RESOLUTION NO. 20-153

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, INITIATING PROCEEDINGS FOR THE ANNUAL LEVY OF ASSESSMENTS FOR THE NORTHWEST ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021, PURSUANT TO THE PROVISIONS OF PART 2 OF DIVISION 15 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Northwest Roseville Specific Plan Landscaping and Lighting District (hereafter referred to as the “District”) pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the “Act”), that provides for levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of street lighting, landscaping, and all appurtenant facilities and operations related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter “Engineer”) for the purpose of assisting with the establishment of the assessments, the annexation of territory, and to prepare and file an Engineer’s Annual Levy Report (hereinafter referred to as the “Engineer’s Report”) with the City Clerk in accordance with the act, and in accordance with the California Constitution, Articles XIII C and XIII D;

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE NORTHWEST ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Engineer’s Report: The City Council hereby orders Willdan Financial Services to prepare the Engineer’s Report concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22622* of the Act.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include turf, ground cover, shrubs and trees, irrigation systems, drainage systems, natural areas, open space areas, public pedestrian paths, entry monuments, fencing, lighting systems, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer’s Report describes all new improvements or substantial changes in existing improvements.

RESOLUTION NO. 20-154

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, DECLARING ITS INTENTION TO LEVY ANNUAL ASSESSMENTS FOR THE NORTHWEST ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Northwest Roseville Specific Plan Landscaping and Lighting District (hereafter referred to as the “District”), and initiated proceedings for Fiscal Year 2020/2021, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the “Act”) that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of all improvements and facilities related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services for the purpose of assisting with the Annual Levy of the District, and to prepare and file a report with the City Clerk in accordance with the Act; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE NORTHWEST ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, PURSUANT TO CHAPTER 3, SECTION 22624 OF THE ACT, AS FOLLOWS:

Section 1 Intention: The City Council hereby declares that it is its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay the annual costs of the improvements.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include turf, ground cover, shrubs and trees, irrigation systems, drainage systems, natural areas, open space areas, public pedestrian paths, entry monuments, fencing, lighting systems, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer’s Report describes all new improvements or substantial changes in existing improvements.

Section 3 Boundaries and Designation: The boundaries of the District are described as the boundaries previously defined in the formation documents of the District. The District generally includes the parcels within the area known as the Northwest Roseville Specific Plan. The District is known and designated as

“Northwest Roseville Specific Plan Landscaping and Lighting District”

Section 4 Proposed Assessment Amounts: The proposed assessments are outlined in the Engineer’s Annual Levy Report. District Assessments are calculated in accordance with the method of apportionment established for the District and do not exceed the assessment rates.

Section 5 Public Hearing(s): The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22626* of the Act.

Section 6 Notice: The City Clerk shall give notice of the time and place of the Public Hearing by causing the publishing of this Resolution once in a local newspaper not less than ten (10) days before the date of the hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices.

Section 7 Time and Place of Public Hearing: Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Wednesday, May 20, 2020 at 6:00 p.m.**, or as soon thereafter as feasible in the regular meeting chambers located at 311 Vernon Street, Roseville, California.

RESOLUTION NO. 20-155

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR PRELIMINARY APPROVAL OF THE ENGINEER'S LEVY REPORT FOR THE NORTHWEST ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, the City Council has, by previous Resolutions, ordered the preparation of an Engineer's Levy Report (hereafter referred to as the "Engineer's Report") for the district known and designated as the Northwest Roseville Specific Plan Landscaping and Lighting District (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereinafter referred to as the "Act"); and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer"), for the purpose of assisting with the establishment of the assessments and to prepare and file an Engineer's Report with the City Clerk in accordance with the Act, and in accordance with the requirements of the California Constitution, Articles XIIC and XIID; and,

WHEREAS, there has now been presented to this City Council the Engineer's Report as required by *Chapter 1, Article 4, Section 22566* of said Act; and,

WHEREAS, this City Council has carefully examined and reviewed the Engineer's Report as presented, and is preliminarily satisfied with the District, each and all of the budget items and documents as set forth therein, and is satisfied that the assessments, on a preliminary basis, have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within each Zone, as set forth in said Report; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE NORTHWEST ROSEVILLE SPECIFIC PLAN LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 that the Engineer's Report as presented, consists of the following:

- a. A Description of Improvements
- b. The Annual Budget (Costs and Expenses of Maintenance, Services, Operations and District Administration)
- c. The Assessment Roll containing the Fiscal Year 2020/2021 Levy for each Assessor Parcel within the District

Section 3 The Engineer's Report is hereby approved on a preliminary basis, and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 4 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Engineer's Report.

ENGINEER'S REPORT AFFIDAVIT

Establishment of Annual Rates and Charges for the:

Northwest Roseville Specific Plan
Landscaping and Lighting District

City of Roseville
Placer County, State of California

This Report describes the District and any relevant zones therein, including the improvements, budgets, parcels and assessments to be levied for Fiscal Year 2020/21 as they existed at the time of the passage of the Resolution of Intention. Reference is hereby made to the Placer County Assessor's maps for a detailed description of the lines and dimensions of parcels within the District. The undersigned respectfully submits the enclosed Report as directed by the City Council.

I. OVERVIEW

A. INTRODUCTION

The City of Roseville (“City”) annually levies and collects special assessments in order to provide and maintain the improvements within the Northwest Roseville Specific Plan Area, known as Northwest Roseville Specific Plan Landscaping and Lighting District (“District”) within the City. The District was formed and is levied annual assessments pursuant to *the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code* (the “1972 Act” or the “Act”).

This Engineer’s Levy Report (“Report”) describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2020 through June 30, 2021. The assessments are based on historical and estimated costs to maintain the improvements that provide a direct and special benefit to properties within the District. The District consists of two (2) benefit zones (“Zones”). The improvements that benefit properties within each Zone and the costs of those improvements are identified and budgeted separately. Each parcel is assessed proportionately for the estimated costs of the parcel’s respective Zone.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number by the Placer County Assessor’s Office. The Placer County Auditor/Controller (“County Auditor/Controller”) uses Assessor’s Parcel Numbers and specific Tax Code Accounts, to identify on the County’s tax roll, properties assessed for special district benefit assessments.

Following consideration of public comments at a public hearing, and a final review of the Report, the City Council may order amendments to the Report or confirm the Report as submitted. After final approval of the Report, and confirmation of the assessments, the assessment information will be submitted to the County Auditor/Controller. The County Auditor/Controller will include the assessments on the property tax roll for fiscal year 2020/21.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved by the City Council.

B. COMPLIANCE WITH CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the 1972 Act and are in compliance with the provisions of the *California Constitution Article XIID* (Proposition 218). Pursuant to the *California Constitution Article XIID* (“*Article XIID*”) *Section 5*, certain existing assessments are exempt from the substantive and procedural requirements of *Article XIID Section 4* and property owner balloting for the assessments is not required until such time that the assessments are increased. Specifically, the City determined that all improvements and the annual assessments established for the original District were part of the conditions of property development and approved by the original property owner (developer). As such, pursuant to *Article XIID Section 5(b)*, the property owners approved these existing District assessments at the time the assessments were created (originally imposed pursuant to a 100% landowner petition). The assessments applied to the District’s parcels at the time of passage of Proposition 2018 of \$100 to each single-family residential parcel within Zone A and \$147.20 to each single family residential parcel within Zone B continue to be exempt from the procedural requirements *Article XIID Section 4*.

The District and all Zones therein have been formed pursuant to the 1972 Act. Pursuant to the 1972 Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments and to review the Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the 1972 Act.

In November 2004, the City initiated and conducted property owner protest ballot proceedings, in accordance with the 1972 Act and Article XIID, to annex into Zone A, and approve the maximum assessment of \$100 per single family residential parcel. At the conclusion of the Public Hearing, the City determined that a majority protest did not exist. The City then approved the Engineer’s Report, through the adoption of Resolution No. 04-507, which annexed the Dunmore Junction territory to Zone A. Dunmore Junction was first assessed by the District in FY 2005/06.

In April 2005, the City initiated and conducted property owner protest ballot proceedings, in accordance with the 1972 Act and Article XIID, to annex into Zones B, and approve the maximum assessment of \$147.20 per single family residential parcel. At the conclusion of the Public Hearing, the City determined that a majority protest did not exist. The City then approved the Engineer’s Report, through the adoption of Resolution No. 05-165, which annexed the Legacy subdivision territory to Zone B. The Legacy subdivision was first assessed by the District in FY 2005/06.

C. DESCRIPTION OF DISTRICT BOUNDARIES

The Northwest Roseville Specific Plan Landscaping and Lighting District lies west of the existing urban area of the City of Roseville. The District is generally bounded by Baseline Road to the north, Fiddymont Road to the west and Washington Boulevard to the east. The City annexed in Dunmore Junction, which is generally located on the east side of Porter Drive, south of Junction Boulevard and north of Lawton Avenue. The City also annexed in Legacy Subdivision, which is generally located on the northwest corner of Washington Boulevard and Junction Boulevard. For general reference purposes, renderings of the District's Boundaries are presented in Appendix A of the Report.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to a proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section

22662.5.

- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF IMPROVEMENTS AND SERVICES

Zone A

Zone A of the District, by special benefit assessments, is to provide funding for the maintenance of the following improvements: landscaped street medians and landscaped corridors adjacent to property within the District including but not limited to, plantings, sound walls, and project identification signs; the maintenance of the vernal pool preserves identified in the Northwest Roseville Specific Plan; the installation and maintenance of bike trails within the Northwest Roseville Specific Plan Area; and the installation of park improvements and/or the payment of debt service related to the installation of bike trails and/or park improvements within the Northwest Roseville Specific Plan Area.

Zone B

Zone B of the District, by special benefit assessments, is to provide funding for the following:

- The maintenance of the landscaped street buffers or medians, certain natural areas within the subdivision and landscape corridors adjacent to the property within the Zone (including, but not limited to, planting, screen walls, project identification signs, and drainage and wetlands areas within the property).
- The perpetual maintenance of the landscape strips adjacent to the Sierra Crossing subdivision contiguous to Foothills Boulevard and Booth Road, including but not limited to maintenance of the planting, screen walls, and project identification signs.
- The maintenance of the natural border adjoining and contiguous to the westerly border of Sierra Crossing.
- The maintenance of the wetland preserve area.
- The on-going maintenance of the landscape strips adjacent to the Legacy subdivision contiguous to Junction Boulevard, Washington Boulevard and Sawtell Road, including but not limited to maintenance of the planting, screen walls, and project identification signs.
- The maintenance of natural border adjoining and contiguous to the westerly border of the Legacy subdivision.

II. METHOD OF APPORTIONMENT

A. GENERAL

The 1972 Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements, which include the construction, maintenance, and servicing of public lights, landscaping and appurtenant facilities. The 1972 Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”

The formula used for calculating assessments reflects the composition of the parcels, and the improvements and services provided, to fairly apportion the costs based on estimated benefit to each parcel.

B. DESCRIPTION OF METHOD OF APPORTIONMENT

Pursuant to the Act, the costs of each Zone may be apportioned by any formula or method that fairly distributes the net amount to be assessed, among all assessable parcels in proportion to the estimated special benefits to be received by each such parcel from the improvements. The special benefit formula used for any special benefit assessment should reflect the composition of the parcels, and the improvements and services provided, to fairly apportion the costs based on estimated special benefit to each parcel. All assessable parcels in each Zone receive a direct special benefit from the services and improvements provided by the District.

Each parcel within this District has been assigned an Equivalent Benefit Unit (EBU), which reflects each parcel's estimated special benefit from the improvements as compared to other parcels within each Zone of the District. The levy amount is spread evenly to each assessable parcel in the District, on a per benefit unit (per parcel) method.

For each Zone, the total eligible special benefit expenses (“Balance to Levy”), is divided by the total EBUs of all parcels. The result of this calculation establishes an assessment rate per EBU (“Levy per EBU” or “Assessment Rate”) to be applied to each Zone.

The following formulas shall be applied to each Zone to calculate the assessment for each parcel:

Zone A

Total number of residential lots based on final filed maps, divided into the total annual estimated costs of Zone A.

Zone B

Total number of residential lots based on final filed maps, divided into the total annual estimated costs of Zone B.

The Maximum Annual Assessment is not to exceed \$100.00 per parcel for Zone A and \$147.20 per parcel for Zone B.

C. PROPOSITION 218 BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments regarding the Dunmore Junction subdivision Legacy subdivision annexations to the District, notably:

Article XIID Section 2d defines District as follows:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service”;

Article XIID Section 2i defines Special Benefit as follows:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4a defines proportional special benefit assessments as follows:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

Each of the proposed improvements, the associated costs and assessments have been carefully reviewed, identified and allocated based on special benefit pursuant to the provisions of the Constitution and 1972 Act. All improvements associated with this District have been identified as necessary, required and/or desired for the orderly development of the properties within the District to their full potential, consistent with the proposed development plans and applicable portions of the City General Plan and the Northwest Roseville Specific Plan. As such, the improvements for which each property shall be assessed would be necessary and required of individual property owners for the development of such properties and the ongoing operation, servicing and maintenance of these improvements would be the financial obligation of those properties. Therefore, the improvements and the annual costs of ensuring the maintenance and operation of the improvements are of direct and special benefit to the properties.

The method of apportionment (method of assessment) is based on the premise that each assessed parcel within the District receives benefit from the improvements. Well-maintained landscaping and recreational facilities in close proximity to those properties enhances the desirability of those properties.

The special benefits associated with the landscape improvements and associated appurtenants are specifically:

- Enhanced desirability of properties through association with the improvements.
- Improved aesthetic appeal of properties providing a positive representation of the area and properties.
- Enhanced adaptation of the urban environment within the natural environment from adequate green space and landscaping.
- Environmental enhancement through improved erosion resistance, dust and debris control, and fire prevention.
- Increased sense of pride in ownership of property within the District resulting from well-maintained improvements associated with the properties.
- Enhanced quality of life through well-maintained green belts, landscaped areas and recreational facilities.
- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the District through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels by moderating temperatures, providing oxygenation and attenuating noise.

All of the preceding special benefits allow the property to be developed for the enjoyment of the property owners and contribute to a specific enhancement and desirability of each of the assessed parcels within the District.

The improvements are for the special benefit, enhancement and use of properties within the District and the Northwest Roseville Specific Plan Area. Although the improvements include public easements, rights-of-way and other amenities available or visible to the public at large, it has been determined that the additional improvements installed in connection with this development and those installed as part of the overall Northwest Roseville Specific Plan, are only necessary for the development of properties within the specific plan area and were not required nor necessarily desired by any properties or developments outside the Northwest Roseville Specific Plan Area. Therefore, this District being part of that plan, receives similar and proportional special benefits from both the improvements installed in connection with developing properties in this District as well as existing and future shared amenities within the District. Any public access or use of the improvements by others is incidental and there is no measurable general benefit to properties outside the specific plan area or to the public at large.

III. DISTRICT BUDGET

A. 2020/21 BUDGET

DESCRIPTION	Zone A ⁽¹⁾ Fund 2008	Zone B ⁽²⁾ Fund 2009
<u>DIRECT COSTS</u>		
Contract Maintenance - Landscaping	\$208,117.00	\$11,252.00
Repair & Maintenance - Landscaping/Parks	67,000.00	1,000.00
Utilities	160,000.00	4,900.00
Stormwater Management/Drainage (1130-4801-10001)	0.00	1,278.00
Rehab Reserve Project - Landscape Rehab	<u>35,000.00</u>	<u>0.00</u>
Total Direct Costs	\$470,117.00	\$18,430.00
<u>ADMINISTRATION COSTS</u>		
City Administration	\$9,244.00	\$383.00
Contract Administration - Park's Dept	33,000.00	1,500.00
County Auditor Fees	4,622.00	191.36
Consulting & Professional Services	7,947.00	329.00
Consultant Incidental Expenses	769.82	30.18
Public Hearing Publishing Costs	<u>695.00</u>	<u>400.00</u>
Total Administrative Costs	\$56,277.82	\$2,833.54
Total Direct and Administration Costs	\$526,394.82	\$21,263.54
<u>BUDGET ADJUSTMENTS</u>		
Replenishment/(Use) of Operating Reserve	(\$29,194.82)	(\$2,127.54)
Contribution for /(Use of) Rehab Reserve	(35,000.00)	0.00
Rounding Adjustment		
Total Adjustments	(\$64,194.82)	(\$2,127.54)
BALANCE TO LEVY	\$462,200.00	\$19,136.00

(1) The Dunmore Junction Subdivision was annexed into Zone A.

(2) The Legacy Subdivision was annexed into Zone B.

Fund balance information of each Zone is reported in Section C on the following page.

B. 2020/21 ASSESSMENT RATES

DESCRIPTION	Zone A Fund 2008	Zone B Fund 2009
<u>FY 2020/21 APPLIED ASSESSMENT RATES</u>		
Total Assessable Parcels	4,622	130
Applied Assessment Rates per Parcel	\$100.00	\$147.20
Maximum Assessment Rates per Parcel	\$100.00	\$147.20
Potential Maximum Assessment Per Zone	\$462,200	\$19,136

C. 2020/21 FUND BALANCE INFORMATION

DESCRIPTION	Zone A Fund 2008	Zone B Fund 2009
<u>OPERATING RESERVE</u>		
Beginning Operating Reserve Balance 7-1-2020 (est.)	\$288,056.28	\$9,660.62
add: Replenish from FY 20/21 Levy		
less: Use for FY 20/21 Expenses	(29,194.82)	(2,127.54)
Transfer from/(to) the Rehab Reserve	(23,802.96)	5.46
Ending Operating Reserve Balance 6-30-2021 (est.)	\$235,058.50	\$7,538.54
<u>REHABILITATION RESERVE</u>		
Beginning Rehab Reserve Balance 7-1-2020 (est.)	\$212,326.81	\$5.46
add: Collect from FY 20/21 Levy		
less: Use for FY 20/21 Rehab Projects	(35,000.00)	0.00
Transfer from/(to) the Operating Reserve	23,802.96	(5.46)
Ending Rehab Reserve Balance 6-30-2021 (est.)	\$201,129.77	\$0.00

D. DESCRIPTION OF BUDGET ITEMS

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping - Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping corridors, street medians, entryways, irrigation and related drainage systems as well as maintenance of appurtenant facilities (the "improvements").

Repair & Maintenance – Landscaping / Parks - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism,

storms, etc. If zero, this line item may not be shown in the budget.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Stormwater Management / Drainage - This line item includes costs to properly maintain certain drainage and / or wetlands areas within the District. If zero, this line item may not be shown in the budget.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts, the preparation of the Engineer's Report and incidental expenses of consultant.

Public Hearing Publishing Costs – Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A “Replenishment” increases the levy in order to replenish the Operating Reserve. On the other hand, a “Use” of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Contribution for /(Use of) Rehab Reserve — A “Contribution” increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a “Use of” of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

Total Assessable EBUs - The total number of expected Equivalent Benefit Units for each of the District’s Zones.

Applied Assessment Rates per EBU - The assessment rates to be applied to the parcels lying within the respective Zone of the District for the fiscal year shown.

Maximum Assessment Rates per EBU - The maximum assessment rates for the parcels lying within the respective Zone of the District for the fiscal year shown.

Potential Maximum Assessment Per Zone – The total amount that can be assessed against all parcels within each Zone for the current fiscal year based upon the expected number of EBUs to be assessed.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2020 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2020 to December 31, 2020, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 20/21 Levy – This amount is added to the levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2020 (the beginning of the Fiscal Year) through December 31, 2020. If zero, this line item may not be shown in the budget.

Use for FY 20/21 Expenses – The amount of the Operating Reserve to be used to fund FY 20/21 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2020 (the beginning of the Fiscal Year) through December 31, 2020. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2021 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2021. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve

balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2020 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2020. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 20/21 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 20/21 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2021 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2021. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

Should the District have no Rehabilitation Reserve balances or related activity, no Rehabilitation Reserve information shall be presented in the Report.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

For each Zone showing a projected ending Rehabilitation Reserve balance or projected FY 2020/21 expenditures for Rehabilitation Reserve Project, a five-year Capital Improvement Plan showing the projected expenditures related to the rehabilitation, restoration and/or replacement of District improvements and other allowable costs, is shown below.

Zone A.

Description	FY 2020/21	FY 2021/22	FY 2022/23	FY 2023/24	FY 2024/25	4 Year Total
Repair, replace and/or refurbish fencing improvements	\$0	\$20,000	\$20,000	\$0	\$0	\$40,000
Replace, repair, renovate and/or refurbish plants, landscape & related materials	10,000	10,000	15,000	20,000	20,000	\$65,000
Grid tree pruning, removal and replacement of declining trees	25,000	25,000	25,000	25,000	25,000	\$100,000
Total Zone A Expenditures	\$35,000	\$55,000	\$60,000	\$45,000	\$45,000	\$205,000

Zone B. The Zone's projected reserves are currently not sufficient to fund capital improvement expenditures.

From time to time, funds held in a Rehabilitation Reserve may be needed to respond to changing needs due to the condition of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and / or operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map of the District and Zones have previously been submitted to the Clerk of the City in the format required under the Act and are, by reference, hereby made part of this Report. The boundary maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a rendering of the District's Boundaries is represented herein.

APPENDIX B — 2020/21 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

Due to the size of the Assessment Roll, a listing of parcels to be assessed within this District, along with the proposed assessment amounts, shall be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways including public greenbelts and parkways; utility rights-of-ways; common areas; landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2020/21. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2020/21 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 20-156

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, INITIATING PROCEEDINGS FOR THE ANNUAL LEVY OF ASSESSMENTS FOR THE OLYMPUS POINTE LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021, PURSUANT TO THE PROVISIONS OF PART 2 OF DIVISION 15 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Olympus Pointe Landscaping and Lighting District (hereafter referred to as the “District”) pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the “Act”), that provides for levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of street lighting, landscaping, and all appurtenant facilities and operations related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter “Engineer”) for the purpose of assisting with the establishment of the assessments, the annexation of territory, and to prepare and file an Engineer’s Annual Levy Report (hereinafter referred to as the “Engineer’s Report”) with the City Clerk in accordance with the act, and in accordance with the California Constitution, Articles XIII C and XIII D;

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE OLYMPUS POINTE LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Engineer’s Report: The City Council hereby orders Willdan Financial Services to prepare the Engineer’s Report concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22622* of the Act.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: project identification signs and surrounding landscape and hardscape, special street materials, sculpture and sculpture park, special lighting for the project identification signs, sculpture and sculpture park, landscape street medians, special street signs, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer’s Report describes all new improvements or substantial changes in existing improvements.

RESOLUTION NO. 20-157

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, DECLARING ITS INTENTION TO LEVY ANNUAL ASSESSMENTS FOR THE OLYMPUS POINTE LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Olympus Pointe Landscaping and Lighting District (hereafter referred to as the “District”), and initiated proceedings for Fiscal Year 2020/2021, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the “Act”) that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of all improvements and facilities related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services for the purpose of assisting with the Annual Levy of the District, and to prepare and file an Engineer’s Annual Levy Report (hereinafter referred to as the “Engineer’s Report”) with the City Clerk in accordance with the Act; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE OLYMPUS POINTE LANDSCAPING AND LIGHTING DISTRICT, PURSUANT TO CHAPTER 3, SECTION 22624 OF THE ACT, AS FOLLOWS:

Section 1 Intention: The City Council hereby declares that it is its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay the annual costs of the improvements.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: project identification signs and surrounding landscape and hardscape, special street materials, sculpture and sculpture park, special lighting for the project identification signs, sculpture and sculpture park, landscape street medians, special street signs, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer’s Report describes all new improvements or substantial changes in existing improvements.

Section 3 **Boundaries and Designation:** The boundaries of the District are described as the boundaries previously defined in the formation documents of the original District. The District includes the parcels generally within the area known as the Northeast Roseville Specific Plan. The District is known and designated as the:

“Olympus Pointe Landscaping and Lighting District”

Section 4 **Proposed Assessment Amounts:** The proposed assessments are outlined in the Engineer’s Annual Levy Report. District Assessments are calculated in accordance with the method of apportionment established for the District and do not exceed the assessment rates and annual inflationary adjustment previously authorized by City Council and approved by the property owners in accordance with the provisions of the California State Constitution, Article XIID.

Section 5 **Public Hearing(s):** The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22626* of the Act.

Section 6 **Notice:** The City Clerk shall give notice of the time and place of the Public Hearing by causing the publishing of this Resolution once in the local newspaper not less than ten (10) days before the date of the hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices.

Section 7 **Time and Place of Public Hearing:** Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Wednesday, May 20, 2020 at 6:00 p.m.** or as soon thereafter as feasible in the regular meeting chambers located at 311 Vernon Street, Roseville, California.

RESOLUTION NO. 20-158

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR PRELIMINARY APPROVAL OF THE ENGINEER'S ANNUAL LEVY REPORT FOR THE OLYMPUS POINTE LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, the City Council has, by previous Resolutions, ordered the preparation of an Engineer's Annual Levy Report (hereafter referred to as the "Engineer's Report") for the district known and designated as the Olympus Pointe Landscaping and Lighting District (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereinafter referred to as the "Act"); and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer"), for the purpose of assisting with the establishment of the assessments and to prepare and file an Engineer's Report with the City Clerk in accordance with the Act, and in accordance with the requirements of the California Constitution, Articles XIII C and XIII D; and,

WHEREAS, there has now been presented to this City Council the Engineer's Report as required by *Chapter 1, Article 4, Section 22566* of said Act; and,

WHEREAS, this City Council has carefully examined and reviewed the Engineer's Report as presented, and is preliminarily satisfied with the District, each and all of the budget items and documents as set forth therein, and is satisfied that the assessments, on a preliminary basis, have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within each Zone, as set forth in said Report; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE OLYMPUS POINTE LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Engineer's Report as presented, consists of the following:

- a. A Description of Improvements
- b. The Annual Budget (Costs and Expenses of Maintenance, Services, Operations and District Administration)
- c. The Assessment Roll containing the Fiscal Year 2020/2021 Levy for each Assessor Parcel within the District

Section 3 The Engineer's Report is hereby approved on a preliminary basis, and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 4 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Engineer's Report.

ENGINEER'S REPORT AFFIDAVIT

Establishment of Annual Rates and Charges for the:

Olympus Pointe
Landscaping and Lighting District

City of Roseville
Placer County, State of California

This Report describes the District and any relevant zones therein, including the improvements, budgets, parcels and assessments to be levied for Fiscal Year 2020/21 as they existed at the time of the passage of the Resolution of Intention. Reference is hereby made to the Placer County Assessor's maps for a detailed description of the lines and dimensions of parcels within the District. The undersigned respectfully submits the enclosed Report as directed by the City Council.

I. OVERVIEW

A. INTRODUCTION

The City of Roseville (“City”) annually levies and collects special assessments in order to maintain the certain public improvements within the Olympus Pointe Landscaping and Lighting District (“District”) within the City. The District, which was formed in 1989, is levied annual assessments pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code (the “Act”).

The Engineer’s Report (“Report”) describes the District boundaries, any new annexations, improvements maintained by the District and the proposed assessments for the period of July 1, 2020 through June 30, 2021.

The District consists of two (2) benefit Zones (“Zones”). The improvements that benefit properties within each Zone and the costs associated with those improvements are identified and budgeted separately. Each parcel within a Zone is assessed proportionately for only those improvements and services that are a direct and special benefit to the properties within the respective Zone. The assessments are based on the historical and estimated cost to maintain the improvements that provide a direct and special benefit to properties within the District.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (“APN”) by the Placer County Assessor’s Office.

Following approval of the Report, the City Council will by resolution, order the improvements to be made, if any, and confirm the levy and collection of assessments herein pursuant to the Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council defines the assessments to be applied to each parcel within the District and respective Zones for Fiscal Year (“FY”) 2020/21. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved by the City Council.

B. COMPLIANCE WITH CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the Act and are in compliance with the substantive and procedural requirements of the California State Constitution Articles XIIC and XIID (“Article XIIC” and “Article XIID”) and the provisions of the Proposition 218 Omnibus Implementation Act [Government Code Section 53750 and following] (the “Implementation Act”). Articles XIIC and XIID and the Implementation Act collectively are hereinafter referred to as “Proposition 218”.

The District’s Maximum Assessment Rates for all Zones and the Inflationary Adjustment Factor were previously approved and confirmed through property owner ballot proceedings and as such, comply with the provisions of Proposition 218.

Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer’s Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls.

C. CLARIFICATION OF ZONE DESIGNATIONS

In order to increase consistency with the City’s other districts and to facilitate presentation within the Engineer’s Report, the names of both Zones were redesignated, commencing with FY 2007/2008, as follows:

- The “Non-Residential/Multi-Family Residential Zone” was redesignated to “Zone A”. ⁽¹⁾
- The “Residential Zone” was redesignated to “Zone D”. ⁽²⁾

(1) Prior to FY 2005/2006, this territory was known as “Zone A”. In FY 2005/2006, Zone A was redesignated to the “Non-Residential/Multi-Family Residential Zone”.

(2) Prior to FY 2005/2006, this territory was known as “Zones B & C”. In FY 2005/2006, Zones B & C were combined and redesignated to the “Residential Zone”.

D. GENERAL DESCRIPTION OF DISTRICT

The Olympus Pointe Landscaping and Lighting District is located in the City of Roseville at the southerly edge of Placer County, northeast of the intersection of Interstate 80 and Douglas Boulevard. The site is generally bounded by Interstate 80 on the west, East Roseville Parkway and Olympus Drive to the north, Douglas Boulevard to the south and Sierra College Boulevard to the east. See Appendix A for a rendering of the District boundary map.

The District consists of two zones as described below. These zones were established by the City through a District reengineering commencing with the FY 2005/2006 levy. Additional information regarding the reengineering is provided in Section III of the Report.

Zone A

Zone A includes land zoned for non-residential and multi-family residential uses. The Zone comprises the majority of the District and is primarily west and south of East Roseville Parkway, east of Interstate 80 north of Douglas Boulevard. This Zone contains 581.78 acres of assessable land that was originally designated as “Zone A”. The area was then redesignated as the “Non-Residential/Multi-Family Zone” commencing with the FY 2005/06 and then redesignated back to “Zone A” commencing with the FY 2007/08 levy.

Zone D

Zone D includes two single-family residential developments on the eastern side of the District. The Zone is bisected by Olympus Drive and Sierra College Boulevard on the District’s eastern boundary and includes 468 developed single-family residences. Originally, each residential development was designated as separate zone (Zones B and C). The area was redesignated as the “Residential Zone” commencing with the FY 2005/2006 levy and then redesignated to the “Zone D” commencing with the FY 2007/2008 levy.

E. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to a proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.

- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.

- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

F. DESCRIPTION AND LOCATION OF IMPROVEMENTS

This District, through the levy special assessments, provides funding for the maintenance and operation of the following improvements located within the public rights-of-way and dedicated easements: project identification signs, including surrounding landscape and hardscape; special street materials; sculptures and sculpture park; special street signs; special lighting for the project identification signs and special illuminated street signs; and landscaped street medians (the “Improvements”). The specific locations of the improvements within the district are described as follows:

1. Zone A

a. Landscaped Median Islands:

- Eureka Road from Douglas Boulevard to Taylor Road Connector
- Sunrise Avenue from southern boundary of the Northeast Roseville Specific Plan (the “NERSP”) to East Roseville Parkway
- East Roseville Parkway from Douglas Boulevard to Rocky Ridge Drive
- Douglas Boulevard from eastern boundary of NERSP to Rocky Ridge Drive

b. Project identification signs (granite entryways) and special paving materials:

- Eureka Road at Douglas Boulevard
- East Roseville Parkway at Douglas Boulevard
- Eureka Road at Taylor Road

c. Sculpture and Sculpture Park:

- Aris Demetrio’s original sculpture located on Parcel 14
- Sculpture park (0.85 acres located on Parcel 14)

d. Special street signs:

- Eureka Road at Sunrise Avenue, Rocky Ridge Drive, Lead Hill Drive and Douglas Boulevard
- Lead Hill Drive at Rocky Ridge Drive

- Sunrise Avenue at Auto Mall entrance
- East Roseville Parkway at Taylor Road, Lead Hill Drive, Olympus Drive and Douglas Boulevard
- Olympus Drive at Sierra College Boulevard:

2. Zone D

a. Landscaped Frontage:

- Southern side of Olympus Drive from East Roseville Parkway to Sierra College Boulevard, excluding any landscaping not within or adjacent to the Zone
- Northern side of Olympus Drive from the Zone boundary (the former Zone C boundary), which is 175 feet southwest of Corniche Lane, to Sierra College Boulevard, western side of Sierra College Boulevard from Olympus Drive to the Zone boundary (the former Zone C boundary), which is approximately 600 feet.

b. Project identification signs and special paving materials:

- Sierra College Boulevard at Olympus Drive

G. DESCRIPTION OF MAINTENANCE AND SERVICES

Maintenance means the furnishing of services and materials for the ordinary and usual maintenance, operation and servicing of the Improvements and appurtenant facilities, including repair, removal or replacement of all or part of any of Improvements or appurtenant facilities; providing for the life, growth, health and beauty of the Improvements including cultivation, irrigation, trimming, mowing, spraying, fertilizing and treating for disease or injury; the removal of trimmings, rubbish, debris and other solid waste.

Servicing means the furnishing of water and electricity for the Improvements including any decorative lighting and the furnishing of electric current or energy, gas or other illuminating agent for the special street signs.

II. METHOD OF APPORTIONMENT

A. GENERAL

The Act permits the establishment of assessment districts by public agencies for the purpose of providing certain public improvements, which include the construction, maintenance, and servicing of street lights, traffic signals and landscaping facilities. Streets and Highways Code Section 22573 requires that maintenance assessments be levied according to benefit rather than the assessed value.

“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”

In addition, Article XIID and the Implementation Act require that a parcel’s assessment may not exceed the reasonable cost for the proportional special benefit conferred to that parcel. Article XIID and the Implementation Act further provide that only special benefits are assessable and the City must separate the general benefits from the special benefits. They also require that publicly owned properties, which specifically benefit from the improvements, be assessed.

B. BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments, notably:

Article XIID Section 2d defines District as follows:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service”;

Article XIID Section 2i defines Special Benefit as follows:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4a defines proportional special benefit assessments as follows:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

The City initiated and conducted property owner protest ballot proceedings in accordance with Article XIID and the Implementation Act for both the Non-Residential/Multi-Family Zone (Zone A) and the Residential Zone (Zone D). Each Zone’s Improvements, the associated costs and assessments had been reviewed, identified and allocated based on special benefit pursuant to the provisions of the Constitution and Act.

All Improvements associated with these Zones have been identified as necessary, required and/or desired for the orderly development of the properties to their full potential. As such, these Improvements would be necessary and required of individual property owners for the development of such properties and the ongoing operation, servicing and maintenance of these Improvements would be the financial obligation of those properties. Therefore, the Improvements and the annual costs of ensuring the maintenance and operation of the Improvements are of direct and special benefit to the properties.

The method of apportionment (method of assessment) is based on the premise that each of the assessed parcels within these Zones receives special benefit from the Improvements maintained and financed by the assessments. Specifically, the assessments associated with the Zones are for the maintenance of the Improvements installed as part of the original development of the parcels within the Zones. The desirability and security of properties within each Zone is enhanced by the close proximity of these amenities to those properties.

The annual assessments outlined in this Report are proposed to cover the estimated costs to provide all necessary service, operation, administration, and maintenance required to keep the Zone Improvements in a healthy, vigorous, and satisfactory condition.

The special benefits associated with these improvements are specifically:

- Enhanced desirability of properties through association with the improvements.
- Improved aesthetic appeal of properties within the Zones providing a positive representation of the area.
- Enhanced adaptation of the urban environment within the natural environment from adequate green space and landscaping.

- Environmental enhancement through improved erosion resistance, and dust and debris control.
- Increased sense of pride in ownership of property within the District resulting from well-maintained improvements associated with the properties.
- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the District through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels within the Zones by moderating temperatures, providing oxygenation and attenuating noise.

All of the preceding special benefits allowed the property to be developed for the enjoyment of the property owners and contribute to an ongoing specific enhancement and desirability of each of the assessed parcels within the Zones.

The improvements are for the special benefit, enhancement and use of properties within the Zones. Although the improvements include public easements, rights-of-way, streets and other amenities available or visible to the public at large, the construction and installation of these Improvements were only necessary for the development of properties within the Zones and were not required nor necessarily desired by any properties or developments outside the Zone's boundaries. Therefore, any public access or use of the Improvements by others is incidental and there is no measurable general benefit to properties outside the Zones or to the public at large. In making this determination, it should be noted that all parkway and perimeter landscaping within the City is both funded and maintained by a special district, individual property owners or through some type of association.

C. ASSESSMENT METHODOLOGY

To establish the special benefit to the individual lots and parcels within the District an Equivalent Benefit Unit ("EBU") system is used. The EBU method of apportioning benefit is typically seen as the most appropriate and equitable assessment methodology for districts formed under the Act, as the benefit to each parcel from the Improvements are apportioned as a function of land use type, size and development. Acreage of common area parcels shall be apportioned to the remaining assessable parcels of a subdivision and/or parcel split(s) related to the creation of the common area parcel(s).

EBU Application Table

Land Use	EBU per Unit/Acre
Single Family Residential	1.00 per Unit
Multi-Family Residential	1.00 per Acre
Non-Residential	1.00 per Acre
Exempt	0.00 per Acre

1. Definitions and Formulas Related to the Product Type EBU Method

Single-Family Residential — This land use is defined as a fully subdivided residential parcel that is part of a final tract map.

Multi-Family Residential — This land use is defined as a residential parcel anticipated to have or has more than one residential unit.

Non-Residential — Parcels that are not considered Single Family Residential, Multi-Family Residential or Exempt.

Exempt Parcels — This land use identifies properties that are not assessed and are assigned 0.0 EBU per acre. This land use classification may include, but is not limited, to lots or parcels identified as public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas, greenbelts, parkways, park properties and other publicly owned properties that are part of the District Improvements. These types of parcels are considered to receive little or no benefit from the Improvements and are therefore exempted from assessment.

2. Zone Benefit Formula

The benefit formula applied to parcels within each Zone is based on the preceding Equivalent Benefit Unit (EBU) Application Table. Each parcel's EBU correlates the parcel's special benefit received as compared to all other parcels benefiting from the Improvements.

The following formula is used to calculate the EBU for each parcel (proportional benefit).

$$\text{Parcel Type EBU} \times \text{Units/Acres} = \text{Parcel EBU}$$

The total number of Equivalent Benefit Units (EBUs) is the sum of all individual EBUs applied to parcels within each Zone that receive a special benefit from the

Improvements. An assessment amount per EBU (Assessment Rate) for each Zone is established by taking the total costs associated with the Zone's Improvements and dividing that amount by the total number of EBUs within each Zone of all parcels benefiting from those Improvements. This Rate is then applied back to each individual parcel based on their assigned EBUs to determine the parcel's proportionate special benefit and assessment obligation from those Improvements.

$$\text{Zone Budget/ Total EBU} = \text{Assessment per EBU}$$

$$\text{Assessment per EBU} \times \text{Parcel EBU} = \text{Maximum Parcel Assessment Amount}$$

D. ASSESSMENT RANGE FORMULA

The purpose of establishing an Assessment Range Formula is to provide for reasonable increases and inflationary adjustment to annual assessments rather than initiating protest ballot proceedings to approve small increases in annual costs. This District provides for an annual adjustment to the Maximum Assessment Rate in an amount equal to three percent (3%).

The Maximum Assessment Rate is adjusted annually and is calculated independent of the District's annual budget and proposed annual assessment. Any proposed annual assessment rate (less than or equal to this Maximum Assessment Rate) is not considered an increased assessment, even if the proposed assessment is greater than the assessment applied in the prior fiscal year.

Although the Maximum Assessment Rate will increase each year, the actual assessment rate may go up and down as compared to the previous year(s). The Maximum Assessment Rate adjustment is designed to allow for the adjustment of the annual assessment for inflation in order to maintain the original purchasing power of the District budget. The Maximum Assessment Rate calculated each year does not require or facilitate an increase to the annual assessment and neither does it restrict assessments to the adjusted maximum amount. If the budget and assessment for the fiscal year do not require an increase, or the increase is less than the adjusted Maximum Assessment Rate, then the required budget and assessment may be applied without additional property owner balloting. If the budget and assessments calculated requires an increase greater than the adjusted Maximum Assessment Rate, then the assessment is considered an increased assessment and would be subject to Proposition 218 balloting requirements.

E. BASE MAXIMUM ASSESSMENT RATES

The base assessment rates and the annual inflationary adjustment to each Zone are listed in the table below:

Zone	Base Year	Base Year Maximum Assessment Rate per EBU	Annual Inflationary Adjustment ⁽¹⁾
Zone A	FY 2005/06	\$296.65	3.00%
Zone D	FY 2005/06	\$99.76	3.00%

(1) The Annual Inflationary Adjustment commences with the Fiscal Year 2006/2007 assessments.

III. DISTRICT BUDGET

A. 2020/21 BUDGET

DESCRIPTION	ZONE A Fund 2006	ZONE D Fund 2007

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping – Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping improvements, irrigation and related drainage systems, as well as maintenance of appurtenant facilities (the “improvements”). Cost to maintain improvements within the District’s entryway areas are not included in this amount.

Contract Maintenance - Parks - Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of park improvements, as well as maintenance of appurtenant facilities (the “improvements”).

Repair & Maintenance - Landscaping/Parks - This line item includes repairs or maintenance items that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc.

Maintenance - Parks City Staff - This line item includes maintenance items that are performed by the Parks staff.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's' Report.

Consultant Incidental Expenses - Includes out of pocket costs related to district administration.

Public Hearing Publishing Costs –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A “Replenishment” increases the levy in order to replenish the Operating Reserve. On the other hand, a “Use” of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Contribution for / (Use of) Rehab Reserve — A “Contribution” increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a “Use of” of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

APPLIED ASSESSMENT RATES

Total Assessable Acreage - The total acreage within each zone expected to be assessed in the current fiscal year.

Total Assessable Units - The total number of assessable single-family units within each zone expected to be assessed in the current fiscal year.

Total Equivalent Benefit Units (“EBUs”) - Total assessable EBUs within the District for the current fiscal year. Each assessable parcel is assigned EBUs as follows:

Land Use	EBU per Unit/Acre
Single Family Residential	1.00 per Unit
Multi-Family Residential	1.00 per Acre
Non-Residential	1.00 per Acre
Exempt	0.00 per Acre

Applied Assessment Rate per Equivalent Benefit Unit (EBU) - The assessment rate per EBU to be applied to the applicable Zone for the current fiscal year.

Maximum Assessment Rate per Equivalent Benefit Unit (EBU) - The maximum assessment rate per EBU that can be applied to the applicable Zone for the current fiscal year.

Potential Maximum Assessment Per Zone – The total amount that can be assessed to all parcels within each Zone for the current fiscal year based upon the expected number of assessable units and acres.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2020 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone’s expenditures from July 1, 2020 to December 31, 2020, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District’s fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 20/21 Levy – This amount is added to the levy in order to replenish the Operating Reserve. Due to the six-month delay from the District’s receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2020 (the beginning of the Fiscal Year) through December 31, 2020. If zero, this line item may not be shown in the budget.

Use for FY 20/21 Expenses – The amount of the Operating Reserve to be used to fund FY 20/21 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2020 (the beginning of the Fiscal Year) through December 31, 2020. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2021 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2021. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2020 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2020. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 20/21 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 20/21 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2021 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2021. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

Should the District have no Rehabilitation Reserve or related activity, the Rehabilitation Reserve information may not be presented in the Report.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

For each Zone showing a projected ending Rehabilitation Reserve balance or projected FY 2020/21 expenditures for Rehabilitation Reserve Project, a five-year Capital Improvement Plan showing the projected expenditures related to the rehabilitation, restoration and/or replacement of District improvements and other allowable costs, is shown below.

Zone A

Description	FY 2020/21	FY 2021/22	FY 2022/23	FY 2023/24	FY 2024/25	4 Year Total
Replace, repair, renovate and/or refurbish plants, landscapes & related materials	\$7,000	\$7,000	\$7,000	\$10,000	\$10,000	\$34,000
Grid pruning	\$2,680	\$2,680	\$2,680	\$2,680	\$2,680	\$10,720
Replace irrigation controller(s)	\$0	\$0	\$0	\$40,000	\$0	\$40,000
Stone wall repair and medians	\$0	\$0	\$0	\$5,000	\$0	\$5,000
Repaint Cosmos Statute	\$0	\$0	\$0	\$40,000		\$40,000
Rehabilitate, renovate and/or replace median improvements	\$0	\$0	\$55,000	\$0	\$0	\$55,000
\$25k Insurance deductible to repair/replace 1 of 3 granite monument signs	\$25,000	\$0	\$0	\$0	\$0	\$0
Total Zone A Expenditures	\$34,680	\$9,680	\$64,680	\$97,680	\$12,680	\$184,720

Zone D

Description	FY 2020/21	FY 2021/22	FY 2022/23	FY 2023/24	FY 2024/25	4 Year Total
Replace, repair, renovate and/or refurbish plants, landscape & related materials	\$3,500	\$8,500	\$8,500	\$5,000	\$5,000	\$27,000
Grid pruning	\$5,110	\$5,110	\$5,110	\$5,110	\$5,110	\$20,440
Rehabilitate, renovate and/or replace project entryway improvements	\$0	\$0	\$0	\$20,000	\$0	\$20,000
Total Zone D Expenditures	\$8,610	\$13,610	\$13,610	\$30,110	\$10,110	\$67,440

Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map for the District has previously been submitted to the Clerk of the City in the format required under the Act and is, by reference, hereby made part of this Report. These District Boundary Maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a rendering of the District's Boundaries is presented herein.

APPENDIX B — 2020/21 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, may be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways, including public greenbelts and parkways; utility rights-of-ways; small parcels vacated by the County, bifurcated lots, and other property that cannot be developed, excepting common area parcels. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2020/21. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2020/21 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 20-159

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, INITIATING PROCEEDINGS FOR THE ANNUAL LEVY OF ASSESSMENTS FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, FOR FISCAL YEAR 2020/2021, PURSUANT TO THE PROVISIONS OF PART 2 OF DIVISION 15 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Riverside Avenue Landscaping and Lighting District (hereafter referred to as the “District”) pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the “Act”), that provides for levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of street lighting, landscaping, and all appurtenant facilities and operations related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter “Engineer”) for the purpose of assisting with the establishment of the assessments, the annexation of territory, and to prepare and file an Engineer’s Annual Levy Report (hereinafter referred to as the “Engineer’s Report”) with the City Clerk in accordance with the act, and in accordance with the California Constitution, Articles XIII C and XIII D;

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Engineer’s Report: The City Council hereby orders the Engineer to prepare and file with the City Clerk the Engineer’s Report concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22622 (d)* of the Act.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: maintenance, servicing, administration and operation of landscape, lighting and streetscape improvements, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer’s Report describes all new improvements or substantial changes in existing improvements.

RESOLUTION NO. 20-160

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, DECLARING ITS INTENTION TO LEVY ANNUAL ASSESSMENTS FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Riverside Avenue Landscaping and Lighting District (hereafter referred to as the “District”), and initiated proceedings for Fiscal Year 2020/2021, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the “Act”) that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of all improvements and facilities related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services for the purpose of assisting with the Annual Levy of the District, and to prepare and file a report with the City Clerk in accordance with the Act; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, PURSUANT TO CHAPTER 3, SECTION 22624 OF THE ACT, AS FOLLOWS:

Section 1 Intention: The City Council hereby declares that it is its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay the annual costs of the improvements.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: maintenance, servicing, administration and operation of landscape, lighting and streetscape improvements, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer’s Report describes all new improvements or substantial changes in existing improvements.

Section 3 Boundaries and Designation: The boundaries of the District are described as the boundaries previously defined in the formation documents of the original District. The District is known and designated as:

“Riverside Avenue Landscaping and Lighting District”

Section 4 Proposed Assessment Amounts: The proposed assessments are outlined in the Report. District Assessments are calculated in accordance with the method of apportionment established for the District and do not exceed the assessment rates and annual inflationary adjustment previously authorized by City Council and approved by the property owners in accordance with the provisions of the California State Constitution, Article XIID.

Section 5 Public Hearing(s): The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22626* of the Act.

Section 6 Notice: The City Clerk shall give notice of the time and place of the Public Hearing by causing the publishing of this Resolution once in a local newspaper not less than ten (10) days before the date of the hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices.

Section 7 Time and Place of Public Hearing: Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Wednesday, May 20, 2020 at 6:00 p.m.**, or as soon thereafter as feasible in the regular meeting chambers located at 311 Vernon Street, Roseville, California.

RESOLUTION NO. 20-161

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR PRELIMINARY APPROVAL OF THE ENGINEER'S ANNUAL LEVY REPORT FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, the City Council has, by previous Resolutions, ordered the preparation of an Annual Levy Report (hereafter referred to as the "Engineer's Report") for the district known and designated as the Riverside Avenue Landscaping and Lighting District (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereinafter referred to as the "Act"); and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer"), for the purpose of assisting with the establishment of the assessments and to prepare and file an Engineer's Report with the City Clerk in accordance with the Act, and in accordance with the requirements of the California Constitution, Articles XIIC and XIID; and,

WHEREAS, there has now been presented to this City Council the Engineer's Report as required by *Chapter 1, Article 4, Section 22566* of said Act; and,

WHEREAS, this City Council has carefully examined and reviewed the Engineer's Report as presented, and is preliminarily satisfied with the District, each and all of the budget items and documents as set forth therein, and is satisfied that the assessments, on a preliminary basis, have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within the District, as set forth in said Engineer's Report; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Engineer's Report as presented, consists of the following:

- a. A Description of Improvements
- b. The Annual Budget (Costs and Expenses of Maintenance, Services, Operations and District Administration)
- c. The Assessment Roll containing the Fiscal Year 2020/2021 Levy for each Assessor Parcel within the District

Section 3 The Engineer's Report is hereby approved on a preliminary basis, and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 4 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Engineer's Report.

ENGINEER'S REPORT AFFIDAVIT

Establishment of Annual Rates and Charges for the:

Riverside Avenue

Landscaping and Lighting District

City of Roseville

Placer County, State of California

This Report describes the District and any relevant zones therein, including the improvements, budgets, parcels and assessments to be levied for Fiscal Year 2020/21 as they existed at the time of the passage of the Resolution of Intention. Reference is hereby made to the Placer County Assessor's maps for a detailed description of the lines and dimensions of parcels within the District. The undersigned respectfully submits the enclosed Report as directed by the City Council.

I. OVERVIEW

A. INTRODUCTION

The City of Roseville (“City”) annually levies and collects special assessments in order to maintain the improvements within the Riverside Avenue Landscaping and Lighting District (“District”). The District was formed in January of 2007 and is levied annual assessments pursuant to *the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code* (“1972 Act”).

The Engineer’s Report (“Report”) describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2020 through June 30, 2021. The special benefit assessments are based on historical and estimated costs to maintain the District improvements. These assessments, which provide a direct and special benefit to properties within the District, will provide funding for the operation and maintenance of District improvements.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (“APN”) by the Placer County Assessor’s Office. The Placer County Auditor/Controller uses Assessor’s Parcel Numbers and specific Tax Code Accounts, to identify on the County’s tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will by resolution, order the improvements to be made and confirm the levy and collection of assessments herein pursuant to the Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council defines the assessments to be applied to each parcel within the District for Fiscal Year (“FY”) 2020/21. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved by the City Council.

B. COMPLIANCE WITH CURRENT LEGISLATION

The City Council, pursuant to the provisions of the “Landscaping and Lighting Act of 1972”, being Division 15, Part 2 of the Streets and Highways Code of the State of California, beginning with Section 22500 (the “1972 Act”); Article XIID of the Constitution of the State of California (“Article XIID”); and the Proposition 218 Omnibus Implementation Act, beginning with Government Code Section 53750 (the “Implementation Act”) (the 1972 Act, Article XIID and the Implementation Act are referred to collectively as the “Assessment Law”) initiated proceedings for the formation of the District on November 15, 2006 and to levy and collect annual assessments against lots and parcels within the District for FY 2007/08. On January 17, 2007, pursuant to Assessment Law, the City conducted a Public Hearing and tabulated the returned ballots. The City determined that a majority protest did not exist and approved the District’s maximum assessment rate and annual inflationary adjustment factor.

Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer’s Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the Act and Assessment Law.

C. DESCRIPTION OF DISTRICT BOUNDARIES

The proposed territory within the District consists of all lots, parcels and subdivisions of land as shown on the Boundary Map titled “Boundary Map of Riverside Avenue Landscaping and Lighting District” contained within this report in Appendix A-1.

The District is bounded by Douglas Boulevard to the north, Darling Way to the south and includes parcels that front Riverside Avenue. It is centrally located between Interstate 80 and Downtown Roseville and is east of the Union Pacific Railroad.

The District currently has a mix of different types of land uses including automotive related retail and car lots, community/neighborhood retail, offices, services, and residential units.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to a proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.

- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.

- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF THE IMPROVEMENTS AND MAINTENANCE

The District, through the levy of special assessments, is to provide funding for ongoing maintenance, operation and servicing of landscaping and lighting improvements located within the public rights-of-ways and dedicated easements located within the District. These improvements may include, but are not limited to, all materials, equipment, utilities, labor, and appurtenant facilities related to the ongoing maintenance of the improvements. The improvements to be maintained and services are generally described as follows:

Landscaping Improvements

The general landscaping improvements in the District are to be consistent with the improvements on Vernon Street located north of the District, which intersects Riverside Avenue. As a gateway to downtown Roseville, Riverside Avenue's compatibility with Vernon Street links the downtown area and Riverside Gateway area together.

The landscaping improvements have been designed to enhance the area within the District and may include, but are not limited to ground cover, shrubs and plants, trees, irrigation and drainage systems, ornamental lighting, masonry walls or other fencing, hardscape improvements, monuments and landmarks, mid-block bulbs, bulb-outs, and associated appurtenant located within the street rights-of-way and public areas within the District. Specifically, the proposed landscape improvement areas for this District are:

- Landscaping and hardscape improvements within the public rights-of-way of the streets within the District including, but not limited to, Riverside Avenue including the corners of Riverside Avenue and Second Street, Third Street, Fourth Street, Fifth Street, Sixth Street, Darling Way, Fern Street, Cherry Street, and Bonita Street.
- Decorative banners along Riverside Avenue.
- Transit facilities including bus stop seating and decorative shelters.
- Roundabout improvements including plantings, paving, and landmark feature located at the intersection of Vernon St., Douglas Blvd., and Riverside Ave.
- A Gateway feature located at the intersection of Darling Way and Riverside Avenue.

- Various amenities associated with the landscape improvements and public areas within the District, including, but not limited to, trash receptacles, street furniture, bike racks, entry signs, sidewalks, fencing, and retaining walls.

Specifically not included as District improvements are those improvements located on private property, improvements and facilities that are outside the boundaries of the District and/or area funded by other sources available to the City.

Public Lighting Improvements

The lighting improvements may include, but are not limited to, the cost of providing, maintaining and servicing of lighting fixtures, poles, meters, conduits, electrical cable, and associated appurtenant facilities associated with:

- Lighting facilities within the landscaped areas and public areas including safety lights, security lights or ornamental lights installed as part of the District improvements; and
- Public street light improvements located on the streets within the District. Specifically excluded from the assessment are the street light energy costs. These costs are to be paid for by the City from other revenue sources.

Detailed maps and descriptions of the location and extent of the specific improvements to be maintained by the District are on file in the Office of Public Works and by reference are made part of this Report.

Description of Maintenance and Services

Maintenance means the furnishing of services and materials for the ordinary and usual maintenance, operation and servicing of landscaping and street lighting improvements facilities and appurtenant facilities, including repair, removal or replacement of all or part of any of the landscaping and street lighting improvements, or appurtenant facilities; providing for the life, growth, health and beauty of landscaping improvements including cultivation, irrigation, trimming, mowing, spraying, fertilizing and treating for disease or injury; the removal of trimmings, rubbish, debris and other solid waste; and the cleaning sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Servicing means the furnishing of water and electricity for the irrigation of the landscape improvements or appurtenant facilities and the furnishing of electric current or energy for the operation of the landscaping improvements or appurtenant facilities. The street lighting improvements shall be maintained to provide adequate illumination; however, the City will be paying the actual energy costs of the streetlights.

II. METHOD OF APPORTIONMENT

A. GENERAL

The Implementation Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements, which include the construction, maintenance, and servicing of landscaping improvements, streetlights and traffic signals.

Streets and Highways Code Section 22573 requires that maintenance assessments be levied according to benefit rather than the assessed value.

“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”

In addition, Article XIID and the Implementation Act require that a parcel's assessment may not exceed the reasonable cost for the proportional special benefit conferred to that parcel. Article XIID and the Implementation Act further provides that only special benefits are assessable, and the City must separate the general benefits from the special benefits. They also require that publicly owned properties that specifically benefit from the improvements be assessed.

B. SPECIAL BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments, notably:

Article XIID Section 2d defines District as follows:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service”;

Article XIID Section 2i defines Special Benefit as follows:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4a defines proportional special benefit assessments as follows:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

This District was formed to establish and provide for the improvements that enhance the presentation of the surrounding properties and developments. These improvements will directly benefit the parcels to be assessed within the District. The assessments and method of apportionment is based on the premise that the assessments will be used to construct and install landscape and lighting improvements within the District as well as provide for the annual maintenance of those improvements, and the assessment revenues generated by District will be used solely for such purposes.

The costs of the proposed improvements have been identified and allocated to properties within the District based on special benefit. The improvements to be provided by this District and for which properties will be assessed have been identified as an essential component and local amenity that provides a direct reflection and extension of the properties within the District which the property owners and residents have expressed a high level of support.

The method of apportionment (method of assessment) set forth in the Report is based on the premise that each assessed property receives special benefits from the landscape and lighting improvements within the District, and the assessment obligation for each parcel reflects that parcel's proportional special benefits as compared to other properties that receive special benefits.

To identify and determine the proportional special benefit to each parcel within the District, it is necessary to consider the entire scope of the improvements provided as well as the properties that benefit from those improvements. The improvements and the associated costs described in this Report, have been carefully reviewed and have been identified and allocated based on a benefit rationale and calculations that proportionally allocate the net cost of only those improvements determined to be of special benefit to properties within the District. The various public improvements and the associated costs have been identified as either “general benefit” (not assessed) or “special benefit”.

Proper maintenance and operation of parkway landscaping and streetlights provides special benefit to adjacent properties by providing community character, security, safety and vitality. In addition, these improvements will enhance the ability of property owners to attract and maintain customers as well as increase the viability of commercial development.

Landscaping Special Benefit

Landscaping and appurtenant facilities, if well maintained, provide beautification, shade and enhancement of the desirability of the surroundings, and therefore increase property value. Specifically, they provide a sense of ownership and a common theme in the community providing aesthetic appeal and increased desirability of properties.

Landscaping provides special benefit to those developments that are directly adjacent to the public streets.

Landscaping General Benefit

The Improvements were installed to directly benefit the property owners in the District to enhance business and development opportunities. Therefore, it has been determined that there are no general benefits associated with the landscaping improvements.

Lighting Special Benefit

The operation, maintenance and servicing of lighting along local streets and arterial streets of a development provide the following special benefits:

- Improved security of lots and parcels along the perimeter of the development;
- Improved nighttime visibility for the local access of emergency vehicles; and
- Improved safety and traffic circulation to and from parcels.

Street Lights General Benefit

Similar to the landscaping improvements described above, the Improvements were installed to directly benefit the property owners in the District to enhance business and development opportunities. Therefore, it has been determined that there are no general benefits associated with lighting improvements.

C. ASSESSMENT METHODOLOGY

To establish the special benefit to the individual parcels within the District, a formula that spreads the costs of the maintenance based on the special benefit must be established. The improvements have been reviewed and a formula has been established to apportion the maintenance costs based on benefit.

The method of assessment is based on the front footage of each parcel located within the District. The parcel's Front Footage was determined based on Assessor Parcel maps or other sources. Only Front Footage on Riverside Avenue was used.

Based on the above formula, the FY 2007/08 maximum assessment rate approved on January 17, 2007 through a property owner balloting (the "Initial

Assessment Rate” or the “Base Year Maximum Assessment Rate”) is \$6.45 per each foot of frontage.

The following formulas were used to first calculate the District’s Initial Assessment Rate and then each parcel’s FY 2007/08 assessment (proportional benefit):

Step 1:

$$\text{Balance to Levy} \div \text{Total Front Footage} = \text{Maximum Front Footage Rate}$$

Step 2:

$$\text{Parcel Front Footage} \times \text{Maximum Front Footage Rate} = \text{Maximum Assessment}$$

The Total Front Footage was the sum of all the Front Feet within the District. The Initial Assessment Rate per Front Foot was established by taking the total cost of improvements (Balance to Levy) and dividing that amount by the Total Front Footage within the District. The Initial Assessment Rate per Front Foot, which is also the FY 2007/08 Maximum Front Footage Rate, is then applied back to each individual parcel’s Front Footage to determine the parcel’s proportionate special benefit and assessment obligation (The FY 2007/08 Maximum Assessment).

D. ASSESSMENT RANGE FORMULA

The purpose of establishing an Assessment Range Formula is to provide for reasonable increases and inflationary adjustment to annual assessment rates without requiring the District to go through the requirements of Proposition 218 in order to get a small increase in assessments. This District provides for an annual adjustment to the Maximum Assessment Rate of the lesser of the percentage change in the Local Consumer Price Index of the San Francisco-Oakland-San Jose Area for All Urban Consumers (the “CPI”) or three percent (3%) (the “Escalation Percentage”). The CPI in this adjustment shall be determined through CPI data from the Bureau of Labor Statistics from December to December, beginning with the period from December 2006 to December 2007.

The Assessment Range Formula shall be applied to all future assessments within the District beginning in fiscal year 2008/09. Generally, if the proposed annual assessment rate for the current fiscal year is less than or equal to the calculated Maximum Assessment Rate, then the proposed annual assessment is not considered an increased assessment. The Maximum Assessment Rate is equal to the FY 2007/08 Maximum Assessment Rate, which was approved on January 17, 2007 through a property owner balloting (the “Initial Assessment Rate” or “Base Year Assessment Rate”) and adjusted annually by the Escalation Percentage.

Beginning in the second fiscal year (Fiscal Year 2008/09) and each fiscal year thereafter, the Maximum Assessment Rate would be recalculated, and a new Maximum Assessment Rate established within the District.

The Maximum Assessment Rate is adjusted annually and is calculated independent of the District's annual budget and proposed annual assessment. Any proposed annual assessment is not considered an increased assessment, even if the proposed assessment is greater than the assessment applied in the prior fiscal year.

Although the Maximum Assessment Rate will increase each year, the actual assessment rate may remain unchanged. The Maximum Assessment Rate adjustment is designed to establish a reasonable limit on assessments. The Maximum Assessment Rate calculated each year does not require or facilitate an increase to the annual assessment rate and neither does it restrict assessments to the adjusted maximum amount. If the budget and assessment for the fiscal year do not require an increase, or the increase is less than the adjusted Maximum Assessment Rate, then the required budget and assessment may be applied without additional property owner balloting. If the budget and assessments calculated requires an increase greater than the adjusted Maximum Assessment, then the assessment is considered an increased assessment and would be subject to balloting.

III. DISTRICT BUDGET

A. 2020/21 BUDGET

DESCRIPTION	AMOUNTS
<u>DIRECT COSTS</u>	
Contract Maintenance - Landscaping	\$7,350.00
Repair & Maintenance - Landscaping	9,720.00

C. 2020/21 FUND BALANCE INFORMATION

DESCRIPTION	AMOUNTS
<u>OPERATING RESERVE</u>	
Beginning Operating Reserve Balance 7-1-2020 (est.)	(\$8,732.30)
add: Replenish from FY 20/21 Levy	6,391.60
less: Use for FY 20/21 Expenses	
Transfer from/(to) the Rehab Reserve	29,418.20
Ending Operating Reserve Balance 6-30-2021 (est.)	\$27,077.50
<u>REHABILITATION RESERVE</u>	
Beginning Rehab Reserve Balance 7-1-2020 (est.)	120,050.32
add: Collect from FY 20/21 Levy	
less: Use for FY 20/21 Rehab Projects	(25,000.00)
Transfer from/(to) the Operating Reserve	(29,418.20)
Ending Rehab Reserve Balance 6-30-2021 (est.)	\$65,632.12

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping - Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping improvements, irrigation and related drainage systems, as well as maintenance of appurtenant facilities (the “improvements”).

Repair & Maintenance - Landscaping - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc.

Repair & Maintenance – Lighting - This line item includes bulb replacement and repairs that are generally unforeseen. This may include repair of damaged amenities due to vandalism, storms, etc.

Repair & Maintenance - Streetscape/Signage - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year’s assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer’s Report, together with other financial information required to determine the annual

assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park’s Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department’s estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer’s Report.

Public Hearing Publishing Costs –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A “Replenishment” increases the levy in order to replenish the Operating Reserve. On the other hand, a “Use” of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Contribution for /(Use of) Rehab Reserve — A “Contribution” increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a “Use of” of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

APPLIED ASSESSMENT RATE

Number of Assessable Parcels - The total number of parcels that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public rights-of-way or easements, common areas, and/or parcels within the boundaries of the District currently do not benefit from the improvements and are therefore not assessed.

Total Assessable Front Footage - The total amount of assessable Front Footage within the District in accordance with the Method of Assessment Section of this Report.

Applied Assessment Rate - The assessment rate to be applied to the front footage of each non-exempt parcel within the District for the current fiscal year.

Maximum Assessment Rate - The Maximum Assessment Rate per front foot for the current fiscal year.

Potential Maximum Assessment – The total amount that can be assessed against all non-exempt District parcels for the current fiscal year based upon the expected assessable front footage within the District.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2020 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2020 to December 31, 2020, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 20/21 Levy – This amount is added to the levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be

sufficiently funded to provide for expenditures from the period of July 1, 2020 (the beginning of the Fiscal Year) through December 31, 2020. If zero, this line item may not be shown in the budget.

Use for FY 20/21 Expenses – The amount of the Operating Reserve to be used to fund FY 20/21 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2020 (the beginning of the Fiscal Year) through December 31, 2020. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2021 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2021. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2020 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2020. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 20/21 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 20/21 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2021 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2021. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

A five-year Capital Improvement Plan showing projected expenditures related to the rehabilitation, restoration and/or replacement of District improvements, and other allowable costs, is shown below.

Description	FY 2020/21	FY 2021/22	FY 2022/23	FY 2023/24	FY 2024/25	4 Year Total
Grid tree pruning, removal and replacement of declining trees		\$1,400	\$1,400	\$1,400	\$1,400	\$5,600
Improve street furniture, trash receptacles, bike racks, bus stop shelters					\$2,000	\$2,000
Replace plants, landscaping, irrigation and/or drainage systems		\$1,500	\$11,500	\$1,500	\$1,500	\$16,000
Replace public street lights, lighting fixtures, poles/meters, safety, security, ornamental lights		\$7,000	\$7,000	\$7,000	\$7,000	\$28,000
Replace entry signs and decorative banners and hardware		\$2,000	\$2,000	\$8,032	\$2,000	\$14,032
\$25k Insurance deductible to repair/replace train monument if demolished	\$25,000					\$0
Total Projected Expenditures	\$25,000	\$11,900	\$21,900	\$17,932	\$13,900	\$65,632

From time to time, funds held in a Rehabilitation Reserve may be needed to respond to changing needs due to the condition of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the District's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and/or operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map for the District has previously been submitted to the Clerk of the City in the format required under the Act and is, by reference, hereby made part of this Report. These District Boundary Maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a summary of the District's Boundaries is presented herein.

APPENDIX B — 2020/21 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, shall be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways including public greenbelts and parkways; utility rights-of-ways; common areas; landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2020/21. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2020/21 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 20-162

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, INITIATING PROCEEDINGS FOR THE ANNUAL LEVY OF ASSESSMENTS FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, FOR FISCAL YEAR 2020/2021, PURSUANT TO THE PROVISIONS OF PART 2 OF DIVISION 15 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Vernon Street Landscaping and Lighting District (hereafter referred to as the “District”) pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the “Act”), that provides for levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of street lighting, landscaping, and all appurtenant facilities and operations related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter “Engineer”) for the purpose of assisting with the establishment of the assessments, the annexation of territory, and to prepare and file an Engineer’s Annual Levy Report (hereinafter referred to as the “Engineer’s Report”) with the City Clerk in accordance with the act, and in accordance with the California Constitution, Articles XIII C and XIII D;

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Engineer’s Report: The City Council hereby orders the Engineer to prepare and file with the City Clerk the Engineer’s Report concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22622 (d)* of the Act.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: maintenance, servicing, administration and operation of landscape, lighting and streetscape improvements, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer’s Report describes all new improvements or substantial changes in existing improvements.

RESOLUTION NO. 20-163

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, DECLARING ITS INTENTION TO LEVY ANNUAL ASSESSMENTS FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021

The City Council of the City of Roseville, California (hereafter referred to as the “City Council”) does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Vernon Street Landscaping and Lighting District (hereafter referred to as the “District”), and initiated proceedings for Fiscal Year 2020/2021, pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the “Act”) that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of all improvements and facilities related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services for the purpose of assisting with the Annual Levy of the District, and to prepare and file a report with the City Clerk in accordance with the Act; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, PURSUANT TO *CH AFTER 3, SECTION 22624* OF THE ACT, AS FOLLOWS:

Section 1 Intention: The City Council hereby declares that it is its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay the annual costs of the improvements.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: maintenance, servicing, administration and operation of landscape, lighting and streetscape improvements, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer’s Report describes all new improvements or substantial changes in existing improvements.

Section 3 Boundaries and Designation: The boundaries of the District are described as the boundaries previously defined in the formation documents of the original District. The District is known and designated as:

“Vernon Street Landscaping and Lighting District”

Section 4 Proposed Assessment Amounts: The proposed assessments are outlined in the Report. District Assessments are calculated in accordance with the method of apportionment established for the District and do not exceed the assessment rates and annual inflationary adjustment previously authorized by City Council and approved by the property owners in accordance with the provisions of the California State Constitution, Article XIID.

Section 5 Public Hearing(s): The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22626* of the Act.

Section 6 Notice: The City Clerk shall give notice of the time and place of the Public Hearing by causing the publishing of this Resolution once in a local newspaper not less than ten (10) days before the date of the hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices.

Section 7 Time and Place of Public Hearing: Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Wednesday, May 20, 2020 at 6:00 p.m.**, or as soon thereafter as feasible in the regular meeting chambers located at 311 Vernon Street, Roseville, California.

RESOLUTION NO. 20-164

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR PRELIMINARY APPROVAL OF THE ENGINEER'S ANNUAL LEVY REPORT FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2020/2021

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, the City Council has, by previous Resolutions, ordered the preparation of an Annual Levy Report (hereafter referred to as the "Engineer's Report") for the district known and designated as the Vernon Street Landscaping and Lighting District (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereinafter referred to as the "Act"); and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer"), for the purpose of assisting with the establishment of the assessments and to prepare and file an Engineer's Report with the City Clerk in accordance with the Act, and in accordance with the requirements of the California Constitution, Articles XIIC and XIID; and,

WHEREAS, there has now been presented to this City Council the Engineer's Report as required by *Chapter 1, Article 4, Section 22566* of said Act; and,

WHEREAS, this City Council has carefully examined and reviewed the Engineer's Report as presented, and is preliminarily satisfied with the District, each and all of the budget items and documents as set forth therein, and is satisfied that the assessments, on a preliminary basis, have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within the District, as set forth in said Engineer's Report; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Engineer's Report as presented, consists of the following:

- a. A Description of Improvements
- b. The Annual Budget (Costs and Expenses of Maintenance, Services, Operations and District Administration)
- c. The Assessment Roll containing the Fiscal Year 2020/2021 Levy for each Assessor Parcel within the District

Section 3 The Engineer's Report is hereby approved on a preliminary basis, and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 4 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Engineer's Report.

I. OVERVIEW

A. INTRODUCTION

The City of Roseville (“City”) annually levies and collects special assessments in order to maintain the improvements within the Vernon Street Landscaping and Lighting District (“District”). The District was formed in January of 2001 and is levied annual assessments pursuant to *the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code* (“1972 Act”).

The Engineer’s Report (“Report”) describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2020 through June 30, 2021. The special benefit assessments are based on historical and estimated costs to maintain the District improvements. These assessments, which provide a direct and special benefit to properties within the District, will provide funding for the operation and maintenance of District improvements.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (“APN”) by the Placer County Assessor’s Office. The Placer County Auditor/Controller uses Assessor’s Parcel Numbers and specific Tax Code Accounts, to identify on the County’s tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will by resolution, order the improvements to be made and confirm the levy and collection of assessments herein pursuant to the Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council defines the assessments to be applied to each parcel within the District for Fiscal Year (“FY”) 2020/21. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved by the City Council.

B. COMPLIANCE WITH THE CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the 1972 Act and are in compliance with the provisions of the California Constitution Article XIID (Proposition 218).

The District has been formed pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code. Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the Act.

Prior to FY 2001/02, the City initiated (Resolution 00-523) and conducted property owner protest ballot proceedings (Resolution 01-22) in accordance with Article XIID of the California Constitution ("Article XIID") for the parcels within the District. An annual rate escalator was also included in the ballot that allows for an annual inflationary increase equal to the percentage change in the Consumer Price Index of the San Francisco-Oakland-Hayward Area (the "CPI") of each succeeding year (the "Escalation Percentage"). At the conclusion of the Public Hearing held on January 17, 2001, all property owner ballots returned were tabulated to determine if majority protest existed. The result of the protest proceeding was an approval of the assessment rate and the annual inflationary increase for maintaining the improvements within the District.

Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls.

C. DESCRIPTION OF DISTRICT BOUNDARIES

The District is located in downtown Roseville and includes all parcels that front along Vernon Street between Folsom Road and the Riverside/Douglas Boulevard. See Appendix A for District boundary map.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to a proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.

- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.

- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF THE IMPROVEMENTS AND MAINTENANCE

The District ensures the continued maintenance, servicing, administration and operation of various landscape, lighting and streetscape improvements and associated appurtenances that are required to keep the improvements in a healthy, vigorous, and satisfactory condition. The assessable parcels receive benefit from the above improvements within the District.

Specific improvements include installation, maintenance and servicing of public facilities, including, but not limited to street trees, sidewalks, curbs, gutters, parking stripes, turf, brick pavers, planters, gateways, benches, bike racks, signage, trash receptacles, and lighting throughout the boundaries of the District (the “Improvements”).

As applied herein, “installation” means the construction of public Improvements, including, but not limited to, land preparation, such as grading, leveling, cutting and filling, sod, landscaping, irrigation systems, sidewalks and drainage, lights, equipment, turf, brick pavers, planters, gateways, benches, bike racks and signage.

“Maintenance” means the furnishing of services and materials for the ordinary and usual maintenance, operation and servicing of any Improvement, including repair, removal or replacement of all or any part of any Improvement; providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury; the removal of trimmings, rubbish, debris, and other solid waste, and the cleaning, sandblasting, and painting of Improvements to remove or cover graffiti.

“Servicing” means the furnishing of electric current, or energy, gas or other illuminating agent for any public lighting facilities or for the lighting or operation of any other Improvements; or water for the irrigation of any landscaping, the operation of any fountains, or the maintenance of any other Improvements.

Plans and specification for the Improvements to be maintained are on file in the office of the Economic and Community Services Director at 311 Vernon Street, Roseville, CA 95678.

All assessable parcels identified as being within the District share in both the cost and the benefits of the improvements. The costs associated with the Improvements are equitably spread among all benefiting parcels within the District. Only parcels that receive direct benefit from the Improvements are assessed, and each parcel is assessed in proportion to the estimated benefit received. The funds collected are dispersed and used for only the services and operation provided to the District.

II. METHOD OF APPORTIONMENT

A. GENERAL

The 1972 Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements which include the construction, maintenance and servicing of public lights, landscaping and appurtenant facilities. The 1972 Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”

The formula used for calculating assessments in the District therefore reflects the composition of the parcels, and the Improvements and services provided, to fairly apportion the costs based on estimated benefit to each parcel.

B. BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIIID addresses several key criteria for the levy of assessments, notably:

Article XIIID Section 2d defines District as follows:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service”;

Article XIIID Section 2i defines Special Benefit as follows:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIIID Section 4a defines proportional special benefit assessments as follows:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

This District was formed to establish and provide for the improvements that enhance the presentation of the surrounding properties and developments. These improvements will directly benefit the parcels to be assessed within the District. The assessments and method of apportionment is based on the premise that the assessments will be used to construct and install landscape and lighting improvements within the District as well as provide for the annual maintenance of those improvements, and the assessment revenues generated by District will be used solely for such purposes.

The costs of the proposed improvements have been identified and allocated to properties within the District based on special benefit. The improvements to be provided by this District and for which properties will be assessed have been identified as an essential component and local amenity that provides a direct reflection and extension of the properties within the District which the property owners and residents have expressed a high level of support.

The method of apportionment (method of assessment) set forth in the Report is based on the premise that each assessed property receives special benefits from the landscape and lighting improvements within the District, and the assessment obligation for each parcel reflects that parcel's proportional special benefits as compared to other properties that receive special benefits.

To identify and determine the proportional special benefit to each parcel within the District, it is necessary to consider the entire scope of the improvements provided as well as the properties that benefit from those improvements. The improvements and the associated costs described in this Report, have been carefully reviewed and have been identified and allocated based on a benefit rationale and calculations that proportionally allocate the net cost of only those improvements determined to be of special benefit to properties within the District. The various public improvements and the associated costs have been identified as either “general benefit” (not assessed) or “special benefit”. The City initiated and conducted property owner protest ballot proceedings in accordance with Article XIIID. Each of the proposed Improvements, the associated costs and assessments were identified and allocated based on special benefit pursuant to the provisions of Article XIIID and 1972 Act. Additionally, the Improvements and the annual costs

of ensuring the maintenance and operation of the Improvements are of direct and special benefit to the properties.

The City annually levies and collects special benefit assessments in order to maintain and service the District Improvements. The District provides for specific Improvements and services that include the maintenance and operation of landscaping and lighting Improvements and associated appurtenances located within the District's public rights-of-way and dedicated easements. The annual assessment is based on the historical and estimated cost to maintain the Improvements that provide a benefit to properties within these Districts. The Improvements within the District and the costs of those Improvements are identified and budgeted separately, including all expenditures, deficits, surpluses, revenues, and reserves.

All Improvements within the District and the properties associated with those Improvements were reviewed for benefit prior to the formation of the District. Because the Improvements affront the benefited parcels, it has been determined that there is no measurable general benefit to properties outside the District or to the public at large. In making this determination it should be noted that similar improvements within California are typically maintained by individual property owners, through some type of association or a special district as allowed by State Law since the on-going maintenance of these improvements are a special benefit to the properties associated with those improvements.

The method of apportionment (method of assessment) for the District is based on the premise that each of the assessed parcels within the District receives special benefit from the Improvements maintained and financed by District assessments. The presence of these Improvements and the close proximity of the Improvements to the properties within the District enhance the desirability and security of properties within the District.

The landscape Improvements provided by the District may include landscaped parkways, perimeters, entryways, local medians, slopes, internal amenities and appurtenant facilities. Street lighting Improvements may include all energy costs and necessary maintenance to the facilities related thereto. The annual assessments outlined in this Report are proposed to cover the estimated costs to provide all necessary service, operation, administration, and maintenance required to keep these Improvements in a healthy, vigorous, and satisfactory condition. The special benefits associated with the local landscaping Improvements are specifically:

The special benefits associated with all landscaping Improvements are specifically:

- Enhanced desirability of properties through association with the Improvements.

- Improved aesthetic appeal of properties providing a positive representation of the area and properties.
- Enhanced adaptation of the urban environment within the natural environment from adequate landscaping.
- Environmental enhancement through improved dust and debris control, and fire prevention.
- Increased sense of pride in ownership of property within the District resulting from well-maintained Improvements associated with the properties.
- Enhanced quality of life through well-maintained landscaped areas.
- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the District through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels by moderating temperatures, providing oxygenation and attenuating noise.

The special benefits of street lighting are the convenience, safety, and security of property, improvements, and goods. Specifically:

- Enhanced deterrence of crime and the aid to police protection.
- Increased nighttime safety on streets and roads within the Districts.
- Improved ability of pedestrians and motorists to see.
- Improved ingress and egress to property.
- Reduced vandalism and other criminal acts and damage to Improvements or property.
- Improved traffic circulation and reduced nighttime accidents and personal property loss.
- Increased promotion of business during nighttime hours in the case of commercial properties.

All of the preceding special benefits contribute to a specific enhancement and desirability of each of the assessed parcels within the District.

C. DESCRIPTION OF THE METHOD OF APPORTIONMENT

Pursuant to the 1972 Act, the costs of the District may be apportioned by any formula or method that fairly distributes the net amount to be assessed, among all assessable parcels within the District in proportion to the estimated special benefits to be received by each such parcel from the Improvements. The special benefit formula used should reflect the composition of the parcels, the Improvements and

services provided to fairly proportion the costs based on estimated special benefit to each parcel within the District. All assessable parcels within the District shall receive a direct special benefit from the services and Improvements provided by the District.

Article XIID of the California Constitution specifies that only special benefits are assessable and that the City must separate the general benefits from the special benefits conferred on any parcel. Since the District is a downtown business area and the Improvements that affront each District parcel primarily attract and retain an increased customer base, these benefits enhance the District parcels and there is no measurable benefit to the public at large. Therefore, 100% of the Improvements are considered special benefit to the District parcels. The cost of maintaining the Improvements is therefore identified as special benefit and has been allocated to the special assessments.

It was determined that a uniform assessment rate per foot of frontage upon Vernon Street would fairly distribute the net amount to be assessed due to the following reasons:

1. The assessments are based upon a specific property owner's special benefit received from the Improvements.
2. The special benefits should be directly related to the extent at which a property fronts the improvements, relative to other properties in the District.

The base assessment rate for the District was \$4.59 per linear foot in FY 2001/02 and was determined using the formula below.

$$\text{Assessment Rate Per Foot} = \frac{\text{Balance to Levy}}{\text{Total Feet of Frontage}}$$

The annual assessment amount for each parcel was then determined using the formula below:

$$\text{Parcel Front Footage} \times \text{Rate per Linear Foot} = \text{Parcel Assessment Amount}$$

D. ANNUAL INFLATIONARY ADJUSTMENT

Commencing with FY 2002/03, the maximum assessment rate is to increase by the percentage change in the Consumer Price Index of the San Francisco-Oakland-Hayward ("CPI") as of January of each succeeding year (the "Escalation Percentage"). Since the Department of Labor, Bureau of Labor Statistics does not publish a CPI for January; the CPI for preceding month shall be used since this is the CPI *available* in the month of January. The District's starting CPI Index of 184.1, December of 2000, is hereby established as the base CPI (the "Base Year CPI Index").

If the proposed assessment increases over the prior fiscal year by a percentage no greater than the Escalation Percentage as defined above, then the proposed assessment is not considered an increase. This assessment range formula shall be applied to all future assessments within the District. Generally, if the proposed annual assessment rate for the Current Fiscal Year is less than or equal to the calculated maximum assessment rate, then the proposed annual assessment is not considered an increased assessment.

E. APPEALS AND INTERPRETATION

Any property owner, who believes that the assessment levied on the subject property is in error as a result of incorrect information being used to apply the foregoing method of assessment, may file a written appeal with the Finance Director of the City of Roseville or his or her designee. Any such appeal is limited to correction of an assessment during the then Current Fiscal Year. Upon the filing of any such appeal, the Director of Housing and Redevelopment or his or her designee will promptly review the appeal and any information provided by the property owner. If the Director of Housing and Redevelopment or his or her designee finds that the assessment should be modified, the appropriate changes shall be made to the assessment roll. However, if any such changes are approved after the County of Placer's deadline for adjustments to the tax roll, the Director of Housing and Redevelopment or his or her designee is authorized to approve a refund of the reduction amount to the property owner. Any dispute over the decision of the Director of Housing and Redevelopment or his or her designee, shall be referred to the City Council of the City of Roseville and the decision of the City Council of the City of Roseville shall be final.

F. DETERMINATION OF FRONT FOOTAGE

The front footage of each assessable parcel is subject to revision and/or correction using measurements of front footage found on the then current Placer County Assessor's Parcel Maps or through direct measurement by City personnel. Any such correction that increases a Parcel Assessment shall not be considered an increased assessment subject to the procedural provisions of Article XIID.

III. DISTRICT BUDGET

A. FY 2020/21 BUDGET

DESCRIPTION	AMOUNTS
<u>DIRECT COSTS</u>	
Contract Maintenance - Landscaping	\$4,830.00
Repair & Maintenance - Landscaping	10,150.00
Repair & Maintenance - Lighting	2,000.00
Repair and Maintenance - Streetscape and Signage	2,500.00
Utilities	9,600.00

Transfer from/(to) the Operating Reserve	(9,615.69)
Ending Rehab Reserve Balance 6-30-2021 (est.)	\$29,070.44

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping - Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping corridors, street medians, entryways, irrigation and related drainage systems as well as maintenance of appurtenant facilities (the "improvements").

Repair & Maintenance – Landscaping - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc. If zero, this line item may not be shown in the budget.

Repair & Maintenance – Lighting - This line item includes bulb replacement and repairs that are generally unforeseen. This may include repair of damaged amenities due to vandalism, storms, etc.

Repair & Maintenance - Streetscape/Signage - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district

administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's' Report.

Public Hearing Publishing Costs –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A “Replenishment” increases the levy in order to replenish the Operating Reserve. On the other hand, a “Use” of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Contribution for /(Use of) Rehab Reserve — A “Contribution” increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a “Use of” of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under “FUND BALANCE INFORMATION” in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

APPLIED ASSESSMENT RATE

Number of Assessable Parcels - The total number of parcels that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public rights-of-way or easements, common areas, and/or parcels within the boundaries of the District currently do not benefit from the improvements and are therefore not assessed.

Total Assessable Front Footage - The total linear footage of that portion of each assessable parcel's boundary that is contiguous with Vernon Street.

Applied Assessment Rate per Front Foot - This amount represents the rate being applied to the front footage of each parcel for the Current Fiscal Year.

Maximum Assessment Rate per Front Foot - This amount represents the maximum rate that can be being applied to the front footage of each parcel for the Current Fiscal Year.

Maximum Potential Assessment – The total amount that is expected to be assessed against all parcels within the District for the Current Fiscal Year.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2020 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2020 to December 31, 2020, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 20/21 Levy – This amount is added to the levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2020 (the beginning of the Fiscal Year) through December 31, 2020. If zero, this line item may not be shown in the budget.

Use for FY 20/21 Expenses – The amount of the Operating Reserve to be used to fund FY 20/21 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve

Balance to an amount no greater than the expected District costs for the period of July 1, 2020 (the beginning of the Fiscal Year) through December 31, 2020. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2021 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2021. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2020 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2020. Streets and Highways Code 22660 allows the District generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 20/21 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 20/21 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically,

funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2021 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2021. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment. Should the District have no Rehabilitation Reserve balances or related activity, no Rehabilitation Reserve information shall be presented in the Report.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

A five-year Capital Improvement Plan showing projected expenditures related to the rehabilitation, restoration and/or replacement of District improvements, and other allowable costs, is shown below.

Description	FY 2020/21	FY 2021/22	FY 2022/23	FY 2023/24	FY 2024/25	4 Year Total
Grid pruning, removal and replacement of declining trees	\$2,530	\$2,530	\$2,530	\$2,530	\$2,530	\$10,120
Replace, repair, renovate and/or refurbish plants, landscaping & related materials	\$5,000	\$6,000	\$5,000	\$5,000	\$3,000	\$19,000
Replace, repair electrical outlets	\$1,000	\$2,000	\$3,000	\$1,500	\$1,000	\$7,500
Total Projected Expenditures	\$8,530	\$10,530	\$10,530	\$9,030	\$6,530	\$36,620

From time to time, funds held in a Rehabilitation Reserve may be needed to respond to changing needs due to the condition of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the Districts' Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and/or operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map for the District has previously been submitted to the Clerk of the City in the format required under the 1972 Act and is, by reference, hereby made part of this Report. These District Boundary Maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a summary of the District's Boundaries is presented herein.

Assessment diagram

APPENDIX B — 2020/21 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, shall be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways including public greenbelts and parkways; utility rights-of-ways; common areas; landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2020/21. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2020/21 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

COUNCIL COMMUNICATION

CC #: 0747

File #: 0200

Title: Utility Billing System - Software License Agreement Amendment

Contact: Andrea Blomquist 916-774-5317 ablomquist@roseville.ca.us

Meeting Date: 5/6/2020

Item #: 6.19.

RECOMMENDATION TO COUNCIL

Staff recommends the City Council adopt a resolution authorizing the City Manager to execute a first amendment to Software License Agreement with N. Harris Computer Corporation.

BACKGROUND

The City of Roseville currently contracts with N. Harris Computer Corporation for Cayenta, a customer information system used for utility billing. As part of the City's standard operating procedures, Utility Billing staff are executing additional system tools from Cayenta to enhance customer service to both internal and external customers. The annual licensing fees for these tools is \$9,250.

FISCAL IMPACT

The total cost of the contract amendment is not to exceed \$9,250. This cost is included in the approved FY2019-20 Finance/Utility Billing operating budgets.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. An amendment to a Software License Agreement meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Respectfully Submitted,

Andrea Blomquist, Billing Services Manager

Dennis Kauffman, Assistant City Manager/Chief Financial Officer

A handwritten signature in blue ink, consisting of several overlapping loops and a horizontal line, likely representing the name Dominick Casey.

Dominick Casey, City Manager

Description

Resolution No. 20-139

Cayenta Software Agreement Addendum

RESOLUTION NO. 20-139

APPROVING A FIRST AMENDMENT TO SOFTWARE LICENSE AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND N. HARRIS CORPORATION, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, a first amendment to software license agreement for the customer information system used for utility billing services, by and between the City of Roseville and N. Harris Corporation, has been reviewed by the City Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said first amendment is hereby approved and that the City Manager is authorized to execute it on behalf of the City of Roseville.

PASSED AND ADOPTED by the Council of the City of Roseville this ____ day of _____, 20_, by the following vote on roll call:

AYES COUNCILMEMBERS:

NOES COUNCILMEMBERS:

ABSENT COUNCILMEMBERS:

MAYOR

ATTEST:

City Clerk

**FIRST AMENDMENT TO
SOFTWARE LICENSE AGREEMENT**

THIS FIRST AMENDMENT TO AGREEMENT is made and entered into this ____ day of _____, 20__, by and between the City of Roseville, a municipal corporation ("CITY"), and N. Harris Computer Corporation, a Canadian corporation ("CONSULTANT"); and

W I T N E S S E T H:

WHEREAS, CITY and CONSULTANT previously entered into a Software License Agreement dated September 3, 2014 ("Agreement") regarding the implementation of a new Customer Information System ("Project"); and

WHEREAS, CITY desires to amend the Agreement to include additional services as described in CONSULTANT's License Agreement Addendum, which is attached hereto as Exhibit "A" and incorporated herein by reference; and

WHEREAS, CONSULTANT is willing and able to provide such additional services.

NOW, THEREFORE, the parties agree as follows:

1. CONSULTANT shall provide additional services as described in Exhibit "A" of this First Amendment to Agreement.
2. Paragraph 2 of the Agreement is amended by adding an additional paragraph to read as follows:

"CITY shall pay nine thousand, two hundred fifty dollars (\$9,250), in consideration of the additional services as set forth in Exhibit "A" to the First Amendment to Agreement."

3. All other provisions of the Agreement shall remain unchanged and in full force and effect.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this First Amendment to Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20__, and CONSULTANT has caused this First Amendment to Agreement to be executed.

Title: Main Gas Supplier Agreement - Transaction Confirmation
Contact: Petra Wallace 916-774-5510 pwallace@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.20.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt a resolution authorizing the City Manager to execute a Main Gas Supplier Agreement ("Agreement") with Shell Energy North America L.P. ("Shell").

BACKGROUND

In order to operate the Roseville Energy Park and the Roseville Combustion Turbine project, the City purchases natural gas. This gas is transported on the Pacific Gas and Electric pipeline system. This pipeline system enforces operational restrictions that can result in substantial penalties when scheduled use varies from actual daily usage. To mitigate this risk, smaller gas purchasers, such as the City, can join a supplier pool by executing a main gas supplier agreement with a larger gas trading company. Larger trading companies provide a greater level of protection than the City could achieve alone due to size, scheduled volume, diversity of usage, and gas storage.

In December 2019, staff pre-qualified the 8 companies to bid to be the main gas supplier for the City. Staff issued a Request for Proposals and received responses from three qualified companies. Staff and ACES Power Marketing (the City's Power Management Services Provider) independently ranked the responses. Shell's proposal came in first place based on Roseville's rating criteria.

The Agreement will become effective on June 1, 2020 and extend for a five-year term through May 31, 2025. There is a 90-day notice of cancellation provision within the Agreement. This Agreement renews the existing main gas supplier agreement with Shell Energy North America L.P., authorized under City Council Resolution 15-105, and expiring on May 31, 2020.

FISCAL IMPACT

The Agreement sets out the terms and conditions for Shell to provide natural gas balancing services to the City which are estimated to be approximately \$30,000 per year. Transactions under this Agreement will be executed pursuant to Roseville's Energy Trading Authority Policy.

The cost of those transactions is included in the annual budget for the Electric Department. There is no additional budgetary impact.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. A gas supplier agreement meets the above criteria and is not subject to CEQA. No additional environmental review is required.

This Revised Transaction Confirmation is subject to the NAESB Base Contract between SHELL ENERGY NORTH AMERICA (US), L.P. ("Shell Energy") and the CITY OF ROSEVILLE ("Roseville") dated December 1, 2006.

<u>Delivery Point</u>	<u>Designated Quantity</u>	<u>Contract Price</u>	<u>Type of Service</u>	<u>Period of Delivery</u>
See Definitions Below	0 to 50,000 MMBtu/day (See Below)	See Below	Firm (See Below)	June 1, 2020 through May 31, 2025 (per Section B, below)

A. Definitions:

Buyer means the CITY OF ROSEVILLE ("Roseville")

Seller means SHELL ENERGY NORTH AMERICA (US), L.P. ("Shell Energy")

Delivery Point means Shell Energy's PG&E Contracted Marketer Pool No. NBAA 1021.

Type of Service-Firm Shell Energy shall supply full requirements for Roseville's facilities less the fixed volumes of natural gas supplied by third parties.

Trading Day "Trading Day" shall be up to 6:00 a.m. prevailing Pacific time ("PPT") on a regular trading day as designated in the Trading Calendar immediately prior to the Gas Flow Day.

Trading Calendar "Trading Calendar" shall be the Next Day Trading Calendar for Physical Gas published by the Intercontinental Exchange ("ICE") for the applicable calendar year.

Intra-Day Trading Period "Intra-Day Trading Period" shall be the period after 6:00 a.m. prevailing Pacific time ("PPT") on a regular trading day as designated in the Trading Calendar immediately prior to

the Gas Flow Day and up to 2:00 p.m. prevailing Pacific time ("PPT") on the Gas Flow Day, if such Gas Flow Day is also a regular Trading Day

Gas Flow Day "Gas Flow Day" shall be the calendar day of actual gas use.

Imbalance Gas Flow Day "Imbalance Gas Flow Day" shall be the calendar day immediately following the Imbalance Trading Day.

Imbalance Trading Day "Imbalance Trading Day" shall be the NEXT Trading Day following the Gas Flow Day on which the imbalance occurred as designated in the Trading Calendar. (i.e. if the Gas Flow Day is Monday, the applicable Imbalance Trading Day is Tuesday for Imbalance gas flows on Wednesday; if the Gas flow Days are Friday through Sunday, the applicable Imbalance Trading Day is Monday for Imbalance gas flows on Tuesday.)

Daily Index Price "Daily Index Price" shall be the price reported in Platt's *Gas Daily* "Daily price survey" under the heading "Citygates" "PG&E Citygate", under the column "Midpoint" on the day published where "Flow date(s)" corresponds to the respective Gas Flow Day or Imbalance Gas Flow Day.

Monthly Index Price "Monthly Index Price" shall be the price as reported by *Natural Gas Intelligence* "NGI's Bidweek Survey," "California" "PG&E Citygate" under the column "avg.".

Day-Ahead Contract Quantity: "Day-Ahead Contract Quantity (DACQ)" means such quantity of Gas per Day, up to the "Designated Quantity" as Roseville may purchase from or sell to SHELL ENERGY for a particular Day, on the Trading Day. Shell Energy may, but shall not be obligated to sell a Day-Ahead Contract Quantity in excess of 50,000 MMBtu/Day. In the event Roseville fails to nominate the DACQ by 6:00 a.m. on the day before the Trading Day, the DACQ will be deemed to be zero.

Intra-Day Contract Quantity "Intra-Day Contract Quantity (IDCQ)" means such quantity of Gas per Day as Roseville purchases or sells to Shell Energy during the Intra-Day Trading Period. In the event Roseville fails to nominate the IDCQ within the Intra-Day Trading Period, the IDCQ will be deemed to be zero.

Imbalance Daily Quantity "Imbalance Daily Quantity (IDQ)" if actual meter usage on a Gas Flow Day is more or less than all scheduled gas quantities purchased and sold including, but not limited to, Month-Ahead Contract Quantity, Day-Ahead Contract Quantity, Intra-Day Contract Quantity, Third-Party Quantity delivered, and Qualifying Use Quantity, then Shell Energy will be deemed to be either a buyback from or a sell to Roseville such quantities.

Month Ahead Contract Quantity "Month-Ahead Contract Quantity (MACQ)" means a quantity of gas per day that Roseville purchases from Shell Energy for the upcoming Month. The MACQ must be delivered in equal daily quantities within the month delivered up to the Designated Quantity less any PPQ and HDQ. The MACQ confirmation must be executed no later than seven (7) Business Days prior to the first Business Day of the upcoming Month. The parties may, but are not obligated to, nominate and deliver an MACQ in excess of the Designated Quantity. If Roseville fails to nominate an MACQ within the time frame set forth above, the MACQ shall be deemed to be zero for the upcoming Month.

Third Party Pre-Pay Monthly Quantity "Third Party Pre-Pay Monthly Quantity (PPQ)" means such quantity of gas purchased by Roseville from third party suppliers under a Natural Gas Prepay Agreement with a predefined monthly schedule, and delivered at the Delivery Point for receipt into Shell Energy's Contracted Marketer Pool (PG&E No. 0602) in equal daily quantities. Shell Energy must receive notification of any PPQ for the upcoming month(s) no later than five Business Days prior to the first Business Day of the delivery month.

Third Party Physical Gas Hedge Daily Quantity "Third Party Physical Gas Hedge Daily Quantity (HDQ)" means any such quantity of gas per day purchased by Roseville from third party suppliers under a Natural Gas physical hedge Agreement with a predefined daily schedule, and delivered

at the Delivery Point for receipt into Shell Energy's Contracted Marketer Pool (PG&E No. 0602) in equal daily quantities. Shell Energy must receive notification of any HDQ for the upcoming day(s) no later than the Trading Day prior to the Day of delivery.

B. PERIOD OF DELIVERY

The Period of Delivery shall be from June 1, 2020 through May 31, 2025, however either Party shall have the right to terminate this Transaction Confirmation upon ninety (90) days' written notice to the other Party. Any termination shall be subject to the terms of the Base Contract.

C. SHELL ENERGY DELIVERIES OF GAS TO ROSEVILLE

Contract Price:

Month-Ahead Contract Quantity Price: The price for the MACQ shall be as mutually agreed by the parties, or in the absence of a mutually agreed price:

- For deliveries during November 1-March 31, the price shall be the Monthly Index Price plus \$0.015/MMBtu
- For deliveries during April 1-October 31, the price shall be the Monthly Index Price plus \$0.015/MMBtu

Day-Ahead Contract Quantity Price: For all DACQ volumes nominated on or before 6:00 a.m. PPT on the day before the Trading Day, the price for the DACQ shall be equal to the Daily Index Price, unless otherwise mutually agreed upon by the parties.

Intra-Day Contract Quantity Price: The price for the IDCQ shall be:

- the price mutually agreed upon by the parties, or
- In the absence of a mutually agreed upon price, the higher of the current or next day Daily Index Price plus \$.05/MMBtu for the Trading Day.

PPQ and HDQ Price: The price for all PPQ and HDQ volumes nominated by or on behalf of Roseville to SHELL ENERGY's Contracted Marketer Pool (PG&E No. 0602) shall be equal to \$0.00/MMBtu.

D. ROSEVILLE REDELIVERIES OF GAS TO SHELL ENERGY

Contract Price:

Day-Ahead Contract Quantity Price: For all redelivered DACQ volumes nominated on or before 6:00 a.m. PPT on the day before the Trading Day, the price for the DACQ shall be equal to the Daily Index Price, unless otherwise mutually agreed upon by the parties.

Intra-Day Contract Quantity Price: The price for the IDCQ shall be:

- the price mutually agreed upon by the parties, or
- In the absence of a mutually agreed upon price, the lower of the current or next day Daily Index Price minus \$.05/MMBtu for the Trading Day.

E. OPERATIONAL FLOW ORDERS

Buyer shall be responsible for any and all daily associated penalties, cash outs, or non-compliance charges imposed on Seller pursuant to PG&E Gas Rule No. 21 that are attributable to Buyer's Excess Imbalance and/or Buyer's Shortfall Imbalance being outside of the Transporter's tolerance band while Daily Balancing or OFO/EFO requirements are in effect. The price for Buyer's Daily Excess Imbalance and/or Buyer's Daily Shortfall Imbalance outside of the Transporter's tolerance band shall be equal to the Transporter's Tariff imbalance price per MMBtu. Notwithstanding anything to the contrary, SHELL ENERGY shall be responsible for only those penalties caused by SHELL ENERGY actually imposed

upon it by PG&E in the case where, after receiving proper notice from Roseville in accordance with Sections C and D above, SHELL ENERGY fails to schedule and deliver to the Delivery Point all contract quantities, except any PPQ or HDQ.

