials, this bill would impose a state-mandated local program.

This bill would, on January 1, 2020, repeal the provision establishing the claim resolution process.

This bill would specify that these provisions constitute a matter of statewide concern.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

The people of the State of California do enact as follows:

SECTION 1. Section 9204 is added to the Public Contract Code, to read:

9204. (a) The Legislature finds and declares that it is in the best interests of the state and its citizens to ensure that all construction business performed on a public works project in the state that is complete and not in dispute is paid in full and in a timely manner.

(b) Notwithstanding any other law, including, but not limited to, Article 7.1 (commencing with Section 10240) of Chapter 1 of Part 2, Chapter 10 (commencing with Section 19100) of Part 2, and Article 1.5 (commencing with Section 20104) of Chapter 1 of Part 3, this section shall apply to any claim by a contractor in connection with a public works project.

(c) For purposes of this section:

(1) "Claim" means a separate demand by a contractor sent by registered mail or certified mail with return receipt requested, for one or more of the following:

(A) A time extension, including, without limitation, for relief from damages or penalties for delay assessed by a public entity under a contract for a public works project.

(B) Payment by the public entity of money or damages arising from work done by, or on behalf of, the contractor pursuant to the contract for a public works project and payment for which is not otherwise expressly provided or to which the claimant is not otherwise entitled.

(C) Payment of an amount that is disputed by the public entity.

(2) "Contractor" means any type of contractor within the meaning of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code who has entered into a direct contract with a public entity for a public works project.

(3) (A) "Public entity" means, without limitation, except as provided in subparagraph (B), a state agency, department, office, division, bureau, board, or commission, the California State University, the University of California, a city, including a charter city, county, including a charter county, city and county, including a charter city and county, district, special district, public authority, political subdivision, public corporation, or nonprofit transit corporation wholly owned by a public agency and formed to carry out the purposes of the public agency.

(B) "Public entity" shall not include the following:

(i) The Department of Water Resources as to any project under the jurisdiction of that department.

(ii) The Department of Transportation as to any project under the jurisdiction of that department.

(iii) The Department of Parks and Recreation as to any project under the jurisdiction of that department.

(iv) The Department of Corrections and Rehabilitation with respect to any project under its jurisdiction pursuant to Chapter 11 (commencing with Section 7000) of Title 7 of Part 3 of the Penal Code.

(v) The Military Department as to any project under the jurisdiction of that department.

(vi) The Department of General Services as to all other projects.

(vii) The High-Speed Rail Authority.

(4) "Public works project" means the erection, construction, alteration, repair, or improvement of any public structure, building, road, or other public improvement of any kind.

(5) "Subcontractor" means any type of contractor within the meaning of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code who either is in direct contract with a contractor or is a lower tier subcontractor.

(d) (1) (A) Upon receipt of a claim pursuant to this section, the public entity to which the claim applies shall conduct a reasonable review of the claim and, within a period not to exceed 45 days, shall provide the claimant a written statement identifying what portion of the claim is disputed and what portion is undisputed. Upon receipt of a claim, a public entity and a contractor may, by mutual agreement, extend the time period provided in this subdivision.

(B) The claimant shall furnish reasonable documentation to support the claim.

(C) If the public entity needs approval from its governing body to provide the claimant a written statement identifying the disputed portion and the undisputed portion of the claim, and the governing body does not meet within the 45 days or within the mutually agreed to extension of time following receipt of a claim sent by registered mail or certified mail, return receipt requested, the public entity shall have up to three days following the next duly publicly noticed meeting of the governing body after the 45-day period, or extension, expires to provide the claimant a written statement identifying the disputed portion and the undisputed portion.

(D) Any payment due on an undisputed portion of the claim shall be processed and made within 60 days after the public entity issues its written statement. If the public entity fails to issue a written statement, paragraph (3) shall apply.

(2) (A) If the claimant disputes the public entity's written response, or if the public entity fails to respond to a claim issued pursuant to this section within the time prescribed, the claimant may demand in writing an informal conference to meet and confer for settlement of the issues in dispute. Upon receipt of a demand in writing sent by registered mail or certified mail, return receipt requested, the public entity shall schedule a meet and confer conference within 30 days for settlement of the dispute.

(B) Within 10 business days following the conclusion of the meet and confer conference, if the claim or any portion of the claim remains in dispute, the public entity shall provide the claimant a written statement identifying the portion of the claim that remains in dispute and the portion that is undisputed. Any payment due on an undisputed portion of the claim shall be processed and made within 60 days after the public entity issues its written statement. Any disputed portion of the claim, as identified by the contractor in writing, shall be submitted to nonbinding mediation, with the public entity and the claimant sharing the associated costs equally. The public entity and claimant shall mutually agree to a mediator within 10 business days after the disputed portion of the claim has been identified in writing. If the parties cannot agree upon a mediator, each party shall select a mediator and those mediators shall select a qualified neutral third party to mediate with regard to the disputed portion of the claim. Each

party shall bear the fees and costs charged by its respective mediator in connection with the selection of the neutral mediator. If mediation is unsuccessful, the parts of the claim remaining in dispute shall be subject to applicable procedures outside this section.

(C) For purposes of this section, mediation includes any nonbinding process, including, but not limited to, neutral evaluation or a dispute review board, in which an independent third party or board assists the parties in dispute resolution through negotiation or by issuance of an evaluation. Any mediation utilized shall conform to the timeframes in this section.

(D) Unless otherwise agreed to by the public entity and the contractor in writing, the mediation conducted pursuant to this section shall excuse any further obligation under Section 20104.4 to mediate after litigation has been commenced.

(E) This section does not preclude a public entity from requiring arbitration of disputes under private arbitration or the Public Works Contract Arbitration Program, if mediation under this section does not resolve the parties' dispute.

(3) Failure by the public entity to respond to a claim from a contractor within the time periods described in this subdivision or to otherwise meet the time requirements of this section shall result in the claim being deemed rejected in its entirety. A claim that is denied by reason of the public entity's failure to have responded to a claim, or its failure to otherwise meet the time requirements of this section, shall not constitute an adverse finding with regard to the merits of the claim or the responsibility or qualifications of the claimant.

(4) Amounts not paid in a timely manner as required by this section shall bear interest at 7 percent per annum.

(5) If a subcontractor or a lower tier subcontractor lacks legal standing to assert a claim against a public entity because privity of contract does not exist, the contractor may present to the public entity a claim on behalf of a subcontractor or lower tier subcontractor. A subcontractor may request in writing, either on his or her own behalf or on behalf of a lower tier subcontractor, that the contractor present a claim for work which was performed by the subcontractor or by a lower tier subcontractor on behalf of the subcontractor. The subcontractor requesting that the claim be presented to the public entity shall furnish reasonable documentation to support the claim. Within 45 days of receipt of this written request, the contractor shall notify the subcontractor in writing as to whether the contractor presented the claim to the public entity and, if the original contractor did not present the claim, provide the subcontractor with a statement of the reasons for not having done so.

(e) The text of this section or a summary of it shall be set forth in the plans or specifications for any public works project that may give rise to a claim under this section.

(f) A waiver of the rights granted by this section is void and contrary to public policy, provided, however, that (1) upon receipt of a claim, the parties may mutually agree to waive, in writing, mediation and proceed directly to the commencement of a civil action or binding arbitration, as applicable; and (2) a public entity may prescribe reasonable change order, claim, and dispute resolution procedures and requirements in addition to the provisions of this section, so long as the contractual provisions do not conflict with or otherwise impair the timeframes and procedures set forth in this section.

(g) This section applies to contracts entered into on or after January 1, 2017.

(h) Nothing in this section shall impose liability upon a public entity that makes loans or grants available through a competitive application process, for the failure of an awardee to meet its contractual obligations.

(i) This section shall remain in effect only until January 1, 2020, and as of that date is

repealed, unless a later enacted statute, that is enacted before January 1, 2020, deletes or extends that date.

SECTION 2.

The Legislature finds and declares that it is of statewide concern to require a charter city, charter county, or charter city and county to follow a prescribed claims resolution process to ensure there are uniform and equitable procurement practices.

SECTION 3.

If the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code.

SUPPLEMENTAL CONDITIONS

Project: AQUIFER STORAGE AND RECOVERY – MONITORING WELLS PROJECT

Scope of Supplemental Conditions

1. The Work shall be performed in accordance with the General Conditions and Department Standards, except as the General Conditions may be modified by the following additional City Standards, incorporated herein by this reference, if so indicated.

	COMMUNITY DESIGN GUIDELINES 311 Vernon Street, Roseville, CA 95678
	SPECIFICATIONS FOR COMMERCIAL CONSTRUCTION (ELECTRIC) 2090 Hilltop Circle, Roseville, CA 95747
	PARKS CONSTRUCTION STANDARDS 316 Vernon Street, Suite 400, Roseville, CA 95678
X	DESIGN AND CONSTRUCTION STANDARDS 311 Vernon Street, Roseville, CA 95678
	OTHER

Above documents are available at: www.roseville.ca.us.

2. Numbering in these Supplemental Conditions conforms to that in the General Conditions. The existence of a section in these Supplemental Conditions means that the corresponding section in the General Conditions is modified in some respect. Unless otherwise specified, the modified General Condition is deleted entirely and the provisions of these Supplemental Conditions are substituted.

SECTION 1. DEFINITIONS AND TERMS

1-1.24 **DEPARTMENT.** Section 1-1.24 of the General Conditions is amended to include the following:

The Department for Contract Administration is the Environmental Utilities Department of the City of Roseville.

1-1.28 **Engineer or Architect:** Section 1-1.28 of the General Condition is amended to the following:

Engineer. The Environmental Utilities Director or the duly authorized representative.

SECTION 2. CONTROL AND SCOPE OF THE WORK

2-1.08 **SUBMITTALS.** Section 2-1.08 of the General Conditions is amended to include the following two sentences:

The Contractor shall submit all material submittals within the timelines included in the Specifications.

The time allowed for review of each submittal is 14 Days after receipt of the submittal by the Director.

SECTION 3. CHANGES IN THE WORK

There are no amendments to the General Conditions.

SECTION 4. CONTROL OF MATERIALS

There are no amendments to the General Conditions.

SECTION 5. LEGAL RELATIONS AND RESPONSIBILITY

5-1.14 **AIR POLLUTION CONTROL AND ASBESTOS.** Section 5-1.14 of

the General Conditions is amended to include the following:

To the best of the City's knowledge, asbestos is not present in the vicinity of the project.

SECTION 6. PROSECUTION AND PROGRESS

6-1.04 **PROGRESS SCHEDULE:** Section 6-1.04A of the General

Conditions is modified to delete the first sentence and replace with the following:

The Contractor shall submit to the Director, within ten (10) calendar days after date of the Notice to Proceed, a Preliminary Progress Schedule covering the Contractor's activities over the first thirty (30) calendar days of operation in detail and the remainder of the project in summary.

6-1.04 **PROGRESS SCHEDULE.** Section 6-1.04F of the General Conditions is amended to include the following:

Progress schedules showing project completion dates more than 30 Days earlier than specified in Section 6-1.07 shall be rejected.

6-1.07 **TIME OF COMPLETION.** Section 6-1.07 of the General Conditions is amended to include the following:

The Contractor shall begin Work within 21 days after receiving a Notice to Proceed and shall diligently prosecute the Work to completion. The Work shall be completed within the Time of Completion required by the Agreement.

If landscaping plants require an establishment period, that period will be 60 Days and the start of the establishment should be per supplier planting instructions.

6-1.08 **LIQUIDATED DAMAGES.** Section 6-1.08 of the General Conditions is amended to include the following:

The amount of Liquidated Damages is included in the Agreement.

SECTION 7: ACCEPTANCE AND PAYMENT

Section 7-1.02 of the General Conditions is amended to include the following:

Unless special payment is specifically provided in the Measurement and Payment Section, all incidental work and expense in connection with the Completion of Work Under the Contract will be considered a subsidiary obligation of the Contractor and all such costs shall be included in the appropriate items in the Schedule of Bid Items in connection with which costs are incurred.

[END OF SUPPLEMENTAL CONDITIONS]

SECTION 01025

MEASUREMENT AND PAYMENT

PART 1 GENERAL

1.01 SCOPE

- A. All estimated quantities stipulated in the Bid Form or other Contract Documents are approximate and are to be used only (a) as a basis for estimating the probable cost of the Work and (b) for the purpose of comparing the bids submitted for the Work. The actual amounts of work completed and materials furnished under unit price items may differ from the estimated quantities. The basis of payment for work and materials will be the actual amount of work completed and materials furnished. Contractor agrees to make no claim for damages, anticipated profits, or otherwise on account of any difference between the amounts of work actually completed and materials actually furnished and the estimated amounts therefore as long as the difference is within 25% (+ or -) of the stated quantities on the Bid Form.
- B. Payment for the Unit Price Work items of the Schedule of Work Items, as further specified herein, shall include all compensation to be received by the **Contractor** for furnishing all tools, equipment, supplies, and manufactured articles and for all labor, operations, and incidentals appurtenant to the items of work being described that are necessary to complete the various items of the work in accordance with the requirements of the Contract Documents, including all appurtenances thereto and including all costs of compliance with the regulation of public agencies having jurisdiction, including Safety and Health Requirements of the California Division of Industrial Safety and the Occupational Safety and Health Administration (OSHA) of the U.S. Department of Labor. No separate payment will be made for any item that is not specifically set forth in the Schedule of Work Items. All costs therefore shall be included in the prices named in the Schedule of Work Items for the various appurtenant items of work.

1.02 UNITS OF MEASUREMENT

- A. Measurements shall be in accordance with United States Standard Measures.

1.03 UNIT PRICE ITEMS

- A. Materials and items of work which are to be paid for on the basis of measurement will be measured in accordance with the method stipulated in the particular sections involved. In determining quantities, all measurements shall be made in a horizontal plane unless otherwise specified. Measurement of the completed work shall be in accordance with, and by instruments and devices calibrated to United States Standard Measures, and the units of measurement for payment, and the limit thereof, shall be made as shown on the Plans, Specifications, General Conditions, and Supplementary Conditions and the Referenced City of Roseville Standards and Specifications.

1.04 LUMP SUM ITEMS

- A. The quantities of work performed under lump sum bid items will not be measured except to evaluate percent complete for each lump sum bid item as determined by the City to be necessary for the purpose of determining reasonable progress payments. Such measurements, as is determined to be necessary, shall be performed by the **Contractor** and verified by the **City**, in accordance with Paragraph 1.03 of this Section, UNIT PRICED ITEMS.

PART 2 DESCRIPTION OF BID ITEMS

2.01 GENERAL

- A. The Bid Amounts for each Bid Item will be used for comparative bid analysis. The Bid Amounts will also form the basis of progress payments. Each Lump Sum Bid Amount will undergo further breakdown as described later in this section. Bid Items are not intended to be exclusive descriptions of work categories and the **Contractor** shall determine and include in its pricing all materials, labor, and equipment necessary to complete each Bid Item (work phase) as shown and specified.

2.02 BID ITEMS

A. GENERAL (ITEMS 1-3, 21)

1. [Bid Item No. 1] Mobilization and Demobilization– (Lump Sum) Shall include but not be limited to, **Contractor's** participation in the assessment of pre-construction conditions and post construction damage assessment of the entire job site including project work described in the bid schedule to include pre-construction photographs; permits; project signs; move in of equipment, tools, supplies, materials, and manpower to the job site; providing and furnishing **Contractor's** field office (if needed), power, telephone, water and sanitary facilities; erecting, maintaining, removing and transporting of the construction project information signs, flow barriers and fencing around storage and staging areas; dust control; daily clean-up of job site; and final cleanup of job site after the project is completed and accepted by the **City**. The Lump Sum amount bid shall be divided 65 percent for mobilization and 35 percent for demobilization and shall be paid after the **City** has conducted inspections and approved all repairs and clean up and upon the **City's** review and acceptance of the As-Built Plans.
2. [Bid Item No. 2] Site to Site Mobilization– (Lump Sum) Including, but not limited to, traffic and pedestrian safety within the project limits for all project work identified in Contract Drawings including, traffic control plans (submitted to Public Works for review and approval); installation, maintenance and removal of temporary traffic control facilities including, but not limited to: cones, K-rails, fencing, barricades, trench plating, temporary backfilling and paving, striping, signals, signs, flagmen, high level warning devices, flashing arrow signs and other temporary traffic control and public safety complete in place, as is required for the execution and completion of this Work for the entire project as shown in the Specifications for Well Destruction and Well Site Facilities Demolition and Improvements. The Lump Sum amount will be paid proportionally to the work done within each payment cycle.
3. [Bid Item No. 3] Sound Attenuation Walls – (**NOT USED**).
4. [Bid item No. 21] Standby – (Hourly) Shall include any standby time incurred when the **Contractor** is instructed to stop work by either the **City** or the **Consultant**, through no fault of the work of the **Contractor**, to await further direction on the project. The **Contractor** shall be paid at an hourly rate for all working hours in which they are in standby mode.

B. WELL DRILLING (ITEMS 4-8)

1. [Bid Item No. 4] 8-inch Diameter Pilot Hole Drilling – (Unit Price per Linear Foot) Including, but not limited to, furnishing all the equipment, labor, and materials for drilling of the pilot hole to the depth specified in the Table 1, or as specified by the **Consultant**, and at locations shown in Figures 1-9. Samples of the drilling cuttings to be provided every 10 feet or at intervals specified by the **Consultant**. Equipment includes drilling pipe and mud rotary drilling unit as well as mud tanks. The **Contractor** shall be paid per linear foot drilled.
2. [Bid Item No. 5] Geophysical (E-Logs) – (Lump Sum) Including, but not limited to, all the equipment, labor, and materials required to perform geophysical logging of the entire depth of the well. The **Contractor** shall supply the **City** and **Consultant** with copies of the geophysical log following completion of each geophysical survey. The lump sum amount will be paid upon completion of each well site geophysical log.
3. [Bid Item No. 6] 14-inch Diameter Reaming – (Unit Price per Linear Foot) Including, but not limited to, furnishing all the equipment, labor, and materials for the reaming of the pilot hold to 14 inches to the depths specified in Table 1, or as specified by the **Consultant**. The **Contractor** shall be paid per linear foot of borehole reamed to 14 inches.
4. [Bid Item No. 7] 12-inch Diameter Reaming – (Unit Price per Linear Foot) Including, but not limited to, furnishing all the equipment, labor, and materials for the reaming of the pilot hold to 12 inches to the depths specified in Table 1, or as specified by the **Consultant**. The **Contractor** shall be paid per linear foot of borehole reamed to 12 inches.
5. [Bid Item No. 8] 8-inch Diameter Reaming/Hole Cleanout – (Unit Price per Linear Foot) Including, but not limited to, furnishing all the equipment, labor, and materials for the reaming of the pilot hold to 8 inches and cleaning the reamed pilot hole to the depths specified in Table 1, or as specified by the **Consultant**. The **Contractor** shall be paid per linear foot of borehole reamed to 8 inches and material excavated from the finished hole.

C. WELL CONSTRUCTION (ITEMS 9-13, 18)

1. [Bid Item No. 9] 2.5-inch Diameter Schedule 80 PVC Well Casing – (Unit Price per Linear Foot) Including, but not limited to, furnishing all equipment, labor and materials to install 2.5-inch diameter Sch. 80 PVC well casing to the depths specified in Table 1 or as specified by the **Consultant**. The **Contractor** shall be paid per linear foot of casing installed.
2. [Bid Item No. 10] 2.5-inch Diameter Schedule 80 PVC Well Screen, 0.032 Slot – (Unit Price per Linear Foot) Including, but not limited to, furnishing all equipment, labor and materials to install 2.5-inch diameter Sch. 80 PVC well screen of 0.032 slot to the depths specified in Table 1 or as specified by the **Consultant**. The **Contractor** shall be paid per linear foot of screen installed.
3. [Bid Item No. 11] Borehole Seals – (Unit Price per Linear Foot) Including, but not limited to, furnishing all equipment, labor, and materials to install borehole seals at the depth and thickness identified in Figures 10 through 17, or as specified by the **Consultant**. Borehole seals shall be bentonite seals above the screen intervals and bentonite slurry everywhere else gravel envelope isn't present. The **Contractor** shall be paid per linear foot of seal installed.

4. [Bid Item No. 12] Gravel Envelope – (Unit Price per Linear Foot) Including, but not limited to, furnishing all equipment, labor, and materials to install gravel envelope around the screened interval of the well. For each screen interval, approximately 50 feet of gravel envelope will be installed. All gravel will be washed and placed with clean water to ensure little to no fines are installed with the gravel envelope that can be entrained in the formation during development. The **Contractor** shall be paid per linear foot of gravel installed.
5. [Bid Item No. 13] Sanitary Seal – (Unit Price per Linear Foot) Including, but not limited to, furnishing all equipment, labor, and materials to install sanitary seals from the ground surface to 20 feet below ground surface at each well site. Sanitary seals shall be sand-cement grout. The **Contractor** shall be paid for linear foot of sanitary seal installed at each site.
6. [Bid Item No. 18] Furnish and Install Enclosures, Pads, and Bollards – (Lump Sum) Including, but not limited to, furnishing all equipment, labor, materials, and vehicle transport to install well enclosures, bollards, and concrete pads at each well site. Concrete pads shall be 10” thick 4’x4’ pad with potential for a future electrical conduit running to the well enclosure. The well enclosure shall be a 16” diameter steel enclosure with a locking cap. metal with the ability. Bollards shall be constructed of 4-inch diameter by 6-foot long low-carbon steel Schedule 40 pipe and grout. The bollards shall be painted bright yellow similar to other City installations. The lump sum amount shall be paid upon completion of each well site.

D. WELL DEVELOPMENT (ITEMS 14-17, 19, 20)

1. [Bid Item No. 14] Well Development: Bailing and Surging/Air Lifting – (Hourly) Including, but not limited to, furnishing all equipment, labor, and materials to properly develop the monitoring wells. Development shall include swabbing of the screen intervals for a minimum of 4 minutes per foot of well screen or until drilling fluids are removed from the well and sediments are minimal. The **Contractor** shall be paid hourly for time required for initial development of the well.
2. [Bid Item No. 15] Furnish and Install Test Pumps – (Lump Sum) Including, but not limited to, vehicle transportation, equipment, and labor to install a test pump at all well sites. The pump shall be a 2-inch diameter submersible pump capable of pumping at 10 gpm against 140 feet of head. The lump sum amount shall be paid upon completion of well development at each well site.
3. [Bid Item No. 16] Pump Development – (Hourly) Including but not limited to, furnishing all equipment, labor, and materials to completed final pump development of each monitoring well. Pump development shall occur for no less than 1 hour and until turbidity is less than 5 NTUs, or as directed by the **Consultant**. The **Contractor** shall be paid hourly for the time required to complete pump development for each well.
4. [Bid Item No. 17] Borehole Destruction – (Unit Price per Linear Foot) Including but not limited to, furnishing all equipment, labor, and materials to abandon any boreholes or wells requested by the **Consultant**. Wells shall be abandoned by filling the borehole completely with concrete. The **Contractor** shall be paid per linear foot of borehole destroyed and for mobilization and demobilization to the site. If a well or borehole is to be abandoned due to actions of the **Contractor**, no payment shall be made.

5. [Bid Item No. 19] Thin-down water, Development Water, and Mud Disposal – (Lump Sum) Including, but not limited to, furnishing all equipment labor, material, and vehicles to transport thin down water, development water, and mud to the City’s wastewater treatment facility. The lump sum amount shall be paid following completion of the monitoring wells and proper disposal of all mud along with thin-down and development water.
6. [Bid Item No. 20] Drill Cuttings Disposal – (Lump Sum) Including, but not limited to, furnishing all equipment, labor, materials and transportation to stockpile and remove drill cuttings from site. The lump sum amount shall be paid following completion of the monitoring wells and proper disposal of all cuttings.

END OF SECTION

SECTION 01110

SUMMARY OF WORK

PART 1 GENERAL

1.01 SUMMARY

A. Section Includes:

1. The work to be performed under this Contract shall consist of furnishing all tools, equipment, materials, supplies, and manufactured articles, and for furnishing all transportation and services, including fuel, power, water, and essential communications, and for the performance of all labor, work, or other operations required for the fulfillment of the Contract in strict accordance with the Contract Documents. The work shall be complete, and all work, materials, and services not expressly shown or called for in the Contract Documents which may be necessary for the complete and proper construction of the work in good faith shall be performed, furnished, and installed by the **Contractor** as though originally so specified or shown, at no increase in cost to the **City**. Well site locations are shown in the Figures Sections as Figures 1 through 9. Well details are presented in Table 1 and illustrated in Figures 10 through 17.
2. Work covered by Contract Documents
 - a. The work required for the construction of the monitoring wells will include but not be limited to the following items:
 - 1) Obtain appropriate permits for the installation of described monitoring wells
 - 2) Move on, provide temporary facilities, and move off a minimum of six (6) and up to eight (8) sites at different locations. The **Contractor** shall mobilize at the first well site within 30 calendar days after receipt by the **Contractor** of the Notice to Proceed from the **City**.
 - 3) Drill up to eight (8) 8-inch diameter pilot holes, to the depths listed in Table 1, and shown on Figures 10 through 17, using the mud rotary drilling method. Table 1 is provided in the Figures Section. Collect drill cuttings at 10-foot intervals or changes in sediment type.
 - 4) Conduct geophysical (electric logs) of the eight (8) pilot holes.
 - 5) Ream the 8-inch diameter pilot holes to the diameters shown in Table 1. Clean-out the 8-inch diameter boreholes to the depths as listed in Table 1 or to depths as specified by the **Consultant** based on the geophysical logging.
 - 6) Construct twenty-four (24), 2.5-inch-diameter monitoring wells in the eight (8) boreholes to depths as listed in Table 1 and shown in Figures 10 through 17.
 - 7) Develop the monitoring wells by swabbing and airlifting and clean out the monitoring well to their total depths using a bailer or airlift.
 - 8) Provide temporary pumps to pump the wells until water is clear to allow water quality sampling by the **Consultant**.
 - 9) Furnish and install eight (8) concrete pads, enclosures, and bollards.

1.02 PROJECT CONDITIONS

A. General Conditions

1. The monitoring well locations shown in Figures 1 through 9 are generally flat, publically accessible, with some native grasses. Few locations have nearby trees, a generally small work area, and have a slight grade as well as greater vehicle traffic. If impact to surrounding trees is required, the **Contractor** shall work with the **City** to determine proper mitigation measures. No overhead powerlines are present at any of the sites. One site is within 50 feet of an underground gas line and will required notification to PG&E prior to beginning work. Locations may be near flowing creeks, residential neighborhoods, or business parks.
2. Drilling materials are expected to include sand, silt, clay, and gravel. Geologic formations expected to be encountered include the Riverbank, Laguna, Mehrten, and Ione Formations. Hard drilling through consolidated and cemented sandstone, conglomerate, and lahars may be encountered within the Mehrten for between 50- and 100-foot intervals, based on information from *Well Installation Completion Report Western Placer County AB303 Grant and City of Roseville ASR Well Installation Project* (MWH 2011).

B. Activities by Others

1. The **Contractor** shall cooperate fully with all utility forces, regulating agencies, the ingress/egress landowner, and personnel of the **City** and the **Consultant**.

C. Noise Abatement

1. The work shall be carried out as quietly as possible to prevent possible annoyance to nearby residents. Unnecessary noise shall always be avoided. The **Contractor** shall comply with the requirements of any and all local ordinances and the instructions of the **Consultant**.

D. Contractor Use of the Project Site

1. The **Contractor's** use of the project site shall be limited to the construction operations, including on-site storage of materials, sanitary facilities, and field equipment.
2. The **Contractor** shall be responsible for site protection of equipment and drill sites.
3. **City** ordinances allow for construction activities to occur between 7:00 AM to 5:00 PM, Monday through Saturday. No work shall be allowed on Sundays or national holidays.

1.03 QUALITY ASSURANCE

A. Pre-Construction Conference

1. The **Contractor** shall contact the **Consultant** to arrange for conference date and time. Conference shall occur no later than five (5) days after **Contractor's** receipt of the Notice of Award.
2. Prior to the commencement of work at the site, a pre-construction conference will be held at a mutually agreed time and place which shall be attended by the **Contractor**, the **Contractor's** superintendent, and all subcontractors as appropriate. Other attendees will

include: **Consultant**; **City**; governmental representatives as appropriate; others as requested by the **Contractor**; **City**, or **Consultant**.

3. The **Consultant** will preside at the pre-construction conference and will arrange for keeping the minutes and distributing the minutes to all persons in attendance.
4. Purpose of conference
 - a. The purpose of this pre-construction conference is to designate responsible personnel and establish a working relationship. Matters requiring coordination will be discussed and procedures for handling such matters established. The complete agenda will be furnished to the **Contractor** prior to the meeting date, which may include the following:
 - 1) **Contractor's** projected schedule.
 - 2) Water for construction.
 - 3) Transmittal, review, and distribution of the **Contractor's** submittals.
 - 4) Processing applications for payment.
 - 5) Maintaining record documents.
 - 6) Critical work sequencing.
 - 7) Field decisions and Change Orders.
 - 8) Use of project site, storage areas, security, housekeeping, and **Consultant's** needs.
 - 9) Major equipment deliveries and priorities.
 - 10) The **Contractor's** assignments for safety and first aid.
 - 11) Labor compliance requirements and issues.

PART 2 MATERIALS

(Not Used.)

PART 3 EXECUTION

(Not Used.)

END OF SECTION

SECTION 01501

TEMPORARY FACILITIES

PART 1 GENERAL

1.01 SUMMARY

A. Section Includes:

1. Temporary facilities, utilities including but not limited to water, electrical power, drainage, sanitary facilities, lighting, and security.

B. Measurement and Payment

1. No price is fixed for TEMPORARY FACILITIES in the proposal. The **Contractor** is to do the work or furnish materials and equipment to complete all the work as may be needed to provide temporary facilities.
2. The cost of providing such temporary facilities as needed to complete the work or furnishing materials or equipment not otherwise specified in the Special Provisions or Technical Specifications shall be included in the LUMP SUM price bid for the BID ITEM MOBILIZATION and no additional compensation shall be paid.

1.02 WATER

- A. The **Contractor** shall arrange for construction water at the site one week, five (5) working days, prior to the pre-construction meeting.
- B. Water shall be obtained from municipal fire hydrants for use by the **Contractor**. The **Contractor** shall obtain an approved back flow prevention device from the **City** for use in connecting to the hydrant. A refundable deposit is required.
- C. All water necessary for drilling and construction of the monitoring wells shall be conveyed or transported to the drilling sites by the **Contractor**.
- D. Water used for well drilling shall be kept free from contamination and shall conform to the requirements of the state and local authorities for potable water and water well drilling.

1.03 ELECTRICAL POWER

- A. The **Contractor** shall provide, at his own expense, all electric power required for construction, testing, general and security lighting, and all other purposes whether supplied through temporary or permanent facilities. The **Contractor** may arrange with the local utility to provide adequate temporary electrical service at a mutually agreeable location or provide his own generating equipment provided it meets the conditions of the County Noise Ordinance.
- B. When power cords are used at the site, the **Contractor** shall provide adequate job site electrical distribution facilities conforming to applicable codes and safety regulations.

1.04 DRAINAGE

- A. **Contractor** shall prevent any drilling, equipment, and/or other fluids from entering the on-site drainage facilities, nearby creeks, or drainage tributaries.

1.05 SANITARY FACILITIES

- A. The **Contractor** shall provide and maintain suitable chemical toilets or water closets (cleaned a minimum of twice a week) at the monitoring well locations. Upon completion of the contract work, the **Contractor** shall remove such toilets and disinfect the premises in the event of a spill or leakage.

1.06 LIGHTING

- A. The **Contractor** shall provide temporary lighting in all work areas sufficient to maintain a lighting level during working hours not less than the lighting level required by California OSHA standards. When used, lighting shall be shielded so that adjacent property owners are not adversely impacted.

1.07 NUISANCE WATER

- A. It is anticipated that nuisance water, such as drilling water, rainfall, groundwater or surface runoff may be encountered within the construction site during the period of construction under this contract. The **Contractor** shall at all times protect the work from damage by such waters and shall take all due measures to prevent delays in progress of work caused by such waters. The **Contractor** shall dispose of nuisance water without adverse effects upon the **City's** property or any other property.

1.08 WATER DISPOSAL

- A. The **Contractor** should expect to transport and dispose of drilling muds, thin down water, and initial development water off-site.
- B. Water purged from monitoring wells during pump development must not flow off-site or into the stormwater system. Purged water can be applied to the adjacent land and allowed to percolate on-site following approval from the **City** prior to pump development.

1.09 FENCES

- A. Fences, Barricades, Warning Signs, and Lights.
 - 1. When used, shall conform to CAL-OSHA regulations, other State of California and local codes, rules, regulations, and ordinances for protection of workers, public and private property, and provide, install and maintain barricades, warning devices and other protection required therefor.
 - 2. **Contractor** shall provide temporary barriers as needed to protect materials, equipment, and miscellaneous items from theft, vandalism, unauthorized access and/or harm.

PART 2 PRODUCTS

(Not used.)

PART 3 EXECUTION

(Not used.)

END OF SECTION

SECTION 01505

MOBILIZATION

PART 1 GENERAL

1.01 SUMMARY

A. Section includes:

1. Mobilization shall include the obtaining of all permits; the transportation of personnel, equipment; materials, temporary facilities, site cleanup, and/or operating supplies to the site and from (Demobilization) the site, all as required for the proper performance and completion of the work.
2. Mobilization shall include but not be limited to the following principal items:
 - a. Moving onto and off the site all **Contractor's** equipment, materials, supplies required for work to commence, continue, and finish within the contracted time.
 - b. Installing, operating, maintaining, and removing temporary facilities including but not limited to storage tanks and drainage for well development and testing, construction water, electrical power, communications (telephone), security (fencing and other as required), traffic control, portable sanitary facilities, and lighting.
 - c. Obtaining all required permits and posting all OSHA required notices and establishment of safety programs.
 - d. Submittal and updating of the Projected Construction Schedule as directed by the **City or Consultant**.
 - e. Site cleanup.

B. Related Sections

1. Section 01501 - Temporary Facilities
2. Section 02523 – 440 - Site Cleanup

C. Measurement and Payment

1. Measurement

- a. The unit for this work is Lump Sum for all work associated with mobilization and demobilization.

2. Payment

- a. Unit prices for mobilization shall be as set forth in the BID SCHEDULE for items:
 - 1) Item No. 1 Mobilization/Demobilization
 - 2) Item No. 2 Site to Site Mobilization
- b. Progress payments and final payment may be made for this Item.

PART 2 PRODUCTS

(Not Used)

PART 3 EXECUTION

3.01 WELL PERMITS

- A. Well permits for all well sites shall be obtained from the City of Roseville Environmental Utilities Engineering Division (916-774-5669). Permits from the City will be provided at no cost to the Contractor.

END OF SECTION

SECTION 02523-141

PILOT BOREHOLE DRILLING

PART 1 GENERAL

1.01 SUMMARY

A. Section includes:

1. This section includes the products, materials, and procedures associated with the drilling of a pilot boreholes with subsequent reaming operations of the pilot boreholes to reach the final diameter and collecting formation samples for up to eight (8) boreholes to approximate depths below ground surface as indicated in Table 1 and Figures 10 through 17.
2. The method of drilling shall be by mud rotary drilling in which the uncased wall of the drill hole is held in place at all times with a circulating drilling fluid.

B. Related sections:

1. Section 02523-160: Drilling Fluid
2. Section 02523-180: Geophysical Surveys
3. Section 02523-241 Borehole Reaming

C. Measurement and Payment

1. Measurement

- a. The unit for this work is Linear (vertical) Feet of final borehole drilled. The value for payment shall be as measured to the nearest foot. Measurement shall be as taken from the bottom of the borehole as specified and as verified by the geophysical surveys.

2. Payment

- a. Unit prices for mobilization shall be as set forth in the BID SCHEDULE for items:

- 1) Item No. 3, 8-inch Diameter Pilot Borehole Drilling.

1.02 SUBMITTALS

- A. The **Contractor** shall submit a drilling equipment schedule listing proposed equipment with sizes and rated capacities to the **Consultant** upon award of the Contract.
- B. The **Contractor** shall submit Safety Data Sheets (SDS) for all drilling fluid additives upon award of the Contract.

PART 2 PRODUCTS

2.01 MATERIALS

A. Drilling Fluid

1. The **Contractor** shall maintain controlled drilling fluid material characteristics per Section 02523-160: Drilling Fluid.
2. The **Contractor** will record these measurements on the daily drilling report.

2.02 EQUIPMENT

A. Drill Rig:

1. The **Contractor** shall provide a complete mud rotary drilling unit of sufficient size and capacity to conduct the drilling operations required in these Specifications.
2. The drilling unit(s) and associated equipment shall be in good condition and of sufficient capacity to lower the specified casing assemblies to the specified depths without the use of flotation devices or “float plugs.”
3. The drilling pipe shall be of adequate size to conduct drilling, shall be in good condition, and shall be connected by standard tool or flanged-type joints. Each pipe shall be measured and recorded in a tally book available for review at all times by the **City**. Mast capacity should be at least 150% of the casing load anticipated and the rig capacity shall not be limited by insufficient power train components (engine and clutch).
4. The **Contractor** shall provide tools, accessories, power, lighting, water, other equipment, and experienced personnel necessary to conduct efficient drilling operations at the project site at all times.

B. Mud Tanks

1. Above ground mud tank(s) shall be of a volume and shape to allow proper settlement and removal of cuttings from the drilling operations and return a drilling fluid suitable for mud rotary drilling. If required, the above ground tanks shall be cleaned to maintain proper drilling fluid characteristics.

PART 3 EXECUTION

3.01 PREPARATION

A. Equipment Disinfection

1. All equipment used down hole or that comes into contact with materials or equipment down hole shall be thoroughly cleaned and disinfected prior to use.

3.02 CONSTRUCTION

A. Pilot Borehole

1. An 8-inch diameter pilot hole shall be drilled to the total depth for the boring as indicated in Table 1. The pilot borehole may be reamed as specified in Borehole Reaming section 02523-241. Cuttings shall be collected at 10-foot intervals and at changes in sediment type.

B. Sequences of Operations

1. Borehole Drilling

- a. The pilot borehole shall be drilled with diligence and without undue delay in a continuous operation to depths below ground surface as listed in Table 1, or other depth as directed by the **Consultant**.
 - 1) Drilling fluid properties must conform to those specified in Section 02523-160: Drilling Fluid.
 - 2) Formation samples shall be collected as specified in this Section.
- b. The **Consultant** will be on-site at the times necessary during the drilling operations to direct the **Contractor** as to the exact drilling depth. The exact depth will be dependent upon cuttings and lithology from the borehole.
- c. The **Contractor** shall not drill below the depth for each site as indicated in Table 1 unless directed by the **Consultant** in writing.
- d. The **Contractor** shall maintain a record indicating the time and depth when drilling fluid additives are mixed. The **Contractor** shall also record the approximate amount of water added to the drilling fluid during each shift.
- e. Upon completion of the pilot borehole a geophysical survey shall be conducted.

C. Formation Sampling

1. The **Contractor** shall collect representative formation samples during the drilling of the borehole. Samples will be collected at each formation change in addition to samples taken at 10-foot intervals.
 - a. The **Contractor** shall provide a sample collection splitter box in the discharge pipe to the mud tanks or other approved methods to obtain representative samples as approved by the **Consultant**.
 - b. The **Contractor** shall place each sample in a quart-size zip-lock freezer plastic bag. All containers will be labeled to indicate the well number and depth interval of the collected sample and stored in a manner to prevent breakage or loss. The **Contractor** will furnish containers. The **Contractor** shall prepare a "drillers log" of the formation samples indicating the types of soil encountered and the associated formation changes. The samples shall be laid out during

drilling operations in a location that is easily accessible for inspection and in an area that will not be susceptible to damage from construction activity or site traffic.

3.03 FIELD QUALITY CONTROL

A. Reports

1. A daily report with a drilling log including shift records of construction activities shall be prepared by the **Contractor** for the **Consultant**. The report shall include but shall not be limited to:
 - a. A record shall be kept showing any variation in the addition, and amount of drilling fluid or water required during the drilling operation. The depths at which such changes are required shall be shown in the daily reports.

END OF SECTION

SECTION 02523-160

DRILLING FLUID

PART 1 GENERAL

1.01 SUMMARY

A. Section Includes:

1. This section includes the products, materials, and procedures associated with the drilling fluid used throughout the construction of the monitoring wells to facilitate the removal of formation cuttings and stabilize drilling and completion operations. This work includes all materials, labor, tools, and equipment to maintain and utilize the drilling fluid.

B. Measurement and Payment

1. Measurement

- a. No measurement shall be made for Drilling Fluid.

2. Payment

- a. No payment for Drilling Fluid will be made in this contract. Payments and final payment for any Drilling Fluid work or costs shall be included under Bid Items No. 4, 6, 7, and 8.
- b. Transport of used drilling mud and drill cuttings shall be made as set forth in the BID SCHEDULE, Bid Item No. 19 and No.20.

C. Related Sections

1. Section 01501 Temporary Facilities, Water
2. Section 02523-141 Pilot Borehole Drilling
3. Section 02523-180 Geophysical Logs
4. Section 02523-241 Borehole Reaming

1.02 REFERENCES

- A. Standard 13-A, Drilling Fluid Materials, American Petroleum Institute (API).
- B. Standard 13-B, Recommended Practice Standard Procedure for Field Testing Oil-Based Drilling Fluids, API.

1.03 SUBMITTALS

A. Drilling Fluids Program

1. The **Contractor** shall submit to the **Consultant** for approval prior to the pre-construction meeting a Drilling Fluids Program that will include but not be limited to:
 - a. A list of all additives other than potable water that are proposed or anticipated to be used to stabilize or otherwise aid in drilling

operations. Material Safety Data Sheets (SDS) shall be submitted with each proposed additive.

PART 2 PRODUCTS

2.01 MATERIALS

A. Drilling Fluid

1. Only potable water shall be used in drilling fluids. The **Contractor** shall provide potable water for drilling fluid purposes. See Section 01501 Temporary Facilities, Water.
2. Drilling additives, when approved to be used by the **City**, shall meet or surpass Standard 13-A, Drilling Fluid Materials, API and shall be NSF approved.
3. All drilling fluid additives used will comply with industry standards and practices for use in the construction of a water supply well. The additives shall be applied and used as prescribed by the manufacturer and shall be reviewed with respect to the impact they may impose on the successful development of the well.

2.02 EQUIPMENT

A. Drilling Fluid Control Equipment

1. To maintain drilling fluid density and viscosity, the **Contractor** shall employ the necessary equipment to facilitate a relatively rapid dropout or removal of cuttings without the use of a below ground mud pit. The **Contractor** shall utilize such equipment as shale shakers, desanders/desilters, and other as required to remove cuttings from the drilling fluid to maintain drilling fluid properties.
2. A Marsh Funnel shall be supplied and used for the measurement of drilling fluid.
3. Mud balance equipment to determine Weight (fluid density) shall be supplied by the **Contractor** in accordance with standard practice and API RP13B—Recommended Practice Standard Procedure for Field Testing Oil-Based Drilling Fluids and as applied to fresh water municipal well drilling.

B. Tank/Shaker Table

1. The **Contractor** shall provide mud tank/shaker table at the project site.
2. Tanks shall be of such configuration that proper settlement of solids from the drilling fluid occurs prior to exiting the tank and fluid return to the borehole.

PART 3 EXECUTION

3.01 APPLICATION

A. Drilling Fluid

1. The Contractor shall maintain controlled drilling fluid characteristics during the entire operation of well construction.
2. Should loss of circulation or other drilling problems require the addition of other additives, prior approval of the **City** and the **Consultant** is required. The **Contractor** shall take into consideration additional development procedures to ensure the complete removal of additives should they be used.
3. If proper control of the drilling fluid is not maintained to the satisfaction of the **Consultant**, the **Contractor** shall be required to retain or employ, at his own expense, an experienced qualified mud engineer on the job during all operations to design, supervise and maintain drilling fluid characteristics to the satisfaction of the **Consultant**.
4. The **Contractor** shall maintain the drilling fluid properties as follows:

Parameter	Criteria	Units
Weight (Fluid Density)	9.33 to 11.36	Pounds per gallon, lb./gal.
Viscosity, Marsh Funnel	32 to 50	Seconds per quart, sec./qt.
Sand Content	0 to 4	Percent (%) by Volume

5. The **Contractor** is cautioned to maintain the minimum viscosity of the drilling fluid that will raise cuttings and adequately condition the wall of the hole. The **Contractor** shall remove all mud cake on the wall of the borehole during the development of the well or placing of the gravel.
6. All drilling fluids shall be disposed of by the **Contractor** in accordance with the applicable ordinances and regulations of governmental agencies having jurisdiction. No additional compensation will be paid to the **Contractor** for disposal of cuttings or drilling fluids.

3.02 DRILL CUTTINGS

A. Containment

1. Mud tanks shaker tables will be allowed for the collection and settlement of drill cuttings.

B. Disposal

1. All drill cuttings and drilling mud shall be contained and disposed of by the **Contractor** off-site. Drilling cuttings shall be stockpiled and transported off-site following completion of the monitoring well. No additional compensation will be paid to the **Contractor** for disposal of cuttings or drilling fluids.

3.03 RECORDS/QUALITY CONTROL

A. Drilling Fluid Properties

1. Drilling fluid properties shall be tested, measured, and recorded once during each 60 feet of borehole or reaming drilled or 4 hours of circulation time, whichever is more frequent. The recorded results shall be included in the daily report.
2. Failure by the **Contractor** to test, measure, record, or provide such drilling fluid data to the **City** or the **Consultant** in accordance with this specification may result in delay of work at no cost to the **City**.

END OF SECTION

SECTION 02523-180

GEOPHYSICAL SURVEYS

PART 1 GENERAL

1.01 SUMMARY

A. Section Includes

1. This section includes the products, materials, and procedures/services associated with geophysical surveys proposed in the pilot borehole(s). The **Contractor** shall secure the services of a firm approved by the **Consultant** to conduct the surveys.

B. Related Sections

1. Section 02523-141 Pilot Borehole Drilling
2. Section 02523-160 Drilling Fluid

C. Measurement and Payment

1. Measurement

- a. The unit for this work/service is lump sum and includes any incidentals thereof.
- b. The **Consultant** shall be present to witness the geophysical logging of the pilot boreholes.
- c. Measurements of the service provided shall be per log completed as recorded by the **Consultant**. If more or less logging is completed as stated in this specification, measurement for payment shall be proportioned accordingly; proportion shall be as agreed upon by the **Contractor** and **City** or **City Representative**.
- d. There will be no additional payment for rig time or idle time while logging is being run. No standby time will be paid for a 24-hour period after the logs are run while the **Consultant** interprets the logs.

2. Payment

- a. Unit prices for mobilization shall be as set forth in the BID SCHEDULE for items:
 - 1) Item No. 5 Geophysical (E-Logs).
- b. Progress payments and final payment shall be made for this Item.

PART 2 PRODUCTS

2.01 QUALIFIED FIRMS

A. The following firms are approved by the **City** to conduct geophysical and other borehole surveys; no other firm shall be used. The **Contractor** shall list one of these firms in the Subcontractor's list provided as part of the Bid Package:

1. Pacific Surveys, 4456 El Circuito, Claremont, CA 91711, (909) 625-6262
2. Dewey Data Inc, 1634 W Alpine Ave, Stockton, CA 95204, (209) 942-0480

2.02 LOGGING

A. Electric Logs

1. The electric logs shall consist of a spontaneous potential, 16-inch normal, 64-inch normal, and point resistivity.
2. The anticipated horizontal scale for the printed plots of the spontaneous potential shall be 20 millivolts per inch. The anticipated horizontal scale for the plot of the 16-inch normal, 64-normal is 40 ohmmeter²/meter per inch.
3. The vertical scale for all printed plots of logs shall be 20 feet per inch. The vertical adjustment required to determine the true depth for each of the electric log curves shall be indicated on the plot.

2.03 EQUIPMENT

- A. The logging shall be run using digital logging equipment recording both real time and on analog paper during the actual logging.
- B. Digital information is to be stored on a compact disk. The information shall be stored in ASCII and DXF formats and shall record 1 data point for every foot logged in the borehole as a minimum.

2.04 REPORT FORMAT

- A. All logs and heading shall comply with the API RP-38 standards for format and log scales. All pertinent well data is to be recorded on log headings.
- B. The electric conductivity of the mud filtrate shall be measured and entered into each log.

2.05 CALIBRATION

- A. The well surveying Company is required to present proof of the last equipment calibration. This calibration must be printed on each log at the time of run. The calibration date should not be greater than 14 days prior to the date of the surveying.

PART 3 EXECUTION

3.01 PROCEDURES

A. Geophysical Logging

1. Upon completion of the borehole, digital geophysical logs shall be run by a firm specializing in Geophysical Logging retained by the **Contractor** and approved by the **Consultant**.
2. Before running geophysical logs, the **Contractor** shall cease drilling and circulate fluid for not less than 1 hour.
3. The logs will be run in the presence of the **Consultant**. The geophysical logs shall become the property of the **City** at the time the logging is completed.
4. The logging speed for all logs shall be 40 feet per minute, unless otherwise approved by the **Consultant**.
5. The **Contractor** shall be required to provide whatever assistance may be necessary to accomplish the geophysical logs; this includes reaming the borehole should logging equipment fail to reach the bottom.
6. The **Contractor** shall perform necessary measures after the geophysical logs are run to ensure the stability and preservation of the pilot bore.
7. The **Contractor** shall provide, immediately upon completion, 3 field copies of each log and one electronic file of each log to the **Consultant** for interpretation.
8. If logging information indicates that further development is not warranted, the **Consultant** reserves the right to terminate further work on the pilot hole.

END OF SECTION

SECTION 02523-241

BOREHOLE REAMING

PART 1 GENERAL

1.01 SUMMARY

A. Section includes:

1. Reaming of the pilot borehole to the final borehole diameter or any other reaming required in completion of the work as specified. Reaming shall be conducted to complete the borehole to the sizes and depths specified in Table 1 and Figure 10 through 17.

B. Related Sections:

1. Section 02523-141: Pilot Borehole Drilling
2. Section 02523-160: Drilling Fluid

C. Measurement and Payment

1. Measurement

- a. The unit for this work is Linear (vertical) Feet of borehole reamed. The value for payment shall be as measured to the nearest foot.

2. Payment

- a. Unit prices for mobilization shall be as set forth in the BID SCHEDULE for items:
 - 1) Item No. 6, 14-inch Diameter Reaming
 - 2) Item No. 7, 12-inch Diameter Reaming
 - 3) Item No. 8, 8-inch Diameter Reaming/hole cleanout
 - 4) Item No. 19, Thin-down Water, Development Water, and Mud Disposal
 - 5) Item No. 20, Drill Cuttings Disposal

PART 2 PRODUCTS

2.01 MATERIALS

A. Drilling Fluid

1. The **Contractor** shall maintain controlled drilling fluid characteristics during the entire drilling operation as specified in Section 02523-160, Drilling Fluid.

PART 3 EXECUTION

3.01 CONSTRUCTION

A. Sequences of Operations

1. Reaming Borehole

- a. Upon completion of the Geophysical Surveys as specified in Section 02523-180, and written authorization by the **Consultant**, the **Contractor** shall proceed with reaming the pilot borehole, if necessary.
- b. The borehole shall be reamed to complete the borehole to the sizes and depths specified in Table 1, or as directed by the **Consultant**.
- c. Upon completion of reaming, the **Contractor** shall clean out the remaining portions of the 8-inch diameter borehole to the depths listed in Table 1 or to the depths specified by the **Consultant** based on the geophysical logging.
- d. A record shall be kept showing any variation in the addition, and amount of drilling fluid or water required during the drilling operation. The depths at which such changes are required shall be shown in the daily reports.

END OF SECTION

SECTION 02523-281

MONITORING WELL CASING AND SCREEN

PART 1 GENERAL

1.01 SUMMARY

A. Section includes:

1. This work includes all materials, labor, tools, and equipment to install monitoring well casing as specified for a gravel-packed single or nested monitoring wells concentric within the drilled and accepted borehole. Table 1 lists the monitoring well depths. Figure 10 through 17 show the construction details for each well.

B. Measurement and Payment

1. Measurement

- a. The unit for this work is Linear (vertical) Feet of blank or screened well casing installed. The value for payment shall be as measured to the nearest foot.

2. Payment

- a. Unit prices for payment of blank and screened sections shall be as set forth in the BID SCHEDULE:
 - 1) Item No. 9, 2.5" Dia. SCH 80 PVC Well Casing
 - 2) Item No. 10, 2.5" Dia. SCH 80 PVC Well Screen, 0.032 slot
 - 3) Item No. 19, Thin-down Water, Development Water, and Mud Disposal
 - 4) Item No. 20, Drill Cuttings Disposal
- b. Progress payments and final payment can be made for these Items.

1.02 REFERENCES

- A. American Society of Testing and Materials (ASTM)

1.03 SUBMITTALS

- A. The **Contractor** shall provide documentation that the screen meets this specification, and proof of casing and screen manufacturer.

PART 2 PRODUCTS

2.01 MATERIALS

A. Blank Casing (PVC)

1. All PVC casing and material shall be new and unused.

2. The well casing shall be manufactured in accordance with ASTM F 780 with the following additions.
 - a. Well casing shall be coupled.
 - b. The PVC casing shall be Schedule 80.
- B. Well Screen (PVC Mill Slot)
 1. All PVC screens and material shall be new and unused.
 2. The screen shall:
 - a. Have a 0.032-inch slot size,
 - b. Shall be constructed from Schedule 80, and
 - c. Be coupled.
 3. The well screen perforations shall be mill slot by the manufacturer.

PART 3 EXECUTION

3.01 GENERAL

- A. Well casing shall be continuous and watertight from the top to the bottom of the installed casing except for well screen sections.
- B. **Contractor** shall provide caps and plugs for the top and bottom of the well casing.
- C. The tremie pipe for filling the annular space with filter pack shall be installed before placement of the well casing and screens.

3.02 SCHEDULE

- A. Within eight (8) normal working hours of completion of the geophysical survey, the **Consultant** will provide the **Contractor** with a written schedule for the final position and depths of the screen and blank sections including the type of material to be used.

3.03 JOINTS (PVC)

- A. The **Contractor** may decide the appropriate lubricating joint compound, if any. However, the pipe compound must be approved for use for drinking water. Grease or compounds containing volatile organic compounds will not be allowed.

3.04 CENTRALIZERS

- A. PVC guides shall be attached to all blank casing sections. Centralizers will be constructed of stainless steel or PVC. The centralizers will be installed at not more than 60 feet apart to centralize and hold the casings in the proper position until the gravel and sanitary seals are in place. At least one centralizer will be set above and below each screened interval. Centralizers shall not be placed onto the screen sections.

3.05 SEQUENCE INSTALLATION OF CASING, SCREEN, AND OTHER PIPES

- A. Upon completion of the drilling and/or reaming, evaluation of the geophysical survey, backfilling, and approval from the **Consultant** that the borehole is acceptable, the **Contractor** may proceed with the construction of the monitoring well.
- B. The **Contractor**, after landing the casing at its correct location, shall reduce the drilling fluid viscosity to 30 seconds per quart (sec./qt.) by Marsh funnel and density to less than 8.9 pounds per gallon (lbs/gal).
 - a. Fluid properties shall be changed by the addition of fresh water. Care should be exercised to avoid setting up a density inversion in the borehole between the drilling fluid and the fresh water.
 - b. Circulation shall be commenced using fluid from the mud tanks having the same viscosity as the conditioned fluid.
 - c. Circulation shall be maintained for at least 30 minutes following the measured change in the drilling fluid.
- C. Water generated during the thin down process shall be contained, transported, and properly disposed of off-site. No water shall be allowed to flow off property or to the stormwater system.
- D. Installation of the casing shall proceed in accordance with the contract drawings with the circulation tremie pipe remaining and circulation continuing during the installation. The installation shall be by methods that will ensure no damage to casing, screen, borehole, or other appurtenances will occur.
- E. The use of floatation plugs to land and set the well string will not be permitted.
- F. The well casing string shall be suspended in tension from the surface by means of an appropriate hanger or clamp. The bottom of the casing shall be at a sufficient distance above the bottom of the reamed hole as to ensure that none of the casing will be supported from the bottom of the hole.
- G. The **Contractor** shall gain the verification that the total weight of the well string is supported by the drill rig by having the **Consultant** observe the dial weight indicator.
- H. If, for any reason, the casing cannot be landed in the correct position or at a depth acceptable to the **Consultant**, the **Contractor** shall remove the casing and ream the borehole. In no event shall the **Contractor** attempt to drive or “spud” the well string.
- I. The well casing shall be completed to a minimum height of two (2)-feet above ground surface and plugged with an expandable plug.
- J. Upon completion of well development activities, the casing shall be sealed with a water-tight, expandable plug.

- K. If, for any reason the casing cannot be placed in the correct position, or at a depth acceptable to the **Consultant**, the **Contractor** shall construct another well immediately adjacent to the original location and complete this well in accordance with the specifications and drawings at no additional cost to the **City**. The abandoned hole shall be properly sealed at the **Contractor's** expense.
- L. If any of the casings should collapse prior to well completion, they shall be withdrawn and replaced at the **Contractor's** expense.
- M. All work required to be repeated, and all additional materials, labor, and equipment required, shall be furnished at the expense of the **Contractor** and no claim for additional compensation shall be made or be allowed therefore, except as specifically provided herein.

END OF SECTION

SECTION 02523-321

BOREHOLE SEALS AND GRAVEL ENVELOPE

PART 1 GENERAL

1.01 SUMMARY

A. Section includes:

1. This work includes all materials, labor, tools, and equipment to install the borehole seals (bentonite and bentonite slurry) to isolate the monitoring wells and the gravel envelope (pack) to surround the well screens. Figures 10 through 17 shows typical seal and gravel envelope placement for each well.

B. Related Sections

1. Section 02523-141: Pilot Borehole Drilling
2. Section 02523-160: Drilling Fluid
3. Section 0243-241: Borehole Reaming
4. Section 02523-331: Borehole Sanitary Seals

1.02 MEASUREMENT AND PAYMENT

1. Measurement

- a. The unit for this work is Linear (vertical) Feet of borehole seals (bentonite and common fill gravel) installed.
- b. The unit for this work is Linear (vertical) Feet of gravel envelope installed and shall be based on measurement from the top of the borehole seal or annular seal and shall include payment for consolidating and maintaining the gravel envelope through development and final acceptance of the monitoring well.

2. Payment

- a. Unit prices for payment shall be as set forth in the BID SCHEDULE for items:
 - 1) Item No. 11 Borehole Seals
 - 2) Item No. 12 Gravel Envelope
 - 3) Item No. 13 Sanitary Seal

1.03 SUBMITTALS

A. Prior to gravel packing operation:

1. A description and recent (less than 1-month) certified sieve analysis of gravel envelope to be used to surround the well screens must be submitted

to the **Consultant** at least three (3) days prior to the anticipated date of shipment of gravel from the supplier.

2. The **Contractor** shall submit for approval the type of bentonite to be used for the seals.
3. The **Contractor** shall submit for approval, the type of bentonite slurry to be used.
4. The **Contractor** shall submit a written estimate of the volume of gravel envelope to be installed in the monitoring well annulus.

1.04 DELIVERY, STORAGE, AND HANDLING

- A. The gravel, if stockpiled on site, shall be separated from the adjacent ground and kept free of all foreign matter at all times.

PART 2 PRODUCTS

2.01 MATERIALS

A. Borehole Seals:

1. Bentonite Slurry: Bentonite slurry shall be used adjacent formations where the gravel envelope is not installed, and impervious sealing material is not required.
2. Bentonite:
 - a. The bentonite shall be 3/8 or 1/2 -inch diameter pellets or chips manufactured by Barrio or approved equal.
 - b. Used driller's mud or cuttings or pellets or chips from drilling the borehole shall not be used.

B. Gravel Envelope

1. All gravel shall be hard, water worn gravels, washed clean of shale, mica, clay, dirt, loam and organic impurities of any kind (crushed gravel will not be accepted). The materials shall be mostly siliceous with a limit of five (5)- percent by weight of calcareous material. It shall be semi to well-rounded and graded.
2. All gravel is subject to approval by the **Consultant** prior to use in the packing process. For bidding purposes:
3. The gravel envelope filter pack shall be:
 - a. SRI 8 x 16 or approved equal.

2.02 EQUIPMENT

- A. A gravel pump will be required to install the gravel. A gravel hopper as part of an approved gravel installation system shall be employed to measure the gravel placed downhole.
 1. The **Contractor** shall submit a schematic drawing of the gravel installation system.

- B. A minimum of 2-inch diameter tremie pipe shall be provided to reach within five (5) feet of the bottom of the borehole.
- C. A device approved by the **Consultant** shall be used to sound the level of the gravel throughout the placement of the envelope.

PART 3 EXECUTION

3.01 PROCEDURES

A. Borehole Seal Placement

1. A combination of bentonite and bentonite slurry shall be used to seal the bottom of the 8-inch pilot hole as specified by the **Consultant**
2. The **Contractor** shall submit his estimate of the volume of bentonite and bentonite slurry to be installed.
3. Prior to placement of the bentonite or bentonite slurry, the drilling fluid shall be thinned with clean water. Initial circulation of fluid will be accomplished through the tremie pipe. The drilling fluid viscosity must be 30 sec./qt. Per Marsh funnel measurement and the drilling fluid density below 8.9 lbs/gal before gravel packing commences. Refer to Section 02523-160 Drilling Fluid
4. The borehole seals, bentonite slurry, and bentonite shall be installed using a tremie pipe and a positive placement technique from the bottom of the borehole.
 - a. The tremie pipe shall be removed in approximately twenty (20) foot intervals when the common gravel in the borehole reaches the bottom of the tremie pipe.
 - b. At no time shall the bottom of the tremie pipe be greater than 40 feet above the top of the sealing material.
5. The sealing materials placement shall continue uninterrupted to the depth as specified by the **Consultant**.
6. The top of the seals shall be sounded to confirm the placement of the bentonite intervals, and to ensure that no bridging occurred during placement. Sounding shall occur after bentonite placement, and at the top of the borehole seals.
7. Bentonite clay shall be placed opposite potentially confining formations to prevent vertical movement of groundwater from the producing formations. Bentonite clay intervals will be installed from 10 feet below to 10 feet above a potentially confining unit.
8. The quantities of gravel initially placed around the casing and screen assembly shall not be less than the estimated volume of the annular space as determined by the **Consultant**.

- a. A quantity less than the computed value may be judged as an indication of voids and corrective measures may be required by the **Contractor**.
- b. If a significant (35%) difference between the estimated and actual volume of seal installed is found to exist, the discrepancy may be grounds for rejection of the well by the **Contractor**.

B. Gravel Envelope Placement

1. The **Contractor** shall submit his estimate of the volume of gravel to be installed.
2. The **Contractor** shall supply the devices required to measure the volume of gravel placed in the well as submitted and approved in the gravel installation system.
3. The gravel envelope shall be installed in the annular space between the reamed hole and the casing through the tremie pipe installed for the borehole seals.
 - a. The tremie pipe shall be removed in approximately twenty (20) foot intervals when the gravel in the borehole reaches the bottom of the tremie pipe.
 - b. At no time shall the bottom of the tremie pipe be greater than 40 feet above the top of the gravel during gravel installation.
4. The gravel placement shall continue uninterrupted until the height of the gravel envelope reaches the depth of the next borehole seal or annular seal as specified by the **Consultant**.
5. After the gravel envelopes have been placed to the depth specified, a swab shall be carefully worked opposite all screened sections. As the gravel settles, more shall be added. This operation shall continue until there is no further measurable settlement of the gravel.
6. Upon completion of the initial gravel placement and swab operation, and after removal of the swab, all rock, sand, and foreign materials shall be removed from the casing by bailing.
7. The quantities of gravel initially placed around the casing and screen assembly shall not be less than the estimated volume of the annular space as determined by the **Consultant** from the bit diameter and total depth.
 - a. A quantity less than the computed value may be judged as an indication of voids and corrective measures may be required by the **Contractor**.
 - b. If a significant (35%) difference between the estimated and actual volume of pack installed is found to exist, the discrepancy may be grounds for rejection of the well by the **Contractor**.

END OF SECTION

SECTION 02523-331

BOREHOLE SANITARY SEAL

PART 1 GENERAL

1.01 SUMMARY

A. Section includes:

1. This work includes all materials, labor, tools, and equipment to install the sanitary seal as specified.

B. Related Sections

1. Section 02523-160 Drilling Fluid

C. Measurement and Payment

1. Measurement

- a. The unit for this work is Linear (vertical) Feet of annular seal installed and shall be based on measurement from the bottom of the seal to the top of the seal, respectively, for any given sanitary seal.

2. Payment

- a. Unit prices for payment for the annular seals shall be as set forth in the BID SCHEDULE for items:

- 1) Item No. 13 Sanitary Seal

D. Progress payments and final payment can be made for this Item.

E. Measurement and Payment Procedures

1. Payment for the annular seal will be based on measurement of vertical feet of sand-cement grout installed.

1.02 DEFINITIONS

A. Sanitary Seal

1. Seals the annular space between the well casing and the borehole wall.

1.03 SUBMITTALS

- A. The **Contractor** shall submit the positive placement technique, which will be employed to place the annular seal for approval. The submittal shall include the equipment, appurtenances, and techniques proposed for placement of the seal under positive pressure.

- B. Certified test reports to show compliance with both the physical and chemical properties of the sealing material used for the seal is required including delivery receipts for commercially prepared and supplied sealing material. This includes additives for a quick-setting cement for a less than 24-hour set time per State Standards.

PART 2 PRODUCTS

2.01 MATERIALS

A. Sealing Material

1. Sand-Cement Sealing Material: A sand-cement sealing material shall be used for the annular seal.
 - a. Sand-Cement “grout”: “Sand-cement shall be mixed at a ratio of not more than 188 pounds of sand to one 94-pound sack of Portland cement (2 parts sand to 1 part cement, by weight) about 7 gallons of clean water, where Type I or Type II Portland cement is used. This is equivalent to a “10.3 sack mix.”
 - b. Cement: Cement used in sealing mixtures shall meet the requirements of American Society for Testing and Materials C150, Standard Specification for Portland Cement, including the latest revisions thereof.
 - 1) Special cement setting accelerators and retardants and other additives may be used in some cases with **City** approval. Special field additives for Portland cement mixtures shall meet the requirements of ASTM C494, Standard Specification for Chemical Admixtures for Concrete, including the latest revisions thereof. ASTM C150 Type I cement is equal to API Class A cement.
 - c. Water: Water used to prepare sealing mixtures should generally be of drinking water quality, shall be compatible with the type of sealing material used, be free of petroleum and petroleum products, and be free of suspended matter. The quality of water to be used for sealing mixtures shall be determined where unknown.
 - d. Additives: Materials used as additives for Portland cement mixtures in the field shall meet the requirements and latest revisions thereof, ASTM-C494, Standard Specifications for Chemical Admixtures for Concrete and be Approved by the **City** prior to use by the **Contractor**.
 - e. Mixing: Cement-based sealing materials shall be mixed thoroughly to provide uniformity and ensure that no lumps exist.
2. Variations: Ratios of the components of cement-based sealing materials can be varied, depending upon the type of cement and additives used. **City** and Environmental Health Department (Lead District for Permit) approval of variations must be received prior to placement.
3. Bentonite: Bentonite is allowed as an additive to cement-based sealing mixes, at a ratio of up to 6% by weight of cement used. If bentonite is to be used, it must be proposed in the submittal for sealing material.

B. Bentonite (Transition Seal)

1. The bentonite shall be 3/8 or 1/2 -inch diameter pellets manufactured by Bariod or approved equal.

2. Using driller's mud or cutting or pellets or chips from drilling the borehole shall not be used.

PART 3 EXECUTION

3.01 TYPES OF SEALS

A. Seal shall be composed of:

1. A minimum three (3) foot bentonite transition seal placed above the gravel envelope used around the monitoring well screen.

3.02 PROCEDURES

A. After approval from the **Consultant** to proceed with and at the completion of monitoring well construction, the Contractor shall install the sanitary seal.

B. The **Contractor** shall notify the permitting agency of the intent to place the seal and request inspection.

C. Placement of the Transition Seal:

1. Transition seals shall be installed using a tremie pipe.
2. The top of the seals shall be sounded to ensure that no bridging occurred during placement. Sounding shall occur after placement of sand packs or bentonite seals.

D. Annular Seal Placement

1. After completion of placement of the gravel envelope around the well screens, the **Contractor** shall place the sanitary seal to depths specified by the **Consultant**.
2. The sanitary seal will be placed in one continuous pour.
3. Where sealing material is to be introduced under water or the interval cannot be observed from the surface, the **Contractor** shall employ a positive placement technique as submitted to the **Consultant** for approval.
4. The sealing material shall always be introduced at the bottom of the interval to be sealed. The tremie pipe shall be gradually withdrawn as the sealing material is placed to prevent excessive pressures against the well casing. The end of the tremie pipe must remain submerged in the sand-cement sealing material during placement.
5. After the sand-cement sealing material is placed, no work shall be conducted on the monitoring wells for 24 hours.

END OF SECTION

SECTION 02523-341

NESTED MONITORING WELL DEVELOPMENT

PART 1 GENERAL

1.01 SUMMARY

A. Section includes:

1. This work includes all materials, labor, tools, and equipment to conduct monitoring well development.

B. Purpose

1. The purpose of well development is to remove drilling fluids and residues and to develop the gravel pack and aquifer to maximize the yield of the well.
2. The process shall consist of swabbing and airlift pumping of the well following gravel packing; bailing the well of materials introduced into the casing during swabbing; the installation of a submersible test pump; and pumping of the well until the well is fully developed and meets the requirements of minimum sand and turbidity production.

C. Related Sections

1. Section 02523-331 Borehole Sanitary Seals

D. Measurement and Payment

1. Measurement

- a. The unit for this work is by hourly unit rate time for all work associated with monitoring well development.

2. Payment

- a. Unit prices for well development shall be as set forth in the BID SCHEDULE for items:
 - 1) Item No. 14, Well development – Bailing and Surging/Air Lifting
 - 2) Item No. 15, Furnish and Install Test Pumps
 - 3) Item No. 16, Pump Development
- b. Progress payments and final payment can be made for this Item.
- c. No payment will be made for running equipment into or out of the well.

PART 2 PRODUCTS

2.01 EQUIPMENT

- A. General: The **Contractor** shall provide sufficient drill pipe and mechanical swab tool with a single rubber packer assembly designed to be operated in the screen casing of the wells.
- B. Test Pump
 - 1. The **Contractor** shall furnish a 2-inch diameter submersible pump capable of pumping up to 10 gpm against up to 140 feet of head not including friction losses. The bowl setting shall be at 50 feet below the water surface unless otherwise specified by the **Consultant**.

PART 3 EXECUTION

3.01 TIMING

- A. Upon Approval by the **Consultant** of the annular seal, the **Contractor** shall perform monitoring well development after the specific set time for the annular seal.

3.02 PROCEDURES

A. General Development Methods

- 1. Development is required to clean all drilling fluids, mud wall cake, and other substances from the envelope area to prevent any impairment of flow into the well.
 - a. Initial Development: Cleaning shall be initially accomplished by swabbing the screen sections. Following swabbing of the well screen, water from the borehole shall be airlifted until sediments in the water decrease to a minimal level.
 - b. Final Development: final development will be by submersible pump, pumping to waste until the water is clear (Turbidity of less than 5 NTUs).

B. PROCEDURES FOR INITIAL WELL DEVELOPMENT

1. Swab Development

- a. Swabbing operations will be conducted from the bottom screen section to the top.
- b. Screen sections will be swabbed for a minimum of four (4) minutes per foot of well screen or until cleaned of all drilling fluids.
- c. During development, the swab shall be moved slowly, up and down, to achieve a swabbing action across the screen section.

2. Air-lift Development

- a. After completion of the swab development, airlift pumping shall commence.

- b. Screen sections will be air-lifted for a minimum of four (4) minutes per foot of well screen or until cleaned of all drilling fluids.
- c. Water from the airlifts may not flow off property or reach the stormwater system. It may be applied to the land and allowed to percolate on-site following approval by the **City** prior to development.

C. FINAL DEVELOPMENT

- 1. Within five (5) days after the completion of initial development, the submersible pump and piping assembly shall be installed and functioning.
- 2. The water generated during final development shall not be allowed to flow off-site or to the stormwater system but may be applied to the adjacent land and allowed to percolate on-site following approval of the **City**.
- 3. In no case shall development pumping-time be less than 1 hour.
- 4. Development pumping shall commence at a low rate and increase in increments until the maximum flow rate of the pump is reached.
- 5. Development records shall be maintained at a frequency of 30 minutes showing:
 - a. Production rate
 - b. Pumping water level
 - c. Water surface drawdown to the nearest 0.01 foot
 - d. Sand production observations
 - e. And all other pertinent information concerning well development, quality of water, presence of gases, color or other information.
- 6. Development shall be considered complete when the turbidity is less than 5 NTUs, or as directed by the **Consultant**.
- 7. At the end of the final development, water quality samples shall be collected by the **Consultant**.
- 8. After completion of development pumping, the **Contractor** shall measure the depth of the well to determine the amount of sediment deposited in the bottom. If the amount of sediment is greater than five (5) feet, the **Contractor** shall pull the pump and clean the well of all accumulated sediment and foreign material.

END OF SECTION

SECTION 02523-420

BOREHOLE DESTRUCTION

PART 1 GENERAL

1.01 DESCRIPTION

- A. The **Contractor**, at the specific direction of the **Consultant**, may be required to abandon all or portions of the pilot borehole.

1.02 SUBMITTALS

Not used.

1.03 MEASUREMENT AND PAYMENT

A. Measurement

- 1. Abandonment of the borehole specifically requested by the **Consultant** shall be paid for on a per linear foot basis at the unit price in Bid Item No. 17.

B. Payment

- a. Unit prices for payment for the annular seals shall be as set forth in the BID SCHEDULE for items:
- 2. Item No. 17, Borehole Destruction
- 3. Payment shall be considered full compensation for furnishing all labor, materials, tools, and equipment necessary and incidental to completion of the work, as specifically requested by the **Consultant**.
- 4. No payment will be granted for destruction or abandonment of the borehole or well due to actions of the **Contractor**.

PART 2 PRODUCTS

Not used.

PART 3 EXECUTION

3.01 FIELD QUALITY CONTROL

A. Abandonment Prior To Installation of Monitoring Well Casing

- 1. Abandonment Due to Actions of The **Contractor**
 - a. If abandonment of the drilled hole is by reason of any actions of the **Contractor**, including but not limited to such causes as losing tools, damaging the well, misalignment, or any other cause attributed to careless or poor workmanship, the hole shall be completely filled with bentonite or other impervious earth materials in accordance with applicable State and County Standards. No payment will be made for drilling and filling the hole for abandoned, or for mobilization and

demobilization, and the **Contractor** shall drill a new hole within 50 feet of the same location.

2. Abandonment at Request of **Consultant**

- a. If abandonment of the drilled hole is specifically requested by the **Consultant**, including, but not limited to such causes as total lack of potential aquifers, insufficient number of potential aquifers, or unacceptable water quality, the hole shall be completely filled with concrete. In this event, the Contractor will be paid for mobilization and demobilization at this site, as well as for the footage of drilling completed.
- b. Abandonment hereunder shall also include payment for abandonment of any remaining or unused portion of the pilot hole that is not being used for final well completion. Unused portions of the borehole will be filled with bentonite.

B. Abandonment During or After Installation of Casing And/Or Well Screen

1. Abandonment Due to Actions of The **Contractor**

- a. Abandonment of the reamed hole can be caused by reason of any action of the **Contractor** or negligence. In such event, the **Contractor** shall pull or leave the casing(s) in place, at his discretion. If the casing is pulled, the hole shall be abandoned in accordance with applicable state and county standards. No payment will be granted for lost or damaged casings and/or their installation in a well abandoned by reason of any action of the **Contractor**. The **Contractor** shall be required to drill a new well within 50 feet of the original site.
- b. The **Contractor** may salvage as much casing and screen from the well as possible and may use it in the new well, subject to acceptance by the **Consultant**. Salvaged material, if not used in another well, will remain the property of the **Contractor**.

2. Abandonment at Request of **Consultant**

- a. If abandonment of the drilled hole is specifically requested by the **Consultant**, including, but not limited to such causes as total lack of potential aquifers, insufficient number of potential aquifers, or unacceptable quality, the hole shall be completely filled with bentonite or other impervious earth materials in accordance with applicable State and County Standards. In this event, the **Contractor** will be paid for mobilization and demobilization at this site, as well as for the footage of drilling completed. The Contractor may then be requested to remobilize at a second pilot hole site selected by the **Consultant**. No payment for stand-by time while awaiting a second pilot hole site will be made.

- b. Abandonment hereunder shall also include payment for abandonment of any remaining or unused portion of the pilot hole that is not being used for final well completion.
- c. Payment for pilot hole abandonment, if required, and if specifically requested by the **Consultant** as set forth above shall be made on a unit price per linear foot, and shall be considered full compensation for all time, materials, and equipment required to complete the abandonment.

END OF SECTION

SECTION 02523-440

SITE CLEANUP

PART 1 GENERAL

1.01 SUMMARY

A. Section includes:

1. This work includes all materials, labor, tools, and equipment to perform all site cleanup and any incidentals, therefore.

B. Related Sections

1. Section 01501 - Temporary Facilities
2. Section 01505 - Mobilization

C. Measurement and Payment

1. Measurement - no measurement shall be made for Site Cleanup.
2. Payment - no separate payment for Site Cleanup will be made in this contract. Progress payments and final payment for all Site Cleanup shall be included under Section 01505 – Mobilization.
3. There will be no additional payment for rig time or idle time while site cleanup is being conducted.

PART 2 PRODUCTS

(NOT USED)

PART 3 EXECUTION

3.01 CLEANING

- ###### A. The **Contractor** shall keep the premises free from accumulations of waste materials, rubbish, and other debris resulting from the work, and at completion of the work, he shall remove all waste materials, rubbish, and debris from and about the well site as well as all tools, construction equipment, fuel tanks, machinery, and surplus materials.

1. The **Contractor** shall leave the site clean and ready for use by the **City**.
2. The **Contractor** shall restore, to an equal or better condition, all temporary work areas.
3. All mud trenches are to be backfilled and compacted.
4. All fill materials placed for access shall be removed.
5. The **Contractor** is responsible for any damages to properties adjacent to the well caused by drilling, construction, or well testing activities associated with the work described in the contract documents.

END OF SECTION

SECTION 02523-501

WELL APPURTENANCES

PART 1 GENERAL

1.01 SUMMARY

A. Section includes:

1. This section describes the installation of the well enclosure, well pad, and installation of the well seals and crash posts.

B. Measurement and Payment

1. Measurement

- a. The unit for well appurtenances shall be by LUMP SUM for each single or nested monitoring well.

2. Payment

- a. Unit prices for payment for the well appurtenances shall be set forth in the BID SHEET for items:

- 1) Item No. 18, Furnish and Install Enclosures and Bollards.

PART 2 MATERIALS

2.01 WELL PAD

- A. The well pad shall be concrete. No rebar is required. Pad shall be of sufficient thickness to allow for future electrical vault and conduit to be installed. PVC conduit shall be installed to allow for the future installation of measurement devices.

2.02 WELL SEAL

- A. The monitoring wells shall have a 2-inch diameter water-tight locking expansion plug.

2.03 WELL ENCLOSURE

- A. The well enclosure shall be 16-inch diameter x 5-foot-tall steel monument well cover or approved alternate.
- B. The monument shall be equipped with a locking cap.

2.04 BOLLARDS

- A. Bollards shall be constructed of 4-inch diameter by 6-foot long low-carbon steel Schedule 40 pipe and grout.

PART 3 EXECUTION

3.01 WELL PADS AND ENCLOSURE

- A. The **Contractor** shall construct the well pad to the dimensions specified below.
 - 1. The pad shall be four (4) feet long by four (4) feet wide by ten (10) inches thick.
 - 2. The pad shall be formed and finished so that the concrete gently slopes away from the well enclosure.
- B. The **Contractor** shall construct the well enclosure to the dimensions specified below.
 - 1. The well enclosure shall be installed with an approximate 2.5-foot stickup above the ground surface and shall be seated in the sanitary seal.
 - 2. The top of the well casing shall be no more than six (6) inches and no less than three (3) inches below the rim of the well enclosure cover. The inside of the well enclosure shall be filled with sand to no more than six inches below the top of the well casings.
 - 3. Four (4) 1/8-inch diameter holes shall be drilled into the well enclosure, about 90 degrees apart, within 2-inches of the top of the concrete pad to allow any accumulated water to drain.

3.02 BOLLARDS

- A. Four (4) bollards shall be installed surrounding each well pad.
 - 1. The Contractor shall drill 8-inch diameter holes to a depth of 2-feet below ground surface.
 - 2. Upon completion of drilling the holes, the Contractor shall center the 4-inch diameter pipe in the holes and grout them in place.
 - 3. The entire 4-inch pipe shall be grouted to the top of the pipe and mounded

3.03 PAINTING

- A. The enclosure and crash posts shall be painted bright yellow paint similar to other Roseville installations.

COUNCIL COMMUNICATION

CC #: 0751
File #: 0800-03

Title: Utility Tree Trimming Services – Contract Purchase Agreement
Contact: Jeff Beaubier 916-774-5611 jbeaubier@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.3.

RECOMMENDATION TO COUNCIL

Staff recommends City Council adopt a resolution authorizing the City Manager to execute a contract purchase agreement with West Coast Arborists, Inc. (WCA) to perform Utility Tree Trimming services for three years, with an option to renew two additional one-year periods.

Funding for the first year of the agreement is \$1,378,125 and is included in the proposed Electric FY2020-21 budget and all future funding shall be contingent upon budget approval each year.

BACKGROUND

Roseville Electric is subject to State-required compliance mandates, and construction and maintenance requirements for high voltage electric line clearance trimming. The California Public Utilities Commission (CPUC) General Order 95, Rule 35 Vegetation Management, requires electric utilities to have an active high voltage tree trimming program to maintain the minimum clearance requirements for distances of trees or vegetation from energized lines.

Roseville Electric solicited proposals through Request For Proposals No. 07-076 Utility Tree Trimming seeking a vendor to assist with meeting the State-mandated tree trimming requirements. One vendor proposal was received and evaluated based on qualifications of firm and team, project understanding and plan, cost, and experience and references. The evaluation team reviewed and scored the proposal, finding WCA, Inc. qualified across all evaluation criteria, and selected WCA to provide the requested scope of services.

FISCAL IMPACT

The first year of the three-year agreement will cost \$1,378,125 and will be included in the proposed Electric Department FY2020-21 budget. FY2021-22 will cost \$1,433,250 and FY2022-23 of the agreement will cost \$1,488,375. The total cost of the agreement will not exceed \$4,299,750 over an initial three year period Should the two optional one-year renewals be

executed, FY2023-24 costs shall not exceed \$1,543,500 and FY2024-25 costs shall not exceed \$1,598,625. All future funding shall be contingent upon budget approval each year.

ENVIRONMENTAL REVIEW

The proposed project involves minor alteration in the condition of the land, water, and or vegetation which will not remove healthy, mature scenic trees. The project is limited to tree trimming for power line clearance and does not include tree removal, therefore this activity is categorically exempt from CEQA as a Class 4 Exemption (State CEQA Guidelines Section 15304). The Exemption has been prepared and no further CEQA action is required.

Respectfully Submitted,

Jeff Beaubier, Electric Operations Supervisor

Michelle Bertolino, Electric Utility Director

Dominick Casey, City Manager

Contract Purchase Agreement

Scoresheet

RESOLUTION NO. 20-165

APPROVING A CONTRACT PURCHASE AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND WEST COAST ARBORISTS, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, a contract purchase agreement (3000262) for utility tree trimming services, between the City of Roseville and West Coast Arborists, Inc., has been reviewed by the Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said contract purchase agreement is approved and the City Manager is authorized to execute it on behalf of the City of Roseville.

BE IT FURTHER RESOLVED that the City Manager or his designee is authorized to execute two (2) additional one (1) year renewals without further City Council approval, provided that the applicable budget is approved by the City Council each year, and upon receipt and approval of bonds by the City Attorney's office each year.

PASSED AND ADOPTED by the Council of the City of Roseville this ____ day of _____, 2020, by the following vote on roll call:

This Contract Purchase Agreement is sent for your review and acceptance. Notify the Buyer via email of any needed changes to the company name, address, and contact information. The Buyer will update the agreement prior to you signing the document.

Return signed copies of the agreement to the Buyer noted on the agreement. Alterations or modifications to the agreement are not allowed. Upon receipt of all necessary documents, the City will sign the agreement and return a fully executed copy to you. Receipt of the signed copy will be your notice to proceed with the work in accordance with the terms and conditions of the agreement. Work must not begin until the contract has been fully executed.

The following guidelines must be followed for the signature block on the agreement:

Sole proprietorship - By owner

Partnership - Any general partner

Corporation - Two options:

(1) A signature from the President and the corporate seal; OR

(2) One signature from the Chairman of the Board, President, or any Vice President AND one signature from the Secretary, any Assistant Secretary, Chief Financial Officer, or any Treasurer or Assistant Treasurer of the corporation

***General Manager, Office Manager and/or Sales Manager are not corporate officer titles.** The agreement will be rejected if not signed in accordance with these guidelines.

Insurance requirements:

The City's insurance requirements are referenced on Attachment A of the agreement. By signing the agreement, you are confirming that your company has the minimum insurance limits required.

Contract Terms and Conditions

1. To the fullest extent allowed by law, Contractor shall defend, indemnify, and save and hold harmless City, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of Contractor's willful misconduct or negligent act or omission while engaged in the performance of obligations or exercise of rights created by this Agreement, except those matters arising from City's sole negligence or willful misconduct. The parties intend that this provision shall be broadly construed. Contractor's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.
2. Contractor is an independent contractor, and shall not be considered an officer, agent or employee of the City.
3. Without the written consent of the City, this Agreement is not assignable by Contractor either in whole or in part.
4. Time is of the essence of this Agreement.
5. At any time during the term of this Agreement, the City has the right to terminate this Agreement, provided Contractor is given thirty (30) days written notice. City's termination shall be without further liability to City; however, Contractor shall be entitled to all costs reasonably incurred prior to the date of termination. Contractor acknowledges that City may terminate this Agreement should funds not be appropriated by its governing body to continue services under this Agreement.
6. This Agreement may only be amended or modified in writing. It is integrated and contains the complete understanding of the parties.
7. All equipment, supplies and services sold to the City of Roseville shall conform to the general safety orders of the State of California.
8. Unless notified to the contrary, in writing, the City assumes that the Contractor has accepted the work in accordance with the plans and specifications (if any) and agrees to do the work in compliance with this Agreement.
9. All fair employment practices must be adhered to. In addition, if the project referenced on this service agreement is a Public Works project, all prevailing wage laws must be complied with. For prevailing wage contracts over \$25,000, copies of certified payroll must be submitted with invoices. Prevailing wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: <http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm>.
10. Contractor agrees to the below insurance requirements:
 - a. Unless otherwise specified, the Contractor shall maintain the policies of insurance outlined in Attachment A, incorporated herein by this reference, in full force and effect during the term of this Agreement. The City of Roseville retains sole discretion in determining the types and proper levels of insurance coverage.

- b. Form. Contractor shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.
- c. Additional Insureds. Contractor shall also provide a separate endorsement or section of the policy showing City, its officers, agents, employees, and volunteers as additional insureds for each type of coverage, except for Workers' Compensation. Such insurance shall specifically cover the contractual liability of Contractor. The additional insured coverage under the Contractor's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from City's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office (ISO) CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be:
 - (1) the minimum coverage and limits specified in this Agreement; or
 - (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.
- d. Cancellation/Modification. Contractor shall provide ten (10) days written notice to City prior to cancellation or modification of any insurance required by this Agreement.
- e. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of City (if agreed to in a written contract) before City's own insurance shall be called upon to protect it as a named insured.
- f. Subcontractors. Contractor agrees to include in its contracts with all subcontractors the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, Contractor shall require its subcontractors to agree to be bound to Contractor and City in the same manner and to the same extent as Contractor is bound to City under this Agreement. Additionally, Contractor shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of City's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request.
- g. Self-Insured Retentions. All self-insured retentions (SIR) must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.
- h. Waiver of Subrogation. Contractor hereby agrees to waive subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of

subrogation in favor of City, its officers, agents, employees and volunteers for all work performed by Contractor, its employees, agents and subcontractors.

- i. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve Contractor of liability in excess of such coverage, nor shall it preclude City from taking such other actions as are available to it under any other provisions of this Agreement or law.
11. Contractor shall comply with all federal, state and local laws and ordinances, including but not limited to the City's storm water regulations, as may be applicable to the performance of services under this Agreement. Failure to comply with local ordinances may result in monetary fines and cancellation of this Agreement. Refer to www.roseville.ca.us/stormwater for links to more information on the City's storm water regulations.
12. In the event that the terms of any attachment or exhibit conflict with any terms of this Agreement, the terms of this Agreement shall control.
13. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. In the event that any signature is delivered by facsimile transmission or by e-mail delivery of a ".pdf" format data file, such signature shall create a valid and binding obligation of the party executing (or on whose behalf such signature is executed) with the same force and effect as if such facsimile or ".pdf" signature page were an original hereof.
14. If either party commences any legal action against the other party arising out of this Agreement or the performance thereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorneys' fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.
15. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.
16. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.
17. For purposes of this Agreement, the terms "Contractor," "Consultant," and "Supplier" are used interchangeably.
18. If the project referenced on this agreement is a Public Works project, then the following shall apply: No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this agreement, Contractor and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.
19. If the project referenced on this agreement is a Public Works project, then the following shall apply: Contractor must submit all claims as defined in and in accordance with the claim resolution process set forth in Section 9204 of the Public Contract Code. Each such claim must be sent to the City by registered mail or certified mail with return receipt requested and must contain reasonable documentation to support the claim. All claims must be received prior to acceptance of the work.

Contract Purchase Agreement 3000262

Contractor agrees to defend and indemnify City if, despite the parties intent and practice, any venue, agency, or court with competent jurisdiction determines that Contractor and/or any of its agents, officers, employees, volunteers, independent contractors, or subcontractors, are characterized as employee(s) of City. Contractor and City agree that: (a) Contractor is free from the control and direction of City in connection with the performance of the work; (b) Contractor is providing services directly to City; (c) Contractor has and will maintain at all relevant times a business license; (d) Contractor maintains a business location that is separate from City; (e) Contractor is customarily engaged in an independently established business of the same nature as that involved in the work performed hereunder; (f) Contractor actually contracts with other businesses to provide the same or similar services and maintains a clientele without restrictions from City; (g) Contractor advertises and holds itself out to the public as available to provide the same or similar services; (h) Contractor provides its own tools, vehicles, and equipment to perform the services; (i) Contractor has negotiated its own rates; (j) Contractor set its own hours and location of work in accomplishing City's on-call needs; and (k) Contractor has the right to control the manner and means of accomplishing the result desired and exercises its own expert independent judgement.

The supplier named hereon by the acceptance of this order agrees to the provisions of this document titled "Contract Purchase Agreement" and all accompanying terms, conditions, and attachments.

Insurance Submission Process

The City of Roseville Human Resources/Risk Management Department uses a service called EBIX to manage our insurance certificate tracking.

How It Works

- The vendor's contact information is entered into EBIX. EBIX will contact the vendor to request proof of insurance.
- The Vendor can forward the request to their Insurance Agent(s) if necessary.
- Vendor/Insurance Agent submits insurance to EBIX by email to roseville@ebix.com or by fax to (770) 325-5727. After faxing or emailing the certificate, please DO NOT send the certificate by mail to EBIX. Please do not mail, email or fax any certificates to the City of Roseville.
- Once submitted, EBIX reviews the insurance documentation. If there are deficiencies, EBIX will send a follow up letter or email requesting additional information.

Questions Regarding Insurance Submission: Contact EBIX at (951) 652-4239

Proposed Rate Sheet for RFP 07-067 Utility Tree Trimming Services

Populate the below tables with proposed regular hourly rates for labor and equipment by fiscal year. All rates shall be inclusive of tools, supplies, administrative, and overhead expenses. Additional proposed rates for equipment not listed by the City, but anticipated by the Contractor, shall be added by the Contractor. Space is provided below and Contractor may attach additional sheets if needed.

Regular Hourly Rates for:	2020/2021	2021/2022	2022/2023	*2023/2024	*2024/2025
Crew Leader (Foreman)	\$ <u>125.00</u> /hr	\$ <u>130.00</u> /hr	\$ <u>135.00</u> /hr	\$ <u>140.00</u> /hr	\$ <u>145.00</u> /hr
Patrolman/Inspector (Foreman)	\$ <u>125.00</u> /hr	\$ <u>130.00</u> /hr	\$ <u>135.00</u> /hr	\$ <u>140.00</u> /hr	\$ <u>145.00</u> /hr
Certified Line Clearance Tree Trimmer	\$ <u>125.00</u> /hr	\$ <u>130.00</u> /hr	\$ <u>135.00</u> /hr	\$ <u>140.00</u> /hr	\$ <u>145.00</u> /hr

Overtime charge is 25 % times regular hourly rate.

Equipment Hourly Rates for:	2020/2021	2021/2022	2022/2023	*2023/2024	*2024/2025
Aerial Boom w/ Dump	\$ <u>0.00</u> /hr	\$ <u>0.00</u> /hr	\$ <u>0.00</u> /hr	\$ <u>0.00</u> /hr	\$ <u>0.00</u> /hr
Chipper	\$ <u>0.00</u> /hr	\$ <u>0.00</u> /hr	\$ <u>0.00</u> /hr	\$ <u>0.00</u> /hr	\$ <u>0.00</u> /hr
Patrol Vehicle	\$ <u>0.00</u> /hr	\$ <u>0.00</u> /hr	\$ <u>0.00</u> /hr	\$ <u>0.00</u> /hr	\$ <u>0.00</u> /hr
Other Equipment: Crane	\$ <u>125.00</u> /hr	\$ <u>130.00</u> /hr	\$ <u>135.00</u> /hr	\$ <u>140.00</u> /hr	\$ <u>145.00</u> /hr
Other Equipment: Roll off or Loader	\$ <u>125.00</u> /hr	\$ <u>130.00</u> /hr	\$ <u>135.00</u> /hr	\$ <u>140.00</u> /hr	\$ <u>145.00</u> /hr

Based on the bid cost information above, provide your total annual cost for:

- One (1) crew leader (foreman) \$125.00
- One (1) patrolman/inspector (foreman) \$125.00
- Three (3) certified line clearance tree trimmers \$375.00
- One (1) combination aerial lift dump truck with insulated boom containing incidental power and hand tools \$0.00
- One (1) chipper \$0.00
- One (1) patrol vehicle with tools \$0.00

Base total cost using a full year of **2080 regular hours** and **100 hours of overtime** between 12am and 6am. Total rate for each year shall be Contractor proposed rate multiplied by 2080 hours, plus the overtime figure. Initial award shall be for a three (3) year contract period. *Two one-year optional renewal years are contingent upon satisfactory performance and all terms, conditions, and prices remain the same as initial agreement. Optional renewal years are additionally contingent upon budget approval and at the discretion of the Electric Operations Manager or designee.

	2020/2021	2021/2022	2022/2023		*2023/2024	*2024/2025
TOTAL ANNUAL BID COST BY YEAR	\$ 1,378,125.00	\$ 1,433,250.00	\$ 1,488,375.00	TOTAL ANNUAL BID COST BY OPTIONAL YEAR	\$1,543,500.00	\$1,598,625.00

Proposed Rate Sheet for RFP 07-067 Utility Tree Trimming Services

- Should there be a need to obtain permits such as Encroachment Permits or Traffic Control Plans, WCA will pass the actual cost to the City of Roseville under this contract.
- Should there be a need to dispose of diseased or pest-infested trees/logs that require special handling and/or disposal fees, WCA will pass the actual cost to the City of Roseville under this contract.
- The cost for specialty equipment (Crane or Roll-off or Loader,) should the need arise, is for the equipment use only. The operator will be charged additionally, at the employee hourly rate of \$125.00 FY20-21, \$130.00 FY21-22, \$135.00 FY22-23, \$140.00 FY23-24, and \$145.00 FY24-25.
- Trees that are deemed as hazardous material and/or require extraordinary fees to dispose or handle, WCA will pass the actual cost to the City of Roseville under this contract.