F. MONTHLY VOLUME DIFFERENTIAL (TRUE-UP)

If, at the conclusion of a delivery month, there is a volumetric difference between what is reported as the meter read from PG&E for the month and the volumes sold to Roseville (including MACQ, DACQ and IDCQ) for that month, the following pricing shall apply:

- (i) For all volumetric differences beyond five percent (5%) (the "Tolerance Band") of the monthly volumes burned, the price per MMBtu shall be sold or repurchased at a price equal to the average of the applicable Month's Daily Index Price.
- (ii) For all volumes that exceed the Tolerance Band:
 - a. Overburns: If the meter read from PG&E is greater than the volumes sold to Roseville (including MACQ, DACQ and IDCQ), Roseville shall pay to Shell Energy for the volumes that exceed the Tolerance Band at a price equal to the monthly average common high for the applicable Month's Gas Daily, "Daily Price Survey" per MMBtu.
 - b. Underburns: If the meter read from PG&E is less than the volumes sold to Roseville (including MACQ, DACQ and IDCQ), Shell Energy shall pay Roseville for, and dispose of, the volumes that exceed the Tolerance Band at a price equal to the monthly average common low for the applicable Month's Gas Daily, "Daily Price Survey" per MMBtu.

G. DODD-FRANK

Commodity Trade Option Representations: To the extent that this transaction (alone or combined with related transaction(s)) (the "Transaction") is deemed by either party or by the Commodity Futures Trading Commission ("CFTC") to be a commodity trade option under part 32 of the CFTC's regulations (including certain forward transactions with volumetric optionality that are not excluded from the definition of "swap"):

The seller of the option represents to the buyer of the option that in connection with this Transaction, the seller of the option is either (i) an eligible contract participant as defined in section 1a(18) of the Commodity Exchange Act ("Act"), as further jointly defined or interpreted by the CFTC and the Securities Exchange Commission or expanded by the CFTC pursuant to section 1a(18)(C) of the Act (an "ECP"), or (ii) a producer, processor, commercial user of or a merchant handling the commodity that is the subject of this Transaction, or the products or byproducts thereof, and is offering or entering into this Transaction solely for purposes related to its business as such.

The buyer of the option represents to the seller of the option that in connection with this Transaction the buyer of the option is a producer, processor, commercial user of or a merchant handling the commodity that is the subject of this Transaction or the products or by-products thereof and is offering or entering into this Transaction solely for purposes related to its business as such. Both parties hereby confirm to each other that this Transaction is intended to be physically settled so that, if exercised, the option would result in the sale of an exempt commodity for immediate or deferred delivery.

Notwithstanding anything contained in the Master Agreement to the contrary, this Confirmation shall only be effective when executed by both parties. Please confirm that the terms and conditions stated herein accurately reflect the agreement reached by Buyer and Seller by signing and returning by facsimile to Shell Energy at (858) 526-2140 and (713) 767-5414.

Title: Clean Fuel Reward Program - Electric Distribution Utility Joinder to the Clean Fuel Reward Governance Agreement
Contact: Rachel Radell-Harris 916-774-5627 raradell-harris@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.21.

RECOMMENDATION TO COUNCIL

Staff Recommends City Council adopt a resolution authorizing the City Manager to execute the Electric Distribution Utility Joinder to the Clean Fuel Reward (CFR) Governance Agreement.

BACKGROUND

Since early 2017, Roseville Electric Utility has been participating in California Air Resources Board (CARB) Low Carbon Fuel Standard (LCFS) program. Participation in the LCFS program allows the utility to receive credits and generate proceeds based on the number of electric vehicles charging in Roseville. Proceeds from the LCFS program are used to develop electric vehicle educational programs, develop customer tools related to electric vehicles, and to offer rebates for the purchase of electric vehicles and installation of charging stations.

To enhance the LCFS program, CARB, in collaboration with electric utilities throughout the state, developed a new statewide point-of-purchase rebate for electric vehicles called the CFR program. This point-of-purchase rebate will be available at any participating car dealership within the state and is funded by a portion of the electric utilities' LCFS proceeds. Utilities participating in the LCFS program are required to enter into the CFR Governance Agreement.

The CFR Governance Agreement establishes and defines the oversight and administrative structure for the new CFR program, the Steering and Advisory committees, the solicitation process for selecting program implementers, program costs, cost sharing, and various risk mitigation measures. Executing the agreement allows Roseville Electric Utility to continue to participate in the LCFS program and generate proceeds to support electric vehicle programs in the community.

FISCAL IMPACT

Roseville Electric Utility's initial cost is \$136,614 and is due by January 31, 2021. Following the

initial cost, the utility will annually transfer 20% of certain LCFS program proceeds to the CFR program through 2022, and 25% beginning in 2023. Funding for this agreement is available from the LCFS program proceeds and will be included in the utility's proposed FY 2020-21 budget.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Participation in a clean fuel reward program meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Draft Rev 8.

CLEAN FUEL REWARD PROGRAM

GOVERNANCE AGREEMENT

This Governance Agreement (“**Agreement**”) is made and entered into effective as of [MONTH ##], 2019 (the “**Effective Date**”), by and among Pacific Gas and Electric Company (“**PG&E**”), San Diego Gas & Electric Company (“**SDG&E**”), Southern California Edison Company (“**SCE**”), Los Angeles Department of Water & Power (“**LADWP**”), Sacramento Municipal Utility District (“**SMUD**”), and the other electric distribution utilities that may become a Party hereto during the term of the Agreement.

RECITALS

WHEREAS, the Low Carbon Fuel Standard (“**LCFS**”) regulation of the California Air Resources Board (“**CARB**”) (as may be amended from time to time, the “**LCFS Regulation**”) provides for the issuance of “base” credits for residential electric vehicle charging (“**LCFS Base Credits**”) to electric distribution utilities (“**EDUs**”) that participate in the LCFS program, each quarter;¹ and

WHEREAS, on September 27, 2018, CARB adopted amendments to the LCFS Regulation mandating the development and implementation of a statewide, common-design, EDU-run program to reduce the price of purchased and leased light-duty, zero emission, plug-in electric and electric hybrid vehicles (“**ZEVs**”) at the point of sale that is funded by EDUs’ LCFS Base Credit revenues that are assigned to the statewide program according to provisions in California Code of Regulations Title 13 sections 95481 and section 95483(c), and the Parties (as defined in Section 1.1 below) have agreed that the name for this program shall be the *Clean Fuel Reward Program* (“**CFR Program**”); and

WHEREAS, CARB’s amended LCFS Regulation² requires that the CFR Program be (i) initiated through the investor-owned utilities (“**IOUs**”), publicly-owned utilities (“**POUs**”) and electric cooperatives (“**COOPs**”) participating in the CFR Program, and (ii) funded by the EDUs with revenue from the sale of LCFS Base Credits pursuant to mandatory EDU contributions of such LCFS Base Credit revenue to the CFR Program in accordance with the minimum percentage amounts determined by EDU-size³ set forth in the LCFS Regulation (“**EDU Contributions**”); and

WHEREAS, the Parties hereby agree to establish and fund the CFR Program, per the direction of CARB, in an effort to accelerate the progress towards achieving the state and

¹ See California Code of Regulations Title 13 sections 95480, *et seq.*

² See September 27, 2018 CARB Resolution 18-34 available at: <https://www.arb.ca.gov/regact/2018/lcfs18/finalres18-34.pdf>

³ Participating EDUs’ minimum percentages of LCFS Credit Revenue that must be contributed to the CFR Program pursuant to the LCFS Regulations are set forth in Appendix A.

national clean energy and environmental policies through the execution of this Agreement in compliance with CARB's directives, including but not limited to implementation of a sliding-scale incentive program based on the ZEV's all-electric operating range and equity for all customers; and

WHEREAS, the Parties recognized that in order to develop and implement the CFR Program in a timely manner to support accelerating ZEV market adoption in California, one of the EDUs needs to serve as the initial administrator of the CFR Program through the start-up process and early stages of the CFR Program; and

WHEREAS, in the absence of another EDU volunteer to serve as the initial administrator, SCE agreed to serve in such role on a short term basis provided that the California Public Utilities Commission ("CPUC") directed and CARB has authorized SCE to do so, and the other EDUs agree to have SCE serve in such capacity subject to SCE's receipt of the CPUC's direction and CARB's authorization to do so; and

WHEREAS, SCE filed Advice Letter #AL 3982-E with the CPUC on April 2, 2019 (the "**Advice Letter**") to request the CPUC to authorize and direct SCE to serve as the initial short-term administrator of the CFR Program and to effect SCE's proposed implementation plan for the CFR Program on the terms and conditions set forth in the Advice Letter; and

WHEREAS, on August 15, 2019, the CPUC issued Resolution E-5015 adopting and approving the Advice Letter and SCE's proposed implementation plan for the CFR Program, subject to certain modifications set forth in such Resolution (the "**CPUC Approval**"); and

WHEREAS, on [REDACTED], 2019, CARB authorized and directed that the CFR Program be administered pursuant to this Governance Agreement and found that this Governance Agreement is in the public interest, is made for the public purposes stated in the LCFS Regulation, and is consistent with the LCFS Regulation (the "**CARB Authorization**"); and

WHEREAS, the Parties have agreed to appoint SCE as the initial administrator of the CFR Program consistent with the terms and conditions set forth in the Advice Letter, the CPUC Approval, the CARB Authorization, and this Agreement in order to expedite the implementation of the CFR Program for the benefit of the EDUs, CARB, and the State of California; and

WHEREAS, the Parties desire to enter into this Agreement to set forth the rights, powers, duties, obligations, and liabilities of the Parties concerning the conduct, operation, administration and funding of the CFR Program and any fees, costs, expenses and liabilities arising from the administration of the CFR Program by SCE as the Program Administrator, including those arising under this Agreement or any agreement entered into by SCE in connection with its role as the Program Administrator of the CFR Program, in each case pursuant to the terms and conditions of this Agreement; and

WHEREAS, each of the Large EDUs has executed and delivered this Agreement to one another on or before the Effective Date, and each additional Participating EDU who becomes a Party after the Effective Date shall execute and deliver a joinder to this Agreement pursuant to the provisions of Section 2.2 below.

NOW THEREFORE, in consideration of the mutual covenants, purposes and agreements set forth herein, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows:

ARTICLE 1 CERTAIN DEFINITIONS

1.1. Defined Terms. As used in this Agreement, the following capitalized terms shall have the respective meanings specified in this Section 1.1.

- (a) **"Accounts"** has the meaning set forth in Section 4.3(b).
- (b) **"Additional LCFS Revenue Payments"** has the meaning set forth in Section 9.1(b)(ii).
- (c) **"Administrative Expenses"** has the meaning set forth in Section 5.1.
- (d) **"Advice Letter"** has the meaning set forth in the Recitals.
- (e) **"Advisory Committee"** has the meaning set forth in Section 3.4.
- (f) **"Affiliate"** means, with respect to any Person, any other Person controlling, controlled by, or under common control with such other Person. For purposes of this definition, "control," when used with respect to any Person, means the power to direct the management and policies of such Person, directly or indirectly, whether through the ownership of voting securities, by contract or otherwise, and the terms "controlling" and "controlled" have correlative meanings.
- (g) **"Agreement"** has the meaning set forth in the preamble.
- (h) **"Alternates"** has the meaning set forth in Section 3.3(c).
- (i) **"Annual Program Funds Amount"** means the total EDU Contributions deposited by all of the Participating EDUs during each calendar year following the Initial Funding Date, plus all interest and earnings thereon regardless of the Account in which such funds are held from time to time, during such calendar year.
- (j) **"Bond"** has the meaning set forth in Section 7.4.
- (k) **"CARB"** has the meaning set forth in the Recitals.
- (l) **"CARB Authorization"** has the meaning set forth in the Recitals.
- (m) **"CARB Representative"** has the meaning set forth in Section 3.3(a).
- (n) **"CFR Program"** has the meaning set forth in the Recitals.

(o) **“Claim”** or **“Claims”** means any and all actions, causes of action, complaints, charges, claims, costs, damages, deficiencies, demands, expenses, fees, indebtedness, injuries, interest, judgments, liabilities, losses, obligations, orders, penalties, remedies, suits, sums of money, Taxes, and torts, of whatever kind or character, whether in law, equity or otherwise, direct or indirect, fixed or contingent, foreseeable or unforeseeable, liquidated or unliquidated, known or unknown, matured or unmatured, absolute or contingent, determined or determinable.

(p) **“Collective Deposit Account”** has the meaning set forth in Section 4.3(b)(ii).

(q) **“Contribution Percentage”** means, with respect to any Party at any time, the resulting percentage determined by multiplying 100 by a fraction, the numerator of which shall be the amount of such Party’s Initial EDU Contribution, and the denominator of which shall be the aggregate total of shares all Initial EDU Contributions made by all Parties (including any former Parties) at such time. In calculating the respective Contribution Percentages of the Parties at an time, in the event that a court or arbitrator of competent jurisdiction has determined that any Party is released or excused from its obligation to pay, or is otherwise unable or not required to pay, its Contribution Percentage of any Indemnified Claim, then such Party’s Initial EDU Contribution shall be excluded from the denominator for purposes of calculating the respective Contribution Percentages with respect to such Indemnified Claim as well as to any Indemnified Claim thereafter to which such exclusion would be applicable according to such court or arbitral order or determination.

(r) **“COOPs”** has the meaning set forth in the Recitals.

(s) **“Covenant Not to Sue”** has the meaning set forth in Section 7.3(a).

(t) **“Covered Person”** has the meaning set forth in Section 3.5(a).

(u) **“CPUC”** has the meaning set forth in the Recitals.

(v) **“CPUC Approval”** has the meaning set forth in the Recitals.

(w) **“Deposit Account”** means any Collective Deposit and any Individual Deposit Account.

(x) **“Designated Account Holder”** means any Governmental Authority (including, for the avoidance of doubt, a POU) or not for profit entity that is identified and selected by the Program Administrator and the Steering Committee to hold the Program Funds Account pursuant to Section 4.3(b)(i) or any Collective Deposit Account pursuant to Section 4.3(b)(ii).

(y) **“Disbursement Account”** has the meaning set forth in Section 4.3(c).

(z) **“Earmarked Credits”** means any LCFS Base Credits that are deposited into any EDU’s LCFS balancing account by CARB at any time on or after the Final CPUC Approval Date.

(aa) **“EDU Contribution Account”** means, when used with respect to any Participating EDU at any time and from time to time, (i) if a Program Funds Account has been established and is being maintained at such time, the Program Funds Account, or (ii) if there is no Program Funds Account at such time, then either the Collective Deposit Account or the Individual Deposit Account for such Participating EDU into which such Participating EDU is instructed to make its EDU Contributions at such time in accordance with the instructions of the Program Administrator.

(bb) **“EDU Contributions”** has the meaning set forth in the Recitals.

(cc) **“EDUs”** has the meaning set forth in the Recitals.

(dd) **“Effective Date”** has the meaning set forth in preamble.

(ee) **“Excess Party”** has the meaning set forth in the Section 7.5(b)(iii).

(ff) **“FDIC”** means the Federal Deposit Insurance Corporation.

(gg) **“Final CPUC Approval Date”** the first date on which each of the following approvals from the CPUC shall have been received: (i) the CPUC Approval, (ii) the CPUC’s approval of the advice letter submitted by PG&E for approval to enter into this Agreement, and (iii) the CPUC’s approval of the advice letter submitted by SDG&E for approval to enter into this Agreement.

(hh) **“Financial Institution”** has the meaning set forth in Section 4.1(a).

(ii) **“Governmental Authority”** means the United States, or any state, county, city, municipal, territory, possession, foreign or other governmental or quasi-governmental entity or authority of any nature, including any courts, departments, commissions, boards, bureaus, agencies or other instrumentalities of any of the foregoing.

(jj) **“Holdback Funds”** has the meaning set forth in the Section 7.5(b)(iii).

(kk) **“Imaged Agreement”** has the meaning set forth in Section 10.19.

(ll) **“Implementer”** has the meaning set forth in Section 3.2(a).

(mm) **“Indemnified Claim”** means (i) when used in connection with the SCE Indemnified Persons, the SCE Indemnified Claims, and (ii) when used in connection with the Steering Committee Indemnified Persons, the Steering Committee Indemnified Claims.

(nn) **“Indemnified Persons”** means any of the SCE Indemnified Persons and the Steering Committee Indemnified Persons, each an **“Indemnified Person”**.

(oo) **“Individual Deposit Account”** has the meaning set forth in Section 4.3(b)(iii).

- (pp) **“Individual Deposit Account Agreement”** has the meaning set forth in Section 4.3(b)(iii).
- (qq) **“Initial EDU Contributions”** has the meaning set forth in Section 5.3.
- (rr) **“Initial Funding Date”** has the meaning set forth in Section 5.3.
- (ss) **“Invoice Subcommittee”** has the meaning set forth in Section 3.3(e).
- (tt) **“IOUs”** has the meaning set forth in the Recitals.
- (uu) **“Joinder”** has the meaning set forth in Section 2.2.
- (vv) **“LADWP”** has the meaning set forth in the preamble.
- (ww) **“Large EDU Members”** has the meaning set forth in Section 3.3(a).
- (xx) **“Large EDUs”** means PG&E, SDG&E, SCE, LADWP, and SMUD, each a **“Large EDU”**.
- (yy) **“Law Firms”** has the meaning set forth in Section 10.18.
- (zz) **“LCFS”** has the meaning set forth in the Recitals.
- (aaa) **“LCFS Base Credits”** has the meaning set forth in the Recitals.
- (bbb) **“LCFS Credit Revenue”** means the aggregate gross revenue received by any EDU at any time from the sale, transfer or other disposition of Earmarked Credits.
- (ccc) **“LCFS Non-Base Credit Revenue”** has the meaning set forth in the Section 7.5(b)(iii).
- (ddd) **“LCFS Regulation”** has the meaning set forth in the Recitals.
- (eee) **“Liability Reserve”** has the meaning set forth in Section 4.3(e).
- (fff) **“Master Account Agreement”** has the meaning set forth in Section 4.3(b).
- (ggg) **“Member”** has the meaning set forth in Section 3.3(a).
- (hhh) **“ME&O”** has the meaning set forth in Section 4.2(a).
- (iii) **“NCPA”** means the Northern California Power Agency.
- (jjj) **“Northern EDU Majority Vote”** has the meaning set forth in Section 3.3(a).
- (kkk) **“Northern EDU Member”** has the meaning set forth in Section 3.3(a).

(lll) **“Northern EDUs”** means any EDU listed as a Northern EDU on Schedule 1.1 hereto, as such Schedule may be amended from time to time hereafter; provided that in no event shall any Large EDU ever be listed as or deemed to be a Northern EDU.

(mmm) **“Operating Reserve”** has the meaning set forth in Section 4.3(e).

(nnn) **“PA Representative”** has the meaning set forth in Section 3.3(a).

(ooo) **“Participating EDU”** means any EDU that has (i) become a Party to this Agreement by either (A) executing and delivering a duly executed signature page to this Agreement to the other Parties on or prior to the Effective Date, or (B) executing and delivering a duly executed Joinder to this Agreement to the Program Administrator in accordance with the provisions of Section 2.2 following the Effective Date, and (ii) not withdrawn as a Party pursuant to Section 9.2 or been removed as Party pursuant to Section 9.3.

(ppp) **“Participating Northern EDU”** has the meaning set forth in Section 3.3(a).

(qqq) **“Participating Southern EDU”** has the meaning set forth in Section 3.3(a).

(rrr) **“Party”** means any entity that is a signatory to this Agreement as set forth on the signature pages hereto or that hereafter becomes a party to this Agreement by executing and delivering a duly executed Joinder to this Agreement to the Program Administrator in accordance with the provisions of Section 2.2 following the Effective Date, which entities are referred to collectively, as the **“Parties”**. For the avoidance of doubt, unless and until an entity that is not an EDU becomes a Party to this Agreement, each Party is a Participating EDU, and vice versa, and the terms may be used interchangeably.

(sss) **“Percentage Target”** has the meaning set forth in Section 5.2.

(ttt) **“Person”** means an individual, corporation (including any non-profit corporation), general or limited partnership, limited liability company, joint venture, estate, trust, unincorporated organization, association, organization or other entity or form of business enterprise or Governmental Authority.

(uuu) **“PG&E”** has the meaning set forth in the preamble.

(vvv) **“Policy”** has the meaning set forth in Section 7.4.

(www) **“POU”** has the meaning set forth in the Recitals.

(xxx) **“Program Administrator”** means SCE in its capacity as program administrator and administrative agent for the Parties with respect to the CFR Program for the term set forth in Section 3.1(b), or any successor Program Administrator appointed following the end of SCE’s term as Program Administrator in accordance with the provisions of Section 3.1(c) or any amendment to this Agreement entered into pursuant to the provisions thereof.

- (yyy) **“Program Agreement”** has the meaning set forth in Section 3.1(a).
- (zzz) **“Program Auditor”** has the meaning set forth in Section 4.1(a).
- (aaaa) **“Program Funds”** has the meaning set forth in Section 4.3(a).
- (bbbb) **“Program Funds Account”** has the meaning set forth in Section 4.3(b)(i).
- (cccc) **“Program Implementer”** has the meaning set forth in Section 4.1(a).
- (dddd) **“Program Implementer Representatives”** has the meaning set forth in Section 4.5(a).
- (eeee) **“Program Launch Date”** has the meaning set forth in Section 5.5.
- (ffff) **“Program Legal Matters”** has the meaning set forth in Section 10.18.
- (gggg) **“Program Material”** has the meaning set forth in Section 8.1.
- (hhhh) **“Related Entities”** has the meaning set forth in Section 7.1(a).
- (iii) **“Release”** has the meaning set forth in Section 7.1(b).
- (jjj) **“Released Claims”** means (i) when used in connection with the SCE Released Parties, the SCE Released Claims, and (ii) when used in connection with the Steering Committee Released Parties, the Steering Committee Released Claims.
- (kkkk) **“Released Parties”** means any of the SCE Released Parties and the Steering Committee Released Parties, each a **“Released Party”**.
- (lll) **“Remaining Liabilities”** has the meaning set forth in Section 9.1(b).
- (mmmm) **“Removal Vote”** has the meaning set forth in Section 9.3(a).
- (nnnn) **“Representative”** means, with respect to a particular Person, any director, member, partner, officer, employee, agent, consultant, advisor or other representative of such Person, including outside legal counsel, accountants and financial advisors; provided that in no event shall any Implementer, any other vendor or contractor retained by the Program Administrator on behalf of the CFR Program, or any of their respective Representatives be, or be deemed to be, a Representative of the Program Administrator or of any Participating EDU.
- (oooo) **“Required Percentage”** has the meaning set forth in Section 5.4.
- (pppp) **“Reserve Amounts”** means the aggregate amounts of Program Funds maintained at any time, and from time to time, in the Liability Reserve and the Operating Reserve.
- (qqqq) **“Reward Amount”** has the meaning set forth in Section 3.3(d)(iii)

(rrrr) **“RFI”** has the meaning set forth in Section 3.2(a).

(ssss) **“RFP”** has the meaning set forth in Section 3.2(a).

(tttt) **“SCE”** has the meaning set forth in the preamble.

(uuuu) **“SCE Indemnified Claim”** has the meaning set forth in Section 7.5(a)(i).

(vvvv) **“SCE Indemnified Person(s)”** has the meaning set forth in Section 7.5(a)(i).

(wwwv) **“SCE Released Claims”** has the meaning set forth in Section 7.1(a)(i).

(xxxx) **“SCE Released Part(y/ies)”** has the meaning set forth in Section 7.1(a)(i).

(yyyy) **“SDG&E”** has the meaning set forth in the preamble.

(zzzz) **“Shortfall Indemnity Termination Date”** has the meaning set forth in Section 7.9.

(aaaaa) **“Shortfall Party”** has the meaning set forth in the Section 7.5(b)(iii).

(bbbbb) **“Shortfall Payments”** has the meaning set forth in Section 9.1(b)(i).

(ccccc) **“Small EDU Members”** means the Northern EDU Member and the Southern EDU Member, each a **“Small EDU Member”**.

(ddddd) **“SMUD”** has the meaning set forth in the preamble.

(eeee) **“Southern EDU Member”** has the meaning set forth in Section 3.3(a).

(ffff) **“Southern EDUs”** means any EDU listed as a Southern EDU on Schedule 1.1 hereto, as such Schedule may be amended from time to time hereafter; provided that in no event shall any Large EDU ever be listed as or deemed to be a Southern EDU.

(ggggg) **“Southern EDU Supermajority Vote”** has the meaning set forth in Section 3.3(a).

(hhhhh) **“Steering Committee”** has the meaning set forth in Section 3.3(a).

(iiii) **“Steering Committee Indemnified Claim”** has the meaning set forth in Section 7.5(a)(ii).

(jjjj) **“Steering Committee Indemnified Person(s)”** has the meaning set forth in Section 7.5(a)(ii).

(kkkkk) **“Steering Committee Released Claims”** has the meaning set forth in Section 7.1(a)(ii).

(lllll) **“Steering Committee Released Part(y/ies)”** has the meaning set forth in Section 7.1(a)(ii).

(mmmmm) **“Tax” or “Taxes”** means any and all taxes, assessments, charges, duties, fees, levies, imposts or other governmental charges, including all federal, state, local or non-U.S. income taxes (including any tax on or based upon net income, gross income, or income as specially defined, or earnings, profits, or selected items of income, earnings or profits) and all gross receipts, payroll, employment, excise, severance, stamp, occupation, premium, environmental, customs duties, capital stock, profits, withholding, social security, unemployment, disability, real property, personal property, sales, use, ad valorem, transfer, service, franchise, license, windfall profits taxes, estimated, alternative or add-in minimum taxes and any other taxes of any kind whatsoever (whether or not requiring the filing of a Tax Return), together with any interest and any penalties and additions to tax.

(nnnnn) **“Tax Return”** means any return, declaration, report, claim for refund, or information return or statement relating to Taxes, including any schedules and amendments thereof.

(ooooo) **“Third Party Program Administrator”** means any successor Program Administrator appointed at any time following the end of SCE’s term as Program Administrator, in accordance with the provisions of Section 3.1(c) or any amendment to this Agreement entered into pursuant to the provisions thereof, that is not also a Participating EDU hereunder.

(ppppp) **“TOU”** has the meaning set forth in Section 4.2(b).

(qqqqq) **“Withdrawing Notice”** has the meaning set forth in Section 9.2(a).

(rrrrr) **“ZEVs”** has the meaning set forth in the Recitals.

1.2. Construction. As used herein, unless the context of this Agreement otherwise requires, (a) all references to Sections, Articles, Schedules or Exhibits are to Sections, Articles, Schedules or Exhibits of this Agreement; (b) each accounting term has the meaning assigned to it in accordance with GAAP; (c) words of any gender include each other gender; (d) words using the singular or plural number also include the plural or singular number, respectively; (e) the terms “hereof,” “herein,” “hereby,” “hereto” and derivative or similar words refer to this entire Agreement; (f) the word “including” shall mean “including, without limitation”; (g) the word “or” shall be used in the inclusive sense of “and/or” and not exclusive; (h) each reference to “\$” or “dollars” shall be to United States dollars; and (i) each reference to “days” shall be to calendar days.

ARTICLE 2 FORMATION OF CFR PROGRAM

2.1. Governance Agreement. This Agreement shall constitute a "Governance Agreement" (as that term is used in the Advice Letter and the CPUC Approval). The rights, powers, duties, obligations, and liabilities of the Parties to each other with respect to the CFR Program shall be determined pursuant to this Agreement. Each Party shall at all times comply with its respective duties, obligations, covenants and agreements set forth in this Agreement.

2.2. EDU Participation. As of the Effective Date, the Parties and Participating EDUs consist of PG&E, SDG&E, SCE, LADWP, and SMUD. Any EDU that desires to participate in the CFR Program and that is not already a Party hereto on the Effective Date as set forth in the preamble to this Agreement and the signature pages hereto, will be required to execute and deliver to the Program Administrator (with a copy to CARB) a joinder to this Agreement in the form attached hereto as Exhibit A (a "Joinder"), in order to become a Party and a Participating EDU hereunder.

ARTICLE 3 ADMINISTRATION OF CFR PROGRAM

3.1. SCE Appointment as Initial Program Administrator and Agent.

(a) Appointment. Each of the Participating EDUs (in its capacity as a Participating EDU) and each other current and future Party hereto hereby irrevocably appoints SCE as the initial Program Administrator, and hereby designates and authorizes SCE to act on its behalf as the Program Administrator under this Agreement and under any agreement approved by the Steering Committee that is entered into by the Program Administrator or any Participating EDU with respect to the CFR Program pursuant to the terms and conditions hereof (each, a "**Program Agreement**"), and authorizes the Program Administrator to take such actions on its behalf and to exercise such powers as are delegated to the Program Administrator by the terms hereof or thereof, together with such actions and powers as are reasonably incidental thereto or as otherwise determined by the Steering Committee, in each case for the time period set forth in Section 3.1(b) below. As used herein, Program Administrator shall mean SCE in its capacity as program administrator and administrative agent for the Parties with respect to the CFR Program under this Agreement or any Program Agreement, or any successor to SCE appointed by the Parties as Program Administrator pursuant to the terms of the replacement administrative and governance structure for the CFR Program implemented pursuant to Section 3.1(c) below. It is understood and agreed that the use of the terms "agent" and "administrator" herein or in any other Program Agreement (or any other similar term) with reference to the Program Administrator or SCE is not intended to connote any fiduciary or other implied (or express) obligations arising under agency doctrine of any applicable law. Instead, such term is used as a matter of market custom, and is intended to create or reflect only an administrative relationship between sophisticated contracting parties.

(b) Term. SCE is hereby appointed and authorized to serve in such role as Program Administrator from the Effective Date until the earliest to occur of (i) the third (3rd) anniversary of the commencement date of the third party contractor solicitation process

described in ARTICLE 4 below, unless SCE files an advice letter with the CPUC requesting authority to administer the CFR Program long term, in which case SCE will continue to serve as Program Administrator while the CPUC considers the appropriate disposition of the advice letter, and thereafter, if approved, in compliance with the CPUC resolution approving that advice letter, (ii) the date on which SCE is removed or ordered to be removed as Program Administrator by CARB or CPUC, and (iii) the effective date of resignation of SCE as Program Administrator as set forth in any written communication of resignation delivered by SCE to the other Parties after receiving CPUC authorization or approval to withdraw as Program Administrator.

(c) Replacement Structure. No later than the second anniversary of the Effective Date, the Steering Committee, with oversight from CARB, will develop and determine a replacement administrative and governance structure for the CFR Program that would go into effect upon the date of expiration or termination of SCE's appointment as Program Administrator in accordance with the provisions of Section 3.1(b), in order to ensure a seamless transition to a new administrative and governance regime following such date. The Parties will implement such replacement administrative and governance structure through an amendment to this Agreement establishing the terms of such replacement structure, which amendment shall be executed by all Parties no later than the date that is ninety (90) days before the third anniversary of the Effective Date.

3.2. Program Administrator Authority.

(a) Solicitation. The Program Administrator will serve as the principal agent of the Parties to develop, issue and administer the competitive Request for Proposals ("**RFP**"), Request for Information with Pricing ("**RFI**") or other such solicitations to acquire the services of one (or more) qualified firm(s) to develop, administer and implement the CFR Program, subject to the terms below. All Parties shall assist the Program Administrator in the performance of the associated responsibilities, as may be requested by the Program Administrator during the solicitation process, and the Program Administrator shall work with the Steering Committee in selecting the successful respondent(s) to the solicitation. The Steering Committee shall make recommendations to the Program Administrator regarding the competitive solicitation, selection of offers, and negotiation of third-party contracts. The Program Administrator shall have the discretionary contracting authority (i) to recommend the third party firms and institutions that it deems to be the best-qualified to perform the necessary and appropriate functions to develop, implement and maintain the CFR Program, which at a minimum will include the Program Auditor, Financial Institution, and Program Implementer (each, an "**Implementer**"), (ii) to negotiate the terms and conditions of any Program Agreement entered into with any Implementer in connection with the CFR Program, and (iii) subject to receipt of approval from the Steering Committee, to enter into Program Agreements with the Implementers as Program Administrator of the CFR Program on behalf of the Parties. The selection of each Implementer and the final form of each Program Agreement shall require the approval of both the Program Administrator and the Steering Committee. The mechanics of the solicitation process are set forth in further detail in ARTICLE 4 below.

(b) Post-Solicitation Program Administration. The Program Administrator will also serve as the principal agent of the Parties with respect to the administration of the CFR Program, in providing instructions to the Implementers and in enforcing the provisions of the

Program Agreements both during and following the solicitation process. All Parties shall assist the Program Administrator in the performance of the associated responsibilities necessary for the successful functioning and operation of the CFR Program, as may be requested by the Program Administrator from time to time in accordance with the provisions of this Agreement, the Program Agreements and the decisions and resolutions of the Steering Committee that will be responsible for oversight of the CFR Program.

(c) Reporting. The Program Administrator shall provide the Steering Committee quarterly reports on program administration, financial accounting and program results, which quarterly reports are anticipated to be delivered to the Steering Committee by the end of the first month that commences following the close of each of the first three calendar quarters, and by the last day of February following the close of the fourth calendar quarter and the calendar year. At any other time, the Program Administrator shall provide the Steering Committee such other information as may be reasonably requested by the Steering Committee with reasonable advance notice of not less than ten (10) business days for the Program Administrator to collect the requested information. The Program Administrator and the Steering Committee shall cause to be provided to the Participating EDUs on a quarterly basis such Tax information regarding the operation of the CFR Program as the Program Administrator determines is reasonably necessary for the Participating EDUs to calculate their Taxes with respect to the CFR Program.

3.3. Steering Committee.

(a) Composition. The CFR Program will be overseen by a joint steering committee (the “**Steering Committee**”) made up of seven (7) voting members (each, a “**Member**”), one (1) non-voting representative appointed by the Program Administrator (the “**PA Representative**”), and one (1) non-voting LCFS program implementation representative from CARB with oversight authority over the Steering Committee (the “**CARB Representative**”).

(i) The Members will consist of (1) one senior representative from and appointed by each Large EDU (the “**Large EDU Members**”), one (1) Member (the “**Southern EDU Member**”) selected by the Southern EDUs that are Participating EDUs (the “**Participating Southern EDUs**”), and one (1) Member (the “**Northern EDU Member**”) selected by the Northern EDUs that are Participating EDUs (the “**Participating Northern EDUs**”).

(ii)

(A) Southern EDU Member annual voting structure.

The Southern EDU Member shall be confirmed annually before each new calendar year and shall be either a representative from one of the Participating Southern EDUs or a qualified third-party representative, as determined by the Participating Southern EDUs. The Southern EDU Member shall be selected by at least a 2/3 majority vote (with each of the Participating Southern EDUs receiving a single vote each of equal weight) of the Participating Southern EDUs (“**Southern EDU Supermajority Vote**”), if the Member is a representative from one of the Participating Southern EDUs. If the Southern EDU Member is a third-party representative they shall be

selected by a unanimous vote of the Participating Southern EDUs. Votes shall be submitted by a senior representative (Assistant General Manager level or higher; or equivalent position(s)) through a conference call vote with an email confirmation of the final vote following the call. A proxy voting representative may be assigned by each Participating Southern EDU through a written notification from their senior representative to the other Participating Southern EDUs.

(B) Initial adoption period. Notwithstanding the provisions of Section 3.3(a)(ii)(A) above, selection of the Southern EDU Member will be conducted as set forth in this Section 3.3(a)(ii)(B) until December 31st, 2020. Once the first Participating Southern EDU has become a Party to this Agreement in accordance with the provisions of Section 2.2, it will select the initial Southern EDU Member. A new vote will be held among the Participating Southern EDUs to elect the Southern EDU Member each time a new Southern EDU becomes a Party to this Agreement in accordance with the provisions of Section 2.2, until December 31st, 2020. All votes during this initial adoption period will continue to follow the Southern EDU Supermajority Vote and senior representative voting requirements set forth in Section 3.3(a)(ii)(A). The Participating Southern EDUs will vote, in accordance with the provisions of Section 3.3(a)(ii)(A), to elect a Southern EDU Member for the 2021 calendar year before the end of 2020. After December 31, 2020, even if any new Southern EDU becomes a Party to this Agreement in accordance with the provisions of Section 2.2, there will be no new vote on a Southern EDU Member until the annual vote, unless a vote is called for under Section 3.4(b).

(iii) The Northern EDU Member shall be selected by vote of the Participating Northern EDUs (which vote may be cast directly by any such Participating Northern EDU or indirectly by a third party Representative granted a proxy by any such Participating Northern EDU to act on its behalf for purposes of such vote) representing more than 50% of the aggregate EDU Contributions made as of such date by all Participating Northern EDUs, as determined from time to time (a "**Northern EDU Majority Vote**"), and shall be either a senior representative from one of the Participating Northern EDUs or a member of the staff of NCPA or other qualified third party representative.

(iv) Each of the seven Members on the Steering Committee shall serve on the Steering Committee until such time as a replacement is designated for such Member pursuant to the provisions of Section 3.3(b) below. The Steering Committee shall maintain a Chair, a Vice-Chair and Secretary positions. The Members that hold these positions described in the preceding sentence shall be selected from within the Steering Committee by a vote thereof pursuant to Section 3.3(i), and shall, subject to the provisions of Section 3.3(b), maintain those positions for a oneError! Bookmark not defined. year term, unless agreed upon in writing by all Members (other than the Member holding the position). The Chair (or, in the absence of the Chair, the Vice-Chair) shall preside over all meetings of the Steering Committee, and the Secretary (or, in the absence of the Secretary, any person appointed by the Chair or, in the Chair's absence, by the Vice-Chair) shall take and maintain the minutes of the proceedings of the meetings of the Steering Committee.

(v) The Program Administrator will designate a staff person to serve as the PA Representative, who will be invited to participate in all meetings of the Steering Committee. The PA Representative will be the Program Administrator's non-voting

representative on the Steering Committee and will serve as the primary point of contact between the Program Administrator and the Steering Committee. The Program Administrator may remove and replace the PA Representative at any time with or without cause, effective upon written notice to the Members provided in accordance with the provisions of Section 10.14.

(vi) CARB will designate a senior LCFS program staff person to serve as the CARB Representative, who will be invited to participate in all meetings of the Steering Committee. The CARB Representative will monitor and provide feedback to and oversight of the Steering Committee regarding LCFS and vehicle incentive goals and implementation. CARB may remove and replace the CARB Representative at any time with or without cause, effective upon written notice to the Members provided in accordance with the provisions of Section 10.14.

(b) Member Removal, Resignation and Replacement. Each Large EDU may remove and/or replace any Large EDU Member appointed by it at any time with or without cause, effective upon written notice to the other Members. The Participating Southern EDUs may by a Southern EDU Supermajority Vote remove and/or replace the Southern EDU Member at any time with or without cause, effective upon written notice to the Members documenting the results of such Southern EDU Supermajority Vote. The Participating Northern EDUs may by a Northern EDU Majority Vote remove and/or replace the Northern EDU Member at any time with or without cause, effective upon written notice to the Members documenting the results of such Northern EDU Majority Vote. A Member may resign at any time from the Steering Committee by delivering his or her written resignation to the Chair (or in the absence of a Chair, the Vice Chair or Secretary). Any such resignation shall be effective upon receipt thereof unless it is specified to be effective at some other time or upon the occurrence of some other event. The Steering Committee's acceptance of a resignation shall not be necessary to make it effective. Any vacancy on the Steering Committee resulting from the resignation, removal, death or disability of a Member shall be filled by (i) if a Large EDU Member, the same Large EDU that appointed such Member pursuant to Section 3.3(a), (ii) if a Southern EDU Member, by written notice to the other Members documenting the results of the Southern EDU Supermajority Vote held to select a replacement for such Southern EDU Member, or (iii) if a Northern EDU Member, by written notice to the other Members documenting the results of the Northern EDU Majority Vote held to select a replacement for such Northern EDU Member, in each case with such appointment to become effective immediately upon delivery of written notice of such appointment to the Chair (or in the absence of a Chair, the Vice Chair or Secretary).

(c) Alternates. In addition to the Member removal and replacement procedures set forth in Section 3.3(b) above, each Large EDU, the Participating Southern EDUs (by Southern EDU Supermajority Vote), and the Participating Northern EDUs (by Northern EDU Majority Vote), may by written notice delivered to the Chair designate up to two (2) alternative representatives ("Alternates") who may, upon written or oral notice by such Party/Parties to the Chair that the Member designated by such Party/Parties is unable to attend any meeting (or participate in any action by written consent) of the Steering Committee (or any subcommittee thereof) and shall instead be represented by the Alternate designated in such notice, attend, participate and vote at any regular or special meeting of the Steering Committee (or any subcommittee thereof), or participate and vote in any action by written consent, in lieu of the regular Member designated by such Party/Parties. The Program Administrator may also

designate one or more alternate representatives to attend and participate in any meeting of the Steering Committee (or any subcommittee thereof) in lieu of the designated PA Representative. CARB may also designate one or more alternate representatives to attend and participate in any meeting of the Steering Committee (or any subcommittee thereof) in lieu of the designated CARB Representative.

(d) Roles and Responsibilities: The Steering Committee is responsible for strategic direction, program guidance, oversight of policy objectives, and overall governance and supervision of the CFR Program, subject to the oversight of CARB exercised through the CARB Representative's participation on the Steering Committee as provided by Section 3.3(a)(vi). These roles and responsibilities will include but not be limited to:

(i) participation with the Program Administrator in the development, review and selection processes related to the competitive solicitation process to select the Implementers, and final approval of the solicitation process, the selection of Implementers and the final form of the Program Agreements to be entered into with the Implementers;

(ii) reviewing and approving the CFR Program's budget and the initial starting balance for the CFR Program, each of which shall be submitted to the Steering Committee by the Program Administrator for review and approval;

(iii) approving the initial CFR rebate amount ("**Reward Amount**") and approving any required adjustments thereto or in the method of payment of any Reward Amounts, in each case as recommended by the Program Administrator following CARB approval of the methodology for determining the Reward Amount;

(iv) determining the process for approving payment of invoices for administrative and marketing functions, including Implementer invoices, in accordance with the provisions of ARTICLE 6, and the Steering Committee shall also have the authority to make any changes to the invoice approval processes set forth in ARTICLE 6 or otherwise as determined by the Steering Committee from time to time, in order to maintain the efficient operation of the CFR Program;

(v) determining whether to adjust the amounts specified to be held in the Liability Reserve or the Operating Reserve as set forth in Section 4.3(e) and the amount of any such increase, but in no event shall any such specified amounts be decreased without the prior written consent of the Program Administrator;

(vi) reviewing the performance of the CFR Program and recommending any required adjustments thereto;

(vii) approving the timing and content of public announcements about this Agreement and/or the CFR Program (as described in Section 8.2);

(viii) terminating this Agreement (as described in Section 9.1);

(ix) removing a Party as a party under this Agreement (as described in Section 9.3);

(x) amending this Agreement, or waiving, discharging, or terminating any provision hereof (as described in Section 10.7);

(xi) reviewing the quarterly reports and other information required to be provided by the Program Administrator under Section 3.2(c); and

(xii) any and all other roles and responsibilities for the Steering Committee set forth in this Agreement or in any Program Agreement.

(e) Subcommittees. The Steering Committee may, by resolution, designate from among the Members one or more subcommittees, each of which shall be comprised of two or more Members, and that, subject to the limitations set forth in the next sentence, shall have and may exercise any authority of the Steering Committee as the Steering Committee may delegate to it in the resolution forming such subcommittee. The Steering Committee shall not, and shall not have the power or authority to, designate or authorize any subcommittee with all of the powers and authority of the Steering Committee, or with the authority of the Steering Committee in reference to: (A) final approval of the initial Reward Amount or the amount of any adjustment thereto, (B) any proposed increase (or other adjustment) to the amounts specified to be held in the Liability Reserve or the Operating Reserve as set forth in Section 4.3(e), (C) final approval of payment of any invoice for Administrative Expenses (provided that the Steering Committee may create one or more subcommittees with the responsibility and authority to review, reject, negotiate, pre-approve and submit to the Steering Committee for final approval any or all such invoices (each, an "**Invoice Subcommittee**")), (D) altering or repealing any resolution of the Steering Committee that by its terms provides that it shall not be so amendable or repealable, or (E) final approval of any Implementers. The Steering Committee may dissolve any subcommittee or remove any member (or non-voting participant) of a subcommittee through a Steering Committee vote conducted pursuant to the provisions of Section 3.3(i) below at any time. The Parties anticipate that, in addition to an Invoice Subcommittee, potential subcommittees may include (but not be limited to) subcommittees to address dealer training, marketing and outreach, and financial forecasting. The Steering Committee and any subcommittee thereof, and their respective Members, may consult with and seek and rely upon information and advice from employees and representatives of any Participating EDUs, Implementers, Advisory Committee members, Governmental Authorities, legal counsel, independent accountants and other Persons as to matters which they believe to be within such Person's professional or expert competence. The Steering Committee shall designate a chair and secretary for each subcommittee. The chair (or in the absence of the chair, the secretary) shall preside over all meetings of the subcommittee, and the secretary (or, in the absence of the secretary, the chair or any person appointed by the chair) shall take and maintain the minutes of the proceedings of the meetings of the subcommittee. All minutes of subcommittee meetings shall be made available to all Steering Committee Members. If any member of the Advisory Committee is invited to a subcommittee meeting or a Steering Committee meeting, then the portion(s) of the minutes of such meeting during which such member of the Advisory Committee was present shall also be made available to all members of the Advisory Committee.

(f) Regular Meetings. Regular meetings of the Steering Committee shall be held no less than monthly during the first year, and quarterly thereafter, via a conference call at a date and time that is either (i) determined by the Chair (or in the absence thereof, by the Vice

Chair or Secretary) after consulting with the Members at the immediately preceding meeting, or (ii) scheduled by the Chair (or in the absence thereof, by the Vice Chair or Secretary) on not less than five (5) calendar days' notice to the Members, the PA Representative and the CARB Representative. All meetings (regular or special) of the Steering Committee shall be held by means of telephone or video conference or other communications device that permits all Members, the PA Representative and the CARB Representative participating in the meeting to hear each other, provided that if all Members agree any meeting may be held in person at a mutually agreed location. The Parties acknowledge and agree that the presence and participation of all Members (or their respective Alternates) on the Steering Committee at the meetings and proceedings of the Steering Committee is important for the successful development, implementation, operation and oversight of the CFR Program and, accordingly, each Party shall use its commercially reasonable efforts to have its respective Member (or Alternate) attend each meeting (regular and special) of the Steering Committee. To the extent reasonably practicable, any written materials for regular meetings of the Steering Committee shall be provided to all Members, the PA Representative and the CARB Representative not less than seventy-two (72) hours prior to the meeting. Unless specifically noted on such meeting materials or in the cover correspondence distributed with such meeting materials that such materials (or any portion thereof) are not to be distributed outside of the Steering Committee, each Member shall be free to distribute copies of the meeting materials to the Participating EDUs that such Member represents on the Steering Committee.

(g) Special Meetings. Special meetings of the Steering Committee to address emergency, urgent or other time sensitive matters shall be held on the call of the Program Administrator or any two (2) Members upon written notice to the Members, the PA Representative and the CARB Representative sent at least 2 business days prior to the meeting, or upon such shorter notice as may be approved by all the Members. To the extent reasonably practicable, any written materials for special meetings of the Steering Committee shall be provided to all Members, the PA Representative and the CARB Representatives not less than twenty-four (24) hours prior to the meeting (it being understood that it may not always be practicable to meet such a timeframe). Any Member may waive such notice as to himself or herself.

(h) Quorum; Voting Percentages. Members holding a majority of the voting percentages held by all Members (as described below in this Section 3.3(h)), shall constitute a quorum for the transaction of business of the Steering Committee. For the avoidance of doubt, as long as such a quorum is present, the Steering Committee may meet and act even if there are vacancies on the Steering Committee at such time, including, without limitation, during the time period following the Effective Date prior to the appointment of any Small EDU Member to the Steering Committee. At all times when the Steering Committee is conducting business at a meeting of the Steering Committee, a quorum of the Steering Committee must be present at such meeting. If a quorum shall not be present at any meeting of the Steering Committee, then the Members present at the meeting may adjourn the meeting from time to time, without notice other than announcement at the meeting, until a quorum shall be present. Until such time as SCE is no longer the Program Administrator, the voting percentages of the Members (which shall always total 100% in the aggregate) shall be:

Member

Voting Percentage

SCE's Member	33.0%
Each remaining Large EDU Member	12.5%
The Southern EDU Member	8.5%
The Northern EDU Member	8.5%

Unless previously modified pursuant to a replacement structure implemented by way of an amendment to this Agreement entered into pursuant to the provisions of Section 3.1(c), the following voting percentages set forth below will serve as the default replacement structure in the event of the replacement of the initial Program Administrator. In the event that another Large EDU replaces SCE as the Program Administrator, then its designated Member shall have a 33.0% voting percentage and SCE's Member shall have a 12.5% voting percentage, and the other voting percentages shall remain unchanged. In the event that a Participating Southern EDU replaces SCE as the Program Administrator, then such Participating Southern EDU shall have the sole power to appoint the Southern EDU Member and the Southern EDU Member shall have a 25.0% voting percentage, each Large EDU Member shall have a 13.3% voting percentage, and the Northern EDU Member shall have a 8.5% voting percentage. In the event that a Participating Northern EDU replaces SCE as the Program Administrator, then such Participating Northern EDU shall have the sole power to appoint the Northern EDU Member and the Northern EDU Member shall have a 25.0% voting percentage, each Large EDU Member shall have a 13.3% voting percentage, and the Southern EDU Member shall have a 8.5% voting percentage. In the event that the Program Administrator is not an EDU, then unless otherwise approved by the Steering Committee in connection with its approval of such replacement Program Administrator, the Program Administrator shall have no (0%) voting percentage, and each Large EDU Member shall have a 16% voting percentage, and the Southern EDU Member and the Northern EDU Member shall each have a 10% voting percentage.

(i) Vote Required for Action. Except as expressly set forth otherwise with respect to certain actions in this Agreement, (i) all actions of the Steering Committee must be taken at any duly scheduled or called meeting thereof at which a quorum is present and shall require the affirmative vote of Members (or of their respective Alternate or designated proxy as set forth below) holding a majority of the aggregate voting percentages held by all Members present at such meeting, and (ii) all actions of any subcommittee of the Steering Committee must be taken at any duly scheduled or called meeting of such subcommittee at which a quorum (i.e., a majority of the aggregate voting percentage held by all members of such subcommittee) is present and shall require the affirmative vote of Members (or of their respective Alternate or designated proxy as set forth below) holding a majority of the aggregate voting percentages held by all Members who are members of such subcommittee. Voting by proxy, which proxy must be in writing and signed by the Member or Alternate designated by the Party granting a proxy, granted to another Member (or Alternate therefor) will be allowed in case a Party with a Member on the Steering Committee is not able to have its designated Member or Alternate attend any regular or special meeting.

(j) Action by Written Consent. Notwithstanding anything herein to the contrary, any action of the Steering Committee (or any subcommittee thereof) may be taken

without a meeting if either (a) a written consent of Members holding at least sixty-six percent (66%) of the aggregate voting percentage held by all Members on the Steering Committee (or subcommittee), and which consent must include the signature of the Member (or Alternate) designated by the Program Administrator, shall approve such action; provided, that prior written notice of such action is provided to all Members, the PA Representative and the CARB Representative at least two (2) business days before such action is taken, or (b) a written consent constituting all of the Members on the Steering Committee (or subcommittee) shall approve such action. Such written consent shall have the same force and effect as a vote at a meeting where a quorum was present.

3.4. Advisory Committee

(a) The CFR Program's performance will be monitored by an advisory committee (the "**Advisory Committee**") comprised of representatives of stakeholder organizations (such as EDUs, regulatory agencies, industry groups, ZEV manufacturers and dealers, other industry representatives, environmental NGOs, social and economic justice groups, and other community-based organizations) that have a direct interest in the success of the CFR Program. A list of the stakeholders that the Parties anticipate inviting to join the Advisory Committee is set forth on Schedule 3.4(a) hereto, which Schedule may be amended from time to time by the Steering Committee.

(b) The purpose and role of the Advisory Committee will be to provide feedback to the Steering Committee on CFR Program performance and on market and industry trends and best practices to ensure a successful program. The Advisory Committee shall provide such information and feedback to the Steering Committee, and may make recommendations to the Steering Committee on program implementation, in response to consumer and dealer feedback, on metrics needed to evaluate program effectiveness and on CFR Program or process improvement, but the Advisory Committee shall have no management, operational, or decision-making power or authority, or any other type of power or authority, with respect to the CFR Program and neither the Steering Committee nor the Program Administrator shall be required to implement or follow any recommendations made by the Advisory Committee.

(c) The Advisory Committee and Steering Committee will meet or have conference calls or electronic meetings not less than twice a year to share feedback on CFR Program performance. The Steering Committee shall inform the Advisory Committee, by way of written or electronic notice to all members of the Advisory Committee or at an in-person, telephonic or electronic meeting of the Advisory Committee, prior to effecting any adjustment to the Reward Amount.

3.5. Duties

(a) This Agreement is not intended to, and does not, create or impose any fiduciary duty on any Party, the Program Administrator, the PA Representative, the CARB Representative, any Member or any member of the Advisory Committee appointed by a Participating EDU (each of the foregoing, a "**Covered Person**"). Furthermore, each of the Parties hereby waives any and all fiduciary duties that, absent such waiver, may be implied on any Covered Person by applicable law, and in doing so, acknowledges and agrees that the duties

and obligation of each Covered Person to each other, to any other Party and to the CFR Program with respect to the CFR Program or the matters that are the subject of this Agreement, are only as expressly set forth in this Agreement. The provisions of this Agreement, to the extent that they restrict the duties and liabilities of a Covered Person otherwise existing at law or in equity, are expressly agreed by the Parties to replace such other duties and liabilities of such Covered Person.

(b) Whenever in this Agreement a Covered Person is permitted or required to make a decision (including a decision that is in such Covered Person's "discretion" or under a grant of similar authority or latitude), the Covered Person shall be entitled to consider only such interests and factors as such Covered Person desires, including its own interests, and shall have no duty or obligation to give any consideration to any interest of or factors affecting any other Party, Member or third party. Whenever in this Agreement a Covered Person is permitted or required to make a decision in such Covered Person's "good faith," the Covered Person shall act under such express standard and shall not be subject to any other or different standard imposed by this Agreement or any other applicable law.

ARTICLE 4 SOLICITATION PROCESS.

4.1. Solicitation.

(a) As set forth above, the Steering Committee, under the oversight of the CARB Representative, will work with the Program Administrator to develop and ultimately approve the RFP/RFI processes to select the Implementers who will be engaged to develop, administer and implement the CFR Program, and the Program Administrator will serve as the primary agent of the Parties to issue and administer the RFP/RFI processes, subject to the terms below. The Parties agree that at least the following three Implementer functions will be required for the statewide CFR program: (i) implementation of the CFR program activities ("**Program Implementer(s)**"); (ii) a FDIC insured financial institution to receive, hold, and/or distribute CFR funds ("**Financial Institution**"); and (iii) an independent accounting firm to perform regular audits ("**Program Auditor**"). The Parties acknowledge and agree that additional Implementers may also be required as determined and approved by the Program Administrator and the Steering Committee.

(b) The Program Administrator will utilize a competitive solicitation/bidding process by issuing a Request for Proposal/Information with pricing (RFP/RFI) to potential Implementers to submit a proposal or quote on a specific commodity or service. The RFP/RFI bid process is a fair and standardized method for the Program Administrator to systematically obtain and demonstrate best value for goods and services procured and ensure that the CFR Program's vendor costs are reasonable according to prevailing market conditions.

(c) Competitive awards resulting from the RFPs/RFIs will be based upon the comparison of commercial and/or technical information from multiple independent suppliers. The RFP/RFI process will start with the development and definition of business requirements contained in a Statement of Work (SOW) or Specification. A list of prospective qualified suppliers will be established. The Program Administrator will receive input and approval from

the Steering Committee on the RFP/RFIs and development of an evaluation criteria prior to receipt of the bids. The Program Administrator will manage the competitive procurement process including the evaluation of the RFP responses. The successful bidder will be selected based on the established criteria (e.g., technical, commercial, supplier responsibility, and risk considerations). Negotiations are entered into, if necessary. Once negotiations with a proposed Implementer are complete, the Program Administrator will submit the proposed Program Agreement with such Implementer together with any requested supporting documentation to the Steering Committee for review and approval; provided that approval of each Program Implementer and the Program Auditor shall require the approval of Members holding at least sixty-six percent (66%) of the aggregate voting percentage held by all Members on the Steering Committee, which approval must include the approval of the Member designated by the Program Administrator and, as long as there are at least five (5) Members on the Steering Committee, the approval of at least three (3) other Members in addition to the Member designated by the Program Administrator. If the Steering Committee rejects the proposed Program Agreement with any vendor, it shall provide the Program Administrator with a detailed set of terms and conditions that must be included in the Program Agreement for the Steering Committee to provide its approval thereof. The Program Administrator shall then continue negotiations with the proposed Implementer or with other respondents to the solicitation process in order to meet the terms and conditions specified by the Steering Committee, and may then submit one or more revised proposals to the Steering Committee for approval. Following Steering Committee approval, the approved procurement award and Program Agreement will be delivered to the applicable vendor selected to serve as such Implementer.

4.2. Program Implementer(s).

(a) The Program Implementer(s) will consist of one or more third parties (which may include multiple contractors or a prime contractor that engages multiple subcontractors) to engage in Marketing, Education and Outreach (“ME&O”) activities for the CFR Program; establish, operate, and maintain the web-based portal for ZEV dealers to request reimbursement for payment of a Reward Amount and to submit documentation required to establish compliance with requirements for such reimbursement; and to review and evaluate the dealership requests for Reward Amount reimbursements to confirm whether they comply with the reimbursement requirements set forth in the applicable Program Agreement; and to perform such other services and obligations as are set forth in the applicable Program Agreement. The Program Implementer(s) will also assist with the collection of data, including all data necessary for participant and CFR Program reporting, and submit invoices to the Program Administrator to request payments owed to the Program Implementer or to approved subcontractors or vendors that have been engaged in accordance with the terms of the applicable Program Agreement. The Program Implementer(s) will perform, or contract for, other administrative and ME&O functions necessary and appropriate for the efficient operation of the CFR Program pursuant to the terms and conditions of the Program Agreements entered into with such Program Implementers by the Program Administrator on behalf of the Parties.

(b) A rate education and outreach implementation plan will be developed by the Program Implementer, in collaboration with the Steering Committee and the CPUC’s Energy Division, designed to educate ZEV purchasers and the public on time-of-use (“TOU”) rates (in general), other applicable rates and the benefits of off-peak charging. The rate education and

outreach plan will include a proposal for point of purchase or dealership educational materials. Rate education and outreach materials developed for the statewide CFR program will specify that there are a variety of rate options available depending on the different EDU service territories and will direct customers to contact their specific utility for more information. At a minimum, rate education will be required for all IOU customers who participate in the CFR Program.

(c) The Program Implementer's contract will require it to collect certain data, including but not limited to customer name, address, Vehicle Identification Number (VIN), ZEV make and model. The Program Implementer will provide this information to the Participating EDU that serves that particular customer, and to any non-Participating EDU that serves that customer that has executed and delivered the non-disclosure agreement with the Program Implementer required under Section 4.2(d). See Appendix B for a copy of the data collection template.

(d) In order to receive certain confidential customer related information from the Program Implementer (such as customer name, address, vehicle make, and other information relevant for purposes of grid planning, marketing of any additional utility ZEV programs and similar permitted uses), each Participating EDU shall be required to execute and deliver a non-disclosure agreement with the Program Implementer in a form negotiated by the Program Administrator and approved by the Steering Committee, which shall include the applicable confidentiality and data security requirements governing the handling of such information under applicable laws.

4.3. Financial Institution.

(a) The Financial Institution shall be a state or federally regulated bank or other financial institution that is insured by the FDIC and selected through a RFP/RFI process approved by the Steering Committee. The Financial Institution will receive and hold the EDU Contributions and all interest or other earnings thereon (collectively, "**Program Funds**") in designated Accounts (as defined and described below), and will disseminate Program Funds from the Accounts upon receipt of appropriate instructions from the Program Administrator, including (i) to pay reimbursements to ZEV dealers for their qualifying Reward Amount payments following verification thereof by the Program Implementer pursuant to the terms of its Program Agreement, and (ii) to pay other CFR Program costs, expenses and liabilities, including Administrative Expenses following approval of payment of the invoice by the Steering Committee or CARB in accordance with ARTICLE 6, and any amounts payable for or in connection with Indemnified Claims pursuant to Sections 7.5(b)(ii) and 7.5(b)(iii).

(b) Subject to such modifications to the below provisions as may be proposed by the Program Administrator and approved by the Steering Committee, the Program Administrator will enter into a master agreement with the Financial Institution (the "**Master Account Agreement**") that will provide for the establishment and maintenance of one or more bank accounts to hold, disburse or otherwise administer the Program Funds ("**Accounts**"). While the terms of the Master Account Agreement and the structure of the Accounts will not be able to be finalized until the completion of the RFP/RFI process to select a Financial Institution, the Parties currently anticipate that the basic financial structure of the CFR Program will follow

one of the structural models set forth below (with such modifications thereto as are proposed by the Program Administrator and approved by the Steering Committee), which are ranked in order of preference and which, to the extent a higher priority option is available prior to finalization of the Master Account Agreement, shall be approved by the Steering Committee in such order, subject to the provisions of Section 4.3(f) below and consideration of relevant Tax reporting and administration requirements:

(i) if the Program Administrator and the Steering Committee identify a Governmental Authority (including, for the avoidance of doubt, a POU) or not for profit entity that (A) is willing to serve as the record holder (under its name and federal Tax identification number) of an Account to hold all Program Funds (the **“Program Funds Account”**), and (B) they believe in good faith is appropriate to hold the Program Funds Account, then the Program Administrator shall negotiate the terms of one or more Program Agreements (each of which shall be subject to the approval of the Steering Committee in accordance with Section 3.2(a)) with such Designated Account Holder (as such term is defined in Section 1.1) and the Financial Institution pursuant to which the Designated Account Holder will (1) open and maintain the Program Funds Account in its name and federal Tax identification number, and (2) provide sole management authority and control over the Program Funds Account, all funds contained therein and all decisions pertaining thereto to the Program Administrator, which management authority and control shall in all cases be limited by and subject to the provisions of this Governance Agreement and any additional requirements established by CARB pursuant to the LCFS Regulation;

(ii) in the event that the Program Administrator and the Steering Committee have not identified a Designated Account Holder to hold the Program Funds Account, but have identified any Governmental Authority (including, for the avoidance of doubt, a POU) or not for profit entity that (A) is willing to serve as the record holder (under its name and federal Tax identification number) of an Account to hold the EDU Contributions (and all interest and earnings thereon) of more than one but less than all of the Participating EDUs (a **“Collective Deposit Account”**), and (B) they believe in good faith is appropriate to hold such Collective Deposit Account, then the Program Administrator shall negotiate the terms of one or more Program Agreements (each of which shall be subject to the approval of the Steering Committee in accordance with Section 3.2(a)) with each such Designated Account Holder and the Financial Institution pursuant to which the Designated Account Holder will (1) open and maintain such Collective Deposit Account in its name and federal Tax identification number, and (2) provide sole management authority and control over such Collective Deposit Account, all funds contained therein and all decisions pertaining thereto to the Program Administrator, which management authority and control shall in all cases be limited by and subject to the provisions of this Governance Agreement and any additional requirements established by CARB pursuant to the LCFS Regulation. For the avoidance of doubt, any Participating EDU that is not authorized to deposit its EDU Contributions into a Collective Deposit Account established pursuant to this Section 4.3(b)(ii) must establish an Individual Deposit Account in accordance with the provisions of Section 4.3(b)(iii) below; or

(iii) in the event that the Program Administrator and the Steering Committee have not identified (A) a Designated Account Holder to hold the Program Funds Account pursuant to Section 4.3(b)(i), or (B) one or more Designated Account Holders to hold

one or more Collective Deposit Accounts pursuant to Section 4.3(b)(ii) that, individually or in the aggregate, would hold the EDU Contributions for all Participating EDUs, then any Participating EDU that is not authorized to deposit its EDU Contributions into a Collective Deposit Account or, in the event there is no Collective Deposit Account, each Participating EDU, must establish its own individual deposit Account with the Financial Institution selected pursuant to Section 4.1(c) (each, an “**Individual Deposit Account**”) and will be required to execute and deliver, upon the Program Administrator’s request therefor, the separate Program Agreement with the Financial Institution creating and governing its Individual Deposit Account in the final form thereof negotiated by the Program Administrator for all Participating EDUs to deliver and as such final form has been approved by the Steering Committee (the “**Individual Deposit Account Agreement**”), as a condition to remaining as a Participating EDU and Party under this Agreement. The Individual Deposit Account Agreement shall grant the Program Administrator sole management authority and control over each Individual Deposit Account, all funds contained therein and all decisions pertaining thereto, which management authority and control shall in all cases be limited by and subject to the provisions of this Governance Agreement and any additional requirements established by CARB pursuant to the LCFS Regulation.

(c) In the event that the Program Administrator and the Steering Committee have not identified a Designated Account Holder to hold the Program Funds Account, the Program Administrator will establish one or more disbursement Accounts (the “**Disbursement Account**”) to be maintained for the purpose of paying all Reward Amount reimbursement payments to ZEV dealers (and, solely to the extent required by CARB pursuant to the LCFS Regulation and in accordance with the terms thereof, any carrying costs associated with any undue delay in reimbursement of Reward Amount payments to the ZEV dealers due to the fault of the Program Administrator), all Administrative Expenses, all payments to reimburse the Program Administrator for its (or its Affiliates’) payment of any Administrative Expenses, and all amounts payable for or in connection with Indemnified Claims pursuant to Sections 7.5(b)(ii) and 7.5(b)(iii). If there is a Program Funds Account, then all such payments, Administrative Expenses, reimbursement and amounts referenced in the preceding sentence will be paid out of the Program Funds Account. The Disbursement Account shall be held in the name of and under the federal Tax identification number of the Program Administrator, and the Program Administrator’s management authority and control over the funds in the Disbursement Account shall in all cases be limited by and subject to the provisions of this Governance Agreement and any additional requirements established by CARB pursuant to the LCFS Regulation.

(d) In the event that the Program Administrator and the Steering Committee have not identified a Designated Account Holder to hold the Program Funds Account, the Master Account Agreement shall set forth the terms and condition pursuant to which:

(i) when the Program Administrator delivers an instruction to the Financial Institution to make any payment of any Reward Amount to any ZEV dealer as verified by the Program Implementer, the Financial Institution will transfer from the Deposit Accounts to the Disbursement Account, pro rata from each Deposit Account (based on the respective then current account balances in each of the Deposit Accounts), the amounts necessary to pay such Reward Amount, and

(ii) when the Program Administrator delivers an instruction to the Financial Institution to make a payment of any Administrative Expense from the Administrative Account following approval of payment of the invoice from the Steering Committee or CARB in accordance with ARTICLE 6, the Financial Institution will transfer from the Deposit Accounts to the Disbursement Account, pro rata from each Deposit Account (based on the respective then current account balances in each of the Deposit Accounts), the amounts necessary to pay such Administrative Expense.

(e) A reserve of Program Funds totaling Ten Million Dollars (\$10,000,000.00) in the aggregate shall be maintained at all times following the Program Launch Date in the Program Funds Account or, if none, segregated among the Deposit Accounts in the manner and amounts determined by the Program Administrator but totaling Ten Million Dollars in the aggregate (the “**Liability Reserve**”). The Liability Reserve shall only be used by the Program Administrator as a reserve to cover and pay any and all amounts payable to any Indemnified Party in accordance with the indemnification provisions of Section 7.5(b), or to pay off any Remaining Liabilities following the termination of the CFR Program or this Agreement pursuant to the provisions of Section 9.1(b). In addition to the Liability Reserve, for each calendar year that ends following the Program Launch Date, an operating reserve shall be maintained in the Program Funds Account or, if none, segregated among the Deposit Accounts in the manner and amounts determined by the Program Administrator, in an amount equal to the CFR Program’s highest forecasted calendar month of expenditures projected for such year as set forth in the CFR Program budget for such year (the “**Operating Reserve**”). The Operating Reserve shall only be used by the Program Administrator as a reserve to cover and pay any and all amounts payable in accordance with the provisions of Section 4.3(d) and ARTICLE 6, or to any Indemnified Party in accordance with the indemnification provisions of Section 7.5(b), or to pay off any Remaining Liabilities following the termination of the CFR Program or this Agreement pursuant to the provisions of Section 9.1(b), in each case solely to the extent that there are insufficient Program Funds otherwise available to pay such amounts when due or required to be paid. Upon the request of the Program Administrator at any time, the Steering Committee is hereby authorized to adjust the respective amounts of the Liability Reserve and the Operating Reserve from time to time in an effort to ensure that adequate reserves for the payment of all costs, expenses, and liabilities (fixed or contingent) of the CFR Program, and all Claims pertaining thereto, are maintained at all times.

(f) Notwithstanding the foregoing or any other provision of this Agreement to the contrary, in the event that the Program Administrator determines in good faith that modifications to the foregoing structure, or an alternative Account structure, are necessary or appropriate in order to avoid any adverse Tax consequences to the Program Administrator or its Affiliates arising from such structure, the Program Administrator may call an emergency meeting for Steering Committee review and approval of any such modifications or alternative structures; provided that if the Program Administrator and the Steering Committee are unable to agree upon the modifications to be implemented within ten (10) business days following the initial issuance of the notice for such emergency meeting by the Program Administrator, the Program Administrator shall have the power, authority and discretion to implement such modifications or alternative structures as are determined appropriate by the Program Administrator, and the Program Administrator shall promptly notify the Steering Committee no

later than three (3) business days following the implementation of any such modifications or alternative structures that did not receive Steering Committee approval.

(g) Without limiting the provisions of Section 9.1(b) below, once any EDU Contribution is deposited into any Deposit Account or Program Funds Account, as the case may be, those funds and all interest and earnings thereon will become Program Funds and the Participating EDU or Designated Account Holder that is the holder of such Deposit Account or Program Funds Account, as the case may be, will not be able to withdraw, transfer or otherwise exercise any control over such funds (or any interest or earnings thereon) even if such Participating EDU withdraws or is removed from the CFR Program or this Agreement, or such Designated Account Holder desires to close such Collective Deposit Account or Program Funds Account; provided that for Tax purposes, such Participating EDU or Designated Account Holder that is the holder of such Deposit Account or Program Funds Account shall be considered the owner of such funds and all interest and earnings on such funds maintained in any Deposit Account will be reported as interest and earnings paid to or received by the Participating EDU or Designated Account Holder that is the record holder of such Account. All applicable bank fees and penalties for all Accounts are considered part of CFR Program Administrative Expenses and will be paid or reimbursed using Program Funds. No Participating EDU shall claim a Tax deduction in connection with a deposit to their respective EDU Contribution Account, except at such time and to the extent such funds are paid to ZEV dealers or to satisfy or reimburse Administrative Expenses or Indemnified Claims pursuant to Sections 7.5(b)(ii) and 7.5(b)(iii).

4.4. Program Auditor.

(a) Program Auditor. The Program Auditor will be an independent (i.e., not an Affiliate of any EDU), nationally-recognized (i.e., with 10 or more offices in at least 3 different states) accounting firm engaged to perform regular audits of all auditable aspects of the CFR Program, including the program controls and performance, the administration of the CFR Program and Administrative Expenses, including payment/reimbursement of expenses to the Program Administrator and Program Implementers, and Reward Amount payments/reimbursements to ZEV dealers. An annual audit of the CFR Program will be conducted by the Program Auditor each fiscal year with a published report to be issued within sixty (60) days following the completion of the audit (and in no event later than one hundred eighty (180) days following the end of the fiscal year). During the first year of the CFR Program following the Program Launch Date, an interim audit will be performed to test CFR Program controls and such audit will commence within six (6) months after the Program Launch Date with a report issued sixty (60) days after completion of the audit.

(b) Confidential and Market-Sensitive Information. Unless otherwise determined by the Steering Committee it is not anticipated that the Program Auditor will receive any market-sensitive information in connection with its audits and market-sensitive aspects of the CFR Program, such as, but not limited to, any trading activity in LCFS Base Credits by the EDUs, shall not be included within the scope of any audit by the Program Auditor. No Participating EDU is obligated to provide or disclose any of its confidential or market-sensitive information to any other Participating EDU under this Agreement. All Participating EDUs and Implementers shall be required to comply with any and all requests for information issued by

CARB in accordance with the LCFS Regulation or other applicable law, as well as to any other Governmental Authority with legal authority and jurisdiction to request such information.

(c) Audit Reports. The Program Auditor's audit reports shall be provided to all Participating EDUs, CARB, the CPUC, and the public. Any Participating EDU shall have the right at its own expense to review any non-confidential records and information underlying the Program Auditor's report on reasonable notice during regular business hours. The Program Auditor's reports shall contain all information necessary for the Program Administrator to comply with its reporting obligations to CARB as set forth in the CPUC Approval (and in any subsequent resolution issued by CARB), and each Party shall provide all information and assistance requested by the Program Auditor or the Program Administrator in order to comply with such reporting obligations to CARB or any other Governmental Authority.

(d) Program Auditor Insurance. The Program Auditor shall maintain insurance coverage of the specified types, with an endorsement as additional insured for the benefit of the Program Administrator, the Steering Committee and the Parties, and in amounts equal to or in excess of such minimum coverage amounts, in each case as are determined by the Steering Committee.

4.5. Program Implementer Qualifications. The RFP solicitation shall provide that third parties seeking to be Program Implementers must meet certain minimum requirements in order to submit an offer in response to the RFP. The RFP will provide that each Program Implementer will be required to execute and deliver one or more Program Agreements with the Program Administrator (and, if applicable, the Participating EDUs) that includes terms and conditions pursuant to which the Program Implementer, depending on the scope of work to be provided by such Program Implementer to the CFR Program, will:

(a) indemnify, defend, and hold each of the Participating EDUs, their Affiliates, and each of their respective Representatives harmless for and from any liabilities arising from or in connection with any negligent or intentional acts/omissions or mismanagement of Program Funds or other LCFS Credit Revenue by such Program Implementer, its contractors or subcontractors, or any of its or their respective Representatives (collectively, the "**Program Implementer Representatives**");

(b) have procured, and will cause Program Implementer Representatives and other vendors and contractors, to have or procure, sufficient insurance to cover their liabilities in such amounts equal to or in excess of such minimum coverage amounts as are determined by the Steering Committee to cover any negligence, errors or omissions, or mismanagement of the Program Funds, LCFS Credit Revenue or the CFR Program by the Program Implementer Representatives;

(c) have internal practices and procedures to prevent the risk of fraud or mismanagement (including terms and conditions that would apply to the evaluation of claims submitted and payment of Reward Amounts to participating ZEV dealers);

(d) have experience managing large-scale programs with aggregate funding in excess of \$100 million;

- (e) have technological experience creating web-based programs;
- (f) ensure that all agreements with subcontractors include terms for the protection of the Participating EDUs;
- (g) not be an Affiliate of the Program Administrator or any Participating EDU; and
- (h) have practices and procedures to prevent and prosecute fraud by ZEV dealers seeking reimbursement for Reward Amounts, such as through carefully crafted terms and conditions to which ZEV purchasers and point-of-sale entities must agree to receive the applicable Reward Amount for the ZEV purchaser.

ARTICLE 5

CFR PROGRAM EXPENSES; COST SHARING; LAUNCH

5.1. Program Administrator Expenses. The Parties hereby acknowledge and agree that Program Funds shall be used to pay and/or reimburse the Program Administrator (unless it is a Third Party Program Administrator) for, all costs, expenses, fees, Taxes, liabilities, and other amounts paid or incurred by the Program Administrator pursuant to or in connection with its service or status as Program Administrator ("**Administrative Expenses**"), including without limitation (but subject to the provisions of Section 5.2 below), (i) all amounts paid or incurred with respect to (A) any Implementers, or (B) any other contractors, vendors, attorneys, accountants, or other third parties in connection with the role of Program Administrator, (ii) an allocated portion of the fully-loaded labor costs (excluding bonus programs) for any employees who provide services in connection with the Program Administrator role and functions (which allocation shall be determined by the Program Administrator in good faith), (iii) an allocated portion of time and materials costs paid to independent contractors who provide services in connection with the Program Administrator role and functions (which allocation shall be determined by the Program Administrator in good faith), (iv) any reasonable travel related expenses incurred by any such persons described in the preceding clauses (ii) or (iii) associated with the Program Administrator role or functions, and (v) any non-labor related marketing costs such as media buy and collateral development expenses. For the avoidance of doubt, Administrative Expenses do not include costs, expenses, fees, Taxes, liabilities, and other amounts paid or incurred by SCE (or any successor thereof as Program Administrator that is a Participating EDU) to the extent paid or incurred in its capacity as a Participating EDU as opposed to in its capacity as Program Administrator. For purposes of illustrating the concept underlying the preceding sentence only, and without any limiting purpose or effect, any Taxes (including on any interest or other earnings on such account) incurred by the Program Administrator (or its Affiliates) in connection with any Disbursement Account, Program Funds Account, Collective Deposit Account, or Individual Deposit Account (except for the Program Administrator's own Individual Deposit Account, if any), or any other Account opened or maintained with the Financial Institution in connection with its role as Program Administrator constitute Administrative Expenses, but any Taxes incurred by SCE (or any successor thereof as Program Administrator that is a Participating EDU) on its own Individual Deposit Account into which its EDU Contributions will be made in its capacity as a Participating EDU would not constitute Administrative Expenses. To make the Program Administrator (unless it is a

Governmental Authority or not for profit entity exempt from income Tax)) whole on an after-Tax basis, Taxes constituting Administrative Expenses shall be calculated as if the Program Administrator were subject to Tax at, and any payment or reimbursement of Taxes constituting Administrative Expenses shall be grossed-up at, the highest combined federal and state marginal Tax rate for the applicable period in the Program Administrator's jurisdictions of operations, in each case as reasonably determined by the Program Administrator. The Parties acknowledge and agree that the Program Administrator (unless it is a Third Party Program Administrator) is entitled to payment and reimbursement from Program Funds (including all required EDU Contributions, but excluding, with respect to the Program Administrator's own internal costs that constitute Administrative Expenses, any interests or earnings thereon) for all Administrative Expenses, particularly in light of the fact that the Program Administrator is not requesting or receiving any administrator fee or compensation for its services as Program Administrator. Accordingly, each Participating EDU hereby covenants and agrees to make its respective EDU Contributions and to pay all other amounts payable by such Participating EDU in accordance with the terms and conditions of this Agreement, and CARB shall be tasked with monitoring each Participating EDU's compliance with these obligations in its respective Program Agreement and verifying the information received with the Financial Institution and CARB, as applicable. For the avoidance of doubt, the foregoing Administrative Expense payment and reimbursement rights shall not apply to any Program Administrator other than SCE or another Participating EDU that is appointed by the Steering Committee to serve as Program Administrator, as the Parties anticipate that any Third Party Program Administrator that may be engaged would receive fees for its service in such role and any additional expense payments or reimbursements to which it may be entitled would be expressly set forth in the engagement agreement with such Third Party Program Administrator.

5.2. Payment/Reimbursement of Administrative Expenses. The Program Administrator (unless it is a Third Party Program Administrator) upon approval by the Steering Committee is hereby authorized to (i) pay Administrative Expenses directly from Program Funds, and (ii) reimburse itself for any Administrative Expenses paid or incurred by the Program Administrator (or any of its Affiliates), in each case from Program Funds in the Program Funds Account or the Disbursement Account, as the case may be, and to transfer amounts from any Deposit Account into the Disbursement Account in order to make such payments and reimbursements, in each case in accordance with the provisions of ARTICLE 6 below and the Master Account Agreement; provided that the total amount of such payments and reimbursements of Administrative Expenses made by the Program Administrator in any calendar year following approval of the invoice therefor by the Steering Committee or CARB in accordance with the provisions of ARTICLE 6, shall in no event exceed ten percent (10%) (as such percentage may be adjusted pursuant to the following provisions of this Section 5.2, the "**Percentage Target**") of the total CFR Program budget of aggregate Program Funds for such calendar year. The Program Administrator and the Steering Committee shall monitor the aggregate amount of payments and reimbursements of Administrative Expenses approved and made in each calendar year to ensure that aggregate Administrative Expenses payments and reimbursements made in such calendar year do not exceed the Percentage Target. Given that the Parties cannot predict with any degree of accuracy what the actual annual Administrative Expenses will be until the RFP/RFI processes have concluded and the Implementers have been engaged, upon the request of the Program Administrator, but subject to the prior submission to, and approval by, the CPUC of a Tier 2 advice letter if still required in connection therewith by

the provisions of ordering paragraph 6 or ordering paragraph 7 of CPUC Resolution E-5015, the Steering Committee is hereby authorized to increase (but not decrease) the Percentage Target from time to time to ensure that all Administrative Expenses incurred in each calendar year are authorized to be paid or reimbursed, as the case may be, in a timely fashion and when due. Notwithstanding the foregoing, the provisions of this Section 5.2 shall not apply to any Third Party Program Administrator, as the terms and conditions on which any Third Party Administrator may handle or administrator any Program Funds or Accounts shall be set forth in and governed by the applicable Program Agreement(s) entered into with such Third Party Program Administrator.

5.3. Start-Up Funding. To fund the initial start-up costs of the CFR Program, including the amounts necessary to pay all Administrative Expenses and all Reward Amount reimbursement payments to ZEV dealers and to fund the initial Reserve Amount during the start-up phase of the CFR Program, the Participating EDUs will contribute a total of Fifty Million Dollars (\$50,000,000) in initial EDU Contributions in the aggregate (assuming full participation by all eligible EDUs in the CFR Program). Each Participating EDU shall be required to fund the amount set forth opposite such Participating EDU's name on Appendix A hereto as its initial EDU Contribution (the "**Initial EDU Contributions**"). Following the establishment of the initial Account structure for the CFR Program in accordance with the provisions of Section 4.3, each Large EDU shall be required to deposit the amount of its Initial EDU Contribution into its EDU Contribution Account (which shall be the applicable Program Funds Account, Collective Deposit Account or Individual Deposit Account designated for such Large EDU in accordance with the instructions of the Program Administrator), no later than sixty (60) days following the date on which the Master Account Agreement is executed by the Program Administrator and the Financial Institution (the "**Initial Funding Date**"). In the event the Account structure includes an Individual Deposit Account for such Large EDU, such Large EDU shall also execute and deliver its Individual Deposit Agreement to the Financial Institution on or prior to the earlier to occur of the Initial Funding Date and the date on which it makes its Initial EDU Contribution. Each other Participating EDU besides the Large EDUs shall be required (a) to deposit the amount of its Initial EDU Contribution into its EDU Contribution Account, which shall be the applicable Program Funds Account, Collective Deposit Account or Individual Deposit Account designated for such Participating EDU in accordance with the instructions of the Program Administrator, and (b) if such Program Administrator instructions provide that an Individual Deposit Account be established for such Participating EDU, such Participating EDU shall also execute and deliver its Individual Deposit Agreement to the Financial Institution, in each case for both clauses (a) and (b), no later than (i) January 31, 2021 for all Participating EDUs identified as Medium Publicly-owned Utilities on Appendix A, and (ii) January 31, 2023 for all Participating EDUs identified as Small Publicly-owned Utilities or Small Investor-owned Utilities on Appendix A; provided that if such other Participating EDU has not executed and delivered its Joinder to become a Party to this Agreement pursuant to Section 2.2 on or prior to (x) January 31, 2021 for the Medium Publicly-owned Utilities, or (y) January 31, 2023 for the Small Publicly-owned Utilities, then such Participating EDU shall have until the first anniversary of the date of its Joinder to deposit the amount of its Initial EDU Contribution into its EDU Contribution Account and, if applicable, to execute and deliver its Individual Deposit Account Agreement to the Financial Institution.

5.4. Periodic Funding Requirements. Each Participating EDU hereby covenants and agrees that, upon and following such Participating EDU's execution of this Agreement, in addition to making its required Initial EDU Contribution, it will also make additional aggregate EDU Contributions to its EDU Contribution Account during each calendar year in an amount equal to or greater than the applicable required percentage for such year of LCFS Credit Revenue generated by such Participating EDU during such calendar year as set forth opposite the name of such Participating EDU on Appendix A (the "**Required Percentage**"), and in accordance with the LCFS Regulation.

(a) Large EDUs' Periodic EDU Contributions. Each Large EDU shall be responsible for (i) identifying and tracking all Earmarked Credits deposited into its LCFS balancing account by CARB at any time on or after the Final CPUC Approval Date, and (ii) no later than the Initial Funding Date, depositing into its EDU Contribution Account the Required Percentage of the LCFS Credit Revenue generated by such Large EDU from the sale of all Earmarked Credits that have been deposited by CARB into such Large EDU's LCFS balancing account at any time on or prior to the end of the calendar quarter immediately preceding the quarter during which the Initial Funding Date occurs, and such Large EDU shall be required to sell all such deposited Earmarked Credits prior to the Initial Funding Date (provided that with respect to LCFS Credit Revenue generated by sales of any Earmarked Credits deposited into such Large EDU's LCFS balancing account during the calendar quarter that immediately precedes the quarter in which the Initial Funding Date occurs, the Large EDU shall have until the last day of such quarter in which the Initial Funding Date occurs to deposit its Required Percentage of such LCFS Credit Revenue generated therefrom into its EDU Contribution Account as required under this Section 5.4(a)(ii)). Commencing with the quarter in which the Initial Funding Date occurs, the Large EDUs will deposit their Required Percentage of their respective LCFS Credit Revenue into their respective EDU Contribution Accounts no less frequently than on a quarterly basis in arrears and in one or more transactions that shall be made no later than the end of the last business day of the following quarter. The following table sets forth the required deposit schedule of the Large EDUs' LCFS Credit Revenue for an illustrative year of the CFR Program:

Table X: Schedule of Large EDU Base Credit Revenue Transfer to CFR Program

Due Date for Deposit	Large EDU Required Deposits into its EDU Contribution Account
June 30	Large EDU deposits into its EDU Contribution Account the Required Percentage of its respective LCFS Credit Revenue from the sale of any Earmarked Credits deposited in its LCFS balancing account in Q1 of that year.
September 30	Large EDU deposits into its EDU Contribution Account the Required Percentage of its respective LCFS Credit Revenue from the sale of any Earmarked Credits deposited in its LCFS balancing account in Q2 of that year.
December 31	Large EDU deposits into its EDU Contribution Account the Required Percentage of its respective LCFS Credit Revenue from the sale of any Earmarked Credits deposited in its LCFS balancing account in Q3 of that year.
March 31	Large EDU deposits into its EDU Contribution Account the Required Percentage of its respective LCFS Credit Revenue from the sale of any Earmarked Credits deposited in its LCFS balancing account in Q4 of the previous year plus any "true up" revenue from the previous calendar year.

If any Large EDU has any Earmarked Credits deposited into its LCFS balancing account by CARB in any quarter that remain unsold at the end of such quarter, the Large EDU will track such Earmarked Credits and contribute the Required Percentage of the LCFS Credit Revenue generated therefrom to its EDU Contribution Account in the immediately following quarter, in which quarter such Earmarked Credits must be sold. Each Large EDU will be required to sell all Earmarked Credits deposited into its LCFS balancing account by CARB each quarter by no later than the end of the following quarter. By March 31st of each year, each Large EDU will be responsible for truing up and depositing into its EDU Contribution Account its aggregate required EDU Contributions for the entire previous calendar year. Notwithstanding the foregoing, the Steering Committee shall have the power and authority to waive or suspend the aforementioned timing requirements for when sales of Earmarked Credits held in the respective LCFS balancing accounts of the Large EDUs must take place should the Steering Committee determine that market conditions or other extenuating factors make such waiver or suspensions (which would apply as to all Large EDUs) prudent, and the Steering Committee shall promptly notify all Large EDUs of any such waiver or suspension. The Steering Committee shall grant an extension of the aforementioned timing requirements to any Large EDU, on an individual case-by-case basis, if the Large EDU has demonstrated to the satisfaction of the Steering Committee that it is utilizing all reasonable efforts to consummate the sale of its Earmarked Credits in a diligent and timely manner, but needs additional time to complete all sales required in order to deposit its full Required Percentage of LCFS Credit Revenue.

(b) Other Participating EDUs' Periodic EDU Contributions. Each EDU that is not a Large EDU shall be responsible for (i) identifying and tracking all Earmarked Credits deposited into its LCFS balancing account by CARB at any time on or after the Final CPUC Approval Date, and (ii) within sixty (60) days following such EDU's execution of this Agreement or a Joinder hereto, depositing into its EDU Contribution Account the Required Percentage of the LCFS Credit Revenue generated by such EDU from the sale of all such Earmarked Credits deposited into its LCFS balancing account by CARB at any time on or prior to the end of the calendar year immediately preceding the year during which such EDU becomes a Party to this Agreement, and each such EDU shall be required to sell all such deposited Earmarked Credits prior to such 60th day following such EDU's execution of this Agreement or a Joinder hereto. Each other Participating EDU besides the Large EDUs will also deposit its Required Percentage of its respective LCFS Credit Revenue received in any calendar year commencing with the calendar year in which it becomes a Participating EDU into its respective EDU Contribution Account no less frequently than on an annual basis in arrears and in one or more transactions that shall occur no later than March 31st of the following year. All such Participating EDUs shall be required to sell all of the Earmarked Credits deposited by CARB into its LCFS balancing account during any calendar year in such calendar year. Notwithstanding the foregoing, the Steering Committee shall have the power and authority to waive or suspend the aforementioned timing requirements for when sales of Earmarked Credits held in the respective LCFS balancing accounts of the other Participating EDUs must take place should the Steering Committee determine that market conditions or other extenuating factors make such waiver or suspensions (which would apply as to all such other Participating EDUs) prudent, and the Steering Committee shall promptly notify all such Participating EDUs of any such waiver or suspension. The Steering Committee shall also have the power and authority to grant an extension of the aforementioned timing requirements to any Participating EDU, on an individual case-by-case basis, that has demonstrated to the satisfaction of the Steering Committee that it is utilizing all reasonable efforts to consummate the sale of its Earmarked Credits in a diligent and timely manner, but needs additional time to complete all sales required in order to deposit its full Required Percentage of LCFS Credit Revenue.

(c) Steering Committee. Notwithstanding the foregoing, the above annual deposit schedules for the Participating EDUs set forth in Sections 5.4(a) and 5.4(b) above shall be reviewed by the Steering Committee at a minimum of every three years, and whenever the Program Administrator requests in good faith any modification to any such schedule, and the deposit schedule shall be updated from time to time if necessary as determined by the Steering Committee.

5.5. CFR Program Commencement. The Parties shall commence the CFR Program following the satisfaction of the following conditions: (i) SCE, PG&E and SDG&E shall have received any additional approval or consent of the CPUC to execute and deliver this Agreement as may be required by the CPUC Approval; (ii) CARB Authorization shall have been received; (iii) each Large EDU shall have duly executed and delivered this Agreement to the other Large EDUs; (iv) Members holding at least a majority of the voting percentages specified to be held by all Members as set forth in Section 3.3(h), shall have been appointed to the Steering Committee pursuant to the provisions of Section 3.3(a); (v) the Financial Institution, Program Auditor and the Program Implementer responsible for administering and paying Reward Amount reimbursement payments to ZEV dealers shall have been selected and engaged through duly

executed and delivered Program Agreements, and any preconditions to commencement of the CFR Program set forth in such Program Agreements shall have been satisfied or been duly waived by the Steering Committee and the Program Administrator; (vi) each Large EDU shall have deposited its Initial EDU Contribution into its EDU Contribution Account, the Liability Reserve and the Operating Reserve shall have been funded using such Initial EDU Contributions, and, to the extent instructed by the Program Administrator pursuant to Section 4.3(b), the Financial Institution and each Large EDU shall have duly entered into their respective Individual Deposit Account Agreement; (vii) the Steering Committee has approved the initial Reward Amount pursuant to the provisions of Section 3.3(d)(iii); (viii) the Parties shall have received approval or a legal opinion from CARB that the LCFS Credit Revenue may be used to compensate all CFR Program costs and expenses including, subject to Section 5.2 and the other provisions of this Agreement, any Administrative Expenses and any Indemnified Claims using Reserve Amounts and other Program Funds under this Agreement; (ix) the Program Administrator shall have made a solicitation to procure, or have otherwise approached insurance or bonding providers to procure, a Policy or Bond to cover Claims pertaining to the CFR Program and, to the extent commercially available, shall have procured such Policy or Bond in accordance with the provisions of Section 7.4; and (x) at the written request of the Program Administrator, the Steering Committee shall have issued its approval to commence the CFR Program and to authorize the offer and payment of the initial Reward Amount thereunder by issuance of a joint press release on behalf of all Participating EDUs announcing the official commencement and launch of the CFR Program. The CFR Program shall officially commence on the date specified in such joint press release as the official start date of the CFR Program (the **"Program Launch Date"**).

ARTICLE 6

APPROVAL AND PAYMENT OF INVOICES

6.1. Implementer Invoices. The Program Agreement with each Implementer shall set forth the terms and conditions for submission of all Implementer invoices to the Program Administrator for payment. Following receipt of any invoice from any Implementer, or from any other contractor, vendor, attorney, accountant, or other third party in connection with the Program Administrator's role and responsibilities as Program Administrator and that the Program Administrator has not paid directly and submitted for reimbursement as an Administrative Expense that was paid by the Program Administrator in accordance with the provisions of Section 6.2 below, the Program Administrator shall submit such invoice (along with any other supporting documents submitted therewith) to the Steering Committee and/or the applicable Invoice Subcommittee. The CARB Representative shall receive copies of all invoices submitted to the Steering Committee. Following final approval of any such invoice by the Steering Committee or CARB, the Program Administrator shall authorize and instruct the Financial Institution to pay such invoice as an Administrative Expense from the Program Funds Account or the Disbursement Account, as applicable. Any amounts incurred in connection with any delay in approval or payment of any invoice, including any interest, fees, charges, penalties or other amounts, shall also be paid as an Administrative Expense from the Program Funds Account or the Disbursement Account, as applicable.

6.2. Program Administrator Invoices. In the event that the Program Administrator (or any Affiliate thereof) pays any Administrative Expenses directly, including any

Administrative Expenses paid or incurred by the Program Administrator prior to the Program Launch Date, the Program Administrator shall submit an invoice therefor (along with any reasonably requested supporting documentation) to the Steering Committee and/or the applicable Invoice Subcommittee. The CARB Representative shall receive copies of all invoices submitted to the Steering Committee. Following final approval of any such invoice by the Steering Committee or CARB, the Program Administrator shall authorize and instruct the Financial Institution to pay such invoice as an Administrative Expense from the Program Funds Account or the Disbursement Account, as applicable.

6.3. Reward Amount Payments. For the avoidance of doubt, Reward Amount payments and reimbursements shall not be subject to the invoice, approval and payment procedures set forth in this ARTICLE 6, and shall in no event be deemed to be Implementer or vendor invoices. Reward Amount payments and reimbursements shall be handled pursuant to the provisions of Section 4.3(c)(i) and the applicable Program Agreements with the Program Implementer and the Financial Institution, and shall in no event require any review or approval of the Steering Committee or any subcommittee thereof, but are subject to audit by the Program Auditor.

ARTICLE 7

RELEASE, COVENANT NOT TO SUE, INSURANCE AND INDEMNIFICATION

7.1. Release and Waiver.

(a) Each Party, on its own behalf, and on behalf of its successors, assigns, direct and indirect subsidiaries and Affiliates (collectively, "**Related Entities**"), does hereby irrevocably, unconditionally, voluntarily, knowingly, fully, finally, completely, and forever waive and disclaim, and release and discharge:

(i) SCE, and each of its direct and indirect subsidiaries, Affiliates, divisions, successors, assigns and predecessors and each of its and their direct and indirect Representatives, successors, and assigns, individually and collectively (each, a "**SCE Released Party**" and collectively, the "**SCE Released Parties**"), from, against and with respect to, any and all Claims that such Party or its Related Entities ever had or now has, or may hereafter have or acquire, against any of the Released Parties by reason of any and all acts, omissions, events, circumstances or facts existing or hereafter occurring that, directly or indirectly, arise out of, result from, relate to, or are otherwise connected with or involving SCE's performance or non-performance in its role, capacity or status as Program Administrator, or its actions or inactions as Program Administrator or with respect to the administration, management or oversight of the CFR Program, including, without limitation, the RFP/RFI processes, the selection of the Implementers, the performance or non-performance of any Implementer, and any management or oversight of the Implementers ("**SCE Released Claims**"); provided that in no event shall SCE Released Claims include or be deemed to include Claims arising from the SCE Released Party's own fraud, willful injury to the person or property of another, or violation of law whether willful or negligent, or otherwise against public policy pursuant to California Civil Code Section 1668; and

(ii) each Member, each Alternate and each EDU that appoints or employs such Member or Alternate, individually and collectively (each, a **"Steering Committee Released Party"** and collectively, the **"Steering Committee Released Parties"**), from, against and with respect to, any and all Claims that such Party or its Related Entities ever had or now has, or may hereafter have or acquire, against any of the Released Parties by reason of any and all acts, omissions, events, circumstances or facts existing or hereafter occurring that, directly or indirectly, arise out of, result from, relate to, or are otherwise connected with or involving such Member's or Alternate's performance or non-performance in his or her role, capacity or status as a Member or Alternate, or his or her actions or inactions as a Member or Alternate on the Steering Committee or with respect to the Steering Committee's administration, management or oversight of the CFR Program, including, without limitation, the RFP/RFI processes, the selection of the Implementers, the performance or non-performance of any Implementer, and any management or oversight of the Implementers (**"Steering Committee Released Claims"**); provided that in no event shall Steering Committee Released Claims include or be deemed to include Claims arising from the Steering Committee Released Party's own fraud, willful injury to the person or property of another, or violation of law whether willful or negligent, or otherwise against public policy pursuant to California Civil Code Section 1668.

(b) Each Party, itself and for its Related Entities, expressly acknowledges and agrees that it has executed and delivered this Agreement with the intention that the release and waiver set forth in this Section 7.1 (the **"Release"**) be a general release and waiver to the full extent provided herein. Each Party, itself and for its Related Entities, expressly acknowledges and agrees that there is a possibility that subsequent to the execution of this Agreement, it will discover facts or incur or suffer Claims specifically related to Released Claims which were unknown or unsuspected at the time this Agreement was executed, and which if known by it at that time may have materially affected its decision to execute this Agreement or to grant the Release provided for herein. Each Party, itself and for its Related Entities, expressly acknowledges and agrees that it has by reason of this Agreement, and the Release contained herein, it is assuming any risk of such unknown facts and such unknown and unsuspected Released Claims. Each Party, itself and for its Related Entities, expressly acknowledges and agrees that it has been advised of, and does hereby specifically and expressly waive and release all rights under, the provisions of Section 1542 of the Civil Code of California, which provides as follows:

"A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS THAT THE CREDITOR OR RELEASING PARTY DOES NOT KNOW OR SUSPECT TO EXIST IN HIS OR HER FAVOR AT THE TIME OF EXECUTING THE RELEASE AND THAT, IF KNOWN BY HIM OR HER, WOULD HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH THE DEBTOR OR RELEASED PARTY."

Notwithstanding any such provisions or similar laws, this Agreement shall constitute a full release of Released Claims in accordance with its terms. Each Party, itself and for its Related Entities, knowingly and voluntarily waives the provisions of Section 1542 and any other such statutes, laws, or rules of similar effect, and acknowledges and agrees that this waiver is an essential and material term of this Agreement and was separately bargained for, and without such waiver (i) SCE would not have agreed to serve as Program Administrator and would not have entered into this Agreement, and (ii) each Member and each Alternate would not have agreed to

serve as a Member or Alternate, as the case may be, on the Steering Committee. Each Party, itself and for its Related Entities, hereby represents that it has been advised by its legal counsel, and that it understands and acknowledges the significance and consequence of the Release set forth herein and of this waiver of Section 1542 and any other such statutes, laws, or rules of similar effect.

7.2. Covenant Not To Sue.

Each Party, on its own behalf and on behalf of each of its Related Entities, irrevocably covenants and agrees never to sue, commence or prosecute any action or other proceeding against, or make any Claim or demand upon any Released Party, directly or indirectly, in respect of any of the Claims or matters waived, disclaimed, released or discharged in respect of such Released Party pursuant to Section 7.1 above, or in respect of any of the Claims or matters purported to be waived, disclaimed, released or discharged in respect of such Released Party pursuant to Section 7.1 above notwithstanding the failure of any court or arbitrator of competent jurisdiction to enforce or validate any provision thereof.

7.3. Effect of Release and Covenant Not to Sue.

(a) Enforcement. Each of the Release set forth in Section 7.1 and the covenant not to sue set forth in Section 7.2 (the “**Covenant Not to Sue**”) may be pleaded by any of the Released Parties as a full and complete defense and may be used as the basis for an injunction against any action at law or equity instituted or maintained against any of them in violation hereof.

(b) Complete Release. Each Party hereby warrants and represents that there are no additional entities or persons affiliated with such Party that are necessary to effectuate the release and extinguishment contemplated herein and this Agreement (including, without limitation, the Release and the Covenant Not to Sue set forth herein) constitutes a valid and binding obligation of such Party, enforceable against such Party in accordance with its terms, subject to laws of general application relating to bankruptcy, insolvency and the relief of debtors and rules of law governing specific performance, injunctive relief or other equitable remedies. Each Party hereby warrants and represents that such Party has not heretofore assigned, subrogated or transferred, or purported to assign, subrogate, or transfer to any Person whatsoever any Released Claim. Each Party hereby agrees to indemnify, defend, and hold harmless each Released Party from any such assignment, subrogation, or transfer of Released Claims.

(c) Knowledge and Investigation Of Release/Covenant Not to Sue. Each Party granting the Release and making the Covenant Not to Sue has made such investigation of the facts pertaining to the Release and the Covenant Not to Sue, and all of the matters pertaining thereto, as such Party deems necessary. In agreeing to the Release and the Covenant Not to Sue, each such Party assumes, on its own behalf and on behalf of each of its Related Entities, the risk of any mistake. Should any such Party subsequently discover that such Party’s understanding of the facts or of the law in agreeing to such Release and Covenant Not to Sue was incorrect, such Party (and its Related Entities) will not be entitled to any relief in connection therewith. Without limiting the generality of the foregoing, each Party surrenders any alleged right or Claim to set aside or rescind the Release or the Covenant Not to Sue on any ground whatsoever. Each of the

Release and the Covenant Not to Sue is intended to be and is final and binding upon each Party and its Related Entities.

(d) Newly Discovered Facts Or Claims. Each Party is aware that such Party may hereafter discover claims or facts in addition to or different from those such Party now knows or believes to be true with respect to the matters related herein. Nevertheless, it is each Party's intention to fully, finally, and forever waive, disclaim, settle and release all such matters covered by the Release or Covenant Not to Sue, and all Released Claims relative thereto, which now exist, heretofore have existed, or arise in the future between any Party or any Party's Related Entities, on the one hand, and any Released Party, on the other hand. In furtherance of such intention, the waivers, disclaimers and releases given herein will remain in effect as full and complete waivers, disclaimers and releases of all such matters notwithstanding the discovery or existence of any additional or different claims or facts related thereto.

(e) Full Knowledge; Independent Legal Advice. Each Party hereby warrants and represents that, in executing this Agreement, such Party does so with full knowledge of any and all rights that such Party may have with respect to the matters set forth herein and the Released Claims, and that such Party has received independent legal advice with respect to the matters set forth herein and the Released Claims and with respect to the rights and asserted rights arising out of such matters.

(f) Binding Effect. Each of the Release and the Covenant Not to Sue is binding upon each Party and all of its Related Entities and will inure to the benefit of each of the Released Parties.

7.4. Insurance.

To the extent commercially available, SCE shall procure and purchase, as an Administrative Expense using Program Funds, one or more insurance policies (each a "**Policy**") to cover any and all Claims pertaining to SCE's administration of the CFR Program, the Steering Committee's administration of the CFR Program and any administrative activities and, to the extent possible, Claims pertaining to the CFR Program itself and Claims against any Participating EDU arising from or in connection with the CFR Program. In addition to or in lieu of any such insurance policy, SCE may also procure and purchase, as an Administrative Expense using Program Funds, one or more performance bonds to cover its obligations under any Program Agreement (each, a "**Bond**"). SCE shall have the authority to select, purchase, maintain and replace, as the case may be, any such Policy or Bond and to make any and all decisions with respect thereto including, without limitation, the providers, nature, amounts, and other terms and conditions thereof; provided that if SCE is presented with more than one quotation for any such Policy or Bond from different providers prior to purchasing such a Policy or Bond, it shall present such quotations to the Steering Committee for review and approval in accordance with the provisions of Section 4.1(c). Notwithstanding the foregoing, in no event shall SCE or any other Released Party be liable or responsible to any Party or Person for any failure to obtain, approve or maintain any such Policy or Bond, and the lack of any such Policy or Bond shall in no event affect the right to indemnification of any Indemnified Person under the indemnification provisions contained herein, including the right to be reimbursed or advanced expenses or otherwise indemnified for Claims hereunder. If any Indemnified Person recovers any

amounts in respect of any Claim from any insurance coverage, then such Indemnified Person shall, to the extent that such recovery is duplicative of amounts with respect to such Claim received under the provisions of Section 7.5(c) below, reimburse the applicable Parties (on a pro rata basis) for any amounts previously paid to such Indemnified Person by such Parties in respect of such Claim.

7.5. Indemnification.

(a) Indemnified Claims.

(i) In the event that any Claims are made against or otherwise incurred or suffered by SCE or any other SCE Released Party (SCE and the other SCE Released Parties also being referred to herein collectively as, the "**SCE Indemnified Persons**", each an "**SCE Indemnified Person**") at any time that, directly or indirectly, arise out of, result from, relate to, or are otherwise connected with or involving SCE's role, capacity or status as Program Administrator, SCE's actions or inactions as Program Administrator or with respect to the administration, management or oversight of the CFR Program, the solicitation or RFP/RFI processes, or any Program Agreement (each, an "**SCE Indemnified Claim**"), each SCE Indemnified Person shall be entitled to reimbursement, advancement of expenses, defense, protection, and payment from Program Funds for any such SCE Indemnified Claim.

(ii) In the event that any Claims are made against or otherwise incurred or suffered by any Member, any Alternate or any other Steering Committee Released Party (the Members, Alternates and the other Steering Committee Released Parties also being referred to herein collectively as, the "**Steering Committee Indemnified Persons**", each a "**Steering Committee Indemnified Person**") at any time that, directly or indirectly, arise out of, result from, relate to, or are otherwise connected with or involving such Member's or Alternate's role, capacity or status as a Member or Alternate on the Steering Committee, or such Member's or Alternate's actions or inactions as a Member or Alternate on the Steering Committee, or with respect to the Steering Committee's administration, management or oversight of the CFR Program, the solicitation or RFP/RFI processes, or the Steering Committee's approval (or disapproval) of any Program Agreement (each, a "**Steering Committee Indemnified Claim**"), each Steering Committee Indemnified Person shall be entitled to reimbursement, advancement of expenses, defense, protection, and payment from Program Funds for any such Steering Committee Indemnified Claim.

(b) Payment of Indemnified Claims.

(i) As a first resort, payment for any Indemnified Claim will come from any Policy or Bond that may be then in effect and available to cover such Indemnified Claim.

(ii) To the extent that any Indemnified Claim, or any portion thereof, is not covered by any Policy or Bond that is then in effect and available, or to the extent the amounts available and obtained therefrom are insufficient to fully cover and satisfy the entire amount of such Indemnified Claim, then any and all Program Funds shall be used to pay and satisfy the Indemnified Claim and all amounts associated therewith in the following order of

priority (and, for the avoidance of doubt, no Percentage Target limitation that may otherwise be applicable as set forth in Section 5.2 shall apply), (A) if there is a Program Funds Account, (x) first, all amounts held in such Program Funds Account (other than the Reserve Amounts), and (y) second, the Reserve Amounts, and (B) if there is no Program Funds Account, (x) first, all amounts held in the Disbursement Account, (y) second, all amounts held in any and all Deposit Accounts (other than the Reserve Amounts), and (z) third, the Reserve Amounts.

(iii) In the event that existing Program Funds are insufficient to fully cover and satisfy the entire amount of any such Indemnified Claim, then each Party (including, for the avoidance of doubt, SCE in its capacity as a Participating EDU) shall, on a pro rata basis according to the respective Contribution Percentages (as defined in Section 1.1) of the Parties at such time, promptly deposit into its respective EDU Contribution Account such amounts of (A) additional LCFS Credit Revenue held by such Party in excess of its Required Percentage of LCFS Credit Revenue required to be contributed by such Party to Program Funds pursuant to Section 5.4 ("**Holdback Funds**"), and (B) revenue from the sale of any other credits issued by CARB pursuant to the LCFS Regulation ("**LCFS Non-Base Credit Revenue**"), up to an amount equal to the aggregate sum of all Holdback Funds and LCFS Non-Base Credit Revenue then held by such Party along with any and all future LCFS Credit Revenue received by such Party from the sale(s) of LCFS Base Credits (including all future Holdback Funds and not limited to such Party's Required Percentage of its LCFS Credit Revenue) and any and all future LCFS Non-Base Credit Revenue received by such Party from the sale(s) of such other LCFS credits issued by CARB, until each such Indemnified Claim and all amounts associated therewith have been paid and satisfied in full. In the event that the total amount of any Party's LCFS Non-Base Credit Revenue contributed with respect to any Indemnified Claim is insufficient to cover its respective Contribution Percentage of the amount of any such Indemnified Claim (each such Party, a "**Shortfall Party**"), each Party that is required to contribute aggregate Holdback Funds or LCFS Non-Base Credit Revenue pursuant to the preceding sentence or pursuant to the provisions of Section 7.5(c) below that is in excess of its respective Contribution Percentage of the amount of any such Indemnified Claim (each such Party, an "**Excess Party**"), shall be entitled to be reimbursed by each Shortfall Party, on a pro rata basis in proportion to its respective share of such excess contributions of Holdback Funds and LCFS Non-Base Credit Revenues made by all Excess Parties, and the Steering Committee (with oversight from CARB and, with respect to the IOUs only, the CPUC) shall determine the appropriate timing, manner and amounts of such reimbursements (including an appropriate interest factor to take into account the time value of money) required to be made by any Shortfall Party to any Excess Party, and each Party shall comply with the instructions of the Steering Committee with respect thereto.

(c) Shortfall Indemnity. Solely in the event that the amount of any Indemnified Claim has not been fully and finally satisfied pursuant to the provisions of Section 7.5(b), and the amounts available to pay such Indemnified Claim under Section 7.5(b) are insufficient or exhausted, all of the Parties (including, for the avoidance of doubt, SCE in its capacity as a Participating EDU), on a pro rata basis according to their respective Contribution Percentages, shall indemnify, defend, and hold each Indemnified Person harmless from and against any such Indemnified Claim that has been made, brought or asserted against any Indemnified Person by any other Person, except to the extent that such Indemnified Claim arises out of such Indemnified Person's gross negligence or reckless or willful misconduct, as determined by a final arbitration award or final judgment or judicial decree issued by an

arbitrator or court of competent jurisdiction. The Parties acknowledge and agree that the obligations of any POU to make such payments under this Section 7.5(c) constitute an expense of the POU payable from its electric revenue fund.

7.6. Maximum Liability.

(a) IN ADDITION TO, AND WITHOUT ANY LIMITATION (EXPRESS OR IMPLIED) ON THE FOREGOING PROVISIONS OF THIS ARTICLE 7, IN NO EVENT SHALL THE AGGREGATE LIABILITY OF SCE AND THE OTHER SCE RELEASED PARTIES WITH RESPECT TO ANY AND ALL CLAIMS DESCRIBED IN SECTION 7.1 OR SECTION 7.2 ABOVE, WHETHER ARISING OUT OF OR RELATED TO BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE) OR OTHERWISE, EXCEED FIVE THOUSAND DOLLARS (\$5,000.00) TO ANY PARTY AND ITS RELATED ENTITIES OR FIFTY THOUSAND DOLLARS (\$50,000) IN THE AGGREGATE TO ALL PARTIES (AND THEIR RESPECTIVE RELATED ENTITIES) FOR ANY AND ALL SUCH CLAIMS ARISING OUT OF OR RELATED TO THIS AGREEMENT. FOR THE AVOIDANCE OF DOUBT, THIS SECTION 7.6(a) DOES NOT APPLY TO ANY LIABILITY THAT SCE MAY HAVE UNDER SECTION 7.5(b) OR SECTION 7.5(c) IN ITS CAPACITY AS A PARTICIPATING EDU.

(b) IN ADDITION TO, AND WITHOUT ANY LIMITATION (EXPRESS OR IMPLIED) ON THE FOREGOING PROVISIONS OF THIS ARTICLE 7, IN NO EVENT SHALL THE AGGREGATE LIABILITY OF ANY MEMBER OR ANY ALTERNATE (OR THEIR RESPECTIVE RELATED STEERING COMMITTEE RELEASED PARTIES) WITH RESPECT TO ANY AND ALL CLAIMS DESCRIBED IN SECTION 7.1 OR SECTION 7.2 ABOVE WITH RESPECT TO SUCH STEERING COMMITTEE RELEASED PARTIES, WHETHER ARISING OUT OF OR RELATED TO BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE) OR OTHERWISE, EXCEED FIVE THOUSAND DOLLARS (\$5,000.00) TO ANY PARTY AND ITS RELATED ENTITIES OR FIFTY THOUSAND DOLLARS (\$50,000) IN THE AGGREGATE TO ALL PARTIES (AND THEIR RESPECTIVE RELATED ENTITIES) FOR ANY AND ALL SUCH CLAIMS ARISING OUT OF OR RELATED TO THIS AGREEMENT. FOR THE AVOIDANCE OF DOUBT, THIS SECTION 7.6(b) DOES NOT APPLY TO ANY LIABILITY THAT ANY STEERING COMMITTEE RELEASED PARTY MAY HAVE UNDER SECTION 7.5(b) OR SECTION 7.5(c) IN ITS CAPACITY AS A PARTICIPATING EDU.

7.7. Savings.

If this ARTICLE 7 or any portion hereof shall be invalidated on any ground by any arbitrator or court of competent jurisdiction, then the Parties shall nevertheless release and covenant not to sue each Released Party pursuant to Sections 7.1 through 7.3, and the Parties shall nevertheless indemnify, defend and hold harmless each Indemnified Person pursuant to Section 7.5(c), in each case to the fullest extent permitted by any applicable portion of this ARTICLE 7 that shall not have been invalidated and to the fullest extent permitted by applicable law.

7.8. New Program Administrator; Amendment.

(a) In the event that a new Program Administrator that is a Participating EDU is appointed to replace or succeed SCE following the date of expiration or termination of SCE's appointment as Program Administrator in accordance with the provisions of Section 3.1(b), then unless the Steering Committee otherwise determines and the Parties amend this Section 7.8(a) in connection with the replacement administrative and governance structure for the CFR Program that is implemented at such time in accordance with the provisions of 3.1(c), any such replacement or successor Program Administrator to SCE that is a Participating EDU shall receive and be entitled to the same rights and protections as are provided to SCE under this ARTICLE 7 and on the same terms and conditions as are applicable to SCE hereunder. For the avoidance of doubt, in the event that a Third Party Program Administrator replaces or succeeds SCE or any other Participating EDU as Program Administrator, any such Third Party Program Administrator shall not be entitled hereunder to any of the rights or protections that are provided to SCE (or to any other Released Party or Indemnified Person) under this ARTICLE 7.

(b) The provisions of this ARTICLE 7 shall be a contract among all of the Parties, on the one hand, and each Program Administrator (and the other Released Parties and Indemnified Persons with respect to such Program Administrator) who served in such capacity, in each case other any Third Party Program Administrator, at any time while this ARTICLE 7 is in effect, on the other hand, pursuant to which each of the Parties and each such Program Administrator, Released Party, and Indemnified Person intend to be legally bound. No amendment, modification, or repeal of this ARTICLE 7 that adversely affects the rights of any former, current or future Program Administrator (excluding any Third Party Program Administrator), Released Party or Indemnified Person to waiver, disclaimer, discharge, release, or the covenant not sue with respect to any or all Released Claims, or to indemnification and defense for and protection from any or all Indemnified Claims, incurred or relating to a state of facts existing, or to any Program Administrator's service, status or capacity as Program Administrator (excluding any Third Party Program Administrator), prior to such amendment, modification, or repeal shall apply in such a way as to eliminate or reduce such Program Administrator's (and the other Released Parties' and Indemnified Persons' with respect to such Program Administrator) entitlement to waiver, disclaimer, discharge, release, or the covenant not sue with respect to any or all such Released Claims, or to indemnification and defense for and protection from any or all such Indemnified Claims, or to any other rights or privileges under this ARTICLE 7, in each case without such Program Administrator's or former Program Administrator's (but excluding any Third Party Program Administrator) prior written consent.

7.9. Survival.

The provisions of this ARTICLE 7 shall survive and continue to apply and bind each Party (including each former, current and future Party) hereto in perpetuity notwithstanding any termination of this Agreement, any termination of the CFR Program, or any withdrawal of any Party from this Agreement or the CFR Program; provided, however, that the provisions of Section 7.5(c) shall terminate on the date (the "**Shortfall Indemnity Termination Date**") that is ninety (90) days after the latest to occur of (i) the fourth anniversary of the date of termination of this Agreement, (ii) the fourth anniversary of the date of termination of the CFR Program, and (iii) the expiration of the longest federal, state, local or foreign statute of limitations (including extensions thereof) applicable to any Indemnified Claim (or, if written notice of such

Indemnified Claim shall have been given prior to such date, indefinitely until such Indemnified Claim is finally resolved and paid in full).

ARTICLE 8

PROGRAM MATERIALS; PUBLIC ANNOUNCEMENTS

8.1. Ownership of Program Materials

The Parties hereby acknowledge and agree that, because the CFR Program is a CARB program created by the LCFS Regulation, any and all intellectual property rights (including any copyright, trademark, service mark, and patent rights) in and to any materials, webpages, software, databases, project data, documentation, reports, logos, works of authorship, other works, or other intellectual property materials developed, created, produced or invented in the performance of the CFR Program, by any Implementer, whether solely or jointly with any other Implementer or with any employees, contractors, or agents of any Party in connection with the CFR Program (collectively, "**Program Material**"), will be assigned to CARB; provided that in no event shall Program Material (or any assignment thereof) include, or be deemed to include, any Party's proprietary intellectual property or confidential information that may be incorporated into or included in any Program Material. All Program Agreements shall (a) contain or require the delivery of such an assignment by the Implementer to CARB of all intellectual property rights in any and all Program Material developed, created, produced or invented thereunder, and (b) require that the Implementer deliver to CARB or its designee all Program Material in its possession upon any termination of the applicable Program Agreement with such Implementer, and provide all reasonable and necessary assistance to CARB or its designee as needed to ensure a smooth transition to a new Implementer, in each case in a form approved by the Steering Committee. It is the Parties' intention that rebate access and redemption be seamless to ZEV purchasers and lessees during the term of the CFR Program.

8.2. Public Announcements

The Steering Committee or its designee(s) will approve the content and timing of any and all joint press releases or announcements regarding the CFR Program on behalf of all Participating EDUs, and all Participating EDUs shall be required to sign on to such joint press releases and announcements in the time and manner so approved by the Steering Committee or its designee. No Party may issue any other press release or announcement regarding this Agreement, any Program Agreement, the CFR Program, or any Program Material unless (i) such press release is issued jointly by the Participating EDUs in the form approved by the Steering Committee or its designee (including any subcommittee established for such purpose or the applicable Program Implementer) in accordance with the immediately preceding sentence, or (ii) before the release of the press release such Party furnishes the other Parties with a copy of such press release, and (A) obtains the prior written approval of the Steering Committee or such designee of such press release, or (B) the press release by such Party complies and is in strict accordance with the terms, conditions and substance of a pre-approved form of such press release that has already been approved by the Steering Committee or such designee for purposes of issuances of such press release(s) by any Party; provided that, notwithstanding any failure to obtain such approval, no Party is prohibited from issuing or making any press release or other announcement or notification if it is necessary to do so in order to comply with applicable laws,

legal or regulatory proceedings or the rules and regulations of any stock exchange having jurisdiction over such Party.

ARTICLE 9 PROGRAM TERM; TERMINATION; WITHDRAWAL

9.1. Term

(a) Term. This Agreement will be effective as of the Effective Date and will remain in effect until the earlier to occur of (i) CARB's termination of the CARB-authorized and endorsed CFR Program, or (ii) the unanimous approval of the termination of this Agreement by all Members of the Steering Committee.

(b) Effect of Termination. Notwithstanding any expiration or termination of this Agreement, the provisions of ARTICLE 1, Section 4.3, ARTICLE 7, ARTICLE 8, this ARTICLE 9, and ARTICLE 10 shall survive any such expiration or termination and shall remain in full force and effect and each Party and each former Party shall continue to be obligated and bound thereafter by the provisions thereof. Any Program Funds shall remain in the respective Accounts in which they are held at the time of such termination and shall be used thereafter in order to pay for any Administrative Expenses, Reward Amount payment reimbursements, Indemnified Claims, or other expenses and liabilities (contingent or otherwise) of the CFR Program or with respect to its administration that exist as of or arise following the date of termination (collectively, "**Remaining Liabilities**"). After the payment and satisfaction of all Remaining Liabilities, and in no event before the occurrence of the Shortfall Indemnity Termination Date, but in all events subject to the requirements of the LCFS Regulation, any remaining Program Funds shall be distributed in the following manner and order of priority:

(i) To the extent that any payments have been made pursuant to the provisions of Section 7.5(c) at any time prior to the Shortfall Indemnity Termination Date ("**Shortfall Payments**"), any remaining Program Funds shall first be distributed to the Parties that made such Shortfall Payments on a *pro rata* basis in proportion to each such Party's respective percentage of the aggregate total amount of all Shortfall Payments made by all of the Parties, in each case until each such Party has received the total amount of such Party's Shortfall Payments returned to it in full (without interest);

(ii) After satisfaction in full of any amounts payable under Section 9.1(b)(i) above, to the extent that any payments have been made pursuant to the provisions of Section 7.5(b)(iii) at any time prior to the Shortfall Indemnity Termination Date ("**Additional LCFS Revenue Payments**"), any remaining Program Funds shall next be distributed to the Parties that made such Additional LCFS Revenue Payments on a *pro rata* basis in proportion to each such Party's respective percentage of the aggregate total amount of all Additional LCFS Revenue Payments made by all of the Parties, in each case until each such Party has received the total amount of such Party's Additional LCFS Revenue Payments returned to it in full (without interest); and

(iii) After satisfaction in full of any amounts payable under Section 9.1(b)(i) and 9.1(b)(ii) above, all remaining Program Funds shall be distributed in the manner

required by the LCFS Regulation or, if no such manner is specified, to the Parties on a *pro rata* basis in proportion to each such Party's respective percentage of the aggregate total amount of all EDU Contributions made by all Parties during the term of the CFR Program.

(c) LADWP Term. Notwithstanding the provisions of Section 9.1(a) above, the term of LADWP's participation as a Participating EDU under this Agreement shall commence on the Effective Date and terminate on the earlier to occur of (x) the fifth anniversary of the Effective Date unless, not less than ninety (90) days prior to such fifth anniversary, LADWP delivers written notice to the Program Administrator and the Steering Committee that LADWP elects not to terminate its participation as a Participating EDU under this Agreement on the date of such fifth anniversary, or (y) the date on which LADWP withdraws as a Party pursuant to the provisions of Section 9.2 below or is removed as a Party pursuant to the provisions of Section 9.3 below.

9.2. Withdrawal by a Party

(a) Withdrawal by a Party. Any Party may cancel its participation in this Agreement and withdraw as a Party hereunder with or without cause, upon (i) such Party's compliance with any procedures and requirements set forth in the LCFS Regulation governing such Party's withdrawal from the CFR Program and this Agreement, and such Party's delivery of advanced written notice to CARB, the Program Administrator and the Members of such Party's intent to withdraw as a Party (a "**Withdrawal Notice**"), which advance written notice must be delivered within the timeframe set forth in the LCFS Regulation or, if none is provided, not less than ninety (90) calendar days prior to the Party's intended date of withdrawal; and (ii) such Party's satisfaction of the following conditions to such withdrawal:

(A) Within ten (10) days of the date of its Withdrawal Notice, such Party must deposit into its EDU Contribution Account the Required Percentage of any LCFS Credit Revenue held by such Party;

(B) Within the timeframe required for such Party to sell its Earmarked Credits and contribute the Required Percentage of the LCFS Credit Revenue generated therefrom into its EDU Contribution Account pursuant to the provisions of Section 5.4, or such shorter timeframe as may be required by the LCFS Regulation, such Party must sell any remaining Earmarked Credits received or held by such Party and deposit into its EDU Contribution Account the Required Percentage of any LCFS Credit Revenue received by such Party from such sale(s) of LCFS Base Credits; and

(C) Immediately following the date of its Withdrawal Notice or, if later, the date on which the Program Administrator delivers to such Party a notice of an Indemnified Claim under Sections 7.5(b)(iii) or 7.5(c), such Party shall deposit into its EDU Contribution Account the additional amount of LCFS Credit Revenue demanded from such Party in any outstanding notice of Indemnified Claim delivered to such Party by the Program Administrator.

(b) Effect of Withdrawal. Following any withdrawal or attempted withdrawal by any Party from this Agreement, the provisions of ARTICLE 1, Section 4.3, ARTICLE 7,

ARTICLE 8, this ARTICLE 9, and ARTICLE 10 shall survive, remain in full force and effect, and continue to apply to such Party, and such Party shall continue to be obligated and bound by the provisions thereof at all times thereafter. Following a Party's delivery of a Withdrawal Notice, such Party shall promptly complete and satisfy in full any procedures, requirements or other conditions for such Party's withdrawal from the CFR Program or this Agreement as are set forth in the LCFS Regulation. In addition, following any Party's delivery of a Withdrawal Notice, the Program Administrator may thereafter instruct the Financial Institution to transfer any and all amounts held in such Party's Individual Deposit Account at such time or at any time thereafter into the Disbursement Account (or any Collective Deposit Account) on a priority basis at any time, and from time to time, thereafter, notwithstanding such Party's respective pro rata share of any outstanding Reward Amount payment reimbursements or Administrative Expenses. Notwithstanding the foregoing provisions of this Section 9.2(b), following the second anniversary of the date of a Party's valid withdrawal as a Party to this Agreement in accordance with the requirements set forth in this Section 9.2, and subject to such former Party's continued compliance with its obligations hereunder following such withdrawal, such former Party's obligations under Sections 7.5(b)(iii), 7.5(c) or 9.2(a)(C) shall no longer apply with respect to any Indemnified Claim that arises solely from activities, omissions, events or circumstances occurring following such second anniversary.

9.3. Removal of a Party

(a) Post-Breach Removal. Any Party may be removed as a Party under this Agreement if, following notice by the Program Administrator, upon the agreement and concurrence of the Steering Committee, of such Party's material breach of such Party's obligations under this Agreement (including any failure by such Party to make any of its Required EDU Contributions in strict accordance with the requirements of this Agreement), such Party does not cure such breach to the satisfaction of the Steering Committee within thirty (30) days of the date of such notice of breach and the Steering Committee thereafter votes to remove such Party as a Party under this Agreement ("**Removal Vote**"). Following the occurrence of a Removal Vote with respect to a Party, such Party shall immediately be removed as a Party from this Agreement, and shall further be required to act as follows (provided that such action is consistent with the LCFS Regulation as in effect at such time):

(i) Within three (3) days of the date of the Removal Vote, such Party must deposit into its EDU Contribution Account all LCFS Credit Revenue held by such Party; and

(ii) Within ten (10) days of the date of the Removal Vote, such Party must sell any remaining LCFS Base Credits received or held by such Party and deposit into its EDU Contribution Account all of the LCFS Credit Revenue received by such Party from such sale(s) of LCFS Base Credits.

(b) Effect of Removal. Following any Removal Vote with respect to any Party, the provisions of ARTICLE 1, Section 4.3, ARTICLE 7, ARTICLE 8, this ARTICLE 9, and ARTICLE 10 shall survive, remain in full force and effect, and continue to apply to such Party, and such Party shall continue to be obligated and bound by the provisions thereof at all times thereafter. Following the Removal Vote, such Party shall forfeit any and all rights to

receive any LCFS Base Credits and shall no longer receive any LCFS Base Credits from CARB, and such Party's forfeited LCFS Base Credits it would have otherwise received thereafter had it not been removed as a Party shall be allocated to the other remaining Participating EDUs pro rata, in each case in accordance with the provisions of the LCFS Regulation. In addition, following the Party's removal, the Program Administrator may thereafter instruct the Financial Institution to transfer any and all amounts held in such Party's Individual Deposit Account at such time or at any time thereafter into the Disbursement Account (or any Collective Deposit Account) on a priority basis at any time, and from time to time, thereafter, notwithstanding such Party's respective pro rata share of any outstanding Reward Amount payment reimbursements or Administrative Expenses.

ARTICLE 10 MISCELLANEOUS

10.1. Governing Law; Waiver of Jury Trial.

(a) The construction, validity, performance, and effect of this Agreement for all purposes will be governed by the laws of the State of California, without giving effect to otherwise applicable principles of conflicts of law that would give effect to the laws of another jurisdiction.

(b) EACH PARTY (OTHER THAN A PARTY LISTED ON SCHEDULE 10.9(d)) HERETO HEREBY WAIVES, TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT TO ANY PROCEEDING DIRECTLY OR INDIRECTLY ARISING OUT OF, UNDER OR IN CONNECTION WITH THIS AGREEMENT OR ANY MATTERS RELATED TO THIS AGREEMENT. EACH PARTY HERETO (A) CERTIFIES THAT NO REPRESENTATIVE OF ANY OTHER PARTY HERETO HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT, IN THE EVENT OF ANY PROCEEDING, SEEK TO ENFORCE THE FOREGOING WAIVER AND (B) ACKNOWLEDGES THAT IT AND THE OTHER PARTIES HERETO HAVE BEEN INDUCED TO ENTER INTO THIS AGREEMENT BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION 10.1(b).

10.2. Use of Name or Endorsements.

No Party will use the name or intellectual property of any other Party on or with regard to any product or service, which is directly or indirectly related to this Agreement, without the prior written approval of the affected Party or Parties. By entering into this Agreement no Party directly or indirectly endorses any product or service, of or by any Party, its successors or assignees.

10.3. Damages Limitation.

EXCEPT FOR AMOUNTS PAYABLE UNDER SECTION 7.5(c), IN NO EVENT SHALL ANY PARTY OR ANY OF ITS REPRESENTATIVES BE LIABLE UNDER THIS AGREEMENT TO ANY OTHER PARTY OR ANY THIRD PARTY FOR ANY CONSEQUENTIAL, INCIDENTAL, INDIRECT, EXEMPLARY, SPECIAL OR PUNITIVE

DAMAGES, INCLUDING ANY DAMAGES FOR BUSINESS INTERRUPTION, LOSS OF USE, REVENUE OR PROFIT, WHETHER ARISING OUT OF BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE) OR OTHERWISE, REGARDLESS OF (A) WHETHER SUCH DAMAGES WERE FORESEEABLE, (B) WHETHER OR NOT THE LIABLE PARTY WAS ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, AND (C) THE LEGAL OR EQUITABLE THEORY (CONTRACT, TORT OR OTHERWISE) UPON WHICH THE CLAIM IS BASED.

10.4. Survival.

Notwithstanding the expiration or termination of this Agreement, the Parties will continue to be bound by the provisions of this Agreement which, by their nature, will survive such expiration or termination as set forth in Section 9.1(b).

10.5. Headings.

Titles and headings of the Sections and Subsections of this Agreement are for the convenience of reference only and do not form a part of this Agreement and will in no way affect the interpretation thereof.

10.6. Severability.

In the event any one or more of the provisions of the Agreement shall for any reason be held or determined by any Governmental Authority (or any arbitrator appointed pursuant to Section 10.9(c)) to be invalid, illegal or unenforceable under any law, statute, regulation, order or decision of any Governmental Authority, the remaining provisions of this Agreement shall be unimpaired, and the invalid, illegal or unenforceable provision shall be replaced by a provision, which, being valid, legal and enforceable, comes closest to the intention of the Parties underlying the invalid, illegal or unenforceable provision.

10.7. Amendments.

Neither this Agreement nor any term hereof may be amended, waived, discharged or terminated other than (a) with the prior written approval of (i) the Steering Committee, (ii) CARB, and (iii) to the extent required under applicable law or resolution, the CPUC, and (b) following receipt of the foregoing required approvals, by means of a written instrument referencing this Agreement and signed by (i) the Program Administrator and (ii) Parties with Members on the Steering Committee holding a majority of the aggregate voting percentages held by all Members; provided, however, that if any amendment, waiver, discharge or termination operates in a manner that treats any Party materially different from the other Parties, the consent of such Party shall also be required for such amendment, waiver, discharge or termination. Any such amendment, waiver, discharge or termination effected in accordance with this Section shall be binding upon each Party that has entered into this Agreement; provided, however, that any such amendment, waiver, discharge or termination of the terms of (A) ARTICLE 7, 8 or 9 or Sections 10.1, 10.3, 10.4, 10.7 or 10.9 that adversely affects the rights or obligations of any Participating EDU thereunder will not be binding on such Participating EDU without its consent thereto unless such amendment, waiver, discharge or termination (x) has been approved by the Steering Committee by the vote of Members (or of their respective Alternates or designated

proxies therefor) holding an aggregate voting percentage of at least eighty percent (80%) of the aggregate voting percentage held by all Members, or (y) has been approved by the Steering Committee pursuant to the regular voting requirements set forth in Sections 3.3(i) and 3.3(j) in response to an order or request made by a Governmental Authority or in order to comply with a legal requirement, or (B) the provision of Section 4.1(c) setting forth the voting requirement for approval of each Program Implementer and the Program Auditor must be approved by the same approval vote of the Steering Committee set forth in such provision.

10.8. Assignment.

Neither this Agreement nor any rights or obligations of any Party will be assigned or otherwise transferred by any Party without the prior written consent of the Steering Committee, except that assignment will be permitted in the event of merger, acquisition or change in control of any Party.

10.9. Dispute Resolution.

Any dispute arising under or related to this Agreement shall be resolved exclusively as follows, with the costs of any mediation and arbitration to be shared equally by all Parties to such dispute:

(a) Initial Resolution by Meeting. The Parties shall first attempt to resolve amicably the dispute by meeting with each other, by telephone or in person at a mutually convenient time and location, within thirty (30) days after written notice of a dispute is delivered from one Party to any other Party. Subsequent meetings may be held upon mutual agreement of the Parties to the dispute.

(b) Mediation. If the dispute is not resolved within sixty (60) days of the first meeting, the Parties to the dispute shall submit the dispute to mediation by an organization or company specializing in providing neutral, third-party mediators. The mediation shall be conducted within sixty (60) days of the date the dispute is submitted to mediation, unless the Parties to the dispute mutually agree on a later date.

(c) Arbitration. Any dispute that is not otherwise resolved by meeting or mediation shall, subject to the provisions of Section 10.9(d) below, be exclusively resolved by arbitration between the Parties to the dispute in accordance with the Comprehensive Arbitration Rules & Procedures of JAMS, with the arbitration to be conducted in Los Angeles, California, or another location mutually agreed by the Parties to the dispute. The results of such arbitration shall be binding on the Parties, and judgment may be entered in any court having jurisdiction. Notwithstanding the foregoing, any Party may seek interim injunctive relief from any court of competent jurisdiction.

(d) Venue in Limited Circumstances. Solely in the event that LADWP, SMUD, or any other POU that is added to Schedule 10.9(d) after the Effective Date by approval of the Steering Committee after having documented to the satisfaction of the Steering Committee concurrently with executing and delivering such POU's Joinder hereto that such POU is prohibited by (i) applicable law or (ii) written city or municipal policy that is binding on such POU and that has been in effect since before the Effective Date, from agreeing to participate in

binding arbitration, is a necessary and non-severable party to the applicable dispute, then solely in such event shall such dispute not be resolved pursuant to binding arbitration as set forth in Section 10.9(c) above, but rather shall be submitted to the exclusive jurisdiction of the federal and state courts located in Los Angeles, California. Each Party hereby waives, and agrees not to assert in any such dispute, controversy or proceeding, in each case to the fullest extent permitted by applicable law, any claim that (a) such Party is not personally subject to the jurisdiction of such courts, (b) such Party and such Party's property is immune from any legal process issued by such courts or (c) any Proceeding commenced in such courts is brought in an inconvenient forum.

10.10. No Third Party Beneficiaries.

This Agreement will be binding upon and inure solely to the benefit of each Party hereto and their permitted successors and assigns, and, except as expressly set forth in ARTICLE 7, nothing in this Agreement, express or implied, is intended to or will confer upon any other Person that is not a Party to this Agreement (or a permitted successor or assign thereof) any right, benefit or remedy of any nature whatsoever under or by reason of this Agreement.

10.11. Independent Parties.

For the purposes of this Agreement, the Parties are jointly funding the development of the CFR Program. The relationship of the Parties is that of independent parties and not as agents of each other or as joint venturers or partners. Nothing contained in this Agreement shall ever be construed to create an association, joint venture, trust or partnership, or impose a trust or partnership duty, obligation or liability on or with regard to any one or more of the Parties. Each Party shall be individually responsible for its own duties and obligations under this Agreement, and shall maintain sole and exclusive control over its respective personnel and operations. No Party or group of Parties shall be under the control of or shall be deemed to control any other Party or the Parties as a group. Except as expressly provided in this Agreement, no Party shall have a right or power to bind any other Party without its or their express written consent.

10.12. Counterparts.

This Agreement may be executed in any number of identical counterparts, each of which shall be deemed to be an original, and all of which together shall be deemed to be one and the same instrument when each Party has signed one such counterpart.

10.13. Full Performance Required.

Performance of any duty imposed on a Party by this Agreement is conditioned on each other Parties' full performance of all duties imposed on this Agreement.

10.14. Notices.

All notices, requests, consents, claims, demands, waivers, and other communications to a Party under this Agreement, or to any Member or Alternate of such Party on the Steering Committee, shall be in writing and shall be deemed to have been given: (a) when delivered by hand (with written confirmation of receipt); (b) when received by the addressee if sent by a

nationally recognized overnight courier (receipt requested); (c) on the date sent by facsimile or email of a PDF document (with confirmation of transmission) if sent during normal business hours of the recipient, and on the next business day if sent after normal business hours of the recipient; or (d) on the third day after the date mailed, by certified or registered mail, return receipt requested, postage prepaid. Such communications must be sent to the Party addressed to the individual(s) and at the address(es) for such Party specified on Schedule 10.14 hereto (or to such replacement individual(s) at such other address(es) for a Party as shall be specified in a notice given in accordance with this Section 10.14). The Steering Committee shall have the power and authority to amend Schedule 10.14 hereto to incorporate any such modifications made by a Party to its contact information in accordance with the provisions hereof and to add the contact information for each new Party to this Agreement following the Effective Date, but in the absence of the inclusion of a Party's contact information on Schedule 10.14 hereto, then the contact information for such Party shall be the contact information for such Party set forth on its Joinder delivered when it became a Party to this Agreement.

10.15. Construction.

This Agreement has been negotiated by the Parties, and their respective legal counsel, and legal or equitable principles that might require the construction of this Agreement or any provision hereof against the party drafting this Agreement will not apply in any construction or interpretation of this Agreement. The provisions of this Agreement will be interpreted in a reasonable manner to effect the intentions of the Parties and beneficiaries hereto and of this Agreement.

10.16. Time of Essence.

With regard to all dates and time periods set forth or referred to in this Agreement, time is of the essence.

10.17. Specific Performance.

Each of the Parties acknowledges and agrees that the other Parties would be damaged irreparably in the event any of the provisions of this Agreement are not performed in accordance with their specific terms or otherwise are breached or violated. Accordingly, each of the Parties agrees that, without posting bond or other undertaking, the other Parties will be entitled to an injunction or injunctions to prevent breaches or violations of the provisions of this Agreement and to enforce specifically this Agreement and the terms and provisions hereof in any claim, action, cause of action or suit (whether in contract or tort or otherwise), litigation (whether at law or in equity, whether civil or criminal), controversy, assessment, arbitration, investigation, hearing, charge, complaint, demand, notice or proceeding to, from, by or before any Governmental Authority having jurisdiction over the Parties and the matter in addition to any other remedy to which it may be entitled, at law or in equity. Each Party hereto further agrees that, in the event of any action for specific performance in respect of such breach or violation, it will not assert the defense that a remedy at law would be adequate or that the consideration reflected in this Agreement was inadequate or that the terms of this Agreement were not just and reasonable.

10.18. Legal Matters.

SCE has retained its own outside legal counsel, Munger, Tolles & Olson LLP, in connection with the CFR Program, SCE's intention to serve as the initial Program Administrator, and the drafting and negotiation of this Agreement, and SCE expects to retain additional legal counsel following approval thereof by the Steering Committee (collectively, including Munger, Tolles & Olson LLP, the "**Law Firms**") following the execution of this Agreement in connection with SCE's role as Program Administrator in administering, managing and overseeing the CFR Program. The Law Firms do not, have not and will not represent any Party other than SCE solely in its role as Program Administrator in connection with (i) the CFR Program or the formation thereof, (ii) the drafting and negotiation of this Agreement or any Program Agreement, (iii) the solicitation process or the operation, administration, management or oversight of the CFR Program, or (iv) any dispute which may arise between any Party or Person other than SCE, on the one hand, and the CFR Program, the Program Administrator, SCE or any other SCE Indemnified Person or SCE's Steering Committee Indemnified Persons in connection with the CFR Program, on the other hand (each matter described in any of the foregoing clauses (i) through (iv), a "**Program Legal Matter**"). Each Party may, if it wishes to have counsel on a Program Legal Matter, retain its own independent counsel at its own expense with respect thereto. Each Party agrees that the Law Firms may represent one or more SCE Indemnified Persons, and/or one or more of SCE's Steering Committee Indemnified Persons, in connection with any and all Program Legal Matters (including any dispute between the CFR Program, the Program Administrator, SCE or any other SCE Indemnified Person or SCE's Steering Committee Indemnified Persons, on the one hand, and any Party (other than SCE), any other Steering Committee Indemnified Person or any other Person, on the other hand) and hereby waives any present or future conflict of interest with the Law Firms regarding Program Legal Matters arising by virtue of any representation or deemed representation of any Party or the CFR Program on account of the Law Firms' representation of one or more SCE Indemnified Persons or SCE Steering Committee Indemnified Persons in connection with any Program Legal Matter; provided that each Law Firm shall be responsible for abiding by the Rules of Professional Conduct applicable to it and its attorneys in connection with any such representation including their duty to keep any client information received from any Party confidential and not disclose it to others and to ensure that appropriate ethical walls or other safeguards that are necessary for them to abide by such Rules of Professional Conduct are implemented. Amounts paid or payable by SCE to the Law Firms in connection with Program Legal Matters that arise or have arisen during or prior to SCE's service as Program Administrator, or that arise following SCE's service as Program Administrator involving or otherwise relating to events or circumstances that occurred, in whole or in part, during SCE's service as Program Administrator and that involve or otherwise relate to SCE's role as Program Administrator, shall be reimbursed to SCE as Administrative Expenses.

10.19. Entire Agreement.

This Agreement constitutes the entire agreement between the Parties concerning the subject matter hereof and supersedes any prior understanding or written or oral agreement relative to said matter. This Agreement and other related documents may be photocopied, scanned and stored on computer storage media (the "**Imaged Agreement**"). The Imaged Agreement, if introduced as evidence, and all computer records of the foregoing, if introduced as evidence, and all computer records of the foregoing, if introduced as evidence in any format, in

any judicial, arbitration, mediation or administrative proceedings, will be admissible as between the Parties to the same extent and under the same conditions as other business records originated and maintained in documentary form. No Party shall object to the admissibility of the Imaged Agreement (in electronic, printed, or photocopied format) on the basis that the Agreement or other related documents were not originated or maintained in documentary or written form under either the hearsay rule or the best evidence rule. However, nothing in this Section shall preclude a Party from challenging the admissibility of that evidence on some other ground, without limitation, the basis that the evidence has been materially or substantially altered from the original.

10.20. Representations by the Parties.

Each Party hereby represents and warrants to the Program Administrator and to each other Party that (a) it has the power and authority, and the legal right, to make, deliver and perform this Agreement and it has taken all necessary action to authorize the execution, delivery and performance of this Agreement, (b) other than the approvals of the CPUC set forth in the definition of Final CPUC Approval Date in Section 1.1(gg), which approvals have been requested but not yet received, no consent or authorization of, filing with, notice to or other act by or in respect of, any Governmental Authority or any other Person that has not been obtained, made or completed is required in connection with the execution, delivery and performance, validity or enforceability of this Agreement, (c) this Agreement has been duly and validly executed and delivered on behalf of such Party, (d) the execution, delivery and performance of this Agreement by such Party will not violate, conflict with, require consent under or result in any breach or default under (i) any of such Party's organizational, governing or charter documents, (ii) any applicable law, or (iii) with or without notice or lapse of time or both, the provisions of any material contract or agreement to which such Party is a party or to which any of its material assets are bound, and (e) this Agreement constitutes a legal, valid and binding obligation of such Party enforceable against it in accordance with its terms, subject to the effects of bankruptcy, insolvency, fraudulent conveyance, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally, general equitable principles (whether considered in a proceeding in equity or at law) and an implied covenant of good faith and fair dealing.

EXHIBIT A

PARTICIPATING EDU JOINDER

This JOINDER AGREEMENT ("Joinder Agreement"), dated as of [DATE] is made by [JOINING EDU], a [STATE OF ORGANIZATION] [ENTITY TYPE] (the "Joining EDU"), and delivered to [NAME OF PROGRAM ADMINISTRATOR], in its capacity as Program Administrator (in such capacity and together with any successors in such capacity, the "Program Administrator") under that certain Governance Agreement (as amended, amended and restated, supplemented or otherwise modified from time to time, the "Governance Agreement"; capitalized terms used but not otherwise defined herein shall have the meanings assigned to such terms in the Governance Agreement), dated as of [DATE] made by and among Pacific Gas and Electric Company, San Diego Gas & Electric Company, Southern California Edison Company, Los Angeles Department of Water & Power, Sacramento Municipal Utility District, and the other electric distribution utilities ("EDUs) party thereto.

WHEREAS, the Joining EDU is an EDU operating in the State of California and desires to participate in the CFR Program developed and implemented by the EDUs that are parties to the Governance Agreement and, in order to participate in the CFR Program, the Joining EDU is required by the terms of the Governance Agreement and the LCFS Regulation to be joined as a party to the Governance Agreement as a Participating EDU; and

WHEREAS, this Joinder Agreement supplements the Governance Agreement and is delivered by the Joining EDU pursuant to Section 2.2 of the Governance Agreement; and

WHEREAS, the Joining EDU will materially benefit directly and indirectly from (i) the CFR Program and from the LCFS Base Credits made available and to be made available by CARB to the Joining EDU as a participant in the CFR Program and a Participating EDU under the Governance Agreement, and (ii) from the Program Administrator's administration of the CFR Program on behalf of the Joining EDU and all Participating EDU; and

NOW THEREFORE, the Joining EDU hereby agrees as follows with the Program Administrator and each other Party to the Governance Agreement:

1. Joinder. The Joining EDU hereby irrevocably, absolutely and unconditionally becomes a party to the Governance Agreement as a Participating EDU, as a Party, and in each other capacity (e.g., POU, IOU, Northern EDU, Southern EDU, etc.) under the Governance Agreement that is applicable to the Joining EDU as a Participating EDU and Party thereunder, and agrees to be bound by all the terms, conditions, covenants, obligations, liabilities and undertakings applicable to any such Participating EDU or Party, or to which any such Participating EDU or Party is subject thereunder, all with the same force and effect as if the Joining EDU were an original signatory to the Governance Agreement. Without limiting the generality of the foregoing, (a) the Joining EDU hereby designates and authorizes the Program Administrator to act on its behalf as the Program Administrator under the Governance Agreement and under any Program Agreement, and authorizes the Program Administrator to take such actions on its behalf and to exercise such powers as are delegated to the Program Administrator by the terms hereof or thereof, together with such actions and powers as are reasonably incidental thereto or as otherwise determined by the Steering Committee, in each case

in accordance with the terms and conditions of and for the time period set forth in the Governance Agreement, and (b) the Joining EDU, on its own behalf and on behalf of its Related Entities, does hereby irrevocably, unconditionally, voluntarily, knowingly, fully, finally, completely, and forever grant and make the Release and Covenant Not to Sue, and agrees to the indemnification and other obligations, set forth in ARTICLE 7 of the Governance Agreement with full knowledge and in full agreement with all of the terms, conditions and obligations set forth therein and without limiting the generality of the foregoing expressly acknowledges and agrees that it has been advised of, and does hereby specifically and expressly waive and release all rights under, the provisions of Section 1542 of the Civil Code of California, which provides as follows:

“A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS THAT THE CREDITOR OR RELEASING PARTY DOES NOT KNOW OR SUSPECT TO EXIST IN HIS OR HER FAVOR AT THE TIME OF EXECUTING THE RELEASE AND THAT, IF KNOWN BY HIM OR HER, WOULD HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH THE DEBTOR OR RELEASED PARTY.”

2. Affirmations. The Joining EDU hereby makes each of the representations and warranties and agrees to each of the covenants contained in the Governance Agreement that is made by any Participating EDU, Party, and in each other capacity under the Governance Agreement that is applicable to the Joining EDU as a Participating EDU and Party thereunder. The Joining EDU also represents and warrants to the Program Administrator and to each other Party that (a) it has the power and authority, and the legal right, to make, deliver and perform this Joinder Agreement and has taken all necessary action to authorize the execution, delivery and performance of this Joinder Agreement, (b) no consent or authorization of, filing with, notice to or other act by or in respect of, any Governmental Authority or any other Person that has not been obtained, made or completed is required in connection with the execution, delivery and performance, validity or enforceability of this Joinder Agreement, (c) this Joinder Agreement has been duly and validly executed and delivered on behalf of the Joining EDU, (d) the execution, delivery and performance of this Agreement by such Joining EDU will not violate, conflict with, require consent under or result in any breach or default under (i) any of such Joining EDU's organizational, governing or charter documents, (ii) any applicable law, or (iii) with or without notice or lapse of time or both, the provisions of any material contract or agreement to which such Joining EDU is a party or to which any of its material assets are bound, and (e) this Joinder Agreement constitutes a legal, valid and binding obligation of the Joining EDU enforceable against such Joining EDU in accordance with its terms, subject to the effects of bankruptcy, insolvency, fraudulent conveyance, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally, general equitable principles (whether considered in a proceeding in equity or at law) and an implied covenant of good faith and fair dealing.

3. Miscellaneous. ARTICLE 10 of the Governance Agreement is hereby incorporated into this Joinder Agreement by reference and shall be a part hereof, *mutatis mutandis*.

[Signature page follows]

IN WITNESS WHEREOF, the parties hereto have caused this Joinder Agreement to be executed as of the date first written above by their respective officers thereunto duly authorized.

EXHIBIT A

PARTICIPATING EDU JOINDER

This JOINDER AGREEMENT (“Joinder Agreement”), dated as of May 6, 2020 is made by City of Roseville, a California Municipal Corporation (the “Joining EDU”), and delivered to Southern California Edison Company, in its capacity as Program Administrator (in such capacity and together with any successors in such capacity, the “Program Administrator”) under that certain Governance Agreement (as amended, amended and restated, supplemented or otherwise modified from time to time, the “Governance Agreement”; capitalized terms used but not otherwise defined herein shall have the meanings assigned to such terms in the Governance Agreement), dated as of March 3, 2020 made by and among Pacific Gas and Electric Company, San Diego Gas & Electric Company, Southern California Edison Company, Los Angeles Department of Water & Power, Sacramento Municipal Utility District, and the other electric distribution utilities (“EDUs”) party thereto.

WHEREAS, the Joining EDU is an EDU operating in the State of California and desires to participate in the CFR Program developed and implemented by the EDUs that are parties to the Governance Agreement and, in order to participate in the CFR Program, the Joining EDU is required by the terms of the Governance Agreement and the LCFS Regulation to be joined as a party to the Governance Agreement as a Participating EDU; and

WHEREAS, this Joinder Agreement supplements the Governance Agreement and is delivered by the Joining EDU pursuant to Section 2.2 of the Governance Agreement; and

WHEREAS, the Joining EDU will materially benefit directly and indirectly from (i) the CFR Program and from the LCFS Base Credits made available and to be made available by CARB to the Joining EDU as a participant in the CFR Program and a Participating EDU under the Governance Agreement, and (ii) from the Program Administrator’s administration of the CFR Program on behalf of the Joining EDU and all Participating EDU; and

NOW THEREFORE, the Joining EDU hereby agrees as follows with the Program Administrator and each other Party to the Governance Agreement:

1. Joinder. The Joining EDU hereby irrevocably, absolutely and unconditionally becomes a party to the Governance Agreement as a Participating EDU, as a Party, and in each other capacity (e.g., POU, IOU, Northern EDU, Southern EDU, etc.) under the Governance Agreement that is applicable to the Joining EDU as a Participating EDU and Party thereunder, and agrees to be bound by all the terms, conditions, covenants, obligations, liabilities and undertakings applicable to any such Participating EDU or Party, or to which any such Participating EDU or Party is subject thereunder, all with the same force and effect as if the Joining EDU were an original signatory to the Governance Agreement. Without limiting the generality of the foregoing, (a) the Joining EDU hereby designates and authorizes the Program Administrator to act on its behalf as the Program Administrator under the Governance Agreement and under any Program Agreement, and authorizes the Program Administrator to take such actions on its behalf and to exercise such powers as are delegated to the Program Administrator by the terms hereof or thereof, together with such actions and powers as are reasonably incidental thereto or as otherwise determined by the Steering Committee, in each case

in accordance with the terms and conditions of and for the time period set forth in the Governance Agreement, and (b) the Joining EDU, on its own behalf and on behalf of its Related Entities, does hereby irrevocably, unconditionally, voluntarily, knowingly, fully, finally, completely, and forever grant and make the Release and Covenant Not to Sue, and agrees to the indemnification and other obligations, set forth in ARTICLE 7 of the Governance Agreement with full knowledge and in full agreement with all of the terms, conditions and obligations set forth therein and without limiting the generality of the foregoing expressly acknowledges and agrees that it has been advised of, and does hereby specifically and expressly waive and release all rights under, the provisions of Section 1542 of the Civil Code of California, which provides as follows:

“A GENERAL RELEASE DOES NOT EXTEND TO CLAIMS THAT THE CREDITOR OR RELEASING PARTY DOES NOT KNOW OR SUSPECT TO EXIST IN HIS OR HER FAVOR AT THE TIME OF EXECUTING THE RELEASE AND THAT, IF KNOWN BY HIM OR HER, WOULD HAVE MATERIALLY AFFECTED HIS OR HER SETTLEMENT WITH THE DEBTOR OR RELEASED PARTY.”

2. Affirmations. The Joining EDU hereby makes each of the representations and warranties and agrees to each of the covenants contained in the Governance Agreement that is made by any Participating EDU, Party, and in each other capacity under the Governance Agreement that is applicable to the Joining EDU as a Participating EDU and Party thereunder. The Joining EDU also represents and warrants to the Program Administrator and to each other Party that (a) it has the power and authority, and the legal right, to make, deliver and perform this Joinder Agreement and has taken all necessary action to authorize the execution, delivery and performance of this Joinder Agreement, (b) no consent or authorization of, filing with, notice to or other act by or in respect of, any Governmental Authority or any other Person that has not been obtained, made or completed is required in connection with the execution, delivery and performance, validity or enforceability of this Joinder Agreement, (c) this Joinder Agreement has been duly and validly executed and delivered on behalf of the Joining EDU, (d) the execution, delivery and performance of this Agreement by such Joining EDU will not violate, conflict with, require consent under or result in any breach or default under (i) any of such Joining EDU's organizational, governing or charter documents, (ii) any applicable law, or (iii) with or without notice or lapse of time or both, the provisions of any material contract or agreement to which such Joining EDU is a party or to which any of its material assets are bound, and (e) this Joinder Agreement constitutes a legal, valid and binding obligation of the Joining EDU enforceable against such Joining EDU in accordance with its terms, subject to the effects of bankruptcy, insolvency, fraudulent conveyance, reorganization, moratorium and other similar laws relating to or affecting creditors' rights generally, general equitable principles (whether considered in a proceeding in equity or at law) and an implied covenant of good faith and fair dealing.

3. Miscellaneous. ARTICLE 10 of the Governance Agreement is hereby incorporated into this Joinder Agreement by reference and shall be a part hereof, *mutatis mutandis*.

COUNCIL COMMUNICATION

CC #: 0743
File #: 0800-02

Title: Water Capacity Partnership Exploration - Memorandum of Understanding
Contact: Sean Bigley 916-774-5513 sbigley@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.22.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council approve a Memorandum of Understanding (MOU) with the Placer County Water Agency (PCWA) for exploration of shared water conveyance infrastructure alternatives for additional water supply reliability and authorize the City Manager to execute it.

BACKGROUND

PCWA has been seeking funding partnerships in the proposed Ophir Water Treatment Plant (Ophir WTP) for several years. The intent of these partnerships is to both distribute the cost of this large infrastructure program according to benefits and minimize the debt liability and burden to PCWA's customers. As benefitting financial partners in the Ophir Project have not materialized to date, Roseville and PCWA staff began exploring the concept of partnering, wherein Roseville and PCWA share existing infrastructure and treated water capacity for some period of time, prior to constructing Ophir WTP, which has benefits to both agencies. This partnership may address some, or part of Roseville's primary interest in the Ophir Project which is redundancy and reliability.

PCWA, as well as other potential funding partners, have the fundamental objective of maximizing use of existing treated water capacity to defer construction of Ophir WTP as long as prudently possible. This objective is to minimize the amount of capital to be financed when ultimately constructing the project.

Available treated water capacity has recently been improved by reduced demand habits within PCWA's service territory persisting since the last drought and by small improvement projects constructed at Foothill WTP. It is currently estimated that PCWA will need Ophir WTP online in the early 2030s, assuming a rate of absorption of 700 units of capacity per year. This time could be much farther out if weaker economic conditions prevail.

Delaying construction of Ophir WTP benefits project financing; however, doing so delays the provision of a surface water supply alternative to Folsom Reservoir for the City of Roseville. A concept that has been discussed between Roseville Environmental Utilities staff and PCWA staff includes more near-term sharing of existing treated water capacity at Roseville's Barton Road

WTP during normal conditions and PCWA's Foothill WTP in the event Folsom Reservoir level is too low to serve the intake serving the Barton Road WTP. The benefit to PCWA is that Roseville could use Barton Road WTP to serve PCWA customers in western Placer County, under an existing wheeling agreement, which can further delay the need for Ophir WTP. In exchange, PCWA could use its conserved water during times of extreme drought, when Folsom Reservoir level is not adequate, to provide surface water supplies to the City of Roseville, under an existing "take or pay" water service contract between the City of Roseville and PCWA.

The attached MOU will allow for an initial exploration and planning effort to commence which will include analyzing the feasibility of sharing in water conveyance capacity in the manner described. This would include both a supply and demand analysis as well developing needed infrastructure alternatives. The proposed concept is not intended to alter water rights or put undue conservation on either party, rather, only to share in capacity that may already exist at times when it is not being used. The proposed not-to-exceed total for any outside services is \$100,000, to be split equally for \$50,000 each between the City of Roseville and PCWA. Any projects or operational agreements resulting from this exploration would require subsequent agreement of both the Roseville City Council and the PCWA Board of Directors.

FISCAL IMPACT

Under the proposed MOU, PCWA and the City of Roseville would share in costs of up to \$100,000 (\$50,000 for the City of Roseville, \$50,000 for PCWA). The City's \$50,000 is budgeted in the FY2019-20 Water Administration budget, funded within the Water Operations Fund which receives revenue through water utility service.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. A Memorandum of Understanding meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Respectfully Submitted,

Sean Bigley, Assistant Environmental Utilities Director

Richard D. Plecker, Environmental Utilities Director

PCWA-Roseville Treated Water Capacity Partnership

RESOLUTION NO. 20-131

APPROVING A MEMORANDUM OF UNDERSTANDING FOR EXPLORATION INTO A WATER CAPACITY PARTNERSHIP, BY AND BETWEEN THE CITY OF ROSEVILLE AND THE PLACER COUNTY WATER AGENCY, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, a Memorandum of Understanding for Exploration into a Water Capacity Partnership, by and between the City of Roseville and the Placer County Water Agency, has been reviewed by the City Council;

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said Memorandum of Understanding is approved and that the City Manager is authorized to execute it on behalf of the City of Roseville.

PASSED AND ADOPTED by the City Council of the City of Roseville this _____ day of _____, 20____, by the following vote on roll call:

AYES COUNCIL MEMBER:

NOES COUNCIL MEMBER:

ABSENT COUNCIL MEMBER:

Mayor

ATTEST:

City Clerk

**MEMORANDUM OF UNDERSTANDING
FOR
EXPLORATION INTO A WATER CAPACITY PARTNERSHIP**

This Memorandum of Understanding for exploration of the sharing of available water capacity, also known as the Water Capacity Partnership (hereinafter, "MOU"), is entered into by and among the City of Roseville, a municipal corporation (hereinafter, "Roseville") and the Placer County Water Agency, a public agency (hereinafter, the "Agency") and will take effect as of the date on which both Roseville and the Agency have executed this MOU. Roseville and the Agency may be collectively referred to as the "Parties," or each individually as a "Party."

RECITALS

A. Whereas, Roseville and the Agency have an existing "Contract Between the Placer County Water Agency and the City of Roseville Relating to Water Supplies and Exchanges," dated September 1, 2010 (hereinafter, "2010 Contract"); and

B. Whereas, the Agency has rights granted by the State of California Water Resources Control Board ("Water Board") to divert up to 120,000 acre-feet of water for consumptive use from its Middle Fork Project, a hydroelectric power generation project on the Middle Fork of the American River; and

C. Whereas, water supplied from the Middle Fork Project can be beneficially used within a service area covering western Placer County, including Roseville, as permitted by the Water Board; and

D. Whereas, the 2010 Contract provides for Roseville's Annual Entitlement of up to 30,000 acre-feet of water from the Agency's Middle Fork Project (based upon an incremental "build up" schedule), with delivery of the water from the Agency to Roseville at Folsom Reservoir; and

E. Whereas, the 2010 Contract also provides Roseville a right to participate in the enlargement of an Agency water treatment plant having the capability of delivering water diverted from the Agency's pump station at the North Fork American River at Auburn; and

F. Whereas, the Parties wish to delay construction of new treated water capacity as long as possible to curtail infrastructure financing costs and depreciation; and

G. Whereas, since the drought beginning in 2014 and ending in 2016, peak day demands in the Parties' treated water systems have consistently been lower than prior to the drought, which has made capacity available; and

H. Whereas, the Parties wish to explore leveraging their existing water capacity by strategically sharing reasonable portions of existing capacity in a manner that extends the time needed before the construction of additional capacity by either Party; and

I. Whereas, delivery of water from Folsom Reservoir is subject to United States Bureau of Reclamation ("USBR") operations of its Central Valley Project ("CVP") and is vulnerable to drought, when reservoir levels can become extraordinarily low and fall below the intake serving Roseville and halt delivery of water provided under the 2010 Contract, as well as Roseville's CVP supply from the USBR; and

J. Whereas, the Parties wish to explore a new option for water to be delivered to Roseville through the Agency's pump station at the North Fork American River at Auburn as treated water; and

K. Whereas, the Parties share existing treated water interties along the shared boundaries of their service areas and at delivery points into the California-American Water Company franchise service area, that can be used to share existing capacity; and

L. Whereas, the Parties recognize that construction of additional water facilities for the benefit of sharing capacity, as provided for herein, would also provide redundancy and operational flexibility within each Party's water system.

NOW, THEREFORE, in consideration of the mutual obligations set forth herein, the Parties hereby understand and agree as follows:

AGREEMENT

1. Incorporation of Recitals. The foregoing recitals are hereby incorporated by reference.
2. Purpose. The purpose of this MOU is to establish a cost-sharing partnership that enables the Parties to coordinate efforts to explore the feasibility, infrastructure needs, and costs of sharing of water capacity and augmenting access to contracted water supplies. Such sharing would be both in times of normal water supply and in drought, as well as during other water supply emergencies.

Nothing in this MOU grants the Parties any power or authority to alter any water right, contract right or any similar right of the other Party or to direct the water-delivery practices of the other Party without the prior written consent of the Party and receipt of all required approvals.

The Parties anticipate that any future development or implementation of the partnership would be governed by future agreement(s), and approval of any such agreements will be subject to compliance with the California Environmental Quality Act and all other applicable environmental laws or regulations.

3. Technical Evaluations. The following are technical evaluations that the Parties have identified as necessary to complete in order to achieve the purpose of this MOU:
 - a. The amount of water capacity that can be shared by each Party and where this capacity can be delivered to the other Party;
 - b. The extent and location of new treated demands within each Parties' service area that can be met until construction of a new water treatment plant;
 - c. Identification of new water facilities within each Party's service area necessary to deliver the capacity identified in (a) above;
 - d. Impacts to each Party's drought resiliency under a scenario of shared water capacity;
 - e. Other operational matters as identified during course of exploration;
 - f. Implementation plans for construction and operation of new facilities, including cost share between the Parties.
4. Performance. In order to perform the technical evaluations outlined herein, the Parties will both utilize their own internal staff as well as retain outside services when deemed necessary. The retention of any outside services will be performed pursuant to Paragraph 5, Cost Sharing.
5. Cost Sharing. It is the intent of the Parties to split equally the costs of any outside services undertaken pursuant to this MOU, such as engineering, financial, or public outreach consulting costs. The following terms apply with respect to the retention of such outside services and project-related costs:
 - a. Staff time, overhead, and internal costs borne by each Party may be separately tracked by same at the Party's sole discretion, but there is no obligation to report these costs to the other Party nor any right to pursue reimbursement for same from the other Party;
 - b. Either Party may retain outside services to perform or assist in the performance of technical evaluations, but such retention is subject to the other Party's approval of the service provider, scope of work, and not-to-exceed cost of the services;
 - c. The total cost of outside services shall not exceed \$100,000, split equally between the Parties. Any changes to this total cost amount shall be by written amendment to this MOU;
 - d. Each Party shall follow its respective legal requirements, policies, and procedures in the retention of outside services;

- e. Upon payment for approved outside services, each Party shall promptly invoice the other for its equal share of actual costs. Payment by the other Party is due within sixty (60) days of receipt of invoice.
6. Notices. All notices that are required either expressly or by implication to be given by any party to the other under this MOU shall only be signed by authorized officers of the notifying party.

All notices to Parties required by this MOU shall be delivered personally or mailed, U.S. first class postage prepaid, to the following addresses:

Roseville

City Manager
311 Vernon Street
Roseville, CA 95768

PCWA

General Manager
P.O. Box 6570
Auburn, CA 95604

7. Term. This MOU will remain in full force and effect until one of the following occurs: (a) the MOU is terminated by either Party upon thirty (30) days' written notice; or (b) the technical evaluations have been completed and no obligations under this MOU, including payment for outside services as set forth in Paragraph 5, remain outstanding.
8. Termination. If this MOU is terminated pursuant to Paragraph 7, each Party will remain responsible for its share of financial obligations or indebtedness incurred under this MOU prior to the effective date of termination.
9. Amendments. Any amendments to this MOU must be in writing and executed by both Parties.
10. Sharing of Records and Access. The Parties shall maintain records directly pertinent to performance of technical evaluations under this MOU for a minimum of three (3) years. Where an outside provider is retained, the retaining Party shall promptly provide the other Party with copies of any reports, spreadsheets, and other project-related data or documents. Each Party shall have access to such project-specific records of the other Party for the purpose of inspection and copying.
11. Choice of Law. This MOU shall be governed by the laws of the State of California. The Parties each waive any federal court removal and/or jurisdictional rights they may have.
12. Dispute Resolution. In recognition of the negative consequences associated with disputes both in terms of lost time and expense to all Parties, the Parties agree to attempt to settle their disputes by good-faith, non-binding mediation as a condition precedent to the institution of legal proceedings by either Party. Request for mediation shall be filed in writing with the other Party to this MOU and with the American Arbitration Association. If mediation would jeopardize the substantive rights of either Party including, but not limited to, the application of any applicable statute of limitations or other timing

requirement, then such Party may proceed to enforce such rights notwithstanding this mediation requirement and mediation will be required during the dispute resolution process to the extent it may be used without jeopardizing the substantive rights of either Party. The Parties shall share the mediator's fee and any filing fees equally. The mediation shall be held in Placer County, California unless another location is mutually agreed upon.

13. Headings. The paragraph headings used in this MOU are intended for convenience only and shall not be used in interpreting this MOU or in determining any of the rights or obligations of the Parties to this MOU.
14. No Third Party Beneficiaries. The Parties understand and agree that this MOU creates rights and obligations solely between the Parties and is not intended to benefit any other party. No provision of this MOU shall in any way inure to the benefit of any third person so as to constitute any such third-person as a third-party beneficiary of this MOU or any of its items of conditions, or otherwise give rise to any cause of action in any person not a party hereto.
15. Reasonable Cooperation; No Agency. The Parties will reasonably cooperate with each other, including the execution of all necessary documents required to perform the obligations under this MOU, and to carry out the purpose and intent of this MOU; provided that each Party understands and agrees that there is no agency or joint venture relationship between the Parties, and no Party is authorized to act for or on behalf of any other Party except as expressly authorized under this MOU.
16. Construction and Interpretation. This MOU is entered into freely and voluntarily. This MOU has been arrived at through negotiation, and each Party has had a full and fair opportunity to revise the terms of this MOU. Consequently, the normal rule of construction that any ambiguities are to be resolved against the drafting party will not apply in construing or interpreting this MOU.
17. Liabilities. Each Party understands and agrees that any internal, in-house or administrative costs or expenses incurred by any Party related to that Party's obligations under this MOU shall be the sole responsibility of the Party incurring said costs and expenses.

With the exception of the agreed cost sharing set forth in Paragraph 5, the Parties expressly agree that the debts, liabilities and obligations of each Party shall remain the debts, liabilities and obligations of that Party alone and shall not be the debts, liabilities and obligations of any other Party to this MOU, except as may be otherwise set forth herein or in an amendment to this MOU.

18. Counterparts. The Parties agree that this MOU may be executed and delivered in counterparts which, when taken together, shall constitute a fully-executed MOU. In

addition, this MOU may be executed via electronic pdf transmission and any such pdf signature shall be deemed to be an original signature.

The foregoing is hereby agreed to by the Parties.

IN WITNESS THEREOF, the Parties have executed this MOU as of the dates written below and the City of Roseville, a municipal corporation, has authorized the execution of this MOU by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20__.

Title: On-Call Resident Engineering and Inspection Services - Professional Services Agreements Amendments
Contact: Beth Taylor 916-746-1300 bftaylor@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.23.

RECOMMENDATION TO COUNCIL

Staff recommends the City Council adopt three resolutions to approve the First Amendment to Professional Services Agreements for on-call resident engineering and inspection services with: HDR Construction Corporation; PSOMAS; and Hanna Engineering, Inc. dba The Hanna Group, and authorize the City Manager to execute them.

Staff also requests, as part of each resolution, that the City Council authorize the City Manager to execute the remaining one year extension to each Agreement without further Council approval.

BACKGROUND

After a competitive Request for Proposal process, at their May 10, 2017 meeting, City Council approved three resolutions to enter into Profession Service Agreements with HDR Construction Corporation; PSOMAS; and Hanna Engineering, Inc. dba The Hanna Group for on-call resident engineering and inspection services for a term of three years, with the option of two additional one year extensions, and a not-to-exceed fee for each Agreement of \$1.5 million over the first three-year term. These recommended first amendments extend the contract one year, to May 10, 2021 and increase the contract compensation not-to-exceed fees for each amendment by \$1 million for a total not to exceed fee per contract of \$2.5 million. The Agreements have been and will continue to be funded by various Capital Improvement Program project budgets.

The Public Works Engineering Division is responsible for constructing and repairing City infrastructure such as roads, bridges, drainage facilities, traffic signals, and municipal buildings. Multiple Capital Improvement Program (CIP) projects must be completed every year. Some of the recently completed CIP projects constructed utilizing the existing On-Call agreements are Woodcreek Oaks Widening, Oak Street Parking Garage, Louis Orlando Transfer Station, Sierra Gardens Transfer Point, 2019 Residential Resurfacing, and 2019 Curb Ramp and Concrete Project. These projects represent approximately \$27,000,000 in construction improvements completed timely and efficiently in part due to the support of the on-call resident engineering and inspection consultant contracts.

The Engineering Division anticipates constructing multiple CIP projects this year at an estimated cost of \$15 million, and anticipates the same for 2021. For these projects to be successful, cost efficient, and safe, they must be managed by a team of engineers and inspectors. Some of these projects will be managed by City staff, but additional consultant resources are necessary to supplement City staff and manage the rest due to lean staffing levels. These contract services allow staff to complete more projects without hiring additional permanent City employees. Projects requiring contract construction management that are anticipated to be constructed in 2020 include Oak Street Parking Garage Sealing Project, Arterial Roadway Resurfacing, Oak Ridge Drive Bridge Replacement, Washington Blvd Bikeway and Pedestrian Pathways Project, and the Bridge Preventative Maintenance Project. The most cost effective and time efficient method of obtaining these additional resources is through multiple on-call Professional Service Agreements.

FISCAL IMPACT

The estimated cost for resident engineer and inspection services provided by these three Agreements for projects planned to be constructed over the next year is \$3,000,000. The Agreements will be funded by various Council -pproved CIP project budgets. No General Fund resources will be used.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. First Amendments to Professional Services Agreements meet the above criteria and are not subject to CEQA. No additional environmental review is required.

Respectfully Submitted,

Beth Taylor, Assistant Engineer

Jason Shykowski, Public Works Director

Dominick Casey, City Manager

**FIRST AMENDMENT TO
PROFESSIONAL SERVICES AGREEMENT**

On-Call Construction Resident Engineer and Inspection Services

THIS FIRST AMENDMENT TO AGREEMENT is made and entered into this ____ day of _____, 20__, by and between the City of Roseville, a municipal corporation (“CITY”), and Hanna Engineering, Inc. dba The Hanna Group, a California corporation (“CONSULTANT”); and

W I T N E S S E T H:

WHEREAS, CITY and CONSULTANT previously entered into a Professional Services Agreement dated May 10, 2017 (“Agreement”) regarding on-call construction resident engineer and inspection services (“Project”); and

WHEREAS, CITY is exercising its option to extend the term of the Agreement for an additional one (1) year period and CONSULTANT is willing and able to provide such services.

NOW, THEREFORE, the parties agree as follows:

1. Paragraph 1 of the Agreement is amended by adding an additional paragraph to read as follows:

“The term of this First Amendment to Agreement shall be one (1) year commencing May 10, 2020 and ending on May 9, 2021.”

2. Paragraph 3 of the Agreement is amended by adding an additional paragraph to read as follows:

“CITY shall pay one million dollars (\$1,000,000), bringing the total not to exceed contract amount to two million, five hundred thousand dollars (\$2,500,000).”

3. Paragraph 4 of the Agreement is amended by adding an additional paragraph to read as follows:

“CONSULTANT agrees to defend and indemnify CITY if, despite the parties intent and practice, any venue, agency, or court with competent jurisdiction determines that CONSULTANT and/or any of its agents, officers, employees, volunteers, independent contractors, or subcontractors, are characterized as employee(s) of CITY.”

4. Paragraph 13 of the Agreement is amended by adding an additional paragraph to read as follows:

“CONSULTANT and CITY agree that: (a) CONSULTANT is free from the control and direction of CITY in connection with the performance of the work; (b) CONSULTANT is providing services directly to CITY; (c) CONSULTANT has and will maintain at all relevant times a business license; (d) CONSULTANT maintains a business location that is separate from CITY; (e) CONSULTANT is customarily engaged in an independently established business of the same nature as that involved in the work performed hereunder; (f) CONSULTANT actually contracts with other businesses to provide the same or similar services and maintains a clientele without restrictions from CITY; (g) CONSULTANT advertises and holds itself out to the public as available to provide the same or similar services; (h) CONSULTANT

provides its own tools, vehicles, and equipment to perform the services; (i) CONSULTANT has negotiated its own rates; (j) CONSULTANT set its own hours and location of work in accomplishing CITY's on-call needs; and (k) CONSULTANT has the right to control the manner and means of accomplishing the result desired and exercises its own expert independent judgement."

5. All other provisions of the Agreement shall remain unchanged and in full force and effect.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this First Amendment to Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20____, and CONSULTANT has caused this First Amendment to Agreement to be executed.

CERTIFICATE

The undersigned hereby certifies that she is the Assistant Secretary of HDR Construction Control Corporation, a Nebraska corporation (the "Corporation"), and that, as such, has custody of the minute books of the Corporation, and that, by Consent and Agreement of the Board of Directors, the following resolution was unanimously adopted:

"RESOLVED, that effective immediately, and until termination of said individual from the Corporation, or until rescission by the Corporation's Board of Directors, whichever occurs first, the following individuals are hereby granted the nondelegable authority to execute or approve on behalf of the Corporation, contracts, amendments or change orders for engineering services and architectural services incidental to engineering services to be rendered by the Corporation, . . . , or releases of claim or lien in connection with such services, such contracts, amendments, change orders or releases so executed or approved shall be binding upon the Corporation:

. . . Jason A. Tom – Vice President . . ."

The undersigned further certifies that the foregoing resolution has been spread in full upon the minute books of the Corporation and is in full force and effect.

DATED February 26, 2020.

Elizabeth C. Buell, Assistant Secretary

COUNCIL COMMUNICATION

CC #: 0744
File #: 0800-02

Title: On-Call Material Testing Services - Professional Services Agreements Amendments
Contact: Beth Taylor 916-746-1300 bftaylor@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.24.

RECOMMENDATION TO COUNCIL

Staff recommends the City Council adopt three resolutions to approve the First Amendment to Professional Services Agreements for on-call material testing services with: Holdrege & Kull; Blackburn Consulting; and Twining, Inc., and authorize the City Manager to execute them. Staff also requests, as part of each resolution, that the City Council authorize the City Manager to execute the remaining one year extension to each Agreement without further Council approval.

BACKGROUND

After a competitive Request for Proposals process, at their May 17, 2017 meeting, City Council approved three resolutions to enter into Professional Services Agreements with Holdrege & Kull; Blackburn Consulting; and Twining, Inc. for on-call material testing services for a term of three years, with the option of two additional one-year extensions, and a not-to-exceed fee for each Agreement of \$900,000 over the first three-year term. These recommended first amendments extend the contracts by one year to May 17, 2021, and increase the contract compensation not-to-exceed fees for each amendment by \$300,000 each, to a total of \$1.2 million per contract. The Agreements have been and will continue to be funded by various Capital Improvement Program projects.

The Public Works Engineering Division is responsible for constructing and repairing City infrastructure such as roads, bridges, drainage facilities, traffic signals, and municipal buildings. Several Capital Improvement Program (CIP) projects must be completed every year. Since the late 1990's, engineering staff has utilized professional service agreements for material testing services to ensure materials supplied and placed within City right-of-way and public utility easements meet the requirements of City Standards. Recently completed CIP projects that have utilized the current on-call material testing contracts include Hillcrest Drainage Improvements, Woodcreek Oaks Widening, 2018 Roller Compacted Concrete, Sierra Gardens Transfer Point, 2019 Residential Resurfacing, and Royer Park to Harding Bike Trail Segment 3. These projects represent approximately \$23,000,000 in construction improvements completed to city standard due in part to the support of the on-call materials testing consultant contracts.

The Engineering Division anticipates constructing several CIP projects this year at an estimated cost of approximately \$15,000,000, and anticipates the same in 2021. Projects requiring contract material testing services that are anticipated to be constructed in 2020 include: Oak Street Parking Garage Sealing Project, Arterial Roadway Resurfacing, Oak Ridge Drive Bridge Replacement, Washington Blvd Bikeway and Pedestrian Pathways Project, and the Bridge Preventative Maintenance Project. The most cost effective and time efficient method of obtaining these additional services is through multiple on-call Professional Services Agreements.

FISCAL IMPACT

The estimated cost for material testing services provided by these three Agreements for projects planned to be constructed over the next year is \$900,000. The Agreements will be funded by various Council approved CIP project budgets. No General Fund resources will be used.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Agreements for Material Testing Services meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Respectfully Submitted,

Beth Taylor, Assistant Engineer

Jason Shykowski, Public Works Director

**FIRST AMENDMENT TO
PROFESSIONAL SERVICES AGREEMENT**

On-Call Material Testing Services

THIS FIRST AMENDMENT TO AGREEMENT is made and entered into this ____ day of _____, 20__, by and between the City of Roseville, a municipal corporation ("CITY"), and Blackburn Consulting, a California corporation ("CONSULTANT"); and

W I T N E S S E T H:

WHEREAS, CITY and CONSULTANT previously entered into a Professional Services Agreement dated May 17, 2017 ("Agreement") regarding on-call material testing services ("Project"); and

WHEREAS, CITY is exercising its option to extend the term of the Agreement for an additional one (1) year period and CONSULTANT is willing and able to provide such services.

NOW, THEREFORE, the parties agree as follows:

1. Paragraph 2 of the Agreement is amended by adding an additional paragraph to read as follows:

"CITY shall pay three hundred thousand dollars (\$300,000), bringing the total not to exceed contract amount to one million, two hundred thousand dollars (\$1,200,000)."

2. Paragraph 3 of the Agreement is amended by adding an additional paragraph to read as follows:

“CONSULTANT agrees to defend and indemnify CITY if, despite the parties intent and practice, any venue, agency, or court with competent jurisdiction determines that CONSULTANT and/or any of its agents, officers, employees, volunteers, independent contractors, or subcontractors, are characterized as employee(s) of CITY.”

3. Paragraph 12 of the Agreement is amended by adding an additional paragraph to read as follows:

“CONSULTANT and CITY agree that: (a) CONSULTANT is free from the control and direction of CITY in connection with the performance of the work; (b) CONSULTANT is providing services directly to CITY; (c) CONSULTANT has and will maintain at all relevant times a business license; (d) CONSULTANT maintains a business location that is separate from CITY; (e) CONSULTANT is customarily engaged in an independently established business of the same nature as that involved in the work performed hereunder; (f) CONSULTANT actually contracts with other businesses to provide the same or similar services and maintains a clientele without restrictions from CITY; (g) CONSULTANT advertises and holds itself out to the public as available to provide the same or similar services; (h) CONSULTANT provides its own tools, vehicles, and equipment to perform the services; (i) CONSULTANT has negotiated its own rates; (j) CONSULTANT set its own hours and location of work in accomplishing CITY’s on-call needs; and (k) CONSULTANT has the right to control the manner and means of accomplishing the result desired and exercises its own expert independent judgement.”

4. Paragraph 21 of the Agreement is amended by adding an additional paragraph to read as follows:

“The term of this First Amendment to Agreement shall be one (1) year commencing May 17, 2020 and ending on May 16, 2021.”

5. All other provisions of the Agreement shall remain unchanged and in full force and effect.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this First Amendment to Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20__, and CONSULTANT has caused this First Amendment to Agreement to be executed.

"CITY shall pay three hundred thousand dollars (\$300,000), bringing the total not to exceed contract amount to one million, two hundred thousand dollars (\$1,200,000)."

2. Paragraph 3 of the Agreement is amended by adding an additional paragraph to read as follows:

“CONSULTANT agrees to defend and indemnify CITY if, despite the parties intent and practice, any venue, agency, or court with competent jurisdiction determines that CONSULTANT and/or any of its agents, officers, employees, volunteers, independent contractors, or subcontractors, are characterized as employee(s) of CITY.”

3. Paragraph 12 of the Agreement is amended by adding an additional paragraph to read as follows:

“CONSULTANT and CITY agree that: (a) CONSULTANT is free from the control and direction of CITY in connection with the performance of the work; (b) CONSULTANT is providing services directly to CITY; (c) CONSULTANT has and will maintain at all relevant times a business license; (d) CONSULTANT maintains a business location that is separate from CITY; (e) CONSULTANT is customarily engaged in an independently established business of the same nature as that involved in the work performed hereunder; (f) CONSULTANT actually contracts with other businesses to provide the same or similar services and maintains a clientele without restrictions from CITY; (g) CONSULTANT advertises and holds itself out to the public as available to provide the same or similar services; (h) CONSULTANT provides its own tools, vehicles, and equipment to perform the services; (i) CONSULTANT has negotiated its own rates; (j) CONSULTANT set its own hours and location of work in accomplishing CITY’s on-call needs; and (k) CONSULTANT has the right to control the manner and means of accomplishing the result desired and exercises its own expert independent judgement.”

4. Paragraph 21 of the Agreement is amended by adding an additional paragraph to read as follows:

“The term of this First Amendment to Agreement shall be one (1) year commencing May 17, 2020 and ending on May 16, 2021.”

5. All other provisions of the Agreement shall remain unchanged and in full force and effect.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this First Amendment to Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20__, and CONSULTANT has caused this First Amendment to Agreement to be executed.

Title: Resolution Declaring Weeds and Rubbish a Public Nuisance - Setting a Public Hearing Date
Contact: Jason Rizzi 916-774-5802 jrizzi@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.25.

RECOMMENDATION TO COUNCIL

To initiate the 2020 Weed Abatement Program staff recommends Council approval of the attached resolution declaring weeds, rubbish, dirt, and/or rank growth within the City of Roseville on the parcels identified on the attached list, (based on available City of Roseville GIS data at the time of report) to be a public nuisance, as well as ordering the Fire Chief to give notice of the passage and setting a time and place for the required public hearing. The public hearing will be scheduled for the City Council meeting on Wednesday, June 3, 2020.

BACKGROUND

The Fire Department manages a very proactive and effective annual Weed Abatement Program. Each year all vacant parcels are identified and property owners are notified of their obligation to maintain adequate fire breaks as a fire protection/prevention measure. The fire and life safety requirements for vegetation management are contained in the California Fire Code, which is enforced by the Roseville Fire Department. Property owners are given an opportunity to abate hazards that exist on their parcels. The City only conducts abatement activities on private parcels once the owner has failed to abate the hazard by a pre-determined date specified by the Fire Department. Abatement costs related to private properties are billed to the respective property owners. The notification, public hearing, and cost recovery processes are specified in Chapter 9.20 of the Roseville Municipal Code.

FISCAL IMPACT

Owners of private parcels that are abated by the City are responsible for the costs associated with providing abatement services. A bill is sent to each property owner detailing the abatement costs, as well as an administrative fee. If the property owner fails to pay the bill, the City places a lien on the subject property and the monies owed are reimbursed through the property tax collection process.

ENVIRONMENTAL REVIEW

The Weed Abatement Program involves minor alteration in the condition of the land, water, and/or vegetation and will not remove healthy, mature, scenic trees. This activity is categorically exempt from CEQA as a Class 4 Exemption (State CEQA Guidelines Section 15304). The Exemption has been prepared and no further CEQA action is required.

Respectfully Submitted,

Jason Rizzi, Division Chief / Fire Marshal

Rick Bartee, Fire Chief

Dominick Casey, City Manager

Description

Resolution No. 20-125

Public Hearing Notice

2020 Weed Abatement Parcel List - Alpha

Sample Letter

RESOLUTION NO. 20-125

RESOLUTION OF THE COUNCIL OF THE CITY OF ROSEVILLE DECLARING ALL WEEDS, DIRT, RUBBISH OR RANK GROWTHS WITHIN THE CITY OF ROSEVILLE TO BE A PUBLIC NUISANCE; ORDERING THE FIRE CHIEF TO GIVE NOTICE OF THE PASSAGE OF THIS RESOLUTION; AND SETTING A TIME AND PLACE FOR HEARING ANY OBJECTIONS TO THE PROPOSED DESTRUCTION OR REMOVAL OF SUCH WEEDS, DIRT, RUBBISH, OR RANK GROWTHS.

Whereas, weeds, dirt, rubbish and rank growths are growing, located and existing on property within the City of Roseville and constitute a public nuisance, and

Whereas, it is the desire of the Council to cause the abatement of that nuisance by destruction or removal of such weeds, dirt, rubbish and rank growths;

Now, therefore, be it resolved by the City Council of the City of Roseville as follows:

That all weeds, dirt, rubbish and rank growths growing, located or existing on the property within the City of Roseville described by Placer County Assessor's parcel numbers in the "weed, dirt, rubbish and rank growths abatement list – FY 2019-20", a copy of which is on file in the office of the City Clerk, are hereby declared to be a public nuisance.

1. That the Fire Chief of the City of Roseville is hereby ordered to give notice of the passage of this resolution and required by law stating, among other things, that unless such nuisance be abated without delay of the destruction or removal of the weeds, dirt, rubbish and rank growths. The nuisance will be abated by the city authorities and the expenses thereof assessed upon the lots, parcels and lands from or on which such nuisance is abated.
2. That Wednesday, June 3, 2020 at 6:00 p.m. or as soon thereafter as the matter can be heard, in the Council Chambers in City Hall, 311 Vernon Street, Roseville, California, is hereby fixed as the time and place for hearing.
3. That the City Clerk is hereby directed to publish notice to destroy or remove those weeds, dirt, rubbish or rank growths declared therein to be a public nuisance at least twice in a newspaper published and circulated in the City of Roseville. The first publication of which shall be at least (10) ten days prior to the time fixed herein by this Council for hearing objections.

PASSED AND ADOPTED by the Council of the City of Roseville this_____day of
_____, 20____, by the following vote on roll call:

AYES: COUNCILMEMBERS:

NOES: COUNCILMEMBERS:

ABSENT: COUNCILMEMBERS:

MAYOR

CITY CLERK

NOTICE

Public Notice is hereby given that a public hearing will be held before the City Council of the City of Roseville for the purpose of considering the following:

WEED ABATEMENT HEARING

On May 6, 2020 pursuant to the provisions of Chapter 9.20 of the Roseville Municipal Code, the City Council of the City of Roseville adopted Resolution No.20-____ declaring that all weeds as defined in Section 9.20.010 (C) (1) of said chapter and all dirt, rubbish and/or rank growth, as defined in Section 9.20.010 (C) (2,3,4) of said chapter, of any kind on private property, or in any street or alley abutting any property, constitute a public nuisance which must be abated by the destruction or removal thereof.

All property owners, lessees or occupants of buildings, grounds or lots shall, without delay, destroy or remove all such weeds, dirt, rubbish and/or rank growths from their property and half of the abutting street and alley, if any, between the lot lines, as extended, or such weeds, dirt, rubbish and/or rank growths will be destroyed or removed and such nuisance abated by the city authorities, in which case the cost of destruction or removal will be assessed upon the lots and lands from or on which, or abutting the streets and alleys from or on which, such nuisance was abated, and such costs will constitute a lien upon the lots or parcels until paid and will be collected on the next tax roll upon which municipal taxes are collected.

All property owners having objections to the proposed abatement of the nuisances are hereby notified to attend a meeting of the Council of the City of Roseville to be held on June 3, 2020, at 6:00 o'clock p.m., or as soon thereafter as may be heard, in the Civic Center Council Chambers, 311 Vernon Street, Roseville, CA, where and when all objections will be heard and given due consideration.

FIRE CHIEF OF THE CITY OF ROSEVILLE
RICK BARTEE

NOTICE TO ABATE FIRE HAZARD

This letter is intended for parcels that are undeveloped. If the property has been developed or sold, please disregard the following and complete the information on the following page(s) and return it to the Roseville Fire Department, 316 Vernon Street, Suite 480, Roseville, CA 95678.

This letter is to notify you that a fire hazard may exist on the undeveloped parcel(s) listed on the following page(s). The law requires that all cut or uncut weeds, grass, vines, vegetation, or other combustible materials be removed when determined to be a fire hazard. Roseville Fire Code (RFC) 304.1.3; H&S Code, Division 12, Part 5.

*If applicable, all necessary work shall be completed no later than **July __, 2020**. If the property owner does not comply with this notice, the required firebreaks will be made by the City of Roseville. All costs incurred by the City, including a **\$308.00** per parcel administration fee, shall be billed directly to the property owner.*

WEED ABATEMENT GUIDELINES

A clear firebreak of a minimum 30-foot width shall be created and maintained in all areas designated by the City of Roseville. Clear firebreaks shall be provided around all combustible buildings, fences, vehicles, structures, or storage on this parcel or on adjacent properties. We ask that you adhere to the following abatement requirements:

- 1. The preferred method of weed abatement shall be accomplished by discing and completed so that all weeds, grass, other vegetation or organic material which can be expected to burn are completely removed or turned under so there is insufficient fuel to sustain or allow the spread of fire.*
 - Discing does not negate the requirement for weed removal up to the structure.*
- 2. Where discing is not practical, mowing is permitted where the material is mulched and the remaining weeds do not exceed two inches in height.*
- 3. Spark arrestors shall be installed on all outdoor equipment with internal combustion engines.*
- 4. Parcels that are one acre or less shall be completely abated.*

Prior to abating weeds, seasonal rains should be considered. Late rains will produce late growing weeds. Weeds once mowed, may require additional mowing. The weed abatement program's intent is to reduce the fire hazard during fire season.

Our Mission... Protect and enhance the safety and well being of residents, businesses, customers and partners
We will accomplish this by... Delivering exceptional service and compassionate solutions as a cohesive team with dedication, pride and vigilance.

Title: Diamond Creek North Roseville Specific Plan DC 30 & 33 Improvement Plan - Notice of Completion

Contact: Darin Crockett 916-746-1324 dcrockett@roseville.ca.us

Meeting Date: 5/6/2020

Item #: 6.26.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt the attached resolution accepting Diamond Creek North Roseville Specific Plan (NRSP) DC 30 & 33, CWJ#190257, as complete and authorizing the City Engineer to execute the Notice of Completion.

BACKGROUND

The Engineering division has made a final inspection of the subject project and has found the subdivision infrastructure work complete in accordance with the improvement plans and City specifications.

FISCAL IMPACT

The actions requested as part of this action have no impact to the City's General Fund. Construction costs were paid by the developer.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment (CEQA Guidelines 15061(b)(3)). Accepting the Notice of Completion for the Diamond Creek NRSP DC 30 & 33 project does not include the potential for a significant environmental effect and therefore is not subject to CEQA.

Respectfully Submitted,

Darin Crockett, Construction Inspector

Mike Isom, Development Services Director

Dominick Casey, City Manager

Title: Dry Creek Wastewater Treatment Plant Cogeneration and Nitrate Reduction Improvements Project - Notice of Completion

Contact: Todd Jordan 916-746-1829 tjordan@roseville.ca.us

Meeting Date: 5/6/2020

Item #: 6.27.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council accept the Dry Creek Wastewater Treatment Plant Cogeneration and Nitrate Reduction Improvements Project as complete and authorize the Environmental Utilities Director to execute the Notice of Completion.

BACKGROUND

On January 10, 2018, the City Council awarded a construction contract to Auburn Constructors, Incorporated for construction of the Dry Creek Wastewater Treatment Plant Cogeneration and Nitrate Reduction Improvements Project in the amount of \$18,420,300.

Construction was completed for a total cost of \$19,065,903. This cost includes \$645,603 in change orders, approximately 3.5% of the awarded project amount. This is less than the Council approved change order authority of \$2,325,019.

The Cogeneration project provides the plant the ability to convert digester gas to electricity for plant usage, which increased the treatment process energy efficiencies and reduced air emissions. The Nitrate Reduction Improvements Project included improvements that provide the ability for the plant to consistently meet the new final effluent nitrate plus nitrite limits.

FISCAL IMPACT

The original contract amount was \$18,420,300. The total change order amount was \$645,603. The total contract amount of \$19,065,903 was paid from the Dry Creek Wastewater Treatment Plant cogeneration and Nitrate Reduction Improvements Project budget.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in

a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The Notice of Completion meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Respectfully Submitted,

Todd Jordan, Process Engineer

Title: Downtown Water Mains Replacement Project – Hillcrest Neighborhood - Professional Design Services Agreement and Budget Adjustment

Contact: Janice R. Gainey 916-774-5535 jrgainey@roseville.ca.us

Meeting Date: 5/6/2020

Item #: 6.28.

RECOMMENDATION TO COUNCIL

Staff recommends that City Council:

- 1) Approve a professional design services agreement for the Downtown Water Mains Replacement Project-Hillcrest with Domenichelli & Associates, Inc. and adopt a resolution authorizing the City Manager to execute it; and
- 2) Adopt an ordinance to approve a budget adjustment to transfer the remaining project budget of \$1,533,248 from an operating account in the Water Rehabilitation Fund to a newly established Capital Improvement Project (CIP). There is no increase in appropriations nor a net change to the available resources in the Water Rehabilitation Fund.

BACKGROUND

An analysis of flow capacity limitations, review of maintenance history, and age of the water distribution pipelines in the Roseville downtown area identified the need for mainline replacements and upsizing of fire hydrants in the Hillcrest neighborhood. This project area is bounded by I-80 on the West, Douglas Blvd. on the North, Marietti Way on the East, and Vine Avenue on the South.

The Public Works Department (PWD) had planned for resurfacing and repair of roadways in this neighborhood in the Summer of 2020. In a coordinated effort between Public Works and Environmental Utilities (EU), to ensure that the underground improvements are completed, prior to the above ground PWD improvements being installed, and to help reduce disruptions within the neighborhood, the water pipeline replacements and roadwork will be combined under one construction contract to be completed in the Summer of 2021. Staff will return to the City Council with a request to award that construction contract sometime in fall 2020.

This professional design service agreement will design engineering support for the consultant to work with EU staff to design the new alignment of the water mains and locations of hydrants, as well as developing plans and specifications for construction, and supporting the construction

oversight efforts.

This project supports the City's Strategic Plan Goal F - Invest in Well-Planned Infrastructure and Growth by reinvesting in aging infrastructure.

FISCAL IMPACT

Funding for this effort is already included in the Water Rehabilitation Fund. The recommended budget adjustment transfers the remaining budget from an operating budget to a newly created CIP in order to facilitate expense tracking in the City's financial system. There is no appropriation increase and no impact to the available resources in the Water Rehabilitation Fund.

ENVIRONMENTAL REVIEW

Approval of the professional design services agreement and adoption of the ordinance approving the proposed budget adjustment are not subject to CEQA, as it applies only to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3).

The proposed Water Mains Replacement project involves the maintenance and replacement of existing structures and facilities. This activity is categorically exempt from CEQA as a Class 2 Exemption (State CEQA Guidelines Section 15302). The Exemption has been prepared and no further CEQA action is required.

Respectfully Submitted,

Janice R. Gainey, Senior Engineer

Richard D. Plecker, Environmental Utilities Director

Dominick Casey, City Manager

PROFESSIONAL DESIGN SERVICES AGREEMENT

Downtown Water Mains Replacement Project

THIS AGREEMENT is made and entered into this ____ day of _____, 20__,
by and between the City of Roseville, a municipal corporation ("CITY"), and Domenichelli &
Associates, Inc., a California corporation ("CONSULTANT"); and

W I T N E S S E T H:

WHEREAS, CITY desires professional design services consisting of replacement of the
downtown water mains – Hillcrest neighborhood; and

WHEREAS, CONSULTANT has prepared a proposal dated April 3, 2020, which
describes the scope of work to be performed by CONSULTANT, the budget for the work, and
the schedule for performance of the work; and

WHEREAS, CONSULTANT is qualified and experienced to provide such professional
design services.

NOW, THEREFORE, the parties agree as follows:

1. Services. CONSULTANT shall perform, at the direction of CITY, the scope of
services as described in EXHIBIT "A," attached hereto and incorporated herein by this
reference.
2. Compensation. For its services provided hereunder, CONSULTANT shall be
compensated on a time and expense basis in accordance with the budget estimate as described in

EXHIBIT "B," attached hereto and incorporated herein by this reference. Total compensation shall not exceed three hundred seventy-seven thousand and eighty-four dollars (\$377,084).

CONSULTANT shall submit monthly invoices for its services. Such invoices shall be delineated by task, the person performing the services, and the hourly rate, which shall be stated in time increments of not greater than one-tenth (1/10) hours. CITY shall pay invoices within thirty (30) days after receipt, if the services specified in the invoice have been satisfactorily completed.

3. Indemnification. To the fullest extent allowed by law, CONSULTANT agrees to indemnify, including the cost to defend CITY, and its officers, agents, employees and volunteers from any and all claims, demands, costs or liability that arise out of, or pertain to, or relate to the negligence, recklessness, or willful misconduct of CONSULTANT and its agents in the performance of services under this contract, but this indemnity does not apply to liability for damages for death or bodily injury to persons, injury to property, or other loss, arising from the sole negligence, willful misconduct or defects in design by CITY or the agents, servants, or independent contractors who are directly responsible to CITY, or arising from the active negligence of CITY. Notwithstanding any terms of this section, indemnification and defense obligations shall conform to California Civil Code Section 2782.8.

CONSULTANT agrees to defend and indemnify CITY if, despite the parties intent and practice, any venue, agency, or court with competent jurisdiction determines that CONSULTANT and/or any of its agents, officers, employees, volunteers, independent contractors, or subcontractors, are characterized as employee(s) of CITY.

CONSULTANT's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by

law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

4. Insurance. CONSULTANT agrees to continuously maintain, in full force and effect, the following minimum policies of insurance during the term of this Agreement.

<u>COVERAGE</u>	<u>LIMITS OF LIABILITY</u>
Workers' Compensation	Statutory
Commercial General Liability	\$2,000,000 each occurrence \$4,000,000 aggregate Personal Injury: \$2,000,000 each occurrence \$4,000,000 aggregate
Automobile Liability	\$1,000,000 combined single limit
Professional Liability (errors and omissions)	\$2,000,000 per claim \$4,000,000 aggregate

a. Form. CONSULTANT shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

b. Additional Insureds. CONSULTANT shall also provide a separate endorsement form or section of the policy showing CITY, its officers, agents, employees and volunteers as additional insureds for each type of coverage, except for Workers' Compensation and Professional Liability. Such insurance shall specifically cover the contractual liability of CONSULTANT. The additional insured coverage under the CONSULTANT's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from CITY's insurance or self-insurance. In addition, the

additional insured coverage shall be at least as broad as the Insurance Services Office ("ISO") CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds.

Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

c. Cancellation/Modification. CONSULTANT shall provide ten (10) days written notice to CITY prior to cancellation or modification of any insurance required by this Agreement.

d. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of CITY (if agreed to in a written contract) before CITY's own insurance shall be called upon to protect it as a named insured.

e. Subcontractors. CONSULTANT agrees to include in its contracts with all subcontractors the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, CONSULTANT shall require its subcontractors to agree to be bound to CONSULTANT and CITY in the same manner and to the same extent as CONSULTANT is bound to CITY under this Agreement. Additionally, CONSULTANT shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of CITY's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request.

f. Self-Insured Retentions. All self-insured retentions ("SIR") must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or CITY. CITY reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

g. Waiver of Subrogation. CONSULTANT hereby agrees to waive subrogation which any insurer of CONSULTANT may acquire from CONSULTANT by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of CITY, its officers, agents, employees and volunteers for all work performed by CONSULTANT, its employees, agents and subcontractors.

h. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve CONSULTANT of liability in excess of such coverage, nor shall it preclude CITY from taking such other actions as are available to it under any other provisions of this Agreement or law.

5. Records. CONSULTANT and its subcontractors shall maintain all files and records relating to the services performed hereunder during the term of this Agreement and for a period of not less than one (1) year after the date of termination or expiration. Provided, however, that in the event of litigation or settlement of claims arising from the performance of this Agreement, CONSULTANT and its subcontractors shall maintain all files and records until such litigation, appeals or claims are resolved. Duly authorized representatives of CITY shall

have right of access during normal business hours and after reasonable notice to CONSULTANT's and subcontractors' files and records relating to the services performed hereunder, and may review and copy the files and records at appropriate stages during performance of the services and during the one (1) year period following termination or expiration of this Agreement. CONSULTANT shall include this provisions in its contracts with all subcontractors.

6. Time is of the Essence. Time is of the essence of this Agreement.

7. Prevailing Wages. When applicable, for purposes of this Agreement, CONSULTANT and its subcontractors shall comply with all applicable prevailing wage laws, e.g., but not limited to, California Labor Code Sections 1770 et seq. In accordance with said Section 1775, CONSULTANT shall forfeit as a penalty to the City two hundred dollars (\$200) for each calendar day or portion thereof for each worker paid less than the prevailing rates for such work or craft in which such worker is employed for any work done on-site under the Agreement by CONSULTANT or by any subcontractor in violation of the provisions of the Labor Code and in particular, Labor Code Sections 1770 to 1780, inclusive. In addition to said penalty and pursuant to said Section 1775, the difference between such stipulated prevailing wage rates and the amount paid to each worker for each calendar day or portion thereof for which each worker was paid less than the stipulated prevailing wage shall be paid to each worker by CONSULTANT or the applicable subcontractor.