COUNCIL COMMUNICATION

CC #: 0740

File #: 0900-03 & 0201-01

Title: Compressed Natural Gas Fueling Station Upgrade Phase 1 – Contract Purchase Agreement and Budget Adjustment

Contact: Janice R. Gainey 916-774-5535 jrgainey@roseville.ca.us

Meeting Date: 5/6/2020

Item #: 6.4.

RECOMMENDATION TO COUNCIL

Staff recommends that City Council:

1. Adopt a resolution to approve a Service Agreement with EFS West, Inc. (EFS) for Phase 1 of the Compressed Natural Gas Fueling Station Upgrade Project (Project No. 500095) in the amount of \$225,665.00, authorize the City Manager to execute it, and authorize the Environmental Utilities (EU) Director or his designee to approve and pay for contract change orders for this project that could increase the contract amount by no more than 10% (\$22,567.00) for a not-to-exceed total contract amount of \$248,232.00.
2. Adopt an ordinance approving the attached budget adjustment that will transfer \$288,232.00 from the Waste Services Annual Rehabilitation budget in the Waste Services Rehabilitation Fund to a newly created CIP in the same fund.

BACKGROUND

The City of Roseville has had alternative fueled vehicles (AFV) in its fleet since 1997. The AFV mix includes hybrids, electric, and Compressed Natural Gas (CNG) vehicles. The City funded and constructed a small fast-fill and time-fill CNG fueling station in 1997 at the Corporation Yard and has operated and maintained the station for its transit and municipal vehicles since then.

The City is currently in the planning phases of construction of a new fast-fill Renewable Natural Gas (RNG) fuel station at the Pleasant Grove Wastewater Treatment Plant. When constructed, this will be the primary fueling infrastructure for the Waste Collection fleet.

The City plans to upgrade and maintain the current fueling infrastructure to provide reliability by having two fuel sources in the event the primary fueling station experiences any system failure.

On November 22, 2019, a Request for Proposals was issued for a Condition Assessment, Upgrade and Maintenance Plan of the Corporate Yard CNG Fueling Station.

On January 24, 2020, one proposal was received. The proposal was evaluated by an EU Proposal Evaluation Committee and determined that the proposal was responsible and responsive; however, Phase 2-Major Systems Upgrades and Phase 3-Maintenance Plan Agreement would be considered optional tasks to be executed only after the Condition Assessment and initial critical upgrades have been completed.

Based upon the findings of the Condition Assessment, staff may submit a separate request to the City Council for additional support from EFS West for Phase 2 and Phase 3 support services.

This project supports the City's Strategic Plan Goal F - Invest in Well-Planned Infrastructure and Growth by reinvesting in aging infrastructure.

FISCAL IMPACT

The planned costs for the CNG Fueling Station Upgrades project are \$288,232 (\$225,665 for the services agreement with EFS West, \$22,567 for a ten percent contingency, and \$40,000 for staff time charged to the project). This budget adjustment transfers \$288,232 from already-appropriated funds in the Waste Services Annual Rehabilitation budget to a new Compressed Natural Gas (CNG) Fueling Station Upgrade project (500095), with no net effect on the available resources in that fund. The budget adjustment provides an increase in the available resources of the EU operating funds (Water: \$18,000, Wastewater: \$18,000, Waste Services: \$4,000) due to EU Technical Services staff charging their time to the project.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) only applies to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3)).

This is a Service Agreement contract, and the criteria above apply, therefore no additional environmental review is required.

Respectfully Submitted,

Janice R. Gainey, Senior Engineer

Richard D. Plecker, Environmental Utilities Director

Contract Terms and Conditions

1. To the fullest extent allowed by law, Contractor shall defend, indemnify, and save and hold harmless the City, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of Contractor's willful misconduct or negligent act or omission while engaged in the performance of obligations or exercise of rights created by this Agreement, except those matters arising from City's sole or active negligence or willful misconduct. The parties intend that this provision shall be broadly construed. Contractor's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.
2. Contractor is an independent contractor, and shall not be considered an officer, agent or employee of the City.
3. Without the written consent of the City, this Agreement is not assignable by Contractor either in whole or in part.
4. Time is of the essence of this Agreement.
5. At any time during the term of this Agreement, the City has the right to terminate this Agreement, provided Contractor is given thirty (30) days written notice. City's termination shall be without further liability to City; however, Contractor shall be entitled to all costs reasonably incurred prior to the date of termination. Contractor acknowledges that City may terminate this Agreement should funds not be appropriated by its governing body to continue services under this Agreement.
6. This Agreement may only be amended or modified in writing. It is integrated and contains the complete understanding of the parties.
7. All equipment, supplies and services sold to the City of Roseville shall conform to the general safety orders of the State of California.
8. Unless notified to the contrary, in writing, the City assumes that the Contractor has accepted the work in accordance with the plans and specifications (if any) and agrees to do the work in compliance with this Agreement.
9. All prevailing wages and fair employment practices must be adhered to. For prevailing wage contracts over \$25,000, copies of certified payroll must be submitted with invoices. Prevailing wage rates may be obtained from the State Department of Industrial Relations and/or the following website address:
<http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm>.
10. Contractor agrees to the below insurance requirements:
 - a. Unless otherwise specified, the Contractor shall maintain the policies of insurance outlined in Attachment A, incorporated herein by this reference, in full force and effect during the term of this Agreement. The City of Roseville retains sole discretion in determining the types and proper levels of insurance coverage.

- b. Form. Contractor shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.
- c. Additional Insureds. Contractor shall also provide a separate endorsement or section of the policy showing City, its officers, agents, employees, and volunteers as additional insureds for each type of coverage (except Workers' Compensation) and for ongoing and completed operations. Such insurance shall specifically cover the contractual liability of Contractor. The additional insured coverage under the Contractor's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from City's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office (ISO) CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be:
 - (1) the minimum coverage and limits specified in this Agreement; or
 - (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.
- d. Cancellation/Modification. Contractor shall provide ten (10) days written notice to City prior to cancellation or modification of any insurance required by this Agreement.
- e. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of City (if agreed to in a written contract) before City's own insurance shall be called upon to protect it as a named insured.
- f. Subcontractors. Contractor agrees to include in its contracts with all subcontractors the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, Contractor shall require its subcontractors to agree to be bound to Contractor and City in the same manner and to the same extent as Contractor is bound to City under this Agreement. Additionally, Contractor shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of City's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request.
- g. Self-Insured Retentions. All self-insured retentions (SIR) must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.
- h. Waiver of Subrogation. Contractor hereby agrees to waive subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General

Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of City, its officers, agents, employees and volunteers for all work performed by Contractor, its employees, agents and subcontractors.

- i. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve Contractor of liability in excess of such coverage, nor shall it preclude City from taking such other actions as are available to it under any other provisions of this Agreement or law.
11. Contractor shall comply with all federal, state and local laws and ordinances, including but not limited to the City's storm water regulations, as may be applicable to the performance of services under this Agreement. Failure to comply with local ordinances may result in monetary fines and cancellation of this Agreement. Refer to www.roseville.ca.us/stormwater for links to more information on the City's storm water regulations.
12. In the event that the terms of any attachment or exhibit conflict with any terms of this Agreement, the terms of this Agreement shall control.
13. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. In the event that any signature is delivered by facsimile transmission or by e-mail delivery of a ".pdf" format data file, such signature shall create a valid and binding obligation of the party executing (or on whose behalf such signature is executed) with the same force and effect as if such facsimile or ".pdf" signature page were an original thereof.
14. If either party commences any legal action against the other party arising out of this Agreement or the performance thereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorneys' fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.
15. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.
16. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.
17. For purposes of this Agreement, the terms "Contractor," "Consultant," and "Supplier" are used interchangeably.
18. No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this agreement, Contractor and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.
19. Contractor must submit all claims as defined in and in accordance with the claim resolution process set forth in Section 9204 of the Public Contract Code. Each such claim must be sent to the City by registered mail or certified mail with return receipt requested and must contain reasonable documentation to support the claim. All claims must be received prior to acceptance of the work.

20. Contractor agrees to defend and indemnify City if, despite the parties intent and practice, any venue, agency, or court with competent jurisdiction determines that Contractor and/or any of its agents, officers, employees, volunteers, independent contractors, or subcontractors, are characterized as employee(s) of City. Contractor and City agree that: (a) Contractor is free from the control and direction of City in connection with the performance of the work; (b) Contractor is providing services directly to City; (c) Contractor has and will maintain at all relevant times a business license; (d) Contractor maintains a business location that is separate from City; (e) Contractor is customarily engaged in an independently established business of the same nature as that involved in the work performed hereunder; (f) Contractor actually contracts with other businesses to provide the same or similar services and maintains a clientele without restrictions from City; (g) Contractor advertises and holds itself out to the public as available to provide the same or similar services; (h) Contractor provides its own tools, vehicles, and equipment to perform the services; (i) Contractor has negotiated its own rates; (j) Contractor set its own hours and location of work in accomplishing City's on-call needs; and (k) Contractor has the right to control the manner and means of accomplishing the result desired and exercises its own expert independent judgement.

The supplier named hereon by the acceptance of this order agrees to the provisions of this document titled "Contract Purchase Agreement" and all accompanying terms, conditions, and attachments.

Insurance Submission Process

The City of Roseville Human Resources/Risk Management Department uses a service called EBIX to manage our insurance certificate tracking.

How It Works

- The vendor's contact information is entered into EBIX. EBIX will contact the vendor to request proof of insurance.
- The Vendor can forward the request to their Insurance Agent(s) if necessary.
- Vendor/Insurance Agent submits insurance to EBIX by email to roseville@ebix.com or by fax to (770) 325-5727. After faxing or emailing the certificate, please DO NOT send the certificate by mail to EBIX. Please do not mail, email or fax any certificates to the City of Roseville.
- Once submitted, EBIX reviews the insurance documentation. If there are deficiencies, EBIX will send a follow up letter or email requesting additional information.

Questions Regarding Insurance Submission: Contact EBIX at (951) 652-4239

Questions Regarding Insurance Requirements Contact Risk Management at (916) 774-5202

PLANNING • DESIGN • CONSTRUCTION

28472 Constellation Rd, Valencia, CA 91355

March 20, 2020

City of Roseville
Attn: City Clerk
Department 311 Vernon
Street
Roseville, CA 95678

Subject: EXHIBIT A - Scope of Work for the City of Roseville; Compressed Natural Gas Fueling Station Upgrade and Maintenance Plan Phase 1, Phase 2 and Phase 3

EFS WEST will provide the following work to be performed as detailed below for the Compressed Natural Gas Fueling Station Upgrade for the City of Roseville. EFS West agrees to provide appropriately licensed contracting, and/or engineering services as needed pursuant to the Service Agreement in addition to all labor, tools, equipment, and materials, and transportation required to complete the services outlined in this RFP. A price breakdown as well as preliminary schedule are included as attachments to this scope of work.

TECHNICAL REQUIREMENTS:

EFS WEST agrees to comply with all federal, state, and local safety regulations and all applicable Cal-OSHA requirements. The project design, installation and maintenance shall conform at a minimum to the following applicable codes and standards:

- NFPA 52 Vehicular Fuel Systems Code, Chapter 8 CNG Compression, Gas Processing, Storage, and Dispensing Systems, General requirements for compressed natural gas (CNG) compression, gas processing, storage, and dispensing systems
- NFPA 52 Vehicular Fuel Systems Code, 8.4 System Siting Requirements for system setback distances
- NFPA 52 Vehicular Fuel Systems Code, Table 8.4.2.9 Electrical Installations, Requirements for classified areas
- Natural Gas Vehicle (NGV) 2 Natural Gas Vehicle Containers
 - o Set of standards that address component testing for certification purposes for natural gas vehicle fueling infrastructure and vehicle tanks
- NGV 1 Compressed NGV Fueling Connection Devices
 - o Set of standards that address component testing for certification purposes for natural gas vehicle fueling infrastructure and vehicle tanks
- NGV 3.1 Fuel System Components for Natural Gas Powered Vehicles
 - o Certification document for fuel system components
- NGV 4.1 Dispensing Systems Certification document for fuel systems

- NGV 4.2 Hoses for Natural Gas Vehicles (NGV) and Dispensing Systems
 - o Certification document for fueling hoses
- NGV 4.3 Temperature Compensation
 - o Devices for Natural Gas Dispensing Systems Standard to address fueling parameters required to achieve defined state-of-charge
- NGV 4.4 Breakaway Devices for Natural Gas Dispensing Hoses and Systems
 - o Certification document for dispenser hoses
- NGV 4.5 (draft) Priority and Sequencing
 - o Equipment for Natural Gas Dispensing Systems Document in development that sets procedures for fueling operations
- NGV 4.6 Manually Operated Valves for Natural Gas Dispensing Systems
 - o Certification document for dispensing system valves
- NGV 4.7 (draft) Automatic Valves for Use in Natural Gas Vehicle Fueling Stations Certification document for fuel system compressors
- NGV 4.8 Natural Gas Fueling Station Reciprocating Compressor Guidelines Pressure Relief Devices -1 for NGV Fuel Container Certification document for fueling compressors
- ASME B31.3 Process Piping Process design piping standard
- C-6 Standards for Visual Inspection of Steel Compressed Gas Cylinders
- Inspection standard to complement design standard
- S-1.1 Pressure Relief Device Standards -
 - o Part 1- Cylinders for Compressed Gases S-1.3 Pressure Relief Device Standards -
 - o Part 3 - Stationary Storage Containers for Compressed Gases and Pressure relief for different container configurations

SCOPE OF WORK:

Phase 1 – Assessment, Design, and Repair/Upgrade of CNG Fueling Station Facilities

1.1 Project management

EFS West will provide overall project management to ensure all tasks are fully completed, within the allocated budget and timeframe. This task includes all costs for mobilization, demobilization, bonds, insurance, permits (at a minimum a City Business Permit is required), and other administrative requirements including but not limited to; travel, accommodations, preparation for and participation in meetings, submittal of payment requests, technical submittals, development and maintenance of progress schedules.

1.2 Condition Assessment and Analysis

EFS West will conduct a condition and reliability assessment of the CNG fueling station facilities. Assessment will include all system components and field testing as necessary to determine remaining useful life. Provide a Technical Memorandum summarizing the assessment methodology, findings, and alternatives/options for equipment repair or replacement, cost estimates and revised service life for each identified option, and recommendations for City's facilities.

An outline of major system components to be included in the Technical Memorandum (but not limited to these items) is as follows. Site maps as included in the Request for Proposals.

- Site 1a: Storage vessels, supply line configuration, priority sequencing cabinet, dome-loaded regulator panel, and all PRV's and bleed valves associated with fuel storage.

Site 1b: Compressor skid, compressors, existing coalescing gas filter/dryer system (Xebec), blowdown tank, associated PRV's for gas supply, and compressor PRV piping system.

- Site 3: All electrical conduits, compressor control system, entire Emergency Shutdown System (ESD) system, paddle switches, power supply conductors and 480 station feeder panel.
- Site 1-4: Confirm adequacy of supply line sizing between compression skid to fuel dispensing stations.
- Site 4: Analyze condition of the time-fill fueling stations; nozzles, controls, and appurtenances.
- Filter Banks: Engineering analysis of the potential need for additional Coalescing Filter Bank and if so, appropriate location, sizing, and appurtenances that will be required.
- E-Stop System Analysis: Analyze existing emergency stop system for safety, ease of access, and integration with existing, and potential future facilities.
- Painting and Corrosion Protection: Analyze and recommend appropriate painting and corrosion protection for each area of the CNG facilities.
- Other Sites: All appurtenances related to the CNG Fueling Station.
- Testing of the CNG Fueling system as a whole including:
 - performance evaluation of the compressors by EFS West and a manufacturer's rep,
 - observation of the fueling process to estimate compressor flow rate,
 - leak testing of the piping systems,
 - testing of all ESD devices and circuits,
 - Evaluating the condition of the existing equipment from current maintenance records and recommendations from the equipment manufacturers.

Deliverables:

- a. Technical Memorandum – CNG Fueling Station Condition Assessment

Assumptions:

- a. This scope of work allows for 160 man-hours of senior staff to conduct the Condition Assessment. These man-hours will be used to develop a work plan/test protocols and to perform the inspections and testing detailed in the work plan.
- b. The cost also includes allowances for participation by manufacturers reps for

the equipment and compressors, as well as engineering time for development of permitable plans for repairs/improvements identified during the assessment work, as requested in the RFP.

- c. The work plan will be reviewed and approved by Roseville staff prior to performing the onsite assessment. Once EFS West and Roseville have agreed on the inspections and tests to be performed, the actual field inspection work will be performed.
- d. Following completion of the inspections and tests, EFS West will prepare the Technical Memorandum called for in the RFP addressing the items listed.

1.3 Facility Upgrades and Modifications

EFS West will provide the engineering design, equipment, and installation for the following upgrades and modifications to the CNG fueling station.

- 1.3.1. **Dome-Loaded Regulator Panel Upgrade (Site 1).** Remove the existing Dome Loaded Regulator Panel and install a new Priority Panel with temperature compensation. This work includes all required piping and electrical for an operating priority panel with temperature compensation.
- 1.3.2. **Hose Replacement at Time-fill Stations (Site 4).** Includes all labor, material and equipment to repair, or replace up to 12 existing Time Fill hoses and nozzles. Remove the twelve (12) fill/vent hoses from all Six (6) of the time-fill posts. New conductive fill/vent hoses should be furnished and installed to serve the anticipated fill demand. The hoses to be furnished shall be per the following specifications: Parker Parflex or approved equal. Fill nozzles shall be replaced as needed.
- 1.3.3. **Emergency Shutdown System Improvements (Site 3).** Includes all labor, material, and equipment to replace up to three existing ESD switches. Also, to test and evaluate the entire ESD system and make recommendations for national and local code compliance upgrades if needed.
- 1.3.4. **Fast Fill Dispenser Removal (Site 2).** Includes all labor, material, and equipment to remove the existing non-operational Fast Fill Dispenser. This includes capping the high pressure lines at the base of the dispenser and at the priority panel. Cutting the electrical conduits and conductors at the dispenser base and disconnecting the conductors at the breaker panel. Removing any communication cables that are connected.
- 1.3.5. **CNG Compressors (Optimize Operation) (Site 1).** Includes labor, material and equipment for EFS West and Atlas Copco to evaluate the current compressor PLC configurations and reconfigure the PLC for optimal performance including reconfiguring (by installing tubing as required) the new priority panel to a cascade system.
- 1.3.6. **As-built, Diagram and Drawings.** EFS West will provide a complete set of AS- BUILT drawings from information provided from the City of Roseville and as observed from the aboveground equipment configurations. It does not include any subsurface investigations for piping or electrical

routing.

- 1.3.7. **Truck Defueling Station.** Includes labor, material, and equipment required to install one defueling station vented to the atmosphere.

Deliverables:

- a. Design Submittals for each facility upgrade/modification; equipment, plans and technical specifications. Two submittals shall be provided to the City for review and comment prior to finalizing the submittals for the improvements.
- b. An updated flow schematic and Process and Instrumentation Diagram (PID) shall be included in the submittals.
- c. Labor, equipment and installation of all task 1.3 fueling station modifications.
- d. 1-year parts and labor warranty on all task 1.3 fueling station modifications.

Assumptions:

- a. EFS West costs assumes that we will be using the Priority panel and Defueling panel provided by Atlas Copco.
- b. Contract is a not-to-exceed budget, allocated as shown in attached cost proposal.

Phase 2 Optional Upgrades and Modifications

The City may choose to issue amendments to EFS West's scope of work to implement recommendations for fueling station modifications or equipment replacement as identified in Phase 1 of this scope of work. This optional phase is not a part of current scope of work and exercise of this option is at City's discretion with no obligation to EFS West.

Phase 3 Optional Facility Maintenance Agreement

The City may choose to enter into a maintenance service plan with EFS West for the routine inspection and service of the CNG fueling station including on-call repair services. This optional phase is not a part of current scope of work and exercise of this option is at City's discretion with no obligation to EFS West.

If you have any questions please do not hesitate to contact our office at (661-705-8264).

Sincerely,

Von Regli

ORDINANCE NO. 6215

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE
AUTHORIZING CERTAIN AMENDMENTS TO THE FISCAL YEAR 2019-20
BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY
EFFECTIVE AS AN APPROPRIATION MEASURE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. The City of Roseville Annual Budget, Fiscal Year 2019-20, is hereby amended by transferring appropriation to and from the activities indicated below:

Appropriate funds for the Compressed Natural Gas (CNG) Fueling Station Upgrade project, per request of the Environmental Utilities Department, as listed on the attached Request for Budget Adjustment in the amount of \$40,000.

SECTION 2. This ordinance is hereby declared to be an appropriation measure, immediately effective pursuant to the provisions of Section 5.03 of the Charter.

SECTION 3. The City Clerk is hereby authorized and directed to post a true copy of the foregoing ordinance in each of three (3) conspicuous locations in the City and she shall immediately after such posting enter in the ordinance book, under the record of the ordinance, a certificate under her hand stating the time and place of such publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville, this
_____ day of _____, 2019, by the following vote on roll call:

FUND BALANCE

ACCOUNT STRING				BUDGET (\$)	DESCRIPTION
Fund	Account	Center	Project	Adjustment	
6101				18,000	Increase available resources in Water Ops Fund
6201				18,000	Increase available resources in Wastewater Ops Fund
6301				4,000	Increase available resources in Waste Services Ops Fund
TOTAL				40,000	

Justification for Budget Adjustment:

The new Compressed Natural Gas (CNG) CNG Fueling Station Upgrade project (500095) improves the existing station to meet current code regulations and replace equipment past usable life. The total cost will be \$288,232 (\$248,232 for the service agreement and 10% contingency plus \$40,000 of secondary labor) and funds are available in the Waste Service Annual Rehab cost center (74260) so there is no net effect on the available resources in the Waste Services Rehabilitation Fund (6330). There is an increase in the available resources of the EU operating funds (Water: \$18,000, Wastewater: \$18,000, Waste Services: \$4,000) due to EU Tech Services staff charging their time to the project.

CITY OF ROSEVILLE

NOTICE FOR PROPOSALS

CNG Fueling Station Upgrade and Maintenance Plan Phase 1 and Phase 2

NOTICE IS HEREBY GIVEN that proposals for **Compressed Natural Gas (CNG) Fueling Station Upgrade and Maintenance Plan Phase 1 and Phase 2** will be received by the City of Roseville. Proposals will be accepted **ONLY** at the office of the **City Clerk, Civic Center, 311 Vernon Street, Roseville, CA, 95678, until 3:00 p.m., January 24, 2020**. Said proposals will be evaluated and results will be made public after completion of the negotiation process with the selected contractor. The City reserves the right to reject any or all proposals and to waive any informalities or irregularities in any proposal or in the proposal process.

IMPORTANT!!!

The City is not responsible for misdelivered proposals, and the proposer is strictly liable for its chosen method of delivery. It is the proposer's sole responsibility to make sure that proposals arrive at the proper location. Any proposal which does not actually arrive in the City Clerk's Office by the RFP due date and time will be rejected as non-responsive, even if properly addressed or delivered to another City Department.

Your proposal **MUST** be addressed and delivered as follows:

**City of Roseville
Attn: City Clerk Department
311 Vernon Street
Roseville, CA 95678**

The proposer is also directed to include the attached "Sealed Proposal" label on the outside of the package or envelope so that it is visible when delivered to the City.

City of Roseville RFP
PREVAILING WAGE NOTIFICATION

This is a prevailing wage project. Accordingly, all prevailing wage and fair employment laws and regulations shall be adhered to. For prevailing wage contracts over \$25,000.00, copies of certified payroll must be submitted with invoices. Prevailing wage rates may be obtained from the Department of Industrial Relations and/or the following website address:

<http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm>

City of Roseville RFP

DEPARTMENT OF INDUSTRIAL RELATIONS CONTRACTOR REGISTRATION NOTIFICATION

No contractor or subcontractor may be listed on a Proposal for or work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. The Contractor shall provide proof of current registration with the Department of Industrial Relations for both itself and all listed subcontractors with their Proposal. The Contractor is hereby notified that this Project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

1.0 INTRODUCTION

The City of Roseville (hereinafter “City”), is soliciting proposals for a Compressed Natural Gas (CNG) Fueling Station Upgrade and Maintenance Plan Phase 1 and Phase 2. This will be a competitive negotiation process. Qualified individuals, firms, contractors, consultants or entities (hereinafter “Contractor”), that meet the requirements set forth in this Request for Proposals (hereinafter “RFP”), and are capable of providing the services requested are encouraged to participate.

1.1 CITY OVERVIEW

The City of Roseville is an incorporated city with a population of more than 132,000 residents, located in Placer County off of Interstate 80, approximately 16 miles northeast of Sacramento, California. The City of Roseville is a Charter city operating under the City Council/City Manager form of government.

1.2 BACKGROUND

The City of Roseville has had alternative fueled vehicles (AFV) in its fleet since 1997. The AFV mix includes hybrids, electric, and CNG vehicles. The city funded and constructed a small fast-fill and time-fill CNG fueling station in 1997 and has operated and maintained the station for its transit and municipal vehicles. The City maintains its own CNG station using specialized craft resources from the Environmental Utilities Maintenance Division.

The City of Roseville’s CNG station was designed and constructed in two phases by Accel Project Systems, Inc. who provided all the design, permitting, equipment components, and installation. The latest phase added a second 50 scfm compressor, six more high-pressure storage vessels and ten time-fill posts were completed in 2003. The following summarizes the current use and condition of the CNG fueling station: Only the time-fill system is in operation at this time. The fast-fill dispenser is out of service.

A map and elevation of the existing stations is attached. See Attachment 7. A Process and Instrumentation Diagram of the facility is included. See Attachment 8.

1.2.1 - Existing Fueling Station Facilities

The following is a description of the current fueling station facilities.

Compressors

There are two 50 standard cubic feet per minute (scfm) CNG compressors (Compressors #1 and #2) both manufactured by Ingersoll Rand (IR). Each compressor operates for approximately 15-20 hours per month and have been overhauled once. Compressors #1 and #2 have accumulated 6,200 and 5,800 runtime hours, respectively, since their last overhaul.

Dryer

A gas dryer manufactured by Xebec, Inc. consisting of a single tower filled with 200 lbs of Desiccant is located upstream of the compressors. The pressure drop across the tower is reported by the City to be low. There have been no icing issues reported downstream of the dryer which indicates no or low moisture carryover. The desiccant inside the tower has not been replaced due to moisture content of the gas.

Storage Tanks

There are a total of nine storage tanks connected in a buffer configuration (i.e., all vessels are connected to each other). At the start of the evening's fill, the CNG in the vessels is sent to the vehicles followed by CNG directly from the compressors. After the vehicles are full, the compressors replenish the vessels for the next evening's fill.

Dome-Loaded Regulator Panel

The Dome-Loaded Regulator Panel contains a dome-load regulator to ensure overnight vehicle fills are ambient temperature compensated to 3,600 psig (i.e., equal to a settled fill of 3,600 psig at 70 degrees F). Stainless steel tubing is not plumb and is run in front of the regulator obstructing access. The City reports this panel has been unreliable for years.

Time-fill Posts and Hoses

A total of six dual hose fill posts (12 fill hoses) are located in the parking area designated for time-fill operations.

Fast-Fill Dispenser and Priority/Sequencing Control Valve Panel

The existing single fast-fill station is currently out of service. The City has determined that this fueling station and its priority/sequencing control valve panes are no longer needed and should be removed.

1.2.2 - Current and Future CNG Station Operation

The two CNG compressors can provide a total of approximately 43 diesel gallon equivalents (dge) per hour of CNG ($2 \times 50 \text{ scfm} \times 60 \text{ min/hour} / 139 \text{ scf/dge} = 43 \text{ dge/hour}$).

There are currently four (4) waste collection vehicles using approximately 35 dge/day while running 4.5 hours/day each. In the coming year the City plans to add four (4) additional vehicles using approximately the same 35 dge/day. The resulting demand will therefore be 280 dge/day and supplying this demand will require a both compressors to run approximately 7 hours per day.

Based on the current and projected modest fuel demands of the City's CNG vehicle fleet (i.e. 140 dge/day and 280 dge/day respectively), the CNG fueling station can supply this capacity.

Vehicles at the time-fill fueling stations are supplied CNG from the storage tanks first. Capacity of the storage tanks is roughly 70 dge of usable fuel when all of the vessels are full.

The amount of usable fuel within multiple storage tanks, in a buffer configuration, is roughly 10% of the total fuel stored since the storage tank's pressure drops during the fueling process as the pressure reaches equilibrium with the vehicle's fuel tank during fueling, so not all fuel can be used. This usable amount of CNG is not always sufficient to directly fill the vehicles and the compressors will come on to complete the fueling process directly. Once all vehicles are filled the compressors continue to run to replenish the storage tanks.

The City of Roseville is currently in the planning phases of construction of a new fast-fill Renewable Natural Gas (RNG) fuel station at its Wastewater Treatment Plant. This will be the primary fueling infrastructure for the Waste Collection fleet. The City would like to upgrade and maintain the current fueling infrastructure to provide reliability by having two fuel sources in the event of system failure.

1.3 INSTRUCTIONS TO PROPOSERS

This RFP includes a description of the scope of services, proposal requirements, and instructions for submitting your proposal. Failure to follow these instructions may result in rejection of your proposal.

No oral representations or interpretations will be made to any proposer as to the meaning of this RFP.

Direct all inquiries regarding this RFP in writing to: <https://www.publicpurchase.com>

City of Roseville
Environmental Utilities Department
Attn: Sen Saetern

Do not contact other individuals or City departments in this regard. Information provided by anyone other than the above contact may be invalid and proposals which are submitted in accordance with such information may be declared non-responsive.

In the event that it becomes necessary to revise any part of this RFP, written addenda will be issued. Any amendment to this RFP is valid only if it is in writing and issued by the City department issuing the RFP. No oral interpretations or answers shall bind the City unless confirmed by the City in writing.

All addenda for this RFP will be distributed through PublicPurchase.com to proposers who have registered with PublicPurchase.com and who have downloaded the RFP. Additionally, the Notice of Intent to Award will be posted on PublicPurchase.com. **It is the proposer's sole responsibility to monitor PublicPurchase.com for possible addenda to this RFP and for the Notice of Intent to Award.** Failure of proposer to retrieve addenda or the Notice of Intent to Award from PublicPurchase.com shall not relieve him/her of the requirements contained therein or the timelines associated therewith. Additionally, failure of proposer to return a signed addendum, when required, may be cause for rejection of his/her proposal.

2.0 TENTATIVE SCHEDULE

The following represents the tentative schedule for this RFP. Any change in the scheduled dates for the Pre-Proposal Job Walk/Conference, Deadline for Final Questions, or Proposal Submission Deadline will be advertised in the form of an addendum to this RFP. The schedule for the evaluation process and other future dates may be adjusted without notice.

Table 1: Project Milestone Schedule

Project Milestone	Date
RFP Released by the City	November 22, 2019
Mandatory Pre-Proposal Job Walk	December 17, 2019
Deadline for Final Questions	January 7, 2020
City Responses to Written Questions	January 15, 2020
Proposal Submission Deadline	January 24, 2020
Contractor Interviews as needed	February 25, 2020
Contract Negotiations	March 17, 2020
Contract Approval by City Council	May 6, 2020
Commencement of Services	May 7, 2020

3.0 MANDATORY PRE-PROPOSAL JOB WALK/CONFERENCE

A **mandatory** pre-proposal conference/job walk has been scheduled for Tuesday, December 17, 2019 at 1:00 pm at:

City of Roseville Corporation Yard
2005 Hilltop Circle
Roseville, CA 95747

Proposals from Contractors who do not attend the **mandatory** pre-proposal conference/job walk will be rejected. The pre-proposal conference/job walk will begin at the designated start time. **Tardiness will be grounds for disqualification.**

Interested firms will have an opportunity to submit questions regarding the requirements outlined in this RFP. In order to make the meeting more effective for all participants, attendees should read this document thoroughly prior to the meeting.

Substantial clarifications or changes required as a result of the meeting will be issued in the form of a written addendum to the RFP. A list of attendees will be distributed upon request.

4.0 TECHNICAL REQUIREMENTS

Contractor shall comply with all federal, state, and local safety regulations and all applicable Cal-OSHA requirements.

The Contractor shall also provide appropriately licensed contracting, and/or engineering services as needed pursuant to the Service Agreement in addition to all the labor, tools, equipment, and materials required to complete the services outlined in this RFP.

The project design, installation and maintenance shall conform at a minimum to the following applicable codes and standards

- NFPA 52 Vehicular Fuel Systems Code, Chapter 8 CNG Compression, Gas Processing, Storage, and Dispensing Systems, General requirements for compressed natural gas (CNG) compression, gas processing, storage, and dispensing systems
- NFPA 52 Vehicular Fuel Systems Code, 8.4 System Siting Requirements for system setback distances
- NFPA 52 Vehicular Fuel Systems Code, Table 8.4.2.9 Electrical Installations, Requirements for classified areas
- Natural Gas Vehicle (NGV) 2 Natural Gas Vehicle Containers
 - Set of standards that address component testing for certification purposes for natural gas vehicle fueling infrastructure and vehicle tanks
- NGV 1 Compressed NGV Fueling Connection Devices
 - Set of standards that address component testing for certification purposes for natural gas vehicle fueling infrastructure and vehicle tanks
- NGV 3.1 Fuel System Components for Natural Gas Powered Vehicles
 - Certification document for fuel system components
- NGV 4.1 Dispensing Systems Certification document for fuel systems
- NGV 4.2 Hoses for Natural Gas Vehicles (NGV) and Dispensing Systems
 - Certification document for fueling hoses
- NGV 4.3 Temperature Compensation
 - Devices for Natural Gas Dispensing Systems Standard to address fueling parameters required to achieve defined state-of-charge
- NGV 4.4 Breakaway Devices for Natural Gas Dispensing Hoses and Systems
 - Certification document for dispenser hoses
- NGV 4.5 (draft) Priority and Sequencing
 - Equipment for Natural Gas Dispensing Systems Document in development that sets procedures for fueling operations
- NGV 4.6 Manually Operated Valves for Natural Gas Dispensing Systems
 - Certification document for dispensing system valves
- NGV 4.7 (draft) Automatic Valves for Use in Natural Gas Vehicle Fueling Stations Certification document for fuel system compressors
- NGV 4.8 Natural Gas Fueling Station Reciprocating Compressor Guidelines Pressure Relief Devices -1 for NGV Fuel Container Certification document for fueling compressors
- ASME B31.3 Process Piping Process design piping standard
- C-6 Standards for Visual Inspection of Steel Compressed Gas Cylinders
- Inspection standard to complement design standard
- S-1.1 Pressure Relief Device Standards -
 - Part 1- Cylinders for Compressed Gases S-1.3 Pressure Relief Device Standards -
 - Part 3 - Stationary Storage Containers for Compressed Gases and Pressure relief for different container configurations

5.0 SCOPE OF SERVICES

The City of Roseville requires the Contractor to provide engineering design services, installation, labor, tools, equipment, materials and transportation required to perform the services necessary for completing the CNG Fueling Station Upgrade and Maintenance Plan Phases 1 and 2 per the scope defined in this RFP.

The work will be divided into two phases, with Phase 1 consisting of a condition assessment, analysis and development of upgrade recommendations, facilities upgrades that have been identified as immediately necessary, and development of a facilities maintenance plan including entering into a two-year facilities maintenance agreement with the City upon completion of the work.

Phase 2 will cover the optional modifications and upgrades identified in the condition assessment and tasks will be awarded individually, all together, or not at all depending on the findings of the condition assessment, recommendations, and City's goals.

The proposals will be evaluated based on Contractor's experience, qualifications, Project Understanding, Proposed Plan, and References.

PHASE 1 - ASSESSMENT, DESIGN, REPAIR/UPGRADE, AND MAINTENANCE OF THE CNG FILLING STATION

Contractor shall coordinate all onsite work with the City. Work that requires process/facility shutdowns shall be coordinated with a written access request to the City Project Manager a minimum of two (2) days in advance of the work. Contractor shall not begin work until access requests are approved in writing.

TASK 1.1 - PROJECT MANAGEMENT

Provide overall project management to ensure all tasks are fully completed, within the allocated budget and timeframe. The Contractor shall be responsible for mobilization, demobilization, bonds, insurance, permits (at a minimum a City Business Permit is required), and other associated work under this task. The Contractor shall provide overall project management to keep the project on schedule and within budget, participate in meetings, submit payment requests, process technical submittals required in the tasks below, and develop a baseline and progress schedules.

TASK 1.2 – CONDITION ASSESSMENT AND ANALYSIS

Conduct a condition and reliability assessment of the CNG fueling station facilities. Assessment should include all system components and field testing as necessary to determine remaining useful life. Provide a Technical Memorandum summarizing the assessment methodology, findings, and best alternatives/options for equipment repair or replacement. Include a timeline, and cost estimate for each rehabilitation/replacement option on a Time and Material basis. An

outline of major system components to include in the Technical Memorandum (but not limited to these items) is as follows.

- Site 1a: Storage vessels, supply line configuration, priority sequencing cabinet, dome-loaded regulator panel, and all PRV's and bleed valves associated with fuel storage.
- Site 1b: Compressor skid, compressors, existing coalescing gas filter/dryer system (Xebec), blowdown tank, associated PRV's for gas supply, and compressor PRV piping system.
- Site 3: All electrical conduits, compressor control system, entire Emergency Shutdown System (ESD) system, paddle switches, power supply conductors and 480 station feeder panel.
- Site 1-4: Confirm adequacy of supply line sizing between compression skid to fuel dispensing stations.
- Site 4: Analyze condition of the time-fill fueling stations; nozzles, controls, and appurtenances.
- Filter Banks: Engineering analysis of the potential need for additional Coalescing Filter Bank and if so, appropriate location, sizing, and appurtenances that will be required.
- E-Stop System Analysis: Analyze existing emergency stop system for safety, ease of access, and integration with existing, and potential future facilities.
- Painting and Corrosion Protection: Analyze and recommend appropriate painting and corrosion protection for each area of the CNG facilities.
- Other Sites: All appurtenances related to the CNG Fueling Station.

TASK 1.3 - FACILITY UPGRADES & MODIFICATIONS

The Contractor shall provide the engineering design and installation for the following upgrades and modifications. For the purposes of estimating the contractor's efforts, the Contractor shall assume that two design submittals, (60% and 100% plans and specifications as applicable), shall be provided to the City for review and comment prior to finalizing the submittals for the improvements. An updated flow schematic and Process and Instrumentation Diagram (PID) shall be included in the submittals.

Task 1.3.1 – Dome-Loaded Regulator Panel Upgrade (Site 1)

Replace the dome-loaded regulator panel including stainless steel tubing and temperature compensation system. The proposal should provide a recommendation on the best alternative for the temperature compensation system.

Task 1.3.2 – Hose Replacement at Time-fill Stations (Site 4)

Remove the twelve (12) fill/vent hoses from all Six (6) of the time-fill posts. New conductive fill/vent hoses should be furnished and installed to serve the anticipated fill demand. The hoses to be furnished shall be per the following specifications: Parker Parflex or approved equal. Fill nozzles shall be replaced as needed.

Task 1.3.3 – Emergency Shutdown System Improvements (Site 3)

Install upgrades to the ESD (Emergency Shutdown System) identified in Task 1.2. See Attachment 9 for Location of Existing Emergency Stop Buttons.

Currently the ESD system only shuts down compressors under the following conditions:

- Manual Shutdown: Someone activates any of the ESD buttons at dispensers, east wall of car wash near fuel islands, or ESD mounted adjacent to entrance to CNG compressor skid.
- Auto Shutdown: Compressor's pressure reducing valves on both unit's 4 stages are each tied together so if any of the four compressor stages over pressurize it will shut down the faulty compressor.

Although compressors can be shut down either manually or automatically, there is currently no leak detection and no ESD for a leak. In the event of a leak between storage and dispensers, there is no ESD to stop the flow of gas to dispenser posts. One potential solution is the addition of a solenoid valve between storage and time-fill posts that is tied to the ESD system. This option should be included in the condition assessment's rehabilitation options together with other identified facilities upgrade recommendations for the ESD system. Confirm that the ESD meets the latest codes and describe the assumptions of any work to be performed in Tab E: Project Plan.

Task 1.3.4 – Fast Fill Dispenser Removal (Site 2)

Depressurize and isolate supply pipelines to the out-of-service fast-fill dispenser. Control valves feeding the fast-fill dispenser at the existing priority/sequencing valve panel near the compressor skid (Site 1) shall be closed and capped. Remove the unused fast fill dispenser system and associated above ground piping and appurtenances at fuel island. Minimize the amount of asphalt concrete disturbed during the removal process.

TASK 1.3.5 – CNG Compressors (Optimize Operation) (Site 1)

Provide an option for optimizing the run strategy and reduce the intermittent starting and stopping of the CNG compressors. Evaluate if a lead-lag system with compressors set to alternate would make sense. Each compressor might be set to run longer (and independently) with the goal of mitigating the risks of wear and tear on the compressors. The proposer shall develop an operational strategy, including a control strategy for accomplishing the modifications. Include a modified process schematic, identify the on-site improvements required, and outline the steps to achieve this goal.

TASK 1.3.6 – As-built, Diagram and Drawings

Contractor to prepare As-built drawings for the existing CNG Fueling Station including all upgrades on the different components. Include company logo on drawing, underground facility, plan view of facility, and details of various components that have been upgraded or modified. The Contractor shall keep the drawings up-to-date at all times during construction and upon completion of the project, submit their As-built drawings to the City with the Contractor's certification as to the accuracy of the information. All As-built drawings submitted shall be titled "AS-BUILT" above the title block and dated. Contractor shall provide three (3) drawings on D size (22 inches by 34 inches) used for construction of CNG fueling station. Contractor shall also provide one (1) electronic copy of the as-built in PDF and CAD on USB flash drive.

TASK 1.3.7 – Truck Defueling Station

Contractor to provide options and location for truck defueling station. Defueling is required whenever work on the CNG fuel tanks or non-isolated fuel system components is being performed within a major repair garage. Most commonly, defueling is performed using a defueling post or station. This device incorporates a hose and connections that allow the onboard tank to discharge through a vent to atmosphere or to a station with CNG fueling infrastructure. Defueling to a CNG station is preferred, as it enables the recapture of most of the defueled gas.

TASK 1.4 - FACILITY MAINTENANCE PLAN DEVELOPMENT

Develop an overall maintenance plan for the CNG fueling station facilities including a schedule of activities and a description of maintenance activities and frequency to ensure reliability and compliance are met. The City plans to enter into an Agreement with the successful proposer for a three (3) year routine maintenance contract for the CNG fueling station facilities with an option for extending the contract another two (2) years.

The following facilities and regularly scheduled tasks shall be included in the facility maintenance contract agreement.

- Site 1: Storage vessels, supply line, priority sequencing cabinet, and all PRVs and bleed valves associated with fuel storage, Dome-Loaded Regulator Panel. Compressor skid, compressors, gas filter/dryer system, blowdown tank, associated PRV's for gas supply, and compressor PRV piping system. Compressor control system.

Test pressure relief valves (PRV) annually. Section 541(a)(6) in Title 8 of the California Code of Regulations specifies all safety relief devices in CNG vehicular fueling systems shall be tested at least annually and maintained in proper operating condition. Describe testing procedures that will be utilized. Maintenance reports shall be provided to City staff. City currently owns spare Mercer and Crosby PRV's to rotate out annually for all storage vessels. City also owns one spare set of compressor PRV's to be alternated every three (3) years between compressors 1 and 2.

- Site 3: All electrical conduits, compressor control system, entire Emergency Shutdown System (ESD) system, paddle switches, power supply conductors and 480 station feeder panel.

- Site 4: Time fill posts and supply line from station to dispensers.

Hoses should be tested monthly for electrical continuity, pressure tested for leaks, and visually inspected for damage/wear. Please consult the tag with the manufacturer's product specific data on the new fill/vent hose for further maintenance details. CNG compressors, Xebec Molecular sieve dryer, elements, compressor controls, ESD system, blowdown tank, oil recovery tank. Describe testing procedures that will be utilized. Maintenance reports shall be provided to City staff.

- Other Sites: All appurtenances related to the CNG Fueling System.

PHASE 2 – OPTIONAL UPGRADES AND MODIFICATIONS

Phase 2 will incorporate optional modifications and upgrades to the CNG system outlined below. Contractor will develop options, recommendations and budgets for the Phase 2 work during the Phase 1 condition assessment. The project understanding (Tab D) and project plan (Tab E) should detail the approach, assumptions, and methodology that will be used to develop the condition assessment analysis and recommendations for Phase 2.

TASK 2.1 – CNG COMPRESSORS (SITE 1)

Based on the results of the condition assessment, this task may consist of rehabilitation of the CNG compressors. In the event that the Compressors cannot be rehabilitated to yield a long term reliable system, the City may select to replace the compressors entirely. This portion of the work, shall be up to the sole discretion of the City and shall be a determination made by the City, after the Phase1 tasks of this RFP have been completed and been in operation for 24 months.

This task may consist of replacing the current 50 scfm Ingersoll Rand compressors with either new compressors or an entirely new package skid at the same system pressure of 3600 psi. The Contractor shall provide the engineering and installation, for this upgrade. For the purposes of estimating the contractors efforts, the Contractor shall assume that two design submittals, (60% and 100% plans and specifications), shall be provided to the City for review and comment, prior to finalizing the submittals for the improvement's. An updated flow schematic and PID shall be included in the submittals.

TASK 2.2 – COALESCING FILTER BANK (NEAR SITE 4)

Based on the results of condition assessment this task includes design and installation of a new coalescing filter bank near time-fill fueling stations to increase protection due to compressor oil carryover. The coalescing filters shall be provided per the following specifications: Parker Finite Coalescing filters sized appropriately for full pressure drop demand potential of time fill dispensers. Filters shall include block and bleed valves (Swagelok) for oil capture tube system. Additionally filters shall be plumbed with isolation valves immediately up and downstream of housings for coalescing filter inspections.

TASK 2.3 – PAINTING AND CORROSION PROTECTION (SITE 1)

Based on the results of the condition assessment, and City’s approval, this task may consist of new coatings to provide protection from external corrosion of the steel piping and other appurtenances. Contractor should include a description of the methodology for development of recommendations (specifications for) the appropriate coating system and installation techniques required.

TASK 2.4 – CNG VENT OUTLET MODIFICATIONS (SITE 1)

Confirm that CNG vent outlets are at least ten (10) feet above finish grade in accordance with Section 541(b)(2) in Title 8 of the California Code of Regulations. It appears that some may not be at least ten (10) feet tall. Modify any CNG vents that do not comply with the minimum height requirement in Title 8. For the purposes of estimating the effort for this task, Contractor shall determine the number of PRVs to be modified and assume a minimum of two (2) PRVs will have to be modified to meet the code requirements and be cognizant that additional vents may be required.

6.0 PROPOSAL FORMAT REQUIREMENTS

Each response to this RFP shall include the information described in this section. Provide the information in the specified order. Failure to include all of the information specified may be cause for rejection. Additional information may be provided, but should be succinct and relevant to the goals of this RFP. Any additional information that a proposing Contractor wishes to include that is not specifically requested should be included in an appendix to the proposal.

Contractors are encouraged to keep the proposals brief and to the point, but sufficiently detailed to allow evaluation of the project approach. Excessive information will not be considered favorably. Unauthorized conditions, omissions, limitations or provisions attached to a proposal will render the proposal non-responsive and may cause its rejection.

Proposers are warned against making erasures or alterations of any kind, without initialing each and every such change. Proposals that contain erasures or irregularities of any kind, without such initialing, or omissions, may be rejected.

The proposal should be bound or contained in a loose leaf binder. Document pages shall be 8-1/2 inches by 11 inches in size or folded to such a size. Use section dividers, tabbed in accordance with this section as specified below.

6.1 PART 1 –TECHNICAL PROPOSAL

Part 1 of the Proposal must be sealed separately from Part 2 of the Proposal. Section 7 provides submittal instructions.

Cover Letter with the following information:

- Title of this RFP
- Name and Mailing Address of Firm (include physical location if mailing address is a PO Box)

- Contact Person, Telephone Number, Fax Number, and Email Address

TAB A: Firm's Qualifications (3 double sided pages maximum)

Describe your firm and provide a statement of your firm's qualifications for performing the requested services. Identify the services which would be completed by your firm's staff and those that would be provided by sub-consultants or sub-contractors, if any. Identify any sub-consultants or sub-contractors you propose to utilize to supplement your firm's staff. Include the firm's organizational chart, including its constituent parts, and size variation of staffing levels in the past five (5) years.

TAB B: Experience and References (2 double sided pages maximum)

Provide a summary of your firm's experience in providing these or similar services. Provide a minimum of three (3) references for projects or services similar in nature and scope that your firm's team members have completed in the last five (5) years. Include brief descriptions of the projects, dates, client names and contact persons' names, addresses and telephone numbers. Public sector references are preferred.

Contractors shall also demonstrate a minimum of five (5) years direct experience working on fuel pumps, compressors, and CNG filtration system. Such work experience must be direct, and the work must have been performed by the Contractors's own crews. The Contractor must have experience performing rehabilitation work on medium size or larger CNG facilities with total compressor capacity of 50 scfm or larger, or performed at least other jobs similar in size and scope to the work specified herein. Any work performed by subcontractors will not be considered direct contractor experience.

TAB C: Qualifications of Team (2 double sided pages maximum)

Provide a brief summary of the role, qualifications and experience of each team member and designated project manager/lead assigned to this project, including length of service with the firm and the qualifications/experience of any sub-consultant or sub-contractor staff on your project team. A project team organizational diagram and brief resume of each team member and the designated project manager/lead for each applicable category shall be included. The geographic location of the firm and key personnel shall also be identified. Any proposed sub-consultants or sub-contractors shall be listed in Attachment 3. Include subconsultant's and subcontractor's assigned task(s) and experience. Full resumes may be included in the appendix.

TAB D: Project Understanding (2 double sided pages maximum)

Based on the available information, supplemental research, field observations, and experience with similar projects, provide a narrative describing your understanding of the services requested in this RFP, your general approach and any major challenges to achieving the City's stated goals. Include any issues that you believe will require special consideration for this project. Also identify any unique approaches or strengths that your firm may have related to this project. City staff will assess your understanding of all aspects of the project based on the overview.

TAB E: Project Plan (8 double sided pages maximum)

Provide a detailed discussion of your firm's approach to the successful implementation of this project. Include thorough discussions of methodologies you believe are essential to accomplishing this project. Include a proposed work schedule to accomplish all of the required tasks within the desired timeline. Identify the staff who would be assigned to each task, including sub-consultants and sub-contractors. List any necessary equipment, training or installation services required.

As applicable, the Contractor shall provide clear and detailed descriptions of the approach and procedures that will be implemented in completing the scope of services. These procedures shall completely conform with the requirements laid out in Technical Requirements Section of this RFP.

TAB F: Required Statements/Documents

Include the following required statements and forms in Tab F.

- Executed copy of Proposer's Certification (Attachment 1)
- Contractor Licenses (Attachment 2)
- Subcontractor List (Attachment 3)
- Noncollusion Declaration (Attachment 5)
- Assurance of Designated Project Team (Attachment 11)
- No Conflict of Interest Declaration (Attachment 12)
- Proprietary Information Statement per Section 10.23 (Attachment 13)
- Provide a statement indicating your ability and agreement to fulfill the indemnification and insurance requirements contained in the sample contract (**Section 10.7**). Please note that actual certificates of insurance are not required as part of your submittal.

TAB G: Exceptions

Describe any and all proposed exceptions, alterations or amendments to the Scope of Services or other requirements of this RFP, including the Sample Contract (**Attachment 4**). The nature and scope of your proposed exceptions may negatively affect the evaluation of your submittal and the City's determination of whether it is possible to successfully negotiate a contract with your firm.

TAB H: Appendix

Include additional information and documents in this section as needed. May include, but not limited to:

- Resumes of key staff and Subcontractors. Page Limit: none.
- Miscellaneous attachments as needed.

6.2 PART 2 – COST PROPOSAL AND FINANCIAL INFORMATION

Part 2 of the Proposal must be sealed separately from Part 1 of the Proposal. Section 7 provides submittal instructions. Part 2 should contain the following items.

Cost Proposal

The Cost Proposal shall be provided in a table format that identifies the key project team member(s) proposed for each task and sub-task and the number of management, engineering, technical, drafting and support personnel hours and cost envisioned for each task. The hourly rate, name of team member and staff classification shall be included in the column headings of the spreadsheet. Define any reimbursable expenses requested to be paid by the City. Identify all other costs to be billed to the project including project expenses (no mark-ups on expenses will be allowed) and sub-consultant costs. Include any proposed mark-up for sub-consultant fees. Include a copy of the proposed rate schedule(s) to be used throughout the duration of the project including any adjustments which are predicted to occur during the life of the project. In order to facilitate the assessment of cost proposals, all proposals shall be formatted such that the tasks listed in the “Scope of Services” Section (Tasks 1.1 through 1.4), shall be utilized. Additional sub-tasks may be created in the cost proposals at the proposing firm’s discretion to provide additional definition of major activities to be accomplished.

Financial Data

The City wants to ensure that the successful Contractor has the necessary facilities, ability, experience, and financial resources to provide the services specified herein in a satisfactory and timely manner. Please list and explain any pending bankruptcies, liens, stop payment notices, judgments, lawsuits, arbitrations, mediations, foreclosures, and any similar actions filed or resolved in the past seven (7) years. Please indicate whether a client has ever terminated a contract with your firm for breach, and if so, please explain. Also, furnish a statement of financial resources demonstrating that the Contractor has the ability to maintain a staff of regular employees, sub-consultants or sub-contractors adequate to insure continuous performance of work, and demonstrating that the equipment for the work contemplated is sufficient, adequate and suitable.

Optional Confidential Envelope – Proprietary Information.

Optional “Confidential” Envelope. If a Proposer desires to claim a **privilege against public disclosure** as described in Section 11.23, for a trade secret or other proprietary information, such information must be submitted with the Proposal in a separate envelope marked “confidential.” This confidential envelope should be included in Part 2 Envelope (or container). City Staff will ensure that this Confidential Envelope is reviewed by the City Attorney’s office for future handling.

7.0 SUBMITTAL INSTRUCTIONS

7.1 Submittal Package Structure and Contents

There are two parts to the Bid Proposal. Part 1 is the Proposer's Technical Proposal and Required Proposal Form Attachments. Part 2 is the Cost Proposal and Proposing Company's financial information. Part 1 should be submitted in a separate sealed envelope from Part 2's sealed envelope. Both sealed envelopes shall be submitted simultaneously before the Bid Proposal submission deadline.

Your submittal package shall include the following:

Envelope 1 (or Container 1)

- One (1) original and seven (7) printed copies of your Part 1 – Firm's Qualifications and Technical Proposal, and
- One (1) electronic copy of your entire Part 1 proposal in PDF format on flash drives or other electronic media.

Envelope 2 (or Container 2)

- One (1) original copy of Cost Proposal and Confidential Financial data; and
- One (1) electronic copy of your entire Part 2- Cost Proposal without Confidential Financial data in PDF format on a USB flash drive.
- Optional "Confidential" Envelope. If a Proposer desires to claim a **privilege against public disclosure** as described in Section 11.23, for a trade secret or other proprietary information, such information must be submitted with the Proposal in a separate envelope marked "confidential." This confidential envelope should be included in Part 2 Envelope (or container). City Staff will ensure that this Confidential Envelope is reviewed by the City Attorney's office for future handling.

7.2 Proposal Deadline

Proposals shall be submitted not later than the time and date indicated on the cover page of this RFP.

7.3 Labeling

Each submittal envelope/container (Part 1 and Part 2) must include the City's "Sealed Proposal" label. In addition to the City's label, clearly mark each envelope as either Part 1 or Part 2. See Attachment 10 for "Sealed Proposal" label.

7.4 Proposal Delivery Address

Proposals shall be submitted ONLY to:

City of Roseville
Attn: City Clerk Department
311 Vernon Street
Roseville, CA 95678

Faxed and/or emailed proposals will not be accepted.

The City shall not be responsible for proposals delivered to a person or location other than that specified herein.

Postmarks will not be accepted and proposals received after the deadline date and time will not be accepted or considered. **No exceptions.**

7.5 Minor Irregularities

The City reserves the right to waive minor defects and/or irregularities in proposals, and shall be the sole judge of the materiality of any such defect or irregularity.

7.6 Department of Industrial Relations Contractor Registration:

No contractor or subcontractor may be listed on a proposal for or work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. The Contractor shall provide proof of current registration with the Department of Industrial Relations for both itself and all listed subcontractors with their proposal. The Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

8.0 EVALUATION CRITERIA

The proposals will be evaluated based on Contractor's experience, qualifications, Project Understanding, Proposed Plan, and References. The following evaluation criteria and rating schedule will be used to determine the most highly qualified firm(s).

Table 2: Proposal Scoring

Tab	Evaluation Criteria	Maximum Points Possible
A	Firm's Qualifications	20
B	Experience and References	15
C	Qualifications of Team	20
D	Project Understanding	20
E	Project Plan	25
F	Required Statements Documents	Pass/Fail
	Total Score:	100

9.0 SELECTION PROCESS

9.1 Award of Contract

Award of the RFP shall be made to the responsible proposer whose proposal is determined, through a formal evaluation panel process, to be the most advantageous to the City after the evaluation panel has taken into consideration the evaluation factors set forth in the RFP. A master score sheet shall be created based on the evaluation panel's initial evaluation. Proposals shall be scored according to the criteria stated in the RFP.

9.2 Selection Committee

Proposals submitted will be reviewed by a selection committee. Contractors that have submitted the best and most complete proposals may be invited to an interview. The number of Contractors invited to an interview may vary depending upon the number of proposals submitted.

Should the City elect to conduct interviews with any proposers, the following criteria shall be considered and each proposer ranked by the evaluation panel during the interview process: a) Quality of presentation, b) Ability to meet the City's business goals, c) Communication style.

The City reserves the right to make a selection after review of the proposals without oral interviews; therefore, the proposal should be submitted initially on the most favorable terms that the Contractor might propose.

9.3 Contract Negotiation

A contract will be negotiated with the Contractor considered best meeting the City's need for this project. In the event a mutually satisfactory contract cannot be negotiated with the City's first choice, negotiations may be terminated and commenced with the Contractor considered next best in meeting the City's needs for this particular project.

9.4 Contract Execution

The selected Contractor will be required to execute a City prepared contract. The contract may further refine the scope of services and will provide for the terms and conditions of employment.

9.5 City Council Approval

The award of any contract is expressly contingent upon City Council approval and the availability of funds. City staff may not legally bind the City to a contract.

9.6 City's Right to Reject All Proposals

The City reserves the right to reject any or all proposals, or to waive minor irregularities in said proposals, or to negotiate minor deviations with the successful Contractor(s). In the case of differences between written words and figures in a proposal, the amount stated in written words shall govern. In the case of a difference in unit price versus the extended figure, the unit price shall govern.

The City reserves the right to seek clarification on any or all proposal submittals to ensure the RFP specifications are met. Proposals may be rejected from any proposer who does not comply with the City's request for clarification.

9.7 Notice of Intent (NOI)

Once a decision has been made to award the contract, then a formal notice of the intent to award to the recommended proposer(s) shall be made by the Department.

9.8 License, Permits, and Certifications

A City of Roseville business license as well as all applicable permits, licenses and certifications required by local, state or federal law are required before the award of contract.

Contractors are not required to have a City of Roseville Business license to submit a Proposal; however, it will be required before executing a Contract. Contractors may apply for a business license at: <https://www.roseville.ca.us/government/departments/finance/licensing/business>

10.0 GENERAL TERMS & CONDITIONS

10.1 Standard Contract

Upon completion of the evaluation and recommendation for award, the selected Contractor will be required to execute an agreement prepared by the City, a sample of which is included as **Attachment 4**.

10.2 Independent Contractor

At all times the Contractor shall represent himself/herself to be an independent contractor offering such services to the general public and shall not represent himself/herself, or his/her employees, to be an employee of the City. Therefore, the Contractor shall assume all legal and financial responsibility for taxes, FICA, employee fringe benefits, workers' compensation, employee insurance, minimum wage requirements, overtime, etc., and agrees to indemnify, save, and hold the City, its officers, agents, and employees, harmless from and against, any and all loss, cost (including attorneys' fees), and damage of any kind related to such matters.

10.3 Non-Appropriation

The City may terminate any resulting contract at the end of any fiscal year, June 30th, without further liability other than payment of debt incurred during such fiscal year, should funds not be appropriated by its governing body to continue services for which the contract was intended.

10.4 Conflict of Interest

The Contractor shall warrant that no official or employee of the City has an interest, has been employed or retained to solicit or aid in the procuring of the resulting contract, nor that any such

person will be employed in the performance of such contract without immediate divulgence of such fact to the City. Contractors submitting a proposal in response to this RFP must disclose any actual, apparent, direct, indirect, or potential conflicts of interest that may exist with respect to the Contractor or the Contractor's management or employees relative to the services to be provided to the City. Conflict of interest issues may require consultation with legal counsel. If a Contractor has no conflicts of interest, a statement to that effect must be included in the proposal. Violation of this section shall be a material breach of the contract entitling the City to any and all remedies by law or in equity.

10.5 Undue Influence

The Contractor shall warrant via an executed Proposer's Certification (**Attachment 1**) that no undue influence or pressure is used against or in concert with any officer or employee of the City in connection with the award or terms of the contract that will be executed as a result of this RFP, including any method of coercion, confidential financial arrangement or financial inducement. No officer or employee of the City shall receive compensation, directly or indirectly, from the Contractor, or from any officer, employee or agent of the Contractor, in connection with the award of the contract or any work to be conducted as a result of this RFP. Violation of this section shall be a material breach of the contract entitling the City to any and all remedies by law or in equity.

10.6 Non-Collusion

Contractors submitting proposals shall warrant via an executed Proposer's Certification (**Attachment 1**) that their offer is made without any previous understanding, agreement or connection with any person, firm or corporation submitting a separate proposal for the same project and is in all respects fair, without outside control, collusion, fraud or otherwise illegal action. This condition shall not apply to proposals which are submitted by firms who have partnered with others to submit a cooperative proposal that clearly identifies a primary contractor and the associated sub-consultants or sub-contractors. For construction contracts, proposers shall submit a properly completed and executed "Non-collusion Declaration" which is attached as **Attachment 5**.

10.7 Indemnification & Insurance Requirements

The City's standard indemnification and insurance requirements are provided in the sample contract, included in **Attachment 4**. All costs of complying with the insurance requirements shall be as included in your pricing. The selected Contractor shall provide complete and valid insurance certificates within ten (10) days of the City's written request. Failure to provide the documents within the time stated may result in rejection of the Contractor's proposal. Alterations to the terms and conditions shall not be allowed.

10.8 Cost of Preparing Proposal

The City will not pay any costs incurred by any Contractor in preparing or submitting a proposal in response to this RFP.

10.9 Proposals Property of the City

All documents or materials submitted with or in conjunction with any proposal, including but not limited to electronic files, shall become the property of the City after the proposal submission deadline. No submission documents will be returned. During negotiations, the scope of services may be amended by the City and negotiated based upon ideas provided by other proposers or any other source.

10.10 Proposals are Public Records

All proposals submitted are subject to the public disclosure requirements under the laws of the State of California, unless the City identifies and exercises a right or obligation to exempt any record from public disclosure. However, proposals will not be disclosed until negotiations are complete and a recommendation for selection and award is made.

10.11 Protests

A. Protest Requirements

Any Proposer who is aggrieved in connection with the solicitation or award of a contract may file a protest with the City Clerk's office. The protest must be received in writing by the City Clerk's office within seven (7) calendar days after such aggrieved Proposer 1) knows or should have known of the facts giving rise thereto or 2) the date of the notice of intent to award, whichever is sooner. In no event shall a protest be allowed after an award has been made by City Council. If the seventh calendar day falls on a weekend or City holiday, the protesting party may submit the protest prior to close of business on the first business day following such weekend or holiday. Failure to submit a timely protest shall bar consideration of a protest.

B. Grounds for Protest

1. The alleged grounds for protest shall be limited to the following: (a) computation errors, (b) violations of local, state, or federal law, or (c) the City failed to follow the procedures specified in this Policy.
2. The protest shall state all grounds claimed for the protest and include supporting documentation. Failure to clearly state the grounds for the protest and provide supporting documentation shall be deemed a waiver of all protest rights.

C. Administrative Review

Upon receipt of the protest and after determining the protest was properly filed, the Department Director shall provide a copy of the protest to other proposers who might become aggrieved as a result of the protest and issue a written decision within fourteen (14) calendar days after receipt of the protest. The protest will be evaluated by the Department Director, the City Attorney's Office, and the Purchasing Manager. The protesting proposer shall promptly provide any information requested by City staff as part of such investigation. The decision shall either deny or uphold the protest and include reasons for the decision. The written decision shall be final.

D. Stay of Action During a Protest

In the event a protest is filed under Section 10.11, the City shall not proceed further with the award of the contract until the protest is resolved, unless:

1. The Director of Central Services makes a determination that the award of the contract without delay is necessary to protect a substantial interest of the City, or
2. The City decides to reject all proposals and issue a new RFP.

10.12 Rejection of RFP

The City reserves the right to reject any or all proposals, to waive defects or irregularities in any proposal or in the RFP process, and to offer to negotiate or contract with any Contractor in response to any RFP. This RFP does not constitute any form of offer to contract.

10.13 Multiple Award.

The City reserves the right to award the contract to multiple contractors when applicable.

10.14 Increasing/Decreasing Portions of RFP

The City reserves the right to increase or decrease the amount of any portions of the work represented in the RFP and/or to omit portions of said work, as may be deemed necessary by the City.

10.15 Rejection as Non-Responsive

Proposals may be rejected as non-responsive at the City's sole discretion if there are alterations of form, the proposal is conditional or the proposal is incomplete.

10.16 Modifying RFP

The City reserves the right to modify any portion of, or to postpone or cancel this RFP at any time, and/or reject any and all submissions without indicating any reason.

10.17 No Proposal Accepted

If no proposal is accepted, the City may elect to have the services performed in some other manner.

10.18 Rejecting Team Members, Firms or Sub-contractors

The City reserves the right to reject individual team members, firms, sub-consultants or sub-contractors and request substitution prior to contract award.

10.19 Local Business, Small Business, Minority and Women Owned Business.

Although no preferences will be given, the City highly encourages submission of proposals by local businesses, by small business owners, and by minority and women-owned businesses.

10.20 Withdrawal of Proposals

Proposals may be withdrawn prior to the date and time specified for proposal submission with a formal written notice by an authorized representative of the proposer delivered to the City Clerk's Office. Proposals submitted will become property of the City after the proposal submission deadline.

Proposals may not be withdrawn for ninety (90) days after the due date unless the City enters into a contract with another Contractor prior to the expiration of that ninety (90) day period.

10.21 Electronic Transmittals

No electronic mail, telephone or facsimile proposals will be accepted. If a photocopy is submitted, the proposal must be signed in ink.

10.22 Proposal Postponement and Amendment.

The City reserves the right to revise or amend the RFP or specifications up to the time set for opening of the proposals. Such revisions and amendments, if any, shall be announced by amendments to this RFP through the City's web site. Copies of such amendments shall be furnished to all prospective proposers. Prospective proposers are defined as those proposers who have registered and are on the City's RFP list for this material/service. If revisions and amendments require changes in quantities, prices or scope of services, the date set for opening of the proposals may be postponed by such number of days as in the opinion of the City shall enable proposers to revise their proposals. Proposals which fail to acknowledge a substantive addendum to the RFP, as determined by the City Attorney's Office, on the City supplied addendum form will be rejected as non-responsive. Any revisions or amendments to the RFP will become incorporated into any contract awarded pursuant to the RFP.

10.23 Proprietary Information

Proposers submitting a proposal in response to this RFP must provide a statement that nothing contained in the submitted proposal will be proprietary. However, if a proposer desires to claim a privilege against public disclosure for a trade secret or other proprietary information, such information must be submitted with the proposal in a separate envelope marked "confidential." The City Attorney's Office will determine if the information is in fact proprietary, based on state and federal law. Note that under California law, a price proposal to a public agency is not a trade secret. The Contractor shall defend, indemnify and hold harmless the City regarding any claim by any third party for the public disclosure of the "confidential" portion of the proposal.

10.24 Right to Request Additional Information

During the evaluation process, the City reserves the right, where it may serve the best interests of the City, to request additional information and clarifications from proposers. Such information will be requested in writing to the specific proposer. This information will become a part of the original proposal submitted by the specific proposer and will be used by the City in evaluating the proposal and will not be shared with other proposers during the evaluation and negotiation process.

10.25 Modification of Proposals

Modification of a proposal already received will be considered only if the modification is received prior to the deadline date for receiving proposals. All modifications shall be made in writing, executed, and submitted in the same form and manner as the original proposal.

10.26 Examination of Contract Documents.

Each proposer shall thoroughly examine and be familiar with the terms of this RFP, the sample contract attached as **Attachment 4**, legal and procedural documents, general conditions, specifications, and addenda (if any), which will constitute the contract documents. Submission of a proposal shall constitute acknowledgement, upon which the City may rely, that the proposer has thoroughly examined and is familiar with the contract documents. Failure or neglect of a proposer to receive or examine any of the contract documents shall in no way relieve the proposer of any obligation with respect to their proposal or to the contract. No claim for additional compensation will be allowed which is based upon lack of knowledge of any contract document.

10.27 Non-Discrimination

The City maintains various policies related to contractual service providers. Among these is an anti-discrimination policy, which requires that the City's contractors not discriminate in hiring on the basis of gender, race, religion, sexual orientation, medical condition, and all other categories protected by law. Upon acceptance of a proposal, the City may request that the selected Contractor sign a statement affirming its compliance with this policy.

10.28 No Assignment or Modifications

This awarded contract is to be binding on the successors and assigns of the parties hereto. The services called for herein are deemed unique and except as provided herein Contractor shall not assign, transfer, subcontract, or otherwise substitute its interest in the agreement or any of its obligations herein without the written consent of the City. The Agreement may be modified only by a written amendment signed by the parties.

10.29 Bankruptcy

Upon filing for any bankruptcy or insolvency proceeding whether voluntary or involuntary, or upon the appointment of a receiver, trustee, or assignee for the benefit of creditors, the Contractor must notify the City immediately. Upon learning the actions herein identified, the City reserves the right, at its sole discretion, to cancel the contract.

10.30 Bonds

The successful Contractor will be required to provide a **100% Faithful Performance Bond and a 100% Labor and Materials Bond** using the City's forms.

Attachment 1 - PROPOSER'S CERTIFICATION

CNG Fueling Station Upgrade and Maintenance Plan Phase 1 and Phase 2

I hereby propose to furnish the goods or services specified in the Request for Proposals ("RFP"). I agree that my proposal will remain firm for a period of up to ninety (90) days in order to allow the City of Roseville ("City") adequate time to evaluate the qualifications submitted.

I have carefully examined the Request for Proposals and any other documents accompanying or made a part of this RFP. The information contained in this proposal is true and correct to the best of my knowledge and is signed under penalty of perjury under the laws of the State of California. I further certify that I am duly authorized to submit this proposal on behalf of the firm as its authorized agent and that the firm is ready, willing and able to perform if awarded the contract.

I further certify that this proposal is made without prior understanding, agreement, connection, discussion, or conspiracy with any other person, firm or corporation submitting a proposal for the same product or service; that this proposal is fair and made without outside control, collusion, fraud or illegal action; that no officer, employee or agent of the City or any other proposer is financially interested in said proposal; that no undue influence or pressure was used against or in concert with any officer, employee or agent of the City in connection with the award or terms of the contract that will be executed as a result of this RFP; and that the undersigned executed this Proposer's Certification with full knowledge and understanding of the matters therein contained and was duly authorized to do so.

Type of Organization:

☐ Sole Proprietorship ☐ Corporation ☐ State of Incorporation
☐ Partnership ☐ Limited Liability Company

The undersigned Proposer acknowledges receipt, understanding, and full consideration of the following Addenda:

CITY OF ROSEVILLE, A MUNICIPAL CORPORATION

1. To the fullest extent allowed by law, Contractor shall defend, indemnify, and save and hold harmless the City, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of Contractor's willful misconduct or negligent act or omission while engaged in the performance of obligations or exercise of rights created by this Agreement, except those matters arising from City's sole or active negligence or willful misconduct. The parties intend that this provision shall be broadly construed. Contractor's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.
2. Contractor is an independent contractor, and shall not be considered an officer, agent or employee of the City.
3. Without the written consent of the City, this Agreement is not assignable by Contractor either in whole or in part.
4. Time is of the essence of this Agreement.
5. At any time during the term of this Agreement, the City has the right to terminate this Agreement, provided Contractor is given thirty (30) days' written notice. City's termination shall be without further liability to City, however Contractor shall be entitled to all costs reasonably incurred prior to the date of termination. Contractor acknowledges that City may terminate this Agreement should funds not be appropriated by its governing body to continue services under this Agreement.
6. This Agreement may only be amended or modified in writing. It is integrated and contains the complete understanding of the parties.
7. All equipment, supplies and services sold to the City of Roseville shall conform to the general safety orders of the State of California.
8. Unless notified to the contrary, in writing, the City assumes that the Contractor has accepted the work in accordance with the plans and specifications (if any) and agrees to do the work in compliance with this Agreement.
9. All prevailing wages and fair employment practices must be adhered to. For prevailing wage contracts over \$25,000, copies of certified payroll must be submitted with invoices. Prevailing wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: <http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm>.
- 10a. Unless otherwise specified, the Contractor shall maintain the policies of insurance outlined in Attachment A, incorporated herein by this reference, in full force and effect during the term of this Agreement. The City of Roseville retains sole discretion in determining the types and proper levels of insurance coverage.
- 10b. Form. Contractor shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.
- 10c. Additional Insureds. Contractor shall also provide a separate endorsement or section of the policy showing City, its officers, agents, employees, and volunteers as additional insureds for each type of coverage (except Workers' Compensation) and for ongoing and completed operations. Such insurance shall specifically cover the contractual liability of Contractor. The additional insured coverage under the Contractor's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from City's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office ("ISO") CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.
- 10d. Cancellation/Modification. Contractor shall provide ten (10) days written notice to City prior to cancellation or modification of any insurance required by this Agreement.
- 10e. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of City (if agreed to in a written contract) before City's own insurance shall be called upon to protect it as a named insured.
- 10f. Subcontractors. Contractor agrees to include in its contracts with all subcontractors the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, Contractor shall require its subcontractors to agree to be bound to Contractor and City in the same manner and to the same extent as Contractor is bound to City under this Agreement. Additionally, Contractor shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of City's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request.
- 10g. Self-Insured Retentions. All self-insured retentions ("SIR") must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.
- 10h. Waiver of Subrogation. Contractor hereby agrees to waive subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of City, its officers, agents, employees and volunteers for all work performed by Contractor, its employees, agents and subcontractors.
- 10i. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve Contractor of liability in excess of such coverage, nor shall it preclude City from taking such other actions as are available to it under any other provisions of this Agreement or law.

11. Contractor shall comply with all federal, state and local laws and ordinances, including but not limited to the City's storm water regulations, as may be applicable to the performance of services under this Agreement. Failure to comply with local ordinances may result in monetary fines and cancellation of this Agreement. Refer to www.roseville.ca.us/stormwater for links to more information on the City's storm water regulations.
12. In the event that the terms of any attachment or exhibit conflict with any terms of this Service Agreement, the terms of this Service Agreement shall control.
13. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. In the event that any signature is delivered by facsimile transmission or by e-mail delivery of a ".pdf" format data file, such signature shall create a valid and binding obligation of the party executing (or on whose behalf such signature is executed) with the same force and effect as if such facsimile or ".pdf" signature page were an original thereof.
14. If either party commences any legal action against the other party arising out of this Agreement or the performance thereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorneys' fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.
15. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.
16. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.
17. No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this agreement, Contractor and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.
18. Contractor must submit all claims as defined in and in accordance with the claim resolution process set forth in Section 9204 of the Public Contract Code. Each such claim must be sent to the City by registered mail or certified mail with return receipt requested and must contain reasonable documentation to support the claim. All claims must be received prior to acceptance of the work.

City reserves the right to withhold any payments to Contractor in the event of noncompliance with insurance requirements or if required by law.

Insurance Submission Process

The City of Roseville Human Resources/Risk Management Department uses a service called EBIX to manage our insurance certificate tracking.

How It Works

- The vendor's contact information is entered into EBIX. EBIX will contact the vendor to request proof of insurance.
- The Vendor can forward the request to their Insurance Agent(s) if necessary.
- Vendor/Insurance Agent submits insurance to EBIX by email to roseville@ebix.com or by fax to (770) 325-5727. After faxing or emailing the certificate, please **DO NOT** send the certificate by mail to EBIX. Please do not mail, email or fax any certificates to the City of Roseville.
- Once submitted, EBIX reviews the insurance documentation. If there are deficiencies, EBIX will send a follow up letter or email requesting additional information.

Questions Regarding Insurance Submission: Contact EBIX at (951) 652-4239
Questions Regarding Insurance Requirements Contact Risk Management at (916) 774-5202

Attachment 5 – NONCOLLUSION DECLARATION

NONCOLLUSION DECLARATION TO BE EXECUTED BY PROPOSER AND SUBMITTED WITH PROPOSAL

The undersigned declares:

I am the _____ of _____, the party making the foregoing Proposal.

The proposal is not made in the interest of, or on behalf of, any undisclosed person, partnership, company, association, organization, or corporation. The bid is genuine and not collusive or sham. The bidder has not directly or indirectly induced or solicited any other bidder to put in a false or sham bid. The bidder has not directly or indirectly colluded, conspired, connived, or agreed with any bidder or anyone else to put in a sham bid, or to refrain from bidding. The bidder has not in any manner, directly or indirectly, sought by agreement, communication, or conference with anyone to fix the bid price of the bidder or any other bidder, or to fix any overhead, profit, or cost element of the bid price, or of that of any other bidder. All statements contained in the bid are true. The bidder has not, directly or indirectly, submitted his or her bid price or any breakdown thereof, or the contents thereof, or divulged information or data relative thereto, to any corporation, partnership, company, association, organization, bid depository, or to any member or agent thereof, to effectuate a collusive or sham bid, and has not paid, and will not pay, any person or entity for such purpose.

Any person executing this declaration on behalf of a bidder that is a corporation, partnership, joint venture, limited liability company, limited liability partnership, or any other entity, hereby represents that he or she has full power to execute, and does execute, this declaration on behalf of the bidder.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that this declaration is executed on _____ [date], at _____ [city], _____ [state].

Attachment 6 – ASSEMBLY BILL NO. 626

CHAPTER 810

An act to add and repeal Section 9204 of the Public Contract Code, relating to public contracts.

[Approved by Governor September 29, 2016. Filed with Secretary of State September 29, 2016.]

LEGISLATIVE COUNSEL'S DIGEST

AB 626, Chiu. Public contracts: claim resolution.

Existing law prescribes various requirements regarding the formation, content, and enforcement of state and local public contracts. Existing law applicable to state public contracts generally requires that the resolution of claims related to those contracts be subject to arbitration. Existing law applicable to local agency contracts prescribes a process for the resolution of claims related to those contracts of \$375,000 or less.

This bill would establish, for contracts entered into on or after January 1, 2017, a claim resolution process applicable to any claim by a contractor in connection with a public works project. The bill would define a claim as a separate demand by the contractor for one or more of the following: a time extension for relief from damages or penalties for delay, payment of money or damages arising from work done pursuant to the contract for a public work, or payment of an amount disputed by the public entity, as specified.

This bill would require a public entity, defined to exclude certain state entities, upon receipt of a claim sent by registered or certified mail, to review it and, within 45 days, provide a written statement identifying the disputed and undisputed portions of the claim. The bill would authorize the 45-day period to be extended by mutual agreement. The bill would require any payment due on an undisputed portion of the claim to be processed within 60 days, as specified. The bill would require that the claim be deemed rejected in its entirety if the public entity fails to issue the written statement.

This bill would authorize, if the claimant disputes the public entity's written response or if the public entity fails to respond to a claim within the time prescribed, the claimant to demand to meet and confer for settlement of the issues in dispute. The bill would require any disputed portion of the claim that remains in dispute after the meet and confer conference to be subject to nonbinding mediation, as specified. The bill would provide that unpaid claim amounts accrue interest at 7% per annum. The bill would prescribe a procedure by which a subcontractor or lower tier contractor may make a claim through the contractor.

This bill would require the text of these provisions, or a summary, to be set forth in the plans or specifications for any public work which may give rise to a claim. The bill would specify that a waiver of these rights is void and contrary to public policy, except as specified. The bill would also specify that it does not impose liability on a public entity that makes loans or grants available through a competitive application process, for the failure of an awardee to meet its contractual obligations.

By increasing the duties of local agencies and officials, this bill would impose a state-mandated local program.

This bill would, on January 1, 2020, repeal the provision establishing the claim resolution process.

This bill would specify that these provisions constitute a matter of statewide concern.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

The people of the State of California do enact as follows:

SECTION 1. Section 9204 is added to the Public Contract Code, to read: 9204. (a) The Legislature finds and declares that it is in the best interests of the state and its citizens to ensure that all construction business performed on a public works project in the state that is complete and not in dispute is paid in full and in a timely manner.

(b) Notwithstanding any other law, including, but not limited to, Article 7.1 (commencing with Section 10240) of Chapter 1 of Part 2, Chapter 10 (commencing with Section 19100) of Part 2, and Article 1.5 (commencing with Section 20104) of Chapter 1 of Part 3, this section shall apply to any claim by a contractor in connection with a public works project.

(c) For purposes of this section:

(1) "Claim" means a separate demand by a contractor sent by registered mail or certified mail with return receipt requested, for one or more of the following:

(A) A time extension, including, without limitation, for relief from damages or penalties for delay assessed by a public entity under a contract for a public works project.

(B) Payment by the public entity of money or damages arising from work done by, or on behalf of, the contractor pursuant to the contract for a public works project and payment for which is not otherwise expressly provided or to which the claimant is not otherwise entitled.

(C) Payment of an amount that is disputed by the public entity.

(2) "Contractor" means any type of contractor within the meaning of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code who has entered into a direct contract with a public entity for a public works project.

(3) (A) "Public entity" means, without limitation, except as provided in subparagraph (B), a state agency, department, office, division, bureau, board, or commission, the California State University, the University of California, a city, including a charter city, county, including a charter county, city and county, including a charter city and county, district, special district, public authority, political subdivision, public corporation, or nonprofit transit

corporation wholly owned by a public agency and formed to carry out the purposes of the public agency.

(B) "Public entity" shall not include the following:

- (i) The Department of Water Resources as to any project under the jurisdiction of that department.
- (ii) The Department of Transportation as to any project under the jurisdiction of that department.
- (iii) The Department of Parks and Recreation as to any project under the jurisdiction of that department.
- (iv) The Department of Corrections and Rehabilitation with respect to any project under its jurisdiction pursuant to Chapter 11 (commencing with Section 7000) of Title 7 of Part 3 of the Penal Code.
- (v) The Military Department as to any project under the jurisdiction of that department.
- (vi) The Department of General Services as to all other projects.
- (vii) The High-Speed Rail Authority.

(4) "Public works project" means the erection, construction, alteration, repair, or improvement of any public structure, building, road, or other public improvement of any kind.

(5) "Subcontractor" means any type of contractor within the meaning of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code who either is in direct contract with a contractor or is a lower tier subcontractor.

(d)(1) (A) Upon receipt of a claim pursuant to this section, the public entity to which the claim applies shall conduct a reasonable review of the claim and, within a period not to exceed 45 days, shall provide the claimant a written statement identifying what portion of the claim is disputed and what portion is undisputed. Upon receipt of a claim, a public entity and a contractor may, by mutual agreement, extend the time period provided in this subdivision.

(B) The claimant shall furnish reasonable documentation to support the claim.

(C) If the public entity needs approval from its governing body to provide the claimant a written statement identifying the disputed portion and the undisputed portion of the claim, and the governing body does not meet within the 45 days or within the mutually agreed to extension of time following receipt of a claim sent by registered mail or certified mail, return receipt requested, the public entity shall have up to three days following the next duly publicly noticed meeting of the governing body after the 45-day period, or extension, expires to provide the claimant a written statement identifying the disputed portion and the undisputed portion.

(D) Any payment due on an undisputed portion of the claim shall be processed and made within 60 days after the public entity issues its written statement. If the public entity fails to issue a written statement, paragraph (3) shall apply.

(2)(A) If the claimant disputes the public entity's written response, or if the public entity fails to respond to a claim issued pursuant to this section within the time prescribed, the claimant may

demand in writing an informal conference to meet and confer for settlement of the issues in dispute. Upon receipt of a demand in writing sent by registered mail or certified mail, return receipt requested, the public entity shall schedule a meet and confer conference within 30 days for settlement of the dispute.

- (B) Within 10 business days following the conclusion of the meet and confer conference, if the claim or any portion of the claim remains in dispute, the public entity shall provide the claimant a written statement identifying the portion of the claim that remains in dispute and the portion that is undisputed. Any payment due on an undisputed portion of the claim shall be processed and made within 60 days after the public entity issues its written statement. Any disputed portion of the claim, as identified by the contractor in writing, shall be submitted to nonbinding mediation, with the public entity and the claimant sharing the associated costs equally. The public entity and claimant shall mutually agree to a mediator within 10 business days after the disputed portion of the claim has been identified in writing. If the parties cannot agree upon a mediator, each party shall select a mediator and those mediators shall select a qualified neutral third party to mediate with regard to the disputed portion of the claim. Each party shall bear the fees and costs charged by its respective mediator in connection with the selection of the neutral mediator. If mediation is unsuccessful, the parts of the claim remaining in dispute shall be subject to applicable ~~procedures~~ outside this section.
- (C) For purposes of this section, mediation includes any nonbinding process, including, but not limited to, neutral evaluation or a dispute review board, in which an independent third party or board assists the parties in dispute resolution through negotiation or by issuance of an evaluation. Any mediation utilized shall conform to the timeframes in this section.
- (D) Unless otherwise agreed to by the public entity and the contractor in writing, the mediation conducted pursuant to this section shall excuse any further obligation under Section 20104.4 to mediate after litigation has been commenced.
- (E) This section does not preclude a public entity from requiring arbitration of disputes under private arbitration or the Public Works Contract Arbitration Program, if mediation under this section does not resolve the parties' dispute.
- (3) Failure by the public entity to respond to a claim from a contractor within the time periods described in this subdivision or to otherwise meet the time requirements of this section shall result in the claim being deemed rejected in its entirety. A claim that is denied by reason of the public entity's failure to have responded to a claim, or its failure to otherwise meet the time requirements of this section, shall not constitute an adverse finding with regard to the merits of the claim or the responsibility or qualifications of the claimant.
- (4) Amounts not paid in a timely manner as required by this section shall bear interest at 7 percent per annum.
- (5) If a subcontractor or a lower tier subcontractor lacks legal standing to assert a claim against a public entity because privity of contract does not exist, the contractor may present to the public entity a claim on behalf of a subcontractor or lower tier subcontractor. A subcontractor may request in writing, either on his or her own behalf or on behalf of a lower tier subcontractor, that the contractor present a claim for work which was performed by the subcontractor or by a lower tier subcontractor on behalf of the subcontractor. The subcontractor requesting that the claim be presented to the public entity shall furnish

reasonable documentation to support the claim. Within 45 days of receipt of this written request, the contractor shall notify the subcontractor in writing as to whether the contractor presented the claim to the public entity and, if the original contractor did not present the claim, provide the subcontractor with a statement of the reasons for not having done so.

- (e) The text of this section or a summary of it shall be set forth in the plans or specifications for any public works project that may give rise to a claim under this section.
- (f) A waiver of the rights granted by this section is void and contrary to public policy, provided, however, that (1) upon receipt of a claim, the parties may mutually agree to waive, in writing, mediation and proceed directly to the commencement of a civil action or binding arbitration, as applicable; and (2) a public entity may prescribe reasonable change order, claim, and dispute resolution procedures and requirements in addition to the provisions of this section, so long as the contractual provisions do not conflict with or otherwise impair the timeframes and procedures set forth in this section.
- (g) This section applies to contracts entered into on or after January 1, 2017.
- (h) Nothing in this section shall impose liability upon a public entity that makes loans or grants available through a competitive application process, for the failure of an awardee to meet its contractual obligations.
- (i) This section shall remain in effect only until January 1, 2020, and as of that date is repealed, unless a later enacted statute, that is enacted before January 1, 2020, deletes or extends that date.

SEC. 2. The Legislature finds and declares that it is of statewide concern to require a charter city, charter county, or charter city and county to follow a prescribed claims resolution process to ensure there are uniform and equitable procurement practices.

SEC. 3. If the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code.

COUNCIL COMMUNICATION

CC #: 0724
File #: 0203-05

Title: VHF Communication Maintenance - Sole Source Contract Purchase Agreement
Contact: Greg James 916-774-5806 gjames@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.5.

RECOMMENDATION TO COUNCIL

Staff recommends Council adopt a resolution to approve a Sole Source Contract Purchase Agreement with Silke Communications for repairs, modifications, integration and specialized equipment required for maintenance of the VHF enterprise wide interoperable radio system.

BACKGROUND

The existing VHF communications systems utilized for communications with Placer County local agencies and State of California systems for both law enforcement and the fire service, were upgraded with grant funding between 2010 and 2015.

During those upgrades, additional system modifications and maintenance needs were identified, which included replacing aged antenna systems, the re-engineering and modifications of outdated filters, modifications required to allow proper communication with local agencies frequencies, and fixes to address coverage and capability for public safety communications. The VHF system has had increased technical challenges and now requires more resources than expected.

While addressing these repairs and re-engineering, it is necessary to have the current service provider (Silke Communications) continue such work since all are engineered by this vendor. All components must be installed by one vendor to maintain warranty status, and the vendor must also be a factory-certified dealer of such equipment already installed or added. For this reason, staff recommends the existing vendor be granted approval to continue such work under the sole source contract purchase agreement.

FISCAL IMPACT

The \$100,000 contract purchase agreement will be funded by \$50,600 in the existing Fire Department operating budget, with additional funding coming from the General Fund Contingency budget. The agreement with Silke Communications is intended to fill unexpected time-sensitive needs as they occur.

ECONOMIC DEVELOPMENT / JOBS CREATED

Not applicable.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. A contract purchase agreement for VHF Communications meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Respectfully Submitted,

Greg James, Assistant Fire Chief - Operations

Rick Bartee, Fire Chief

Dominick Casey, City Manager

Contract Terms and Conditions

1. To the fullest extent allowed by law, Consultant agrees to indemnify, including the cost to defend City, and its officers, agents, employees and volunteers from any and all claims, demands, costs or liability that arise out of, or pertain to, or relate to the negligence, recklessness, or willful misconduct of Consultant and its agents in the performance of services under this contract, but this indemnity does not apply to liability for damages for death or bodily injury to persons, injury to property, or other loss, arising from the sole negligence, willful misconduct or defects in design by City or the agents, servants, or independent contractors who are directly responsible to City, or arising from the active negligence of City. Consultant's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.
2. Consultant is an independent contractor, and shall not be considered an officer, agent or employee of the City.
3. Without the written consent of the City, this Agreement is not assignable by Consultant either in whole or in part.
4. Time is of the essence of this Agreement.
5. At any time during the term of this Agreement, the City has the right to terminate this Agreement, provided Consultant is given thirty (30) days written notice. City's termination shall be without further liability to City; however, Consultant shall be entitled to all costs reasonably incurred prior to the date of termination. Consultant acknowledges that City may terminate this Agreement should funds not be appropriated by its governing body to continue services under this Agreement.
6. This Agreement may only be amended or modified in writing. It is integrated and contains the complete understanding of the parties.
7. All equipment, supplies and services sold to the City of Roseville shall conform to the general safety orders of the State of California.
8. Unless notified to the contrary, in writing, the City assumes that the Consultant has accepted the work in accordance with the plans and specifications (if any) and agrees to do the work in compliance with this Agreement. Any work product created for City pursuant to this Agreement is deemed owned by City.
9. All prevailing wages and fair employment practices must be adhered to. For prevailing wage contracts over \$25,000, copies of certified payroll must be submitted with invoices. Prevailing wage rates may be obtained from the State Department of Industrial Relations and/or the following website address:
<http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm>
10. Consultant agrees to the below insurance requirements:
 - a. Unless otherwise specified, the Consultant shall maintain the policies of insurance outlined in Attachment A, incorporated herein by this reference, in full force and effect during the term of this Agreement. The City of Roseville retains sole discretion in determining the types and proper levels of insurance coverage.
 - b. Form. Consultant shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.
 - c. Additional Insureds. Consultant shall also provide a separate endorsement or section of the policy showing City, its officers, agents, employees, and volunteers as additional insureds for each type of coverage, except for Workers' Compensation and Professional Liability. Such insurance shall specifically cover the contractual liability of Consultant.

The additional insured coverage under the Consultant's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from City's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office (ISO) CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be:

- (1) the minimum coverage and limits specified in this Agreement; or
 - (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater
 - d. Cancellation/Modification. Consultant shall provide ten (10) days written notice to City prior to cancellation or modification of any insurance required by this Agreement.
 - e. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of City (if agreed to in a written contract) before City's own insurance shall be called upon to protect it as a named insured.
 - f. Subconsultants. Consultant agrees to include in its contracts with all subconsultants the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subconsultants work. Furthermore, Consultant shall require its subconsultants to agree to be bound to Consultant and City in the same manner and to the same extent as Consultant is bound to City under this Agreement. Additionally, Consultant shall obligate its subconsultants to comply with these same provisions with respect to any tertiary subconsultant, regardless of tier. A copy of City's indemnity and insurance provisions will be furnished to the subconsultant or tertiary subconsultant upon request.
 - g. Self-Insured Retentions. All self-insured retentions (SIR) must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.
 - h. Waiver of Subrogation. Consultant hereby agrees to waive subrogation which any insurer of Consultant may acquire from Consultant by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of City, its officers, agents, employees and volunteers for all work performed by Consultant, its employees, agents and sub consultants.
 - i. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve Consultant of liability in excess of such coverage, nor shall it preclude City from taking such other actions as are available to it under any other provisions of this Agreement or law.
11. Consultant shall comply with all federal, state, local laws, ordinances and policies as may be applicable to the performance of services under this Agreement. Failure to comply with local ordinances may result in monetary fines and cancellation of this Agreement.
 12. In the event that the terms of any attachment or exhibit conflict with any terms of this Agreement, the terms of this Agreement shall control.
 13. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. In the event that any signature is delivered by facsimile transmission or by e-mail delivery of a ".pdf" format data file, such signature shall create a valid and binding obligation of the party executing (or on whose behalf such signature is executed) with the same force and effect as if such facsimile or ".pdf" signature page were an original thereof.

14. If either party commences any legal action against the other party arising out of this Agreement or the performance thereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorneys' fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.
15. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.
16. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.
17. For purposes of this Agreement, the terms "Contractor," "Consultant," and "Supplier" are used interchangeably.
18. Consultant agrees that any and all information furnished by City shall be deemed proprietary and confidential. All such information, to the extent previously, presently or subsequently disclosed to Consultant and/or processed and derived by Consultant services is the property of City and such property shall be deemed and treated as "Confidential Information" of City. Consultant acknowledges that such Confidential Information may contain information provided and/or generated by third-parties. Consultant agrees that such Confidential Information shall not be disclosed to any third party without written permission from City, except as required by law. Consultant shall not use the Confidential Information except to perform Consultant's services as directed by City.
19. All facilities, devices, networks and services used to store, deliver, process, backup or purge Confidential Information will employ administrative, physical, technical, and procedural safeguards and best practices at a level sufficient to secure Confidential Information from unauthorized access, destruction, use, modification, or disclosure. Such measures will be no less protective than those used to secure Consultant's own information of a similar type, and in no event less than reasonable in view of the type and nature of the information involved. It is the City's expectation that Consultant, at its own expense, shall perform annual audits for any data centers that house Confidential Information, using an independent third-party audit that meets industry standards applicable to the services under this Agreement, and provide the audit report or certification upon request to City.
20. Consultant will retain Confidential Information until deleted by City or City-authorized third party, or for a time period mutually agreed upon by the parties to this Agreement.
21. Upon termination or expiration of this Agreement, Consultant will ensure that all Confidential Information is securely transferred to City within thirty (30) calendar days. Consultant will ensure that any transfer of Confidential Information is accomplished by methods that are compatible with the relevant City systems, and that City will have access to all Confidential Information during any such transfer. Consultant shall securely dispose of all Confidential Information when requested by City and Consultant will provide written notification to City once all Confidential Information has been securely disposed of.
22. Consultant shall report to City any data compromise or unauthorized access to Confidential Information within twenty-four (24) hours after Consultant discovers such data compromise or unauthorized access. Consultant will take commercially reasonable measures to address any such data compromise or unauthorized access in a timely manner. Except as otherwise required by law, Consultant will not provide notice to end users or other entities of any such data compromise or unauthorized access without written permission from City. Consultant will promptly reimburse City in full for all fees and costs incurred by City in any investigation, remediation or litigation resulting from any such data compromise or unauthorized access, including identity protection and restoration services for each person, who in the City's sole discretion, could be impacted by identity theft.
23. Consultant may not advertise that City is a client, list City as a reference or otherwise use City's name, logos, trademarks, or service marks without prior written permission from City.