Pursuant to the provisions of California Labor Code Section 1773, the contracting department has identified the source, stated below, of the general prevailing rate of wages applicable to the site to be done, for straight time, overtime, and holiday work. The holiday wage rate listed shall be applicable to all holidays recognized in the collective bargaining

agreement of the particular craft, classification or type of worker concerned. These wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: <http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm>.

Pursuant to Labor Code Section 1773.2, general prevailing wage rates set forth above, which forms a part of this Agreement, shall be posted by CONSULTANT at a prominent place at the work site. Prevailing wage rates to be posted at the work site will be furnished by the contracting department. The possibility of wage increases is one of the elements to be considered by CONSULTANT in determining its proposal, and will not under any circumstances be considered as the basis of a claim against CITY or the Agreement.

8. Contractor Registration. No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this Agreement, CONSULTANT and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. CONSULTANT is hereby notified that this Agreement is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

9. Compliance with Laws. CONSULTANT shall comply with all federal, state and local laws, ordinances and policies as may be applicable to the performance of services under this Agreement.

10. Ability to Perform. CONSULTANT agrees and represents that it has the time, ability and professional expertise to perform the services required under this Agreement.

11. Governing Agreement. In the event of any conflict between this Agreement and its EXHIBITS, the provisions of this Agreement shall govern. In the event of any conflict between any of the EXHIBITS, the provisions of the first in order of attachment shall govern.

12. Assignment. CONSULTANT is employed to perform unique personal services. CONSULTANT shall not assign this Agreement without the prior written consent of CITY. CONSULTANT shall not employ or otherwise incur any obligation to pay other specialists or experts for services in connection with this Agreement, without prior written consent of CITY.

13. Independent Contractor. CONSULTANT shall act as an independent contractor, and covenants and agrees that it will conduct itself consistent with such status, that it will neither hold itself out as, nor claim to be, an officer or employee of CITY by reason of this Agreement.

CONSULTANT and CITY agree that: (a) CONSULTANT is free from the control and direction of CITY in connection with the performance of the work; (b) CONSULTANT is providing services directly to CITY; (c) CONSULTANT has and will maintain at all relevant times a business license; (d) CONSULTANT maintains a business location that is separate from CITY; (e) CONSULTANT is customarily engaged in an independently established business of the same nature as that involved in the work performed hereunder; (f) CONSULTANT actually contracts with other businesses to provide the same or similar services and maintains a clientele without restrictions from CITY; (g) CONSULTANT advertises and holds itself out to the public as available to provide the same or similar services; (h) CONSULTANT provides its own tools, vehicles, and equipment to perform the services; (i) CONSULTANT has negotiated its own rates; (j) CONSULTANT set its own hours and location of work in accomplishing CITY's on-call needs; and (k) CONSULTANT has the right to control the manner and means of accomplishing the result desired and exercises its own expert independent judgement.

14. Representation and Warranties. CONSULTANT warrants that it has not employed or retained any company or person, other than a bona fide employee working for

CONSULTANT, to solicit or secure this Agreement, and that it has not paid or agreed to pay any company or person, other than a bona fide employee, any fee, commission, percentage, brokerage fee, gift or any other consideration, contingent upon or resulting from the award or making of this Agreement. For breach or violation of this warranty, CITY shall have the right to terminate as void this Agreement, without liability, or, in its discretion, to deduct from the Agreement price or consideration, or otherwise recover, the full amount of such fee, commission, percentage, brokerage fee, gift or contingent fee.

15. Successors in Interest. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.

16. Copyright, Ownership and Use of Materials. All tangible materials ("Material") created or delivered pursuant to this Agreement is considered a work made for hire under the Copyright Act. To the extent such Material does not qualify as a work made for hire, CONSULTANT hereby assigns to CITY all right, title, and interest, including but not limited to all copyrights, in all Material created by CONSULTANT in its performance under this Agreement. Material constitutes the scope of work outlined in Exhibit A and attached hereto, and all written and other tangible expressions, including but not limited to, drawings, papers, documents, reports, surveys, renderings, exhibits, sketches, maps, models, prints, paintings or photographs, in any and all media or formats in which such materials have been created or are maintained. All Material furnished by CONSULTANT is, and shall remain, the property of CITY.

CONSULTANT shall execute any documents necessary to effectuate such assignment. In the event that CONSULTANT uses, employs, designates, or retains any person or entity who is not an employee of CONSULTANT, to perform any work required of it pursuant to this

Agreement, CONSULTANT shall require said person or entity to execute an agreement containing the preceding paragraph.

17. Termination of Agreement. The City may terminate this Agreement without cause by giving CONSULTANT ten (10) days advance written notice from the City Manager. CONSULTANT may terminate this Agreement without cause by giving CITY thirty (30) days advance written notice. In the event of termination through no fault of CONSULTANT, CITY shall compensate CONSULTANT for services performed as of the date of termination, upon the release to CITY of all Material hereunder, in any and all media or formats in which such materials have been created or are maintained. CITY retains the right to receive and use any Material, notwithstanding any termination or any dispute regarding the amount to be paid.

18. Attorney's Fees; Venue; Governing Law. If either party commences any legal action against the other party arising out of this Agreement or the performance thereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorneys' fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

19. Modification. This Agreement and each provision contained herein may be waived, amended, supplemented or eliminated only by mutual written agreement of the parties.

20. Severability. If any of the provisions contained in this Agreement is for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

21. Notices. Any notices to parties required by this Agreement shall be delivered personally or mailed, U.S. first class postage prepaid, addressed as follows:

CITY OF ROSEVILLE

Janice Gainey
Environmental Utilities
2005 Hilltop Circle
Roseville, CA 95747

CONSULTANT

Joseph Domenichelli
5180 Golden Foothill Parkway
Suite 220
El Dorado Hills, CA 95762

Either party may amend its address for notice by giving notice to the other party in writing.

22. Integrated Agreement. This is an integrated agreement and contains all of the terms, considerations, understanding and promises of the parties. It shall be read as a whole.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20____, and CONSULTANT has caused this Agreement to be executed.

RE: Scope of Work and Fee for Professional Design Services – Downtown Water Mains Replacement Project – Hillcrest Neighborhood

Dear Ms. Gainey,

Domenichelli and Associates, Inc. (D&A) is pleased to submit the attached Scope of Work and Fee for the City of Roseville's Downtown Water Mains Replacement Project.

Our point of contact will be myself, Joe Domenichelli, President at JoeD@daengineering.net. A second principal contact will be Sara Rogers, Vice President at SaraR@daengineering.net. Our address and phone numbers are:

Corporate Office:

5180 Golden Foothill Parkway, Suite 220
El Dorado Hills, CA 95762

Phone: (916) 933-1997

Sacramento Office:

3301 C Street #1000
Sacramento, CA 95816

Cell: (916) 716-4207 (Joe), or (916) 803-0012 (Sara)

Our team will be led by Sara Rogers, who has over 19 years of experience managing and/or designing large water main replacement projects throughout northern California. She will be supported by Joe Domenichelli who has over 35-years of design and construction experience in the water resources industry. Our team also includes Tom Dugan and Adam Motiejunas, with extensive experience in pipeline replacement design. In addition, Mr. Dugan specializes in Construction Management. His construction experience will be an asset during the design and design-assist/construction phases of the project.

Our unique approach to providing the design-assist services for this project is reflected in our scope of work. We have the right team, the necessary support staff, a proven track record on similar projects, and the right experience to provide outstanding services to the City. Please note that there are a few added optional tasks included in our Project Plan.

D&A will perform all of the services defined in the RFP and adhere to the requirements of the RFP, Addendum #1 (issued March 2nd), and Addendum #2 (issued March 11th). If you have any questions or require additional information, please do not hesitate to contact myself or Sara Rogers.

Sincerely,

A handwritten signature in black ink, appearing to read 'Joe D.', with a stylized flourish at the end.

Joe Domenichelli, P.E. – President,
Domenichelli and Associates, Inc.

CITY OF ROSEVILLE

Scope of Work for Downtown Water Mains Replacement Project – Hillcrest Neighborhood

SCOPE OF WORK

The following provides our detailed project scope of work. Additional (optional) tasks are also provided for reference. These optional tasks may be authorized by the City as required.

Task 1 – Project Management and Coordination

Along with providing the right design team, a proper project management and design approach will be necessary to keep the project on schedule while providing the necessary quality assurance and quality control (QA/QC). First and foremost, our project management approach involves strong leadership and communication. Our management team members are principal and senior level staff who will also be involved during the project design. This level of commitment and experience has made D&A design teams highly successful with continued solicitation for service from our current clients. We provide concise and complete meeting minutes; schedule updates; and progress reports that accompany monthly billing.

Recognizing the Design-Assist approach will require an even higher level of coordination and communication amongst all parties involved, D&A's project management team is committed to communicating often and early between the City's staff, the Contractor, the design team members, and the local Hillcrest community if requested by the City. This will assure quick and efficient response to situations as they present themselves in the effort to meet the City's milestone dates and project objectives.

As the Principal-In-Charge for QA/QC for our design team, Joe Domenichelli will provide a

final review of all major design documents prior to submittal to the City.

Under the Design-Assist project approach, D&A understands that accurate and up to date data sharing amongst all parties is critical to respond promptly to situations and convey information to the field. Provided the City does not have a preferred data sharing platform, D&A proposes using a cloud-based data sharing platform (e.g. google doc, box, drop box, etc.). D&A would present a project folder structure to the City for approval, which would then be setup on the agreed data sharing site. The project folders would be accessible to the City, the Contractor, D&A, and others as determined necessary. Our management team will continually audit the data content and folder organization to ensure the most up to date information is posted, older content is archived, and the files are in good working order.

D&A is available to support the City at their request during public outreach. We have budgeted sixteen (16) hours for this effort under project management.

Table 1 lists the proposed meetings and workshops we anticipate holding leading up to construction. They are being presented and budgeted in Task 1 but will be performed in the respective tasks identified. A brief description of the design meetings/workshops are provided with more description in their respective tasks. Construction progress meetings are not listed in this table but have been budgeted under Task 6.

CITY OF ROSEVILLE

Scope of Work for Downtown Water Mains Replacement Project – Hillcrest Neighborhood

Table 1. Summary of Anticipated Design Meetings

Design Meeting and Workshop	Associated Task	Description
Initial Project Workshop	Task 2b	Project Team introductions, review project objectives and schedules, data sharing and protocols, review design criteria, discuss available and additional data needs, discuss specification content, discuss procurement document status and content.
Preliminary 60% Design Review Meeting	Task 2c	After the preliminary design field walk, review the compiled field comments and incorporate field changes, discuss the incorporation of the road restoration plans.
Final 60% Design Workshop	Task 2c	Review all final City comments and D&A responses prior to finalizing the 60% plans and 100% specifications
Procurement Document Finalization Workshop	Task 3	Review D&A's comments with the City and provided further assistance in finalizing the procurement documents.
Contractor Selection Pre-proposal Meeting	Task 3	Participate in the procurement pre-proposal meeting
Design/Construction Workshop	Task 4	Introduction to the selected contractor, review proposed 100% design and potholing sequence approach, review data needs, review permitting constraints, review design/construction collaboration effort, discuss ways to improve efficiency and streamline construction activities.
Final 100% Phase Reviews	Task 4	Review all final 100% Phase Designs (Phases TBD)

The following are the minimum project management responsibilities that will be provided:

- ❖ Effective tracking of schedule and budget.
- ❖ Quality assurance/control of all deliverables.
- ❖ Communication with City staff and Contractor. This includes scheduling and conducting the various design meetings and workshops listed above through design.
- ❖ Written and timely requests for information.
- ❖ Regular project meetings with City staff, Contractor, and other entities as determined necessary and preparation of meeting minutes. Some of the meetings

and plan review will include City Operations and Maintenance staff, the Contractor, inspection and construction management consultants.

- ❖ Monthly billing with appropriate summary of work performed and cost allocation by task, project percent complete and earned value table, narrative of tasks to be completed, remaining budget, and schedule updates.
- ❖ Routine auditing of the data sharing platform to ensure the files are updated and properly archived.

Unanticipated Project Management and Coordination – This Task includes budget for unanticipated Project Management and Coordination services. An unanticipated budget equivalent to 5% of the Project Management and

CITY OF ROSEVILLE

Scope of Work for Downtown Water Mains Replacement Project – Hillcrest Neighborhood

Coordination Scope has been included in the cost proposal. If the City determines that additional scope of work, (which was unanticipated) is required to be done by the consultant, the consultant shall proceed only after authorization is received by the City's Project Manager.

Task 2 – 60% Design Services

Task 2a – Optional Surveying Services

Upon receiving Notice to Proceed (NTP) and the City's authorization, D&A would coordinate with Vertical Mapping to begin the process of obtaining an aerial topographic map that we suggest becomes the Project plan base mapping. As discussed in our project understanding, the use of the aerial topo map as the base maps provides the following advantages: 1) provides a defined datum and elevation that the City, Design Consultant, and the Contractor can all make reference, 2) provides 1-foot contours over the entire project area allowing accurate surface profiles be established that would accurately reflect utility depths, and 3) improves the accuracy of data presented in the DDW waiver request.

As discussed below, optional ground survey and utility investigation using ground penetrating radar (GPR) may be necessary as the design progresses and informational needs are identified. D&A will coordinate these optional service needs with the City and proceed upon receiving the City's authorization.

Task 2b – Initial Project Workshop

Upon receiving NTP, D&A would review the City's available project and utility data and conduct the Initial Project Workshop. The intent of this workshop are the following: establish lines of communication; establish the data sharing organization structure and define protocols; review and discuss the City's available information and identify other informational needs; discuss design criteria to be implemented in the 60% plans; discuss the City's pavement

project status and schedule; discuss permitting approaches and schedules; and discuss the content and development of the 100% specifications (e.g. front-ends, special provisions, and technical).

Task 2c – Design Plan Preparation

Taking the information gathered from the Initial Project Workshop, D&A will begin organizing and assessing feasible pipe alignments within the Project area. We will also show on the base maps any potential staging areas identified by the City staff. The City has identified having limited right-of-way and property information in one portion of the project (Hillcrest Ave and Marietti Way). In order to ensure that the improvements are within existing right-of-way or determine easement needs, D&A has budgeted for obtaining title reports for the two properties in question. Our surveyor will assist with the right-of-way analysis.

Assuming aerial topo mapping is not authorized, D&A will develop preliminary 60% plans based on the City provided AutoCAD base maps and GIS data. D&A will overlay all available parcel, right-of-way, and City's available utility and GIS data (horizontal and vertical) onto these base maps. We are anticipating that accurate ground surfaces cannot be developed from the City's base maps. In the procurement documents we will require that the Contractor survey street centerline elevations when potholing for the 100% design effort. As discussed more in Task 4, the plans and ultimately the profiles will be refined based on the utility pothole information obtained and surveyed by the Contractor.

D&A will show the preliminary 60% pipe alignments on the base maps, and then schedule a design site walk with the City Representative(s) to evaluate the proposed alignments relative to the City's utility information and right-of-way lines shown as compared to the actual field conditions. The site walk will allow the design

CITY OF ROSEVILLE

Scope of Work for Downtown Water Mains Replacement Project – Hillcrest Neighborhood

team an opportunity to verify and/or collect additional field information (e.g. field measurements, drain inlet depth, etc.), review the proposed alignment with the City and obtain feedback on the City's preferences as they relate to the water main and road restoration projects. In addition to the above, the site walk will identify other informational needs (e.g. identify additional design pothole needs or ground survey and/or GPR locations) that would enhance the 60% design plans. Relevant information and input gathered from the design site walk will be incorporated into the Final 60% Design plans.

With the 60% plans, D&A proposes to develop specific localized profiles targeted at storm and sewer crossing. Ultimately these profiles will be expanded during the 100% design to show the entire pipeline and all other utility crossings. The crossing profiles will be developed using available City sewer and storm drain GIS systems data, and serve two initial benefits: 1) provide the contractor a better understanding of the specific sewer and stormwater crossing they will encounter and 2) the profiles would be presented in the DDW waiver packet to illustrate the proposed separation from non-potable water utilities. As discussed in Task 5, D&A recommends submitting the DDW waiver at the 60% design phase to help maintain the overall project schedule and avoid potential delays transitioning between 100% design and construction.

Concurrent with developing the 60% plans, D&A will develop the 100% project specifications. These specifications will incorporate the City's road restoration project specifications (prepared by the City). Project Special Provisions will reflect all conditions stipulated in the City's draft Design-Assist and Construction RFP. D&A anticipates the City's front-end specifications (Division 0) would be received at the kick-off meeting. D&A will develop both the Division 1 and Division 2 technical specifications. A list of proposed technical specifications will be

provided to the City prior to the kick-off meeting for their review and comment. If the City has Division 1 technical specifications they prefer, D&A will modify those to reflect both the water main replacement project and the road restoration project. Division 2 technical specifications will be developed based on D&A's past water main project experience and City Standards. The road restoration Division 2 technical specifications will be prepared and provided by the City and incorporated into the overall Project specifications. D&A anticipates that the development of the 100% specifications will be a result of coordination between D&A and City staff.

D&A will conduct a thorough internal QA/QC of the final 60% plans and the 100% specifications prior to formally submitting them to the City for final review and comment. This submittal will also be accompanied by the engineer's opinion of probable construction cost. Once the City completes their formal review, D&A will catalog all comments and provided written response that will be reviewed with the City during a final 60% design workshop. This workshop would solidify the design's direction and initiate the Contractor procurement process.

2d – Corrosion Evaluation

Based on the recent geotechnical report provided in the RFP addenda, lab results show potential for aggressive soils in one of the samples taken. Therefore, D&A is adding JDH Corrosion Consultants, Inc. to our team to evaluate the corrosion potential of the soils by use of "over the line" soils resistivity testing throughout our project area. A report will be provided describing the corrosivity of the soils relative to our pipeline materials and will provide recommendations for protective measures if needed.

Unanticipated 60% Design – This Task includes budget for unanticipated 60% Design services. An unanticipated budget equivalent to 10% of the

CITY OF ROSEVILLE

Scope of Work for Downtown Water Mains Replacement Project – Hillcrest Neighborhood

60% Design Scope has been included in the cost proposal. If the City determines that additional scope of work, (which was unanticipated) is required to be done by the consultant, the consultant shall proceed only after authorization is received by the City's Project Manager.

Task 3 – Procurement Support

D&A has recent project experience in assisting agencies in the review and negotiations related to contractor qualification-based proposals and contracts. We will review the City's draft Design-Assist and Construction RFP and provide written comments and suggestions felt beneficial to better align the Contractor selection process with the Project plans and specification and general Project scope. One initial recommendation would be to include a potholing sequence that would correlate with D&A's proposed 100% design phased approach discussed in Task 4. We anticipate the development of the procurement document and review will result in multiple phone and/or email exchanges, and a finalization workshop with the City before the procurement document is finalized and the procurement package is released for proposals.

D&A will work with the City to determine the criteria for contractor selection based on the RFP requirements. A decision matrix will be developed to aid in the selection process.

During the solicitation period, D&A will support the City by participating in the pre-proposal meeting and preparing addendum that will include responses to Contractor questions, design clarifications and any design revisions. Upon the City opening the contractor proposal, D&A will be available to work with the City's contractor selection committee to review the proposals and provide recommendations on Contractor selection.

Unanticipated Procurement Support Services - This Task includes budget for unanticipated Procurement Support services. An unanticipated

budget equivalent to 5% of the Procurement Support Scope has been included in the cost proposal. If the City determines that additional scope of work, (which was unanticipated) is required to be done by the consultant, the consultant shall proceed only after authorization is received by the City's Project Manager.

Task 4 – 100% Design Services

Once the City selects a Contractor and has issued them NTP, D&A will closely coordinate with the City and the Contractor. We propose conducting a design/construction workshop to conduct introductions, begin developing a working relationship, lay the groundwork for working through design and into construction. At this meeting, D&A will review our 100% design phase approach and revisit the pothole sequence defined in the procurement document. Based on the City's proposed schedule, the 100% plan design and construction activities overlap by approximately 3-months. Therefore, D&A proposes phasing the 100% design. The exact number of phases and how each is defined will be outlined during the 60% design.

The design/construction workshop will allow all parties to make suggestions to improve the efficiency of phasing the 100% designs, sequencing the pothole effort to best coordinate design efforts with construction schedules, and help streamline the construction activities. The phased approach will allow construction work to begin while pothole data is collected, and the data incorporated into its respective design phase. Furthermore, this will allow alignment revisions to be made and DDW waiver amendments processed if necessary.

Based on the City Standard, the new ductile iron or PVC pipe will reflect a minimum 48-inches of cover. The profile will also show defined restraint lengths, fittings (e.g. tee and bends), joint deflections, valves, air vents and blow offs, fire hydrants, and utility crossings including callouts specific to DDW constraints.

CITY OF ROSEVILLE

Scope of Work for Downtown Water Mains Replacement Project – Hillcrest Neighborhood

As each 100% design phase nears completion, D&A will schedule a constructability walk with the City and the Contractor to review the design's constructability and to identify and mitigate as many foreseeable conflicts before construction. The information gathered from the constructability walk will be incorporated into the final 100% plans reviewed once again by the City and the Contractor and then issued by the City to the Contractor for construction upon completing any contract negotiations. We have included contract negotiation support under Task 6.

Unanticipated 100% Design Services – This Task includes budget for unanticipated 100% Design services. An unanticipated budget equivalent to 5% of the 100% Design Scope has been included in the cost proposal. If the City determines that additional scope of work, (which was unanticipated) is required to be done by the consultant, the consultant shall proceed only after authorization is received by the City's Project Manager.

Task 5 – Permit Assistance

D&A concurs with the City that the normal encroachment permit process will not be required and that the Project will be categorically exempt from the CEQA process. The basis of our permitting assistance effort will be to prepare the State Water Resources Control Board – Division of Drinking Water (DDW) waiver packet and prepare a Storm Water Pollution Prevention Plan (SWPPP).

As mentioned previously, D&A recommends preparing and submitting the Division of Drinking Water (DDW) waiver packet upon completing the 60% design. This will help maintain the overall project schedule and allow the Contractor to begin pipe installation at locations where the DDW waiver does not apply. As utility information becomes available during the Contractor's potholing efforts, D&A will review the pothole data and make the

determination on whether a waiver amendment is necessary or an in-field pipe adjustment at the crossed/paralleled non-potable utility can be made. If necessary, D&A will revise the pipe alignment to comply with the DDW regulations. In either event, D&A assumes the City's inspector(s) or other staff will document (measure and photograph) all non-potable pipe crossings and parallel pipe locations subject to the DDW waiver. During the project closeout, D&A will coordinate with the City inspector(s) and prepare the final DDW waiver closeout documentation verifying to DDW that all crossings and parallel pipe were installed in compliance with DDW regulations. D&A will coordinate with the City and the Contractor throughout the 100% design and construction phase to ensure all DDW concerns are promptly addressed to avoid potential in-field delays.

Task 5a – Storm Water Pollution and Prevention Plan (SWPPP) Development

We anticipate a SWPPP will be necessary, therefore D&A has included services to prepare a SWPPP and assist the City in administering the SWPPP through the State SMARTs system. D&A QSD/P's have relevant experience developing and assisting agencies through the State SMARTs system. The SWPPP will be developed using the 60% plans. Amendments to the SWPPP will be made to reflect the finalized 100% plans and filed with the State as the project progresses.

Unanticipated Permit Assistance Services – This Task includes budget for unanticipated Permit Assistance services. An unanticipated budget equivalent to 10% of the Permit Assistance Scope has been included in the cost proposal. If the City determines that additional scope of work, (which was unanticipated) is required to be done by the consultant, the consultant shall proceed only after authorization is received by the City's Project Manager.

CITY OF ROSEVILLE

Scope of Work for Downtown Water Mains Replacement Project – Hillcrest Neighborhood

Task 6 – Engineering Services During Construction

D&A will provide typical engineering services during construction (ESDC) that will include at a minimum attendance at construction progress meetings; plan revisions and design clarifications collaborated with the Contractor; shop drawing submittal reviews; response to requests for information; change order review and negotiation support; site reviews as needed; and record drawings development based on City approved field “as-built” drawings.

We recognize that the Design-Assist approach will require a higher level of communication and collaboration with the City and the Contractor. In addition to budgeting twenty-four (24) hours for field visits for constructability evaluation and/or verification of site conditions, D&A has also budgeted for participating in fourteen (14) construction meetings and supporting the City during contract negotiations with the Contractor.

At the completion of construction, D&A will review each phase’s as-built plans with the City inspector and Contractor prior to developing a set of draft record drawings of that phase. The draft record drawings will be compiled into a single Project Record Drawing set and submitted to the City for formal review and comment. D&A will review those comments with the City and incorporate them into the Final Project Record Drawing set.

Unanticipated Engineering Services During Construction – This Task includes budget for unanticipated Engineering Services During Construction. An unanticipated budget equivalent to 10% of the Engineering Services During Construction Scope has been included in the cost proposal. If the City determines that additional scope of work, (which was unanticipated) is required to be done by the consultant, the consultant shall proceed only after authorization is received by the City’s Project Manager.

Project Deliverables

The following is a list of deliverables for the scope tasks described above.

Task 1 Project Management & Coordination Deliverables:

- *Monthly invoices with progress report and schedule updates*
- *Schedule and conduct Initial Project Workshop (1) and technical review meeting (6) and prepare meeting minutes and action items list for all meetings.*
- *Participate in contract negotiations meetings between the City and Contractor regarding cost adjustment based on the development of the 100% plans. Provide written evaluations of the Contractor justification for cost adjustments and recommendation to the City for accepting the requested changes.*

Task 2 60% Design Deliverables:

- *Draft 60% Plans (PDF; three (3) 11x17 hard copies)*
- *Final 60% Plans (PDF format)*
- *Final 100% Specifications (PDF, Word)*
- *Corrosion Evaluation Report (PDF, Word)*

Task 3 Procurement Support Deliverable:

- *Written comments to the City’s draft Design-Assist and Construction RFP*
- *Participate in the pre-proposal meeting*
- *Addendum (2) preparation support including response to Contractor RFIs and design clarifications*

Task 4 100% Design Deliverable:

- *100% designs by phase (PDF, two full-size 22x34, four half-size 11x17 prints)*

Task 5 Permit Assistance Deliverable:

- *Develop DDW waiver package for City approval and filing with the State*

CITY OF ROSEVILLE

Scope of Work for Downtown Water Mains Replacement Project – Hillcrest Neighborhood

- *Prepare DDWA waiver amendments (as needed)*
- *Develop a Storm Water Pollution Prevention Plan and SMARTs Filing*

Task 6 Services During Construction Deliverables:

- *Participation at construction progress meetings (Assume fourteen 1-hour weekly meetings between April – October 2021)*
- *Submittal review and response*
- *Response to RFI questions*
- *Design revisions during construction as needed*
- *Prepare Final Project Record Drawings (AutoCAD files, Hard Copies: One full size (22x34), One half size (11x17))*

Project Schedule

The following schedule provides an outline of our anticipated task timelines. The schedule will be updated as needed.

ORDINANCE NO. 6214

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE
AUTHORIZING CERTAIN AMENDMENTS TO THE FISCAL YEAR 2019-20
BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY
EFFECTIVE AS AN APPROPRIATION MEASURE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. The City of Roseville Annual Budget, Fiscal Year 2019-20, is hereby amended by transferring appropriation to and from the activities indicated below:

Appropriate funds for the Downtown Water Mains Replacement Project – Hillcrest Neighborhood, per request of the Public Works Department, as listed on the attached Request for Budget Adjustment in the amount of \$1,533,248.

SECTION 2. This ordinance is hereby declared to be an appropriation measure, immediately effective pursuant to the provisions of Section 5.03 of the Charter.

SECTION 3. The City Clerk is hereby authorized and directed to post a true copy of the foregoing ordinance in each of three (3) conspicuous locations in the City and she shall immediately after such posting enter in the ordinance book, under the record of the ordinance, a certificate under her hand stating the time and place of such publication by posting.

Justification for Budget Adjustment:

The Downtown Water Mains Rehabilitation effort was initiated as an operating cost center in FY2020 (74161) in the Water Rehabilitation Fund (6130). In order to facilitate project expense tracking, this adjustment moves the remaining budget into a new multi-year project (500094). This is not an increase in appropriations and there is no net effect on the available resources in the Water Rehabilitation Fund. This cost center can then be closed at the end of FY2020.

COUNCIL COMMUNICATION

CC #: 0748
File #: 0900-02

Title: West Side Tanks and Pump Station Project - Design-Assist Construction Agreement and Budget Adjustment
Contact: Janice R. Gainey 916-774-5535 jrgainey@roseville.ca.us

Meeting Date: 5/6/2020
Item #: 6.29.

RECOMMENDATION TO COUNCIL

Staff recommends that City Council:

- 1) Approve the Design-Assist and Construction Agreement for the West Side Tank and Pump Station Project with Auburn Constructors, LLC in the amount of \$23,481,300. (Exhibit A) and adopt a resolution authorizing the City Manager to execute the attached Design-Assist and Construction agreement for the project.
- 2) Authorize the Environmental Utilities Director or his designee to approve and pay for contract change orders for this project that could increase the contract amount by no more than 10% (\$2,348,130) or not to exceed a total contract amount of \$25,829,430.
- 3) Adopt an ordinance to approve a budget adjustment of \$4,284,886 from available resources in the Water Construction Fund to fully fund the project.

BACKGROUND

Projected population growth in the western portion of the City requires additional potable water storage and distribution facilities be constructed to support increased water demand. The five-acre West Side Tank and Pump Station site is located adjacent to the Pleasant Grove Wastewater Treatment Plant and is identified in the West Roseville Specific Plan as the location for potable water storage reservoirs and associated pumping facilities.

In 2005, Council adopted a capital improvement project to construct the above listed facilities. A Preliminary Design Report (PDR) was completed in 2007 and construction documents were completed in 2008. Prior to bidding the project, the Environmental Utilities Department (EU) made a decision to put the project on hold due to the slowdown in residential and commercial growth.

With the City's growth patterns on the rise, EU resumed work on the project in 2015 with an updated PDR. Phase 1, which included some site work to remove unsuitable soils which was completed in 2017, and in 2019, Phase 2 commenced with award of a Professional Design Services Agreement to Water Works Engineers to complete the engineering design of the

facilities.

In November 2019, a RFP for Design-Assist Construction of the facilities was published. On January 30, 2020, four construction firms submitted proposals to the City Clerk's office for review and consideration. Based upon review of the proposals by EU's Proposal Evaluation Committee, the proposal of Auburn Constructors, LLC., was identified as providing the best value to the City and was ranked the highest based on the evaluation criteria outlined in the RFP. Staff therefore recommends that the contract be awarded Auburn Constructors, LLC.

This project supports the City's Strategic Plan Goal F - Invest in Well-Planned Infrastructure and Growth by reinvesting in aging infrastructure.

FISCAL IMPACT

This project has a remaining budget of \$22,028,384 and will require an additional \$4,284,886 from available resources in the Water Construction Fund for a total project budget of \$26,313,270, to cover the not-to-exceed contract amount of \$25,829,430 and the staff time costs of \$483,840.

ENVIRONMENTAL REVIEW

Development of the West Side Tank and Pump Station Phase 2 Project was previously evaluated in the Amoruso Ranch Specific Plan Environmental Impact Report (EIR) (SCH No. 2008032115), certified June 15, 2016. Construction of the West Side Tank and Pump Station Phase 2 project is within the scope of the project covered by the Amoruso Ranch Specific Plan Final EIR. The EIR provides environmental analyses of community infrastructure and facilities, including specifically addressing potable water storage and potable water storage tank location on the West Side Tank and Pump Station project site. Because the project is consistent with the Amoruso Ranch Specific Plan Final EIR, no new effects would be expected to occur and all applicable mitigation measures from the Amoruso Specific Plan EIR will be implemented during the design and construction of the project. As the proposed project meets the requirements identified in Section 15183 of the State CEQA Guidelines, no additional CEQA review is required.

Respectfully Submitted,

Janice R. Gainey, Senior Engineer

Richard D. Plecker, Environmental Utilities Director

West Side Tanks and Pump Station Budget Adjustment

RESOLUTION NO. 20-140

APPROVING AN AGREEMENT FOR THE DESIGN-ASSIST AND CONSTRUCTION OF
THE WEST SIDE TANKS AND PUMP STATION PROJECT, BY AND BETWEEN
AUBURN CONSTRUCTORS, LLC AND THE CITY OF ROSEVILLE, AND AUTHORIZING
THE CITY MANAGER TO EXECUTE IT ON BEHALF OF
THE CITY OF ROSEVILLE

WHEREAS, an agreement for the design-assist and construction of the West Side Tanks and Pump Station project, by and between Auburn Constructors, LLC and the City of Roseville, has been reviewed by the City Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said agreement is hereby approved.

BE IT FURTHER RESOLVED that the Environmental Utilities Director or his designee is authorized to approve change orders for the project, consistent with the contract terms, provided that the net cost of all change orders shall not exceed ten percent (10%) of the contract price.

REQUEST FOR PROPOSALS (RFP)

INCLUDING:
Proposal Selection Process, Instructions,
Requirements and Forms

DUE: January 30, 2020 3:00 PM

DELIVER TO:
City of Roseville
Attn: City Clerk Department
311 Vernon Street
Roseville, CA 95678

(This Page Intentionally Left Blank)

CITY OF ROSEVILLE
NOTICE FOR PROPOSALS
FOR DESIGN-ASSIST AND CONSTRUCTION OF
WEST SIDE TANKS AND PUMP STATION PROJECT

NOTICE IS HEREBY GIVEN that proposals for Design-Assist and Construction of the **West Side Tanks and Pump Station Project** will be received by the City of Roseville. Proposals will be accepted **ONLY** at the office of the **City Clerk, Civic Center, 311 Vernon Street, Roseville, CA, 95678**, until 3:00 p.m., **January 30, 2020**.

A Mandatory Pre-Proposal Meeting and Site Walk to discuss the Project will be held at 10:00 a.m., local time, DECEMBER, 11, 2019 at the Pleasant Grove Wastewater Treatment Plant, 5051 Westpark Drive, Roseville, CA 95747. Attendance (in-person) is mandatory and will disqualify a Proposer from the Proposal process if not attended. Virtual/or conference call-in shall not qualify as attendance. A sign-in sheet will be available up until commencement of the pre-proposal meeting only. Attendance by subcontractors is not mandatory, but all interested prospective subcontractors are encouraged to attend.

Said Proposals will be evaluated and results will be made public after completion of the negotiation process with the selected contractor. The City reserves the right to reject any or all Proposals and to waive any informalities or irregularities in any Proposal or in the proposal process.

Date

Janice Gainey, Senior Engineer,
Environmental Utilities

(This Page Intentionally Left Blank)

IMPORTANT!!!

The City is not responsible for misdelivered Proposals, and the Proposer is strictly liable for its chosen method of delivery. It is the Proposer's sole responsibility to make sure that Proposals arrive at the proper location. Any Proposal which does not actually arrive in the City Clerk's Office by the RFP due date and time will be rejected as non-responsive, even if properly addressed or delivered to another City Department.

Your Proposal **MUST** be addressed and delivered as follows:

**City of Roseville
Attn: City Clerk Department
311 Vernon Street
Roseville, CA 95678**

The Proposer is also directed to include the attached "Sealed Proposal" label on the outside of the package or envelope so that it is visible when delivered to the City. See Attachment 17 for "Sealed Proposal" label.

City of Roseville RFP

PREVAILING WAGE NOTIFICATION

This is a prevailing wage project. Accordingly, all prevailing wage and fair employment laws and regulations shall be adhered to. For prevailing wage contracts over \$25,000.00, copies of certified payroll must be submitted with invoices. Prevailing wage rates may be obtained from the Department of Industrial Relations and/or the following website address:

<http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm>

City of Roseville RFP

DEPARTMENT OF INDUSTRIAL RELATIONS CONTRACTOR REGISTRATION NOTIFICATION

No contractor or subcontractor may be listed on a Proposal for or work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. The Contractor shall provide proof of current registration with the Department of Industrial Relations for both itself and all listed subcontractors with their Proposal. The Contractor is hereby notified that this Project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

WEST SIDE TANKS AND PUMP STATION PROJECT

VOLUME 1: REQUEST FOR PROPOSALS

1.0 INTRODUCTION

The City of Roseville (hereinafter “City”), is soliciting Proposals for the West Side Tanks and Pump Station Project (WST-PS). This will be a competitive negotiation process. Qualified individuals, firms, contractors, consultants or entities (hereinafter “Contractors” or “Proposers”), that meet the requirements set forth in this Request for Proposals (hereinafter “RFP”) and are capable of providing the services requested are encouraged to participate.

1.1 CITY OVERVIEW

The City of Roseville is an incorporated city with a population of more than 122,000 residents, located in Placer County off of Interstate 80, approximately 16 miles northeast of Sacramento, California. The City of Roseville is a Charter city operating under the City Council/City Manager form of government.

1.2 BACKGROUND

Projected growth for the western portion of the City’s service area requires additional water distribution facilities to be constructed to support water supply to the new developments within the City’s Pressure Zone 4 (PZ4) service area. Storage reservoirs and associated pumping facilities were identified as infrastructure required to service these new developments within the City’s West Roseville Specific Plan Area, as well as new growth areas that have been (and future growth areas that will be) incorporated into the City’s service area.

In 2005, the City initiated a project to construct these facilities. Preliminary Design Report (PDR) was completed in 2007, construction documents for the reservoirs and pumping station facilities, were completed in 2008. Prior to bidding the project, the City made a decision to put the project on hold, due to the slowdown in residential and commercial growth. In 2015 with growth patterns on the rise, the City’s Environmental Utilities Department (EUD) resumed work on the project. A review and update to the PDR was conducted resulting in changes due to new codes, recommendations on project phasing and options for moving the project into construction.

Phase 1 - Site Grading Improvements (Completed)

Geotechnical investigation conducted in 2007 revealed that some portions of the site had soils that were unsuitable for construction of facilities such as buildings, storage tanks, and paving. Phase 1 completed initial excavation to remove unsuitable soils from the site and initial site grading.

Phase 2 – Engineering Design (Ongoing)

Phase 2 Engineering Design of the facilities identified in the PDR and updated PDR was completed by Water Works Engineers and the City’s Environmental Utilities Department.

Phase 2 – Construction (scope of this RFP)

A Design-assist contracting agreement is being used to construct the West Side Tank and Pump Station Project (Project) which includes, but is not limited to, Construction of two (2) new six (6) million gallon pre-stressed concrete water storage tanks, a new concrete masonry unit (CMU) block Booster Pump Station building and equipment, hydropneumatic tank, site grading and

paving, storm water treatment basins, tank valve vault, electrical site work, 1,500 kW standby diesel generator and fuel tank, Electrical switchgear, Instrumentation and Controls, Contractor Design-Assist Responsibilities, and other structural, mechanical and electrical ancillary systems. Reference Section 5-Scope of Services.

The City has retained the services of Water Works Engineers (Architect/Engineer) to provide design services, engineering services during construction, and construction management services for this project.

Due to the public impact, visibility, complexity, and critical importance of this Project, the City will use a competitive, best value process for procurement of the services and work required to complete the construction of the Project. The Design-Assist Guaranteed Maximum Price (GMP) with shared savings contract delivery method, will be used for the WST-PS project's delivery. Contractor selection will be conducted utilizing this Request for Proposal (RFP) procurement and a best value evaluation, followed by the City's Contract award process.

- All Prospective Proposers should determine if they meet minimum qualifications before submitting a Design-Assist Proposal. Refer to Section 5 of this RFP for minimum contractor qualification requirements.
- The estimated construction value of the Project is between \$21,000,000 and \$23,000,000.
- The City intends to achieve Final Completion of this Project by September 2022.

1.3 KEY ACTION DATES

The following represents the tentative schedule for this RFP. Any change in the scheduled dates for the Pre-Proposal Conference, Deadline for Final Questions, or Proposal Submission Deadline will be advertised in the form of an addendum to this RFP. The schedule for the evaluation process and other future dates may be adjusted without notice.

Table 1: Key Action Dates

Event	Date
RFP Released by the City	11/15/19
Pre-Proposal Conference or Job Walk	12/11/19
Deadline for Final Questions	1/13/20
City Responses to Written Questions	1/24/20
Proposal Submission Deadline	1/30/20
Submit Key Subcontractor Information by*	2/06/20
Anticipated Contractor Interviews as needed	2/25/20
Anticipated Contract Negotiations	02/26/20-03/20/20
Anticipated Contract Approval by City Council	05/06/20
Anticipated Notice to Proceed	05/13/20
Anticipated Final Completion	09/25/22

*Key Subcontractor Information (those subs with $\geq 5\%$ of GMP): within five (5) business days of Proposal due date. Tab E provides definition of "Major" and "Key" subcontractors and requirements of proposal submittals for these subcontractors.

2.0 AVAILABLE INFORMATION

2.1 EXAMINATION OF CONTRACT DOCUMENTS

The Contract Documents consist of:

- VOLUME 1 – Request of Proposals (this document) and all of the required forms and attachments.
- VOLUME 2 – Agreement
- VOLUME 3 – Technical Specifications
- VOLUME 4 – Drawings

Any Proposer planning to submit a Proposal is responsible for examining with appropriate care the complete Contract Documents and all Addenda, and is also responsible for informing itself with respect to all conditions, which might in any way affect the cost or the performance of the Work. Failure to do so will be at the sole risk of the Proposer, and no relief shall be given for errors or omissions by the Proposer. The submission of a Proposal shall constitute an acknowledgment upon which City shall rely on as a confirmation that the Proposer has thoroughly examined and is familiar with the Contract Documents and that the Proposer has waived any objections or contentions regarding the Contract Documents and/or the Proposal submission requirements. The failure or neglect of a Proposer to receive or examine any of the Contract Documents shall in no way relieve it from any obligation with respect to its Proposal or to the Agreement. No claim for additional compensation will be allowed which is based upon a lack of knowledge of any Contract Documents.

2.2 SUPPLEMENTAL INFORMATION AVAILABLE TO PROPOSERS

Geotechnical Report

A subsurface investigation has been conducted at the site of the Work. The subsurface investigation and geotechnical report(s) were developed for planning and design purposes only, and as such may not include necessary information for, any or all, construction related activities including, but not limited to, excavations, sheeting, shoring, bracing, boring and dewatering. The Contractor may not make claim against City or any of City's Consultants with respect to the completeness of this investigation and geotechnical report(s) for Contractor's purposes with respect to the means, methods, techniques, sequences and procedures employed by Contractor, and safety precautions and programs incident thereto.

The resulting geotechnical report with the records of borings made at the Project site is titled: Geotechnical Report for West Side Tank & Pump Station Project Phase 2, Roseville, California dated January 9, 2019 prepared by Bajada Geosciences, Inc.

An electronic copy of the geotechnical report will be posted on the City of Roseville's Public Purchase website at: <https://www.publicpurchase.com/>. This geotechnical report is not part of the Contract Documents and is made available solely for the convenience of the Proposer and Contractor.

It is expressly understood and agreed by Proposer that neither the City nor the Engineer assume any responsibility whatsoever with respect to the sufficiency or accuracy of the investigations thus made, the records thereof, or of the interpretation set forth therein or made by the Engineer in their use thereof and there is no representation, warranty or guarantee, either express or implied, that the conditions indicated by such investigations or records thereof are correct or representative of those existing throughout such areas or any part thereof, or that unanticipated developments may not occur or that materials other than, or in proportions different from, those indicated may not be encountered.

When a log of test borings showing a record of the data obtained by the Engineer's investigation of the subsurface conditions is made available to the Proposers and Contractor, it is expressly understood and agreed by Proposers and Contractor that said log of test borings does not constitute a part of the Contract Documents, represents only the opinion of the Engineer as to the character of the materials encountered in the test borings, is made available only for the convenience of Proposers, and its use is subject to all of the conditions and limitations set forth in this RFP. Water levels that may be shown on a log of test borings are valid only for the stated date of observation. The water level may change from season to season and from year to year.

The City disclaims responsibility for the Proposer's or Contractor's interpretation of data, such as, projecting or extrapolating from the test holes to other locations on the site of the Work, soil bearing values and profiles, and soil stability, as well as the presence, level, and extent of underground water for subsurface conditions during construction operations.

Information and data reflected in the Contract Documents with respect to Underground Facilities at or contiguous to the Site are based upon information and data furnished to Engineer by the City of such Underground Facilities or others, and City and Engineer disclaim responsibility for the accuracy or completeness thereof, unless it is expressly provided otherwise in the Contract Documents.

Storm Water Pollution Prevention Plan

As part of the water pollution control work, a Storm Water Pollution Prevention Plan (SWPPP) is required for this Contract. A Preliminary SWPPP has been prepared and will be posted on the City of Roseville's Public Purchase website at: <https://www.publicpurchase.com/>. This initial SWPPP is not part of the Contract Documents and is made available solely for the convenience of the Proposer and Contractor. The contractor will be required to revise and finalize the SWPPP as needed to comply with Construction General Permit Requirements and all other pertinent laws, rules, and regulations. Only a Qualified SWPPP Developer (QSD) is allowed to revise or amend the SWPPP. All revisions and Amendments must be accepted by the Legally Responsible Person (LRP).

2.3 INSPECTION OF PROJECT SITE AND PRE-PROPOSAL ACCESS TO THE SITE

In addition to examination of the Contract Documents, each Proposer shall become fully informed regarding all existing and expected conditions and matters, which could affect any Work or performance of any Work.

Prior to submitting a Proposal, it is the Proposer's responsibility to investigate the nature and location of Work and the general and local conditions, and particularly, but without limitation, with respect to the following: those affecting transportation, access, disposal, handling, haul route, and onsite and offsite storage of materials; water, and electric power; availability and condition of roads; climatic conditions and seasons; physical conditions at the Site, work area(s)

available as outlined in the Drawings, impact to the residents, stakeholders, and the Project areas as a whole; equipment and facilities needed preliminary to and during performance of the Work; and all other matters that can in any way affect performance of the Work. The failure of the Proposer to acquaint itself with any applicable condition will not relieve it from the responsibility for properly estimating either the difficulties or the costs of successfully performing the Work.

Any failure to fully investigate the Site or the foregoing conditions shall not relieve the Proposer from responsibility by estimating properly the difficulty or cost of successfully performing any Work. Neither City nor any of the City's representatives or agents assumes any responsibility for any verbal representation regarding all existing and excepted Site conditions.

Proposers seeking to conduct any additional invasive examination of the Site, such as potholing, must request Site access from the City in writing at least three (3) business days in advance. Requests should be emailed to the City's representative, Janice Gainey at JRGainey@roseville.ca.us. The location of any invasive testing will be subject to approval on behalf of the City and any other agencies with jurisdiction over such testing. Proposers may not conduct tests at the Project Site prior to obtaining City approval. Additionally, any such Proposer must execute a City furnished Access, Indemnity and Release Agreement and provide an insurance certificate as described therein by noon of the day prior to Proposer's approved Site visit. Once approved testing is complete, the Proposer must fill all trenches or holes, restore all pavement to match existing structural section, and otherwise clean up and restore the test site to its pre-test condition.

Proposers who intend only to observe site conditions and not conduct such examinations are not required to provide an executed Access, Indemnity and Release Agreement or insurance information. However, these Proposers must request Site access from the City in writing at least three (3) business days in advance.

If, during the course of its Site inspection, a Proposer finds conditions which appear to be in conflict with the Contract Documents, the Proposer may apply to City, in writing, for additional information and explanation and shall follow time guidelines as outlined in the Key Action Dates in Table 1. Questions shall be submitted no later than the last day to ask questions before the time specified for receiving the Proposals.

Submission of a Proposal by the Contractor shall constitute conclusive evidence that, if awarded the Agreement, the Contractor has relied upon and is relying on its own examination of (1) the Site of the Work, (2) access to the Site, (3) all other data and matters requisite to the fulfillment of the Work and on the Contractor's own knowledge of existing facilities on and in the vicinity of the Site of the Work to be constructed under the Agreement, (4) the conditions to be encountered, (5) the character, quality and scope of the proposed Work, (6) the quality and quantity of the materials to be furnished, and (7) the requirements of Contract Documents, and other related information made available to Proposers by the City. Any related information provided by the City is not intended to be a substitute for, or a supplement to the independent verification by the Proposer to the extent such independent investigation of site conditions is deemed necessary or desirable by the Proposer.

3.0 INSTRUCTIONS TO PROPOSERS

This RFP includes a description of the scope of services, Proposal requirements, and instructions for submitting your Proposal. Failure to follow these instructions may result in rejection of your Proposal.

3.1 Overview of Proposal Process

- ☐ Attend Mandatory Pre-Proposal Conference (Section 4).
- ☐ Evaluate Minimum Contractor Qualification Requirements (Section 6).
- ☐ Study all RFP documents and supplemental Information (Proposer's Responsibility).
- ☐ Prepare Proposal Parts 1 and 2. (Section 7).
- ☐ Follow Proposal Submittal Instructions (Section 8) to submit by due date and time.
- ☐ Within five (5) business days after Proposal due date; submit reference materials for Key Subcontractors as described in Section 7.1 (Tab E).

3.2 Communications Regarding this RFP and Project

To protect the integrity of the procurement process, by shielding it from undue influences prior to the recommendation of Project award, there are strict prohibitions regarding communications between potential Proposers and the City. From the publication of this RFP until the time of City's publication of the Notice of Intent to Award the following rules will apply:

- City's Representative for this project is:

Janice Gainey, P.E.
Senior Engineer
City of Roseville Environmental Utilities-Engineering
2005 Hilltop Circle
Roseville, CA 95747
JRGainey@roseville.ca.us.

- No oral representations or interpretations will be made to any Proposer as to the meaning of this RFP.
- Do not contact any other CITY staff or departments in regard to this project. Information provided by anyone other than the above contact may be invalid and Proposals which are submitted in accordance with such information may be declared non-responsive.
- Other than contact with the City's Representative, communication (of any form) with any City staff including its consultants and City Council members and their staff, is prohibited.
- If the City determines that the communication prohibition rules have been violated, the City may use this as grounds for Proposal rejection. Direct all inquiries regarding this RFP in writing to either: <http://www.publicpurchase.com>, or JRGainey@roseville.ca.us.

3.3 Revisions to Request for Proposals

In the event that it becomes necessary to revise any part of this RFP, written addenda will be issued. Any amendment to this RFP is valid only if it is in writing and issued by the City department issuing the RFP. No oral interpretations or answers shall bind the City unless confirmed by the City in writing.

All addenda for this RFP will be distributed to Proposers who have registered with PublicPurchase.com and who have downloaded the RFP. **It is the Proposer's sole responsibility to monitor this website for possible addenda to this RFP.** Failure of Proposer to retrieve addenda from this site shall not relieve him/her of the requirements contained therein. Additionally, failure of Proposer to return a signed addendum, when required, may be cause for rejection of his/her Proposal.

3.4 Escrow Documents

The highest ranked Proposer shall submit one copy of all documentary information generated in preparation of its GMP for this project within five (5) business days after receipt of Notice of Intent to Award from City. This material is hereinafter referred to as Escrow Proposal Documents (EPDs). Reference Section 11.31 – Escrow Proposal Documents.

3.5 Classification of Subcontractors

This RFP and Agreement (Volume 2 of Contract Documents) incorporate the following definitions of classifications of subcontractors. Each classification has separate requirements for qualifications that must be included in the Proposal.

“Subcontractor-MAJOR”. Major subcontractors are defined as a subcontractor who will perform greater than or equal to twenty percent (20%) of the GMP.

“Subcontractor-KEY”. Key subcontractors are defined as a subcontractor who will perform greater than five percent (5%) of the GMP.

“Subcontractor-LISTED”. Listed subcontractors are defined as a subcontractor who will perform greater than one half percent (>0.5%) of the GMP.

4.0 MANDATORY PRE-PROPOSAL CONFERENCE AND JOB WALK

A **mandatory** pre-proposal conference/job walk has been scheduled for **10:00 a.m., DECEMBER 11, 2019** at:

Pleasant Grove Wastewater Treatment Plant
5051 West Park Drive
Roseville, California

A sign-in sheet will be available up until commencement of the pre-proposal conference meeting only. Proposals from Contractors who do not sign the sign-in sheet and attend the **mandatory** pre-proposal conference/job walk will be rejected. Attendance by subcontractors is not mandatory, but all interested prospective subcontractors are encouraged to attend. The pre-proposal conference/job walk will begin at the designated start time. Any Proposals received

from Contractors who did not sign the sign-in sheet and attend the meeting and project walk-through will be returned to them unopened.

Except for the mandatory conference/job walk, no other access to the project site will be granted prior to the proposal submission date without prior approval from the City. See Section 2.3- INSPECTION OF PROJECT SITE AND PRE-PROPOSAL ACCESS TO THE SITE.

Interested firms will have an opportunity to submit questions regarding the requirements outlined in this RFP. In order to make the meeting more effective for all participants, attendees should read this document thoroughly prior to the meeting.

Substantial clarifications or changes required as a result of the meeting will be issued in the form of a written addendum to the RFP. A list of attendees will be distributed upon request.

5.0 SCOPE OF SERVICES

The Contractor shall furnish all labor, equipment, materials, and services specified for the Design-Assist and Construction of the improvements at the West Side Tank and Pump Station site. The design plans and specifications comprise the technical portions of the Project and are included Volumes 3 and 4 of the Contract Documents. They are:

1. VOLUME 3 – Technical Specifications (Attachment 22)
2. VOLUME 4 – Drawings (Attachment 23)

Contractor shall refer to the Construction Documents for detailed requirements related to construction sequencing, submittals, site access requirements, construction of temporary facilities, safety requirements, warranty, testing, and demolition requirements.

Please note that “Construction” documents are a subset of the “Contract” documents that are listed in Section 2.1.

5.1 CONSTRUCTION

The scope of the construction work is summarized below (not including administrative tasks such as submittal preparation, startup, testing, etc.):

Water Storage Tanks

- Over excavation beneath tanks and installation of mechanical stabilized earth (MSE) foundation improvement system to provide suitable subgrade conditions for tank construction.
- Construction of two (2) 6.0 MG at-grade pre-stressed concrete water storage tanks with flat concrete roofs. Each tank will be identically sized at 170 ft. diameter with 40 ft. sidewall height.
- Installation of two access hatches, roof vent, interior and exterior access ladders, and electric davit cranes at each tank.
- Installation of leak detection system with PVC liner and perforated piping.
- Installation of wall drain piping.

- Installation of downspouts from roof of each tank for rainwater collection.
- Installation of hydrodynamic tank mixing system in each tank.
- Installation of internal and external overflow piping and supports at each tank.
- Installation of sump in floor of each tank with drain piping and valves.
- Installation of water sample station at each tank.

Tank Valve Vault

- Construction of new cast-in-place concrete valve vault with structural supports and grating.
- Installation of seven (7) butterfly valves and two (2) check valves associated with tank inlet and outlet. This piping and valve arrangement allow the two tanks to be operated in parallel, in series, or independently taken offline for maintenance.

Pump Station

- Construction of 2,537 sq. ft. Concrete Masonry Unity (CMU) block Booster Pump Station building to house booster pumps, sodium hypochlorite storage and feed system, and electrical and control equipment.
- Installation of architectural canopies over exterior electrical switchgear and valve vault.
- Installation of coiling overhead door for vehicle access into pump room.
- Installation of evaporative cooling for pump room and air conditioning for electrical room.
- Installation of trench drains for building drainage and small diameter pipe routing.
- Installation of roof hatches over all pumps with winch operated rigging to allow operators to open hatches from ground level.
- Construction of valve vault outside of building for suction-side pump isolation valves.
- Installation of four (4) 250 hp vertical turbine booster pumps (3 duty plus 1 standby) set in below-grade suction barrels. Each pump shall have a design capacity of 3,800 gpm at 170 ft TDH.
- Installation of 16-inch electronic control valve for tank filling and pressure relief.
- Installation of piping, pipe supports, valves and appurtenances associated with pumping system.
- Installation of sample pump for tank outlet chlorine residual analyzer.
- Installation of 500-gallon dual contained sodium hypochlorite storage tank.
- Installation of skid-mounted progressive cavity sodium hypochlorite metering pumping system.
- Installation of two (2) emergency eyewash and shower systems with tepid water system.
- Installation of 2,000-gallon bladder-style hydropneumatic tank and associated piping, pipe supports, valves and foundation.

Electrical

- Coordination with electric utility and installation of electric service to site including transformer, conduit and wiring.
- Installation of 1,500 kW standby diesel generator, dual-contained fuel tank, load bank and access stairs and platforms.
- Installation of exterior switchboard at Booster Pump Station.
- Installation of interior automatic transfer switch, distribution sections, panelboard, transformer, control panel and security panel in electrical room of Booster Pump Station.
- Installation of two (2) 250 hp variable frequency drives and two (2) 250 hp reduced voltage soft starters in electrical room of Booster Pump Station.
- Installation of light fixtures on and in the Booster Pump Station and light poles throughout the site.
- Installation of all conduit, wire, supports, pull boxes, etc. to support the new system.

Instrumentation and Controls

- Installation of programmable logic controller (PLC) and control panel to monitor and control the new system.
- Installation of level measurement devices, ladder and hatch intrusion switches and power supply to davit cranes at each water storage tank.
- Installation of level measurement devices in tank valve vault.
- Installation of free chlorine residual analyzers for tank inlet and outlet sampling.
- Installation of pressure transmitter on pump discharge header.
- Installation of bi-directional 24-inch magnetic flowmeter for tank fill and pump discharge flow measurement.
- Installation of site access and security system, including fiber optic network tied into Pleasant Grove WWTP Administration Building.
- Installation of miscellaneous instrumentation.

Miscellaneous Site Work

- Installation of valve vault to tie into existing water distribution system with new 30-inch piping.
- Installation of 30-inch tank fill, 42-inch tank outlet and miscellaneous yard piping, including sewer and storm drain manholes and catch basins.
- Site grading and construction of curbs, gutters and paving.
- Construction of lined bioretention basins for storm water treatment prior to discharge to existing storm drain system.
- Construction of CMU block wall and chain-link fencing around site perimeter.
- Construction of steel fencing at main site entrance with automatic gate and single-leaf gate for pedestrian access.

- Relocating and connecting to existing recycled water distribution system, installation of irrigation system between Westpark Drive and new CMU block wall, planting shrubs and installing mulch.
- Installation of site erosion control measures.

5.2 DESIGN ASSIST

Based on the Final Design Submittal, and in accordance with the Contract Documents Article 2.1-Scope of Work (Volume 2 - Agreement), the Contractor is a Design-Assist Team member with responsibility to complete the following design assist activities. Coordination with other members of the Design-Assist Team will be required; the City, Engineer, Construction Manager and possibly other personnel that have regulatory or funding authority.

- Conduct a constructability review of the Final Design Submittal Drawings and Specifications, and submit comments and identified mitigation solutions to the City.
- Identify cost savings and added value alternative design/construction solutions, and submit to the City for evaluation.
- Develop detailed cost estimates for identified alternatives when requested by City for the City's evaluation.
- Identify construction sequencing and the impacts of the identified alternatives on the sequencing.
- Develop a detailed schedule and the impacts of the identified alternatives on the schedule.
- Participate in a cooperative partnership relationship with City, Engineer, and Construction Manager to develop a comprehensive construction plan to address project risk and minimize existing facility disruptions.
- Participate in up to eight (8) Final Design Coordination Meetings lasting up to four (4) hours each to present and work collaboratively to allow for issuance of the Project Drawings and Specifications for construction.

Note that the Engineer is the entity professionally responsible for the design of the Project. City acknowledges that Contractor is a general contractor and not an architect or engineer. Except with respect to any subcontractors of Contractor providing architectural or engineering services for the Project as design-build work, the Contractor's review of or input for any design documents, or Contractor's recommendation for any design concepts, is made solely in Contractor's capacity as a licensed contractor and not as a licensed design professional. Contractor is not responsible for any errors in the Engineer's design or failure of the design to comply with applicable laws, codes, rules and regulations, or lawful orders of public authorities. However, if Contractor observes any such nonconformity or errors it shall promptly notify City's Representative and the Engineer.

6.0 MINIMUM CONTRACTOR QUALIFICATIONS

Prospective Proposers interested in submitting Proposals for the WST-PS Project must meet minimum qualifications of experience, responsibility, responsiveness, safety, and financial stability. The minimum requirements are described in Section 7 – Proposal Requirements and Format, Section 9 – Evaluation

Criteria, and Section 12 – Attachments (Forms). The list below is provided as a self-assessment check list only and is not intended to completely describe the qualifications of a successful Proposal.

- ✓ Relevant project experience: Five projects of similar nature, scope, complexity, and size that your firm's team members have completed in the last ten (10) years. Relevant project experience may be met through combined pump station and tank projects or individual, but five representative projects for both types of work, individually, are required. See Attachment 5 – Firm's Qualifying Project Experience for additional information and requirements.
- ✓ Possess a valid and current California Contractor's license (Class A, General Engineering Contractor) and this license has not been revoked at any time in the last five (5) years.
- ✓ Registration with the California Department of Industrial Relations pursuant to California Labor Code Section 1725.5
- ✓ Have not had a surety firm complete a contract on the Prospective Proposer's behalf, or paid for completion because the Prospective Proposer's firm was default terminated by the project owner within the last five (5) years.
- ✓ Project Manager, Scheduler, and Job Superintendent (serving as on-site resident Superintendent and Contractor's authorized representative) are identified and qualifications met.
- ✓ Safety Supervisor, Tank Construction Superintendent, and Specialty Tank Prestressing Superintendent and/or Operator are identified, qualifications presented, and acknowledgement of conformance with qualification and experience requirements.
- ✓ Bonding Capacity is sufficient.
- ✓ Meet Insurance requirements.
- ✓ Current workers' compensation insurance policy as required by the Labor Code or is legally self-insured pursuant to Labor Code Section 3700 et. seq.
- ✓ Reviewed or audited financial statement with all accompanying notes and supplemental information for 2018 or later.
- ✓ During the last five (5) years, the Proposer's firm or any of its owners or officers have not been convicted of a crime involving the awarding of a contract of a government construction project, or the bidding or performance of a government contract.
- ✓ Contractor must self-perform at least 30% of the value of the work.
- ✓ Company is eligible to bid on or be awarded a public works contract, or perform as a subcontractor on a public works contract, pursuant to California Labor Code 1777.1 and Labor Code 1777.7.
- ✓ No conflict of interest; the Prospective Proposer shall warrant that no official or employee of the City has an interest, has been employed or retained to solicit or aid in the procuring of the Contract for the Project contained in this RFP.
- ✓ Prohibition against interest in more than one Proposal and Proposer collusion. Firms/Companies may be included as a subcontractor on multiple Proposals; however, Firm/Company may not submit a Proposal as a Prime Contractor if they are also identified as a subcontractor on other Proposals.

7.0 PROPOSAL REQUIREMENTS AND FORMAT

Each response to this RFP shall include the information described in this section. Provide the information in the specified order. Failure to include all of the information specified may be cause for rejection. Additional information may be provided, but should be succinct and relevant to the goals of this RFP. Any additional information that a proposing Contractor wishes to include that is not specifically requested should be included in an appendix to the Proposal.

There are two parts to the Proposal. Part 1 is the Proposer's Technical Proposal and Required Proposal Form Attachments. Part 2 is the Proposal Guaranteed Maximum Price (GMP), Cost Information, Proposal Guarantee, and Proposing Company's financial information. Part 1 should be submitted in a separate sealed envelope from Part 2's sealed envelope. Both sealed envelopes shall be submitted simultaneously before the Proposal submission deadline.

Proposal Development. Contractors are encouraged to keep the proposals brief and to the point, but sufficiently detailed to allow evaluation of the Proposer's: project understanding; approach to the design-assist methodology; strategy/approach for execution of the scope of work, qualifications and expertise of the team; quality control processes, and safety record. Unauthorized conditions, omissions, limitations or provisions attached to a proposal will render the proposal non-responsive and may cause its rejection.

Proposers are warned against making erasures or alterations of any kind, without initialing each and every such change. Proposals that contain erasures or irregularities of any kind, without such initialing, or omissions, may be rejected.

The Proposal should be bound or contained in a loose leaf binder. Document pages shall be 8-1/2 inches by 11 inches in size or folded to such a size. Use section dividers, tabbed in accordance with this section as specified below.

There are page limits for specific sections of the Proposal which are indicated below. The following sections do not have page limits: cover sheet; index sheets (tab dividers), table of contents, references, signature requirements, safety record, resumes (in the appendix), financial status documents, and cost proposal.

7.1 PART 1 –TECHNICAL PROPOSAL

Proposer shall submit all forms and information required as described in Section 7.1 in a sealed envelope (or container) labeled as Part 1. See Section 8 for additional labeling and delivery instructions.

The following sections shall be included within Part 1 of the Proposer's submittal. Use section dividers (Tabs) as specified below.

COVER LETTER

- ☐ Include a Cover Letter with, at a minimum, the following information:
 - Title of this RFP
 - Name and Mailing Address of Firm (include physical location if mailing address is a PO Box)
 - Contact Person, Telephone Number, Fax Number, and Email Address

TAB A: Project Understanding (30 Points)

Include the following items in Tab A. Page Limit: 6. Maximum Score: ~~30~~40 points.

- ☐ Based on the available information, supplemental research, field observations, and experience with similar projects, provide a narrative describing your understanding of the services requested in this RFP, your general approach and any major challenges to achieving the City's stated goals. Include any issues that you believe will require special consideration for this project. City staff will assess your understanding of all aspects of the project based on the narrative.

TAB B: Project Approach (60 Points)

This tab includes the proposers approach to the Project's Scope of Work, special project considerations and proposed work schedule.

Include the following items in Tab B. Page Limit: 12 (not counting work schedule). Maximum Score: 60 points.

- ☐ Provide a detailed narrative of your firm's approach to the successful implementation of this project. Include thorough discussions of methodologies you believe are essential to accomplishing this project. Also identify any unique approaches or strengths that your firm may have related to this project.
- ☐ Provide proposed work schedule to accomplish all of the required tasks within the desired timeline. Identify the staff who would be assigned to each scheduled task, including sub-consultants and sub-contractors.

TAB C: Project Cost Reduction Opportunities (20 Points)

Include the following items in Tab C. Page Limit: 3. Maximum Score: 20 points:

- ☐ Based on the preparation of your firm's Technical Proposal and your firm's/team's construction experience with similar projects, identify items that you believe can improve the existing plan for the new facilities while also potentially creating savings to reduce the cost to construct the Project and/or operational costs of the new and/or retrofitted facilities. Cost savings ideas should not simply reduce scope, or in any way impair the essential functions or characteristics of the Project, including but not limited to, service life, economy of operation, ease of maintenance, desired appearance, or design and safety standards. Cost savings ideas should not materially change any provisions found in the Agreement. DO NOT provide any estimates of potential cost savings in either Part 1 or Part 2 of Proposal.

TAB D: Contractor's Minimum Qualifications and Certifications (Pass/Fail)

The City wants to ensure that the successful Contractor has the necessary facilities, ability, experience, and financial resources to provide the services specified herein in a satisfactory and timely manner. Items included in this Tab D are all forms attached to this RFP, are scored as Pass/Fail, and do not count toward page totals. A Passing score is given only if 1) the item required is provided in the proposal, 2) the item required and provided in the proposal is completely filled out by proposer and executed (signed) where appropriate, and 3) meets the requirements for experience demonstration and/or qualifications.

Include the following items in Tab D. This section is not awarded a point score but all items must be completed and submitted to be considered a responsible Proposer therefore Tab D is scored as Pass/Fail.

- ☐ Attachment 1 – Proposer's Certification and Evidence of Authority to sign.
- ☐ Attachment 2 – Certification of Proposer's Experience and Qualifications. Include any supplemental information to Attachment 2 in the Appendix for Part 1 (Tab L).
- ☐ Attachment 3 - License Information. Attached form requires information on Contractor Licenses, business license, and DIR registration.
- ☐ Attachment 4 - Corporate Tree. If the company, corporation, LLC, or other entity seeking to prequalify a parent, subsidiary, in a holding company relationship, or otherwise an affiliate of any other construction company, corporation, LLC, or other entity, provide on a separate page (labeled as Attachment 4), a complete corporate tree showing percentage of ownership.

TAB E: Project Team Qualifications and Experience (~~40-50~~ Points)

The City wants to ensure that the successful Contractor has the necessary project experience and expertise to provide the services specified herein in a satisfactory and timely manner.

If a Proposer subcontracts out any work items and the expected value of subcontractor's work is greater than twenty percent (20%) of the GMP, that subcontractor is considered a **"MAJOR"** subcontractor. Major subcontractors' qualifying project experience and safety record information must be submitted **with Part 1 of the Proposal package**.

If a Proposer subcontracts out any work items and the expected value of subcontractor's work is greater than five percent (5%) of the GMP, that subcontractor is considered a **"KEY"** subcontractor. Key subcontractors' qualifying project experience and safety record may be included either **with Part 1 of the proposal package OR may submitted within five (5) business days after the deadline to receive Proposals**. If submitted after Proposal due date, follow the same delivery instructions that are given in Section 8 and mark this envelope with additional label, "Key Subcontractors".

Include the following items in Tab E. Maximum Score: ~~40-50~~ points:

- ☐ One-page organizational chart showing all Major and Key Project team members and identification of their roles.
- ☐ Summary Statement of your team's qualifications and experience for performing the requested services. Include identification of team members, their roles and

responsibilities, qualifications, and geographic locations. Include discussion of the qualifications of the:

- Project Manager
- Job Superintendent
- Tank Construction Superintendent
- Specialty Tank Pre-stressing Superintendent and/or Operator
- Quality Control Manager
- Scheduler
- Safety Manager.

This summary statement has a page limit of six (6) pages. Full resumes may be included in the appendix for part 1 (Tab L).

- ☐ Attachment 5 – Qualifying Project Experience. Proposer, Major, and Key Subcontractors must each complete Attachment 5 (one for each project) to provide relevant and qualifying experience. Minimum numbers of qualifying projects must be provided for each as described in the instructions for Attachment 5.
- ☐ Attachment 6 - Project Manager’s Project Experience. There are minimum project experience requirements for the proposed Project Manager and a requirement that the Project Manager will be fully dedicated (100% assigned) to this project and present on-site during construction. The Project Manager may also service as Job Superintendent (serving as on-site resident Superintendent and Contractor’s authorized representative). Complete Attachment 6 for the proposed Project Manager.
- ☐ Attachment 6 – Significant Subcontractor Staff. If a Project Manager is not serving as the Tank Construction Superintendent and/or Specialty Tank Prestressing Superintendent/Operator as described in Technical Specification Section 03314, then those individuals serving in these roles are considered Significant Subcontractor Staff and must furnish the same qualifying project experience as the Project Manager as detailed above under Project Manager Experience.
- ☐ Attachment 6 - Resumes of Major Subcontractors’ on-site superintendent/general foreman or project manager that will be assigned to this Project.
- ☐ Resumes of Key subcontractors’ on-site superintendent/general foreman or project manager that will be assigned to this Project.

TAB F: Subcontractor List and Assurance of Designated Project Team (Pass/Fail)

Include the following items in Tab F. This section is not awarded a point score but all items must be completed and submitted to be considered a responsible Proposer therefore Tab F is scored as Pass/Fail.

- ☐ Attachment 7 - Subcontractor List. Complete this form with all subcontractors that will perform work greater than one half of one percent (> 0.5%) of the GMP amount. This form attachment also requires subcontractor’s license information and DIR registration information.

- ☐ Attachment 8 - Assurance of Designated Project Team. Proposer shall give assurance that the designated project team, including sub-consultants or sub-contractors (if any), are in fact assigned to this project. Departure or reassignment of, or substitution for, any member of the designated project team, sub-consultant(s) or sub-contractor(s) shall not be made without the prior written approval of the City.

TAB G: Construction Scheduler Qualifications (20 Points)

Include the following items in Tab G. Maximum total score for all items in Tab G is 20 points

- ☐ Resume of Proposed Project Scheduler. Provide the resume of the person who will prepare your Baseline Critical Path Method (CPM) Schedule and all required updates and progress reports for this Project. Your assigned person responsible for all CPM schedules and progress reports may be the same person as the full-time Project Manager provided you certify the Project Manager has the scheduling qualifications, scheduling experience and time to produce acceptable schedules and reports in a timely manner.
- ☐ Please provide an example CPM Schedule produced by the individual selected to prepare the Baseline CPM (Scheduler) for a project of similar size and complexity. Example project schedule may be for the proposed West Side Tanks project, a previous project, or generic example. Schedule shall be submitted on 11x17 paper.

TAB H: Safety Program and Records (30 Points)

Include the following items in Tab H. Maximum total score for all items in Tab H is 30 points.

- ☐ Provide an electronic copy of your Company's overall Safety Program for all company operations in PDF format as an appendix on the USB flash drive. No page limit.
- ☐ Resume of the Safety Manager who will be assigned to the Project.
- ☐ Attachment 9 – SAFETY RECORD must be completed by Proposer and any subcontractor whose expected value of work is greater than five percent (5) of the GMP.

TAB I: Quality Control Program (30 Points)

Include the following items in Tab I. Maximum total score for all items in Tab I is 30 points.

- ☐ Provide a descriptive outline of your planned quality control (QC) program for this Project. This QC program should integrate and compliment the testing and inspection requirements found in the Contract Documents. Include a description of how QC would be managed on this project. Page Limit: 3

- ☐ Resume of your proposed QC Manager for this Project. The QC Manager can be the same person as the full-time Project Manager (do not submit a second copy of resume in this case).

TAB J: Other Required Statements/Documents

All Items in Tab J are scored as Pass/Fail and must be included in the Proposal. A Passing score is given only if 1) the item required is provided in the Proposal, 2) the item required and provided in the Proposal is completely filled out by proposer and executed (signed) where appropriate, and 3) meets the requirements for experience demonstration and/or qualifications.

Include the following items in Tab J.

- ☐ Attachment 10 –No Conflict of Interest Declaration. Complete the attachment to certify absence of a conflict of interest. Section 11 General Terms and Conditions, Paragraph 11.4 provides additional requirements for Attachment 10.
- ☐ Attachment 11 –Non-Collusion Declaration. Proposers shall execute the Attachment to certify Non-Collusion on the RFP. Reasonable grounds to believe that any individual, partnership, corporation, or combination is interested in more than one Proposal in response to this RFP will cause rejection of all Proposals in which that individual, partnership, corporation, or combination is interested. (Reference Section 11.6) Additionally; Firms/Companies may be included as a subcontractor on multiple Proposals; however, Firm/Company is restricted from submitting a Proposal as a Prime Contractor if they are also identified as a subcontractor on other Proposals.
- ☐ Attachment 13 - Iran Contracting Act Disclosure Form.
- ☐ Attachment 14 – Statement indicating your ability and agreement to fulfill the indemnification and insurance requirements contained in the sample CONTRACT. Section 11 General Terms and Conditions, Paragraph 11.7 provides additional requirements for Attachment 14. Please note that actual certificates of insurance are not required as part of your Proposal.
- ☐ Attachment 19 – Proprietary Information Statement. Statement that nothing contained in the submitted proposal will be proprietary, OR a statement that Proposer desires to claim a privilege against public disclosure for a trade secret or other proprietary information. Part 1 of the Proposal should only contain the short statement in Attachment 19 that there is not/ or is, proprietary information. If a claim for privilege against public disclosure is submitted it should be included in Part 2 of the Proposal. Section 11 General Terms and Conditions, Paragraph 11.23 provides additional requirements for Attachment 9. Sections 7.2 and 8.1 provide instructions for submitting Attachment 19.

TAB K: Exceptions

Include the following items in Tab K.

- ☐ Describe any and all proposed exceptions, alterations or amendments to the Scope of Services or other requirements of this RFP, including the Sample

AGREEMENT (Volume 2 of the Contract Documents). The nature and scope of your proposed exceptions may negatively affect the evaluation of your submittal and the City's determination of whether it is possible to successfully negotiate a contract with your firm. Section is not scored but must be included.

TAB L: Part 1 Appendix

Include additional information and documents in this section as needed. May include, but not limited to:

- ☐ Resumes of significant staff and Subcontractors.
- ☐ Miscellaneous attachments as needed.

7.2 PART 2 - COST PROPOSAL and FINANCIALS

Proposer shall submit all forms and information required as described in Section 7.2 in a separate sealed envelope (or container) labeled as "Part 2". See Section 8 for additional instruction for delivery and labeling.

The following sections shall be included within Part 2 of the Proposal submittal. Use section dividers (Tabs) as specified below.

PROPRIETARY INFORMATION LETTER (OPTIONAL)

- ☐ If a Proposer desires to claim a privilege against public disclosure for a trade secret or other proprietary information, such information must be submitted with the Proposal in a separate envelope marked "confidential." Reference Section 11.23 for more information. This confidential envelope should be included in Part 2 Envelope (or container).

TAB M: Guaranteed Maximum Price, Cost of Work and Fee (60 Points)

- ☐ Attachment 15 – Guaranteed Maximum Price, Cost of Work, and Fee. Provide a statement of total proposed guaranteed maximum price and additional cost proposal information by completing the form and tables in this attachment. Page Limit: 10 (not including additional pages as needed).

TAB N: Proposed Shared Savings (10 Points)

- ☐ Attachment 16 – Proposed Shared Savings. Page Limit: 1

TAB O: Financial Status (Pass/Fail)

The City wants to ensure that the successful Contractor has the necessary facilities, ability, experience, and financial resources to provide the services specified herein in a satisfactory and

timely manner. Items included in this Tab O will be reviewed to determine adequate financial resources of the Proposer. A Passing score is given only if 1) the item required is provided in the proposal, 2) the item required and provided in the proposal is completely filled out by proposer and executed (signed) where appropriate, and 3) demonstrates adequate financial stability and resources.

Include the following in Tab O:

- ☐ Copy of Reviewed or Audited Financial Statement (2018) with accompanying notes and supplemental information. A financial statement that is not reviewed or audited is not acceptable. No page limit.
- ☐ Proposer must provide a letter from its Surety or Surety Broker, which certifies that Proposer's current bonding capacity is sufficient for this Work based on the Proposal and the terms of the Agreement. No page limit.

8.0 SUBMITTAL INSTRUCTIONS

8.1 Submittal Package Structure and Contents

There are two parts to the Proposal. Part 1 is the Technical Proposal. Part 2 is the Cost Proposal and Financial data.

Each part must be labeled appropriately, sealed, and submitted simultaneously before the Proposal submission deadline.

Your submittal packages shall be sealed and include the following:

Envelope 1 (or Container 1)

- One (1) original and eight (8) printed copies of your Part 1 – Firm's Qualifications and Technical Proposal (Reference Section 7.1 for contents); and
- Two (2) electronic copies of your entire Part 1 proposal in PDF format on flash drives or other electronic media

Envelope 2 (or Container 2)

- One (1) original and one (1) printed copy of your Part 2 – Cost Proposal and Confidential Financial data.
- Two (2) electronic copies of your entire Part 2 in PDF format on two separate flash drives or other electronic media (one copy on each device).
- Optional "Confidential" Envelope. If a Proposer desires to claim a **privilege against public disclosure** as described in Section 11.23, for a trade secret or other proprietary information, such information must be submitted with the Proposal in a separate envelope marked "confidential." This confidential envelope should be included in Part 2 Envelope (or container). Only one Confidential Envelope should be submitted. City Staff will ensure that this Confidential Envelope is reviewed by City Attorney's office for future

handling. Submit in the Original Part 2 only (not in additional copy and not electronically).

8.2 Proposal Deadline

Proposals shall be submitted not later than the date and time indicated on the cover page of this RFP.

Postmarks will not be accepted and Proposals received after the deadline date and time will not be opened and will be returned to Proposer. No exceptions.

8.3 Proposal Delivery Address

Proposals shall be submitted ONLY to:

City of Roseville
Attn: City Clerk Department
311 Vernon Street
Roseville, CA 95678
Re: Design-Assist and Construction of the
West Side Tanks and Pump Station Project
Attention: Janice Gainey, Senior Engineer, Environmental Utilities-Engineering

8.4 Faxed and/or emailed Proposals will not be accepted.

8.5 Delivery Responsibility

The City shall not be responsible for Proposals delivered to a person or location other than that specified herein.

8.6 Labeling

Each submittal envelope/container (Part 1 and Part 2) must include the City's "Sealed Proposal" label. In addition to the City's sticker, clearly mark each envelope as either Part 1 or Part 2. See Attachment 17 for "Sealed Proposal" label.

8.7 Minor Irregularities

The City reserves the right to waive minor defects and/or irregularities in Proposals, and shall be the sole judge of the materiality of any such defect or irregularity.

9.0 EVALUATION CRITERIA and PROPOSAL SCORING

A selection committee consisting of City employees will evaluate and rank the Proposals received. The City may conduct such reference checks as the City deems necessary to establish the responsibility, qualifications, and financial ability of the Proposer's team, to perform the Work. **Table 2 – PROPOSAL SCORING** shows either the maximum points available in each category or that the category will be scored on a "Pass/Fail" basis.

Pass/Fail Scoring. For Proposal items that receive a failing score (for any of the items identified as scored on a “Pass/Fail” basis) the City will treat the Proposal as nonresponsive and will reject it on that basis. A Passing score is given only if 1) the item required is provided in the Proposal, 2) the item required and provided in the proposal is completely filled out by Proposer and executed (signed) where appropriate, and 3) meets the requirements for experience demonstration and/or qualifications.

Points Scoring. Proposal items that are scored will be awarded points determined by the selection committee based on the best value to City using all information provided by the Proposer in its Proposal and other investigations by CITY as described in this RFP.

Points Scoring Formulas for Part Two (Envelope 2) of the Proposal.

The Part Two scoring will order the Proposals received and score each using the following formulas:

- Total Proposed GMP Score
 - Lowest GMP receives 40 Points
 - GMP within 2% of Lowest GMP receives 40 Points
 - GMP more than 2% and less than or equal to 4% of Lowest GMP receives 30 points
 - GMP more than 4% and less than or equal to 6% of Lowest GMP receives 20 points
 - GMP more than 6% and less than or equal to 8% of Lowest GMP receives 10 points
 - GMP greater than 8% of Lowest GMP receives 0 Points
- Total On-Site Management & Administration Positions Hourly Rate Score = Maximum Points x Lowest Average Hourly Rate / Proposer’s Average Hourly Rate
- Proposed Total Fee Mark-Up for General Overhead & Profit Score = Maximum Points x Lowest Fee / Proposer’s Fee
- Proposed Shared Savings = Maximum Points x Proposer’s % to Owner / Highest % to Owner

10.0 SELECTION PROCESS

10.1 Award of Contract

Award of the RFP shall be made to the responsible Proposer whose Proposal is determined, through a formal evaluation panel process, to be the most advantageous to the City after the evaluation panel has taken into consideration the evaluation factors set forth in the RFP. A master score sheet shall be created based on the evaluation panel's initial evaluation. Proposals shall be scored according to the criteria stated in the RFP.

10.2 Selection Committee

If City determines that a Proposer cannot be selected based solely on the Proposals submitted, the top ranked Proposers submitting the most highly rated technical Proposals may be invited for interviews with the selection committee. The Proposer's proposed Project Manager must be present at the interview; up to three (3) others may attend at the discretion of the Proposer. After this process, the Proposers will be ranked and notified.

The City reserves the right to make a selection after review of the Proposals without oral interviews; therefore, the Proposal should be submitted initially on the most favorable terms that the contractor might propose.

10.3 Contract Negotiation

A contract will be negotiated with the Proposer considered the best value meeting the City's need for this project. In the event a mutually satisfactory Contract cannot be negotiated with the City's first choice, negotiations may be terminated and commenced with the Proposer considered next best in meeting the City's needs for this particular project.

10.4 Contract Execution

The selected Proposer will be required to execute a City prepared Contract. The Contract may further refine the scope of services and will provide for the terms and conditions of employment.

10.5 City Council Approval

The award of any contract is expressly contingent upon City Council approval and the availability of funds. City staff may not legally bind the City to a contract.

10.6 City's Right to Reject All Proposals

The City reserves the right to reject any or all Proposals, or to waive minor irregularities in said Proposals, or to negotiate minor deviations with the successful Proposer. In the case of differences between written words and figures in a Proposal, the amount stated in written words

shall govern. In the case of a difference in unit price versus the extended figure, the unit price shall govern.

10.7 Notice of Intent (NOI)

Once a decision has been made to award the contract, then a formal notice of the intent to award to the recommended Proposer(s) shall be made by the City.

10.8 License, Permits, and Certifications

A City of Roseville business license as well as all applicable permits, licenses and certifications required by local, state or federal law are required before the award of Contract.

Contractors are not required to have a City of Roseville Business license to submit a proposal; however, it will be required before executing a Contract. Contractors may apply for a business license at: <https://www.roseville.ca.us/government/departments/finance/licensing/business>

11.0 GENERAL TERMS & CONDITIONS

11.1 Standard Contract.

Upon completion of the evaluation and recommendation for award, the selected Contractor will be required to execute an agreement prepared by the City, a sample of which is included as Volume 2 of the Contract Documents.

11.2 Independent Contractor

At all times the Contractor shall represent himself/herself to be an independent contractor offering such services to the general public and shall not represent himself/herself, or his/her employees, to be an employee of the City. Therefore, the Contractor shall assume all legal and financial responsibility for taxes, FICA, employee fringe benefits, workers' compensation, employee insurance, minimum wage requirements, overtime, etc., and agrees to indemnify, save, and hold the City, its officers, agents, and employees, harmless from and against, any and all loss, cost (including attorneys' fees), and damage of any kind related to such matters.

11.3 Non-Appropriation

The City may terminate any resulting contract at the end of any fiscal year, June 30th, without further liability other than payment of debt incurred during such fiscal year, should funds not be appropriated by its governing body to continue services for which the contract was intended.

11.4 Conflict of Interest.

The Contractor shall warrant that no official or employee of the City has an interest, has been employed or retained to solicit or aid in the procuring of the resulting contract, nor that any such person will be employed in the performance of such contract without immediate divulgence of such fact to the City. Contractors submitting a proposal in response to this RFP must disclose any actual, apparent, direct, indirect, or potential conflicts of interest that may exist with respect to the Contractor or the Contractor's management or employees relative to the services to be provided to the City. Conflict of interest issues may require consultation with legal counsel. If a

Contractor has no conflicts of interest, a statement to that effect must be included in the proposal. Violation of this section shall be a material breach of the contract entitling the City to any and all remedies by law or in equity.

Firms/Companies may be included as a subcontractor on multiple proposals; however, Firm/Company may not submit a proposal as a Prime Contractor if they are also identified as subcontractors on other proposals.

11.5 Undue Influence.

The Contractor shall warrant via an executed Proposer's Certification (**Attachment 1**) that no undue influence or pressure is used against or in concert with any officer or employee of the City in connection with the award or terms of the contract that will be executed as a result of this RFP, including any method of coercion, confidential financial arrangement or financial inducement. No officer or employee of the City shall receive compensation, directly or indirectly, from the Contractor, or from any officer, employee or agent of the Contractor, in connection with the award of the contract or any work to be conducted as a result of this RFP. Violation of this section shall be a material breach of the contract entitling the City to any and all remedies by law or in equity.

11.6 Non-Collusion.

Contractors submitting proposals shall warrant via an executed Proposer's Certification (**Attachment 1**) that their offer is made without any previous understanding, agreement or connection with any person, firm or corporation submitting a separate proposal for the same project and is in all respects fair, without outside control, collusion, fraud or otherwise illegal action. This condition shall not apply to proposals which are submitted by firms who have partnered with others to submit a cooperative proposal that clearly identifies a primary contractor and the associated sub-consultants or sub-contractors. For construction contracts, proposers shall submit a properly completed and executed "Non-collusion Declaration" which is attached as **Attachment 10**.

11.7 Indemnification & Insurance Requirements

The City's standard indemnification and insurance requirements are provided in the sample agreement, included as Volume 2 to the Contract Documents.

11.7.1 Insurance

Insurance requirements are provided in Volume 2 of the Contract Documents – Agreement Article 11-Insurance to be provided by CONTRACTOR, only an overview is provided in Table 3, refer to the agreement for all requirements.

Table 3: Insurance Requirements

Insurance	Requirement
Commercial General Liability	

Insurance	Requirement
Major Construction Projects (Projects over \$1,000,000)	\$5,000,000 each occurrence \$10,000,000 aggregate Personal Injury: \$5,000,000 each occurrence \$10,000,000 aggregate
Comprehensive Automobile Liability	
For bodily injury (including death) and property damage which provides	Total limits of not less than One Million Dollars (\$1,000,000) combined single limits per accident, applicable to all owned, non-owned, and hired vehicles.
Statutory Workers' Compensation and Employer's Liability Insurance	Limits of not less than One Million Dollars (\$1,000,000) per occurrence.
Builder's Risk/Course of Construction Insurance	All Risk type of builder's Risk Insurance of the type covering one hundred percent (100%) of the value of the Work performed under this Contract
Contractor's Pollution Liability Insurance	Combined Single Limit for each occurrence: \$2,000,000 General Aggregate: \$2,000,000
Professional Liability	
Submittals prepared by licensed California Engineer	Limit per claim of at least \$2,000,000, and a \$4,000,000 in the aggregate for errors and omissions.

All costs of complying with the insurance requirements shall be as included in your pricing. The selected Contractor shall provide complete and valid insurance certificates within ten (10) days of the City's written request. Failure to provide the documents within the time stated may result in rejection of the Contractor's proposal. Alterations to the terms and conditions shall not be allowed.

11.7.2 Bonds

The Contract's Article 11.12-Payment, Performance and Warranty Bonds contains requirements for Performance, Labor & Materials and Warranty Bonds. The successful Contractor will be required to provide a Faithfull Performance Bond and a Labor and Materials Bond using the City's forms. The successful contractor will also be required to execute Warranty Bond issued by a corporate surety, acceptable to City. The Payment Bond and Labor and Material Bond shall be for not less than one hundred percent (100%) of the Total GMP; and the Warranty Bond shall be not less than ten percent (10%) of the Agreement cost. Pursuant to California Code of Civil Procedures Section 995.311, the City will verify all bonds for this Project are issued and executed by a California admitted surety. A summary of the Bonding requirements is presented in Table 4-Bonding Requirements below.

Table 4: Bonding Requirements

Bond Type	Requirement
Faithful Performance	100% of the Total Contract Price

Labor and Materials	100% of the Total Contract Price
Warranty	One year following the date of Final Completion Penal sum equal to ten percent (10%) of the GMP

11.8 Cost of Preparing Proposal.

The City will not pay any costs incurred by any Contractor in preparing or submitting a proposal in response to this RFP.

11.9 Proposal's Property of the City.

All documents or materials submitted with or in conjunction with any proposal, including but not limited to electronic files, shall become the property of the City after the proposal submission deadline. No submission documents will be returned. During negotiations, the scope of services may be amended by the City and negotiated based upon ideas provided by other proposers or any other source.

11.10 Proposals are Public Records.

All proposals submitted are subject to the public disclosure requirements under the laws of the State of California, unless the City identifies and exercises a right or obligation to exempt any record from public disclosure. However, proposals will not be disclosed until negotiations are complete and a recommendation for selection and award is made.

11.11 Protests

A. Protest Requirements

Any Proposer who is aggrieved in connection with the solicitation or award of a contract may file a protest with the City Clerk's office. The protest must be received in writing by the City Clerk's office within seven (7) calendar days after such aggrieved proposer 1) knows or should have known of the facts giving rise thereto or 2) the date of the notice of intent to award, whichever is sooner. In no event shall a protest be allowed after an award has been made by City Council. If the seventh calendar day falls on a weekend or City holiday, the protesting party may submit the protest prior to close of business on the first business day following such weekend or holiday. Failure to submit a timely protest shall bar consideration of a protest.

B. Grounds for Protest

1. The alleged grounds for protest shall be limited to the following: (a) computation errors, (b) violations of local, state, or federal law, or (c) the City failed to follow the procedures specified in this Policy.
2. The protest shall state all grounds claimed for the protest and include supporting documentation. Failure to clearly state the grounds for the protest and provide supporting documentation shall be deemed a waiver of all protest rights.

C. Administrative Review

Upon receipt of the protest and after determining the protest was properly filed, the Department Director shall provide a copy of the protest to other proposers who might become aggrieved as a result of the protest and issue a written decision within fourteen (14) calendar days after receipt of the protest. The protest will be evaluated by the Department Director, the City Attorney's Office, and the Purchasing Manager. The protesting proposer shall promptly provide any information

requested by City staff as part of such investigation. The decision shall either deny or uphold the protest and include reasons for the decision. The written decision shall be final.

D. Stay of Action During a Protest

In the event a protest is filed under Section 11.11, the City shall not proceed further with the award of the contract until the protest is resolved, unless:

1. The Director of Central Services makes a determination that the award of the contract without delay is necessary to protect a substantial interest of the City, or
2. The City decides to reject all proposals and issue a new RFP.

11.12 Rejection of RFP

The City reserves the right to reject any or all proposals, to waive defects or irregularities in any proposal or in the RFP process, and to offer to negotiate or contract with any Contractor in response to any RFP. This RFP does not constitute any form of offer to contract.

11.13 Multiple Award

The City reserves the right to award the contract to multiple contractors when applicable.

11.14 Increasing/Decreasing Portions of RFP

The City reserves the right to increase or decrease the amount of any portions of the work represented in the RFP and/or to omit portions of said work, as may be deemed necessary by the City.

11.15 Rejection as Non-Responsive

Proposals may be rejected as non-responsive at the City's sole discretion if there are alterations of form, the proposal is conditional or the proposal is incomplete.

11.16 Modifying RFP

The City reserves the right to modify any portion of, or to postpone or cancel this RFP at any time, and/or reject any and all submissions without indicating any reason.

11.17 No Proposal Accepted

If no proposal is accepted, the City may elect to have the services performed in some other manner.

11.18 Rejecting Team Members, Firms or Sub-contractors.

The City reserves the right to reject individual team members, firms, sub-consultants or sub-contractors and request substitution prior to contract award.

11.19 Local Business, Small Business, Minority and Women Owned Business

Although no preferences will be given, the City highly encourages submission of proposals by local businesses, by small business owners, and by minority and women-owned businesses.

11.20 Withdrawal of Proposals

Proposals may be withdrawn prior to the date and time specified for proposal submission with a formal written notice by an authorized representative of the proposer delivered to the City Clerk's Office. Proposals submitted will become property of the City after the proposal submission deadline.

Proposals may not be withdrawn for ninety (90) days after the due date unless the City enters into a contract with another Contractor prior to the expiration of that ninety (90) day period.

11.21 Electronic Transmittals

No electronic mail, telephone or facsimile proposals will be accepted. If a photocopy is submitted, the proposal must be signed in ink.

11.22 Proposal Postponement and Amendment

The City reserves the right to revise or amend the RFP or specifications up to the time set for opening of the proposals. Such revisions and amendments, if any, shall be announced by amendments to this RFP through the City's website. Copies of such amendments shall be furnished to all prospective proposers. Prospective proposers are defined as those proposers who have registered and are on the City's RFP list for this material/service. If revisions and amendments require changes in quantities, prices or scope of services, the date set for opening of the proposals may be postponed by such number of days as in the opinion of the City shall enable proposers to revise their proposals. Proposals which fail to acknowledge a substantive addendum to the RFP, as determined by the City Attorney's Office, on the City supplied addendum form will be rejected as non-responsive. Any revisions or amendments to the RFP will become incorporated into any contract awarded pursuant to the RFP.

11.23 Proprietary Information

Proposers submitting a proposal in response to this RFP must provide a statement that nothing contained in the submitted proposal will be proprietary. However, if a proposer desires to claim a privilege against public disclosure for a trade secret or other proprietary information, such information must be submitted with the proposal in a separate envelope marked "confidential." The City Attorney's Office will determine if the information is in fact proprietary, based on state and federal law. Note that under California law, a price proposal to a public agency is not a trade secret. The Contractor shall defend, indemnify and hold harmless the City regarding any claim by any third party for the public disclosure of the "confidential" portion of the proposal.

11.24 Right to Request Additional Information

During the evaluation process, the City reserves the right, where it may serve the best interests of the City, to request additional information and clarifications from proposers. Such information will be requested in writing to the specific proposer. This information will become a part of the original proposal submitted by the specific proposer and will be used by the City in evaluating the proposal and will not be shared with other proposers during the evaluation and negotiation process.

11.25 Modification of Proposals

Modification of a proposal already received will be considered only if the modification is received prior to the deadline date for receiving proposals. All modifications shall be made in writing, executed, and submitted in the same form and manner as the original proposal.

11.26 Examination of Contract Documents

Each Proposer shall thoroughly examine and be familiar with the terms of this RFP, the sample Agreement attached (Volume 2), Technical Specifications (Volume 3), Drawings (Volume 4), legal and procedural documents, general conditions, specifications, and addenda (if any), which will constitute the contract documents. Submission of a proposal shall constitute acknowledgement, upon which the City may rely, that the proposer has thoroughly examined and is familiar with the contract documents. Failure or neglect of a Proposer to receive or examine any of the contract documents shall in no way relieve the Proposer of any obligation with respect to their proposal or to the contract. No claim for additional compensation will be allowed which is based upon lack of knowledge of any contract document.

11.27 Non-Discrimination.

The City maintains various policies related to contractual service providers. Among these is an anti-discrimination policy, which requires that the City's contractors not discriminate in hiring on the basis of gender, race, religion, sexual orientation, medical condition, and all other categories protected by law. Upon acceptance of a proposal, the City may request that the selected Contractor sign a statement affirming its compliance with this policy.

11.28 No Assignment or Modifications

This awarded contract is to be binding on the successors and assigns of the parties hereto. The services called for herein are deemed unique and except as provided herein, Contractor shall not assign, transfer, subcontract, or otherwise substitute its interest in the agreement or any of its obligations herein without the written consent of the City. The Agreement may be modified only by a written amendment signed by the parties.

11.29 Bankruptcy

Upon filing for any bankruptcy or insolvency proceeding whether voluntary or involuntary, or upon the appointment of a receiver, trustee, or assignee for the benefit of creditors, the Contractor must notify the City immediately. Upon learning the actions herein identified, the City reserves the right, at its sole discretion, to cancel the contract.

11.30 Escrow Proposal Documents (EPDs)

A. Procedure

1. The highest ranked Proposer shall submit one (1) copy of all documentary information generated in preparation of its GMP for this project within five (5) working days after receipt of Final Agreement for Contractor's signature. This material is hereinafter referred to as Escrow Proposal Documents (EPDs).
2. The highest ranked Proposer agrees, as a condition of award of the Agreement, that the EPDs constitute the only complete documentary information used in preparation of its

Proposal. No other Proposal preparation information shall be considered in resolving disputes.

3. Nothing in the EPDs shall change or modify the terms or conditions of the Contract Documents.

B. Ownership

1. The EPDs are and shall always remain the property of the Contractor subject only to joint review by City and the Contractor, except as provided for herein.
2. City stipulates and expressly acknowledges that the EPDs, as defined herein, constitute trade secrets. This acknowledgment is based on City's express understanding that the information contained in the EPDs is not known outside the Contractor's business, is known only to a limited extent and only by a limited number of employees of the Contractor, is safeguarded while in the Contractor's possession, and is extremely valuable to competitors by virtue of its reflecting the Contractor's contemplated techniques of construction.
3. City acknowledges that EPDs and the information contained therein are made available to City only because such action is an express prerequisite to award of the Project Agreement. City acknowledges that the EPDs include a compilation of information used in the Contractor's business, intended to give the Contractor an opportunity to obtain an advantage over competitors who do not know of or use the contents of the documentation. City agrees to safeguard the EPDs and all information contained therein to the fullest extent permitted by law.

C. Purpose

EPDs will be used to assist in the negotiation of price adjustments and variations and in the settlement of disputes, claims and other controversies. They will not be used for pre-award evaluation of the Contractor's anticipated methods of construction or to assess the Contractor's qualifications for performing the Work.

D. Format And Content

1. Proposers may submit EPDs in their usual cost estimating format. It is not intended that extra work is required in preparing the Proposal but to ensure that the EPDs will be adequate to enable complete and proper understanding and proper interpretation for their intended use. The EPDs shall be in the English language only.
2. The EPDs shall clearly itemize the estimated costs of performing the Work. Items shall be separated into sub-items as required to present a complete and detailed cost estimate and allow a detailed cost review. The EPDs shall include all quantity take-offs, crews, equipment, calculations of rates of production and progress, copies of quotations from subcontractors and suppliers, and memoranda, narratives, consultants reports, add/deduct sheets and all other information used by the Contractor to arrive at the prices contained in the GMP. Estimated costs shall be broken down into the Contractor's usual estimate categories such as direct labor, repair labor, equipment operation, equipment ownership, expendable materials, permanent materials, and subcontract costs as appropriate. Plant and equipment and indirect costs should be detailed in the Contractor's usual format. The Contractor's allocation of plant and equipment, indirect costs, contingencies, mark-up and other items to each portion of its estimate shall be clearly indicated.

3. The EPDs shall clearly show in calculations, text, or both, the relationship between baseline indications presented in the Contract Documents and assumptions that form the basis for the Contractor's means, methods, equipment selection, rates of production, and costs.
4. All costs shall be identified. For work items where the extended amount is less than \$10,000, estimated unit costs are acceptable without a detailed cost estimate, provided that labor, equipment, materials and subcontracts, as applicable, are included and provided that indirect costs, contingencies, and mark-up, as applicable, are allocated.
5. Proposal Documents provided by City should not be included in the EPDs unless needed to comply with the above requirements.