24. Consultant acknowledges that services rendered under this agreement (including but not limited to service levels and operational levels) shall be performed in accordance with industry standards.
25. If the project referenced on this agreement is a Public Works project, then the following shall apply: No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this agreement, Contractor and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.
26. If the project referenced on this agreement is a Public Works project, then the following shall apply: Contractor must submit all claims as defined in and in accordance with the claim resolution process set forth in Section 9204 of the Public Contract Code. Each such claim must be sent to the City by registered mail or certified mail with return receipt requested and must contain reasonable documentation to support the claim. All claims must be received prior to acceptance of the work.

The supplier named hereon by the acceptance of this order agrees to the provisions of this document titled "Contract Purchase Agreement" and all accompanying terms, conditions, and attachments.

Insurance Submission Process

The City of Roseville Human Resources/Risk Management Department uses a service called EBIX to manage our insurance certificate tracking.

How It Works

- The vendor's contact information is entered into EBIX. EBIX will contact the vendor to request proof of insurance.
- The Vendor can forward the request to their Insurance Agent(s) if necessary.
- Vendor/Insurance Agent submits insurance to EBIX by email to roseville@ebix.com or by fax to (770) 325-5727. After faxing or emailing the certificate, please DO NOT send the certificate by mail to EBIX. Please do not mail, email or fax any certificates to the City of Roseville.
- Once submitted, EBIX reviews the insurance documentation. If there are deficiencies, EBIX will send a follow up letter or email requesting additional information.

Questions Regarding Insurance Submission: Contact EBIX at (951) 652-4239

Questions Regarding Insurance Requirements Contact Risk Management at (916) 774-5202

VHF and On Call Services SOW

City of Roseville On Call Service Services, VHF

Silke Communications will provide radio communications on call services for The City of Roseville's VHF communications system. These services include, but are not limited to,

1. Annual preventative maintenance on VHF System Equipment.
2. Scheduled and on call repair services to VHF transmitters & receivers.
3. Scheduled and on call repair services to UHF link station.
4. Scheduled and on call repair services to voter equipment.
5. Scheduled and on call repair services for VHF to dispatch interface equipment.
6. Scheduled and on call repair services for the VHF simulcast system equipment.
7. Scheduled and on call repair services for Fire Station VHF radios and ring down equipment.
8. Other VHF radio services as requested by the City of Roseville.

City of Roseville Service Call Out Procedures

City of Roseville On Call Service Call Out Procedures

An authorized member of City of Roseville will initiate a Radio Service Call Our Procedure. As of Q1-2020 the following members of City of Roseville are approved to initiate a radio service call out:

- Karl Grover
- Paul Ruiz

Normal Business Hours:

Call the West Sacramento Shop at 916-245-6555

After Business Hours:

Call the main toll free Silke number and select the "California Technician on Call" at 855-GoSilke (855-467-4553)

Service Request:

Who: Identify yourself as a City of Roseville member.

What: Quick report on what the problem is.

Where: Quick report on where the problem is.

When: Quick report on when the failure was noticed or occurred

Point person and call back number: Who should we work with (if other than the reporting person) for resolution and their contact number?

This call gets the process rolling with the Silke Com Team. We will initiate our call out tree to ensure the best and closest resource will be responding to the problem.

Then, if possible, please have the reporting person follow up with an email to SacSupport@silkecom.com with any additional information, cell phone pictures, additional information, etc.

Hourly rates for On Call Service

Field Technician during normal business hours	\$145 an hour
System Technician during normal business hours	\$225 an hour

After hour rates are at 1.5 times normal hourly rates.

The Field Technician rate is applicable to tasks such as radio & antenna installation, repeater/voter equipment installation, radio program loading, basic troubleshooting (coax, SWR, physical wire connections), radio system clean up (tracing coax and wires, labeling, connectors, grounding), voter connections down and similar tasks.

The Systems Technician rate is applicable when a technician is actively working on "the system". Tasks such as programming the comparators and voters, tuning combiners, troubleshooting complex problems (voter is down and does not come back up after standard phone line troubleshooting).

The same technician can bill at both rates on the same call out, based on the task they are performing.

November 18, 2019

City of Roseville Fire Department
316 Vernon Street #480
Roseville, CA. 95678

Dear Roseville Fire Department.,

Thank you for the continued opportunity to serve as a communications resource for your operations. Silke Communications stands behind our workmanship and the product we represent and install. However, Silke Communications will not warranty any service, work or installation we have provided in the past that is still under warranty, if a non-Silke technician has performed work on that system. Limited exceptions are made for City of Roseville Fleet Technicians that have been trained by Silke Communications and stay within the approved scope of work. For radio and communications hardware and other physical material we have installed, we cannot provide warranty service, either manufactures' or out extended warranty is a non-Silke technician has worked on the system, beyond standard user accessible options.

Sincerely,

The handwritten signature of David C Jones is written in black ink over the Silke Communications logo. The logo consists of a red square icon with white curved lines, followed by the word "SILKE" in a bold, dark grey sans-serif font, and the word "COMMUNICATIONS" in a smaller, all-caps, dark grey sans-serif font below it.

COUNCIL COMMUNICATION

CC #: 0735
File #: 0203-12

Title: Personal Protective Equipment - Purchase Order
Contact: Brian Diemer 916-746-1392 bdiemer@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.6.

RECOMMENDATION TO COUNCIL

Staff recommends Council approve the purchase of Personal Protective Equipment (PPE) from Lion Corporation, through the use of the Master Price Agreement as a qualified government member (M-5690891) of National Purchasing Partners (NPPGOV) under Oregon Chapter 190 (Contract #PS16008). This is a publicly solicited contract established through a Request For Proposals process conducted by a lead public agency.

BACKGROUND

Staff requests authorization to purchase personal protective equipment from Lion utilizing their authorized reseller, Allstar Fire Equipment until June 14, 2020. The total purchase for FY2019-20 will not exceed \$75,000. Section 4.12.105 of the Roseville Municipal Code authorizes the Purchasing Officer to use cooperative contracts.

The Fire Department has an ongoing requirement to maintain proper personal protective equipment (PPE) for operations staff. The PPE requirements and recommendations are outlined in guides from National Fire Protection Association and Occupational Safety and Health Administration regulations. This includes a life span of ten years for structural turnout clothing.

The structural turnout clothing (PPE) is used by fire and rescue personnel when fighting fires, responding to vehicle accidents, and when incidents such as gas leaks occur. The clothing provides protection from heat, steam, blood borne pathogens, falling objects, and provides for visibility/identification. It is imperative that this equipment is in good working order at all times. Every firefighter is assigned two sets of structural turnouts clothing (PPE) to allow for cleaning, inspections, and repair. As new staff are hired, new sets need to be purchased for those individuals.

FISCAL IMPACT

The total purchase for FY2019-20 will not exceed \$75,000 which is included as part of the Fire

Department's approved annual budget.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The purchase of personal protective equipment meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Respectfully Submitted,

Brian Diemer, Assistant Fire Chief

Rick Bartee, Fire Chief

Dominick Casey, City Manager

Title: Power Plant Control System Hardware - Purchase Order
Contact: Nathan Ribordy 916-746-1673 nribordy@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.7.

RECOMMENDATION TO COUNCIL

Staff recommends City Council approve a purchase order with Emerson Process Management for the purchase of standardized equipment not to exceed \$270,000.

BACKGROUND

The Roseville Energy Park (REP) utilizes Emerson's Ovation Distributed Control System (DCS) to control plant processes. The DCS system is comprised of a server, field devices, operator and engineering work stations, and various networking hardware. While the field devices are anticipated to last in excess of twenty years, the server and workstations have a similar life cycle to that of a standard computer. Recently the REP has experienced minor equipment failure in these systems, indicating that an upgrade to more modern software and hardware is due.

Emerson supports life cycle upgrades through their Evergreen program that is intended to replace workstations, servers, improved control methodologies, and provide incremental improvements to networking hardware. In addition to the physical upgrades the REP will benefit from having the latest in control network security technology. Due to the REP having standardized on the Emerson DCS, they are uniquely qualified to provide this upgrade service. This will be the second such upgrade at the REP since it went online in 2007.

FISCAL IMPACT

The not-to-exceed cost for this hardware is \$270,000. Funding is included in the Electric Department's FY2019-20 capital budget.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines

§15060(c)(3) and §15378. The purchase of control system hardware for use at the Roseville Energy Park meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Respectfully Submitted,

Nathan Ribordy, Senior Power Plant Engineer

Michelle Bertolino, Electric Utility Director

Title: Utility Tree Trimming – Service Agreement Amendment
Contact: Jeff Beaubier 916-774-5611 jbeaubier@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.8.

RECOMMENDATION TO COUNCIL

Staff recommends City Council adopt a resolution authorizing the City Manager to execute Amendment No. 1 to Service Agreement S2003015 with Utility Tree Service, LLC. to continue providing high voltage line tree trimming services on an as-needed basis.

BACKGROUND

Utility Tree Service, LLC is the contracted tree trimming service provider for Roseville Electric to meet State-required compliance mandates, and construction and maintenance needs for high voltage electric line clearance trimming. The California Public Utilities Commission (CPUC) General Order 95, Rule 35 Vegetation Management, requires electric utilities to have an active high voltage tree trimming program to maintain the minimum clearance requirements for distances of trees or vegetation from energized lines.

The California legislature recently passed S.B. 247 that significantly increased vegetation management labor rates in the state, effective Jan 1, 2020, resulting in significant increased costs. As a result, available funds are expected to be exhausted prior to the end of the fiscal year. Additional contract funding is necessary to retain required service levels per the State mandate and to maintain tree trimming services for public safety at new, increased rates.

FISCAL IMPACT

This amendment increases agreement funding by \$170,000 bringing the total annual amount from \$546,976.34 to \$716,976.34. Funding is available in the FY2019-20 Electric Department budget.

ENVIRONMENTAL REVIEW

The proposed project involves minor alteration in the condition of the land, water, and or vegetation which will not remove healthy, mature scenic trees. The project is limited to tree trimming for power line clearance and does not include tree removal, therefore this activity is categorically exempt from CEQA as a Class 4 Exemption (State CEQA Guidelines Section 15304). The Exemption

has been prepared and no further CEQA action is required.

Respectfully Submitted,

Jeff Beaubier, Electric Operations Supervisor

Michelle Bertolino, Utility Director

Dominick Casey, City Manager

COUNCIL COMMUNICATION

CC #: 0734
File #: 0900-03

Title: Industrial and Fiddymment Substation Civil Construction - Approval of Plans and Specifications and Authorization to Call for Bids
Contact: Chris Porter 916-774-5615 cporter@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.9.

RECOMMENDATION TO COUNCIL

Staff is recommending that City Council approve the plans and specifications and authorize staff to advertise the Industrial and Fiddymment Substation Civil Construction project to call for bids.

BACKGROUND

This project is for civil construction at two substations: Industrial and Fiddymment. The construction work at Industrial Substation is required for the replacement of the existing switchgear that has reached its end of life. Replacement of this equipment is necessary to maintain system reliability.

The construction work at Fiddymment Substation is necessary to support the installation of a new 230/60kV transformer. This will be the fourth transformer of its kind in the system and is being installed to increase system redundancy and reliability. These transformers are critical in supplying electricity to the City.

FISCAL IMPACT

This total project cost is estimated at \$400,000. Funding is included in the Electric Department FY2019-20 budget.

ENVIRONMENTAL REVIEW

The proposed work of the Industrial Substation 12kV Switchgear #2 Replacement project involves the replacement of existing structures and facilities. This activity is categorically exempt from CEQA as a Class 2 Exemption (State CEQA Guidelines Section 15302). The Exemption has been prepared and no further CEQA action is required.

The proposed work of the Fiddymment Substation Transformer Addition is an action that is subject to CEQA. Project level CEQA compliance for the Fiddymment Substation Transformer Addition

was accomplished with the preparation of the Fiddymont Substation 230/60-kV Circuit Breaker Initial Study/Negative Declaration (Adopted: January 8, 2003). Because the Fiddymont Substation Transformer Addition project is consistent with the project evaluated in the Fiddymont Substation 230/60-kV Circuit Breaker Initial Study/Negative Declaration, no new effects would be expected to occur and all applicable mitigation measures from the Fiddymont Substation 230/60-kV Circuit Breaker Initial Study/Negative Declaration will be implemented. As such, no additional CEQA action is required at this time.

Respectfully Submitted,

Chris Porter, Senior Power Engineer

Michelle Bertolino, Electric Utility Director

Dominick Casey, City Manager

DEPARTMENT OF ELECTRIC

Industrial Substation 12kV Switchgear Replacement and Fiddymment Substation Transformer
Addition Project

NOTICE TO CONTRACTORS

NOTICE IS HEREBY GIVEN THAT sealed Proposals will be received at the Office of the City Clerk, 311 Vernon Street, Roseville, California, until June 2, 2020 at 3:00 p.m. Late Proposals will be rejected. No exceptions.

The Proposals will be publicly opened and read by the City Clerk or designee of the City of Roseville at 3:05 p.m. on June 2, 2020 at the Office of the City Clerk located at 311 Vernon Street, Roseville California for the following project: Industrial Substation 12kV Switchgear Replacement and Fiddymment Substation Transformer Addition Project.

A pre-bid meeting will be held per the instructions listed on the Public Purchase at <https://www.publicpurchase.com>.

A Project Manual, including all Contract Documents and the Proposal forms for bidding this project, may be obtained on-line from the City of Roseville's website at https://www.roseville.ca.us/business/procurement_services/bids_rfps. All communications relative to this project shall be conducted through Public Purchase.

Bids shall be submitted on the City's Proposal Forms included in the Project Manual, plainly endorsed with the Bidder's name together with signed acknowledgement of any and all addenda. Proposal Forms shall be securely sealed in a suitable envelope marked with the name

and address of the Bidder, and marked in capital letters on the front and back of the envelope as follows:

**INDUSTRIAL SUBSTATION 12KV SWITCHGEAR REPLACEMENT AND
FIDDYMENT SUBSTATION TRANSFORMER ADDITION PROJECT**

(Name of Bidder)

(Address of Bidder)

Whether mailed or personally delivered, all bids shall be addressed to the City of Roseville, Office of the City Clerk, 311 Vernon Street, Roseville, California, 95678.

Each bid must be accompanied by a Bid Guaranty in the form of a Certificate of Deposit, Certified or Cashier's Check, Bidder's Bond or Irrevocable Standby Letter of Credit in an amount equal to at least ten percent (10%) of the Bidder's Grand Total Price. The Bid Guaranty will be retained by the City and applied to any and all damages sustained by the City in the event that the successful Bidder fails or refuses to enter into the Contract awarded to it and to furnish all required bonds and Certificates of Insurance. The City intends to award the Contract to the lowest responsible Bidder based on the Grand Total Bid Price for all components of the Project. To the extent allowed by law, the City reserves the right to reject any and all bids and/or to waive any irregularities or informalities in any bid or in the bidding procedure. The City specifically reserves the right to not award the Contract after the opening of bids.

Any bid may be withdrawn at any time prior to the time fixed in the public notice for the deadline submission of bids only by written request for the withdrawal of the bid filed with the City Clerk. The request shall be executed by the Bidder or his or her duly authorized representative. The withdrawal of a bid does not prejudice the right of the Bidder to file a new

bid by the submission deadline. Whether or not bids are opened exactly at the time fixed in the public notice for opening bids, a bid will not be received after the deadline submission of bids nor may any bid be withdrawn after the time fixed in the public notice for deadline for submission of bids. Immediately following the deadline for submission of bids all bids shall become the property of the City of Roseville and the City is under no obligation to return bids.

Bids will be examined and reported to the City Council within sixty (60) business days after the bid opening. Except as permitted by applicable law, no Bidder may withdraw its bid for a period of sixty (60) business days after the date of bid opening. Each Bidder will be notified of any award of the Contract by the City.

The City will affirmatively ensure non-discrimination on the basis of one or more of the following: race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, genetic information, marital status, sex, age, sexual orientation, or military and veteran status in the award and administration of contracts that it awards.

Pursuant to Public Contract Code Section 22300, the successful Bidder may submit certain securities in lieu of the City withholding retention of payments during the Project.

The City has determined that the Contractor shall possess a valid Class A, General Engineering Contractor's license at the time that the bid is submitted, as well as any other license classification as may be required by the laws of the California for the performance of the work specified in the Contract Documents. Said license shall be maintained during the Contract period. Failure to possess the specified license shall render the bid nonresponsive and will act as a bar to the award of the Contract to any Bidder not possessing such a license at the time of bid submittal. The Contractor shall provide certification of the license, its number and the expiration date on the proposal form.

The work is to be done in Placer County. Pursuant to California Labor Code Section 1773, the City has ascertained the General Prevailing Rate of Wages in the County in which the work is to be done to be as determined by the Director of Industrial Relations of the State of California. The Contractor is hereby made aware that information regarding prevailing wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: <http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm>. The Contractor is required to post a copy of the applicable wage rates at the job site. Attention is directed to Section 5 “Legal Relations and Responsibility” of the General Conditions.

Pursuant to Labor Code Section 1771.1(b), notice is hereby given that a contractor or subcontractor shall not be qualified to bid on, be listed in a bid proposal, subject to the requirements of Section 4104 of the Public Contract Code, or engage in the performance of any contract for public work, as defined in Labor Code Sections 1720, et seq., unless currently registered and qualified to perform public work pursuant to Labor Code Section 1725.5 or exempt from registration requirements pursuant to Labor Code Section 1725.5(f). It is not a violation of Labor Code Section 1771.1 for an unregistered contractor to submit a bid that is authorized by Section 7029.1 of the Business and Professions Code or by Section 10164 or 20103.5 of the Public Contract Code, provided the contractor is registered to perform work pursuant to Labor Code Section 1725.5 at the time the contract is awarded or is exempt from registration requirements pursuant to Labor Code Section 1725.5(f). The Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

All questions prior to the deadline for bid submissions shall be directed to Public Purchase at <https://www.publicpurchase.com> The deadline for submissions of questions and

clarifications regarding the Contract Documents is seven (7) calendar days before the deadline for bid submissions. Only Addenda issued by the City are binding.

City Clerk, City of Roseville

Dated: _____

Published: _____

INSTRUCTIONS TO BIDDERS

SECTION 1. GENERAL

1-1.01 **GENERAL.** These Instructions to Bidders form a part of the Contract Documents. Capitalized terms are defined in the General Conditions Section 1.

1-1.02 **EXAMINATION OF PLANS, CONTRACT DOCUMENTS AND SITE OF THE WORK.** The Bidder shall examine carefully the site of the Work and all the Contract Documents, including these Instructions to Bidders, and shall inform itself of the conditions relating to the execution of the Work. Failure to do so will not relieve the successful Bidder of its obligation to enter into an Agreement and complete the Work in strict accordance with the Contract Documents. Conditions relating to the execution of the Work include the requirements of federal, state, and local laws, statutes and ordinances relative to the execution of Work, including, but not limited to, applicable regulations concerning prevailing wage rates, non-discrimination in the employment of labor, protection of the public, employee health and safety, and environmental protection.

The submission of a bid shall be conclusive evidence that the Bidder has investigated and is satisfied as to the conditions to be encountered, as to the character, quality, and scope of Work to be performed, the quantities of materials to be furnished, and as to the requirements of all the Contract Documents.

1-1.03 **EXISTING INFORMATION.** Where the Department has made investigations of site conditions, including subsurface conditions in areas where Work is to be performed under the Contract, such investigations are made only for the purpose of study and design. City does not represent that such conditions as found in these investigations or inferences or conclusions drawn as a result of these investigations will represent actual site

conditions and hereby disclaims any liability as a result of Contractor's or Bidder's reliance on such investigations. City will presume that all Bidders have conducted their own site investigations, including investigations of subsurface conditions. Where such investigations have been made, Bidders or Contractors may, upon written request, inspect the records of the Department as to such investigations subject to the conditions set forth in these Instructions to Bidders. Such inspection of records may be made only at the location noted above. The records of such investigations are not a part of the Contract Documents and are shown solely for the convenience of the Bidder or Contractor. The City assumes no responsibility whatsoever with respect to the sufficiency or accuracy of the investigations made, the records thereof, or of the interpretations set forth therein or made by the City in its use thereof. The City makes no warranty or guarantee, either express or implied, that the conditions indicated by such investigations or records are representative of those existing throughout such areas, or any part thereof, or that unforeseen developments may not occur, or that materials other than, or in proportions different from those indicated, may not be encountered.

No information derived from such inspection of records of investigations or compilation thereof made by the City, the Department or from the Engineer, or his or her assistants, will in any way relieve the Bidder or Contractor from properly examining the site and making such additional investigations as it may elect, or from properly fulfilling the terms of the Contract.

SECTION 2: BID REQUIREMENTS

2-1.01 **PROPOSAL FORMS.** The Department will furnish to each Bidder standard Proposal Forms, which, when filled out and executed may be submitted as the bid. Proposals shall include all pages in the Project Manual with page numbers marked “PROP” plus the Addendum acknowledgment form (front sheet) from all Addenda received by the Bidder. Proposals shall be removed from the Project Manual. The full Project Manual shall not be submitted with the proposal. Bids not presented on forms so furnished will be disregarded.

The Proposal and one (1) copy thereof shall be submitted as directed in the “Notice to Contractors” under sealed cover plainly marked as a Proposal, and identifying the project to which the Proposal relates and the date of the bid opening therefor. Proposals which are not properly marked may be disregarded.

All blank spaces in the Proposal must be completed, as required, in ink. All price information shall be shown, clearly legible, in figures where required.

The Bidder shall sign the Proposal in the blank space provided therefor. If the Bidder is the sole owner, the Proposal shall be signed by the owner. If the Bidder is a corporation, the legal name of the corporation and its State of incorporation shall be set forth and the Proposal shall be signed by at least two officers authorized to sign contracts on behalf of the corporation. If the Bidder is a partnership, the true name of the firm shall be set forth, the names and addresses of all partners shall be given and the Proposal shall be signed by a partner in the firm authorized to sign contracts on behalf of the partnership. If the Bidder is a joint venture, the Proposal shall be signed on behalf of each participating company by officers or other individuals who have the full and proper authorization to do so. If the Proposal is signed by an agent of the Bidder other than an officer of a corporation or a member of a partnership, a notarized Power of

Attorney must be on file with the City prior to opening of bids or must be submitted with the Proposal. If requested by the City, the Bidder shall promptly submit evidence satisfactory to the City of the authority of the person signing the Proposal.

2-1.02 **SUBMISSION OF BIDS.** Bids must be submitted at the prescribed time and location specified in the Notice to Contractors. Any submission received after the prescribed time shall be rejected, regardless of whether or not bids are opened exactly at the prescribed time.

Any unauthorized conditions or qualifications entered on, or changes made to, the Proposal may render it invalid and may cause its rejection.

No telegraphic, telephonic, or facsimile or other electronically transmitted bids will be considered.

2-1.03 **REQUIRED LISTING OF PROPOSED SUBCONTRACTORS.** Each Proposal shall list the name, address and Contractor license number of each Subcontractor to whom the Bidder proposes to subcontract portions of the Work in an amount in excess of one-half of one percent (0.5%) of its total bid, in accordance with Section 4100 to 4114, inclusive, of the Public Contract Code for the State of California. The Bidder shall list the Subcontractor's license number and the portion of the Work that will be done by each Subcontractor. If the Bidder fails to specify a Subcontractor for any portion of the Work, the Bidder agrees to perform that portion of the Work itself, and represents that it is qualified to perform that portion of the Work itself. The Bidder's attention is invited to other provisions of the Public Contract Code related to the imposition of penalties for a failure to observe its provisions by using unauthorized Subcontractors or by making unauthorized substitutions.

2-1.04 **CONTRACTOR'S LICENSING LAWS.** Attention is directed to the

provisions of Business and Professions Code Chapter 9 of Division 3 concerning the licensing of Contractors.

All Bidders at the time of bid submittal shall be licensed as Contractors in accordance with the laws of this State. Any Bidder or Contractor not so licensed is subject to the penalties imposed by such laws. The form of Contractor's license required is stated in the Notice to Contractors, provided that the City makes no representation as to whether the State may require other or additional licenses. It is the Bidder's and Contractor's responsibility to obtain the correct Contractor's licenses. Bidders shall be skilled and regularly engaged in the general class or type of Work called for under this Contract.

All Bidders and Contractors, including Subcontractors, shall have a current City business license before undertaking any Work.

2-1.05 **NONCOLLUSION DECLARATION.** By submitting a bid, the Bidder represents and warrants that such bid is genuine and not a sham or collusive or made in the interest or on the behalf of any person therein named, and that the Bidder has not, directly or indirectly, included or solicited any other Bidder to put in a sham bid, or any other person, firm, or corporation to refrain from bidding, and that the Bidder has not in any manner sought collusion to secure the Bidder an advantage over any other Bidder.

Bidders shall submit a properly completed and executed "Noncollusion Declaration" in the form required by Public Contract Code Section 7106 and provided with the Proposal (PROP-11).

2-1.06 **DISQUALIFICATION, REMOVAL OR OTHER PREVENTION OF BIDDING.** A bid may be rejected on the basis of a Bidder, any officer of such Bidder, or any employee of such Bidder who has a proprietary interest in such Bidder, having been disqualified,

removed, or otherwise prevented from bidding on, or completing a federal, state, or local project because of a violation of law or a safety regulation.

2-1.07 **PROPOSAL GUARANTY.** All bids shall be accompanied by one of the following forms of Bidder's security: Cash, a cashier's check, a certified check, or a Bidder's bond executed by an admitted California surety insurer, made payable to the City of Roseville, or any other form of security deemed acceptable by the City Attorney. The security shall be in an amount equal to at least ten percent (10%) of the amount bid. A bid will not be considered unless one of the form of Bidder's security is enclosed with it.

A Bidder's bond shall conform to the City's bond form in the Proposal and shall be properly filled out and executed.

2-1.08 **SCHEDULE OF BID PRICES.** Bidders are directed to submit unit and lump sum prices for all Work set forth in the Contract Documents on the Proposal Form entitled "Schedule of Bid Prices."

Unit prices and lump sum prices, as indicated, must be entered in the appropriate spaces provided in the Schedule of Bid Prices. If applicable, unit prices shall be multiplied by the quantities shown, and the total shall be inserted in the Amount column. In the event of any error or discrepancy between the unit price and the calculated amount, the unit prices shall govern.

The City may correct any mathematical errors apparent on the face of the bid.

The amounts shown in the Amount column must be added together in arriving at the Grand Total Bid Price.

Amounts for Allowance bid items must be entered in the exact amount in the Amount column.

The prices included within the Schedule of Bid Prices shall include all costs for labor,

materials, tools, equipment, services, Subcontractors, suppliers, taxes, insurance, shipment, delivery, overhead, profit, and all other costs necessary to perform the Work in accordance with the Contract Documents.

The Grand Total Bid Price shall be indicated in the Summary table form included with the Schedule of Bid Prices. The Grand Total Bid Price shall be the sum of the amounts bid for each of the designated portions of the Work, as more specifically described on the Schedule of Bid Prices form itself.

Full compensation for complying with the Contract Documents, including requirements of the Standard Specifications, the General Conditions, Supplemental Conditions, and all warranties, shall be considered included in the bid items and no additional compensation shall be allowed therefor.

Full compensation for completion of all work as shown on the plans, as specified in the Specifications, and as directed by the City, shall be considered included in the bid items and no additional compensation shall be allowed.

Bidders are strongly discouraged from submitting unbalanced bids. As used herein, the term “unbalanced bid” is defined as any bid that does not include a reasonable proportionate allocation of indirect costs and profit of each bid item indicated in the Schedule of Bid Prices. The City reserves the right to reject any unbalanced bid if the City determines that there is a reasonable doubt that an acceptance of the bid will not result in the lowest ultimate cost to the City with regard to the work or a disproportionate distribution of contract funds.

The City reserves the right to delete any bid item in its entirety and/or significantly reduce the quantity of Work under a bid item. The City makes no representation that any Work under a bid item will be performed during the course of the Project or that the Work will be

performed at the quantities included in the Schedule of Bid Prices. As provided in the General Conditions, for any deleted Work, Contractor shall not be entitled to payment of the indirect costs and profit included for said bid item. All bid items shall be considered distinct and severable from the remaining bid items, and each Bidder acts at its peril if its bid is unbalanced.

The City shall compare bids on the basis of the Grand Total Bid Price, which includes the base bid and any alternates designated on the Schedule of Bid Prices. Alternates may or may not be awarded, or may be awarded in any combination, at the City's discretion.

2-1.09 **WITHDRAWAL OF PROPOSALS.** Any bid may be withdrawn at any time prior to the time fixed in the Notice to Contractors for the opening of bids, provided that a request in writing, executed by the Bidder or its duly authorized representative, for the withdrawal of such bid is filed with the City Clerk. Facsimile and electronic mail requests are not acceptable. The withdrawal of a bid shall not prejudice the right of a Bidder to file a new bid. The withdrawal of any bid after the time fixed in the Notice to Contractors for the opening of bids will not be permitted.

2-1.10 **ADDENDUM.** Proposals shall include all costs and account for all Addenda issued prior to opening of bids. The Bidder is responsible for verifying that all issued Addenda have been received. An Addendum acknowledgment form for each Addendum shall be included as part of the Proposal submittal.

2-1.11 **PUBLIC OPENING OF PROPOSALS.** Proposals will be publicly opened and read at the time and place indicated in the Notice to Contractors. Bidders or their authorized agents are invited to be present.

2-1.12 **TRENCHING AND EXCAVATION WORK.** In accordance with the provisions of California Labor Code Section 6707, if the Work involves construction of a

pipeline, sewer, sewage disposal system, boring or jacking pits, or similar trenches or open excavations, which are five feet (5') or deeper, each bid submitted shall contain, as a bid item, adequate sheeting, shoring, and bracing, or equivalent method, for the protection of life or limb, which shall conform to all applicable safety orders.

SECTION 3: EVALUATION OF BIDS

3-1.01 **BID EVALUATION PROCESS.** Bids will be evaluated to determine the apparent low Bidder. The apparent low Bidder will be determined on the basis of the Grand Total Bid Price, as shown in the Schedule of Bid Prices. If additive or deductive alternates are used in the Schedule of Bid Prices, the apparent low Bidder will be the Bidder with the lowest total of the bid prices for base contract items plus the alternates designated by the City as those that will be used for determining the lowest bid price. However, the City reserves the right to (1) not award any alternates or (2) award any combination of alternates.

In case of discrepancy between the total of the base contract items and any specified alternates and the stated Grand Total Bid Price, the total of the base contract items plus specified alternates shall prevail. Any mathematical errors that appear on the face of the bid will be corrected by the City and the City will use the mathematically corrected addition. For example, if the mathematical total of Bidder's base contract items plus specified alternates equals \$1,000,000, but the Bidder has written \$1,250,000 as the Grand Total Bid Price, the City will consider \$1,000,000 to be the Bidder's Grand Total Bid Price for purposes of comparison to other Bidders and actual bid award. The City reserves its rights to reject or accept bids based on discrepancies between the stated Grand Total Bid Price and the actual mathematical total of the base contract bid items, plus specified alternates.

3-1.02 **REJECTION OF IRREGULAR PROPOSALS.** Proposals may be rejected in the City's sole discretion if they show any alterations of form, additions not called for, conditional bids, incomplete bids, erasures, or irregularities of any kind. However, the City reserves the right to waive any minor irregularities and informalities in any bid or in the bid procedure for any reason.

3-1.03 **COMPETITIVE BIDDING.** If more than one proposal is offered by any individual, firm, partnership, corporation, association, or any combination thereof, under the same or different names, all such proposals may be rejected. A party who has quoted prices on materials or Work to a Bidder is not thereby disqualified from quoting prices to other Bidders, or from submitting a bid directly for the materials or Work.

All Bidders are put on notice that any collusive agreement to control or affect the awarding of this Contract is in violation of the competitive bidding requirements of the City Charter, State Contract Act and the Business and Professions Code and may render void any Contract let under such circumstances.

3-1.04 **RELIEF OF BIDDERS.** If the Bidder claims a mistake was made in its bid, the Bidder shall give the Department written notice within five (5) Days after the opening of the bids of the alleged mistake, specifying in the notice in detail how the mistake occurred. No relief from a claimed mistaken bid shall be granted unless such mistake clearly appears on the face of the bid submitted to the City. Claimed mistakes on backup worksheets, spreadsheets, computerized bidding programs, or any other similar calculative bidding mistake which is not apparent on the face of the bid shall not under any circumstance be considered as a basis for relief. The burden of proving the occurrence of a mistake entitling a Bidder to relief from its bid rests entirely on the Bidder. Relief from bids shall be in the City's sole discretion.

SECTION 4: AWARD AND EXECUTION OF CONTRACT

4-1.01 **AWARD OF CONTRACT.** The City reserves the right to reject any and all proposals and to award (or not award) any combination of bid items at its option. Any such award will be to the lowest responsible Bidder whose proposal complies with the requirements prescribed for the bid items awarded. Such award, if made, will be made within sixty (60) business days after the opening of the proposals. If the lowest responsible Bidder refuses or fails to execute the Contract, or provide an acceptable Performance Bond, Payment Bond, and insurance certificate(s), the City may award the Contract to the second lowest responsible Bidder. Such award, if made, will be made within eighty-two (82) business days after the opening of proposals. If the second lowest responsible Bidder refuses or fails to execute the Contract, or provide an acceptable Performance Bond, Payment Bond, and insurance certificate(s), the City may award the Contract to the third lowest responsible Bidder. Such award, if made, will be made within one hundred four (104) business days after the opening of the proposals. The above time periods within which the award of Contract may be made are subject to extension for such further period as may be agreed upon in writing between the City and the Bidder concerned.

4-1.02 **RETURN OF BIDDER'S SECURITIES.** Within ten (10) Days after the award of the Contract, the City Clerk will return all Bidders' securities, other than Bidders' bonds, accompanying the proposals that are not to be further considered in making the award. Retained Bidders' securities will be held until the Contract has been fully executed, after which all Bidders' securities, except Bidders' bonds and any Bidders' securities that have been forfeited, will be returned.

4-1.03 **CONTRACT BONDS.** The successful Bidder shall furnish two (2)

bonds in the form contained in the section entitled Insurance Broker Information Packet and Bonds. One (1) bond shall secure the payment of the claims of laborers, mechanics or materialmen employed on the Work under the Contract, and the other bond shall guarantee the faithful performance of the Contract.

Each of the two (2) bonds shall be in a sum equal to one hundred percent (100%) of the Contract Price. If the Contract Price increases by the issuance of Change Orders, the penal amounts of the bonds required shall increase accordingly. Sureties on each of said bonds shall be satisfactory to the City.

All alterations, extensions of time, extra and additional Work, and other changes authorized by the Standard Specifications, the General Conditions, the Supplemental Conditions or any part of the Contract may be made without securing the consent of the surety or sureties on the Contract bonds.

Furthermore, the successful Bidder shall furnish a certificate from the County Clerk as required by California Civil Code of Procedure Section 995.660(a)(3).

4-1.04 **INSURANCE.** At the time of the execution of the Contract, the Contractor shall, at its own expense, procure, and at all times during the prosecution of the Work maintain in full force and effect Worker's Compensation Insurance, and Liability Insurance as specified in the General Conditions. The Contractor shall provide a Certificate of Insurance in the form contained in the section entitled Insurance Broker Information Packet.

4-1.05 **EXECUTION OF CONTRACT.** The Contract shall be signed by the successful Bidder and returned, together with all the required Contract bonds and insurance certificates, within fifteen (15) Days after the Contract has been awarded, or as otherwise directed, in writing, by the City.

If the Bidder is an individual, the Contract shall be executed personally by the Bidder. If the Bidder is a partnership, it is desirable that the Contract be executed by all of the partners, but it may be executed by one of them. If the Bidder is a corporation, it must be executed by two officers of the corporation consisting of (1) the chairman of the board, president or vice president; and (2) the secretary, assistant secretary, chief financial officer, treasurer or assistant treasurer, or by a person authorized by the corporation to execute written contracts on its behalf, and the corporate seal affixed thereto. In the alternative, a person other than an officer may sign the Contract, provided evidence satisfactory to the City is provided indicating the individual's authority to bind the corporation. If the corporate seal is not affixed to the Contract, or if it is executed by a person other than officers, or only by one officer, there must be attached to the Contract a certified copy of a resolution of the corporation authorizing such officer or person to execute written contracts for and on behalf of the corporation. If the Bidder is a joint venture, the Contract must be executed on behalf of each participating firm by officers or other individuals who have the full and proper authorization to do so.

4-1.06 **FAILURE TO EXECUTE CONTRACT.** Failure of the lowest responsible Bidder, the second lowest responsible Bidder, or the third lowest responsible Bidder to execute the Contract and file acceptable bonds and insurance as provided within fifteen (15) Days after the Contract has been awarded, or as otherwise directed, in writing, by the City, shall be just cause for annulment of the award and forfeiture of the Bidder's security. The successful Bidder may file with the City Clerk a written notice, signed by the Bidder or Bidder's authorized representative, specifying that the Bidder will refuse to execute the Contract if presented to Bidder. The filing of such notice shall have the same force and effect as the failure of the Bidder to execute the Contract and furnish acceptable bonds within the time prescribed.

SECTION 5: BID PROTEST PROCEDURES

5-1.01 **POLICY/PROCEDURES.** It is the policy of the City to consider fully and adjudicate promptly protests filed by prospective Bidders relating to the City's bidding procedure or award of the Contract. Protests shall be filed and processed in accordance with Section 4.12.150 of the Roseville Municipal Code. A Bidder's failure to follow the bid protest procedures may result in rejection of the protest by the City.

PROPOSAL TO THE DEPARTMENT OF _____

Project:_____

Name of Bidder _____ Business Phone _____

Business Address _____

Place of Business _____

Contractor's License No. _____

License Expiration Date_____

License Classification Type _____

DIR Registration No. _____

Type of business organization: _____

*If a Corporation, incorporated under the laws of the State of: _____

City of Roseville Business License No._____

The undersigned Bidder herewith submits this Proposal and binds itself on award by the City of Roseville under this bid to execute a Contract in accordance with its bid and the Contract Documents.

The Notice to Contractors, Instructions to Bidders, Form of Agreement, Specifications, General Conditions, Supplemental Conditions, Contract Drawings, and Addenda, if any, are made part of this bid and all provisions thereof are hereby accepted, and all representations and warranties are required thereby are hereby affirmed.

The work to be done is described in the Bidding Documents entitled _____
_____, City of Roseville, California.

This offer shall be irrevocable for a period of sixty (60) Days after the date on which bids are opened.

The undersigned Bidder understands that any clarification made to the above or any new and different conditions or information submitted on or with its Proposal, other than that requested, may render the bid non-responsive.

The undersigned, as Bidder, declares that the only persons or parties interested in this Proposal as principals are those named herein; that this Proposal is made without collusion with any other person, firm, or corporation; that the Bidder has carefully examined the location of the proposed Work, the attached Form of Agreement, and the plans, Specifications, and other Contract Documents; and agrees if this Proposal is accepted, that it will contract with the City of Roseville, in the form of a copy of the Agreement contained in the Project Manual, to provide all necessary machinery, tools, apparatus and other means of construction, and to do all the work and furnish all the materials specified in the Contract Documents, in the manner and time therein prescribed, and according to the requirements of the Director, as therein set forth, and that the Bidder will take in full payment therefore prices indicated in the Schedule of Bid Items, including all work modified by addendum numbers _____. (IF NONE, STATE NONE).

Bids are required for all Bid Items. The amount of the Bid for comparison purposes will be the total of all items awarded.

The Bidder shall set forth for each item of work, in clearly legible figures, an item (“unit”) price and a total for the item in the respective spaces provided for this purpose in the Schedule of Bid Items.

The prices included within the Schedule of Bid Items include all costs for labor, materials, tools, equipment, services, Subcontractors, suppliers, taxes, insurance, shipment, delivery, overhead, profit, and for all other costs necessary to perform the Work in accordance

with the Contract Documents.

Accompanying this Proposal is _____.

(Notice: Insert the words "Cash \$_____", "Cashier's Check," "Certified Check," or "Bidder's Bond," as the case may be, in an amount equal to at least ten percent (10%) of the total of the Bid.)

BIDDER'S BOND

City Council of the City of Roseville

KNOW ALL MEN BY THESE PRESENTS:

That we _____
_____, as PRINCIPAL, and

a, _____ and duly authorized to transact business
under the laws of the State of California, as SURETY, are held and firmly bound unto the City of
Roseville in the penal sum of _____ dollars
(\$_____), being at least TEN PERCENT (10%) OF THE TOTAL AMOUNT OF
THE BID of the Principal above named, submitted by said Principal to the City of Roseville,
acting by and through the Public Works Director, for the work described below, for the payment
of which sum in lawful money of the United States, well and truly to be made, to the Director of
the Department to which said Bid was submitted, we bind ourselves, our heirs, executors,
administrators and successors, jointly and severally, firmly by these presents.

THE CONDITION OF THIS OBLIGATION IS SUCH,

That whereas the Principal has submitted the above-mentioned Bid to the City Council of
the City of Roseville, as aforesaid, for certain construction specifically described as follows, for
which Bids are to be opened at the Office of the City Clerk located at 311 Vernon Street,
Roseville, California, on _____, 20__ FOR

(Copy here the exact title of work as it appears on the Proposal.)

NOW, THEREFORE, IF THE AFORESAID PRINCIPAL is awarded the Contract and, within the time and manner required under the Contract Documents, after the prescribed forms are presented for signature, enters into a written Contract, in the prescribed form, in accordance with the Bid, and files all insurance and two (2) Bonds with the Department, one (1) to guarantee Faithful Performance and the other to guarantee Payment for Labor and Materials, as required by law, then this obligation shall be null and void; otherwise, it shall be and remain in full force and effect.

IN WITNESS WHEREOF, we have hereunto set our hands and seals on this ____ day of _____, 20__.

NONCOLLUSION DECLARATION TO BE EXECUTED BY
BIDDER AND SUBMITTED WITH BID

The undersigned declares:

I am the _____ of _____, the party making the foregoing bid.

The bid is not made in the interest of, or on behalf of, any undisclosed person, partnership, company, association, organization, or corporation. The bid is genuine and not collusive or sham. The Bidder has not directly or indirectly induced or solicited any other Bidder to put in a false or sham bid. The Bidder has not directly or indirectly colluded, conspired, connived, or agreed with any Bidder or anyone else to put in a sham bid, or to refrain from bidding. The Bidder has not in any manner, directly or indirectly, sought by agreement, communication, or conference with anyone to fix the bid price of the Bidder or any other Bidder, or to fix any overhead, profit, or cost element of the bid price, or of that of any other Bidder. All statements contained in the bid are true. The Bidder has not, directly or indirectly, submitted his or her bid price or any breakdown thereof, or the contents thereof, or divulged information or data relative thereto, to any corporation, partnership, company, association, organization, bid depository, or to any member or agent thereof, to effectuate a collusive or sham bid, and has not paid, and will not pay, any person or entity for such purpose.

Any person executing this declaration on behalf of a Bidder that is a corporation, partnership, joint venture, limited liability company, limited liability partnership, or any other entity, hereby represents that he or she has full power to execute, and does execute, this declaration on behalf of the Bidder.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that this declaration is executed on _____ [date], at _____ [city], _____ [state].

(Signature of Declarant)

DISQUALIFICATION QUESTIONNAIRE

The Bidder shall complete, under the penalty of perjury, the following questionnaire:

Has the Bidder, any officer of the Bidder, or any employee of the Bidder who has proprietary interest in the Bidder, ever been disqualified, removed, or otherwise prevented from bidding on, or completing a federal, state, or local government project because of a violation of law or a safety regulation?

and directed the City Clerk to advertise for sealed proposals for doing said work and providing
that bids be submitted on the ____ day of _____, 20____; and

WHEREAS, the City Clerk, thereafter duly and regularly caused a notice to be published
in the manner and for the time prescribed by law; and

WHEREAS, CONTRACTOR, pursuant to the provisions of said notice duly filed a bid
with the City Clerk, a true copy of which bid is now on file in the office of the City Clerk, and is
hereby referred to and by this reference made a part hereof as fully as if set forth at length herein;
and

WHEREAS, all bids received pursuant to said notice were opened and examined and
publicly declared at the time specified in said advertisement for bids and at a meeting of the City
Council held on the ____ day of _____, 20____, the Council found and

declared the bid of CONTRACTOR to be the lowest responsible bid and thereupon awarded a contract to CONTRACTOR to do the work referred to in the aforementioned specifications.

NOW, THEREFORE, the parties agree as follows:

1. THE WORK. CONTRACTOR agrees:

a. To do the work and furnish all the labor, materials, tools, supplies, equipment, superintendence, insurance, and bonds required for the _____

in accordance with the Contract Documents (the Work).

b. To do and perform the Work contemplated hereby in a good and workmanlike manner under the direction of and to the satisfaction of the Director of Public Works of the City of Roseville.

2. PAYMENT. CITY shall pay CONTRACTOR _____
_____ dollars (\$_____) for the Work to be done under this Agreement in accordance with the Contract Documents.

3. CONTRACT DOCUMENTS. The complete Agreement between the parties hereto consists of the following documents:

- a. The advertisement for bids (including the notice to bidders, instructions to bidders and proposals);
- b. The accepted bid;
- c. Plans and specifications (including general conditions, supplemental conditions, special provisions and construction details);
- d. Bonds and insurance required by the specifications; and

e. This contract.

All documents specified above are intended to operate so that any work called for in any one and not mentioned in the other, or vice versa, is to be executed the same as if mentioned in all said documents.

4. LIQUIDATED DAMAGES. In the event CONTRACTOR does not complete the Work within the time specified, CONTRACTOR agrees that CITY will suffer damages. Inasmuch as the actual damages which would result from such breach by CONTRACTOR under this Agreement are uncertain, and would be impractical or extremely difficult to fix, CONTRACTOR agrees that it shall pay, or CITY shall deduct from CONTRACTOR's fee, the amount of \$_____ per day as liquidated damages, in the event of such delay.

5. TIME OF COMPLETION. Time is of the essence of this Agreement. CONTRACTOR shall complete all Work under the Contract Documents within _____ Days of the date of this Contract. CONTRACTOR shall begin work by the date specified in the "Notice to Proceed" letter and shall diligently prosecute all of the Work under this Contract in all parts and requirements as defined in the Contract Documents.

6. SERVICE OF NOTICE. Any notice required or permitted to be given under this Agreement shall be deemed given when (a) personally delivered to the recipient identified below; (b) mailed by registered or certified mail, return receipt requested, postage pre-paid, to the address specified below; or (c) sent by facsimile, with confirmation of receipt, to the facsimile number identified below.

CITY OF ROSEVILLE

CONTRACTOR

CITY may also act through either its architect or construction manager if CITY expressly gives notice to CONTRACTOR, in writing, that CITY's designee has authority to act for CITY in a specific capacity.

7. DISPUTES. Disputes arising from this Agreement will be determined in accordance with the Contract Documents and Public Contract Code Sections 10240-10240.13.

8. GOVERNING LAW. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

9. INDEPENDENT CONTRACTOR. CONTRACTOR shall act as an independent contractor, and covenants and agrees that it will conduct itself consistent with such status, that it will neither hold itself out as, nor claim to be, an officer or employee of CITY by reason of this Agreement.

10. SUCCESSORS IN INTEREST. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.

11. MODIFICATION. This Agreement and each provision contained herein may be waived, amended, supplemented or eliminated only by mutual written agreement of the parties.

12. SEVERABILITY. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

13. INTEGRATED AGREEMENT. This is an integrated agreement and contains all of the terms, considerations, understanding and promises of the parties. It shall be read as a whole.

14. CONTRACTORS LICENSE LAW. CONTRACTORS ARE REQUIRED BY LAW TO BE LICENSED AND REGULATED BY THE CONTRACTORS' STATE LICENSE

BOARD WHICH HAS JURISDICTION TO INVESTIGATE COMPLAINTS AGAINST CONTRACTORS IF A COMPLAINT REGARDING A PATENT ACT OR OMISSION IS FILED WITHIN FOUR (4) YEARS OF THE DATE OF THE ALLEGED VIOLATION. A COMPLAINT REGARDING A LATENT ACT OR OMISISON PERTAINING TO STRUCUTRAL DEFECTS MUST BE FILED WITHIN TEN (10) YEARS OF THE DATE OF THE ALLEGED VIOLATION. ANY QUESTIONS CONCERNING A CONTRACTOR MAY BE REFERRED TO THE REGISTRAR, CONTRACTORS' STATE LICENSE BOARD, P.O. BOX 26000, SACRAMENTO, CALIFORNIA 95826.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attestation by its City Clerk under authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20____, and CONTRACTOR has caused this Agreement to be duly executed.

INSURANCE BROKER INFORMATION PACKET

Project:_____

NOTICE TO CONTRACTOR:

For your convenience, this package contains the Requirements for Insurance and Bonds for this project, including the necessary City forms. You are required to return these forms in addition to the executed Contract within fifteen (15) calendar days after the award of the Bid, unless otherwise directed by City in writing. (See the Instructions to Bidders.)

Please insert the dollar amount of your accepted Bid into the blank on page INS-1 and present this entire package to your insurance broker if you are awarded the Bid.

NOTICE TO INSURANCE BROKER

Your client has been awarded a bid by the City Council of the City of Roseville to perform a public works project known as _____. The Contract Conditions for that project require your client (“the Contractor”) to return certain evidence of insurance and bonds to the City Attorney of the City within fifteen (15) days after the Bid award, unless otherwise directed by the City in writing, or else the Bid award may be terminated and awarded to another company.

This package contains the information you will need as an insurance broker to provide the appropriate insurance and bonds to the City. The insurance coverages the Contractor needs are specified in the section entitled “Insurance Requirements.” Please note that, in addition to the insurance certificate itself, copies of several endorsements must be actually furnished.

Please refer to the Supplemental Conditions for modifications of the General Conditions, if any, and the requirements of this insurance packet.

Please use the standard City of Roseville Bond Forms provided in this package.

The Bonds required must each be in the penal amount of: \$_____.

Bonds must be sent to the following staff person:

Insurance documents must be provided using one of the following methods:

- a. By email to roseville@ebix.com and riskmanagement@roseville.ca.us
- b. By fax to (770) 335-5727 and (916) 774-5461

After using one of these methods, please **DO NOT** send the insurance certificate(s) by mail.

When forwarding the documents, please refer to the project name so that the documents can be matched with the Contract for which they are submitted.

Thank you.

INS - 1

INSURANCE REQUIREMENTS

The following sections are quoted from the General Conditions:

5-1.23 **INSURANCE COVERAGE.**

A. **Evidence of Maintenance Required.** The Contractor shall, at its expense, procure and at all times maintain in full force and effect at a minimum the insurance required by this section on all of its operations; and the Contractor shall not allow any Subcontractor to commence work until similar insurance required of the Subcontractor has been obtained and filed. An original Certificate of Insurance, and copies of all required endorsements, all in a form approved by the Risk Manager, evidencing all required coverage or policies shall be filed after the award of the bid and prior to approval of the Contract by the City Council. Contractor shall provide ten (10) days prior written notice to the City of any reduction of coverage limits or cancellation of the coverage or policies shall be given to the City of Roseville as Certificate holder.

B. **Qualifying Insurers.** With the exception of the State Compensation Insurance Fund, all required insurance policies shall be issued by companies acceptable to the City and licensed to do business in the State of California and who hold a current policy holders alphabetic and financial size category rating of not less than AVII according to the most recent issue of Best's Insurance Reports.

C. **Insurance Required.**

1. **Commercial General Liability (CGL):** Insurance Services Office Form CG 00 01 covering CGL on an “occurrence” basis, including products and completed operations with limits of no less than Two Million Dollars (\$2,000,000) per occurrence for bodily injury, personal injury and property damage for projects under One Million Dollars (\$1,000,000) and

limits of no less than Five Million Dollars (\$5,000,000) per occurrence for bodily injury, personal injury and property damage for projects over One Million Dollars (\$1,000,000). If a general aggregate limit applies, either the aggregate limit shall apply separately to this project or the general aggregate limit shall be twice the required occurrence limit.

The Commercial General Liability insurance shall include the following, copies of which shall be provided:

a. Inclusion of the City of Roseville, and its officers, agents, employees, and volunteers, as additional insureds (except for workers' compensation) as respects services or operations under the Contract. The additional insured endorsement for the general liability policy shall be at least as broad as the ISO CG 2010 10 01 combined with ISO CGL Endorsement CG 2037 10 01. Any other endorsement must be approved in writing by the City. Endorsements must include coverage for on-going and completed operations, which coverage shall be maintained for four (4) years following completion of the Project. Endorsements shall cover the City of Roseville, its officers, agents, employees, and volunteers.

b. The insurance shall provide coverage for claims by one insured against another insured and the policies shall not contain any cross-suits exclusions, cross-liability exclusions, or insured versus insured exclusions. The policies shall not contain any classification exclusions purporting to deny coverage for any work to be performed by Contractor or any of its Subcontractors.

c. Stipulation that the insurance is primary and noncontributory, as evidenced by a separate endorsement (CG 20 01 04 13 or an equivalent) or section of the policy, and that neither the City nor its insurers will be called upon to contribute to a loss.

d. Such insurance shall specifically cover the contractual liability of

the Contractor.

e. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

f. Waiver of subrogation endorsement.

g. The Contractor shall furnish a certificate for the period covered.

2. **Automobile Liability:** Insurance Services Office Form Number CA 0001 covering Code 1 (any auto), or if Contractor has no owned autos, Code 8 (hired) and Code 9 (non-owned), with limits of no less than One Million Dollars (\$1,000,000) per accident for bodily injury and property damage.

3. **Workers' Compensation:** In accordance with the provisions of the California Labor Code, Contractor is required to be insured against liability for Workers' Compensation or to undertake self-insurance. Statutory Workers' Compensation and Employers' Liability of at least One Million Dollars (\$1,000,000) shall cover all Contractors staff while performing any work incidental to the performance of this Agreement.

4. **Professional Liability:** Professional Liability (Errors and Omission) Insurance appropriate to Contractor's profession, with a limit of liability not less than One Million Dollars (\$1,000,000) per occurrence or claim and Two Million Dollars (\$2,000,000) aggregate to cover all design and engineering services rendered by Contractor pursuant to the Agreement. Coverage must commence from the first day that Contractor or any of its Subcontractors provided any design or engineering services in connection with the Project.

5. **Builder's Risk/Course of Construction Insurance Is ____ OR Is Not**

____ Required by Risk Management: The Contractor shall be responsible for all loss, damage or destruction whatsoever to the work called for by this Contract until the approval of a Notice of Completion or acceptance of the Work if no Notice of Completion is to be recorded.

The Contractor shall secure "All Risk" type of builder's Risk Insurance of the type covering one hundred percent (100%) of the value of the work performed under this Contract (the value is presumed to be the Contract amount unless otherwise stated in Supplemental Conditions) and all materials, equipment, or other items to be incorporated therein while the same are located at the construction site, a bonded warehouse, or its place of manufacture. At any time, the policy shall cover the value of the work completed. The policy shall cover hazards including the losses due to fire, explosion, hail, rain, lightning, flood (separate insurance as needed), vandalism, malicious mischief, wind, collapse, aircraft, and smoke.

The policies providing such insurance shall name the City as a loss payee as its respective interests may appear, and certified copies of such policies shall be filed with the City. The maximum deductible allowable under the Builder's All Risk policy shall be five percent (5%) of the Contract amount.

Builder's Risk Insurance is not required for coverage of losses in excess of five percent (5%) of the Contract amount for damages resulting from earthquake in excess of a magnitude of 3.5 on the Richter scale, or tidal waves. Coverage in the amount of five percent (5%) of the Contract amount for such losses is required.

6. **Pollution Coverage:** Contractor shall procure pollution liability coverage or other insurance covering claims for bodily injury or property damage arising out of the abatement, removal, storage, transportation, or other exposure to hazardous materials or

pollutants, in limits not less than Two Million Dollars (\$2,000,000). Contractor shall add the City and all parties required to be indemnified by Contractor as additional insured on all pollution liability policies.

7. **Higher Coverage Limits:** If Contractor maintains higher coverage limits than the amounts shown above, then the City requires and shall be entitled to coverage for the higher coverage limits maintained by Contractor. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the City.

8. **Claims Made Coverage:** Liability insurance coverage may not be written on a “claims made” or modified occurrence basis. The Certificate of Insurance must clearly provide that the coverage is on an “occurrence” basis.

5-1.24 **OTHER INSURANCE PROVISIONS.**

A. The requirements of the Standard Specifications as to types and limits of insurance coverage to be maintained by the Contractor, and any approval of insurance by the City, are not intended to, and shall not in any manner limit or qualify the liabilities and obligations otherwise assumed by the Contractor pursuant to the Contract, including, but not limited to, the provisions concerning indemnification, nor preclude the City from taking any other action available to it under any other provision of the Contract or law.

B. The City acknowledges that some insurance requirements contained in these Standard Specifications may be fulfilled by self-insurance on the part of the Contractor. However, this shall not in any way limit liabilities assumed by Contractor under the Contract. Any self-insurance must be approved in writing by the City, in its sole discretion and shall not reduce the limits of liability. Any deductibles or self-insured retentions (“SIR”) must be declared on the certificate of insurance and approved by City in writing. Policies containing any

SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

C. The Contractor agrees to include in its contracts with all subcontractors the same requirements and provisions of this Contract, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, the Contractor shall require its subcontractors to agree to be bound to the Contractor and the City in the same manner and to the same extent as the Contractor is bound to the City under this Contract. Additionally, the Contractor shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of the City's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request. Alternatively, the Contractor may insure subcontractor(s) under its own policy.

D. The City, its officers, agents, employees, and volunteers are to be covered as insureds with respect to liability arising out of automobiles owned, leased, hired or borrowed by or on behalf of the Contractor; and with respect to liability arising out of work or operations performed by or on behalf of the Contractor including materials, parts or equipment furnished in connection with such work or operations. Coverage shall not extend to any indemnity coverage for the active negligence of the additional insured in any case where an agreement to indemnify the additional insured would be invalid under California Insurance Code Section 11580.04.

E. The limits of insurance required in this Contract may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be

endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of the City (if agreed to in a written contract) before the City's own insurance shall be called upon to protect it as a named insured.

F. The insurance procured by Contractor shall be subject to the approval of the City, but any acceptance of insurance certificates by the City shall in no way limit or relieve Contractor of its duties and responsibilities under the Agreement.

G. Contractor shall be responsible for all premiums, deductibles, and self-insured retention applicable to the insurance it is required to procure under the Contract. All deductibles or self-insured retentions over five hundred thousand dollars (\$500,000) must be approved by the City, in writing. Contractor shall be responsible for all deductibles, self-insured retention payments, and/or increased premiums incurred if the City's policies of insurance are forced to cover damages or respond to claims for which Contractor or its Subcontractors were obligated to provide insurance under the Contract.

H. Failure of the City to enforce in a timely manner any of the requirements of these insurance provisions shall not act as a waiver to enforcement of any of these provisions at a later date.

I. Contractor's indemnity obligations shall not be limited by these insurance provisions and shall survive the expiration of the Contract and the insurance provisions of the Contract shall likewise not be limited by the indemnity provisions of the Contract.

J. THE CITY RESERVES THE RIGHT TO WITHHOLD ANY PROGRESS PAYMENTS TO THE CONTRACTOR IN THE EVENT OF NONCOMPLIANCE WITH ANY INSURANCE REQUIREMENTS.

Bond No. _____ Premium \$ _____

**PUBLIC WORKS
FAITHFUL PERFORMANCE BOND**

(Project: _____)

WHEREAS, the City of Roseville ("CITY") has awarded a bid and contract to _____ as contractor ("PRINCIPAL") for the public work described as _____ (the "WORK"). The contract ("AGREEMENT"), for the public work described above, and all of its terms and conditions are incorporated by reference and made a part hereof; and

WHEREAS, the PRINCIPAL is required to furnish a bond in connection with the AGREEMENT guaranteeing its faithful performance; and

NOW, THEREFORE, we the undersigned PRINCIPAL and _____, a _____, admitted and duly authorized to transact business under the laws of the State of California, as SURETY ("SURETY"), are held and firmly bound unto the CITY or its successors and assigns in the sum of _____ dollars (\$ _____) (which amount is not less than 100% of the AGREEMENT price) to be paid to the CITY or its successors and assigns; and for which payment, well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors or assigns jointly and severally, firmly by these presents.

The condition of this obligation is such that if the PRINCIPAL, or its heirs, executors, administrators, successors or assigns, shall abide by, and in all respects promptly and faithfully perform the covenants, conditions and provisions in said AGREEMENT and any alteration thereof made as therein provided, notice of which alterations to Surety being hereby waived, on its part to be kept and performed at the time and in the manner therein specified, and in all respects according to their true intent and meaning, and shall indemnify and save harmless CITY, its officers, agents, employees, volunteers as therein stipulated, then this obligation shall be null and void; otherwise, this obligation shall be and remain in full force and effect.

As condition precedent to the satisfactory completion of the contract, the obligation of the PRINCIPAL and SURETY under this Bond shall remain in effect for a period of one (1) year after the completion and acceptance of the WORK. During that time, if the PRINCIPAL, its heirs, executors, administrators, successors or assigns fails to make full, complete and satisfactory repair and replacement or totally protect the CITY from any loss or damage made evident during that year which results from or is caused by either defective materials or faulty workmanship in the prosecution of the WORK, then the obligation shall remain in full force and effect. However, anything in

this paragraph to the contrary notwithstanding, the obligation of the SURETY shall continue so long as any obligation of the PRINCIPAL remains.

No prepayment or delay in payments, and no change, extension, addition or alteration of any provision of the AGREEMENT or in the specifications agreed to between the PRINCIPAL and the CITY, or any forbearance on the part of the CITY shall operate to relieve the SURETY. The SURETY hereby waives the provisions of Section 2819 of the California Civil Code. The SURETY waives all rights of subrogation against the CITY or any person employed by the CITY. If the contract price increases by the issuance of change orders, the amount specified in this bond shall increase by the same amount.

Whenever PRINCIPAL shall be and declared by CITY to be in default under the AGREEMENT, SURETY shall promptly remedy the default, or shall promptly do one of the follow at CITY's election:

1. Undertake through its agents or independent contractors, reasonably acceptable to CITY, to complete the AGREEMENT in accordance with its terms and conditions and to pay and perform all obligations of PRINCIPAL under the AGREEMENT, including without limitation, all obligations with respect to warranties, guarantees, and the payment of liquidated damages.
2. Reimburse CITY for all costs CITY incurs in completing the AGREEMENT, and in correcting, repairing or replacing defects in materials or workmanship and/or materials and workmanship which do not conform to the specifications in the AGREEMENT.

SURETY's obligations hereunder are independent of the obligations of any other surety for the performance of the AGREEMENT, and suit may be brought against SURETY and such other sureties, jointly and severally, or against any one or more of them, or against less than all of them without impairing CITY's rights against the others.

No right of action shall accrue on this bond to or for the use of any person or corporation other than CITY or its successors or assigns.

As part of the obligation secured hereby and in addition to the face amount specified therefore, there shall be included costs and reasonable expenses and fees, including reasonable attorneys' fees, incurred by CITY in successfully enforcing such obligation, all to be taxed as costs and included in any judgment rendered.

**PUBLIC WORKS
LABOR AND MATERIALS PAYMENT BOND**
(Project: _____)

WHEREAS, the City of Roseville ("CITY"), has awarded a bid and contract to _____
as contractor ("PRINCIPAL"), for the public work described as _____
_____ (the "WORK"). The
contract ("AGREEMENT"), for the public work described above, and all of its terms and
conditions are incorporated by reference and made a part hereof; and

WHEREAS, the PRINCIPAL is required to furnish a bond in connection with the
AGREEMENT guaranteeing payment of persons who provide labor and material; and

NOW, THEREFORE, we the undersigned PRINCIPAL and _____
_____, a _____, admitted
and duly authorized to transact business under the laws of the State of California, as
SURETY ("SURETY"), are held and firmly bound unto the CITY or its successors and
assigns in the sum of _____
dollars (\$ _____) (which amount is not less than 100% of the
AGREEMENT price) to be paid to the CITY or its successors and assigns; and for which
payment, well and truly to be made, we bind ourselves, our heirs, executors and
administrators, successors or assigns jointly and severally, firmly by these presents.

The condition of the obligation is such that if the PRINCIPAL, its subcontractors,
heirs, executors, administrators, successors or assigns fails to pay any of the persons
named in Section 8004 or 9100 of the Civil Code of the State of California, or the
amounts due under the Unemployment Insurance Code of the State of California, or any
amounts required to be deducted, withheld and paid over to the Employment
Development Department from the wages of employees of the PRINCIPAL and its
subcontractors pursuant to Section 13020 of the Unemployment Insurance Code, with
respect to work or labor performed by any such claimant, that the SURETY will pay for
the same, in an amount not exceeding the sum specified in this bond, and also, in case
suit is brought upon the bond, shall pay reasonable attorneys' fees, to be fixed by the
Court.

This bond shall inure to the benefit of any and all persons, companies, and
corporations entitled to file a Stop Payment Notice pursuant to the provisions of Section
9350 et seq. of the Civil Code of the State of California, so as to give a right of action to
them or their assigns in any suit brought upon this bond.

No prepayment or delay in payments, and no change, extension, addition or alteration of any provision of the AGREEMENT or in the specifications agreed to between the PRINCIPAL and the CITY, or any forbearance on the part of the CITY shall operate to relieve the SURETY. The SURETY hereby waives the provisions of Section 2819 of the California Civil Code. The SURETY waives all rights of subrogation against the CITY or any person employed by the CITY. If the contract price increases by the issuance of change orders, the amount specified in this bond shall increase by the same amount.

As part of the obligation secured hereby and in addition to the face amount specified therefore, there shall be included costs and reasonable expenses and fees, including reasonable attorneys' fees, incurred by CITY in successfully enforcing such obligation, all to be taxed as costs and included in any judgment rendered.

SECTION 1

DEFINITIONS AND TERMS

1-1.01 **GENERAL.** When the following abbreviations and terms or pronouns in place of them appear in the Contract Documents, the intent and meaning shall be interpreted as provided in this Section 1.

1-1.02 **ACCEPTANCE.** Formal Acceptance by resolution by the Roseville City Council of the Contract when completed in all respects in accordance with the Contract Documents and any modifications previously approved.

1-1.03 **ADDENDUM.** Written interpretation or revision to any of the Contract Documents issued by the City before the bid opening.

1-1.04 **AS-BUILT DOCUMENTS, AS-BUILT DRAWINGS AND RECORD DOCUMENTS.** As-Built Documents, As-Built Drawings and Record Documents are all contract documents modified to reflect changes during the construction phase. Specifically, As-Built Documents/Drawings are a revised set of drawings submitted by the Contractor upon Final Completion of a project. They reflect changes made in the Specifications and Working Drawings during the construction process, and show the exact dimensions, geometry, and location of all elements of the work completed under the Contract. Record Documents, on the other hand, are compiled by the Engineer or Architect based on the As-Built Documents/Drawings submitted by the Contractor. They reflect the Engineer or Architect's concurring review of what changes were denoted, why they were made and where they occurred and create a record set of drawings.

1-1.05 **ASSESSMENT.** A cost imposed on the Contractor for non-compliance

with certain contractual requirements.

1-1.06 **BENEFICIAL OCCUPANCY.** The taking possession of a portion of the Work by the City for its use and/or occupancy on other than a temporary or emergency basis.

1-1.07 **BID GUARANTY.** The cashier's, certified check, irrevocable standby letter of credit, deposit of securities, or Bidder's Bond, accompanying the bid submitted by the Bidder, as a guaranty that the Bidder will enter into an agreement with the City for the performance of the Work, if the Agreement is awarded to Bidder, and the Bidder will submit the required Contract Bonds and Certificate of Insurance. Also referred to as the Bidder's Security.

1-1.08 **BIDDER.** Individual, firm, partnership, limited liability company, corporation, joint venture, or any combination thereof, submitting a Proposal for the Work, acting directly, or through a duly authorized representative.

1-1.09 **BIDDING DOCUMENTS.** Includes the Notice to Bidders, Bidding Requirements, Contract Conditions, Drawings, and Addenda.

1-1.10 **CHANGE ORDER.** Any written order to the Contractor directing an addition, deletion, or modification of the Work, or an adjustment in the Contract Price or Contract Time provided in the Contract Documents and issued after the Agreement has been signed.

1-1.11 **CITY.** The City of Roseville.

1-1.12 **CITY ATTORNEY.** The City Attorney of the City.

1-1.13 **CITY CLERK.** The City Clerk of the City.

1-1.14 **CLAIM.** A separate demand by Contractor sent by registered mail or certified mail with return receipt requested, for one or more of the following: (a) a time extension, including, without limitation, for relief for damages or penalties for delay assessed by

the City; (b) payment by the City of money or damages arising from work done by, or on behalf of, Contractor pursuant to the Contract Documents and payment for which is not otherwise expressly provided or to which Contractor is not otherwise entitled; and (c) payment of an amount that is disputed by the City.

1-1.15 **CONSTRUCTION SCHEDULE.** A list or graphic display of construction activities required for completing the Work, in a format required by the Contract Documents. The duration, start and finish date, and sequence of significant activities, critical path, float and milestones must be indicated in the Construction Schedule.

1-1.16 **CONTRACT OR AGREEMENT.** The written agreement relating to the Work to be performed, the labor, materials, and equipment to be furnished, and the payment to be made therefor. The Agreement/Contract is part of and incorporates all of the Contract Documents.

1-1.17 **CONTRACT CONDITIONS.** Includes the General Conditions, Supplemental Conditions, and Specifications.

1-1.18 **CONTRACT DOCUMENTS.** Includes those documents that form the basis of the Contract, including but not limited to, Bidding Documents, the Bid or Proposal, Contract Bonds, the Contract, all required insurance certificates or endorsements, all bonds, all required certifications or statements, Change Orders, any Contract Amendment, any City Standard which is incorporated by reference and these City of Roseville General Conditions for Buildings and Grounds.

1-1.19 **CONTRACT DRAWINGS.** The official drawings including plans, elevations, sections, detail drawings, diagrams, plated, General Notes, information and schedules thereon, or exact reproductions thereof, showing the location, character, dimension, and details

of the Work. The Contract Drawings include any drawings or plates bound within the Supplemental Conditions.

1-1.20 **CONTRACT PRICE.** The total compensation to be paid to the Contractor in accordance with the terms of the Agreement.

1-1.21 **CONTRACT TIME.** The number of Days, or portion thereof, allowed for completion of the Work, including all authorized time extensions. The effective date for commencement of the Work specified in the Notice to Proceed shall define the beginning of the Contract Time.

1-1.22 **CONTRACTOR.** Individual, firm, partnership, limited liability company, corporation, joint venture, or any combination thereof, who has entered into the Agreement with City.

1-1.23 **DAY OR DAYS.** Unless otherwise designated, Day or Days as used in the Contract Documents will be understood to mean calendar Day or Days.

1-1.24 **DEPARTMENT.** The Department for Contract Administration, as identified in the Supplemental Conditions.

1-1.25 **DIRECT COSTS.** Those cost items (including labor, materials, equipment and any subcontractor's work) that are used in the actual performance of, and are specifically and uniquely attributable to the Work or changed Work. Direct Costs do not include Overhead. Direct Costs only include the following:

A. Payroll costs for employees in the direct employ of Contractor in the performance of the Work under schedules of job classifications agreed upon by City and Contractor. Payroll costs for employees not employed full time on the Work shall be apportioned on the basis of their time spent on the Work. Payroll costs shall include salaries and

wages plus the cost of fringe benefits which shall include social security contributions, unemployment, excise and payroll taxes, workers' compensation, health and retirement benefits, sick leave, vacation and holiday pay applicable thereto. Such employees may include superintendents and foremen at the site. The expenses of performing work after regular working hours, on Saturday, Sunday or legal holidays shall be included in the above only to the extent authorized by City in writing.

B. Cost of all materials and equipment furnished and incorporated in the Work, including costs of transportation and storage thereof, and suppliers' field services required in connection therewith. All trade discounts, rebates and refunds and all returns from sale of surplus materials and equipment shall accrue to City, and Contractor shall make provisions so that they may be obtained.

C. Payments made by Contractor to the subcontractors for work performed by subcontractors. If required by City, Contractor shall obtain competitive bids from subcontractors acceptable to Contractor and shall deliver such bids to City who will then determine which bids will be accepted. If a subcontract provides that the subcontractor is to be paid on the basis of cost of the work plus a fee, the subcontractor's cost of the work shall be determined in the same manner as Contractor's cost of the work. All subcontracts shall be subject to the other provisions of the Contract Documents insofar as applicable.

D. Costs of special consultants (including engineers, architects, testing laboratories, surveyors, and accountants) employed for services specifically, and only, related to the Work.

E. Supplemental costs including the following:

1. The proportion of necessary transportation, travel and subsistence

expenses of Contractor's employees incurred in discharge of duties connected with the Work.

2. Cost, including transportation and maintenance, of all materials, supplies, equipment, machinery, appliances, office and temporary facilities at the site and hand tools not owned by the workers, which are consumed in the performance of the Work, and cost, less market value of such items used but not consumed which remain the property of Contractor.

3. Rentals of all construction equipment and machinery and the parts thereof whether rented from Contractor or others in accordance with rental agreements approved by City, and the costs of transportation, loading, unloading, installation, dismantling and removal thereof, all in accordance with terms of said rental agreements. The rental of any such equipment, machinery or parts shall cease when the use thereof is no longer necessary for the Work.

4. Sales, consumer, use or similar taxes related to the Work, and for which Contractor is liable, imposed by laws and regulations.

5. The cost of utilities (including the meter and all associated installation costs), fuel and sanitary facilities at the site.

6. Cost of premiums for additional bonds and insurance required because of changes in the Work.

1-1-26 **DIRECTOR.** Director of the Department for Contract Administration or his or her designee.

1-1.27 **EMERGENCY.** Any sudden generally unforeseen occurrence (such as a fire, flood, storm, earthquake, civil disorder, or other natural and/or man-made disaster) that has the potential to adversely affect the safety of life, the Work, and/or adjacent property; to interrupt contracts essential to the performance of the Work; and/or to cause catastrophic failure of City

equipment and/or facilities.

1-1.28 **ENGINEER OR ARCHITECT.** Professional Engineer or Architect designated for a particular project responsible for signing and sealing the permit drawings, interpretation of the drawings where ambiguities exist, review of requests for information, design Change requests and Shop Drawings, resolution of errors and omissions, and finalization of Record Documents.

1-1.29 **FINAL COMPLETION.** When the project has been completed according to the terms and conditions set forth in the Contract Documents. Final Completion is not the same as Acceptance.

1-1.30 **FORCE ACCOUNT.** Payment by force account shall mean payment on the basis of the Contractor's time and materials.

1-1.31 **GENERAL NOTES.** The written instructions, provisions, conditions or other requirements appearing on the Contract Drawings and so identified thereon, which pertain to the performance of the Work.

1-1.32 **INSTALLATION, INSTALL.** Completely assembling, erecting, and/or connecting materials, parts, components, supplies, and related equipment specified or required for the completion of the Work.

1-1.33 **LABORATORY.** Established professional laboratories authorized by the City to test materials and Work involved in the Contract.

1-1.34 **LEGAL HOLIDAYS.** Those days designated as Federal holidays or declared by the City, or otherwise specified in the Contract Documents.

1-1.35 **LIQUIDATED DAMAGES.** The amount prescribed in the Contract Documents to be paid to the City or to be deducted from any payments due or to become due the

Contractor for each day's delay in completing the whole or any specified portion of the Work beyond the time allowed in the Supplemental Conditions.

1-1.36 **NOTICE OF COMPLETION.** A legal notice filed by the City with the Placer County Recorder's Office stating that construction has been completed and accepted by the City.

1-1.37 **NOTICE TO PROCEED.** A written notice given by the City to the Contractor fixing the date on which the Contract Time will commence to run.

1-1.38 **NOTICE OF TERMINATION.** Written notice from the City to the Contractor and/or its Surety terminating the Agreement, or a portion thereof, either for convenience of the City or for default due to the Contractor's failure to perform its contractual obligations.

1-1.39 **OVERHEAD.** Business or administrative expenses (including but not limited to office expenses, administrative staff, rent, insurance, utilities) not chargeable to a particular part of the Work. The term "Overhead" shall include all of the following:

A. Payroll costs and other compensation of Contractor's officers, executives, principals (of partnerships and sole proprietorships), general managers, engineers, architects, estimators, attorneys, auditors, accountants, purchasing and contracting agents, expeditors, timekeepers, clerks, and other personnel employed by Contractor whether at the Work Site or in Contractor's principal or a branch office for general administration of the Work and not specifically included in the agreed upon schedule of job classifications, all of which are to be considered administrative costs covered by the Contractor's fee.

B. Expenses of Contractor's principal and branch offices other than Contractor's office at the site.

C. Any part of Contractor's capital expenses, including interest on Contractor's capital employed for the Work and charges against Contractor for delinquent payments.

D. Cost of premiums for all bonds and for all insurance whether or not Contractor is required by the Contract Documents to purchase and maintain the same, except as provided in section 1-1.25.

E. Other overhead or general expense costs of any kind.

1-1.40 **PREMISES.** Shall mean the area within construction easements, easements, rights of entry and City owned property which surrounds the Work Site, limited by the property lines thereof. In some cases Premises may coincide with the Work Site.

1-1.41 **PROFESSIONAL ENGINEER.** An engineer licensed by the Board of Registration for Professional Engineers, State of California.

1-1.42 **PROJECT MANUAL.** A book containing all Contract Documents.

1-1.43 **PROPOSAL FORMS.** The approved forms upon which the City requires that each Bidder submit its bid with regard to the Agreement.

1-1.44 **REQUEST FOR INFORMATION (RFI).** A document issued by the Contractor requesting information concerning the Contract Documents.

1-1.45 **SAFETY.** Includes the practice of identifying potential hazards, assessing their risk, taking corrective action where possible, including and providing control measures such as engineering design, written procedures, and the personal protective equipment for workers in order to eliminate or reduce the risk for exposure in the workplace.

1-1.46 **SCHEDULE OF VALUES.** The breakdown of the Contract Price that will serve as the basis for Contractor's Applications of Payment. Any lump sum bid item

included within the Contract Price will be apportioned among values relating to specific components of the Work covered by said lump sum.

1-1.47 **SHOP DRAWINGS.** Drawings, plans, diagrams, schedules, and other data specifically prepared and submitted to the City by the Contractor, showing in detail: (a) the proposed fabrication and assembly of a special component of the Work; and (b) the Installation (form, fit and attachment details) of a special component of the Work. Shop Drawings shall be deemed to include Working Drawings, Product Data, literature, and applicable performance and test data.

1-1.48 **SPECIFICATIONS.** The technical Specifications for the Work prepared by the Director or an Engineer or Architect describing in detail the nature of the Work, its components, any performance standards, and how the Work is to be constructed.

1-1.49 **SUBCONTRACTOR.** Any individual, firm, partnership, limited liability company, corporation, joint venture, or combination thereof, other than employees of the Contractor, engaged by the Contractor to furnish services, labor, equipment and materials for a portion of the Work.

1-1.50 **SUBMITTALS.** Those documents required to be submitted by the Contractor for review by the City in accordance with the Contract Documents.

1-1.51 **SUPPLEMENTAL CONDITIONS.** The Supplemental Conditions are specific clauses modifying or supplementing these General Conditions.

1-1.52 **SUPPLIER.** Any individual, firm, partnership, limited liability company, corporation, joint venture, or combination thereof, other than employees of the Contractor, that supplies a tangible product as a portion of the Work, with services usually limited to delivery and/or required testing, and with manufacturing, fabrication, or production facilities located off

the Work Site.

1-1.53 **WORK.** The furnishing of all labor, and the furnishing and Installing of all materials, articles, supplies and equipment as specified, designated, or required by the Contract Documents.

1-1.54 **WORK SITE.** All or portion of the Premises that the Work is limited to as shown on the Contract Drawings or designated by the Director. Public streets are not included unless Work is being done within the street right-of-way.

1-1.55 **WORKING DRAWINGS.** Original drawings prepared by the Contractor and/or its Subcontractors or Suppliers, of any tier, illustrating Work required for construction that will not become an integral part of the completed Work. This includes, but is not limited to, drawings for temporary structures such as decking, bulkheads, excavation supports, utility support, groundwater control, forming, falsework, access roads, staging areas, staging plans, and diversion plans. A Working Drawing is one type of a Shop Drawing.

SECTION 2

CONTROL AND SCOPE OF THE WORK

2-1.01 **AUTHORITY OF DIRECTOR.** The Contract shall be performed in a manner satisfactory to the Director who shall decide all questions which may arise as to the quality or acceptability of materials furnished and Work performed and as to the manner of performance and rate of progress of the Work; all questions which may arise as to the interpretation of the Contract Documents; all questions as to the acceptable fulfillment of the Contract on the part of the Contractor; and all questions as to compensation. The Director shall have authority to enforce and make effective such decisions and orders in the event the Contractor fails to promptly carry out the same.

2-1.02 **INTENT OF CONTRACT DOCUMENTS.** The Contract Documents are complementary, and what is called for by one shall be as binding as if called for by all. The intent of the Contract Documents is to describe the details for the construction and completion of the Work. Where the Contract Documents describe portions of the Work in general terms, but not in complete detail, it is understood that only the best general practice shall be followed and that only materials and workmanship of the best quality are to be used. Any Work, materials, or equipment that are customarily provided, or that are reasonably inferable from the Contract Documents as being required to produce the intended result, shall be supplied, whether or not specifically called for. When words, which have a well-known technical or trade meaning are used to describe work, materials, or equipment, such words shall be interpreted in accordance with that meaning. Unless otherwise specified, the Contractor shall furnish all labor, materials, tools, equipment, and incidentals, and do all the Work involved in executing the Contract in a

satisfactory and workmanlike manner.

Reference to standard specifications, manuals or codes of any technical society, organization or association, or to the laws or regulations of any governmental authority, whether such reference be specific or by implication, shall mean the latest standard specification, manual, code, laws, or regulations in effect on the first published date of the Notice to Contractors, except as may be otherwise specifically stated. However, no provision of any referenced standard specification, manual or code (whether or not specifically incorporated by reference in the Contract Documents) shall be effective to change the duties and responsibilities of City or Contractor, or any of their consultants, agents, or employees from those set forth in the Contract Documents, nor shall it be effective to assign to City, or City's designated representative, any duty or authority to supervise or direct the furnishing or performance of the Work or any duty or authority to undertake responsibility contrary to other provisions of the Contract Documents.

The Contract Documents are divided into parts, divisions, sections and articles for convenience, organization and reference. Generally, there has been no attempt to divide the Specifications sections into work performed by the various building trades, work by separate Subcontractors, or work required for separate facilities in the project.

2-1.03 **EXAMINATION AND VERIFICATION OF CONTRACT**

DOCUMENTS. The Contractor shall thoroughly examine and become familiar with all of the various parts of the Contract Documents and shall determine the nature and location of the Work, the general and local conditions (including applicable laws) and all other matters which can in any way affect the cost, progress or performance of the Work under this Agreement. Failure to make an examination necessary for this determination shall not release the Contractor from the obligations of the Agreement. No oral agreement or conversation with any officer, or employee

of the City, or with the City's designated representative either before or after the execution of the Agreement, shall affect or modify any of the terms or obligations contained in the Contract Documents.

2-1.04 **CONTRACT DRAWINGS.** The Contract Drawings consist of general drawings and show such plans, elevations, sections, details and schedules as are necessary to give a graphic and pictorial description of the contemplated construction. All authorized alterations affecting the requirements and information given on the Contract Drawings shall be in writing.

2-1.05 **COORDINATION AND INTERPRETATION OF CONTRACT DOCUMENTS.** All Contract Documents are essential parts of the Contract, and a requirement occurring in one is as binding as though occurring in all. They are intended to be complementary, and to describe and provide for a complete Work.

In the event of inconsistencies between requirements contained in different components of the Contract Documents, the precedence of the Contract Documents shall be as follows to resolve conflicts:

1. Change Orders
2. The Contract (including Addenda)
3. The Supplemental Conditions
4. Specifications
5. Contract Drawings
6. The General Conditions

Should it appear that the Work to be done or any of the matters relative thereto are not sufficiently detailed or explained in the Contract Documents, the Contractor shall submit a

Request for Information (“RFI”) to the Director for such further explanations as may be necessary and shall conform to the written explanation given as if part of the Contract Documents. The decisions of the Director shall be final.

Contractor shall anticipate that it will be necessary to prepare and submit RFIs regarding the Contract Documents. The City will respond to each RFI by no later than fourteen (14) Days after receipt of the RFI, unless the RFI is of significant complexity. Furthermore, in the event that there are numerous RFIs pending, Contractor shall cooperate with the City in establishing a priority for responding to the RFIs, and potentially some RFIs may be responded to beyond the fourteen (14) Day period.

Each RFI prepared by Contractor shall be full and complete. Contractor shall prepare RFIs so as to not cause any delay to the progress of the Work and to not cause any impact to Contractor’s labor productivity in the field. Contractor shall not assert any Claims for delay or interference against the City if Contractor fails to timely submit any RFI to the City, after consideration of the response period allowed for by the City.

The response to an RFI shall not, by itself, constitute a writing that authorizes Contractor to perform any Work that causes an adjustment to either the Contract Price or the Contract Time. If Contractor believes that any response to any RFI should constitute a compensable change, Contractor shall provide a Notice of Potential Claim as provided in Section 7-1.03, below. Contractor’s failure to provide the required written notice shall constitute a waiver of the Contractor’s right to seek a compensable change based on the RFI response.

The Contractor shall examine all Contract Documents; shall verify all figures in the Contract Documents before laying out the Work; shall promptly notify the City of all errors, inconsistencies, and/or omissions that it discovers; and, in instances where such non-

conformities are discovered, shall obtain specific instructions in writing from the City before proceeding with the Work. Contractor's performance of any Work affected by such non-conformities prior to the City's decision shall be at the Contractor's risk. Any Work that is customarily provided or that is reasonably inferable shall not relieve the Contractor from performing such work at no additional expense and/or delay, and such Work shall be performed as if fully set forth in the Contract Documents.

2-1.06 **INDEPENDENT CONTRACTOR STATUS.** The Contractor shall independently perform all Work required by the Contract Documents and shall not be considered as an agent or employee of the City, nor shall the Contractor's Subcontractors or employees be considered as subagents of the City.

The Contractor and Contractor's Subcontractors shall be licensed in accordance with the laws of the State of California and as more particularly described in the bidding documents or elsewhere in the Contract Documents.

2-1.07 **ORDER OF WORK.** When required by the Contract Documents, the Contractor shall follow the sequence of operations set forth therein. Full compensation for conforming to such requirements will be considered as included in the prices paid for the various Contract items of work, and no additional compensation will be allowed therefor.

2-1.08 **SUBMITTALS.** It shall be the Contractor's responsibility to timely submit, so as to cause no delay in the Work, all Shop Drawings, descriptive data, manuals, instructions, affidavits, samples for the various trades as required by the Supplemental Conditions and Specifications, and offers of alternatives, if any. Such Submittals shall be checked and coordinated by the Contractor with the Work of other trades involved before they are submitted to the Director for examination.

The Contractor shall deliver at least one (1) electronic copy of the Submittals to the Director, and one (1) hard copy if requested. Work requiring the submittal of working drawings, descriptive data or samples shall not begin prior to approval of said Submittal by the Director.

The time allowed for review of each Submittal will be as indicated in the Supplemental Conditions. Review time will start upon receipt of the Submittal by the Director and will end upon the Director's mailing of the Submittals to the Contractor. Defective, incomplete or partial Submittals will be returned to the Contractor unreviewed.

Submittals shall be made by a letter of transmittal that shall contain a list of all matter submitted and identification of all variations from the Contract Documents contained in the Submittal. The letter and all items accompanying the same shall be fully identified as to project name and location, Contractor's name, district, county, and Contract number, with ample cross-references to the Contract Documents, to facilitate identification of items and their location in the Work.

All Shop Drawings and supporting data, catalogs, schedules, shall be submitted as the instruments of the Contractor, who shall be responsible for their accuracy and completeness. These Submittals may be prepared by the Contractor, Subcontractors, or Suppliers, but the Contractor shall ascertain that Submittals meet all of the requirements of the Contract Documents, while conforming to structural, space, and access conditions at the point of Installation. The Contractor shall check all Submittals before submitting them to the Director.

2-1.08A **SHOP DRAWINGS.** The Contractor shall submit an electronic copy (searchable PDF) of all Shop Drawings required by the Supplemental Conditions or Specifications, and one (1) hard copy, if requested by the Director. Shop Drawings shall also be provided separately in AutoCAD format using the latest version of AutoCAD. An electronic

copy will be returned to the Contractor either approved for use, as demonstrated by a stamp, or returned for correction and resubmittal. Materials, colors and/or samples will not be returned to the Contractor. Shop Drawings include any drawing, which requires execution by a draftsman as distinguished from printed matter. The size of Shop Drawings shall not exceed twenty-four inches (24”) by thirty-six inches (36”).

2-1.08B **DESCRIPTIVE DATA.** The Contractor shall submit an electronic copy (searchable PDF) of each set of manufacturer's brochures or other data required by the Supplemental Conditions or Specifications, and one (1) hard copy, if requested by the Director. The City will examine such Submittals and return either an electronic copy or a hard copy approved for use or returned for correction and resubmittal.

2-1.08C **SAMPLES.** The Contractor shall submit samples of articles, materials or equipment as required by the Supplemental Conditions or Specifications. The Work shall be in accordance with the approved samples. Samples shall be removed from City property when directed or may be incorporated in the Work if approved by the Director. Samples not removed by the Contractor will become the property of the City or, at the City's option, will be removed or disposed of by the City at the Contractor's expense.

2-1.08D **MANUALS, INSTRUCTIONS AND AFFIDAVIT.**

A. **Manuals and Instructions.** Where operation and maintenance manuals are required by the Supplemental Conditions, the Contractor shall submit two (2) sets of manuals, suitably bound, along with two (2) electronic copies in an approved format, to the Director within forty-five (45) Days after favorable review of the equipment or facilities. If operation and maintenance manuals are approved to be provided in PDF format, text shall be provided in searchable PDF format, making proper use of PDF for headings and heading levels,

paragraphs, tables, and lists. Submitted operation and maintenance manuals shall be a collected, organized, and indexed set of bookmarked PDF documents comprising each operation and maintenance manual that corresponds to a hardcopy binder. All manuals shall be marked to indicate the specific equipment furnished for this project and shall include at a minimum:

1. Equipment summary form
2. Cover/Title page
3. Table of contents
4. Operating procedures including start-up, shutdown, normal operation, all operating modes, emergency shutdown, and safety precautions
5. Lubrication instructions (if required)
6. Preventative maintenance procedures
7. Troubleshooting and corrective maintenance procedures
8. Reinstallation instructions
9. Overhaul instructions (if applicable)
10. Parts identification list with exploded view and associated cross references
11. Recommended spare parts list
12. Operator safety requirements
13. Electrical and control system wiring drawings, including panel wiring control (ladder) diagrams, logic diagrams, loop diagrams, and interconnection diagrams
14. Panel layout and assembly drawings

15. Mechanical drawings
16. Printouts of all software programs and configuration files
17. Factory and field test procedures and results

Operation and maintenance manuals for complex equipment shall also include:

18. Alternate specified operating modes
19. Emergency shutdown instructions
20. Normal shutdown instructions
21. Long term shutdown instructions

Operation and maintenance manuals for systems comprised of separate pieces of equipment shall include a system explanation of items 4, 7, 18, 19, 20, and 21 as well as the instructions for the separate pieces of equipment.

B. Affidavits. Where required in the Supplemental Conditions or Specifications, manufacturers of equipment shall provide field service as a part of this project. Equipment shall not be considered ready for full time operation until after the authorized factory-trained and qualified manufacturer's representative for the specific equipment has checked and adjusted the equipment and certified by written affidavit that the equipment has been properly Installed, tested, adjusted, lubricated, and calibrated, and is ready for full time operation. Acceptable affidavits shall be submitted prior to completion of the Work. Affidavits shall contain the following specific wording:

“The (Name of Equipment) has been properly installed, tested, adjusted, lubricated, and calibrated, and is ready for full time operation. The installation has been inspected and has been found to be in conformance with our (the manufacturer's) standards and requirements.”

No amplification, dilution, or modification of this specific wording will be permitted.

2-1.08E **ALTERNATIVES.** For convenience in designation in the Contract Documents, certain materials, articles, or equipment may be designated by a brand or a trade name or the name of the manufacturer together with catalog designation or other identifying information, hereinafter referred to generically as “designated by brand name.” Except in those instances where the product is designated to match others in use in a particular improvement, either completed or in the course of completion, an alternative material, article, or equipment which is of equal quality and of the required characteristics for the purpose intended may be proposed for use provided the Contractor complies with the following requirements:

A. The Contractor shall submit its proposal for an alternative in writing. Such request shall be made in ample time to permit review and approval without delaying the Work. The Contractor shall not be entitled to an adjustment of the Contract Time or an increase in the Contract Price based on any Contractor-proposed substitution.

B. No such proposal will be considered unless accompanied by complete information and descriptive data, necessary to determine the equality of the offered materials. The Contractor shall satisfy the Director as to the comparative quality, suitability, or performance of the offered material, articles, or equipment. In the event that the Director rejects the use of such alternative materials, articles, or equipment, then one of the particular products designated by brand name shall be furnished.

C. The burden of proof as to the quality and suitability of alternatives shall be upon the Contractor and it shall furnish all information necessary as required by the Director. The Director shall be the sole judge as to the quality and suitability of alternative articles or materials and such decisions shall be final. Where use of an alternative material

involves redesign of, or changes to, other parts of the Work, the cost and time required to effect such redesign or changes will be considered in evaluating the suitability of the alternative material. Cost of redesign by the City will be borne by the Contractor.

D. Whenever classification, rating or other certification by a body such as Underwriters Laboratories (UL) or the National Electrical Manufacturers Association (NEMA) is a part of the specification for any material, Contractor's request for use of alternative articles or materials shall be accompanied by reports from the listed or equivalent independent testing Laboratory indicating compliance with the Contract Documents. The cost of all testing required to prove equality of the material proposed shall be borne by the Contractor. Approval of an alternative shall be only for the characteristics or use named in such approval, and shall not be used to change or modify any requirement of the Contract Documents.

E. At its election, the City reserves the right to consider any Contractor proposed substitution as a Cost Reduction Proposal under Section 3-1.07 of these General Conditions in the event that there is a significant savings resulting from the substitution.

The Director will examine, with reasonable promptness, such Submittals, and return of Submittals to the Contractor shall not relieve the Contractor from responsibility for deviations and alternatives from the Contract Documents, nor shall it relieve the Contractor from responsibility for errors in the Submittals. A failure by the Contractor to identify in its letter of transmittal material deviations from the Contract Documents shall void the Submittal and any action taken thereon by the Director. When specifically requested by the Director, the Contractor shall resubmit such Shop Drawings, descriptive data and samples as may be required.

If any mechanical, electrical, structural, or other changes are required for the proper Installation and fit of alternative materials, articles, or equipment, or because of deviations from

the Contract, such changes shall not be made without the approval of the Director and shall be made without additional cost to the City.

2-1.09 **DISPOSAL OF MATERIAL OUTSIDE THE WORK SITE.** Unless otherwise stated elsewhere in the Contract Documents, the Contractor shall, at its own cost and expense, make its own arrangements for disposing of materials outside the Work Site.

Except when material is to be disposed of at a landfill or recycling center, when any material is to be disposed of outside the Work Site, the Contractor shall first obtain written permission from the City to dispose of the material at the intended location. The City's approval will be contingent upon the Contractor obtaining a written permit from the property owner on whose property the disposal is to be made. Prior to the disposal of any material at the intended location, the Contractor shall submit such permit or a certified copy thereof to the City, together with a written release from the property owner absolving the City from any and all responsibility related to the disposal of material on said property.

Disposal of Hazardous Materials must be done in accordance with all laws and regulations. Copies of all required regulatory documentation including copies of final manifests shall be supplied to the City.

2-1.10 **ACCESS TO THE WORK.** The Contractor shall satisfy itself that the jurisdictions through which its operations and haul routes pass will permit such operations with respect to the type of vehicle, laden weights, frequency and dimensions of loads, hours of operation and required traffic control. All necessary permits, licenses or bonds shall be obtained and paid for by the Contractor.

2-1.11 **TEMPORARY UTILITIES.** The Contractor shall make its own arrangements with utility companies for any temporary services it may require in performance of

the Work and shall pay all costs of these services directly to these utility organizations.

2-1.12 **UTILITY FACILITIES.** The Contractor shall protect from damage those utility facilities that are to remain in place, be Installed, relocated or otherwise arranged.

The Contractor's attention is directed to the possible existence of facilities not shown, and of facilities in a location different from that, which is indicated. The Contractor shall take steps to ascertain the exact location of all facilities prior to doing any Work, which may damage such facilities or interfere with their service. Where the location of a facility is indicated or inferred from the presence of visible facilities such as buildings, meters, and junction boxes, the Contractor shall make such excavations and explorations as are necessary to ascertain the correct location. Unless provided for elsewhere in the Contract Documents, the cost of such excavations and explorations will be considered as a part of the cost of other items of Work and no additional payment will be made. Such excavations and exploratory Work shall not entitle the Contractor to an extension of time.

If the Contractor discovers underground facilities not indicated or inferred from the Contract Documents, the Contractor shall immediately give the Director written notification of the existence of those facilities. The Contractor shall determine the exact location of the underground facilities and the cost of the work will be paid for in accordance with the Contract Documents. The underground facilities shall be protected from damage as directed by the Director and the cost of that work will be paid for as extra work. The Contractor shall, if directed by the Director, repair any damage, which may occur to the underground facilities. The cost of that repair work, not due to the failure of the Contractor to exercise reasonable care, will be paid for as extra work. Damage due to the Contractor's failure to exercise reasonable care shall be repaired at the Contractor's cost and expense.

Where it is determined by the City that the rearrangement of an underground facility, the existence of which is not shown on the Contract Drawings, is essential in order to accommodate the Work, the City will provide for the rearrangement of such facility by other forces or, when so ordered by Change Order, such rearrangement shall be performed by the Contractor and will be paid for as provided under a Change Order.

The Contractor shall be responsible for the maintenance of all utility facilities placed by the Contractor in temporary locations, and all utilities within the construction area not required to be relocated but which are required to be shored or supported during the construction period. The cost of such maintenance shall be borne by the Contractor, and no other compensation shall be due the Contractor for this Work.

The cost of providing and maintaining all necessary or required temporary structures, of making any necessary repairs, replacements, or similar operations, or furnishing indemnity or other bonds, if required, and all costs required by this Section shall be paid by the Contractor and shall be included in the prices bid in the schedule for other items of work.

2-1.13 **PRESERVATION AND CLEANING.** The Contractor shall clean up the Work at frequent intervals and at other times when directed by the Director. While finish Work is being accomplished, floors, Work areas and finished areas shall be kept clean, free of dust, construction debris and trash. Upon completion of the Work, the Contractor shall remove from the Premises its construction equipment and any waste materials not previously disposed of, leaving the Premises thoroughly clean and ready for final inspection.

2-1.14 **LIMITATIONS ON WORK SITE AND PREMISES.** The Contractor shall limit its construction operations to the Work Site unless otherwise shown on the Contract Drawings or specified. The Contractor shall perform no operation of any nature over or on the

Premises except such operations as are authorized by the Contract Documents or as authorized by the Director.

2-1.15 **DUST CONTROL.** During the performance of all Work under this Contract, the Contractor shall assume all responsibility for dust control and shall furnish all labor, equipment, and means required to carry out proper and efficient measures wherever and whenever dust control is necessary to prevent the operations from producing dust damage and nuisance to persons and property. Any claims resulting from dust damage or nuisance shall be borne solely by the Contractor. The Contractor shall comply with all applicable Air Quality Act requirements.

2-1.16 **SANITATION.** The Contractor shall provide sanitary facilities for all persons working on the Work.

2-1.17 **NIGHT WORK AND NORMAL WORKING HOURS.** Normal working hours at the construction site shall be between the hours of 7:00 a.m. and 7:00 p.m. Monday through Friday. Legal holidays are excluded. Certain utility connections and street operations are anticipated to require night Work by the Contractor during low usage periods. The Contractor may also be required to prosecute the Work at night if, at any time, the Director shall deem it necessary for the progress of the Work, or if emergencies arise. The Contractor shall promptly comply with any such requirements made in writing by the Director. The Contractor will also be permitted to Work at night if Contractor satisfies the Director of the need therefor, in order to maintain the required progress or protect the Work from the elements. Certain activities are required to be performed at night for nominal progress of the Work and/or are specified to be performed at night by other portions of the Supplemental Conditions. When required, ordered, or permitted to Work at night, the Contractor shall provide sufficient and

satisfactory lighting and other facilities therefor. The Contractor shall receive no extra payment for night Work, if specified or if required to be performed during the normal progress of the Work, but compensation shall be considered as having been included in the price stipulated for the Work.

If Contractor performs work during weekends, holidays or any non-normal work hours, Contractor shall pay for required City Inspectors.

2-1.18 **LINES AND GRADES.** Unless otherwise provided in the Supplemental Conditions, the Contractor shall lay out all Work, including structures and pipelines, and shall be responsible for any errors resulting therefrom. In all questions arising as to proper location of lines and grades, the Director's decision will be final.

As part of the bid price for the construction of the improvements, the Contractor shall provide and be responsible for the layout of all Work on this project. The Contractor shall provide all necessary surveys, field staking, and positioning for the construction of all components at the proper alignment, elevations, grades, and positions, as indicated on the Contract Drawings and as required for the proper operation and function. The Contractor shall stake its Work area limits. Contractor shall perform all construction staking using a land surveyor licensed in the State of California. Contractor shall provide a staking plan prior to commencement of Work for the City's review and maintain monuments, stakes, and marks, and shall update the plan as necessary. Director, or Director's designated representative, may verify the field condition. Errors or inconsistencies in the Contract Documents discovered by the Contractor shall be reported to the Director within twenty-four (24) hours and prior to constructive forms or related improvements. Any work Installed with this requirement shall be subject to removal and replacement at the Contractor's expense.

The Contractor's lay-out shall be based on existing structures, property lines, survey control, and bench marks established by the City. All structures and pipeline connections shall be Installed based on actual elevation of existing structures to which connections are made.

The Contractor shall supply such labor as required, at no extra charge, to aid and assist the Director in checking location and grades of the Work as set by the Contractor if the Director desires to perform this checking. This shall include moving materials and equipment located between monuments and the construction Work.

2-1.19 **ARCHEOLOGICAL DISCOVERIES.** Upon discovery of prehistoric or historic artifacts, or other indicators or examples of cultural resources discovered during the course of site preparation, grading, excavation, construction or other development activities, all operations within fifty feet (50') of the find shall cease until such time as the City provides the services of a qualified archeologist to evaluate the finds and recommend appropriate action.

Prehistoric materials can include flaked stone tools (e.g., projectile points, knives and choppers) or tool making debris of obsidian, chert, quartzite and other materials, culturally darkened soil (i.e., midden, which often contains heat affected rock, ash and charcoal, shellfish remains, and cultural materials), and stone milling equipment such as mortars, pestles and hand stones. Historic material may include wood, stone, concrete or adobe footings, walls and other structural remains; debris filled wells or privies; and deposits of wood, metal, glass, ceramics and other refuse.

2-1.20 **PRESERVATION OF MONUMENTS.** Any monuments or bench marks disturbed by construction operations shall be repaired per the City's standard and promptly re-established by a registered land surveyor or civil engineer. A plat for each monument shall be furnished to the Director after the plat has been recorded with the Placer

County Recorder's Office at no additional cost to the City. The recorded plat shall serve as a record of the re-establishment of said existing survey points.

2-1.21 **CONFORMITY WITH CONTRACT DOCUMENTS.** Work and materials shall conform to the lines, grades, cross sections, dimensions and material requirements, including tolerances, required by the Contract Documents. Although measurement, sampling and testing may be considered evidence as to such conformity, the City shall be the sole judge as to whether the Work or materials deviate from the Contract Documents. At its option, the City may elect to accept deviations from the Contract Documents with appropriate backcharge Assessments against the Contractor, and, if such an election is made, the City will provide written notice to the Contractor of such acceptance.

2-1.22 **FINAL CLEANUP.** Prior to final Acceptance of the Work, the Contractor shall thoroughly clean the Premises, remove all temporary structures built by or for the Contractor, and remove all equipment and surplus construction material and debris from the area. The entire project, before Acceptance by the City, shall be left in a neat and clean condition. All Work areas and temporary construction areas shall be returned to essentially the same conditions existing before the commencing of project construction.

2-1.23 **AS-BUILT DOCUMENTS AND DRAWINGS.** The Contractor shall maintain one set of the full size prints furnished by the City and mark thereon in color any deviations from plan dimensions, elevations, or orientations. Also, the Contractor shall locate on said prints, all underground facilities, such as piping, conduits and tanks by accurate field measurement from structure walls, corners, etc. The Contractor shall submit the prints and an electronic CD (searchable PDF or source file format such as AutoCAD) in good condition to the Director upon completion of the job as a condition of Acceptance of the project. Marked prints

shall be updated at least once each week and shall be available to the Director for review as to currency prior to developing partial payment estimates. After the completion of testing, but prior to Acceptance, the Contractor shall submit As-Built electrical drawings in color and an electronic CD showing all components and their wiring, and as specified in the Supplemental Conditions.

2-1.24 **SUPERINTENDENCE.** The Contractor shall supervise and direct the Work, which shall be performed in accordance with the requirements of the Contract Documents. The Contractor shall be solely responsible for implementation of all construction means, methods, techniques, sequences, and procedures and for coordination of all portions of the Work under the Agreement. The Contractor shall be solely responsible for the safety of its employees, Subcontractors of any tier, Suppliers, visitors to the Contractor, and other third parties associated with the Contractor.

The Contractor shall designate in writing before starting Work, an authorized representative who shall have the authority to represent and act for the Contractor.

When the Contractor is comprised of two (2) or more persons, firms, partnerships, or corporations functioning on a joint venture basis, said Contractor shall designate in writing before starting Work, the name of one authorized representative who shall have the authority to represent and act for the Contractor. Instances of misconduct, contract non-compliance, unsatisfactory performance, or incompetence by these personnel shall be grounds for the City to direct Contractor to dismiss them from the Project. Contractor shall immediately comply with the City's request for dismissal, at no cost to the City, and shall designate a replacement, which shall be subject to approval by the City.

Said authorized representative shall be present at the site of the Work at all times while Work is actually in progress on the Contract. When Work is not in progress and during periods

when Work is suspended, arrangements acceptable to the Director shall be made for any Emergency Work that may be required.

Whenever the Contractor or its authorized representative is not present on any particular part of the Work where it may be desired to give direction, orders will be given by the Director, which shall be received and obeyed by the superintendent or foremen who may have charge of the particular Work in reference to which the orders are given.

Any order given by the Director, not otherwise required by the Supplemental Conditions to be in writing, will on request of the Contractor, be given or confirmed by the Director in writing.

2-1.25 **CHARACTER OF WORKER.** If any Subcontractor or person employed by the Contractor shall appear to the Director to be incompetent or to act in a disorderly or improper manner, he or she shall be removed immediately on the requisition of the Director, and such person shall not again be employed on the Work.

2-1.26 **INSPECTION.** The Contractor shall at all times permit the Director to inspect the Work or any part thereof. The Contractor shall maintain proper facilities and provide safe access for such inspection by the Director to all parts of the Work, and to the shops where the Work is in preparation. Work shall not be covered up until authorized by the Director and the Contractor shall be solely responsible for notifying the Director where and when such Work is in readiness for inspection and testing. Should any such Work be covered without authorization, it shall, if so ordered, be uncovered at the Contractor's expense.

Unless otherwise designated as normal working hours, whenever the Contractor intends to perform Work on Saturday, Sunday, or a Legal Holiday, the Contractor shall give notice to the Director of such intention forty-eight (48) hours prior to performing such Work, or such longer

period as may be specified so that the Director may make necessary arrangements.

The observation and/or approval of the workmanship or materials by the City shall not relieve the Contractor of any obligations to fulfill the requirements of the Contract Documents. Workmanship and materials not meeting such requirements shall be corrected and unsuitable Work or material may be rejected, notwithstanding that such Work or materials have been previously observed and/or approved by the City, or payment therefor has been included in a progress estimate.

The City may order re-examination of questioned Work at any time before final Acceptance. If so ordered, the Contractor shall uncover the Work. If such work is found to be in accordance with the Contract Documents, the City will pay for the cost of uncovering, removing, recovering and replacing the parts removed; but if such Work so exposed or examined is not in accordance with the Contract Documents, the uncovering, removal, recovering and replacement shall be at the Contractor's expense. Work that has been covered prior to observation by the City does not qualify as re-examined work; the City may order such work uncovered for observation without payment of any costs.

2-1.27 **REMOVAL OF REJECTED AND UNAUTHORIZED WORK.** All Work which has been rejected shall be remedied, or removed and replaced by the Contractor in a manner acceptable to the Director and no compensation will be allowed the Contractor for such removal, replacement, or remedial Work.

Any Work done beyond the lines shown on the Contract Drawings or established by the Director, or any Work done without written authority will be considered as unauthorized Work and will not be paid for. Upon order of the Director, unauthorized Work shall be remedied, removed, or replaced at the Contractor's expense.

Upon failure of the Contractor to comply promptly with any order of the Director made under this section, the Director may cause rejected or unauthorized Work to be remedied, removed, or replaced, and the costs thereof will be deducted from any moneys due or to become due the Contractor.

SECTION 3

CHANGES IN THE WORK

3-1.01 **CHANGES.** The Director, without invalidating this Agreement and without notice to Contractor's surety, may order changes in the Work, consisting of additions or deletions, or other revisions. The Contract Price and the Contract Time shall be adjusted accordingly. All such changes in the Work, including in the Contract Price and the Contract Time, shall be authorized only by Contract Change Order, signed by the Director.

If Contractor claims that performance of any work entitles it to additional compensation or to an extension of time for performance of the Work, Contractor shall provide written notice to the City of any such claim prior to undertaking such work. Contractor shall provide written notice of any anticipated impacts to the Contract Price or Contract Time within three (3) Days of discovering such impact, by submitting a Notice of Potential Claim described in Section 7-1.03 below, or notice of delay as described in Section 6-1.09 below. If the Director refuses to issue a Change Order for such work, Contractor shall perform that work if directed or obligated to do so and shall submit a complete and specific Claim for additional compensation and/or extension of time for performance within fifteen (15) Days after such work is performed, as described in Section 7-1.03 below. Failure to provide written notice of claims prior to undertaking such work, failure to provide a timely Notice of Potential Claim, or failure to submit timely a complete and specific Claim for additional compensation and/or extension of the time for performance, shall be deemed a waiver and abandonment of any such Claim. No Claim, dispute or controversy shall interfere with the progress or performance of the Work and the Contractor shall proceed with the Work as directed by the Director. Failure to so proceed shall amount to a

default under this Agreement.

3-1.02 **PROPOSED CHANGE ORDERS.** The Contractor will be notified in writing of a proposed Change Order describing the intended change. Within fifteen (15) Days after receipt of a written request, the Contractor shall submit its proposed price to be added or deducted from the Contract Price due to the change and its estimate of the extent of the adjustment in the Contract Time, if any. The Contractor's proposed price to be added to or deducted from the Contract Price shall be supported by a detailed estimate of cost prepared by the Contractor, vendor or Supplier. The Contractor's proposed price submittal shall be accompanied by a statement of the time necessary for the changed Work, together with a description of how this time will be incorporated into the current Construction Schedule. The Contractor shall upon request by the Director permit inspection of its original Contract estimate, subcontract agreements or purchase orders relating to the change.

If agreement is reached on the adjustment in compensation as provided in Section 3-1.05, "Contract Price Adjustment," of these General Conditions, the Contractor shall proceed with the Work as changed at the agreed price.

If the Contractor and the Director fail to agree as to the adjustment in compensation for the performance of the changed Work, the Contractor, upon written order from the Director, shall proceed immediately with the changed Work and the Contract Price shall be adjusted in accordance with Section 3-1.06, "Force Account Payment," of these General Conditions.

If the Contractor fails to submit its cost estimate within such fifteen (15) Day period, the Contractor shall commence the Work as changed immediately upon receipt of written order of the Director, and the Contract Price will be adjusted in accordance with the Director's cost estimate for the changed Work.

3-1.03

EMERGENCY AND INDETERMINATE TYPE CHANGE

ORDERS. Changes in the Work made necessary by an Emergency, as determined by the Director, or changes of a kind where the extent of the Work cannot be determined until completed, may be authorized by the Director in writing. The Change Order shall state that it is issued pursuant to this Section 3-1.03. Upon receipt of an authorized Change Order or other written order of the Director, the Contractor shall proceed with the ordered Work and the Director will maintain a daily job record containing a detailed summary of all labor, materials and equipment required for the changed Work.

Within fifteen (15) Days after receiving a written request, the Contractor shall submit a detailed estimate of cost for the change and any requested change in Contract Time in the same manner as required for proposed Change Orders in Section 3-1.02 of these General Conditions.

3-1.04

EXECUTED CHANGE ORDER.

A Contract Change Order signed by both the Director and the Contractor is an “executed Contract Change Order.” By signing the Contract Change Order, the Contractor agrees that the specified compensation constitutes full compensation for the changed Work, including payment for interruption, disruption, acceleration, extended Overhead, delay or any other “impact” claim or “ripple effect” claim. The Contractor specifically understands and agrees that its execution of the Contract Change Order shall constitute a waiver of any right for the Contractor to claim any additional compensation with respect to the subject matter of the Contract Change Order.

3-1.05

CONTRACT PRICE ADJUSTMENT.

If a Contract Change Order provides for an adjustment to the Contract Price, the amount of such adjustment shall be determined by one of the following methods, or a combination thereof, as determined by the City and in its sole discretion:

A. Lump sum. The Contractor and the City may agree on a lump sum amount for the Change Order. At the City's request, the Contractor will provide pricing for the work. Maximum markups for Contract Change Orders paid for using lump sum pricing shall be paid for in the same manner and in the same amounts as markups for Force Account work, as described in Section 3-1.06 below.

B. Unit Prices. The unit prices set forth in the Contractor's Schedule of Bid Prices will be utilized where they are applicable and acceptable to the City. The Contractor's unit prices shall remain firm and shall not be subject to adjustment unless and until the actual quantity of work is increased or decreased by Contract Change Order in an amount greater than twenty-five percent (25%) from the estimated quantity indicated for such item. No markups will be given for Contract Change Orders paid for using unit prices.

Unit prices for new items included in the Contract Change Order but not included in the original bid shall be as mutually agreed upon or, in the absence of agreement, as determined by the City in the same manner as if the work were to be paid for on a Force Account basis, as described in Section 3-1.06 below.

C. Force Account. Where the City and the Contractor are unable to agree on lump sum pricing and if the City does not elect to utilize the unit prices in Contractor's bid, or such unit prices are not applicable, the changed work will be performed and tracked by the Contractor as Force Account work, as described in Section 3-1.06 below. The City will pay for such work, including markups, properly attributable to the change in accordance with those Force Account provisions.

D. Eliminated Items. The City reserves the right to delete any bid item of Work in its entirety. The City makes no representation that any work under a bid item of Work

will be performed, and all work may be subject to a Contract Change Order that deletes such work. Bid items are distinct and severable from the other bid items, and the Contractor shall not be entitled to any anticipated profit, unabsorbed Overhead, or other indirect expense attributable to the deleted item, except as provided immediately below with regard to Force Account mark-ups on the direct and verifiable costs incurred prior to the City's order that deletes the work.

Should any bid item of Work be eliminated in its entirety and not accounted for as described immediately above and, in the absence of an executed Contract Change Order covering such elimination, payment will be made to the Contractor for actual direct and verifiable costs incurred in connection with such eliminated bid item if incurred prior to the date of notification in writing by the City of such elimination. If acceptable material is ordered by the Contractor for the eliminated item prior to the date of notification of such elimination by the City, and if orders for such material cannot be canceled, it will be paid for at the actual direct and verifiable cost to the Contractor. Actual direct costs shall include documented vendor shipping fees, Supplier restocking fees, if applicable, and Contractor handling costs directly related to the eliminated item(s). In such case, the material paid for shall become the property of the City and the actual cost of any further handling will be paid for by the City. If the material is returnable to the vendor and if the City so directs, the material shall be returned and the Contractor will be paid for the actual direct cost of charges made by the vendor for returning the material. The actual direct cost of handling returned materials will also be paid for by the City. The actual direct and verifiable costs to be paid by the City as provided herein will be computed in the same manner as if the work were to be paid for on a Force Account basis, including the application of Force Account mark-ups to said costs.

3-1.06 **FORCE ACCOUNT PAYMENT.** When Work performed pursuant to a

Change Order is to be paid for on a Force Account basis, the Contractor's labor, materials and equipment used in the performance of such Work shall be subject to the approval of the City, and the compensation will be determined as set forth below in this section.

3-1.06A **LABOR.** The Contractor will be paid an amount based on the actual cost for the workers (including foremen when authorized by the Director) used in the actual and direct performance of the Work. All labor costs associated with Overhead, whether field or home office, are specifically excluded herein, as those labor costs are covered by the below mark-ups. The cost of labor, whether the employer is the Contractor, Subcontractor or other forces, shall include employer payments; assessment of benefits required by lawful labor union collective bargaining agreements; compensation insurance payments; contributions made to the State pursuant to the Unemployment Insurance Code; and for taxes paid to the Federal Government pursuant to the Social Security Act of August 14, 1935, as amended. No labor cost will be recognized at a rate in excess of the wages prevailing in the locality at the time the Work is performed, nor will the use of a labor classification, which would increase the cost, be permitted unless the Contractor establishes to the complete satisfaction of the Director the necessity for payment at a higher rate.

3-1.06B **MATERIALS.** Only materials furnished by the Contractor and necessarily used in the performance of the Work will be paid for. Such cost of materials may include the costs of procurement, transportation and delivery if necessarily incurred. If a cash or trade discount by the actual supplier is available to the Contractor, it shall be credited to the City. If materials are procured by the purchaser by any method which is not a direct purchase from and a direct billing by the actual supplier to such purchaser, the cost of such materials shall be deemed to be the price paid to the actual supplier plus the actual costs, if any, incurred in the

handling of such materials. If the materials are obtained from a supply or source owned wholly or in part by the purchaser, the cost of such materials shall not exceed the price paid by the purchaser for similar materials furnished from said source on Bid items or the current wholesale price for such materials delivered to the job site, less any discounts as provided herein, whichever is lower. If, in the opinion of the Director, the cost of materials is excessive, or if the Contractor fails to furnish satisfactory evidence of the cost to it from the actual supplier within sixty (60) Days after the date of delivery of the materials or within fifteen (15) Days after Acceptance of the Agreement, whichever occurs first, the cost of the materials shall be deemed to be the lowest current wholesale price at which similar materials are available in the quantities required, less any discounts provided herein. The Department reserves the right to furnish such materials required by the Change Order as it deems advisable, and the Contractor shall have no claim for cost or markups on material furnished by the Department.

3-1.06C **EQUIPMENT.** The Contractor will be paid an amount based on the actual cost for the use of equipment directly required and approved by the Director in the performance of the changed Work. No payment will be made for time while equipment is inoperative due to breakdowns or on Days when no Work is performed. In addition, the rental time shall include the time required to move the equipment to the Work from the nearest available source of such equipment, and to return it to the source. If such equipment is not moved by its own power, then loading and transportation costs will be paid. Moving time, loading and transportation costs will only be paid if the equipment is used exclusively on the changed Work during the time between move in and move out. Individual pieces of equipment having a replacement value of One Thousand Dollars (\$1000) or less shall be considered to be tools or small equipment, and no payment will be made therefore. For equipment owned,

furnished, or rented by the Contractor, no cost therefore shall be recognized in excess of the equipment rental rates published by Caltrans at the following website address:

<http://www.dot.ca.gov/hq/construc/equipmnt.html>. Equipment located at a Work Site and utilized on non-Force Account work shall not be eligible for standby payment, and shall be charged on a Force Account basis only when solely performing pre-approved Force Account work tasks.

3-1.06D **MARKUPS.** When a Change Order increases the cost of the Work, the Contractor may add the following maximum markups to its actual costs of labor, materials, or equipment rental:

15 percent for labor;

10 percent for materials; and

5 percent for equipment rental.

The above markups include full compensation, covering the costs of all supervision, bonds, profit, Overhead, and other general expenses not specifically designated as a direct cost in Sections 3-1.06A through 3-1.06C above. The total payment (i.e., direct cost plus applicable markups) shall be deemed to be the actual cost of such work and shall constitute full compensation therefor. The Contractor specifically understands and agrees that such payment shall include any Contractor costs for interruption, disruption, and acceleration, extended Overhead, Change Order management, delay or other “impact” claim or “ripple effect” claim.

When work paid for on a Force Account basis is performed by forces other than the Contractor’s own forces, the maximum allowable mark-ups for the Subcontractors’ costs shall be fifteen percent (15%) for the cost of labor, ten percent (10%) for the cost of materials, and five percent (5%) for the cost of rented equipment. In these situations where the work is being performed by Subcontractors, the Contractor will only be entitled to an additional five percent

(5%) mark-up and will not be entitled to receive the additional mark-ups specified in this section.

When a Change Order decreases the cost of the Work, the reduction in cost shall include a five percent (5%) markup on the estimated cost for furnishing the labor, materials and equipment, which would have been used on such Work, had the Change Order not been issued.

When a Change Order involves both added Work and deleted Work, the markup or markups to be used shall be as follows:

The actual costs of labor, materials, and equipment rental for added and deleted Work shall be calculated separately without adding markups. If the difference between the calculated costs for labor results in an increased cost, a markup of fifteen percent (15%) shall be applied to the increased cost. If the difference between the calculated costs of materials or equipment rental results in an increased cost, a markup of ten percent (10%) and five percent (5%) respectively, shall be applied to the increased costs of materials or equipment rental, as the case may be. If the difference between the calculated costs for labor, materials or equipment rental results in a decreased cost, a markup of five percent (5%) shall be applied to the decreased costs of labor, materials or equipment rental, as the case may be.

Contractor shall not add mark-ups on work performed and billed by City staff nor add mark-ups to successive iterations of proposed Change Order cost proposals returned to Contractor by the City due to incomplete or inaccurate information being originally submitted by the Contractor. If the Contract Price increases by the issuance of Change Orders, the penal amounts of the bonds required shall increase accordingly.

3-1.06E **RECORDS.** The Contractor shall maintain its records in such a manner as to provide a clear distinction between the direct costs of extra work paid for on a Force Account basis and the costs of other operations.

From the above records, the Contractor shall furnish the City completed daily extra work reports, on forms acceptable to the City, for each Day's extra work to be paid for on a Force Account basis. The daily extra work reports shall itemize the materials used, and shall cover the direct cost of labor and the charges for equipment rental, whether furnished by the Contractor, Subcontractor, or other forces. The daily extra work reports shall provide names and identifications and classifications of workers, the hourly rate of pay and hours worked, and also the size, type, and identification number of equipment, and hours operated. Daily extra work and Force Account reports (actual or claimed) shall be signed by both the City's and the Contractor's representatives within twenty-four (24) hours of the performance of the work.

Valid copies of vendor's invoices shall substantiate material charges. Such invoices shall be submitted with the daily extra work reports, or if not available, they shall be submitted with subsequent daily extra work reports. Should said vendor's invoices not be submitted within sixty (60) Days after the date of delivery of the material or within fifteen (15) Days after the Acceptance of the Agreement, whichever occurs first, the City reserves the right to establish the cost of such materials at the lowest current wholesale prices at which said materials were available in the quantities, less any discounts.

The City will compare its records with the completed daily extra work reports furnished by the Contractor and make any necessary adjustments. When these daily extra work reports are agreed upon and signed by both parties, said reports shall become the basis of payment for the work performed, but shall not preclude subsequent adjustment based on a later audit by the City.

The Contractor's cost records pertaining to Work paid for on a Force Account basis shall be open to inspection or audit by representatives of the City during the life of the Agreement and for a period of not less than three (3) years after the date of Agreement completion and the

Contractor shall retain such records for that period. Where payment for materials or labor is based on the cost thereof to forces other than the Contractor, the Contractor shall make every reasonable effort to insure that the cost records of such other forces will be open to inspection and audit by representatives of the City on the same terms and conditions as the cost records of the Contractor. If an audit is to be commenced more than sixty (60) Days after the date of Acceptance of the Agreement, the Contractor will be given fifteen (15) Days' notice of the time when such audit is to begin.

3-1.07 **COST REDUCTION PROPOSALS.** The City encourages the Contractor to submit Cost Reduction Proposals whenever the Contractor identifies areas and/or instances in which there can be savings to the Work. Contractor may submit to the City, in writing, proposals for modifying the plans, Specifications or other requirements of the Agreement for the sole purpose of reducing the total cost of construction, including the time for completion of the Work. The City may consider such Cost Reduction Proposals and, if accepted, the Agreement will be equitably adjusted. The City has no obligation to consider or accept Cost Reduction Proposals.

SECTION 4

CONTROL OF MATERIALS

4-1.01 **MATERIALS.** The Contractor shall furnish all materials required to complete the Work, except materials that are designated in the Supplemental Conditions to be furnished by the City and materials furnished by the City in accordance with Section 3, “Changes in the Work,” of these General Conditions.

Unless otherwise specified in the Supplemental Conditions, materials furnished by the Contractor for incorporation into the Work shall be new. When the quality or kind of materials, articles, or equipment is not particularly indicated, then the quality or kind thereof shall be similar to those that are indicated.

Articles or materials to be incorporated in the Work shall be stored in such a manner as to insure the preservation of their quality and fitness for the Work, and to facilitate inspection.

All materials which do not conform to the requirements of the Contract Documents as determined by the Director, will be rejected whether in place or not. Rejected material shall be removed immediately from the site of the Work, unless otherwise permitted by the Director. No rejected material, the defects of which have been subsequently corrected, shall be used in the Work, unless approval in writing has been given by the Director. Upon failure of the Contractor to comply promptly with any order of the Director made under these provisions, the Director shall have the authority to cause the removal and replacement of rejected material and to deduct the cost thereof from any moneys due or to become due the Contractor.

Manufacturer's warranties, guaranties, instruction sheets and parts lists, which are furnished with certain materials incorporated in the Work, shall be delivered to the Director

before Acceptance of the Contract.

Unless otherwise designated in the Supplemental Conditions or Specifications, materials furnished by the City will be delivered to the job site. Materials furnished by the City that are designated in the Supplemental Conditions as available at locations other than the job site shall be hauled to the site of the Work by the Contractor at its expense, including any necessary loading and unloading that may be involved.

The Contractor will be held responsible for all materials furnished to it, and shall pay all demurrage and storage charges. City-furnished materials lost or damaged from any cause whatsoever shall be replaced by the Contractor. The Contractor will be liable to the Department for the cost of replacing City-furnished material and such costs may be deducted from any moneys due or to become due the Contractor.

4-1.02 **PRODUCT AND REFERENCE STANDARDS.** When descriptive catalog designations, including manufacturer's name, product brand name, or model number are referred to in the Contract Documents, such designations shall be considered as being those found in industry publications in effect on the day the Notice to Contractors for the Work is dated, except as may be otherwise stated.

When standards or test designations of the Federal Government, trade societies, or trade associations are referred to in the Contract Documents by specific date of issue, these shall be considered as part of the Contract. When such references do not bear a date of issue, the edition in effect on the day the Notice to Contractors for the Work is dated shall be considered as part of the Contract.

4-1.03 **SAMPLING AND TESTING OF MATERIALS.** Unless otherwise specified, all tests shall be performed in accordance with the methods used by the State

Department of Transportation (Caltrans) and shall be made by the Director or his or her designated representative.

The State Department of Transportation has developed test methods for testing the quality of materials and Work. These test methods are identified by a California Test followed by the serial number. Copies of individual tests are available at the State Department of Transportation Laboratory, Sacramento, California, and will be furnished to interested persons upon request.

Whenever a reference is made in the Supplemental Conditions to a California Test by number, it shall mean the California test in effect on the day the Notice to Contractors for the Work is dated.

Whenever the Supplemental Conditions provide an option between two (2) or more test methods, the Director will determine the test method to be used.

Whenever a Supplemental Condition, manual, or test designation provides for test reports (such as certified mill test reports) from the manufacturer, copies of such reports, identified as to the lot of material, shall be furnished to the Director. The manufacturer's test reports shall supplement the inspection, sampling and testing provisions of this Section 4-1.03 and shall not constitute a waiver of the City's right to inspect. When material which cannot be identified with specific test reports is proposed for use, the Director may at his or her discretion, select random samples from the lot for testing. Testing specimens from the random samples, including those required for retest, shall be prepared in accordance with the referenced Supplemental Conditions and furnished by the Contractor at its expense. The number of such samples and test specimens shall be entirely at the discretion of the Director.

When requested by the Director, the Contractor shall furnish, without charge, samples of

all material entering into the Work, and no material shall be used prior to approval by the Director, except as provided in Section 4-1.04, "Certificates of Compliance," of these General Conditions.

A. Inspection and Access for Testing. The Contractor shall provide safe access for the Director and his or her inspectors to adequately inspect the quality of Work and conformance with the General and Supplemental Conditions. The Contractor shall provide adequate lighting, ventilation, ladders and other protective facilities as may be necessary for the safe performance of inspections.

The Contractor shall submit samples or specimens of such materials to be furnished or used in the Work as the Director may require. The Contractor shall furnish the Director all necessary labor and facilities for such things as excavation in the compacted fill to depths required to take samples.

Inspections, tests, or favorable review by the Director or others shall not relieve the Contractor from its obligations to perform the Work in accordance with the requirements of the Contract Documents.

Work covered without the favorable review or consent of the Director shall, if required by the Director, be uncovered for examination at the Contractor's expense.

If the Engineer, Architect, or Director considers it necessary or advisable that covered Work be inspected or tested by others, the Contractor, at the Director's request, will uncover, expose or otherwise make available for observation, inspection or testing as the Director may require, that portion of the Work in question, furnishing all necessary labor, materials, tools, and equipment. If it is found that such Work is defective, the Contractor will bear all the expenses of such uncovering, exposure, observation, inspection and testing and of

satisfactory reconstruction. If, however, such Work is not found to be defective and the Work was not covered without favorable review of the Director, the Contractor will be allowed an increase in the Contract Price or an extension of the Contract Time, or both, to cover its costs directly attributable to such uncovering, exposure, observation, inspection, testing, and reconstruction and an appropriate Change Order shall be issued.

Whenever the Contractor varies the period during which Work is carried on each Day, the Contractor shall give due notice to the Director so that proper inspection may be provided. Any Work done in the absence of the Director may be subject to rejection. Proper facilities for safe access for inspection to all parts of the Work shall at all times be maintained for the necessary use of the Director and other agents of the City. Authorized representatives and agents of the Director shall be permitted access to inspect all Work and materials wherever it is required for preparation of progress reports, and the Contractor shall provide proper facilities for such access and inspection.

It is the Contractor's responsibility to supervise the Work and complete the project in accordance with the Contract Documents. In the course of managing that effort, the Contractor shall generate its own punch lists as deemed necessary. The Director may prepare punch lists for the Director's own use in communicating with the Contractor; however, the Director shall be under no obligation to prepare punch lists for the Contractor. In general, the Director will prepare punch lists only after the Contractor has given the Director written notice that the subject Work is completed and tested in accordance with the Contract Documents and is ready for operation and/or use and/or occupancy. Failure of the Director to include an item in a punch list shall not relieve the Contractor of its duty to satisfactorily complete all Work required by the Contract Documents.

Upon Final Completion of the construction Work and request by the Contractor, the Director will conduct a final inspection as a basis for recommending to the City that the Work be accepted.

B. Field and Materials Testing. Where the Supplemental Conditions require Work to be specially field tested or approved, it shall be tested only in the presence of the Director after timely notice of its readiness for inspection and test, and the Work after testing shall be covered up only upon the consent thereto of the Director.

The results of any tests made are for the information of the Director. Regardless of any test results, the Contractor is solely responsible for the quality of workmanship and materials and for compliance with the requirements of the Contract Drawings and Supplemental Conditions.

Except as specifically required under the Supplemental Conditions, all tests by the Director of materials furnished by the Contractor will be done in accordance with commonly recognized standards of national organizations. The Contractor shall furnish such samples of all materials as required by the Director without charge. No material shall be used unless it has been favorably reviewed by the Director.

Where such inspection and testing are to be conducted by an independent Laboratory or agency, the sample or samples of materials to be tested shall be selected by such Laboratory or agency, or the Director, and not by the Contractor.

C. Costs of Testing.

1. Initial Services: The City shall furnish and pay for all initial testing services required by the Contract Documents. When initial tests indicate non-compliance with the Contract Documents, the cost of initial tests associated with that non-compliance will be

deducted by the City from the balance owed the Contractor. The Contractor shall furnish samples of materials for testing as may be required by the Director. Such samples shall be furnished without cost to the City.

2. Retesting: When initial tests indicate non-compliance with the Contract Documents, all subsequent retesting occasioned by the non-compliance shall be performed by the same testing Laboratory and the cost thereof will be deducted by the City from the balance owed the Contractor. Contractor shall be billed for each additional test.

3. Contractor Convenience Testing: Inspection or testing performed exclusively for the Contractor's convenience shall be the sole responsibility of the Contractor.

4. Additional Tests and Inspections: When in the opinion of the Director additional tests or inspections are required because of the manner in which the Contractor executes its Work, such tests and inspections shall be paid for by the City, but will be deducted from the Contract Price. Examples of such tests and inspections are tests of materials substituted for previously accepted materials or substituted for specified materials, retests made necessary by failure of material to comply with the requirements of the Specifications, load tests made necessary because of portions of the structure not fully meeting Specifications or plan requirements, etc.

4-1.04 **CERTIFICATES OF COMPLIANCE.** A Certificate of Compliance shall be furnished prior to the use of any materials for which the Supplemental Conditions require that such a Certificate be furnished. In addition, the Director may permit the use of certain materials or assemblies prior to sampling and testing if accompanied by a Certificate of Compliance. The Certificate shall be signed by the manufacturer of the material or the manufacturer of assembled materials and shall state that the materials involved comply in all

respects with the requirements of the Supplemental Conditions. A Certificate of Compliance shall be furnished with each lot of such materials delivered to the Work and the lot so certified shall be clearly identified in the Certificate.

All materials used on the basis of a Certificate of Compliance may be sampled and tested at any time. The fact that material is used on the basis of a Certificate of Compliance shall not relieve the Contractor of responsibility for incorporating material in the Work which conforms to the requirements of the Contract Documents and any such material not conforming to such requirements will be subject to rejection whether in place or not.

The Department reserves the right to refuse to permit the use of material on the basis of a Certificate of Compliance.

The form of the Certificate of Compliance and its disposition shall be as directed by the Director.

SECTION 5

LEGAL RELATIONS AND RESPONSIBILITY

5-1.01 **LAWS TO BE OBSERVED.** The Contractor shall keep informed of and observe, and comply with and cause all of its agents and employees to observe and comply with, all prevailing Federal and State laws, and rules and regulations made pursuant to said Federal and State laws, and county and municipal ordinances, and regulations, which in any way affect the conduct of the Contract. If any conflict arises between provisions of the Contract and any such law above referred to, the Contractor shall notify the Director at once in writing. To the fullest extent allowed by law, the Contractor shall defend, indemnify, and save and hold harmless the City or any of its officers, agents, employees, and volunteers against any claim or liability arising from or based on the violation of any such law, rule, or regulation, whether by itself or its agents or employees.

5-1.02 **HOURS OF LABOR.** Eight (8) hours labor constitutes a legal Day's work. The Contractor or Subcontractor shall, as a penalty to City, forfeit Twenty-five Dollars (\$25) for each worker employed in the execution of the contract by the respective Contractor or Subcontractor for each calendar day during which such worker is required or permitted to work more than eight (8) hours in any one (1) calendar day and forty (40) hours in any one (1) calendar week in violation of the provisions of the Labor Code, and in particular, Section 1810 to Section 1815, thereof, inclusive, except that Work performed by employees of Contractors in excess of eight (8) hours per day, and forty (40) hours during any one (1) week, shall be permitted upon public work upon compensation for all hours worked in excess of eight (8) hours per day at not less than one and one-half (1-1/2) times the basic rate of pay, as provided in said

Section 1815. In addition, Contractor and/or its Subcontractors may be required to pay double the basic rate of pay for all hours worked in excess of twelve (12) hours in any workday and under other circumstances. (See California Code of Regulations, Title 8, Sections 16100(c)(6) and (16200(a)(3)(F) and applicable Department of Industrial Relations prevailing wage determinations.)

5-1.03 **NONDISCRIMINATION.**

A. Attention is directed to Labor Code Section 1735, which reads as follows:

“A contractor shall not discriminate in the employment of persons upon public works on any basis listed in subdivision (a) of Section 12940 of the Government Code, as those bases are defined in Sections 12926 and 12926.1 of the Government Code, except as otherwise provided in Section 12940 of the Government Code. Every Contractor for public works who violates this section is subject to all the penalties imposed for a violation of this chapter.”

B. During the performance of this Contract, Contractor and its Subcontractors shall not unlawfully discriminate against any employee or applicant for employment because of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, genetic information, marital status, sex, gender, gender identity, gender expression, age, sexual orientation, or military and veteran status. The Contractor and Subcontractors shall insure that the evaluation and treatment of their employees and applicants for employment are free of such discrimination. The Contractor and Subcontractors shall comply with the provisions of the California Fair Employment and Housing Act (Government Code §12900, et seq.) and the applicable regulations promulgated thereunder (California Code of Regulations, Title 2, §7285.0 et seq.) and other applicable State and Federal regulations and City

policies pertaining to nondiscrimination and affirmative action which are incorporated into this Agreement by reference and made a part hereof as if set forth in full. The Contractor and its Subcontractors shall give written notice of their obligations under this clause to labor organizations with which they have a collective bargaining or other agreement.

C. Contractor shall include the nondiscrimination and compliance provisions of this clause in all subcontracts to perform Work under the agreement.

5-1.04 **PREVAILING WAGE.** The Contractor and any Subcontractor shall comply with Labor Code Sections 1770 et seq. In accordance with said Section 1775 the Contractor and any Subcontractor under the Contractor shall, as a penalty, forfeit to the state or City not more than \$200 for each calendar day or portion thereof, for each worker paid less than the prevailing rate as determined by the Director of Industrial Relations for the work or craft in which such worker is employed for under the Contract by the Contractor or by any Subcontractor under the Contractor.

The amount of the penalty shall be determined by the Labor Commissioner based on consideration of both of the following: (a) whether the failure to pay the correct rate of per diem wages was a good-faith mistake and, if so, whether the error was promptly and voluntarily corrected when brought to the attention of the Contractor or Subcontractor; and (b) whether the Contractor or Subcontractor has a prior record of failing to meet its prevailing wage obligations.

The penalty may not be less than forty dollars (\$40) for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rate, unless the failure of the Contractor or Subcontractor to pay the correct rate of per diem wages was a good faith mistake and, if so, the error was promptly and voluntarily corrected when brought to the attention of the Contractor or Subcontractor.

The penalty may not be less than eighty dollars (\$80) for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rate, if the Contractor or Subcontractor has been assessed penalties within the previous three (3) years for failing to meet its prevailing wage obligations on a separate contract, unless those penalties were subsequently withdrawn or overturned.

The penalty may not be less than one hundred twenty dollars (\$120) for each calendar day, or portion thereof, for each worker paid less than the prevailing wage rate, if the Labor Commissioner determines that the violation was willful, as defined in subdivision (c) of Section 1777.1 of the Labor Code.

If the amount due under this section is collected from the Contractor or Subcontractor, any outstanding wage claim under Chapter 1 (commencing with Section 1720) of Part 7 of Division 2 of the Labor Code against the Contractor or Subcontractor shall be satisfied before applying that amount to the penalty imposed on that Contractor or Subcontractor pursuant to this section.

The determination of the Labor Commissioner as to the amount of the penalty shall be reviewable only for an abuse of discretion.

In addition to said penalty, the difference between such stipulated prevailing wage rates and the amount paid to each worker for each calendar day or portion thereof for which each worker was paid less than the stipulated prevailing wage shall be paid to each worker by the Contractor or Subcontractor.

If a worker employed by a Subcontractor on a public works project is not paid the general prevailing per diem wages by the Subcontractor, the Contractor is not liable for any penalties described above unless the Contractor had knowledge of that failure of the Subcontractor to pay

the specified prevailing rate of wages to those workers or unless the Contractor fails to comply with all of the following requirements:

1. The contract executed between the Contractor and the Subcontractor for the performance of work on the public works project shall include a copy of the provisions of Sections 1771, 1776, 177.5, 1813, and 1815 of the Labor Code.
2. The Contractor shall monitor the payment of the specified general prevailing rate of per diem wages by the Subcontractor to the employees, by periodic review of the certified payroll records of the Subcontractor.
3. Upon become aware of the Subcontractor's failure to pay its workers the specified prevailing rate of wages, the Contractor shall diligently take corrective action to halt or rectify the failure, including, but not limited to, retaining sufficient funds due the Subcontractor for work performed on the public works project.
4. Prior to making final payment to the Subcontractor for work performed on the public works project, the Contractor shall obtain an affidavit signed under penalty of perjury from the Subcontractor that the Subcontractor has paid the specified general prevailing rate of per diem wages to its employees on the public works project and any amount due pursuant to 1813 of the Labor Code.

Pursuant to Section 1775 of the Labor Code, the Division of Labor Standards Enforcement shall notify the Contractor on a public works project within fifteen (15) Days of the receipt by the Division of Labor Standards Enforcement of a complaint of the failure of a Subcontractor on that public works project to pay workers the general prevailing rate per diem wages.

Pursuant to the provisions of California Labor Code Section 1773, the City has obtained

the general prevailing rate of wages applicable to the categories of workers the City anticipates will be utilized for this project for straight time, overtime, Saturday, Sunday, and holiday Work. The holiday wage rate listed shall be applicable to all holidays recognized in the collective bargaining agreement of the particular craft, classification or type of worker concerned or, if no collective bargaining applies, those holidays identified in Government Code Section 6700. These wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: <http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm>, which is incorporated herein as a part of this Contract.

Pursuant to Labor Code Section 1773.2, the general prevailing wage rates set forth above, which forms a part of this Contract, shall be posted by the Contractor at a prominent place at the site of the Work.

Pursuant to Labor Code Section 1773.6 and California Code of Regulations Section 16204, Title 8, changes in general prevailing wage determinations shall apply to the project only if issued by the Director of Industrial Relations prior to the City's bid issuance date.

The City will not recognize any claim for additional compensation because of the payment by the Contractor of any wage rate in excess of the prevailing wage rate set forth in the Contract. The possibility of wage increases is one of the elements to be considered by the Contractor in determining its Bid, and will not under any circumstances be considered as the basis of a claim against the City or Contract.

When both California and Federal prevailing wage rates apply, the Contractor and any Subcontractors shall pay their workers the higher of the two rates. The Contractor and any Subcontractors shall insert this clause in any lower tier contract.

5-1.05 **REGISTRATION REQUIRED AS QUALIFICATION TO BID.**

Pursuant to Labor Code Section 1771.1(b), notice is hereby given that a Contractor or Subcontractor shall not be qualified to bid on, be listed in a bid proposal, subject to the requirements of Section 4104 of the Public Contract Code, or engage in the performance of any contractor for public work, as defined in Labor Code Sections 1720, et seq., unless currently registered and qualified to perform public work pursuant to Labor Code Section 1725.5. It is not a violation of Labor Code Section 1771.1 for an unregistered contractor to submit a bid that is authorized by Section 7029.1 of the Business and Professions Code or by Section 10164 or 20103.5 of the Public Contract Code, provided the contractor is registered to perform public work pursuant to Section 1725.5.

5-1.06 **PAYROLL RECORDS.** The Contractor's attention is directed to the following provisions of Labor Code Section 1776. The Contractor shall be responsible for the compliance with these provisions by its Subcontractors.

A. The Contractor and each Subcontractor shall keep accurate and current payroll records, showing the name, address, social security number, work classification, straight time and overtime hours worked each day and week, and the actual per diem wages paid to each journeyman, apprentice, worker, or other employee employed by it in connection with the public work. Each payroll record shall contain or be verified by a written declaration that is made under penalty of perjury, stating both of the following:

1. The information contained in the payroll record is true and correct.
2. The employer has complied with the requirements of Section 1771, 1811, and 1815 for any work performed by his or her employees on the public works project.

B. The payroll records enumerated under subdivision (A) shall be available for inspection at all reasonable hours at the principal office of the Contractor on the following

basis:

1. A certified copy of an employee's payroll record shall be made available for inspection or furnished to such employee or his or her authorized representative on request.

2. A certified copy of all payroll records enumerated in subdivision (A) shall be made available for inspection or furnished upon request to a representative of the City, the Division of Labor Standards Enforcement, and the Division of Apprenticeship Standards of the Department of Industrial Relations. The City reserves the right to withhold any progress payments to the Contractor in the event of noncompliance with the subsection.

3. A certified copy of all payroll records enumerated in subdivision (A) shall be made available upon request by the public for inspection or for copies thereof. However, a request by the public shall be made through either the City, the Division of Apprenticeship Standards, or the Division of Labor Standards Enforcement. The public shall not be given access to such records at the principal office of the Contractor.

C. The certified payroll records shall be on forms provided by the Division of Labor Standards Enforcement or shall contain the same information as the forms provided by the Division.

D. Each Contractor shall file a certified copy of the records enumerated in subdivision (A) with the entity that requested the records within ten (10) Days after receipt of a written request.

E. Any copy of the records made available for inspection as copies and furnished upon request to the public or any public agency by the City, the Division of Apprenticeship Standards or the Division of Labor Standards Enforcement shall be marked or

obliterated to prevent disclosure of an individual's name, address and social security number. The name and address of the Contractor awarded the Contract or Subcontractor performing the Contract shall not be marked or obliterated. Any copy of records made available for inspection by, or furnished to, a joint labor-management committee established pursuant to the federal Labor Management Cooperation Act of 1978 (Section 175a of Title 29 of the United States Code) shall be marked or obliterated only to prevent the disclosure of an individual's name and social security number. A joint labor-management committee may maintain an action in a court of competent jurisdiction against an employer who fails to comply with Section 1774. The court may award restitution to an employee for unpaid wages and may award the joint labor-management committee reasonable attorneys' fees and costs incurred in maintaining the action. An action under this subdivision may not be based on the employer's misclassification of the craft of a worker on its certified payroll records. Nothing in this subdivision limits any other available remedies for a violation of this section.

F. The Contractor shall inform the City of the location of the records enumerated under subdivision (A), including the street address, city and county, and shall, within five (5) business days, provide a notice of a change of location and address.

G. The Contractor shall have ten (10) Days in which to comply subsequent to receipt of written notice requesting the records enumerated in subdivision (A). In the event that the Contractor or Subcontractor fails to comply within the ten (10) Day period, the Contractor shall, as a penalty to the State or City, forfeit twenty-five (\$25) Dollars for each calendar day, or portion thereof, for each worker, until strict compliance is effectuated. Upon the request of the Division of Apprenticeship Standards or the Division of Labor Standards Enforcement, these penalties shall be withheld from any progress payment or final payment then due. A contractor

is not subject to a penalty assessment pursuant to this section due to the failure of a Subcontractor to comply with this section.

5-1.07 **SAFETY REQUIREMENTS.** It is the intent of the parties that the City is not an exposing, creating, controlling, or correcting employer under California Labor Code Section 6400. In accordance with generally accepted construction practices and State law, the Contractor shall have the authority and be solely and completely responsible for conditions on the Work Site, including safety of all persons and property during performance of the Work. Moreover, the Contractor shall be the controlling employer and has the authority and responsibility to enforce Work Site safety. The Contractor shall be responsible for conducting daily safety inspections and assuring all hazards and violations are abated. The Contractor is responsible for assuring that all Subcontractors adhere to the minimum Cal/OSHA safety requirements and that each Subcontractor has an effective Cal/OSHA IIPP (Illness and Injury Prevention Program) in place that specifically addresses all potential exposures, such as, but not limited to, fall protection, confined space, and trenching/shoring. These requirements shall apply continuously and not be limited to normal working hours. The Contractor shall be responsible for any delay costs or damages in the event the progress of Work is slowed or stopped due to a safety violation.

The Contractor shall designate a safety officer and have in place a health and safety plan in accordance with the laws of State of California and conduct safety meetings and document them in accordance with the law. The Contractor shall have the safety record available for inspection during working hours and shall submit job site safety meeting reports with each Application for Payment.

Prior to Contractor commencing construction project work on City property, Contractor

shall make available copies of its Health and Safety Plan (HASP) that meets or exceeds applicable Cal/OSHA regulations. The Contractor's HASP shall also meet or exceed the requirements of any applicable City-wide or departmental specific Injury and Illness Prevention Programs (IIPP) and other HASP programs, procedures, and plans. Potentially applicable HASP programs, procedures, and plans include, but are not limited to, the following:

1. Bloodborne Pathogens Exposure Control Plan;
2. Confined Space Entry Procedure;
3. Electrical Safety Program (Lockout/Tagout);
4. Emergency Action Plans (Site Specific);
5. Fire Prevention Plans (Site Specific);
6. Hazardous Waste Operations Emergency Response Plan (or Equivalent);
7. Hazard Communication Program (SDS's and Right-to-Know training);
8. Heat Illness & Prevention Plan;
9. Hearing Conservation Program;
10. Hot Work/Welding Procedure;
11. Job Hazard Analyses/Standard Operating Procedures;
12. Traffic Control & Flagging;
13. Excavation/Dig Safe Procedure;
14. Fall Protection Plan;
15. Personal Protective Equipment Plan;
16. Respirable Crystalline Silica Exposure Control Plan;
17. Respirator Program;
18. Soils Management Plan (for contaminated soils); and

19. Transite (Asbestos) Pipe Work Procedure.

Additionally, Contractor shall be responsible for complying with all City-wide and departmental specific safety requirements as identified in the Supplemental Conditions or presented at a pre-construction meeting.

Contractor shall inform City in advance of the quantity of chemical(s) to be used for the project and the total quantity of chemical(s) that will be brought onto City property. In addition, Contractor shall provide City with one copy of the Safety Data Sheet (SDS) for each chemical expected to be used to complete the project and for each chemical brought to the Work Site, regardless of whether such chemicals are ultimately used for the project.

The services of the Director in conducting construction review of the Contractor's performance is not intended to include review of the adequacy of the Contractor's Work methods, equipment, bracing or scaffolding, or safety measures, in, on, or near the construction site. If a City employee observes a safety violation, the City employee will report the violation to the Contractor who is then responsible for assuring the violation is abated.

The Contractor is hereby informed that Work on this project could be hazardous. The Contractor shall carefully instruct all personnel working in potentially hazardous Work areas as to potential dangers and shall provide such necessary safety equipment and instructions as are necessary to prevent injury to personnel and damage to property. Special care shall be exercised relative to Work underground.

All Work and materials shall be in strict accordance with all applicable State, City, County, and Federal Rules, Regulations, and Codes, and attention is drawn to the requirements of Cal/OSHA. The Contractor shall be solely responsible for compliance with all City, County and State blasting requirements and for any damages caused by its operations.

To ensure compliance with California Labor Code Section 6705, the Contractor shall submit to the City, at least five (5) Days in advance of excavation of any trench five feet (5') or more in depth, Working Drawings to the Director showing the design of shoring, bracing, sloping and other provisions to be made for worker protection from the hazard of caving ground during the excavation of such trench or trenches. If such Working Drawings vary from the shoring system standards established by the Cal/OSHA Construction Safety Orders of the Division of Industrial Safety, the plan shall be prepared and signed by a registered civil or structural engineer in the State of California. This in no way relieves the Contractor from the requirement of maintaining safety in all operations performed by the Contractor or the Contractor's Subcontractors and nothing in this section shall be deemed to allow the use of a shoring, sloping or protective system less effective than that required by the Cal/OSHA Construction Safety Orders of the Division of Industrial Safety Contractor's Working Drawings shall be subject to approval insofar as the details affect the character of the finished Work and for compliance with design requirements applicable to the construction when specified or called for, but details of the design will be left to Contractor who shall be responsible for the successful construction of the Work. The City shall approve Working Drawings before any Work involving such drawings is performed. Approval and/or acceptance by the City or its designated agent only constitutes acknowledgment of the submission and does not constitute review or approval of the designs, design assumptions or criteria, completeness of submissions, applicability to areas of intended use, nor implementation of the plans, which are solely the responsibility of the Contractor and its registered engineer.

The Contractor shall perform its Work as not to expose personnel to, or to discharge into the atmosphere from any source whatever, smoke, dust, asbestos, toxic chemicals or other air

contaminants in violation of the laws, rules, and regulations of the governmental entities having jurisdiction and shall bear full and exclusive responsibility for any release of hazardous or non-hazardous chemicals or substances during the course of the Work. The Contractor shall immediately report any such release to the City. The Contractor shall be solely responsible for all claims and expenses associated with the response to, removal and remediation of the release, including, without limitation, payment of any fines or penalties levied against the City by any agency as a result of such release and shall defend, indemnify, and save and hold harmless the City, its officers, agents, employees, and volunteers from any claims arising from such release. For purposes of this section only, the term “claims” shall include:

1. All notices, orders, directives, administrative or judicial proceedings, fines, penalties, fees, or charges imposed by any governmental agency with jurisdiction; and
2. Any claim, cause of action, or administrative or judicial proceeding brought against the City, its officers, agents, employees, and volunteers for any loss, cost (including reasonable attorneys’ fees), damage or liability, sustained or suffered by any person or entity, including the City.

If the performance of the Work creates any hazardous wastes, those wastes shall be properly disposed of according to federal, state, and local laws, at the expense of the Contractor. The Contractor shall dispose of the wastes under its own EPA Generator Number. In no event shall the City be identified as the generator. The Contractor shall notify the City of any such hazardous wastes and the City reserves the right to a copy of the results of any tests conducted on the wastes, and, at its cost, to perform additional tests or examine those wastes, prior to disposition. The Contractor shall defend, indemnify, and save and hold harmless the City, its

officers, agents, employees, and volunteers from any claims arising from the disposal of the hazardous wastes, regardless of the absence of negligence or other malfeasance by the Contractor. Disposal of all Hazardous Materials must be done in accordance with all laws and regulations. Copies of required regulatory documentation including copies of final manifests shall be supplied to the City.

Contractors or Subcontractors removing one hundred or more square feet (100') of asbestos must be "Certified" in accordance with State law. All Work involving exposure to asbestos and all other hazardous materials shall be performed with protection of personnel in compliance with all applicable regulations and safety requirements including, but not limited to, California Code of Regulations Section 1529, Title 8.

Nothing in these General Conditions is to be construed to permit Work not conforming to governing codes. When Contract Documents differ from governing codes, the Contractor shall furnish and Install the higher standards called for without extra charge.

5-1.08 **SUBSURFACE EXCAVATIONS, NOTIFICATION.** The Contractor shall contact the regional notification center, "Underground Service Alert," and schedule its Work to allow ample time for the center to notify its members and, if necessary, for any member to field locate and mark its facilities. Without limiting the foregoing, the Contractor's attention is directed to Government Code Sections 4216 to 4216.9, and in particular Section 4216.2.

5-1.09 **PUBLIC SAFETY.** The Contractor shall assume all responsibility for public safety during the performance of its Work, and all costs arising therefrom shall be included in the Contract Price. Whenever the Contractor's operations create a condition hazardous to traffic or to the public, it shall furnish, erect and maintain, at its expense, such fences, barricades, lights, signs, and other devices and take such other protective measures as are

necessary to prevent accidents or damage or injury to the public. The Contractor shall establish the pedestrian detours with comparable lighting to the original pedestrian areas. The Contractor shall arrange for such flaggers as are necessary to give adequate warning to traffic or to the public of any dangerous conditions affecting traffic. For Work in a public right-of-way, the Contractor shall comply with the rules and regulations of the State, County, or local agency that owns the right-of-way.

The Contractor shall promptly and fully comply with and carry out, and shall without separate charge therefor to the City, all safety and first aid requirements prescribed by all applicable Federal, State, and local laws and regulations, rules, and orders. The Work shall be done in a safe manner; and the Contractor shall safeguard the safety and health of its employees, Subcontractors, and the people of local communities. The Contractor shall also be reasonable for ensuring that its Subcontractors comply with the provisions of this section.

Upon the failure of the Contractor to comply with any of the requirements of this section, the City shall have the authority, but not the duty, to stop the Work until such failure is remedied. The Contractor shall not be entitled to an adjustment of the Contract Time or an increase in the Contract Price due to any such suspensions.

When required by the Contract Documents, the Contractor shall construct, maintain, and remove detours for use of public traffic, without additional cost to the City, unless separate payment is specified in the Special Provisions.

The failure or refusal of the Contractor to construct and maintain detours at the proper time shall be sufficient cause for closing down the work until such detours are in satisfactory condition for use by public traffic.

Due care shall be exercised to avoid injury to existing improvements or facilities, utility

facilities, adjacent property and trees, shrubs, and other plants that are not to be removed.

Trees, shrubs and other plants that are not to be removed, and pole lines, fences, signs, survey markers and monuments, buildings and structures, conduits, pipe lines, sewer and waterlines, highway facilities, and any other improvements or facilities, under or above ground, that are within or adjacent to the work limit line shall be protected from injury or damage, and the Contractor shall provide and Install suitable safeguards to protect such objects from injury or damage. If such objects are injured or damaged by reason of the Contractor's operations, they shall be replaced or restored at the Contractor's expense. The facilities shall be replaced or restored to a condition as good as when the Contractor entered upon the Work Site, or as good as required by the Contract Documents if any such objects are part of the Work. The City may make or cause to be made such temporary repairs as are necessary to restore to service any damaged facility. The cost of such repairs shall be borne by the Contractor, and the costs may be deducted from any monies due or to become due to the Contractor under the Agreement.

The fact that any underground facilities is not shown on the Contract Drawings shall not relieve the Contractor of its responsibility pursuant to "Utility Facilities" in Section 2-1.12 elsewhere in the Contract Documents. It shall be the Contractor's responsibility, pursuant thereto, to ascertain the location of such underground improvements or facilities, which may be subject to damage by reason of its operations.

Full compensation for furnishing all labor, materials, tools, equipment and incidentals, and for doing all the Work involved in protecting or repairing property as specified in this section, shall be considered as included in the prices paid for the various Contract items of work and no additional compensation will be allowed therefor.

5-1.10 **EMERGENCIES.** In an Emergency affecting the safety of life, the

Work, or adjoining property, the Contractor, without special instructions or authorization from the City, shall act at its discretion to prevent such threatened loss or injury. In such an Emergency, the Contractor may perform such additional work as is reasonably required. Any compensation claimed by the Contractor on account of Work performed to an Emergency shall be determined in accordance with the provisions relating to Force Account payment contained elsewhere in the Contract Documents.

5-1.11 **APPRENTICES.** Attention is directed to Labor Code Sections 1777.5, 1777.6 and 1777.7 and Title 8, California Code of Regulations Section 200 et seq. In accordance with Section 1777.5, the Contractor shall secure the necessary certificates and shall contribute to the apprenticeship fund or funds, as provided therein. The Contractor shall require each Subcontractor who will perform work or labor or render service to the Contractor in or about the construction of the work to fully comply with Sections 1777.5 and 1777.6 of the Labor Code. To insure compliance and complete understanding of the law regarding apprentices, and specifically the required ratio thereunder, each Contractor or Subcontractor should, where some questions exist, contact the Division of Apprenticeship Standards, , or one of its branch offices prior to commencement of Work on the public works Contract. Responsibility for compliance with this section lies with the prime Contractor.

It is State and City policy to encourage the employment and training of apprentices on public works Contracts as may be permitted under local apprenticeship standards.

5-1.12 **FAIR LABOR STANDARDS ACT.** Attention is invited to the fact that the City has been advised by the Wage and Hour Division, U.S. Department of Labor, that Contractors engaged in construction Work are required to meet the provisions of the Fair Labor Standards Act of 1958 and as amended (52 Stat. 1060).

5-1.13 **WORKERS' COMPENSATION.** Pursuant to the requirements of Labor Code Section 1860, the Contractor will be required to secure the payment of workers' compensation to its employees in accordance with the provisions of Labor Code Section 3700.

Prior to the commencement of Work, the Contractor shall sign and file with the Director a certification in the following form:

“I am aware of the provisions of Labor Code Section 3700 which require every employer to be insured against liability for workers' compensation or to undertake self-insurance in accordance with the provisions of that code, and I will comply with such provisions before commencing the performance of the Work of this Contract.”

5-1.14 **AIR POLLUTION CONTROL AND ASBESTOS.** The Contractor shall comply with all air pollution control rules, regulations, ordinances and statutes which apply to any Work performed pursuant to the Contract, including any air pollution control rules, regulations, ordinances and statutes, specified in Government Code Section 11017.

In the absence of any applicable air pollution control rules, regulations, ordinances or statutes governing solvents, all solvents, including but not limited to the solvent portions of paints, thinners, curing compounds, and liquid asphalt used on the project shall comply with the applicable material requirements of the applicable Air Quality Management District. All containers of solvent, paint, thinner, curing compound, or liquid asphalt shall be labeled to indicate that the contents fully comply with said requirements.

Unless otherwise provided in the Supplemental Conditions, material to be disposed of shall not be burned, either inside or outside the Premises.

The Contractor shall also comply with all rules, regulations, statutes and ordinances

regarding asbestos removal and disposal, including but not limited to, 42 U.S.C. Sections 7401, 7412 and 7601, 40 C.F.R. Part 61, Subpart M, and California Code of Regulations Section 1529, Title 8.

If the Contractor discovers that a building to be demolished or renovated contains asbestos containing material, the Contractor shall immediately cease Work and notify the City.

5-1.15 **USE OF PESTICIDES.** The Contractor shall comply with all local, state and federal rules and regulations of the Department of Food and Agriculture, the Department of Health, the Department of Industrial Relations and all other agencies which govern the use of pesticides required in the performance of the Work.

Pesticides shall include but shall not be limited to herbicides, insecticides, fungicides, rodenticides, germicides, nematocides, bactericides, inhibitors, fumigants, defoliants, desiccants, soil sterilants, and repellents.

Any substance or mixture of substances intended for preventing, repelling, mitigating, or destroying weed, insects, diseases, rodents, or nematodes and any substance or mixture of substances intended for use as a plant regulator, defoliant or desiccant shall be considered as pesticide.

5-1.16 **SOUND AND LIGHT CONTROL REQUIREMENTS.** The Contractor shall comply with all local sound control, light control, and noise level rules, regulations and ordinances which apply to any Work performed pursuant to the Contract. Work shall not begin before 7 a.m. nor occur after 7 p.m., unless otherwise permitted by the City.

Each internal combustion engine, used for any purpose on the Work or related to the Work, shall be equipped with a muffler, in good working order, of a type recommended by the manufacturer. No internal combustion engine shall be operated on the project without said

muffler.

5-1.17 **WEIGHT LIMITATIONS.** Unless expressly permitted elsewhere in the Contract Documents, the Contractor shall not operate construction equipment or vehicles of any kind which, laden or unladen, exceed the maximum weight limits set forth in Division 15 of the Vehicle Code over completed or existing base, surfacing, pavement or structures.

5-1.18 **ENVIRONMENTAL CLEARANCES; MITIGATION MONITORING PROGRAMS; AND REGULATORY AGENCY PERMIT REQUIREMENTS.** The Department will obtain all environmental clearances and other authorizations necessary for this project as set forth in the Contract Documents. The Contractor shall comply with the provisions, including giving notices during construction when required, of said authorizations. In the event the obtaining of said authorizations delays completion of all or any portion of the Work, an extension of time determined pursuant to the provisions in Section 6-1.08, "Liquidated Damages," of these General Conditions will be granted.

Contractor shall comply with: (1) all mitigation identified in the mitigation monitoring program (attached to and adopted as a component of the mitigated negative declaration or Environmental Impact Report) to mitigate impacts to protected natural resources; and (2) all related permit requirements issued by the regulatory agencies authorizing the project. Contractor shall defend, indemnify, and save and hold harmless the City, its officers, agents, employees, and volunteers from any fines, claims, suits, actions or regulatory sanctions of every name, kind and description brought forth, or on account of, damage to protected natural resources from or arising out of Contractor's negligence or willful misconduct in the performance of this Agreement.

5-1.19 **PERMITS AND LICENSES.** The Contractor acknowledges and agrees that, prior to the submission of its bid for the Work, it fully familiarized itself with the

requirements of all applicable federal, state, county and municipal laws, codes, rules, and regulations, as well as the conditions of any required licenses and permits.

The Contractor shall procure all permits and licenses, including any applicable building permits (except those procured or to be procured by the City which are listed elsewhere in the Contract Documents), in coordination with the Director, pay all charges and fees, and give all notices necessary and incident to the due and lawful prosecution of the Work. Contractor shall be responsible for applying, paying all fees, and coordination for obtaining all permits for completion of the Work. All permits and licenses shall be obtained in sufficient time to prevent delays to the Work. Contractor will apply to the City for reimbursement for such permits costs. Accordingly, Contractor should not include the anticipated costs for permits in its bid, as the necessary permit costs will be reimbursed by the City.

The California Environmental Quality Act (Public Resources Code, Section 21000 to 21177) may be applicable to permits, licenses and other authorizations which the Contractor must obtain from State or local agencies in connection with performing the Work. The Contractor shall comply with the provisions of that Act in obtaining such permits, licenses and other authorizations, and all permits, licenses and other authorizations shall be obtained in sufficient time to prevent delays to the Work.

The Contractor shall maintain the applicable Contractor's license as identified in the Notice to Contractors and City business license for the duration of the Work.

5-1.20 **WATER POLLUTION.** The Contractor shall comply with all water pollution control rules, regulations, ordinances and statutes which apply to any Work performed pursuant to the Contract, including any water pollution control rules, regulations, and statutes, specified by the most current State of California NPDES General Permit for Stormwater

Discharges Associated with Construction Activity.

The Contractor shall take all necessary precaution to protect streams, vernal pools, ponds, reservoirs, and lakes from pollution with fuels, oils, bitumen, calcium chloride, and other harmful materials as consistent with the law. Also, the Contractor shall conduct and schedule operations so as to avoid discharging pollutants, such as but not limited to: sediment and silt to the storm drain system. The storm drain system consists of all facilities that are designed to convey stormwater to the Waters of the State as defined in the California Water Code. The storm drain system includes, but is not limited to, all streets, gutters, drain inlets, roadside ditches, streams, vernal pools, ponds, and lakes. Care shall be exercised to preserve roadside vegetation beyond the limits of construction.

5-1.21 **PROTECTION AND USE OF PROPERTY.** The Contractor shall be responsible for and provide and maintain all proper temporary walkways, covered walkways, barriers, roads, guards, railings, lights, warning signs, and take precaution at all times to avoid injury or damage to any person or any property, and upon completion of the Work, or at other times as directed, restore Premises and adjacent property to a proper condition. In the event of such injury or damage, Contractor shall report such injury and damage to City within forty-eight (48) hours of occurrence.

The Contractor shall protect adjoining property and nearby buildings, including City buildings, City roads, and public streets or roads, from dust, dirt, debris, or the nuisance arising out of the Contractor's operations or storage practices, and, if ordered by the Director, the Contractor shall provide and Install suitable safeguards, approved by the Director, to protect such objects from damage. If such objects are damaged by reason of the Contractor's operations, they shall be replaced or restored at the Contractor's expense.

If the Contractor damages any buildings, roads, utilities, or other property which belong to the City, or any Department or agency thereof, then the Director, at his or her option, may retain from the money due under the Contract an amount sufficient to insure repair of the damage.

The Director may make or cause to be made such temporary repairs as are necessary to restore to service any such damaged facility. The cost of such repairs shall be borne by the Contractor and may be deducted from any moneys due or to become due the Contractor under the Contract.

5-1.22 **RESPONSIBILITY FOR DAMAGE AND INDEMNIFICATION.**

The City of Roseville, its officers, agents, employees, and volunteers, including but not limited to the Director and his or her designee, shall not be answerable or accountable in any manner: for any loss or damage that may happen to the Work or any part thereof; for any loss or damage to any of the materials or other things used or employed in performing the Work; for injury to or death of any person, either workers or the public; or for damage to property from any cause which might have been prevented by the Contractor, its workers, or anyone employed by the Contractor or the Contractor's Subcontractors.

The Contractor shall be responsible for any liability imposed by law and for injuries to, or death of, any person including, but not limited to, workers and the public, or damage to property resulting from defects or obstructions, or from any cause whatsoever during the progress of the Work or at any time before its completion and final Acceptance.

To the fullest extent allowed by law, the Contractor shall defend (through counsel acceptable to the City), indemnify, and save and hold harmless the City, and its respective officers, agents, Subcontractors, employees, and volunteers, and the successors and assigns of

any of them, (hereinafter referred to as “Indemnitees”) from and against all claims, demands, liability, suits, actions, costs or expenses for any and all loss or damage, including but not limited to, personal injury, property damage, or economic loss, arising out of or resulting from allegations of (1) Contractor’s use of the City’s property or any activities or Work performed hereunder by the Contractor; (2) the Contractor’s performance of the Work under the Agreement; or (3) the Contractor’s breach of any provision of the Agreement. The duty of the Contractor to indemnify and save harmless includes the duties to defend as set forth in Civil Code Section 2778. The only exception to these provisions is that the Contractor’s obligations under this section will not apply to the extent that the claims, demands, liability, suits, actions, costs or expenses are caused by Indemnitees’ active negligence, willful misconduct, criminal acts, or for defects in design furnished by the Indemnitees, misconduct, criminal acts, or for defects in design furnished by the Indemnitees.

The Contractor waives any and all rights to any type of express or implied indemnity against the City, its officers, agents, employees, or volunteers.

The Contractor’s responsibility for such defense and indemnity obligations shall survive the termination or completion of this Contract for the full period of time allowed by law. The defense and indemnity obligations of this Contract are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Contract. The parties intend that the defense and indemnity obligations in this Contract shall be broadly construed.

Any person, firm or corporation that Contractor authorizes to Work on the City’s property including Subcontractors, shall be deemed to be an agent of the Contractor for purposes herein, shall be subject to all the applicable terms herein, and shall be within the scope of the Contractor’s indemnity obligation described herein.

In addition to any remedy authorized by law, so much of the money due the Contractor under and by virtue of the Contract as shall be considered necessary by the Department may be retained by the City until disposition has been made of such suits or claims for damages.

The retention of money due the Contractor shall be subject to the following:

A. The City will give the Contractor thirty (30) Days' notice of its intention to retain funds from any partial payment which may become due to the Contractor prior to Acceptance of the Contract. Retention of funds from any payment made after Acceptance of the Contract may be made without such prior notice to the Contractor.

B. No retention of additional amounts out of partial payments will be made if the amount to be retained does not exceed the amount being withheld from partial payments pursuant to Section 7-1.07, "Progress Payments," of these General Conditions.

C. If the City has retained funds and it is subsequently determined that the City is not entitled to be indemnified and saved harmless by the Contractor in connection with matter for which such retention was made, the Department shall be liable for interest on the amount retained at the legal rate of interest for the period of such retention.

5-1.23 **INSURANCE COVERAGE.**

A. **Evidence of Maintenance Required.** The Contractor shall, at its expense, procure and at all times maintain in full force and effect at a minimum the insurance required by this section on all of its operations; and the Contractor shall not allow any Subcontractor to commence work until similar insurance required of the Subcontractor has been obtained and filed. An original Certificate of Insurance, and copies of all required endorsements, all in a form approved by the Risk Manager, evidencing all required coverage or policies shall be filed after the award of the bid and prior to approval of the Contract by the City Council. Contractor shall

provide ten (10) days prior written notice to the City of any reduction of coverage limits or cancellation of the coverage or policies shall be given to the City of Roseville as Certificate holder.

B. Qualifying Insurers. With the exception of the State Compensation Insurance Fund, all required insurance policies shall be issued by companies acceptable to the City and licensed to do business in the State of California and who hold a current policy holders alphabetic and financial size category rating of not less than AVII according to the most recent issue of Best's Insurance Reports.

C. Insurance Required.

1. Commercial General Liability (CGL): Insurance Services Office Form CG 00 01 covering CGL on an “occurrence” basis, including products and completed operations with limits of no less than Two Million Dollars (\$2,000,000) per occurrence for bodily injury, personal injury and property damage for projects under One Million Dollars (\$1,000,000) and limits of no less than Five Million Dollars (\$5,000,000) per occurrence for bodily injury, personal injury and property damage for projects over One Million Dollars (\$1,000,000). If a general aggregate limit applies, either the aggregate limit shall apply separately to this project or the general aggregate limit shall be twice the required occurrence limit.

The Commercial General Liability insurance shall include the following, copies of which shall be provided:

a. Inclusion of the City of Roseville, and its officers, agents, employees, and volunteers, as additional insureds (except for workers’ compensation) as respects services or operations under the Contract. The additional insured endorsement for the general liability policy shall be at least as broad as the ISO CG 2010 10 01 combined with ISO CGL

Endorsement CG 2037 10 01. Any other endorsement must be approved in writing by the City. Endorsements must include coverage for on-going and completed operations, which coverage shall be maintained for four (4) years following completion of the Project. Endorsements shall cover the City of Roseville, its officers, agents, employees, and volunteers.

b. The insurance shall provide coverage for claims by one insured against another insured and the policies shall not contain any cross-suits exclusions, cross-liability exclusions, or insured versus insured exclusions. The policies shall not contain any classification exclusions purporting to deny coverage for any work to be performed by Contractor or any of its Subcontractors.

c. Stipulation that the insurance is primary and noncontributory, as evidenced by a separate endorsement (CG 20 01 04 13 or an equivalent) or section of the policy, and that neither the City nor its insurers will be called upon to contribute to a loss.

d. Such insurance shall specifically cover the contractual liability of the Contractor.

e. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

f. Waiver of subrogation endorsement.

g. The Contractor shall furnish a certificate for the period covered.

2. Automobile Liability: Insurance Services Office Form Number CA 0001 covering Code 1 (any auto), or if Contractor has no owned autos, Code 8 (hired) and Code 9

(non-owned), with limits of no less than One Million Dollars (\$1,000,000) per accident for bodily injury and property damage.

3. **Workers' Compensation:** In accordance with the provisions of the California Labor Code, Contractor is required to be insured against liability for Workers' Compensation or to undertake self-insurance. Statutory Workers' Compensation and Employers' Liability of at least One Million Dollars (\$1,000,000) shall cover all Contractors staff while performing any work incidental to the performance of this Agreement.

4. **Professional Liability:** Professional Liability (Errors and Omission) Insurance appropriate to Contractor's profession, with a limit of liability not less than One Million Dollars (\$1,000,000) per occurrence or claim and Two Million Dollars (\$2,000,000) aggregate to cover all design and engineering services rendered by Contractor pursuant to the Agreement. Coverage must commence from the first day that Contractor or any of its Subcontractors provided any design or engineering services in connection with the Project.

5. **Builder's Risk/Course of Construction Insurance (If Required by Risk Management):** The Contractor shall be responsible for all loss, damage or destruction whatsoever to the work called for by this Contract until the approval of a Notice of Completion or acceptance of the Work if no Notice of Completion is to be recorded.

The Contractor shall secure "All Risk" type of builder's Risk Insurance of the type covering one hundred percent (100%) of the value of the work performed under this Contract (the value is presumed to be the Contract amount unless otherwise stated in Supplemental Conditions) and all materials, equipment, or other items to be incorporated therein while the same are located at the construction site, a bonded warehouse, or its place of manufacture. At any time, the policy shall cover the value of the work completed. The policy shall cover hazards

including the losses due to fire, explosion, hail, rain, lightning, flood (separate insurance as needed), vandalism, malicious mischief, wind, collapse, aircraft, and smoke.

The policies providing such insurance shall name the City as a loss payee as its respective interests may appear, and certified copies of such policies shall be filed with the City. The maximum deductible allowable under the Builder's All Risk policy shall be five percent (5%) of the Contract amount.

Builder's Risk Insurance is not required for coverage of losses in excess of five percent (5%) of the Contract amount for damages resulting from earthquake in excess of a magnitude of 3.5 on the Richter scale, or tidal waves. Coverage in the amount of five percent (5%) of the Contract amount for such losses is required.

6. Pollution Coverage: Contractor shall procure pollution liability coverage or other insurance covering claims for bodily injury or property damage arising out of the abatement, removal, storage, transportation, or other exposure to hazardous materials or pollutants, in limits not less than Two Million Dollars (\$2,000,000). Contractor shall add the City and all parties required to be indemnified by Contractor as additional insured on all pollution liability policies.

7. Higher Coverage Limits: If Contractor maintains higher coverage limits than the amounts shown above, then the City requires and shall be entitled to coverage for the higher coverage limits maintained by Contractor. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the City.

8. Claims Made Coverage: Liability insurance coverage may not be written on a "claims made" or modified occurrence basis. The Certificate of Insurance must clearly provide that the coverage is on an "occurrence" basis.

5-1.24 **OTHER INSURANCE PROVISIONS.**

A. The requirements of the Standard Specifications as to types and limits of insurance coverage to be maintained by the Contractor, and any approval of insurance by the City, are not intended to, and shall not in any manner limit or qualify the liabilities and obligations otherwise assumed by the Contractor pursuant to the Contract, including, but not limited to, the provisions concerning indemnification, nor preclude the City from taking any other action available to it under any other provision of the Contract or law.

B. The City acknowledges that some insurance requirements contained in these Standard Specifications may be fulfilled by self-insurance on the part of the Contractor. However, this shall not in any way limit liabilities assumed by Contractor under the Contract. Any self-insurance must be approved in writing by the City, in its sole discretion and shall not reduce the limits of liability. Any deductibles or self-insured retentions (“SIR”) must be declared on the certificate of insurance and approved by City in writing. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

C. The Contractor agrees to include in its contracts with all subcontractors the same requirements and provisions of this Contract, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor’s work. Furthermore, the Contractor shall require its subcontractors to agree to be bound to the Contractor and the City in the same manner and to the same extent as the Contractor is bound to the City under this Contract. Additionally, the Contractor shall obligate its subcontractors to comply with these

same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of the City's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request. Alternatively, the Contractor may insure subcontractor(s) under its own policy.

D. The City, its officers, agents, employees, and volunteers are to be covered as insureds with respect to liability arising out of automobiles owned, leased, hired or borrowed by or on behalf of the Contractor; and with respect to liability arising out of work or operations performed by or on behalf of the Contractor including materials, parts or equipment furnished in connection with such work or operations. Coverage shall not extend to any indemnity coverage for the active negligence of the additional insured in any case where an agreement to indemnify the additional insured would be invalid under California Insurance Code Section 11580.04.

E. The limits of insurance required in this Contract may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of the City (if agreed to in a written contract) before the City's own insurance shall be called upon to protect it as a named insured.

F. The insurance procured by Contractor shall be subject to the approval of the City, but any acceptance of insurance certificates by the City shall in no way limit or relieve Contractor of its duties and responsibilities under the Agreement.

G. Contractor shall be responsible for all premiums, deductibles, and self-insured retention applicable to the insurance it is required to procure under the Contract. All deductibles or self-insured retentions over five hundred thousand dollars (\$500,000) must be approved by the City, in writing. Contractor shall be responsible for all deductibles, self-insured

retention payments, and/or increased premiums incurred if the City's policies of insurance are forced to cover damages or respond to claims for which Contractor or its Subcontractors were obligated to provide insurance under the Contract.

H. Failure of the City to enforce in a timely manner any of the requirements of these insurance provisions shall not act as a waiver to enforcement of any of these provisions at a later date.

I. Contractor's indemnity obligations shall not be limited by these insurance provisions and shall survive the expiration of the Contract and the insurance provisions of the Contract shall likewise not be limited by the indemnity provisions of the Contract.

J. THE CITY RESERVES THE RIGHT TO WITHHOLD ANY PROGRESS PAYMENTS TO THE CONTRACTOR IN THE EVENT OF NONCOMPLIANCE WITH ANY INSURANCE REQUIREMENTS.

5-1.25 **THIRD PARTY BENEFICIARY.** No provisions in the Contract Documents shall in any way inure to the benefit any third party (including the public at large or any member thereof) so as to constitute such person a third party beneficiary of the Contract, or of any term or condition or other provision of the Contract or otherwise give rise to any cause of action in any person not a party to the Agreement, except as expressly provided elsewhere in the Contract Documents.

5-1.26 **COORDINATION AND ACCESS.** The Contractor acknowledges that the City may award, or has already awarded, other construction contracts for additional work or may perform additional work with its own forces and that such work may affect the Work under this Agreement. Additionally, the Contractor acknowledges that the State and other public and private agencies may be granted a right-of-entry by the City for the purpose of constructing

facilities within and adjacent to the Work Site. It is the obligation of the Contractor to coordinate its Work with the work of others working within or adjacent to the City's property.

During performance of its Work, the Contractor shall not have exclusive access to or use of the work areas. The City may also require that certain facilities and areas be used concurrently by the Contractor and by other contractors working in the area. When two (2) or more contractors are employed on related or adjacent City work, each shall conduct its operations in such a manner as not to cause any unnecessary delay or hindrance to the other. Each contractor shall be responsible to the other for all damage to any work, to persons or property caused to the other by its operations, and for loss caused the other due to any unnecessary delays or failure to finish the work within the time specified for completion.

If any party of the Contractor's Work depends on the work of any other contractor and/or the City for proper execution and/or results, the Contractor shall promptly notify the City of any discrepancies and/or defects in said other work that would render its work unsuitable for proper execution and/or results prior to proceeding with the Contractor's own Work. If it becomes necessary, the City will resolve coordination and access problems.

The Contractor and its representative in charge of the Work shall familiarize themselves with the City's property and Work Site, and adjacent surroundings in the vicinity of said Work, and any private or public operations on adjoining properties.

5-1.27 **OCCUPANCY BY THE DEPARTMENT PRIOR TO**

ACCEPTANCE. The City may at any time notify the Contractor in writing that it intends to take Beneficial Occupancy of any portion of the Work even though the Work may not be substantially complete. Unless the reason for the City's taking Beneficial Occupancy is that the Contractor has not completed the Work (or portions thereof) in accordance with the Contract

Time, the City's Beneficial Occupancy shall relieve the Contractor from its responsibility for maintenance, loss or damage to that portion of the Work for which the City has taken Beneficial Occupancy other than that resulting from the Contractor's act or omission, negligence, willful misconduct or breach of warranty.

Should the Work (or portion thereof) not be completed in accordance with the Construction Schedule within the Contract Time (as adjusted under the terms of the Contract Documents), the City shall have the right, but not the obligation, to take Beneficial Occupancy of the Work. In such event, the Contractor shall not be entitled to any additional compensation on account of said occupancy by the City, nor shall the Contractor be relieved of any of its responsibilities under the Contract Documents, including, without limitation, Contractor's obligation to complete the Work in accordance with the Construction Schedule.

Beneficial Occupancy shall not be deemed an Acceptance by the City either of the Work or of any portion thereof, nor will it relieve the Contractor of full responsibility for correcting defective Work or materials found at any time before the formal written Acceptance of the entire Contract by the Director or during the full warranty period after such Acceptance, as provided in Section 7-1.12, "Warranty," of these General Conditions.

The City's Beneficial Occupancy shall not relieve the Contractor of its responsibility to maintain all insurance and bonds required under the Contract Documents until the entire project is accepted by the City.

5-1.28 **RIGHT TO OPERATE UNSATISFACTORY FACILITIES AND EQUIPMENT.** If, after Installation, the operation or use of the facilities or equipment to be furnished under this Contract proves to be unsatisfactory to the Director, the City shall have the right to operate and use such facilities or equipment until they can, without damage to the City,

be taken out of service for correction or replacement. Such period of use of the defective facilities or equipment, pending correction or replacement, shall in no way decrease the warranty period required for the acceptable corrected or replaced facilities or equipment.

5-1.29 **CONTRACTOR'S RESPONSIBILITY FOR THE WORK.** Except as otherwise provided herein, the Contractor shall have the charge and care of the Work and shall bear the risk of injury or damage to any part of the Work by the action of the elements or from any other cause whether arising from the execution or from the nonexecution of the Work until the Acceptance of the Contract by the Director. The Contractor shall rebuild, repair, restore, and make good all injuries or damages to any portion of the Work occasioned by any cause before its completion and Acceptance, and shall bear the expense thereof. In case of suspension of Work from any cause whatever, the Contractor shall be responsible for the Work and it shall also be responsible for all materials, and shall properly store them if necessary, and shall provide suitable drainage and erect temporary structures where necessary.

The Contractor will be relieved of responsibility for any injury or damage to the Work caused by the following:

- A. An earthquake in excess of a magnitude of 3.5 on the Richter Scale or a tidal wave, when the effect of such has been proclaimed a disaster or state of emergency by the Governor of the State of California or by the President of the United States, or was of such magnitude at the site of the Work as to have been sufficient to have caused a proclamation of disaster or state of emergency, had it occurred in a populated area.
- B. Occupancy and use by the Department or the public prior to the completion of the entire project.
- C. Acts of the Federal Government or the public enemy.

5-1.30 **RESPONSIBILITY FOR UTILITIES.** The Contractor shall be responsible at its own cost for any and all Work, expense or special precautions caused or required by the existence or proximity of utilities encountered in performing the Work, including without limitation, repair of any or all damage and all hand or exploratory excavation required. The Contractor is cautioned that such utilities may include communication cables or electrical cables which may be high voltage, and when working or excavating in the vicinity of such cables, or the ducts enclosing such cables, the Contractor shall undertake at its own cost any special precautions required. Suitable warning signs, barricades, and safety devices shall be erected as necessary or required.

However, if during the course of the Work the Contractor encounters utility Installations which are not shown or indicated in the Contract Documents or which are found in a location substantially different from that shown, and such utilities are not reasonably apparent from visual examination, then the Contractor shall promptly notify the Director in writing. Where necessary for the Work of the Contract, the Director shall issue a written order to the Contractor to make such adjustments, rearrangement, repair, removal, alteration, or special handling of such utility, including repair of the damaged utility. The Contractor shall perform the Work described in such written order, and compensation therefor will be made in accordance with Section 3 of these General Conditions relating to changes in the Work. Except for the items of cost specified in said Section 3, the Contractor shall receive no compensation for any other cost, damage, delay, interference, or hindrance to him or her due to the presence of such utility. If the Contractor fails to give the notice specified above and thereafter acts without instructions for the Director, then the Contractor shall be liable for any or subsequent to discovery thereof, and the Contractor shall repair and make good such damage at its own cost.

The precise location of underground facilities can only be determined by careful probing or hand digging in compliance with Article 6 of the Cal/OSHA Construction Safety Orders which states in part:

“Prior to opening an excavation, effort shall be made to determine whether underground installations, i.e., sewer, water, fuel, electric lines, etc., will be encountered, and if so, where such underground installations are located. When the excavation approaches the approximate location of such an installation, the exact location shall be determined by careful probing or hand digging, and, when it is uncovered, adequate protection shall be provided for the existing installation.”

The location of known existing utilities and pipelines are shown on the Contract Drawings in their approximate locations. Some of the locations include multiple conduits. The Contractor shall exercise care in avoiding damage to those facilities which are to remain in service subsequent to the construction of the particular new facility involved and the Contractor will be held responsible for any repairs if damaged. The Contractor shall also exercise care in maintaining those pipes and facilities required for continuing operation of the existing facilities until such time as they can be abandoned. There is no guarantee that all utilities or obstructions are shown on the Contract Drawings or that the locations indicated are accurate.

The Contractor shall exercise extreme caution in working in the area adjacent to the existing pipelines and utility services. It is essential that all the existing facilities be maintained in service. Construction of the connections between the existing facilities and the new facilities shall be at times and during periods acceptable to the City. The Contractor shall advise the Director in writing of its proposed Construction Schedule for these connections at least forty-eight (48) hours in advance.

The Contractor shall uncover all piping and conduits, to a point one foot (1') below the pipe, where crossings, interferences, or connections are shown on the Contract Drawings, prior to trenching or excavating for any pipe or structures, to determine actual elevations. New pipelines shall be laid to such grade as to clear all existing facilities which are to remain in service. If the Contractor does not expose all required utilities, it shall not be entitled to additional compensation for Work necessary to avoid interferences nor for repair to damaged utilities. Excavations around underground electrical ducts and conduits shall be performed using extreme caution to prevent injury or damage to workers and to the electrical ducts or conduits.

5-1.31 **PROPERTY RIGHTS IN MATERIALS.** Nothing in the Contract shall be construed as vesting in the Contractor any right of property in the materials used after they have been attached or affixed to the Work or soil or after partial payment has been made as provided in Section 7-1.07, "Progress Payments," of these General Conditions for material delivered on the ground or stored subject to or under the control of the City and unused. All such material shall become the property of the City upon being so attached or affixed or upon payment for materials delivered on the ground or stored subject to or under the control of the City and unused, as provided in said Section 7-1.07.

5-1.32 **COURT ORDERED DELAY.** If, pursuant to court order, the Department temporarily suspends performance of all or any portion of the Work, an extension of time determined pursuant to the provisions in Section 6-1.08, "Liquidated Damages," of these General Conditions will be granted.

5-1.33 **NO PERSONAL LIABILITY.** Neither the Director, nor any other officer or authorized employee of the City, shall be personally responsible for any liability arising under or by virtue of the Contract.

5-1.34 **RIGHTS IN LAND AND IMPROVEMENTS.** The Contractor shall make no arrangements with any person or entity to permit occupancy or use of any land, structure or building within the limits of the Work, for any purpose whatsoever, either with or without compensation, in conflict with any agreement between the City and any third party owner, former owner, or tenant of such land, structure or buildings. The Contractor shall not occupy City-owned property outside the limit of the Work shown on the Contract Drawings unless it obtains prior approval.

5-1.35 **ANTITRUST CLAIMS.** The Contractor's attention is directed to the following provision of Public Contract Code Section 7103.5(b), which is applicable to the Contractor and its Subcontractors:

“ In entering into a public works contract or a subcontract to supply goods, services, or materials pursuant to a public works contract, the contractor or subcontractor offers and agrees to assign to the awarding body all rights, title, and interest in and to all causes of action it may have under Section 4 of the Clayton Act (15 U.S.C. Sec. 15) or under the Cartwright Act (Chapter 2 [commencing with Section 16700] of Part 2 of Division 7 of the Business and Professions Code), arising from purchases of goods, services, or materials pursuant to the public works contract or the subcontract. This assignment shall be made and become effective at the time the awarding body tenders final payment to the contractor, without further acknowledgement by the parties.”

5-1.36 **RIGHTS TO DRAWINGS, TECHNICAL DATA PATENTS.** Shop

Drawings and Working Drawings submitted to the City by the Contractor, Subcontractor or any lower tier Subcontractor pursuant to the Agreement, are the property of the City and the City may use, and disclose in any manner and for any purpose, Shop Drawings and Working Drawings delivered under the Contract.

Technical Data including manuals or instructional materials, computer or microprocessor software which are delivered or submitted to the City by the Contractor, Subcontractor, or any lower tier Subcontract pursuant to the Contract are the property of the City, and the City may use or disclose same in any manner and for any purpose.

The Contractor shall assume all costs arising from the use of patented materials, equipment, devices, or processes used on or incorporated in the Work, and shall defend, indemnify and save and hold harmless the City, and its duly authorized representatives, from all suits at law, or in equity, and actions of every nature for, or on account of the use of any patented materials, equipment, devices or processes. In case some materials, equipment, devices or processes are held to constitute an infringement and their use enjoined, the Contractor, at its expense, shall:

1. Secure for the City the right to continue using said materials, equipment, devices or processes by suspension of the injunction or by procuring a license or licenses; or
2. Replace such materials, equipment, devices, processes; or
3. Modify them so that they become non-infringing or remove the enjoined materials, equipment, devices or processes and refund the sums paid therefor without prejudice to any other rights of the City.

5-1.37 **PAYMENT OF TAXES.** Contractor shall pay all taxes and duties applicable to and assessable against any Work, equipment, materials, services, processes, and

operations incidental to or involved in the Agreement, including but not limited to, retail sales and use, transportation, export, import, business, and special taxes. The Contractor is responsible for ascertaining and acquainting itself with such taxes and making all necessary arrangements to pay them. The Contractor will maintain records that are auditable records, and these records shall be subject to the City's review to verify that Contractor's tax payments are current at all times.