E. Submittal

1. The highest ranked Proposer shall submit their EPDs in a sealed container (e.g., sealed envelope, box or carton sealed with tape, locked strongbox, etc.), and the container shall be clearly marked on the outside with the Proposer's name, date of submittal, project name, Agreement No., and the words "Escrow Proposal Documents". The EPDs shall be submitted to:

Janice Gainey
City of Roseville Environmental Utilities-Engineering
2005 Hilltop Circle
Roseville, CA 95747

2. The EPDs shall be accompanied, on the outside of the container, by the "Escrow Proposal Document Certification" which is **Attachment 18** to this RFP. The Escrow Proposal Document Certification should be signed by an individual authorized by the Proposer to execute the Proposal, stating that the material in the Escrow Proposal Documentation constitutes all the documentary information used in the preparation of the Proposal and that the individual authorized by the Proposer has personally examined the contents of the EPDs container and has found that the documents in the container are complete.
3. Prior to award of the Project Agreement, the EPDs of the highest ranked Proposer will be examined, organized and inventoried by representatives of City, together with members of the Contractor's staff who are knowledgeable in how the Proposal was prepared. This examination is to ensure that the EPDs are authentic, legible, and complete. It will not include review of and will not constitute approval of proposed construction methods, estimating assumptions, or interpretations of the Contract Documents. Examination will not alter any condition(s) or term(s) of the Agreement.
4. If all documentation required in the "Format and Contents" has not been included in the original submittal, additional documentation shall be submitted, at City's discretion, prior to award of the Project. The detailed breakdown of estimated costs shall be reconciled and revised, if appropriate, by agreement between the Contractor and City before making the award.
5. If the Project is not awarded to the highest ranked Proposer, the EPDs of the next highest ranked Proposer to be considered for award shall be processed, as described above.

6. Timely submission of the complete EPDs is an essential element of the Proposer's responsibility and a prerequisite to Agreement award. Failure to provide the necessary EPDs within the specified time frame will be sufficient cause for City to reject the Proposal as non-responsive.
7. If the Proposer's Proposal is based on subcontracting any part of the Work, each subcontractor whose total subcontract price exceeds five percent (5%) of the total GMP proposed by the Proposer, shall provide separate EPDs to be included with those of the Proposer. These documents will be opened and examined in the same manner and at the same time as the examination described above for the highest ranked Proposer. THE FAILURE TO SUBMIT SUBCONTRACTOR EPDs MAY RENDER CONTRACTOR'S PROPOSAL NON-RESPONSIVE.
8. If the Contractor wishes to subcontract any portion of the Work after award, City retains the right to require the Contractor to submit EPDs from the subcontractor before the subcontract is approved. THIS SECTION IS NOT INTENDED TO AND SHALL NOT BE INTERPRETED AS A WAIVER BY THE CITY OF ANY OF THE REQUIREMENTS OR PROVISIONS OF PUBLIC CONTRACT CODE SECTION 4100 et seq. KNOWN AS THE SUBLETTING AND SUBCONTRACTING FAIR PRACTICES ACT.

F. Storage

Absent request from the Contractor to place the EPDs in possession of a third-party escrow agent, the EPDs will be stored by the City's Department of Environmental Utilities in its offices. Upon written request from the Contractor, the EPDs shall be placed in escrow with a mutually agreeable institution for the life of the Agreement, unless examination is required, which shall be conducted in accordance with this section. The cost of storage by a third-party escrow agent will be borne by the Contractor.

G. Examination

1. The EPDs shall be examined by both City and the Contractor, at any time deemed necessary by either City or the Contractor, to assist in the negotiation of price adjustments and change orders, or the settlement of disputes.
2. Such examination of the EPDs is subject to the following conditions:
 - a. As trade secrets, the EPDs are proprietary and confidential as described above.
 - b. City and the Contractor shall each designate, in writing to the other party a minimum of ten (10) days prior to examination, representatives who are authorized to examine the EPDs. No other person shall have access to examine the EPDs.
 - c. Examination of the EPDs will take place only in the presence of duly designated representatives of both City and the Contractor.

H. Final Disposition

1. The EPDs will be returned to the Contractor at such time as the Agreement has been completed and final settlement has been achieved.

2. The EPDs submitted by any unsuccessful Proposer will be returned unopened, unless opened as provided for above, following execution of the Agreement.

THIS DOCUMENT IS NOT INTENDED TO CREATE CONFIDENTIAL STATUS TO EPDs IN THE EVENT OF LITIGATION BETWEEN CONTRACTOR AND THE CITY. IF LITIGATION OCCURS, ALL EPDs ARE SUBJECT TO DISCOVERY AND SHALL NOT BE CONSIDERED CONFIDENTIAL. IF LITIGATION COMMENCES BETWEEN THE CITY AND CONTRACTOR, UPON TEN (10) DAYS WRITTEN NOTICE TO CONTRACTOR, THE CITY MAY DEMAND AND CONTRACTOR SHALL PERMIT THE CITY TO COPY ALL MATERIALS SUBMITTED INTO ESCROW PURSUANT TO THIS SPECIFICATION.

Attachment 1 - PROPOSER'S CERTIFICATION

Signature Instructions:

The attached Proposer's Certification (**Attachment 1**) shall be executed by an official(s) legally authorized to bind the Contractor. Contractor must follow the appropriate signature requirements and signature block when executing the Attachment. Submit with Part 1 of the proposal.

- Proposals which are submitted by a **Sole Proprietorship** (Individual Doing Business under a firm name "dba") shall be signed in the name of the individual doing business under the proper firm name and style.
- Proposals submitted on behalf of a **Partnership** shall be signed in the firm name by a partner.
- Proposals which are submitted on behalf of a **Corporation** shall have the correct corporate name thereon and the actual signature of the authorized officer of the corporation written (not typed) below the corporate name. The title of the office held by the person signing for the corporation shall appear below the signature of the officer.
- Proposals which are submitted on behalf of a **Limited Liability Company** ("LLC") shall be signed by the person or persons authorized to bind the LLC under the LLC's Articles of Organization.

Form Attachment 1 on next page

Attachment 1- PROPOSER'S CERTIFICATION

West Side Tanks and Pump Station

In response to the Request for Proposals (RFP), dated November 15, 2019, the undersigned hereby proposes to City to furnish all plant, labor, technical and professional services, supervision, materials, and equipment (other than materials and equipment specified as furnished by City), and to perform all operations necessary and required for construction of the West Side Tanks and Pump Station Project, in accordance with the Contract Documents, and any Addenda thereto, for the Total Guaranteed Maximum Price (GMP) and all other terms submitted in the Proposal.

This Proposal constitutes a firm offer to City, which cannot be withdrawn for 120 days from and after the date set for receiving Proposals, or until the Agreement is fully executed by City, whichever is earlier.

It is understood that this Proposal is based upon completion of the Work within a period outlined in Exhibit H-COMPLETION TIMES AND LIQUIDATED DAMAGES, of the Agreement commencing on the date specified in the Notice to Proceed.

The undersigned Proposer hereby certifies that it has examined and is fully familiar with all of the provisions of the Contract Documents; has carefully checked all of the words and figures shown on its Proposal; has carefully reviewed the accuracy of all statements in this Proposal and attachments hereto; and understands and agrees that City will not be responsible for any errors or omissions on the part of the undersigned in preparing this Proposal.

The undersigned Proposer has, by careful examination of the Contract Documents, and by examination of the actual Site conditions, satisfied itself as to the nature and location of all Work, the general and local conditions to be encountered in the performance of any Work, the requirements of the Contract Documents, and all other matters that can in any way affect the Work or the cost thereof.

The undersigned agrees to execute the Agreement and provide City the executed Agreement, the required insurance certificates, endorsements, and waivers of subrogation, and the required surety bonds within fifteen (10) business days after the undersigned's receipt of the City's unsigned Agreement.

I further certify that this proposal is made without prior understanding, agreement, connection, discussion, or conspiracy with any other person, firm or corporation submitting a proposal for the same product or service; that this proposal is fair and made without outside control, collusion, fraud or illegal action; that no officer, employee or agent of the City or any other proposer is financially interested in said proposal; that no undue influence or pressure was used against or in concert with any officer, employee or agent of the City in connection with the award or terms of the contract that will be executed as a result of this RFP; and that the undersigned executed this Proposer's Certification with full knowledge and understanding of the matters therein contained and was duly authorized to do so.

Type of Organization:

☐ Sole Proprietorship ☐ Corporation ☐ State of Incorporation
☐ Partnership ☐ Limited Liability Company

The undersigned Proposer acknowledges receipt, understanding, and full consideration of the following Addenda:

Attachment 2 – MINIMUM EXPERIENCE AND QUALIFICATIONS REQUIREMENTS

West Side Tanks and Pump Station Project

The undersigned Proposer represents that it is duly licensed, competent, and knowledgeable and has the special skills on the nature, extent and inherent conditions of the work to be performed on this Project. Proposer further acknowledges that the conditions inherent in the construction of particular facilities may create, during construction, unusual or unsafe conditions hazardous to persons and property. Proposer expressly acknowledges that it is aware of such risks and that it has the skill and experience to foresee and to adopt and implement protective measures to adequately and safely perform the construction work with respect to such hazards. The prospective Proposer's qualifications and responses to the questions set forth below are part of the City's evaluation of the Proposer's eligibility to receive the award based on the Proposer's responsibility and responsiveness. The Owner has determined that only Proposers meeting the mandatory minimum experience and qualification requirements set forth below will have the requisite quality, fitness, capacity and experience to perform the highly complex and vital construction work on this Project.

QUESTIONS REGARDING PROPOSER'S RESPONSIBILITY AND FITNESS TO CONTRACT FOR THE WORK.

An answer of "False" to any of the Statements 1 through 9 will be rated a "Fail" and the Prospective Proposer will be immediately disqualified.

Table 2.1 Minimum Qualifications and Experience Questionnaire

No.	True	False	Statement
1			Prospective Proposer possesses a valid and current California Contractor's license -Class A, General Engineering Contractor) for the project for which it intends to submit a Proposal.
2			Proposer's company's contractor's license HAS NOT been revoked at any time in the last five years.
3			Prospective Proposer is registered with the California Department of Industrial Relations pursuant to California Labor Code Section 1725.5.
4			Prospective Proposer has not had a surety finish the work on any contract in the past five years.
5			Prospective Proposer has current workers' compensation insurance policy as required by the Labor Code or is legally self-insured pursuant to Labor Code section 3700 et. seq. OR Prospective Proposer is exempt from this requirement because it has no employees.

No.	True	False	Statement
6			At the time of submitting this RFP, company is eligible to bid on or be awarded a public works contract, or perform as a subcontractor on a public works contract, pursuant to California Labor Code §1777.1 and Labor Code §1777.7.
7			At no time during the last five (5) years, has Proposer's company, or any of its officers or partners been convicted of a crime involving the awarding of a contract for a government construction project, or the bidding or performance of any federal, state or local government contract.
8			Prospective Proposer agrees to perform with its own organization and with the assistance of workers under its immediate superintendence, work of a value not less than 30% of the Proposer's Total Guaranteed Maximum Price.
9			Proposer's Firm has completed at least \$75 Million in construction value on no more than seven (7) projects completed since January 1, 2009.

Attachment 5 – QUALIFYING PROJECT EXPERIENCE

West Side Tanks and Pump Station Project

Given the complexity and importance of timely and successful completion of the Project to the City and its residents, the Contractor and Subcontractors must provide qualifying project experience to be considered a responsible Proposer for this specific RFP procurement.

Prime Contractor: Provide five (5) references for projects or services similar in nature, scope, complexity, and size that your firm's team members have completed. Use the Attachment 5 form on following page.

Contractor's project experience will be assigned a Passing score for this project proposal evaluation if individually and collectively the experience presented meets all of the following qualifying criteria.

1. Time: Project(s) was completed within the last ten (10) years. Projects that are in progress may be used as qualifying projects but only the cost billed to date may be used for project size and volume requirements as defined in Items 3 and 4 below.
2. Type: Project was similar nature; scope, and complexity to West Side Tanks project. City will consider the following types of projects as qualifying on project type.
 - a. Water Tanks, where the structural concrete, excavation and backfill were part of the Contractor's contract;
 - i. Only Contractors experienced in the construction of strand wrapped prestressed concrete tanks are qualified to propose on and construct the water tanks on this project. Contractor's team shall have successfully completed at least five (5) circumferentially strand wrapped AWWA D110 Type 1 prestressed concrete tanks of at least 1.0 MG in capacity in the last ten (10) years. At least 2 of the above tanks shall have been in successful service for a minimum of five years. If the tank construction is subcontracted, the Tank Subcontractor, or one of its divisions, shall be required to meet the above-specified experience qualifications.
 - ii. In order to meet the experience requirements, the five (5) completed AWWA D110 Type 1 tanks shall be similar (i.e. freed wall base, poured-in-place core wall, externally machine strand wrapped, etc.) in design to the specified tank. Experience with tanks having fixed wall bases, mild-steel reinforced tank core walls, shotcrete tank core walls, precast tank core walls or tank core walls incorporating external solid wire wrapping systems or internal stressing systems shall not be considered in meeting the required experience requirements. All tanks listed for CONTRACTOR's experience requirements must have been built in CONTRACTOR's own name, or one of its divisions. Experience of personnel associated with CONTRACTOR or hired by the CONTRACTOR will not be considered unless CONTRACTOR can demonstrate that the work was contracted and performed directly by the listed Tank Contractor, or one of its divisions, in its business name.
 - b. Pump Stations where the structural concrete, excavation, backfill, electrical, mechanical and instrumentation systems were part of the Contractor's contract;

- c. Industrial and/or Municipal Water Treatment Plants where the earthwork, structural concrete, mechanical, electrical, and instrumentation systems were part of the Contractor's contract; or
 - d. Industrial and/or Municipal Wastewater Treatment Plants where the earthwork, structural concrete, mechanical, electrical, and instrumentation systems were part of the Contractor's contract.
3. Size: Demonstrate experience on projects of a similar size. At least one (1) qualifying project must be for a contract cost of \$20M or larger.
 4. Self-Performance - Proposer certifies that they self-performed at least 30% of the Work on each of the reference projects presented as qualifying projects. Also, Proposers should note that only projects performed by the organization applying for the project, shall be considered; any project performed by a parent or sister company shall not be considered.

Major Subcontractor(s). If a Contractor subcontracts out any work items and the expected value of subcontractor's work is greater than twenty percent (20%) of the GMP, that subcontractor is considered a "Major Subcontractor" and must furnish the same qualifying project experience as the Prime Contractor as detailed above under **Prime Contractor**.

Key Subcontractor(s). If a Contractor subcontracts out any work items and the expected value of subcontractor's work is greater than five percent (5%) of the GMP, that subcontractor is considered a "Key Subcontractor" and must furnish three (3) project references completed in the last five (5) years that show experience required for their scope of work on this project.

In addition to completing individual project reference forms, each Prime, Major, or Key Contractor must complete Table 5-1: Reference Project Summary for their reference projects.

Attachment 6 - PROJECT EXPERIENCE of the PROJECT MANAGER and SIGNIFICANT SUBCONTRACTOR STAFF

West Side Tanks and Pump Station Project

Instructions and Requirements

Given the complexity and importance of timely and successful completion of the Project to the City and its residents, the Proposer must provide qualifying project experience for their assigned Project Manager to be considered a responsible Proposer for this specific RFP procurement.

Project Manager Experience

Provide three (3) references for projects or services similar in nature, scope, complexity, and size where your assigned project manager held the position of Project Manager using the forms on following pages. Project Manager's project experience will be assigned a passing score for this project proposal evaluation if individually and collectively the experience presented meets all of the following qualifying criteria.

1. Time: Project(s) was completed within the last ten (10) years. Projects that are in progress may be used as qualifying projects but only the cost billed to date may be used for project size requirement below (Item 3).
2. Type: Project was similar nature; scope, and complexity to West Side Tanks project. City will consider the following types of projects as qualifying on project type.
 - a. Water Tanks, where the structural concrete, excavation and backfill were part of the Contractor's contract;
 - b. Pump Stations where the structural concrete, excavation, backfill, electrical, mechanical and instrumentation systems were part of the Contractor's contract;
 - c. Industrial and/or Municipal Water Treatment Plants where the earthwork, structural concrete, mechanical, electrical, and instrumentation systems were part of the Contractor's contract; or
 - d. Industrial and/or Municipal Wastewater Treatment Plants where the earthwork, structural concrete, mechanical, electrical, and instrumentation systems were part of the Contractor's contract.
3. Size: Demonstrate experience on projects of a similar size. At least one (1) qualifying project must be for a contract cost of \$20M or larger.

Significant Subcontractor Staff Experience

If a Project Manager is not serving as the Tank Construction Superintendent and/or Specialty Tank Prestressing Superintendent/Operator as described in Technical Specification Section 03314, then those individuals serving in these roles are considered Significant Subcontractor Staff and must furnish the same qualifying project experience as the Project Manager as detailed above under **Project Manager Experience**.

Attachment 6 Forms on following pages.

Attachment 6 - PROJECT MANAGER'S PROJECT EXPERIENCE

Name: _____

Role: _____ (Project Manager, Superintendent, etc.)

Number of Years of Total Construction experience in this Role assigned to the types of projects as defined above: _____ years

Number of Years in this Role for your Company: _____ years

The City may check project references to verify the Project Manager's project experience information provided; therefore, it is very important that the Proposer verify that all contact information is current for project contacts.

The Proposer certifies that their named Project Manager will be assigned only this Project and will be personally present on-site full-time during construction.

Attachment 7 - STATEMENT OF SUBCONTRACTORS

Westside Tanks and Pump Station Project

The undersigned Proposer submits herewith a list of subcontractors the Contractor proposes to employ on the Work that will each perform **Work in an amount greater than one half of one percent (0.5%) of the Total GMP** submitted in their Cost Proposal.

This list shall include the proper firm name, their license number and class, city and state of each subcontractor, and the portion of the Work to be done by each subcontractor with the understanding that failure to name such subcontractors shall be witness that the Contractor shall have agreed to perform such portion of the Work themselves; and that the Contractor shall not subcontract said portion of the Work.

If a subcontractor is listed, there shall be no substitution of that subcontractor without first obtaining written permission of City Council pursuant to the provisions of Section 4107 of the Public Contract Code.

The Contractor shall list only one subcontractor for each portion of the Work to be done as defined by the Contract Documents. The City will determine the percentage of the Work self-performed by the Proposer, by subtracting the total percentage of below listed subcontractors work from 100%.

Table 7-1: Statement of Subcontractors

Attachment 9 – SAFETY RECORD

West Side Tanks and Pump Station Project

Contractor/Firm completing this report: _____

List any Occupational Safety Health Administration (OSHA) citation for violations of OSHA Standards and Requirements within the past five (5) years. Please explain each violation and the resulting penalties, if any.

Has CONTRACTOR earned any industry safety awards in the past five (5) years? If so, please provide an explanation of award(s).

Workers Compensation

Identify if your firm is self-insured for Workers Compensation Insurance in California. If self-insured provide the self-insurance number and attach a certification in the Appendix to the proposal.

Provide the name of your Worker's Comp. Insurance Carrier(s) as well as their address, agent's name and telephone number.

Provide the Average Lost Workday Incident Rates (LWIR), Average Recordable Incident Rates (RIR) and most recent Experience Modification Rate (EMR) in the format presented below.

Contractor's Average Lost Workday Incident Rates (LWIR) and the Average Recordable Incident Rates (RIR) are requested for evaluation of the safety history relating to the CONTRACTOR's construction operations only. Home office staff labor hours and the corresponding injury and illness figures for home office staff shall not be included in the calculation of these rates. Similar information for parent

companies, subsidiaries, or other company divisions not directly engaging in construction activities shall not be considered in these rate calculations. All data used in the calculations shall be specific to the company operation who will construct this Project if awarded the Contract.

Average Lost Workday Incident Rate (LWIR)

Calculate and provide your company's LWIR for the past three (3) complete years in the format presented below. The lost workday information is listed on your OSHA forms No. 300 and 300A and is available from your workers' compensation insurance carrier.

$LWIR = \text{Total number of lost workday incidents} \times 200,000 \text{ Total employee hours worked}$

Table 9-1: LWIR

Year	# of Lost Workday Incidents	Total Employee Hours Worked	Lost Workday Incident Rate
1-2018			
2-2017			
3-2016			
3 Year Average			

Average Recordable Incident Rate (RIR)

Calculate and provide your firm's RIR for the past three (3) complete years in the format presented below. The Incident Rate information is listed on your OSHA forms No. 300 and 300A and is available from your workers' compensation insurance carrier.

$RIR = \text{Total number of recordable incidents} \times 200,000 \text{ Total employee hours worked}$

Table 9-2: RIR

Year	# of Recordable Incidents	Total Employee Hours Worked	Recordable Incident Rate
1-2018			
2-2017			
3-2016			
3 Year Average			

The Experience Modification Rate (EMR)

The EMR is established by the CONTRACTOR's workers' compensation insurance carrier and is based on the CONTRACTOR's loss history. CONTRACTOR can provide either its Intrastate or Interstate EMR.

Identify either: () Intrastate () Interstate: _____

Provide your firm's EMR for the last three (3) complete years (this information is provided by your worker's comp. insurance carrier) in the format presented below.

Table 9-3: EMR

Year	EMR

Attachment 10 – NO CONFLICT OF INTEREST DECLARATION

West Side Tanks and Pump Station Project

The undersigned Proposer certifies that no official or employee of the City has an interest, has been employed or retained to solicit or aid in the procuring of the resulting agreement, nor that any such person will be employed in the performance of such work without immediate divulgence of such fact to the City. Proposers submitting a Proposal in response to this RFP must disclose any actual, apparent, direct, indirect, or potential conflicts of interest that may exist with respect to the Proposer or the Proposer's management or employees relative to the services to be provided to the City. Conflict of interest issues may require consultation with legal counsel. **If a Proposer has no conflicts of interest, a statement to that effect must be added to this ATTACHMENT 10.** Violation of this section shall be a material breach of the Agreement entitling the City to any and all remedies by law or in equity.

The undersigned Proposer certifies that no undue influence or pressure is used against or in concert with any officer or employee of the City in connection with the award or terms of the Agreement that will be executed as a result of this RFP, including any method of coercion, confidential financial arrangement or financial inducement. No officer or employee of the City shall receive compensation, directly or indirectly, from the Proposer, or from any officer, employee or agent of the Proposer, in connection with the award of the Agreement or any Work to be conducted as a result of this RFP. Violation of these requirements shall be a material breach of the contract entitling the City to any and all remedies by law or in equity.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that this declaration is executed on _____ [date], at _____ [city], _____ [state].

Attachment 11 – NON-COLLUSION DECLARATION

West Side Tanks and Pump Station Project

NONCOLLUSION DECLARATION TO BE EXECUTED BY BIDDER AND SUBMITTED WITH PROPOSAL

The undersigned declares:

I am the _____ of _____, the party making the foregoing Proposal.

The Proposal is not made in the interest of, or on behalf of, any undisclosed person, partnership, company, association, organization, or corporation. The Proposal is genuine and not collusive or sham. The Proposer has not directly or indirectly induced or solicited any other Proposer to put in a false or sham Proposal. The Proposer has not directly or indirectly colluded, conspired, connived, or agreed with any Proposer or anyone else to put in a sham Proposal, or to refrain from proposing. The Proposer has not in any manner, directly or indirectly, sought by agreement, communication, or conference with anyone to fix the Proposal price of the Proposer or any other Proposer, or to fix any overhead, profit, or cost element of the Proposer price, or of that of any other Proposer. All statements contained in the Proposal are true. The Proposer has not, directly or indirectly, submitted his or her Proposal price or any breakdown thereof, or the contents thereof, or divulged information or data relative thereto, to any corporation, partnership, company, association, organization, bid depository, or to any member or agent thereof, to effectuate a collusive or sham Proposal, and has not paid, and will not pay, any person or entity for such purpose.

Any person executing this declaration on behalf of a Proposer that is a corporation, partnership, joint venture, limited liability company, limited liability partnership, or any other entity, hereby represents that he or she has full power to execute, and does execute, this declaration on behalf of the Proposer.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that this declaration is executed on _____ [date], at _____ [city], _____ [state].

(Signature of Declarant)

Attachment 12 - ASSEMBLY BILL NO. 626

CHAPTER 810

An act to add and repeal Section 9204 of the Public Contract Code, relating to public contracts.

[Approved by Governor September 29, 2016. Filed with
Secretary of State September 29, 2016.]

LEGISLATIVE COUNSEL'S DIGEST

AB 626, Chiu. Public contracts: claim resolution.

Existing law prescribes various requirements regarding the formation, content, and enforcement of state and local public contracts. Existing law applicable to state public contracts generally requires that the resolution of claims related to those contracts be subject to arbitration. Existing law applicable to local agency contracts prescribes a process for the resolution of claims related to those contracts of \$375,000 or less.

This bill would establish, for contracts entered into on or after January 1, 2017, a claim resolution process applicable to any claim by a contractor in connection with a public works project. The bill would define a claim as a separate demand by the contractor for one or more of the following: a time extension for relief from damages or penalties for delay, payment of money or damages arising from work done pursuant to the contract for a public work, or payment of an amount disputed by the public entity, as specified.

This bill would require a public entity, defined to exclude certain state entities, upon receipt of a claim sent by registered or certified mail, to review it and, within 45 days, provide a written statement identifying the disputed and undisputed portions of the claim. The bill would authorize the 45-day period to be extended by mutual agreement. The bill would require any payment due on an undisputed portion of the claim to be processed within 60 days, as specified. The bill would require that the claim be deemed rejected in its entirety if the public entity fails to issue the written statement.

This bill would authorize, if the claimant disputes the public entity's written response of if the public entity fails to respond to a claim within the time prescribed, the claimant to demand to meet and confer for settlement of the issues in dispute. The bill would require any disputed portion of the claim that remains in dispute after the meet and confer conference to be subject to nonbinding mediation, as specified. The bill would provide that unpaid claim amounts accrue interest at 7% per annum. The bill would prescribe a procedure by which a subcontractor or lower tier contractor may make a claim through the contractor.

This bill would require the text of these provisions, or a summary, to be set forth in the plans or specifications for any public work which may give rise to a claim. The bill would specify that a waiver of these rights is void and contrary to public policy, except as specified. The bill would also specify that it does not impose liability on a public entity that makes loans or grants available through a competitive application process, for the failure of an awardee to meet its contractual obligations.

By increasing the duties of local agencies and officials, this bill would impose a state-mandated local program.

This bill would, on January 1, 2020, repeal the provision establishing the claim resolution process.

This bill would specify that these provisions constitute a matter of statewide concern.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that, if the Commission on State Mandates determines that the bill contains costs mandated by the state, reimbursement for those costs shall be made pursuant to these statutory provisions.

The people of the State of California do enact as follows:

SECTION 1. Section 9204 is added to the Public Contract Code, to read: 9204. (a) The Legislature finds and declares that it is in the best interests of the state and its citizens to ensure that all construction business performed on a public works project in the state that is complete and not in dispute is paid in full and in a timely manner.

(b) Notwithstanding any other law, including, but not limited to, Article 7.1 (commencing with Section 10240) of Chapter 1 of Part 2, Chapter 10 (commencing with Section 19100) of Part 2, and Article 1.5 (commencing with Section 20104) of Chapter 1 of Part 3, this section shall apply to any claim by a contractor in connection with a public works project.

(c) For purposes of this section:

(1) "Claim" means a separate demand by a contractor sent by registered mail or certified mail with return receipt requested, for one or more of the following:

(A) A time extension, including, without limitation, for relief from damages or penalties for delay assessed by a public entity under a contract for a public works project.

(B) Payment by the public entity of money or damages arising from work done by, or on behalf of, the contractor pursuant to the contract for a public works project and payment for which is not otherwise expressly provided or to which the claimant is not otherwise entitled.

(C) Payment of an amount that is disputed by the public entity.

(2) "Contractor" means any type of contractor within the meaning of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code who has entered into a direct contract with a public entity for a public works project.

(3) (A) "Public entity" means, without limitation, except as provided in subparagraph (B), a state agency, department, office, division, bureau, board, or commission, the California State University, the University of California, a city, including a charter city, county, including a charter county, city and county, including a charter city and county, district, special district, public authority, political subdivision, public corporation, or nonprofit transit corporation wholly owned by a public agency and formed to carry out the purposes of the public agency.

(B) "Public entity" shall not include the following:

(i) The Department of Water Resources as to any project under the jurisdiction of that department.

(ii) The Department of Transportation as to any project under the jurisdiction of that department.

(iii) The Department of Parks and Recreation as to any project under the jurisdiction of that department.

(iv) The Department of Corrections and Rehabilitation with respect to any project under its jurisdiction pursuant to Chapter 11(commencing with Section 7000) of Title 7 of Part 3 of the Penal Code.

(v) The Military Department as to any project under the jurisdiction of that department.

(vi) The Department of General Services as to all other projects.

(vii) The High-Speed Rail Authority.

(4) "Public works project" means the erection, construction, alteration, repair, or improvement of any public structure, building, road, or other public improvement of any kind.

(5) "Subcontractor" means any type of contractor within the meaning of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code who either is in direct contract with a contractor or is a lower tier subcontractor.

(d) (1) (A) Upon receipt of a claim pursuant to this section, the public entity to which the claim applies shall conduct a reasonable review of the claim and, within a period not to exceed 45 days, shall provide the claimant a written statement identifying what portion of the claim is disputed and what portion is undisputed. Upon receipt of a claim, a public entity and a contractor may, by mutual agreement, extend the time period provided in this subdivision.

(B) The claimant shall furnish reasonable documentation to support the claim.

(C) If the public entity needs approval from its governing body to provide the claimant a written statement identifying the disputed portion and the undisputed portion of the claim, and the governing body does not meet within the 45 days or within the mutually agreed to extension of time following receipt of a claim sent by registered mail or certified mail, return receipt requested, the public entity shall have up to three days following the next duly publicly noticed meeting of the governing body after the 45-day period, or extension, expires to provide the claimant a written statement identifying the disputed portion and the undisputed portion.

(D) Any payment due on an undisputed portion of the claim shall be processed and made within 60 days after the public entity issues its written statement. If the public entity fails to issue a written statement, paragraph (3) shall apply.

(2)(A) If the claimant disputes the public entity's written response, or if the public entity fails to respond to a claim issued pursuant to this section within the time prescribed, the claimant may demand in writing an informal conference to meet and confer for settlement of the issues in dispute. Upon receipt of a demand in writing sent by registered mail or certified mail, return receipt requested, the public entity shall schedule a meet and confer conference within 30 days for settlement of the dispute.

(B) Within 10 business days following the conclusion of the meet and confer conference, if the claim or any portion of the claim remains in dispute, the public entity shall provide the claimant a written statement identifying the portion of the claim that remains in dispute and the portion that is undisputed. Any payment due on an undisputed portion of the claim shall be processed and made within 60 days after the public entity issues its written statement. Any disputed portion of the claim, as identified by the contractor in writing, shall be submitted to nonbinding mediation, with the public entity and the claimant sharing the associated costs equally. The public entity and claimant shall mutually agree to a mediator within 10 business days after the disputed portion of the claim has been identified in writing. If the parties cannot agree upon a mediator, each party shall select a mediator and those mediators shall select a qualified neutral third party to mediate with regard to the disputed portion of the claim. Each party shall bear the fees and costs charged by its respective mediator in connection with the selection of the neutral mediator. If mediation is unsuccessful, the parts of the claim remaining in dispute shall be subject to applicable procedures outside this section.

(C) For purposes of this section, mediation includes any nonbinding process, including, but not limited to, neutral evaluation or a dispute review board, in which an independent third party or board assists the parties in dispute resolution through negotiation or by issuance of an evaluation. Any mediation utilized shall conform to the timeframes in this section.

(D) Unless otherwise agreed to by the public entity and the contractor in writing, the mediation conducted pursuant to this section shall excuse any further obligation under Section 20104.4 to mediate after litigation has been commenced.

(E) This section does not preclude a public entity from requiring arbitration of disputes under private arbitration or the Public Works Contract Arbitration Program, if mediation under this section does not resolve the parties' dispute.

(3) Failure by the public entity to respond to a claim from a contractor within the time periods described in this subdivision or to otherwise meet the time requirements of this section shall result in the claim being deemed rejected in its entirety. A claim that is denied by reason of the public entity's failure to have responded to a claim, or its failure to otherwise meet the time requirements of this section, shall not constitute an adverse finding with regard to the merits of the claim or the responsibility or qualifications of the claimant.

(4) Amounts not paid in a timely manner as required by this section shall bear interest at 7 percent per annum.

(5) If a subcontractor or a lower tier subcontractor lacks legal standing to assert a claim against a public entity because privity of contract does not exist, the contractor may present to the public entity a claim on behalf of a subcontractor or lower tier subcontractor. A subcontractor may request in writing, either on his or her own behalf or on behalf of a lower tier subcontractor, that the contractor present a claim for work which was performed by the subcontractor or by a lower tier subcontractor on behalf of the subcontractor. The subcontractor requesting that the claim be presented to the public entity shall furnish reasonable documentation to support the claim. Within 45 days of receipt of this written request, the contractor shall notify the subcontractor in writing as to whether the contractor presented the claim to the public entity and, if the original contractor did not present the claim, provide the subcontractor with a statement of the reasons for not having done so.

(e) The text of this section or a summary of it shall be set forth in the plans or specifications for any public works project that may give rise to a claim under this section.

(f) A waiver of the rights granted by this section is void and contrary to public policy, provided, however, that (1) upon receipt of a claim, the parties may mutually agree to waive, in writing, mediation and proceed directly to the commencement of a civil action or binding arbitration, as applicable; and (2) a public entity may prescribe reasonable change order, claim, and dispute resolution procedures and requirements in addition to the provisions of this section, so long as the contractual provisions do not conflict with or otherwise impair the timeframes and procedures set forth in this section.

(g) This section applies to contracts entered into on or after January 1, 2017.

(h) Nothing in this section shall impose liability upon a public entity that makes loans or grants available through a competitive application process, for the failure of an awardee to meet its contractual obligations.

(i) This section shall remain in effect only until January 1, 2020, and as of that date is repealed, unless a later enacted statute, that is enacted before January 1, 2020, deletes or extends that date.

SEC. 2. The Legislature finds and declares that it is of statewide concern to require a charter city, charter county, or charter city and county to follow a prescribed claims resolution process to ensure there are uniform and equitable procurement practices.

SEC. 3. If the Commission on State Mandates determines that this act contains costs mandated by the state, reimbursement to local agencies and school districts for those costs shall be made pursuant to Part 7 (commencing with Section 17500) of Division 4 of Title 2 of the Government Code.

Attachment 13 - IRAN CONTRACTING ACT DISCLOSURE FORM

GENERAL REQUIREMENTS

Pursuant to the Iran Contract Act of 2010 (California Public Contract Code, Sections 2202-2208), Proposers are ineligible to propose on projects with a public entity for goods or services of one million dollars (\$1,000,000) or more if the Proposer engages in investment activities in Iran.

Proposers must provide the below disclosure form as a mandatory submittal for all projects in excess of \$1,000,000. The Iran Contracting Act Disclosure Form shall be submitted by all Proposers as a mandatory submittal.

(California Public Contract, Sections 2202-2208)

When responding to a bid or proposal or executing a contract or renewal for a City contract for goods or services of \$1,000,000 or more, a vendor must either: a) certify it is **not** on the current list of persons engaged in investment activities in Iran created by the California Department of General Services (“DGS”) pursuant to Public Contract Code section 2203(b) and is not a financial institution extending twenty million dollars (\$20,000,000) or more in credit to another person, for 45 days or more, if that other person will use the credit to provide goods or services in the energy sector in Iran and is identified on the current list of persons engaged in investment activities in Iran created by DGS; or b) demonstrate it has been exempted from the certification requirement for that solicitation or contract pursuant to Public Contract Code Section 2203(c) or (d).

To comply with this requirement, please provide your vendor or financial institution name and complete **one** of the options on the following page. Please note: California law establishes penalties for providing false certifications, including civil penalties equal to the greater of \$250,000 or twice the amount of the contract for which the false certification was made; contract termination; and three-year ineligibility to bid on contracts. (Public Contract Code section 2205.)

OPTION #1 – CERTIFICATION

I, the official named below, certify I am duly authorized to execute this certification on behalf of the vendor/financial institution identified below, and the vendor/financial institution identified below is **not** on the current list of persons engaged in investment activities in Iran created by DGS and is not a financial institution extending twenty million (\$20,000,000) or more in credit to another person/vendor, for 45 days or more, if that other person/vendor will use the credit to provide goods or services in the energy sector in Iran and is identified on the current list of persons engaged in investment activities in Iran created by DGS.

<i>Vendor Name/Financial Institution (Printed)</i>	
<i>By (Authorized Signature)</i>	
<i>Printed Name and Title of Person Signing</i>	
<i>Date Executed</i>	<i>Executed in</i>

OPTION #2 – EXEMPTION

Pursuant to Public Contract Code sections 2203(c) and (d), a public entity may permit a vendor/financial institution engaged in investment activities in Iran, on a case-by-case basis, to be eligible for, or to bid on, submit a proposal for, or enters into or renews, a contract for goods and services.

If you have obtained an exemption from the certification requirement under the Iran Contracting Act, please fill out the information below, and attach documentation demonstrating the exemption approval.

<i>Vendor Name/Financial Institution (Printed)</i>	
<i>By (Authorized Signature)</i>	
<i>Printed Name and Title of Person Signing</i>	
<i>Date Executed</i>	<i>Executed in</i>

(This Page Intentionally Let Blank)

Attachment 15 - GUARANTEED MAXIMUM PRICE, COST OF WORK AND FEE

West Side Tanks and Pump Station Project

1.0 TOTAL PROPOSED GUARANTEED MAXIMUM PRICE (GMP)

The undersigned proposes and agrees to contract with the City to perform all of the Work for the Design Assist and Construction of the West Side Tanks and Pump Station Project including subsidiary obligations as defined in the Contract, for a **Guaranteed Maximum Price (“GMP”)** of

_____ dollars
(\$_____.00), U.S. Currency.

Subject to the provisions of this Proposal and the Contract, the costs and expenses which the Contractor may include in the Cost of Work for purposes of determining that aspect of the Contractor’s compensation are as set forth below. The Contractor’s total compensation, including Fee and allowable mark-ups, shall not exceed the GMP.

The GMP may be adjusted by Change Order in accordance with the Agreement.

2.0 BREAKDOWN OF GUARANTEED MAXIMUM PRICE

Proposer provides the breakdown of the Contractor’s GMP by major items of work as shown in Table 15-1. The cost breakdown should sum to a total that equals the GMP given in this Attachment 15 Section 1.0 – Total Proposed Guaranteed Maximum Price.

Table 15-1: Breakdown of Guaranteed Maximum Price

Scope Area	Cost
Site Development and Ground Improvements	
Mechanical Equipment and Piping	
Water Storage Tanks	
Pump Station Building	
Electrical, Instrumentation and Controls	
Mobilization, Demobilization, Bonds, Insurance, and Permits	
Sheeting/Shoring/Bracing per Labor Code Section 6707 (From Table 15-5)	
Allowance Items Total (From Table 15-6)	
Total GMP:	

3.0 Schedule of Values

Contractor will be required to submit a complete schedule of values upon selection to facilitate contract negotiation within ten (10) days of notice.

- A. The Schedule of values shall be a form showing a detailed breakdown of quantities and prices of work and materials required to perform and complete the contract, including voluntary proposer allowances.
- B. The Schedule of values shall provide a cost breakdown for each element detailed in the approved Construction Schedule. The total of the price breakdown must agree with the GMP. The elements listed and price breakdown shall not be front end loaded or unbalanced, shall be subject to adjustment between the ENGINEER and the CONTRACTOR, and will be used as a basis for progress payments.
- C. Acceptance of the Schedule of values shall not relieve the CONTRACTOR of the responsibility of performing all the work needed to complete the project at the GMP.

Volume 2 – Agreement incorporates additional details and definitions that pertain to the Guaranteed Maximum Price, Fee, and Cost of Work.

4.0 COST OF THE WORK

The term "Cost of Work" means the sum of all costs necessarily incurred and paid by the Contractor for labor, materials, equipment, subcontractors, special services, bonds, liability, workers' compensation and errors and omissions insurance, direct job overhead expenses, taxes and other necessary expenses incurred in the performance of the Work, that do not exceed the GMP.

4.1 Hourly Field Labor

The cost of hourly field craft labor for workers used in actual and direct performance of the work by the Contractor will be the sum of the following:

- A. The actual wages paid plus any employer payments to, or on behalf of workers for fringe benefits including health and welfare, pension, vacation and similar purposes.
- B. All payments imposed by State and Federal Laws including, but not limited to, workers' compensation insurance, and social security payments. The rates used for workers' compensation insurance shall be actual rates paid by the Contractor for each specific craft and broken down by wage rate if applicable to that craft.
- C. Actual General Liability insurance burden, if applied to Contractor's payroll.

4.2 Hourly Field Craft Labor Rates Limitations

The cost of hourly field craft labor for workers used in actual and direct performance of the work by the Contractor will be limited by the following:

- A. Except as otherwise may be agreed to in writing by the City, the actual wages and benefits paid for manual classifications of Contractor's on-site workers will not, in the aggregate, be greater than the current applicable wage for each classification as established by the State of California Department of Industrial Relations.

- B. Specifically prohibited from the labor costs are other payroll burden factors such as small tools (as defined in Attachment 15 Section 3.6-Construction Equipment), bonuses of any kind and safety incentives.
- C. The Hourly Field Labor Rates will remain unchanged for the duration of the Project unless changed in accordance with an Industry Master Labor Agreement, if the Contractor is signatory to any such Agreements, changes by the Department of Industrial Relations, or changes made company-wide in the Contractor's organization for a craft classification in the Project's geographic area. All changes to these hourly field labor rates must be submitted by the Contractor to the City for review and approval prior to billing the City for work performed with new hourly labor rates. Increase in labor rates is not an allowable increase in the GMP.

4.3 Contractor's Hourly Field Craft Labor Rates

- A. Based on the requirements and limitations of Sections; 3.1-Hourly Field Craft Labor, and 3.2- Hourly Field Craft Labor Rates Limitations, the undersigned Proposer provides their hourly field labor rates set forth in **Table 15-2** for all labor employed by Contractor used in the performance all of the Work for the West Side Tanks and Pump Station Project.
- B. The proposer is to list the crafts and classifications, up to foreman level, they anticipate using in the performance of the work when completing this **Table 15-2**. Should the contractor ultimately use a craft classification not listed in table below, the contractor will submit backup cost information for that craft classification to the city.
- C. Contractor shall include the actual travel and/or subsistence costs, if any, as a separate line item under the labor cost category when submitting progress billings to the City. Except as otherwise may be agreed to in writing by the City, the actual travel and/or subsistence costs will not be more than established in an applicable Master Labor Agreement or the State of California Department of Industrial Relations.

4.4 Management and Administrative Labor

- A. Wages and Salaries of Contractor's supervisory and administrative personnel assigned to this Project to directly manage and administer the Work: These positions may include a Principal-in-Charge, On-site Project Manager, On-site Project Engineer, On-site Superintendents, Yardman/Delivery Driver and On-site Administrative Assistant. These positions will be paid in accordance with the following Table 3 for entire duration of the Project and include all labor burden, overhead and profit mark-ups. The Principal-in-Charge can only charge for hours worked at the Site for this Project and can also charge for attendance of on-site Project Meetings. Any off-site Principal-in-Charge time spent on this Project shall be included in the Contractor's Fee Schedule for the Project under the Contractor's Fee subsection below.
- B. The Contractor is allowed to charge up to a maximum of fifty (50) hours per week for each full-time assigned supervisory and administrative personnel even if an employee works more than fifty (50) hours in a week. The Contractor can only charge for supervisory and administrative hours if they also pay those same hours to the employee that worked up to fifty (50) hours in any given week. The Contractor is not allowed to charge for any supervisory and administrative personnel hours not paid to any employee.

Other company personnel such as Corporate Officers and Division/Area Managers (unless either are designated as the Principle-in-Charge), Quality Control Managers, Safety Officers, Project Schedulers, Project Coordinators, Estimators, Business Supervisors and Accountants are not allowed to charge any hours to the Project. The Proposer should include the anticipated cost of such personnel in the Contractor's Fee Schedule for the Project under the Contractor's Fee Subsection 5.0 below.

- C. Based on the above requirements for Management and Administrative Labor, the undersigned Proposer proposes the rates set forth in **Table 15-3** for all Management and Administrative labor employed by Contractor used in the performance all of the Work for the West Side Tanks and Pump Station Project.

Table 15-3: Management and Administrative Labor Rates

Management and Administrative Position	Hourly Rate
	\$
	\$
	\$
	\$

4.5 Materials

The cost of all materials, including all factory testing, freight and delivery costs of materials, used in performing the work will be the cost to the Contractor from the supplier thereof. All discounts for early payment shall accrue to the Contractor unless the City's payment to Contractor is paid to Contractor before discount payment is due in which case discount savings will be fully credited to the City on next progress billing. All rebates and all returns from the sale of surplus materials shall be credited to the Cost of the Work. Any rebates from future use of re-usable materials, such as concrete forming materials, shall be negotiated between the Contractor and City as materials are evaluated for possible Contractor re-use on other projects.

4.6 Construction Equipment

- A.** The undersigned Proposer proposes the initial Contractor Owned Equipment Rates set forth in Table 15-4 for all Contractor Owned Equipment used in the performance all of the Work for the West Side Tanks and Pump Station Project. The rates found in this table for equipment owned by the Contractor will, in all cases, be understood to cover all fuel, supplies, repairs, maintenance, insurance, ownership, and incidental costs and no further allowances will be made for those items, unless specifically approved in writing by the City.
- B.** Equipment owned by Contractor will only be paid for the actual time equipment is used in performing work and will be rounded to the closest full hour if paid by an hourly rate.
- C.** Compensation for idle time of equipment through delays caused by the City will be made consistent with Article 9-Changes in the Work in the Design-Assist Agreement, provided as Volume 2 to the Contract Documents; however, that the Owned Equipment Rates set forth below in Table 15-4 will apply.
- D.** All changes to these equipment rates must be submitted by the Contractor to the City for review and approval prior to billing the City for work performed with new hourly labor rates. Approved changes to equipment rates are not an allowable increase in the GMP.
- E.** The Proposer is to list the contractor owned construction equipment they anticipate using in the performance of the work when completing this table. Should the contractor ultimately use equipment not listed in table below, the contractor will submit backup cost information for that equipment item to the City for approval.
- F.** Equipment not owned by Contractor which is rented by Contractor and used in performing work will be paid by the City based on actual invoiced cost to Contractor, plus actual fuel/lube costs, provided the rental rate is not in excess of rental rates established by distributors or equipment rental companies in the local area. Owner-operated equipment will also be paid by the City based on actual invoiced cost to Contractor provided the City does not deem any charges excessive. All transportation costs to move equipment on and off the Work will be paid by the City up to a maximum of four (4) hours total travel time each way.
- G.** For equipment with a value less than \$500.00: The Contractor will be paid an amount of three percent (3%) of total hourly field labor costs as defined in paragraph 3.3-Contractor's Hourly Field Craft Labor Rates above to cover the cost of small tools and safety supplies for work directly performed at the Site.

Table 15-4: Contractor Owned Equipment. Contractor Name: _____

Equipment Description	Hourly Rate	Daily Rate

Attach additional sheets as needed.

3.7 Subcontractors and Sub Tier Subcontractors

The Contractor will be paid for all work performed by a subcontractor at the actual invoiced amount. Should a Subcontractor be required to perform extra work caused by a contract change order, the subcontractor will be allowed a mark-up as provided for in the General Conditions.

3.8 Bonds and Insurance

The Contractor will be paid the actual cost for the 100% payment bond and 100% performance bond, as well as the cost of all insurance costs required for the Work (such costs are deemed a Cost of Work and are therefore contained within the GMP). Additional details regarding requirements for Bonds and Insurance are included in Volume 2 of the Contract Documents – Agreement Article 11 – Insurance and Bonds; Indemnification.

3.9 Direct Job Overhead Expenses

The Contractor will be paid for the actual cost of job overhead expenses which may include such expenses as office trailers, storage vans, temporary fencing/security, toilets, dumpsters, waste removal, water, utility power, jobsite landline telephone costs, jobsite internet provider costs, reasonable room and board subsistence for employees who live farther than 40 miles from the Work Site or as required by California prevailing wage laws, copy machine, water cooler and any office furniture required for the Work needs, including mobilization and demobilization of same. There will be no warranty reserve.

3.10 Taxes

The Contractor acknowledges it will be liable for all sales, use, gross receipts or other taxes, tariffs or duties related to the Work and that these taxes and tariffs are included in the GMP. All invoices to the City will include the applicable taxes and tariffs that are the Contractor's responsibility and will not be shown as a separate line item on the Contractor's invoice.

4.0 CALIFORNIA LABOR CODE SECTION 6707

Pursuant to the provisions of California Labor Code Section 6707, each Proposal submitted in response to this RFP shall contain, as a separate cost item, adequate sheeting, shoring, and bracing, or equivalent method, for the protection of life or limb in trenches and open excavation, exceeding five (5) feet, which shall conform to applicable safety orders. By entering an amount for this cost item below, the Proposer warrants that its action does not convey tort liability to the City, the Engineer, the Construction Manager, the Funding Agencies and their respective officers, employees, agents, and subconsultants.

Table 15-5: Total Amount for Worker Protection for CA Labor Code Section 6707

Protection in trenches and Open Excavations - Description	Total Cost
	\$

5.0 SPECIAL SERVICES

Special work or services are defined as that work not included in this agreement and characterized by extraordinary complexity, sophistication, or innovation or a combination of the foregoing attributes which are unique to the construction industry. These special services may include such services as registered land surveyor, licensed geotechnical engineer, licensed structural engineer, special testing or laboratory work. The Contractor will be paid for special services based on actual invoiced cost, provided the City does not determine any special services costs to be excessive.

6.0 VOLUNTARY PROPOSER ALLOWANCES

The Proposer is allowed to propose allowances for minor portions of the Work. Proposers are limited to a maximum of three (3) proposed allowances and the total amount for all proposed allowances cannot exceed One Hundred Fifty Thousand Dollars (\$150,000.00).

Each proposed allowance description should be well-defined. There is no scoring points assigned to any proposed allowances, but they may be discussed during the final negotiations with the highest ranked

Proposer. Proposers are not required to propose an allowance item; it is strictly voluntary. Allowances shall not be considered for compensation as defined in Attachment 16 – PROPOSED SHARED SAVINGS.

The following Proposer's cost allowances and allowance amounts are included in the GMP:

Table 15-6: Proposer's Cost Allowances

Item#	Allowance Description	Allowance Amount
1		\$
2		\$
3		\$
	Total of Allowances:	\$

7.0 ITEMS NOT INCLUDED IN THE COST OF WORK:

- A.** Salaries and other compensation of Contractor's personnel stationed at Contractor's principal office or offices other than the Site, except as specifically provided in this Attachment 15 Section 3.4 – Management and Administrative Labor.
- B.** Expenses of Contractor's principal office and offices, other than the Site office.
- C.** Contractor's General Overhead and Expenses, except as specifically provided for in the Contract Documents.
- D.** The capital expenses of Contractor, including interest on capital employed for the Work and charges to Contractor for delinquent payments.
- E.** Hours in excess of fifty (50) hours per week for each full-time assigned supervisory and administrative personnel even if a supervisory or administrative employee works more than fifty (50) hours in a week.
- F.** Costs due to correction of Defective Work, disposal of materials or equipment wrongfully supplied, and making good any damage to property.
- G.** Costs that would cause the GMP to be exceeded.
- H.** Any costs incurred after Owner's Final Acceptance of the Project.

8.0 CONTRACTOR'S FEE MARKUPS

- A. The undersigned Proposer proposes the following mark-up fees for general overhead and profit in the performance all of the Work for the West Side Tanks and Pump Station Project as shown in Table 15-7.

Table 15-7: Contractor's Fee Mark-up Schedule

Attachment 15 Section	Cost Category	Fee Mark-Ups For General Overhead And Profit
3.1-3.3	Hourly Field Labor	%
3.4	Management and Administrative Labor	Included in hourly rates
3.5	Materials	%
3.6	Construction Equipment	%
3.7	Subcontractors	%
3.8	Bonds and Insurance	%
3.9	Direct Job Overhead Expenses	%
3.10	Taxes	%

- B. Based on the above percentages for each cost category, the Proposed Total Fee Markup-for General Overhead and Profit percentage included in the Contractor's GMP is ____%.

****END OF ATTACHMENT 15****

Attachment 16 – PROPOSED SHARED SAVINGS

West Side Tanks and Pump Station

In the event the final Cost of Work, plus the Proposed Total Fee Mark-up for General Overhead and Profit, is less than the GMP, as adjusted by the Change Orders, the undersigned Proposer proposes a sharing of the savings as follows.

_____ % of the savings to the City

_____ % of the savings to the Contractor

Percent of Savings to the contractor must be a minimum of 20% plus the Total Fee Markup percentage for General Overhead and Profit as shown in the GMP (Attachment 15, Paragraph 7.0.B).

Should there be savings shared, City will pay the Contractor its share of the savings at the same time as the final retention payment.

DESIGN-ASSIST CONSTRUCTION AGREEMENT

WESTSIDE TANKS AND PUMP STATION

This Design-Assist Construction Agreement (“Agreement”) is made and entered into on this ____ day of _____, 20____, by and between the CITY of Roseville, a municipal corporation (“CITY”), and Auburn Constructors, LLC (CSLB License #_1043407 A, B, C10), doing business as a Limited Liability Corporation hereinafter referred to as “CONTRACTOR”).

RECITALS

WHEREAS, the CITY has issued a Request for Proposals (“RFP”) pursuant to which CITY solicited proposals from design-assist contractors to construct the Westside Tanks and Pump Station Project (Project); and

WHEREAS, CONTRACTOR has submitted a Proposal, dated __January 30, 2020__ attached hereto and made a part hereof as Exhibit B – Scope of Work from Contractor’s Technical Proposal, and CITY has selected CONTRACTOR to provide design and construction services as set forth in this Agreement; and

WHEREAS, CONTRACTOR is ready, willing and able to perform the aforementioned services required in accordance with the terms and conditions of this Agreement; and

NOW, THEREFORE, CITY and CONTRACTOR agree as follows:

ARTICLE 1 - DEFINITIONS OF LANGUAGE USED, WORDS AND TERMS

Where used in the Contract Documents, the following words and terms shall have the meanings indicated. The meanings shall be applicable to the singular, plural, masculine and feminine of the words and terms.

The Contract Documents include the terms “as allowed,” “as approved,” “as ordered,” “as directed” or terms of like effect to authorize an exercise of professional judgment by the CITY, Construction Manager or Engineer. The adjectives/terms “reasonable,” “suitable,” “acceptable,” “proper,” “satisfactory,” and “of like effect” are used to describe an action or determination of the CITY, Construction Manager or Engineer as to the Work. It is intended that such exercise of professional judgment, action or determination will be solely to evaluate, in general, the Work for compliance with the requirements of and information in the Contract Documents and conformance with the design concept of the completed Project as a functioning whole as shown or indicated in the Contract Documents (unless there is a specific statement indicating otherwise). The use of any such term is not intended to and shall not be effective to assign to CITY, Construction Manager or Engineer any duty or authority to supervise or direct the performance of the Work or any duty or authority contrary to the other provisions of the Contract Documents.

Specification Section Paragraphs entitled "Section Includes" summarize briefly what is generally included in the section. Requirements of Specifications are not limited by "Section Includes" paragraphs.

Specifications and Drawings have been partially streamlined by intentionally omitting words and phrases, such as "the Contractor shall," "in conformity therewith," "shall be" following "as indicated," "a," "an," "the" and "all." The phrases "by CITY’s Representative", “by Engineer”, and “by Construction Manager” modify words such as "accepted," "directed," "selected," "inspected," "permitted," “submit”,

“report”, and “satisfactory” when they are unmodified. Words "Contractor shall" are implied when direction is stated.

Colons (:) are used to introduce a list of particulars, an amplification, or an illustrative quotation. When used after designation of product, colons are used in place of words “shall be.”

Whether the term or phrase is capitalized or in all capitals (for example, Contractor or CONTRACTOR) in the Contract Documents shall be deemed to be the same for purposes of the Definitions of Language Used, Words and Terms.

- 1.1. **“Agreement” or “Contract”** means this Design-Assist Construction Agreement, its exhibits, and all amendments and/or modifications hereto executed by the parties. The defined terms “Contract” and “Agreement” may be used throughout interchangeably and should be considered as one in the same defined term.
- 1.2. **“Allowance” or “Construction Allowance”** is an amount of money set aside under the Contract for a special purpose identified and defined in the Contract Documents. Voluntary Allowance items are described by Contractor in Exhibit C – Guaranteed Maximum Price, Fee, and Cost of Work and are included in the total GMP.
- 1.3. **“Applicable Laws”** means all laws, codes, ordinances, rules and regulations of **governmental** authorities having jurisdiction over the Site and/or the Work.
- 1.4. **“Application for Payment”** means the document prepared by CONTRACTOR and **submitted** to CITY showing CONTRACTOR’s entitlement to progress payments, the requirements of which are more fully described in Article 8 hereof.
- 1.5. **“Architect/Engineer”** means a licensed professional(s) (and/or entity(ies)) retained by CITY, who provides architectural, design and/or engineering services as may be required by the Work. The Architect/Engineer shall be registered in the State of California and the architect and/or engineer of record for the Work pursuant to their design responsibilities. The Architect/Engineer may be substituted or replaced at the discretion of CITY.
- 1.6. **“Asbestos”** is any material that contains more than one percent asbestos and is friable or is releasing asbestos fibers into the air above current action levels established by the United States Occupational Safety and Health Administration.
- 1.7. **“Authorized Representatives”** means the Design-Assist Team and those individuals appointed by CITY and CONTRACTOR from time to time in accordance with the provisions of Article 4.2.1.
- 1.8. **“Beneficial Occupancy” or “Beneficial Occupation”** is a term that can be used to describe a distinct portion of the Work, that in the CITY’s Representative’s opinion, is capable of being used for its intended purpose, even though it may have some minor deficiencies, including outstanding punch list items to complete.
- 1.9. **“Business Day”** means any day when the office of the CITY Clerk of the CITY of Roseville is open for business.
- 1.10. **“Certificate of Substantial Completion”** means a certificate prepared by CONTRACTOR in accordance with Article 8.13 and forwarded to CITY.
- 1.11. **“Certificate of Final Completion”** means a certificate prepared by CONTRACTOR and forwarded to CITY stating that the Project is finally complete and that CONTRACTOR is entitled to Final Payment in accordance with Article 8.14 hereof.
- 1.12. **“Change Directive”, “Change Order”, or “Construction Change Directive (CCD)”** is a written order prepared by the Construction Manager and signed by the CITY, directing a change

in the Work and stating a proposed basis for adjustment, if any, in the Contract GMP amount or Contract Time.

- 1.13. **“Change Proposal”** means a proposal for a Change Order submitted by CONTRACTOR to CITY, either at the request of CITY, or at CONTRACTOR's own initiative.
- 1.14. **“CITY”** refers to the CITY of Roseville, the governing body of which is termed the “CITY Council”.
- 1.15. **“CITY’s Representative”** is the person(s) designated by the Director of the CITY’s Environmental Utilities Department who has been duly authorized to exercise control and supervision of the Work. A CITY’s Representative generally will be either a professional engineer or architect, depending on the nature of the Work, but is not required to be a professional engineer or architect. The CITY may change the individual(s) acting as the CITY’s Representative(s), or delegate one or more specific functions to one or more specific CITY’s Representative at any time without notice and without liability to Contractor. Each CITY’s Representative is the beneficiary of all Contractor obligations to CITY, including without limitation, all releases and indemnities
- 1.16. **“Claim”**. A demand or assertion by the Contractor seeking an adjustment of the GMP or Contract Times, or both, or other relief with respect to the terms of the Contract. A demand for money or services by a third party is not a Claim.
- 1.17. **“Construction Documents”** means the plans and specifications prepared by the Design Assist Team for the Project, approved by CITY, and incorporated into this Agreement by reference after such approval, to be used to construct the Project. The Construction Documents shall set forth in detail all items necessary to complete the construction of the Project in accordance with the Contract Documents (subject to their completion following commencement of the Construction Phase). All amendments and modifications to the Plans and Specifications must be approved by CITY prior to incorporation into this Agreement. CONTRACTOR’s attention is hereby directed to the confidentiality requirements of Article 2.12.
- 1.18. **“Construction Consultant”**. The CITY may retain a Construction Consultant(s) as it deems necessary to assist/advise the CITY staff and/or other CITY consultants during the progress of the Work. Any Construction Consultant retained by CITY for this Project will not have any formal contract administration responsibilities. The Construction Consultant(s) is the beneficiary of all Contractor obligations to CITY, including without limitation, all releases and indemnities.
- 1.19. **“Construction Manager”** is the person designated, in writing, by the CITY to act as its representative at the Site and to perform administrative functions relating to this Agreement. The Construction Manager shall also furnish inspection services as provided by the contract between the Construction Manager and the CITY. All contact between the Contractor and the CITY shall be through the Construction Manager; unless otherwise specified or directed. Only the CITY may modify the Agreement. The CITY may assign all or part of the CITY’s Representative’s duties, rights and responsibilities to the Construction Manager. The Construction Manager is the beneficiary of all Contractor obligations to CITY, including without limitation, all releases and indemnities.
- 1.20. **“Construction Phase”** means the period beginning with the issuance of the Construction Notice to Proceed (NTP) and ending on the date of Final Completion of the Project.
- 1.21. **“Construction Work”** means that portion of the Work consisting of the provision of labor, materials, equipment and services in connection with the construction of the Project as set forth in the Contract Documents.
- 1.22. **“Contingency Costs”** means those items of Cost of the Work attributable to a contingency for

which CITY is responsible and which are payable by CITY to CONTRACTOR pursuant to a Change Order as provided in Article 9.7-CHANGE ORDERS ON ACCOUNT OF CONTINGENCIES.

- 1.23. **“Contract”** means this Design-Assist Construction Agreement, its exhibits, and all amendments and/or modifications hereto executed by the parties. The defined terms “Contract” and “Agreement” may be used throughout interchangeably and should be considered as one in the same defined term.
- 1.24. **“Contract Documents”** means 1) the Request for Proposals (and Contractor’s Proposal), 2) this document (Agreement) and its Exhibits, 3) the Technical Specifications, and 4) Project Drawings, all of which form the entire integrated agreement between CITY and CONTRACTOR. In the event of a conflict between any of these documents, this Agreement controls, followed by its Exhibits.
- 1.25. **“Contract Time”** The number of days or the dates stated in the Agreement to: (i) achieve Milestones, (ii) achieve Substantial Completion; and (iii) complete the Work so that it is ready for final payment as evidenced by Construction Manager’s written recommendation of final payment. See Exhibit H - COMPLETION TIMES AND LIQUIDATED DAMAGES.
- 1.26. **“CONTRACTOR”** means the individual or entity identified in the preamble to this Agreement.
- 1.27. **“CONTRACTOR’S Plant and Equipment”** means the equipment, material, supplies and all other items, except labor, brought onto the Site by the Contractor to carry out the Work, but not to be incorporated in the Work.
- 1.28. **“CONTRACTOR Event of Default”** shall have the meaning set forth in Article 14.1 hereof.
- 1.29. **“Cost of the Work”** consists of those items of Work, which are paid for by CITY to CONTRACTOR, and consist of those categories of costs set forth as allowable on Exhibit C.
- 1.30. **“County”** refers to Placer County where the Site is located.
- 1.31. **“CPM”** means a critical path method schedule in the form of precedents, networks and time sequences.
- 1.32. **“Day” or “Days”** means calendar days, including legal holidays, Saturdays and Sundays, unless specifically noted otherwise. The day shall be 24 hours measured from midnight to the next midnight.
- 1.33. **“Defective Work”** refers to Work that does not meet the requirements of the Contract Documents and has been identified to the Contractor by the Construction Manager in writing because the Work:
 - a. Does not meet the requirements of or conform to the Contract Documents; or
 - b. Does not meet the requirements of any applicable inspection, reference standard, test, or approval referred to in the Contract Documents; or
 - c. Has been damaged prior to Construction Manager’s or Engineer’s recommendation of final payment (unless responsibility for the protection thereof has been assumed by CITY as of the Substantial Completion date in accordance with the Contract Documents).

Punch list or other minor corrective items of work that are not in compliance with the Contract Documents do not meet to the definition of “Defective Work” as used in these Contract Documents. For work to be deemed “Defective Work,” the Construction Manager must have notified the Contractor in writing of a defective item of the Work.

- 1.34. **“Design-Assist Team”** includes the following: Architect/Engineer; CONTRACTOR; and/or others as coordinated by CONTRACTOR and CITY.
- 1.35. **“Design Development Documents”** means the drawings, specifications and other documents prepared by the Design-Assist Team for CITY's review and approval prior to the preparation of the Construction Documents. The Design Development Documents shall illustrate the scale and relationship of Project components, outline the nature and structural exterior and three dimensional scale of the Project and shall fix and describe in detail the configuration and character of the Project concerning all items of the Project necessary for the complete and final preparation of the Construction Documents in accordance with the requirements of the Contract Documents, including architectural and electrical systems, materials and such other elements as may be appropriate. CONTRACTOR's attention is hereby directed to the confidentiality requirements of Article 2.12.
- 1.36. **“Design Materials”** means any and all documents, shop drawings, electronic information, data, plans, drawings, sketches, illustrations, specifications, descriptions, models and other information developed, prepared, furnished, delivered or required to be delivered by CONTRACTOR to CITY under the Contract Documents or developed or prepared by CONTRACTOR specifically to discharge its duties under the Contract Documents. CONTRACTOR's attention is hereby directed to the confidentiality requirements of Article 2.12.
- 1.37. **“Design-Assist Work”** means that portion of the Work consisting of the design-assist services required to be provided in connection with the Architect/Engineer's design of the Project as set forth in the Contract Documents, which shall be performed consistent with the standards of care set forth herein.
- 1.38. **“Direct”** is an action of the CITY or Construction Manager by which the Contractor is ordered to perform or refrain from performing work under the Agreement.
- 1.39. **“Drawings”**, also referred to as **“Plans”** are that part of the Contract Documents consisting of the graphical and technical requirements of the Agreement as included on the plan, profile, section and detail sheets, included in a response to Request for Information or any revisions issued by Engineer. Drawings, or reproductions thereof, show the location, character, dimensions and details of the Work to be done. Shop drawings and other Contractor submittals are not Drawings as so defined.
- 1.40. **“Engineer”**. The engineer, architect or specialty design consultant designated by the CITY to have design control over the Work or a specified portion of the Work, acting either directly or through duly authorized representatives. Such representatives shall act within the scope of the particular duties delegated to them. The Engineer may also furnish inspection services as provided by the Agreement. The Engineer may also be referred to as the “CITY's Representative” if the definition is used in an Engineer role and capacity. The CITY may assign all or part of the CITY's Representative's duties, rights and responsibilities to the Engineer. The Engineer is the beneficiary of all Contractor obligations to CITY, including without limitation, all releases and indemnities.
- 1.41. **“Equipment”** (Construction) is all machinery and equipment, together with the necessary supplies for upkeep and maintenance, including tools and apparatus necessary for the proper construction and acceptable completion of the Work contemplated. Equipment (Installation) is all material or articles used in equipping a facility or apparatus required to fulfill a functional design.
- 1.42. **“Execution”** means field or site performance, workmanship, installation, erection, application, field fabrication, quality control, and protection of installed products on the Site.

- 1.43. **“Excusable Delay”** shall have the meaning set forth in Article 7.3.3.
- 1.44. **“Extra Work”** is new or unforeseen work, or added work of a different character or function; or that involves revisions of the details of the Work on which Contractor based its GMP. If the extra work increases the Contractor’s Cost of the Work and/or time to perform the Work, and is approved by the CITY via a written Change Order, the GMP and/or Contract Times shall be adjusted as provided in the Contract Documents. Extra Work shall not include Work which is shown, detailed or specified in the Contract Documents or which constitutes “Incidental Work” as defined within the Contract Documents definition below.
- 1.45. **“Fee”**, if applicable, means the fee payable to CONTRACTOR pursuant to this Agreement and as part of the GMP, if shown on Exhibit C – GUARANTEED MAXIMUM PRICE, COST OF WORK AND FEE attached hereto.
- 1.46. **“Field Directive”** is a change in the scope of the Agreement that does not cause an increase in the Cost of the Work, nor an adjustment to the GMP or the Contract Time(s), unless the Construction Manager determines the Field Directive warrants a Change Order.
- 1.47. **“Field Order”** is a written instruction given to the Contractor by Construction Manager authorizing work that is a change to the scope of Work to be performed on a time and material basis or a lump sum cost agreed to between CITY and the Contractor and documented in a Change Order.
- 1.48. **“Final Acceptance”** is the formal approval by CITY in accepting a portion of the Contractor’s work as completed.
- 1.49. **“Final Completion”** means the date when the work is 100% complete in accordance with the terms and conditions of the Contract Documents, including completion of all Punch list items as certified by the Construction Manager.
- 1.50. **“Force Majeure”** includes industry wide or nationwide labor dispute (excluding labor shortage), fire, unusual delay in transportation or delivery, unavoidable casualty, flood (assuming CONTRACTOR has taken reasonable precautions), earthquake, epidemic, civil disturbance, war, freight embargo, riot, sabotage (by persons other than CONTRACTOR or Subcontractors), material shortage or any other similar act or condition, in each case only to the extent the event in question is beyond the reasonable control of and without the fault or negligence of CONTRACTOR. It is expressly agreed that the following matters shall not constitute Force Majeure:
- a. Lack of or inability to use funds for any reason;
 - b. Any occurrence which results from the wrongful act, or wrongful omission, of the affected party, or the failure by the affected party to act in a prudent and proper manner and in accordance with good and accepted industry practices;
 - c. Any failure by the affected party to reach agreement with any third party necessary to enable the affected party to perform its obligations under this Agreement;
 - d. An event or circumstance, where the event or circumstance, or its effects on the affected party, or the resulting inability of the affected party to perform its obligations could have been prevented, overcome or remedied by the exercise by the affected party of the standard of care and diligence consistent with that of a reasonable and prudent person;
 - e. Breakdown of Contractor’s Equipment;
 - f. Strike or industrial action of Contractor’s employees or those of subcontractors; or
 - g. Adverse weather conditions including, without limitation, wet weather, unless the

weather is unusually severe for the Site.

- 1.51. **“Governmental Approvals”** means those CITY approvals necessary for the completion of the Project, including, but not limited to, modification of existing zoning, vacation of certain streets and/or alleys, and modifications to or variances from applicable building or zoning regulations.
- 1.52. **“Guaranteed Maximum Price” or “GMP”** means the amount set forth on Exhibit C- GUARANTEED MAXIMUM PRICE, FEE, AND COST OF WORK hereto, which may be increased or decreased in accordance with the provisions of the Contract Documents.
- 1.53. **“Hazardous Materials”** means those items identified on Exhibit E-HAZARDOUS MATERIALS hereto.
- 1.54. **“Holidays”** are the legal holidays as designated by the CITY including: New Year’s Day, Martin Luther King Jr. Day, President’s Day, Memorial Day, Independence Day, Labor Day, Columbus Day, Veteran’s Day, Thanksgiving Day, the day after Thanksgiving and Christmas Day.
- 1.55. **Incidental Work.** Incidental work includes reasonably implied parts of the not shown on Drawings nor described in Specifications, but which is necessary or normally or customarily required as a part of the Work shown on the Drawings or described in the Specifications to provide a complete installation which is fully connected and tied into the existing facilities and processes and is fully functional and operational. Incidental work shall be treated as if fully described in Specifications and shown on Drawings, and expense thereof shall be included in the GMP. Incidental work shall be performed by Contractor and included in the Cost of the Work without an increase in the GMP.
- 1.56. **“Indemnified Parties”** includes, but is not limited to, CITY, its agents, officers, employees, and volunteers.
- 1.57. **“Inspector”** shall mean the person(s), firm(s), or agency(ies) employed by the CITY to perform inspection during construction of the Work, under the direction of the Construction Manager. It shall also mean any representative of the CITY who will perform inspections of the Work for code compliance and quality assurance reporting in addition to those inspections performed by the CITY’s Representative and/or the Engineer. Said inspector may be the Construction Manager or may be another representative of the CITY.
- 1.58. **“Liquidated Damages”** means the damages payable by CONTRACTOR to CITY in the event CONTRACTOR does not achieve project Milestones Final Completion of the Project by the date required on the Schedule, as adjusted, as more fully described in Article 7.5 and Exhibit H- COMPLETION TIMES AND LIQUIDATED DAMAGES hereof.
- 1.59. **“Modification”** means an amendment to this Agreement executed by the parties after the date hereof.
- 1.60. **“Non-Excusable Delay”** shall have the meaning set forth in Article 7.3.2.
- 1.61. **“Notice of Completion”** is the formal action taken by the CITY in determining that the Contractor’s Work has been completed, or as delegated pursuant to a CITY Council resolution, accepting the Work as fully completed. The written notice is signed by the CITY and filed with the County Recorder.
- 1.62. **“Notice to Proceed” (NTP)** is the written notice given by the CITY to the Contractor fixing the date on which the Contract Times will commence to run and on which Contractor shall start to perform the Work under the Contract Documents.
- 1.63. **“Or Equal”** means any product, equipment, material, thing, service, mean/method or service which is proposed by the Contractor for use in the Work, which is equal to or better than, and is

as suitable as the product, equipment, material, thing, service, mean/method or service specified in the Contract Documents as to function, performance, reliability, quality, schedule and general configuration. Any “or equal” substitutions must be approved by the CITY.

- 1.64. **“Owner”** refers to the CITY, or authorized representative as approved by the CITY.
- 1.65. **“Party”** shall mean CITY or CONTRACTOR individually, and **“Parties”** shall mean CITY and CONTRACTOR collectively.
- 1.66. **“Payment and Performance Bonds”** means the payment bond and performance bond issued by an admitted Surety covering the faithful performance and completion of the Construction Work, including payment for all materials and labor furnished or supplied in connection with the Construction Work, by CONTRACTOR. Such bonds shall be in the form described in Exhibit G-BOND FORMS.
- 1.67. **“Plans”**. See “Drawings”.
- 1.68. **“Project”** means the design and construction of the project described in the Recitals, together with all on-site infrastructure, site improvements and appurtenances to be designed, constructed and installed in connection therewith, as more fully set forth and described in the Contract Documents and as required thereby or reasonably inferred therefrom.
- 1.69. **“Project Manager”** means the person assigned by the Director of the CITY’s administering department to monitor the Project and Work.
- 1.70. **“Proposal”** is the offer of a Proposer to perform the Work pursuant to completed prescribed Bid Proposal requirements and forms, properly executed and guaranteed, and timely submitted.
- 1.71. **“Punch List”** means those minor items of Work to be completed after Substantial Completion and prior to Final Completion, which do not prevent the Project from being used for the purpose for which it is intended and which will not prevent beneficial occupancy or use.
- 1.72. **“Reference Specifications”** are those standards, rules, method of tests or analysis, codes, and specifications of other agencies, engineering societies, or industrial associations referred to in the Contract Documents.
- 1.73. **“Request for Information”** also referred to as “Request for Clarification”. A Request for Information (RFI) is issued by the Contractor to the Construction Manager requesting additional information necessary to clarify or amplify an item in the Contract Documents that the Contractor believes is not clearly shown or called for in the Drawings or Specifications or other portions of the Contract Documents, or to address problems which have arisen under field conditions. A RFI is not to be used for request for materials/equipment substitutions or value engineering/cost reduction incentive proposals.
- 1.74. **“Request for Quotation”** is a request for a proposed cost made to the Contractor by the CITY to add, delete or change the Work. A Request for Quote (RFQ) shall not be deemed to be a direction to proceed with any addition, deletion or change to the Work.
- 1.75. **“Retention”** means the amount withheld from progress payments from CITY to CONTRACTOR from time to time, as more fully described in Article 8.6-RETENTION, ESCROW AGREEMENT, FINAL PAYMENTS hereof.
- 1.76. **“Samples”** refers to physical examples of materials, equipment, or workmanship that are representative of some portion of the Work and which establish the standards by which such portion of the Work will be judged.
- 1.77. **“Schedule”** means the schedule pursuant to the Proposal and/or other Contract Documents to which CONTRACTOR has agreed to complete the Work. The Schedule shall be adjusted

pursuant to the provisions of the Contract Documents. In the event the Schedule is not contained within the Proposal, then CONTRACTOR shall provide to CITY, within fifteen (15) days of issuance of a Notice To Proceed by CITY, with a complete milestone schedule identifying, among other things, critical paths (if any) and total calendar days until Substantial and Final Completion. In the event the Schedule is contained in the Proposal, the start of the Schedule shall be adjusted by the CONTRACTOR to reflect the date of the Notice To Proceed.

- 1.78. **“Scheduled Date of Substantial Completion”** means the date CONTRACTOR has agreed to achieve Substantial Completion of the Project in accordance with the Schedule, as adjusted.
- 1.79. **“Scope Change Costs”** means those items of Cost of the Work attributable to changes in scope of the Work and payable by CITY to CONTRACTOR pursuant to a Change Order, as provided in Article 9-CHANGES IN THE WORK.
- 1.80. **“Separate Contractors”** means those individuals or entities (including, but not limited to, concessionaires) who have entered into arrangements with CITY for the provision of labor, materials or other services in connection with the Project.
- 1.81. **“Shop Drawings (Submittals)”** are drawings, diagrams, illustrations, schedules, performance charts, instructions, brochures, and other data which are prepared by the Contractor or any subcontractor, manufacturer, supplier, or distributor and which illustrate some portion of the Work.
- 1.82. **“Site”** is the real property on which the Project will be located.
- 1.83. **“Specifications”** are that part of the Contract Documents consisting of written descriptions of the technical features of materials, equipment, construction systems, standards, and workmanship.
- 1.84. **“Specify”** refers to information described, shown, noted or presented in any manner in any part of the Agreement.
- 1.85. **“State”** is the State of California.
- 1.86. **“State of California Specifications”** are the State of California Department of Transportation Standard Specifications in effect as documented in the Specifications and/or Drawings. Also referred to as State Standard Specifications and Caltrans Standard Specifications.
- 1.87. **“Subcontract”** means an agreement between CONTRACTOR and another person or entity engaged to perform a portion of the Work.
- 1.88. **“Subcontractor”** means an individual or entity who has entered into an agreement with CONTRACTOR or another Subcontractor for the provision of labor, materials or other services required to be performed by CONTRACTOR under the Contract Documents.
- 1.89. **“Subcontractor-KEY”**. Key subcontractors are defined as a subcontractor who will perform greater than or equal to twenty-five percent (5% of the GMP).
- 1.90. **“Subcontractor-MAJOR”**. Major subcontractors are defined as a subcontractor who will perform greater than five percent (20%) of the GMP.
- 1.91. **“Subcontractor-LISTED”**. Listed subcontractors are defined as a subcontractor who will perform greater than one half percent (>0.5%) of the GMP.
- 1.92. **“Submittals”** are the information which is specified for submission to the Construction Manager in accordance with the Contract Documents.
- 1.93. **“Substantial Completion”** means the stage in the progress of the Work when the Work or a designated portion thereof is sufficiently complete in accordance with the Contract Documents

so that CITY may use the Project for its intended purpose. Determination of Substantial Completion is solely at the discretion of the CITY. Substantial Completion does not mean complete in accordance with the Agreement nor shall Substantial Completion of all or any part of the Project entitle the Contractor to Final Completion under the Agreement.

- 1.94. **“Surety”** means one or more issuers of the Payment and Performance Bonds, each of which shall be admitted and licensed to do business in the State of California.
- 1.95. **“Surveyor”** means a land surveyor licensed in the State of California.
- 1.96. **“Trade Names”**. Where a certain product is called by its Trade Name, it is intended as a guide for type and quality.
- 1.97. **“Typical Details”** are details of standard structures, devices or instructions referred to on the Plans and Specifications by title or number and developed by the Engineer.
- 1.98. **“Underground Facilities”** means all underground pipelines, including but not limited to, conduits, ducts, cables, wires, manholes, vaults, tanks, tunnels, or other such facilities or attachments, and any encasements containing such facilities, including those that convey electrical, gases, steam, liquid petroleum products, telephone or other communications, cable television, water, wastewater, storm water, other liquids or chemicals, or traffic or other control systems.
- 1.99. **“Unit Price Work”** is work to be paid for on the basis of unit prices.
- 1.100. **“Utility”** is a public or private fixed works for, including but not limited to, the transportation of fluids, gasses, power, signals, or communications.
- 1.101. **“Work” or “Scope of Work”** means the Project, inclusive of all labor, materials and services required to be performed or provided by CONTRACTOR officers, employees, agents, Subcontractors or Suppliers pursuant to the provisions of this Agreement and its Exhibits.
- 1.102. **“Work Day”**. A working day is defined as any day, except Saturdays, Sundays and CITY’s Legal Holidays. Any work scheduled by the Contractor on non-working days (Saturdays, Sundays, and CITY Legal Holidays) shall be verified with the CITY at least 72 hours in advance. Depending on the circumstances, the CITY may request Contractor compensation for inspection work, at an hourly rate, for any work performed on non-working days and for overtime.

ARTICLE 2 - SCOPE OF WORK / PROJECT REQUIREMENTS

2.1 Scope of Work Summary

The CITY, in conjunction with its Engineer and other consultants, developed the Design-Assist and Construction Contract Documents for the Westside Tanks and Pump Station Project. The Work includes but is not limited to Construction of two (2) new six (6) million gallon water storage tanks, New CMU block Booster Pump Station building and equipment, Tank valve vault, Electrical site work and 1,500 kW standby diesel generator, Electrical switchgear, Instrumentation and Controls, Contractor Design Assist Responsibilities, and all other miscellaneous improvements in support of the Project, including asset management, start up and testing to provide a complete, integrated and operational system in all respects.

Based on the Final Design Submittal, and in accordance with the Contract Documents, the Contractor is a Design-Assist Team member with responsibility to complete the following design assist activities. Coordination with other members of the Design-Assist Team will be required; the City, Engineer, Construction Manager and possibly other personnel that have regulatory or funding authority.

- A. Conduct a constructability review of the Final Design Submittal Drawings and Specifications, and submit comments and identified mitigation solutions to the City.
- B. Identify cost savings and added value alternative design/construction solutions, and submit to the City for evaluation.
- C. Develop detailed cost estimates for identified alternatives when requested by City for the City's evaluation.
- D. Identify construction sequencing and the impacts of the identified alternatives on the sequencing.
- E. Develop a detailed schedule and the impacts of the identified alternatives on the schedule.
- F. Participate in a cooperative partnership relationship with City, Engineer, and Construction Manager to develop a comprehensive construction plan to address project risk and minimize existing facility disruptions.
- G. Participate in up to eight (8) Final Design Coordination Meetings lasting up to four (4) hours each to present and work collaboratively to allow for issuance of the Project Drawings and Specifications for construction.

Note that the Engineer is the entity professionally responsible for the design of the Project. City acknowledges that Contractor is a general contractor and not an architect or engineer. Except with respect to any subcontractors of Contractor providing architectural or engineering services for the Project as design-build work, the Contractor's review of or input for any design documents, or Contractor's recommendation for any design concepts, is made solely in Contractor's capacity as a licensed contractor and not as a licensed design professional. Contractor is not responsible for any errors in the Engineer's design or failure of the design to comply with applicable laws, codes, rules and regulations, or lawful orders of public authorities. However, if Contractor observes any such nonconformity or errors it shall promptly notify City's Representative and the Engineer.

2.2 Performance of Work

CONTRACTOR shall perform the Work in accordance with this Agreement. CONTRACTOR covenants and agrees that it shall be responsible for performing and completing, and for causing all Subcontractors to perform and complete, the Work in accordance with the Contract Documents, standard professional and trade practices, Local Ordinances, and Applicable Laws. CONTRACTOR covenants that the Work and the materials provided thereunder shall be appropriate for the purposes stated in the Request for Proposal and Proposal. Although it is the responsibility of CONTRACTOR to conform the Work to Applicable Laws at all times, to the extent there is a change in one or more Applicable Laws after the date of execution of this Contract, and such change has the effect of increasing the cost or time of performance of the Work, such change may be the subject of a Change Order under the provisions of Article 9-CHANGES IN THE WORK hereof.

2.3 Standards of Performance

The Work shall be performed by CONTRACTOR in accordance with the professional standards applicable to projects, buildings or work of complexity, quality and scope comparable to the Work and the Project. CONTRACTOR may make such additions or substitutions to personnel and responsibilities as it deems necessary or appropriate in order to carry out its responsibilities hereunder, provided such personnel shall be suitably qualified. Nothing in this Agreement shall be construed to create any contractual liability with CITY toward any Subcontractor.

2.4 Execution, Correlation and Intent

2.4.1 Execution of Agreement.

Execution of this Agreement by CONTRACTOR is a representation that CONTRACTOR has visited the Site, become familiar with the local conditions under which the Work is to be performed and correlated personal observations with requirements of the Contract Documents.

2.4.2 Intent of Contract Documents.

The intent of the Contract Documents is to include all items necessary for the proper execution and completion of the Work by CONTRACTOR. The Contract Documents are complementary and what is required by one shall be as binding as if required by all; performance by CONTRACTOR shall be required only to the extent consistent with the Contract Documents and reasonably inferable from them as being necessary to produce the intended results. Any work, materials or equipment that may reasonably be inferred from the requirements of the Contract will be furnished and performed whether or not specifically called for. When words or phrases that have a well-known technical or construction industry or trade meaning are used to describe Work, materials or equipment, such words or phrases shall be interpreted in accordance with that meaning

2.4.3 Organization of Material.

Organization of the Design Materials into divisions, sections and articles, and arrangement of drawings does not necessarily control CONTRACTOR in dividing the Construction Work among Subcontractors or in establishing the extent of Construction Work performed by any trade.

2.4.4 Resolving Conflicts

In resolving conflicts resulting from errors or discrepancies in any of the Contract Documents, the order of precedence shall be as follows:

- A. Permits from other agencies specifically required for the performance of the Work as may be required by law;
- B. Supplemental Agreements and Change Orders, the one dated later having the precedence over another dated earlier;
- C. Agreement;
- D. General Requirements (Division 1);
- E. Technical Specifications (Division 2 and all other Divisions following);
- F. Contract Drawings;
- G. CITY of Roseville's most current version of Construction Standards and Design Standards and Amendments to the Current Version
- H. Other Referenced Standard Specifications;
- I. Other Referenced Standard Plans.

With reference to the Drawings, the order of precedence is as follows:

- A. Addenda/Change Order drawings govern over any other drawings;
- B. Enumerated dimensions govern over scaled dimensions;
- C. Detail drawings govern over general drawings; and

D. Contract Drawings govern over standard drawings/plans.

The provisions of the Contract Documents shall take precedence over any Laws or Regulations applicable to the performance of the work unless such an interpretation of the provisions of the Contract Documents would result in a violation of such Law or Regulation.

2.4.5 Meaning of Words

Unless otherwise stated in this Agreement, words which have well-known technical or construction industry meanings are used in accordance with such recognized meanings.

2.5 Contractor Services and Facilities

2.5.1 General.

CONTRACTOR shall provide everything required for the orderly progress and proper execution and completion of the Work and the Project in accordance with the requirements of the Contract Documents, whether temporary or permanent and whether or not incorporated or to be incorporated into the Work, including, but not limited to, services, labor, materials, equipment, furnishings, tools, construction equipment and machinery, utilities, transportation and other facilities and services.

2.5.2 Supervision

CONTRACTOR shall supervise and direct the Work in accordance with its best skill and attention. CONTRACTOR shall be solely responsible for and have control over construction means, methods, techniques, sequences and procedures. CONTRACTOR shall be responsible to CITY for the acts and omissions of, and whenever this Contract refers to the negligence, fault or omission of CONTRACTOR, such term shall include the negligence, fault or omission of, CONTRACTOR's employees, Subcontractors and their agents and employees, and other persons performing portions of the Work under an agreement with CONTRACTOR. CONTRACTOR shall not be relieved of obligations to perform the Work in accordance with the Contract Documents by tests, inspections or approvals required or performed by persons other than CONTRACTOR.

2.5.3 Coordination

CONTRACTOR shall coordinate construction requirements with Governmental agencies, utilities, and all other parties either involved in infrastructure improvements or otherwise affected by the design and construction requirements.

2.5.4 Design-Assist Development Coordination

CONTRACTOR understands and agrees that all Design Development Documents and time schedules prepared by Architect/Engineer must be coordinated with CONTRACTOR and CITY. CONTRACTOR shall participate and provide recommendations in the development of the drawings and other documents to fix and describe the size and character of the Project in its entirety as to structural, and electrical systems, materials and other essentials in CONTRACTOR's capacity as a general contractor and not as a design professional, focusing on constructability and cost implications of the evolving design.

2.5.5 Construction Documents Coordination. [reserved]

2.5.6 Cooperation

CONTRACTOR shall cooperate with the Architect/Engineer, and CITY's financial, design and construction consultants and all other designated representatives during the design and construction of the Project.

2.5.7 Management

CONTRACTOR shall implement suitable management systems and work plans for the Project relative to Project safety, quality assurance and managing and controlling the Work.

2.5.8 Reports

CONTRACTOR shall prepare and submit to CITY monthly progress reports on the Work accomplished during the previous monthly period, which reports shall be prepared in a manner and in a format reasonably acceptable to CITY. Such reports shall be furnished at the time of submission of each monthly Application for Payment. As part of such report, CONTRACTOR shall provide an updated Schedule, including CPM, if any, illustrating the progress that has been made, by reference to the initial CPM, and specifying whether the Work is on schedule or behind schedule and actions being taken to correct Schedule slippage. The monthly report shall also set forth CONTRACTOR's projected progress for the forthcoming month.

2.6 Labor and Materials; Liens (Stop Payment Notice Claims); Indemnity

Unless otherwise provided in the Contract Documents, CONTRACTOR shall provide and pay for labor, materials, equipment, tools, construction equipment and machinery, water, heat, utilities, transportation, and other facilities and services necessary for the proper execution and completion of the Work, whether temporary or permanent and whether or not incorporated or to be incorporated in the Work.

CONTRACTOR shall enforce strict discipline and good order among CONTRACTOR's employees, subcontractors, and other persons carrying out the Work. CONTRACTOR shall not permit employment of unfit persons or persons not skilled in tasks assigned to them.

CONTRACTOR shall not permit any Subcontractor, materialman, or laborer to place liens on the Project covering any portion of the Work for which CITY has made payment to CONTRACTOR. If any liens (e.g., stop payment notice claims) are imposed, CITY may withhold payment in the amount of 125% of the claim until such time an unconditional release is provided in a form satisfactory to CITY.

CONTRACTOR shall indemnify, defend, and hold harmless CITY regarding any claim or lien that proceeds to, or is the subject of litigation. CITY may withhold payment(s) pending compliance with this provision.

2.7 Local Conditions; Environmental Site Conditions

2.7.1 Local Conditions

CONTRACTOR represents that it has taken steps reasonably necessary to ascertain the nature and location of the Work, and that it has investigated and satisfied itself as to the general and local conditions which are applicable to the Work such as (a) conditions bearing on transportation, disposal, handling and storage of materials; (b) the availability of labor, water, power and roads; (c) normal weather conditions; (d) observable physical conditions at the Site; (e) the surface conditions of the ground; and (f) the character of equipment and facilities needed prior to and during the performance of the Work. To the

extent CONTRACTOR encounters subsurface or concealed conditions which differ materially from that actually known by CONTRACTOR on the date of this Agreement or from those ordinarily found to exist and generally recognized as inherent in the activities of the character provided in the Contract Documents; then CONTRACTOR shall give notice to CITY promptly before conditions are disturbed and in no event later than two (2) Days after the first observance of the conditions if a Change Order is contemplated by CONTRACTOR due to such condition. Such materially different conditions may entitle CONTRACTOR to an equitable adjustment in the GMP and/or Schedule pursuant to the Change Order provisions of this Agreement.

2.7.2 Hazardous Materials

The Parties' agreement as to the handling of Hazardous Materials discovered at the Site (and not brought there by CONTRACTOR or any Subcontractor) is set forth in Exhibit E-HAZARDOUS MATERIALS hereto, and the only duties and responsibilities of CONTRACTOR in connection therewith are as therein specified, notwithstanding any other provision of this Agreement.

2.8 Legal Requirements

CONTRACTOR shall comply with all Applicable Laws, and shall give applicable **notices** pertaining thereto.

2.8.1 Governmental Approvals

CONTRACTOR shall comply with Applicable Laws, and shall give applicable notices pertaining thereto. Except with respect to Governmental Approvals, CONTRACTOR shall prepare and file all documents required to obtain the necessary approvals of governmental authorities having jurisdiction over the Work and/or the Project and shall secure and pay for permits and governmental fees, licenses and inspections necessary for the proper execution of the Work and completion of the Project. Notwithstanding the foregoing, CITY has informed CONTRACTOR that fees in connection with building permits, street use permits, and similar permits relating to construction will be waived and are not to be included in the GMP. If and to the extent charges for such permits are imposed in the future, such charges shall be paid by CITY, or shall be the subject of a Change Order to the Contract in accordance with the Change Order provisions of this Agreement.

2.8.2 Permits, Fees and Notices

Unless otherwise provided in the Contract Documents, and subject to the provisions of Article 2.8-Legal Requirements hereof, CONTRACTOR shall secure all permits, governmental fees, licenses and inspections necessary for the proper execution and completion of the Work. To the extent there is a change in the type or cost of any of such permits, fees, licenses or inspection occurring after execution of this Agreement, there shall be an equitable adjustment in the GMP and Schedule on account of such change in accordance with the Change Order provisions. CONTRACTOR shall comply with and give notices required by Applicable Laws.

2.8.3 Patents, Trademarks, Copyrights

CONTRACTOR shall pay, as a Cost of the Work, all-applicable royalties and license fees on any matters arising in connection with the Work. CONTRACTOR shall defend all suits or claims for infringement of patent, trademark, and copyrights against the Indemnified Parties, and shall save the Indemnified Parties harmless from loss on account thereof for any and all matters arising in connection with the Work or the Project (such costs to be paid as Cost of the Work), except with respect to any particular design process or the product of a particular manufacturer or manufacturers specified and required by CITY, other than

pursuant to the recommendation or suggestion of CONTRACTOR or a subcontractor; provided however, if CONTRACTOR has reason to believe that the design, process or product so specified is an infringement of a patent, CONTRACTOR shall be responsible for any loss resulting unless CONTRACTOR has provided CITY with prompt written notice of CONTRACTOR's belief, and CITY has nevertheless elected to go forward with such design, process or product so specified.

2.9 Warranty

CONTRACTOR warrants to CITY that any and all materials, equipment and furnishings incorporated in the Work will be of good quality and new unless otherwise required or permitted by the Contract Documents, that the Construction Work will be free from defects not inherent in the quality required or permitted, and that the Construction Work will conform with the requirements of the Contract Documents. Construction Work not conforming to these requirements, including substitutions not properly approved and authorized, may be considered defective by CITY at its sole discretion.

CONTRACTOR shall warranty the Construction Work for a period of one-year commencing upon recording of the notice of completion. If within this one-year warranty period any of the Work is found to be defective or not in accordance with the requirements of the Contract Documents, CONTRACTOR shall correct it promptly after receipt of written notice from CITY to do so. CITY shall give such notice promptly after discovery of the condition. CONTRACTOR shall bear the cost of correction.

CONTRACTOR's attention is directed to Article 11.13-Payment, Performance, and Warranty Bonds and Exhibit G-BOND FORMS regarding Warranty Bond requirements.

2.10 Use of Site.

2.10.1 Beneficial Use

CITY shall be permitted beneficial use of the Work.

2.10.2 Access by CITY

CONTRACTOR shall afford CITY and its authorized designees access to the Project Site at all times, subject to reasonable prior notice for access outside of normal business hours.

2.10.3 Rubbish; Debris; Cleanup

During the performance of all on-site Work, CONTRACTOR shall at all times, as a Cost of the Work, keep the Site and adjacent streets, properties and sidewalks free from waste materials, debris and/or rubbish, and shall employ adequate dust control measures. If accumulation of such materials, debris, rubbish or dust constitutes a nuisance or safety hazard or is otherwise objectionable in the reasonable opinion of CITY, CONTRACTOR shall promptly remove them. Upon Substantial Completion of the Work, or any portion or component thereof, CONTRACTOR shall remove from the Site, or applicable portion thereof, all tools, construction equipment, machinery, surplus materials, waste materials and rubbish and shall leave the Site in a "broom clean" condition. If CONTRACTOR fails to clean up as provided in the Contract Documents, CITY may do so and the cost thereof shall be charged to CONTRACTOR as a Cost of the Work.

2.10.4 Noise and Night Work

CONTRACTOR shall comply with CITY's noise ordinance.

2.11 Taxes

CONTRACTOR shall pay, as Cost of the Work, all existing and future applicable federal, state and local sales, consumer, use and similar taxes, whether direct or indirect, relating to, or incurred in connection with, the performance of the Work (excluding taxes based on CONTRACTOR's income). In the event CONTRACTOR is obligated to pay any new or increased taxes or duties adopted after the date hereof, the amount of such new or increased taxes shall increase the GMP pursuant to the Change Order provisions of this Contract. In the event CONTRACTOR receives the benefit of a tax exemption or tax reduction taking effect after the date hereof, the amount of such exemption or reduction shall decrease the GMP pursuant to the Change Order provisions of this Contract

2.12 Ownership of Documents and Materials, and Confidentiality

CITY shall have unlimited rights to copy and use in connection with the Project all Design Materials, including the right to use same on the Project at no additional cost to CITY, regardless of degree of completion, provided that said services performed have been fully paid for as required by the terms of this Agreement. CONTRACTOR and its Subcontractors shall keep all design documents confidential, and shall not disclose such documents except as may be required in performance of the Work or pursuant to legal process.

2.13 Value Engineering

CONTRACTOR shall suggest to CITY value engineering to reduce the cost of the Project, which CITY may accept at its sole discretion.

2.13.1 Acceptance of Value Suggestions

To the extent that CONTRACTOR provides value engineering suggestions or comments with respect to the Project's design, CITY acknowledges that such services are advisory only and not professional design services. CITY shall refer all such suggestions and comments to the Architect/Engineer for review and evaluation prior to CITY's acceptance thereof. CITY shall cause the Architect/Engineer to revise the Project's design documents to reflect all value engineering suggestions and comments accepted by CITY without delay or disruption to the timely and orderly progress of the Work, including revisions needed to address the impact of an agreed value engineering solution on other portions of the Work. The GMP and Contract Time shall be adjusted by Change Order promptly after CONTRACTOR's review and pricing of the change to the Work reflected in the revised design documents.

2.13.2 Subcontractors Bids

CONTRACTOR shall make recommendations to the Architect/Engineer regarding the appropriate quality of materials, equipment, component systems and types of construction for the most reasonable prices for inclusion in the Construction Documents, and CONTRACTOR shall also recommend to the Architect/Engineer and CITY reasonable adjustments in the scope of the Project so that the total cost bid by the bidding Subcontractors will not exceed the estimate.

2.14 Design Development Documents and Construction Documents.

2.14.1 General

The Design-Assist Team understands that all construction documents, working drawings and specifications must be coordinated with, submitted to, and approved by, CITY prior to construction. CONTRACTOR shall allow CITY a minimum of fourteen (14) days for review of Submittals and corrections made thereto. CONTRACTOR shall work with the Design-Assist Team to prepare, for the approval of CITY, working drawings and specifications setting forth in detail the requirements for the

construction of the Project in its entirety CITY's review of the Design Development Documents and the Construction Documents shall not relieve CONTRACTOR from its responsibilities under this Agreement, or be deemed to be an approval or waiver by CITY of any deviation from, or of CONTRACTOR's failure to comply with, any provision or requirement of the Contract Documents, unless such deviation or failure has been identified as such in writing in the document submitted for approval by CONTRACTOR and approved by CITY. CONTRACTOR shall comply with all CITY construction standards as deemed applicable by the CITY. CONTRACTOR shall provide CITY with a complete, accurate, full size, and current set of as built drawings in a hard copy acceptable to City prior to Final Completion.

The Architect/Engineer is the entity professionally responsible for the design of the Project. CITY acknowledges that CONTRACTOR is a general contractor and not an architect or engineer. Except with respect to any subcontractors of CONTRACTOR providing architectural or engineering services for the Project as design-build work, CONTRACTOR's review of or input for any design documents, or CONTRACTOR's recommendation for any design concepts, is made solely in CONTRACTOR's capacity as a licensed contractor and not as a licensed design professional. CONTRACTOR is not responsible for any errors in the design or failure of the design to comply with applicable laws, codes, rules and regulations, or lawful orders of public authorities. However, if CONTRACTOR observes any such nonconformity or errors it shall promptly notify CITY and the Architect/Engineer.

2.14.2 Reliance on Approvals

CONTRACTOR shall be entitled to rely on the approvals of CITY with respect to the Design Materials. If CITY revokes, modifies or otherwise changes in a material way its approval of a given system after such system has been designed and approved, or modifies the original Scope of Work in a material manner requiring modification to one or more systems which have been designed and approved, CONTRACTOR shall be entitled to a Change Order in accordance with the provisions of Article 9-CHANGES IN THE WORK hereof. No Change Order shall be issued to the extent such modification is due to the fault or neglect of CONTRACTOR.

2.14.3 Review of Contract Documents and Field Conditions

CONTRACTOR shall take field measurements and verify field conditions and shall carefully compare such field conditions and other information known to CONTRACTOR with the Contract Documents before commencing activities. CONTRACTOR shall perform the Work in accordance with the Contract Documents and submittals approved in accordance with the procedures set forth in this Agreement.

2.15 Shop Drawings, Product Data, Samples and Other Submittals.

2.15.1 Documents and Samples at the Site

From and after commencement of the Construction Work, CONTRACTOR shall maintain at the site one (1) record copy of the Construction Documents, and any and all amendments thereto, in good order and marked to record changes and selections made during the Construction Phase. In addition, CONTRACTOR shall maintain at the site approved shop drawings, product data, samples and similar required submittals. These shall be provided to CITY upon completion of the Work.

2.15.2 Shop Drawings

Shop Drawings are drawings, diagrams, schedules and other data specially prepared for the Work by CONTRACTOR, a Subcontractor, manufacturer, supplier or distributor to illustrate some portion of the Work.

2.15.3 Product Data

Product Data includes illustrations, standard schedules, performance charts, instructions, brochures, diagrams and other information furnished by CONTRACTOR to illustrate materials or equipment for some portion of the Work.

2.15.4 Samples

Samples are physical examples, which illustrate materials, equipment or workmanship and establish standards by which the Work will be judged.

2.15.5 Submittals are not Contract Documents.

Shop Drawings, Product Data, Samples and similar submittals are not Contract Documents. The purpose of their submittal is to demonstrate for those portions of the Work for which submittals are required the way CONTRACTOR proposes to conform the construction to the Construction Documents.