The Contract Price paid for the Work shall include full compensation for all taxes which the Contractor is required to pay, whether imposed by Federal, State or local government, including, without being limited to, Federal excise tax. No tax exemption certificate nor any document designed to exempt the Contractor from payment of any tax will be furnished to the Contractor by the Department, as to any tax on labor, services, materials, transportation, or any other items furnished pursuant to the Contract.

The Contractor shall withhold and pay any and all sales and use taxes, withholding taxes, whether Federal, State, or local, Social Security taxes, State Unemployment Insurance charges and all other taxes which are now or hereafter may be required to be paid or withheld under any laws.

5-1.38 **GRATUITIES AND CONFLICT OF INTEREST.** The Contractor shall not offer or provide gratuities in the form of gifts, entertainment, loans, meals, rewards, and/or services to representatives of the City, including but not limited to, officers, employees, agents, Engineering Service Consultants, Consulting Engineers and Architects, Inspectors and/or Testing Agencies retained by the City. If it is found that the Contractor has violated this provision, the Contract may be subject to termination for default as defined elsewhere in these General Conditions.

During the term of the Contract and until the final payment has been made to the Contractor, the Contractor shall not employ or compensate in any manner whatsoever, the City's officers, employees and authorized representatives, agents, and any Engineering Service Consultants, Consulting Engineers and Architects, Inspectors, and/or Testing Agencies retained by the City. Any exception to the employment or compensation to any of the above named parties must be made in writing by the City. If the Contractor offers or provides employment or compensation to those named above during the term of the Contract, the Contract may be subject to termination for default.

5-1.39 **COOPERATION.** Should construction be under way by City forces or other forces or by other Contractors within or adjacent to the limits of the Work or should Work of any other nature be under way by such forces within or adjacent to said limits, the Contractor shall cooperate with all such forces to the end that any delay, interference or hindrance to their Work will be avoided. The right is reserved to perform other or additional Work at or near the site at any time, by the use of such forces.

5-1.40 **DIGGING TRENCHES OR OTHER EXCAVATIONS.** In the event any work involves digging trenches or other excavations that extend deeper than four feet (4') below the surface, City and Contractor shall comply with the following:

A. The Contractor shall promptly, and before the following conditions are disturbed, notify City in writing of any:

1. Material that the Contractor believes may be material that is hazardous waste, as defined in Section 25117 of the Health and Safety Code, that is required to be removed to a Class I, Class II, or Class III disposal site in accordance with provisions of existing law.

2. Subsurface or latent physical conditions at the site differing from those made available to Contractor for inspection as provided in the project proposal.

3. Unknown physical conditions at the site of any unusual nature, different materially from those ordinarily encountered and generally recognized as inherent in Work of the character provided for in the Contract.

B. The City shall promptly investigate the conditions, and if it finds that the conditions do materially so differ, or do involve hazardous waste, and cause a decrease or increase in the Contractor's cost of, or the time required for, performance of any part of the Work shall issue a Change Order under the procedures described in the Contract.

C. In the event that a dispute arises between the City and the Contractor whether the conditions materially differ, or involve hazardous waste, or cause a decrease or increase in the Contractor's cost of, or time required for, performance of any part of the Work, the Contractor shall not be excused from any scheduled completion date provided for by the Contract, but shall proceed with all work to be performed under the Contract. The Contractor shall retain any and all rights provided either by contract or by law which pertain to the resolution of disputes and protests between the contracting parties. However, no claim of the Contractor under this clause shall be allowed unless the Contractor has given the notice required by this Section. No claim by the Contractor for an equitable adjustment hereunder shall be allowed if asserted after final payment under this Contract.

5-1.41 **CONTRACTOR REGISTRATION.** No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this Contract, the Contractor and its subcontractors shall have a continuing legal obligation to maintain current

registration with the Department of Industrial Relations. The Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

5-1.42 **CITY OF ROSEVILLE ENCROACHMENT PERMITS AND RIGHTS-OF-WAY.** The Contractor need not obtain a separate encroachment permit from the City prior to construction within street rights-of-way or other City rights-of-way. Execution of the Contract by the City shall be deemed an encroachment permit for work required by the Contract within rights-of-way. All work shall conform to the rules and regulations of encroachment permits and shall be subject to the inspection and approval of the Director and City Engineer.

To the extent indicated in the Contract Drawings, the City will provide the rights-of-way over private lands or the site to enable the Contractor to perform its work. The Contractor shall be solely responsible for securing any additional rights-of-way desired by the Contractor. The City will not be a party to nor assume any liability for any separate agreements reached between the Contractor and any third parties with respect to these additional rights-of-way. The Contractor shall procure evidence that agreements are in place with said third parties before the Contractor uses those areas covered by the agreements. Any damage to such private lands caused by the Contractor's operations shall be the sole responsibility of the Contractor.

SECTION 6

PROSECUTION AND PROGRESS

6-1.01 **SUBLETTING AND SUBCONTRACTING.** The Contractor shall be responsible for all Work performed under the Contract. The Contractor shall give its personal attention to the fulfillment of the Contract and shall keep the Work under its control. Nothing in the Contract Documents shall create any contractual relationship between the City and any Subcontractor. The Contractor is fully responsible to the City for the acts and omissions of its Subcontractors of any tier. When any Subcontractor fails to prosecute a portion of the Work in a manner satisfactory to the Director, that Subcontractor shall not again be employed on the Work. Although the sections of the Contract may be arranged according to various trades, or general grouping of the Work, the Contractor is not obligated to sublet the Work in such manner. The Director will not arbitrate disputes among Subcontractors or between Contractor and one or more Subcontractors concerning responsibility for performing any part of the Work.

The on-site production of materials produced by other than the Contractor's own forces shall be considered as subcontracted. The erection, establishment or reopening of on-site plants for production of materials and the operation thereof in the production of materials for use on the Work shall conform to the requirements relating to labor set forth in the Contract Documents.

The Contractor shall also be responsible for coordinating the Work performed by Subcontractors and Suppliers.

The Contractor shall not substitute any person as Subcontractor in place of a Subcontractor listed on its bid proposal without the written approval of the Director. Substitutions must be in accordance with the provisions of the "Subletting and Subcontracting

Fair Practices Act” beginning with Public Contract Code Section 4100. Violations of this Act by the Contractor may subject it to penalties which may include cancellation of Contract, Assessment of ten percent (10%) of the Subcontractor's bid, and disciplinary action by the Contractors State License Board.

The Contractor shall pay any Subcontractors approved by the City for work that has been satisfactorily performed no later than seven (7) Days from the date of Contractor’s receipt of progress payments by the City. Within seven (7) Days after receipt from the City of funds attributable to work performed by a Subcontractor, Contractor shall release any retainage payments withheld to the Subcontractor. In the event Contractor does not make progress payments or release retention to Subcontractors in accordance with the time period specified herein, Contractor may be subject to prompt payment penalties per statute.

6-1.02 **ASSIGNMENT.** The performance of this Contract may not be assigned, except upon the written consent of the City Council of the City of Roseville. Consent will not be given to any proposed assignment which would relieve the original Contractor or its surety of their responsibilities under the Contract nor will the City consent to any assignment of a part of the Work under the Contract.

The Contractor may assign moneys due or to become due to it under the Contract and such assignment will be recognized by the City, if given proper notice thereof, to the extent permitted by law, but any assignment of moneys shall be subject to all proper set-offs in favor of the City and to all deductions provided for in the Contract and particularly all money withheld, whether assigned or not, shall be subject to being used by the City for the completion of the Work in the event that the Contractor should be in default therein.

6-1.03 **BEGINNING OF WORK.** After the execution of the Contract by both

parties, the City will issue the Notice to Proceed upon its determination that it is appropriate for the Contract Time to commence.

The Contractor shall begin Work within fifteen (15) Days after receiving the Notice to Proceed from the Director, subject to the requirements stated elsewhere in the Contract Documents regarding, among other things, the submittal of Baseline Schedule, and shall diligently prosecute the same to completion within the time limit provided in the Supplemental Conditions. Contractor shall also achieve any and all Contract milestones as described elsewhere in the Contract Documents.

The Contractor shall notify the Director, in writing, of its intent to begin Work at least seventy-two (72) hours before Work is begun. The notice shall be delivered to the Director and shall specify the date the Contractor intends to start. If the project has more than one (1) location of Work, a separate notice shall be given for each location.

The Contractor is not authorized to perform any Work until it has received a Notice to Proceed from the City. Should the Contractor begin Work in advance of receiving notice that the Contract has been approved as above provided, any Work performed by it in advance of the said date of approval shall be considered as having been done by the Contractor at its own risk and as a volunteer unless said Contract is so approved thereafter.

6-1.04 **PROGRESS SCHEDULE.**

A. Preliminary Progress Schedule. The Contractor shall submit to the Director, within twenty (20) Days after date of the Notice to Proceed, a Preliminary Progress Schedule covering the Contractor's activities over the first three (3) months of operation in detail and the remainder of the project in summary. The Preliminary Progress Schedule shall schedule the project within the Contract Time for completion of the Work, and shall be subject to

favorable review by the Director.

B. CPM Schedule. The Contractor shall submit an acceptable Critical Path Method (CPM) Schedule to the Director within thirty (30) Days after the receipt of the Notice to Proceed. Subsequent revisions to said schedule shall be submitted as set forth hereinafter. The requirement for the CPM schedule is included to allow for adequate planning and execution of the Work, to determine the critical nature of delays, and to assist the Director in appraising the reasonableness of the proposed schedule and evaluating progress of the Work. The CPM schedule submitted under this Section shall utilize a CPM format, either the precedence or arrow diagramming method. The definitions of CPM terms and functions shall be as provided in the Associated General Contractors of America book *CPM in Construction, A Manual for General Contractors*, or a favorably reviewed alternative publication or reference. No progress payment will be made prior to submission and acceptance of the CPM Schedule.

1. The CPM schedule system shall consist of diagrams and accompanying mathematical analyses. The diagrams shall show elements of the project in detail and an entire project summary. Diagrams shall show the order and interdependence of activities and sequence in which the Work is to be accomplished as planned by the Contractor. The basic concept of a network analysis diagram shall be followed to show how the start of a given activity is dependent on the completion of preceding activities and its completion restricts the start of following activities. Detailed network activities shall include, in addition to construction activities, the submittal and favorable review of samples of material and Shop Drawings, the procurement of critical materials and equipment, fabrication of special material and equipment, and their Installation and testing. All activities of the City and the Director that affect progress and required Contract dates for completion of all or parts of the Work shall be shown. The

selection and number of activities shall be subject to favorable review by the Director. Summary networks shall be time scaled. Durations shall be in Days and shall not exceed fifteen (15) Days, except for submittal and delivery items. Where the duration of continuous Work exceeds fifteen (15) Days, Work items in the Construction Schedule shall be subdivided by location, approximate stationing or other sub-element of the Work.

The graphic network diagram shall include for each activity, the description, activity number, the estimated duration in Days, and all activity relationship lines. The network diagram shall be drawn for the early start of activities. All significant Submittals shall be scheduled along with manual Submittals and training on all large or critical pieces of equipment. If the precedence technique is utilized, the schedule project shall include a calendar in Work Days, a network report sorted by early start and a logic table report sorted by preceding Work item. If the arrow technique is utilized, the schedule report shall include a calendar in Work Days, a network report sorted by early start, a network report sorted by I-J numbers, and a network sorted by slack time and I-J numbers.

2. The critical path shall be shown on all reports and on the graphic network diagram. The activities which constitute the critical path shall be identified.

3. The mathematical analysis of the network diagram shall include a tabulation of each activity. The following information shall be furnished as a minimum for each activity:

- (a) preceding and following event numbers
- (b) activity description and number
- (c) estimated duration of activities
- (d) earliest start date (by calendar date)

- (e) earliest finish date (by calendar date)
- (f) actual start date (by calendar date)
- (g) actual finish date (by calendar date)
- (h) latest start date (by calendar date)
- (i) latest finish date (by calendar date)
- (j) slack or float
- (k) percentage of activity completed

4. The program shall be capable of accepting revised completion dates as modified by approved time adjustments and recomputations of all tabulation dates and float accordingly.

5. Submission and review of the system shall be as follows:

(a) The complete network analysis system, consisting of the detailed network mathematical analysis and network diagrams, shall be submitted within thirty (30) Days after receipt of the Notice to Proceed.

(b) The Contractor shall participate in a review and evaluation of the proposed network diagrams and analysis by the Director. Any revisions necessary as a result of this review shall be resubmitted for review by the Director within ten (10) Days. When completed, the favorably reviewed schedule shall then be the schedule to be used by the Contractor for planning, organizing and directing the Work and for reporting progress. If the Contractor thereafter desires to make significant changes in its method of operating and scheduling, the Contractor shall notify the Director in writing stating the reasons for the change.

(c) The Contractor shall submit at monthly intervals a report of the actual construction progress. Each monthly report shall cover a period of approximately thirty

(30) Days ending around the 20th of each month. The monthly reports shall be submitted within ten (10) Days of the end of the reporting period.

(1) If the project is proceeding on schedule, the monthly update report may consist of a marked-up copy of the graphical network diagram. This submittal shall clearly indicate the status of any minor shifts in sequence or schedule and the estimated completion date or percent complete of all activities currently in progress. The Contract completion date shall also be indicated. The Contractor shall submit a narrative report relating to status of construction, the schedule, and factors which may affect the remainder of the schedule. The report shall show the activities or portions of activities completed during the reporting period. The report shall state the percentage of the Work actually completed and scheduled as of the report date and the progress along the critical path in terms of Days ahead or behind the allowable dates.

(2) If, in the opinion of the Director, the project is behind schedule, the monthly report shall include a revised network diagram and/or mathematical analysis showing the Contractor's proposed revised schedule. An analysis of the effect that the delay has on progress along other paths shall also be included in the report. The Contractor shall also submit a narrative report with each updated analysis which shall include but not to be limited to a description of current and anticipated problem areas, delaying factors and their impact, and an explanation of corrective actions taken or proposed.

(3) Periodic report shall be submitted in sufficient copies to cover Contractor needs plus five (5) copies and an available electronic copy to be retained by the Director.

6. To the extent that the favorably reviewed initial Construction Schedule, or revisions thereto, indicate anything not jointly agreed upon, it shall be deemed to be not favorably reviewed by the Director. Any omission of Work from the detailed schedule, otherwise required for Contract compliance, will not excuse the Contractor from completing such Work within any applicable completion date. The CPM schedule shall be generated by computer methods.

C. Schedule Review. Once each month, on a date mutually agreed upon, but no later than seven (7) business days after the monthly schedule progress report date, a Work Site meeting will be held to review the Construction Schedule and job progress. The Contractor shall also attend weekly meetings scheduled by the Director to review the progress of the Work in the preceding week and in the subsequent week, coordinate the Work with public agencies or other Contractors as required, and allow the Director to plan his or her activities for testing, inspection, etc.

D. Schedule Revisions. The conditions under which the Director will require revisions of the Construction Schedule include the following:

1. When delay in completion of any Work item or sequence of Work items results in an estimated extension of project completion by either twenty (20) business days or by ten percent (10%) of the remaining duration of time to complete the Contract, whichever is less.

2. When delays in Submittals or deliveries make replanning or rescheduling of the Work necessary.

3. When the schedule does not represent actual prosecution and progress of the Work.

4. When any change to the sequence of activities, the completion date for major portions of the Work, or when changes occur which affect the critical path.

5. When Contract Amendments or a Change Order necessitates schedule revision, the Contractor shall submit a schedule analysis of all Change Order Work with its proposal.

E. Cash Flow Projection. A cash flow projection shall be submitted with the Construction Schedule. This cash flow projection shall be revised and resubmitted when revisions of the Construction Schedule will result in changes to the projected cash flow.

F. Schedules showing project completion dates earlier than specified in the Supplemental Conditions will be rejected unless justification can be provided for early completion.

6-1.05 **SCHEDULE OF VALUES.** Prior to preparation of the first estimate for a progress payment, the Contractor shall submit for favorable review by the Director a detailed Schedule of Values or cost breakdown of the Work under each bid item awarded. The breakdown will then become the basis for partial payment determination. Elements of Work shall be grouped by structure, pipeline, system, etc. Within each grouping, Work should be itemized by readily measurable quantities of Work complete in place. For example, concrete should be in units of cubic yards including form Work and reinforcing steel. Move-on costs, bond and insurance costs, and Overhead costs shall not be considered an item of cost for this purpose but shall be prorated over items of Work. In the event the Schedule of Values is not favorable reviewed by the Director, another Schedule of Values shall be submitted that is mutually acceptable to the Contractor and the Director.

6-1.06 **CITY'S RIGHT TO STOP WORK.** The Director shall have the

authority to order the Contractor, in writing, to suspend the Work wholly or in part, for such period as the Director may deem necessary due to the failure on the part of the Contractor to correct Work that is not in accordance with the requirements of the Contract Documents or if Contractor persistently fails to carry out Work in accordance with the Contract Documents.

The Contractor shall immediately comply with the written order of the Director to suspend the Work wholly or in part. The suspended Work shall be resumed when conditions are favorable and methods are corrected, as ordered or approved in writing by the Director.

Any stoppage of work under this section shall be at the Contractor's sole expense, and the Contractor shall have no claim against the City based on the Contractor's failure to perform the Work in accordance with the Contract Documents.

In addition to the City's right to stop Work, the City may order the Contractor to submit to the City at no additional cost to the City, additional information concerning Contractor's planned Work if the Contractor fails to promptly correct Work that is not in accordance with the requirements of the Contract Documents or persistently fails to carry out Work in accordance with the Contract Documents. The additional information ordered by the City may include, but is not limited to, preparation of Submittals or Working Drawings not otherwise required to be submitted under the Contract Documents.

In the event the City discovers that the Contractor has created an unsafe condition the City may arrange for other work forces to remedy the condition. Such remedial work shall be at the sole discretion of the City. If this action is required, the City may unilaterally terminate Work under the Contract, and will pay only for the quantities of Work actually performed, less the cost of the City's remedial Work. In the event that Work is not halted, the Contractor must take immediate steps to correct the situation. There will be no extra payment for Work required

to correct unsafe conditions.

The right of the City to suspend the Work shall not give rise to a duty on the part of the City to exercise this right for the benefit of the Contractor or any other person or entity. This right shall be in addition to and not in restriction or derogation of the City's other rights under the Contract Documents.

In the event of a suspension of Work under any of the conditions set forth in this Section 6-1.06, such suspension of Work shall not relieve the Contractor of its legal responsibilities as set forth in these General Conditions.

6-1.07 **TIME OF COMPLETION.** The Contractor shall complete the entire Work, including Installation, repairs, startup, troubleshooting, painting, and touchup, training, submittal or record drawings, and manuals, cleanup, demobilization, and all other Work within the number of Days set forth in the Supplemental Conditions. The time for completion includes an allowance for working time lost due to normal inclement weather.

Extensions of time may be allowed for unusual inclement weather under the provisions hereinafter described. Unusual inclement weather is weather which adversely affects "controlling" operations or the critical path of construction and which meets one of the following criteria:

A. For the particular calendar month in question, the number of individual Days with rainfall exceeding 0.10 inches exceeds the average number of such Days for that month over the immediately preceding five (5) years of record by at least three (3) Days.

B. For the particular calendar month in question, the total cumulative rainfall for that month exceeds the average cumulative rainfall for that month over the immediately preceding five (5) years of record by at least two inches (2").

Rainfall shall be measured at a publicly operated, maintained, and reported station in reasonable proximity to the construction site. A claim for delay shall indicate the period of rainfall which is claimed as “unusual,” the specific dates during which the unusual rainfall and subsequent wet soil conditions prevented Work, and the specific critical path tasks adversely affected by such unusual weather. A claim for delay due to unusual inclement weather shall be filed within ten (10) Days of the apparent end of the unusual inclement rainfall period, whether or not the monthly totals are available at that time. The burden of proof that weather meets the criteria for unusual weather shall be solely the responsibility of the Contractor.

It is the responsibility of the Contractor to order materials required for the Work properly and promptly on a Notice to Proceed. If evidence presented demonstrates that, in spite of the Contractor's efforts, government-established priorities controls delay material deliveries, suitable extension of time will be made.

If performance of extra Work ordered by the City or failure of the City to provide the necessary site for Installation affects construction tasks which are “controlling” or which are on the “critical path” of the Construction Schedule, suitable extensions of time will be made.

The Contractor shall not be entitled to a time extension for delays in activities on non-critical paths of the favorably reviewed schedule unless the duration of the excusable delay exceeds the total float of the activities being delayed. If the duration of an excusable delay does exceed the total float of the activities affected by the delay, the Contractor shall be entitled to an extension equal to the difference.

C. Determination that a day is a non-working day by reason of inclement weather or conditions resulting immediately therefrom, shall be made by the Director.

6-1.08 **LIQUIDATED DAMAGES.** It is agreed by the parties to the Contract

that in case all the Work called for under the Contract in all parts and requirements is not completed within the number of Days as set forth in the Supplemental Conditions, damage will be sustained by the City and that it is and will be impracticable and extremely difficult to ascertain and determine the actual damage which the City will sustain in the event of and by reason of such delay; and it is therefore agreed that the Contractor will pay to the City, the monetary amount indicated in the Supplemental Conditions in dollars (U.S.) per day for each and every calendar day of delay in completing the Work in excess of the number of Days prescribed and the number of additional calendar days, if any, authorized by Contract Change Order; and the Contractor agrees to pay said Liquidated Damages herein provided for, and further agrees that the City may deduct the amount thereof from any moneys due or that may become due the Contractor under the Contract.

It is further agreed that in case the Work is not finished and completed in all parts and requirements within the number of Days specified, the City shall have the right to increase the number of Days or not, as it may deem best to serve the interest of the City, and if it decides to increase the said number of Days, it shall further have the right to charge to the Contractor, its heirs, assigns or sureties and to deduct from the final payment for the Work all of any part, as it may deem proper, of the actual cost of engineering, inspection, superintendence, and other Overhead expenses which are directly chargeable to the Contract, and which accrue during the period of such extension, except that cost of preparation of final statement shall not be included in such charges.

6-1.09 **DELAYS AND EXTENSIONS TO THE WORK.** The Contractor must complete all Work within the time specified in the Agreement. The Contractor will be granted an extension of time and will not be assessed with liquidated damages or the cost of engineering

and inspection for any delay in substantially completing the Work (or parts thereof) beyond the time set forth in the Agreement, provided that such delay was caused by unforeseeable causes beyond the control and without the fault or negligence of the Contractor. Examples of such causes include acts of public enemy, fire, floods, abnormal weather (as described below), earthquakes, epidemics, quarantine restrictions, strikes, labor disputes and freight embargoes, fire, changes made pursuant to the provisions of “Changes in the Work” under Section 3 of these General Conditions or acts or neglect of the City not contemplated by the Contract Documents. In all cases, any extension of time is conditioned on the following:

1. That the cause is not due to the fault or negligence of the Contractor, and the Contractor has taken reasonable precautions to prevent and minimize the effects thereof; and
2. That the Contractor notifies the Director in writing within three (3) Days from the beginning of such delay specifying the nature of the delay and the measures that have been or will be taken to prevent or minimize the delay. Failure to submit written notice within this time period shall constitute an absolute waiver of any claim for a time extension.

No extension of time will be granted for a delay caused by a shortage of materials, unless the Contractor furnishes to the City documentary proof that it has diligently made every effort to obtain such materials from all known sources within reasonable reach of the work and further proof, as acceptable to the Director, that the inability to obtain such materials when originally planned did in fact cause a delay in Final Completion of the entire Work which could not be compensated for by revising the sequence of the Contractor’s operations. Only the physical shortage of material will be considered as a cause for extension of time, and no consideration

will be given to any claim that material could not be obtained at a reasonable, practical or economical cost or price, unless it is shown to the satisfaction of the City that such material could have been obtained only at exorbitant prices entirely out of line with current rates, taking into account the quantities involved and the usual practices in obtaining such quantities.

No extension of time will be granted for a delay caused by Contractor's staff turnovers, understaffing or insufficient quantity of qualified staff able to perform the necessary work.

The term "shortage of materials," as used in this section, shall apply only to materials, articles, parts or equipment which are standard items and shall not apply to materials, parts, articles or equipment which are processed, made, constructed, fabricated or manufactured to meet the specific requirements of the Contract Documents.

No extensions of time will be granted for delays that have no measureable impact on the completion of the Work (or parts thereof) under the Contract Documents. When extensions of time are granted, they will be limited to the period equivalent to the actual number of Days lost on the critical path or controlling operations of the Construction Schedule, taking into account the extent to which that delay could be decreased by reasonable mitigation measures by the Contractor. All requests for extensions of time must be supported with a critical path analysis showing the critical path and impacts to it. Contractor's failure to submit this analysis will be sufficient cause for denial of any request for a time extension.

Within a reasonable period of time after the Contractor submits the notice and information required by this section, the City will determine whether an extension of time is justified and, if so, the number of days for the extension.

Abnormal weather may be a valid basis for a time extension under the Agreement. "Abnormal Weather" occurs when the number of days of rain above 0.5 inches in a 24 hour

period exceeds the average for such rainfall in a particular month as determined by the National Weather Service. The Contractor will only be entitled to, at most, a time extension for the number of days of rain exceeding the average for that month in the locale where the Work is to be performed. If delays are caused by the Contractor or those for whom the Contractor is responsible, the Contractor will only be entitled to, at most, a time extension for the number of rain days exceeding the average for the month when the Work should have been performed.

In addition, before a time extension may be granted for abnormal weather, the Contractor must establish that the rain either significantly impacted at least sixty percent (60%) of the planned work of the controlling operations for a particular day or prohibited at least five (5) hours of work on the controlling operations planned for that day. Contractor shall employ reasonably methods to mitigate the impact of abnormal weather (i.e., dewatering, protection of site, etc.) The occurrence of rain during non-work hours or having minimal impact to work on the controlling operation shall not constitute a day of abnormal weather.

In the event that the project experiences favorable weather for a particular month (e.g., the number of actual rain days in a month less than that indicated above for allowable rain days per months), the additional float resulting from such favorable weather shall accrue to the project.

Any Contractor claim for damages or additional compensation based on delay shall be limited to only those circumstances where the Contractor has fulfilled each of the following three (3) requirements:

1. Contractor has established its entitlement to a time extension pursuant to the provisions described above regarding delay and extensions to the Work.
2. The delay was caused solely by the City's issuance of changes made pursuant to the

provisions of “Changes in the Work” under Section 3 of these General Conditions or by acts or neglect of the City.

3. The delay was unreasonable under the circumstances and not within the contemplation of the parties.

It is expressly understood and agreed that delays caused by the City will be non-compensable when there are concurrent delays caused by the Contractor. Also, the Contractor shall have no entitlement to additional compensation for any delay where there have been concurrent delays caused by non-compensable delays, including, but not limited to, fire, floods, earthquakes, epidemics, quarantine restrictions, strikes, labor disputes, and freight embargoes.

Contractor’s damages and/or additional compensation for delays will consist solely of the extended costs of maintaining the Contractor’s Work Site presence. The Contractor will not be entitled to any extended home office overhead.

Compensation for idle time of equipment will be determined in the same manner as determinations are made for equipment used in the performance of extra work paid for on a Force Account basis with the following exceptions:

1. The time for which compensation will be paid will be the actual normal working hours during which such delay conditions exists, but in no case will exceed eight (8) hours in any one day.
2. The days for which compensation will be paid will be each calendar day of the work week (defined elsewhere in the Contract Documents) and Legal Holidays, during the existence of such delay, except that when rental of the equipment is paid for under the provisions in Section 3-1.06C, “Force Account Payment – Equipment,” of these General Conditions, no payment will be made for delays in accordance with the

provisions of this section.

Actual loss shall be understood to include no items of expense other than idle time of personnel, cost of extra moving of equipment, and cost of longer hauls. Compensation for idle time of equipment will be determined as provided in this section and compensation for idle time of personnel will be determined pursuant to Section 3-1.06A, "Force Account Payment – Labor," of these General Conditions. No markup will be added in either case for Overhead and profit. The cost of extra moving of equipment and the cost of longer hauls will be paid for as extra work as provided pursuant to "Changes to the Work" elsewhere in the Contract Documents.

6-1.10 **TERMINATION.**

6-1.10A **TERMINATION OF AGREEMENT – CONVENIENCE OF CITY.** The Department reserves the right to terminate the Contract at any time and for any reason if the Director determines that to do so would be in the best interest of the City. Any termination which is not based on the circumstances set forth in Section 6.1-10B below shall be effected by delivery to the Contractor of a Notice of Termination specifying the extent to which performance of Work under the Contract is terminated, and the date upon which such termination becomes effective.

Upon the Contractor's receipt of a written Notice of Termination for convenience, the Contractor shall cease Work as to those portions of the project so terminated and shall undertake the steps outlined in Section 6-1.10B below.

1. Acceptance of the Contract as hereinafter specified shall not relieve the Contractor of responsibility for damage to materials except as follows:
 - a. The Contractor's responsibility for damage to materials for which partial payment has been made as provided in Section 7-1.07, "Progress

Payments,” of these General Conditions and for materials furnished by the City for use in the Work and unused shall terminate when the Director certifies that such materials have been stored in the manner and at the locations he or she has directed.

- b. The Contractor's responsibility for damage to materials purchased by the City subsequent to the issuance of the notice that the Contract is to be terminated shall terminate when title and delivery of such materials has been taken by the City.
- c. When the Director determines that the Contractor has completed the Work under the Contract directed to be completed prior to termination and such other Work as may have been ordered to secure the project for termination, the Contractor will recommend that the City formally accept the Work, and immediately upon and after such Acceptance by the City, the Contractor will not be required to perform any further Work thereon and shall be relieved of its contractual responsibilities for injury to persons or damage to property which occurs after the formal Acceptance of the project by the City.

2. The total compensation to be paid to the Contractor shall be determined by the Director on the basis of the following:

- a. The reasonable cost to the Contractor, without profit, for all Work performed under the Contract, including mobilization, demobilization and Work done to secure the project for termination. Reasonable cost will include a reasonable allowance for project Overhead and general

administrative Overhead not to exceed a total of seven percent (7%) of Direct Costs of such Work.

- b. A reasonable allowance for profit on the cost of the Work performed as determined under subsection (a), provided the Contractor establishes to the satisfaction of the Director that it is reasonably probable that it would have made a profit had the Contract be completed and provided further, that the profit allowed shall in no event exceed four percent (4%) of said cost.
- c. The reasonable cost to the Contractor of handling material returned to the vendor, delivered to the Department or otherwise disposed of as directed by the Director.
- d. A reasonable allowance for the Contractor's administrative costs in determining the amount payable due to termination of the Contract.

All records of the Contractor and the Contractor's Subcontractors, necessary to determine compensation in accordance with this Section, shall be open to inspection or audit by representatives of the Department at all times after issuance of the notice that the Contract is to be terminated and for a period of three (3) years, and such records shall be retained for that period.

After Acceptance of the Work by the Director, the Director may make payments on the basis of interim estimates pending issuance of the Final Statement, when in his or her opinion the amount thus paid, together with all amounts previously paid or allowed, will not result in total compensation in excess of that to which the Contractor will be entitled. All payments, including payment upon the Final Statement, shall be subject to deduction for prior payments and amounts, if any, to be kept or retained under the provisions of the Contract.

In the event that the City terminates this Contract under Section 6-1.10B below and it is determined for any reason that there was not sufficient cause to do so, the City's termination automatically will convert to a termination for convenience under this section and the terms and conditions outlined in this section automatically will be applied to effectuate the Contract termination. Thus, damages to which a Contractor may be entitled as a result of an improper default termination will be limited to the amounts provided for in this section.

The provisions of this section shall be included in all subcontracts.

6-1.10B **TERMINATION OF AGREEMENT - FOR CAUSE.** An

"Event of Default" as referred to in this section shall occur if the Contractor:

1. Fails to maintain progress of the Work in accordance with the requirements of the Contract Documents; or
2. Fails to prosecute the Work or any of its components in accordance with the Contract Documents; or
3. Persistently or repeatedly fails or refuses to supply sufficient properly skilled workers or proper material to permit the performance of the Work in accordance with the Contract Documents; or
4. Fails to make prompt payment to Subcontractors or Suppliers in accordance with the respective agreements between the Contractor and the Subcontractor and Contractor and Supplier; or
5. Fails to comply with applicable laws, ordinances or rules, regulations or orders of a public authority having jurisdiction over the Work; or
6. Abandons, assigns or sublets the Contract without approval of the City; or
7. Becomes bankrupt or is subject to appointment of a receiver on behalf of the

Contractor; or

8. Otherwise is guilty of a substantial breach of a provision of the Contract Documents.

Upon the City's reasonable belief that there has been an Event of Default by the Contractor, the City may elect to give the Contractor written notice thereof. The Contractor thereafter shall cure the default as soon as possible and in no event after ten (10) Days from the Contractor's receipt of the City's written notice.

If the Contractor does not timely cure its default, the City may, without waiver of any of its other rights and remedies, elect to terminate the Contract, or portion thereof.

Upon the City's election to terminate the Contract, or portion thereof, the City shall have the right to complete the Work, or portion involved, by whatever means and methods it deems expedient, including the hiring of others on such terms as the City deems advisable. The City shall have the right to take possession of the Contractor's materials, plant, tools, equipment and property of any kind provided by or on behalf of the Contractor for the purpose of the Work, or a portion of them, without being responsible to the Contractor for wear and tear. The Contractor shall have no rights in such property during its use by the City. The City shall not be required to obtain the lowest prices for completing the Work or a portion of it but shall make such expenditures as, in the City's sole judgment, best accomplish such completion.

The expense of completing such Work or portion thereof, together with a reasonable charge for engineering, managerial and administrative services, as certified by the City, shall be charged to the Contractor, and the expense so charged shall be deducted by the City out of such monies as may be due or may at any time thereafter become due to the Contractor. In case such expense is more than the sum which otherwise would have been payable to the Contractor under the Agreement, then the Contractor or its surety or sureties shall promptly pay the amount of

such excess so due. When the City terminates the Contract under this section, the Contractor shall not be entitled to receive any further payments until the Work is completed and there has been a final settlement of costs of completing the Work covered by such notice of default.

The City will issue to the Contractor a written notice specifying that the Contract, or portion thereof, is terminated. Upon receipt of said written notice and, except as otherwise directed in writing by the City, the Contractor shall:

1. Stop all Work under the Contract; or if partial termination, stop Work relating to the terminated portion of the Agreement;
2. Perform Work the City deems necessary to secure the Work Site for termination including measures to leave the Work Site in a safe condition;
3. Remove equipment from the site of Work, as specified by the City;
4. Take such action as is reasonably necessary to protect materials from damage;
5. Notify all Subcontractors and Suppliers that the Contract or portion thereof is being terminated and that their contracts or orders are not to be further performed unless otherwise authorized in writing by the City;
6. Provide the City with an inventory list of all materials previously produced, purchased or ordered from Suppliers for use in the Work and not yet used in the Work, including its storage location, and such other information as the City may request;
7. Dispose of materials not used in the Work as directed by the Director. It shall be the Contractor's responsibility to provide the City (a) with good title to all materials purchased by the City hereunder, including materials for which partial payment has been made by the City and (b) with bills of sale or other documents of title for such

materials;

8. Subject to the prior written approval of the City, settle all outstanding liabilities and all claims arising out of Subcontractors or orders for materials terminated hereunder. To the extent directed by the City, the Contractor shall assign to the City all rights, title and interests of the Contractor under subcontracts or orders for materials terminated hereunder. The City shall be at liberty to negotiate with and engage any Subcontractors who had contracted with the Contractor for the Work;
9. Furnish the City with the documentation required to be furnished by the Contractor under the provisions of the Contract Documents, including, on projects as to which Federal funds are involved, all documentation required under the Federal requirements included in the Agreement; and
10. Take such other actions as the City may direct.

If only a portion of the Work has been terminated, the Contractor shall perform the remainder of the Work in conformity with the Contract Documents and in such a manner as not to interfere with the City or others in their performance and completion of the portion of the Work which was terminated.

The City may recover from the Contractor the amount of any loss or damage, including consequential damages, suffered or incurred as a result of the Contractor's default.

SECTION 7

ACCEPTANCE AND PAYMENT

7-1.01 **ACCEPTANCE.** When the Contractor believes that the entire Work is fully and finally completed, including the satisfactory completion of inspections, tests, and documentation specified in the Contract Documents and completion of all punch list and clean-up items, the Contractor shall submit to the City a written request for final Acceptance within fifteen (15) Days thereafter, specifying that the Work is fully and finally completed and the date on which it was completed. Within thirty (30) Days after receipt of the request for final Acceptance, the City will inspect the Work and will either:

1. Reject the request for final Acceptance, specifying the defective and/or uncompleted portions of the Work; or
2. Notify the Contractor that the Work will be accepted by Resolution of the City Council of the City of Roseville, and a Notice of Completion will be caused to be recorded by the City Clerk; or
3. Notify the Contractor that the Work has been accepted by the City but no Notice of Completion will be recorded.

If the City rejects the request for final Acceptance, the Contractor shall promptly remedy the defective and/or uncompleted portions of the Work. Thereafter, the Contractor shall again submit a written request for final Acceptance of the Work, specifying a new date based on the date the defective and/or uncompleted portions of the Work were corrected. Thereafter, the foregoing procedure shall apply successively until the City has verified that the Work is fully and finally completed and accepted the Work by Resolution of the City Council or by written

notification from the Director. Immediately upon such Acceptance, the Contractor shall be relieved of the duty of maintaining the Work as a whole.

All warranties commence upon final Acceptance of the Work. The City's final Acceptance of the Work shall not be construed as an acceptance by the City of any latent defects discovered with regard to the Contractor's work. Furthermore, Contractor's obligations under Section 5-1.22 "Responsibility for Damage and Indemnification" shall still remain applicable after the City's grant of final Acceptance of the Work.

Prior to final Acceptance, the Contractor shall submit to the City the Record Documents and Operation and Maintenance Manuals as specified in the Contract Documents.

7-1.02 **SCOPE OF PAYMENT.** The Contractor shall accept the compensation provided in the Contract as full payment for furnishing all labor, materials, tools, equipment, and incidentals necessary to the completed Work and for performing all Work contemplated and embraced under the Contract; also for loss or damage arising from the nature of the Work, or from the action of the elements, or from any unforeseen difficulties which may be encountered during the prosecution of the Work until the Acceptance by the Director and for all risks of every description connected with the prosecution of the Work, also for all expenses incurred in consequence of the suspension or discontinuance of the Work as provided in the Contract; and for completing the Work according to the Contract. Neither the payment of any estimate nor of any retained percentage shall relieve the Contractor of any obligation to make good any defective Work or material.

No compensation will be made in any case for loss of anticipated profits.

7-1.03 **NOTICE OF POTENTIAL CLAIM.** The Contractor shall not be entitled to the payment of any additional compensation for any act or failure to act by the City,

including failure or refusal to issue a Change Order, or for the happening of any event, thing, occurrence or other cause unless the Contractor has given the City due written Notice of Potential Claim as hereinafter specified, provided, however, that compliance with this Section 7-1.03 shall not be a prerequisite as to matters within the scope of the notice provisions in Section 6-1.07, "Time of Completion," or the notice provisions in Section 6-1.08, "Liquidated Damages," of these General Conditions, nor to any claim which is based on differences in measurement or errors of computation as to correct quantities.

The written Notice of Potential Claim shall set forth the reasons for which the Contractor believes additional compensation will or may be due, the nature of the costs involved, and, insofar as possible, the amount of the potential claim. The said Notice as above required must have been given to the Director prior to the time that the Contractor shall have performed the Work giving rise to the potential claim for additional compensation, if based on an act or failure to act by the Director, or in all other cases within seven (7) Days after the happening of the event, thing, occurrence or other cause giving rise to the potential claim.

If the Notice of Potential Claim does not include complete information about the claim or the parties do not execute a Contract Change Order in connection with the Notice of Potential Claim, Contractor shall submit complete information about its claim for additional compensation and/or extension of time for performance within fifteen (15) Days after such work is performed. Failure to provide written notice of claim prior to undertaking such work or failure to timely submit a complete and specific information about the claim for additional compensation and/or extension of the time for performance shall be deemed a waiver and abandonment of such claim.

If there is a dispute over any claim, the Contractor shall continue to Work during the dispute resolution process in a diligent and timely manner as directed by the City, and shall be

governed by all applicable provision of the Agreement.

The Contractor shall maintain cost records of all Work that is the basis of any dispute. On a daily basis, Contractor shall submit to City completed daily forms, the format of which will be acceptable to the City, with respect to the Contractor's costs of performing the disputed work. These daily forms shall itemize all of Contractor's costs in performing the disputed work, including, but not limited to, all costs relating to materials, labor and equipment with respect to the disputed work. These daily forms shall provide names or identification and classification of affected workers, the hourly rate of pay and hours worked, and also the size, type, and identification number of equipment and hours operated. Said daily work forms shall be duly signed and verified by the Contractor or its authorized representative. The City's receipt of the Contractors' daily forms shall not constitute an approval of the Contractor's claim. Contractor's failure to submit the daily forms on a daily basis shall constitute a waiver of the Contractor's right to claim any additional compensation for the disputed work.

Each Contractor claim shall include full and complete information concerning the Claim. Contractor shall provide a clear, concise recital of the basis, upon which the claim is asserted, including a designation of the provisions of the Contract Documents upon which the claim is based. Contractor shall also include a statement as to the amount of time and/or compensation sought pursuant to the claim; if Contractor's claim arises from an ongoing occurrence, Contractor shall so state in its claim, including a description of the specific Work activities affected by the claim. All costs, expenses or damages and extensions of time claimed shall be described in reasonable detail under the circumstances together with complete supporting documentation.

The City will review any timely Notice of Potential Claim and supporting information

submitted by Contractor. In conducting this review, the City shall have the right to require the Contractor to submit such additional or supporting documents, data and other information as the City may require.

If an agreement can be reached which resolves the Contractor's claim, the parties will execute a Contract Change Order to document the resolution of the claim. If the parties cannot reach agreement with respect to the Contractor's claim, the Contractor shall still be obligated to comply with the claim identification provisions identified in these General Conditions, including but not limited to Section 7-1.04.

It is the intention of this Section 7-1.03 that differences between the parties arising under and by virtue of the Contract be brought to the attention of the Director at the earliest possible time in order that such matters may be settled, if possible, or other appropriate action promptly taken. The Contractor hereby agrees that it shall have no right to additional compensation for any Claim that may be based on any such act, failure to act, event, thing or occurrence for which no timely written Notice of Potential Claim as herein required was filed.

7-1.04 **CLAIMS.** Contractor must submit all Claims, for which it has previously submitted a Notice of Potential Claim, prior to Acceptance of the Work. Each such Claim must be sent to the City by registered mail or certified mail with return receipt requested and must contain reasonable documentation to support the Claim.

Upon receipt of a Claim, the City shall conduct a reasonable review of the Claim and, within a period not to exceed forty-five (45) Days, or such further time as mutually agreed upon or necessary pursuant to Public Contract Code Section 9204, the City shall provide the Contractor a written statement identifying what portion of the Claim is disputed and what portion is undisputed. If the City does not respond to a Claim from the Contractor within the time

specified herein, such Claim shall be deemed rejected in its entirety.

Any payment due on an undisputed portion of the Claim shall be processed and made within sixty (60) Days after the City issues its written statement.

If the Contractor disputes the City's written response, or if the City does not respond within the time specified herein, the Contractor may demand in writing an informal conference to meet and confer for settlement of the issues in dispute. Upon receipt of a demand in writing sent by registered mail or certified mail, return receipt requested, the City shall schedule a meet and confer conference within thirty (30) Days for settlement of the dispute.

Within ten (10) business days following the conclusion of the meet and confer conference, if the claim or any portion of the claim remains in dispute, the City shall provide the Contractor a written statement identifying the portion of the Claim that remains in dispute and the portion that is undisputed. Any payment due on an undisputed portion of the Claim shall be processed and made within sixty (60) Days after the City issues its written statement. Any disputed portion of the Claim, as identified by the Contractor in writing, shall be submitted to nonbinding mediation, with the City and the Contractor sharing the associated costs equally. The City and the Contractor shall mutually agree to a mediator within ten (10) business days after the disputed portion of the Claim has been identified in writing. If the parties cannot agree upon a mediator, each party shall select a mediator and those mediators shall select a qualified neutral third party to mediate with regard to the disputed portion of the Claim. Each party shall bear the fees and costs charged by its respective mediator in connection with the selection of the neutral mediator. If mediation is unsuccessful, the parts of the Claim remaining in dispute shall be resolved in accordance with Section 7-1.05 below.

7-1.05 **DISPUTE RESOLUTION PROCEDURE.** All Claims not resolved

pursuant to Section 7-1.04, shall be resolved pursuant to Public Contract Code Section 10240, et seq.

7-1.06 **STOP PAYMENT NOTICES.** The City, by and through the Department or other appropriate office or officers, may at its option and at any time retain out of any amounts due the Contractor, sums sufficient to cover claims, filed pursuant to Civil Code Section 9350, et seq., including an amount to provide for the reasonable cost of any litigation thereunder.

7-1.07 **PROGRESS PAYMENTS.** Within fifteen (15) Days after the effective date in the Notice to Proceed, but in any event prior to Contractor's first Application for Payment, the Contractor shall submit to the City a detailed Schedule of Values.

Upon its approval, the Schedule of Values will form a basis for determining the compensation payable to the Contractor based on its actual progress of Work with respect to each Lump Sum bid item. The City, prior to any progress payment being made, must approve the Schedule of Values.

At the Director's discretion the approved Schedule of Values may be used as the basis for calculating the adjustment in compensation for a lump sum bid item due to changes ordered by the Director. When an ordered change increases or decreases the quantities shown in an approved Schedule of Values, at the Director's discretion, the adjustment in compensation may be determined in the same manner specified for increases and decreases in the quantity of a bid item of work in accordance with Section 3-1.05(B), "Contract Price Adjustment," of these General Conditions.

The Contractor once in each month shall submit an Application for Payment, for approval by the Director. Contractor's Applications shall be based on the Schedule of Values submitted to the City. These applications shall be supported by: (1) documentation requested by the City to

substantiate the payment request; (2) statutory releases from Contractor and all Subcontractors and suppliers pursuant to Civil Code Sections 8132 and 8138; and (3) certified payroll records for the period for which payment is requested. Specifically, the Contractor will submit conditional waivers upon progress payment executed by all contractors and suppliers that will be receiving sums sought in the instant payment request and also submit unconditional waivers upon progress payment executed by all contractors and suppliers that have been paid to the date of the payment request. The Contractor shall certify that the Work for which payment is requested has been accomplished. When requested by the City, the Contractor shall submit receipts, invoices and other documentation that the City requires to be furnished for purpose of evaluating the application.

The City will pay the Contractor within thirty (30) Days after its receipt of an undisputed and properly submitted Application for Payment, after deducting all previous payments, retention, and other sums as described in the Contract Documents. Within seven (7) Days of its receipt of the Contractor's Application for Payment, the City will determine whether it complies with the provisions of the Contract Documents. As appropriate, the City will return the application to the Contractor accompanied by a document prepared by the City setting forth the reasons for the rejection. Thereafter, the Contractor shall correct and resubmit the Application for Payment. Progress payments may be withheld for Work that is not performed in accordance with the Contract Documents.

The City may deduct the following from each progress payment:

1. An amount equal to one hundred and twenty-five percent (125%) of the amount claimed under any stop payment notice or other lien filed against the Contractor, which includes an amount to provide for the reasonable cost of any litigation

thereunder.

2. Any Liquidated Damages or Assessments that have accrued as of the date of the Application for Payment.
3. Any sums expended by the City in performing any of the Contractor's obligations under the Agreement that the Contractor has failed to perform.
4. Any other sums that the City is entitled to recover from the Contractor under the terms of the Contract including damages to the City's property.
5. The failure of the City to deduct any of the above identified sums from a progress payment shall not constitute a waiver of the City's right to such sums.

No such estimate or payment shall be construed to be an acceptance of any defective Work or improper materials.

Under no circumstances will the City make payment to unlicensed Contractors. As a condition of payment, the Contractor is required to maintain the applicable Contractor's license as identified in the Notice to Contractors for the duration of the Work.

7-1.08 **PAYMENT FOR MATERIALS AND EQUIPMENT ON HAND.**

Partial payments may be made to the extent of seventy-five percent (75%) of the cost of materials and equipment plus delivery to be incorporated in the Work, provided that such materials and equipment meet the requirements of the Contract Documents and are delivered to acceptable sites on the plant site or at other sites in the vicinity that are acceptable to the City and only with the prior written approval by the City. Such delivered costs of stored or stockpiled materials and equipment may be included in the next progress payment after the following conditions are met:

- A. Equipment and materials will only be eligible if given conditional or final

Acceptance by the Director and are in apparent compliance with favorably reviewed Submittals.

B. Only equipment or materials which have received favorable review of Shop Drawings will qualify.

C. The material or equipment has been stored or stockpiled adequately protected against damage in a manner acceptable to the Director at an approved site.

D. The Contractor has furnished the Director with acceptable evidence of the quantity and the quality of such stored or stockpiled materials or equipment with identification of where they will be incorporated into the project with Specification reference.

E. The Contractor has furnished the Director with satisfactory evidence that the material or equipment and transportation costs have been paid.

F. The Contractor has furnished the City legal title (free of liens or encumbrances of any kind) and lien releases to the material or equipment so stored or stockpiled.

G. The Contractor has furnished the City evidence that the material or equipment so stored or stockpiled is insured against loss by damage to or disappearance of such materials at any time prior to use in the Work.

It is understood and agreed that the transfer of title and the City payment for such stored or stockpiled materials or equipment shall in no way relieve the Contractor of its responsibility for furnishing and placing such materials or equipment in accordance with the requirements of the Contract Documents.

In no case will the amount of progress payments for materials or equipment on hand exceed the Contract Price for such materials or equipment or the Contract Price for the Contract item in which the material is intended to be used.

No partial payment will be made for stored or stockpiled living or perishable plant

materials.

The Contractor shall bear all costs associated with the progress payment of stored or stockpiled materials or equipment in accordance with the provisions of this Section.

7-1.09 **RETENTION ON PROGRESS PAYMENTS.** From each progress payment estimate, five percent (5%) will be deducted and held in retention by the City. The remainder, less any deductions described in Section 7-1.07, "Progress Payments," of these General Conditions, will be paid to the Contractor as progress payments.

Pursuant to Public Contract Code Section 22300, the successful Bidder may submit Securities in lieu of retention payments by the City. Upon the Contractor's request, the City will make payment of funds withheld from progress payments, pursuant to the requirements of California Public Contract Code Section 22300, if the Contractor deposits in escrow with the City or with a bank acceptable to the City, securities eligible for investment under California Government Code Section 16430, bank or savings and loan certificates of deposit, interest bearing demand deposit accounts, standby letters of credit, or any other security mutually agreed to by the Contractor and the City, upon the following conditions:

1. The Contractor shall bear the expenses of the City and the escrow agent in connection with the escrow deposit made.
2. Securities or certificates of deposit to be placed in escrow shall be of a value at least equivalent to the amounts of retention to be paid to the Contractor pursuant to this section.
3. Contractor shall enter into an escrow agreement satisfactory to the City, which agreement shall be substantially similar to the form provided in California Public Contract Code section 22300.

4. The Contractor shall obtain the written consent of the surety to such agreement.

7-1.10 **FINAL PAYMENT.** Final payment will be made only after Contractor has achieved Final Completion of the Work pursuant to the provisions of Section 7-1.01, “Acceptance,” of these General Conditions. Before final payment can be made, the Contractor shall have furnished the City with the following:

1. All Record Documents, catalogues, instruction sheets and information as required by the Contract Documents.
2. Conditional Waivers and Releases Upon Final Payment executed by Contractor and all Subcontractors and Suppliers, as provided by Civil Code Section 8136. Unconditional Waivers and Releases Upon Final Payment, as provided in Civil Code Section 8138, executed by Contractor and all Subcontractors and Suppliers, must be provided for all Subcontractors and Suppliers that have been paid in full.

Within thirty (30) Days of the date of the City’s Acceptance of the Work, the Contractor shall prepare and submit a Final Invoice, showing the proposed total amount due the Contractor, segregated by Bid item quantities, Change Order Work, and other basis for payments; deductions made or to be made for prior payment; and amounts previously retained. Prior invoices and payments shall be subject to correction in the proposed Invoice for Final Payment. Payments to the Contractor will be made only for actual quantities of the Contract items of work constructed in accordance with the Contract Documents.

The City will review the Contractor’s proposed Final Invoice and necessary changes or corrections will be forwarded to the Contractor. Within ten (10) Days thereafter, the Contractor

shall submit a revised proposed Final Invoice incorporating changes or corrections made by the City together with any new claims resulting therefrom. Upon approval by the City, the corrected proposed Final Invoice will become the approval Final Invoice.

If agreements are reached on all questions regarding the Final Invoice, the City will pay the entire sum found due on the approved application. However, the City will withhold sums sufficient to pay all unsettled claims for which stop payment notices have been filed pursuant to Section 9350, et seq. of the California Civil Code, together with the reasonable cost of any litigation thereunder.

Final payment will be made within thirty (30) Days after receipt of an approved Final Invoice and other required Submittals referenced above or within sixty (60) Days after Acceptance of the work by the City, whichever is later, provided, however, that if an approved Final Invoice has not been submitted within sixty (60) Days after Acceptance of the Work by the City, the City may elect to make payment of sums not in dispute without prejudice to the right of either the City or the Contractor in connection with such disputed sums. Notwithstanding the foregoing, if a Notice of Completion is recorded, final payment shall not be made prior to the expiration of the thirty-five (35) calendar day lien period. The start of this lien period is the date the Placer County Recorder's Office records the Notice of Completion.

The City may withhold from the Final Payment an amount not to exceed one hundred fifty percent (150%) of any amount in dispute between the City and the Contractor.

The making of Final Payment shall not operate to release the Contractor or its sureties from obligations arising under the Contract, the Contract bonds and warranties as herein provided. Specifically, the making of final payment shall not constitute a waiver and release of claims by the City arising from:

1. Unsettled or future liens;
2. Failure of the Work to comply with the requirements of the Contract Documents;
3. The terms of any warranties required by or contained in the Contract Documents;
4. The right to any insurance proceeds or the right to make any insurance or bond claims;
5. Any claims with respect to Contractor's obligations of indemnity with respect to claims asserted by third parties; or
6. Any latent deficiencies with the Work or Contractor's fraud.

7-1.11 **CLERICAL ERRORS.** Notwithstanding the provisions of Section 7-1.10, "Final Payment," of these General Conditions, for a period of three (3) years after Acceptance of the Work, all estimates and payments made pursuant to said Section 7-1.10, are subject to correction for clerical errors in the calculations involved in the determination of quantities and payments. The Contractor and the City agree to pay to the other any sum due under the provisions of this Section 7-1.11, provided, however, if the total sum to be paid is less than \$100, no such payment shall be made.

7-1.12 **WARRANTY.** Notwithstanding inspections and Acceptance by the City of Work furnished under the Contract Documents, the Contractor hereby unconditionally guarantees that all materials and equipment furnished will be of good quality and new, that the Work will be free from defects in workmanship and materials and that the Work will conform to the requirements of the Contract Documents. Work not conforming to these requirements, including substitutions not properly approved and authorized, may be considered defective.

This warranty by the Contractor is in addition to any warranties or guarantees required elsewhere in the Contract Documents. This warranty shall be in effect notwithstanding any disclaimers, or limiting or conditional terms contained in such separate warranties furnished by manufacturers or suppliers.

The Contractor hereby agrees to repair or replace any and all Work, together with any other adjacent Work which may be displaced in so doing, that may prove to be not in accordance with the requirements of the Contract or that may be defective in its workmanship or material during the greater of a period of one (1) year after Acceptance of the Work by the City or the period specified in the Special Conditions, without any expense whatsoever to the City, ordinary wear and tear and unusual abuse or neglect excepted.

The Contractor further agrees, that within ten (10) Days after being notified in writing by the Department of any Work not in accordance with the requirements of the Contract Documents or of any defects in the Work, the Contractor will commence and prosecute with due diligence all Work necessary to fulfill the terms of this warranty, and to complete such Work within a reasonable period of time. In the event Contractor fails to comply, it does hereby authorize the Department to proceed to have such Work done at the Contractor's expense and the Contractor will honor and pay the cost and charges therefore upon demand. The Department shall be entitled to all costs and expenses, including reasonable attorneys' fees, necessarily incurred upon the Contractor's refusal to honor and pay the above costs and charges.

All warranties set forth in the Contract Documents shall be deemed cumulative and not alternative or exclusive. Nothing contained in this section shall be construed to establish a period of limitation with respect to any other obligation, which Contractor has under the Contract Documents or under any separate warranty or guaranty required thereby. The establishment of a

specific warranty period relates only to the specific obligation of Contractor to correct defective Work, and it has no relationship to the time within which its obligation to comply with the Contract Documents or applicable provision of law may be sought to be enforced, nor to the time within which proceedings may be commenced to establish Contractor's liability with respect to its obligations other than specifically to correct the Work. Without limiting the foregoing, it is understood and agreed that Contractor shall remain responsible for latent defects with its work, regardless of the expiration of any warranty period set forth in the Contract Documents.

7-1.13 **WARRANTY OF TITLE.** No material, supplies, or equipment for the Work under this Contract shall be purchased subject to any chattel mortgage, security agreement, or under a conditional sale or other agreement by which an interest therein or any part thereof is retained by the seller or supplier. The Contractor warrants good title to all material, supplies, and equipment Installed or incorporated in the Work and agrees upon completion of all Work to deliver the Premises, together with all improvements and appurtenances constructed or placed thereon by it, to the City free from any claim, liens, security interest, or charges, and further agrees that neither the Contractor nor any person, firm, or corporation furnishing any materials or labor for any Work covered by this Contract shall have any right to a lien upon the Premises or any improvement or appurtenances thereon. Provided, that this shall not preclude the Contractor from Installing metering devices and other equipment of utility companies, the title of which is commonly retained by the utility company. In the event of the Installation of any such metering device or equipment, the Contractor shall advise the City as to the legal owner thereof. Nothing contained in this paragraph, however, shall defeat or impair the right of such persons furnishing materials or labor under any bond given by the Contractor for their protection or any rights under any law permitting such persons to look to funds due the Contractor in the hands of the City.

The provisions of this paragraph shall be inserted in all subcontracts and material Contracts, and notice of its provisions shall be given to all persons furnishing materials for the Work when no formal Contract is entered into for such materials.

[END OF GENERAL CONDITIONS]

SUPPLEMENTAL CONDITIONS

Industrial Substation 12kV Switchgear Replacement and Fiddymont Substation Transformer
Addition Project

Scope of Supplemental Conditions

1. The Work shall be performed in accordance with the General Conditions and Department Standards, except as the General Conditions may be modified by the following additional City Standards, incorporated herein by this reference, if so indicated.

	COMMUNITY DESIGN GUIDELINES 311 Vernon Street, Roseville, CA 95678
X	SPECIFICATIONS FOR COMMERCIAL CONSTRUCTION (ELECTRIC) 2090 Hilltop Circle, Roseville, CA 95747
	PARKS CONSTRUCTION STANDARDS 316 Vernon Street, Suite 400, Roseville, CA 95678
	DESIGN AND CONSTRUCTION STANDARDS 311 Vernon Street, Roseville, CA 95678
	OTHER

Above documents are available at: www.roseville.ca.us.

2. Numbering in these Supplemental Conditions conforms to that in the General Conditions. The existence of a section in these Supplemental Conditions means that the corresponding section in the General Conditions is modified in some respect. Unless otherwise specified, the modified General Condition is deleted entirely and the provisions of these Supplemental Conditions are substituted.

SECTION 1. DEFINITIONS AND TERMS

1-1.24 **DEPARTMENT.** Section 1-1.24 of the General Conditions is amended to include the following:

The Department for Contract Administration is the Electric Department of the City of Roseville.

SECTION 2. CONTROL AND SCOPE OF THE WORK

2-1.08 **SUBMITTALS.** Section 2-1.08 of the General Conditions is amended to include the following:

The time allowed for review of each submittal is 5 Days after receipt of the submittal by the Director.

SECTION 3. CHANGES IN THE WORK

There are no amendments to the General Conditions.

SECTION 4. CONTROL OF MATERIALS

There are no amendments to the General Conditions.

SECTION 5. LEGAL RELATIONS AND RESPONSIBILITY

5-1.14 **AIR POLLUTION CONTROL AND ASBESTOS.** Section 5-1.14 of the General Conditions is amended to include the following:

To the best of the City's knowledge, asbestos not present in the vicinity of the Project. Additional information shall be made available to Contractor upon request.

SECTION 6. PROSECUTION AND PROGRESS

6-1.04 **PROGRESS SCHEDULE.** Section 6-1.04F of the General Conditions is amended to include the following:

Progress schedules showing project completion dates more than 30 Days earlier than specified in Section 6-1.07 shall be rejected.

6-1.07 **TIME OF COMPLETION.** Section 6-1.07 of the General Conditions is amended to include the following:

The Contractor shall begin Work within 5 business days after receiving a Notice to Proceed and shall diligently prosecute the Work to completion. The Work shall be completed within 125 calendar days of the Notice to Proceed.

If landscaping plants require an establishment period, that period will be 60 calendar days. Start of the establishment should be as outlined in the Specifications.

6-1.08 **LIQUIDATED DAMAGES.** Section 6-1.08 of the General Conditions is amended to include the following:

The amount of Liquidated Damages is the sum of \$500 per Day.

SECTION 7: ACCEPTANCE AND PAYMENT

There are no amendments to the General Conditions.

[END OF SUPPLEMENTAL CONDITIONS]

TEXT OF AB 626

Assembly Bill No. 626

CHAPTER 810

An act to add and repeal Section 9204 of the Public Contract Code, relating to public contracts.

[Approved by Governor September 29, 2016. Filed with Secretary of State September 29, 2016.]

LEGISLATIVE COUNSEL'S DIGEST

AB 626, Chiu. Public contracts: claim resolution.

Existing law prescribes various requirements regarding the formation, content, and enforcement of state and local public contracts. Existing law applicable to state public contracts generally requires that the resolution of claims related to those contracts be subject to arbitration. Existing law applicable to local agency contracts prescribes a process for the resolution of claims related to those contracts of \$375,000 or less.

This bill would establish, for contracts entered into on or after January 1, 2017, a claim resolution process applicable to any claim by a contractor in connection with a public works project. The bill would define a claim as a separate demand by the contractor for one or more of the following: a time extension for relief from damages or penalties for delay, payment of money or damages arising from work done pursuant to the contract for a public work, or payment of an amount disputed by the public entity, as specified.

This bill would require a public entity, defined to exclude certain state entities, upon receipt of a claim sent by registered or certified mail, to review it and, within 45 days, provide a written statement identifying the disputed and undisputed portions of the claim. The bill would authorize the 45-day period to be extended by mutual agreement. The bill would require any payment due on an undisputed portion of the claim to be processed within 60 days, as specified. The bill would require that the claim be deemed rejected in its entirety if the public entity fails to issue the written statement.

This bill would authorize, if the claimant disputes the public entity's written response or if the public entity fails to respond to a claim within the time prescribed, the claimant to demand to meet and confer for settlement of the issues in dispute. The bill would require any disputed portion of the claim that remains in dispute after the meet and confer conference to be subject to nonbinding mediation, as specified. The bill would provide that unpaid claim amounts accrue interest at 7% per annum. The bill would prescribe a procedure by which a subcontractor or lower tier contractor may make a claim through the contractor.

This bill would require the text of these provisions, or a summary, to be set forth in the plans or specifications for any public work which may give rise to a claim. The bill would specify that a waiver of these rights is void and contrary to public policy, except as specified. The bill would also specify that it does not impose liability on a public entity that makes loans or grants available through a competitive application process, for the failure of an awardee to meet its contractual obligations.

By increasing the duties of local agencies and officials, this bill would impose a state-mandated local program.

This bill would, on January 1, 2020, repeal the provision establishing the claim resolution process.

This bill would specify that these provisions constitute a matter of statewide concern.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

The people of the State of California do enact as follows:

SECTION 1. Section 9204 is added to the Public Contract Code, to read:

9204. (a) The Legislature finds and declares that it is in the best interests of the state and its citizens to ensure that all construction business performed on a public works project in the state that is complete and not in dispute is paid in full and in a timely manner.

(b) Notwithstanding any other law, including, but not limited to, Article 7.1 (commencing with Section 10240) of Chapter 1 of Part 2, Chapter 10 (commencing with Section 19100) of Part 2, and Article 1.5 (commencing with Section 20104) of Chapter 1 of Part 3, this section shall apply to any claim by a contractor in connection with a public works project.

(c) For purposes of this section:

(1) "Claim" means a separate demand by a contractor sent by registered mail or certified mail with return receipt requested, for one or more of the following:

(A) A time extension, including, without limitation, for relief from damages or penalties for delay assessed by a public entity under a contract for a public works project.

(B) Payment by the public entity of money or damages arising from work done by, or on behalf of, the contractor pursuant to the contract for a public works project and payment for which is not otherwise expressly provided or to which the claimant is not otherwise entitled.

(C) Payment of an amount that is disputed by the public entity.

(2) "Contractor" means any type of contractor within the meaning of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code who has entered into a direct contract with a public entity for a public works project.

(3) (A) "Public entity" means, without limitation, except as provided in subparagraph (B), a state agency, department, office, division, bureau, board, or commission, the California State University, the University of California, a city, including a charter city, county, including a charter county, city and county, including a charter city and county, district, special district, public authority, political subdivision, public corporation, or nonprofit transit corporation wholly owned by a public agency and formed to carry out the purposes of the public agency.

(B) "Public entity" shall not include the following:

(i) The Department of Water Resources as to any project under the jurisdiction of that department.

(ii) The Department of Transportation as to any project under the jurisdiction of that department.

(iii) The Department of Parks and Recreation as to any project under the jurisdiction of that department.

(iv) The Department of Corrections and Rehabilitation with respect to any project under its jurisdiction pursuant to Chapter 11 (commencing with Section 7000) of Title 7 of Part 3 of the Penal Code.

(v) The Military Department as to any project under the jurisdiction of that department.

(vi) The Department of General Services as to all other projects.

(vii) The High-Speed Rail Authority.

(4) "Public works project" means the erection, construction, alteration, repair, or improvement of any public structure, building, road, or other public improvement of any kind.

(5) "Subcontractor" means any type of contractor within the meaning of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code who either is in direct contract with a contractor or is a lower tier subcontractor.

(d) (1) (A) Upon receipt of a claim pursuant to this section, the public entity to which the claim applies shall conduct a reasonable review of the claim and, within a period not to exceed 45 days, shall provide the claimant a written statement identifying what portion of the claim is disputed and what portion is undisputed. Upon receipt of a claim, a public entity and a contractor may, by mutual agreement, extend the time period provided in this subdivision.

(B) The claimant shall furnish reasonable documentation to support the claim.

(C) If the public entity needs approval from its governing body to provide the claimant a written statement identifying the disputed portion and the undisputed portion of the claim, and the governing body does not meet within the 45 days or within the mutually agreed to extension of time following receipt of a claim sent by registered mail or certified mail, return receipt requested, the public entity shall have up to three days following the next duly publicly noticed meeting of the governing body after the 45-day period, or extension, expires to provide the claimant a written statement identifying the disputed portion and the undisputed portion.

(D) Any payment due on an undisputed portion of the claim shall be processed and made within 60 days after the public entity issues its written statement. If the public entity fails to issue a written statement, paragraph (3) shall apply.

(2) (A) If the claimant disputes the public entity's written response, or if the public entity fails to respond to a claim issued pursuant to this section within the time prescribed, the claimant may demand in writing an informal conference to meet and confer for settlement of the issues in dispute. Upon receipt of a demand in writing sent by registered mail or certified mail, return receipt requested, the public entity shall schedule a meet and confer conference within 30 days for settlement of the dispute.

(B) Within 10 business days following the conclusion of the meet and confer conference, if the claim or any portion of the claim remains in dispute, the public entity shall provide the claimant a written statement identifying the portion of the claim that remains in dispute and the portion that is undisputed. Any payment due on an undisputed portion of the claim shall be processed and made within 60 days after the public entity issues its written statement. Any disputed portion of the claim, as identified by the contractor in writing, shall be submitted to nonbinding mediation, with the public entity and the claimant sharing the associated costs equally. The public entity and claimant shall mutually agree to a mediator within 10 business days after the disputed portion of the claim has been identified in writing. If the parties cannot agree upon a mediator, each party shall select a mediator and those mediators shall select a qualified neutral third party to mediate with regard to the disputed portion of the claim. Each

party shall bear the fees and costs charged by its respective mediator in connection with the selection of the neutral mediator. If mediation is unsuccessful, the parts of the claim remaining in dispute shall be subject to applicable procedures outside this section.

(C) For purposes of this section, mediation includes any nonbinding process, including, but not limited to, neutral evaluation or a dispute review board, in which an independent third party or board assists the parties in dispute resolution through negotiation or by issuance of an evaluation. Any mediation utilized shall conform to the timeframes in this section.

(D) Unless otherwise agreed to by the public entity and the contractor in writing, the mediation conducted pursuant to this section shall excuse any further obligation under Section 20104.4 to mediate after litigation has been commenced.

(E) This section does not preclude a public entity from requiring arbitration of disputes under private arbitration or the Public Works Contract Arbitration Program, if mediation under this section does not resolve the parties' dispute.

(3) Failure by the public entity to respond to a claim from a contractor within the time periods described in this subdivision or to otherwise meet the time requirements of this section shall result in the claim being deemed rejected in its entirety. A claim that is denied by reason of the public entity's failure to have responded to a claim, or its failure to otherwise meet the time requirements of this section, shall not constitute an adverse finding with regard to the merits of the claim or the responsibility or qualifications of the claimant.

(4) Amounts not paid in a timely manner as required by this section shall bear interest at 7 percent per annum.

(5) If a subcontractor or a lower tier subcontractor lacks legal standing to assert a claim against a public entity because privity of contract does not exist, the contractor may present to the public entity a claim on behalf of a subcontractor or lower tier subcontractor. A subcontractor may request in writing, either on his or her own behalf or on behalf of a lower tier subcontractor, that the contractor present a claim for work which was performed by the subcontractor or by a lower tier subcontractor on behalf of the subcontractor. The subcontractor requesting that the claim be presented to the public entity shall furnish reasonable documentation to support the claim. Within 45 days of receipt of this written request, the contractor shall notify the subcontractor in writing as to whether the contractor presented the claim to the public entity and, if the original contractor did not present the claim, provide the subcontractor with a statement of the reasons for not having done so.

(e) The text of this section or a summary of it shall be set forth in the plans or specifications for any public works project that may give rise to a claim under this section.

(f) A waiver of the rights granted by this section is void and contrary to public policy, provided, however, that (1) upon receipt of a claim, the parties may mutually agree to waive, in writing, mediation and proceed directly to the commencement of a civil action or binding arbitration, as applicable; and (2) a public entity may prescribe reasonable change order, claim, and dispute resolution procedures and requirements in addition to the provisions of this section, so long as the contractual provisions do not conflict with or otherwise impair the timeframes and procedures set forth in this section.

(g) This section applies to contracts entered into on or after January 1, 2017.

(h) Nothing in this section shall impose liability upon a public entity that makes loans or grants available through a competitive application process, for the failure of an awardee to meet its contractual obligations.

(i) This section shall remain in effect only until January 1, 2020, and as of that date is

repealed, unless a later enacted statute, that is enacted before January 1, 2020, deletes or extends that date.

SECTION 2.

The Legislature finds and declares that it is of statewide concern to require a charter city, charter county, or charter city and county to follow a prescribed claims resolution process to ensure there are uniform and equitable procurement practices.

SECTION 3.

If the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code.

**SPECIFICATION
INDUSTRIAL SUBSTATION SWITCHGEAR FOUNDATION
AND FIDDYMENT TRANSFORMER ADDITION
CONSTRUCTION SPECIFICATION**

TABLE OF CONTENTS

1. SCOPE OF WORK
2. GENERAL PROVISIONS
3. DRAWING LIST
4. EXISTING SITE CONDITIONS
5. CONSTRUCTION SURVEYING
6. SITE PREPARATION AND GRADING
7. EARTHWORK AND COMPACTION
8. EXCAVATION AND BACKFILLING FOR TRENCHES AND FOUNDATIONS
9. UNDERGROUND CABLE CONDUITS AND TRENCHES
10. GROUNDING SYSTEM
11. REINFORCED CONCRETE FOUNDATIONS
12. CAST-IN-PLACE CONCRETE
13. CRUSHED ROCK SURFACING
14. AGGREGATE BASE
15. ASPHALT CONCRETE PAVEMENT

1. **SCOPE OF WORK**

- 1.1 This Specification covers the labor, supervision and materials required for the following projects:
 - 1.1.1 Replace the bay 2 medium voltage switchgear concrete foundation at Industrial Substation. This project consists of the following: clearing and grubbing of existing concrete foundation, construction of new reinforced concrete foundation, installation of underground electrical conduits, installation and reconfiguration of concast trench system, grounding and grounding pigtails as shown on drawings and as needed, and repair of any part of the substation yard that is disturbed.
 - 1.1.2 Construct new facilities at Fiddymment Substation. This project consists of the following: construction of new reinforced concrete pads and piers, installation of underground electrical conduits, installation of Concast trench system, grounding and grounding pigtails as necessary, and repair of any existing facilities disturbed during construction.
- 1.2 Work Included: Contractor shall perform all labor, coordination, supervision, surveying, inspection, site and laboratory testing that is required to construct the needed items. All labor, material, testing and associated construction costs are the responsibility of the Contractor unless specifically stated otherwise.

The principal components of the work include, but are not limited to the following:

- 1.2.1 Establish the reference and boundary lines.
- 1.2.2 Demo reinforced concrete switchgear foundation as shown on the drawings.
- 1.2.3 Construct concrete foundations for the new equipment as shown on the drawings.
- 1.2.4 Furnish and install underground low voltage control wiring conduits and reconfigure cable trench system as shown on drawings.
- 1.2.5 Repair substation grounding system as necessary for excavation and construction of concrete foundations.
- 1.2.6 Reconstruct conduits as needed for outgoing distribution circuits
- 1.2.7 Remove and dispose of all surplus materials including surplus excavated materials from sites.
- 1.2.8 Install and remove new concast trench system as needed.
- 1.2.9 Install underground junction boxes as necessary.

1.2.10 Install new grounding and grounding pigtailed as shown on the drawings.

1.2.11 Supply and implement necessary BMP's for erosion and sediment control.

1.3 This Specification shall be used together with the following:

1.3.1 Construction drawings listed in Section 3.

1.3.2 The Supplemental Conditions.

1.3.3 Roseville Electric Specifications for Commercial Construction.

1.3.4 Other standard specifications.

1.3.5 General Conditions for Buildings and Grounds.

In case of any conflicts between the requirements stated above, the order of precedence shall be as follows:

- A. Construction drawings listed in Section 3 (highest).
- B. The Supplemental Conditions.
- C. This Specification.
- D. Other standard specifications.
- E. General Conditions for Buildings and Grounds.

2. GENERAL PROVISIONS

2.1 Contractor shall examine the site and determine the amount, nature and difficulty of the proposed work. Contractor shall evaluate the requirements of the plans, specifications, bid package and existing conditions and bid accordingly. Contractor shall satisfy himself/herself of the soil conditions prior to bidding this project. The contract price shall be based on a lump sum basis.

2.2 If there is a doubt as to the true meaning of any part of the plans, specifications, or the contract documents or if discrepancies in or omissions from the drawings or specifications are found, a written request should be made to the City for interpretation. No payment will be made to the Contractor because of error, negligence or failure to become familiar with the existing conditions or requirements of the plans, specifications and bid package.

- 2.3 The safety of all materials and labor used in this project is left solely to the Contractor. Any loss due to weather, acts of God, vandalism, theft, poor workmanship, or any other loss is the responsibility of the Contractor and it is assumed to be part of this bid and bid price. City will not be responsible for the loss of any material and/or labor.
- 2.4 Appropriate tarps and covers shall be used to protect all open trenches, excavations and removed materials that are planned to be used for backfill from wind, rain and other weather conditions.
- 2.5 Underground Service Alert (USA) must be called before any digging is started. The phone number of USA is 1-800-642-2444. There are existing underground installations in the working area including electrical power cables installed by the City, water and sewer lines, gas and telephone facilities. The as-built drawings are available for inspection at the Electric Department. These drawings are not exact and the Contractor agrees to hold the City harmless for any errors that may be on the plans or for any damage that the Contractor may do to existing facilities due to the plans. Any damage to existing underground facilities including the electrical power cables or to the conduit system done by the Contractor is the complete responsibility of the Contractor. **There are existing underground conductors energized at 12,000 volts on and adjacent to this site.**
- 2.6 There are existing exposed 230-kV and 60-kV energized conductors above the working areas. All work under these exposed conductors shall be restricted at ground level only. Outage and clearance must be pre-arranged with Roseville Electric before working in close proximity to the live conductors. Overhead conductors **will not be removed** to allow access for drilling equipment. Drilling equipment must be of a height as to not interfere or damage overhead conductors.
- 2.7 All work inside the existing energized Industrial and Fiddymont Substations will be under the supervision of City of Roseville Electric Department's representative to ensure all relevant safety procedures are followed.
- 2.8 If work is performed within 10 feet of normally energized equipment, suitable type of protective clothing shall be used by all persons per specification 2.9 below. The 10 feet is not the reach distance. It is measured as a footprint with a 10-foot perimeter around all normally energized equipment including wire, overhead line, bus and underground cable. Inside this perimeter, approved FR protective clothing shall be worn. When working at ground level only in an area without any aboveground energized conductors, if the work does not dig in or expose any underground live cables, the FR clothing requirement may be waived with the approval from Roseville Electric site supervisor or Engineer.
- 2.9 When working within the 10-foot perimeter of energized equipment as defined by 2.8 above, no clothing made from acetate, nylon, polyester, and rayon alone or in blends shall be worn. Clothing or underwear worn next to the skin shall be made of FR material or

natural fibers. Caution – some of the new synthetic materials melt at temperatures as low as 140 deg. C. Personnel that may be exposed to an electric arc shall wear the FR shirt rated at 8 ATPV over 100% cotton T-shirt in conjunction with FR pants rated at 8 ATPV. Worn and threadbare denim pants do not have the ignition or protective level required shall not be worn. The FR shirt sleeves shall be rolled down and secured at the wrist when exposed to the potential thermal hazard area.

- 2.10 Contractor shall coordinate and comply with the statutory requirements of all relevant authorities for the due and lawful prosecution of the work. The contractor shall be liable for all monetary fines assessed during construction due to non-compliance on the part of the contractor and subcontractors.
- 2.11 Unless otherwise approved by the Engineer, the normal working hours shall be limited to Monday through Friday, excluding City's holidays, between 7 a.m. and 3:30 p.m.
- 2.12 Contractor shall preserve the existing landscape surrounding the substation site. Any damage done to the landscaping in the surrounding area by the Contractor shall be repaired to the City's satisfaction at the cost of the Contractor. This cost is assumed to be part of this bid and bid price.
- 2.13 **Except as otherwise provided in Section 2.14, Contractor shall furnish all materials, utilities, electrical power, supplies, tools, construction equipment, temporary traffic facilities, and all items of consumable nature that are required to complete the work.**
- 2.14 The following lists the items that will be furnished by the City:
 - 2.14.1 Anchor bolts for the 12kV Switchgear at Industrial Substation.
 - 2.14.2 Anchor bolts for the 230/60kV Transformer at Fiddymont Substation.
 - 2.14.3 Anchor bolts and anchor bolt templates for concrete pier foundations at Fiddymont Substation.
- 2.15 A mandatory prebid meeting will be held in accordance with meeting details posted on the Public Purchase website which will include an inspection of the project sites. FR clothing per sections 2.8 and 2.9 shall be required for the on-site inspection.
- 2.16 **Contractor Submittals and Qualification-** Along with the bid submittal, contractor shall provide a list of substation projects for Electric Utilities only that have been completed in last fifteen years. The project list shall include scope of work, total contract amount, change orders and number of weeks to complete the entire project. The client list shall include the name, address and contact phone numbers of all companies for which the contractor has previously built related projects. **Contractor and its foreman or supervisor assigned for this project must have performed construction projects in at least three electric**

substations at 60-kV or above, during the last ten years. Please identify the name and location of your three most recent electric substation projects. Bids will be rejected by any Contractor that does not meet these requirements/qualifications.

2.17 **Time of Completion:** The Contractor shall perform all specified work within the following number of days after the date on the Notice to Proceed.

2.17.1 Work at Industrial Substation shall take place approximately between late August and late September 2020:

Begin Site Construction	5 calendar days
Switchgear Foundation	20 calendar days
Conduit, Concast Trench, Ground Grid	10 calendar days

2.17.2 Work at Fiddymont Substation shall take place approximately between October and December 2020:

Begin Site Construction	5 calendar days
Transformer Foundation	45 calendar days
Complete all work	90 calendar days

2.18 **Prevailing Wages and DIR Registration Notice** - A portion of the services described herein are for publicly funded projects, considered “public works” as defined by California Labor Code Section 1720 et seq. Any Contractor awarded a contract as the result of this bid shall be responsible for compliance with all applicable prevailing wage laws, as well as any and all applicable state or federal wage laws, for services performed under any resulting contract. Fee schedules must differentiate hourly rates for public works and private development projects and be consistent with applicable prevailing wage requirements.

Provide documentation verifying that your firm and any sub-consulting firm is registered with the Department of Industrial Relations (DIR), including the Public Works Contractor (PWC) Registration Number for all firms. Consultants are hereby notified that this agreement and task agreements hereunder are, as applicable, subject to compliance monitoring and enforcement by DIR.

2.19 **Mitigation Monitoring and Reporting –**

Mitigation Measure CR-1 (Previously Unidentified Cultural Resources)

- (a) Construction shall stop if potential cultural resources are encountered. It is possible that previous activities have obscured surface evidence of cultural resources. If signs of an archeological site, such as any unusual amounts of stone, bone, or shell, are uncovered during grading or other construction activities, work

shall be halted within 100 feet of the find and the Roseville City Manager's Office shall be notified. A qualified archeologist shall be consulted for an on-site evaluation. If the site is or appears to be eligible for listing in state or federal registers, additional mitigation, such as further testing for evaluation or data recovery, may be necessary.

- (b) In the event resources are discovered, the City shall request a qualified archaeologist assess the find, and determine whether the resource requires further study. Any previously undiscovered resources found during construction should be recorded on appropriate Department of Parks and Recreation (DPR) 523 forms and evaluated for significance under all applicable regulatory criteria.
- (c) No further grading shall occur in the area of the discovery until the City approves the measures to protect the resources. Any archaeological artifacts recovered as a result of mitigation shall be donated to a qualified scientific institution approved by the Lead Agency where they would be afforded long-term preservation to allow future scientific study.

Mitigation Measure CR-2 (Previously Unidentified Paleontological Resources)

If substantial fossil remains (particularly vertebrate remains) are discovered during earth-disturbing activities on the project site, activities will stop immediately until a state-registered professional geologist or qualified professional paleontologist can assess the nature and importance of the find and a qualified professional paleontologist can recommend appropriate treatment. Treatment may include preparation and recovery of fossil materials so that they can be housed in an appropriate museum or university collection and may also include preparation of a report for publication describing the finds. The applicant will be responsible for ensuring that recommendations regarding treatment and reporting are implemented.

Mitigation Measure CR-3 (Inadvertent Discovery of Human Remains)

If human remains are discovered during any phase of construction, including disarticulated or cremated remains, the construction contractor shall immediately cease all ground-disturbing activities within 100 feet of the remains and notify Terri Shirhall, Environmental Coordinator, City of Roseville Development Services.

In accordance with California State Health and Safety Code Section 7050.5, no further disturbance shall occur until the following steps have been completed:

- (a) The County Coroner has made the necessary findings as to origin and disposition pursuant to Public Resources Code (PRC) § 5097.98.

- (b) If the remains are determined by the County Coroner to be Native American, the NAHC shall be notified within 24 hours, and the guidelines of the NAHC shall be adhered to in the treatment and disposition of the remains. It is further recommended that a professional archaeologist with Native American burial experience conduct a field investigation of the specific site and consult with the Most Likely Descendant (MLD), if any, identified by the NAHC. As necessary and appropriate, a professional archaeologist may provide technical assistance to the MLD, including but not limited to, the excavation and removal of the human remains.

3. DRAWING LIST

315C1-07	Industrial Substation Switchgear 2 Foundation Detail
315C1-09	Industrial Substation Existing Switchgear Pad
315C1-13	Industrial Substation Location Plan
315C1-17	Industrial Substation Conduits, Trenching and Lighting
315C1-22	Industrial Substation Grounding Plan
315C1-26	Industrial Substation Conduit Layout
315C1-27	Industrial Substation Containment and Grading
315C1-34	Industrial Substation Stair/Ramp Details
325C1-01	Fiddymment Substation Vicinity and Site Location Plan
325C1-03	Fiddymment Substation Site and Grading Plan
325C1-40	Fiddymment Substation Pier & Foundation Details
325C1-41	Fiddymment Substation Transformer Foundation Details
325C1-42	Fiddymment Substation Foundation & Conduit Plan
325C1-43	Fiddymment Substation Grounding Plan

4. EXISTING SITE CONDITIONS

- 4.1 Existing underground electrical cables energized at 12,000 volts and other control cables are on both sites.
- 4.2 The existing sites have been graded. After modification work for the project, all area must be restored to the original grading.
- 4.3 Soils investigation has been carried out at Fiddymment substation.
- 4.4 Topographic Survey has not been conducted on the site.
- 4.5 A copy of the Geotechnical Report is included in this manual for Fiddymment Substation. A Geotechnical Report for Pleasant Grove Substation which is located 900 ft away from Industrial Substation has been provided as reference only. Contractor shall review this report and bid accordingly.

5. CONSTRUCTION SURVEYING

- 5.1 The Contractor shall lay out all proposed improvements in accordance with the plans and these specifications.
- 5.2 Contractor shall layout all proposed improvements from lines established by the drawings.

6. SITE PREPARATION AND GRADING

- 6.1 Contractor shall prepare the site in accordance with the drawings and these specifications. Site preparation shall include clearing of existing debris, grading and sub-grade preparation. All trench work must be inspected by Roseville Electric before backfilling.
- 6.2 Sub-grade preparation shall include areas that will receive crushed rock and aggregate base.
- 6.3 The area within the limits of the substation site shall be cleared and graded.
- 6.4 Clearing shall consist of removal of debris, vegetation, waste, or other unacceptable sub-grade material.
- 6.5 Grading shall include construction of embankment, cutting, shaping, blading, and rolling and all other operations necessary to achieve the proposed elevations, slope and compaction.
- 6.6 The intent of the grading information shown on the drawings is to provide for a free draining surface.
- 6.7 Grade tolerance for sub-grade and cut or fill slopes shall be plus or minus one inch from the finished elevation shown on the drawings. However, the tolerance shall not create small pools or otherwise affect the intent of the free draining surfaces.

7. EARTHWORK AND COMPACTION

- 7.1 Immediately prior to surfacing, the sub-grade shall be shaped to the grade and cross section indicated on the drawings. The top six inches of the sub-grade shall be compacted to 95 percent of maximum density at optimum moisture content as determined by ASTM D698 when that test is appropriate, or to 70 percent relative density as determined by ASTM D4253 and D4254 when these tests are appropriate. This operation shall include any scarifying, reshaping, and wetting required to obtain proper compaction. Soft, organic, and otherwise unsuitable material shall be removed from the sub-grade and

replaced with suitable material approved by the Engineer.

- 7.2 Any deviation of the sub-grade surface in excess of one inch as indicated by a sixteen-foot straightedge, or template cut to typical section, shall be corrected by loosening, adding or removing material, reshaping, and recompacting.
- 7.3 In cut areas and in areas of less than six inches of compacted fill, the top six inches shall be scarified and thoroughly mixed by discing or blading and watered or aerated as necessary to achieve optimum moisture content. It shall be compacted to 95% relative density.
- 7.4 Where compacting earth materials is required, materials shall be deposited in horizontal layers and compacted as specified.
- 7.5 The soil compaction tests shall be performed by an independent testing laboratory approved by the Engineer. The laboratory shall be retained by the Contractor and all costs for laboratory services shall be paid by the Contractor.

8. EXCAVATION AND BACKFILL FOR TRENCHES AND FOUNDATIONS

- 8.1 Excavation, backfill, and compaction for trenches and structures shall be in accordance with the drawings and these specifications.
- 8.2 All excavation shall be to the lines and grades required for foundations, conduits, grounding and other facilities. Excavation shall be large enough to allow form removal and working space to backfill and compact.
- 8.3 The bottom of excavations for foundations shall be a smooth plane with the top six inches compacted to 95 percent relative density. The bottom of drilled holes shall be free of loose or disturbed soil.
- 8.4 Any over excavation and resultant backfilling, compacting, or concreting will be considered as incidental work and included in the bid prices.
- 8.5 Backfill shall be free of organic matter, large rocks or any other deleterious material. Rocks or clods larger than 1-1/2 inches in diameter will not be allowed within 6 inches of any conduit or ground wire. All backfill will be subject to the approval of the Engineer. Backfill shall be watered and aerated to an optimum moisture content in successive lifts not to exceed six inches and compacted to relative density of 95 percent.
- 8.6 No backfill shall be made until the work to be covered has been approved by the Engineer. External back filling materials must be approved by the Engineer before use.

- 8.7 Contractor shall locate, protect, shore, brace, support, and maintain all existing underground pipes, conduits, drains, and other underground construction which may be uncovered or otherwise affected by the work.
- 8.8 Existing improvements and underground facilities have been plotted from the best information available. However, this information is not complete or accurate. There may be additional existing facilities. The utility information shown on the plans shall not relieve the Contractor of the responsibility of using caution and good judgment. It is the responsibility of the Contractor to ascertain the exact location of all existing facilities and to avoid damaging them.
- 8.9 Existing improvements that are damaged shall be replaced to an original or better condition. All repair and restoration shall be to the satisfaction of the City of Roseville.
- 8.10 Excavation by machinery shall be approved by the Engineer or City's Electric Department representative in consideration of the safe electrical working clearances and close proximity to the existing energized conductors and underground conduits. The contractor must pot-hole and locate the exact location of the underground 12-kV conduits before any excavation and drilling near the cables location identified by the Electric Department as part of the USA requirements.
- 8.11 All work shall be carried out effectively and tidily to ensure minimum inconvenience to the substation operation. All drains and gullies shall be kept clear of excavation materials at all times.
- 8.12 Drilling equipment for drilling the pier foundations shall have sufficient power for drilling the piers in the soil conditions present on site. The Geotechnical Report is included in this manual. Drilling equipment must also comply with the height requirements referenced in Section 2.6.

9. UNDERGROUND CABLE CONDUITS AND TRENCHES

- 9.1 The underground power cable and control cable conduits and trench system shall be installed as shown on the drawings and the requirements stated in the City of Roseville Specifications for Commercial Construction (Appendix "A").
- 9.2 Power conduits and couplings shall be minimum Schedule 40 PVC. The solvent used shall be in accordance with ASTM-2564 for PVC. All conduits shall be blown free of water and debris. A 3/8" diameter nylon pull rope shall be provided for each conduit.
- 9.3 All conduits shall be proven by a proving mandril equal to 80 percent of the conduit diameter. The proving tests shall be witnessed and approved by the Engineer.
- 9.4 Conduits that are encased in concrete shall be encased with a 3/8" aggregate concrete mix

with a seven inches slump and with a normal strength of 2,500 lbs. The encasement shall cover at least three inches on any side of the conduits. All conduit outlets must be set perfectly vertical or inclined at an angle at the bottom of the trench to the direction as showed on the drawings.

10. GROUNDING SYSTEM

- 10.1 Contractor shall locate the existing grounding conductors as shown on the Drawings. The contractor shall provide the grounding conductors, welding materials and perform the connections to the ground grids.
- 10.2 The Contractor shall install ground rods, grounding conductors and pig-tails for the equipment structures as shown on the Drawings.
- 10.3 All grounding grid conductors and rods shall be connected by exothermal welding, e.g. Cadweld or approved equivalent.

11. REINFORCED CONCRETE FOUNDATIONS

- 11.1 The Contractor shall construct the reinforced concrete foundations in accordance with the drawings and these specifications.
- 11.2 The foundation shall be accurately located, sized and plumbed. The maximum variation of any foundation from its designed location shall not be more than two (2) inches. **The variation of the top surface of all foundations shall not exceed 1/8 inch in 12 feet.** All edges shall be chamfered. The Contractor shall employ a licensed surveyor to stake the foundation locations and to check the tolerance of the top surface of the foundations.
- 11.3 The surplus excavated materials shall become the property of the Contractor and shall be removed from the site. All excavation shall be made to the lines and grades shown on the drawings. The bottom surface of the excavation shall be free of loose or disturbed material. Any over excavation and resulting backfilling, compacting, or concreting shall be considered incidental. No separate payment will be made.
- 11.4 No classification of excavated materials will be made except for identification purposes. Foundation excavation shall include the removal and subsequent handling of all materials encountered in excavating the foundation to the depth required.
- 11.5 Blasting will not be permitted on the site.
- 11.6 The steel support structure foundation piers shall be drilled with an auger in earth and with a rock drill in rock. Casings shall be used where the sides of the excavation are unstable and may be used at all locations. Drilling equipment shall be designed to drill

straight and clean holes. Casings, if used, shall be installed as the drilling proceeds or immediately after the auger is withdrawn as required to prevent sloughing and caving of the excavation walls. Contractor may elect to advance the excavation and facilitate the removal of cuttings by utilizing a densified fluid.

- 11.7 Casings shall be of steel or fiber construction and shall be of ample strength to withstand handling and installation stresses. Casing shall be removed as the concrete is placed. The casing extraction shall be facilitated by the use of a vibratory extractor. During removal the casing shall be continually plumb and the concrete surface within the casing shall be continually observed for maintenance of concrete "head" sufficient to offset the external water head of the casing. A minimum head of 4 to 5 feet of concrete shall be maintained above the bottom of the casing during casing extraction.
- 11.8 Control joints shall be placed on foundations as shown on the drawings. The Burke "Key Kold Joint" compound or equal shall be used.
- 11.9 Concrete work for foundation shall conform to the requirements of the section entitled "Cast-in-Place Concrete" and to these additional requirements. Concrete shall reach a minimum compressive strength of 3,500 psi in 28 days unless otherwise specified on the drawings. For each cement truck load only, Contractor shall employ an independent testing laboratory to take concrete samples at the job site and to perform compression testing at 14 and 28 days for compliance with these specifications. One test shall be performed on each batch of concrete. The testing laboratory shall be approved by the Engineer.
- 11.10 All water and loose materials shall be removed from the holes before any concrete is placed. Foundation holes shall be dry except as specified hereinafter. **No concrete shall be poured without prior inspection by City Engineer.**
- 11.11 Concrete shall be placed with a tremie or funnel to prevent segregation and the top six feet shall be rodded or vibrated to provide a dense mass free of voids. As placed, the concrete shall have a slump between 2-1/2 and 4 inches. During the filling of the holes, if water begins to accumulate on the top of the concrete, the amount of water in succeeding batches shall be reduced. Should there be an accumulation of scum or laitance on the top of the concrete, it shall be removed and additional concrete shall be placed to bring the foundation back to the proper elevation.
- 11.12 After the concreting is started for each foundation, it shall be completed in a continuous process. A sufficient quantity of concrete to fill the foundation shall be in delivery trucks at the foundation site when the first concrete is placed in each foundation. If the concreting of any foundation is suspended for more than 30 minutes before the foundation is completed, laitance and water shall be removed from the joint surface and the joint surface shall be coated with epoxy bonding compound before concreting is resumed. In order to provide for an emergency stoppage, bonding compound shall be at

the site before the concreting of foundations is started.

- 11.13 Foundations shall be reinforced as indicated on the drawings and all reinforcements shall be installed and secured to prevent shifting during the placement of concrete. Anchor bolt cages for steel pole foundations shall be installed plumb and within 1/8 inch of their specified plan location. The upper portion of the foundations shall be formed where indicated on the drawings. Shores and frames shall remain in place a minimum of two days and may be removed only when the concrete has reached a strength capable of supporting its weight safely. Each foundation shall be cured for at least 7 days by continuous saturation with water or the use of membrane curing compound as specified in the section entitled "Cast-in-Place Concrete".
- 11.14 Records shall be kept by the Contractor indicating the exact volume of each foundation excavated and this volume shall then be compared to the volume of concrete actually placed in each foundation. A lesser amount of concrete placed than calculated may indicate faulty foundation construction. In the event of such an occurrence, the Engineer shall be notified, and immediate remedial action shall then be taken by the Contractor.
- 11.15 Concrete shall not be deposited under water except with specific permission of the Engineer.

For concrete deposited under water, the limiting requirements shall be adjusted to provide not more than six inches of slump and to increase the cement factor by one sack per cubic yard. Any extra charges for these changes by the concrete supplier shall be borne by the Contractor.

Underwater concrete shall be placed through tremies. The tremies shall be equipped with a tremie seal at the lower end and a hopper at the upper end. The tremie shall be watertight and large enough to allow a free flow of concrete. After the flow of concrete is started, the lower end of the tremie shall be kept below the surface of the deposited concrete. Agitation of the deposited concrete shall be avoided. When necessary to move laterally, the tremie shall be lifted free of the concrete and lowered vertically at the new location. The entire mass of concrete shall be placed as quickly as possible so that it will flow into place without the necessity of horizontal shifting below water.

The water shall be quiescent when concrete is deposited therein. After placing, the ground water level in the area adjacent to the foundation shall be kept static until the concrete has taken its initial set.

- 11.16 The anchor bolt cage and the rebar cage shall be clean, dry and free of rust, dirt and oil. Anchor bolt cage may be welded to hold its shape. The rebar cage shall NOT be welded. No welds will be permitted for the rebar cage.

- 11.17 Any Anchor bolts for the foundations supplied by the contractor shall conform to ASTM A-307 and be galvanized in accordance with ASTM A-153.

12. CAST-IN-PLACE CONCRETE

- 12.1 General. This section covers cast-in-place concrete and includes reinforcing steel, forms, finishing, curing, grouting, and other appurtenant work. Contractor shall submit concrete mix specifications prior to ordering to the City Engineer in order to confirm it complies with these specifications.

Cast-in-place concrete shall be in accordance with the latest applicable requirements of the Federal Specifications, ACI, ASTM, and CRSI, except as modified by these specifications.

- 12.2 Materials. Materials shall be in accordance with these requirements:

Cement:	ASTM C150, Type I & II
Fine Aggregate:	Clean natural sand, ASTM C-33
Coarse Aggregate:	Crushed stone, washed gravel, or other acceptable inert granular material conforming to ASTM C-33. Maximum size of aggregate to be 3/4".
Water:	Clean and free from deleterious substances.
Air-entraining Agent:	ASTM C260
Plasticizing Retarder:	ASTM C494, Type B or D
Plasticizer:	ASTM C494, Type A
Reinforcing Steel Bars:	ASTM A615-85, Grade 60
Forms:	
Plywood:	Product Standard PSI, waterproof, resin-bounded, exterior type Douglas Fir.
Lumber:	Straight, uniform width and thickness, and free from knots, offsets, holes, dents, and other surface defects.
Chamfer Strips:	Clear pine, surface against concrete shall be planed.

Form Oil: Light colored paraffin oil or other acceptable non-staining material.

13. CRUSHED ROCK SURFACING

- 13.1 Contractor shall furnish and restore crushed rock in accordance with the drawings and these specifications. Rock shall be washed and a uniform size of 3/4-inch with 100% fractured faces. The rock shall be clean and free of deleterious materials for its intended use. The rock surfacing shall have a minimum thickness of six inches or as indicated on the drawings.
- 13.2 Prior to applying the crushed rock surfacing, the Contractor shall apply weed eradicator and soil fumigant in strict accordance with the manufacturer's instructions. Contractor is cautioned to apply weed eradicator and soil fumigant only to the crushed rock surfacing areas and to refrain from applying such material when conditions may cause drifting to areas which are not to be treated.
- 13.3 The rock surfacing shall be smooth, hard and tight and free draining. Rock shall be spread evenly without humps or depressions.

14. AGGREGATE BASE

- 14.1 Contractor shall furnish, place and compact aggregate base in accordance with the drawings if required for touch up area. The materials and application of aggregate base shall comply with Section 26 of the CALTRANS "Standard Specifications", latest edition, and these specifications.
- 14.2 The subgrade shall be prepared in accordance with Section 7, Earthwork and Compaction.
- 14.3 The aggregate base shall be compacted, trimmed and shaped by blading and rolling to produce a hard and tight surface. The finish surface shall be true to grade and free of segregation, irregularities, depression, or loose material. The compacted aggregate base shall have a uniform thickness of six (6) inches. The surface of the aggregate base shall not vary more than 0.05-foot above or below the grades shown on the drawings. The relative compaction for aggregate base shall not be less than 95 percent. The maximum aggregate size shall be 3/4-inch.

15. ASPHALT CONCRETE PAVEMENT

- 15.1 The asphalt concrete surface, if required for touch up area, shall be hot-mix hot-laid asphalt concrete pavement. Areas to be paved are as indicated on the drawings.

- 15.2 Unless otherwise specified herein, the materials and workmanship shall comply with Sections 39 and 92 of the California Department of Transportation Standard Specification, Latest Edition.
- 15.3 Major earthwork including subgrade preparation shall be in accordance with Section 7, Earthwork and Compaction.
- 15.4 Aggregate base requirements are specified in Section 14, Aggregate Base.
- 15.5 All asphalt paved areas constructed under these specifications shall be maintained by the Contractor until final acceptance of the work by the City.
- 15.6 Materials for the asphalt concrete shall conform to the following requirements as defined by the California Department of Transportation Standard Specifications, Latest Edition.

Asphalt concrete	Type A
Aggregate grading	1/2 inch maximum, medium
Asphalt cement	Steam-refined paving asphalt, viscosity Grade AR-4000
Asphalt concrete (percent by weight of total mix)	4 to 7 percent

- 15.7 The asphalt concrete shall be placed in one lift with an asphalt paver or spreader to provide a nominal compacted thickness of four (4) inches. Placing the asphalt concrete mixture shall be a continuous operation. If any irregularities occur, they shall be corrected before final compaction of the mixture.
- 15.8 The completed paving shall have a density equal to or greater than 95 percent of the density of a laboratory specimen made in the proportions of the job mix formula.
- 15.9 The surface of the completed pavement shall be checked longitudinally and transversely for smoothness with a 10 foot straightedge. The surface shall not vary more than 1/4 inch in 10 feet parallel to the center line and not more than 1/2 inch at right angles to the center line.
- 15.10 Construction joints shall be made in such a manner as to assure a neat junction, thorough compaction, and bond throughout.

16. Erosion and Sediment Control

- 16.1 Contractor shall supply and implement all necessary Best Management Practices (BMP's)

in order to control erosion and prevent sediment from entering the stormwater system.

16.2 Measures shall include but not limited to the following:

16.2.1 Geotextiles and mats.

16.2.2 Velocity dissipation devices.

16.2.3 Silt fence.

16.2.4 Sediment basin or trap.

16.2.5 Fiber rolls.

16.2.6 Street sweeping and vacuuming.

16.2.7 Sand bag or straw bale barrier.

16.2.8 Storm drain inlet protection.

16.2.9 Biofilter bags.

16.2.10 Wind erosion control by applying water suppressants.

16.2.11 Entrance/outlet tire wash or wash station for necessary equipment.

GEOTECHNICAL ENGINEERING REPORT PLEASANT GROVE SUBSTATION

Roseville, California

WKA No. 2087.01

May 20, 1992

INTRODUCTION

General

We have completed a geotechnical engineering investigation of the sites proposed for the Pleasant Grove Substation and the connection to existing power facilities located near the NEC electronics facility in Roseville, California. This investigation was conducted to evaluate the existing site, soil and ground water conditions, and to provide geotechnical engineering conclusions and recommendations for design and construction of the proposed substation and connection facility. This report presents the results of our work.

Scope

Geotechnical Engineering

Engineering Geology

Environmental Consulting

Remediation Services

Construction Inspection

Materials Testing

Our scope of work has included the drilling and sampling of two borings to a maximum depth of 20 feet below existing grade; one boring was located at the proposed substation; the second boring was located approximately 200 feet east of the substation site, near a proposed pole location. Relatively undisturbed soil samples obtained at various depths from the borings were taken to our laboratory and tested to determine soil engineering parameters. Soil resistivity tests were performed in the field; several soil samples also were laboratory tested to evaluate resistivity of the individual soil strata. The boring logs and field/laboratory test results then were analyzed to determine conclusions and recommendations regarding soil resistivity, site preparation, pole foundation design and exterior slab support for equipment.

Test boring locations are shown on Plates No. 1 and 2. Logs of the borings and results of laboratory tests are presented on Plates No. 3 and 4. An explanation of the symbols and classification system used on the logs appears on Plate No. 5. Appendix A contains information of a general nature regarding project concepts, exploratory methods used during the field investigation phase of our study and further laboratory test results. Appendix B contains Earthwork Specifications that may be used for the preparation of contract documents.

We know them (140K lbs)

Proposed Development

The City of Roseville Electric Department drawings indicate the subdivision will consist of several slabs-on-grade for support of switch gear, capacitor banks and similar equipment. Slab sizes will vary from 7' x 8' (capacitor banks) to 16-1/2' x 32-1/2' (switch gear); one slab (designated as "XFMR Pad") will be surrounded by an oil containment trench and wall. Equipment loads are unknown, but anticipated to range from moderate to heavy in magnitude. An L-shaped asphalt concrete access road will be constructed on the south and west sides of the substation.

Kam Hung with the City of Roseville Electrical Department indicated that four power poles are proposed, which likely will be 24-inch diameter steel poles. Two 40 foot poles in an H-frame arrangement will be located at the substation site. A single, intermediate pole (40 foot) will be located approximately 80 feet to the east. The fourth pole will be adjacent to the existing 60 Kv line located approximately 200 feet to the east; this pole will be approximately 54 feet in height.

Wood pole

FINDINGS

Site Description

The proposed substation site is an approximately rectangular area on the east side of the NEC electronic facility, which is located along Foothill Boulevard in northern Roseville, California. The site is bordered to the north by an existing trailer and asphalt concrete paved area, beyond which are chemical/manufacturing facilities for NEC; to the east by the railroad easement; and to the south and west by undeveloped land on the NEC campus. The relatively level site has been cut several feet with respect to the land to the west; the ground to the north is several feet lower in elevation. At the time of our field exploration, the surface of the substation site was relatively void of significant vegetation, except for trees along the westerly and southerly boundaries.

The site of the proposed pole which will facilitate connection of the substation with existing power facilities (located 200 feet east of the substation site) is along the north/south alignment of existing power facilities, just west of an existing utility access road. Vegetation in this area consisted of various volunteer grasses and weeds, with several trees in the vicinity.

Subsurface Soils Conditions

The soils conditions encountered at the two sites are variable. Our boring at the proposed substation site encountered medium dense slightly clayey silty fine sands from the surface to a depth of approximately nine feet. Between 9 and 11 feet we observed very stiff sandy clays, underlain by a two foot layer of very stiff silt. The silts are underlain by medium dense slightly clayey medium sands to a depth of approximately 19 feet below existing grade; between 19 and 20 feet (maximum depth of the boring) we encountered dense silty sands.

WALLACE • KUHL
& ASSOCIATES INC.

PLEASANT GROVE SUBSTATION

May 20, 1992

WKA No. 2087.01

Page 3

Subsurface conditions revealed by our boring drilled near the existing power line consist of dense silty sands within the upper four feet, underlain by very dense very slightly clayey to clayey fine to coarse sands to the maximum 20 foot depth of exploration; occasional fine gravels were encountered within the coarse sand layer, which has the appearance of a decomposed granitic material.

Ground Water

Ground water was not encountered within our borings drilled on April 21, 1992.

CONCLUSIONS

Bearing Capacity

Field and laboratory test results indicate the undisturbed native soils encountered in the test borings are capable of supporting the slabs and poles described above. Our work also indicates that recompacted surface soils and engineered fill, placed and compacted in accordance with the recommendations of this report, will be capable of supporting the proposed slabs and equipment.

Soil Expansion Potential

The surface and near-surface soils are granular, low plasticity materials considered to be essentially non-expansive. Potentially expansive clays were encountered in one boring at a depth of approximately nine feet below existing grade; however, these soils are located deep at a sufficient depth to not significantly effect development.

Excavation Conditions

The soils encountered within the project limits are medium dense to very dense silty to clayey sands and very stiff clays; these soils are anticipated to be excavatable with conventional earthmoving, trenching and drilling equipment.

Soil Resistivity

Soil resistivity measurements were obtained in the field utilizing a Biddle Instruments Ground Resistance Tester. The four-probe method (Wenner Method) was used with equal spacing between all probes. Spacing of the probes for the testing was 2.5, 5.0 and 10 feet; two trials at each spacing was performed and then averaged. The results of this testing are contained in the following table:

PLEASANT GROVE SUBSTATION

May 20, 1992

WKA No. 2087.01

Page 4

<u>Location</u>	<u>Probe Spacing - Feet</u>	<u>Average Reading ohms</u>	<u>Resistivity ohm-cm</u>	
See Plate No. 1	2.5	5.0	2395	23.95 Ω -m
See Plate No. 1	5.0	4.0	3830	
See Plate No. 1	10.0	1.8	3445	

To supplement the field soil resistivity measurements, four samples of soil were subjected to laboratory resistivity testing in accordance with Caltrans test methods. The samples were tested in "saturated" and "as received" conditions, resulting in values ranging from 720 to 3800 ohm/cm; a summary of these test results are contained in Appendix A.

The field resistivity readings were performed in April, 1992, after several weeks without rain; however, the soil was in a moist condition, which will decrease the resistivity. Other factors affecting soil resistivity are soil type, dissolved salts in the soil and temperature. We understand the interpretation of the resistivity data will be performed by others in the design of a grounding mat.

Ground Water

Our experience in the general Roseville area, as well as conditions encountered by our borings indicate a permanent ground water table should not be a factor in design or construction at this site.

Seasonal Water

During the wet season, infiltrating surface run-off water can create a saturated surface soil conditions. Grading operations attempted following the onset of winter rains and prior to drying periods will be hampered by high soil moisture contents. Such soils, intended for use as engineered fill, will require aeration to reach a moisture content that will permit the specified degree of compaction to be achieved.

RECOMMENDATIONS

Site Preparation

Site clearing for the proposed substation facility should include the removal of all surface organics by stripping. Strippings are not suitable for reuse in fill and should be removed from the site.

PLEASANT GROVE SUBSTATION

May 20, 1992

WKA No. 2087.01

Page 5

Following site stripping, areas to receive fill and at-grade areas should be scarified to a minimum depth of six inches, brought to a uniform moisture condition and compacted in-place to at least 90 percent of the maximum dry density per ASTM D1557-78 specifications.

Engineered fill should be placed in horizontal lifts not exceeding six inches in compacted thickness. Each layer should be compacted at a uniform moisture content to at least 90 percent of the maximum dry density as defined above. On-site soils are considered acceptable for use in engineered fill if free of rubble, rubbish or concentrations of organics. Imported fill, if necessary, should be granular and be approved by our office prior to importation to the site.

The upper six inches of the subgrade for slabs should be uniformly compacted to at least 90 percent relative compaction. The upper six inches of final pavement subgrades should be uniformly compacted to at least 95 percent of the maximum dry density.

Site preparation should be accomplished in accordance with the recommendations of this section and the appended earthwork specifications. Our representative should be present throughout grading operations to determine compliance with job specifications.

Pole Foundation Design

Based upon the soil conditions in the vicinity of the proposed poles, we anticipate a drilled concrete pier will be suitable for support of the poles. The piers should be at least three feet in diameter and extend at least 10 feet into the ground. The piers may be sized for lateral resistance using a "passive" earth pressure equivalent to a fluid weighing 400 pounds per cubic foot (pcf). The upper two feet of soils should be disregarded in computing lateral resistance.

For support of vertical load, the piers may be designed as end bearing using an allowable bearing capacity of 6000 pounds per square foot (psf) for dead plus live load; this may be increased by 1/3 to include wind or seismic forces. Alternately, the piers may be designed as friction piers using an adhesion between the concrete and soil of 400 psf. If designed as friction piers, the upper two feet of soil must be disregarded in sizing computations.

Based upon the medium dense to very dense nature of the soils encountered within anticipated pole foundation embedment depths, we anticipate the drilled holes will remain open; however, minor caving could occur during construction operations, especially if holes are left open for an extended period of time.

Slab Support

Concrete slabs-on-grade for the switchgear equipment, capacitor banks, and other equipment may be placed directly on the soil grade without a capillary moisture barrier, although a granular leveling course consisting of crushed rock could be used, if desired. The crushed rock should be

PLEASANT GROVE SUBSTATION

- 1) 5KV SWITCHGEAR - 45,000 lbs.
Pad size $16 \times 30 = 480 \text{ ft}^2$
Ave PSF = 93.75 PSF
- 2) Tx - 150,000 lbs
Pad size $16 \times 10 = 160 \text{ ft}^2$
Ave PSF = 937.5 PSF

graded so that 100 percent will pass a one-inch sieve and none will pass a No. 4 sieve. The subgrade soils are considered capable of supporting 1500 psf without significant total or differential settlements. Slab thicknesses and reinforcement should be determined by the structural engineer based upon anticipated loads.

LIMITATIONS

Our recommendations are based upon the information provided regarding the proposed construction, combined with our analysis of site conditions revealed by the field exploration and laboratory testing programs. We have used our best engineering judgment based upon the information provided and the data generated from our investigation. If the proposed construction is modified or resited; or, if it is found during construction that subsurface conditions differ from those we encountered at the boring locations, we should be afforded the opportunity to review the new information or changed conditions to determine if our conclusions and recommendations must be modified.

We would appreciate the opportunity to review the final plans and specifications to determine if the intent of our recommendations has been implemented in those documents.

We emphasize that this report is applicable only to the proposed construction and the investigated site. This report should not be utilized for construction on any other site.

APPENDICES

APPENDIX A

A. GENERAL INFORMATION

The performance of a geotechnical engineering investigation at the site of the proposed Pleasant Grove Substation to be built in Roseville, California, was authorized by Michael F. Neils on March 11, 1992. Authorization was for an investigation as described in our proposal letter of March 11, 1992, sent to our client, MacRostie-Neils Engineering, whose mailing address is 9261 Folsom Boulevard, Suite 203, Sacramento, California 95826; telephone (916) 362-3624.

In performing this investigation, we made reference to two 1"=10' scale site plans of the substation site and power pole layout prepared by the City of Roseville Electric Department.

B. FIELD EXPLORATION

Test borings were accomplished on April 21, 1992 utilizing a CME-55 truck-mounted drill rig. At the locations indicated on Plates No. 1 and 2, two exploratory borings were drilled to a maximum depth of 20 feet using four-inch diameter continuous flight helical augers. At various intervals, relatively undisturbed soil samples were recovered with a 2-1/2 inch O.D., 2-inch I.D. California sampler driven by a 140 pound hammer freely falling 30 inches. The number of blows of the hammer required to drive the 18-inch long sampler each 6-inch interval was recorded with the sum of the blows required to drive the sampler the lower 12-inch interval, or portion thereof, being designated the penetration resistance or "blow count" for that particular drive.

The samples were retained in 2-inch diameter by 6-inch long thin-walled brass tubes contained within the sampler. Immediately after recovery, the soils in the tubes were visually classified by the field engineer and the ends of the tubes were sealed to preserve the natural moisture contents. All samples were taken to our laboratory for soil classification and selection of samples for testing. The Boring Logs, Plates No. 3 and 4, contain descriptions of the soils encountered in each boring. A Boring Legend explaining the Unified Soil Classification System and the symbols used on the logs is contained on Plate No. 5.

C. LABORATORY TESTING

Selected undisturbed samples of the soils were tested to determine dry unit weight and natural moisture content (ASTM D2216), and shear strength parameters from triaxial testing (California Test 230A). The results of the moisture/density tests are included on the boring logs at the depth each sample was obtained. Results of triaxial testing are contained on Plate No. A1.

Four samples of the soils were sent to ConCeCo Engineering, Inc., for resistivity testing. The results of resistivities for "as-received" and "saturated" conditions are presented on Plate No. A2.

GEOTECHNICAL REPORT

A Geotechnical Report (WKA No. 2087.01; dated May 20, 1992), has been prepared for this project by Wallace - Kuhl & Associates, Inc. of West Sacramento, California [(916) 372-1434].

SEASONAL LIMITS

Fill material shall not be placed, spread or rolled during unfavorable weather conditions. When the work is interrupted by heavy rains, fill operations shall not be resumed until field tests indicate that the moisture contents of the subgrade and fill materials are satisfactory.

MATERIALS

All fill shall be of approved local materials from required excavations, supplemented by imported fill, if necessary. Approved local materials are defined as local soils free from rubble, rubbish and vegetation and shall be approved by the Geotechnical Engineer prior to use. Clods or rocks exceeding six inches (6") in final size shall not be allowed in the upper two feet (2') of fill. Imported fill materials shall meet the above requirements and shall have plasticity indices not exceeding twelve (12).

CLEARING, GRUBBING AND PREPARING BUILDING PADS

- a. All significant vegetation; rubbish; existing man-made fills and saturated materials; underground utilities within two feet (2') of original or final grade (whichever is lower) shall be

removed from building areas and disposed of. Excavations and depressions resulting from the removal of such items shall be cleaned out to firm, undisturbed soil and backfilled with suitable materials in accordance with these specifications.

b. The surfaces upon which fill is to be placed shall be plowed or scarified to a depth of at least six inches (6") and moisture conditioned until the moisture content is satisfactory for compaction.

After the foundation for the fill has been adequately processed, it shall be compacted to not less than ninety percent (90%) of the maximum dry density as determined by the ASTM D1557-78 Compaction Test.

PLACING, SPREADING AND COMPACTING FILL MATERIAL

The selected fill material shall be placed in layers which when compacted shall not exceed six inches (6") in thickness. Each layer shall be spread evenly, thoroughly mixed and compacted to not less than ninety percent (90%) of maximum dry density as determined by the ASTM D1557-78 Compaction Test. Each layer shall be compacted over its entire area until the desired density has been obtained.

FINAL SUBGRADE PREPARATION

The upper six inches (6") of the subgrades for slabs-on-grade shall be uniformly compacted to at least ninety percent (90%) relative compaction, regardless of whether final subgrade elevation is attained by filling, excavation or is left at existing grade.

The upper six inches (6") of pavement subgrades should be uniformly compacted to at least ninety-five percent (95%) relative compaction, regardless of whether final subgrade elevation is attained by filling, excavation or is left at existing grade.

TESTING AND OBSERVATION

All grading operations shall be tested and observed by the Soil Engineer, who is serving as the representative of the Owner.

Earthwork shall not be performed without prior notification and approval of the Soil Engineer.

The Contractor shall notify the Soil Engineer at least two (2) working days prior to commencement of any aspect of the site earthwork.

APPENDIX A

FIELD INVESTIGATION AND LABORATORY TESTING

FIELD INVESTIGATION

General

The subsurface conditions at the site were explored on October 27 and 28, 1994, by drilling 14 borings to depths ranging from 20 to 21-1/2 feet below existing grade. Borings were drilled using Mobile B-61 and B-53 truck-mounted drill rigs equipped with a 4-inch-diameter solid-stem auger. The locations of borings performed for this investigation are shown on Plate 2 of the report. Designation "B-4" was omitted from the drilling program and is not shown on Plate 2.

IMPORTANT NOTE: Borings were located in the field by visual sighting and/or pacing from existing site features. Therefore, the location of borings shown on Plate 2 should be considered highly approximate and may vary from that indicated on the plate.

Our engineer maintained a log of the borings, visually classified soils encountered according to the Unified Soil Classification System (see Plate A-1), and obtained relatively undisturbed and bulk samples of the subsurface materials. A key to the Logs of Borings is presented on Plate A-2 of this appendix; Logs of Borings are presented on Plates A-3 through A-16.

Sampling Procedures

Soil samples were obtained from the borings using a Modified California Sampler driven 18 inches (unless otherwise noted) into undisturbed soil using a 30-inch drop of a 140-pound hammer. Blow counts were recorded at 6-inch intervals for each sample attempt and are reported on the logs in terms of blows-per-foot for the last foot of penetration. Soil samples obtained from the borings were packaged and sealed in the field to reduce moisture loss and disturbance, and returned to our Sacramento laboratory for further testing. After borings were completed, they were backfilled with the drill cuttings.

LABORATORY TESTING

General

Laboratory tests were performed on selected samples to aid in soil classification and to evaluate physical properties of the soils which may affect the geotechnical aspects of project design and construction. A description of the laboratory testing program is presented below; a summary of all laboratory tests performed is presented on the Summary of Laboratory Tests, Plate A-17.

Moisture Content and Dry Unit Weight

Moisture content and dry unit weight tests were performed to evaluate moisture-conditioning requirements during site preparation and earthwork grading; soil overburden, and active and passive earth pressures; and relative soil strength and compressibility. Moisture content was evaluated in general accordance with ASTM Test Method D 2216; dry unit weight was evaluated using procedures similar to ASTM Test Method D 2937. Results of these tests are presented on the logs and are summarized on the Summary of Laboratory Tests.

Sieve Analysis

Sieve analyses were performed to evaluate the gradational characteristics of the material and to aid in soil classification. Tests were performed in general accordance with ASTM Test Method C 136. Results of these tests are presented on the logs and are summarized on the Summary of Laboratory Tests.

Atterberg Limits

Atterberg Limits tests were performed to aid in soil classification and to evaluate the plasticity characteristics of the material. Additionally, test results were correlated to published data to evaluate the shrink/swell potential of near-surface site soils. Tests were performed in general accordance with ASTM Test Method D 4318. Results of these tests are presented on the logs and are summarized on the Summary of Laboratory Tests.

pH and Resistivity

pH and resistivity tests were performed on soil samples obtained near anticipated foundation and underground utility depths to evaluate soil corrosivity effects on buried concrete and steel. Test procedures were in general accordance with California Tests 643 and 532. Results of these tests are presented on the Summary of Laboratory Tests.

Direct Shear

Direct shear tests were performed on relatively undisturbed samples to evaluate the drained shear strength of the site soils. Samples were tested in a near-saturated condition in general accordance with ASTM Test Method D 3080 (consolidated, drained). Results of these tests are presented on Plates A-18 and A-19.

Expansion Index

An expansion index (EI) test was performed on a remolded, fine-grained soil sample considered representative of the anticipated floor slab subgrade. Test procedures were in general accordance with the Uniform Building Code (UBC) Standard 29-2. Results of this test are presented on the Summary of Laboratory Tests and may be compared to the table presented below to qualitatively evaluate the expansion potential of the near-surface site soils.

<u>Expansion Index</u>	<u>Potential Expansion</u>
0-20	Very low
21-50	Low
51-90	Medium
91-130	High
Above 130	Very high

Compaction

Three compaction tests were performed on near-surface bulk soil samples to evaluate maximum dry density and optimum moisture content. Test procedures were in general accordance with ASTM Test Method D 1557. Results of these tests are presented on the Summary of Laboratory Tests and Plate A-20.

COUNCIL COMMUNICATION

CC #: 0715
File #: 0203-05

Title: Citywide Phone System Support - Contract Purchase Agreement
Contact: Karl Grover 916-774-5145 kgrover@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.10.

RECOMMENDATION TO COUNCIL

Recommend Council authorize a Contract Purchase Agreement with Altura Communication Solutions, LLC for the renewal of support for the citywide phone system in the amount of \$97,186.68.

BACKGROUND

The citywide phone system for all departments is called Avaya with support provided by Altura Communication Solutions, LLC. The phone system enables normal phone calls to be made and received as well as call center services. The support coverage period is from March 1, 2020 through February 28, 2021. The cost is \$97,186.68 through Altura Communication Solutions using a competitively-bid contract via General Services Administration contract number GS-35F-0156V.

FISCAL IMPACT

The support renewal cost of \$97,186.68 is accounted for in the FY2019-20 Information Technology's Internal Service Fund budget.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. A contract purchase agreement for the support of the Citywide phone system meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Respectfully Submitted,

Karl Grover, Acting Program Manager - IT Network Infrastructure

Hong Sae, Chief Information Officer

This Contract Purchase Agreement is sent for your review and acceptance. Notify the Buyer via email of any needed changes to the company name, address, and contact information. The Buyer will update the agreement prior to you signing the document.

Return signed copies of the agreement to the Buyer noted on the agreement. Alterations or modifications to the agreement are not allowed. Upon receipt of all necessary documents, the City will sign the agreement and return a fully executed copy to you. Receipt of the signed copy will be your notice to proceed with the work in accordance with the terms and conditions of the agreement. Work must not begin until the contract has been fully executed.

The following guidelines must be followed for the signature block on the agreement:

Sole proprietorship - By owner

Partnership - Any general partner

Corporation - Two options:

(1) A signature from the President and the corporate seal; OR

(2) One signature from the Chairman of the Board, President, or any Vice President AND one signature from the Secretary, any Assistant Secretary, Chief Financial Officer, or any Treasurer or Assistant Treasurer of the corporation

*General Manager, Office Manager and/or Sales Manager are **not** corporate officer titles. The agreement will be rejected if not signed in accordance with these guidelines.

Insurance requirements:

The City's insurance requirements are referenced on Attachment A of the agreement. By signing the agreement, you are confirming that your company has the minimum insurance limits required.

Contract Terms and Conditions

1. To the fullest extent allowed by law, Consultant agrees to indemnify, including the cost to defend City, and its officers, agents, employees and volunteers from any and all claims, demands, costs or liability that arise out of, or pertain to, or relate to the negligence, recklessness, or willful misconduct of Consultant and its agents in the performance of services under this contract, but this indemnity does not apply to liability for damages for death or bodily injury to persons, injury to property, or other loss, arising from the sole negligence, willful misconduct or defects in design by City or the agents, servants, or independent contractors who are directly responsible to City, or arising from the active negligence of City. Consultant's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.
2. Consultant is an independent contractor, and shall not be considered an officer, agent or employee of the City
3. Without the written consent of the City, this Agreement is not assignable by Consultant either in whole or in part.
4. Time is of the essence of this Agreement
5. At any time during the term of this Agreement, the City has the right to terminate this Agreement, provided Consultant is given thirty (30) days written notice. City's termination shall be without further liability to City; however, Consultant shall be entitled to all costs reasonably incurred prior to the date of termination. Consultant acknowledges that City may terminate this Agreement should funds not be appropriated by its governing body to continue services under this Agreement.
6. This Agreement may only be amended or modified in writing. It is integrated and contains the complete understanding of the parties
7. All equipment, supplies and services sold to the City of Roseville shall conform to the general safety orders of the State of California.
8. Unless notified to the contrary, in writing, the City assumes that the Consultant has accepted the work in accordance with the plans and specifications (if any) and agrees to do the work in compliance with this Agreement. Any work product created for City pursuant to this Agreement is deemed owned by City
9. All prevailing wages and fair employment practices must be adhered to. For prevailing wage contracts over \$25,000, copies of certified payroll must be submitted with invoices. Prevailing wage rates may be obtained from the State Department of Industrial Relations and/or the following website address:
<http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm>
10. Consultant agrees to the below insurance requirements
 - a. Unless otherwise specified, the Consultant shall maintain the policies of insurance outlined in Attachment A, incorporated herein by this reference, in full force and effect during the term of this Agreement. The City of Roseville retains sole discretion in determining the types and proper levels of insurance coverage
 - b. Form. Consultant shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney
 - c. Additional Insureds. Consultant shall also provide a separate endorsement or section of the policy showing City, its officers, agents, employees, and volunteers as additional insureds for each type of coverage, except for Workers' Compensation and

Professional Liability. Such insurance shall specifically cover the contractual liability of Consultant. The additional insured coverage under the Consultant's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from City's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office (ISO) CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be:

- (1) the minimum coverage and limits specified in this Agreement; or
 - (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater
- d. Cancellation/Modification. Consultant shall provide ten (10) days written notice to City prior to cancellation or modification of any insurance required by this Agreement.
 - e. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of City (if agreed to in a written contract) before City's own insurance shall be called upon to protect it as a named insured
 - f. Subconsultants. Consultant agrees to include in its contracts with all subconsultants the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subconsultants work. Furthermore, Consultant shall require its subconsultants to agree to be bound to Consultant and City in the same manner and to the same extent as Consultant is bound to City under this Agreement. Additionally, Consultant shall obligate its subconsultants to comply with these same provisions with respect to any tertiary subconsultant, regardless of tier. A copy of City's indemnity and insurance provisions will be furnished to the subconsultant or tertiary subconsultant upon request.
 - g. Self-Insured Retentions. All self-insured retentions (SIR) must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.
 - h. Waiver of Subrogation. Consultant hereby agrees to waive subrogation which any insurer of Consultant may acquire from Consultant by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of City, its officers, agents, employees and volunteers for all work performed by Consultant, its employees, agents and sub consultants.
 - i. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve Consultant of liability in excess of such coverage, nor shall it preclude City from taking such other actions as are available to it under any other provisions of this Agreement or law
11. Consultant shall comply with all federal, state, local laws, ordinances and policies as may be applicable to the performance of services under this Agreement. Failure to comply with local ordinances may result in monetary fines and cancellation of this Agreement.
 12. In the event that the terms of any attachment or exhibit conflict with any terms of this Agreement, the terms of this Agreement shall control.
 13. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. In the event that any signature is delivered by facsimile transmission or by e-mail delivery of a

".pdf" format data file, such signature shall create a valid and binding obligation of the party executing (or on whose behalf such signature is executed) with the same force and effect as if such facsimile or ".pdf" signature page were an original thereof

14. If either party commences any legal action against the other party arising out of this Agreement or the performance thereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorneys' fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.
15. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto
16. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.
17. For purposes of this Agreement, the terms "Contractor," "Consultant," and "Supplier" are used interchangeably.
18. Consultant agrees that any and all information furnished by City shall be deemed proprietary and confidential. All such information, to the extent previously, presently or subsequently disclosed to Consultant and/or processed and derived by Consultant services is the property of City and such property shall be deemed and treated as "Confidential Information" of City. Consultant acknowledges that such Confidential Information may contain information provided and/or generated by third-parties. Consultant agrees that such Confidential Information shall not be disclosed to any third party without written permission from City, except as required by law. Consultant shall not use the Confidential Information except to perform Consultant's services as directed by City.
19. All facilities, devices, networks and services used to store, deliver, process, backup or purge Confidential Information will employ administrative, physical, technical, and procedural safeguards and best practices at a level sufficient to secure Confidential Information from unauthorized access, destruction, use, modification, or disclosure. Such measures will be no less protective than those used to secure Consultant's own information of a similar type, and in no event less than reasonable in view of the type and nature of the information involved. It is the City's expectation that Consultant, at its own expense, shall perform annual audits for any data centers that house Confidential Information, using an independent third-party audit that meets industry standards applicable to the services under this Agreement, and provide the audit report or certification upon request to City.
20. Consultant will retain Confidential Information until deleted by City or City-authorized third party, or for a time period mutually agreed upon by the parties to this Agreement.
21. Upon termination or expiration of this Agreement, Consultant will ensure that all Confidential Information is securely transferred to City within thirty (30) calendar days. Consultant will ensure that any transfer of Confidential Information is accomplished by methods that are compatible with the relevant City systems, and that City will have access to all Confidential Information during any such transfer. Consultant shall securely dispose of all Confidential Information when requested by City and Consultant will provide written notification to City once all Confidential Information has been securely disposed of.
22. Consultant shall report to City any data compromise or unauthorized access to Confidential Information within twenty-four (24) hours after Consultant discovers such data compromise or unauthorized access. Consultant will take commercially reasonable measures to address any such data compromise or unauthorized access in a timely manner. Except as otherwise required by law, Consultant will not provide notice to end users or other entities of any such data compromise or unauthorized access without written permission from City. Consultant will promptly reimburse City in full for all fees and costs incurred by City in any investigation, remediation or litigation resulting from any such data compromise or unauthorized access, including identity protection and restoration services for each person,

who in the City's sole discretion, could be impacted by identity theft

23. Consultant may not advertise that City is a client, list City as a reference or otherwise use City's name, logos, trademarks, or service marks without prior written permission from City.
24. Consultant acknowledges that services rendered under this agreement (including but not limited to service levels and operational levels) shall be performed in accordance with industry standards.
25. If the project referenced on this Agreement is a Public Works project, then the following shall apply: No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this agreement, Contractor and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.
26. If the project referenced on this Agreement is a Public Works project, then the following shall apply: Contractor must submit all claims as defined in and in accordance with the claim resolution process set forth in Section 9204 of the Public Contract Code. Each such claim must be sent to the City by registered mail or certified mail with return receipt requested and must contain reasonable documentation to support the claim. All claims must be received prior to acceptance of the work.

The supplier named hereon by the acceptance of this order agrees to the provisions of this document titled "Contract Purchase Agreement" and all accompanying terms, conditions, and attachments.

Insurance Submission Process

The City of Roseville Human Resources/Risk Management Department uses a service called EBIX to manage our insurance certificate tracking.

How It Works

- The vendor's contact information is entered into EBIX. EBIX will contact the vendor to request proof of insurance.
- The Vendor can forward the request to their Insurance Agent(s) if necessary.
- Vendor/Insurance Agent submits insurance to EBIX by email to roseville@ebix.com or by fax to (770) 325-5727. After faxing or emailing the certificate, please DO NOT send the certificate by mail to EBIX. Please do not mail, email or fax any certificates to the City of Roseville.
- Once submitted, EBIX reviews the insurance documentation. If there are deficiencies, EBIX will send a follow up letter or email requesting additional information.

Questions Regarding Insurance Submission: Contact EBIX at (951) 652-4239

The End Customer may terminate their Avaya Support Advantage Services at any time during the current term upon at least 30 days written notice and shall be subject to payment of: (i) Support Advantage charges up to and including the date of termination, and (ii) cancellation fees. Cancellation fees shall be equal to the greater of Support Advantage charges that would otherwise be payable for the affected Support Advantage coverage for the remainder of the year of the Term in effect as of the effective date of the termination OR, 50% of the remainder of the Term in effect as of the effective date of the termination. The parties agree that the cancellation fees are liquidated damages comprising a reasonable estimate of Avaya's damages in the event of the Customer's early termination and are not a penalty. Unless already paid, the cancellation fees shall be immediately due and payable upon cancellation.

A Platinum Equity Company

Master Sales and Maintenance Agreement (Amended 06/06/16)

THIS MASTER SALES AND MAINTENANCE AGREEMENT ("Agreement") is made this 1st of March, 2006, ("Effective Date") by and between Altura Communication Solutions, LLC, a Delaware limited liability company ("Altura"), and City of Roseville, a ("Customer"). The parties agree as follows:

- 1. SYSTEM AND MAINTENANCE SERVICES.** This Agreement governs Customer's orders for (i) purchase and installation of telecommunications equipment ("Equipment") and/or licensed software ("Software") (collectively, the "System"), (ii) maintenance services during the Warranty Period (as defined below) ("Warranty Maintenance Services"), (iii) maintenance services after the Warranty Period ("Post-Warranty Maintenance Services"), and/or (iv) other related services, at a single location or multiple locations (the "Premises"). Each order shall be set forth on an order form (the "Order Form") in the form attached to this Agreement as Exhibit A and attached hereto.
- 2. TERM.** The term of this Agreement shall commence on the Effective Date and will end, except as otherwise provided herein, upon expiration of the later of the Warranty Period and any Post-Warranty Maintenance Term (as defined below) hereunder (the "Term").
- 3. AGREEMENT.** This Agreement incorporates the General Terms and Conditions attached hereto and any Exhibit, Schedule and/or Scope of Work executed by the parties and attached hereto. Except as set forth on the front page of this Agreement, all capitalized terms shall have the meanings set forth in the General Terms and Conditions.
- 4. NOTICES.** Notices shall be in writing and will be deemed given when delivered in person, or when sent via facsimile, overnight courier, or when mailed by certified mail (return receipt requested) to the addresses set forth below. The parties shall notify each other of any changes of address.

GENERAL TERMS AND CONDITIONS

5. PRICE AND PAYMENT TERMS

(a) **Sale; Payment.** The total purchase price of the System excluding taxes (the "Purchase Price") is set forth on the Order Form. Unless otherwise indicated, the Purchase Price includes costs of shipping and installation. If Customer is purchasing a System or part thereof, Customer shall pay (i) 30% of the Purchase Price upon execution of this Agreement, (ii) 60% of the Purchase Price on the date of Delivery or the date Customer notifies Altura of Customer's desire to delay Delivery, and (iii) 10% of the Purchase Price on the date of Acceptance (as defined below).

(b) **Lease; Payment.** If Customer elects to enter into a lease arrangement rather than a direct purchase from Altura, Customer shall enter into a binding agreement (the "Lease") satisfactory to Altura with a leasing company or other financial institution ("Lessor") satisfactory to Altura providing for a lease of the Equipment by Customer from Lessor. Altura shall reasonably cooperate with Customer in arranging for such Lease; however, Altura shall have no liability if such Lease is not obtained, nor shall Altura have any liability under the Lease. Upon execution by Customer of this Agreement, Customer shall deposit with Altura 30% of the Purchase Price as a deposit ("Deposit"). Upon the effective date of the Lease and upon receipt of a purchase order from Lessor for the Equipment, in form satisfactory to Altura, Altura will credit the Deposit to Customer's account with Lessor. Altura shall not be required to commence the shipment or installation of the Equipment until Altura has received the purchase order, a copy of the Lease executed by Customer and Lessor, and the Deposit. The date of Cutover will be extended accordingly in the event of a delay in receiving the purchase order, executed Lease or Deposit. In the event Customer is unable to secure a lease within sixty (60) days of signing this Agreement, or at least sixty (60) days prior to the scheduled installation date if earlier, the applicable order will be canceled and Customer will reimburse Altura for any out-of-pocket costs and expenses incurred by Altura with respect to this Agreement.

(c) **Sales and Use Taxes.** (i) Altura will collect sales and/or use tax from Customer on the total amount of Purchase Price, Service Fee (as defined below) and shipping charges based on the tax laws and tax rates in effect in the state to which the System is shipped or in which the Warranty Maintenance Services and Post-Warranty Maintenance Services (collectively, the "Maintenance Services") are performed, unless: (A) Customer provides a tax exemption or resale certificate for the state(s) to which the System is shipped or in which the Maintenance Services are performed; or (B) Customer demonstrates that no sales or use tax is due on the Service Fee in the locale in which services are performed. (ii) If sales or use taxes are not invoiced or collected, and it is later determined that sales or use taxes apply, Customer agrees to pay such taxes, with any interest or penalties.

(d) **Other Payment Terms.** All charges are due and payable as indicated in this Agreement. Past due amounts bear interest at a rate of 1.5% per month or the maximum permitted by law. "Delivery" is defined as on-site delivery of the main processor at the Premises. "Cutover" occurs when a System is connected to the network, activated and functioning to provide basic service, excepting minor variances in performance of the System that do not materially impair basic service. All stated dates for Delivery, installation and Cutover are approximate and Altura shall not be liable for any loss, damage or expenses arising from delays in Delivery, installation or Cutover. No payment by Customer or receipt by Altura of a lesser amount of the Purchase Price or any other sum hereunder, shall be deemed to be anything other than payment and/or receipt on account of the Purchase Price schedule above, nor shall any endorsement or statement on any check or any letter accompanying such check or payment be deemed an accord and satisfaction. Altura may accept such check or payment without prejudice to Altura's right to recover the balance of the Purchase Price or pursue any other remedy available under this Agreement at law or in equity. Customer shall not be relieved of its payment obligations due to the failure of Lessor or any third party to make timely payments.

6. **ACCEPTANCE.** After Altura installs a System, Altura shall test the System in accordance with the manufacturer's diagnostic and readiness test specifications. The System will be deemed accepted by Customer after it has been Cutover and has operated in accordance with the manufacturer's specifications and the scope of work ("Acceptance"). Customer will, upon Acceptance, promptly execute an In-Service Certificate. If a System is installed in phases, Altura may request a separate written In-Service Certificate for each phase. If Customer has entered into a Lease and Acceptance has occurred, upon request by Altura and/or Lessor, Customer shall execute a Delivery and Acceptance Notice ("D&A Notice"). If Customer fails and/or refuses to execute a D&A Notice, notwithstanding anything to the contrary set forth herein or in the Lease, Customer shall be liable to Altura for the full Purchase Price of the System which shall be due and payable immediately.

7. **ORDERING PROCEDURES.** The purchase of any Equipment, Software and/or Maintenance Services (excluding Modifications as set forth in Section 8 below) is subject to the following procedures:

(a) Upon Customer's request, by purchase order or otherwise, Altura will prepare and remit to Customer an Order Form for each new System or Maintenance Service.
(b) Customer shall notify Altura of its acceptance or rejection of Altura's quote within thirty (30) days of Customer's receipt of the Order Form by signing the Order Form and returning it to Altura. Altura's quote will expire if Customer fails to return the Order Form within the thirty (30) day period. Any additional terms on the executed Order Form shall be construed as proposals for addition to the contract and will not become part of the Agreement unless Altura expressly indicates its assent thereto.

(c) Altura shall acknowledge acceptance of Customer's order by signing and returning the Order Form to Customer with, if applicable, indication that Altura has agreed to be bound by any additional terms proposed by Customer. Altura's failure to return the executed Order Form to Customer shall indicate rejection of the order. All Order Forms executed by both parties are deemed incorporated into this Agreement.

(d) Unless expressly accepted by both parties in writing, no terms on any Customer-issued purchase order or other Customer-issued ordering documentation shall be binding upon Altura or become a part of this Agreement. This Agreement shall govern any Lease, security agreement, Customer-issued purchase order, or other agreement. No additional terms shall be binding unless agreed upon by both parties in writing.

(e) A schedule ("Schedule") and/or scope of work ("Scope of Work") may be attached to the Order Form. Any Schedule and/or Scope of Work attached to an Order Form shall be deemed incorporated into this Agreement provided that both parties mutually agree upon and execute the Schedule and/or Scope of Work.

8. CHANGES, CLAIMS, RETURNS AND CANCELLATIONS

(a) **Changes.** Upon Customer's request, by purchase order or otherwise, Altura shall perform moves, adds, changes, or deletions to a System ("Modifications") pursuant to an executed Sales Change Notice ("SCN") before Cutover, or a Moves, Adds or Changes Order ("MAC") after Cutover. All executed SCNs and/or MACs shall be deemed incorporated into this Agreement. Changes to the Equipment will result in added charges to be paid by Customer promptly upon receipt of an invoice for such additional charges. Cumulative delays requested by Customer of more than twenty (20) days may result in increased associated labor and material costs, plus increases instituted by Altura and any applicable equipment shortage and carrying charges.

(b) **Claims.** Altura will not accept Customer claims of shortages, discrepancies or damage to Equipment Altura does not install unless Customer notifies Altura of such claims in writing within fourteen (14) calendar days of Delivery.

(c) **Returns.** Altura will only accept return of Equipment which reflects a Return Merchandise Authorization ("RMA") number, is in its original packaging, and is in

the same condition as delivered, ordinary wear and tear excepted. Altura shall charge a restocking fee for Equipment returns unless the Equipment is defective, delivered in error, or delivered pursuant to a SCN issued by Altura. The parties agree that Altura may reject any return or exchange request that does not strictly comply with Altura's return procedures.

(d) **Cancellations.** If Customer cancels an order for Equipment and/or Software in whole or in part, Customer shall pay Altura (i) all reasonable costs and expenses for Equipment, material and labor incurred in connection with Altura's preparation for or actual performance pursuant to an order, and (ii) as liquidated damages and as a reasonable estimate of Altura's lost profits, and not as a penalty, 20% of the Purchase Price.

9. RISK OF LOSS, TITLE AND SECURITY INTEREST.

(a) **Risk of Loss.** Customer assumes the risk of loss with respect to each piece of Equipment from the date such piece of Equipment is delivered to the Premises. Customer shall maintain insurance for the full insurable value of the System in an amount equal to the unpaid balance of the Purchase Price and shall name Altura as an additional insured under its policy.

(b) **Transfer of Title.** Title shall pass to Customer upon payment in full of the Purchase Price plus taxes. Title to all parts used to repair the Equipment shall remain in Altura until installed and all parts removed and/or replaced in providing the Maintenance Services shall become the property of Altura.

(c) **Security Interest.** Customer grants Altura a purchase money security interest in the Equipment to the extent of any unpaid balance of the Purchase Price and taxes. Customer agrees to execute such documents as Altura may reasonably require to perfect its security interest in the Equipment. Until title passes to Customer, Customer will not create, assume or suffer to exist any security interest, lien or encumbrance upon the Equipment ranking equal to or above Altura's security interest in the Equipment nor will Customer sell, lease dispose of or remove the Equipment from the Premises.

10. CUSTOMER'S RESPONSIBILITIES.

(a) Customer shall (i) permit full access to the Premises for Altura to perform services pursuant to this Agreement including periodic maintenance inspections; (ii) permit Altura to access the System remotely by installing and maintaining a dedicated outside central office telephone line connected to the System; (iii) maintain the Equipment in a clean, ventilated room free of non-communications equipment and material and the temperature and humidity shall be maintained within the manufacturer's specified operating ranges; (iv) provide a lockable door to the equipment room; (v) limit access to equipment room to authorized personnel only; (vi) provide first level fault isolation and, if possible, resolution; and (vii) operate the System strictly in the manner prescribed by Altura and will not move, alter or permit the alteration of any of the Equipment or Software without the prior written consent of Altura. Altura will invoice Customer at its then current time and materials rate for any expenses related to delays resulting from conditions at the Premises which preclude Altura's performance.

(b) Customer represents and warrants that the Premises shall: (i) be in compliance with all applicable federal, state and local laws, rules and regulations; (ii) be safe and non-hazardous; and (iii) not contain, present, or expose Altura technicians to hazardous materials or substances. If Customer breaches this Section 10, Altura may immediately suspend performance until Customer has corrected such condition(s). If Customer does not correct such condition(s), Altura may elect, at its sole discretion, to recommence performance or terminate the Order with respect to such Premises without liability.

(c) If Customer requests an upgrade to an existing system not maintained by Altura under a current agreement, Altura may require, at Customer's expense, that the existing system be brought into compliance with the manufacturer's specifications before installing the upgrade. Altura will invoice Customer at its then current time and materials rate, and Customer agrees to pay Altura, to inspect the existing system and, upon Customer's request, bring the system into compliance with the manufacturer's specifications.

11. LIMITATION OF LIABILITY.

(a) IN NO EVENT SHALL ALTURA, ITS SUPPLIERS OR SUBCONTRACTORS BE LIABLE FOR: (i) ANY INDIRECT, INCIDENTAL, SPECIAL, OR EXEMPLARY DAMAGES; (ii) CONSEQUENTIAL DAMAGES, INCLUDING, WITHOUT LIMITATION, COMMERCIAL LOSS OF ANY KIND INCLUDING, WITHOUT LIMITATION, LOSS OF BUSINESS, GOODWILL, PROFITS, REVENUE OR SAVINGS, LOSS OF DATA OR MESSAGES, OR (iii) ANY DAMAGES OF ANY KIND RESULTING FROM UNAUTHORIZED USE OF OR INTRUSION INTO THE SYSTEM, INCLUDING TOLL FRAUD. THIS PROVISION APPLIES TO ALL CLAIMS WHETHER BASED UPON BREACH OF WARRANTY, BREACH OF CONTRACT, NEGLIGENCE, STRICT LIABILITY IN TORT OR ANY OTHER LEGAL THEORY, AND REGARDLESS OF WHETHER ALTURA, ITS SUPPLIERS OR ITS SUBCONTRACTORS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH LOSS OR DAMAGES.

TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, ALTURA'S LIABILITY FOR LOSS OR DAMAGES RELATED TO THE SALES AND INSTALLATION OF THE EQUIPMENT SHALL NOT EXCEED THE PRICE PAID FOR THE PARTICULAR ITEM OF EQUIPMENT REGARDLESS OF THE FORM OF ANY CLAIM, WHETHER IN CONTRACT, TORT, NEGLIGENCE OR UNDER THE U.C.C., OR UNDER ANY OTHER THEORY IN LAW OR EQUITY. ALTURA'S SOLE LIABILITY RELATED TO THE PROVISION OF MAINTENANCE SERVICES BY ALTURA HEREUNDER SHALL BE LIMITED TO THE COSTS ASSOCIATED WITH THE REPERFORMANCE OF WORK, REPAIRS, ADJUSTMENTS, OR ANY COMBINATION THEREOF, AND/OR THE COST OF MATERIAL PROVIDED SUCH AS REPLACEMENT PARTS.

ALTURA SHALL HAVE NO LIABILITY RESULTING FROM USE OF THE EQUIPMENT IN CONJUNCTION WITH LIFE SUPPORT DEVICES, MEDICAL DEVICES, NATIONAL DEFENSE, PUBLIC TRANSPORTATION, AVIATION, OR OTHER CRITICAL USES WHICH MAY SUBJECT THE PUBLIC TO HARM.

ALTURA SHALL NOT BE RESPONSIBLE FOR FAILURE TO PROVIDE SERVICE HEREUNDER (i) AT LOCATIONS DEEMED HAZARDOUS TO THE HEALTH OR SAFETY OF ALTURA'S EMPLOYEES OR AGENTS, OR (ii) WHERE SUCH FAILURE RESULTS FROM CAUSES BEYOND THE REASONABLE CONTROL OF ALTURA, INCLUDING, BUT NOT LIMITED TO EVENTS OF FORCE MAJEURE AS SET FORTH HEREIN AND ACTS OR OMISSIONS OF CUSTOMER, SUBCONTRACTORS OR SUPPLIERS. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, ALTURA AND ITS AGENTS SHALL HAVE NO LIABILITY FOR DAMAGES ARISING FROM MANUFACTURING, DESIGN OR INSTALLATION DEFECT OF EQUIPMENT OR UNAUTHORIZED USE OF CUSTOMER'S SYSTEM BY PERSONS OTHER THAN EMPLOYEES OF ALTURA OR ITS AGENTS. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT SHALL ALTURA BE LIABLE TO CUSTOMER FOR ANY DAMAGES ARISING FROM OR RELATED TO FAILURE OR INTERRUPTION OF SOFTWARE PRODUCT(S).

(b) Altura shall be liable for any physical damage it causes to the System or its components; such liability is limited to Altura's repair of the System or component, or if the System or component cannot be repaired, replacement with a comparable System or component.

12. SOFTWARE LICENSE.

(a) **General.** All Software licensed hereunder is proprietary and confidential, having been developed by or for Altura or a third party provider. All such software and all copies or modifications thereof are or shall become the property of Altura or its third party provider. Only one right of use of the Software is being licensed herein. Each piece of Software is licensed to Customer solely for Customer's use only with the specific piece of Equipment to which it relates. Customer shall ensure that anyone who uses the Software does so only in compliance with the terms of this Agreement. Customer shall not reverse engineer or decompile any of the Software. Customer shall use such Software only as stated herein, shall not use the Software with any other equipment item and shall not disclose or transfer the Software, or any part of it, to any other party except with the express written permission of Altura, which permission to transfer may be granted by the specific software license furnished with or for the Equipment herein if applicable provided the transferee agrees in writing to be bound by these provisions. This Software protection will be supplemented by the provisions of any software license furnished with or for the Equipment.

(b) **Grant of License.** Customer is granted a Software license directly from Avaya, Inc. ("Avaya") and/or the manufacturer pursuant to the terms of this Agreement and/or the software license agreement attached to this Agreement, the Order Form or delivered with the Equipment. Any such license agreement shall be deemed

incorporated into this Agreement and shall exclusively and independently govern the licensing of such Software; provided, however, Customer acknowledges and agrees: (i) to be bound by the terms of any software license agreement of Avaya and/or any third party provider in connection with Equipment manufactured and/or provided by or through Avaya; (ii) that Avaya shall be a third party beneficiary of the license(s) granted to Customer by or through Avaya; (iii) that Avaya may enforce its rights directly against Customer for any breach thereof; (iv) that Altura or Avaya may cancel any license to Customer for failure to comply with any provision of any software license agreement provided in connection with Equipment manufactured and/or provided by or through Avaya; and (v) not to modify any Software provided in connection with Equipment manufactured and/or provided by or through Avaya in order to verify compliance with the license(s) via remote access) the system configuration containing the Equipment manufactured and/or provided by or through Avaya in order to verify compliance with the license(s) granted to Customer, provided that such audit shall be conducted at the time of enablement of any separately licensed feature or incremental unit of capacity and at other times selected by Avaya which, except in the event of emergencies or suspected violations, shall not be more than once per calendar year upon at least two (2) business days' notice. In addition to the Software license granted by Avaya, Altura grants Customer a non-exclusive, non-transferable, limited license to use the Software only in the System for its useful life, provided Customer: (i) does not disclose information about the Software to a third party without Altura's prior written consent; (ii) uses the System solely for Customer's internal business purposes; (iii) does not copy any part of the Software without Altura's consent, (iv) does not attempt to develop any source code from the Software; and (v) returns, erases or destroys any Software on any media being recycled or discarded and so certifies to Altura. Subject to Section 22(b) hereof and the payment of a right-to-use fee, Customer may transfer the right to use the Software to an end user who acquires the right to use the System and agrees to be bound by the terms of this license.

(c) **Copies.** If the Software contains documentation that is provided only in electronic form, then Customer is authorized to print only one copy of the documentation per licensed copy of the Software program. If the Software is provided as a program upgrade, then authorization to use the Software from which Customer is being upgraded shall be limited to use in connection with the upgrade, and shall be limited to the total number of Customer's authorized or licensed copies of the Software.

(d) **Restricted Rights.** The Software and related documentation is provided to the United States Government ("Government") with RESTRICTED RIGHTS. Use, duplication, or disclosure by the Government is subject to restrictions as set forth in subparagraph c)(1) (ii) of the Rights in Technical Data and Computer Software clause at DFARS 252.227-7013 or subparagraphs c)(1) and (2) of the Commercial Computer Software- Restricted Rights at 48 CFR 52.227-19, as applicable. Distributor is Altura Communication Solutions, LLC, 2890 E. White Star Ave, Anaheim, CA 92806, or its licensor.

(e) **Export.** Customer agrees not to export or re-export directly or indirectly any Software (including source code), technology, or direct products of Software or technology to any countries or nationals of any countries except in compliance with the U.S. Export Administration Regulations. In conjunction therewith, and in conformity with the United States Export Administration Act and regulations promulgated thereunder, Customer represents and warrants that Customer shall not disclose, export or re-export, directly or indirectly, any Equipment or technical data (or direct products thereof) provided under this Agreement to destinations in Country Groups Q, S, W, Y and Z as modified from time to time by the U.S. Department of Commerce, or that are otherwise controlled under said Act and regulations. Without limiting the foregoing, Customer shall comply with all applicable export control, import control and trade embargo laws, rules and regulations, whether foreign or domestic. Customer shall not resell, export, import, re-export, distribute, transfer or dispose of Equipment or technical data, directly or indirectly, without first obtaining all necessary written consents, permits and authorizations and completing such formalities as may be required by any such laws, rules and regulations. Failure by Customer to comply with such laws, rules and regulations shall constitute a material breach of this Agreement which is incapable of being cured. Customer shall ensure that its employees, agents, partners, customers, and the like also comply with such laws, rules and regulations. Customer shall not do anything which would cause Altura, or its suppliers or licensors to be in breach of such laws, rules and regulations, and shall protect, indemnify and hold harmless Altura and its suppliers and licensors from any fines, damages, costs, losses, liabilities, penalties and expenses incurred by Altura or its affiliates, suppliers or licensors as a result of the errors, mistakes, failures or omissions of Customer, or any third party under agreement with Customer, including without limitation any failure by Customer to comply with these terms and conditions.

(f) **Breach of License.** Customer acknowledges that the Software is proprietary and confidential, and is the property of Altura or a third party licensor. Notwithstanding any other provision of this Agreement, Customer's failure to comply with the terms of this Section 12 shall be deemed a material breach of this Agreement. Accordingly, Altura shall be entitled to immediately terminate this Agreement and all of Customer's rights and privileges to the Software, and to obtain injunctive and other relief as necessary to protect Altura from any potential damage resulting from such breach.

13. LIMITED WARRANTY.

(a) Altura warrants that (i) the Equipment it installs will be free from defects in materials and workmanship and will operate in accordance with manufacturer's specifications for one (1) year after Cutover (the "Equipment Warranty Period"); and (ii) the Software provided with the Equipment will conform in all material respects to the applicable software specifications for ninety (90) days from Cutover (the "Software Warranty Period," together with the Equipment Warranty Period, the "Warranty Period"); provided, however, that if Cutover is delayed by more than thirty (30) days due to Customer's acts or omissions, the Warranty Period shall be reduced by such number of days in excess of thirty (30) calendar days. Notwithstanding the foregoing, with respect to Equipment and/or Software used in an upgrade to an existing System or Equipment and/or Software installed after Cutover arising out of the performance of Maintenance Services or authorized Modifications, the Warranty Period for such Equipment and/or Software shall terminate upon the later of the expiration of the applicable Warranty Period for the existing Equipment and/or Software and ninety (90) days after installation.

(b) Exclusions.

(i) The warranty provided herein applies only to Equipment and Software sold or leased pursuant to the terms of this Agreement and does not apply to other Equipment or Software, including, without limitation, rented Equipment or Equipment that is the subject of a shared maintenance arrangement.

(ii) Customer's SOLE AND EXCLUSIVE REMEDY for breach of any warranty is limited to the remedies in Section 14 below. Altura's liability terminates at the end of the applicable Warranty Period or the Post-Warranty Maintenance Term, if applicable, including liability for any manufacturing defects that Customer did not discover within the Warranty Period. If, however, it is determined that such remedy fails of its essential purpose, then Altura's entire liability is limited to Altura's payment of Customer's actual damages in an amount not to exceed the portion of the Purchase Price allocable to the Equipment related to the claim, less a reasonable amount for its use. Except as set forth above, Maintenance Services provided during the Warranty Period will not extend or restart the Warranty Period.

(iii) Altura does not warrant that the Equipment will run uninterrupted or error-free.

(iv) The foregoing warranty shall be void if the System has been subject to: (A) damage caused by Force Majeure conditions; (B) Customer's failure to follow operational, maintenance, or environmental requirements described in the manufacturer's manuals or product bulletins, or Altura manuals and other documentation; (C) Customer's or third party's additions, alterations, modifications, enhancements, repairs or disassembly without Altura's written consent; (D) Customer's or third party's mishandling, abuse, misuse, negligence or damage; (E) relocation without Altura's written consent (other than telephone instruments relocated in accordance with the manufacturer's specifications); (F) Customer's failure to promptly advise Altura of a malfunction which delay exacerbates the malfunction; (G) operation beyond the System's design range or improper testing; (H) failures or changes required by the local exchange company interexchange carrier, the power company or the transmission providers; and/or (I) malfunctions of third party equipment including batteries and auxiliary equipment and equipment owned by the public telephone network.

(v) The above limited warranty does not extend to, and Altura does not warrant, products or Equipment normally consumed in operation or which have a normal life shorter than twelve (12) months. With respect to such products or Equipment, Altura conveys to Customer the warranty, if any, of Altura's supplier, to the extent that such warranty can be conveyed.

(vi) Although the Equipment is designed to be reasonably secure, Altura makes no express or implied warranty that Equipment is immune from or will prevent fraudulent intrusion, unauthorized use or disclosure or loss of proprietary information. When enabled, certain Software features, including silent monitoring features, could be used improperly in violation of privacy laws. Altura prohibits the use of Software in any improper manner or for any illegal use. Notwithstanding anything

contained in this Agreement to the contrary, Altura shall not be liable for any improper or unlawful use of such features and Customer shall indemnify, defend and hold Altura harmless from any losses, claims, liabilities or damages to the extent due to any improper or illegal use of the System or any of its components by or for Customer.

(vii) **THE WARRANTIES PROVIDED BY THIS SECTION 13 ARE IN LIEU OF ALL OTHER EXPRESS WARRANTIES AND IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT. ALTURA DISCLAIMS ANY WARRANTY TO PREVENT UNAUTHORIZED USE OF OR INTRUSION INTO THE SYSTEM INCLUDING TOLL FRAUD.**

14. WARRANTY MAINTENANCE SERVICES AND POST-WARRANTY MAINTENANCE SERVICES.

(a) **Level of Service.** Subject to the terms of this Agreement, during the Term, Altura shall maintain the System in good operating condition in accordance with generally accepted telephone industry standards. Altura shall provide Customer with Standard Services, as set forth in subsection (b) of this Section 14 ("Standard Services"). In addition, Customer may elect enhanced optional coverage ("Optional Coverage"), as set forth in subsection (c) of this Section 14 by so indicating on the Order Form. During the Warranty Period, Altura shall provide Standard Services at no extra charge to Customer. If Customer elects to receive Post-Warranty Maintenance Services, Altura shall provide and Customer agrees to pay for Standard Services at the rate set forth on the Order Form during the period of time selected (the "Post-Warranty Maintenance Term"). If Customer elects to receive Optional Coverage, Altura shall provide and Customer agrees to pay for such Optional Coverage at the rate set forth on the Order Form.

(b) **Standard Services.** For a major System malfunction resulting in total System failure, failure of a console or application processor, or failure of 10% or more of a System's trunks or stations ("Major System Malfunction"), Altura will endeavor to respond to service requests remotely or on-site within four (4) business hours of receipt of notice from Customer, between 8 a.m. and 5 p.m. local time, Monday through Friday including Altura Observed Holidays (as defined below). All other malfunctions are classified as non-emergency. Altura will endeavor to respond to non-emergency service requests within one business day of receipt of notice from Customer, except when the request is made on or the day before a weekend day or an Altura Observed Holiday, in which case Altura will respond by the next business day. At Customer's request, Altura will use commercially reasonable efforts to perform emergency and non-emergency services outside normal working hours, subject to manpower availability at Altura's then current rates. In performing the Maintenance Services, provided that the malfunction can be reproduced or verified, Altura will, at its option and expense, repair a System at the Premises, or accept return of System components for repair or replacement provided that maintenance of Software shall be limited to the database of the System and shall not include maintaining generic or operating software included in the Software other than normal reloading. Repair and replacement parts may be new or reconditioned to be the functional equivalent of new. Altura Observed Holidays shall mean New Year's Day, Good Friday, Memorial Day, Fourth of July, Labor Day, Thanksgiving Day, the day after Thanksgiving Day, Christmas Eve Day, Christmas and New Year's Eve Day, and shall not be considered business days. Customer agrees to execute Altura's form of Field Service Report for all Maintenance Services provided hereunder.

(c) **Optional Coverage.** Customer may elect to receive one or more of the following Optional Coverages by so indicating on the Order Form: (i) Standard Services but provided twenty-four (24) hours per day, seven days per week including Altura Observed Holidays ("24x7 Coverage"); and/or (ii) Standard Services but provided with a two (2) hour response time for Major System Malfunctions ("2 Hour Coverage"); or (iii) Standard Services but provided twenty-four (24) hours per day, seven days per week including Altura Observed Holidays for the Warranty Period with a two (2) hour response time for Major System Malfunctions for the Warranty Period and Post-Warranty Maintenance Term ("Value Plus Maintenance"). Payment for any Optional Coverage shall be due together with the Purchase Price and any Service Fee, as applicable.

(d) **Additional Services.** Notwithstanding the foregoing, the following services ("Additional Services") shall not constitute Standard Services and, subject to availability will be provided at Altura's then current rates: (i) furnishing expendables and supplies (platens, ribbons, thermal print elements, tape cartridges, batteries, etc.); (ii) repairs not attributable to normal wear and tear; (iii) non-emergency services (including maintenance inspections) outside of normal working hours; (iv) services provided outside a fifty (50) mile radius of the local service center; (v) Modifications and upgrades; (vi) electrical work external to the System; (vii) service which is impractical for Altura to render because of Equipment alterations or its connection to other devices, or because of alterations to operating systems; (viii) systems engineering services, programming, and operations procedures of any sort; and (ix) upon thirty (30) days prior written notice, relocation, removal, rearrangement and/or similar services within a fifty (50) mile radius of the local service center. Payment for Additional Services shall be due and payable upon receipt of invoice from Altura. Customer waives its right to claim that Maintenance Services requested hereunder were requested and/or approved by an unauthorized employee or agent.

(e) If Customer orders an upgrade to an existing system, then "System" shall mean "the existing system as upgraded by the System" for purposes of this Agreement.

15. POST-WARRANTY MAINTENANCE TERM; SERVICE FEE.

(a) Altura shall provide Post-Warranty Maintenance Services on Equipment for one (1) year from the day after the Warranty Period expires or no Post-Warranty Maintenance Services or another term, as indicated on the Order Form (such one (1) year term or other term to be referred to as the "Initial Term"). Maintenance parts are furnished on an exchange basis. The replaced parts become the property of Altura.

(b) At the end of the Initial Term, unless otherwise agreed, the Post-Warranty Maintenance Term shall automatically renew in successive annual periods at Altura's then current rate unless Customer or Altura declines such renewal in writing at least forty-five (45) days before the end of the Initial Term.

(c) The fee for Post-Warranty Maintenance Services is set forth on the Order Form ("Service Fee"). Customer may elect to be billed for such Post-Warranty Maintenance Services on a quarterly, semiannual or annual basis, in advance, as Customer indicates on the Order Form. After the Initial Term, Altura may adjust charges for Maintenance Services upon ten (10) days prior written notice, provided such adjustment does not exceed Altura's then standard rates for servicing like Equipment. Payment for Post-Warranty Maintenance Services shall be due and payable in advance, no later than the commencement of the first billing cycle and prior to commencement of each billing cycle thereafter. For customers electing a multi-year Post-Warranty Maintenance Term as set forth on the Order Form, charges for these services during the Initial Term will not increase more than the cumulative increase in the Consumer Price Index or 5% per annum, whichever is greater.

(d) If Customer has elected a Post-Warranty Maintenance Term of one (1) year or less, such Post-Warranty Maintenance Term may be terminated by Customer upon ninety (90) days prior written notice to Altura without charge. If Customer has elected a Post-Warranty Maintenance Term greater than one (1) year, such Post-Warranty Maintenance Term may be terminated by Customer upon ninety (90) days prior written notice to Altura; provided, however that all Service Fees payable or to become payable during the Post-Warranty Maintenance Term shall be accelerated and Customer shall pay Altura such accelerated amount within thirty (30) days of termination.

(e) After termination of the Post-Warranty Maintenance Term, Altura shall provide Maintenance Services to Customer pursuant to the terms and conditions of a separate agreement providing for maintenance on a time and materials basis.

16. MAINTENANCE SERVICES EXCLUSIONS.

(a) Maintenance Services exclude repairs for: (i) damage caused by Force Majeure conditions; (ii) Customer's failure to follow operational, maintenance, or environmental requirements described in the manufacturer's manuals or product bulletins, or Altura manuals and other documentation; (iii) Customer's or third party's additions, alterations, modifications, enhancements or repairs to, or disassembly of, the System without Altura's written consent; (iv) Customer's or third party's mishandling, abuse, misuse, negligence or damage to the System; (v) relocation of the System without Altura's written consent (other than telephone instruments relocated in accordance with the manufacturer's specifications); (vi) Customer's failure to promptly advise Altura of a malfunction which delay exacerbates the malfunction; (vii) operation beyond the System's design range or improper testing; (viii) failures or changes required by the local exchange company, interexchange carrier, the power company or other transmission providers; and/or (ix) malfunctions of third party equipment including batteries and auxiliary equipment and equipment owned by the public telephone network.

(b) Post Warranty Maintenance Services excludes repairs and replacement of third party personal computers, application processor hardware and

operating software that have been manufactured discontinued by the manufacturer. In the event of a failure, Altura will provide maintenance repairs on a best effort basis, with any new hardware or operating software billed at the Customers contracted rates.

(c) Altura reserves the right to void the Warranty, cancel its service obligations for a System after the Warranty Period and accelerate payment of all Service Fees due or to become due under the Post-Warranty Maintenance Term if Customer installs or has installed gray market products, performs or permits a third party to perform Modifications without the prior written approval of Altura.

17. **INDEMNIFICATION.** During the Warranty Period and any Post-Warranty Maintenance Term, each party shall indemnify the other for any third party claim alleging bodily injury, including death, or damage to tangible property to the extent such injury or damage is caused by the negligence of the indemnifying party, provided that such claim is promptly reported in writing and reasonable assistance is provided. The indemnifying party may, at its election, defend and control any such suit or proceeding.

18. **CONFIDENTIAL INFORMATION.** The parties agree: (i) not to disclose the Confidential Information (as defined below) of the other party, its agents and licensors, to third parties (excluding a party's agents or representatives); (ii) not to use the Confidential Information except in furtherance of the purposes of this Agreement; (iii) that the Confidential Information of a party is and shall remain the property of the disclosing party; and (iv) to return or destroy, at the request of the disclosing party, the other party's Confidential Information upon termination of this Agreement. Confidential Information includes information in any form regarding business or operations of a party including, without limitation, the terms of this Agreement; provided, however that Confidential Information shall not include information that: (A) is or subsequently becomes publicly available without the receiving party's breach of any obligation owed to the disclosing party; (B) became known to the receiving party prior to the disclosing party's disclosure of such information to the receiving party; (C) became known to the receiving party from a source other than the disclosing party and other than by the breach of an obligation of confidentiality owed to the disclosing party; or (D) is independently developed by the receiving party. Nothing herein shall prevent disclosures that are required by law.

19. **DEFAULT.** Either party shall be entitled to seek adequate assurance of performance and thereafter terminate this Agreement and/or any outstanding Order Form and pursue its remedies in law or equity, except as otherwise limited by this Agreement, in the event that: (i) the other party fails to make any payment when due and fails to cure the nonpayment within ten (10) days of written notice; (ii) the other party commits a material breach of this Agreement (other than a payment breach) and fails to cure that breach within thirty (30) days of written notice describing the breach; (iii) if Customer refuses to permit Altura to perfolil its obligations under this Agreement, or purports to terminate or cancel this Agreement or any Order Form; (iv) a party files bankruptcy or fails to discharge an involuntary petition within sixty (60) days; or (v) a party ceases doing business or commences dissolution or liquidation. The aggrieved party may suspend performance of its obligations during the cure period for any breach described above. Upon termination of this Agreement resulting from Customer's failure to pay and/or material breach, Altura shall have the right to accelerate all Service Fees payable or to become payable hereunder and Customer shall pay Altura such accelerated amount within ten (10) days of termination.

20. **FORCE MAJEURE.** Altura's non-performance or delay shall be excused to the extent the failure or delay in performance is the result of events beyond Altura's reasonable control, including but not limited to, acts of God (e.g., lightning, earthquake, etc.), power failures, surges, or fluctuations, air conditioning failures, malfunction of external trunk or cable lines, labor disputes, shortages of supplies, riots, war, fire, epidemics, government regulation, court action, Customer's acts or omissions, or transportation difficulties.

21. **DISPUTE RESOLUTION.** In the event of a dispute arising out of this Agreement, the parties agree to negotiate in good faith to discuss and attempt to resolve the issues which are the subject of the dispute. ~~If such discussions fail to resolve the dispute, (i) disputes that are likely to affect or involve intellectual property rights shall be handled by a court of competent jurisdiction located in Orange County, California; (ii) disputes that involve payment hereunder may be handled, at Altura's sole discretion, either by a court of competent jurisdiction or by arbitration pursuant to this Section 21; and (iii) all other disputes shall be submitted to binding arbitration for final resolution. The arbitration shall be conducted in accordance with the Commercial Arbitration Rules of the American Arbitration Association ("AAA") and shall be held in Orange County, California. There shall be one arbitrator, and such arbitrator shall be chosen by mutual agreement of the parties in accordance with AAA rules. The findings of the arbitrator shall be final and binding on the parties and may be entered by either party in a court of competent jurisdiction located in Orange County, California for purposes of enforcement.~~ In the event that legal resolution is required, venue shall be in Orange County, California.

22. **MISCELLANEOUS.** (a) **Subcontractors.** Altura may subcontract services under this Agreement. (b) **Assignment.** Customer shall not assign this Agreement or any Order Form, or transfer the System or any part thereof, without Altura's prior written consent. Any assignment of any rights, duties or obligations under this Agreement without Altura's consent will be deemed null and void. (c) **Binding Effect.** This Agreement shall be binding upon and shall inure to the benefit of the parties and their respective successors and permitted assigns. (d) **Waiver.** Waiver by either party of any default will not operate as a waiver of any subsequent default. (e) **Enforcement.** The non-prevailing party in any dispute will be liable for the prevailing party's costs or expenses of enforcing this Agreement, including reasonable attorneys' and collection fees. (f) **Severability.** If any court finds any provision of this Agreement to be void, unlawful or unenforceable under any applicable statute or other controlling law, the remainder of this Agreement shall continue in full force and effect. (g) **Credit Approval.** Customer will provide Altura with credit information as requested, and Altura's obligations under this Agreement are subject to credit approval. (h) **Statute of Limitations.** ~~Except for tax issues in Section 5(e), neither party may bring a cause of action arising from this Agreement more than two (2) years after the cause of action has accrued.~~ (i) **Governing Law.** This Agreement shall be governed by the laws of the State of California without regard to the conflicts of laws principles thereof. (j) **Statute of Frauds.** The parties may rely on a facsimile transmission of the other party's authorized signature to bind the other party and satisfy any applicable Statute of Frauds. (k) **Execution.** This Agreement may be executed contemporaneously in one or more counterparts, each of which shall be deemed an original, but which together shall constitute one instrument. (l) **Non-Solicitation.** Neither Customer nor its affiliates shall hire, employ or solicit with an offer to hire or employ any employees or agents of Altura, during the term of this Agreement and for one (1) year after termination. (m) **Independent Contractor.** Altura and Customer are independent contractors with respect to all rights and obligations under this Agreement. (n) **Entire Agreement.** This Agreement represents the entire agreement between the parties regarding the subject matter hereof and supersedes all prior written and oral representations. (o) **Amendments.** No amendment to this Agreement shall be effective unless it is in writing and signed by the parties. No usage of trade or course of dealing by or between the parties shall be deemed to constitute any modification or amendment of the terms of this Agreement. (p) **Document Precedence.** In the event of any conflict between this Agreement, any Order Form, Schedule or Scope of Work, unless otherwise indicated therein, with respect to each Order, the order of precedence shall be (i) the Order Form, (ii) the Schedules, (iii) the Scope of Work, and (iv) the Agreement.

COUNCIL COMMUNICATION

CC #: 0720
File #: 0203-06

Title: Nimble Storage Support - Purchase Order
Contact: Karl Grover 916-774-5145 kgrover@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.11.

RECOMMENDATION TO COUNCIL

Recommend Council authorize a purchase order to CDW Government, LLC for the renewal of Nimble support for the City's digital data storage solution in the amount of \$55,973.

BACKGROUND

The City's primary method of storing digital files onsite for all departments is Nimble storage. The Nimble solution consists of multiple storage arrays across multiple locations to provide capacity for the City's data storage needs in a reliable and secure manner. The support coverage period is from February 20, 2020 through August 1, 2024.

The cost is \$55,973 through CDW-G using a competitively-bid contract via National Intergovernmental Purchasing Alliance Technology Solutions (2018011-01).

FISCAL IMPACT

The support renewal cost of \$55,973 is accounted for in the Information Technology's FY2019-20 Internal Service Fund budget.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. A purchase order for the storage of digital files meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Respectfully Submitted,

Karl Grover, Acting Program Manager - IT Network Infrastructure

Hong Sae, Chief Information Officer

Dominick Casey, City Manager

Title: Cisco Smartnet Network Support - Purchase Order
Contact: Karl Grover 916-774-5145 kgrover@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.12.

RECOMMENDATION TO COUNCIL

Recommend Council authorize a purchase order to ConvergeOne for the renewal of Cisco SmartNet support for the Citywide data network in the amount of \$35,117.10.

BACKGROUND

The City's various technology services depend on the data network to efficiently and reliably send and receive information. The network consists of various types of Cisco devices located across many City locations to provide employees with access they need to perform daily job functions. The support coverage is from February 1, 2020 through November 30, 2020.

The cost is \$35,117.10 through ConvergeOne using a competitively-bid contract via the National Association of State Procurement Officials AR233 and State of California Participating Addendum # 7-14-70-04.

FISCAL IMPACT

The support renewal costs \$35,117.10 and is accounted for in the Information Technology's FY2019-20 Internal Service Fund budget.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. A purchase order for support of network devices meets the above criteria and is not subject to CEQA. No additional environmental review is required.

TERMS AND CONDITIONS

This Solution Summary summarizes the document(s) that are attached hereto and such documents are incorporated herein by reference (collectively, this "Order"). Customer's signature on this Order (or Customer's issuance of a purchase order in connection with this Order) shall represent Customer's agreement with each document in this Order and acknowledgement that such attached document(s) are represented accurately by this Solution Summary.

Unless otherwise specified in this Order, this Order shall be subject to the following terms and conditions (the "Agreement"): (i) the Master Sales Agreement or other applicable master agreement in effect as of the date hereof between ConvergeOne, Inc. and/or its subsidiaries and affiliates (collectively, "C1" or "ConvergeOne" or "Seller") and Customer; or (ii) if no such master agreement is currently in place between C1 and Customer, the Online General Terms and Conditions currently found on the internet at: <https://www.convergeone.com/online-general-terms-and-conditions/> . If Customer's Agreement is a master agreement entered into with one of ConvergeOne, Inc.'s predecessors, affiliates and/or subsidiaries, ("Legacy Master Agreement"), the terms and conditions of such Legacy Master Agreement shall apply to this Order, subject to any modifications, located at: <https://www.convergeone.com/online-general-terms-and-conditions/> . In the event of a conflict between the terms and conditions in the Agreement and this Order, the order of precedence shall be as follows: (i) this Order (with the most recent and specific document controlling if there are conflicts between the Solution Summary and any applicable supporting document(s) incorporated into this Order), (ii) Attachment A to the Agreement (if applicable), and (iii) the main body of the Agreement.

This Order shall apply to sales of any of the following to Customer: (a) any hardware, third party software, and/or Seller software (collectively, "Products"); (b) any installation services, professional services, and/or third party provided support services that are generally associated with the Products and sold to customers by Seller ("Professional Services"); (c) any Seller-provided vendor management services, software release management services, remote monitoring services and/or, troubleshooting services (collectively, "Managed Services"); and/or (d) any Seller-provided maintenance services ordered by Customer to maintain and service Supported Products or Supported Systems at Supported Sites to ensure that they operate in conformance with their respective documentation and specifications ("Maintenance Services"). For ease of reference only, Professional Services, Managed Services and Maintenance Services may be referred to collectively as "Services." Unless otherwise defined herein, capitalized terms used herein will have the same meanings as set forth in the Agreement.

Products and/or Services not specifically itemized are not provided hereunder. This Order will be valid for a period of thirty (30) days following the date hereof. Thereafter, this Order will no longer be of any force and effect.

COUNCIL COMMUNICATION

CC #: 0719
File #: 0203-12

Title: Taser Equipment - Sole Source Purchase Order
Contact: Shelly Bracco 916-774-5018 sbracco@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.13.

RECOMMENDATION TO COUNCIL

Authorize the issuance of a purchase order to ProForce for the purchase of replacement tasers with cartridges and spare parts for FY2019-20, in an amount not to exceed \$130,000.

BACKGROUND

The Police Department has an ongoing requirement for Tasers for its police personnel. The purchase is for (77) seventy-seven Tasers with cartridges and replacement parts. The Tasers are used by Patrol officers, the Regional SWAT team, and Animal Control officers.

The Police Department's current Taser X26 models are 15 years old and are no longer being supported by Taser for repair or replacement. The new X26P models, cartridges and replacement parts will carry the department through the next five years.

ProForce has been a sole source Taser provider to the City for several years. Prior to the recent authorization to replace all Tasers, the Police Department spent almost \$20,000 with ProForce in FY2019-20. By approving the sole source purchase increase to \$130,000, the Police Department will be able to make the final purchase of Tasers and stay within the requested limit.

FISCAL IMPACT

A budget adjustment was approved by Council on January 15, 2020, which appropriated \$100,000 in the Citizen's Option for Public Safety Fund for taser equipment replacement. The additional \$30,000 was approved in the Police Department's FY2019-20 budget. There will be no net impact to the General Fund.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not

considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The purchase taser equipment meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Respectfully Submitted,

Shelly Bracco, Administrative Analyst

James Maccoun, Police Chief

Title: Pool System Repair Parts and Service - Service Agreement Amendment
Contact: Brian Castelluccio 916-223-4310 bcastelluccio@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.14.

RECOMMENDATION TO COUNCIL

Staff recommends Council adopt a resolution authorizing the City Manager to execute Amendment No. 1 to the Service Agreement with Knorr Systems, Inc., to allow for pool system repairs and replacement components.

BACKGROUND

The request is for an increase in purchase authority in the FY2019-20 budget to \$40,000.00.

The Parks, Recreation & Libraries (PRL) department currently oversees three aquatics facilities and two splash pads with a total of nine water/chemical circulation systems. The systems consist of pumps, heaters, filters, chemical distribution systems and controllers. The systems' operation is critical to ensure a safe environment for pool users and the protection of our pool infrastructure and assets. To support the proper maintenance, repair and replacement of this critical specialized equipment, the City has procured a sole source on-call contract with Knorr Systems, Inc., who specializes in maintaining aquatic systems. Our facilities are aging and require an increased need for repair and replacement of system components. Earlier this year we had an unexpected emergency repair and replacement at our indoor pool, which was necessary to ensure the health and safety of the public and keep this revenue generating facility open to the public. This emergency replacement results in accumulated expenditures which exceed the previously approved limit. The increase is requested to accommodate this replacement plus the repair and replacement of critical system components at our aquatics facilities which may be needed through the remainder of the fiscal year. Knorr Systems, Inc., has performed satisfactorily and in accordance with the terms and conditions of the service agreement (S2003051).

FISCAL IMPACT

The total cost of the service agreement, including the recommended amendment, shall not exceed \$40,000. The funds for FY2019-20 are included in the Parks, Recreation & Libraries Department's General Fund budget. There is no net impact to the General Fund.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of an amendment to a service agreement for pool system repair parts and service meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Respectfully Submitted,

Brian Castelluccio, Parks, Recreation & Libraries Superintendent

Jill Geller, Parks, Recreation & Libraries Director

Dominick Casey, City Manager

RECOMMENDATION TO COUNCIL

Adopt a resolution authorizing the City Manager to execute the second amendment to Professional Services Agreement with HydroCompliance, Inc.

BACKGROUND

In May 2018, Council approved a Professional Services Agreement with BT Consulting, Inc. The agreement was for a base of one year with two optional one-year renewals. The authorization amount was for \$50,000 for the first year and \$50,000 annually. Council also authorized the City Manager to execute the remaining two (2) renewal years without further Council approval, pending approval of the budget each year. The first renewal was approved by the City Manager in May 2019. In March 2020, the City Attorney's Office approved assignment of the Agreement from BT Consulting, Inc. to HydroCompliance, pursuant to Section 13 of the Agreement.

The original Agreement also included a requirement to return to Council for approval if an increase to the annual amount was needed. Staff is requesting approval to extend the agreement for the second (final) one-year renewal period and increase the service agreement annual authorization by \$10,000, bringing the total annual amount to \$60,000 and the contract total to \$160,000 for the three-year contract period. The projected workload includes Pistachio Regional Park, Crabb Park, Sullivan Park and Central Park.

FISCAL IMPACT

The second amendment will increase the annual service agreement authorization by \$10,000, bringing the total annual amount to \$60,000 and the contract total to \$160,000 for the three-year contract period. The on-call services agreement does not guarantee an annual amount of work and is in place on an "as-needed" basis. Work performed under this service agreement will utilize capital improvement project budgets.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of a professional services agreement amendment meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Hydrocompliance - second amendment

RESOLUTION NO. 20-135

APPROVING A SECOND AMENDMENT TO ON-CALL PROFESSIONAL SERVICES AGREEMENT, BETWEEN THE CITY OF ROSEVILLE AND HYDROCOMPLIANCE, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, a second amendment to on-call professional services agreement for On-Call Qualified Stormwater Pollution Prevention Plan Developer and Qualified Stormwater Pollution Prevention Plan Practitioner Services, by and between the City of Roseville and HydroCompliance, has been reviewed by the City Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said second amendment is hereby approved and that the City Manager is authorized to execute it on behalf of the City of Roseville.

PASSED AND ADOPTED by the Council of the City of Roseville this ____ day of _____, 20_, by the following vote on roll call:

**SECOND AMENDMENT TO
ON-CALL PROFESSIONAL SERVICES AGREEMENT**

On-Call Qualified SWPPP Developer and Qualified SWPPP Practitioner Services

THIS SECOND AMENDMENT TO ON-CALL PROFESSIONAL SERVICES AGREEMENT is made and entered into this ____ day of _____, 20__, by and between the City of Roseville, a municipal corporation ("CITY"), and HydroCompliance, a California corporation ("CONSULTANT"); and

W I T N E S S E T H:

WHEREAS, CITY and CONSULTANT previously entered into an On-Call Professional Services Agreement dated August 15, 2018 and amended May 18, 2019 ("Agreement") regarding On-Call Qualified SWPPP Developer and Qualified SWPPP Practitioner services ("Project");

WHEREAS, CITY desires to amend the term for an additional year as outlined in Section 1 of the Agreement; and

WHEREAS, CITY consented to the assignment of the Agreement from BT Consulting, Inc. to HydroCompliance, pursuant to Section 13 of the Agreement.

NOW, THEREFORE, the parties agree as follows:

1. Section 1 of the Agreement is amended to read as follows:

"The term of this Agreement shall commence upon execution and expire on June 30, 2021."

2. Section 3 of the Agreement is amended to read as follows:

"Compensation. For its services provided hereunder, CONSULTANT shall be compensated on a time and expense basis in accordance with the hourly rates as described in Exhibit "B," attached hereto and incorporated herein by this reference. Any proposed increase in the effective rates for future services must be preceded by at least a 90-day written notice to the contracting department. Total compensation shall not exceed one hundred sixty thousand dollars (\$160,000.00). Total annual compensation shall not exceed sixty thousand dollars (\$60,000.00) per year. Adjustment to the total compensation per year shall require a written amendment to this Agreement, subject to approval by the City Council.

CONSULTANT shall submit monthly invoices for its services. Such invoices shall be delineated by task, the person performing the services, and the hourly rate, which shall be stated in time increments of not greater than one tenth (1/10) hours. CITY shall pay invoices within thirty (30) days after receipt if the services specified in the invoice have been satisfactorily completed."

3. Section 4 of the Agreement is amended by adding an additional paragraph to read as follows:

"CONSULTANT agrees to defend and indemnify CITY if, despite the parties intent and practice, any venue, agency, or court with competent jurisdiction determines that CONSULTANT and/or any of its agents, officers, employees,

volunteers, independent contractors, or subcontractors, are characterized as employee(s) of CITY.”

4. Section 14 of the Agreement is amended by adding an additional paragraph to read as follows:

“CONSULTANT and CITY agree that: (a) CONSULTANT is free from the control and direction of CITY in connection with the performance of the work; (b) CONSULTANT is providing services directly to CITY; (c) CONSULTANT has and will maintain at all relevant times a business license; (d) CONSULTANT maintains a business location that is separate from CITY; (e) CONSULTANT is customarily engaged in an independently established business of the same nature as that involved in the work performed hereunder; (f) CONSULTANT actually contracts with other businesses to provide the same or similar services and maintains a clientele without restrictions from CITY; (g) CONSULTANT advertises and holds itself out to the public as available to provide the same or similar services; (h) CONSULTANT provides its own tools, vehicles, and equipment to perform the services; (i) CONSULTANT has negotiated its own rates; (j) CONSULTANT set its own hours and location of work in accomplishing CITY’s on-call needs; and (k) CONSULTANT has the right to control the manner and means of accomplishing the result desired and exercises its own expert independent judgement.”

5. All other provisions of the Agreement shall remain unchanged and in full force and effect.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Second Amendment to Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20__, and CONSULTANT has caused this Second Amendment to Agreement to be executed.

Title: Richard and Pauline Roccucci Park Project - Notice of Completion
Contact: Rjahja Canlas 916-774-5342 rcanlas@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.16.

RECOMMENDATION TO COUNCIL

Accept the Richard and Pauline Roccucci Park Project as complete and adopt a resolution authorizing the Parks, Recreation & Libraries Director to execute the attached Notice of Completion.

BACKGROUND

The Parks, Recreation & Libraries Department has made a final inspection of the Richard and Pauline Roccucci Park Project (formerly parksite W-51) and has found that all contract work has been completed in accordance with the improvement plans and specifications. The project is now ready for acceptance. This 4.7-acre park site is located on Symphony Avenue at Chorus Avenue in the West Roseville Specific Plan. The project included a children's play area, shaded picnic area, adult fitness equipment, multi-use turf, perimeter walkway that connects to the existing bike trail, basketball half court, two pickleball courts, a zip line swing, landscaping and irrigation. In accordance with City specifications, the contractor shall guarantee the installation of these improvements for a period of twelve (12) months from the date of this Notice of Completion.

FISCAL IMPACT

The project was funded with monies from the West Roseville Citywide Park Fund. Funding for maintenance will be through the Westpark Community Facilities District No. 2 (Public Services). There is no impact to the General Fund.

ENVIRONMENTAL REVIEW

Development of WRSP Neighborhood Park W-51 was originally evaluated in the project level West Roseville Specific Plan (WRSP) EIR (January 2004, SCH# 2002082057). Construction of Neighborhood Park W-51 was found to be within the scope of the project covered by the WRSP Specific Plan EIR. No new effects would be expected to occur and all applicable mitigation

measures from the applicable EIR was implemented during the design and construction of the proposed project. As such, no additional environmental documentation was required.

Respectfully Submitted,

Rjahja Canlas, Associate Engineer

Title: City of Roseville Financial Policies for Fiscal Year 2020-21
Contact: Dennis Kauffman 916-774-5313 dkauffman@roseville.ca.us

Meeting Date: 5/6/2020

Item #: 6.17.

RECOMMENDATION TO COUNCIL

Staff recommends City Council adopt a resolution adopting the City of Roseville Financial Policies effective July 1, 2020.

BACKGROUND

On May 1, 2019, Council approved resolution 19-180 which adopted the financial policies that had previously been consolidated into one policy in July 2018 via Resolution 18-303. On March 4, 2020, Council approved a new Budget Development Policy and an amended Investment Policy, which are incorporated into the document recommended for approval.

The purpose for these policies is to determine appropriate and responsible financial guidelines for staff to follow when developing the budget, making recommendations and fulfilling their role as fiscal stewards of public funds. As new policies are developed and approved by Council, they will be added to this document. Each year the policies will be reviewed by staff, updated where recommended and submitted to Council for approval. A brief summary of the current policies is provided below:

Investment Policy

The purpose of the Investment Policy is to establish cash management and investment guidelines for the Chief Financial Officer, who is responsible for the stewardship of the City of Roseville's investment program. Each transaction and the entire portfolio must comply with the California Government Code Sections 53600 and 53635 et seq. and the Investment Policy. The Investment Policy conforms to the customary standards of prudent investment management and any changes to the policy must be adopted by the Council. The Investment Policy has been certified by the California Municipal Treasurers Association through their Investment Policy Certification Program. There are no updates to this recently amended policy.

Debt Management Policy

The purpose of the Debt Management Policy is to provide guidelines for the issuance of bonds and other forms of indebtedness to finance necessary land acquisitions, capital construction, equipment, and other items for the City. There are no updates to the existing policy.

Budget Development Policy

The purpose of the Budget Development Policy is to establish guidelines for developing the annual operating and capital budget. The policy maintains a citywide focus during the budget development process consistent with the General Principles of Governance adopted by the City Council. The policy includes guidelines for general revenues, a balanced budget and public involvement. There are no updates to this recently adopted policy.

General Fund Reserves Policy

The purpose of the General Fund Reserves Policy is to establish a targeted level of General Fund operating reserves, a basic component of a financially strong city. The policy maintains an amount equal to 10% of annual General Fund budgeted operating costs as the minimum level of funding in the City's General Fund Emergency Reserve and 15% of annual General Fund budgeted operating costs as the target level of funding for the City's new General Fund Stabilization Reserve Fund. Appropriation from the Emergency Reserve and Stabilization Reserve Funds require approval of at least four City Council members. The policy also includes the Litigation Reserve Fund which was established to address legal matters that require proactive handling and funding. There are no updates to the existing policy.

Capital Improvement Program Rehabilitation Funding Policy

The purpose of the Capital Improvement Program Rehabilitation Funding Policy is to address funding for the City's General Fund infrastructure rehabilitation and replacement. There are no updates to the existing policy.