2.15.6 Submission of items listed in Article 2.15.5

Requirements and procedures for submittal of shop drawings, product and equipment data are covered in technical specification section 01322 and 01330.

2.15.7 Responsibility

CONTRACTOR shall not be relieved of responsibility for the deviations from requirements of the Contract Documents by CITY's approval of Shop Drawings, Product Data, Samples or similar submittals unless CONTRACTOR has specifically informed CITY of such deviation at the time of the submittal and CITY has given written approval to the specific deviation. CONTRACTOR shall not be relieved of responsibility for errors or omissions in Shop Drawings, Product Data, Samples or similar submittals by CITY's approval thereof.

2.16 Tests and Inspections

2.16.1 Initial Tests and Inspections

Tests, inspections and approvals of portions of the Construction Work shall be made as required by the Contract Documents, Applicable Laws or normal construction practices and/or as directed by CITY. Unless otherwise provided, CONTRACTOR shall make arrangements for such tests, inspections and approvals with an independent testing laboratory or entity acceptable to CITY, or with the appropriate public authority. The costs of such tests, inspections and approvals shall be a cost paid by CONTRACTOR. CONTRACTOR shall give CITY timely notice of when and where tests and inspections are to be made so that CITY may observe such procedures. All costs of tests, inspections or approvals imposed upon CONTRACTOR by changes in Applicable Laws occurring after execution of this Agreement shall be an increase to the GMP in accordance with the Change Order provisions herein.

2.16.2 Additional Tests and Inspections

If CITY, or any other public authority having jurisdiction, determines that portions of the Construction Work require additional testing, inspection or approval beyond that required by Article subsection 2.16.1 above, CITY will instruct CONTRACTOR to make arrangements for such additional testing, inspection or approval by an entity acceptable to CITY, and CONTRACTOR shall give timely notice to CITY of when and where tests and inspections are to be made so CITY may observe such procedures. If such additional tests and/or inspections reveal failure of the portions of the Work to comply with the

requirements of the Contract Documents, the costs of such tests and required correction shall be paid as a Cost of the Work, subject to the limitations set forth in Article 2.19-CORRECTION OF WORK hereof. If the additional tests and/or inspections show that the portions of the Work comply with the requirements of the Contract Documents, the costs thereof shall be an increase to the GMP in accordance with the Change Order provisions of this Agreement.

2.16.3 Required Certificates

Required certificates of testing, inspection or approval shall, unless otherwise required by the Contract Documents, be secured by CONTRACTOR and promptly delivered to CITY.

2.16.4 Timing of Testing

Tests or inspections conducted pursuant to the Contract Documents shall be made promptly to avoid unreasonable delay in the Work.

2.17 Cutting and Patching

2.17.1 Cutting and Patching of the Work

CONTRACTOR shall be responsible for cutting, fitting, or patching required to complete the Work or to make its parts fit together properly.

2.17.2 Damage to Work of CITY or Separate Contractors

CONTRACTOR shall not damage or endanger a portion of the completed Work, fully or partially completed construction of CITY, or work or construction by Separate Contractor(s) by cutting, patching or otherwise altering such construction or work, or by excavation. CONTRACTOR shall not cut or otherwise alter such construction by CITY or a Separate Contractor except with written consent of CITY and of such Separate Contractor, such consent not to be unreasonably withheld.

2.18 Uncovering of Construction Work.

2.18.1 Uncovering

If a portion of the Construction Work is covered contrary to CITY's written request to observe such work prior to it being covered or contrary to requirements of the Contract Documents, it must, if directed in writing by CITY, be uncovered for CITY's observation and be replaced without change in the Schedule or GMP. The costs of such uncovering and replacement shall be Cost of the Work, subject to the limitation set forth in Article 2.19-CORRECTION OF WORK hereof.

2.18.2 Covering of Work Requested to be Observed

If a portion of the Construction Work has been covered, which CITY has not specifically requested to observe prior to being covered, CITY may request to see such Construction Work and it shall be uncovered by CONTRACTOR. If such Construction Work is in accordance with the Contract Documents, costs of uncovering and replacement shall, by appropriate Change Order, be charged to CITY and shall increase the GMP. An appropriate time extension shall also be given. If such Construction Work is not in accordance with the Contract Documents, CONTRACTOR shall pay such costs as Cost of the Work, unless such condition was caused by CITY or a Separate Contractor in which event CITY shall be responsible for payment of such costs by appropriate Change Order, and an appropriate time extension shall also be given.

2.19 Correction of Work

2.19.1 Work Rejected by CITY

CONTRACTOR shall promptly correct Construction Work rejected by CITY or failing to conform to the requirements of the Contract Documents, whether observed before or after Substantial Completion and whether or not fabricated, installed or completed. CONTRACTOR shall bear the costs of correcting such rejected Construction Work, as a Cost of the Work, including additional testing and inspection and compensation for services and expenses of CITY made necessary thereby.

2.19.2 Removal of Work

CONTRACTOR shall remove from the Site portions of the Construction Work, which are not in accordance with the requirements of the Contract Documents and are neither corrected by CONTRACTOR nor accepted by CITY. The costs incurred in removing such Work shall be a Cost of the Work, subject to the limitation set forth in Article 2.19-CORRECTION OF WORK hereof.

2.19.3 Failure to Correct Nonconforming Work

If CONTRACTOR fails to correct nonconforming Construction Work within a reasonable time, CITY may correct it in accordance with the terms of this Agreement. If CONTRACTOR does not proceed with correction of such nonconforming Construction Work within a reasonable time fixed by written notice from CITY, CITY may remove it and store the salvageable materials or equipment at CONTRACTOR's expense. If CONTRACTOR does not pay costs of such removal and storage within ten (10) Days after written notice, CITY may, upon ten (10) additional Days written notice, sell such materials and equipment at auction or at private sale and shall account for the proceeds thereof, after deducting costs and damages that should have been borne by CONTRACTOR, including compensation for services and expenses made necessary thereby. If such proceeds of sale do not cover costs which CONTRACTOR should have borne, CONTRACTOR shall pay such excess to CITY. If such proceeds are in excess of the costs which CONTRACTOR should have borne, such excess shall be paid by CITY to CONTRACTOR. If such costs arise during the performance of the Work, such costs shall be charged against the Cost of the Work. If such costs arise after Substantial Completion, such costs shall be payable as provided in Article 8.1-GUARANTEED MAXIMUM PRICE.

2.19.4 Damaged or Destroyed Work

CONTRACTOR shall bear the cost of correcting destroyed or damaged construction, whether completed or partially completed, of CITY or Separate Contractors caused by CONTRACTOR's correction or removal of Construction Work which is not in accordance with the requirements of the Contract Documents. If such costs arise during the performance of the Work, such costs shall be charged against the Cost of the Work. If such costs arise after Substantial Completion, such costs shall be payable as provided in Article 8.1-GUARANTEED MAXIMUM PRICE.

2.19.5 No Limitation

Nothing contained in this Article 2.19-CORRECTION OF WORK shall be construed to establish a period of limitation with respect to other obligations which CONTRACTOR might have under the Contract Documents.

2.19.6 Acceptance of Nonconforming Work

If CITY prefers to accept Work, which is not in accordance with the requirements of the Contract Documents, CITY may do so instead of requiring its removal and correction, in which case the GMP will be reduced as appropriate and equitable. Such adjustment shall be effected whether or not final payment has been made.

2.20 Contractor Registration

No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this Contract, CONTRACTOR and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. CONTRACTOR is hereby notified that this Project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

ARTICLE 3 - CONTRACT ADMINISTRATION

3.1 Administration of the Contract

The CITY's Representative and the Construction Manager will provide administration of the Agreement as hereinafter described. If the status of any of the above parties should change, the CITY will provide written notice to the Contractor of such change.

3.2 CITY's Representative

3.2.1 General

The CITY's Representative has the authority to act on behalf of the CITY on change orders, field orders, progress payments, Contract Decisions, acceptability of the Contractor's work, and early possession.

3.2.2 Change Orders

The CITY's Representative has the authority to accept or reject change orders and cost proposals submitted by the Contractor or as recommended by the Construction Manager.

3.2.3 Progress Payments

CITY's Representative has the authority to accept or reject requests for progress payments which have been submitted by the Contractor and recommended by the Construction Manager.

3.2.4 Contract Decisions

Should CONTRACTOR disagree with the Construction Manager's decision with respect to the Agreement, the CONTRACTOR may appeal to the CITY's Representative in accordance with the provisions of the Agreement.

3.2.5 Acceptability of Work

The CITY's Representative has the authority to make the final determination of the acceptability of the Work.

3.3 Construction Manager

3.3.1 General

The Construction Manager is a representative of the CITY employed to act as advisor and consultant to the CITY in construction matters related to the Agreement. The term Construction Manager may include more than one individual to perform contract administration and construction observation. Hereinafter, the term Construction Manager includes any and all representatives working under the direction of the Construction Manager.

All instructions to the Contractor and all communications from the Contractor to the CITY or the CITY's Representative shall be forwarded through the Construction Manager. The Construction Manager will have authority to act on behalf of the CITY only to the extent provided in the Contract Documents. The CITY has delegated its authority to the Construction Manager to make initial decisions regarding questions which may arise as to the quality or acceptability of materials furnished and work performed, and as to the manner of performance and rate of progress of the Work. The Construction Manager shall make initial decisions with respect to the Contractor's fulfillment of the Agreement and the Contractor's entitlement to compensation. The Contractor shall look initially to the Construction Manager in matters relating to the Agreement.

The Construction Manager's authority to act under Article 3-CONTRACT ADMINISTRATION, herein, and any decision made by it in good faith either to exercise or not to exercise such authority, shall not be interpreted or construed as control of or responsibility for any of the Work performed under this Agreement.

3.3.2 On-Site Representative

The Construction Manager will observe the progress, quality, and quantity of the Work to determine, in general, if the Work is proceeding in accordance with the provisions of the Contract Documents. The Construction Manager shall not be responsible for the superintendence of the construction site conditions; construction means, methods, appliances techniques, sequences, or procedures; operation of equipment; Contractor's personnel; or for safety practices or unsafe practices, precautions, and programs in connection with the Work.

In accordance with the provisions of these Contract Documents, the Construction Manager will make decisions relative to all matters of interpretation or execution of the Contract Documents.

3.3.3 Observation and Inspections of Construction

The Construction Manager shall observe the construction and shall have the authority to reject work and materials which do not conform to the Contract Documents, and to require special inspection or testing. Observation and inspection by the Construction Manager or an inspector is not an authorization to revoke, alter, or waive any requirements of the Specifications. Observation and inspection is the authorization to call the attention of the Contractor to any failure of the Work, materials or workmanship to conform to the Contract Documents. The Construction Manager shall have this authority including the ability to reject materials or, in any emergency, suspend the Work. The Contractor may appeal any such issue which it disagrees with to the Construction Manager for decision. If the decision of the Construction Manager is not satisfactory to the Contractor, the Contractor may appeal such decision to the CITY's Representative.

3.3.4 Acceptability of the Work

The Construction Manager has the authority to make a recommendation as to the acceptability of the Work.

3.3.5 Change Orders

The Construction Manager has the authority to initiate change orders; to reject change orders proposed by the Contractor; to negotiate and recommend acceptance of change orders to the CITY; or to order minor changes in the Work that result in no cost to the CITY.

3.3.6 Construction Schedule

The Construction Manager has the authority to review and recommend acceptance of the progress schedule submitted by the Contractor at the start of the Work and subsequent significant revisions for conformance to the specified sequence of Work and logic.

3.3.7 Progress Payments

The Construction Manager has the authority to recommend acceptance or rejection of requests for progress payments which have been submitted by the Contractor.

3.3.8 Final Payment

The Construction Manager, with the assistance of the CITY's Representative and the Engineer, will conduct inspections to determine the date of Final Completion of the Work, and the Construction Manager will receive and forward to the CITY, for the CITY's review, written warranties and related documents required by the Agreement and assembled by the Contractor.

3.3.9 Contract Interpretation by the Construction Manager

Notwithstanding any omission from the Specifications or the Drawings it shall be the duty of the Contractor to call the Construction Manager's attention to apparent errors or omissions upon discovery by the Contractor and request instructions in writing before proceeding with the Work. The Contractor shall not unreasonably take advantage of any errors or omissions found by Contractor. If the Contractor discovers any errors or omissions that it believes affect the time or cost of performing the Work, it shall be entitled to request a Change Order. Contractor shall promptly notify the Construction Manager in writing of any design, materials, or specified method that the Contractor identifies as defective or insufficient, provided, however, that in doing so Contractor will be acting in its capacity as a contractor and not an architect or engineer, and that this section does not affect CITY's responsibility with regard to the Contract Documents. The Construction Manager may, by appropriate written instructions, correct errors and supply omitted information, which instructions shall be as binding upon the Contractor as though contained in the original Specifications or Drawings when incorporated into Change Orders. Such instructions shall be incorporated into the Agreement in accordance with the Change Order provisions of the Agreement.

Any discrepancies discovered by the Contractor between the Contract Documents and Site conditions or any inconsistencies or ambiguities in the Contract Documents shall be promptly reported, in writing, to the Construction Manager. Questions regarding the meaning and intent of the Contract Documents shall be referred in writing by the Contractor to the Construction Manager with a Request for Information (RFI).

Work done by the Contractor after its discovery of such errors, omissions, discrepancies, inconsistencies or ambiguities without such notice and prior to response from the Construction Manager shall be done at the Contractor's risk and shall not be reimbursed as a Cost of the Work, nor be a basis for an increase in the GMP.

3.4 Engineer

3.4.1 General

The Engineer will have the authority to act on behalf of the CITY only to the extent provided in the Contract Documents. The Engineer shall not be responsible or have authority for the superintendence of construction site conditions; construction means, methods, appliances techniques, sequences, or procedures; operation of equipment; Contractor's personnel; or for safety practices or unsafe practices; precautions and programs in connection with the Work; or for any failure of the Contractor to comply with laws, regulations, rules, ordinances, codes, or orders applicable to the Contractor furnishing and performing the Work.

3.4.2 Interpretations

The Engineer has the authority to be the initial interpreter of the technical requirements of the Contract Documents. Either party to the Agreement may make written request to the Construction Manager for interpretations necessary for the proper execution or progress of the Work. The Construction Manager shall refer such written requests to the Engineer, who will render such interpretations. Where the Contractor has requested an interpretation from the Construction Manager, or been notified by the Construction Manager that such interpretation has been requested by the CITY, any work done before receipt of such interpretations, if not in accordance with same, shall be removed and replaced or adjusted as directed by the Construction Manager without additional expense to CITY and shall not be reimbursed as a Cost of the Work, or be a basis for an increase in the GMP.

3.4.3 Acceptability of the Work

The Engineer has the authority to make a recommendation as to the acceptability of the Work. The Engineer has the authority to recommend acceptance regarding the remediation or retention of Defective Work.

3.4.4 Submittal

The Engineer shall receive, through the Construction Manager, shop drawings, product data and samples for review.

The Engineer has the authority to review and take other appropriate action upon the Contractor's submittal such as shop drawings, product data and samples, but only for conformance with the design concept of the Work and the information given in the Contract Documents.

ARTICLE 4 - CITY'S RIGHTS AND RESPONSIBILITIES

4.1 General

CITY, acting through the CITY's Representative or the Construction Manager, shall have the authority to act as the sole judge of the Work and materials with respect to both quantity, quality function, performance and reliability as set forth in the Agreement except as delegated to the Construction Manager in these Contract Documents.

4.2 Information and Services Required of CITY

4.2.1 CITY Designation of Authorized Representative

Both Parties shall designate, from time to time, one or more representatives authorized to act on their behalf with respect to the Project, together with the scope of his/her respective authority.

CONTRACTOR shall not be entitled to rely on directions from anyone outside the scope of that person's authority as set forth in written delegations pursuant to this Agreement. Directions and decisions made by Authorized Representative(s) of CITY shall be subject to any further approval(s) required by any provisions of CITY's Charter or the Roseville Municipal Code.

4.2.2 Communication

During the term of this Contract, CITY shall communicate with Subcontractors, suppliers and others performing any part of the Work only through CONTRACTOR's Authorized Representative.

4.2.3 CITY'S instruction to CONTRACTOR

Wherever CITY is identified in the contract documents in reference to providing the CONTRACTOR with instruction, the "CITY" reference could mean, Construction Manager, Engineer, or Representative acting on behalf of the CITY as delegated in that instance.

4.3 Activities on Site by CITY or Separate Contractors

4.3.1 Observation and Inspection

In addition to the Construction Manager's designated representative, the CITY may provide one or more inspectors to the Construction Manager to observe the Work and with the same authority as provided for in Article 3.3.3, Observation and Inspections of Construction.

Separate and independent from the observations and inspections above, the Work may be inspected by Building Officials, Fire Officials, Roseville Electric and/or Pacific Gas and Electric for code compliance. Such inspectors shall have the authority provided to them by their jurisdiction. Any design deficiencies or additional work required by these code inspections not required by the Contract Documents may be incorporated into the Work in accordance with the Change Order provisions of the Agreement

4.3.2 CITY'S Right to Award Separate Contracts

CITY reserves the right to perform work or operations related to the Project with the CITY'S own forces, and to award separate contracts to Separate Contractors in connection with the Project or other work on the Site. If the Contractor claims that delay, damage, or additional cost is involved because of such action by the CITY, the Contractor shall make such claim as provided elsewhere in the Contract Documents. When separate agreements are awarded for different portions of the Project or other work on the Site, the term "Contractor" in the Contract Documents in each case shall mean the contractor who executes each separate Agreement.

4.3.3 Integration of the Work with Separate Contractors

Following the request of CITY, CONTRACTOR shall prepare a plan in order to integrate the work performed by Separate Contractors with the performance of the Work, and shall submit such plan to CITY for approval. The plan shall be fair and reasonable for CONTRACTOR and the Separate Contractors, and CONTRACTOR shall work with the Separate Contractors to reach agreement on such plan. CONTRACTOR shall arrange the performance of the Work so that the Work and the work of the Separate Contractors are, to the extent applicable, properly integrated, jointed in an acceptable manner, and performed in the proper sequence so that any disruption or damage to the Work or to any work of Separate Contractors is avoided.

4.3.4 Coordination

CONTRACTOR shall provide for the coordination of the activities of CONTRACTOR and its Subcontractors with the activities of the Separate Contractors. CONTRACTOR shall participate with all Separate Contractors and CITY in reviewing and coordinating the schedules of the Separate Contractors with the Schedule. CONTRACTOR shall make any revisions to the Schedule deemed necessary to properly incorporate the work of the Separate Contractors with the Work. To the extent (a) the date of Substantial Completion is extended by such Schedule revision; (b) CONTRACTOR is required to perform its Work materially out of sequence, and in a manner which is not as efficient or cost effective as originally planned; or (c) the Scope of Work is increased, an equitable adjustment in the GMP and the Schedule shall be made in accordance with the Change Order provisions of this Agreement.

4.3.5 Use of Site

CONTRACTOR shall afford CITY and all Separate Contractors reasonable opportunity for storage of materials and equipment and performance of their work. CONTRACTOR shall also connect and coordinate its Work and operations with CITY and all Separate Contractors' operations as required by the Contract Documents. CITY shall direct the Separate Contractors to cooperate with CONTRACTOR and to avoid actions or omissions, which could interfere with or delay the activities of CONTRACTOR.

4.3.6 Deficiency in Work of Contractors

If part of CONTRACTOR's Work depends upon proper execution or results upon construction or operations by CITY or a Separate Contractor, CONTRACTOR shall, prior to proceeding with that portion of the Work, promptly report to the Separate Contractor and CITY apparent discrepancies or defects in such other construction that would render it unsuitable for proper execution and results by CONTRACTOR. CONTRACTOR and the Separate Contractor shall use good faith efforts to resolve any such discrepancies or defects or any disagreements relating thereto. Failure of CONTRACTOR to report such discrepancies or defects shall constitute acceptance by CONTRACTOR of the work of Separate Contractors as fit and proper to receive CONTRACTOR's Work (except as to those defects or discrepancies that are not apparent).

4.4 Claims Involving Separate Contractors

In the event that CONTRACTOR unnecessarily and unreasonably delays the work of Separate Contractors by not cooperating with them as required hereby, or by not affording them reasonable opportunity to perform their work as stated herein, CONTRACTOR shall, in such event, pay, as Cost of the Work, all reasonable direct incremental costs and expenses incurred by such Separate Contractors due to any such delays. If any Separate Contractor shall assert a claim or bring an action against CITY alleging damage due to the fault or neglect of CONTRACTOR, CITY shall immediately notify CONTRACTOR, who shall defend such claim. If it is determined that CONTRACTOR was at fault, CONTRACTOR shall pay all costs of defense, including attorney's fees, as well as any resulting judgment or settlement, as a Cost of the Work.

4.5 Assignment of Separate Contracts

If CITY determines that it wishes to assign to CONTRACTOR one or more contracts between CITY and a Separate Contractor, it shall give CONTRACTOR written notice of such desire, including in such notice a copy of such contract for CONTRACTOR's review and approval. The Separate Contractor shall be fully qualified to perform the work under the to-be-assigned contract, shall possess the financial capability to perform its obligations under such to-be-assigned contract, and shall provide one hundred percent (100%) payment and performance bonds covering such work from sureties meeting the standards

set forth in Article 11-Insurance and Bonds; Indemnification hereof. Such contract shall contain provisions similar to those contained in CONTRACTOR's agreements with its Subcontractors with respect to liability, indemnification, retention, payment, labor, warranty, and other material items. Upon CONTRACTOR's approval of the assignment of such contract, which approval shall not be unreasonably withheld, delayed or conditioned, such Separate Contractor shall cease to be a Separate Contractor and shall thereafter be deemed to be a Subcontractor of CONTRACTOR, and the GMP shall be increased by Change Order in the amount of (a) such assigned contract, and (b) the additional Fee pursuant to the provisions of Article 9.6-Change Orders on Account of Scope Change.

4.6 CITY's Right to Stop the Work

If CONTRACTOR persistently fails to correct Work which is not in accordance with the requirements of the Contract Documents and this Agreement or persistently fails to carry out the Work in accordance with the Contract Documents, CITY, by written order signed by CITY, may deliver a notice to CONTRACTOR setting forth that such a persistent and material failure is occurring and has occurred, and demanding that CONTRACTOR commence a cure of such persistent and material failure within twenty (20) Days and diligently pursue such cure thereafter. In the event that the cure is not commenced and pursued diligently, CITY may, by written notice to CONTRACTOR, order CONTRACTOR to stop the Work, or any portion thereof, until the use for such order has been eliminated; provided, however, that the right of CITY to stop the Work shall not give rise to a duty on the part of CITY to exercise this right for the benefit of CONTRACTOR or any other person or entity and shall not give rise to any liability of CITY to CONTRACTOR resulting from any delay (except to the extent that such order is found to be improper).

If CONTRACTOR fails to correct an unsafe condition as specified in Article 12-SAFETY: PROTECTION OF PERSONS AND PROPERTY, the CITY shall have the right to notify the Contractor through the Construction Manager that an unsafe condition may exist and must be corrected or the Work in question can be stopped immediately. CITY's has a right to stop the work, until the condition is corrected to the satisfaction of the CITY.

4.7 CITY's Right to Carry Out the Work

If CONTRACTOR defaults or neglects to carry out the Work in accordance with the Contract Documents and fails within a seven (7) Day period after receipt of written notice from CITY to commence and diligently continue correction of such default or neglect with diligence and promptness, CITY may, after such seven (7) Day period, give CONTRACTOR a second written notice to correct such deficiencies within such second seven (7) Day period. If CONTRACTOR within such second seven (7) Day period after receipt of such second notice fails to commence and diligently continue to correct any deficiencies, CITY, without prejudice to other remedies CITY may have, may correct such deficiencies. In such case an appropriate Change Order shall be issued deducting from payments then or thereafter due to CONTRACTOR the cost of correcting such deficiencies, including Compensation for additional services and expenses made necessary by such default, neglect or failure. If payments then or thereafter due to CONTRACTOR are insufficient to cover such amounts, CONTRACTOR shall pay the difference to CITY.

The CITY also reserves the right to perform and suspend any portion of the Work due to an emergency threatening the safety of the Work, public, CITY, and any property or equipment. No deductive Change Order shall be issued for an emergency not caused by Contractor.

4.8 Non-Responsibility of the CITY

CITY shall not be held responsible for the care or protection of any material or parts of the Work prior to the Final Acceptance, except as expressly provided in the Contract Documents.

ARTICLE 5 - CONTRACTOR RIGHTS AND RESPONSIBILITIES

5.1 Status of Contractor and Subcontractors

5.1.1 Contractor

It is stipulated and agreed that the Contractor shall be an independent contractor in the performance of this Agreement and shall have complete charge of persons engaged in performance of the Work. The Contractor shall perform the Work in accordance with its own means, methods, and appliances subject to compliance with the requirements of the Agreement.

5.1.2 Subcontractors

If any part of the Work to be done under this Agreement is subcontracted, the subcontract shall be in writing and shall provide that all Work to be performed thereunder shall be performed in accordance with the terms of the Contract Documents. The subcontracting of any or all of the Work to be done will in no way relieve the Contractor of any part of its responsibility under the Agreement. Subcontractors will not be recognized as having a direct relationship with the CITY. The persons engaged in the Work, including employees of subcontractors and suppliers, will be considered employees of the Contractor and their work shall be subject to the provisions of the Agreement. References in the Contract Documents to actions required of subcontractors, manufacturers, suppliers, or any person other than the Contractor, the CITY or the Construction Manager shall be interpreted as requiring that the Contractor shall require such subcontractor, manufacturer, supplier or person to perform the specified action.

The Contractor shall only employ subcontractors that are properly licensed in accordance with State law and are registered with the California Department of Industrial Relations (DIR).

Prior to commencement of any work by a subcontractor, the Contractor shall submit to the Construction Manager:

- A. Verification that the subcontractor is properly licensed for the work it will perform.
- B. Upon CITY'S request, copies of subcontract agreements.
- C. Copies of subcontractor's insurance certificates and endorsements.

5.2 Contractor's Representative

The Contractor shall provide in writing, a request to the CITY to delegate authority to an individual to serve in the capacity of authorized representative and shall wait to receive written confirmation from the CITY, before the authorized representative can start work. The authorized representative shall be qualified for the duties required and have complete authority to represent and to act for the Contractor. Said authorized representative has the authority to act in matters relating to the Agreement, and shall be personally present at the Site at all times while work is actually in progress on the Agreement. During periods when the Work is suspended, arrangements acceptable to the Construction Manager shall be made for any emergency work that may be required. The Contractor's authorized representative shall be fluent and proficient in the English language in order to understand, receive, and carry out oral and written communications or instructions relating to all job functions and responsibilities. All

communications to and from the Contractor's authorized representative shall be binding as if given to or by the Contractor.

Contractor shall provide its authorized representative's contact information which shall include the representative's name, office street address, office telephone number, mobile phone number, home phone number, email address and the office mailing address if different from the street address.

The Contractor's authorized representative shall give its personal attention to and shall supervise the Work to the end that it shall at all reasonable times be prosecuted faithfully; and when the authorized representative is not personally present on the Work, the representative shall at all reasonable times be represented by a competent designated alternate, superintendent or foreman (approved in writing by the CITY, to act in this capacity) who shall receive and obey all instructions or orders given under this Agreement, and who shall have full authority to supply materials, tools, and labor without delay, and who shall be the legally appointed representative of the Contractor. The Contractor shall be liable for the faithful observation of any instructions delivered to the Contractor or to its authorized representative.

5.3 Supervision and Superintendence

CONTRACTOR shall supervise, inspect, and direct the Work competently and efficiently, devoting such attention thereto and applying such skills and expertise as may be necessary to perform the Work in accordance with the Contract Documents. Contractor shall be solely responsible for the means, methods, techniques, sequences, and procedures of construction. Contractor shall not be responsible for the negligence of Owner or Engineer in the design or specification of a specific means, method, technique, sequence, or procedure of construction which is shown or indicated in and expressly required by the Contract Documents.

At all times during the progress of the Work, Contractor shall assign a competent resident Superintendent who shall not be replaced without written notice to Owner and Engineer except under extraordinary circumstances.

5.4 Documents and Samples at the Site.

CONTRACTOR shall maintain at the site for CITY one record copy of the drawings, specifications, addenda, Change Order and other Modifications, in good order and marked currently to record changes and selections made during construction, and in addition approved Shop Drawings, Product Data, Samples and similar required submittals. CONTRACTOR shall also prepare one reproducible set of as-built drawings. These shall be provided to CITY upon completion of the Work.

5.5 Use and Protection of CITY'S Site and Adjacent Property

5.5.1 Designated Areas

With the approval of the Construction Manager, the Contractor may use designated portions of the CITY'S Site for storage of construction equipment, materials and field offices provided the Contractor does not interfere with CITY'S operations. The Contractor will not be allowed to unreasonably encumber the Site or adjacent areas with its materials and/or equipment. The CITY will not accept any responsibility for damage to or loss of the Contractor's equipment or materials stored on any Project related site caused by vandalism, nature, or otherwise, suffered by the Contractor. Protection of all construction equipment, stores, and supplies shall be the sole responsibility of the Contractor. Where additional work space is desired by the Contractor or where the CITY cannot provide the space to the Contractor, it shall be the Contractor's sole responsibility and expense to obtain such a space for its use.

5.5.2 Contractor's Site Access

All workers or representatives of the Contractor, subcontractors or suppliers are admitted to the Site only for the proper execution of the Work and have no tenancy without the express written permission of the CITY. Furthermore, no persons may occupy property owned by the CITY outside the limit of the Work, as indicated on the Drawings, without the express written permission of the CITY.

5.5.3 Provisions for Handling Emergencies

It is possible that emergencies may arise during the progress of the Work, which may require special treatment or make advisable extra shifts of labor forces to continue the Work for twenty-four (24) hours per day. These emergencies may be caused by damage or possible damage to nearby existing structures or property by reason of the work under construction, or by storm, accidents, or leakage. The Contractor shall be prepared in case of such emergencies to make all necessary repairs and shall promptly execute such work when required; such emergency work will be reimbursed as a Cost of the Work and the GMP increased accordingly.

Upon start of the Work, Contractor shall provide means for immediate emergency notification of Contractor's designated representative and designated emergency alternates.

5.5.1 Debris, Trash, and Construction Wastes

The Contractor shall keep the Site reasonably free from debris, trash and construction wastes to permit Contractor to perform construction services efficiently, safely and without interfering with the use of adjacent land areas, and as further stipulated in the Contract Documents. When the Work is Substantially Complete, or a portion of the Work has been completed, Contractor shall remove all debris, trash, construction wastes, materials, equipment, machinery and tools arising from the Work or applicable portions thereof to permit CITY to occupy the Project or a portion of the Project for its intended use. Contractor shall provide a finished cleaning of all areas acceptable to the CITY before releasing any area to the CITY for occupancy.

5.6 Compliance with Laws

The CITY is a municipal corporation in the State of California and is subject to the applicable provisions of law relating to public contracts as a Charter CITY. It is agreed that all provisions of law applicable to public contracts are a part of these Contract Documents to the same extent as though set forth herein and will be complied with by Contractor.

The Contractor shall at all times observe and comply with all existing laws, ordinances, regulations, orders and decrees; and shall protect, indemnify, and defend the CITY, the Construction Manager, the Engineer, the Funding Agencies and all of their officers, officials, employees, agents, volunteers, and servants against any claim or liability arising from or based upon the violation of any such law, ordinance, regulation, order, or decree, whether by the Contractor itself, employees, or its subcontractors.

The Contractor, shall at its own cost and expense, observe and keep itself and its subcontractors fully informed of all existing and future legislated State and Federal Laws and CITY and County ordinances and regulations which in any manner affect those engaged or employed in the Work, or the materials and equipment used in the Work, or which in any way affect the conduct of the Work, and all such orders and decrees of bodies or tribunals having any jurisdiction or authority over the same.

If any discrepancy or inconsistency is discovered in the Drawings, Specifications, or in any other part of this Agreement, in relation to any law, ordinance, regulation, order or decree, the Contractor shall immediately report the same to the Construction Manager in writing.

Attention is directed to the following specific regulations and requirements that are hereby included in the Contract Documents. This list of regulations is not warranted to be complete and the burden of ascertaining legal requirements that must be satisfied shall rest solely with the Contractor.

5.6.1 Prevailing Wages

For purposes of this Agreement, CONTRACTOR and its Subcontractors shall comply with all applicable prevailing wage laws, e.g., but not limited to, California Labor Code Sections 1770 et seq. In accordance with said Section 1775, CONTRACTOR shall forfeit as a penalty to the CITY Two Hundred Dollars (\$200) for each calendar Day or portion thereof for each worker paid less than the prevailing rates for such work or craft in which such worker is employed for any work done on-Site under the Agreement by CONTRACTOR or by any Subcontractor in violation of the provisions of the Labor Code and in particular, Labor Code Sections 1770 to 1780, inclusive. In addition to said penalty and pursuant to said Section 1775, the difference between such stipulated prevailing wage rates and the amount paid to each worker for each calendar Day or portion thereof for which each worker was paid less than the stipulated prevailing wage shall be paid to each worker by CONTRACTOR or the applicable Subcontractor.

Pursuant to the provisions of California Labor Code Sections 1773, the Department has identified the source, stated below, of the General Prevailing Rate of Wages applicable to the work to be done, for straight time, overtime, and holiday work. The holiday wage rate listed shall be applicable to all holidays recognized in the collective bargaining agreement of the particular craft, classification or type of worker concerned. These wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: <http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm>, which is a part of this Agreement.

Pursuant to Labor Code Section 1773.2, General Prevailing Wage Rates set forth above, which forms a part of this Agreement, shall be posted by CONTRACTOR at a prominent place at the Site. Prevailing wage rates to be posted at the Site will be furnished by the Department. The possibility of wage increases is one of the elements to be considered by CONTRACTOR in determining its Proposal, and will not under any circumstances be considered as the basis of a claim against CITY or the Agreement.

5.6.2 DIR Registration

California Labor Code section 1725.5 requires the Contractor and all lower-tier subcontractors performing public works services to be currently registered with the California DIR, as specified in California Labor Code section 1725.5. California Labor Code section 1771.1 provides that a contractor or subcontractor shall not be qualified to bid on, be listed in a bid proposal (subject to the requirements of Section 4104 of the California Public Contract Code), or engage in the performance of any contract for public work, unless currently registered and qualified to perform public work pursuant to California Labor Code section 1725.5. The Contractor shall list the Contractor's current DIR registration number, and the current DIR registration number of all subcontractors, as part of its Bid Proposal.

Further information can be found on DIR's website at <http://www.dir.ca.gov/Public-Works/Contractors.html>. The above summary is provided solely for informational purposes, and does not in any way affect the Contractor's and subcontractors' obligation to comply in all respects with all other applicable laws and regulations. The Contractor shall disseminate these provisions to every lower-tier subcontractor.

5.6.3 Apprentices on Public Work Projects

The Contractor and any subcontractor or subconsultant shall comply with California Labor Code section 1777.5 et seq., and implementing regulations set forth in Title 8 of the California Code of Regulations, governing the employment of apprentices. Contractor and any subcontractor or subconsultant performing Public Work will be subject to penalties for apprenticeship violations in accordance with Labor Code section 1777.7. Please refer to the link below for guidance in meeting your obligation to satisfy the apprentice requirements for this Project:

<https://www.dir.ca.gov/das/DASApprenticesOnPublicWorksSummaryOfRequirements.htm>.

5.6.1 Receipt of Workers' Wages, Fee for Registering or Placing Persons in Public Works

The Contractor and any subcontractor or subconsultant shall comply with California Labor Code sections 1778 and 1779 of the California Labor Code, which read as follows:

Section 1778. "Every person, who individually or as a representative of an awarding or public body or officer, or as a contractor or subcontractor doing public work, or agent or officer thereof, who takes, receives or conspires with another to take or receive, for his own use or the use of any other person any portion of the wages of any workman or working subcontractor, in connection with services rendered upon any public work is guilty of a felony."

Section 1779. "Any person or agent or officer thereof who charges, collects, or attempts to charge or collect, directly or indirectly, a fee or valuable consideration for registering any person for public work, or for giving information as to where such employment may be procured, or for placing, assisting in placing, or attempting to place, any person in public work, whether the person is to work directly for the State, or any political subdivision or for a contractor or subcontractor doing public work is guilty of a misdemeanor."

5.6.2 Travel and Subsistence Payments

Each worker needed to execute the Work must be paid travel and subsistence payments as defined in the applicable collective bargaining agreements filed in accordance with Section 1773.1 of the California Labor Code.

5.6.3 Workday

In accordance with the provisions of Division 2, Part 7, Chapter 1, Article 3 of the Labor Code, State of California, and in particular Sections 1810 to 1815 inclusive, thereof, eight (8) hours labor shall constitute a day's work and no laborer, worker, or mechanic in the employ of said Contractor, or any subcontractor doing or contracting to do any part of the Work contemplated by this Agreement, shall be required or permitted to work more than eight (8) hours in any one calendar day, and forty (40) hours in any one calendar week unless compensated at not less than time and a half as set forth in California Labor Code Section 1815. However, if the prevailing wage determination requires a higher rate of pay for overtime than is required under said Section 1815, then the overtime rate must be paid, as specified in California Code of Regulation Title 8, Group 3, Section 16200(a)(3)(F). The Contractor and each subcontractor shall also keep an accurate record showing the names and actual hours worked of all workers employed by them in connection with the work contemplated by this Agreement, which record shall be open at all reasonable hours for the inspection of the CITY or its officers or agents and by the Division of Labor Standards Enforcement of the Department of Industrial Relations, their deputies or agents; and it is hereby further agreed that said Contractor shall forfeit as a penalty to the CITY, the sum of the greater of (i) Twenty-Five and No/100 Dollars (\$25.00) or (ii) the maximum penalty allowable by statute for each laborer, worker or mechanic employed in the execution of this Agreement by the Contractor or by any

subcontractor for each calendar day during which such laborer, worker or mechanic is required or permitted to labor more than eight (8) hours in any one calendar day and forty (40) hours in one calendar week in violation of these provisions.

5.6.4 Labor Discrimination

The Contractor and any subcontractor or subconsultant shall comply with California Labor Code Section 1735, which reads as follows:

Section 1735. “No discrimination shall be made in the employment of persons upon public works because of the race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, or sex of such persons, except as provided in Section 12940 of the Government Code, and every contractor for public works violating this Section is subject to all the penalties imposed for violation of this chapter.”

Contractor agrees that it shall not discriminate against any person on account of their sex, race, color, religious creed, ancestry, national origin, disability, medical condition, marital status, age, gender, military or veteran status, genetic information, or sexual orientation in violation of the Fair Employment and Housing Act or the Unruh Civil Rights Act. Upon a final determination by a court of competent jurisdiction that the Grantee has violated either of these Acts, the CITY may, at its option, (1) withhold payments to Contractor under this Agreement until Contractor complies; or (2) suspend or terminate this Agreement. Contractor shall include the provisions of this paragraph in every subcontract, including procurement of materials and lease of equipment, unless specifically exempted by the CITY.

5.6.5 Asbestos Related Work

All work involving asbestos containing material must be performed in accordance with California Labor Code, Sections 6501.5 through 6510, inclusive, and California Administrative Code, Title 8, Section 5208 and all other pertinent laws, rules, regulations, codes, ordinances, decrees and orders.

5.6.6 Compliance with Environmental Laws

During construction, the Contractor shall comply with all pertinent requirements of Federal, State, and local environmental laws and regulations, including, but not limited to, the Federal Clean Air Act, State and local air pollution and noise ordinances, construction site erosion control regulations.

5.6.7 Public Records Act

5.6.7.1 Ownership and Disclosure

Except as otherwise provided herein, all records, documents, drawings, plans, specifications, and all other information relating to the conduct of CITY’S business, including information submitted by the Contractor (“Records”), shall become the exclusive property of CITY and shall be deemed public records. Said Records are subject to the provisions of the California Public Records Act (Government Code § 6250 et seq.). The CITY’S use and disclosure of its records are governed by this Act. The CITY will use its best efforts to inform the Contractor of any request for any financial records or documents marked “Trade Secret,” “Confidential” or “Proprietary” provided by the Contractor to CITY. The CITY will not advise as to the nature or content of documents entitled to protection from disclosure under the California Public Records Act.

5.6.7.2 Litigation Related to Disclosure

In the event of litigation concerning the disclosure of any Records, CITY’S sole involvement will be as a stakeholder, retaining the Records until otherwise ordered by a court. The submitting party, at its sole

expense and risk, shall be fully responsible for any and all fees for prosecuting or defending any action concerning the Records and shall indemnify and hold CITY harmless from all costs and expenses including attorney's fees in connection with any such action.

5.7 Certified Electricians

Workers performing work for an electrical contractor installing, constructing, or maintaining any electrical system covered by the National Electrical Code shall be certified as a General Electrician per California Labor Code Section 3099.

5.8 Contractor's Safety Responsibility

The Contractor shall be solely and completely responsible for conditions of the jobsite, including safety of all persons and property during performance of the Work. This requirement shall apply continuously and not be limited to normal working hours. Safety provisions shall conform to U.S. Department of Labor (OSHA), the California Occupational Safety and Health Act (Cal OSHA), and all other applicable Federal, State, County, and local laws, ordinances, codes, including but not limited to the requirements set forth in Article 12 – SAFETY: PROTECTION OF PERSONS AND PROPERTY, and any regulations that may be detailed in other parts of these Contract Documents. In the event of conflicting requirements, the most stringent requirement as it pertains to the Contractor's safety responsibility, shall be followed by the Contractor. Refer to Article 12 - SAFETY: PROTECTION OF PERSONS AND PROPERTY

5.9 Nonstandard Working Hours

The Contractor may be required to prosecute the Work at night or outside of the normal working hours defined in Section 01130-1.3.c Hours of Work and Overtime. Such work may be required due to project or operational constraints as defined in Section 01130 or if emergencies arise as provided for in Article 5.5.3-Provisions for Handling Emergencies. When required, ordered, or permitted to work at night, the Contractor shall provide sufficient and satisfactory lighting and other facilities therefore. Except as provided in 5.5.3-Provisions for Handling Emergencies, for work outside of the normal working hours, the Contractor shall receive no extra payment, but compensation shall be considered as having been included in the GMP stipulated for the Work, except for authorized work performed outside of the Agreement.

5.10 Cooperation with Other Contractors

This paragraph shall serve as notice to the Contractor that the CITY may allow other contracts for other work at or near the Site of this Work. The Contractor shall afford other Contractors reasonable opportunity for the delivery and storage of their materials and the execution of their work, and shall properly connect and coordinate its work with theirs.

Should construction be under way by other forces or by other Contractors within or adjacent to the limits of the work or in the vicinity of the work to be done under this Agreement, the Contractor shall so conduct its operations as to interfere to the least possible extent with the work of such other forces or Contractors.

Any difference or conflicts which may arise between the Contractor and any other forces or Contractors, creating delays or hindrance to each other, shall be adjusted as determined by the Construction Manager.

ARTICLE 6 - SUBCONTRACTORS

6.1 Incorporation of Contract Documents

CONTRACTOR may enter into Subcontracts with various Subcontractors for portions of the Work. The Subcontracts shall require each Subcontractor, to the extent of the Work to be performed by such Subcontractor, to assume towards CONTRACTOR all the obligations and responsibilities which CONTRACTOR assumes towards CITY. All Subcontracts shall incorporate the terms of this Agreement and the Contract Documents to the extent applicable to the Work to be performed by the Subcontractor.

6.2 Approval of Subcontractors

Those portions of the Construction Work that the CONTRACTOR does not intend to perform with CONTRACTOR's own personnel shall be performed under Subcontracts. A proposed list of Subcontractors shall be submitted to CITY for approval. Proposed Subcontractors will be deemed accepted unless CITY objects in writing within five (5) days after submission by CONTRACTOR.

ARTICLE 7 - TIME AND PROGRESS OF THE WORK

7.1 Commencement of Work

Within forty-five (45) calendar days after executed of the Agreement, written Notice to Proceed will be issued by the City to Contractor. Notwithstanding other provisions of the Agreement, the Contractor shall not be obligated to perform the Work, and the City shall not be obligated to accept or pay for such Work performed by the Contractor, prior to City's issuance of the Notice to Proceed. The Contractor shall provide the required Agreement bonds and evidences of insurance prior to the City's execution of this Agreement and prior to commencement of any Work.

The Contractor shall commence execution of the Work within ten (10) days after the date established in the Notice to Proceed for the commencement of Contract Time.

The Contractor shall give the Construction Manager written notice not less than five (5) working days in advance of the actual date on which the Work is to begin on the Site (excluding Preconstruction Services performed under the Agreement) will be started. The Contractor shall be entirely responsible for any delay in the Work which may be caused by its failure to give such notice.

7.2 Contract Time

All time limits for Substantial Completion, and Final Completion as stated in the Contract Documents are of the essence of the Agreement. The counting of Working or Calendar Days shall begin ten (10) Calendar Days from the date of the Notice to Proceed. The Contractor shall prosecute the Work so that the various portions of the Work shall be complete and ready for use within the times specified in Exhibit H-COMPLETION TIMES AND LIQUIDATED DAMAGES. It is expressly understood and agreed by and between the Contractor and the City that the Contract Time(s) for Contract Milestones, Substantial Completion of the Work and for Final Completion are reasonable times taking into consideration the average climatic and economic conditions and other factors prevailing in the locality and the nature of the Work known as of the date this Agreement is entered into.

7.3 Delays

7.3.1 Notice of Delays

When the Contractor foresees a delay in the prosecution of the Work and, in any event, promptly upon the occurrence of a delay to its Work, the Contractor shall notify the Construction Manager in writing of the occurrence of delay, providing the estimated extent of the delay and its cause. The Contractor shall take immediate steps to prevent or mitigate, if possible, the occurrence or continuance of the delay.

The Contractor agrees that no claim shall be made for any occurrence of delay that is not the subject of a written notice and that is not submitted to the attention of the Construction Manager within ten (10) calendar days of its occurrence. The City may accept a delay with more than ten (10) calendar days of notice if the City finds that the Contractor was acting in good faith and the City was not prejudiced by the Contractor's failure to timely provide the required notice.

7.3.2 Non-Excusable Delays

Non-excusable delays in the prosecution of the Work are delays which were caused by the Contractor, or by its subcontractors and suppliers, at any tier level, or delays which could have been avoided by the exercise of care, prudence, and diligence on the part of the Contractor or its subcontractors or suppliers, at any tier level. The Contractor shall receive no compensation or time extension for such delay. The determination of Non-Excusable Delays shall be made solely by the Construction Manager. In the event that the Contractor is not in agreement with the Construction Manager's decision, the Contractor may appeal the decision by submitting to the City (for consideration), evidence that supports the Contractor's claim for an Excusable Delay consideration.

7.3.3 Excusable Delays

Excusable Delays in the prosecution or completion of the Work are delays which are not caused by or within the control of Contractor and which could not have been avoided by the exercise of care, prudence, foresight, and diligence on the part of the Contractor or its subcontractors or suppliers, at any tier level. In addition, before a delay will be deemed an "Excusable Delay," the delay must prevent the Contractor from proceeding with at least seventy-five (75%) percent of the normal labor and equipment force for at least five (5) hours per day toward completion of the current critical activity item(s) on the latest approved progress schedule submitted by Contractor in accordance with the Contract Documents. The Contractor shall receive no compensation for such delay unless such delay also qualifies as a Compensable Delay, as described below. The following are examples of Excusable Delays:

- A. Site Availability; Failure or inability of CITY to make available any or all of the Site in accordance with the requirements of the Schedule.
- B. Regulatory and Governmental Authority; Failure or inability of CITY or CONTRACTOR to obtain necessary zoning changes, variances, code changes, permits or approvals from any governmental authority, or failure to obtain any street or alley vacations required for the performance of the Work, except to the extent due to the fault or neglect of CONTRACTOR.
- C. Separate Contractor's Acts or Omissions; Delays resulting solely from the acts or omissions of Separate Contractors; provided however, only to the extent Separate Contractors perform their work improperly and not in accordance with any applicable critical path schedule.
- D. Force Majeure; Delays resulting from Force Majeure.
- E. Differing Site Conditions; Differing, unusual or concealed site conditions that could not reasonably have been anticipated by CONTRACTOR in preparing the Schedule.
- F. Hazardous Materials; Delays resulting from the existence or discovery of Hazardous

Materials on the Site not brought to the site by CONTRACTOR or any Subcontractor.

- G. Applicable Laws; Delays resulting from changes in Applicable Laws occurring after the date of execution of this Agreement.
- H. CITY Acts or Omissions; Delays occurring solely due to the acts or omissions of CITY and those within the control of CITY, including, but not limited to, Separate Contractors.
- I. Abnormal Delays; Delays caused by fire, unusual storms, floods, tidal waves, earthquakes, strikes, labor disputes, freight embargoes, and shortages of materials shall be considered as Excusable Delays insofar as they prevent the Contractor from proceeding with at least seventy-five (75%) percent of the normal labor and equipment force for at least five (5) hours per day toward completion of the current critical activity item(s) on the latest favorably reviewed progress schedule.
- J. Weather Delays; Delays caused by inclement weather conditions or the conditions resulting from inclement weather shall be considered as “Excusable Delays” if they prevent the Contractor from proceeding with seventy-five (75%) percent of the normal labor and equipment force engaged in the current critical activity item for a period of at least five (5) hours per day toward completion of such operation or operations, and the crew is dismissed as a result thereof.
- K. Material Shortages; Upon the Contractor's submission of satisfactory proof to the Construction Manager, shortages of material may be considered an “Excusable Delay” upon the satisfaction of the conditions set forth herein. The Contractor must demonstrate that the Contractor has made every effort to obtain such materials from all known sources within reasonable reach of the proposed Work. Only the physical shortage of material, caused by unusual and unforeseeable circumstances, will be considered as eligible for an “Excusable Delay,” and no consideration will be given to any claim that the material could not be obtained at a reasonable, practical, or economical cost or price, unless it is shown to the satisfaction of the Construction Manager that such material could have been obtained only at exorbitant prices entirely out of line with current rates, taking into account the quantities involved and usual practices in obtaining such quantities. A time extension for shortage of material will not be considered for material ordered or delivered late or whose availability is affected by virtue of the Contractor’s or its subcontractor’s or supplier’s mishandling of the procurement for such material. The above provisions apply equally to equipment to be installed in the Work. Nothing herein is intended to affect the Contractor also needing to demonstrate that the delay must prevent the Contractor from proceeding with at least seventy-five (75%) percent of the normal labor and equipment force for at least five (5) hours per day toward completion of the current critical activity item(s) on the latest favorably reviewed progress schedule.

7.3.4 Compensable Delays

Compensable Delays in the prosecution or completion of the Work are delays which meet each of the following three elements: (1) delays which result from causes beyond the control of the Contractor and which could not have been avoided by the reasonable exercise of care, prudence, and diligence on the part of the Contractor or its subcontractors or suppliers, at any tier level; (2) delays that prevent the Contractor from proceeding with at least seventy-five (75%) percent of the normal labor and equipment force for at least five (5) hours per day toward completion of the current critical activity item(s) on the latest approved progress schedule; and (3) delays that are caused by one of the following three causes:

- A. CITY Acts or Omissions; Delays due to the actions and/or inactions of the City, Construction Manager, Engineer or any of their agents or employees.

- B. Differing Site Conditions; Delays due to differing site conditions as defined in Article 7.3.3.E-DIFFERING SITE CONDITIONS.
- C. Separate Contractor's Acts or Omissions; Delays due to other contractors employed by the City who interfere with the Contractor's prosecution of the Work as defined above.

7.3.5 Concurrent Delays

Concurrent delays are those delay periods when the prosecution of the Work is delayed during the same period of time due to causes from a combination of the delays defined in Article 7.3.2-NON-EXCUSABLE DELAYS, Article 7.3.3-EXCUSABLE DELAYS, or Article 7.3.4-COMPENSABLE DELAYS. During such concurrent delay periods, time extensions will be granted in accordance with Article 7.4-TIME EXTENSIONS; however, the Contractor will be granted a non-compensable time extension, and the City shall not assess its actual costs as defined in Article 7.4.1-NON-EXCUSABLE DELAYS, nor will the City assess Liquidated Damages.

7.4 Time Extensions

7.4.1 Non-Excusable Delays

The Contractor shall receive no compensation or time extension for Non-Excusable Delays.

7.4.2 Excusable or Compensable Delays

If the Contractor is delayed in the performance of its Work as defined in Article 7.3.3-EXCUSABLE DELAYS, or Article 7.3.4-COMPENSABLE DELAYS, then the Contract Time(s) will be extended by the City for such time that, the Contractor shows, and the City agrees (which agreement will not be unreasonably withheld), the Project's critical path completion dates will be delayed, provided that the Contractor strictly fulfills the following:

- A. The Contractor shall have provided written notification, in accordance with Article 7.3.1-NOTICE OF DELAYS;
- B. The Contractor shall have submitted in writing a request for an extension of time to the Construction Manager stating at a minimum the cause of the delay and the estimated number of days being requested. The Contractor's request for a time extension shall be submitted within fifteen (15) days of the Contractor furnishing its written notice pursuant to Article 7.3.1-NOTICE OF DELAYS. In the case of an Excusable Delay or Compensable Delay that allegedly is impacting the Contractor's operations for a period longer than fifteen (15) days, the Contractor shall update its request for a time extension, including updating its time impact analysis, every thirty (30) days until the delay is no longer allegedly impacting the Contractor's operations.
- C. If the Contractor maintains that the delay at issue is a Compensable Delay, the Contractor shall submit an estimate of the additional compensation for Field Overhead and Indirect Home Office Overhead (per Article 7.4.4-FIELD OVERHEAD AND INDIRECT HOME OFFICE OVERHEAD FOR COMPENSABLE DELAYS that it is seeking in regard to the alleged delay. This estimate shall be included with the Contractor's request for time extension that is described in paragraph B, above. In the case of a Compensable Delay that allegedly is impacting the Contractor's operations for a period longer than fifteen (15) days, the Contractor shall update its estimate of additional compensation every thirty (30) days until the delay is no longer allegedly impacting the Contractor's operations.
- D. If requested by the Construction Manager, the Contractor shall provide sufficient

information to the Construction Manager to assess the cause or effect of the alleged delay (as well as additional compensation in the case of Compensable Delay), or to determine if other concurrent delays affected the Work. Such additional information shall be furnished within fifteen (15) days of the Construction Manager's request for additional information.

- E. Time extensions due to Excusable or Compensable Delays will be granted only if such delays involve controlling critical path operations which would prevent completion of the whole Work within the specified Contract Time(s), as described in the above conditions for determination of "Excusable Delay" or "Compensable Delay."

Construction Manager will, in writing, approve or reject the Contractor's request for a time extension within fifteen (15) days of the latter of (i) the Construction Manager's receipt of the Contractor's complete request for a time extension; or (ii) the Construction Manager's receipt of the additional information referenced in paragraph C, above. If Construction Manager does not provide a written response within such fifteen (15) day time period, the Contractor's request shall be deemed denied by the City.

If the Construction Manager determines that the Contractor is entitled to a time extension, during such approved extension of time, neither extra compensation for engineering, inspection and administration nor damages for delay will be charged to the Contractor.

7.4.3 Weather Delays

For Weather Delays, the Contractor will be granted a non-compensable time extension for weather caused delays, pursuant to Article 7.3.3.J-WEATHER DELAYS, over and above an allowance as provided for in Exhibit H-Completion Times and Liquidated Damages. No time extensions for weather delays will be granted until the total number of weather days exceeds this allowance.

Should the Contractor fail to complete the Work within the time specified in the Agreement, as extended in accordance with this clause if appropriate, the Contractor shall pay to the City liquidated damages in accordance with Article 7.5-Liquidated Damages.

7.4.4 Field Overhead and Indirect Home Office Overhead for Compensable Delays

The Contractor shall be compensated for field overhead and indirect home office overhead expenses due to Compensable Delays for periods of time when the Work is delayed as defined in Article 7.3.4-COMPENSABLE DELAYS. However, no payment shall be made for compensable delays which occur during a concurrent delay as defined in Article 7.3.5-CONCURRENT DELAYS. As a condition precedent to payment for field overhead and indirect home office overhead, the Contractor must fulfill all conditions as provided in Article 7.4.2-EXCUSABLE OR COMPENSABLE DELAYS. Compensation will be calculated in accordance with 7.4.4.1 and 7.4.4.2 below. No additional markup for overhead or profit shall be provided for such field overhead and indirect home office overhead expenses.

Payment to the Contractor for indirect overhead expenses will be made only if the extended Contract Time period granted for the compensable delay(s) is required to complete the Work following the depletion of the original Contract Time period and any time extensions granted other than compensable time extensions. Payment for field overhead and indirect home office overhead shall be calculated as follows:

7.4.4.1 Field Overhead

For those allowable delay periods as described in Article 7.4.4-FIELD OVERHEAD AND INDIRECT HOME OFFICE OVERHEAD FOR COMPENSABLE DELAYS, the Contractor shall be reimbursed for its field overhead based on:

- A. Actual invoice costs for on-site field offices and temporary utilities as described in Section 015000, TEMPORARY FACILITIES AND UTILITIES.
- B. Actual labor costs as shown in Exhibit C, GUARANTEED MAXIMUM PRICE, COST OF WORK AND FEE, for field office staff.
- C. Fair rental values acceptable to the Construction Manager as described in Article 9.6-Cost Determination, for construction equipment idled due to the delay.
- D. Actual Errors and Omissions insurance costs attributable to delay periods.

7.4.4.2 Indirect Home Office Overhead

For those delay periods as described in the introduction of Article 7.4.4-FIELD OVERHEAD AND INDIRECT HOME OFFICE OVERHEAD FOR COMPENSABLE DELAYS, the Contractor shall be reimbursed for its indirect home office overhead based on the following formula:

$$[\text{Guaranteed Maximum Price (\$) divided by the Contract Time Period (Calendar Days)}] \times 0.03 = \text{Daily Indirect Home Office Overhead (\$/Calendar Day)}$$

As it is impractical to determine the actual home office overhead, such reimbursement shall encompass full payment for any and all indirect home office overhead expenses for such periods of time for the Contractor and all subcontractors. Distribution of the markup amount among the Contractor and all subcontractors and suppliers is the responsibility of the Contractor.

7.5 Liquidated Damages

City and the Contractor recognize that time is of the essence of this Agreement and that the City will suffer financial loss if the Work is not completed within the times specified in Exhibit H-COMPLETION TIMES AND LIQUIDATED DAMAGES, plus any extensions thereof allowed in accordance with Article 7.4-TIME EXTENSIONS. It is hereby understood and agreed that it is and will be difficult and/or impossible to ascertain and determine the actual damage which the City will sustain in the event of and by reason of the Contractor's failure to fully perform the Work or to fully perform all of its Agreement obligations that have accrued by the times for completion as specified in Exhibit H-COMPLETION TIMES AND LIQUIDATED DAMAGES.

It is, therefore, agreed in accordance with California Government Code Section 53069.85 that the Contractor will forfeit and pay to the City liquidated damages in the amount set forth in Exhibit F, COMPLETION TIMES AND LIQUIDATED DAMAGES, per day for each and every calendar day that expires after the times for completion specified for each construction milestone except as otherwise provided by extension of time pursuant to Article 7.4-TIME EXTENSIONS. It is further understood and agreed in accordance with California Government Code Section 53069.85 that the liquidated damages sum specified in this provision is not manifestly unreasonable under the circumstances existing at the time this Agreement was made, and that the City may deduct liquidated damages sums in accordance with this provision from any payments due or that may become due the Contractor.

Liquidated damages will continue to accrue at the stated rate until the completion of any defined completion milestone(s) and Final Completion of Work, all as set forth in Exhibit H, COMPLETION TIMES AND LIQUIDATED DAMAGES. Accrued liquidated damages may be deducted by the City from amounts due or that become due to the Contractor for performance of the Work. Liquidated damages may not be waived or reduced by the City unless expressly waived or reduced in writing by the City.

ARTICLE 8 - PAYMENT AND COMPLETION

8.1 Guaranteed Maximum Price (“GMP”) and GMP Shared Savings

CITY shall pay for CONTRACTOR's performance under this Agreement the Cost of the Work and Fee (as described in Exhibit C-GUARANTEED MAXIMUM PRICE, FEE, AND COST OF WORK hereto); provided, however, that the sum of the Cost of the Work and the Fee shall not exceed the GMP, as adjusted by Change Order/Directive in accordance with the Contract Documents. CONTRACTOR bears the risk of its increased costs due to market price increases (including escalating costs for materials).

8.2 Shared Savings

CONTRACTOR shall be compensated for actual work completed based on the Cost of Work and Fee up to the amount of the GMP. If CONTRACTOR's actual total Cost of the Work and Fee is less than the GMP, upon Final Completion, the CONTRACTOR shall be entitled to receive a negotiated percentage of the GMP Savings as described in Exhibit C-GUARANTEED MAXIMUM PRICE, FEE, AND COST OF WORK hereto. “GMP” Savings shall mean the positive difference, if any, when the actual Total Cost of the Work and Fee is subtracted from the GMP; provided, however, that unused Allowance monies, if any, shall not be subject to shared savings.

8.3 Schedule of Values

Contractor will be required to submit a complete schedule of values upon selection of proposal to facilitate contract negotiation within ten (10) days of notice. Schedule of values should set forth the various portions of the Work, and the portions of the GMP allocated to each portion.

8.4 Applications for Payment

CONTRACTOR shall deliver to CITY not more than once each month an Application for Payment covering the Cost of Work and Fee applicable to the Work performed during the immediately preceding month. With each Application for Payment CONTRACTOR shall submit such evidence as may be necessary to demonstrate costs incurred on account of Cost of the Work during such month and the percentage of completion of each category of Work. CITY may reject requests for payment, or portions thereof, for Work, or portions thereof, not performed or completed.

8.5 Amount of Progress Payments

CITY shall pay CONTRACTOR the actual Cost of the Work and Fee, if any, through the period covered by the Application for Payment, less Retention as set forth in Article 8.6 below, provided that the aggregate payment amount before retention will not exceed the percentage of completion of the Work multiplied by the GMP (excluding items of the GMP not subject to retention). CITY may additionally withhold from progress payments such amounts pursuant to stop payment notice claims as required by law and CITY administrative regulation 4.01.

8.6 Retention, Escrow Agreement, Final Payment

Five percent (5%) Retention shall be withheld from each progress payment until the expiration of thirty-five (35) days following the recordation of the notice of completion; provided however, CITY shall continue to retain such amount as required by law and/or CITY administrative regulation 4.01. CONTRACTOR may elect to establish an escrow account for securities in-lieu of the five percent (5%) Retention in a form of escrow agreement compliant with law and subject to approval by the CITY

Attorney (form of escrow agreement is attached as Exhibit F–IN LIEU OF SECURITIES ESCROW AGREEMENT. Release of Retention monies shall constitute the Final Payment.

8.7 Early Release of Subcontractor Retention. [reserved]

8.8 Payment for On-Site and Off-Site Stored Materials.

8.8.1 Payment for Materials:

- 8.8.1.1 Payment may be made for those materials delivered to the site but not incorporated in the work to the extent that the materials are included in the Construction Schedule as cost-loaded material delivery activities.
- 8.8.1.2 Payment for materials delivered will not be made before the respective shop drawings, installation instructions and O&M manuals have been submitted, reviewed, and accepted in accordance with Section 01330, Submittal Procedures.
- 8.8.1.3 To receive payment for materials delivered to the site, but not incorporated in the work, it shall be necessary for the CONTRACTOR to submit to the ENGINEER, at least 7 days prior to the end of said month, a list of such materials.
- 8.8.1.4 At their sole discretion, the ENGINEER will approve items for which payment as for On-Site and Off-Site Stored Materials is to be made.
- 8.8.1.5 The list of materials and invoices shall be clearly identified by referencing the associated activity on the cost loaded schedule.
- 8.8.1.6 Payment for materials delivered to the site or a bonded warehouse will be made in an amount equal to the respective suppliers' invoices(s) for the actual net cost for the item(s) delivered plus delivery charges in accordance with payment terms of the Agreement.
- 8.8.1.7 The CONTRACTOR's actual net cost for the materials must be supported by invoices of suppliers.

- 8.8.2 Proper storage and protection of materials shall be provided by the CONTRACTOR. Final payment shall be made only for materials actually incorporated in the work and, upon acceptance of the work, all materials remaining for which advance payments had been made shall revert to the CONTRACTOR, unless otherwise agreed, and payments made for these items shall be deducted from the final payment for the work.

8.9 Title to Construction Work

CONTRACTOR warrants that title to all Construction Work covered by an Application for Payment shall pass to CITY no later than the time of payment. CONTRACTOR further warrants that upon submittal of an Application for Payment, all Construction Work for which Applications for Payment have been previously issued and payments received from CITY shall, to the best of CONTRACTOR's knowledge, information and belief, be free and clear of liens, claims, security interests or encumbrances in favor of CONTRACTOR, Subcontractors, material suppliers, or other persons or entities making a claim by reason of having provided labor, materials or equipment relating to the Construction Work.

8.10 Withholding of Payment

CITY may withhold payment on account of an Application for Payment if required or authorized by any Applicable Law, or to the extent necessary to protect CITY from loss because of:

- A. defective Work not remedied;
- B. third party claims filed or reasonable evidence indicating probable filing of such claims;
- C. failure of CONTRACTOR to make payments of undisputed amounts to Subcontractors for labor, materials or equipment;
- D. damage to CITY or to a Separate Contractor caused by the fault or neglect of CONTRACTOR to the extent not reimbursed by insurance; or
- E. reasonable evidence that the Work will not be Substantially Completed within the Contract Time due to Inexcusable Delay, and that the unpaid balance of the GMP would not be adequate to cover liquidated damages for the anticipated Inexcusable Delay.

8.11 Failure of Payment; Interest

In accordance with Public Contract Code §20104.50, CITY shall pay CONTRACTOR interest on any progress payment, which is made by CITY more than thirty (30) days after CITY receives an undisputed and properly submitted written payment request. Said interest shall be equal to the rate set forth in Code of Civil Procedure §685.010(a), and shall begin to accrue upon the expiration of said thirty (30) day period. Any written request for a progress payment which CITY determines to be disputed, improper or not suitable for payment for any reason shall be returned to CONTRACTOR within seven (7) days after receipt by CITY, along with a written statement of the reason or reasons why such request is disputed, improper or not suitable for payment.

8.12 Occupancy by CITY Prior to Acceptance

CITY reserves the right to Beneficial Occupancy and without charge by CONTRACTOR. In those areas of the Work which are completed, CITY may store materials, equipment, and supplies, and may perform partial operation.

8.13 Substantial Completion

When CONTRACTOR considers the entire Work complete and ready for its intended use, CONTRACTOR shall certify in writing to CITY that the entire Work is substantially complete provide CITY with a Certificate of Substantial Completion. Within a reasonable time thereafter, CITY and CONTRACTOR shall make an inspection of the Work to determine the status of completion. If CITY does not consider the Work substantially complete, CITY will notify CONTRACTOR in writing giving reasons therefor. If CITY considers the Work substantially complete, CITY will accept a corresponding partial Certificate of Substantial Completion. There shall be attached to the Certificate a Punch List of items to be completed or corrected before Final Acceptance and Final Payment.

8.14 Final Completion

When the Work is fully completed, CONTRACTOR shall provide CITY with a Certificate of Final Completion and shall request final inspection in writing. Additionally, CONTRACTOR shall provide legally effective releases or waivers satisfactory to CITY of all lien rights arising out of or liens filed in connection with the Work. Within ten (10) calendar days of receipt of such completed request form, CITY shall make final inspection. If following final inspection, CITY determines that the Work (including all Punch List items) has been fully completed, CITY will process a Notice of Completion. If CITY determines that the Work is not complete after receipt of certification from CONTRACTOR, CONTRACTOR shall be notified in writing of deficiencies. After the deficiencies have been corrected, the procedure for final inspection as set forth above shall again be initiated by CONTRACTOR. In the

event CITY determines the Work is fully completed, CITY shall initiate process of attaining a notice of completion.

8.15 Waiver of Claims at Final Payment

Acceptance of final payment by CONTRACTOR shall constitute a waiver of all claims by CONTRACTOR, except those previously made in writing and identified as unsettled at the time of final payment.

8.16 Construction Allowance Items [reserved]

CITY shall pay for CONTRACTOR's performance under this Agreement the Cost of the Work and Fee (as described in CONSTRUCTION ALLOWANCE ITEMS AND AMOUNTS hereto); provided, however, that the sum of the actual total cost of each allowance item shall not exceed the approved Allowance Amount of each, as adjusted by Change Order/Directive in accordance with the Contract Documents. CONTRACTOR bears the risk of its increased costs due to market price increases (including escalating costs for materials).

8.17 Contingency [reserved]

8.18 Audits and Access to Records.

The Contractor must maintain all books, records, documents, and other evidence directly pertinent to the performance of the Work in accordance with generally accepted accounting principles and practices. The Contractor must also maintain all financial information and data used by the Contractor in the preparation or support of any cost submission, including the Contractor's estimate, any Change Order, Dispute, Claim, Pay Application, or other request for equitable adjustment. City and its representatives will have access upon five (5) business days advanced written notice, during normal business hours, to all Contractor's books, summary reports, records, accounts, estimates, documents, detailed financial information, certified payroll records, AIS records and all other information and documentation relevant to the Work for the purposes of inspection, audit, and copying. The Contractor will, at no cost to City, provide reasonable facilities for such access, and inspection purposes. The City will arrange for and pay all costs of copying.

The Contractor agrees to include and make the requirements of this article, applicable to all subcontractors listed in their DESIGNATION OF SUBCONTRACTORS list.

Audits conducted pursuant to this article, will be in accordance with general accepted auditing standards and established procedures and guidelines of the reviewing or audit agency.

The Contractor agrees to provide requested information and reports resulting from access to records to City, subject to execution of an appropriate confidentiality order if requested.

Records must be maintained and made available during the performance of the Work and for four (4) years after Final Payment, and until final settlement of all Disputes or Claims, whichever occurs later.

The right of access provisions of this article, applies to all financial records pertaining to the Agreement:

- A. To the extent the records pertain directly to Agreement performance;
- B. To the extent required for verification of the costs incurred where such costs are the basis for billings pursuant to the Agreement including Change Orders;
- C. To the extent there is credible evidence that Contractor has violated the federal False Claims Act and the California False Claims Act or that fraud, gross abuse, or corrupt practices may be

involved; and

D. If the Agreement is terminated for default or convenience.

Access to records is not limited to the required retention periods. City's Authorized Representative or designee must be granted access to records at any reasonable time for as long as the records are required to be maintained.

In the event that City's audit determines that Contractor has billed for any costs that are ineligible for reimbursement or for any reason should not have been paid, or the Contractor's fee has been improperly applied or calculated, Contractor shall promptly refund all improper payments following receipt of City's written notice and explanation of the alleged overpayments or improper fee and shall be responsible to pay City for the City's reasonable costs to perform the audit unless the Contractor establishes that the overpayment or improper fee was the result of an unintentional, inadvertent clerical error.

ARTICLE 9 - CHANGES IN THE WORK

9.1 Contract Held Valid.

Any change in the Scope of Work or deviation from the Contract Documents including, without limitation, Extra Work or Omitted Work, shall not invalidate the original Contract, and shall be performed under the terms of the Contract Documents. The difference in cost of the work affected by such change will be added to or deducted from the Guaranteed Maximum Price (GMP), as the case may be.

9.2 Execution of Changes

- A. Only the Contractor or the City may initiate changes in scope of Work or deviation from Contract Documents.
- B. Changes in the Work may be accomplished after execution of the Contract where they are documented by an executed Field Directive, Field Order, or Change Order in accordance with applicable provisions of the Contract Documents.
- C. Changes in the Work shall be performed under applicable provisions of the Contract Documents. If unit prices are stated in the Contract Documents or subsequently agreed upon, and if quantities originally contemplated are so changed in a proposed Change Order or Change Directive that application of such unit prices to quantities of Work proposed will cause substantial inequity to CITY or CONTRACTOR, the applicable unit prices for such change order/directive shall be equitably adjusted. No GMP adjustment on account of a Change Order shall include CONTRACTOR's or Subcontractor's profit, Fee, home office overhead or a formula allocation of indirect costs unless otherwise specifically allowed hereunder.
- D. The prices agreed upon and any agreed upon adjustment in Contract Time shall be incorporated in the written order issued by the City, which shall be written so as to show acceptance on the part of the Contractor as evidenced by its signature. By signature of the Change Order, the Contractor acknowledges that the adjustments to the GMP and Contract Time contained in the Change Order are in full satisfaction and accord and so waives any right to claim any further cost and time impacts at any time during and after completion of the Contract for the changes encompassed by the Change Order.

9.3 Definitions

9.3.1 Incidental Work

Incidental work includes reasonably implied parts of the work not shown on Drawings nor described in Specifications, but which is necessary or normally or customarily required as a part of the Work shown on the Drawings or described in the Specifications to provide a complete installation which is fully connected and tied into the existing facilities and processes and is fully functional and operational. Incidental work shall be treated as if fully described in Specifications and shown on Drawings, and expense thereof shall be included in the Guaranteed Maximum Price (GMP). Incidental work shall be performed by Contractor and included in the Cost of the Work without an increase in the GMP.

9.3.2 Extra Work

New or unforeseen work, or added work of a different character or function; or that involves revisions of the details of the Work on which Contractor based its GMP. If the extra work increases the Contractor's Cost of the Work and/or time to perform the Work, and is approved by the City via a written Change Order, the GMP and/or Contract Times shall be adjusted as provided in the Contract Documents. Extra Work shall not include Work which is shown, detailed or specified in the Contract Documents or which constitutes "Incidental Work" as defined within the Contract Documents definition above.

9.4 Change Directives

Changes in the Work may be directed by a Construction Change Directive prepared and signed by the OWNER'S REPRESENTATIVE. A Construction Change Directive signed by the CONTRACTOR indicates agreement of the CONTRACTOR with the actions specified in the Directive, including the inclusion or absence of an adjustment in Contract Amount or Contract Time or the method for determining them. The following procedures shall apply with respect to Change Directives.

- A. Upon receipt of a Change Directive signed by CITY, CONTRACTOR shall promptly proceed with the change in the Work involved and advise CITY of CONTRACTOR's agreement or disagreement with the method, if any, provided in the Change Directive for determining the proposed adjustment in the GMP or the Schedule. If CONTRACTOR receives a written communication signed by CITY which CONTRACTOR believes is a Change Directive but is not so identified, it shall not proceed with the change in the Work until it receives from CITY a written confirmation that such communication is in fact a Change Directive.
- B. A Change Directive signed by CONTRACTOR indicates the agreement of CONTRACTOR with the contents thereof, and shall convert the Change Directive to a Change Order.
- C. If CONTRACTOR does not respond promptly or disagrees with the method for adjustment in the GMP or Schedule, the method and adjustment shall be determined as provided in these contract documents. In such case, CONTRACTOR shall keep and present, in such form as CITY may request, an itemized accounting, together with appropriate supporting data.
- D. Pending final determination of cost to CITY, amounts not in dispute shall be included in Applications for Payment. The amount of credit to be allowed by CONTRACTOR to CITY for a deletion or change which results in a net decrease in the GMP shall be actual net cost. When both additions and credits covering related Work or substitutions are involved in a change, the allowance for Fee shall be figured on the basis of net increase, if any, with respect to that change.
- E. If CITY and CONTRACTOR do not agree with the adjustment in the Schedule or the GMP, such disagreement shall be submitted for dispute resolution in accordance with the provisions of

this Contract.

9.5 Contract Modification Procedures

9.5.1 Request for Proposal (RFP)

- A. The City may issue a Request for Proposal (RFP) to the Contractor in connection with the City considering an addition to, or deletion from, or other change in the Work. RFPs shall not be deemed to be directions to proceed with any addition, deletion or change to the Work.
- B. Whenever the Contractor is required to prepare a cost proposal in response to an RFP, and whenever Contractor is entitled to submit a cost proposal and elects to do so, Contractor shall prepare and submit to City for consideration a cost proposal using a form provided by the CM or the Contractor may submit another form if deemed acceptable to the Construction Manager. All cost proposals must contain a complete breakdown of costs of credits, deducts, and extras; and itemize materials, labor, equipment, special services, taxes, and markups. All Subcontractor Work shall be so indicated. Individual entries on the Cost Proposal form shall follow the cost items defined in Cost Determination in this Section. The Contractor shall provide all required cost information requested by an RFP within fourteen (14) days after receiving the RFP.
- C. Upon receipt of the Contractor's cost proposal, which shall include a detailed itemized breakdown as prescribed in this Section, the Construction Manager will act promptly thereon. If Construction Manager takes no exception to the cost proposal, Construction Manager will prepare Change Order for City and Contractor signatures, provided that City has elected to proceed with the changed Work. If a cost proposal is not acceptable to the Construction Manager, the Construction Manager will indicate to Contractor the unacceptable items in the proposal. Except as otherwise provided in this Section, Contractor shall have seven (7) days in which to respond to Construction Manager with a revised cost proposal.
- D. If the parties do not agree on the price or time adjustment in response to an RFP, City may issue a unilateral change order pursuant to the Agreement, Article 9.5.3-FIELD ORDER-FORCE ACCOUNT WORK. Contractor shall perform the changed Work, notwithstanding any claims or disagreements of any nature, with the understanding that it preserves all rights to pursue adjustments to the GMP and/or Contract Time in connection with the change.
- E. When the necessity to proceed with a change does not allow the Construction Manager sufficient time to conduct a proper check of the Contractor's cost proposal (or revised cost proposal), Construction Manager may order Contractor to proceed with the change, with the understanding that parties will negotiate in good faith to determine the value of the change at the earliest practical date. In this event, the value of change, with corresponding equitable adjustment to the GMP, shall not be more than any increase or less than any decrease proposed by the Contractor's cost proposal.

9.5.2 Field Directive/Supplemental Instruction Resulting from RFI's, Submittals or other instructions from the Engineer and/or City

- A. The Contractor may be issued a Field Directive or Supplemental Instructions resulting from an RFI, Submittal or other instructions from the Engineer and/or City.
- B. If the Contractor is satisfied with Field Directive or Supplemental Instruction and does not request change in the GMP or Contract Time, then the Field Directive or Supplemental Instruction shall be executed by the Contractor without a Change Order.

- C. If the Contractor believes the Field Directive/Supplemental Instruction results in additional Cost of the Work or a change in the GMP or Contract Time, then Contractor must notify the Construction Manager within ten (10) days following receipt of Field Directive/Supplemental Instruction and before proceeding with this work. If the Construction Manager considers Contractor's notice to be justified, the instructions of the Field Directive/Supplemental Instructions will be revised or a proposed Change Order will be issued for the City's consideration. The Contractor shall have no claim for additional compensation or extension of the schedule because of any such additional instructions unless the Contractor provides the Construction Manager written notice thereof within the time frame specified above, unless the City is not Prejudiced by Contractor's untimely notice. In addition, the Contractor shall within fifteen (15) days from the date of the Contractor furnishing written notice provide a detailed justification and analysis as well as estimated pricing and Time Impact Analysis to support any request for time extension. Should the work at issue impact Contractor's operations for a period longer than fifteen (15) days, Contractor shall update its request for additional compensation and/or additional time, every thirty (30) days until the disputed work is no longer allegedly impacting Contractor's operations. In addition, Contractor shall comply with the requirements of the Agreement concerning Records of Disputed Work and Submission of Disputed Work Costs, respectively.
- D. Should the Contractor proceed with the work affected before receipt of a response from the Construction Manager, any portion of the work which is not done in accordance with the City's interpretation, clarifications, instructions, or decisions is at Contractor's risk.
- E. If the Contractor and Construction Manager still do not agree on the Field Directive's impact to the GMP or Contract Time, then Contractor may appeal to the Engineer for decision. If the Engineer concurs with the Construction Manager's position, the Contractor will be directed again in writing to make the changes covered in the Field Directive/Supplemental Instructions and Contractor shall do so notwithstanding any claims or disagreements of any nature. Contractor may file a Notice of Potential Claim and Claim in accordance with the Agreement.

9.5.3 Field Order- Force Account Work

- A. If either the amount of work or payment for a Change Order cannot be determined or agreed upon beforehand, the City may direct by issuing a unilateral Change Order or Field Order that the work be done on a force account basis. The term "force account" shall be understood to mean that payment for the work will be made based on an accounting of the Contractor's Cost of the Work as described in the Agreement, Exhibit C-Guaranteed Maximum Price, Cost of Work and Fee, and Article 9.6-Cost Determination.
- B. Prior to the commencement of force account work, the Contractor shall notify the Construction Manager of its intent to begin work. The Contractor shall maintain accurate cost records, separate from the cost categories for the balance of the Work, which depict all costs incurred for the authorized force account work. Upon request by the Construction Manager or City, these cost records must be made available for review as provided in the Agreement.
- C. All subcontractors that expend labor, equipment and materials on force account work shall record those costs daily by using a form provided by or approved by the Construction Manager. The subcontractor reports, if found to be correct, shall be signed by the subcontractor, Contractor and Construction Manager, or inspector, and a copy of which shall be furnished to the Construction Manager no later than the working day following the

- subcontractor's performance of said work. The Daily Extra Work Report sheet shall thereafter be considered the true record of force account work provided by the subcontractor. If the Construction Manager, or inspector, does not agree with the labor, equipment and/or materials listed on the subcontractor's daily force account report, the Construction Manager, or inspector, shall sign-off on the items on which they are in agreement. The Construction Manager shall then review the items of disagreement and will advise the Contractor, in writing, of its determination. If the Contractor disagrees with this determination, it shall have the right to file a claim notice per the Agreement.
- D. The Contractor shall maintain its records in such a manner as to provide a clear distinction between the direct costs of subcontractor work paid for on a force account basis and the costs of other operations.
 - E. To receive partial payments and final payment for force account work, the Contractor shall submit, in a manner approved by the Construction Manager, detailed and complete documented verification of the Contractor's and any of its subcontractor's Costs of the Work involved in the force account pursuant to the pertinent unilateral Change Order or Field Order. Such costs shall be submitted within thirty (30) days after said work has been performed. No payments will be made for work billed and submitted to the Construction Manager after the thirty (30) day period has expired, unless City is not prejudiced by Contractor's untimely billing and submittal of costs.

9.5.4 Construction Change Directive (CCD)

- A. CCD is a written order prepared by the Construction Manager and signed by the City, directing a change in the Work and stating a proposed basis for adjustment, if any, in the Contract Price or Contract Time.
- B. If at any time the City believes in good faith that a timely Change Order will not be agreed upon using the foregoing procedures, the City may issue a CCD with its recommended cost and/or time adjustment. Upon receipt of CCD, Contractor shall promptly proceed with the change of Work involved and concurrently respond to City's CCD within ten (10) calendar days.
- C. Contractor's response must be any one of following:
 - 1. Return CCD signed, thereby accepting City's response, time, and cost.
 - 2. Submit a (revised if applicable) Cost Proposal with supporting documentation (if applicable, reference original Cost Proposal number followed by letter A, B, etc. for each revision), if City so requests.
 - 3. Give notice of intent to submit a Claim as described in the Agreement.
- D. If the CCD provides for an adjustment to the Contract Sum, the adjustment shall be based on one of the following methods:
 - 1. Mutual acceptance of a lump sum properly itemized and supported by sufficient substantiating data to permit evaluation.
 - 2. Unit prices stated in the Contract Documents or subsequently agreed upon.
 - 3. Cost to be determined in a manner agreed by the City and Contractor.
 - 4. Cost to be determined pursuant to Article 9.6-Cost Determination.
- E. A CCD signed by Contractor indicates the agreement of Contractor therewith, including adjustment in Contract Sum and Contract Time or the method for determining them. Such

agreement shall be effective immediately and shall be recorded as a Change Order.

- F. If Contractor does not respond promptly or disagrees with the method for adjustment in the Contract Sum, the method and the adjustment shall be determined by Construction Manager on the basis of reasonable expenditures and savings of those performing the Work attributable to the change including, in case of an increase in the Contract Sum, an allowance for overhead and profit in accordance with Articles 9.6.3 and 9.6.4-Allowable Markups. If the parties still do not agree on the price for a CCD, Contractor may file a Claim in accordance with the Agreement. Contractor shall keep and present, in such form as Construction Manager may prescribe, an itemized accounting together with appropriate supporting data. Unless otherwise provided in the Contract Documents, costs for the purposes of this paragraph shall be limited to those provided in Article 9.6-Cost Determination.
- G. Pending final determination of cost to the City, amounts not in dispute may be included in Applications for Payment.

9.5.5 Documentation for All Changes

- A. Upon request of the Construction Manager, the Contractor shall provide the following information to support the request for change in cost or time:
 - 1. Copy of original quotations, purchase order or invoices to verify costs included in original pricing.
 - 2. Copy of all quotations, purchase order or actual invoices to support new costs submitted.
 - 3. Copy of all insurance and bond costs resulting from change.
 - 4. Copy of all quantity takeoff sheets for materials, labor and equipment.
 - 5. Certified payroll records.
 - 6. A list of equipment with manufacturer's name and model number and the alphanumeric designation used in the Equipment Rental Rates prepared by the California Department of Transportation, unless the equipment is included in the Agreement, Exhibit C-Guaranteed Maximum Price, Cost of Work and Fee.
 - 7. Invoices for all non-owned rental equipment.
 - 8. Other information, as reasonably required, to document the labor, equipment and materials used.
- B. Correlation of Other Items:
 - 1. Contractor shall revise Application for Payment forms to record each authorized Change Order or CCD as a separate line item and adjust the GMP on the next monthly progress billing.
 - 2. Contractor shall revise the Progress Schedules prior to the next monthly pay period to reflect the effects of all authorized Change Orders or CCDs.
 - 3. Contractor shall enter changes in Project Record Documents prior to the next monthly pay period and provide a copy to the Engineer with progress billing.

9.6 Cost Determination

With respect to Change Orders which increase or decrease the Scope of Work described in Exhibit B- Contractor's Technical Proposal, are not due to the errors or omissions of CONTRACTOR and are not attributable to Excusable Delays or the contingencies set forth in Article 9.7 below, the GMP shall be increased (or decreased) by the following "Scope Change Costs":

9.6.1 Contractor's Direct Cost Categories

The Contractor's allowed direct costs are found in the Agreement, Exhibit C-Guaranteed Maximum Price, Cost of Work and Fees.

9.6.2 Subcontractor's Direct Cost Categories

The categories described below are defined to be direct costs for subcontractors at all tier levels.

No other type of costs will be allowable as a direct cost. Direct costs shall not include any labor costs or indirect costs pertaining to the subcontractor's managers or superintendents, their office and engineering staffs, the cost of their offices, facilities, vehicles, or anyone not directly employed on such work, nor small tools (as defined in item C-Subcontractor's Construction Equipment Rental Cost of this Article 9.6.2) nor supplies. All such items are considered indirect costs which form a part of the Contractor's and subcontractors' overhead expenses.

A. Subcontractor's Direct Field Labor

1. The cost of labor for workers (including forepersons when authorized by the Construction Manager) used in actual and direct performance of the work by the subcontractor will be the sum of the following:
 - a. The actual wages paid plus any employer payments to, or on behalf of workers for fringe benefits including health and welfare, pension, vacation and similar purposes.
 - b. All payments imposed by State and Federal Laws including, but not limited to, workers' compensation insurance, and social security payments. The rates used for workers' compensation insurance shall be actual rates paid by the subcontractor for each specific craft and broken down by wage rate if applicable to that craft.
 - c. General Liability insurance burden, if applied to subcontractor's payroll. By formal submittal, the subcontractor shall provide adequate backup information to Construction Manager to verify this burden rate is indicative of the actual rates paid by the Contractor as a percent of labor.
2. Except as otherwise may be agreed to in writing by the Construction Manager, the actual wages and benefits paid for manual classifications of subcontractor's on- site workers will not, in the aggregate, be less than the current applicable wage for each classification as established by the State of California Department of Industrial Relations.
3. Specifically prohibited from the subcontractor's labor costs are other payroll burden factors such as small tools (as defined in item C below), bonuses of any kind and safety incentives.
4. Subcontractor shall include the actual travel and/or subsistence costs, if any, as a separate line item under the labor cost category. Except as otherwise may be agreed to in writing by the Construction Manager, the actual travel and/or subsistence costs will not be less than established in the State of California Department of Industrial Relations.

B. Subcontractor's Materials

1. The cost of all materials, including all factory testing, freight and delivery costs of materials, accepted by the City and used in performing the work will be the cost to the subcontractor from the supplier thereof. All discounts for early payment shall accrue to the subcontractor unless the City's payment to subcontractor is paid to subcontractor before discount payment is due in which case discount savings will be fully credited to City on next progress billing. All rebates and all returns from the sale of surplus materials shall be credited to the Cost of the Work.
2. At the request of the Construction Manager, the subcontractor will obtain more than one quote for materials to be used to complete change order or force account work. Copies of all quotes shall be shown to the Construction Manager.
3. For materials used in construction of the Project which may have additional uses on other projects for the subcontractor's benefit, such as dimensional lumber, beams and plywood to form concrete or temporary diversion pipes, the subcontractor shall submit a material unit cost to cover use of these types of materials for the approval of the City prior to delivery to the Work Site. This unit cost shall take into account the use of such materials on other past and future projects.

C. Subcontractor's Construction Equipment Rental Cost

1. The cost of construction machinery and equipment for changes shall be based on fair rental cost or equivalent rental cost of owned equipment. Such costs will be allowed for only those days or hours during which the equipment is in actual use. Payment shall be based on actual rental and transportation invoices but shall not exceed the rental rates listed for such equipment in the State of California Department of Transportation publication entitled "Labor Surcharge and Equipment Rental Rates" which is in effect on the date upon which the work is performed. City-operated equipment rates shall not exceed the rates in the aforesaid Rental Rate publication plus the labor costs as provided in this section.
2. The aforesaid rental rates shall be deemed to include the cost of fuel, power, oil, lubrication, supplies, small tools, necessary attachments, repairs and maintenance of all kinds, depreciation, storage, insurance, labor except for construction equipment operators and any and all costs to the subcontractor incidental to the use of such construction equipment. All equipment must be in good working condition and suitable for the purpose for which it is to be used, as judged solely by the Construction Manager. Rental time will not be allowed while equipment is inoperative due to breakdowns.
3. Compensation for idle time of equipment through delays caused by the City will be made consistent with Section 8-1.09, Right of Way Delays, of the Caltrans Standard Specifications.
4. Small Tools. Individual pieces of equipment or tools having a replacement value of \$500 or less, whether or not consumed by use, are considered to be small tools and no rental payment will be made unless it can be demonstrated that the particular item is needed and purchased by the subcontractor solely for the completion of the Change Order work.
5. The rental time to be paid for equipment used to complete change order and force account work will be the time the equipment is in operation on the change order or force account work being performed or an approved outside rental rate from an equipment rental company provided such rental rate was approved by the Construction Manager

prior to the equipment's transportation to the project for use in the change order or force account work.

6. For equipment not already on the project site to complete other portions of the Work, loading and transporting costs will be allowed for equipment approved by the Construction Manager to complete change order or force account work. The cost of transporting equipment in low bed trailers shall not exceed the hourly rates charged by established haulers in the area. The cost of transporting equipment shall not exceed the applicable minimum established rates of the California Department of Transportation.

D. Special Services used by Subcontractor

When the Construction Manager and the Contractor, by agreement, determine that special service or item of extra Work cannot be performed by forces of a subcontractor, service or extra Work item may be performed by a specialist. These types of services will be paid based on current market rates, subject to Construction Manager approval, which approval will not unreasonably be withheld.

9.6.3 Allowable Mark-Ups - Contractor

The Contractor's allowed mark-ups are found in Exhibit C Guaranteed Maximum Price, Cost of Work and Fees.

9.6.4 Allowable Mark-Ups – Contractor's Subcontractor(s)

The subcontractors shall be entitled to compensation for indirect field and home office overhead costs, and profit for Change Order work. This compensation shall be in the form of markup percentages applied to the direct cost of the Change Order increase or decrease of work, as further described below. The maximum markup which will be allowed for the subcontractor's combined overhead and profit will be:

- A. For work by its own organization, the subcontractor may add up to the following percentages:
 - Direct Field Labor: 15 percent
 - Materials: 10 percent
 - Equipment (owned or rented): 10 percent
 - Special Services: 5 percent
- B. For all such work done by sub-tier-subcontractors, such sub-subcontractors may add the same percentages as the subcontractor as listed in (9.6.4.A) above to its actual net increase in costs for combined overhead and profit. The subcontractor may then add up to five percent (5%) of the sub-subcontractor's total for its combined overhead and profit. No additional mark-ups will be allowed for further tier-ed subcontracts below a sub-subcontractor.
- C. When both additional and deleted work are involved in any one change order, the combined overhead and profit shall be calculated on the basis of the net change, whether an increase or decrease. For Change Order work which results in a net decrease in cost a minimum of five percent (5%) markup shall be added by the subcontractor to the sum of the direct labor, materials and equipment as a deduction for overhead, profit, and reduction in bond and insurance. The subcontractor shall not be entitled to nor claim for anticipated profits on work that has been omitted.
- D. To the total of the subcontractor's actual costs and fees allowed herein under, not more than two percent (2%) shall be added for additional bonds, if bonds were required by the Contractor. The compensable percentage for the subcontractor's bonds shall be based on the

subcontractor's actual bond costs, as substantiated through documentation formally submitted to the Construction Manager.

- E. The added fixed fees shall be considered to be full compensation, covering the cost of general supervision, overhead, profit, small tools, incidentals and any other general expenses. The above fixed fees represent the maximum limits which will be allowed, and they include, but are not limited, to the subcontractors' indirect field and home office expenses and all other costs for cost proposal preparation, schedule analysis and preparation, operation and maintenance manual documentation, and record documents and change order administration.

9.6.5 Materials On Order at Time of Change Order

If acceptable material is ordered by the subcontractor for the deleted work prior to the date of notification of such deletion by the Construction Manager, and if orders for such material cannot be canceled, the subcontractor will be paid at the actual cost. In such case, the material paid for shall become the property of the City and City will pay for the actual cost of any further handling. If the material is returnable to the vendor, and if the Construction Manager so directs, the material shall be returned and the subcontractor will be paid for the actual costs of charges made by the vendor for returning the material. The actual cost of handling returned material will be paid for by the City.

9.6.6 Disallowed Costs in Change Order and Force Account Work

Disallowed subcontractor costs in Change Orders include, but are not limited to:

- A. Interest cost of any type other than those mandated by statute;
- B. Change Order preparation and review costs;
- C. Meetings related to Change Orders;
- D. Schedule preparation costs;
- E. Submittal preparation costs;
- F. Accounting and Invoicing costs related to Change Orders;
- G. Developing and/or updating as-built drawings.

9.7 Change Orders on Account of Contingencies

With respect to Change Orders which are attributable to the following contingencies, the GMP shall be adjusted (increased or decreased) by the following **"Contingency Costs,"** consisting of the following:

9.7.1 Taxes

With respect to new, increases, or decreases in taxes arising after the date of this Agreement (other than taxes assessed based on the income of CONTRACTOR), the Change Order shall consist of the incremental amount of such new, increased or decreased taxes only.

9.7.2 Permit Fees

With respect to increases or decreases in fees for permits or other governmental certificates or instruments arising after the date of this Agreement, the Change Order shall consist of the incremental amount of such increases or decreases. To the extent this Agreement states that a permit or certificate is not required and

CONTRACTOR is later required to procure such permit or certificate, all out-of-pocket costs reasonably associated therewith shall be included in the Change Order

9.8 Change Orders on Account of Excusable Delays

9.8.1 Construction Delay Costs

With respect to Change Orders, which are attributable to Excusable Delays, and subject to the exceptions set forth in Article 9.8.2 below, the GMP shall be increased by the following “Delay Costs”:

- A. Increased allowable labor costs resulting from wage increases paid due to the delay;
- B. Premiums for overtime and extra shifts incurred in accelerating the Work, but only if acceleration is required in advance by CITY;
- C. Additional general conditions costs which would not have been incurred but for the delay (itemized, and not based on a formula allocation);
- D. Demobilization and remobilization costs; and
- E. Additional items of Cost of the Work attributable to the Excusable Delay and which would not have been incurred but for the Excusable Delay.

9.8.2 Exceptions

With respect to the Excusable Delays described in Article 7.4.2, the following exceptions to the cost provisions of Article 9.8.1 above shall apply:

- A. Failure or inability of CITY to make available any or all of the Site in accordance with the requirements of the Schedule is not a compensable delay if such Excusable Delay occurs prior to the commencement of the Construction Work.
- B. Failure or inability of CITY or CONTRACTOR to obtain necessary zoning changes, variances, code changes, permits or approvals from any governmental authority; is not a compensable delay if such Excusable Delay occurs prior to the commencement of the Construction Work.
- C. Changes in Applicable Laws. Additional compensation shall only be paid if the change in Applicable Law is not a change in law of general application (e.g., CAL/OSHA), but is a change in law specifically affecting the Project.

9.9 Change Orders on Account of Differing Site Conditions

If CONTRACTOR encounters conditions described in Article 7.3.3-Excusable Delays, in addition to the increase in the GMP on account of delay costs incurred by CONTRACTOR (as described in Section 9.8.1), the GMP shall also be increased by the additional Cost of the Work attributable to such conditions which would not have been incurred but for such conditions.

9.10 Cost Pricing Data and Access To Records

- A. All cost and pricing data submitted by the Contractor with respect to any change, prospective or executed, or any claim for extra compensation shall be a true, complete, accurate and current representation of actual cost and pricing of the work. The Construction Manager may require a formal certification as to cost and pricing data submitted by the

Contractor.

- B. The Construction Manager shall have access to the records of Contractor and Subcontractors as provided in Article 8.18-Audits and Access to Records.

9.11 Time Extensions on Account of Change Orders.

CONTRACTOR shall be entitled to a time extension in connection with any Change Order to the extent its time of performance is extended due to such Change Order. CONTRACTOR shall present to CITY a CPM analysis showing how the Change Order affects the critical path of the Work.

9.12 Force Majeure

There shall be no additional compensation to CONTRACTOR on account of Force Majeure.

ARTICLE 10 - CORRECTION OF WORK

10.1 Correction of Work Prior to Completion

Prior to the date of Final Completion, CONTRACTOR shall correct Work which (a) CITY reasonably rejects as being defective or nonconforming to the requirements of the Contract Documents in a written notice delivered to CONTRACTOR or (b) CONTRACTOR recognizes is defective or nonconforming to the Contract Documents. If other portions of the Work are adversely affected by or are damaged by such defective Work, CONTRACTOR shall also correct, repair or replace such affected or damaged Work, as well as any other property of CITY or others damaged by such defective or nonconforming Work. Prior to the date of Final Completion, the cost of correcting any damaged or defective work shall be paid as a Cost of the Work.

10.2 Correction of Work After Completion

For defects identified by CITY and for which CITY has notified CONTRACTOR within a period of twelve (12) months after the date of Final Completion, or within such longer period as may be provided by special warranties contained in the Contract Documents, CONTRACTOR shall re-execute, correct, repair or replace all Work found to be defective or nonconforming to the Contract Documents (whether arising from a construction defect, error, omission or deficiency). If other portions of the Work are adversely affected by or damaged by such defective Work, CONTRACTOR shall also correct, repair or replace such affected or damaged Work, as well as any other property of CITY or others damaged by such defective or nonconforming Work.

10.3 Acceptance of Nonconforming Work

If CITY prefers to accept Work, which is not in accordance with the requirements of the Contract Documents, CITY may do so instead of requiring its removal and correction, in which case the GMP will be reduced as appropriate and equitable. Such adjustment shall be effected whether or not final payment has been made.

10.4 No Effect on Limitations

Nothing contained in this Article shall be construed to establish a period of limitation with respect to other obligations, which CONTRACTOR may have under the Contract Documents.

ARTICLE 11 - INSURANCE AND BONDS; INDEMNIFICATION

11.1 Insurance to be provided by CONTRACTOR

CONTRACTOR shall, at all times, maintain in full force and effect at a minimum the insurance required by this section; and CONTRACTOR shall not allow any subcontractor to commence Work until similar insurance required of the subcontractor has been obtained and filed.

11.2 Evidence of Coverage

CONTRACTOR shall, at all times, maintain in full force and effect at a minimum the insurance required by this section; and CONTRACTOR shall not allow any subcontractor to commence Work until similar insurance required of the subcontractor has been obtained and filed. An original Certificate of Insurance, and copies of all required endorsements, all in a form approved by the Risk Manager, evidencing all required coverage or policies shall be filed after the award of the bid and prior to approval of the Contract by the City Council. CONTRACTOR shall provide ten (10) Days prior written notice to CITY of any reduction of coverage limits or cancellation of the coverage or policies shall be given to the City of Roseville as Certificate holder.

11.3 Qualifying Insurers

With the exception of the State Compensation Insurance Fund, all required insurance policies shall be issued by companies licensed to do business in the State of California and who hold a current policy holders alphabetic and financial size category rating of not less than AVII according to the most recent issue of Best's Insurance Reports.

11.4 Summary of Insurance Requirements

Commercial General Liability, automobile liability, and worker's compensation insurance shall be maintained as shown in the table below.

Table 1: Summary of Insurance Required

Coverage	Limits
Commercial General Liability Minor Construction Projects (Projects under \$1,000,000)	\$2,000,000 each occurrence \$4,000,000 aggregate Personal Injury: \$2,000,000 each occurrence \$4,000,000 aggregate
Commercial General Liability Major Construction Projects (Projects over \$1,000,000)	\$5,000,000 each occurrence \$10,000,000 aggregate Personal Injury: \$5,000,000 each occurrence \$10,000,000 aggregate

Coverage	Limits
Comprehensive Automobile Liability For bodily injury (including death) and property damage which provides	Total limits of not less than One Million Dollars (\$1,000,000) combined single limits per accident, applicable to all owned, non-owned, and hired vehicles
Statutory Workers' Compensation and Employer's Liability Insurance	Limits of not less than One Million Dollars (\$1,000,000) per occurrence.
Builder's Risk/Course of Construction Insurance	All Risk" type of builder's Risk Insurance of the type covering one hundred percent (100%) of the value of the Work performed under this Contract
Contractor's Pollution Liability Insurance	Combined Single Limit for each occurrence: \$2,000,000 General Aggregate: \$2,000,000
Professional Liability Submittals prepared by licensed California Engineer	Limit per claim of at least \$2,000,000, and a \$4,000,000 in the aggregate for errors and omissions.