Pension Funding Policy

The Pension Funding Policy documents the method the City will use to determine its actuarially determined contributions to fund the long-term cost of pension benefits. The policy also provides guidance in making annual budget decisions; demonstrates prudent financial management practices; reassures bond rating agencies; and shows employees and the public how pensions will be funded. There are no updates to the existing policy.

Other Post-Employment Benefits (OPEB) Funding Policy

The purpose of the Other Post-Employment Benefits (OPEB) Funding Policy is to accumulate sufficient assets to fully finance the retiree healthcare benefits that the retired employees receive throughout retirement. There are no updates to the existing policy.

FISCAL IMPACT

Approval of the policies has no fiscal impact. However, implementation of the policies is expected to improve the fiscal position and financial health of the City. As an example, the Fiscal Year 2020-21 Proposed Budget is being developed based on these recommended financial policies.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The adoption of financial policies meets the above criteria and is not

subject to CEQA. No additional environmental review is required.

Respectfully Submitted,

Dennis Kauffman, Assistant City Manager/Chief Financial Officer

I. INTRODUCTION

The purpose of this document is to identify various policies and procedures that enhance opportunities for a prudent and systematic investment policy and to organize and formalize investment-related activities.

The investment policies and practices of the City of Roseville (City) are based on state law and prudent money management. All funds will be invested in accordance with this investment policy and Article 2 of Chapter 4 of the California Government Code. This policy is in compliance with the provisions of the California Government Code, Sections 53600 through 53659, and the authority governing investments for municipal governments.

II. SCOPE

The investment policy applies to all financial assets of the City as accounted for in the Comprehensive Annual Financial Report (CAFR). Policy statements outlined in this document focus on the City's pooled funds, but will also apply to all other funds under the City's Assistant City Manager/Chief Financial Officer's span of control unless specifically exempted by statute or ordinance.

Proceeds of debt issuance shall be invested in accordance with the permitted investment provisions of their specific bond indentures. If, in the opinion of the City's Assistant City Manager/Chief Financial Officer, matching the segregated investment portfolio of the bond reserve fund with the maturity schedule of an individual bond issue is prudent given current economic analysis, the investment policy authorizes beyond the five year maturity limitation as outlined in this document. The intent to invest in securities with longer maturities shall be disclosed in the permitted investment language authorized by the City Council in an indenture of trust.

The policy does not cover funds held by the Public Employees Retirement System nor funds of the Deferred Compensation program or the Other Post Employment Benefit Trust.

III. PRUDENCE

The standard of care to be used by investment officials shall be the "prudent investor" standard and shall be applied in the context of managing an overall portfolio. The "prudent investor" standard states that:

When investing, reinvesting, purchasing, acquiring, exchanging, selling, or managing public funds, a trustee shall act with care, skill, prudence, and diligence under the circumstances then prevailing, including, but not limited to, the general economic conditions and the anticipated needs of the agency, that a prudent person acting in a like capacity and familiarity with those matters would use in the conduct of funds of a like character and with like aims, to safeguard the principal and maintain the liquidity needs of the agency.

Investment officers acting in accordance with written procedures and the investment policy and exercising due diligence shall be relieved of personal responsibility for an individual security's credit risk or market price changes, provided deviations from expectations are reported in a timely fashion and appropriate action is taken to control adverse developments.

IV. OBJECTIVES

The primary objectives, in priority order, of the investment activities of the City shall be:

A. Safety

Safety of principal is the foremost objective of the investment program. City investments shall be undertaken in a manner that seeks to ensure preservation of Capital in the portfolio. To further achieve the safety objective, the amount invested in all investment categories is limited to a percentage of the portfolio as defined in the section "VIII. PERMITTED INVESTMENT INSTRUMENTS".

B. Liquidity

The investment portfolio of the City will remain sufficiently liquid to enable the City to meet its cash flow requirements.

C. Return on Investment

The investment portfolio of the City shall be designed with the objective of attaining a market rate of return on its investments consistent with the constraints imposed by its safety objective and cash flow considerations.

V. DELEGATION OF AUTHORITY

The City Council hereby delegates management responsibility of the investment program to the Assistant City Manager/Chief Financial Officer. The Assistant City Manager/Chief Financial Officer shall be responsible for all transactions undertaken and shall establish a system of controls to regulate the activities of subordinate officials. The Assistant City

Manager/Chief Financial Officer may delegate investment decision making and execution to the Controller in absence of the Assistant City Manager/Chief Financial Officer. No person may engage in an investment transaction except as provided under the limits of this policy unless specifically exempted by statute or ordinance.

VI. ETHICS AND CONFLICT OF INTEREST

Officers and employees involved in the investment process shall refrain from personal business activities that could conflict with proper execution of the investment program, or which could impair their ability to make impartial decisions.

VII. AUTHORIZED FINANCIAL DEALERS AND INSTITUTIONS

The Assistant City Manager/Chief Financial Officer and/or his/her designee will maintain a list of approved financial institutions authorized to provide investment services to the City in the State of California. These may include “primary” dealers or regional dealers that qualify under Securities & Exchange Commission Rule 15C3-1. A determination should be made to insure that all approved broker/dealer firms, and individuals covering the public agency, are reputable and trustworthy. In addition, the broker/dealer firms should have the ability to meet all of their financial obligations in dealing with the Public Agency. The firms, and individuals covering the agency, should be knowledgeable and experienced in Public Agency investing and the investment products involved. No public deposit shall be made except in a qualified public depository as established by the established state laws. All financial institutions and broker/dealers who desire to conduct investment transactions with the public agency must supply the Assistant City Manager/Chief Financial Officer with a completed broker/dealer questionnaire and certification of having read the City’s investment policy. In addition, broker/dealers must certify annually of having read the City’s investment policy.

VIII. PERMITTED INVESTMENT INSTRUCTIONS

The City shall limit investments in any one non-government issuer, except investment pools, to no more than 5% regardless of security type.

- A. **U.S. Treasury obligations** for which the full faith and credit of the United States are pledged for the payment of principal and interest. Up to 100% of the City’s investment portfolio may be invested in government obligations.
- B. **Federal agency or United States government-sponsored enterprise obligations**, participations, or other instruments, including those issued by or fully guaranteed as to principal and interest by federal agencies or United States government-sponsored enterprises. This shall include any mortgage pass through security issued and guaranteed by a Federal Agency with a maximum final maturity of five years. Purchase of Federal Agency issued mortgage-backed

securities authorized by this subdivision may not exceed 20% of the City's surplus money; all other investments in Federal Agency securities are unrestricted.

- C. **Obligations of the State of California or any local agency within the state**, including bonds payable solely out of revenues from a revenue producing property owned, controlled or operated by the state or any local agency or by a department, board, agency or authority of the state or any local agency, provided that the obligations are rated in one of the two highest categories by a nationally recognized statistical-rating organization (NRSRO). Up to 100% of the City's investment portfolio may be invested in California municipal obligations.
- D. **Registered treasury notes or bonds of any of the other 49 states** in addition to California, including bonds payable solely out of the revenues from a revenue-producing property owned, controlled, or operated by a state or by a department, board, agency, or authority of any of these states.
- E. **Repurchase Agreements** used solely as short-term investments not to exceed 30 days. Up to 100% of the City's investment portfolio may be invested in repurchase agreements.

The following collateral restrictions will be observed:

1. Only U.S. Treasury securities or Federal Agency securities, as described in section VIII. PERMITTED INVESTMENT INSTRUMENTS, paragraph (A) and (B) will be acceptable collateral. All securities underlying Repurchase Agreements must be delivered to the City's custodian bank by book entry, physical delivery, or by a third party custodial agreement. The total of all collateral for each Repurchase Agreement must equal or exceed, on the basis of market value, 102% of the funds borrowed against those securities. For any Repurchase Agreement with a term of more than one day, the value of the underlying securities must be reviewed on a weekly basis and the value of the underlying securities brought back up to 102% no later than the next business day.
2. Market value must be calculated each time there is a substitution of collateral.
3. The City or its trustee shall have a perfected first security interest under the Uniform Commercial Code in all securities subject to Repurchase Agreement.
4. The City may enter into Repurchase Agreements only with primary dealers of the Federal Reserve Bank of New York.

5. The City will have specific written agreements with each firm with which it enters into Repurchase Agreements.
6. Reverse repurchase agreements will not be allowed.

F. **Banker's Acceptances**, otherwise known as bills of exchange or time drafts that are drawn on and accepted by a commercial bank.

Purchases of Banker's Acceptances may not exceed 180 days maturity or 40% of the City's investment portfolio.

G. **Commercial paper** of "prime" quality of the highest ranking or of the highest letter and number rating as provided for by a NRSRO. The entity that issues the commercial paper shall meet all of the following conditions in section "VIII. PERMITTED INVESTMENT INSTRUMENTS", paragraph (G1) or (G2).

1. The entity meets the following criteria:
 - a. Is organized and operating in the United States as a general corporation.
 - b. Has total assets in excess of five hundred million dollars (\$500,000,000).
 - c. Has debt other than commercial paper, if any, that is rated "A" or higher by a NRSRO.
2. The entity meets the following criteria:
 - a. Is organized within the United States as a special purpose corporation, trust, or limited liability company.
 - b. Has program wide credit enhancements including, but not limited to, over collateralizations, letters of credit, or surety bond.
 - c. Has commercial paper that is rated "A-1" or higher, or the equivalent, by a NRSRO.

Purchases of eligible commercial paper may not exceed 270 days maturity nor represent more than 10% of the outstanding paper of an issuing corporation.

Purchases of commercial paper may not exceed 25% of the City's investment portfolio.

- H. **Medium-term corporate notes** issued by corporations organized and operating within the United States or by depository institutions licensed by the U.S. or any state and operating within the U.S. Medium-term corporate notes shall be rated in a rating category "A" or its equivalent or better by a nationally recognized rating service.

Purchase of medium-term corporate notes may not exceed 30% of the City's investment portfolio.

- I. **FDIC insured or fully collateralized time certificates of deposit.** Purchases of time certificates of deposit in combination with negotiable certificates of deposit may not exceed 30% of the City's investment portfolio.

- J. **Negotiable certificates of deposit or deposit notes** issued by a nationally or state-chartered bank, a state or federal savings and loan association, a state or federal credit union, or a federally-licensed or state-licensed branch of a foreign bank provided that the senior debt obligations of the issuing institution are rated "A" or better by an NRSRO.

The legislative body of a local agency and the treasurer or other official of the local agency having legal custody of the money are prohibited from investing local agency funds, or funds in the custody of the local agency, in negotiable certificates of deposit issued by a state or federal credit union if a member of the legislative body of the local agency or any person with investment decision making authority in the administrative office manager's office, budget office, auditor-controller's office, or treasurer's office of the local agency also serves on the board of directors, or any committee appointed by the board of directors, or the credit committee or the supervisory committee of the state or federal credit union issuing the negotiable certificates of deposits.

All certificates of deposit must be properly collateralized in accordance with Section 53652 of the California Government Code or fully insured by the Federal Deposit Insurance Corporation (FDIC).

Purchase of time certificates of deposit in combination with negotiable certificates of deposit may not exceed 30% of the City's investment portfolio.

- K. **State of California's Local Agency Investment Fund**

The Local Agency Investment Fund (LAIF) portfolio should be reviewed periodically. Investment in LAIF may not exceed the legally authorized limits.

- L. **Shares of beneficial interest issued by diversified management companies that are money market funds registered with the Securities and Exchange Commission** under the Investment Company Act of 1940 (15 U.S.C. Sec. 80a-1, et seq.). To be eligible for investment pursuant to this subdivision these companies shall either: (1) have attained the highest ranking or the highest letter and numerical rating provided by not less than two nationally recognized statistical rating organizations or (2) have an investment advisor registered or exempt from registration with the Securities and Exchange Commission with not less than five years' experience managing money market mutual funds and with assets under management in excess of \$500,000,000.

The purchase price of shares of beneficial interest purchased shall not include any commission that the companies may charge and shall not exceed 20% of the City's investment portfolio. Further, no more than 10% of the City's investment portfolio may be invested in shares of beneficial interest of any one money market fund.

- M. **Shares in a California common law trust** established pursuant to Title 1, Division 7, Chapter 5 of the Government Code of the State of California that invests exclusively in investments permitted by Section 53635 of Title 5, Division 2, Chapter 4 of the Government Code of the State of California, as it may be amended. Up to 100% of the City's investment portfolio may be invested in this investment type.

- N. **Supranationals** are United States dollar denominated senior unsecured unsubordinated obligations issued or unconditionally guaranteed by the International Bank for Reconstruction and Development (IBRD), International Finance Corporation (IFC), or Inter-American Development Bank (IADB), with a maximum remaining maturity of five years or less, and eligible for purchase and sale within the United States. Investments under this subdivision shall be rated "AA-", its equivalent, or better by an NRSRO.

Purchases of supranationals shall not exceed 30% of the investment portfolio of the City. Supranationals are permitted by California Government Code § 53601 (q) effective January 1, 2015.

- O. **A mortgage pass-through security, collateralized mortgage obligation, mortgage-backed or other pay-through bond, equipment lease-back certificate, consumer receivable pass-through certificate, or consumer receivable-backed bond.** Securities eligible for investment under this subdivision shall be rated in a rating category of "AA" or its equivalent or better by an NRSRO and have a maximum remaining maturity of five years or less. No more than 20% of the City's surplus funds may be invested in this type of security.

Where this section specifies a percentage limitation for a particular category of investment, that percentage is applicable only on the date of purchase. Credit criteria listed in this section refers to the credit of the issuing organization at the time the security is purchased. If an investment falls below the minimum purchase rating, the Investment Review Committee will perform a timely review to sell or hold the investment.

P. Prohibited Investments

For purposes of this policy, a derivative is defined as any security where the value is linked to or derived from an underlying asset or benchmark. Any security type or structure not specifically approved by this policy is hereby specifically prohibited. The City will not use such derivatives as range notes, dual index notes, inverse floating rate notes, deleveraged notes, or notes linked to lagging indices or to long term indices, nor will the City invest in reverse repurchase agreements, interest-only strips that are derived from a pool of mortgages, or any security that could result in zero interest accrual if held to maturity. This policy does not preclude the use of repurchase agreements and callable securities, as they do not fall within the definition of a derivative as described herein.

Summary of Maximum Percentage Limitations of Investments by Investment Type

Authorized Investment Type	Maximum Maturity	Minimum Credit Quality at Time of Purchase	Maximum Percentage Allowed	Maximum Investment In One Issuer
U.S. Treasury Obligations	5 Years	None	None	None
U.S. Agency Securities	5 Years	None	None	None
Forward Delivery Agreements	N/A	A	None	None
Local Agency Bonds	5 Years	None	None	None
Repurchase Agreements	30 days	None	None	None
Bankers' Acceptances	180 days	None	40%	30%
Commercial Paper	270 days	A-1	25%	10%
Medium-Term Notes	5 Years	A	30%	5%
Collateralized Time Deposits	5 Years	None	30%	None
Negotiable Certificates of Deposit	5 Years	A	30%	None
Local Agency Investment Fund (LAIF)	N/A	None	None	LAIF limit
Insured Saving Accounts	N/A	None	None	None
Money Market Mutual Funds	N/A	None	20%	10%
Shares in a California Common Law Trust	N/A	None	None	None
Interest Rate Swaps	N/A	None	None	None
Supranationals	5 Years	AA-	30%	None
Mortgage Pass-Through Securities	5 Years	AA	20%	None

IX. REVIEW OF INVESTMENT PORTFOLIO

The securities held by the City must be in compliance with Permitted Investments at the time of purchase. Because some securities may not comply subsequent to the date of purchase, the Assistant City Manager/Chief Financial Officer shall at least annually review the portfolio to identify those securities that do not comply. The Assistant City Manager/Chief Financial Officer shall report major and critical incidences of noncompliance identified through the review of the portfolio.

The Investment Review Committee will meet at least quarterly to discuss the investments in the City's portfolios.

X. INVESTMENT POOLS

A thorough investigation of any investment pool is required prior to investing and should be monitored on an ongoing basis. The following information should be obtained and analyzed.

- A. A description of eligible of investment securities.
- B. A written statement of investment policies and objectives.
- C. A description of interest calculations and their distribution, and the treatment of gains and losses.
- D. A description of how the securities are safeguarded (including the settlement processes), and how often the securities are priced and the program audited.
- E. A description of who may invest in the program, how often, and what size of deposits and withdraws are allowed.

XI. COLLATERALIZATION

Collateral for Non-negotiable Certificates of Deposit and Negotiable Certificates of Deposit must comply with California Government Code section 53652. In addition, if the Certificate of Deposit is not FDIC insured, collateral is required equal to 110% of principal.

XII. SAFEKEEPING AND CUSTODY

The City shall take from such financial institution a receipt for securities so deposited. All security transactions, including collateral for repurchase agreements, entered into the City shall be conducted on a delivery-versus-payment (DVP) basis pursuant to the approved custodial safekeeping agreements. The authority of the legislative body to deposit for safekeeping may be delegated by the legislative body to the Assistant City Manager/Chief Financial Officer of the City; the Assistant City Manager/Chief Financial Officer shall not be responsible for securities delivered to and receipted for by a financial institution until they are withdrawn from the financial institution by the Assistant City Manager/Chief Financial Officer.

XIII. DIVERSIFICATION

The City's investment pool will be diversified to avoid incurring unreasonable and avoidable risks. The investments will be diversified by security type, maturities of those investments, and institutions in which those investments are made.

XIV. MAXIMUM MATURITY

Investment maturities shall be based on a review of cash flow forecasts. Maturities will be scheduled so as to permit the City to meet all projected obligations while minimizing interest rate risk and maximizing earnings. Unless specified below, the maximum maturity will be no more than five years from purchase date to maturity date.

City Council has granted permission to invest the following fund accounts where liquidity is not the primary investment objective, in Federal Treasury or Agency securities with maturities up to ten years. The specified fund accounts include:

- The City's Pooled Fund, limited to 25% of the total pool
- Citizens' Benefit Trust
- North Central Wetlands Endowment
- Aquatics Complex Maintenance
- Woodcreek West Endowment

XV. INTERNAL CONTROLS

The Assistant City Manager/Chief Financial Officer is responsible for establishing and maintaining an internal control structure designed to ensure that the assets of the City are protected from loss, theft, fraud or misuse. An analysis by an external independent accounting firm shall be conducted annually to review internal controls, account activity, and compliance with the investment policies.

XVI. PERFORMANCE BENCHMARK

The investment portfolio will be designed to obtain a market rate of return during budgetary and economic cycles, taking into account the City's investment risk constraints and cash flow needs. The Investment Review Committee has elected to use for its performance standard the Constant Maturity Treasury (CMT) Index. For the Pooled Portfolio, the 12 month moving average yield on 3Yr CMT will be used and for Citizens' Benefit Trust portfolio, the 12 month moving average yield on 5Yr CMT will be used. All other City portfolios will follow the 2Yr CMT.

XVII. REPORTING REQUIREMENTS

The Assistant City Manager/Chief Financial Officer shall submit monthly investment reports to the City Manager and make these reports available to the City Council in the Finance Department office. The reports shall include, at a minimum, the following information for each individual investment:

- Description of investment instrument
- Issuer name

- Yield on cost
- Purchase date
- Maturity date
- Book value
- Par value
- Current market value
- Transaction activity
- Interest earnings summary

XVIII. INVESTMENT POLICY ADOPTION

The City's investment policy shall be adopted by resolution by the City Council. The policy shall be reviewed annually by the Assistant City Manager/Chief Financial Officer and/or his/her designee and any modifications made thereto must be approved by the City Council.

XIX. GLOSSARY

Agencies - Federal agency and instrumentality securities.

Asked - The price at which securities are offered.

Bid - The price offered by a buyer of securities (when one sells securities, one asks for a bid). See "Offer".

Benchmark - A comparative base for measuring the performance or risk tolerance of the investment portfolio. A benchmark should represent a close correlation to the level of risk and the average duration of the portfolio's investments.

Broker-Dealer – a person or a firm who can act as a broker or a dealer depending on the transaction. A broker brings buyers and sellers together for a commission. They do not take a position. A dealer acts as a principal in all transactions, buying and selling for his own account.

Certificate of Deposit (CD) – A time deposit with a specific maturity evidenced by a Certificate. Large-denomination CDs are typically negotiable.

Collateral – Securities, evidence of deposit or other property, which a borrower pledges to secure repayment of a loan. Also refers to securities pledged by a bank to secure deposits of public monies.

Custody – Safekeeping services offered by a bank, financial institution or trust company, referred to as the "custodian." Service normally includes the holding and reporting of

the customer's securities, the collection and disbursement of income, securities settlement and market values.

Delivery Versus Payment –A type of securities transaction in which the purchaser pays for the securities when they are delivered either to the purchaser or custodian. It ensures that securities are deposited in an eligible financial institution prior to the release of funds. Securities should be held by a third-party custodian as evidenced by safekeeping receipts.

Diversification – Dividing investment funds among a variety of securities offering independent returns.

Federal Agency Obligation – A debt instrument issued by one of the federal agencies. Federal agencies are considered second in credit quality and liquidity only to U.S. Treasuries.

Investment Review Committee –The investment review committee consists of the City Manager, Assistant City Manager/Chief Financial Officer and members of the Finance Department.

Liquidity – An investment that can be converted easily and rapidly into cash without a substantial loss of value.

Local Agency Investment Fund (LAIF) – The aggregate of all funds from political subdivisions that are placed in the custody of the State Treasurer for investment and reinvestment.

Market Value – The price at which a security is trading and could presumably be purchased or sold on a specific date.

Maturity – The date upon which the principal or stated value of an investment becomes due and payable.

Money Market Fund – a type of safe investment comprising a variety of short-term securities with high quality and high liquidity. The fund provides interest to shareholders and must maintain a stable net asset value (NAV) of \$1 per share.

Offer - The price asked by a seller of securities (when one buys securities, one asks for an offer). See "Asked" and "Bid".

Portfolio – Collection of securities held by an investor.

Principal – the original cost of a security. It represents the amount of capital or money that the investor pays for the investment.

Prudent Investor Standard – An investment standard that all investments should be made with care, skill, prudence and diligence under the circumstances then prevailing, including, but not limited to, the general economic conditions and the anticipated needs of the agency, that a prudent person acting in a like capacity and familiarity with those matters would use in the conduct of funds of a like character and with like aims, to safeguard the principal and maintain the liquidity needs of the agency.

Rate of Return - The yield obtainable on a security based on its purchase price or its current market price. This may be the amortized yield to maturity; on a bond, the current income return.

U.S. Treasury – Government debt issued by the United States Department of the Treasury through the Bureau of the Public Debt. Treasury securities are the debt financing instruments of the United States federal government, and they are often referred to simply as Treasuries. There are four types of marketable treasury securities: Treasury bills, Treasury notes, Treasury bonds, and Treasury Inflation Protected Securities (TIPS). All of the marketable Treasury securities are very liquid and are heavily traded on the secondary market.

Yield - The rate of annual income return on an investment, expressed as a percentage.

Yield-To-Call (YTC) - The rate of return an investor earns from a bond assuming the bond is redeemed (called) prior to its nominal maturity date.

Yield-To-Maturity - The current income yield minus any premium above par or plus any discount from par in purchase price, with the adjustment spread over the period from the date of purchase to the date of maturity.

I. INTRODUCTION

The Finance Department of the City of Roseville (the “City”) has developed this Debt Management Policy (the “Debt Policy”) to provide guidelines for the issuance of bonds and other forms of indebtedness to finance necessary land acquisitions, capital construction, equipment, and other items for the City.

While the issuance of debt is frequently an appropriate method of financing capital projects and major equipment acquisitions, such issuance must be carefully monitored to preserve the City’s credit strength and to provide the necessary flexibility to fund future capital needs.

II. SCOPE

This Debt Policy shall govern, except as otherwise covered by the law, City Charter and City Code, the issuance and management of all debt and lease financings funded in the capital markets. While adherence to the Debt Policy is desired, the City recognizes that changes in the capital markets as well as unforeseen circumstances, may from time to time produce situations that are not covered by the Debt Policy and may require modifications or exceptions to achieve City goals.

The City’s Debt Policy shall be reviewed, and updated if necessary, on an annual basis. The Chief Financial Officer (CFO) with the assistance of the General Accounting staff shall have the responsibility and authority for structuring, implementing and managing the City’s debt and financing program, in accordance with City Council authorizations.

III. OBJECTIVES

The City has earned some of the highest credit ratings in the nation and as a result receives some of the lowest possible interest rates on its debt. These low interest rates result in a lower overall cost of capital to the City. This Debt Policy will assist the City in determining appropriate uses of debt financing, establish certain debt management goals and assist the City in maintaining its high credit ratings, while assuming a prudent level of financial risk and preserving the City’s flexibility to finance future capital programs and requirements. Additionally, this Debt Policy is intended to set forth criteria for selecting firms to provide certain financial, legal, and other related services that will ensure that a fair and open selection process is used which provides opportunities for all qualified firms, including minority and women owned businesses.

IV. DEBT ISSUANCE

There are three general methods of issuing debt obligations, a competitive sale, negotiated sale and private placement.

A. Types of Bond Sales

1. Competitive Sale

In a competitive sale, security dealers submit bids either in a sealed bid or electronically secure process and the security dealer with the lowest True Interest Cost (TIC) and in compliance with the bid parameters is awarded the bonds.

2. Negotiated Sale

In a negotiated sale, an underwriter or underwriter syndicate is selected through a Request for Qualifications (RFQ) process or a Request for Proposal (RFP) process. The interest rate and underwriter's fee are negotiated prior to the sale, based on market conditions.

3. Private Placement/Bank Direct Purchase (BDP)

A private placement or bank direct purchase is a sale that is structured specifically for one purchaser, such as a mutual fund or a bank. BDPs are usually quicker and less expensive for municipalities than competitive or negotiated bond sales because they impose fewer requirements on the issuer. The interest rate may be a fixed or variable rate, as agreed between the issuer and purchaser. The term of the bonds may range from under 10 years to 15 years or not much longer, as agreed between the issuer and purchaser. The bonds may or may not be tax-exempt bonds for federal income tax purposes. If the CFO, or his/her designee, determines that it is in the best interest of the City from a cost or administrative standpoint, the Finance Department may negotiate financing terms with banks and financial institutions for specific borrowings.

It shall be the policy of the City to ensure the lowest risk and lowest overall interest rate to the City when issuing debt either through a competitive sale, negotiated sale or private placement, where appropriate. The City shall use the following criteria to determine whether a competitive or negotiated sale should be used.

B. Issuer Characteristics

1. Market Familiarity

A frequent issuer of a well-recognized credit such as general obligation bonds can generally sell these bonds through a competitive sale since investors and underwriters are familiar with the quality of the credit. A negotiated sale may be appropriate if extensive pre-marketing to investors is desired or required.

2. Credit Strength

The higher the credit quality of the bonds being issued, the more likely the bonds can be sold using a competitive sale due to the high demand for high quality municipal bonds. High quality credits fare well in competitive sales.

3. Policy Goals

A competitive sale does not provide the City with the flexibility of choosing the underwriter or underwriter syndicate. If the CFO concludes that determining the composition of the underwriter syndicate to achieve certain policy objectives is important, then a negotiated sale will be required. However, if the CFO selects the negotiated sale solely for policy reasons then the specific rationale and criteria for selection should clearly be specified.

C. Financing Characteristics

1. Type of Debt Instrument

The market favors familiar debt instruments such as general obligation bonds backed by the full faith and credit of the City. New credit types may require an education process that is more conducive to a negotiated sale until the market becomes comfortable with the credit.

2. Issue Size

The size of the bond sale will influence both investor interest in the bonds and the market's ability to absorb the bonds. In general if the bond sale is too small or too large, a negotiated sale may be necessary. A small sale may require greater marketing to garner investor interest while a

large sale may be difficult for the market to absorb without the presale activity available in the negotiated sale process.

3. Market Conditions and Timing

During periods of stable interest rates, market timing is not as critical. However, during periods of volatile interest rates, the timing of the sale becomes more critical. Bond refundings are also often very interest rate sensitive in terms of the potential level of savings or the general feasibility of the refunding. The negotiated sale provides more flexibility in terms of the structure of the bond sale as well as the timing of the bond sale and may be more appropriate when issuing refunding bonds and when interest rates are volatile.

4. Story Bonds

Bonds that require a detailed explanation due to the complexity of the credit or the repayment of the bonds are often referred to as “Story Bonds”. Due to their complexity and the additional explanation these bonds require, an extensive pre-marketing campaign is necessary. Story Bonds often require a negotiated sale composed of an underwriting syndicate that is qualified to market the bonds in order to obtain the lowest financing cost for the City.

V. FINANCIAL SERVICE PROVIDERS

A. Selection

In connection with debt financings, financial advisors, underwriters, and other service providers will be selected from a Qualified Vendors List (QVL) developed through a periodic Request for Qualifications (RFQ) process or, for individual financings, through a Request for Proposals (RFP) process, whichever method is deemed most appropriate given the specifics of the financing. At the discretion of the CFO, contracts may be awarded on a sole source basis if it is clear that an RFQ/RFP process is not feasible or not in the best interest of the City.

For competitive sales, any security dealer meeting the qualification criteria outlined in the competitive bid notice may bid in the competitive sale. For negotiated sales, only those underwriters qualified under the RFQ/RFP process may be selected. Underwriters or underwriter syndicates will be selected by the CFO. The allocation of bonds among syndicate members will be at the sole discretion of the CFO with the approval of the City Manager or his/her designee.

B. Use of Independent Financial Advisors

The City will hire financial advisors who are independent. In the event the best available financial advisor is an investment banking firm, the firm will under no circumstances be permitted to participate as the lead underwriter or as a member of an underwriter syndicate that is bidding on the bonds for which the firm is acting as a financial advisor. In addition, if the firm has any profit sharing or other type of agreement with any member of the underwriting syndicate for the transaction in question, they will not be allowed to act as the financial advisor. In general, no agreement will be permitted that would compromise the firm's ability to provide independent advice or that could be reasonably perceived by the City as a conflict of interest. Advisors must alert the CFO, in writing, of any conflict, potential conflict, or potentially perceived conflict prior to entering into an agreement with the City, or if occurring after entering into an agreement with the City, as soon as the conflict, potential conflict, or potentially perceived conflict arises.

C. Communication/Solicitation

All financial consultants, including all investment banking firms, financial advisors, bond counsel, and other consultants hired in connection with any bond transaction will direct all communications, solicitations and questions to the CFO or his/her designee. Underwriters are reminded that under Rule G-37 of the Municipal Securities Rulemaking Board (MSRB) that a firm may be banned from providing underwriting services to the City for two years for making any political contributions to elected City officials.

VI. DEBT MANAGEMENT PROCESS – TAX STATUS

Prior to the issuance of any bonds, the Finance Department, in conjunction with bond counsel and the City Attorney's Office will evaluate the tax status of any bond sales.

A. Tax-Exempt

Interest on tax-exempt bonds is excluded from the gross income of its owners for federal income tax purposes and from California income taxes and as a result tax-exempt bonds can be sold at a lower true interest cost than taxable bonds. The City, along with bond counsel, will evaluate all projects to be funded to assess their eligibility to be funded by tax-exempt bonds. The City will make every effort to ensure that all tax regulations are complied with to ensure the bonds maintain their tax-exempt status.

B. Taxable

Certain municipal bonds are sold as taxable bonds because they are issued for purposes that the federal government deems do not provide a significant benefit to the public at large or involve “private activity”. In addition, certain tax laws such as the alternative minimum tax (AMT) reduced the tax exemption applicable to certain types of bonds and to certain taxpayers. Taxable bonds will be used whenever a particular project has the potential for private activity or other uses that may call into question the eligibility to use tax-exempt financing.

VII. DEBT MANAGEMENT PROCESS – TYPE OF DEBT

A. Fixed Rate Debt

Longer term debt usually consists of fixed interest rates over the term of the bonds and should be used to finance essential capital facilities, projects and certain equipment where it is appropriate to spread the cost of the project over more than one budget year and generally for a period not to exceed the useful life of the project being financed. In so doing, the City recognizes that future taxpayers who will benefit from the project will pay a share of its cost. Fixed rate debt provides the benefit of fixed payments during the life of the bonds and budget certainties for long-term capital planning. However, fixed rate debt is typically longer term and carries higher interest payments (assuming an upward sloping yield curve) than variable rate debt but is not subject to changes in interest rates. Fixed rate debt is the most common type of debt issued by the City.

B. Variable Rate Debt

The municipal bond market has developed several vehicles by which municipalities can borrow at short-term, variable interest rates. Variable Rate Demand Notes may be issued with interest rates that “reset” daily, weekly, monthly or semiannually at the option of the City. Commercial paper is issued with a maturity of up to 270 days at the City’s option. As the commercial paper matures, it is resold by a commercial paper dealer for another period up to 270 days.

These products are structured as a rolling series of short-term investments and therefore are priced at the short-end of the yield curve at lower interest rates than long-term fixed rate bonds (assuming an upward sloping yield curve). By accepting the risks inherent in variable interest rates, the City can take advantage of the lowest rates available in the current market.

Factors that will be considered in the use of variable rate debt are the availability and size of fund balances to cover variable rate risk, and the budget flexibility of the program being financed. Programs with large complex capital programs may use short-term financing to fund uncertain construction cash flow requirements. The short-term debt can be refinanced as fixed-rate, long term debt once the projects are complete. A project that must be carried in anticipation of grant funding may also be a candidate for the use of variable rate financing. Examples are the Electric, Water, and Wastewater enterprise funds.

C. Use of Alternative Debt Instruments

1. Derivative Products

The use of certain derivative products, such as swaps, swaptions and the sale of call options, allow the City to realize lower all-in costs on a new debt issuance or to receive an upfront payment. One type of swap that may be used would allow the City to issue variable rate debt in exchange for fixed payments that are typically lower than fixed rate debt. However, such products have unique risks that the City and its financial advisors will evaluate as per the City's Swap Policy. The current Swap Policy is included in Appendix A.

VIII. DEBT MANAGEMENT PROCESS – DEBT CAPACITY

The determination of how much indebtedness the City can afford begins by assessing the sufficiency of future revenues. The amount of debt issued is based on the requirements of the approved 5-year CIP, subject to the condition that sufficient revenues are projected to be available. Factors such as debt service coverage requirements outlined in the bond indentures, the impact on the citizens (tax rates), and any impact on the bond ratings will be carefully considered. Different factors are considered for each type of credit. For example, Revenue or Certificates of Participation bonds for electric, water and wastewater bonds will consider the impact on customer utility bills. In the case of general obligation debt, State Statutes and the Constitution limit the amount of debt that a municipality can have outstanding.

IX. DEBT MANAGEMENT PROCESS – SECURITY OF DEBT

A. General Obligation (G.O.) Bonds

G.O. bonds are backed by the full-faith and credit of the City and are secured by secondary property taxes.

B. Revenue Bonds

Revenue bonds are supported solely from fees generated from specific Enterprise Funds. Accordingly, in order to preserve debt capacity and budget flexibility, the City will issue revenue bonds when an identifiable revenue stream can be dedicated to support the payment of debt service. The final maturity of revenue obligations will be determined by the expected life of the project to be financed and the revenues available to repay the debt. The City's various Enterprise Funds – Electric, Water, and Wastewater issue bonds backed by revenues of the enterprise. Revenue bonds are generally issued through the Roseville Finance Authority.

C. Certificates of Participation (COP) Bonds

COP bonds are an instrument evidencing a pro rata share in a specific pledged revenue stream, usually lease payments by the issuer that are typically subject to annual appropriation. The certificate generally entitles the holder to receive a share, or participation, in the payments from a particular project. The payments are passed through the lessor to the certificate holders. The lessor typically assigns the lease and the payments to a trustee, which then distributes the payments to the certificate holders.

D. Housing Bonds

Tax-exempt housing bonds are an important source of capital, providing loans for single-family homeownership and rental housing for very-low, low and moderate-income individuals and families. The relatively low tax-exempt interest rates, combined with federal, state, and local housing assistance programs, provide the necessary subsidy to create a supply of much needed, below market interest-rate loans.

E. Community Facilities District (CFD) Bonds

CFD bonds are issued and backed entirely by a Community Facilities District established under State Statutes for the purpose of managing and financing public improvements within the district boundaries. Any CFDs established in the City are reviewed by the Finance Department and the Finance Department will supervise the issuance of the debt on behalf of the CFD with the CFD paying all costs of issuance including administrative support. The creation of a CFD must be approved by City Council and follow a detailed legal process. Please refer to Appendix B for additional Goals and Policies concerning CFD bonds.

F. Special Assessment Bonds

Special assessment bonds are a special type of municipal bond used to fund development projects that benefit a discrete group of taxpayers within a special assessment district. Principal and interest owed on the bonds is paid from assessments on the property benefiting from the particular bond-funded project. The creation of an Assessment District must be approved by City Council and follow a detailed legal process.

X. DEBT MANAGEMENT PROCESS – PURPOSE OF FINANCING

Generally, financings may be undertaken to fund new projects “new money financing” or to refund existing bonds.

A. New Money Financing

New money issues are those financings that generate funding for capital projects. These funds will be used for necessary land acquisitions, capital construction, equipment, and other items for the City. New money bond proceeds are generally not used to fund operational activities. The City also may use its commercial paper programs to provide interim new money funding. The commercial paper notes are retired upon receipt of bond proceeds from a long-term fixed rate financing.

B. Refunding Bonds

A periodic review of the City’s outstanding debt will be undertaken by the Finance Department to determine refunding opportunities.

Refunding bonds are issued to retire all or a portion of an outstanding bond issue. Most typically this is done to refinance at a lower interest rate to reduce overall debt service. Alternatively, some refundings are undertaken for reasons other than to achieve cost savings, such as to restructure debt service payments, to change the type of debt instruments being used, or to eliminate undesirable covenants.

In any event, a present value savings analysis must be prepared that identifies the economic effects of any refunding being considered by the City. The savings from any particular refunding candidate shall generally be at least 5% of the refunded par amount, net of all transaction expenses. This 5% savings target may be waived by the CFO, or his/her designee, upon a finding that such a refunding is in the City's best overall financial interest and shall not be applicable for refunding transactions that are not solely undertaken to achieve cost savings.

XI. DEBT MANAGEMENT PROCESS - CREDIT RATINGS

The City seeks to obtain and maintain the highest possible credit ratings for all categories of short- and long-term debt. The City will not issue bonds that do not carry investment grade ratings.

A. Rating Agency Relationships

The CFO, or his/her designee, shall be responsible for maintaining relationships with rating agencies that assign ratings to the City's various debt obligations. This responsibility shall include coordinating meetings and presentations in conjunction with the issuance of debt. Full disclosure of operations and open lines of communication shall be maintained with the rating agencies used by the City.

B. Use of Rating Agencies

The City may obtain a rating from at least one nationally recognized rating agency on all new bond issues being sold in the public market. The CFO, or his/her designee, shall determine whether or not any additional ratings will be requested on a particular financing. The CFO, or his/her designee, shall determine which major rating agencies will be asked to provide a rating. Exceptions to this requirement, such as when using a private placement, are permissible, if warranted by the circumstances and approved by the CFO, or his/her designee.

The City and/or the financing team shall notify the rating agencies by telephone or through written correspondence when the City anticipates issuing bonds. Bond documentation shall be sent several weeks prior to the bond sale to the selected rating agencies in order to provide the rating agencies sufficient time to perform their review. A personal meeting with the selected rating agencies may be scheduled if, in the opinion of the CFO, or his/her designee, such a meeting is in the best interest of the City in order to obtain the highest possible credit rating.

The City shall make every reasonable effort to maintain or improve its high quality credit ratings.

The City may request an underlying rating and an insured rating on all bond issues utilizing bond insurance.

The City shall submit its audited comprehensive annual financial report to all rating agencies utilized by the City.

XII. DEBT MANAGEMENT PROCESS – CREDIT ENHANCEMENT

Although the City has high credit ratings, credit enhancement through the use of bond insurance or a bank facility such as a letter of credit to strengthen the underlying credit rating of certain bonds may be financially beneficial. Bonds insured by insurers rated AAA will also receive the AAA rating and thus be able to be sold at a lower interest rate. Bank facilities, such as letters of credit from highly rated banks, can also be used to provide credit enhancement.

A. Bond Insurance

Bond insurance will be considered when it provides an economic benefit to a particular bond maturity or entire issue. Bond insurance provides improved credit quality for the bonds as a result of the insurance provider's guarantee of the payment of principal and interest on the bonds. Because of the decreased risk of non-payment, investors are willing to purchase insured bonds at lower yields than uninsured bonds, thus providing the issuer with interest cost savings.

1. Benefit Analysis

The decision to use bond insurance is an economic decision. A benefit analysis compares the present value of the interest savings to the cost of the insurance premium. Insurance will be purchased when the premium cost is less than the present value of the projected interest savings. A copy of the benefit analysis shall be maintained in the files of the Finance Department.

2. Selection

The City or its financial advisor will undertake a competitive selection process when soliciting pricing for bond insurance, or in the case of a competitive sale, facilitating the prequalification of bonds by insurance providers. The City recognizes that all providers may not be interested in providing bids to the City or pre-qualifying the issue. The winning security dealer in a competitive sale will determine whether it will purchase insurance for the issue. For a negotiated sale, the CFO shall have the authority to purchase bond insurance when deemed advantageous and the terms and conditions governing the guarantee are satisfactory.

B. Bank Facilities (Letters of Credit)

When used for credit enhancement, letters of credit ("LOC") represent a bank's promise to pay principal and interest when due for a defined period of time,

subject to certain conditions. In the case of a direct-pay LOC, the trustee will draw upon the LOC to make debt service payments and the City will reimburse the LOC provider the amount drawn on the LOC by the trustee. A stand-by LOC is used to ensure the availability of funds to pay principal and interest of an obligation only if the funds in the debt service account held by the trustee are insufficient to make the debt service payment on the bonds.

XIII. DEBT MANAGEMENT PROCESS – STRUCTURAL FEATURES

A. Maturity

The final maturity of a bond sale shall be equal to or less than the remaining useful life of the assets being financed, and the average life of the financing shall not exceed 120% of the average useful life of the assets being financed.

B. Debt Service Structure

The Finance Department will carefully consider the debt service structure for each bond issue. Factors such as the flow of revenues available for a particular credit, the need to fill in gaps created by refunding specific principal maturities or to structure savings from a refunding in a particular year will be considered. Accelerated repayment may be considered within the bonding capacity constraints to provide capacity for future capital programs. Bonds will be amortized over a period of time not to exceed the useful life of the assets being financed.

C. Lien Levels

Senior, Junior and Subordinated Junior Liens for each revenue source will be utilized in a manner that will maximize the most critical constraint - typically either cost or capacity - thus allowing for the most beneficial use of the revenue source securing the bond.

D. Capitalized Interest

Subject to Federal and State law, interest may be capitalized from the date of issuance of the debt. Interest may also be capitalized for projects in which the revenue designated to pay debt service on the bonds will be collected at a future date, not to exceed six months from estimated completion of construction. Any use of capitalized interest will require a review by bond counsel and approval by the CFO.

XIV. INVESTMENT OF BOND PROCEEDS

The City shall comply with all applicable Federal, State, and Indenture restrictions, if any, regarding the use and investment of bond proceeds. This includes compliance with any restrictions on the types of investment securities allowed, restrictions on the allowable yield of invested funds as well as restrictions on the time period over which some bond proceeds may be invested. The CFO, or his/her designee, will direct the investment of bond proceeds in accordance with the permitted investments for each particular bond issue. Investments such as guaranteed investment contracts may be considered when their use is in the best interest of the City and will be selected on a competitive basis.

XV. CONTINUING DISCLOSURE

The City will comply when applicable with Rule 15(c)2-12 of the Securities and Exchange Commission by filing an annual report and annual financial information with the Municipal Securities Rulemaking Board's Electronic Municipal Market Access System , and filing material event notices within 10 days of occurrence of certain events as required by the Rule.

XVI. ARBITRAGE REBATE

The City shall comply with all arbitrage rebate requirements as established by the Internal Revenue Service and the Finance Department shall establish a system of record keeping and reporting to meet the arbitrage rebate compliance requirements of the federal tax code. This effort shall include tracking project expenditures financed with bond proceeds, tracking investment earnings on bond proceeds, calculating rebate payments in compliance with tax law, and remitting any rebate earnings to the federal government in a timely manner in order to preserve the tax-exempt status of the City's outstanding tax-exempt debt issues. The CFO, or his/her designee, may enter into agreements with arbitrage service providers to assist the City with complying with arbitrage regulations.

XVII. POST ISSUANCE COMPLIANCE

The City shall comply with all applicable laws and regulations to ensure the tax-exempt status of its bonds. The Finance Department shall maintain written procedures to document the processes used to ensure compliance with applicable laws and regulations, and shall specify the positions and individuals responsible for these processes.

I. INTRODUCTION

The swap guidelines outlined herein are only intended to provide general procedural direction regarding the future use, procurement and execution of interest rate swaps and options. These guidelines are intended to relate to various interest rate hedging techniques, including the contractual exchange of different fixed and variable rate payment streams through interest rate swap agreements. The swap policies are not intended in any way to require the City to modify or terminate existing interest rate swaps. The City maintains the right to modify these guidelines and may make exceptions to any of them at any time in its sole discretion. Failure to comply in any manner with these swap guidelines shall not result in liability on the part of the City to any party.

II. APPROACH AND OBJECTIVES

Interest rate swaps and options are appropriate interest rate management tools that can help the City meet important financial objectives. Properly used, these instruments can increase the City's financial flexibility, provide opportunities for interest rate savings or enhanced investment yields, and help the City manage its balance sheet through better matching of assets and liabilities. Swaps should be integrated into the City's overall debt and investment management guidelines and should not be used for speculation.

Swaps are appropriate to use when they achieve a specific objective consistent with the City's overall financial strategies. Swaps may be used, for example, to lock-in a current market fixed rate or create additional variable rate exposure. Swaps may be used to produce interest rate savings, to alter the pattern of debt service payments, or for asset/liability matching purposes. Swaps may be used to cap, limit or hedge variable rate payments. Options granting the right to commence or cancel an underlying swap may be used to the extent the swap itself is consistent with these guidelines or the City determines there are other advantages to be derived in granting the option; however, the City must determine if the use of any such option is appropriate and warranted given the potential benefit, risks, and objectives of the City. The City's staff, together with its Bond Counsel and its Financial Advisor, periodically shall review the City's swap guidelines and recommend appropriate changes.

In connection with the use of any swaps, the City Council shall make a finding that, per Government Code Section 5922, the applicable swap is designed to reduce the amount or duration of the interest rate risk or result in a lower cost of borrowing when used in combination with the issuance or carrying of the Bonds or enhance the relationship between the risk and return with respect to the City's investments or program of investment, as applicable.

Rationales for Utilizing Interest Rate Swaps and Options

- A. Optimize capital structure; including schedule of debt service payments and/or fixed vs. variable rate allocations
- B. Achieve appropriate asset/liability match
- C. Reduce risk, including:
 - 1. Interest rate risk;
 - 2. Tax risk; or
 - 3. Liquidity renewal risk
- D. Provide greater financial flexibility
- E. Generate interest rate savings
- F. Enhance investment yields
- G. Manage exposure to changing markets in advance of anticipated bond issuances (through the use of anticipatory hedging instruments)

III. PERMITTED INSTRUMENTS

The City may utilize the following financial products on a current or forward basis, after identifying the objective(s) to be realized and assessing the attendant risks.

- A. Interest rate swaps, including fixed, floating and/or basis swaps; and
- B. Options, including swaptions, caps, floors, collars and/or cancellation or index-based features

IV. PROCEDURE FOR SUBMISSION AND EXECUTION

Unsolicited proposals are to be mailed to the Chief Financial Officer and the Financial Advisor for evaluation. Such unsolicited proposals need to be received four weeks prior to the next City Council meeting for consideration at such meeting. For proposals received within four weeks of the next City Council meeting, the City reserves the right to consider the proposal at the following month's Council meeting.

Legal costs incurred in connection with an unsolicited proposal shall be paid by the firm submitting the proposal if for whatever reason the proposal does not close or should the City elect for any reason not to proceed. If the City elects to proceed with the

proposed transaction and the proposed transaction closes, the City will absorb such legal costs through costs of issuance.

The City staff and the Financial Advisor shall review all unsolicited proposals prior to presentation to the City Council. The City shall only present proposals to the Council that the City, in its sole discretion, believes should be considered further given, for example, the projected savings or other benefits and the ability to meet one or more of the objectives outlined herein. Only proposals that meet the savings guidelines (as described in the “Guidelines for Financing and Selection of the Financing Team”) or that the City staff find compelling for other reasons, shall be presented.

Procurement and Execution

The City will not have a fixed guideline with respect to swap procurement. The City will assess the benefits of competitively bidding financial products that are non-proprietary or generally available in the marketplace. On a product-by-product basis, the City will have the authority to negotiate the procurement of financial instruments that have customized or specific attributes designed on the City’s behalf.

The use of financial derivative products will be recommended if they meet one of the benefits outlined herein or if they:

- A. Provide a specific benefit not otherwise available;
- B. Produce greater expected interest rate savings or incremental yield than cash market alternatives;
- C. Are not speculative or do not create unreasonable leverage or risk;
- D. Result in an improved capital structure or better asset/liability match; or
- E. Reasonably pass the risk evaluation required by these guidelines

Conformance with Dodd-Frank

It is the intent of the City to conform this policy to the requirements relating to legislation and regulations for over-the-counter derivatives transactions under Title VII of the Wall Street Transparency and Accountability Act of 2010, as supplemented and amended from time to time (herein collectively referred to as “Dodd-Frank”). Pursuant to such intent, it is the policy of the City that: (i) each swap advisor engaged or to be engaged by the City will function as the designated qualified investment representative of the City, sometimes referred to as the “Designated QIR”; (ii) each swap advisor agrees to meet and meets the requirements specified in Commodity Futures Trading Commission Regulation 23.450(b)(1) or any successor regulation thereto (herein

referred to as the “Representative Regulation”); (iii) each swap advisor provide a written certification to the City to the effect that such swap advisor agrees to meet and meets the requirements specified in the Representative Regulation; (iv) the City monitor the performance of each swap advisor consistent with the requirements specified in the Representative Regulation; (v) the City exercise independent judgment in consultation with its swap advisor in evaluating all recommendations, if any, presented by any counterparty with respect to transactions authorized pursuant to this Debt Policy; and (vi) the City rely on the advice of its swap advisor with respect to transactions authorized pursuant to this Debt Policy and not rely on recommendations, if any, presented by any counterparty with respect to transactions authorized pursuant to this Debt Policy.

Counter-Party Risk Assessment

The City will only do business with highly rated counter parties or counter parties whose obligations are supported by highly rated parties. The City will structure swap agreements to protect itself from credit deterioration of counter parties, including the use of credit support annexes or other forms of credit enhancement to secure counter party performance. Such protection shall include any terms and conditions which in the City’s sole discretion are necessary or appropriate or in the City’s best interest.

The City shall enter into interest rate swap transactions only with qualified swap counter parties. Qualified swap counter parties are investment banks as will be identified by the Financial Advisor. Qualified swap counter parties should be rated at least “Aa3” or “AA-” by one of the nationally recognized rating agencies (i.e. Moody’s, Standard and Poor’s, and Fitch) and not rated lower than “A2” or “A” by any nationally recognized rating agency. In addition, the counter party must have a demonstrated record of successfully executing swap transactions as well as creating and implementing innovative ideas in the swap market. Each counter party shall have minimum capitalization of at least \$150 million.

The City should not have an immutable credit standard. However, the City will attempt to do business with highly rated counter parties of “Aa3” or “AA-” or better. For lower rated (below “Aa3” or “AA-”) counter parties, the City should seek credit enhancement in the form of:

- A. Contingent credit support or enhancement; or
- B. Collateral consistent with the policies contained herein

V. SWAP ANALYSIS AND PARTICIPANT REQUIREMENTS

In connection with any swap, the City and its Financial Advisor shall review the proposed transaction and outline any considerations associated with the transaction to the City Council. Such a review should include the following:

- A. The identification of the proposed benefit and potential risks, which shall include, but not necessarily be limited to, those risks outlined herein
- B. Independent analysis of potential savings from a proposed transaction
- C. Fixed versus variable rate and swap exposure before and after the proposed transaction
- D. Market Net Termination Exposure (as outlined herein) for all existing and proposed transactions at the City

Swap Risks

- A. Counter party Risk – The risk of a payment default on a swap by an issuer’s counter party
- B. Termination Risk - The risk that a swap has a negative value and the issuer owes a “breakage” fee if the contract has to be liquidated
- C. Tax Risk – A mismatch between changes in the rate or price on an issuer’s underlying bonds and the swap caused by a reduction or elimination in the benefits of the tax exemption for municipal bonds, e.g. a tax cut, which results in an increase in the ratio of tax-exempt to taxable yields
- D. Basis Risk – A mismatch between the rate on an issuer’s underlying bonds and the rate paid under the swap, e.g. a tax-exempt variable rate issue which trades at 62% of LIBOR while the issuer only receives 60% of LIBOR under the swap
- E. Tax Exemption Risk – The risk that the transaction may make the issuer’s related bonds taxable
- F. Liquidity/Remarketing Risk – The risk that an issuer cannot secure a cost-effective renewal of a Letter or Line of Credit or suffers a failed auction or remarketing with respect to its variable-rate bonds

Benefit Expectation

Financial transactions, using fixed rate swaps or other derivative products, should generate 2% greater projected savings than the savings guidelines (as described in the “Guidelines for Financing and Selection of the Financing Team”) then in effect for traditional bonds. This threshold will serve as a guideline and will not apply should the transaction, in the City’s sole judgment, help to meet any of the objectives outlined herein. The higher savings target reflects the greater complexity and higher risk of derivative financial instruments. At a minimum, such financial transactions should provide a savings of no less than 5% over refunded par regardless of the spread between the financial transaction and a traditional bond refunding.

For example, assuming a refunding of \$100 million of existing bonds, a traditional fixed rate advance refunding that does not use derivative products would have a present value savings threshold of \$5 million, which is 5% of the refunded par. If the refunding structure utilizes a derivative product, the threshold would be \$7 million in present value savings, 7% of the refunded par. Therefore, the transaction utilizing a swap or other derivative product would have to generate an additional \$2 million to meet the target.

For variable rate or other swap transactions that do not result in a fixed interest rate, the City will evaluate any additional value generated through the transaction in assessing the benefits of proceeding, including the ability to meet the objectives outlined herein. These benefits include, for example, reducing interest rate or tax risk, optimizing the capital structure or further reducing interest expense.

In determining any benefit in implementing a fixed-to-variable swap, the cost of remarketing, in addition to the cost of credit enhancement or liquidity fees must be added to the projected variable rate. Such a calculation should consider the trading performance of comparable bonds and any trading premium resulting from a specific form of credit enhancement or liquidity and/or any impact related to broader industry trends.

VI. LEGAL AND CONTRACTUAL REQUIREMENTS

Unless otherwise approved by Council, the City will use standard ISDA swap documentation including the Schedule to the Master Agreement and a Credit Support Annex. The City may use additional documentation if the product is proprietary or the City deems in its sole discretion that such documentation is otherwise in its interest.

Terms and Notional Amount of Swap Agreement

The City shall determine the appropriate term for an interest rate swap agreement on a case-by-case basis. In connection with the issuance or carrying of bonds, the term of the

swap agreement between the City and a qualified swap counter party shall not extend beyond the final maturity date of existing debt of the City on the related Project, or in the case of a refunding transaction, beyond the final maturity of the refunding bonds. For purposes of calculating net exposure, credit shall be given to any fixed versus variable rate swaps that offset termination exposure for a specific Project or bond transaction. For variable rate transactions, credit may also be given for any assets that are used to hedge a transaction as long as in the City's judgment such assets are reasonably expected to remain in place on a coterminous basis with the swap.

Terms and conditions of any swap shall be negotiated by the City in the best interests of the City subject to the provisions of the California Government Code and, unless otherwise waived or altered by the City, these guidelines. The swaps between the City and each counter party shall include, as appropriate, payment, term, security, collateral, default, remedy, termination, and other terms, conditions and provisions as the City, in consultation with its Bond Counsel and Financial Advisor, deems necessary or desirable.

Subject to the provisions contained herein, the City swap documentation and terms should include the following:

- A. Downgrade provisions triggering termination shall in no event be worse than those affecting the counter party
- B. Governing law for swaps will be New York law, but should reflect California authorization provisions
- C. The specified indebtedness related to credit events in any swap agreement should be narrowly drafted and refer only to specific project debt
- D. Collateral thresholds should be set on a sliding scale reflective of credit ratings (see Collateral below)
- E. Eligible collateral as set forth in the Collateral section below.
- F. Termination value should be set by "market quotation" methodology, when the City deems appropriate
- G. The City should only agree to an Additional Termination Event for the City to the extent that the ratings on the applicable the City bonds fall below a ratings trigger acceptable to the City and the counter party and no form of credit support or enhancement is in place

Termination Provision

All swap transactions shall contain provisions granting the City the right to optionally terminate a swap agreement at any time over the term of the agreement. Such a provision shall be required even if any termination is at market. In general, exercising the right to terminate an agreement should produce a benefit to the City, either through the receipt of a payment from a termination or, if the termination payment is made by the City, in conjunction with a conversion to a more beneficial (desirable) debt obligation of the City.

Collateral

As part of any swap agreement, the City shall require collateralization or other forms of credit enhancements to secure any or all swap payment obligations. As appropriate, the City, in consultation with its Bond Counsel and Financial Advisor, may require collateral or other credit enhancement to be posted by each swap counter party under the following circumstances:

- A. Each counter party to the City may be required to post collateral if the credit rating of the counter party or parent falls below the “AAA” category. Additional collateral for further decreases in credit ratings of each counter party shall be posted by each counter party in accordance with the provisions contained in the collateral support agreement to each counter party with the City the City. Maximum un-collateralized exposure for: (i) “AAA” rated counter parties is \$40 million; (ii) “AA” rated counter parties is \$10 million; and (iii) below “AA” category, uncollateralized exposure is zero
- B. Threshold amounts shall be determined by the City on a case-by-case basis. The City will determine the reasonable threshold limits for the initial deposit and for increments of collateral posting thereafter
- C. Collateral shall be deposited with a third party trustee, or as mutually agreed upon between the City and the counter party
- D. A list of acceptable securities that may be posted as collateral and the valuation of such collateral will be determined and mutually agreed upon during negotiation of the swap agreement with each swap counter party. A complete list of acceptable securities and valuation percentages are included as Attachment A
- E. The market value of the collateral shall be determined on at least a monthly basis, or more frequently if the City determines it is in the City’s best interest given the specific collateral security

- F. It shall be determined on a case-by-case basis whether other forms of credit enhancement are more beneficial to the City

VII. LIMITATIONS ON TERMINATION EXPOSURE

In order to diversify the City's counter party credit risk, and to limit the City's credit exposure to any one counter party, limits will be established for each counter party based upon both the credit rating of the counter party as well as the relative level of risk associated with each existing and projected swap transaction. The guidelines below provide general termination exposure guidelines with respect to whether the City should enter into an additional transaction with an existing counter party. The City Council may make exceptions to the guidelines at any time to the extent that the execution of a swap achieves one or many of the goals outlined in these guidelines or provides other benefits to the City.

Such guidelines will also not mandate or otherwise force automatic termination by the City or the counter party. Maximum Net Termination Exposure is not intended to impose retroactively any terms and conditions on existing transactions. Such provisions will only act as guidelines in making a determination as to whether or not a proposed transaction should be executed given certain levels of existing and projected net termination exposure to a specific counter party. Additionally, the guidelines below are not intended to require retroactively additional collateral posting for existing transactions. Collateral posting guidelines are described in the "Collateral" section above. The calculation of net termination exposure per counter party will take into consideration multiple transactions, some of which may offset the overall exposure to the City.

Maximum Net Termination Exposure will be based on the sum of (i) the market value of existing transactions as of the first day of the month prior to the execution of any new transaction plus (ii) the expected worse case termination value of the new transaction. The maximum termination exposure will also be tied to the credit rating of a counter party and whether or not the counter party has posted collateral against this exposure.

Under this approach, the City will set limits on individual counter party exposure based on existing as well as new or proposed transactions. For existing transactions, exposure will be based on the market value as of the last quarterly swap valuation report provided by the Financial Advisor. For a new or proposed transaction, the City will calculate the projected maximum exposure based on the estimated maximum exposure assuming two standard deviations. Standard deviation is a statistic obtained by squaring the average difference from the mean of a distribution of numbers. Two standard deviations capture 95% of the population of a distribution of numbers. For purposes of the calculation, two standard deviations shall be calculated as the annualized standard deviation of weekly swap rates over the preceding 52 weeks. The time period may vary according to market conditions which could range from flat to volatile.

The sum of the existing market value and the projected maximum exposure shall constitute the Maximum Net Termination Exposure. For purposes of this calculation, the City shall include all existing and projected transactions of an individual counter party and all transactions will be analyzed in aggregate such that the maximum exposure will be additive and netted on a per project basis. The rationale behind aggregating and netting on a Project basis is that the exposure will vary for individual members depending on their participation in different projects.

For example, if the City has \$13 million (i.e. the City would owe termination payment) of exposure to a counter party, the Maximum Net Termination Exposure under the definition above, is the projected maximum termination exposure less the outstanding exposure. If projected maximum termination exposure on the proposed transaction, assuming two standard deviations, is \$20 million, net termination exposure would be \$7 million.

The exposure thresholds, which will be reviewed periodically to ensure that they remain appropriate, will also be tied to credit ratings of the counter parties and whether or not collateral has been posted. If collateral has been posted, the City cannot exceed \$30.0 million of collateralized exposure. In addition, there would be a further limit on the amount of uncollateralized exposure, including any threshold amounts under the Credit Support Annex. For AAA-rated counter parties, the City could have up to \$40.0 million of uncollateralized exposure; for counter parties in the AA category, the City could have up to \$10.0 million of uncollateralized exposure and for counter parties below the AA category, the City could have no uncollateralized exposure. If a counter party has more than one rating, the lowest rating will govern for purposes of the calculating the level of exposure. A summary table is provided below.

Credit Ratings	Maximum Collateralized Exposure	Maximum Uncollateralized Exposure	Maximum Total Termination Exposure
AAA	NA	\$40 million	\$40 million
AA Category	\$30 million	\$10 million	\$40 million
Below AA	\$30 million	None	\$30 million

Assuming the same example as above, if the counter party is currently rated “Aa2” and “AA+,” the exposure thresholds would only take effect if Net Termination Exposure increased an additional \$3 million (from the original \$7 million above).

If the exposure limit is exceeded by a counter party, the City shall conduct a review of the exposure limit per counter party. The City, in consultation with its Bond Counsel and Financial Advisor, shall explore remedial strategies to mitigate this exposure.

VIII. ONGOING MANAGEMENT

The City will seek to maximize the benefits and minimize the risks it carries by actively managing its swap program. This will entail frequent monitoring of market conditions, by both the Financial Advisor and swap counter party, for emergent opportunities and risks. Active management may require modifications of existing positions including, for example:

- A. Early termination;
- B. Shortening or lengthening the term;
- C. Sale or purchase of options; or
- D. Use of basis swaps.

On an overall basis, the City's swap program is not expected to be very large relative to all of its investment and debt activities. Swaps will be used in response to particular market conditions and needs of the City for which swaps are the best investment or debt-management option.

IX. ONGOING REPORTING REQUIREMENTS

A written report providing the status of all interest rate swap agreements entered into by the City will be provided to the City Council on an annual basis (or other basis, if so directed by Council) and shall include the following:

- A. A description of all outstanding interest rate swap agreements, including project and bonds series, type of swap, rates paid and received by the City, total notional amount, average life of each swap agreement, remaining term of each swap agreement
- B. Highlights of all material changes to swap agreements or new swap agreements entered into by the City since the last report
- C. Termination exposure of each of the City's interest rate swap agreements
- D. The credit rating of each swap counter party and credit enhancer insuring swap payments, if any
- E. If applicable, information concerning any default by a swap counter party to the City, including but not limited to the financial impact to the City, if any
- F. If applicable, information concerning any default by the City to a swap counter party

- G. A summary of swap agreements that were terminated or that have expired
- H. For a swap transaction entered into to generate debt service savings, the City will calculate on an annual basis the actual debt service requirements versus the projected debt service on the swap transaction at the original time of execution. Such a calculation shall include a determination of the cumulative actual savings (or, if applicable, additional payments made by the City) versus the projected savings at the time the swap was executed.

Attachment A – Acceptable Collateral

Security	Valuation Percentage
Cash	100%
Negotiable debt obligations issued by the U.S. Treasury Department or the Government National Mortgage Association (“Ginnie Mae”), or (y) mortgage backed securities issued by Ginnie Mae (but with respect to either (x) or (y) excluding interest only or principal only stripped securities, securities representing residual interests in mortgage pools, or securities that are not listed on a national securities exchange or regularly quoted in a national quotation service) and in each case having a remaining maturity of: (i) less than one year (ii) one year or greater but less than 10 years (iii) 10 years or greater	100% 98% 95%
Negotiable debt obligations issued by the Federal Home Loan Mortgage Corporation (“Freddie Mac”) or the Federal Home Loan Mortgage Association (“Fannie Mae”) or (y) mortgage backed securities issued by Freddie Mac or Fannie Mae but excluding interest only or principal only stripped securities, securities representing residual interests in mortgage pools, or securities that are not listed on a national securities exchange or regularly quoted in a national quotation service	95%
Any other collateral acceptable to the City in its sole discretion. The valuation percentage shall be determined by the Valuation Agent from time to time and in its reasonable discretion	The valuation percentage shall be determined by the Valuation Agent from time to time and in its reasonable discretion.

For example, if a counter party is required to post \$1 million of collateral and wished to use bonds issued by Ginnie Mae with five years remaining to maturity, it would be required to post \$1,020,409 (\$1 million/0.98) to satisfy the collateral requirement.

F.	Capital Improvement Program (CIP) and Budget	51
G.	Indirect Cost Allocation Plan.....	52
H.	Internal Service Funds.....	52
I.	General Fund Five-Year Forecast.....	52
J.	Basis of Budgeting.....	52

I. INTRODUCTION

This policy outlines the City of Roseville's (City) guidelines for budget development. Consistently following adopted policies will assist the City in achieving its current and future goals in a fiscally responsible and sustainable manner. This policy establishes guidelines for developing the City's annual operating and capital budget as recommended by the Government Finance Officers Association (GFOA) and the National Advisory Council on State and Local Budgeting (NACSLB). This document shall be reviewed on an annual basis to reflect the highest standards of fiscal management and the City's budgetary goals.

II. POLICY

A. Citywide Focus

Consistent with the General Principles of Governance adopted by the City Council in the Elections Ordinance, the City shall maintain a citywide focus during the budget development process and in the adopted budget. Revenues and expenditures shall be budgeted on a citywide basis and not tracked by Council district.

B. General Revenues

General Fund revenues shall not be earmarked for any particular purpose, unless required by law or Generally Accepted Accounting Principles (GAAP). General revenues shall be deposited in the General Fund and appropriated during the budget process or by a separate Council action.

C. Balanced Budget

The City shall adopt and maintain a balanced annual operating budget and an integrated capital budget throughout the fiscal year. For each fund, annual expenditures shall not exceed annual revenues plus available fund balances. It shall remain a goal of the City to maintain a long-term structurally balanced budget, where ongoing revenues support ongoing expenditures.

The City will achieve a structurally balanced budget through efficiencies (i.e., streamlining), permanent reductions to the expenditure base (e.g., eliminating lower priority vacant positions and reducing service levels), and ongoing revenue enhancements. In addition, the City's budget will not rely on reserves or the use of one-time revenues for ongoing expenditures.

D. Public Involvement

Public involvement shall be encouraged in the annual budget decision-making process through public hearings, public outreach, and the dissemination of accessible information. Public participation efforts allow the City to improve performance by identifying general needs, priorities, and service delivery expectations. Public involvement enables the City to be more responsive to the community's needs, thereby increasing the value that the public receives from the City.

E. Operating Budget

The operating budget document shall contain the expected revenue and expenditure appropriations, staffing levels, and summaries for each department. Summary information for each department featured in the budget shall include the primary services, strategic goals and strategies, accomplishments and initiatives, and key performance and workload measures. Department summaries shall be updated annually to ensure departments' priorities and performance measures support the City Council's Strategic Plan.

F. Capital Improvement Program (CIP) and Budget

The City shall develop a Five-Year CIP, which reflects a comprehensive approach to addressing the City's capital needs and the identification of resources for those needs. Critical inputs include infrastructure condition assessments, service level evaluations, asset management information, and review of available funding sources. The Five-Year CIP shall be the basis for the development of the annual CIP budget.

The annual CIP budget shall be developed in conjunction with the operating budget to ensure the effective utilization of the City's overall resources to operate and maintain facilities. The annual CIP budget shall include projects that span multiple fiscal years and result in capitalized assets. The CIP budget may consist of other projects of a capital nature that may not result in an asset and that span multiple fiscal years and have significant cost estimates.

The annual CIP budget shall reflect total estimated project costs for Council approved projects by including all prior and current year expenditures and appropriations, future year project costs, and any future funding needs through project completion. CIP projects shall only be established with partial funding if there is a reasonable expectation that the remaining funding is identified to complete the project within a reasonable timeframe for the type of project.

CIP appropriations remaining unspent at the end of each fiscal year shall be carried forward to the subsequent fiscal year until the project is completed or abandoned. CIP projects, however, shall be reviewed periodically to identify projects that are not progressing with funds available for reprogramming.

G. Indirect Cost Allocation Plan

The City shall use an indirect cost allocation plan to allocate the costs of those general government activities without significant assets or liabilities to all City funds and departments, except that reimbursements for costs allocated between General Fund departments will not be budgeted. Substantial changes in the allocable indirect costs may be amortized or smoothed over a period not to exceed three fiscal years to allow receiving funds to adjust their rates.

H. Internal Service Funds

The City shall use internal service funds to allocate general government costs for activities with significant assets and/or liabilities to all City funds and departments. Internal service fund costs are budgeted in and allocated to General Fund departments. The City's internal service fund activities include information technology, fleet management, facilities management, and risk management (general liability and workers compensation).

I. General Fund Five-Year Forecast

The City shall maintain a five-year forecast for the General Fund as an essential fiscal planning tool. The forecast shall be based on the current budget and projections of future expenditures, revenues, and other funding sources over a multi-year period. The evaluation of recommended fiscal actions will focus on a longer-term, rather than short-term context. The five-year forecast is based on a set of point-in-time assumptions. The projected expenditure growth shall be realistic, mainly through the term of the current labor contracts. All revenue forecasts will utilize objective external research and internal forecasting methods. City revenues are economically sensitive, and the five-year revenue forecasts are subject to the same uncertainty and downside risk surrounding national economic forecasts. It is important to note that the City's significant tax revenues, property and sales taxes, trail economic trends.

J. Basis of Budgeting

The City's budgets for governmental funds, such as the General Fund, special revenue funds, debt service funds, and capital project funds, shall be prepared based on the modified accrual basis of accounting. In other words, revenues are recognized in the accounting period in which they become available and

measurable, and expenditures are recognized in the accounting period in which the liability is incurred. An exception to this basis is that disbursements of interfund loans are budgeted as expenditures in lender funds and revenue in borrower funds, and repayments of interfund loans are budgeted as expenditures in borrower funds and revenue in lender funds.

The budget for the City's proprietary funds, consisting of enterprise funds and internal service funds, shall be prepared on the full accrual basis of accounting for all operating revenues and most operating expenses. In other words, revenues are recognized when they are earned, and expenses are recognized when the liability is incurred. Expenses related to long-term assets, primarily capital outlay, and long-term liabilities, including repayment of bonded debt as well as pension and other post-employment benefit expenses, are budgeted on the modified accrual basis of accounting. Repayments of interfund loans are budgeted as expenditures in borrower funds and revenue in lender funds.

The City's budget shall exclude unrealized gains or losses resulting from the change in fair value of investments, as well as amortization of premiums and discounts on the City's investments. These calculations are performed solely for financial statement reporting purposes to comply with GAAP.

General Fund Reserves Policy

TABLE OF CONTENTS

I.	INTRODUCTION.....	55
II.	BACKGROUND.....	55
III.	POLICY.....	55
A.	Minimum and Target Reserve Levels.....	55
B.	Methods to Achieve Funding Levels.....	56
C.	Criteria for Expenditure of Reserve Funds.....	56
1.	Emergency Reserve.....	56
2.	Stabilization Reserve.....	56
3.	Litigation Reserve	57
D.	Timeline for Replenishment of the General Fund Reserves.....	57

I. INTRODUCTION

The purpose of this policy is to establish targeted levels of General Fund reserves, a basic component of a financially strong city. Adequate reserves help sustain City operations when adverse or unexpected circumstances affect the City, providing resources to minimize service disruption in the event of temporary revenue shortfalls, declared disasters, or unpredicted one-time expenditures. This policy establishes the amounts the City will strive to maintain in the Emergency Reserve, Stabilization Reserve, and Litigation Reserve, and the conditions under which the reserves may be used.

II. BACKGROUND

Financial reserves strengthen the City's financial status and provide valuable resources for managing through economic cycles and addressing unexpected events. Every fund of the City represents a stand-alone financial set of accounts and has its own operating characteristics, financial capabilities, and constraints. The level of reserves needed should be based on the financial and operating characteristics of each fund.

According to the Government Finance Officers Association (GFOA), it is essential that governments maintain adequate levels of fund balance to mitigate current and future risks (e.g., revenue shortfalls and unanticipated expenditures) in order to protect taxpayers and employees from unexpected changes in financial conditions. GFOA recommends, at a minimum, that general-purpose governments, regardless of size, maintain an unrestricted budgetary fund balance in their General Fund of no less than two months of regular general fund operating revenues or regular General Fund operating expenditures (an amount equivalent to 16.67% of the annual budget).

This policy establishes three months of operating costs (25% of annual budgeted General Fund operating costs) as the City's target level of reserves. This targeted level of reserves consists of the City's Emergency Reserve (10% of annual budgeted General Fund operating costs) and the City's Stabilization Reserve (15% of annual budgeted General Fund operating costs). This policy also establishes \$250,000 as the minimum level in the City's Litigation Reserve. The policy also outlines the methods the City will utilize to achieve the target reserve levels, defines the conditions under which these funds can be used and describes how the City's expenditure and/or revenue levels will be adjusted to match any new economic realities that are causing the use of fund balance reserves as a financing bridge.

III. POLICY

A. Minimum and Target Reserve Levels

The City will maintain an Emergency Reserve at a minimum of 10% of budgeted General Fund operating expenditures. Because the City relies on property tax

and sales tax revenue to support over two-thirds of the City's General Fund budget and the negative effects on property and sales tax revenue can be significant during economic downturns, the City will seek to build up and maintain a General Fund Stabilization Reserve equal to 15% of budgeted General Fund operating expenditures as the target reserve level. The Emergency Reserve and Stabilization Reserve shall be reported as commitments of fund balance in the General Fund for external financial reporting. Appropriations from the Emergency Reserve may only be made by a vote of the City Council to meet a critical, unpredictable financial need such as a declared emergency. Appropriations from the Stabilization Reserve may only be made by a vote of the City Council in the event of temporary revenue shortfalls caused by an economic downturn.

B. Methods to Achieve Funding Levels

Funding of the General Fund Reserves will generally come from the adopted budget, year-end excess revenues over expenditures or anticipated one-time revenues. At a minimum, during the budget process, staff shall review the current and five-year projected reserves to ensure that they are appropriate given the economic and financial risk factors the City faces.

C. Criteria for Expenditure of Reserve Funds

The Reserve Funds shall not normally be applied to recurring annual operating expenditures. Appropriation from the Emergency Reserve and Stabilization Reserve Funds requires approval of at least four City Council members. The Litigation Reserve is appropriated annually in the adopted budget.

1. Emergency Reserve

The Emergency Reserve may be used to contend with significant short-term issues such as declared emergencies. It is the intent of the Council to limit use of the Emergency Reserve to addressing unanticipated, nonrecurring needs.

2. Stabilization Reserve

The Stabilization Reserve may be used strategically to allow time for the City to restructure its operation in a deliberate manner as required in an economic downturn while minimizing service disruption. Use of the Stabilization Reserve will only take place in the context of a Council-adopted long-term plan. The Stabilization Reserve is intended to be used to address significant revenue shortfalls that occur during an economic

downturn until the City's operating expenditure and revenue levels are adjusted to eliminate structural deficits.

3. Litigation Reserve

The Litigation Reserve may be used for legal matters that are unforeseen and/or unusual in nature and, as a result, typically require reactive measures such as seeking a budget adjustment and a funding source. Some examples are contract disputes, municipal code enforcement, and other public safety enforcement matters. The purpose of this reserve is to address these situations by allowing for proactive handling and funding of such matters.

D. Timeline for Replenishment of the General Fund Reserves

If the General Fund Reserves are drawn down below the minimum levels, a plan will be developed and implemented to replenish the reserves. Replenishing the reserves will be a priority use of one-time resources. Generally, the City should seek to replenish the Emergency Reserve and the Litigation Reserve within one year and the Stabilization Reserve to the minimum reserve level within three years.

City of Roseville
Capital Improvement Program Rehabilitation Funding Policy

TABLE OF CONTENTS

I. INTRODUCTION 59

II. BACKGROUND 59

III. POLICY 59

I. INTRODUCTION

The City has significant investments in facilities, equipment, software, vehicles, and other assets which require ongoing maintenance and eventual replacement. The CIP Rehabilitation funds, i.e. the General CIP Rehabilitation Fund; the Parks, Recreation and Library Capital Fund; and the Information Technology Replacement Fund, are used to fund infrastructure needs for City buildings, information technology capital replacement, and parks, recreation and library facilities.

II. BACKGROUND

The City performed a thorough analysis of all City assets in 2012 and developed 10-Year Rehabilitation/Replacement plans. The 10-year plans reflected an annual General Fund funding requirement of \$5.6 million, however the actual amount budgeted in FY2017-18 was \$1.5 million leaving an annual gap of approximately \$4 million

The City performs an annual review of the 10-year plans to develop CIP Rehabilitation budget recommendations for the City Manager that includes a prioritized list of capital projects that can be recommended for funding or deferral in conjunction with the adoption of the City's CIP Rehabilitation budget.

The expectation is that the annual average demand will continue to trend upward based on projects being deferred and new replacement costs.

Addressing these infrastructure needs has been a stated priority of the City Council and was reaffirmed at the City Council meeting on February 7, 2018.

III. POLICY

On an annual basis during each budget process, and until the annual required funding level is attained, the General Fund contribution to the CIP Rehabilitation funds shall increase by \$500,000.

City of Roseville Pension Funding Policy

TABLE OF CONTENTS

I.	PURPOSE	61
II.	BACKGROUND	61
III.	POLICY	62
A.	Actuarially Determine Contribution (ADC)	62
B.	Additional Discretionary Payment (ADP) Contribution	62
C.	Transparency and Reporting.....	62
D.	Review of Funding Policy	63

I. PURPOSE

The City's Pension Funding Policy documents the method the City will use to determine its actuarially determined contributions to fund the long-term cost of benefits to the plan participants and annuitants. The policy also:

- Provides guidance in making annual budget decisions;
- Demonstrates prudent financial management practices;
- Reassures bond rating agencies; and
- Shows employees and the public how pensions will be funded.

II. BACKGROUND

The City provides defined benefit retirement benefits through the California Public Employees' Retirement System (CalPERS). CalPERS is a multiple-employer public employee defined benefit pension plan.

All full-time and certain part-time City employees are eligible to participate in CalPERS. CalPERS provides retirement and disability benefits, annual cost of living adjustments and death benefits to plan members and their beneficiaries. CalPERS acts as a common investment and administrative agent for participating public entities within the State of California. Benefit provisions and all other requirements are established by state statute.

The financial objective of a defined benefit pension plan is to fund the long-term cost of benefits provided to the plan participants. In order to assure that the plan is financially sustainable, the plan should accumulate adequate resources in a systematic and disciplined manner over the active service life of benefitting employees. This funding policy outlines the method the City will utilize to determine its actuarially determined contributions to fund the long-term cost of benefits to the plan participants and annuitants.

Pension Funding: A Guide for Elected Officials, issued by eleven national groups including the U.S. Conference of Mayors, the International City/County Management Association, and the Government Finance Officers Association, established the following five general policy objectives for a pension funding policy:

- **Actuarially Determined Contributions.** A pension funding plan should be based upon an actuarially determined contribution (ADC) that incorporates both the cost of benefits in the current year and the amortization of the plan's unfunded actuarial accrued liability.

- **Funding Discipline.** A commitment to make timely, actuarially determined contributions to the retirement system is needed to ensure that sufficient assets are available for all current and future retirees.
- **Intergenerational equity.** Annual contributions should be reasonably related to the expected and actual cost of each year of service so that the cost of employee benefits is paid by the generation of taxpayers who receives services from those employees.
- **Contributions as a stable percentage of payroll.** Contributions should be managed so that employer costs remain consistent as a percentage of payroll over time.
- **Accountability and transparency.** Clear reporting of pension funding should include an assessment of whether, how, and when the plan sponsor will ensure sufficient assets are available for all current and future retirees.

III. POLICY

A. Actuarially Determine Contribution (ADC)

CalPERS actuaries will determine the City's ADC to CalPERS based on annual actuarial valuations. The ADC will include the normal cost for current service and amortization of any under-funded amount. The normal cost will be calculated using the entry age normal cost method using economic and non-economic assumptions approved by the CalPERS Board of Administration.

The City will review the CalPERS annual actuarial valuations to validate the completeness and accuracy of the member census data and the reasonableness of the actuarial assumptions.

B. Additional Discretionary Payment (ADP) Contribution

The City will consider making ADP contributions with one-time General Fund resources, with the objectives of increasing the plan's funded status, by reducing the unfunded actuarially accrued liability, and reducing ongoing pension costs.

C. Transparency and Reporting

Funding of the City's pension plans should be transparent to vested parties including plan participants, annuitants, the City Council and Roseville residents. In order to achieve this transparency, the following information shall be available:

- Copies of the annual actuarial valuations for the City's CalPERS plans shall be made available to the City Council.
- The City's Comprehensive Annual Financial Report shall be published on its website. This report includes information on the City's annual contributions to the pension systems and their funded status.
- The City's annual operating budget shall include the City's contributions to CalPERS.

D. Review of Funding Policy

Funding a defined benefit pension plan requires a long-term horizon. As such, the City will review this policy at least every five years to determine if changes to this policy are needed to ensure adequate resources are being accumulated.

City of Roseville

Other Post-Employment Benefits (OPEB) Funding Policy

TABLE OF CONTENTS

I.	INTRODUCTION	65
II.	BACKGROUND	65
III.	POLICY	65

I. INTRODUCTION

The purpose of this Funding Policy is to state the overall funding goals for the City of Roseville OPEB Trust. The objective is to accumulate sufficient assets to fully finance the retiree healthcare benefits that the retired employees receive throughout retirement. In meeting this objective, the City will strive to meet the following funding goals:

- A. The City plans to continue to fund retiree medical benefits from operations until such a time as those expenses exceed the City's Actuarially Determined Contribution (ADC). At that time withdrawals from the OPEB Trust will be necessary.
- B. The City intends and plans to ultimately achieve full funding of its actuarially determined OPEB contributions by making increasing contributions to the OPEB trust, to the extent feasible, in the context of other competing demands for public services and employee compensation.
- C. Nothing in this funding policy shall constitute an obligation upon the City, nor an implied contract. The City Council may revoke or amend this policy in the best interests of the City.
- D. Funding of the OPEB Trust does not change the City's obligation or intent to fully pay annual medical costs for retirees.

II. BACKGROUND

The City of Roseville has provided a retiree health benefit to its employees for many years. As a cost reduction strategy, this benefit was eliminated for all bargaining unit employees classified as Tier III. Although eliminated for new employees, this benefit still remains in effect for the majority of the City's employees and must be addressed during the annual budget process.

In an effort to address the long term costs of this expense, a trust was created to begin funding this benefit. The process currently in place is to fund all actual retiree expenses incurred in the current year on a pay-as-you-go basis and make additional contributions to the trust fund.

III. POLICY

The City will engage an OPEB actuary to determine the City's ADC based on biennial actuarial valuations. The ADC will include the normal cost for current service and amortization of the under-funded liability. The normal cost is the current year cost of the program to provide the benefit for current employees in the future. The normal cost

will be calculated using the entry age normal cost method using appropriate economic and non-economic assumptions approved by the City.

The City will review the actuarial valuations to validate the completeness and accuracy of the employee census data and the reasonableness of the actuarial assumptions. Actuarial valuations involve estimates and assumptions about the probability of occurrence of events far into the future. Actuarially determined amounts are subject to continual revision as actual results are compared to past expectations and new estimates are made about the future.

The OPEB Funding Policy is comprised on two components. The first component is calculated as a percentage of total salary for the City. Currently the City funds 6% of salary in the General Fund. The policy requires an increase of 1 percentage point each year until the full actuarially determined contribution is attained.

The second component is calculated as a percentage of one-time monies that may or may not be available at each year end. The actual dollar amount of available one-time funds will be presented to Council with a recommendation as to how much is being recommended for contribution to the trust fund. This recommendation will be based on the dollars available, other competing priorities and Council input.

The City will continue to appropriate in the annual budget for the pay-as-you-go costs of OPEB for current retirees and contributions to the OPEB Trust. On an annual basis during each budget process, and until the full annual required contribution is accomplished, the percentage of salary costs to be deposited into the trust shall increase by 1 percentage point. In addition, a portion of any one-time monies remaining at the end of each fiscal year may be deposited into the trust, which amount will be determined by council based on available funds and other priorities.

Funding OPEB requires a long-term horizon. The City will review this policy at a minimum biennially, coincident with preparation of the actuarial valuations, to determine if changes to this policy are necessary to ensure adequate resources are being accumulated to fund OPEB benefits.

City of Roseville **Workers’ Compensation and General Liability Funding Policy**

TABLE OF CONTENTS

I.	INTRODUCTION	68
II.	BACKGROUND	68
III.	POLICY	68

I. INTRODUCTION

The Workers' Compensation and General Liability Funding Policy documents the City's approach to providing adequate financial resources to fund the City's Workers' Compensation and General Liability Programs and establishing and maintaining adequate reserves in the Workers' Compensation and General Liability Internal Service Funds.

II. BACKGROUND

The City is self-insured for workers' compensation and for general liability. The Workers' Compensation and General Liability and Programs charge City departments and funds for the costs of providing for claims, as well as for the cost of administering the claims.

III. POLICY

In order to methodically and consistently measure the City's projected claims, the City will contract with a professional outside actuary to prepare annual actuarial valuation reports for both categories of claims. Program funding will be based on the annual actuarial valuation reports.

The City's funding policy will provide program funding at the 75% confidence level, including recognition of anticipated investment income. Confidence level is used by actuaries to determine the realistic possibilities that a given funding rate will be sufficient to cover all claims that might be incurred in any one program year. A 75% confidence level indicates that the funding rate should be adequate 75% of the time.

If either program maintains a balance above the minimum funding requirement, the excess reserves will be used to subsidize City contributions over a 1-5 year period depending upon the amount of the excess and the City's economic condition.

If either program has excess claims requiring additional contributions to the fund, the City will increase contributions over a 1-3 year period depending on the amount of the shortfall and the City's economic condition to get to the minimum funding requirement.

City of Roseville
Interfund Loans Policy

TABLE OF CONTENTS

I. PURPOSE 70

II. BACKGROUND 70

III. POLICY 70

 A. Long-term Loans 70

 B. Short-term Loans..... 71

 C. Prohibited Uses..... 71

I. PURPOSE

The City's Interfund Loan Policy documents the methods used by the City to demonstrate prudent financial management over interfund loans. The policy:

- Requires City Council approval of interfund loans, except for short-term working capital loans,
- Permits short-term interfund loans for working capital to cover Council-approved reimbursable grants and projects and other temporary timing differences in cash flows, and
- Prohibits interfund loans from being used to solve ongoing structural budget issues or hindering the accomplishment of any function or project for which the lending fund was established.

II. BACKGROUND

Interfund loans are the lending of cash from one City fund to another for a specific purpose and with a requirement for repayment. The practice of interfund loans is a recognized and necessary aspect of municipal finance. Such loans are typically short-term in nature, and constitute the allocation of resources between individual funds for working capital purposes.

III. POLICY

A. Long-term Loans

Interfund loans, other than short-term working capital loans, must be approved by the City Council. Council approval will include the following terms of the loan:

- Purpose of Interfund Loan
- Identification of the source fund
- Availability of unrestricted funds in the source fund
- Review of multi-year plans for use of source fund cash
- Analysis of legal or contractual restrictions
- Repayment of Interfund Loan
- Repayment must have a payment source and funding stream

- Specific repayment schedule
- Interest imposed at a rate equal to at least investment earnings if loan did not occur
- Other Considerations
- Feasibility of repayment
- Internal controls to monitor repayment

B. Short-term Loans

Short-term interfund loans for working capital to provide cash for Council-approved reimbursable grants and projects, are permitted. Short-term working capital loans are also permitted for temporary timing differences in cash flows when expenditures are incurred before revenue is collected. The source funds for working capital interfund loans are the General Fund and the Automotive Replacement Fund.

C. Prohibited Uses

- Interfund loans will not be used to solve ongoing structural budget issues.
- Interfund loans will not hinder the accomplishment of any function or project for which the lending fund was established.

B.	Grounds for Protest	78
C.	Administrative Review	78
D.	Stay of Action during a Protest	78

I. INTRODUCTION

The purpose of this policy is to provide a uniform process for the issuance, evaluation, and selection of competitive proposals for services and/or customized goods.

II. DEFINITION

Request for Proposals (“RFP”) is a competitive proposal process whereby the City solicits proposals from potential proposers. The RFP process is used for requirements in which the desired outcome is known, but it is difficult to define the methodology or the exact materials or services required to achieve the desired results.

Objectives of the RFP process are to:

- A. Describe the City’s requirements and desired outcomes within a written specification;
- B. Solicit proposers for their proposed solutions;
- C. Describe key criteria to be used in the evaluation of proposals;
- D. Outline the terms and conditions under which the proposer(s) will operate or supply goods and/or services.

The City should use its best efforts to ensure that any RFP is as complete and thorough as possible, however should the scope of work or services of any RFP increase by twenty-five percent (25%) or more after publishing the RFP, that RFP should be withdrawn and any proposals rejected and a new RFP should be issued that includes the increased scope of work or services.

III. USE OF AN RFP

- A. Contracts for goods or services with an estimated value greater than the amount stated in Roseville Municipal Code (“RMC”) Sections 4.12.090 and 4.12.095 must be awarded by the use of competitive bids or an RFP, unless exempted by the City Council or law. Contracts for goods or services estimated to be equal or less than the amount stated in RMC Sections 4.12.090 and 4.12.095 may be awarded upon conclusion of informal interviews by representatives of the initiating department and other City staff, including the Purchasing Division (“Purchasing”), or by an RFP, as may be appropriate.
- B. Notwithstanding the foregoing, qualifying goods or services may be procured without issuing a RFP. A qualifying good or service is one where there is only a single source for obtaining the particular good and/or service. Examples of sole

source goods or services include, but are not limited to, patented, copyrighted, licensed items, specialized test equipment/facilities, critical schedule requirements, unique services, and standardized goods or services for which there is only a single source. Prior to contracting with a sole source, the initiating department shall complete the sole source authorization form. Furthermore, with respect to professional services with an estimated amount exceeding the amount stated in RMC Sections 4.12.090 and 4.12.095, such services may not be procured through sole source without the prior authorization of the City Manager and City Attorney.

IV. PUBLIC NOTICE

Public notice of the RFPs shall be given in the same manner as provided in RMC Section 4.12.090.

The originating department (“Department”) should also generate a list of potential proposers to notify and direct them to the RFP section of the City’s website to access the RFP.

V. FORM OF PROPOSAL

- A. City staff must use the City’s latest version of the RFP template for the initial framework of the document and the City’s Purchasing Guidelines should also be referred to. The RFP content should define the Department’s needs and describe the scope of the work, allowing the potential proposer to develop the project details.
- B. Late proposals shall not be accepted, however staff may extend the time for submission of all proposals.
- C. Each proposal must be signed by an authorized representative of the proposer and include the legal name of the proposing organization and the signer’s title. By signing the proposal it is presumed that the signer has authority to bind the proposer to the proposal’s terms.
- D. RFPs are scored based on the criteria presented in the RFP. Proposers may propose any method or process to satisfy the scope of work in the RFP that maximizes responsiveness to the criteria stated in the RFP.

VI. EVALUATION FACTORS

Award of a RFP shall be made to the responsible proposer whose proposal is determined, through a formal evaluation panel process, to be the most advantageous to the City after the evaluation panel has taken into consideration the evaluation factors

set forth in the RFP. A master averaged score sheet shall be created based on the evaluation panel's initial evaluation. Proposals shall be scored according to the criteria stated in the RFP.

Proposals submitted will be reviewed by an evaluation panel. Members of the evaluation panel shall be comprised of City staff and at the option of City may include non-City staff upon approval of the City Manager and City Attorney. After the initial evaluation, proposers that have submitted the best and most complete proposals may be invited to one or more interviews. The number of proposers invited to an interview may vary depending upon the number of proposals submitted.

The RFP may indicate the relative importance of evaluation factors. The following are representative evaluation criteria that may be considered by the Department when preparing a RFP:

- A. Reputation and Experience. Does the proposer have a reputation of being reliable, delivering on schedule, and performing tasks to the satisfaction of his/her clients? Does the proposer have sufficient experience in the kind of work required?
- B. Capability and Availability of Staff. Does the proposer have qualified and experienced staff needed to perform the work?
- C. Understanding of the Problem. Does the proposer demonstrate a thorough understanding of the issues and has it developed a relevant and effective approach?
- D. Proximity of the Proposer. Although no preference shall be given to local businesses, proposer's office and/or staff proximity to City of Roseville offices or work location as it relates to the proposer's ability to be responsive to the project requirements may be considered.
- E. Cost. Whenever possible and appropriate, a proposer's fee or hourly rate should be secured as part of the proposal and considered in the evaluation process. Whenever possible, RFPs should specify methods of submitting proposed costs that can be compared directly with competing proposals.

The City reserves the right to make a selection without interviews; therefore, the proposal should be submitted on the most favorable terms that the proposer might propose.

Should the City elect to conduct interviews with any proposers, the following criteria shall be considered and each proposer ranked by the evaluation panel during the interview process:

- Quality of presentation
- Ability to meet the City's business goals
- Communication style

A contract will be negotiated with the proposer considered best meeting the City's need for the project. In the event a mutually satisfactory contract cannot be negotiated with the City's first choice, negotiations may be terminated and commenced with the proposer considered next best in meeting the City's needs for the particular project.

The selected proposer will be required to execute a City prepared contract. The contract may further refine the scope of services and will provide for the terms and conditions of employment.

Evaluation Score Sheets. Upon a request pursuant to section 1.8 below, a proposer is entitled to a master averaged score sheet that reflects the averaged evaluation scores of the proposers during the evaluation panel's initial evaluation and the ranking of proposers from any interview (individual score sheets and/or notes are temporary and are not retained following a determination of the evaluation panel). The master score sheet and ranking shall be prepared by City staff prior to notifying any proposers of the results.

VII. DISCUSSIONS WITH PROPOSERS AND REVISIONS TO PROPOSALS

- A. As provided in the RFP, discussions may be conducted with responsible proposers. These discussions shall be for the purpose of clarification to assure full understanding of, and responsiveness to the solicitation requirements. The proposers shall be accorded fair and equal treatment with respect to any opportunity for discussion and revision of proposals, and such revisions may be permitted prior to the evaluation panel's determination of the award recommendation for the purpose of obtaining best and final proposals. In conducting discussions, there shall be no disclosure of any information derived from proposals submitted by competing proposers.
- B. After the evaluation panel has determined the proposer(s) to be recommended for award, the Department may enter negotiations with the recommended proposer(s) to finalize proposed services and price before the evaluation panel's formal notice of intent to award is made.

VIII. AWARD PROCESS

- A. The award is made to the proposer(s) that is determined to best meet the overall needs of the City. For contracts for goods or services with an estimated value greater than the amount stated in RMC Sections 4.12.090 and 4.12.095, the

award of such contract is expressly contingent upon City Council approval and the availability of funds. City staff may not legally bind the City to a contract with an estimated value greater than the amount stated in RMC Sections 4.12.090 and 4.12.095.

- B. Rejection of RFP. The City reserves the right to reject any or all proposals, to waive defects or irregularities in any proposal or in the RFP process, and to offer to negotiate or contract with any proposer(s) in response to any RFP. RFPs do not constitute any form of offer to contract.
- C. Multiple Award. The City reserves the right to award the contract to multiple proposers when applicable.
- D. A formal notice of the intent to award to the recommended proposer(s) shall be made by the Department.