11.4.1 Subcontractors

Minimum Amount of Coverage for Subcontractors who are NOT Listed Contractors included in Attachment 7 to the RFP "Statement of Subcontractors": The bodily injury, personal injury and property damage liability of the Commercial General Liability insurance shall provide coverage in the following limits of liability: \$2,000,000 on account of any one occurrence for bodily injury and property damage, \$2,000,000 personal and advertising injury limit with an annual general aggregate limit of not less than \$4,000,000, and \$2,000,000 products and completed operations aggregate, combined single limit. The Automobile Liability insurance policy shall provide minimum limits of \$1,000,000 per accident as a combined single limit arising out of the ownership, maintenance, or use of any owned or non-owned vehicles. These minimum amounts of insurance coverage do not preclude the Contractor from requiring higher limits or additional insurance coverage as it deems necessary.

11.5 Commercial General Liability.

11.5.1 Coverage or Endorsements

The Commercial General Liability policy shall include coverage or endorsements for:

- A. Completed operations.
- B. Losses related to independent contractors, products and equipment.
- C. Explosion, collapse and underground hazards.

11.5.2 Copies to be Provided

The Commercial General Liability Insurance shall include the following, copies of which shall be provided:

- A. Inclusion of the CITY of Roseville, and its officers, agents, employees and volunteers, as additional insured (except for workers' compensation as respects services or operations under the Contract. The additional insured endorsement for the general liability policy shall be at least as broad as the Insurance Services Office ("ISO") CG 20 38 04 13 or an equivalent, blanket endorsement or section of the policy. Endorsements must include coverage for on-going and completed operations. Endorsements shall cover the CITY of Roseville, its officers, agents, employees, and volunteers.
- B. Cross liability and severability of interest clauses providing that the insurance applies separately to each insured except with respect to the limits of liability.
- C. Stipulation that the insurance is primary and noncontributory, as evidenced by a separate endorsement (CG 20 01 04 13 or an equivalent) or section of the policy, and that neither CITY nor its insurers will be called upon to contribute to a loss.
- D. Such insurance shall specifically cover the contractual liability of the CONTRACTOR.
- E. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.
- F. Waiver of subrogation endorsement.
- G. CONTRACTOR shall furnish a certificate for the period covered.

11.5.3 Claims Made Coverage – Special Notice

SPECIAL NOTICE - CLAIMS MADE COVERAGE:

Liability insurance coverage may not be written on a "claims made" basis, except for Professional Liability insurance. The Certificate of Insurance must clearly provide that the coverage is on an "occurrence" basis.

11.6 Comprehensive Automobile Liability

Comprehensive Automobile Liability for bodily injury (including death) and property damage which provides total limits of not less than One Million Dollars (\$1,000,000) combined single limits per accident, applicable to all owned, non-owned, and hired vehicles.

11.7 Statutory Workers' Compensation and Employer's Liability Insurance

Statutory Workers' Compensation and Employer's Liability Insurance, including a waiver of subrogation endorsement and a Broad Form "All-States" Endorsement for all employees engaged in services or operations under the Contract. The employer's liability insurance shall provide limits of not less than One Million Dollars (\$1,000,000) per occurrence. Both the worker's compensation and employer's liability policies shall contain the Insurer's waiver of subrogation in favor of CITY, its officers, agents, employees, and volunteers.

11.8 Builder's Risk/Course of Construction Insurance

CONTRACTOR shall be responsible for all loss, damage or destruction whatsoever to the Work called for by this Contract until the approval of a Notice of Completion. CONTRACTOR shall secure "All Risk" type of builder's Risk Insurance of the type covering one hundred percent (100%) of the value of the Work performed under this Contract (the value is presumed to be the Contract amount unless otherwise stated in Supplemental Conditions) and all materials, equipment, or other items to be incorporated therein while the same are located at the construction site, a bonded warehouse, or its place of manufacture. At any time, the policy shall cover the value of the Work completed. The policy shall cover hazards including the losses due to fire, explosion, hail, rain, lightning, flood (separate insurance as needed), vandalism, malicious mischief, wind, collapse, aircraft, and smoke.

The policies providing such insurance shall name CITY as a loss payee as its respective interests may appear, and certified copies of such policies shall be filed with CITY.

Builder's Risk Insurance is not required for coverage of losses in excess of five percent (5%) of the Contract amount for damages resulting from earthquake in excess of a magnitude of 3.5 on the Richter scale, or tidal waves. Coverage in the amount of five percent (5%) of the Contract amount for such losses is required.

11.9 Contractor's Pollution Liability Insurance

Contractor's Pollution Liability Insurance. The Contractor shall obtain Pollution Liability Insurance. This insurance shall be written in comprehensive form either as a separate policy or as an endorsement to Contractor's general liability coverage and shall cover liability for bodily injury, property damage, and environmental damage resulting from pollution and related cleanup costs incurred, all arising out of any Work to be performed under the Agreement, including liability for and defense of lawsuits and regulatory actions. Coverage shall be provided for both Work performed on Site, as well as during the transport of hazardous materials. Coverage shall apply to sudden as well as gradual pollution conditions, including without limitation conditions resulting from the escape or release of smoke, vapors, fumes, acids, alkalis, toxic chemicals, liquids, or gases, natural gas, waste materials, or other irritants, contaminants, or pollutants, including asbestos. The liability limits shall be not less than:

- Combined Single Limit for each occurrence: \$2,000,000.
- General Aggregate: \$2,000,000.

If the coverage required is written on a claims-made coverage form:

- The retroactive date must be shown, and this date must be before the award date of the Agreement.
- Insurance must be maintained, and evidence of insurance must be provided for at least five (5) years after final payment.
- If coverage is canceled or non-renewed, and not replaced with another claims-made policy form with a retroactive date prior to the Agreement award date, the Contractor must purchase extended reporting period coverage for a minimum of five (5) years after Final Payment.
- A copy of the claims reporting requirements must be submitted to the City for review.

11.10 Professional Liability Insurance

All submittals required of the Contractor which are to be prepared by a licensed California engineer shall be prepared only by a licensed engineer who is covered by a professional liability insurance policy issued by a California-admitted carrier or a carrier authorized to do business in California with a Best's rating of

A-: VII or better, with an limit per claim of at least \$2,000,000, and a \$4,000,000 in the aggregate for errors and omissions. Such insurance shall be maintained in effect by said engineer at all times while performing Work on the Project and for at least three (3) years after Final Completion of the Project. Contractor shall submit an insurance certificate for such engineer prior to beginning Work for approval by the City.

11.11 Other Insurance Provisions.

- A. The requirements of the Contract Conditions as to types and limits of insurance coverage to be maintained by CONTRACTOR, and any approval of insurance by CITY, are not intended to, and shall not in any manner limit or qualify the liabilities and obligations otherwise assumed by CONTRACTOR pursuant to the Contract, including, but not limited to, the provisions concerning indemnification, nor preclude CITY from taking any other action available to it under any other provision of the Contract or law.
- B. CITY acknowledges that some insurance requirements contained in the Contract Conditions may be fulfilled by self-insurance on the part of CONTRACTOR. However, this shall not in any way limit liabilities assumed by CONTRACTOR under the Contract. Any self-insurance must be approved in writing by CITY, in its sole discretion and shall not reduce the limits of liability. Any deductibles or self-insured retentions (“SIR”) must be declared on the certificate of insurance and approved by CITY in writing. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or CITY. CITY reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.
- C. CONTRACTOR agrees to include in its contracts with all subcontractors the same requirements and provisions of this Contract, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor’s work. Furthermore, CONTRACTOR shall require its subcontractors to agree to be bound to CONTRACTOR and CITY in the same manner and to the same extent as CONTRACTOR is bound to CITY under this Contract. Additionally, CONTRACTOR shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of CITY’S indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request. Alternatively, CONTRACTOR may insure subcontractor(s) under its own policy.
- D. CITY, its officers, agents, employees and volunteers are to be covered as insureds with respect to liability arising out of automobiles owned, leased, hired or borrowed by or on behalf of CONTRACTOR; and with respect to liability arising out of work or operations performed by or on behalf of CONTRACTOR including materials, parts or equipment furnished in connection with such work or operations. Coverage shall not extend to any indemnity coverage for the active negligence of the additional insured in any case where an agreement to indemnify the additional insured would be invalid under California Insurance Code Section 11580.04. In addition, the insurance policy may not contain language which prohibits additional insureds or other insurers from satisfying the self-insured retention or deductible.
- E. The limits of insurance required in this Contract may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of CITY (if agreed to in a written contract) before the CITY’S own insurance shall be called upon to protect it as a named insured.

- F. In the event CONTRACTOR retains the Architect/Engineer, CONTRACTOR shall require its Architect/Engineer to provide professional liability (errors and omissions) insurance (certificate and additional insured endorsement) in the amount of \$2,000,000.
- G. CITY RESERVES THE RIGHT TO WITHHOLD ANY PROGRESS PAYMENTS TO CONTRACTOR IN THE EVENT OF NONCOMPLIANCE WITH ANY INSURANCE REQUIREMENTS.

11.12 Payment, Performance and Warranty Bonds

CONTRACTOR shall furnish and deliver to CITY Performance, Labor & Materials, and Warranty Bonds issued by a surety prior to, and as a condition precedent to, commencement of the Construction Work on the Site; provided, however, the Warranty Bond shall be waived if such bond is not required pursuant to CITY'S request for proposals for the Project. The Labor & Materials and Performance Bonds shall be in a penal sum equal to one hundred percent (100%) of the GMP, and the Warranty Bond shall be in the penal sum equal to ten percent (10%) of the GMP. All bonds shall be in the form as set forth in Exhibit G hereto. All premiums for the Performance, Labor & Materials, and Warranty Bonds shall be a Cost of the Work. CITY shall have the right to withhold any payment(s) under this Agreement until CONTRACTOR has fully complied with this sub-section.

Table 2: Summary of Bonding Requirements

Bond Type	Requirement
Performance	100% of the Total Contract Price
Labor and Materials	100% of the Total Contract Price
Warranty	One year following the date of Final Completion Penal sum equal to ten percent (10%) of the GMP

11.13 Indemnification

To the fullest extent allowed by law, CONTRACTOR shall defend, indemnify, and hold harmless, CITY, its officers, employees, agents, and volunteers, and each and every one of them, from and against all actions, damages, claims, losses, expenses or other liabilities of every type and description, including reasonable attorney fees, to which they may be subjected or put, by reason of, or resulting from, the performance of the Work, whether upon or off the Work, including the loss of use thereof, that is caused in whole or in part by willful or reckless misconduct and/or any negligent or wrongful act or omission of CONTRACTOR, any Subcontractor, and anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, whether or not it is caused in part by a party indemnified hereunder, except for such claims arising from the sole negligence, active negligence, or willful misconduct of CITY. The parties intend that this provision shall be broadly construed.

CONTRACTOR's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

ARTICLE 12 - SAFETY: PROTECTION OF PERSONS AND PROPERTY

12.1 Contractor's Responsibility for Site Safety

It is the intent of the parties that CITY is not an exposing, creating, controlling, or correcting employer under California Labor Code Section 6400. In accordance with generally accepted fabrication and construction practices and all applicable Laws and Standards and Codes, CONTRACTOR shall have the authority and be solely and completely responsible for the safety of all property utilized and all persons performing under this Agreement. Moreover, the CONTRACTOR shall be the controlling employer and has the authority and responsibility to enforce safety for all fabrication, construction work, and Work performed under this Agreement.

The services of CITY'S contract administrator, if any, in conducting a review of CONTRACTOR's performance under this Agreement is not intended to include a review of the adequacy of CONTRACTOR's work methods, equipment or safety measures. If CITY and/or its contract administrator observes a safety violation related to the CONTRACTOR's performance under this Agreement, then CITY and/or its contract administrator will report the violation to the CONTRACTOR who is then responsible for assuring the violation is abated.

- A. CONTRACTOR shall be responsible for initiating, maintaining and providing supervision of safety precautions and programs in connection with the Work, and shall also comply with any and all insurance carrier-mandated safety requirements and programs.
- B. CONTRACTOR is hereby informed that work on this Project could be hazardous. CONTRACTOR shall carefully instruct all personnel performing under this Agreement in potentially hazardous work areas as to potential dangers and shall provide such necessary safety equipment and instructions as are necessary to prevent injury to personnel and damage to property.
- C. All Equipment, Work and materials provided under this Agreement shall be in strict accordance with all applicable Laws and Standards and Codes, and attention is drawn to the requirements of CAL/OSHA.
- D. CONTRACTOR shall perform under this Agreement so as not to expose personnel to, or to discharge into the atmosphere from any materials brought to the Site by CONTRACTOR, smoke, dust, asbestos, toxic chemicals or other air contaminants in violation of applicable Laws and Standards and Codes.
- E. The Contractor shall indemnify, defend and hold CITY and Construction Manager, Engineer, Funding Agencies and their respective officers, officials, employees, agents and volunteers or other authorized representatives harmless to the full extent permitted by law concerning liability related to the Contractor's safety obligations in accordance with Article 11.14-Indemnification.
- F. If death or serious injuries or serious damages occur, the accident shall be reported immediately by telephone or messenger to both the Construction Manager and the CITY. In addition, the Contractor shall furnish the Construction Manager with a copy of the Employer's Report of Injury immediately following any incident requiring the filing of said report during the prosecution of the Work under this Agreement. The Contractor shall also furnish the Construction Manager with a copy of the Employer's Report of Injury involving any subcontractors on this Project. The Contractor shall make all reports as are, or may be, required by any authority having jurisdiction, and permit all safety inspections of the Work being performed under this Agreement.
- G. If a claim is made by anyone against the Contractor or any subcontractor on account of any accident, the Contractor shall promptly report the facts in writing to the Construction Manager,

giving full details of the claim.

12.2 Safety Program

The Contractor shall establish, implement, and maintain a written injury prevention program as required by Labor Code Section 6401.7. Before beginning the Work, the Contractor shall file with the Construction Manager a written Contractor Safety Program that provides for the implementation of all of the Contractor's safety responsibilities in connection with the Work at the Site and the coordination of that program and its associated procedures and precautions with safety programs, precautions and procedures of each of its subcontractors and other Contractors performing work at the Site. The Contractor shall be solely responsible for initiating, maintaining, monitoring, coordinating, and supervising all safety programs, precautions, and procedures in connection with the Work and for coordinating its programs, precautions, and procedures of the other contractors and subcontractors performing the Work at the Site. The Safety Program should contain all the necessary elements for the Contractor to administer its program on the Site

The Contractor's compliance with requirements for safety and/or the Construction Manager's acceptance for filing of the Contractor's Safety Program shall not relieve or decrease the liability of the Contractor for safety. The Construction Manager's review of the Contractor's Safety Program is only to determine if the above listed elements are included in the program. The Contractor's completion of review of the Safety Program does not confirm adequacy of the Program to protect workers. The Contractor is solely responsible to determine adequacy of the program to protect workers per the applicable Labor Code Section.

12.3 Safety Supervisor

The Contractor shall appoint an employee as safety supervisor who is qualified and authorized to supervise and enforce compliance with the Safety Program. The Contractor shall notify the Construction Manager in writing prior to the commencement of work of the name of the person who will act as the Contractor's safety supervisor and furnish the safety supervisor's resume to the Construction Manager.

The Contractor will, through and with its Safety Supervisor, ensure that all of its employees and its subcontractors of any tier, fully comply with the Project Safety Policies. The Safety Supervisor shall be a full-time employee of the Contractor whose responsibility shall be for supervising compliance with applicable safety requirements on the Site and for developing and implementing safety training classes for all job personnel. The CITY shall have the authority to require removal of the Contractor's Safety Supervisor if the representative is judged to be improperly or inadequately performing the duties; however, this authority shall not in any way affect the Contractor's sole responsibility for performing this work safely, nor shall it impose any obligation upon the CITY to ensure the Contractor performs its work safely.

12.4 Applicable Laws

The Contractor shall comply with all applicable laws and regulations of any public body having jurisdiction for the safety of persons or property or to protect them from damage, injury or loss and shall erect and maintain all necessary safeguards for such safety and protection.

12.5 Safety Notices

In connection with the performance of the Work, CONTRACTOR shall provide notices and comply with all Applicable Laws bearing on the safety of persons and property and their protection from damage,

injury or loss. The Contractor shall notify owners of adjacent property and of underground facilities and utility districts when prosecution of the Work may affect them and shall cooperate with them in the protection, removal, relocation, and replacement of their property.

12.6 Reasonable Precautions

CONTRACTOR shall take all precautions and implement all safety measures and requirements imposed by any Applicable Law. Without limiting the generality of the foregoing, CONTRACTOR shall take necessary precautions for the safety of, and shall provide necessary protection to prevent damage, injury or loss to:

- A. Employees on the Work and other persons who may be affected thereby;
- B. The Work and materials and equipment to be incorporated therein, whether in storage on or off the Site under care, custody or control of CONTRACTOR; and
- C. Other property at the Site or adjacent thereto, such as trees, shrubs, lawns, walks, pavements, roadways, structures and utilities not designated for removal, relocation or replacement in the course of the Construction Work.

12.7 Specific Precautions

12.7.1 Confined Spaces

The Project requires work in confined spaces and requires compliance with CAL/OSHA and Federal OSHA requirements. Confined spaces for the purposes of this article shall be as defined by the Division of Industrial Safety. Work within confined spaces of this Project is subject to the definitions and applicable provisions of Section 5156 et seq., Title 8, Division 1, Chapter 4, Subchapter 7, Group 16, Article 108 of California Code of Regulations, and Title 29 Part 1926 of the Code of Federal Regulations.

In addition, the CITY classifies the following existing facilities as confined space: the interior of pipelines, vaults, manholes, reservoirs and any other such structure or space which is similarly surrounded by confining surfaces as to permit the accumulation of dangerous gases or vapors. The confined spaces are “permit” confined spaces as defined by OSHA and CAL/OSHA and therefore entry is allowed only through compliance with a confined space entry permit program by the Contractor that meets the requirements of 8 C.C.R. Section 5157. While the above-mentioned locations have been identified as permit confined spaces, other permit confined spaces may exist. It shall be the responsibility of the Contractor to identify and classify these confined spaces.

It is anticipated that the Contractor may encounter hazardous conditions within these permit confined spaces which include, but are not limited to the following:

- A. Exposure to hydrogen sulfide, methane, carbon dioxide and other gases and vapors commonly found in municipal sewers which could have or has the potential of having Immediate Danger to Life or Health Conditions (IDLH).
- B. Exposure to atmosphere containing insufficient oxygen to support human life.
- C. Exposure to combustible, flammable and/or explosive atmosphere.
- D. Exposure to sewage which may contain bacteriological, chemical and other constituents harmful to humans.
- E. Work in conditions where engulfment or entrapment may occur.

- F. Work in environments which may be slippery and/or have uneven work surfaces.
- G. Work in structures where workers may trip, slip and/or fall several feet.
- H. Exposure to an oxygen enriched environment.

12.7.2 Excavation Safety

- A. Section 6705. In accordance with the provisions of Section 6705 of the Labor Code, the Contractor shall submit, in advance of excavation of any trench or trenches five feet or more in depth, a detailed plan showing the design of shoring, bracing, sloping, or other provisions to be made for worker protection from the hazard of caving ground during the excavation of such trench or trenches. If such plans vary from the shoring system standards set forth in the Construction Safety Orders of the Division of Industrial Safety in Title 8, Subchapter 4, Article 6, California Code of Regulations, the plans shall be prepared and signed by a registered civil or structural engineer employed by the Contractor, and all costs therefore shall be included in the price named in the Agreement for completion of the Work as set forth in the Contract Documents. Nothing in this article shall be deemed to allow the use of a shoring, bracing, sloping, or other protective system less effective than that required by the Construction Safety Orders. Nothing in this article shall be construed to impose a tort liability on the CITY, the Engineer, the Construction Manager, nor any of their officers, officials, employees, agents, consultants or volunteers. The CITY'S review of the Contractor's excavation plan is only for general conformance to the Construction Safety Orders.

Prior to commencing any excavation, the Contractor shall designate in writing to the Construction Manager the "competent person(s)" with the authority and responsibilities designated in the Construction Safety Orders.

- B. Section 6707. Pursuant to the provisions of California Labor Code Section 6707, each Proposal submitted in response to this RFBP shall contain, as a separate cost item, adequate sheeting, shoring, and bracing, or equivalent method, for the protection of life or limb in trenches and open excavation, exceeding five (5) feet, which shall conform to applicable safety orders. By entering an amount for this cost item below, the Proposer warrants that its action does not convey tort liability to the City, the Engineer, the Construction Manager, the Funding Agencies and their respective officers, employees, agents, and subconsultants.

12.7.1 Equipment Safety Provisions

The completed Work shall include the specified permanent safety devices, such as machinery guards and similar safety items, required by the State and Federal (OSHA) industrial authorities and applicable local and national codes. Further, any features of the Work, including CITY-selected equipment, subject to such safety regulations shall be fabricated, furnished, and installed in compliance with these requirements. All equipment furnished shall be grounded and provided guards and protection as required by safety codes. Where vapor-tight or explosion-proof electrical installation is required by safety codes, this shall be provided. Contractors and manufacturers of equipment shall be held responsible for compliance with the requirements included herein. The Contractor shall notify all equipment suppliers and subcontractors of the provisions of this paragraph.

12.7.1 Use of Explosives

Use of explosives is prohibited, unless approved in advance in writing by CITY. CITY may impose reasonable conditions on the use of explosives.

12.7.1 Loading Capacity

The Contractor shall determine safe loading capacities and shall not overload any structure, building, pipe or other existing facility beyond its safe capacity during construction. In addition to any requirements imposed by law, the Contractor shall shore up, brace, underpin and protect as may be necessary all foundations and other parts of all existing structures, facilities and improvements on the Site or adjacent to the Site which are in any way affected by the Contractor's excavations or other operations connected with the Work. Prior to commencing any work which in any way affects adjoining or adjacent land or buildings thereon, or public utilities, the Contractor shall notify the Construction Manager to discuss responsibilities for properly notifying the owners/occupants of adjacent land and the protective measures taken by the Contractor. Upon request of the Construction Manager, the Contractor shall meet with the recipient of any notice or attend local public meetings as proper public outreach on local impacts caused by completion of the Work should be communicated to any parties that may be affected prior to commencing any work.

12.8 Safety Violations

Should the Contractor fail to correct an unsafe condition, the CITY shall have the right to notify the Contractor through the Construction Manager that an unsafe condition may exist and must be corrected or the Work in question can be stopped in accordance with Article 4.6, CITY's Right to Stop the Work, until the condition is corrected to the satisfaction of the CITY. No extension of time or additional compensation will be granted as a result of any stop order so issued. The notification and suspension of such Work or the failure to provide such notification and suspension by the CITY shall not relieve the Contractor of its sole responsibility and liability for safety and the correction of any unsafe conditions.

The CITY shall have the authority to require the removal from the Project of any worker and the foreman and/or superintendent in responsible charge of the work where safety violations occur. The CITY also delegates such authority to the Construction Manager as well.

12.9 Public Safety and Convenience

The Contractor shall conduct its work so as to ensure the least possible obstruction to traffic and inconvenience to the general public and the residents in the vicinity of the Work and to ensure the protection of persons and property. No road or street shall be closed to the public except with the permission of the Construction Manager and the written approval by the proper governmental authority. Fire hydrants on or adjacent to the Work shall be accessible to firefighting equipment. Temporary provisions shall be made by the Contractor to ensure the use of sidewalks, private and public driveways and proper functioning of gutters, sewer inlets, drainage ditches and culverts, irrigation ditches and natural water courses.

12.10 Emergencies

In an emergency affecting the safety of persons or property, CONTRACTOR shall act, at CONTRACTOR's discretion, to prevent threatened damage, injury or loss. Additional costs or extensions of time caused by CONTRACTOR on account of an emergency not caused by the fault or neglect of CONTRACTOR shall be determined as provided in Article 9.8-Change Orders on Account of Excusable Delay.

12.11 Safeguards

CONTRACTOR shall erect and maintain, as required by existing conditions and performance of the Work, reasonable safeguards for safety and protection, including posting danger signs and other warnings against hazards, promulgating safety regulations and notifying CITY and users of adjacent sites and utilities, and shall comply fully with the requirements of CAL/OSHA.

12.12 Security

CONTRACTOR shall take any and all precautions that may be reasonably necessary to render all portions of the Work, the Site and any adjacent areas affected by the Work secure in all material respects, to decrease the likelihood of accidents, and to avoid vandalism and other contingencies which are liable to delay the Work or give rise to claims or liabilities. CONTRACTOR shall furnish and install all necessary facilities to provide safe means of access to all points where Work is being performed. CONTRACTOR shall take all precautions and measures as may be reasonably necessary to secure the Project at all hours, including evenings, holidays and non-work hours. Such precautions may include provision of security guards.

12.13 Damage to Property at the Site

CONTRACTOR shall be responsible for any and all damage or loss to property at the Site, except to the extent caused by the acts or omissions of CITY or its representatives, agents or employees. The costs and expenses incurred by CONTRACTOR under this Article shall be paid as a Cost of the Work to the extent that such costs and expenses are in excess of or are not covered by required insurance, and to the extent of any deductibles. If such damage or loss is caused by CONTRACTOR, payment of such costs as Cost of the Work shall be limited by the provisions of Article 2.19.4 hereof.

12.14 Damage to Property of Others

- A. CONTRACTOR shall avoid damage, as a result of CONTRACTOR's operations, to existing sidewalks, curbs, streets, alleys, pavements, utilities, adjacent property, the work of Separate Contractors and the property of CITY. CONTRACTOR shall repair any such damage caused by the operations of CONTRACTOR, which costs shall be paid as a Cost of the Work to the extent that such costs and expenses are in excess of or are not covered by required insurance, and to the extent of any deductible.
- B. Failure of CONTRACTOR to Repair Damage. If CONTRACTOR fails to commence the repair of damage to property as set forth in this Article, and/or diligently pursue such repair, then CITY, after ten (10) Days prior written notice to CONTRACTOR (provided CONTRACTOR has not commenced such repair during such ten (10) Day period), may elect to repair such damages with its own forces and to deduct from payments due or to become due to CONTRACTOR amounts paid or incurred by CITY in correcting such damage.

12.15 Remedy of Damage

CONTRACTOR shall promptly remedy damage and loss to property referred to in Article 12.14-Damage to Property of Others (items B and C) caused in whole or in part by CONTRACTOR, or anyone employed by or in control of CONTRACTOR, or any Subcontractor. All costs incurred by CONTRACTOR in connection with its obligations under this Section shall be cost of the Work, but shall not increase the GMP.

ARTICLE 13 - DISPUTES

13.1 Disputes between CITY and CONTRACTOR

In the event of any dispute arising between CITY and CONTRACTOR regarding any part of the Contract or the Contract Documents, or the Parties' obligations or performance thereunder, and subject to any claims presentation requirements set forth in the Contract Documents, either Party may institute the dispute resolution procedures set forth herein. The Parties shall continue performance of their respective obligation hereunder notwithstanding the existence of a dispute.

13.2 Dispute Resolution Procedures

CONTRACTOR must submit all claims as defined in and in accordance with the claim resolution process set forth in Section 9204 of the Public Contract Code. Each such claim must be sent to CITY by registered mail or certified mail with return receipt requested and must contain reasonable documentation to support the claim. All claims must be received prior to acceptance of the Work and will be handled in accordance with the procedures set forth in Section 9204 of the Public Contract Code.

ARTICLE 14 - EVENTS OF DEFAULT AND REMEDIES; TERMINATION

14.1 CONTRACTOR Events of Default

The following shall be considered "CONTRACTOR Events of Default":

- A. If CONTRACTOR fails or neglects to carry out the Work in accordance with the provisions of the Contract Documents, and fails, after seven (7) Days' notice from CITY, to commence a cure to correct such failure or neglect and thereafter diligently pursue such cure to completion;
- B. If CONTRACTOR materially breaches this Agreement and fails, after seven (7) Days' notice from CITY, to commence a cure to correct such breach and thereafter diligently pursue such cure to completion (such breach to include, but not be limited to, failure to make payment to Subcontractors for materials or labor in accordance with the respective agreements between CONTRACTOR and the Subcontractors or violation of Applicable Laws);
- C. If a custodian, trustee or receiver is appointed for CONTRACTOR, or if CONTRACTOR becomes insolvent or bankrupt, is generally not paying its debts as they become due or makes an assignment for the benefit of creditors, or CONTRACTOR causes or suffers an order for relief to be entered with respect to it under applicable bankruptcy law or applies for or consents to the appointment of a custodian, trustee or receiver for CONTRACTOR, or bankruptcy, reorganization, arrangement or insolvency proceedings, or other proceedings for relief under any bankruptcy or similar law or laws for the relief of debtors, are instituted by or against CONTRACTOR, and in any of the foregoing cases such action is not discharged or terminated within sixty (60) Days of its institution.

14.2 Remedies of CITY upon a CONTRACTOR Event of Default.

14.2.1 Termination of Contract

Upon the occurrence of a CONTRACTOR Event of Default, CITY shall have the right to terminate this Contract upon an additional seven (7) Days written notice to CONTRACTOR, provided that CONTRACTOR has not commenced a cure within such seven (7) Day period.

14.2.2 Without prejudice to any other rights or remedies of CITY, CITY may:

- A. Take possession of the Site and of all materials, equipment, tools and construction equipment thereon owned by CONTRACTOR;
- B. Accept assignment of Subcontracts; and
- C. Finish the work by whatever reasonable method CITY may deem expedient.
- D. When CITY terminates the Contract as aforesaid, CONTRACTOR shall not be entitled to receive further payment until the Work is finished. If the unpaid balance of the GMP exceeds costs incurred in finishing the Work, such excess shall be paid to CONTRACTOR, up to the amount due CONTRACTOR for work performed prior to termination. If such costs exceed the unpaid balance of the GMP, CONTRACTOR shall pay the difference to CITY.

14.3 Recourse to Payment and Performance Bonds

Upon the occurrence of a CONTRACTOR Event of Default and termination of this Contract by CITY, CITY may call upon the Surety to perform its/their obligations under the Payment and Performance Bonds, if applicable.

14.4 Remedies not Exclusive

Except as otherwise provided in this Agreement, no remedy hereunder is intended to be exclusive of any other remedy, but each and every such remedy shall be cumulative and shall be in addition to any other available legal or equitable remedy, existing now or hereafter. No delay or omission to exercise any right or power accruing shall impair any such right or power nor shall it be construed to be a waiver of any Event of Default or acquiescence therein, and every such right and power may be exercised from time to time as often as may be deemed expedient.

14.5 Termination or Suspension for Convenience.

14.5.1 Termination for Convenience.

CITY may, without cause, terminate this Contract, or any portion of Work to be performed hereunder at any time by a notice in writing from CITY to CONTRACTOR for CITY'S convenience. In such case, CITY shall pay to CONTRACTOR all funds due CONTRACTOR for work performed up to the date of termination, plus all demobilization and close-out costs, including, but not limited to, any amounts payable to Subcontractors for early termination, plus reasonable overhead and profit on Work performed. All funds due hereunder, including unpaid Retention, shall be released within thirty (30) Days of termination of the Contract for convenience, subject to any withholding required or authorized by any Applicable Law. In no event shall such amounts owed to CONTRACTOR exceed the GMP.

14.5.2 Suspension for Convenience

CITY may, without cause, order CONTRACTOR in writing to suspend, delay or interrupt the Work in whole or in part for such period of time as CITY may determine. An adjustment shall be made for

increases in the cost of performance of the Work, including Fee on the increased cost of performance, caused by the suspension, delay or interruption, in accordance with the Change Order provisions of this Contract. No adjustment shall be made to the extent (1) the performance is, was or would have been so suspended, delayed or interrupted by another cause for which CONTRACTOR is responsible or (2) that an equitable adjustment to the GMP and/or Schedule is made or denied under another provision of this Contract. Adjustments made in the cost of performance may have a mutually agreed fixed or percentage Fee.

ARTICLE 15 - MISCELLANEOUS PROVISIONS

15.1 Governing Law

This Contract shall be construed with and governed by the laws of the State of California.

15.2 Successors and Assigns

CITY and CONTRACTOR respectively bind themselves, their partners, shareholders, successors, assigns and legal representatives to the other Party hereto and to shareholders, successors, assigns and legal representatives of such other Party in respect to covenants, agreements and obligations contained in the Contract Documents. Neither Party shall assign the Contract without the prior written consent of the other.

15.3 Notice

Any notices to Parties required by this Agreement shall be delivered or mailed, U.S. first class, postage prepaid, addressed as follows:

If to CITY:	If to CONTRACTOR:
Janice Gainey City of Roseville 2005 Hilltop Circle Roseville, CA 95747	Dean Bailey Auburn Constructors, LLC 730 W. Stadium Lane Sacramento, CA 95834

Address for Notice may be changed by Notice to the other Party.

15.4 Modifications

No Modifications or Change Orders shall be valid unless in writing and signed by CITY and CONTRACTOR.

15.5 Interpretation

Any and all headings of this Agreement are for convenience of reference only and do not modify, define or limit the provisions thereof. Words of any gender shall be deemed and construed to include correlative words of the other gender. Words importing the singular number shall include the plural number and vice versa, unless the context shall otherwise be deemed to include all supplements and/or amendments to any such exhibits or documents entered into in accordance with the terms hereof and thereof. All references to any person or entity shall be deemed to include any person or entity succeeding to the rights, duties and

obligations of such person or entity in accordance with the terms of this Agreement. Where reference is made in this Agreement to another Contract Document, the reference refers to that provision as amended or supplemented by the other provisions of the Contract Documents. In the event of any conflict between or among the Contract Documents, the provisions of this Agreement shall govern.

15.6 Severability

If any provision of this Agreement is held to be inoperative or unenforceable as applied in any particular case because it conflicts with any other provision hereof or any constitution, statute, ordinance, rule of law or public policy, or for any other reason, such holding shall not have the effect of rendering the provision in question inoperative or unenforceable in any other case, or of rendering any other provision herein contained inoperative or unenforceable to any extent whatever. The invalidity of any one or more phrases, sentences, clauses or sections contained in this Agreement shall not affect the remaining portions of this Agreement or any part hereof, and they shall otherwise remain in full force and effect.

15.7 Whole Agreement

This Agreement, the Exhibits hereto and the Contract Documents, specifications and Drawings shall constitute the entire agreement between the Parties, and no inducements, considerations, promises or other references shall be implied in this Agreement that are not expressly addressed herein

15.8 Accounting Records

CONTRACTOR shall keep full and detailed accounts and exercise such controls as may be necessary for proper financial management under this Agreement; the accounting and control systems shall be reasonably satisfactory to CITY. CITY and CITY'S accountants shall be afforded access to CONTRACTOR's records, books, correspondence, instructions, drawings, receipts, Subcontracts, vouchers, memoranda and other data relating to this Agreement, and CONTRACTOR shall preserve these for a period of three (3) years after final payment, or for such longer period as may be required by law.

15.9 No Waiver

Neither the inspection by CITY or its agents, nor any order or certificate for payment of money, nor payment for, nor acceptance of the whole or any part of the work by CITY, nor any extensions of time, nor any position taken by CITY or its agents shall operate as a waiver of any provision of this Agreement or of any power herein reserved to CITY or any right to damages herein provided, nor shall any waiver of any breach of this Agreement be held to be a waiver of any other or subsequent breach.

15.10 CONTRACTOR Shall Assume Risks

Until the Final Completion or acceptance by CITY of all Work under this Contract, the Work shall be under CONTRACTOR's responsible care and charge. CONTRACTOR shall rebuild, repair, restore and make good all injuries, damages, corrections, and repairs occasioned or rendered necessary by accidental causes of any nature, to all or any portions of the Work, except as otherwise stipulated.

15.11 General Liability of CONTRACTOR

Except as otherwise herein expressly stipulated, CONTRACTOR shall perform all the work and furnish all the labor, materials, tools power and light, and appliances, necessary or proper for performing and completing the Work herein required in the manner within the time herein specified. The mention of any specific duty or liability of CONTRACTOR shall not be construed as a limitation or restriction of any

general liability or duty of CONTRACTOR and, any reference to any specific duty or liability shall be construed to be the purpose of explanation.

15.12 Attorney's Fees and Venue

If either Party commences any legal action against the other Party arising out of this Agreement or the performance thereof, the prevailing Party shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorney's fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. To the extent permitted by applicable law, each Party waives any defense that it may have based on lack of *in personam* jurisdiction or *forum nonconveniens*.

15.13 Third Party Beneficiaries

There are no third party beneficiaries to this Agreement.

IN WITNESS WHEREOF, the CITY of Roseville, a municipal corporation, has authorized the execution of this Agreement in duplicate by its CITY Manager and attested to by its CITY Clerk under the authority of Resolution No. _____, adopted by the Council of the CITY of Roseville on the ____ day of _____, 20____, and CONTRACTOR has caused this Agreement to be executed.

PROJECT UNDERSTANDING

PROJECT UNDERSTANDING

INTRODUCTION

The City of Roseville (City) has issued a Request for Proposal (RFP) for the West Side Tanks and Pump Station Project. For this capital improvement project, the City intends to utilize the Design-Assist Guaranteed Maximum Price (GMP) with shared savings contract delivery method. This method will effectively make the selected contractor a vital member of the project team, alongside the City and Water Works Engineers - who has been retained for engineering, design, and construction management services.

The Design-Assist GMP method benefits the City immensely as it allows for a qualifications-based bidding approach and provides for early contractor engagement and collaboration. Through collaboration, this method fosters cost appropriate approaches to the work and promotes constructability opportunities. Through this proposal, we intend to show that AUBURN is the best qualified, most prepared, and highly collaborative candidate to join the Design-Assist Team.

PROJECT OVERVIEW

The West Side Tanks and Pump Station Project has been in process since 2005 and was conceived to provide potable water storage and pumping capacity to new developments on the west side of the City's service area. The project was shelved for years due to the economic recession of 2008 but is now ready for construction.

Figure 1: View of a pre-stressed concrete water storage tank, with encased pump cans in the foreground, under construction at the West Hills Water Treatment Plant in Hollister, CA. Auburn Constructors was the prime contractor on this \$27.8M contract.

The West Side Tanks and Pump Station Project is comprised of the following major items of work:

1. Water Storage Tanks: Additional potable water storage is accomplished by the construction of two 6.0 MG pre-stressed concrete water storage tanks. Tank footings will require over excavation and installation of mechanical stabilized earth (MSE) foundation system. Foundation work will also involve the installation of a leak detection system with PVC liner and perforated piping.
2. Booster Pump Station: Additional pumping capacity is achieved through the installation of four vertical turbine booster pumps, which are housed inside a CMU block building along with a chemical distribution system and associated electrical equipment. Outside features include architectural canopies, valve vault for pump isolation valves, and a hydropneumatic tank to help regulate system pressure.

Figure 2: Isometric section view of the booster pump station building. AUBURN utilizes 3D modeling techniques to collaborate with the project team to refine work plans, discover conflicts before they happen, and provide better perspective on upcoming work. AUBURN personnel will bring this same competency to the Design-Assist team.

3. Tank Valve Vault: The City has made it clear that they are not in favor of direct buried valves on the site. A cast-in-place concrete valve vault will be constructed to house valves on the suction and discharge lines running between the tanks and booster pump station.
4. Electrical: The site will feature a standby diesel generator, fuel tank, and load bank. The pump station will feature variable frequency drives and reduced voltage soft starters, along with other associated electrical, control, and security equipment. Installation of electric service to site including transformer will be required.
5. Instrumentation and Controls: Installation of hardware, instrumentation, and I&C infrastructure will be by the Contractor while programming will be provided by the City.
6. Miscellaneous Site Work: Notable sitework items include sewer, storm drain, and potable water tie-ins; below and above ground yard piping and electrical; design and install of cathodic protection system; site paving and landscaping; construction of lined bioretention basins; and CMU block wall and chain link fence installation.

7. Project Management and Administration: Not only will the Contractor act in a project management role, maintaining schedule and contract correspondence, but they will also participate in a cooperative partnership with the City and Engineer to collaborate on major project challenges, risk mitigation, and constructability opportunities. The Contractor will contribute in up to eight Final Design Coordination Meetings with the Design-Assist Team.

AUBURN'S APPROACH

AUBURN's goal is to deliver the West Side Tanks and Booster Pump Station project to the City before its expected completion date for a lower cost than budgeted. Throughout the project, our experienced managers will collaborate with the City, Engineer, Subcontractors and Suppliers to blend form and function with budget and time. We pay attention to every detail in order to deliver a quality project as cost-effectively as possible. Likewise, our highly skilled field staff will self-perform installation of underground and aboveground utilities, structural concrete, site electrical, and mechanical equipment.

AUBURN will partner with Gateway Pacific Contractors (GATEWAY) to construct the two pre-stressed concrete storage tanks. GATEWAY is locally owned and operated and employs one of the most capable self-performing capacities of any general contractor in California who specializes in tank construction. AUBURN and GATEWAY have a history of successful partnerships on projects, several of which were performed directly for the City of Roseville. Three major advantages that the AUBURN-GATEWAY partnership will bring to the West Side Tanks and Booster Pump Station project include the following:

1. Both AUBURN and GATEWAY are locally owned and operated with 100% of our workforce living in the Sacramento region. Our personnel are invested in the local community and economy. We are readily available for this project, located in our backyard.
2. AUBURN maintains an in-house Electrical Division, which is an integral member of the contracting team for all municipal projects we pursue. This not only helps us to keep our costs low, but also reduces coordination and scheduling issues.
3. GATEWAY has successfully constructed the last five (5) prestressed tanks that were built for the City of Roseville. We hope to build upon this history of successful partnering by serving the City once again to construct the West Side Tanks.

NAME	DESCRIPTION	FINAL CONTRACT AMOUNT	ADDRESS	SUPT.	START	END
Roseville Water Treatment Plant	4MG reservoir with interior walls	2,791,597	9595 Barton Road Granite Bay, CA 95746	Gary Heim	August-90	November-91
10MG Water Storage Tank	Construct 10MG circular, prestressed concrete tank	4,451,281	Guilford Way @ Scarborough Dr. Roseville, CA 95678	Gary Heim	June-98	April-00
Water Reservoir	Construction of a new 6MG filter effluent reservoir	6,193,045	9595 Barton Road Granite Bay, CA 95746	Gene Gregory	June-03	April-05
Stoneridge Joint Use Water Storage Facility	Construct a 3MG prestressed concrete reservoir	4,196,375	3332 Halverson Drive Roseville, CA 95661	Gary Heim	May-08	July-09
Northeast Water Storage Reservoir Replacement	Replace 6MG concrete reservoir with 7.2MG prestressed concrete reservoir	5,207,198	Guilford Way @ Scarborough Dr. Roseville, CA 95678	Gary Heim	October-08	June-10

Figure 3: Details of the last five (5) prestressed concrete tanks built for the City by GATEWAY and DN TANKS. One of the same superintendents listed here is our proposed Tank Construction Superintendent.

ACHIEVING THE CITY'S GOALS

Best Value - A detailed GMP cost proposal has been developed for this Project. Along with an accurate budget, AUBURN will provide weekly updates to ensure opportunities are recognized, and any problems that need to be remedied are done so in a timely manner. This open book approach will give the City confidence that every dollar is being allocated efficiently.

Schedule - A detailed project schedule has been developed for this project which highlights the level of attention we put into every project we construct. In addition to all critical items being recognized at the onset, AUBURN will provide monthly progress reports summarizing activities performed during the reporting period, identify activities planned for the next reporting period, and identify performance and expenditures. AUBURN has never been assessed liquidated damages, which we attribute to our ability to produce and maintain excellent project schedules.

Quality - Long after construction is completed, this project will be highly visible to the public and provide a critical service to the surrounding community. AUBURN recognizes the great importance of this project to the City and will provide our distinguished attention to detail that we bring to every project we perform. AUBURN has an excellent track record of doing work right the first time and going the extra mile to ensure that all parties are satisfied with both function and aesthetics.

IDENTIFYING CHALLENGES

Based on AUBURN's thorough proposal preparation, we have identified the following aspects of work as particularly challenging comparatively in the overall scope.

CHALLENGE #1: Storm Drain Tie-In on Westpark Drive

The 30" storm drain tie-in on Westpark Drive will be inherently difficult as it requires us to perform a large diameter tie-in on an active street. This will necessitate continuous traffic control and a potential lane closure for multiple days as the new pipe is installed and the saddle manhole is cast in place. Some mitigation measures for this challenge are as follows:

- Clear communication with the City and other affected parties as to our tie-in schedule and durations.
- Prepare a detailed traffic control plan well in advance with review and buyoff from affected parties.
- Make consideration for working overtime hours on this task until in-traffic work is complete.

CHALLENGE #2: Construction Site Access

The current Erosion Control Plan shows temporary construction entrances being located on the north and east sides of the project in the same locations as the permanent

entrances. The north entrance is inconveniently located behind a security access gate for the Pleasant Grove Treatment Plant. Because work will be occurring simultaneously on the tanks and the pump station area, there will be considerable access demands between Auburn's forces and that of our tank subcontractor. We feel that two construction entrances will be required on the east side of the project to meet this demand. Ideally, the north access point could be moved to the location shown in Figure 3 below. This entrance would be conveniently located for the tank builder's use and the area already requires demolition in order to install the 30" storm drain.

Figure 3: Overview of 30" Storm Drain tie-in on Westpark Drive and possible access points to the site.

CHALLENGE #3: Coordination with Power Utility

Coordination with an outside agency to provide permanent power to a construction site is a recurring challenge on projects and if not properly coordinated, can become a major schedule driver or delay. Although we are not dealing with a larger organization like PG&E, we believe that coordination with Roseville Electric to provide permanent power to the site could present some difficulties making it worthy to mention in this section. Some mitigation measures for this challenge include:

- Early coordination and communication with Roseville Electric regarding the West Side Tanks and Booster Pump Station Project.
- Finalization of utility design.
- Frequent communication with Roseville Electric throughout the project to ensure that our scheduling and inspection requirements are identified and understood.

CHALLENGE #4: Backfill of Booster Pump Station

GATEWAY plans to construct both tanks concurrently with a three-month delayed start of Tank #1 after proceeding with Tank #2. As such, our preliminary schedule favors AUBURN's work progressing from west to east across the site in order to provide the best possible access for our tank subcontractor. Once tank over-excavation is completed, our forces can install underground utilities for the tanks and advance to the tank valve vault, triggering the start MSE foundation installation. As the tank work progresses from Tank

#2 to Tank #1, our forces will have advanced the site underground utilities to the Booster Pump Station. We will then begin work on the pump cans and the pump station valve vault while work on both tanks progresses.

Once the deeper aspects of the Booster Pump Station are completed, the pump station area will require backfilling to slab subgrade. During backfill of the pump station area, access will become congested between the earthwork subcontractor and the tank builder. This could possibly create a situation where AUBURN's forces have a brief delay in the work until backfill is completed. Some mitigation measures for this challenge include:

- Collaborating closely with our subcontractors when refining our CPM Baseline schedule and work plan to mitigate potential conflicts;
- Reviewing alternative sequencing of the work to ensure the best possible timeline.

CHALLENGE #5: Tank and Pipeline Disinfection and Flushing

Disinfection and flushing of the potable water tanks and pipelines will propose a challenge due to the large-scale infrastructure and sheer volume of water that will be required to make this possible. Discharging this high volume of flushing water and dechlorinated disinfection water to the City's system will require coordination with City utilities. We will prepare a highly detailed Disinfection Plan that draws heavily from AUBURN's and GATEWAY's experience in disinfecting water treatment plants, reservoirs, and pump stations.

CHALLENGE #6: Concrete Delivery

There is a total of two (possibly three) local concrete batch plants that will be able to service this project's demand. Due to the current overwhelming demand, these plants are requiring pours to be scheduled as far out as one month in advance, with delays of up to a week if contractors are unable to meet their originally scheduled pour date. GATEWAY is currently experiencing this challenge as they construct a 6MG prestressed concrete tank in Lincoln, California, to be completed in June of this year. To mitigate this challenge, AUBURN will ensure that lookahead schedules are accurate and to-date and will keep open communication with the plant as work progresses.

CHALLENGE #7: West Park High School Opening, Traffic, and Public Safety

The Roseville High School District has put out a notice stating that the West Park High School, located opposite the project site, will be opening for its first school year in August 2020. Though main access to the school is not off Westpark Dr., this still has the potential to increase traffic, congestion, and public attention at the project.

The tank foundation and structures alone require over 18,000 CY of aggregate base and drain rock and 6,000 CY of ready-mix concrete. Truck traffic to and from the site will be significant. AUBURN will work diligently with our suppliers to develop an efficient truck routing plan and will provide clear communication, access, signage, and traffic control measures when interfacing with the public right of way.

THIS PAGE IS INTENTIONALLY LEFT BLANK

TAB B

PROJECT APPROACH

PROJECT APPROACH

FOUNDATIONAL ELEMENTS

The following key elements form the foundation of our project approach:

1. **CONFIDENCE:** The City will have the full commitment and involvement of our top-level management throughout the life of the project. This commitment ensures that our best-qualified project team is selected, assembled, and available at the start of the project with the proper focus, organizational backing, and resources to “hit the ground running”.
2. **EXPERTISE:** AUBURN employs a team of proven client-focused construction professionals with current relevant project experience and intimate knowledge of the local construction market; who work well together and possess the mature interpersonal skill sets necessary to work collaboratively as a team; and who are committed to the success of the project.
3. **THE RIGHT PEOPLE:** We have assembled a team of qualified subcontractors, sub-consultants, and vendors, who are quality-focused with the proven expertise and depth of resources to handle a project of this size and complexity. It is worth noting that both AUBURN’s and GATEWAY’s management and skilled craftspeople live locally and have deep roots in the community. Our people are motivated to realize this project’s success.
4. **APPROPRIATE MEANS:** We utilize the most appropriate project scheduling, management and communication tools to provide accurate and real time information for effective decision making, including Primavera P6, ProCore, etc. The key to a successfully run project is not the software, it is the people using the software. We will use the appropriate tools to make this project a success and keep everyone informed and comfortable that our collective goals are being accomplished.
5. **OPEN COMMUNICATION:** Our team ensures effective communications and teamwork at all levels of the project with all stakeholders through a collaborative team approach, partnering with the City Engineering and Operations staff, and Water Works Engineers, to make the project a success for all.
6. **DEPTH OF RESOURCES:** AUBURN has the financial strength and Company-wide depth of resources to ensure the necessary manpower, materials, end equipment are employed on the project when needed.
7. **PREPLANNING:** We will establish a “Critical Path” submittal list at the project onset, working with vendors, the City and Engineer to expedite equipment procurement to ensure timeline objectives are met.

MAJOR PROJECT COMPONENTS

AUBURN has generated a preliminary CPM schedule which identifies the following major project components, the critical path drivers, and our proposed methodologies to accomplish the required tasks within the desired timeline:

1. Pre-Planning and Design Assistance
2. Site Development
3. Foundation Mitigation and Tank Construction
4. Tank Valve Vault
5. Booster Pump Station
6. Electrical, Instrumentation, and Control
7. Sitework Concrete, Paving, and Landscaping
8. Project Startup and Closeout

ITEM #1: PRE-PLANNING AND DESIGN ASSISTANCE

Pre-Planning

Once NTP is issued, pre-planning activities will continue in earnest, which will involve issuing all subcontracts and purchase orders for the project, delivering submittals for long-lead time and critical path items, and performing the required pot holing to confirm the extent of all existing utilities within the project limits. Some of the critical path submittals we will pursue initially include:

- MSE Foundation System
- Tank Liner and Underdrain
- Prestressed Concrete Tank
- Underground Pipe, Valves, Fittings
- Precast manholes and vaults
- Vertical Turbine Pumps and Cans
- Major electrical and instrumentation equipment

Design-Assistance

As a Design-Assist Team member, AUBURN, GATEWAY and their subcontractors will bring their extensive background and expertise to the table alongside the City and Water Works Engineers. Upon NTP, we will conduct a constructability review of the final design, providing our combined insight on construction means and methods to offer potential cost and schedule saving ideas that provide an overall benefit to the project. We will also provide value engineering concepts that seek to improve the overall quality of the project. Some of the concepts we have extrapolated to date are presented in Tab C of this scope of work. These concepts will be refined as we participate in up to eight (8) Final Design Coordination Meetings with the Design-Assist Team.

Item #1 Key Staff:

- Dean Bailey (Project Sponsor) – Oversee all contractual matters
- Luke Smith (Project Manager) – Overall project planning and coordination responsibility, critical early submittals, and design assistance.
- Kevin Couper (Principal-in-Charge) – Resource allocation and planning.
- Darin Van Oosterhout (CPM Scheduler) – Baseline schedule creation and updates.
- Andy Rusk (Electrical PM) – Coordination with Roseville Electric, electrical sequencing and installation.
- Gateway Pacific (Tank Builder) – Tank submittals preparation and design assistance.

ITEM #2: SITE DEVELOPMENT

AUBURN will begin initial site development by establishing our access points to the site, installing temporary security fence, mobilizing facilities and equipment and installing Best Management Practices (BMPs) as identified in our SWPPP plan. After these items have been addressed, clearing and grubbing of the site can proceed followed by earthwork activities.

Critical path of the project schedule runs through construction of the two (2) 6MG storage tanks. As such, it will be our priority after mobilization to perform over-excavation for the tanks' foundation and installation of under-tank utilities to make way for our tank builder. The tank excavation will generate over 15,000 CY of soil that will be used for fill operations on the remainder of the site. Our earthwork subcontractor will backfill the site concurrently while over-excavation is taking place to minimize any double handling of material. Though some of this material will have to be placed under the pump station, we will intentionally try to leave the footprint of the booster pump station low as we will have to excavate back through this material to install the pump cans and valve vault.

Once tank over-excavation is complete and prior to our tank builder beginning MSE installation, our underground crew will install the following underground utilities: the 8" tank drains, the 24" tank fill lines, the 30" tank discharge lines, the duct bank running between the two tanks, and the 30" storm drain located on the south side of the tanks. MSE foundation work can begin once these features are in place.

Figure 4: Overview of the 24" and 30" tank fill and discharge lines.

As MSE work begins, our underground crew will advance the 30" and 42" PW lines and electrical from the tank valve vault to the booster pump station. At the pump station, schedule will follow installation of the pump cans and valve vault. Once these features are installed and backfilled, our underground crew will complete installation of the PW pipelines (stopping short of the PW tie-in), the 6" sanitary sewer (SS) line, and underslab electrical. Other notable underground utilities on the site include the 8" storm drain line on the north end of the site, which is not on the critical path of the schedule, and the leak detection pipelines, which will be discussed further in the following section.

It should be noted that Specification Section 01110, Paragraph 1.5.B.1 states that work on the future Operations Building will be under a separate contract following completion of this project. However, Plan Sheet #54, Note 3 states that work on the Ops Building will commence during construction of the West Side Tanks, in accordance with "Project Milestone 2". We will need to confirm the City's intended timeline with this location during the Design Finalization stage so that we are able to build this into our work plan. It will also be critical that the Design-Assist Team finalizes the details for the cathodic protection system so these elements can be installed as the pipe is being installed.

Item #2 Key Staff:

- **Luke Smith (Project Manager)** – Overall project planning, subcontractor coordination, underground utility coordination
- **Don Pearson (Electrical Superintendent)** – Underground electrical coordination
- **Earthwork Subcontractor** – Clearing and grubbing, over-excavation of tank foundation, backfill operations across site

ITEM #3: FOUNDATION MITIGATION & TANK CONSTRUCTION

Our tank builder, GATEWAY, will mobilize and begin work on the MSE foundation once tank underslab utilities are installed. Our schedule shows it will take roughly 16 months to complete work on both tanks, with 2 months committed to MSE installation and the remaining 14 months committed to tank construction, wrapping, and disinfection. Work will proceed at Tank #1 two to three months after beginning work on Tank #2, at which point construction will progress simultaneously on both tanks. This delayed start is to account for the Specialty Tank Pre-stressor's (DN Tanks) work that will occur on the tail end of tank construction. DN Tanks will mobilize one strand wrapping and automated shotcrete machine to the site, which will wrap, prestress, and shotcrete each tank sequentially. This process will take roughly two to three months to finish Tank #2 and relocate the machine to Tank #1.

It should be noted that GATEWAY plans to install the tank slabs and roofs in two pours, as is allowed by the contract structural drawings. This will effectively create a construction joint through the slab and roof of each tank.

GATEWAY will install the 30-mil liner underneath the tanks as they construct the MSE foundation. Once tank construction is completed, AUBURN will backfill the tanks and install the tank leak detection piping and drain rock, bringing up the liner as we backfill and wrapping it back to the tanks for attachment. Leak detection piping will be routed back to the tank valve vault, while the upper drain piping will be routed to the nearby retention basin to the south.

Figure 5: View of one of DN Tanks' pre-stressing machines wrapping a concrete tank.

Final cleaning and disinfection of the tanks will be performed by GATEWAY utilizing AWWA C652, Method 2, as required in Specification Section 03314. Tank disinfection will take place after or in-conjunction with pipeline disinfection. A certified backflow prevention device will be installed at the PW tie-in location so that water can be sent from the City's system through the PW lines to the tanks. Disinfection will, most likely, be performed one tank at a time and utilize the same 6 MG of water for both tanks. Upon passing bacteriological testing, this water will be ready for distribution.

Item #3 Key Staff:

- Luke Smith (Project Manager) – Overall planning, subcontractor coordination
- Gateway Pacific (Tank Builder) – Tank foundation, PVC liner, tank construction, flushing and disinfection
- DN Tanks (Tank Pre-stressor) – Tank wrapping, pre-stressing, & shotcrete

ITEM #4: TANK VALVE VAULT

Because the critical path flows through construction of the storage tanks, there is considerable float for the other structural concrete elements on the site. For example, the Tank Valve Vault is shown with roughly 440 working days (WD's) of float. However, in an effort to maximize efficiency and limit the number of activities requiring completion on the back end of tank construction, AUBURN concrete crews will begin work on the Tank Valve Vault at the same time as our mechanical crews are installing under-tank utilities. Consequently, our concrete and mechanical crews will have completed the valve vault and moved on to the Booster Pump Station area by the time that GATEWAY begins slab work on Tank #1. This will help to limit congestion around the tanks. Concrete construction of the tank valve vault will take an estimated 60 WD's.

Item #4 Key Staff:

- Luke Smith (Project Manager) – Overall project planning and coordination, site supervision of AUBURN concrete and mechanical crews
- Don Pearson (Electrical Superintendent) – Electrical coordination

ITEM #5: BOOSTER PUMP STATION

Our concrete crews will move from the Tank Valve Vault to the Booster Pump Station to install the vertical turbine pump cans and encasement, followed by the pump station valve vault. Once these deeper features have been completed, the pump station footprint will be backfilled to install the underslab piping and electrical, followed by the pump station grade beams and slab on grade. Concrete installation at the Booster Pump Station will take roughly 130 WD's.

Figure 6: Section view of the Booster Pump Station, facing west.

After the slab has been poured, work at the pump station will follow a series of building trade subcontractors who will construct the CMU block walls, erect the open web steel joist roof structure, install the standing seam metal roof and access hatches, install HVAC, louvers, roll-up door, etc. CMU block buildings, like the one on the West Side Tanks and Booster Pump Station Project, requiring the contribution of numerous building trades are

a standard feature on water conveyance projects completed by AUBURN. Our project manager and site foremen will work closely with our subcontractors to ensure that each step is properly coordinated and executed.

As the building is being completed, our mechanical crew will be present to install the vertical turbine pumps and motors, exposed piping and valves, and the chemical storage and injection system. Completion of the CMU block building and mechanical installation will occur in August 2021, approximately 60 WD's after the slab has been poured. Completion of the Booster Pump Station is currently shown with 250 WD's of float.

Item #5 Key Staff:

- **Luke Smith (Project Manager) – Overall project planning and coordination, site supervision of AUBURN concrete and mechanical crews, subcontractor coordination**
- **Don Pearson (Electrical Superintendent) – Electrical coordination**
- **Building Trade Subcontractors – Construction of CMU block building, steel erection, roof installation, HVAC, roll-up door**

ITEM #6: ELECTRICAL, INSTRUMENTATION, AND CONTROL

As mentioned above, electrical underground installation will begin at the PW tanks after over-excavation of the tank footings is complete. It is our preference to rough-in the duct bank that runs between the two tanks prior to tank construction, as this area will become inaccessible while tank work is in progress and it will prevent us from potentially having to excavate back through the MSE foundation if this work had to occur after the tanks were completed. From the tanks, our electrical crew will follow behind our mechanical crew, roughing-in electrical at the tank valve vault and progressing east to the booster pump station. Underground electrical at the pump station will be completed after the pump cans and pump station valve vault are backfilled. The electrical crew will then focus on the generator area, followed by remaining duct banks onsite.

Once the booster pump station structure is complete, focus will shift to installation of above ground features at the pump station, including the switchboard, ATS, VFD's, soft starters, control panel, instrumentation, etc. Our crews will then install the generator and ancillary equipment at the generator area. They will then return to the PW tanks once tank construction is completed to rough-in any remaining underground and install tank instrumentation.

Our electrical team will be a driving force in helping to coordinate permanent power connection to the site. We will engage with Roseville Electric early on and throughout the

project to ensure that our scheduling and inspection requirements are identified and understood.

Installation of hardware, instrumentation, and I&C infrastructure will be by the Contractor while programming will be provided by the City. Our electrical team and system integrator will work closely with the City to ensure that this is a smooth and successful process.

AUBURN holds a major advantage over our competitors in the electrical field because we perform all electrical work in-house. This not only helps us to keep our costs low, but it effectively houses the electrical scope within the AUBURN family. Work is scheduled seamlessly as our managers from the civil and electrical disciplines work hand-in-hand, and our field crews work together on a daily basis. This helps to severely mitigate scheduling and coordination conflicts that can occur as subcontractors vie for priority or access.

Item #6 Key Staff:

- Luke Smith (Project Manager) – Overall project planning and coordination
- Andy Rusk (Electrical PM) – Electrical sequencing and scheduling, Coordination with Roseville Electric
- Don Pearson (Electrical Superintendent) – Site electrical coordination and supervision
- Integrator – Supply, testing, & startup assist of PLC, control panel, instrumentation, and other I&C hardware.

ITEM #7: SITEWORK CONCRETE, PAVING, AND LANDSCAPING

After the site is developed and some of the major structural features are completed, focus will shift to several sitework related features, including the CMU block wall, installation of three (3) Bioretention Ponds, permanent chain link fencing, sitework concrete, AC paving, and landscaping. Some of these features cannot be completed until the tank work is complete and GATEWAY has demobilized from the site, such as installing the south bioretention pond and grading, paving, and pouring miscellaneous concrete around the tanks.

Item #7 Key Staff:

- Luke Smith (Project Manager) – Overall project planning and coordination, sequencing subcontractor work, managing Auburn forces performing concrete installation.
- Subcontractors – Paving, Landscaping, CMU block installation, Liner installation, & chain link fencing will be performed by subcontractor forces.

ITEM #8: PROJECT STARTUP, COMMISSIONING, AND CLOSEOUT

As we approach project completion, AUBURN will provide a detailed Start-up Plan and Disinfection Plan, along with a Start-up Schedule and Training Schedules in accordance with Technical Specification Section 07750, to coordinate all start-up activities with the City and our suppliers. This plan and schedule will be provided to the City not less than 3 months prior to initial equipment startup to allow ample time for review.

The startup process, in general, will begin with the cleaning, flushing, disinfection, bacteriological testing, and leak testing of the PW Tanks and distribution system, which was discussed briefly in Item #3 above. Once we have water in the system, we can move into Functional and Performance Testing of the plant equipment. Each individual equipment startup will be coordinated by AUBURN and will be supervised onsite by the manufacturers' technical representative. Our Integrator and the City's programmer will

also be required onsite during this process, so they are able to communicate directly with the manufacturers' representatives and ensure that each piece of equipment is communicating properly with the plant PLC. City operators will also be required onsite at this time to participate in essential training for each piece of equipment.

Operational Testing of the plant can proceed once training and individual equipment

Figure 7: Aerial view of a PW and wastewater treatment facility recently constructed and commissioned by AUBURN for Harrah's Northern California Casino in Lone, CA.

start-ups have been completed. Overall startup of the plant facilities will be demonstrated by conducting a seven (7) day, continuous operational test of the completed facilities. This test will prove to the City's and Engineer's satisfaction that all equipment and systems operate in the manner they are intended to perform.

Our final task will be to ensure that a thorough punch list has been developed and all items have been fully satisfied. AUBURN will then demobilize from the project and turnover the facility to the City's care.

Item #8 Key Staff:

- Luke Smith (Project Manager) – Overall project planning and coordination, sequencing of start-up activities, preparation of start-up plan, coordinating training, development of punch list, and completion of As-Builts.
- Andy Rusk (Electrical PM) – Electrical and I&C startup coordination.
- Gateway Pacific (Tank Builder) – Leak Testing, Disinfection of PW Tanks.
- Integrator – Onsite I&C startup assistance.
- Vendors – Onsite equipment testing and startups.

PRELIMINARY PROJECT SCHEDULE

Our proposed work schedule is shown on the pages that follow. This preliminary schedule has been prepared by Darin Van Oosterhout, who is our proposed CPM Scheduler for the project. Please see Tab G of this proposal to review Darin's experience and qualifications.

TAB C

**PROJECT COST REDUCTION
OPPORTUNITIES**

PROJECT COST REDUCTION OPPORTUNITIES

Based on AUBURN's thorough proposal preparation and our firm's extensive experience constructing projects of similar scope, we have identified the following items we believe can improve the existing plan for the new facilities while also potentially creating a savings both during construction and for long term operation and maintenance.

OPPORTUNITY #1: STANDBY GENERATOR

Some disadvantages to the current generator arrangement are the large footprint consumed, the generator will most likely require proprietary parts for servicing and maintenance, and, if the generator were to go down, there is no redundancy built into the system. We would like to propose the installation of three (3) 500 kW generators in parallel. Some advantages to this proposed system include: less up-front costs, less maintenance costs, much faster starting than the 1500 kW size generator, no proprietary parts needed, some amount of redundancy built into the system if one generator fails, and the ability to add a future generator should the plant load increase in the future.

Another inherent opportunity with this change would be to install belly fuel tanks under each generator. This would greatly diminish the footprint of the generator and eliminate the need to run additional plumbing and electrical to a remote tank. Costs would be greatly reduced by eliminating the need for third-party components in the tank fabrication, eliminating the extra concrete footing, and eliminating the stairs and landings.

To initiate this opportunity's review the generator manufacturer will provide documentation in submittal format showing the benefits of changing to multiple smaller generators along with some of the frequently asked questions and examples of other projects which have made similar changes.

Figure 8: Overview of the current design for a 1500 kW diesel engine generator, load bank, and remote fuel tank located on the east side of the Booster Pump Station.

OPPORTUNITY #2: TANK FOUNDATION

GATEWAY has been involved in several Design-Build pre-stressed concrete storage tank projects that included foundation improvements similar to the one designed for this project. One of these past projects utilized the same Geogrid and MSE system specification as the West Side Tanks. It is our professional opinion that it may be possible to utilize Rammed Earth Rock Columns, or alternatively, substitute CLSM in place of Geogrid in order to realize a significant cost savings. We recommend hiring an outside geotechnical engineer to examine soil borrowings to assist us in developing a cost saving alternative, which will also potentially lessen future settlement. Upon receiving initial design information (load diagram) from the Engineer of Record, we would then consult with potential Rammed Earth Pier Contractors to determine if the change is feasible. If feasible and works with other conditions and requirements for the project we would then have this reviewed and approved by our own subconsultant geotechnical engineer.

Figure 9: Isometric, x-ray view through the two 6.0 MG potable water storage tanks and the MSE foundation.

OPPORTUNITY #3: HYDRODYNAMIC MIXING SYSTEM

Specification Section 11268 requires that the tank mixing system in the two potable water tanks be the Tideflex Mixing System sole sourced by Tideflex Technologies. The cost of this system is extremely expensive because it is proprietary equipment with no competition. This type of mixing system functions well when there is only one common inlet and outlet pipe designed in the tank; however, the West Side Tanks are designed with individual inlet and outlet pipes. There are other ways of providing water mixing without using duckbill valves and stainless-steel piping. For example, the City has a mixing system in their 7.2mg North East tank utilizing a perforated inlet pipe on the tank floor.

Aside from its inflated cost, a key disadvantage to the Tideflex passive mixing system is it only mixes when water is being pumped into the tank. During the winter months when water use is greatly reduced, an active mixing system using a stand-alone mixer inside the tank is much more efficient. The continuous, powerful circulation of an active mixer provides the most thorough mixing for tanks and enables operators to keep tanks full without sacrificing water quality. Utilizing an active mixing system for the West Side Tanks could present a significant cost savings to the project and will improve water quality.

Additional input and information will be provided from follow-up meetings with the operations staff and Engineer of Record to determine if this opportunity is further discussed (pursuant to our meeting of 3-Mar.-20).

CONTRACTOR'S MINIMUM QUALIFICATIONS AND CERTIFICATIONS

ATTACHMENT 1 – Proposer's Certification and Evidence of Authority to Sign

Attachment 1- PROPOSER'S CERTIFICATION

West Side Tanks and Pump Station

In response to the Request for Proposals (RFP), dated November 15, 2019, the undersigned hereby proposes to City to furnish all plant, labor, technical and professional services, supervision, materials, and equipment (other than materials and equipment specified as furnished by City), and to perform all operations necessary and required for construction of the West Side Tanks and Pump Station Project, in accordance with the Contract Documents, and any Addenda thereto, for the Total Guaranteed Maximum Price (GMP) and all other terms submitted in the Proposal.

This Proposal constitutes a firm offer to City, which cannot be withdrawn for 120 days from and after the date set for receiving Proposals, or until the Agreement is fully executed by City, whichever is earlier.

It is understood that this Proposal is based upon completion of the Work within a period outlined in Exhibit H-COMPLETION TIMES AND LIQUIDATED DAMAGES, of the Agreement commencing on the date specified in the Notice to Proceed.

The undersigned Proposer hereby certifies that it has examined and is fully familiar with all of the provisions of the Contract Documents; has carefully checked all of the words and figures shown on its Proposal; has carefully reviewed the accuracy of all statements in this Proposal and attachments hereto; and understands and agrees that City will not be responsible for any errors or omissions on the part of the undersigned in preparing this Proposal.

The undersigned Proposer has, by careful examination of the Contract Documents, and by examination of the actual Site conditions, satisfied itself as to the nature and location of all Work, the general and local conditions to be encountered in the performance of any Work, the requirements of the Contract Documents, and all other matters that can in any way affect the Work or the cost thereof.

The undersigned agrees to execute the Agreement and provide City the executed Agreement, the required insurance certificates, endorsements, and waivers of subrogation, and the required surety bonds within fifteen (10) business days after the undersigned's receipt of the City's unsigned Agreement.

I further certify that this proposal is made without prior understanding, agreement, connection, discussion, or conspiracy with any other person, firm or corporation submitting a proposal for the same product or service; that this proposal is fair and made without outside control, collusion, fraud or illegal action; that no officer, employee or agent of the City or any other proposer is financially interested in said proposal; that no undue influence or pressure was used against or in concert with any officer, employee or agent of the City in connection with the award or terms of the contract that will be executed as a result of this RFP; and that the undersigned executed this Proposer's Certification with full knowledge and understanding of the matters therein contained and was duly authorized to do so.

Type of Organization:

☐ Sole Proprietorship ☐ Corporation ☐ State of Incorporation

ATTACHMENT 2 – Certification of Proposer’s Experience and Qualifications

Attachment 2 – MINIMUM EXPERIENCE AND QUALIFICATIONS REQUIREMENTS

West Side Tanks and Pump Station Project

The undersigned Proposer represents that it is duly licensed, competent, and knowledgeable and has the special skills on the nature, extent and inherent conditions of the work to be performed on this Project. Proposer further acknowledges that the conditions inherent in the construction of particular facilities may create, during construction, unusual or unsafe conditions hazardous to persons and property. Proposer expressly acknowledges that it is aware of such risks and that it has the skill and experience to foresee and to adopt and implement protective measures to adequately and safely perform the construction work with respect to such hazards. The prospective Proposer’s qualifications and responses to the questions set forth below are part of the City’s evaluation of the Proposer’s eligibility to receive the award based on the Proposer’s responsibility and responsiveness. The Owner has determined that only Proposers meeting the mandatory minimum experience and qualification requirements set forth below will have the requisite quality, fitness, capacity and experience to perform the highly complex and vital construction work on this Project.

QUESTIONS REGARDING PROPOSER’S RESPONSIBILITY AND FITNESS TO CONTRACT FOR THE WORK.

An answer of “False” to any of the Statements 1 through 9 will be rated a “Fail” and the Prospective Proposer will be immediately disqualified.

Table 2.1 Minimum Qualifications and Experience Questionnaire

No.	True	False	Statement
1	X		Prospective Proposer possesses a valid and current California Contractor’s license -Class A, General Engineering Contractor) for the project for which it intends to submit a Proposal.
2	X		Proposer’s company’s contractor’s license HAS NOT been revoked at any time in the last five years.
3	X		Prospective Proposer is registered with the California Department of Industrial Relations pursuant to California Labor Code Section 1725.5.
4	X		Prospective Proposer has not had a surety finish the work on any contract in the past five years.
5	X		Prospective Proposer has current workers’ compensation insurance policy as required by the Labor Code or is legally self-insured pursuant to Labor Code section 3700 et. seq. OR Prospective Proposer is exempt from this requirement because it has no employees.

ATTACHMENT 2 - Certification of Proposer's Experience and Qualifications

No.	True	False	Statement
6	☒	☐	At the time of submitting this RFP, company is eligible to bid on or be awarded a public works contract, or perform as a subcontractor on a public works contract, pursuant to California Labor Code §1777.1 and Labor Code §1777.7.
7	☒	☐	At no time during the last five (5) years, has Proposer's company, or any of its officers or partners been convicted of a crime involving the awarding of a contract for a government construction project, or the bidding or performance of any federal, state or local government contract.
8	☒	☐	Prospective Proposer agrees to perform with its own organization and with the assistance of workers under its immediate superintendence, work of a value not less than 30% of the Proposer's Total Guaranteed Maximum Price.
9	☒	☐	Proposer's Firm has completed at least \$75 Million in construction value on no more than seven (7) projects completed since January 1, 2009.

**PROJECT TEAM QUALIFICATIONS
AND EXPERIENCE**

PROJECT TEAM QUALIFICATIONS AND EXPERIENCE

AUBURN CONSTRUCTORS

Auburn Constructors, LLC (AUBURN) is a General Engineering contractor that has been providing a wide range of construction services for Clients/ Owners in California and Nevada since 1990. AUBURN specializes in the construction of water and wastewater treatment facilities, storm water and freshwater pump stations, water storage facilities, and other water resource/recovery projects. Each project is approached as a joint effort between the client, design, and construction teams. We consistently deliver the highest quality and best value to our clients by integrating teamwork, dedicated project management, and outstanding craftsmanship.

AUBURN self-performs much of all field work with its own experienced crews, including structural concrete, mechanical and process piping, equipment installation and associated earthwork as well as all electrical and instrumentation installations. Many of the company's craftspeople are skilled in several trades which makes the crews versatile and efficient. AUBURN supports its projects with a corporate staff that is thoroughly experienced in all aspects of construction accounting, contracts, risk-management and employee administration services.

Figure 11: Auburn personnel installing vertical turbine pumps at the Los Osos Water Recycling Facility Project.

Throughout our history, AUBURN has completed numerous construction projects under alternative contracting methods. This list includes projects for the Calaveras County Water District, Kirkwood PUD, California American Water Company, Sacramento Regional County Sewer District, Modesto Irrigation District and numerous water and wastewater facilities for Indian Gaming Facilities throughout Northern California. We have also successfully completed the following projects with the City of Roseville:

- Dry Creek WWTP Cogeneration and Nitrate Reduction Improvements Project (Design Assist)
- Dry Creek WWTP Effluent Cooling Towers (Design Build)
- Pleasant Grove WWTP UV Disinfection (Design Assist)
- Dry Creek WWTP Secondary Clarifier(s) Rehabilitation (Design Assist)
- Roseville WTP Concrete & Clarifier Coating and Rehabilitation (Design Assist)

AUBURN has also completed the following projects under alternative contracting methods with Water Works Engineers:

- Dry Creek WWTP Secondary Clarifier(s) Rehabilitation (Design Assist)
- Folsom Water Treatment Plant - Solids Dewatering Project (Design Build)

AUBURN maintains an in-house Electrical Division, which is an integral member of the contracting team for all municipal projects we pursue. The magnitude of the electrical and instrumentation scope on a typical water delivery project requires the Contractor to possess, ideally with its own personnel, expertise of this industry in order to successfully construct, test and implement all of the electrical scope. AUBURN, through its in-house Electrical Division, can provide the City with assurance these requirements will be met. Andy Rusk is the Electrical Project Manager assigned to this project and will be assisting Don Pearson, the Electrical Superintendent, with procurement, RFI's, submittals, QC and safe work practices with respect to the electrical scope of work on this project. Both Mr. Rusk and Mr. Pearson have experience working with the City of Roseville in this capacity on the recently constructed Dry Creek WWTP Design-Assist Project.

The civil, mechanical, and electrical capabilities of AUBURN are unmatched within the treatment plant construction industry. AUBURN takes pride in continually earning positive comparisons when our completed work is seen next to that of another contractor. We see this superior craftsmanship as a direct result of our culture to train and promote from within the organization. We have promoted from within more than 80% of the foremen currently employed by AUBURN. This enables AUBURN to hand pick each foreman based on his leadership capabilities, craftsmanship, attention to safety and ethical character. Motivation and loyalty breed success in our company culture.

Figure 12: Aerial view of the Los Osos Water Recycling Facility Project. Auburn completed construction of this \$47.8M contract in September of 2016.

We believe that people are our most valuable asset. As such, safety is considered the Company's top priority. All new employees are thoroughly trained in safe work practices as it pertains to their respective work assignments and must pass pre-employment drug and alcohol screening. Safety is the key consideration when activities are planned, and our subcontractors are required to follow strict safety protocols as well. It is our focus that all our employees retire in good health with no injuries along the way. AUBURN believes

its strict attitude toward safety is the reason the company has an excellent safety record and has never received an OSHA citation.

The goal of AUBURN is to deliver the West Side Tanks and Booster Pump Station project to the City before its expected completion date and for a lower cost than budgeted. Our Project Manager (PM) plays a critical role in making this goal a reality. The PM assigned to this project, Luke Smith, will be onsite full-time and will be responsible for all aspects of the project. Mr. Smith is eager to join the Design-Assist team to collaborate with the City, Engineer, Subcontractors and Suppliers to deliver a quality project as cost-effectively as possible. Mr. Smith will be assisted by Kyle Hutchens with daily activities including daily QC inspection logs, RFI's, subcontractor scheduling, safety meetings/inspections, submittals, etc. Mr. Hutchens has experience working with the City of Roseville in this capacity on the recently constructed Dry Creek WWTP Design-Assist Project. Mr. Smith will also have the support from Kevin Couper, Safety Director, with respect to the company safety program. Mr. Couper provides all our Project Manager's with weekly safety meetings which are conducted on-site, as well as ensures that all Cal-OSHA safety and health requirements are in compliance.

MAJOR SUBCONTRACTOR: GATEWAY PACIFIC CONTRACTORS

Construction of the pre-stressed concrete potable water storage tanks will be performed by our Major Subcontractor, Gateway Pacific Contractors, Inc. (GATEWAY). Since 1987, Gateway has built over 90 AWWA D110 Type 1 prestressed reservoirs with DN Tanks, their designated tank pre-stressor. President Evan Lundin oversaw the construction of his first prestressed concrete reservoir in 1981 and has been actively involved in the prestressed tank industry for 39 years. As Gateway's President, Evan has been involved in many improvements in design and construction of these tanks, working closely with DN Tanks' owners and engineers.

GATEWAY is the only local qualified prestressed tank contractor in Northern California. Headquartered in Sacramento, California, GATEWAY has 60 full-time employees including 5 experienced tank superintendents. Although it is critical to have highly-experienced project managers and superintendents building prestressed tanks, it is just as important to have well-seasoned craftsman, including operators, carpenters, finishers and labors with the knowledge of what it takes to construct watertight structure with thin concrete slabs and 40-foot tall walls. These are the details that make a successful concrete prestressed tank.

Figure 13: Aerial view of the Bay Street Reservoir Replacement - Phase 2 project in Santa Cruz, CA constructed by Gateway Pacific. This project included the construction of a 6MG prestressed concrete potable water storage tank.

Because of the building boom in Northern California, all contractors are experiencing a shortage of skilled construction workers. GATEWAY is well aware of this and has been very selective not to take on more work than they have skilled craftsmen available to complete. The timing of these two particular 6MG tanks would be especially beneficial to GATEWAY as they are currently constructing a 6MG prestressed concrete tank in Lincoln, California which will be completed by June of this year. This crew of experienced craftsmen would be available for the West Side Tanks and Pump Station project.

Over our 32 years, GATEWAY has developed a great working relationship with the local subcontracting community. They select only subcontractors who have a proven record to be part of the team. GATEWAY self-performs all the concrete work with their experienced crews, while subcontracting the furnishing and placing of rebar to a qualified rebar Subcontractor with whom they are familiar. GATEWAY will also subcontract the deck shoring to an experienced shoring contractor who has done many of their tanks in the past. As mentioned above, GATEWAY will contract with DN Tanks, Inc. to provide the prestressing and shotcrete work.

GATEWAY's attention to safety has resulted in an EMR 3-year average of 0.90, Recordable Incident Rate 3-year average of 0.656 and "0" Lost Workday Incident Rate for the last 3 years. Gary Bechtel is Gateway Pacific's Safety Manager. He, along with the tank superintendent and GATEWAY's highly experienced craftsmen, will ensure that this project is constructed in a safe, healthy and responsible manner.

GATEWAY and AUBURN have worked together in the past on several projects in the area. We have a history of successful partnerships on projects, several of which were performed directly for the City of Roseville.

THE PROJECT TEAM

The following is a brief description of the duties, qualifications and availability of the management team assigned to this project. Each team member is readily available for this project once Contractor selection has been made. Please refer to the Appendix for the professional resumes of each team member listed below.

Dean Bailey, President (Project Sponsor) - Mr. Bailey, the majority shareholder of AUBURN, holds a degree in Construction Management from California State University, Chico and has over 28 years of experience with AUBURN constructing water and wastewater treatment facilities in the Western United States. Mr. Bailey will oversee all contractual matters for this project. As President and Managing Member for AUBURN, Mr. Bailey has an intimate knowledge of the project requirements as well as the intrinsic liabilities as they relate to the balance of Auburn's corporate structure. Project availability: On demand and will attend monthly meetings.

Kevin Couper, Senior Vice President (Principle-in-Charge) - Mr. Couper holds a Construction Management Certificate from the University of California, Davis and has over 27 years of experience with AUBURN constructing water and wastewater treatment facilities in the Western United States. Mr. Couper manages all field operations for AUBURN, assuring proper manpower and equipment are always assigned to all projects and works closely with each manager as needs arise. Additionally, Mr. Couper holds the position of AUBURN Safety Director. Kevin will ensure all safety training, inspections, meetings, and Cal-OSHA requirements are in compliance. Project availability: On demand and will attend weekly coordination meetings.

Luke Smith, P.E. Project Manager - Mr. Smith will be the on-site project manager for AUBURN, as well as serve in the role of Job Superintendent and Quality Control Manager. Mr. Smith holds a Bachelor of Science in Civil Engineering from California State University, Chico, as well as Professional Engineer licensure with the State of California. Mr. Smith has successfully completed several projects for AUBURN since joining the company in 2015. Project availability is 100%.

Kyle Hutchens, Assistant Project Manager - Mr. Hutchens will be the on-site assistant project manager for AUBURN. Mr. Hutchens holds a Bachelor of Science in Construction Management from Everglades University. Mr. Hutchens will assist the project manager with daily activities including daily QC inspection logs, RFI's, subcontractor scheduling, safety meetings/inspections, submittals, etc. Project availability is 100%.

Darin Van Oosterhout, CPM Scheduler - Mr. Van Oosterhout is AUBURN's proposed CPM Scheduler for the West Side Tanks and Pump Station Project. Darin has been a Project Manager and the lead scheduler with our Company on 18 projects since 1996. As the Construction Scheduler, Darin will work closely with all the Project stakeholders to ensure critical path activities are well identified, all potential delays are quickly addressed, and any project concerns are remedied. Project availability is 20%.

Andy Rusk, Electrical Project Manager - Mr. Rusk will assist AUBURN project management staff on all electrical matters. Mr. Rusk will direct all manpower workforce utilization for the Electrical Division on this project. Mr. Rusk will develop, process and review electrical material and equipment submittals for this project, generate electrical RFI's and will perform overall electrical coordination with all trades. Mr. Rusk commenced his employment with AUBURN in 2016. Project availability is 20%.

Don Pearson, Electrical Superintendent - Mr. Pearson will assist AUBURN project management staff on all electrical matters. Responsibilities include management of field crews to self-perform electrical and equipment installations. Coordination with project management, subcontractors, and suppliers. Oversee safety, quality control, and project scheduling. Assist project foreman with RFI's, design changes, material and equipment procurement, manpower, and equipment data information. Mr. Pearson commenced his employment with AUBURN in 2016. Project availability is 100%.

Gary Bechtel, Vice President, GATEWAY - Mr. Bechtel is an engineering and construction management industry veteran having served in multiple senior level positions over a distinguished 30-year career. Mr. Bechtel's career includes a broad and diversified project portfolio including an \$800 million Liquefied Natural Gas (LNG) Plant in Indonesia and a \$5.5 billion U.S. Nuclear Power Plant while with Bechtel International, as well as \$500M in successful wastewater and water treatment and storage projects for GATEWAY where he currently serves as VP Safety Manager. Project availability is 10%.

Jay Hall, Project Manager, GATEWAY - As Northern California Operations Manager, Mr. Hall is responsible for establishing and monitoring the budget of each Northern California project, including the preparation of monthly progress draws. At the beginning of each project, Jay selects the subcontractors and suppliers based on their capabilities, scopes of work and total cost. Jay orders all permits, organizes the work force, and ensures the project complies with the specifications and industry codes. He then tracks the project CPM schedule closely, monitoring progress and delays. Availability is 20%.

Gary Heim, Tank Superintendent Option #1, GATEWAY - Mr. Heim is responsible for managing project budget and schedule. His daily duties include planning, workforce management, coordination of subcontractors and deliveries, and interaction with representatives of the Owners and Engineer. Other duties include updating CPM schedule and weekly cost accounting. Additionally, Gary ensures that employees are provided with proper equipment, PPE, training, and

safe work procedures so they can make informed decisions and achieve our objective of no lost time incidents. Availability is 100%.

Gene Gregory, Tank Superintendent Option #2, GATEWAY - Mr. Gregory will be responsible for completing this project under budget and on time. His daily duties include planning, workforce management, coordination of subcontractors and deliveries, and interaction with representatives of the Owners and Engineer. Additionally, Gene ensures that employees are provided with proper equipment, PPE, training, and safe work procedures so they can make informed decisions and achieve our objective of no lost time incidents. Project availability is 100%.

Andrew Christy, Project Manager, DN Tanks - Mr. Christy is responsible for project management and construction operations for DN Tanks. His primary responsibility is profitable and timely project completion consistent with quality standards. He will provide support to field staff during the course of the project as necessary.

Brett Crockett, Pre-Stressing Superintendent, DN Tanks - Mr. Crockett is responsible for project completion within budget, in compliance with contract specifications, with high quality, and on time. He will consult with the PM and provide recommendations as necessary to improve project performance. Mr. Crockett will be DN Tanks' company representative at the job site and is in charge of all operations including DN Tanks' safety program. Mr. Crockett will act as the ACI Certified shotcrete nozzleman. Project availability is 100%.

SAFETY PROGRAM AND
RECORDS

SAFETY PROGRAM AND RECORDS

AUBURN believes that our people are our most valuable asset and anyone visiting or working at an AUBURN project must be kept safe from the intrinsic danger of a construction site. As such, safety is considered the Company's top priority. AUBURN commences with safety training when each person is hired. All new employees must pass a pre-employment drug and alcohol screen and sign up to the Drug & Alcohol Prevention Policy as a condition of employment. All new employees are thoroughly trained in safe work practices as it pertains to their respective work assignments. In the event of any accident causing personal injury or property damage, all individuals involved are subjected to additional drug and alcohol testing. Any violation of the Drug & Alcohol Prevention Policy is grounds for immediate discharge.

Figure 14: Auburn crews installing tank piping on a steel PW storage tank for Harrah's NorCal casino.

Safety is the key consideration when activities are planned, and our subcontractors are required to follow strict safety protocols as well. AUBURN believes its strict attitude towards safety is the reason the company has an excellent safety record and **has never received an OSHA citation** since the founding of the company in 1990 despite several OSHA visits over the years. More important than a good safety record; we want all employees to retire in good health with no injuries along the way.

Kevin Couper is the Company Safety Director and coordinates all required safety training and compliance. Luke Smith will be responsible for conducting weekly safety meetings, site inspections, subcontractor safety and all PPE compliance. Both Mr. Couper's and Mr. Smith's resumes are attached in the Appendix. An electronic copy of our company Safety Program has been provided on the thumb drives provided with this proposal.

AUBURN's Workers Compensation Insurance Carrier contact information is as follows:

The Hartford
12009 Foundation Place
Rancho Cordova, CA 95762
Tessa Lopes, (916) 294-1368

AUBURN SAFETY POLICY STATEMENT

The Occupational Safety and Health Act of 1970 clearly states our common goal of safe and healthful working conditions. Safety and health of the employees of **AUBURN** must be part of every operation. Without question, this is the responsibility of everyone at any and all levels.

It is our intent to comply with all laws. To do this, we must constantly be aware of conditions in all work areas that can produce injuries. No employee of this company is required to work at a job he/she knows is not safe or healthful. Your cooperation in the detection of hazards and, in turn, controlling or eliminating them, is a condition of your employment. Inform your supervisor immediately of any situation beyond your ability or authority to correct.

AUBURN will maintain a safety and health program conforming to or exceeding the best practices and standards of this industry. To be successful, such a program must embody proper attitudes toward injury and illness prevention on the part of supervisors and employees. It also requires cooperation in all safety and health matters, not only between supervisor and employee, but also between each employee and his/her co-worker. Only through such a cooperative effort, can a safety program in the best interest of all be established and preserved.

Figure 15: Auburn crew installs a 72" cement coated steel pipe manifold in Lathrop, CA.

The safety and health program is expected to reduce the number of injuries and illnesses to an absolute minimum. In order to accomplish this, the responsibilities for safety and health are shared by each and every one of us.

- ✓ **As the employer**, we accept responsibility for the guidance and implementation of the safety and health program and for providing the safeguards required to ensure safe conditions.
- ✓ **As the supervisor**, we accept responsibility for the development of proper attitudes toward safety and health within ourselves and those we supervise and for ensuring that all operations are performed with the utmost regard for the safety and health of all personnel involved, including ourselves.
- ✓ **As the employee**, we accept responsibility for the genuine and wholehearted operation of all aspects of the safety and health program, including compliance with all rules and regulations and for continuously practicing safety while performing our duties.

ATTACHMENT 9 – SAFETY RECORD: AUBURN CONSTRUCTORS

Attachment 9 – SAFETY RECORD

West Side Tanks and Pump Station Project

Contractor/Firm completing this report: Auburn Constructors LLC

List any Occupational Safety Health Administration (OSHA) citation for violations of OSHA Standards and Requirements within the past five (5) years. Please explain each violation and the resulting penalties, if any.

None.

Has CONTRACTOR earned any industry safety awards in the past five (5) years? If so, please provide an explanation of award(s).

AUBURN has received the STEP Safety Award from Associated Builders and Contractors in each of the past five years. STEP is a world-class safety management system that dramatically improves safety performance among participants.

Workers Compensation

Identify if your firm is self-insured for Workers Compensation Insurance in California. If self-insured provide the self-insurance number and attach a certification in the Appendix to the proposal.

Provide the name of your Worker's Comp. Insurance Carrier(s) as well as their address, agent's name and telephone number.

The Hartford

12009 Foundation Place, Rancho Cordova, CA 95762

Tessa Lopes, (916) 294-1368

Provide the Average Lost Workday Incident Rates (LWIR), Average Recordable Incident Rates (RIR) and most recent Experience Modification Rate (EMR) in the format presented below.

Contractor's Average Lost Workday Incident Rates (LWIR) and the Average Recordable Incident Rates (RIR) are requested for evaluation of the safety history relating to the CONTRACTOR's construction operations only. Home office staff labor hours and the corresponding injury and illness figures for home office staff shall not be included in the calculation of these rates. Similar information for parent

RFP – West Side Tanks and Pump Station
Attachment 9 – Safety Record

Page 61 of 98

companies, subsidiaries, or other company divisions not directly engaging in construction activities shall not be considered in these rate calculations. All data used in the calculations shall be specific to the company operation who will construct this Project if awarded the Contract.

Average Lost Workday Incident Rate (LWIR)

Calculate and provide your company's LWIR for the past three (3) complete years in the format presented below. The lost workday information is listed on your OSHA forms No. 300 and 300A and is available from your workers' compensation insurance carrier.

LWIR = Total number of lost workday incidents X 200,000 Total employee hours worked

Table 9-1: LWIR

Year	# of Lost Workday Incidents	Total Employee Hours Worked	Lost Workday Incident Rate
1-2018	0	146,184	0
2-2017	0	172,505	0
3-2016	0	154,357	0
3 Year Average	0	157,682	0

Average Recordable Incident Rate (RIR)

Calculate and provide your firm's RIR for the past three (3) complete years in the format presented below. The Incident Rate information is listed on your OSHA forms No. 300 and 300A and is available from your workers' compensation insurance carrier.

RIR = Total number of recordable incidents X 200,000 Total employee hours worked

Table 9-2: RIR

Year	# of Recordable Incidents	Total Employee Hours Worked	Recordable Incident Rate
1-2018	0	146,184	0
2-2017	3	172,505	3.48
3-2016	5	154,357	6.48
3 Year Average	2.67	157,682	3.38

The Experience Modification Rate (EMR)

The EMR is established by the CONTRACTOR's workers' compensation insurance carrier and is based on the CONTRACTOR's loss history. CONTRACTOR can provide either its Intrastate or Interstate EMR.

Identify either: ☒ Intrastate () Interstate: _____

Provide your firm's EMR for the last three (3) complete years (this information is provided by your worker's comp. insurance carrier) in the format presented below.

Table 9-3: EMR

Year	EMR
1-2018	.82
2-2017	.77
3-2016	.81
3 Year Average	.80

GPC OSHA CITATIONS IN PAST 5 YEARS

INSPECTION #1183055

DATE: OCTOBER 10, 2016

WHERE: CITY OF MODESTO – DOWNSTREAM TIER 1 NORTH TANK 11 AND PUMP STATION

Citation 1 Item 1 – Type of Violation: General

On or around 10-10-16 Employer allowed subcontracted employee to work in an excavation with an angle steeper than one and one-half horizontal to one vertical (34 degrees measured from the horizontal)

Outcome: Corrected during inspection

Fee: \$900.00

INSPECTION #1269736

DATE: OCTOBER 12, 2017

WHERE: CITY OF SOUTH SAN FRANCISCO – S. SF. STATION 1 WATER TREATMENT PLANT UPGRADE

Citation 1 Item 1 – Type of Violation: General

Prior to and during the course of the inspection, including, but not limited to October 12, 2017, the employer failed to document safety inspections at the job site.

Outcome: Appealed and Reclassified to Notice in Lieu of Citation.

Fee: Penalty eliminated.

Citation 1 Item 2 – Type of Violation: General

Prior to and during the course of the inspection, including but not limited to October 12, 2017, the employer failed to establish a written Heat Illness Prevention Plan that contained all of the required elements.

Outcome: Revised Heat Illness Prevention Program has been submitted and awaits approval.

Fee: \$300.00

Citation 1 Item 3 – Type of Violation: General

Prior to and during the course of the inspection, including, but not limited to October 12, 2017, the employer failed to provide the OSHA Form 300 for the year 2017 to the Division.

Outcome: Appealed and Reclassified to Notice in Lieu of Citation

Fee: Penalty eliminated

Workers' Compensation Insurance Rating Bureau of California

09/13/2017

Explanation of Your Experience Rating Form

Following is a brief explanation of your Experience Rating Form. The WCIRB's website (www.wcirb.com) contains additional information about the calculation of your experience modification. See the *Employers* information box on the home page. Electronic versions of the *California Workers' Compensation Experience Rating Plan - 1995 (ERP)* and the *California Workers' Compensation Uniform Statistical Reporting Plan - 1995 (USRP)* are available on the WCIRB's website on the "Manuals and Plans" tab under "Publications and Filings." These publications are part of the California Insurance Commissioner's regulations and govern experience rating and the reporting of payroll and losses by insurers, respectively.

About Experience Rating

Experience rating provides employers a direct financial incentive to reduce the number of work-related accidents and helps to objectively distribute the cost of workers' compensation insurance among employers assigned to the same industry classification. The USRP contains approximately 500 standard classifications used to describe all types of California businesses. A business that is not specifically described is assigned by analogy to a classification that is most similar in terms of processes and hazards.

Businesses assigned to your standard industry classification are relatively similar to your business; however, there are differences and those differences can have an impact on workers' compensation claims costs. To address these variations and encourage workplace safety, experience rating adjusts the premium you pay either upward or downward based on a comparison of your company's history of payroll and claims (collectively referred to as your "experience") to what is expected for businesses of similar size within the same industry classification. This comparison results in your **experience modification**.

An experience modification greater than 100 results from less favorable loss experience compared to the average of other similar businesses. An experience modification less than 100 results from more favorable loss experience. The data used to calculate your experience modification and the experience modification formula are shown on the Experience Rating Form (often referred to as a "worksheet" or "rate sheet").

Since the experience modification is intended to reflect differences in anticipated *future claims* costs, the formula reflects several standard "actuarial" adjustments so that past loss experience is used in a way that is predictive of future loss levels. For those employers who have sufficient historical experience to qualify, experience rating is mandatory and used by all insurers.

Data Used for Experience Rating and the Experience Period

The data used to calculate your experience modification is determined by your company's rating effective date, which generally is the inception date, or start date, of your policies. For example, if your policies always start on January 1, your rating effective date would be January 1.

The rating effective date determines the **experience period**, which is a three-year period beginning four years and nine months prior to your rating effective date and terminating one year and nine months prior to the rating effective date. With few exceptions, the payroll and losses arising from all policies incepting within the experience period are used in the calculation of your experience modification.

The payroll and loss information used in the experience rating calculation are reported by your insurer to the WCIRB on *unit statistical reports* in accordance with the USRP. Factors used in the experience rating calculation, such as the Expected Loss Rates, D-Ratios and Credibility (Primary and Excess), are developed by the WCIRB, approved by the Insurance Commissioner as part of the ERP and based on analysis of statewide data.

Experience Rating Form

The Experience Rating Form provides detailed information about the calculation of your experience modification, including the payroll reported by your insurer for each applicable classification and the claim experience reported by your insurer and used in the experience modification calculation. Your company name, address and other business names that are included under your insurance policy are captured from the policy information page. Some information may not be shown due to space limitations.

Terms Used on the Form

Actual Excess Losses ("E") – The experience modification calculation splits the Actual Losses for each claim into two components – a primary amount called Actual Primary Losses and an excess amount called Actual Excess Losses. The Actual Excess Losses are the amount of each claim shown on the form that is above the Primary Threshold, if any.

Actual Losses – The total medical and indemnity paid plus estimated future payments on a claim reported to the WCIRB by your insurer as of the latest required claim valuation date. In order to mitigate the impact of a single claim on your experience modification, the amount of a single loss is limited to \$175,000 in the experience rating calculation. The total of the Actual Losses is shown for informational purposes and is not used in the experience rating calculation.

Actual Primary Losses ("D") – Primary losses represent the more predictable and controllable portion of a claim. Actual Primary Losses are the reported incurred cost of the claim limited to the Primary Threshold applicable to your experience modification. The total of all Actual Primary Losses is used in the experience rating calculation. The Primary Threshold applicable to your experience modification is based on your total expected losses for the experience period and is in Table II of the ERP.

Bureau Number – A unique file number assigned by the WCIRB to your company.

Claim Number – The claim number reported to the WCIRB by your insurer.

Class Code – The code number of the standard classification applicable to the Payroll shown on the form and which determines the Expected Loss Rate and D-Ratio to be used in the experience rating calculation.

Credibility Excess – The weight given to your total Actual Excess Losses in the experience modification calculation. It is a function of your total Expected Losses and is in Table II of the ERP.

Credibility Primary – The weight given to your total Actual Primary Losses in the experience modification calculation. It is a function of your total Expected Losses and is in Table II of the ERP.

D-Ratio – The ratio used to split Expected Losses into "Primary" and "Excess" amounts. This split accounts for differences in the average severity of claims by classification. D-ratios are in Table I of the ERP.

Effective Date – The date your experience modification applies to your policy.

Expected Excess Losses ("C") – The difference between your Expected Losses and your Expected Primary Losses. The total of all Expected Excess Losses is used in the experience rating calculation.

Expected Loss Rate (ELR) – The average rate of losses per \$100 of payroll that is expected for a standard classification during the experience period. ELRs are in Table I of the ERP.

Expected Losses ("A") – The amount of losses expected to arise for businesses of your size and industry classification(s) during the experience period. Expected Losses are determined by multiplying your total payroll for each classification by the corresponding Expected Loss Rate and then dividing by 100. The total of all Expected Losses is used in the experience rating calculation.

Expected Primary Losses ("B") – Determined by multiplying your Expected Losses for each classification by the D-Ratio for that classification. The total of all Expected Primary Losses is used in the experience rating calculation.

Identifying Information in Upper Left Corner – The employer name, address and classifications that apply to your California operations according to WCIRB records may be displayed; however, in some cases, some of this information may not be shown or may or may not be complete due to space constraints.

Injury Type / # of Claims – On individually-listed claims, this provides some detail about the type of injury associated with a claim. Injury types include Death (01), Permanent Total (02), Permanent Partial Disability Rating 25% or Greater (03), Permanent Partial Disability Rating Less than 25% (04), Temporary Disability (05), Medical Only (06), or Compromised Death Claim (08). For claims shown as grouped, this provides the number of claims included in the group.

Insurer – A code used to identify the insurer that reported the payroll and claims data.