IX. PUBLIC DISCLOSURE

In accordance with the California Public Records Act, proposals submitted in response to a RFP, master averaged score sheets from the initial evaluation, and/or rankings from any interview shall be made available upon a public records request only after: (1) the proposal evaluation process is complete, (2) a contract has been negotiated, and (3) notice of intent to award has been made and/or the contract is placed on a City Council meeting agenda.

X. PROTESTS

A. Protest Requirements

1. Any proposer who is aggrieved in connection with the solicitation or award of a contract may file a protest with the City Clerk's office. The protest must be received in writing by the City Clerk's office within seven (7) calendar days after such aggrieved proposer 1) knows or should have known of the facts giving rise thereto or 2) the date of the notice of intent to award, whichever is sooner. In no event shall a protest be allowed after an award has been made by City Council. If the seventh calendar day falls on a weekend or City holiday, the protesting party may submit the protest prior to close of business on the first business day following such weekend or holiday. Failure to submit a timely protest shall bar consideration of a protest.
2. RFPs must include a notification to prospective proposers of this protest policy.

3. Departments must notify and consult with Purchasing and the City Attorney's Office immediately upon becoming aware of any potential or actual protest. In the event of a proper protest, the RFP process shall be stayed pursuant to Section X (D) of this Policy.

B. Grounds for Protest

1. The alleged grounds for protest shall be limited to the following: (a) computation errors, (b) violations of local, state, or federal law, or (c) the City failed to follow the procedures specified in this Policy.
2. The protest shall state all grounds claimed for the protest and include supporting documentation. Failure to clearly state the grounds for the protest and provide supporting documentation shall be deemed a waiver of all protest rights.

C. Administrative Review

Upon receipt of the protest in accordance with Section X (A), and after determining the protest was properly filed, the Department Director shall provide a copy of the protest to other proposers who might become aggrieved as a result of the protest and issue a written decision within fourteen (14) calendar days after receipt of the protest. The protest will be evaluated by the Department Director, the City Attorney's Office, and the Purchasing Manager. The protesting proposer shall promptly provide any information requested by City staff as part of such investigation. The decision shall either deny or uphold the protest and include reasons for the decision. The written decision shall be final.

D. Stay of Action during a Protest

In the event a protest is filed under Section X, the City shall not proceed further with the award of the contract until the protest is resolved, unless:

1. The City Manager or designee makes a determination that the award of the contract without delay is necessary to protect a substantial interest of the City, or
2. The City decides to reject all proposals and issue a new RFP.

COUNCIL COMMUNICATION

Meeting Date: 5/6/2020

Item #: 6.18.

RECOMMENDATION TO COUNCIL

It is recommended that the City Council adopt the following resolutions (attached):

1. Resolution of the City Council of the City of Roseville, California, Initiating Proceedings for the Annual Levy of Assessments for the Historic District Landscaping and Lighting District for Fiscal Year 2020/2021.

Resolution of the City Council of the City of Roseville, California, Declaring Its Intention to Levy Annual Assessments for the Historic District Landscaping and Lighting District for Fiscal Year 2020/2021.

Resolution of the City Council of the City of Roseville, California, Preliminary Approval of the Engineer's Annual Levy Report for the Historic District Landscaping and Lighting District for Fiscal Year 2020/2021.

2. Resolution of the City Council of the City of Roseville, California, Initiating Proceedings for the Annual Levy of Assessments for the Infill Area Landscaping and Lighting District for Fiscal Year 2020/2021.

Resolution of the City Council of the City of Roseville, California, Declaring Its Intention to Levy Annual Assessments for the Infill Area Landscaping and Lighting District for Fiscal Year 2020/2021.

Resolution of the City Council of the City of Roseville, California, Preliminary Approval of the Engineer's Annual Levy Report for the Infill Area Landscaping and Lighting District for Fiscal Year 2020/2021.

3. Resolution of the City Council of the City of Roseville, California, Initiating Proceedings for the Annual Levy of Assessments for the Johnson Ranch Landscaping and Lighting District for Fiscal Year 2020/2021.

Resolution of the City Council of the City of Roseville, California, Declaring Its Intention to Levy Annual Assessments for the Johnson Ranch Landscaping and Lighting District for Fiscal Year 2020/2021.

Resolution of the City Council of the City of Roseville, California, Preliminary Approval of the Engineer's Annual Levy Report for the Johnson Ranch Landscaping and Lighting District for Fiscal Year 2020/2021.

4. Resolution of the City Council of the City of Roseville, California, Initiating Proceedings for the Annual Levy of Assessments for the North Central Roseville Specific Plan Landscaping and Lighting District for Fiscal Year 2020/2021.

Resolution of the City Council of the City of Roseville, California, Declaring Its Intention to Levy Annual Assessments for the North Central Roseville Specific Plan Landscaping and Lighting District for Fiscal Year 2020/2021.

Resolution of the City Council of the City of Roseville, California, Preliminary Approval of the Engineer's Annual Levy Report for the North Central Roseville Specific Plan Landscaping and Lighting District for Fiscal Year 2020/2021.

5. Resolution of the City Council of the City of Roseville, California, Initiating Proceedings for the Annual Levy of Assessments for the Northwest Roseville Specific Plan Landscaping and Lighting District for Fiscal Year 2020/2021.

Resolution of the City Council of the City of Roseville, California, Declaring Its Intention to Levy Annual Assessments for the Northwest Roseville Specific Plan Landscaping and Lighting District for Fiscal Year 2020/2021.

Resolution of the City Council of the City of Roseville, California, Preliminary Approval of the Engineer's Annual Levy Report for the Northwest Roseville Specific Plan Landscaping and Lighting District for Fiscal Year 2020/2021.

6. Resolution of the City Council of the City of Roseville, California, Initiating Proceedings for the Annual Levy of Assessments for the Olympus Pointe Landscaping and Lighting District for Fiscal Year 2020/2021.

Resolution of the City Council of the City of Roseville, California, Declaring Its Intention to Levy Annual Assessments for the Olympus Pointe Landscaping and Lighting District for Fiscal Year 2020/2021.

Resolution of the City Council of the City of Roseville, California, Preliminary Approval of the Engineer's Annual Levy Report for the Olympus Pointe Landscaping and Lighting District for Fiscal Year 2020/2021.

7. Resolution of the City Council of the City of Roseville, California, Initiating Proceedings for the Annual Levy of Assessments for the Riverside Avenue Landscaping and Lighting District for Fiscal Year 2020/2021.

Resolution of the City Council of the City of Roseville, California, Declaring Its Intention to Levy Annual Assessments for Riverside Avenue Landscaping and Lighting District for Fiscal Year 2020/2021.

Resolution of the City Council of the City of Roseville, California, Preliminary Approval of the Engineer's Annual Levy Report for the Riverside Avenue Landscaping and Lighting District for Fiscal Year 2020/2021.

8. Resolution of the City Council of the City of Roseville, California, Initiating Proceedings for the Annual Levy of Assessments for the Vernon Street Landscaping and Lighting District for Fiscal Year 2020/2021.

Resolution of the City Council of the City of Roseville, California, Declaring Its Intention to Levy Annual Assessments for the Vernon Street Landscaping and Lighting District for Fiscal Year 2020/2021.

Resolution of the City Council of the City of Roseville, California, Preliminary Approval of the Engineer's Annual Levy Report for the Vernon Street Landscaping and Lighting District for Fiscal Year 2020/2021.

It is also recommended that May 20th, 2020 at 6 p.m. be set as the date and time to hold the public hearing.

BACKGROUND

The City of Roseville currently has eight active Landscaping and Lighting Districts (LLDs). These districts were formed within the City to levy and collect assessments for maintenance of public improvements pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code (the Act), and Article XIID of the California Constitution.

The Historic District Landscaping and Lighting District was formed in 2006 to levy and collect assessments for the maintenance and operation of improvements benefiting parcels within the District. The cost of maintaining the streetscape improvements is spread equally to the subject properties, based on their percentage of the total front footage of all affected parcels. The District is located in the Historic Old Town area in Downtown Roseville.

The Infill Area Landscaping and Lighting District was formed in 1995 to levy and collect assessments for the maintenance of certain public improvements that benefit parcels within the District. The District is located in the Infill Plan area.

The Johnson Ranch Landscaping and Lighting District was formed in 1989 to levy and collect assessments for the maintenance of certain public landscape, open space, floodway and stream courses located within the Southeast Roseville Specific Plan area.

The North Central Roseville Specific Plan Landscaping and Lighting District was formed in 1990 to levy and collect assessments for the maintenance of certain public improvements within the North Central Roseville Specific Plan area. In 2004, the property owners in the district approved, through a mailed ballot, an assessment increase and the addition of an annual escalation factor. This enables the City to keep up with increased costs associated with maintaining the landscaping at proper levels.

The Northwest Roseville Specific Plan Landscaping and Lighting District was formed in 1989 to levy and collect assessments for maintenance of certain public landscape medians and corridors,

vernal pool preserves, bike trails, and park improvements. In 2004, the Dunmore Junction subdivision was annexed into the LLD as Zone A and the Legacy subdivision was annexed into Zone B. In 2006 the property owners voted against an assessment increase as well as the addition of an annual escalation factor. In 2011 the property owners voted against an overlay LLD for the Northwest Specific Plan. There was a plan originally scheduled for May 2020 to give the property owners the opportunity to vote for or against an increase to their annual assessment, and the addition of an escalation factor, in order to improve the streetscape landscaping in their neighborhood. Due to the unprecedented times that the community is facing due to the COVID-19 pandemic, the City decided to put the ballot on hold until further notice.

The Olympus Pointe Landscaping and Lighting District was formed in 1989 to levy and collect assessments for the maintenance of certain public improvements within the Northeast Roseville Specific Plan Area. In 2005, the property owners in the district approved, through a mailed ballot, an assessment increase and an annual escalation factor. This enables the City to keep up with increased costs associated with maintaining the landscaping at proper levels.

The Riverside Avenue Landscaping and Lighting District was formed in 2007 to levy and collect assessments for the maintenance and operation of improvements benefiting parcels within the District. The cost of maintaining the streetscape improvements is spread equally to the subject properties, based on their percentage of the total front footage of all affected parcels.

The Vernon Street Landscaping and Lighting District was formed in 2001 to levy and collect assessments for maintenance of improvements installed by the Vernon Streetscape. The cost of maintaining the streetscape improvements is spread equally to the subject properties on their percentage of the total front footage of all affected parcels.

Assessment Statistics

District	Proposed FY 2020-21 Levy	Maximum Annual Assessment	Levied Parcels	% Change from FY 2019-20	FY 2019-20 Levy
Historic District LLD	\$44,590.91	\$44,591.00	56	3%	\$43,292.00
Infill Area LLD	\$30,458.73	\$44,132.80	222	94% *	\$15,666.67
Johnson Ranch LLD	\$48,535.84	\$53,442.00	1,044	6%	\$45,990.42
North Central LLD	\$706,178.96	\$706,438.00	3,494	8% *	\$651,629.38
Northwest LLD	\$481,336.00	\$481,336.00	4,752	0%	\$481,336.00
Olympus Pointe LLD	\$199,168.27	\$404,024.00	824	6% *	\$187,981.34
Riverside Avenue LLD	\$43,014.75	\$43,014.75	75	2%	\$41,986.10
Vernon Street LLD	\$39,769.38	\$39,769.38	60	2%	\$38,818.33
Totals	\$1,593,052.84	\$1,816,747.93	10,527		\$1,506,700.24

* Infill Area LLD assessment was reduced in FY19-20 in Zones B and C because surplus funds were available to reduce the amount levied. The increase for FY20-21 in Zones B and C is the result of not having surplus funds to reduce the levy, as well as an increase in rehab project expenditures in Zones B and C. The FY20-21 assessment in Zone B increased by \$81.52 annually to 41% of the maximum assessment rate. The FY20-21 assessment in Zone C increased by \$80.82 annually to 100% of the maximum assessment rate.

North Central LLD has an increase in direct costs for FY20-21.

Olympus Pointe LLD also has a slight increase in direct costs in addition to not having surplus funds to use to reduce the levy for FY20-21.

FISCAL IMPACT

All charges are needed to fund landscape services in each LLD. There is no impact to the General Fund.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Adoption of the resolutions meet the above criteria and are not subject to CEQA. No additional environmental review is required.

Respectfully Submitted,

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, INITIATING PROCEEDINGS FOR THE ANNUAL LEVY OF ASSESSMENTS FOR THE HISTORIC DISTRICT LANDSCAPING AND LIGHTING DISTRICT, FOR FISCAL YEAR 2020/2021, PURSUANT TO THE PROVISIONS OF PART 2 OF DIVISION 15 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Historic District Landscaping and Lighting District (hereafter referred to as the “District”) pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the “Act”), that provides for levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of street lighting, landscaping, and all appurtenant facilities and operations related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter “Engineer”) for the purpose of assisting with the establishment of the assessments, the annexation of territory, and to prepare and file an Engineer’s Annual Levy Report (hereinafter referred to as the “Engineer’s Report”) with the City Clerk in accordance with the act, and in accordance with the California Constitution, Articles XIII C and XIII D;

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE HISTORIC DISTRICT LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Engineer’s Report: The City Council hereby orders the Engineer to prepare and file with the City Clerk the Engineer’s Report concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22622 (d)* of the Act.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: landscape, lighting and streetscape improvements, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer’s Report describes all new improvements or substantial changes in existing improvements.

RESOLUTION NO. 20-142

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, DECLARING ITS INTENTION TO LEVY ANNUAL ASSESSMENTS FOR THE HISTORIC DISTRICT LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Historic District Landscaping and Lighting District (hereafter referred to as the “District”), and initiated proceedings for Fiscal Year 2020/2021, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the “Act”) that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of all improvements and facilities related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services for the purpose of assisting with the Annual Levy of the District, and to prepare and file a report with the City Clerk in accordance with the Act; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE HISTORIC DISTRICT LANDSCAPING AND LIGHTING DISTRICT, PURSUANT TO CHAPTER 3, SECTION 22624 OF THE ACT, AS FOLLOWS:

Section 1 Intention: The City Council hereby declares that it is its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay the annual costs of the improvements.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: landscape, lighting and streetscape improvements, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer’s Report describes all new improvements or substantial changes in existing improvements.

Section 3 Boundaries and Designation: The boundaries of the District are described as the boundaries previously defined in the formation documents of the original District. The District is known and designated as:

“Historic District Landscaping and Lighting District”

Section 4 Proposed Assessment Amounts: The proposed assessments are outlined in the Report. District Assessments are calculated in accordance with the method of apportionment established for the District and do not exceed the assessment rates and annual inflationary adjustment previously authorized by City Council and approved by the property owners in accordance with the provisions of the California State Constitution, Article XIID.

Section 5 Public Hearing(s): The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22626* of the Act.

Section 6 Notice: The City Clerk shall give notice of the time and place of the Public Hearing by causing the publishing of this Resolution once in a local newspaper not less than ten (10) days before the date of the hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices.

Section 7 Time and Place of Public Hearing: Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Wednesday, May 20, 2020 at 6:00 p.m.**, or as soon thereafter as feasible in the regular meeting chambers located at 311 Vernon Street, Roseville, California.

RESOLUTION NO. 20-143

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR PRELIMINARY APPROVAL OF THE ENGINEER'S ANNUAL LEVY REPORT FOR THE HISTORIC DISTRICT LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, the City Council has, by previous Resolutions, ordered the preparation of an Annual Levy Report (hereafter referred to as the "Engineer's Report") for the district known and designated as the Historic District Landscaping and Lighting District (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereinafter referred to as the "Act"); and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer"), for the purpose of assisting with the establishment of the assessments and to prepare and file an Engineer's Report with the City Clerk in accordance with the Act, and in accordance with the requirements of the California Constitution, Articles XIIC and XIID; and,

WHEREAS, there has now been presented to this City Council the Engineer's Report as required by *Chapter 1, Article 4, Section 22566* of said Act; and,

WHEREAS, this City Council has carefully examined and reviewed the Engineer's Report as presented, and is preliminarily satisfied with the District, each and all of the budget items and documents as set forth therein, and is satisfied that the assessments, on a preliminary basis, have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within the District, as set forth in said Engineer's Report; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE HISTORIC DISTRICT LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Engineer's Report as presented, consists of the following:

- a. A Description of Improvements
- b. The Annual Budget (Costs and Expenses of Maintenance, Services, Operations and District Administration)
- c. The Assessment Roll containing the Fiscal Year 2020/2021 Levy for each Assessor Parcel within the District

Section 3 The Engineer's Report is hereby approved on a preliminary basis, and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 4 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Engineer's Report.

RESOLUTION NO. 20-143

PASSED, APPROVED, AND ADOPTED THIS_____day of_____, 2020.

ENGINEER'S REPORT AFFIDAVIT

Establishment of Annual Rates and Charges for the:

Historic District

Landscaping and Lighting District

City of Roseville

Placer County, State of California

This Report describes the District and any relevant zones therein, including the improvements, budgets, parcels and assessments to be levied for Fiscal Year 2020/21 as they existed at the time of the passage of the Resolution of Intention. Reference is hereby made to the Placer County Assessor's maps for a detailed description of the lines and dimensions of parcels within the District. The undersigned respectfully submits the enclosed Report as directed by the City Council.

Dated this 15th day of APRIL, 2020

I. OVERVIEW

A. INTRODUCTION

The City of Roseville (“City”) annually levies and collects special assessments in order to maintain the improvements within the Historic District Landscaping and Lighting District (“District”). The District was formed on April 5, 2006 and is levied annual assessments pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code (“1972 Act”).

The Engineer’s Report (“Report”) describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2020 through June 30, 2021. The special benefit assessments are based on historical and estimated costs to maintain the District improvements. These assessments, which provide a direct and special benefit to properties within the District, will provide funding for the operation and maintenance of District improvements.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (“APN”) by the Placer County Assessor’s Office. The Placer County Auditor/Controller uses Assessor’s Parcel Numbers and specific Tax Code Accounts, to identify on the County’s tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will by resolution order the improvements to be made and confirm the levy and collection of assessments herein pursuant to the Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council defines the assessments to be applied to each parcel within the District for Fiscal Year (“FY”) 2020/21. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved by the City Council.

B. COMPLIANCE WITH THE CURRENT LEGISLATION

The City Council, pursuant to the provisions of the “Landscaping and Lighting Act of 1972”, being Division 15, Part 2 of the Streets and Highways Code of the State of California, beginning with Section 22500 (the “1972 Act”); Article XIID of the Constitution of the State of California (“Article XIID”); and the Proposition 218 Omnibus Implementation Act, beginning with Government Code Section 53750 (the “Implementation Act”) (the 1972 Act, Article XIID and the Implementation Act are referred to collectively as the “Assessment Law”) initiated proceedings for the formation of the District on February 15, 2006 and to levy and collect annual assessments against lots and parcels within the District for FY 2006/07. On April 5, 2006, pursuant to Assessment Law, the City conducted a Public Hearing and tabulated the returned ballots. The City determined that a majority protest did not exist and approved the District’s maximum assessment rate and annual inflationary adjustment factor.

Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer’s Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the Act and Assessment Law.

C. DESCRIPTION OF DISTRICT BOUNDARIES

The territory within the District consists of all lots, parcels and subdivisions of land as shown on the Boundary Map titled “Boundary Map of Historic District Landscaping and Lighting District” as referenced in Appendix A-1 of this Report.

The District is located within the City’s Historic Old Town, west of Highway 80, south of Pleasant Street, north and east of Washington Boulevard, and north and west of the Union Pacific Railroad. The District consists of mostly commercial parcels in a concentrated area of the Downtown primarily fronting the following streets: Church Street northeast of Washington Boulevard, Main Street between Washington Boulevard and Lincoln Street, Pacific Street and Lincoln Street where the improvements end approximately one block south of Pleasant Street.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to a proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance

or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.

- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;

- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of

the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.

- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF THE IMPROVEMENTS AND MAINTENANCE

The District, through the levy of special assessments, provides funding for ongoing maintenance, operation and servicing of landscaping and lighting improvements located within the public rights-of-ways and dedicated easements located within the District. These improvements may include, but are not limited to, all materials, equipment, utilities, labor, and appurtenant facilities related to the ongoing maintenance of the improvements.

Maintenance services will be provided by City personnel and/or private contractors. The proposed improvements to be maintained and services are generally described as follows:

Landscaping Improvements

The landscaping improvements have been designed to enhance the area within the District and may include, but are not limited to ground cover, shrubs and plants, trees, irrigation and drainage systems, trash receptacles, ornamental lighting, masonry walls or other fencing, hardscape improvements, monuments and landmarks, recreational facilities and associated appurtenances located within the street rights-of-way and public areas within the District. Specifically, the proposed landscape improvement areas for this District are:

- Parkway landscaping and hardscape improvements within the public right of ways of the streets within the district including, but not limited to, Lincoln Street, Main Street, Church Street, Pacific Street and the northeast side of Washington Boulevard estimated at 14,450 square feet of landscaping;
- Various amenities associated with the landscape improvements and public areas within the District, including, but not limited to, trash receptacles, street furniture, bike racks, entry signs, sidewalks, fencing, and retaining walls.

Specifically not included as District improvements are those improvements located on private property, improvements and facilities that are outside the boundaries of the District and/or are funded by other sources available to the City, including those portions of the median and parkway landscaping on Washington Boulevard (southwest side of the street) that are outside the District boundaries.

Public Lighting Improvements

The lighting improvements may include, but are not limited to, the cost of providing,

maintaining and servicing of lighting fixtures, poles, meters, conduits, electrical cable, and associated appurtenant facilities associated with:

- Lighting facilities within the landscaped areas and public areas including safety lights, security lights or ornamental lights installed as part of the District improvements; and
- Public street light improvements located on the streets within the District.

Specifically excluded from the assessment are the street light energy costs. These costs will continue to be paid for by the City from other revenue sources.

Detailed maps of the locations and descriptions of the specific improvements to be maintained by the District are on file in the Office of Public Works and by reference are made part of this Report.

Description of Maintenance and Services

Maintenance means the furnishing of services and materials for the ordinary and usual maintenance, operation and servicing of landscaping and street lighting improvements facilities and appurtenant facilities, including repair, removal or replacement of all or part of any of the landscaping and street lighting improvements, or appurtenant facilities; providing for the life, growth, health and beauty of landscaping improvements including cultivation, irrigation, trimming, mowing, spraying, fertilizing and treating for disease or injury; the removal of trimmings, rubbish, debris and other solid waste; and the cleaning sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Servicing means the furnishing of water and electricity for the irrigation of the landscape improvements or appurtenant facilities and the furnishing of electric current or energy for the operation of the landscaping improvements or appurtenant facilities. The street lighting improvements shall be maintained to provide adequate illumination; however, the City will be paying the actual energy costs to provide illumination.

II. METHOD OF APPORTIONMENT

A. GENERAL

The 1972 Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements which include the construction, maintenance and servicing of public lights, landscaping and appurtenant facilities. The 1972 Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”

The formula used for calculating assessments in the District therefore reflects the composition of the parcels, and the Improvements and services provided, to fairly apportion the costs based on estimated benefit to each parcel.

B. BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments, notably:

Article XIID Section 2d defines District as follows:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service”;

Article XIID Section 2i defines Special Benefit as follows:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4a defines proportional special benefit assessments as follows:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public

improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

This District was formed to establish and provide for the improvements that enhance the presentation of the surrounding properties and developments. These improvements will directly benefit the parcels to be assessed within the District. The assessments and method of apportionment is based on the premise that the assessments will be used to construct and install landscape and lighting improvements within the District as well as provide for the annual maintenance of those improvements, and the assessment revenues generated by District will be used solely for such purposes.

The costs of the proposed improvements have been identified and allocated to properties within the District based on special benefit. The improvements to be provided by this District and for which properties will be assessed have been identified as an essential component and local amenity that provides a direct reflection and extension of the properties within the District which the property owners and residents have expressed a high level of support.

The method of apportionment (method of assessment) set forth in the Report is based on the premise that each assessed property receives special benefits from the landscape and lighting improvements within the District, and the assessment obligation for each parcel reflects that parcel’s proportional special benefits as compared to other properties that receive special benefits.

To identify and determine the proportional special benefit to each parcel within the District, it is necessary to consider the entire scope of the improvements provided as well as the properties that benefit from those improvements. The improvements and the associated costs described in this Report, have been carefully reviewed and have been identified and allocated based on a benefit rationale and calculations that proportionally allocate the net cost of only those improvements determined to be of special benefit to properties within the District. The various public improvements and the associated costs have been identified as either “general benefit” (not assessed) or “special benefit”.

The City initiated and conducted property owner protest ballot proceedings in accordance with Article XIID. Each of the proposed Improvements, the associated costs and assessments were identified and allocated based on special benefit pursuant to the provisions of Article XIID and 1972 Act. Additionally, the Improvements and the annual costs of ensuring the maintenance and operation of the Improvements are of direct and special benefit to the properties.

The City annually levies and collects special benefit assessments in order to maintain and service the District Improvements. The District provides for specific Improvements and services that include the maintenance and operation of

landscaping and lighting Improvements and associated appurtenances located within the District's public rights-of-way and dedicated easements. The annual assessment is based on the historical and estimated costs to maintain the Improvements that provide a benefit to properties within these Districts. The Improvements within the District and the costs of those Improvements are identified and budgeted separately, including all expenditures, deficits, surpluses, revenues, and reserves.

All Improvements within the District and the properties associated with those Improvements were reviewed for benefit prior to the formation of the District. Because the Improvements affront the benefited parcels, it has been determined that there is no measurable general benefit to properties outside the District or to the public at large. In making this determination it should be noted that similar improvements within California are typically maintained by individual property owners, through some type of association or a special district as allowed by State Law since the on-going maintenance of these improvements are a special benefit to the properties associated with those improvements.

The method of apportionment (method of assessment) for the District is based on the premise that each of the assessed parcels within the District receives special benefit from the Improvements maintained and financed by District assessments. The presence of these Improvements and the close proximity of the Improvements to the properties within the District enhance the desirability and security of properties within the District.

The landscape Improvements provided by the District may include landscaped parkways, perimeters, entryways, local medians, slopes, internal amenities and appurtenant facilities. Street lighting Improvements may include all energy costs and necessary maintenance to the facilities related thereto. The annual assessments outlined in this Report are proposed to cover the estimated costs to provide all necessary service, operation, administration, and maintenance required to keep these Improvements in a healthy, vigorous, and satisfactory condition. The special benefits associated with the local landscaping Improvements are specifically:

The special benefits associated with all landscaping Improvements are specifically:

- Enhanced desirability of properties through association with the Improvements.
- Improved aesthetic appeal of properties providing a positive representation of the area and properties.
- Enhanced adaptation of the urban environment within the natural environment from adequate landscaping.
- Environmental enhancement through improved dust and debris control, and fire prevention.

- Increased sense of pride in ownership of property within the District resulting from well-maintained Improvements associated with the properties.
- Enhanced quality of life through well-maintained landscaped areas.
- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the District through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels by moderating temperatures, providing oxygenation and attenuating noise.

The special benefits of street lighting are the convenience, safety, and security of property, improvements, and goods. Specifically:

- Enhanced deterrence of crime and the aid to police protection.
- Increased nighttime safety on streets and roads within the Districts.
- Improved ability of pedestrians and motorists to see.
- Improved ingress and egress to property.
- Reduced vandalism and other criminal acts and damage to Improvements or property.
- Improved traffic circulation and reduced nighttime accidents and personal property loss.
- Increased promotion of business during nighttime hours in the case of commercial properties.

All of the preceding special benefits contribute to a specific enhancement and desirability of each of the assessed parcels within the District.

C. DESCRIPTION OF THE METHOD OF APPORTIONMENT

To establish the special benefit to the individual parcels within the District a formula that spreads the costs of the maintenance based on the special benefit must be established. The improvements have been reviewed and the following formula has been established to apportion the maintenance costs based on benefit.

For purposes of the Assessment Methodology, the terms hereinafter set forth have been the following meanings:

Acreage means the land area of an Assessor's Parcel as shown on an Assessor's Parcel map-, or if the land area is not shown on an Assessor's parcel map, the land area shown on the applicable final map, parcel map, condominium plan, record of survey or other recorded document creating and describing such area of land.

Multi-Family Residential means a residence for which building permits have been issued for attached residential units for rental purposes.

Single-Family Residential Unit means a single residential home. This land use includes detached or attached for sale units intended for single-family occupancy.

Commercial means property being used or zoned for either commercial or industrial use.

Three components were used in the methodology to determine each parcels assessment; 1) Front footage of parcels along the proposed street improvements; 2) acreage of benefiting parcels; and 3) Current land use of parcels. Based on these three components the assessments were determined as follows:

First, the parcels Front Footage was determined based on Assessor's Parcel maps or other sources. Only Front footage on streets that will be improved was used. For parcels with Front Footage on more than one side (corner lots), the total Front Footage was divided by two to provide an average Front Footage. It was determined that twenty percent (20%) of the total budget was reasonably attributed to Front Footage; therefore twenty percent (20%) of the budget was spread to Front Footage.

Second, each parcel's Acreage was calculated based on Assessors Parcels map. It was determined that eighty percent (80%) of the budget was reasonably attributed to Acreage; therefore eighty (80%) of the budget was spread on Acreage. In the event that common area parcels are created subsequent to the formation of the District, the acreage of any such common area parcels shall be apportioned to the remaining assessable parcels of the subdivision and/or parcel split(s) related to the creation of the common area parcel(s).

Third, the current land use of the parcel was determined using the County's secured roll. Parcel's currently used as a Single-Family Residence or Multi-Family Residences were determined to receive twenty-five (25%) of the benefit in relation to commercial parcels. Additionally, it was determined that single Family Residential Parcels benefit equally from the improvements, therefore the total assessment calculated based on the formula was averaged between the five Single Family Residential parcels to determine a Single Family Residential rate per Unit.

The base year maximum assessment rates approved to be levied in FY 2006/07 are provided in the table below.

Base Year (FY 2006/07) Maximum Assessment Rates			
Land Use	Front Footage	Acreage Rate	Flat Rate
Commercial	\$1.99 per Front Foot	\$2,582.41 per Acre	N/A
Multi-Family Residential	\$0.50 per Front Foot	\$645.60 per Acre	N/A
Single-Family Residential	N/A	N/A	\$132.00 per Unit

The following formula is used to calculate each parcel's assessment (proportional benefit) for those parcels that are not Single-Family Residential parcels.

Front Footage Rate x Parcel's Adjusted Front Footage = Parcel Front Footage Levy

Acreage Rate x Parcel's Adjusted Acreage = Parcel Acreage Levy

Proposed Levy per Parcel = Parcel Front Footage Levy + Parcel Acreage Levy

The Assessment Range Formula shall be applied to all future assessments within the District beginning in fiscal year 2007/08. Generally, if the proposed annual assessment for the current fiscal year is less than or equal to the calculated Maximum Assessment, then the Assessment is equal to the initial Assessment (approved by property owners within the District) adjusted annually by three percent (3%).

Beginning in the second fiscal year (Fiscal Year 2007/08) and each fiscal year thereafter, the Maximum Assessment would be recalculated and a new Maximum Assessment established within the District.

The Maximum Assessment is adjusted annually and is calculated independent of the District's annual budget and proposed annual assessment. Any proposed annual assessment is not considered an increased assessment, even if the proposed assessment is greater than the assessment applied in the prior fiscal year.

Although the Maximum Assessment will increase each year, the actual assessment may remain unchanged. The Maximum Assessment adjustment is designed to establish a reasonable limit on assessments. The Maximum Assessment calculated each year does not require or facilitate an increase to the annual assessment and neither does it restrict assessments to the adjustment maximum amount. If the budget and assessment for the fiscal year do not require an increase, or the increase is less than the adjusted Maximum Assessment, the required budget and assessment may be applied without additional property owner balloting. If the budget and assessments calculated requires an increase greater

than the adjusted Maximum Assessment, then the assessment is considered an increased assessment and would be subject to balloting.

D. ANNUAL INFLATIONARY ADJUSTMENT

If the proposed assessment rates increase over the prior fiscal year's maximum assessment rates by a percentage no greater than the 3%, then the proposed assessment rates are not considered an increase.

III. DISTRICT BUDGET

A. FY 2020/21 BUDGET

DESCRIPTION	AMOUNTS
<u>DIRECT COSTS</u>	
Contract Maintenance - Landscaping	\$12,550.00
Repair & Maintenance - Landscaping	9,944.00
Repair & Maintenance - Lighting	2,000.00

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping - Includes all regularly scheduled contract labor, required to properly maintain and ensure the satisfactory condition of all landscaping, irrigation and drainage systems and appurtenant facilities.

Repair and Maintenance - Landscaping - This item includes landscape improvement repair and maintenance costs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc. Planned replacements or upgrades that provide a direct benefit to the District during the Current Fiscal Year may also be included. Costs could include the renovation of improvements such as irrigation systems.

Repair and Maintenance - Lighting - This item includes lighting improvement repair and maintenance costs. This may include repair of damaged amenities due to vandalism, storms, etc. Planned replacements or upgrades that provide a direct benefit to the District during the Current Fiscal Year may also be included.

Repair and Maintenance - Streetscape and Signage - This item includes repair and maintenance costs of streetscape and sign improvements. Streetscape improvements include street furniture, sidewalks, curbs, gutters, parking stripes, brick pavers, benches, bike racks, and trash receptacles. This may include repair of damaged amenities due to vandalism, storms, etc. May include planned replacements or upgrades not listed below that provide a direct benefit to the District.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's' Report.

Public Hearing Publishing Costs –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A "Replenishment" increases the levy in order to replenish the Operating Reserve. On the other hand, a "Use" of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Contribution for /(Use of) Rehab Reserve — A "Contribution" increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a "Use of" of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the

Rehabilitation Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

APPLIED ASSESSMENT RATE

Number of Assessable Parcels - The total number of parcels that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public rights-of-way or easements, common areas, and/or parcels within the boundaries of the District currently do not benefit from the improvements and are therefore not assessed.

Total Assessable Front Footage – the total number of Front Feet within the District, adjusted for corner parcels, Multi-Family Residential and Single-Family Residential Parcels will be assessed as calculated in accordance with the methodology set out in Section C of this Report.

Total Assessable Acreage – the total Acreage within the District, adjusted for Multi-Family Residential and Single-Family Residential Parcels that will be assessed as calculated in accordance with the methodology set out in Section C of this Report.

Total Single-Family Residential Parcels – the total number of parcels currently being used as Single-Family Residences.

Applied Assessment Rates – The applied assessment rates for each of the District’s land use types.

Maximum Assessment Rates per Front Foot – The maximum dollar amount that can be assessed per Adjusted Front Foot for the District’s land use type for the current fiscal year.

Maximum Assessment Rates per Acre – The maximum dollar amount that can be assessed per Adjusted Acreage Foot for the District’s land use type for the current fiscal year.

Maximum Assessment Rate per SF Residential Unit – The maximum dollar amount that can be assessed per Single Family Unit within the District for the current fiscal year.

Potential Maximum Assessment – The total amount that is expected to be assessed against all parcels within the District for the Current Fiscal Year.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2020 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2020 to December 31, 2020, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 20/21 Levy – This amount is added to the levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2020 (the beginning of the Fiscal Year) through December 31, 2020. If zero, this line item may not be shown in the budget.

Use for FY 20/21 Expenses – The amount of the Operating Reserve to be used to fund FY 20/21 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2020 (the beginning of the Fiscal Year) through December 31, 2020. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2021 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2021. The size of each Zone's Operating Reserve is limited by Streets and

Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2020 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2020. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 20/21 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 20/21 Rehab Projects — The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2021 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2021. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

Should the District have no Rehabilitation Reserve balances or related activity, no Rehabilitation Reserve information shall be presented in the Report.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

A five-year Capital Improvement Plan showing projected expenditures related to the rehabilitation, restoration and/or replacement of District improvements, and other allowable costs, is shown below.

Description	FY 2020/21	FY 2021/22	FY 2022/23	FY 2023/24	FY 2024/25	4 Year Total
Repair, replace and/or refurbish street furniture			\$3,500			\$3,500
Replace, repair, renovate and/or refurbish plants, landscape & related materials	\$10,000	\$10,000	\$10,000	\$10,000	\$10,000	\$40,000
Replace, repair lighting fixtures		\$5,000		\$0		\$5,000
Tree grid pruning	\$1,880	\$2,000	\$2,100	\$2,200	\$2,200	\$8,500
Total Projected Expenditures	\$11,880	\$17,000	\$15,600	\$12,200	\$12,200	\$57,000

From time to time, funds held in a Rehabilitation Reserve may be needed to respond to changing needs due to the condition of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the Districts' Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and/or operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map for the District has previously been submitted to the Clerk of the City in the format required under the 1972 Act and is, by reference, hereby made part of this Report. These District Boundary Maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a summary of the District's Boundaries is presented herein.

FILED IN THE OFFICE OF THE CITY CLERK THIS _____ DAY OF _____, 2006.
I HEREBY CERTIFY THAT THIS MAP SHOWING THE BOUNDARIES OF HISTORIC LANDSCAPING AND LIGHTING DISTRICT, CITY OF ROSEVILLE, COUNTY OF PLACER, STATE OF CALIFORNIA, WAS APPROVED BY THE CITY COUNCIL OF THE CITY OF ROSEVILLE AT A REGULAR MEETING THEREOF, HELD ON THE _____ DAY OF _____, 2006, BY ITS RESOLUTION NO. _____.

CITY CLERK
CITY OF ROSEVILLE

APPENDIX B — 2020/21 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, shall be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways including public greenbelts and parkways; utility rights-of-ways; common areas; landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed, excepting common area parcels. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2020/21. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2020/21 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO 20-144

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, INITIATING PROCEEDINGS FOR THE ANNUAL LEVY OF ASSESSMENTS FOR THE INFILL AREA LANDSCAPING AND LIGHTING DISTRICT, FOR FISCAL YEAR 2020/2021, PURSUANT TO THE PROVISIONS OF PART 2 OF DIVISION 15 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Infill Area Landscaping and Lighting District (hereafter referred to as the “District”) pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the “Act”), that provides for levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services relating to landscaping, all appurtenant facilities and operations related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter “Engineer”) for the purpose of assisting with the establishment of the assessments, the annexation of territory, and to prepare and file an Engineer’s Annual Levy Report (hereinafter referred to as the “Engineer’s Report”) with the City Clerk in accordance with the act, and in accordance with the California Constitution, Articles XIII C and XIII D;

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE INFILL AREA LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Engineer’s Report: The City Council hereby orders the Engineer to prepare and file with the City Clerk the Engineer’s Report concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22622 (d)* of the Act.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: maintenance, servicing, administration and operation of the landscape corridors adjacent to property within the Pheasant Run, Cirby Oaks II and Reuter Ranch subdivisions, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer’s Report also describes all new improvements or substantial changes in existing improvements.

RESOLUTION NO. 20-145

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, DECLARING ITS INTENTION TO LEVY ANNUAL ASSESSMENTS FOR THE INFILL AREA LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Infill Area Landscaping and Lighting District (hereafter referred to as the “District”), and initiated proceedings for Fiscal Year 2020/2021, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the “Act”) that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of all improvements and facilities related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services for the purpose of assisting with the Annual Levy of the District, and to prepare and file a report with the City Clerk in accordance with the Act; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE INFILL AREA LANDSCAPING AND LIGHTING DISTRICT, PURSUANT TO CHAPTER 3, SECTION 22624 OF THE ACT, AS FOLLOWS:

Section 1 Intention: The City Council hereby declares that it is its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay the annual costs of the improvements.

Section 2 Proposed improvements and any substantial changes in existing improvements: : The improvements within the District include: maintenance, servicing, administration and operation of the landscape corridors adjacent to property within the Pheasant Run, Cirby Oaks II and Reuter Ranch subdivisions, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer’s Report also describes all new improvements or substantial changes in existing improvements.

Section 3 Boundaries and Designation: The boundaries of the District are described as the boundaries previously defined in the formation documents of the original District. The District includes the parcels within the areas known as the Pheasant Run, Cirby Oaks II and Reuter Ranch subdivisions. The District is known and designated as:

“Infill Area Landscaping and Lighting District”

Section 4 Proposed Assessment Amounts: The proposed assessments are outlined in the Engineer’s Annual Levy Report. District Assessments are calculated in accordance with the method of apportionment established for the District and do not exceed the assessment rates.

Section 5 Public Hearing(s): The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22626* of the Act.

Section 6 Notice: The City Clerk shall give notice of the time and place of the Public Hearing by causing the publishing of this Resolution once in a local newspaper not less than ten (10) days before the date of the hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices.

Section 7 Time and Place of Public Hearing: Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Wednesday, May 20, 2020 at 6:00 p.m.**, or as soon thereafter as feasible in the regular meeting chambers located at 311 Vernon Street, Roseville, California.

RESOLUTION NO. 20-146

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR PRELIMINARY APPROVAL OF THE ENGINEER'S ANNUAL LEVY REPORT FOR THE INFILL AREA LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, the City Council has, by previous Resolutions, ordered the preparation of an Annual Levy Report (hereafter referred to as the "Engineer's Report") for the district known and designated as the Infill Area Landscaping and Lighting District (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereinafter referred to as the "Act"); and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer"), for the purpose of assisting with the establishment of the assessments and to prepare and file an Engineer's Report with the City Clerk in accordance with the Act, and in accordance with the requirements of the California Constitution, Articles XIIC and XIID; and

WHEREAS, there has now been presented to this City Council the Report as required by *Chapter 1, Article 4, Section 22566* of said Act; and,

WHEREAS, this City Council has carefully examined and reviewed the Engineer's Report as presented, and is preliminarily satisfied with the District, each and all of the budget items and documents as set forth therein, and is satisfied that the assessments, on a preliminary basis, have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within each Zone, as set forth in said Report; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE INFILL AREA LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Engineer's Report as presented, consists of the following:

- a. A Description of Improvements
- b. The Annual Budget (Costs and Expenses of Maintenance, Services, Operations and District Administration)
- c. The Assessment Roll containing the Fiscal Year 2020/2021 Levy for each Assessor Parcel within the District

Section 3 The Engineer's Report is hereby approved on a preliminary basis, and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 4 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Engineer's Report.

I. OVERVIEW

A. INTRODUCTION

The City of Roseville (“City”) annually levies and collects special assessments in order to maintain the improvements within the City’s existing Infill Area Landscaping and Lighting District (“District”). The District was formed and is levied annual assessments pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code (the “Act”).

The Engineer’s Report (“Report”) describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2020 through June 30, 2021. The special benefit assessments are based on historical and estimated costs to maintain the District improvements. These assessments, which provide a direct and special benefit to properties within the District, will provide funding for the operation and maintenance of District improvements.

The District consists of three (3) zones of benefit, Zones A, B and C (individually the “Zone” and collectively the “Zones”). The improvements that benefit properties within each Zone and the costs to maintain and service those improvements are identified and budgeted separately by Zone. The total cost of landscape maintenance within a Zone is equitably spread among only the benefiting parcels.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (“APN”) by the Placer County Assessor’s Office. The Placer County Auditor/Controller uses Assessor’s Parcel Numbers and specific Tax Code Accounts, to identify on the County’s tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will by resolution, order the improvements to be made, if any, and confirm the levy and collection of assessments pursuant to the Act. The assessment rates and method of apportionment described in this Report, as approved or modified by the City Council, defines the assessments to be applied to each parcel within the District and respective Zones for Fiscal Year (“FY”) 2020/21. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the FY 2020/21 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rates approved by the City Council.

B. COMPLIANCE WITH CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the Act and are in compliance with the substantive and procedural requirements of the California State Constitution Articles XIIC and XIID (“Articles XIIC and XIID”) and the provisions of the Proposition 218 Omnibus Implementation Act [Government Code Section 53750 and following] (the “Implementation Act”). Articles XIIC and XIID and the Implementation Act collectively are hereinafter referred to as “Proposition 218”.

Pursuant to the California Constitution Article XIID Section 5, certain existing assessments are exempt from the substantive and procedural requirements of Article XIID Section 4 and property owner balloting for the assessments is not required until such time that the assessments are increased. Specifically, the City determined that all improvements and the annual assessments originally established for the District were part of the conditions of property development and approved by the original property owner (developer). As such, pursuant to Article XIID Section 5(b), all the property owners approved the existing District assessments at the time the assessments were created (originally imposed pursuant to a 100% landowner petition). Therefore, the pre-existing assessment amounts (the maximum assessment rates of Zones A, B, & C identified in this Report) are exempt from the procedural requirements Article XIID Section 4, provided the assessments are not increased above these previously approved maximum assessment rates.

The District and all Zones therein have been formed pursuant to the Act. Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer’s Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the Act.

C. DESCRIPTION OF DISTRICT BOUNDARIES

The three Zones within the District are comprised of three non-contiguous residential subdivisions, namely Pheasant Run, Cirby Oaks II and Reuter Ranch, are located in the southern portion of the City and are within the boundaries of the City’s “Infill Planning Area”. A general depiction of the boundaries of each Zone can be found in Appendix A of this Report.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to a proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.

- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF IMPROVEMENTS AND BENEFITS

This District, by special benefit assessments, provides funding for the maintenance and operation of certain landscaping improvements located within the public right-of-way's and dedicated easements:

The District provides all services necessary to maintain the landscaped corridors adjacent to the privately-owned parcels comprising the three subdivisions. Improvements include shrubs, trees and other landscaping vegetation, as well as irrigation controllers, automatic valves and irrigation systems. Services provided include all necessary services, operations, and maintenance required in keeping the improvements in a healthy, vigorous condition and in proper working order.

The District encompasses three subdivisions, each of which is located in a separate Zone. The Zones have specific improvements and costs associated with those improvements that benefit the parcels within each respective Zone. The total cost of landscape maintenance within a Zone is equitably spread among only the benefiting parcels within the Zone and only parcels that receive a special benefit from the improvements are assessed.

The specific locations of the improvements within each Zone of the District are described as follows:

Zone A – Pheasant Run

Maintenance of 6,880 square feet of landscaping and related improvements within the Pheasant Run subdivision.

Zone B – Cirby Oaks

Maintenance of 7,447 square feet of landscaping and related improvements within the Cirby Oaks II subdivision.

Zone C – Reuter Ranch

Maintenance of 24,700 square feet of landscaping and related improvements within the Reuter Ranch subdivision. A larger amount of landscaping benefits the properties within Reuter Ranch and typically results in a larger per parcel assessment for these properties as compared to Zones A and B.

II. METHOD OF APPORTIONMENT

A. GENERAL

The Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements which include the construction, maintenance and servicing of public lights, landscaping and appurtenant facilities. The Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”

The formula used for calculating assessments in each Zone of the District therefore reflects the composition of the parcels, and the improvements and services provided, to fairly apportion the costs based on estimated benefit to each parcel.

B. SPECIAL BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments, notably:

Article XIID Section 2d defines District as follows:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service”;

Article XIID Section 2i defines Special Benefit as follows:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4a defines proportional special benefit assessments as follows:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement,

or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

These improvements will directly benefit the parcels to be assessed within the District. The assessments and method of apportionment is based on the premise that the assessments will be used to construct and install landscape and lighting improvements within the District as well as provide for the annual maintenance of those improvements, and the assessment revenues generated by District will be used solely for such purposes.

Each of the proposed improvements; the associated costs and assessments have been reviewed, identified and allocated based on special benefit pursuant to the Act. All improvements associated with the Zones were necessary and required through the conditions of property development. Therefore, the improvements and the annual costs of ensuring the maintenance and operation of the improvements are of direct and special benefit to the properties.

The method of apportionment (method of assessment) is based on the premise that each assessed parcel within these Zones receives special benefit from the improvements. The desirability and security of properties is enhanced by well-maintained landscaping in close proximity to those properties.

The special benefits associated with all landscaping improvements are specifically:

- Enhanced desirability of properties through association with the improvements.
- Improved aesthetic appeal of properties providing a positive representation of the area and properties.
- Enhanced adaptation of the urban environment within the natural environment from adequate green space and landscaping.
- Environmental enhancement through improved erosion resistance, dust and debris control, and fire prevention.
- Increased sense of pride in ownership of property within the Zones resulting from well-maintained improvements associated with the properties.
- Enhanced quality of life through well-maintained green belts and landscaped areas.
- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the Zones through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels by moderating temperatures, providing oxygenation and attenuating noise.

All of the preceding special benefits allowed the property to be developed for the enjoyment of the property owners and contribute to a specific enhancement and desirability of each of the assessed parcels within the Zones.

The improvements are for the special benefit, enhancement and use of properties within the Zones. Although the improvements include public easements, rights-of-way, streets and other amenities available or visible to the public at large, the construction and installation of these improvements are only necessary for the development of properties within the Zones and are not required nor necessarily desired by any properties or developments outside the Zone's boundaries. Therefore, any public access or use of the improvements by others is incidental and there is no measurable general benefit to properties outside the Zones or to the public at large.

C. RATE AND METHOD OF APPORTIONMENT

Pursuant to the Act, the costs of each Zone of the District must be spread to each parcel based upon a benefit formula. Each assessable parcel in the District receives a direct and special benefit from the improvements in the Zone. This direct and special benefit was determined to be equal for all dwelling units within each Zone; costs for each Zone shall be calculated separately within each respective Zone. Each single-family residence is equal to one dwelling unit (unit) and the formula used to arrive at each parcel's annual assessment is described below. Public parcels lying within the landscape corridors are considered to receive no benefit from the improvements and are therefore not assessed.

Costs associated with each Zone are to be charged only to assessable parcels within the respective Zone as follows:

$$\frac{\text{Balance to Levy in Zone}}{\text{Total Units in Zone}} = \text{Assessment Per Unit in Zone}$$

The Maximum Annual Assessment Rates are not to exceed \$193.32 per unit for Zone A and \$200.00 per unit for Zones B and C.

III. DISTRICT BUDGET

A. 2020/21 BUDGET

DESCRIPTION	ZONE A (Pheasant Run) Fund 2014	ZONE B (Cirby Oaks II) Fund 2015	ZONE C (Reuter Ranch) Fund 2017
<u>DIRECT COSTS</u>			
Contract Maintenance - Landscaping	\$1,323.00	\$1,941.00	\$3,832.00
Repair & Maintenance - Landscaping	\$2,120.00	\$3,000.00	\$2,500.00
Utilities	2,000.00	1,500.00	2,310.00
Rehab Reserve Project Expenditures	<u>1,400.00</u>	<u>8,500.00</u>	<u>10,000.00</u>
Total Direct Costs	\$6,843.00	\$14,941.00	\$18,642.00
<u>ADMINISTRATION COSTS</u>			
City Administration	\$155.00	\$2.00	\$158.00
Contract Administration - Park's Dept	1,150.00	1,213.00	1,954.00
County Auditor Fees	77.33	95.26	132.00
Consulting & Professional Services	678.10	1,480.57	1,847.32
Consultant Incidental Expenses	6.77	14.78	18.45
Public Hearing Publishing Costs	<u>300.00</u>	<u>280.00</u>	<u>295.00</u>
Total Administrative Costs	\$2,367.20	\$3,085.61	\$4,404.77

Ending Rehab Reserve Balance 6-30-2021 (est.)	\$13,872.59	\$29,727.69	\$15,683.83

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping - Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping corridors, street

medians, entryways, irrigation and related drainage systems as well as maintenance of appurtenant facilities (the “improvements”).

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Repair & Maintenance – Landscaping - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc. If zero, this line item may not be shown in the budget.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year’s assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer’s Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park’s Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department’s estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer’s Report.

Public Hearing Publishing Costs –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A “Replenishment” increases the levy in order to replenish the Operating Reserve. On the other hand, a “Use” of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Contribution for / (Use of) Rehab Reserve — A “Contribution” increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a “Use of” of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

APPLIED ASSESSMENT RATES

Number of Assessable Units - The total number of residential units that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public right-of-way's or easements, common areas, and/or parcels within the boundaries of the District currently do not benefit from the improvements and are therefore not assessed.

Applied Assessment Rate per Unit - The per unit assessment rates to be applied to the non-exempt parcels within the District for the current fiscal year.

Maximum Assessment Rate per Unit - The per unit maximum assessment rates for current fiscal year.

Potential Maximum Assessment Per Zone – The total amount that can be assessed against all parcels within each Zone for the current fiscal year based upon the expected number of units to be assessed.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2020 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2020 to December 31, 2020, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 20/21 Levy – This amount is added to the levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2020 (the beginning of the Fiscal Year) through December 31, 2020. If zero, this line item may not be shown in the budget.

Use for FY 20/21 Expenses – The amount of the Operating Reserve to be used to fund FY 20/21 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2020 (the beginning of the Fiscal Year) through December 31, 2020. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2021 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2021. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2020 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2020. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 20/21 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 20/21 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2021 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2021. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

For each Zone showing a projected ending Rehabilitation Reserve balance or projected FY 2020/21 expenditures for Rehabilitation Reserve Project, a five-year Capital Improvement Plan showing the projected expenditures related to the rehabilitation, restoration and/or replacement of District improvements and other allowable costs, is shown below.

Zone A.

Description	FY 2020/21	FY 2021/22	FY 2022/23	FY 2023/24	FY 2024/25	4 Year Total
Repair and/or refurbish sound wall improvements	\$0	\$0	\$5,000	\$0	\$0	\$5,000
Replace, repair, renovate and/or refurbish plants, landscape & related materials	\$1,000	\$2,000	\$2,000	\$2,000	\$2,500	\$8,500
Grid tree pruning, removal and replacement of declining trees	\$400	\$400	\$400	\$400	\$400	\$1,600
Total Zone A Expenditures	\$1,400	\$2,400	\$7,400	\$2,400	\$2,900	\$15,100

Zone B.

Description	FY 2020/21	FY 2021/22	FY 2022/23	FY 2023/24	FY 2024/25	4 Year Total
Repair and/or refurbish sound wall improvements	\$5,000	\$2,000	\$1,000	\$1,000	\$0	\$4,000
Replace, repair, renovate and/or refurbish plants, landscape & related materials	\$3,000	\$15,000	\$3,000	\$3,000	\$3,000	\$24,000
Grid tree pruning, removal and replacement of declining trees	\$580	\$580	\$580	\$580	\$580	\$2,320
Total Zone B Expenditures	\$8,580	\$17,580	\$4,580	\$4,580	\$3,580	\$30,320

Zone C.

Description	FY 2020/21	FY 2021/22	FY 2022/23	FY 2023/24	FY 2024/25	4 Year Total
Repair and/or refurbish sound wall improvements		\$5,000	\$0	\$0	\$0	\$5,000
Replace, repair, renovate and/or refurbish plants, landscape & related materials		\$5,000	\$5,000	\$6,000	\$6,000	\$22,000
Replace or upgrade irrigation controller	\$10,000	\$0	\$0	\$0	\$0	\$0
Total Zone C Expenditures	\$10,000	\$10,000	\$5,000	\$6,000	\$6,000	\$27,000

Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAPS

The Assessment Diagrams for the District have previously been submitted to the City Clerk in the format required under the Act and are, by reference, made part of this Report. The boundary maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a rendering of the District and Zone Boundaries are presented herein.

APPENDIX B — 2020/21 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

Due to the size of the Assessment Roll, a listing of parcels to be assessed within this District, along with the proposed assessment amounts, shall be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways including public greenbelts and parkways; utility rights-of-ways; common areas; landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2020/21. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2020/21 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 20-147

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, INITIATING PROCEEDINGS FOR THE ENGINEER'S LEVY OF ASSESSMENTS FOR THE JOHNSON RANCH LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021, PURSUANT TO THE PROVISIONS OF PART 2 OF DIVISION 15 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Johnson Ranch Landscaping and Lighting District (hereafter referred to as the "District") pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the "Act"), that provides for levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of street lighting, landscaping, and all appurtenant facilities and operations related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer") for the purpose of assisting with the establishment of the assessments, the annexation of territory, and to prepare and file an Engineer's Annual Levy Report (hereinafter referred to as the "Engineer's Report") with the City Clerk in accordance with the act, and in accordance with the California Constitution, Articles XIII C and XIII D;

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE JOHNSON RANCH LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Engineer's Report: The City Council hereby orders Willdan Financial Services to prepare the Engineer's Report concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22622* of the Act.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: certain landscaping and open space areas, including floodway and stream course areas within the open space and all appurtenant facilities related thereto within the District. The Engineer's Report describes all new improvements or substantial changes in existing improvements.

RESOLUTION NO. 20-148

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, DECLARING ITS INTENTION TO LEVY ANNUAL ASSESSMENTS FOR THE JOHNSON RANCH LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Johnson Ranch Landscaping and Lighting District (hereafter referred to as the “District”), and initiated proceedings for Fiscal Year 2020/2021, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the “Act”) that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of all improvements and facilities related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services for the purpose of assisting with the Annual Levy of the District, and to prepare and file a report with the City Clerk in accordance with the Act; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE JOHNSON RANCH LANDSCAPING AND LIGHTING DISTRICT, PURSUANT TO CHAPTER 3, SECTION 22624 OF THE ACT, AS FOLLOWS:

Section 1 Intention: The City Council hereby declares that it is its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay the annual costs of the improvements.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: certain landscaping and open space areas, including floodway and stream course areas within the open space and all appurtenant facilities related thereto within the District. The Engineer’s Report describes all new improvements or substantial changes in existing improvements.

Section 3 Boundaries and Designation: The boundaries of the District are described as the boundaries previously defined in the formation documents of the original District. The District generally includes the parcels within the area known as the Southeast Roseville Specific Plan. The District is known and designated as

“Johnson Ranch Landscaping and Lighting District”

Section 4 Proposed Assessment Amounts: The proposed assessments are outlined in the Engineer’s Annual Levy Report. District Assessments are calculated in accordance with the method of apportionment established for the District and do not exceed the assessment rates and applicable annual inflationary adjustment previously authorized by City Council and approved by the property owners in accordance with the provisions of the California State Constitution, Article XIID.

Section 5 Public Hearing(s): The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22626* of the Act.

Section 6 Notice: The City Clerk shall give notice of the time and place of the Public Hearing by causing the publishing of this Resolution once in a local newspaper not less than ten (10) days before the date of the hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices.

Section 7 Time and Place of Public Hearing: Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Wednesday, May 20, 2020 at 6:00 p.m.**, or as soon thereafter as feasible in the regular meeting chambers located at 311 Vernon Street, Roseville, California.

RESOLUTION NO. 20-149

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR PRELIMINARY APPROVAL OF THE ANNUAL LEVY REPORT FOR THE JOHNSON RANCH LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, the City Council has, by previous Resolutions, ordered the preparation of an Annual Levy Report (hereafter referred to as the “Report”) for the district known and designated as the Johnson Ranch Landscaping and Lighting District (hereafter referred to as the “District”), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereinafter referred to as the “Act”); and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter “Engineer”), for the purpose of assisting with the establishment of the assessments and to prepare and file an Engineer’s Annual Levy Report (hereafter referred to as the “Engineer’s Report”) with the City Clerk in accordance with the Act, and in accordance with the requirements of the California Constitution, Articles XIII C and XIII D; and,

WHEREAS, there has now been presented to this City Council the Engineer’s Report as required by *Chapter 1, Article 4, Section 22566* of said Act; and,

WHEREAS, this City Council has carefully examined and reviewed the Engineer’s Report as presented, and is preliminarily satisfied with the District, each and all of the budget items and documents as set forth therein, and is satisfied that the assessments, on a preliminary basis, have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within each Zone, as set forth in said Report; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE JOHNSON RANCH LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Engineer’s Report as presented, consists of the following:

- a. A Description of Improvements
- b. The Annual Budget (Costs and Expenses of Maintenance, Services, Operations and District Administration)
- c. The Assessment Roll containing the Fiscal Year 2020/2021 Levy for each Assessor Parcel within the District

Section 3 The Engineer's Report is hereby approved on a preliminary basis, and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 4 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Engineer's Report.

ENGINEER'S REPORT AFFIDAVIT

Establishment of Annual Rates and Charges for the:

Johnson Ranch
Landscaping and Lighting District

City of Roseville
Placer County, State of California

This Report describes the District and any relevant zones therein, including the improvements, budgets, parcels and assessments to be levied for Fiscal Year 2020/21 as they existed at the time of the passage of the Resolution of Intention. Reference is hereby made to the Placer County Assessor's maps for a detailed description of the lines and dimensions of parcels within the District. The undersigned respectfully submits the enclosed Report as directed by the City Council.

I. OVERVIEW

A. INTRODUCTION

The City of Roseville (“City”) annually levies and collects special assessments in order to maintain the improvements in the southeast section of the City of Roseville, known as Johnson Ranch Landscaping and Lighting District (“District”). The District was formed and is levied annual assessments pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code (the “Act”).

The Engineer’s Report (“Report”) describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2020 through June 30, 2021. The special benefit assessments are based on historical and estimated costs to maintain the District improvements. These assessments, which provide a direct and special benefit to properties within the District, will provide funding for the operation and maintenance of District improvements.

The District consists of five (5) zones of benefit, Zones A, B, C, D and E (individually the “Zone” and collectively the “Zones”). The improvements that benefit properties within each Zone and the costs to maintain and service those improvements are identified and budgeted separately by Zone. The total cost of landscape maintenance within a Zone is equitably spread among only the benefiting parcels.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (“APN”) by the Placer County Assessor’s Office. The Placer County Auditor/Controller uses Assessor’s Parcel Numbers and specific Tax Code Accounts, to identify on the County’s tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will by resolution, order the improvements to be made, if any, and confirm the levy and collection of assessments pursuant to the Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council defines the assessments to be applied to each parcel within the District and respective Zones for Fiscal Year (“FY”) 2020/21. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the FY 2020/21 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rates approved by the City Council.

B. COMPLIANCE WITH CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the Act and are in compliance with the substantive and procedural requirements of the California State Constitution Articles XIIC and XIID (“Articles XIIC and XIID”) and the provisions of the Proposition 218 Omnibus Implementation Act [Government Code Section 53750 and following] (the “Implementation Act”). Articles XIIC and XIID and the Implementation Act collectively are hereinafter referred to as “Proposition 218”.

Pursuant to the California Constitution Article XIID, Section 5, certain existing assessments are exempt from the substantive and procedural requirements of Article XIID Section 4 and property owner balloting for the assessments is not required until such time that the assessments are increased. Specifically, the City determined that all improvements and the annual assessments originally established for the District were part of the conditions of property development and approved by the original property owner (developer). As such, pursuant to Article XIID Section 5(b), all the property owners approved the existing District assessments at the time the assessments were created (originally imposed pursuant to a 100% landowner petition). Therefore, the pre-existing assessment amounts (the maximum assessment rates of Zones A, B, C & D identified in this Report) are exempt from the procedural requirements of Article XIID Section 4, provided the assessments are not increased above these previously approved maximum assessment rates.

In Fiscal Year 1999/00, the City initiated and conducted property owner protest ballot proceedings in accordance with Article XIID for Zone E in order to increase the assessment to cover additional costs for services. The proposed assessment increase presented to property owners included an annual inflationary factor of 3%. In Fiscal Year 1999/00 the maximum assessment rate was \$623.10 per acre. At the conclusion of the Public Hearing, all property owner ballots returned were tabulated and the City determine that a majority protest did not exist. The City Council then approved the increased assessment and the inflationary factor for maintaining the improvements within the District.

The District and all Zones therein have been formed pursuant to the Act. Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the Act.

C. DISTRICT BOUNDARIES

The District lies within a portion of the Southeast Roseville Specific Plan, which is located in the southeast section of the City of Roseville. The District is generally located east of I-80 on the south side of Douglas Boulevard. See Appendix A for a rendering of the District boundary map.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to a proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;

- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF THE IMPROVEMENTS AND BENEFITS

Zones A, B and C

Zones A, B and C of the District, by special benefit assessments, provide annual funding for the continual maintenance of certain landscaping, open space areas; including floodway and stream course areas as well as any the maintenance of bike trails. The specific locations of the floodways, stream courses and areas adjacent thereto to be maintained are described below:

- Parcel 70 - Floodway that feeds Cirby Creek and is located between Douglas Boulevard and Eureka Road. (7.76 acres) - Zone C
- Parcel 71 - Strap Ravine floodway between Douglas Boulevard and East Roseville Parkway. (3.38 acres) - Zone A
- Parcel 72 - Floodway between Roseville Parkway east to commercial development. (8.98 acres) - Zone C
- Parcel 73 - Recreational floodway in Strap Ravine between East Roseville Parkway and Sierra College Boulevard. (16.11 acres) - Zone A
- Parcels 74 & 75 - Recreational floodway that eventually feeds Linda Creek, beginning at Sierra College Boulevard then east to the Roseville City limits. (6.2 acres and 10.8 acres, respectively) - Zone B

Zone D

Zone D of the District, by special benefit assessments, provides annual funding for the costs of mitigation monitoring and costs to maintain landscaped open space areas within certain wetland / riparian area(s) to comply with a Section 404 Permit. The issuance of this Section 404 permit was a condition of the development of the Johnson Ranch East Project, which represents the parcels comprising Zone D.

Zone E

Zone E of the District, by special benefit assessments, provides annual funding for the maintenance of certain landscaping, bike trails and open space areas that include floodway and stream course areas and the costs of mitigation monitoring to comply with both a Section 404 Permit (Federal) and a 1603 Permit (State). The issuance of these permits was a condition of the development of Parcel 9. The specific locations of the floodway and stream courses to be maintained are described as:

- Parcel 76 - Streambed and floodway area located at Cirby Creek from the southwest side of Eureka Boulevard to the end of the Coker Development. (2.79 acres)

II. METHOD OF APPORTIONMENT

A. GENERAL

The Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements which include the construction, maintenance and servicing of public lights, landscaping and appurtenant facilities. The Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”

The formula used for calculating assessments in each Zone of the District therefore reflects the composition of the parcels, and the improvements and services provided, to fairly apportion the costs based on estimated benefit to each parcel.

B. PROPOSITION 218 BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments regarding Zone E, notably:

Article XIID Section 2d defines District as follows:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service”;

Article XIID Section 2i defines Special Benefit as follows:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4a defines proportional special benefit assessments as follows:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public

improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

The method of apportionment (method of assessment) set forth in the Report is based on the premise that each assessed property receives special benefits from the improvements within the District, and the assessment obligation for each parcel reflects that parcel’s proportional special benefits as compared to other properties that receive special benefits.

C. DESCRIPTION OF METHOD OF APPORTIONMENT

Pursuant to the Act, the costs of the District must be spread to each parcel based upon a benefit formula. Each assessable parcel in the District receives a direct and special benefit from the improvements in the District. The formula used to arrive at each parcel’s annual levy amount in each zone is as follows:

Zones A and B

Thirty percent (30%) of the total budgeted costs of Zones A & B are to be levied to floodway Parcel 82 (APN 458-020-001). The remaining Seventy percent (70%) of costs are then allocated equally on a per acre basis to all assessable parcels within these Zones. Acreage of common area parcels shall be apportioned to the remaining assessable parcels of a subdivision and/or parcel split(s) related to the creation of the common area parcel(s).

Zones C, D and E

The budgeted costs of Zones C, D and E are to be allocated equally on a per acre basis to all assessable parcels within each respective Zone. Acreage of common area parcels shall be apportioned to the remaining assessable parcels of a subdivision and/or parcel split(s) related to the creation of the common area parcel(s).

D. INFLATIONARY ADJUSTMENT FACTOR

For Zone E only, if the proposed assessment rate increases over the prior fiscal year’s maximum assessment rate by a percentage no greater than the 3%, then the proposed assessment rate is not considered an increase.

III. DISTRICT BUDGET

A. 2020/21 BUDGET

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Open Space – Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition of all open space landscaping, irrigation, drainage systems, lighting, floodplain improvements and appurtenant facilities (the “improvements”).

Mitigation Monitoring – Costs associated with monitoring certain impacts to riparian areas in or near the District under the terms of a Section 404 or 1603 permit. If zero, this line item will not be shown in the budget.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements. If zero, this line item will not be shown in the budget.

Maintenance - Bike Trails - Costs associated with the resurfacing of the Bike trail. If zero, this line item will not be shown in the budget.

Water Hyacinth Eradication – Costs associated with the eradication of the Water Hyacinth plant in the creek beds. If zero, this line item will not be shown in the budget.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year’s assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

Contract Administration – Open Space – Estimated costs of City staff to coordinate and oversee the maintenance contracts and non-contract maintenance of the open space areas of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's' Report.

Public Hearing Publishing Costs –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A "Replenishment" increases the levy in order to replenish the Operating Reserve. On the other hand, a "Use" of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Contribution for / (Use of) Rehab Reserve — A “Contribution” increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a “Use of” of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each Zone. The Balance to Levy represents the sum of the total District costs together with applicable adjustments related to the Reserve Fund replenishments or reductions and/or Capital Improvement Fund activity.

Parcel 82 Levy Recap – A recap of the cost breakdown between certain parcels. Thirty percent (30%) of the total budgeted costs of Zones A & B are to be levied to floodway Parcel 82 (APN 458-020-001). 70% of costs are to be assessed to the remaining parcels.

ASSESSMENT RATES:

APPLIED ASSESSMENT RATES

Number of Assessable Parcels - The total number of parcels within each Unit that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public rights-of-way or easements, common areas, and/or parcels within the boundaries of the District that currently do not benefit from the improvements due possibly to development restrictions.

Total Assessable Acres – Non-Parcel 82 Properties - The total number of acres within the Zones A and B that are to be assessed on an acreage basis for the current fiscal year; this acreage excludes Parcel 82.

Applied Assessment Rates - The assessment rates to be applied to the non-exempt parcels within the District for the current fiscal year.

Maximum Assessment Rates - The maximum assessment rates for current fiscal year.

Maximum Potential Assessment – The total amount that is expected to be assessed against all parcels within the District for the Current Fiscal Year.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2020 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2020 to December 31, 2020, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 20/21 Levy – This amount is added to the levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2020 (the beginning of the Fiscal Year) through December 31, 2020. If zero, this line item may not be shown in the budget.

Use for FY 20/21 Expenses – The amount of the Operating Reserve to be used to fund FY 20/21 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2020 (the beginning of the Fiscal Year) through December 31, 2020. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2021 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2021. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2020 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2020. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 20/21 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 20/21 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same Zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2021 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2021. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

For each Zone showing a projected ending Rehabilitation Reserve balance or projected FY 2020/21 expenditures for Rehabilitation Reserve Project, a five-year Capital Improvement Plan showing the projected expenditures related to the rehabilitation, restoration and/or replacement of District improvements and other allowable costs, is shown below.

Description	FY 2020/21	FY 2021/22	FY 2022/23	FY 2023/24	FY 2024/25	4 Year Total
General open space, creek rehab - Zone A	\$0	\$800	\$0	\$0	\$0	\$800
General open space, creek rehab - Zone B	\$0	\$250	\$0	\$0	\$0	\$250
General open space, creek rehab - Zone C	\$0	\$800	\$0	\$0	\$0	\$800
General open space, creek rehab - Zone D	\$0	\$150	\$0	\$0	\$0	\$150
General open space, creek rehab - Zone E	\$0	\$0	\$0	\$0	\$0	\$0
Total Projected Expenditures	\$0	\$2,000	\$0	\$0	\$0	\$2,000

Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the District or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same Zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The Assessment Diagrams for the District have previously been submitted to the Clerk of the City in the format required under the Act and are, by reference, made part of this Report. The boundary maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a one-page rendering of the District's Boundaries is presented herein.

APPENDIX B — 2020/21 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, may be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways, including public greenbelts and parkways; utility rights-of-ways; small parcels vacated by the County, bifurcated lots, and other property that cannot be developed, excepting common area parcels. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2020/21. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2020/21 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 20-150

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, INITIATING PROCEEDINGS FOR THE ENGINEER'S LEVY OF ASSESSMENTS FOR THE NORTH CENTRAL ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021, PURSUANT TO THE PROVISIONS OF PART 2 OF DIVISION 15 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the North Central Roseville Specific Plan Landscaping and Lighting District (hereafter referred to as the "District") pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the "Act"), that provides for levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of street lighting, landscaping, and all appurtenant facilities and operations related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer") for the purpose of assisting with the establishment of the assessments, the annexation of territory, and to prepare and file an Engineer's Annual Levy Report (hereinafter referred to as the "Engineer's Report") with the City Clerk in accordance with the act, and in accordance with the California Constitution, Articles XIII C and XIII D;

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE NORTH CENTRAL ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Engineer's Report: The City Council hereby orders Willdan Financial Services to prepare the Engineer's Report concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22622* of the Act.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: the maintenance and operation of and the furnishing of services, materials or improvements for certain landscaped areas including open space areas, parkways, slopes, and medians and other public improvements within the street right of way areas, including, but not limited to trees, shrubs, turf and other ornamental vegetation, drainage and irrigation systems, and other appurtenant facilities. The Engineer's Report describes all new improvements or substantial changes in existing improvements.

RESOLUTION NO. 20-151

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, DECLARING ITS INTENTION TO LEVY ANNUAL ASSESSMENTS FOR THE NORTH CENTRAL ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the North Central Roseville Specific Plan Landscaping and Lighting District (hereafter referred to as the “District”), and initiated proceedings for Fiscal Year 2020/2021, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the “Act”) that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of all improvements and facilities related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services for the purpose of assisting with the Annual Levy of the District, and to prepare and file an Engineer’s Annual Levy Report (hereinafter referred to as the “Engineer’s Report”) with the City Clerk in accordance with the Act; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE NORTH CENTRAL ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, PURSUANT TO CHAPTER 3, SECTION 22624 OF THE ACT, AS FOLLOWS:

Section 1 Intention: The City Council hereby declares that it is its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay the annual costs of the improvements.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: the maintenance and operation of and the furnishing of services, materials or improvements for certain landscaped areas including open space areas, parkways, slopes, and medians and other public improvements within the street right of way areas, including, but not limited to trees, shrubs, turf and other ornamental vegetation, drainage and irrigation systems, and other appurtenant facilities. The Engineer’s Report describes all new improvements or substantial changes in existing improvements.

Section 3 Boundaries and Designation: The boundaries of the District are described as the boundaries previously defined in the formation documents of the original District. The District generally includes the parcels within the area known as the North Central Roseville Specific Plan. The District is known and designated as

“North Central Roseville Specific Plan Landscaping and Lighting District”

Section 4 Proposed Assessment Amounts: The proposed assessments are outlined in the Engineer’s Annual Levy Report. District Assessments are calculated in accordance with the method of apportionment established for the District and do not exceed the assessment rates and annual inflationary adjustment previously authorized by City Council and approved by the property owners in accordance with the provisions of the California State Constitution, Article XIID.

Section 5 Public Hearing(s): The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22626* of the Act.

Section 6 Notice: The City Clerk shall give notice of the time and place of the Public Hearing by causing the publishing of this Resolution once in a local newspaper not less than ten (10) days before the date of the hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices.

Section 7 Time and Place of Public Hearing: Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Wednesday, May 20, 2020 at 6:00 p.m.**, or as soon thereafter as feasible in the regular meeting chambers located at 311 Vernon Street, Roseville, California.

RESOLUTION NO. 20-152

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR PRELIMINARY APPROVAL OF THE ENGINEER'S ANNUAL LEVY REPORT FOR THE NORTH CENTRAL ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, the City Council has, by previous Resolutions, ordered the preparation of an Engineer's Annual Levy Report (hereafter referred to as the "Engineer's Report") for the district known and designated as the North Central Roseville Specific Plan Landscaping and Lighting District (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereinafter referred to as the "Act"); and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer"), for the purpose of assisting with the establishment of the assessments and to prepare and file an Engineer's Report with the City Clerk in accordance with the Act, and in accordance with the requirements of the California Constitution, Articles XIIC and XIID; and,

WHEREAS, there has now been presented to this City Council the Engineer's Report as required by *Chapter 1, Article 4, Section 22566* of said Act; and,

WHEREAS, this City Council has carefully examined and reviewed the Engineer's Report as presented, and is preliminarily satisfied with the District, each and all of the budget items and documents as set forth therein, and is satisfied that the assessments, on a preliminary basis, have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within each Zone, as set forth in said Report; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE NORTH CENTRAL ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Engineer's Report as presented, consists of the following:

- a. A Description of Improvements
- b. The Annual Budget (Costs and Expenses of Maintenance, Services, Operations and District Administration)
- c. The Assessment Roll containing the Fiscal Year 2020/2021 Levy for each Assessor Parcel within the District

Section 3 The Engineer's Report is hereby approved on a preliminary basis, and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 4 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Engineer's Report.

I. OVERVIEW

A. INTRODUCTION

The City of Roseville (“City”) annually levies and collects special assessments in order to maintain the improvements within the existing North Central Roseville Specific Plan Landscaping and Lighting District (“District”) within the City. The District was formed in 1990. The District was formed and is levied annual assessments pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code (the “Act”).

This Engineer’s Annual Levy Report for Fiscal Year 2020/21 (“Report”) describes the District, any annexations, changes to the District, and the proposed assessments for the period of July 1, 2020 through June 30, 2021. The maintenance, operation and servicing of the improvements associated with specific areas of the City that provide a special benefit to the properties in that area are identified as Zones. The costs of the improvements and services are identified and budgeted separately for each Zone and each parcel within a Zone is assessed proportionately for only those improvements and services that are a direct and special benefit to the properties within the Zone. The budgets and assessments are based on the estimated cost (considering historical costs) to maintain the District improvements that provide a direct and special benefit to properties within the District.

The District consists of four landscaping benefit Zones:

- District Wide Benefit Zone
- Local Benefit Zone
- Zone F
- Zone G

In 2003, the City initiated and conducted property owner protest ballot proceedings, in accordance with the Act and Proposition 218, for the territory now known as Zones F & G. After the results of the ballots were tabulated, the City determined that a majority protest did not exist. The City then approved the annexation of Zones F and G, the maximum assessment rates and annual inflationary adjustment factor.

In 2004, the City initiated and conducted property owner protest ballot proceedings, in accordance with the Act and Proposition 218, to reengineer Zones A, B, C, D & E and approve the maximum assessment rates and annual inflationary adjustment factor. After the results of the ballots were tabulated, the City determined that a majority protest did not exist. The City then approved the Engineer’s Annual Levy Report for FY 2004/05, which reconstituted the reengineered zones into the respective District Wide Benefit Zone or Local Benefit Zone.

Zones A, B, C, D and E were reengineered in order to more accurately identify the Zones and areas of special benefit within this portion of the District. These zones were combined into two new Zones based primarily on level of service, similarity of improvement types, and the proximity to improvements.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (“APN”) by the Placer County Assessor’s Office. The Placer County Auditor/Controller uses Assessor’s Parcel Numbers and specific Tax Code Accounts, to identify on the County’s tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will by resolution, order the improvements to be made, if any, and confirm the levy and collection of assessments pursuant to the Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council defines the assessments to be applied to each parcel within the District and respective Zones for Fiscal Year (“FY”) 2020/21. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the FY 2020/21 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rates approved by the City Council.

B. COMPLIANCE WITH CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the Act and are in compliance with the substantive and procedural requirements of the California State Constitution Articles XIIC and XIID (“Articles XIIC and XIID”) and the provisions of the Proposition 218 Omnibus Implementation Act [Government Code Section 53750 and following] (the “Implementation Act”). Articles XIIC and XIID and the Implementation Act collectively are hereinafter referred to as “Proposition 218”.

In compliance with the provisions of Proposition 218, property owner ballot proceedings have been conducted for all Zones within the District; such proceedings approved and confirmed the Maximum Assessments and the Inflationary Adjustment Factor as described in this Report.

The District and all Zones therein have been formed pursuant to the Act. Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept

property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls.

C. DESCRIPTION OF DISTRICT BOUNDARIES

The District is located north of downtown Roseville between Interstate 80 and Washington Boulevard and generally encompasses the area within the North Central Roseville Specific Plan ("NCRSP") and two small residential developments in close proximity to the NCRSP near the corner of Diamond Oaks Road and Washington Boulevard. See Appendix A for District boundary map.

District Wide Zone This Zone includes all assessable property within the District with the exception of Zone F and Zone G.

Local Benefit Zone This Zone includes all single family residential property within the District with the exception of Zone F and Zone G.

Zone F This Zone, which comprises the Diamond Oaks Unit No. 10 development, was created on January 8, 2003 through Resolution 03-2 and was first levied in FY 2003/04. Zone F was comprised of Assessor Parcel Number ("APN") 015-020-040 prior to being subdivided into 39 residential lots.

Zone G This Zone, which comprises the Diamond Oaks Unit No. 14 development, was created on May 28, 2003 through Resolution 03-220 and was first levied in FY 2003/04. Zone G was comprised of APNs 017-041-034 & 015-020-006 prior to being subdivided into 76 residential lots and 1 non-residential parcel.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to a proposed District, the Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.

- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.

- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF THE IMPROVEMENTS AND MAINTENANCE

The District provides and ensures the continued maintenance, servicing, administration and operation of various landscaping and lighting improvements, and associated appurtenances that benefit parcels within the District. Services provided include all necessary service, operations, administration and maintenance required to keep the improvements in a healthy, vigorous, and satisfactory condition.

Specific improvements include all ground cover, turf, shrubs, trees, gardens, play areas and play equipment, picnic areas, bike paths, pedestrian trails, walls and fences, park maintenance facilities, irrigation and drainage systems, graffiti removal, and associated appurtenances. Improvements in each Zone include:

District Wide Zone This Zone provides for the maintenance of landscaping, fences, sound walls and other improvements within the arterial parkway right of ways, also described as scenic corridors, including but not limited to Roseville Parkway, Pleasant Grove Boulevard, Harding Boulevard and the east side of Washington Boulevard, pedestrian and bike pathways.

Local Benefit Zone This Zone provides for the maintenance of landscaping and other improvements within the local street right of ways. This Zone is primarily a combination of the old Zone C and Zone D, which provided similar maintenance.

Zone F This Zone provides for the maintenance of parkway and perimeter landscaping and block wall adjacent to the development on the west side of Diamond Oaks Road; Parkway and perimeter landscaping, bike trails, block wall and wood fence adjacent to the development on the east side of Washington Boulevard; Open Space designated as Lot “B”, and; Landscaping within Lot “C”, “E” and “F” within the Diamond Oaks Unit No. 10 project.

Zone G This Zone provides for the maintenance of parkway and perimeter landscaping, bike path and masonry sound wall adjacent to the development on the south side of Pleasant Grove Boulevard; maintenance of parkway and perimeter

landscaping, bike path and masonry sound wall adjacent to the development on the west side of Washington Boulevard from Pleasant Grove Boulevard to Emerald Oak Road; maintenance of the masonry sound wall on the western perimeter of the development; installation and maintenance of perimeter landscaping on the west side of the development located on Open Space Parcel C between Emerald Oak Road and the masonry sound wall adjacent to the railroad right of way; and maintenance of Open Space, cobble swale (Lot "B") and post and cable fencing for Lots "A", "B", and "C" within the Diamond Oaks Unit No. 14 project.

All assessable parcels identified as being within each Zone, share in both the cost and the benefits of the improvements. The costs associated with the improvements are equitably spread among all benefiting parcels within each Zone. Only parcels that receive direct and special benefit from the improvements are assessed, and each parcel is assessed in proportion to the estimated benefit received. The funds collected are to be dispersed and used for only the services and operation provided each Zone of the District.

II. METHOD OF APPORTIONMENT

A. GENERAL

The Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements which include the construction, maintenance and servicing of public lights, landscaping and appurtenant facilities. The Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”

The formula used for calculating assessments in each Zone of the District therefore reflects the composition of the parcels, and the improvements and services provided, to fairly apportion the costs based on estimated benefit to each parcel.

B. SPECIAL BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments, notably:

Article XIID Section 2(d) defines District as follows:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service”;

Article XIID Section 2(i) defines Special Benefit as follows:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4(a) defines proportional special benefit assessments as follows:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be

imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

This District was formed to establish and provide for the improvements that enhance the presentation of the surrounding properties and developments. These improvements will directly benefit the parcels to be assessed within the District. The assessments and method of apportionment is based on the premise that the assessments will be used to construct and install landscape and lighting improvements within the District as well as provide for the annual maintenance of those improvements, and the assessment revenues generated by District will be used solely for such purposes.

The City has initiated and conducted property owner protest ballot proceedings in accordance with the Act and Proposition 218 for all Zones within the District. Each of the proposed improvements; the associated costs and assessments have been carefully reviewed, identified and allocated based on special benefit pursuant to the provisions of Article XIID and the Act. All improvements associated with the Zones have been identified as necessary, required and/or desired for the orderly development of the properties to their full potential. As such, these improvements would be necessary and required of individual property owners for the development of such properties and the ongoing operation, servicing and maintenance of these improvements would be the financial obligation of those properties. Therefore, the improvements and the annual costs of ensuring the maintenance and operation of the improvements are of direct and special benefit to the properties.

The method of apportionment (method of assessment) is based on the premise that each assessed parcel within these Zones receives special benefit from the improvements. The desirability and security of properties is enhanced by well-maintained landscaping in close proximity to those properties.

The special benefits associated with all landscaping improvements are specifically:

- Enhanced desirability of properties through association with the improvements.
- Improved aesthetic appeal of properties providing a positive representation of the area and properties.
- Enhanced adaptation of the urban environment within the natural environment from adequate green space and landscaping.
- Environmental enhancement through improved erosion resistance, dust and debris control, and fire prevention.
- Increased sense of pride in ownership of property within the Zones resulting from well-maintained improvements associated with the properties.
- Enhanced quality of life through well-maintained green belts and landscaped areas.

- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the Zones through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels by moderating temperatures, providing oxygenation and attenuating noise.

All of the preceding special benefits allow the property to be developed for the enjoyment of the property owners and contribute to a specific enhancement and desirability of each of the assessed parcels within the Zones.

The improvements are for the special benefit, enhancement and use of properties within the Zones. Although the improvements include public easements, rights-of-way, streets and other amenities available or visible to the public at large, the construction and installation of these improvements are only necessary for the development of properties within the Zones and are not required nor necessarily desired by any properties or developments outside the Zone's boundaries. Therefore, any public access or use of the improvements by others is incidental and there is no measurable general benefit to properties outside the Zones or to the public at large. In making this determination, it should be noted that all parkway and perimeter landscaping within the City is both funded and maintained by a special district, individual property owners or through some type of association.

C. DESCRIPTION OF THE METHOD OF APPORTIONMENT

Pursuant to the Act, the costs of each Zone may be apportioned by any formula or method that fairly distributes the net amount to be assessed, among all assessable parcels within the Zone in proportion to the estimated special benefits to be received by each such parcel from the improvements. The special benefit formula used for each Zone should reflect the composition of the parcels, and the improvements and services provided, to fairly proportion the Zone's costs based on estimated special benefit to each parcel within the Zone. All assessable parcels within each Zone shall receive a direct special benefit from the services and improvements provided by the Zone.

Considering the composition of the parcels within the Zone, each parcel is assigned an Equivalent Dwelling Unit ("EDU"), which reflects each parcel's estimated special benefit from the improvements as compared to other parcels within the Zone. Because all assessable parcels within each Zone are considered to benefit from the Zone improvements on an EDU basis, the amounts to levy to each Zone is then spread to each assessable parcel within the Zone on an EDU method as shown in the table below. Acreage of common area parcels shall be apportioned to the remaining assessable parcels of a subdivision and/or parcel split(s) related to the creation of the common area parcel(s).

The following formulas are used to calculate the assessment for each parcel:

ASSIGNED EDU	PROPERTY CLASS
1.0 per unit	Single-Family Residential Parcels
0.6 per unit	Multi-Family Residential Parcels
7.0 per acre	Non-Residential Parcels

For each Zone, the Applied Assessment Rate per Equivalent Dwelling Unit for each parcel in the Zone is the result of dividing the total Balance to Levy for each Zone, by the sum of the Zone EDU's for the fiscal year. This Applied Assessment Rate is multiplied by each parcel's individual EDU to determine the parcel's levy amount. The assessment cannot be greater than the current maximum assessment rate, as adjusted for the inflation factor.

$$\text{Total Balance to Levy} / \text{Total EDU} = \text{Rate per EDU}$$

$$\text{Parcel EDU} \times \text{Rate per EDU} = \text{Parcel Levy Amount}$$

D. INFLATIONARY ADJUSTMENT FACTOR

Any new or increase in assessments require certain noticing and meeting requirements by law. Prior to the passage of Proposition 218, legislative changes in the Ralph M. Brown Act (the "Brown Act") defined a new or increased assessment to exclude certain conditions. These conditions included any assessment that does not exceed an assessment formula or range of assessments previously adopted by the agency or approved by the voters in the area where the assessment is imposed. This definition and conditions were later confirmed through Senate Bill 919 (the implementing legislation for Proposition 218).

The purpose of establishing an assessment range formula is to provide for reasonable increases and inflationary adjustment to annual assessments without requiring costly noticing and mailing procedures, which could add to the District costs and assessments. As part of the District formation, balloting of property owners is required, pursuant to Proposition 218. The property owner ballots included an Assessment to be approved, as well as the approval of an assessment range formula.

The assessment range formula shall be applied to all future assessments within the District. Generally, if the proposed annual assessment (levy per unit or rate) for the current fiscal year is less than or equals to the "Maximum Assessment" (or "Adjusted Maximum Assessment"), then the proposed annual assessment is not considered an increased assessment. The Maximum Assessment is equal to the initial Assessment approved by property owners adjusted annually by the following criteria:

1. Beginning in the second fiscal year and each fiscal year thereafter, the Maximum Assessment will be calculated.
2. The new Adjusted Maximum Assessment for the year represents the prior year's approved Maximum Assessment increased by three percent (3.0%).

The Maximum Assessment is adjusted annually and is calculated independent of the District's annual budget and proposed annual assessment. Any proposed annual assessment less than or equal to this Maximum Assessment is not considered an increased assessment, even if the proposed assessment is greater than the assessment applied in the prior fiscal year.

The approved base year maximum assessment rates and annual inflationary adjustment factors for all Zones are shown in the table below:

Zone	Year of Approved Maximum Rate and Annual Inflator (Base Year)	Maximum Assessment Rate per EDU (Base Year)	Annual Inflationary Adjustment Factor
District-Wide Benefit Zone	FY 2004/05	\$40.82	3.00%
Local Benefit Zone	FY 2004/05	\$43.92	3.00%
Zone F	FY 2003/04	\$481.35	3.00%
Zone G	FY 2003/04	\$264.22	3.00%

III. DISTRICT BUDGET

A. 2020/21 BUDGET

DESCRIPTION	District-Wide Benefit Zone Fund 2010	Local Benefit Zone Fund 2011	ZONE F (Diamond Oaks No. 10) Fund 2012	ZONE G (Diamond Oaks No. 14) Fund 2013
<u>DIRECT COSTS</u>				
Contract Maintenance - Landscaping	\$185,550.00	\$67,005.00	\$14,650.00	\$3,785.00

Ending Rehab Reserve Balance 6-30-2021 (est.)	\$54,050.00	\$105,670.23	\$15,084.48	\$37,060.01

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping - Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping improvements, irrigation and related drainage systems, as well as maintenance of appurtenant facilities (the “improvements”).

Repair & Maintenance - Landscaping/Parks - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc. If zero, this line item may not be shown in the budget.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Maintenance – Bike Trails – Costs to perform the necessary maintenance of the bike trails within the District. If zero, this line item may not be shown in the budget.

Maintenance – Open Space – Costs to perform the necessary maintenance of the open space areas within the District. If zero, this line item may not be shown in the budget.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year’s assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer’s Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park’s Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department’s estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer’s Report.

Public Hearing Publishing Costs –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A “Replenishment” increases the levy in order to replenish the Operating Reserve. On the other hand, a “Use” of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Contribution for / (Use of) Rehab Reserve — A “Contribution” increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a “Use of” of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected in the District through assessments for the current fiscal year. The Balance to Levy

represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

APPLIED ASSESSMENT RATES

Total Assessable Single-Family Units - The total number of assessable single-family units within the District for the current fiscal year. Since each single family residential parcel is in both the District-Wide Benefit Zone and the Local Benefit Zone, the single-family EDUs are only added once to arrive at the "Total Equivalent Dwelling Units"

Total Assessable Multi-Family Units - The total number of assessable multi-family units within the District for the current fiscal year.

Total Assessable Non-Residential Acres - The total assessable non-residential acres within the District for the current fiscal year.

Total Equivalent Dwelling Units ("EDUs") - Total assessable EDUs within the District for the current fiscal year.

Applied Assessment Rates per EDU - The assessment rates per EDU to be applied to the non-exempt parcels within the applicable Zone for the current fiscal year.

Maximum Assessment Rates per EDU - The maximum assessment rates per EDU to for the parcels of within the applicable Zone for the current fiscal year.

Potential Maximum Assessment Per Zone – The total amount that can be assessed against all parcels within each Zone for the current fiscal year based upon the expected number of parcels to be assessed.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2020 - The District's anticipated beginning balance of cash and receivables net of any unpaid prior year obligations. These beginning balances shall be used to fund the District's expenditures from July 1, 2020 to December 31, 2020, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 20/21 Levy – This amount is added to the levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2020 (the beginning of the Fiscal Year) through December 31, 2020. If zero, this line item may not be shown in the budget.

Use for FY 20/21 Expenses – The amount of the Operating Reserve to be used to fund FY 20/21 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2020 (the beginning of the Fiscal Year) through December 31, 2020. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2021 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2021. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2020 — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2020. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 20/21 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or

upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 20/21 Rehab Projects — The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2021 — The projected balance of funds in the Rehabilitation Reserve as of June 30, 2021. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment. Should the District have no Rehabilitation Reserve or related activity, the Rehabilitation Reserve information may not be presented in the Report.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

For each Zone showing a projected ending Rehabilitation Reserve balance or projected FY 2020/21 expenditures for Rehabilitation Reserve Project, a five-year Capital Improvement Plan showing the projected expenditures related to the rehabilitation, restoration and/or replacement of District improvements and other allowable costs, is shown below.

District Wide Zone

Description	FY 2020/21	FY 2021/22	FY 2022/23	FY 2023/24	FY 2024/25	4 Year Total
Replace, repair, renovate and/or refurbish plants, landscape, irrigation and related materials	\$10,000	\$10,000	\$10,000	\$10,000	\$10,000	\$40,000
Grid tree pruning, removal and replacement of declining trees	\$13,000	\$12,500	\$12,500	\$12,500	\$12,500	\$50,000
Total District Wide Zone Expenditures	\$23,000	\$22,500	\$22,500	\$22,500	\$22,500	\$90,000

Local Benefit Zone

Description	FY 2020/21	FY 2021/22	FY 2022/23	FY 2023/24	FY 2024/25	4 Year Total
Replace, repair, renovate and/or refurbish plants, landscape, irrigation, and related materials	\$7,500	\$7,500	\$8,200	\$7,500	\$7,500	\$30,700
Repair, replace and/or refurbish sound wall improvements	\$0	\$0	\$5,000	\$0	\$0	\$5,000
Grid tree pruning, removal and replacement of declining trees	\$2,500	\$17,500	\$17,500	\$17,500	\$17,500	\$70,000
Total Local Benefit Zone Expenditures	\$10,000	\$25,000	\$30,700	\$25,000	\$25,000	\$105,700

Zone F

Description	FY 2020/21	FY 2021/22	FY 2022/23	FY 2023/24	FY 2024/25	4 Year Total
Replace, repair, renovate and/or refurbish plants, landscape, irrigation and related materials	\$4,000	\$3,500	\$3,500	\$3,500	\$3,500	\$14,000
Grid tree pruning, removal and replacement of declining trees	\$675	\$675	\$675	\$675	\$675	\$2,700
Total Zone F Expenditures	\$4,675	\$4,175	\$4,175	\$4,175	\$4,175	\$16,700

Zone G

Description	FY 2020/21	FY 2021/22	FY 2022/23	FY 2023/24	FY 2024/25	4 Year Total
Replace, repair, renovate and/or refurbish plants, landscape, irrigation and related materials	\$10,000	\$10,000	\$7,500	\$7,500	\$7,500	\$32,500
Grid tree pruning, removal and replacement of declining trees	\$2,575	\$1,140	\$1,140	\$1,140	\$1,140	\$4,560
Total Zone G Expenditures	\$12,575	\$11,140	\$8,640	\$8,640	\$8,640	\$37,060

Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map for the District has previously been submitted to the Clerk of the City in the format required under the Act and is, by reference, hereby made part of this Report. These District Boundary Maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a rendering of the District's Boundaries is presented herein.

APPENDIX B — 2020/21 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

Due to the size of the Assessment Roll, a listing of parcels to be assessed within this District, along with the proposed assessment amounts, shall be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways including public greenbelts and parkways; utility rights-of-ways; common areas; landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2020/21. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2020/21 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.