Issue Date – The date this Experience Rating Form was released.

Loss-Free Rating – Shown at the bottom of the Experience Rating Form is the experience modification that would have been calculated if \$0 (zero) actual losses were incurred during the experience period. This hypothetical rating calculation is provided for informational purposes only. Note that when there is only a single claim in the experience period, the experience modification is limited to be no higher than 25 points above the Loss-Free Rating.

Open/Closed – The claim status that is reported to the WCIRB.

Payroll – The payroll reported to the WCIRB by your insurer.

Policy Period – The effective date and expiration or cancellation date of the policy to which the payroll and claims apply.

Primary Threshold – Based on the total expected losses for the experience period and is in Table II of the ERP.

Attachment 9 – Safety Record

Page 61 of 98

companies, subsidiaries, or other company divisions not directly engaging in construction activities shall not be considered in these rate calculations. All data used in the calculations shall be specific to the company operation who will construct this Project if awarded the Contract.

Average Lost Workday Incident Rate (LWIR)

Calculate and provide your company's LWIR for the past three (3) complete years in the format presented below. The lost workday information is listed on your OSHA forms No. 300 and 300A and is available from your workers' compensation insurance carrier.

LWIR = Total number of lost workday incidents X 200,000 Total employee hours worked

Table 9-1: LWIR

Year	# of Lost Workday Incidents	Total Employee Hours Worked	Lost Workday Incident Rate
1-2018	2	873,284	0.46
2-2017	3	864,753	0.69
3-2016	1	879,312	0.23
3 Year Average	2	872,450	0.46

Average Recordable Incident Rate (RIR)

Calculate and provide your firm's RIR for the past three (3) complete years in the format presented below. The Incident Rate information is listed on your OSHA forms No. 300 and 300A and is available from your workers' compensation insurance carrier.

RIR = Total number of recordable incidents X 200,000 Total employee hours worked

Table 9-2: RIR

Year	# of Recordable Incidents	Total Employee Hours Worked	Recordable Incident Rate
1-2018	13	873,284	2.98
2-2017	18	864,753	4.16
3-2016	15	879,312	3.41
3 Year Average	15	872,449	3.52

The Experience Modification Rate (EMR)

The EMR is established by the CONTRACTOR's workers' compensation insurance carrier and is based on the CONTRACTOR's loss history. CONTRACTOR can provide either its Intrastate or Interstate EMR.

ATTACHMENT 9: SAFETY RECORD
DN TANKS, Key Subcontractor - Specialty Tank Pre-Stressor

Identify either: () Intrastate (x) Interstate: _____

Provide your firm's EMR for the last three (3) complete years (this information is provided by your worker's comp. insurance carrier) in the format presented below.

Table 9-3: EMR

Year	EMR
1-2018	0.66
2-2017	0.69
3-2016	0.89
3 Year Average	0.75

DN Tanks
Accident Prevention Safety Program
Corporate Safety Statement

DN Tanks is committed to the goal of having a work environment for all employees that is free of any unsafe acts, behaviors, work practices, or conditions, and is an environment that complies with all applicable safety and health regulations. To do this, employees must be aware of conditions in all work areas that can cause injuries or accidents to persons or property. No employee is required to work on a task that he or she recognizes as unsafe or unhealthy.

The objective of the DN Tanks Accident Prevention Safety Program is to create a culture that does not tolerate unsafe acts or conditions, resulting in the reduction of the number of injuries and illnesses, not merely in keeping with, but surpassing, the best experience of operations within the industry.

DN Tanks recognizes that the responsibilities for safety and health are shared as follows

- **DN Tanks** management accepts the responsibility for leadership of its Accident Prevention Safety Program, consistent implementation of its Accident Prevention Safety Program, for its effectiveness and improvement, and for providing the safeguards required to ensure safe working conditions. DN Tanks is committed to complying with applicable health and safety requirements and providing training to our employees, to ensure awareness, understanding, and responsibility of this important effort.
- **Supervisors and Managers** bear responsibility for the health of each employee under their direction and their individual commitment to eliminating potential hazards. Supervisors and Managers are responsible for developing the proper attitude toward safety and health for themselves and those they supervise, and for ensuring that all operations are performed with the utmost regard for the safety and health of all personnel.
- **Employees** are responsible for their wholehearted and genuine cooperation in all aspects of the safety and health program. These responsibilities include their compliance with all rules and regulations, consistently practicing safety while performing their job function, and reporting any unsafe work conditions, acts, or behaviors to their supervisors immediately.

Rev. 1-1-19

DN Tanks
Accident Prevention Safety Program
Corporate Safety Statement

Safety requires a sustained conscious effort and is regarded as the responsibility of each and every one of our employees.

DN Tanks recognizes that there are three components of any successful project:

Safety *Quality* *Production*

During the planning and execution of the work, these three elements shall share equal weight; however, it should be clear that the personal safety and health of each employee of DN Tanks, its sub-contractors and their employees, and any other persons doing business with DN Tanks or visiting a DN Tanks site or facility is of primary importance; "Their safety is our moral obligation." Prevention of injuries and illnesses is of such consequence that it will be given precedence over productivity and quality whenever necessary.

Our Employees are our most important asset—

their safety, our greatest responsibility.

QUALITY CONTROL PROGRAM

QUALITY CONTROL PROGRAM

Auburn Constructors, LLC (AUBURN) will be responsible for the quality control of their respective work. This is accomplished by administering an effective quality control, assurance, and inspection system established and carried out to ensure compliance with the Plans and Specifications. AUBURN will coordinate with Water Works Engineers to facilitate all on-site inspections, sampling and special testing requirements.

Long after construction is completed, this project will be highly visible to the public and provide a critical service to the surrounding community. AUBURN recognizes the great importance of this project to the City and will provide our distinguished attention to detail that we bring to every project we perform. AUBURN has an excellent track record of doing work right the first time and going the extra mile to ensure that all parties are satisfied with both function and aesthetics.

Figure 16: Auburn crew installing vertical turbine pumps at the West Hills Water Treatment Plant.

AUBURN's approach to quality control (QC) is a team effort that involves all levels of management from the project manager down to the foremen. Our QC Manager will be the onsite PM, Luke Smith. Mr. Smith will coordinate the overall QC efforts of AUBURN, our subcontractors, and vendors in complying with AUBURN's QC program and the project's specific QC requirements. Mr. Smith will also be responsible for the review and processing of submittals, O&M manuals, and as-built record drawings; coordinating quality control planning and review meetings; coordinating site visits by manufacturers' representatives to provide training and/or site inspections/observations; and stop work authority if workmanship or materials do not conform with project requirements.

As QC Manager, Mr. Smith will be ultimately responsible for the review and processing of submittals. AUBURN will never act as a "pass-through" for submittals but will carefully review each vendor or subcontractor submittal for completeness and conformity to the contract documents prior to submission. If deficiencies are discovered, they will be returned and corrected prior to being submitted for the Engineer's review. If necessary, the QC Manager will schedule and conduct QC review meetings between involved parties to ensure that known conflicts are resolved prior to submission.

Assistant PM Kyle Hutchens will be the link between the QC Manager and our civil/mechanical field foremen and subcontractors by performing daily inspections of work and materials, identifying and monitoring correction of non-conforming work items, providing feedback to the QC Manager on the effectiveness of QC activities, and stop work authority if workmanship or materials do not conform with project requirements.

Electrical Superintendent Don Pearson will fulfill this same role for our electrical field foremen and subcontractors.

AUBURN foremen are the boots-on-the-ground responsible for direct supervision of craftsmen onsite and maintaining quality workmanship. Our foremen review work-in-place for conformance with submittals, manufacturer's installation instructions and project specifications, attend quality control meetings, and have authority to stop work if workmanship or materials do not conform with project requirements.

AUBURN will ensure that all subcontractor work conforms to project requirements. It is our policy that subcontractor selection not solely be based on cost, but also based on quality, experience and ability to successfully complete the scope of work as intended. Mr. Hutchens will conduct a subcontractor pre-construction meeting at the jobsite for each subcontractor prior to the start of their work. These meeting review project specific safety and quality requirements related to the subcontractors' specific work activities. Mr. Hutchens will meet with onsite subcontractor staff daily to inspect work, discuss and help resolve outstanding issues, and assist in coordinating future work.

AUBURN will ensure that all purchased building materials, equipment, and supplies conform to project requirements. Vendors will be selected --- in part --- on their ability to provide the items specified on-time and packaged to ensure that they are appropriately protected during loading, unloading and storage at the jobsite. Mr. Hutchens will verify that 100% of the items delivered to the jobsite are those specified and in strict conformance with approved submittals prior to installation. Bills of materials will be checked against supplies actually delivered and will be cross checked with approved submittals. Any deficiencies will be returned to the supplier for correction. If necessary, photos, video, or shop inspections of corrections made will be requested prior to shipment.

Beyond providing testing for our own quality control purposes, Specification Section 01400 outlines several project specific requirements that AUBURN and our subcontractors will adhere to. Of special note is the requirement that we will be responsible for scheduling all tests and inspections pertaining to the earthwork scope. AUBURN will hire a third-party accredited laboratory and geotechnical consultant for approval by the City during the preplanning process.

INTRODUCTION TO AUBURN'S QC PROGRAM

The introduction to our QC Program provided below, affords the City with a concept of how our QC program will be structured on the project site:

1. Introduction

1.1. The 3 Phases of Quality Control (QC):

Construction quality depends on effective planning, coordination, communication, supervision and testing. AUBURN's Project Team (PT) will use the following tools to achieve quality:

- o Quality planning meetings
- o Confirm that materials meet project requirements at the time of purchase and delivery to the jobsite.
- o Daily inspections during construction

Quality Control (QC) consists of pre-planning activities before installation commences, as well as inspection and testing before, during and upon completion of work.

The 3 phases of Quality Control (QC) are:

- o Pre-Planning Phase
- o Construction Phase
- o Post-Construction Phase

The 3 phases of QC allow AUBURN to plan, schedule and install work in an orderly, consistent way that minimizes rework.

1.2. Zero Defect Program (ZDP):

Goals for AUBURN's Zero Defects Program (ZDP) are:

- o To complete AUBURN's scope of work and the work of subcontractors with a zero punch list at the time of substantial completion of AUBURN's scope of work,
- o To correct outstanding non-conformances during the course of construction as soon as practicable.

1.3. Roles and Responsibilities for Quality Control (QC)

AUBURN's Site Project Manager - (PM) Duties:

- o Acts as Quality Control Manager
- o Coordinate and conduct quality meetings and inspections
- o Coordinate visits by manufacturer or distributor representatives to provide training and/or site inspections/observations
- o Coordinate the QC efforts of AUBURN, subcontractors and owner QA in complying with project- specific requirements
- o Provide direct feedback and advise AUBURN's PT on the effectiveness of QC activities
- o PM will have authority to stop work if workmanship or materials do not conform with project requirements
- o Review work-in-place for conformance with submittals, manufacturer's installation instructions and project specifications
- o Confirm all inspections and tests are performed in conformance with project requirements
- o Inspect AUBURN's and subcontractor's work and monitor correction and completion of non- conforming work items.

AUBURN's Electrical Superintendent (ES) Duties:

- o Reports to PM
- o Responsible for all electrical and instrumentation scope Quality Control activities
- o ES will have authority to stop work if workmanship or materials do not conform with project requirements related to electrical scope
- o Provide direct feedback and advise AUBURN's PT on the effectiveness of QC activities

AUBURN's Foremen (FM) Duties:

- o Concrete and Mechanical FM Report to PM
- o Electrical FM reports to ES
- o Responsible for direct supervision of craftsman on site and maintaining quality workmanship
- o Review work-in-place for conformance with submittals, manufacturer's installation instructions and project specifications
- o Attend quality control meetings
- o FM will have authority to stop work if workmanship or materials do not conform with project requirements
- o Provide direct feedback and advise to AUBURN's PT on the effectiveness of QC activities

OTHER REQUIRED STATEMENTS & DOCUMENTS

ATTACHMENT 10 – NO CONFLICT OF INTEREST DECLARATION

Attachment 10 – NO CONFLICT OF INTEREST DECLARATION

West Side Tanks and Pump Station Project

The undersigned Proposer certifies that no official or employee of the City has an interest, has been employed or retained to solicit or aid in the procuring of the resulting agreement, nor that any such person will be employed in the performance of such work without immediate divulgence of such fact to the City. Proposers submitting a Proposal in response to this RFP must disclose any actual, apparent, direct, indirect, or potential conflicts of interest that may exist with respect to the Proposer or the Proposer's management or employees relative to the services to be provided to the City. Conflict of interest issues may require consultation with legal counsel. **If a Proposer has no conflicts of interest, a statement to that effect must be added to this ATTACHMENT 10.** Violation of this section shall be a material breach of the Agreement entitling the City to any and all remedies by law or in equity.

The undersigned Proposer certifies that no undue influence or pressure is used against or in concert with any officer or employee of the City in connection with the award or terms of the Agreement that will be executed as a result of this RFP, including any method of coercion, confidential financial arrangement or financial inducement. No officer or employee of the City shall receive compensation, directly or indirectly, from the Proposer, or from any officer, employee or agent of the Proposer, in connection with the award of the Agreement or any Work to be conducted as a result of this RFP. Violation of these requirements shall be a material breach of the contract entitling the City to any and all remedies by law or in equity.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that this declaration is executed on 01/29/2020 [date], at Sacramento [city], California [state].

(Signature of Declarant)

Attachment 10 Supplement

Assurance of Absence of Conflict of Interest

Auburn Constructors, LLC (AUBURN) hereby assures the City that no official or employee of the City has an interest, has been employed or retained to solicit or aid in the procuring of the resulting contract, nor that any such person will be employed in the performance of such contract without immediate divulgence of such fact to the City. AUBURN does not have any actual, apparent, direct, or potential conflicts of interest that may exist with respect to AUBURN or AUBURN's management or employees relative to the services to be provided to the City. AUBURN understands that any violation of the conflict of interest clause shall be a material breach of the contract entitling the City to any and all remedies by law or in equity.

I declare under the penalty of perjury under the laws of the State of California that the foregoing is true and correct and that this declaration is executed on 01/29/2020 at Sacramento, California.

J. Dean Bailey, President

ATTACHMENT 11 – NON-COLLUSION DECLARATION

Attachment 11 – NON-COLLUSION DECLARATION

West Side Tanks and Pump Station Project

NONCOLLUSION DECLARATION TO BE EXECUTED BY BIDDER AND SUBMITTED WITH PROPOSAL

The undersigned declares:

I am the President of Auburn Constructors LLC, the party making the foregoing Proposal.

The Proposal is not made in the interest of, or on behalf of, any undisclosed person, partnership, company, association, organization, or corporation. The Proposal is genuine and not collusive or sham. The Proposer has not directly or indirectly induced or solicited any other Proposer to put in a false or sham Proposal. The Proposer has not directly or indirectly colluded, conspired, connived, or agreed with any Proposer or anyone else to put in a sham Proposal, or to refrain from proposing. The Proposer has not in any manner, directly or indirectly, sought by agreement, communication, or conference with anyone to fix the Proposal price of the Proposer or any other Proposer, or to fix any overhead, profit, or cost element of the Proposer price, or of that of any other Proposer. All statements contained in the Proposal are true. The Proposer has not, directly or indirectly, submitted his or her Proposal price or any breakdown thereof, or the contents thereof, or divulged information or data relative thereto, to any corporation, partnership, company, association, organization, bid depository, or to any member or agent thereof, to effectuate a collusive or sham Proposal, and has not paid, and will not pay, any person or entity for such purpose.

Any person executing this declaration on behalf of a Proposer that is a corporation, partnership, joint venture, limited liability company, limited liability partnership, or any other entity, hereby represents that he or she has full power to execute, and does execute, this declaration on behalf of the Proposer.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that this declaration is executed on 01/29/2020 [date], at Sacramento [city], California [state].

(Signature of Declarant)

****END OF ATTACHMENT 11****

ATTACHMENT 13 – IRAN CONTRACTING ACT DISCLOSURE FORM

Attachment 13 - IRAN CONTRACTING ACT DISCLOSURE FORM

GENERAL REQUIREMENTS

Pursuant to the Iran Contract Act of 2010 (California Public Contract Code, Sections 2202-2208), Proposers are ineligible to propose on projects with a public entity for goods or services of one million dollars (\$1,000,000) or more if the Proposer engages in investment activities in Iran.

Proposers must provide the below disclosure form as a mandatory submittal for all projects in excess of \$1,000,000. The Iran Contracting Act Disclosure Form shall be submitted by all Proposers as a mandatory submittal.

(California Public Contract, Sections 2202-2208)

When responding to a bid or proposal or executing a contract or renewal for a City contract for goods or services of \$1,000,000 or more, a vendor must either: a) certify it is **not** on the current list of persons engaged in investment activities in Iran created by the California Department of General Services ("DGS") pursuant to Public Contract Code section 2203(b) and is not a financial institution extending twenty million dollars (\$20,000,000) or more in credit to another person, for 45 days or more, if that other person will use the credit to provide goods or services in the energy sector in Iran and is identified on the current list of persons engaged in investment activities in Iran created by DGS; or b) demonstrate it has been exempted from the certification requirement for that solicitation or contract pursuant to Public Contract Code Section 2203(c) or (d).

To comply with this requirement, please provide your vendor or financial institution name and complete **one** of the options on the following page. Please note: California law establishes penalties for providing false certifications, including civil penalties equal to the greater of \$250,000 or twice the amount of the contract for which the false certification was made; contract termination; and three-year ineligibility to bid on contracts. (Public Contract Code section 2205.)

OPTION #1 – CERTIFICATION

I, the official named below, certify I am duly authorized to execute this certification on behalf of the vendor/financial institution identified below, and the vendor/financial institution identified below is **not** on the current list of persons engaged in investment activities in Iran created by DGS and is not a financial institution extending twenty million (\$20,000,000) or more in credit to another person/vendor, for 45 days or more, if that other person/vendor will use the credit to provide goods or services in the energy sector in Iran and is identified on the current list of persons engaged in investment activities in Iran created by DGS.

SIGNED ADDENDA #1 THROUGH #3

IMPORTANT

Date: December 12, 2019

TO: Proposers

FROM: Janice Gainey, Senior Engineer, Environmental Utilities Dept.

RE: RFP 08-058 Design-Assist and Construction of West Side Tanks and Pump Station Project

*******ADDENDUM ONE*******

This Addendum 1 includes the following attachments:

Pre-Proposal Meeting Presentation
Pre-Proposal Meeting Sign in Sheet
WWE STD 15205-Hose Rack

This Addendum 1 consists of the following revisions or answers to questions:

1. PRE-PROPOSAL MEETING AND SITE WALK STATEMENTS AND RESPONSES TO QUESTIONS

Question 1: When will you notify the contractor that they have the winning proposal?

Answer: We anticipate notifying apparent winner or those who will be invited for interviews sometime between February 18th and February 20th 2020.

Question 2: When are questions going to be answered?

Answer: **Questions will be answered in batches as received via addendum postings on Public Purchase. Final questions are due January 13th and final addendum will be January 24th 2020.**

Question 3: Will the questions and presentation be uploaded to Public Purchase?

Answer: **Yes. Pre-proposal PowerPoint presentation and questions received during the meeting/job walk are being posted December 12th 2020.**

Question 4: How much time is anticipated for the contractor to participate in the design assist process?

Answer: The scope of work outlined in the contract documents; Volume 1 RFP specifies that the Contractor should anticipate up to eight (8) meetings of four (4) hours each for design assist meetings. Contractor should also consider what time they will need for preparation and follow-up for these meetings.

Question 5: Given the formula for scoring Guaranteed Maximum Price (GMP) with any GMP greater than 8% of the lowest GMP receiving zero points, how would the City handle a cost proposal that intentionally gave a “low ball” price in order to deprive all other proposals of any points for GMP?

Answer: First, the total scoring of the proposal is heavily weighted in favor of the Part 1-technical proposal. Second, if the City reasonably believes that GMP does not support ability to construct the project as designed, and the proposer’s Part 1 technical proposal is short listed, contractor will be given the opportunity during interviews to justify their GMP, or withdraw the proposal. Final determination will be made by City attorney if proposal is responsive or not.

Question 6: What are some of the important things you are looking for in the proposal?

Answer: The City is looking for evidence that the Contractor has thought carefully about project approach, has enough knowledge and experience with these types of projects to be able to anticipate issues and present valuable potential solutions.

Question 7: Are there any design items that are not open to alternatives/deviations?

Answer: The City has explored and studied multiple options for the tank tops and are set on a flat roof. Additionally the City would like to maintain access to valves for maintenance in vaults instead of direct bury. We are open to all other ideas.

Question 8: Part 1 has a maximum score of 250, Part 2 has a maximum score of 70. Why is there a total score of 310?

Answer: This is an error. The total potential score for proposal parts 1 and 2 should be 320.

Question 9: Do plans show the existing grading?

Answer: Yes, plans show existing grading.

Question 10: Can more area outside of the fence be used for storage?

Answer: It is our belief that there is adequate laydown and storage area for the project within the project site; however, if Contractor believes they need additional area, this can be discussed as the City does own property around the project site.

2. PRE-PROPOSAL MEETING POWER POINT PRESENTATION

Attached to this Addendum 1 is the pre-proposal meeting presentation

3. PRE-PROPOSAL MEETING SIGN-IN SHEET

Attached to this Addendum 1 is the pre-proposal meeting sign-in sheet.

4. SUBMITTED QUESTION: STEEL

Question: Is there any funding via America Iron & Steel or Buy America. We need to know if you are looking for Domestic or Import Material on this project.

Answer: Project is completely funded by City of Roseville. There are no requirements for buy America.

5. SUBMITTED QUESTION: WD00-C103

Question: Per Dwg WD00-C103, 106, etc., we saw 20 Bollards. Are they new Bollards? If so, are they Fixed or Removable? Also, please confirm which detail they should refer to: 2600 / WD00-G038 or ST-38 / WG00-G022?

Answer: Final placement of new bollards to be determined during design assist. For GMP cost proposal assume all are Removable per Detail 2600 on sheet WD00-G038.

6. SUBMITTED QUESTION: WD20-M005 AND DETAIL 15205

Question per Dwg WD20-M005, we saw a wall mounted Hose Rack calling out to 15205. However, it looks like the plans don't have detail 15205...

Answer: See attached detail 15205 which will be added to Volume 4 – Drawings.

Please include a signed copy of this addendum with your proposal.

I acknowledge receipt of Addendum One

RE: RFP 08-058 Design-Assist and Construction of West Side Tanks and Pump Station Project

***** ADDENDUM TWO *****

This Addendum 2 includes the following attachments:

Attachment 1: 0093^WD20-M-003 Booster Pump Station Section
Attachment 2: Question 11 – RFP Scoring

This Addendum 2 consists of the following revisions or answers to questions:

Note that questions 1-3 were addressed in Addendum 1.

4. SUBMITTED QUESTION: WD20-M001 and M003 - Pipe Size

Question: Can you confirm what size of Pipe is required as the details are calling out 24" In the Plan view Sheet M-001 and 30" in the Section view Sheet M-003.

Answer: The pump suction piping to each suction barrel and associated valves should be 24" as noted on drawings WD00-G-15 and WD20-M-001, and specification section 15200 VS-Valve Schedule. The piping is incorrectly called out as 30" on drawing WD20-M-003, and should be revised to 24". WD20-M003 has been corrected to show 24". See attached revised sheet 0093^WD20-M-003 Booster Pump Station Section

5. SUBMITTED QUESTION: SCADA

Question: Will the City be purchasing new SCADA software as part of this project. Or will work be implemented into an existing platform? Thank you for any information you can provide, I'm interested in sending the RFP to an integrator to submit a bid.

Answer: The City will be implementing on an existing platform.

6. SUBMITTED QUESTION: WD20-M-001 and M-003 - Pipe Size

Question: The potable water lines entering the pump barrels are called out as 24" PW on Drawing WD20-M-001 and 30" PW on Drawing WD20-M-003. Please clarify.

Answer: See response to question 4.

7. SUBMITTED QUESTION: WD00-G-026 and WD00-G-027 – Standard Details

Question: We could not locate a callout or reference for Standard Details W-17 thru W-22 on Drawing WD00-G-026 and WD00-G-027. If used, please indicate locations.

Answer: These are cathodic protection details that are not yet referenced from the Drawings and are currently placeholders. Cathodic protection design will be completed during the Design-Assist process for piping material selected for the project.

8. SUBMITTED QUESTION: WD20-AS-001 and Section 04200, Paragraph 1.4.C.1 – Color of CMU Block

Question: Drawing WD20-AS-001 states CMU is gray split face block and Specification Section 04200, Paragraph 1.4.C.1 states to submit the complete selection of manufacturer's standard and custom colors. Please clarify if gray block is correct.

Answer: City would like to select from the manufacturer's standard colors during the submittal approval process. For purposes of developing your GMP cost proposal assume "Tan Block".

9. SUBMITTED QUESTION: WD00-C-202 – Coupling on 72" Manhole

Question: Drawing WD00-C-202 references a 72" manhole, Detail W-35 where the new 30" PW ties into the existing water main. The connection point appears to be a flex coupling outside the manhole, but the manhole is shaded dark. Please clarify if the 72" manhole and accompanying butterfly valve is new or existing.

Answer: The point of connection with the existing 30" water pipeline is an existing buried 30" butterfly valve. Provide new piping and flex coupling as shown on the right side of the butterfly valve on Detail W-35, and new manhole as shown on Detail E-35.

10. SUBMITTED QUESTION: 16010 1.01 6 and WD20-I-003 – SCADA View Node

Question: Can you please provide specification and drawings for the SCADA View Node referenced in 16010 1.01 6 and also on drawing number WD20-I-003?

Answer: The wall mount SCADA terminal (View Node) hardware, software, and configuration is provided by City.

11. SUBMITTED QUESTION: RFP Scoring

Question: Addendum 1, Question 8, corrects a math error in the addition of Part 1, value (max)250, part 2, value(max) 70 =320 not 310 as shown.

This answer in addendum 1 does not address volume 1, section 7.1, page 14, TAB A: "Project Understanding"(30 Points), however, below the heading, first line states maximum score= 40 points, this could have produced the math error.

Page 15, TAB E, "Project Team" (40 points) however, page 22 proposal scoring matrix list TAB E as 50 points (max), this could be the cause of the 10 point error. Regardless, taking values from pages 14 & 15 does not match page 22.

Answer: See Attachment 2: Question 11 – RFP Scoring. Attachment shows edits to the RFP in three places to correct scoring totals.

Tab A: Project Understanding (40) Points)

Tab E: Project Team Qualifications and Experience (50 Points)

Total Maximum Possible Score for RFP Parts 1 and 2: 320

12. SUBMITTED QUESTION: HDPE3 Specification

Question: There is a call out for “UD” Pipe on the drawings, this Pipe is called out on the Schedule as HDPE3. There is no spec section provided for HDPE3? Can you please provide?

Answer: This is a typo. Revise pipe material for “UD” in Pipe Schedule on Drawing WD00-G-013 to “HDPE2”.

13. SUBMITTED QUESTION: Cost Proposal Format

Question: I don’t see any Bid items on this project. Is a lump Sum Price all that is required?

Answer: This is a Design Assist Contract with a Guaranteed Maximum Price. Please review the RFP for additional information; specifically section 7.2 and Attachment 15.

14. SUBMITTED QUESTION: WD00-G-013 and 15100- Lining for DIP

Question: The Piping Schedule is calling for Potable Water to be CM, Section 15100 PSDS DIP Lining for Water Pipe is asking for Ceramic Epoxy. Please confirm the correct lining.

Answer: Technical Specification Section 15100 covers multiple types of lining. The appropriate lining for each pipe segment is identified in the piping schedule on WD00-G-013.

15. SUBMITTED QUESTION: WD20-M-001 and M-003 - Pipe Size

Question: Please confirm if the couplings identified on Sheet 72 are to be Restraint Couplings. Specs only call out Flexible Couplings.

Answer: All piping specified to be pressure tested shall be restrained with appropriate joint and fitting restraints for the piping system and connection types.

16. ENGINEER REVISION: 16210 Generator Data Sheet

Change: Revise Diesel Fuel tank capacity from 24 hours to 48 hours.

Please include a signed copy of this addendum with your proposal.

RE: RFP 08-058 Design-Assist and Construction of West Side Tanks and Pump Station Project

***** ADDENDUM THREE *****

This Addendum 3 includes the following attachments:

There are no Attachments to Addendum 3.

This Addendum 3 consists of the following revisions or answers to questions:

Note that questions 1-3 were addressed in Addendum 1, questions 4-16 were addressed in Addendum 2.

SPECIAL NOTE: Although the delivery address for the proposals is provided in the RFP, it was not shown in Public Purchase. The delivery address has now been posted to Public Purchase.

City of Roseville
Attn: City Clerk Department
311 Vernon Street
Roseville, CA 95678

17. SUBMITTED QUESTION: WD20-M-001 ARV

Question: The drawing WD20-M-001, Note 5 calls out for Detail 15300 for ARV. The same item (ARV) is called out on Sheet WD20-M-003 as Detail 15234.

The standard Sheet WD00-G-054, has indicated Detail 15230? Please confirm if this Detail 15230 is correct or provide Detail. 15234

Answer: Detail 15230 is the correct detail to use for this installation. Revise Note 5 on Drawing WD20-M-001 to reference Detail 15230. Change the reference in the callout on Drawing WD20-M-003 from Detail 15234 to Detail 15230. See attached revised drawings.

18. SUBMITTED QUESTION: UTILITY TRANSFORMER

Question: Please confirm if the standalone Utility Transformer is to be furnished by the contractor or the Electric Utility company (Roseville Electric). If the Transformer is to be provided by the contractor, please confirm that "Section 16470-Panelboard and Power Transformer" of the spec will govern utility transformer requirements.

Answer: The City will furnish the Utility transformer and primary wire. Additionally, per Specification Section 16010 1.05A, the City pays the Utility Fees as a function of the new service application process. The Fees include the transformer and primary wire costs so they should not be included in the contract.

19. SUBMITTED QUESTION: SECTION 01110 – CATHODIC PROTECTION SYSTEM

Question: Specs section 01110 Part 1.2-B-6c mentions Contractor Design and Installation of a cathodic protection system. There is no other specification that provides any detail of the requirements of the cathodic system. If cathodic is required, please provide a cathodic protection specification to base our estimate on. Please advise.

Answer: These are cathodic protection details that are not yet referenced from the Drawings and are currently placeholders. Cathodic protection design will be completed during the Design-Assist process for piping material selected for the project. See response to Question 7, Addendum 2.

20. SUBMITTED QUESTION:

Question: Can you confirm if the 4" & 6" Sanitary Sewer DI Yard Piping should have NO Lining or Coating per Schedule.

Answer: The coating Information was unintentionally left off the pipe schedule, Dwg WD00-G-013. SS DIP shall be coated per Section 15100 PSDS DIP.

21. SUBMITTED QUESTION:

Question: Per Volume 2, Article 11 - Insurance and Bonds; Indemnification, 11.13 - Please confirm the indemnity will exclude the willful misconduct of the City pursuant to California Civil Code 2782.

Answer: Yes, the indemnity will exclude the willful misconduct of the City. This language will be edited in the final contract before execution as shown in text below.

11.13 Indemnification

To the fullest extent allowed by law, CONTRACTOR shall defend, indemnify, and hold harmless, CITY, its officers, employees, agents, and volunteers, and each and every one of them, from and against all actions, damages, claims, losses, expenses or other liabilities of every type and description, including reasonable attorney fees, to which they may be subjected or put, by reason of, or resulting from, the performance of the Work, whether upon or off the Work, including the loss of use thereof, that is caused in whole or in part by willful or reckless misconduct and/or any negligent or wrongful act or omission of CONTRACTOR, any Subcontractor, and anyone directly or indirectly employed by any of them or anyone for whose acts any of them may be liable, whether or not it is caused in part by a party indemnified hereunder, except for such claims arising from the sole negligence, or active negligence, or willful misconduct of CITY. The parties intend that this provision shall be broadly construed.

CONTRACTOR's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

22. SUBMITTED QUESTION:

Question: Per Volume 2, Article 11 - Insurance and Bonds; Indemnification, 11.11.C - The Contractor agrees to include in its contracts with all subcontractors the same requirements and provisions of the Contract, including the indemnity and insurance requirements. The required General Liability limits of \$5M per occurrence and \$10M aggregate is not commercially reasonable for subcontractors not defined as Major Subcontractors or Key Subcontractors. Please confirm the Contractor can accept lower General Liability insurance limits from subcontractors that are not defined as Major Subcontractors or Key Subcontractors that are commercially reasonable based on their scope of work.

Answer: All LISTED contractors (those with a scope of work greater than one half of one percent (0.5%) of the GMP) have the same insurance requirements as the General Contractor.

For smaller (not LISTED) we are adding the following section to Article 11.4 Summary of Insurance Requirements.

11.4.1 Subcontractors

Minimum Amount of Coverage for Subcontractors who are NOT Listed Contractors included in Attachment 7 to the RFP "Statement of Subcontractors": The bodily injury, personal injury and property damage liability of the Commercial General Liability insurance shall provide coverage in the following limits of liability: \$2,000,000 on account of any one occurrence for bodily injury and property damage, \$2,000,000 personal and advertising injury limit with an annual general aggregate limit of not less than \$4,000,000, and \$2,000,000 products and completed operations aggregate, combined single limit. The Automobile Liability insurance policy shall provide minimum limits of \$1,000,000 per accident as a combined single limit arising out of the ownership, maintenance, or use of any owned or non-owned vehicles. These minimum amounts of insurance coverage do not preclude the Contractor from requiring higher limits or additional insurance coverage as it deems necessary.

23. SUBMITTED QUESTION:

Question: For the Booster Pump Station Roof and Canopy, there are no down spouts shown on the contract drawings. Spec section 07600-2, section 2.4 states "Form downspouts and gutters in maximum lengths as practicable to sizes and shapes indicated on Drawings or to field-fit the locations shown on the drawings."

Spec Section 10340-3, section 2.4 states "Concealed drainage at canopies: Water shall drain from covered surfaces into intermediate trough and be directed to downspouts."

The drawings do not show gutters or down spouts. Please confirm there are no down spouts at the booster pump station for either the roof or the canopy.

Answer: Gutters and downspouts are not required.

24. SUBMITTED QUESTION:

Question: The contract documents state "Contractor should anticipate up to eight (8) meetings of four (4) hours each for design assist meetings." The contract documents do not indicate the anticipated schedule duration for the design assist period from NTP to release of Final Design Drawings and Specifications for Construction. It is our understanding that all project submittals and shop drawings are to be based off the Final Project Drawings and Specifications for Construction, and not those drawings included in the RFP set. For an accurate bid schedule and understanding of the design assist requirements, what is the City's anticipated duration (in days) after NTP that

will be needed to complete the design assist and issue the Plans and Specifications for construction? Please advise.

Answer: The Design-Assist process is throughout the project. Drawings will not necessarily all be finalized at the same time and will depend on what ideas Contractor has, and schedule prioritization.

It is anticipated that the Final Project Drawings and Specifications for Construction will be released as they are finalized and approved through the Design-Assist process. Contractor shall assume the first package of Final Project Drawings and Specifications for Construction detailing approved mobilization and grading work, including the tank and pump station building subgrade and piping shall be released for construction 30 calendar days after NTP. To meet this schedule, Contractor shall be prepared and participated in first design-assist meeting within 5 days of NTP. The schedule for release of the remaining Final Project Drawings and Specifications for Construction will be a function of the speed with which items A-E of Article 2.1, Scope of Work Summary, can be completed by Contractor, submitted to Design Team and a comprehensive construction plan to address project risks can be completed and agreed to via the remaining Final Design Coordination Meetings.

25. SUBMITTED QUESTION:

Question: We would like to request adding by addendum the DeZURIK Model BAW AWWA Butterfly valve as an acceptable manufacturer in BFV-10 Spec section 15200, 2.3, it would be considered an equal and normally allowed on Waterworks Engineering projects specifications.

The listed manufacturers are actually one company not two different ones thus not having any competition for these major items on the project.

The importance of this is that the bidding contractors will only take listed manufacturers and no "or equals" without being listed by addendum only the Mueller products will sole sourced.

We understand that DeZURIK Model BAW AWWA Butterfly valve is an acceptable manufacturer for the City of Roseville and has been supplied on past projects.

See below Pratt website shows it's a Mueller brand (url for website omitted).

Answer: DeZURIK Model BAW AWWA butterfly valves are acceptable for BFV-10 valve types. Revise Section 15200, 2.3.A.3 to add new item "c" as follows and change current item "c" to item "d":

"c. DeZURIK Water Controls; Model BAW."

26. SUBMITTED QUESTION:

Question: There appears to be a discrepancy in the definitions of “Key” and Major” subcontractors between the RFP and Sample Agreement.

Answer: Please revise the following definitions in Volume 2 Article 1 (Agreement) to read as follows:

- 1.89. **“Subcontractor-KEY”.** Key subcontractors are defined as a subcontractor who will perform greater than or equal to twenty-five percent (25%~~5%~~) of the GMP.
- 1.90. **“Subcontractor-MAJOR”.** Major subcontractors are defined as a subcontractor who will perform greater than five percent (~~20~~5%) of the GMP.

27. SUBMITTED QUESTION (contains 4 parts identified as a, b, c, and d):

- a. **Question:** Sheet 00-E-008 show a conduit identified as “21-E-615” in the group of conduits from the Load Bank to the Generator. This conduit does not show up in the Conduit and Wire Routing Schedule. Please provide the required information.

Answer: Add conduit to the Conduit and Wire Routing Schedule as follows: Tag No.: 21-E-615, Size: 1", Type "SPEC", From: Generator, To: Load Bank, Wire Fill: Pull Rope.

- b. **Question:** Conduit identifiers 23-P-603A thru 23-P-603H are identified wrong and should be 21-P-603A thru 21-P-603H. Please confirm.

Answer: Revise conduit numbers 23-P-603A thru 23-P-603H to 21-P-603A thru 21-P-603H on plan drawing WD20-E-001.

- c. **Question:** Sheet WD40-E-001 has a conduit shown as “21-S-501L” feeding LITx-252 at the Valve Vault. This conduit does not appear in the Conduit and Wire Routing Schedule. The Conduit and Wire Routing Schedule does show in the notes that that conduit “21-S-501J is supposed to feed LITx-252 but the conduit identifier on WD40-E-001 is pointing to the conduit feeding LITx-152. Please clarify or provide the required information.

Answer: Revise Conduit and Wire Routing Schedule as follows:

21-S-501J From: PBX-CO2, To: Level Transmitter Jbox, Wire fill: 2 #16 TSPR.

21-S-501K From: Level Transmitter Jbox, To: Tank 1 Level Transmitter, Wire Fill: 1 #16 TSPR Note: (LIT-*152) .

Add conduit Tag No.: 21-S-501L, Size: 3/4", Type "SPEC", From: Level Transmitter Jbox, To: Tank 2 Level Transmitter Wire Fill: 1 #16 TSPR, Note: (LIT-*252).

- d. **Question:** On Sheet WD20-M-001, Note 7 calls for a Portable Hoist for installing and removing valves. Does this Hoist require a dedicated electrical

circuit or will it utilize the 120v convenience outlets located in the general vicinity?

Answer: This is a non-motorized hoist.

28. SUBMITTED QUESTION:

Question: Are bidders entitled to rely upon the Geotechnical Report for West Side Tank & Pump Station Project Phase 2, Roseville, California dated January 9, 2019 prepared by Bajada Geosciences, Inc. identified in 2.2 of the RFP?

Answer: The Geotechnical Report for West Side Tank & Pump Station Project Phase 2, Roseville, California dated January 9, 2019 prepared by Bajada Geosciences, Inc., is supplemental information available to proposers as detailed in paragraph 2.2 of the RFP. The Contractor shall rely on the Intent of Contract Documents, as detailed in paragraph 2.4.2 of Agreement. Subsurface or concealed conditions that are materially different than information provided in the Contract Documents, including but not limited to the referenced Geotechnical Report, will be reviewed for relief in accordance with the requirements set forth in Section 2.7 of the Agreement and in accordance with California Public Contract Code section 7104.

29. SUBMITTED QUESTION:

Question: Please confirm that Public Contract Code section 7104 applies to this project.

Answer: California Public Contract Code section 7104 applies to this project and the applicable provisions will be incorporated into Section 2.7 of the final Agreement prior to execution with the successful Contractor.

30. SUBMITTED QUESTION:

Question: Is the Contractor entitled to Change Order relief under 2.7.1 (Local Conditions) of the Agreement if encountered subsurface or concealed conditions are materially different than information provided with the RFP, including the Geotechnical Report for West Side Tank & Pump Station Project Phase 2, Roseville, California dated January 9, 2019 prepared by Bajada Geosciences, Inc. identified in 2.2 of the RFP?

Answer: Subsurface or concealed conditions that are materially different than information provided in the Contract Documents, including but not limited to the referenced Geotechnical Report, will be reviewed for relief in accordance with the requirements set forth in Section 2.7 of the Agreement and in accordance with California Public Contract Code section 7104.

31. SUBMITTED QUESTION:

Question: Please confirm that LD's are the sole and exclusive remedy for delays.

Answer: Liquidated Damages are one available remedy for delays, in addition to those stated in provisions of Articles 13 and 14 of the Agreement.

32. SUBMITTED QUESTION:

Question: Please provide a waiver of all consequential damages, including lost profits/revenue.

Answer: The City will not provide a waiver of all consequential damages, including lost profits/revenue. Any proposed requests to waive damages shall be addressed in the Contractor's response to this RFP and shall be evaluated accordingly by the City.

33. SUBMITTED QUESTION:

Question: Section 11.5.3 Claims Made coverage - Special Notice, states liability coverage may not be written on a claims-made basis. Occurrence base Professional Liability is not commercially available. Please amend to:

"Liability insurance coverage may not be written on a "claims made" basis, except for Professional Liability insurance. The Certificate of Insurance must clearly provide that the coverage is on an "occurrence" basis."

Answer: Revise Volume 2 Article 11.5.3 to read as follows:

11.5.3 Claims Made Coverage – Special Notice

SPECIAL NOTICE - CLAIMS MADE COVERAGE:

Liability insurance coverage may not be written on a "claims made" basis, with the exception of Professional Liability. The Certificate of Insurance must clearly provide that the coverage is on an "occurrence" basis.

34. SUBMITTED QUESTION:

Question: Section 11.8 Builder's Risk of the Agreement, states the maximum deductible allowable under the Builder's All Risk policy shall be five percent (5%) of the Contract amount. Deductibles are the sole responsibility of the first named insured on the policy and not the responsibility of the City or any other additional insureds on the policy. Because there is no financial exposure to the City, Contractor's deductibles should be at the sole discretion of the Contractor. Please strike this sentence in its entirety.

Answer: Revise Volume 2 Article 11.8, second paragraph to read as follows:

The policies providing such insurance shall name CITY as a loss payee as its respective interests may appear, and certified copies of such policies shall be filed with CITY. ~~The maximum deductible allowable under the Builder's All Risk policy shall be five percent (5%) of the Contract amount.~~

35. SUBMITTED QUESTION:

Question: Section 11.11 Other Insurance Provision (B.) of the Agreement, states any self-insurance or self-insured retentions must be declared and approved by City in writing. Self-insured retentions and deductibles are the sole responsibility of the first named insured on the policy and not the responsibility of the City or any other additional insureds on the policy. Because there is no financial exposure to the City, Contractor's deductibles should be at the sole discretion of the Contractor. Please strike this paragraph in its entirety.

Answer: All insurance requirements must be met before contract award. Insurance will be reviewed as part of final contract negotiation and execution. Any waivers can be considered by the City at that time.

36. SUBMITTED QUESTION:

Question: Drawing WD40-S-009, Detail 1 notes the required floor joint, should one be needed by contractor. Please note that if a floor joint is required, a roof joint will most likely be required as well. The detail shown appears to be a floor slab joint used for concrete floor slabs that are placed at grade. Please confirm, similar to the floor slab, should the contractor require a construction joint to facilitate the schedule, a construction joint in the roof slab would be allowed. Please provide additional details for a construction joint in the roof slab, as it will likely be necessary for a reservoir of this size.

Answer: Floor slab and roof slab joints are not explicitly required, but can be included if the contractor determines that they are needed to accommodate their concrete placement schedules. Floor and roof slab joints, if used, need to include a waterstop and galvanized rebar across the joint. Final joint detail will be finalized as part of Design-Assist process.

37. SUBMITTED QUESTION:

Question: Project specification section 03251.2.8.A notes that bonding agents used that are subject to contact with potable water, shall be NSF-61 certified. Please confirm Scotch-Grip 1300 Rubber adhesive by the 3M company can be applied on bearing pad that is located on the "outside-of-tank" side of water stop that does not come into contact with potable water, and Sikaflex - 1A can be applied to bearing pad on the "inside-of-tank" side of water stop that does come into contact with potable water.

Answer: Scotch-Grip 1300 is used as a bonding agent where it will not be subjected to contact with potable water, i.e. outside of the waterstop. Sikaflex 1A is applied to hold the bearing pad in place while the walls are poured. The inside face of the bearing pad is coated with the NSF 61 CIM coating to meet compliance.

38. SUBMITTED QUESTION:

Question: The tank drawings (WD40-S-002) show two floor sumps however the tank site civil drawings (WD40-M-001) only show piping to one sump. Please confirm the number of sumps required per tank.

Answer: Only one sump is required.

39. SUBMITTED QUESTION:

Question: The project specification 03300.3.3.D.2 states that in no case shall free fall of concrete exceed 8 feet. In the case of a circular spirally tied columns, as is designed for the prestressed concrete tank, columns can be poured from the top as they are not water retaining. Please review and determine whether it is acceptable for concrete to free fall from heights greater than 8 feet, and to use direct discharge for the column pours on this project.

Answer: Concrete free fall shall NOT exceed 8 feet. Concrete free fall greater than 8 feet is NOT acceptable.

40. SUBMITTED QUESTION:

Question: Please confirm if project inspector will be a resident inspector providing inspections continuously and ongoing throughout tank construction.

Answer: The Construction Manager is full-time and shall provide services as described in paragraph 1.19 of Agreement, including select inspection and testing services as described in the Contract Documents. The Contractor is also required to provide select inspection and testing services as described in the Contract Documents. The Contractor shall provide notice / request for inspection and schedule all inspections and testing in accordance with the requirements of the Contract Documents.

41. SUBMITTED QUESTION:

Question: With respect to pre-existing hazardous materials/hazardous waste or hazardous materials/hazardous waste not brought onto the site by the Contractor, please confirm that the City will be considered the "generator" of such hazardous materials/hazardous waste and sign any necessary generator manifests.

Answer: Hazardous materials and hazardous waste shall be handled by the Contractor in accordance with the provisions of the Agreement at "Exhibit E –

Hazardous Materials.” It is possible that the City may not be considered the “generator” of such hazardous materials/waste. Please note the limitation on Contractor’s liability in Sections D.3 and D.4 of Exhibit E to the Agreement.

42. SUBMITTED QUESTION:

Question: Note 3, Drawing WD00-C-302 states to install 3" layer of mulch over weed barrier, which could not be located. Please clarify if applicable.

Answer: Weed Barrier (i.e. 20-yr landscape fabric) shall be black polypropylene polyester blend, 28 mills, 3.33 ounces/sq.yard, Mullen burst strength: 250 lbs. Permeability is 28 gals/s.f./min. per fallen head method. Weed barrier shall be DeWitt Pro 5 Weed Barrier or approved equal. Contractor proposed weed barrier shall be submitted for approval in accordance with Section 02950, paragraph 1.4.A.1.

43. SUBMITTED QUESTION:

Question: Bioretention Section E, Drawing WD00-C-103 and Landscaping Plan, Drawing WD00-C-302 do not indicate plant material within Bioretention Basins. Section 02950, Paragraph 2.1 outlines planting requirements for bioretention areas. Please clarify plant material is required.

Answer: Plant material is required in Bioretention Basins as detailed in Specification 02950 and West Placer Storm Water Quality Design Manual Final Draft, Fact Sheet TR 1, Sacramento Valley Native Plant List.

44. SUBMITTED QUESTION:

Question: We represent Xylem Goulds Vertical Turbine Pumps and would like to be listed as an equal product in specification section 11200, 2.2, Product and Manufacturer. Goulds Pump Model 16DMC-2 Stages is a good fit for the design conditions.

Attached for your review is a pump curve, Goulds Vertical Turbine Brochure, ISO 9001 Certification and an NSF 61 Brochure. We are confident Goulds can meet the specifications and would like an opportunity to quote the contractors. Goulds Pumps are made in America.

Answer: Xylem Goulds is an acceptable manufacturer for the vertical turbine pumps specified in Section 11200, provided they meet all specified requirements. Modify Section 11200, 2.2 to add new item “D” as follows and change current item “D” to item “E”.

“D. Xylem Goulds”

Please include a signed copy of this addendum with your proposal.

I acknowledge receipt of Addendum 3

Name J. Dean Bailey

Signature 

Company Auburn Constructors, LLC

Date 01/29/2020

EXHIBIT C - GUARANTEED MAXIMUM PRICE, COST OF WORK, AND FEE

- A. GUARANTEED MAXIMUM PRICE:** The Guaranteed Maximum Price as of the date of execution of this Agreement is Twenty three Million Four Hundred Eighty One Thousand Three Hundred and no/100ths (\$23,481,300), U.S. Currency.
- B. FEE AND CONTINGENCY:** The Fee and Contingency amounts, if any, are as detailed in the CONTRACTOR'S Proposal Part 2-Cost Proposal and Financials as Attachment 15-GUARANTEED MAXIMUM PRICE, COST OF WORK, and FEE and is incorporated at the end of this Exhibit C.
- C. PROPOSED SHARED SAVINGS:** The proposed shared savings are detailed in the CONTRACTOR'S Proposal Part 2-Cost Proposal and Financials as Attachment 16-Proposed shared Savings and is incorporated at the end of this Exhibit C.

D. COST OF THE WORK:

Cost of the Work. The term "Cost of the Work" shall mean costs incurred by CONTRACTOR in the performance of the Work, that do not exceed the GMP. The following are categories of cost and expense to be paid by CITY to CONTRACTOR as Cost of the Work:

1. Construction Costs.

1.1. Labor Costs.

- 1.1.1. Wages of construction workers directly employed by CONTRACTOR to perform the construction of the Work at the Site or, with CITY'S agreement, at off-site workshops.
- 1.1.2. Wages or salaries of CONTRACTOR's supervisory and administrative personnel when stationed at the Site and wages, salaries and other costs of project management, pre-construction services, form design, foundation engineering, manpower planning, purchasing, estimating and data processing, whether performed at the Site or in CONTRACTOR's offices, including, but not limited to services rendered during the Design Phase of the Project.
- 1.1.3. Wages and salaries of CONTRACTOR's supervisory or administrative personnel engaged at factories, workshops or on the road, in expediting the production or transportation of materials or equipment required for the Work, but only for that portion of their time required for the Work.
- 1.1.4. Costs paid or incurred by CONTRACTOR for taxes, insurance, contributions, assessments and benefits required by law or collective bargaining agreements and, for personnel not covered by such agreements, customary benefits such as sick leave, medical and health benefits, holidays, vacations and pensions, provided such costs are based on wages and salaries included in subsections 1.1.1 through 1.1.3 above.

- 1.2. **Subcontract Costs.** Amounts due Subcontractors in accordance with the requirements of the Subcontracts.

- 1.3. **Costs of Materials and Equipment Incorporated in the Completed Construction.** Costs, including transportation, of materials and equipment

incorporated or to be incorporated in the completed construction.

1.4. Costs of other Materials and Equipment, Temporary Facilities, and Related Items.

1.4.1. Costs, including transportation, installation, maintenance, dismantling and removal of materials, supplies, temporary facilities, machinery, equipment and hand tools not customarily owned by the construction workers, which are provided by CONTRACTOR at the Site and fully consumed in the performance of the Work; and cost, less salvage value, on such items if not fully consumed, whether sold to others or retained by CONTRACTOR. Costs for items previously used by CONTRACTOR shall mean fair market value.

1.4.2. Rental charges for temporary facilities, machinery, equipment and hand tools not customarily owned by the construction workers, which are provided by CONTRACTOR at the Site, whether rented from CONTRACTOR or others, and costs of transportation, installation, minor repairs and replacements, dismantling and removal thereof. Rental charges for equipment owned by CONTRACTOR shall be at then prevailing rates.

1.4.3. Costs of removal of debris from the Site.

1.4.4. Costs of facsimiles, telegrams and long distance telephone calls, postage and delivery charges (whether originating at the Site or at the offices of CONTRACTOR or CONTRACTOR), telephone service at the Site and reasonable petty cash expenses of the Site office.

1.5. Premiums; Taxes; Fees; Royalties.

1.5.1. That portion directly attributable to this Agreement of premiums for insurance and the Payment and Performance Bonds.

1.5.2. Sales, use, gross receipts or similar taxes imposed by a governmental authority, which are related to the Work and for which CONTRACTOR is liable.

1.5.3. Fees and assessments for any permits, licenses and inspections required by the Contract Documents.

1.5.4. Fees of testing laboratories for tests required by the Contract Documents or government authorities.

1.5.5. Royalties and license fees paid for the use of a particular design, process or product required by the Contract Documents. The costs of defending suits or claims for infringement of patent rights arising from such requirement by the Contract Documents; payments made in accordance with legal judgments against CONTRACTOR or CONTRACTOR resulting from such suits or claims and payments of settlements in connection therewith.

1.5.6. Deposits lost for cause other than CONTRACTOR's negligence.

1.6. Emergencies. Costs incurred in taking action to prevent threatened damage, injury or loss in case of emergency affecting the safety of persons and property, as provided in Article 12.10-EMERGENCIES of this Agreement.

- 1.7. **Other Costs.** Other costs incurred in the performance of the Work, if and to the extent approved in writing by CITY, which approval shall not be unreasonably withheld.

2. Items not Included in Cost of the Work.

- 2.1. Salaries and other compensation of CONTRACTOR's personnel stationed at CONTRACTOR's principal office or offices other than the Site, except as specifically provided in subsection 1 above.
- 2.2. Expenses of CONTRACTOR's principal office and offices, other than the Site office.
- 2.3. Overhead and general expenses, except as may be included in subsection 1 above.
- 2.4. The capital expenses of CONTRACTOR, including interest on capital employed for the Work.
- 2.5. Costs that would cause the GMP to be exceeded.

Attachment 15 - GUARANTEED MAXIMUM PRICE, COST OF WORK AND FEE

West Side Tanks and Pump Station Project

1.0 TOTAL PROPOSED GUARANTEED MAXIMUM PRICE (GMP)

The undersigned proposes and agrees to contract with the City to perform all of the Work for the Design Assist and Construction of the West Side Tanks and Pump Station Project including subsidiary obligations as defined in the Contract, for a **Guaranteed Maximum Price ("GMP")** of Twenty Three Million, Four Hundred Eighty One Thousand, Three Hundred dollars (\$ 23,481,300 .00), U.S. Currency.

Subject to the provisions of this Proposal and the Contract, the costs and expenses which the Contractor may include in the Cost of Work for purposes of determining that aspect of the Contractor's compensation are as set forth below. The Contractor's total compensation, including Fee and allowable mark-ups, shall not exceed the GMP.

The GMP may be adjusted by Change Order in accordance with the Agreement.

2.0 BREAKDOWN OF GUARANTEED MAXIMUM PRICE

Proposer provides the breakdown of the Contractor's GMP by major items of work as shown in Table 15-1. The cost breakdown should sum to a total that equals the GMP given in this Attachment 15 Section 1.0 – Total Proposed Guaranteed Maximum Price.

Table 15-1: Breakdown of Guaranteed Maximum Price

Scope Area	Cost
Site Development and Ground Improvements	2,000,000
Mechanical Equipment and Piping	4,350,000
Water Storage Tanks	12,275,000
Pump Station Building	1,231,300
Electrical, Instrumentation and Controls	2,500,000
Mobilization, Demobilization, Bonds, Insurance, and Permits	1,100,000
Sheeting/Shoring/Bracing per Labor Code Section 6707 (From Table 15-5)	25,000
Allowance Items Total (From Table 15-6)	0
Total GMP:	23,481,300

3.0 Schedule of Values

Contractor will be required to submit a complete schedule of values upon selection to facilitate contract negotiation within ten (10) days of notice.

- A. The Schedule of values shall be a form showing a detailed breakdown of quantities and prices of work and materials required to perform and complete the contract, including voluntary proposer allowances.
- B. The Schedule of values shall provide a cost breakdown for each element detailed in the approved Construction Schedule. The total of the price breakdown must agree with the GMP. The elements listed and price breakdown shall not be front end loaded or unbalanced, shall be subject to adjustment between the ENGINEER and the CONTRACTOR, and will be used as a basis for progress payments.
- C. Acceptance of the Schedule of values shall not relieve the CONTRACTOR of the responsibility of performing all the work needed to complete the project at the GMP.

Volume 2 – Agreement incorporates additional details and definitions that pertain to the Guaranteed Maximum Price, Fee, and Cost of Work.

4.0 COST OF THE WORK

The term "Cost of Work" means the sum of all costs necessarily incurred and paid by the Contractor for labor, materials, equipment, subcontractors, special services, bonds, liability, workers' compensation and errors and omissions insurance, direct job overhead expenses, taxes and other necessary expenses incurred in the performance of the Work, that do not exceed the GMP.

4.1 Hourly Field Labor

The cost of hourly field craft labor for workers used in actual and direct performance of the work by the Contractor will be the sum of the following:

- A. The actual wages paid plus any employer payments to, or on behalf of workers for fringe benefits including health and welfare, pension, vacation and similar purposes.
- B. All payments imposed by State and Federal Laws including, but not limited to, workers' compensation insurance, and social security payments. The rates used for workers' compensation insurance shall be actual rates paid by the Contractor for each specific craft and broken down by wage rate if applicable to that craft.
- C. Actual General Liability insurance burden, if applied to Contractor's payroll.

4.2 Hourly Field Craft Labor Rates Limitations

The cost of hourly field craft labor for workers used in actual and direct performance of the work by the Contractor will be limited by the following:

- A. Except as otherwise may be agreed to in writing by the City, the actual wages and benefits paid for manual classifications of Contractor's on-site workers will not, in the aggregate, be greater than the current applicable wage for each classification as established by the State of California Department of Industrial Relations.

- B. Specifically prohibited from the labor costs are other payroll burden factors such as small tools (as defined in Attachment 15 Section 3.6-Construction Equipment), bonuses of any kind and safety incentives.
- C. The Hourly Field Labor Rates will remain unchanged for the duration of the Project unless changed in accordance with an Industry Master Labor Agreement, if the Contractor is signatory to any such Agreements, changes by the Department of Industrial Relations, or changes made company-wide in the Contractor's organization for a craft classification in the Project's geographic area. All changes to these hourly field labor rates must be submitted by the Contractor to the City for review and approval prior to billing the City for work performed with new hourly labor rates. Increase in labor rates is not an allowable increase in the GMP.

4.3 Contractor's Hourly Field Craft Labor Rates

- A. Based on the requirements and limitations of Sections; 3.1-Hourly Field Craft Labor, and 3.2- Hourly Field Craft Labor Rates Limitations, the undersigned Proposer provides their hourly field labor rates set forth in **Table 15-2** for all labor employed by Contractor used in the performance all of the Work for the West Side Tanks and Pump Station Project.
- B. The proposer is to list the crafts and classifications, up to foreman level, they anticipate using in the performance of the work when completing this **Table 15-2**. Should the contractor ultimately use a craft classification not listed in table below, the contractor will submit backup cost information for that craft classification to the city.
- C. Contractor shall include the actual travel and/or subsistence costs, if any, as a separate line item under the labor cost category when submitting progress billings to the City. Except as otherwise may be agreed to in writing by the City, the actual travel and/or subsistence costs will not be more than established in an applicable Master Labor Agreement or the State of California Department of Industrial Relations.

ATTACHMENT 15 - TABLE 15-2

Proposer's Name: Auburn Constructors LLC

Hourly Field Labor Rates Table
West Side Tanks and Pump Station Project

Craft	Classification	Base Wage	Fringes & Vacation	P/R Tax & Insurance	Straight Time Hourly Rate	Overtime Rates

INSIDE WIREMAN (Placer County) 2/1/20 to 7/31/20							

4.4 Management and Administrative Labor

- A. Wages and Salaries of Contractor's supervisory and administrative personnel assigned to this Project to directly manage and administer the Work: These positions may include a Principal-in-Charge, On-site Project Manager, On-site Project Engineer, On-site Superintendents, Yardman/Delivery Driver and On-site Administrative Assistant. These positions will be paid in accordance with the following Table 3 for entire duration of the Project and include all labor burden, overhead and profit mark-ups. The Principal-in-Charge can only charge for hours worked at the Site for this Project and can also charge for attendance of on-site Project Meetings. Any off-site Principal-in-Charge time spent on this Project shall be included in the Contractor's Fee Schedule for the Project under the Contractor's Fee subsection below.
- B. The Contractor is allowed to charge up to a maximum of fifty (50) hours per week for each full-time assigned supervisory and administrative personnel even if an employee works more than fifty (50) hours in a week. The Contractor can only charge for supervisory and administrative hours if they also pay those same hours to the employee that worked up to fifty (50) hours in any given week. The Contractor is not allowed to charge for any supervisory and administrative personnel hours not paid to any employee.

Other company personnel such as Corporate Officers and Division/Area Managers (unless either are designated as the Principle-in-Charge), Quality Control Managers, Safety Officers, Project Schedulers, Project Coordinators, Estimators, Business Supervisors and Accountants are not allowed to charge any hours to the Project. The Proposer should include the anticipated cost of such personnel in the Contractor's Fee Schedule for the Project under the Contractor's Fee Subsection 5.0 below.

- C. Based on the above requirements for Management and Administrative Labor, the undersigned Proposer proposes the rates set forth in **Table 15-3** for all Management and Administrative labor employed by Contractor used in the performance all of the Work for the West Side Tanks and Pump Station Project.

Table 15-3: Management and Administrative Labor Rates

Management and Administrative Position	Hourly Rate
Principal-in-Charge	\$ 125.00
Project Manager	\$ 115.00
Electrical Project Manager	\$ 115.00
Assistant Project Manager	\$ 112.00
Electrical Superintendent	\$ 110.00
Yard Man/Delivery Driver	\$ 45.00

4.5 Materials

The cost of all materials, including all factory testing, freight and delivery costs of materials, used in performing the work will be the cost to the Contractor from the supplier thereof. All discounts for early payment shall accrue to the Contractor unless the City's payment to Contractor is paid to Contractor before discount payment is due in which case discount savings will be fully credited to the City on next progress billing. All rebates and all returns from the sale of surplus materials shall be credited to the Cost of the Work. Any rebates from future use of re-usable materials, such as concrete forming materials, shall be negotiated between the Contractor and City as materials are evaluated for possible Contractor re-use on other projects.

4.6 Construction Equipment

- A. The undersigned Proposer proposes the initial Contractor Owned Equipment Rates set forth in Table 15-4 for all Contractor Owned Equipment used in the performance all of the Work for the West Side Tanks and Pump Station Project. The rates found in this table for equipment owned by the Contractor will, in all cases, be understood to cover all fuel, supplies, repairs, maintenance, insurance, ownership, and incidental costs and no further allowances will be made for those items, unless specifically approved in writing by the City.
- B. Equipment owned by Contractor will only be paid for the actual time equipment is used in performing work and will be rounded to the closest full hour if paid by an hourly rate.
- C. Compensation for idle time of equipment through delays caused by the City will be made consistent with Article 9-Changes in the Work in the Design-Assist Agreement, provided as Volume 2 to the Contract Documents; however, that the Owned Equipment Rates set forth below in Table 15-4 will apply.
- D. All changes to these equipment rates must be submitted by the Contractor to the City for review and approval prior to billing the City for work performed with new hourly labor rates. Approved changes to equipment rates are not an allowable increase in the GMP.
- E. The Proposer is to list the contractor owned construction equipment they anticipate using in the performance of the work when completing this table. Should the contractor ultimately use equipment not listed in table below, the contractor will submit backup cost information for that equipment item to the City for approval.
- F. Equipment not owned by Contractor which is rented by Contractor and used in performing work will be paid by the City based on actual invoiced cost to Contractor, plus actual fuel/lube costs, provided the rental rate is not in excess of rental rates established by distributors or equipment rental companies in the local area. Owner-operated equipment will also be paid by the City based on actual invoiced cost to Contractor provided the City does not deem any charges excessive. All transportation costs to move equipment on and off the Work will be paid by the City up to a maximum of four (4) hours total travel time each way.
- G. For equipment with a value less than \$500.00: The Contractor will be paid an amount of three percent (3%) of total hourly field labor costs as defined in paragraph 3.3-Contractor's Hourly Field Craft Labor Rates above to cover the cost of small tools and safety supplies for work directly performed at the Site.

Table 15-4: Contractor Owned Equipment. Contractor Name: Auburn Constructors LLC

Equipment Description	Hourly Rate	Daily Rate
1/2 Ton Pick-Up	13.00	
3/4 Ton Pick-Up	16.00	
1 Ton Pick-Up with lift gate	17.00	
Backhoe/Loader	50.00	
XUV Gator	10.00	
All Terrain Reach Lift	55.00	
Air Compressor/Breaker	35.00	
Power Sweeper	45.00	
Water Truck	25.00	
500 Gallon Water Wagon	10.00	
Sandblast Equipment		110.00
Spyder Crane		400.00
Honda Portable Generator		80.00
Hi-Cycle Generator		60.00
25 KW Diesel Generator		250.00

Attach additional sheets as needed.

3.7 Subcontractors and Sub Tier Subcontractors

The Contractor will be paid for all work performed by a subcontractor at the actual invoiced amount. Should a Subcontractor be required to perform extra work caused by a contract change order, the subcontractor will be allowed a mark-up as provided for in the General Conditions.

3.8 Bonds and Insurance

The Contractor will be paid the actual cost for the 100% payment bond and 100% performance bond, as well as the cost of all insurance costs required for the Work (such costs are deemed a Cost of Work and are therefore contained within the GMP). Additional details regarding requirements for Bonds and Insurance are included in Volume 2 of the Contract Documents – Agreement Article 11 – Insurance and Bonds; Indemnification.

Table 15-4: Contractor Owned Equipment. Contractor Name: Auburn Constructors LLC

Equipment Description	Hourly Rate	Daily Rate
3" Trash Pump		75.00
Large Conduit Bender		35.00
Large Pipe Threader		35.00
Large Wire Tugger		55.00
Termination Lug Compression Equipment		85.00
Construction Laser		50.00
Vibratory Plate Compactor		75.00
Air Tamper		52.00
Power Trowel		90.00
Welder		60.00
Concrete Saw		75.00

Attach additional sheets as needed.

3.7 Subcontractors and Sub Tier Subcontractors

The Contractor will be paid for all work performed by a subcontractor at the actual invoiced amount. Should a Subcontractor be required to perform extra work caused by a contract change order, the subcontractor will be allowed a mark-up as provided for in the General Conditions.

3.8 Bonds and Insurance

The Contractor will be paid the actual cost for the 100% payment bond and 100% performance bond, as well as the cost of all insurance costs required for the Work (such costs are deemed a Cost of Work and are therefore contained within the GMP). Additional details regarding requirements for Bonds and Insurance are included in Volume 2 of the Contract Documents – Agreement Article 11 – Insurance and Bonds; Indemnification.

3.9 Direct Job Overhead Expenses

The Contractor will be paid for the actual cost of job overhead expenses which may include such expenses as office trailers, storage vans, temporary fencing/security, toilets, dumpsters, waste removal, water, utility power, jobsite landline telephone costs, jobsite internet provider costs, reasonable room and board subsistence for employees who live farther than 40 miles from the Work Site or as required by California prevailing wage laws, copy machine, water cooler and any office furniture required for the Work needs, including mobilization and demobilization of same. There will be no warranty reserve.

3.10 Taxes

The Contractor acknowledges it will be liable for all sales, use, gross receipts or other taxes, tariffs or duties related to the Work and that these taxes and tariffs are included in the GMP. All invoices to the City will include the applicable taxes and tariffs that are the Contractor's responsibility and will not be shown as a separate line item on the Contractor's invoice.

4.0 CALIFORNIA LABOR CODE SECTION 6707

Pursuant to the provisions of California Labor Code Section 6707, each Proposal submitted in response to this RFP shall contain, as a separate cost item, adequate sheeting, shoring, and bracing, or equivalent method, for the protection of life or limb in trenches and open excavation, exceeding five (5) feet, which shall conform to applicable safety orders. By entering an amount for this cost item below, the Proposer warrants that its action does not convey tort liability to the City, the Engineer, the Construction Manager, the Funding Agencies and their respective officers, employees, agents, and subconsultants.

Table 15-5: Total Amount for Worker Protection for CA Labor Code Section 6707

Protection in trenches and Open Excavations - Description	Total Cost
Twenty Five Thousand Dollars	\$ 25,000

5.0 SPECIAL SERVICES

Special work or services are defined as that work not included in this agreement and characterized by extraordinary complexity, sophistication, or innovation or a combination of the foregoing attributes which are unique to the construction industry. These special services may include such services as registered land surveyor, licensed geotechnical engineer, licensed structural engineer, special testing or laboratory work. The Contractor will be paid for special services based on actual invoiced cost, provided the City does not determine any special services costs to be excessive.

6.0 VOLUNTARY PROPOSER ALLOWANCES

The Proposer is allowed to propose allowances for minor portions of the Work. Proposers are limited to a maximum of three (3) proposed allowances and the total amount for all proposed allowances cannot exceed One Hundred Fifty Thousand Dollars (\$150,000.00).

Each proposed allowance description should be well-defined. There is no scoring points assigned to any proposed allowances, but they may be discussed during the final negotiations with the highest ranked

Proposer. Proposers are not required to propose an allowance item; it is strictly voluntary. Allowances shall not be considered for compensation as defined in Attachment 16 – PROPOSED SHARED SAVINGS.

The following Proposer's cost allowances and allowance amounts are included in the GMP:

Table 15-6: Proposer's Cost Allowances

Item#	Allowance Description	Allowance Amount
1	None	\$ 0
2	None	\$ 0
3	None	\$ 0
Total of Allowances:		\$ 0

7.0 ITEMS NOT INCLUDED IN THE COST OF WORK:

- A. Salaries and other compensation of Contractor's personnel stationed at Contractor's principal office or offices other than the Site, except as specifically provided in this Attachment 15 Section 3.4 – Management and Administrative Labor.
- B. Expenses of Contractor's principal office and offices, other than the Site office.
- C. Contractor's General Overhead and Expenses, except as specifically provided for in the Contract Documents.
- D. The capital expenses of Contractor, including interest on capital employed for the Work and charges to Contractor for delinquent payments.
- E. Hours in excess of fifty (50) hours per week for each full-time assigned supervisory and administrative personnel even if a supervisory or administrative employee works more than fifty (50) hours in a week.
- F. Costs due to correction of Defective Work, disposal of materials or equipment wrongfully supplied, and making good any damage to property.
- G. Costs that would cause the GMP to be exceeded.
- H. Any costs incurred after Owner's Final Acceptance of the Project.

8.0 CONTRACTOR'S FEE MARKUPS

- A. The undersigned Proposer proposes the following mark-up fees for general overhead and profit in the performance all of the Work for the West Side Tanks and Pump Station Project as shown in Table 15-7.

Table 15-7: Contractor's Fee Mark-up Schedule

Attachment 15 Section	Cost Category	Fee Mark-Ups For General Overhead And Profit
3.1-3.3	Hourly Field Labor	8.50 %
3.4	Management and Administrative Labor	Included in hourly rates
3.5	Materials	8.50 %
3.6	Construction Equipment	8.50 %
3.7	Subcontractors	8.50 %
3.8	Bonds and Insurance	8.50 %
3.9	Direct Job Overhead Expenses	8.50 %
3.10	Taxes	8.50 %

- B. Based on the above percentages for each cost category, the Proposed Total Fee Markup-for General Overhead and Profit percentage included in the Contractor's GMP is 8.50 %.

****END OF ATTACHMENT 15****

Attachment 16 – PROPOSED SHARED SAVINGS

West Side Tanks and Pump Station

In the event the final Cost of Work, plus the Proposed Total Fee Mark-up for General Overhead and Profit, is less than the GMP, as adjusted by the Change Orders, the undersigned Proposer proposes a sharing of the savings as follows.

<u>70</u>	% of the savings to the City
<u>30</u>	% of the savings to the Contractor

Percent of Savings to the contractor must be a minimum of 20% plus the Total Fee Markup percentage for General Overhead and Profit as shown in the GMP (Attachment 15, Paragraph 7.0.B).

Should there be savings shared, City will pay the Contractor its share of the savings at the same time as the final retention payment.

****END OF ATTACHMENT 16****

EXHIBIT D - CONSTRUCTION ALLOWANCE ITEMS AND AMOUNTS

(NOT USED)

END OF EXHIBIT D

EXHIBIT E - HAZARDOUS MATERIALS

A. Certain Definitions.

1. “Hazardous Materials” means any substance:

- 1.1. The presence of which requires investigation or remediation under federal, state or local law, statute, regulation, ordinance, order, action, policy or common law;
- 1.2. Which is or becomes defined as a “hazardous waste,” “hazardous substance,” pollutant or contaminant under any federal, state or local law, statute, regulation, rule or ordinance or amendments thereto, including, without limitation, the Comprehensive Environmental Response, Compensation and Liability Act, 42 USC §§9601 et seq. (“CERCLA”), as amended, or the Resource, Conservation and Recovery Act, as amended, 42 USC §§6901 et seq. (“RCRA”);
- 1.3. Shall include the meaning provided in Section 100 of the Solid Waste Disposal Act (42 USC Section 6903 and/or Section 25117 of the California Health and Safety Code) as amended from time to time, or any other hazardous material, hazardous waste, hazardous substance, pollutant, and/or contaminant with requirements under federal, State of California, or local law, statute, regulation, rule, ordinance, order, action, policy or common law;
- 1.4. Which is petroleum, including crude oil or any fraction thereof not otherwise designated as a “hazardous substance” under CERCLA, including without limitation gasoline, diesel fuel or other petroleum hydrocarbons;
- 1.5. Which is toxic, explosive, corrosive, flammable, infectious, radioactive, carcinogenic, mutagenic, or otherwise hazardous and is or becomes regulated by any governmental authority or instrumentality;
- 1.6. The presence of which on the Site causes or threatens to cause a nuisance upon the Site or to the adjacent properties or poses or threatens to pose a hazard to the health or safety of persons on or about the Site; or
- 1.7. The presence of which on adjacent properties could constitute a trespass by CONTRACTOR or CITY.

2. “Underground Storage Tank” shall have the definition assigned to that term by RCRA §9001, 42 USC §6991, and also shall include:

- 2.1. Any tank of 1,100 gallons or less capacity used for storing motor fuel;
- 2.2. Any tank used for storing heating oil for consumption on the premises where stored;
- 2.3. Any septic tank; and any pipes connected to items A.2.1-A.2.3.

3. “Environmental Requirements” means all Applicable Laws, statutes, regulations, rules, ordinances, codes, licenses, permits, orders and similar items of all federal, state or local governmental agencies or other instrumentalities and all applicable judicial, administrative and regulatory decrees, judgments and orders relating to the protection of human health or the environment, including, without limitation:

- 3.1. All requirements, including but not limited to, those pertaining to reporting,

licensing, permitting, investigation and remediation of emissions, discharges, releases or threatened releases of Hazardous Materials into the air, surface water, ground water or land, or relating to the manufacture, processing, distribution, use, treatment, storage, disposal, transport or handling of Hazardous Materials; and

3.2. All requirements pertaining to the protection of the health and safety of employees or the public.

4. **“Environmental Damages”** means all claims, judgments, damages, losses, penalties, fines, liabilities, encumbrances, liens, costs and expenses of investigation and defense of any claim, including, without limitation, attorney's fees, which are incurred at any time as a result of the existence of Hazardous Materials upon, about or beneath the Site or migrating or threatening to migrate to or from the Site, and including, without limitation:

4.1. Damages for personal injury, or injury to property or to natural resources occurring upon or off the Site;

4.2. Fees incurred for the services of attorneys, consultants, CONTRACTOR, experts, laboratories and all other costs incurred in connection with the investigation or remediation of such Hazardous Materials or violation of Environmental Requirements; and

4.3. Liability to any third party or governmental agency or political subdivision to indemnify such party, agency or political subdivision for costs expended in connection with the items listed in subparagraph A.4.2.

5. **“Environmental Conditions”** means collectively, Hazardous Materials and Underground Storage Tanks existing on the Site and not brought there by CONTRACTOR or any Subcontractor.

B. Investigation of Site.

1. Upon written notice from CITY, CONTRACTOR shall prepare for approval and execution by CITY, one or more contracts (“Environmental Contracts”) with suitably qualified consultants and/or engineers (“Environmental Engineers”), for purposes of performing an investigation and analysis of the Site prior to demolition and excavation activities, to determine the presence of any Environmental Conditions on, in or under the Site. The Environmental Contracts shall provide for a commercially reasonable scope of investigation approved by CITY, and may provide for conducting the investigation and testing in phases acceptable to CITY. The Environmental Contracts shall also provide that the Environmental Engineers shall begin their tests and inspections at the Site as soon as CITY is able to arrange access to the Site, or any portions thereof, for such purposes. The Environmental Contracts shall provide that CONTRACTOR, acting as agent of CITY, shall coordinate the activities of the Environmental Engineers.

2. The Environmental Contracts shall provide that the Environmental Engineers shall prepare such reports, feasibility studies and remedial plans (“Environmental Assessments”) as may be reasonably necessary in order to identify and explain the quantity, scope and nature of the Environmental Conditions found to exist at the Site. The Environmental Assessments shall contain a detailed analysis of the Environmental Conditions discovered, and the actions (“Remedial Actions”) required for the response, removal, cleanup or remediation of such Environmental Conditions (i) which are required by Environmental Requirements, or (ii) which are reasonably necessary to

mitigate Environmental Damages.

3. The Environmental Contracts shall provide that the Environmental Engineers shall promptly provide CITY and CONTRACTOR with a copy of each Environmental Assessment, together with any other reports and test results generated pursuant to the Environmental Contracts. CONTRACTOR shall, promptly after receipt of the foregoing matters from the Environmental Engineers, prepare and submit to CITY a written report setting forth CONTRACTOR's understanding of whether and to what extent any recommended Remedial Actions may result in an amendment to the Schedule and the progress of the Work.
4. The Environmental Contracts shall provide that it shall be the responsibility of the Environmental Engineers to give any necessary notice to the appropriate regulatory agency or agencies of the presence of any Environmental Conditions; to pursue all necessary negotiations with such agencies concerning preparation and approval of a plan for clean-up to the extent required; and to obtain all necessary permits to perform any Remedial Actions.

C. Remedial Actions.

1. If so instructed by CITY, based upon the results of the Environmental Assessments, CONTRACTOR shall, as agent for CITY, obtain bids from remediation contractors ("Remediation Contractors") suitably qualified and approved by CITY, to perform the Remedial Actions selected by CITY and shall submit such bids to CITY, together with CONTRACTOR's recommendation of the Remediation Contractor(s) to be retained. If CITY elects to go forward with all or any portion of the Remedial Actions covered by the bids submitted, CITY will so advise CONTRACTOR in a written notice on or before the date which is sixty (60) Days after receipt of the foregoing matters from CONTRACTOR. Promptly after receipt of such notice, CONTRACTOR shall prepare for CITY's execution remediation contracts ("Remediation Contracts") with the Remediation Contractors identified in such notice.
2. CONTRACTOR, as agent for CITY, shall be responsible for coordinating the work and services performed by the Remediation Contractors, and coordinating such remediation work with the Work.
3. If in the course of performance of the Work, CONTRACTOR encounters on the Site any Hazardous Materials not previously disclosed and remediated by the Environmental Engineers or the Remediation Contractors, CONTRACTOR shall immediately suspend the Work in the area affected and promptly thereafter report the condition to CITY.

D. Payments: Liability of CONTRACTOR.

1. All payments due under the Environmental Contracts and the Remediation Contracts shall be made by CITY directly to the Environmental Engineers and the Remediation Contractors. Such payments will be based on requisitions, which requisitions shall be approved by CONTRACTOR prior to submission to CITY.
2. All payments due under the Environmental Contracts, the Remediation Contracts and for Environmental Damages, shall not be a part of the GMP, and shall be the sole responsibility of CITY, except as expressly provided otherwise in Section 5 hereof.
3. It is understood and agreed that with respect to any Environmental Conditions existing on the Site, CONTRACTOR is not, and shall not be deemed to be, a generator, arranger, operator, treater, storer, transporter or disposer of, or otherwise responsible for, any such Environmental Conditions. It is understood and agreed that CONTRACTOR shall

have no right to direct the means or methods of performance of any Environmental Engineer or Remediation Contractor.

4. CITY shall indemnify, defend and hold harmless CONTRACTOR, from and against any Environmental Damages asserted against or sustained by CONTRACTOR as a result of CONTRACTOR being deemed or determined to be a generator, arranger, operator, treater, storer, transporter or disposer of, or otherwise responsible for, any such Environmental Conditions.

E. Environmental Responsibilities of CONTRACTOR.

1. CITY acknowledges and agrees that CONTRACTOR shall not commence or continue any demolition or construction activities on any portion of the Site on or in which Remedial Actions are to be performed until such Remedial Actions are to the point where construction activities will not interfere with such Remedial Actions, as evidenced by appropriate certification by the applicable Environmental Engineer and/or Remediation CONTRACTOR and any required approval of any applicable government agency. CONTRACTOR agrees to use good faith diligent efforts to adjust and reschedule its activities at the Site so as to minimize, to the extent reasonably practical, the adverse effect on the progress of the Work resulting from any Remedial Actions.
2. CONTRACTOR shall not bring Hazardous Materials to the Site, and shall not include Hazardous Materials in any construction materials, unless permitted by Environmental Requirements. CONTRACTOR shall comply, and shall cause all Subcontractors to comply, with all Environmental Requirements regarding the generation, handling, storage, treatment and disposal of Hazardous Materials.
3. CONTRACTOR shall indemnify, defend and hold harmless the Indemnified Parties from and against any Environmental Damages asserted against or sustained by such parties as a result of any Environmental Conditions caused or created by CONTRACTOR or any Subcontractor, or of any violation by CONTRACTOR or the Subcontractors, of any Environmental Requirement arising out of the performance of the Work.

END OF EXHIBIT E-HAZARDOUS MATERIALS

EXHIBIT F - IN LIEU OF SECURITIES ESCROW AGREEMENT

Pursuant to Section 22300 of the Public Contract Code of the State of California, CONTRACTOR has the option to deposit securities, subject to prior approval of CITY, with ESCROW AGENT, as a substitute for retention earnings required to be withheld by CITY pursuant to the contract for public works entered into between the CITY and CONTRACTOR.

For the West Side Tanks and Pump Station Project CONTRACTOR, Auburn Constructors, elects to not exercise this option and agrees that retention earnings be held by CITY.

CITY OF ROSEVILLE, a

EXHIBIT G - BONDS

There are three (3) bond forms that constitute Exhibit G following this index sheet.

1. Performance Bond
2. Labor and Material Bond
3. Warranty Bond

EXHIBIT H - COMPLETION TIMES AND LIQUIDATED DAMAGES

West Side Tanks and Pump Station Project

A. Project Milestones

Following are scope descriptions for substantial completion of project milestones.

1. **Milestone 1:** Electrical and Controls Hardware Factory Testing. CITY intends to complete Application Programmer work in parallel with Contractor provided Electrical Contractor and System Integrator work as defined in Section 16010. To ensure successful coordination and timely execution of the work, Contractor and their Electrical Contractor and System Integrator shall work proactively with City to support this effort. Contractor will perform all work necessary to complete Electrical and Controls Hardware Factor Testing, as described in Section 16600-3.01, in advance of this Milestone.
2. **Milestone 2:** Grading and Site Preparation for Future Crew Building. CITY intends to initiate construction of the Operations/Crew building that is indicated on the Plans before the completion of this project. Contractor will complete site grading and drainage improvements for the future Operations/Crew building area and evacuate their equipment, staging area, and all other uses of this area.
3. **Milestone 3:** Substantial Completion in accordance with Article 8.13 and City has accepted a partial Certificate of substantial completion and punch list. Determination of Substantial Completion is solely at the discretion of the CITY.
4. **Milestone 4:** Final Completion in accordance with Article 8.14 and City has initiated the process of attaining a Notice of Completion. Determination of Final Completion is solely at the discretion of the CITY.

B. Times Allowed for Completion

In accordance with the provisions of Article 7-TIME AND PROGRESS OF WORK, the following table summarizes the scope of work milestones and the contracted completion time. Each milestone shall be completed within the number of consecutive calendar days from the date established in the Notice to Proceed for the commencement of Contract Time.

Table H-1: Times Allowed for Completion of Each Project Milestone

Contractual Completion Event	Completion Time (Calendar Days)
Milestone 1: Electrical and Controls Hardware Factory Testing	330
Milestone 2: Grading and Site Work for Future Crew Building	500
Milestone 3: Substantial Completion	770
Milestone 4: Final Completion	865

C. Damages for Delays

In accordance with the provisions of Article 7-TIME AND PROGRESS OF WORK for the period of time that any portion of the Work remains unfinished after the time fixed in above Table H-1: Times Allowed

for Completion of Each Project Milestone, as modified by extensions of time granted by the Owner, it is understood and agreed by the Contractor and the Owner that the Contractor shall pay the Owner the liquidated damages listed below.

Table H-2: Daily Liquidated Damages for Non-Completion of Each Project Milestone

Contractual Completion Event	Daily Liquidated Damages
Milestone 1: SCADA & PLC Factory Testing	\$1,500
Milestone 2: Grading and Site Work for Future Crew Building	\$ 800
Milestone 3: Substantial Completion	\$1,500
Milestone 3: Final Completion	\$1,000

D. Weather Days

In accordance with the provisions of Article 7-TIME AND PROGRESS OF WORK, an allowance of twenty (20) working days of weather or other caused Excusable Delays are included in the time allowed for completion. This allowance represents a reasonable assessment of anticipated lost working days based on historical weather patterns. These weather days shall be included in the Contractor's schedule as specified in Technical Specifications Section 01320-PROGRESS SCHEDULES.

SECTION 01110

SUMMARY OF WORK

PART 1 - GENERAL

1.1 DEFINITIONS AND CONTRACT PROVISIONS

- A. The term "Contract Documents" used throughout the Specifications and Drawings is equivalent to "Agreement" as defined in the Design-Assist Construction Agreement.
- B. The term "Construction Manager" used throughout the Specifications and Drawings is as defined in the Agreement.
 - 1. As it pertains the Specifications and Drawings, the Construction Manager may assign part of the Construction Manager's duties, rights and responsibilities to "Architect/Engineer".
- C. The term "Drawings" used throughout the Specifications and Drawings is equivalent to "Plans" as defined in the Agreement.
- D. The term "Engineer" or "ENGINEER" used throughout the Specifications and Drawings is equivalent to "Architect/Engineer" as defined in the Agreement.
- E. The "Final Design Submittal" refers to the Specifications and Drawings included as attachments to the Request for Proposals to describe the Work. These documents will be modified during the Design-Assist process to produce Construction Documents.
- F. The term "Owner" or "OWNER" used throughout the Specifications and Drawings is equivalent to "CITY" as defined in the Agreement.
- G. Refer to the Agreement for definitions and contract provisions not included in the Specifications or Drawings.

1.2 LOCATION AND DESCRIPTION OF WORK

- A. The Work is located at 4501 Westpark Drive in Roseville, California 95747.
- B. The Work covers the construction of the West Side Tank and Pump Station as generally described below and as shown on the Drawings and Specifications:
 - 1. Water Storage Tanks:
 - a. Over excavation beneath tanks and installation of mechanical stabilized earth (MSE) foundation improvement system to provide suitable subgrade conditions for tank construction.
 - b. Construction of two (2) 6.0 MG at-grade pre-stressed concrete water storage tanks with flat concrete roofs. Each tank will be identically sized at 170 ft diameter with 40 ft sidewall height.
 - c. Installation of two access hatches, roof vent, interior and exterior access ladders, and electric davit cranes at each tank.
 - d. Installation of leak detection system with PVC liner and perforated piping.
 - e. Installation of wall drain piping.
 - f. Installation of downspouts from roof of each tank for rainwater collection.
 - g. Installation of hydrodynamic tank mixing system in each tank.

01110-1

- h. Installation of internal and external overflow piping and supports at each tank.
- i. Installation of sump in floor of each tank with drain piping and valves.
- j. Installation of water sample station at each tank.
- 2. Tank Valve Vault:
 - a. Construction of new cast-in-place concrete valve vault with structural supports and grating.
 - b. Installation of seven (7) butterfly valves and two (2) check valves associated with tank inlet and outlet. This piping and valve arrangement allow the two tanks to be operated in parallel, in series, or independently taken offline for maintenance.
- 3. Booster Pump Station:
 - a. Construction of 2,537 sq. ft CMU block Booster Pump Station building to house booster pumps, sodium hypochlorite storage and feed system, and electrical and control equipment.
 - b. Installation of architectural canopies over exterior electrical switchgear and valve vault.
 - c. Installation of coiling overhead door for vehicle access into pump room.
 - d. Installation of evaporative cooling for pump room and air conditioning for electrical room.
 - e. Installation of trench drains for building drainage and small diameter pipe routing.
 - f. Installation of roof hatches over all pumps with winch operated rigging to allow operators to open hatches from ground level.
 - g. Construction of valve vault outside of building for suction-side pump isolation valves.
 - h. Installation of four (4) 250 hp vertical turbine booster pumps (3 duty plus 1 standby) set in below-grade suction barrels. Each pump shall have a design capacity of 3,800 gpm at 170 ft TDH.
 - i. Installation of 16-inch electronic control valve for tank filling and pressure relief.
 - j. Installation of piping, pipe supports, valves and appurtenances associated with pumping system.
 - k. Installation of sample pump for tank outlet chlorine residual analyzer.
 - l. Installation of 500-gallon dual contained sodium hypochlorite storage tank.
 - m. Installation of skid-mounted progressive cavity sodium hypochlorite metering pumping system.
 - n. Installation of two (2) emergency eyewash and shower systems with tepid water system.
 - o. Installation of 2,000-gallon bladder-style hydropneumatic tank and associated piping, pipe supports, valves and foundation.
- 4. Electrical:
 - a. All Electrical Contractor work, including coordination with electric utility and installation of electric service to site including transformer, conduit and wiring.
 - b. Installation of 1,500 kW standby diesel generator, dual-contained fuel tank, load bank and access stairs and platforms.
 - c. Installation of exterior switchboard at Booster Pump Station.
 - d. Installation of interior automatic transfer switch, distribution sections, panelboard, transformer, control panel and security panel in electrical room of Booster Pump Station.
 - e. Installation of two (2) 250 hp variable frequency drives and two (2) reduced voltage soft starters in electrical room of Booster Pump Station.
 - f. Installation of light fixtures on and in the Booster Pump Station and light poles throughout the site.
 - g. Installation of all conduit, wire, supports, pullboxes, etc. to support the new system.

01110-2

5. Instrumentation and Controls:
 - a. All System Integrator work, including coordination and installation of programmable logic controller (PLC) and control panel to monitor and control the new system. Programming of PLC and SCADA will be provided by OWNER Application Programmer.
 - b. Installation of level measurement devices, ladder and hatch intrusion switches and power supply to davit cranes at each water storage tank.
 - c. Installation of level measurement devices in tank valve vault.
 - d. Installation of free chlorine residual analyzers for tank inlet and outlet sampling.
 - e. Installation of pressure transmitter on pump discharge header.
 - f. Installation of bi-directional 24-inch magnetic flowmeter for tank fill and pump discharge flow measurement.
 - g. Installation of site access and security system, including fiber optic network tied into Pleasant Grove WWTP Administration Building.
 - h. Installation of miscellaneous instrumentation.
6. Miscellaneous Site Work:
 - a. Installation of valve vault to tie into existing water distribution system with new 30-inch piping.
 - b. Installation of 30-inch tank fill, 42-inch tank outlet and miscellaneous yard piping, including sewer and storm drain manholes and catch basins.
 - c. Contractor design and installation of cathodic protection system, including all anodes, test stations, insulating flanges, etc.
 - d. Site grading and construction of curbs, gutters and paving.
 - e. Construction of lined bioretention basins for stormwater treatment prior to discharge to existing storm drain system.
 - f. Construction of CMU block wall and chain-link fencing around site perimeter.
 - g. Construction of steel fencing at main site entrance with automatic gate and single-leaf gate for pedestrian access.
 - h. Connecting to existing recycled water distribution system, installation irrigation system between Westpark Drive and new CMU block wall, planting shrubs and installing mulch.
 - i. Installation of and maintenance of site erosion control measures.
7. Project Management and Administration:
 - a. Preparing and providing submittals.
 - b. Maintaining project schedule.
 - c. Maintaining As-Built Contract Drawings on a continuous basis.
 - d. Preparing Requests for Information.
 - e. Startup, testing, training and project closeout tasks to provide a complete and functional system.

1.3 PROJECT DOCUMENTS

- A. The Work is described in the following project documents:
 1. Volume 1 – Request for Proposals
 2. Volume 2 – Sample Contract
 3. Volume 3 – Technical Specifications
 4. Volume 4 – Drawings
- B. Refer to the Request for Proposals for the following supplemental information referenced from the Drawings and Specifications:
 1. Geotechnical Report
 2. Stormwater Pollution Prevention Plan

01110-3

1.4 COORDINATION

- A. The CONTRACTOR shall be solely responsible for coordination of all of the Work of this Contract.
- B. The CONTRACTOR shall supervise, direct and cooperate fully with all Subcontractors, manufacturers, fabricators, suppliers, distributors, installers, testing agencies and all others whose services, materials or equipment are required to ensure completion of the Work within the Contract Time.
- C. Work of Others:
 - 1. The CONTRACTOR shall generally perform the Work according to the suggested sequence of construction as described in Section 01130, Special Project Constraints.
 - 2. The CONTRACTOR shall cooperate with and coordinate CONTRACTOR's Work with the work of any other contractor, utility service companies, or OWNER's representatives performing work at the site.
 - 3. The CONTRACTOR shall also coordinate their Work with the work of others to assure compliance with schedules.
 - 4. The CONTRACTOR shall attend and participate in all project coordination or progress meetings and report on the progress of all Work and compliance with schedules.
 - 5. If any part of the work depends upon the work of others for proper execution or results, the CONTRACTOR shall inspect and promptly report to the ENGINEER any apparent discrepancies or defects in such work of others that render it unsuitable for such proper execution and results.
 - 6. Failure of the CONTRACTOR to so inspect and report shall constitute an acceptance of the work of others as fit and proper except as to defects which may develop in the work of others after execution of the work by the CONTRACTOR.
- D. Interference with work on utilities:
 - 1. The CONTRACTOR shall cooperate fully with all utility forces of the OWNER or forces of other public or private agencies engaged in the relocation, altering, repair, or otherwise rearranging of any facilities which interfere with the progress of the work.
 - 2. The CONTRACTOR shall schedule the work so as to minimize interference with said relocation, altering, repair, or other rearranging of facilities.
- E. Responsibility for Damage:
 - 1. The CONTRACTOR shall not be responsible for damage done by CONTRACTORs not under their jurisdiction.
 - 2. The CONTRACTOR will not be liable for any such loss or damage, unless it is through the negligence of the CONTRACTOR.

1.5 WORK BY OTHERS

- A. OWNER will perform the following work:
 - 1. Operation of all existing system valves and equipment, unless specified otherwise.
 - 2. PLC and SCADA programming by CITY.
- B. Other contracts as follows:
 - 1. Construction of the future Operations Building will be under a separate contract following completion of this project.

01110-4

1.6 SITE CONDITIONS

A. Site Investigation and Representation

1. The CONTRACTOR acknowledges that it has satisfied itself as to the nature and location of the work, the general and local conditions, particularly those bearing upon availability of transportation, disposal, handling and storage of materials, availability of labor, water, electric power, roads, and uncertainties of weather, tide stages, or similar physical conditions at the site, the conformation and conditions of the ground, the character of equipment and facilities needed preliminary to and during the prosecution of the work and all other matters which can in any way affect the work or the cost thereof under this Contract.
2. The CONTRACTOR further acknowledges that it has satisfied itself as to the character, quality, and quantity of surface and subsurface materials to be encountered from inspecting the site and from evaluating information derived from exploratory work that may have been done by the OWNER or included in these Contract Documents. Any failure by the CONTRACTOR to become acquainted with all the available information will not relieve the CONTRACTOR from responsibility for properly estimating the difficulty or cost of successfully performing the work or for properly installing the Work.
3. Field Verification:
 - a. Before undertaking each part of the work, the CONTRACTOR shall carefully study and compare the Contract Documents and check and verify pertinent figures shown thereon and all applicable field measurements.
 - b. As the work proceeds, the CONTRACTOR shall field verify the depth and location of all buried utilities, and existing systems, and location of hazardous waste and contaminants.
 - c. The CONTRACTOR shall promptly report in writing to the ENGINEER any conflict, error, or discrepancy which the CONTRACTOR may discover and shall obtain a written interpretation or clarification from the ENGINEER before proceeding with any work affected thereby.

B. Existing Utilities and Improvements

1. Location of Underground Utilities:
 - a. Known existing underground conduits, pipelines and other utilities have been shown on the contract drawings in their approximate locations (within 3 feet of actual location). However, the accuracy or completeness of utilities indicated on the drawings is not guaranteed.
 - b. It shall be the responsibility of the CONTRACTOR to determine the exact location of all utilities and their service connections.
 - c. All potholing or other procedures for verifying utility location shall be performed by the CONTRACTOR as necessary to prepare for excavation at least 4 working days in advance of scheduled excavation.
 - d. The CONTRACTOR shall immediately notify the ENGINEER as to any utility located by him which has been incorrectly shown or omitted from the drawings.
 - e. If the CONTRACTOR cannot locate an underground utility whose presence is indicated on the Drawings, the ENGINEER shall be notified in writing.
 - f. The CONTRACTOR shall ascertain the exact locations of underground utilities whose presence is indicated on the Drawings, the locations of their service laterals work and of service laterals or appurtenances of any other underground utilities which can be inferred from the presence of visible facilities such as buildings, meters and junction boxes prior to doing work that may damage such utilities or interfere with their service.
 - g. Utilities Not Shown on Drawings:

01110-5

- 1) Attention is directed to the possible existence of underground utilities not indicated on the Drawings and to the possibility that underground utilities may be in a location different from that indicated on the Drawings.
 - 2) If the ENGINEER determines that the underground utility for which such notice has been given has not been depicted on the Drawings with reasonable accuracy (within 3 feet of actual location), the additional cost incurred in locating the utility will be paid for as extra work as provided in the Agreement.
 - 3) If the CONTRACTOR discovers underground an utility not indicated on the Drawings, the CONTRACTOR shall immediately give the ENGINEER and the Utility Company written notification of the existence of such utility.
 - 4) Such utilities shall be located and protected from damages as directed by the ENGINEER and the cost of such work will be paid for as extra work as provided in the Agreement.
2. Utility Coordination:
- a. The CONTRACTOR shall notify Underground Service Alert (USA) at least 4 days prior to excavation, telephone (800) 642-2444.
 - b. The CONTRACTOR shall also contact all utility owners not registered with USA but known to have utilities in the project area to field locate underground utilities at least 4 days prior to excavation.
 - c. The CONTRACTOR shall notify all owners of utilities when the Work is in progress and shall make arrangements as are necessary to coordinate outages or make any emergency repairs.
 - d. Existing utilities that are shown or that are made known and located to the CONTRACTOR prior to excavation, and that are to be retained; and all utilities that are constructed during excavation operations shall be properly supported and protected from damage during the progress of the work.
3. Utility Protection and Damage:
- a. Existing utilities that are shown or that are made known and located to the CONTRACTOR prior to excavation, and that are to be retained, and all utilities that are constructed during excavation operations shall be properly supported and protected from damage during the progress of the work.
 - b. Should any damage to a utility occur during the progress of the work, the CONTRACTOR shall notify the OWNER or the utility at once and render all assistance possible to repair the damage and restore the service.
 - c. No extra compensation will be made for the repair of any services or utility damaged by the CONTRACTOR nor for any damage incurred through neglect or failure to provide adequate protection to existing utilities.
 - d. The provisions of this Section shall not be abated even in the event such damage occurs after backfilling or is not discovered until after completion of the backfilling.
 - e. Damage Report:
 - 1) If the CONTRACTOR damages any underground utilities not shown on the Drawings or not depicted on the Drawings with reasonable accuracy (within 3 feet of actual location) or any lateral service the location of which could not be inferred by the CONTRACTOR, a written report thereof shall be made immediately to the ENGINEER by CONTRACTOR.
 - 2) The CONTRACTOR's report shall also advise the ENGINEER of any schedule delays. Compensation for such delays will be determined in accordance with the Agreement. The CONTRACTOR shall be entitled to no other compensation for any such damage.
4. All utilities encountered along the line of the work shall remain continuously in service during all work under the Contract, unless otherwise shown on the drawings,

01110-6

or unless other arrangements satisfactory to the ENGINEER are made with the owner of said utilities.

C. CONTRACTOR's Responsibility for Utility Facilities and Service

1. Where the CONTRACTOR's operations could cause damage or inconvenience to railway, telephone, television, power, oil, gas, water, sewer, or irrigation systems, the CONTRACTOR shall make all arrangements necessary for the protection of these utilities and services.
2. The CONTRACTOR shall be solely and directly responsible to the owner and operators of such properties for any damage, injury, expense, loss, inconvenience, delay, suits, actions, or claims of any character brought because of any injuries or damage which may result from the construction operations under this Contract.
3. Neither the OWNER nor its officers or agents shall be responsible to the CONTRACTOR for damages because of the CONTRACTOR's failure to protect utilities encountered in the work.
4. In no event shall interruption of any utility service be allowed outside working hours unless granted by the owner of the utility.
5. No sand, mud, rocks or other construction debris shall be disposed of in the sanitary sewers or storm sewers.
6. Any discharge of construction water to the sewer or storm drain systems requires a City of Roseville discharge permit a minimum of 7 calendar days prior to planned discharge, as approved by ENGINEER.
7. Where bypassing of sewage is required to perform sewer repairs or service relocations and where temporary pumps are required to bypass any sewage across traffic lanes, the discharge lines crossing the traffic lanes shall be buried a minimum of 4 inches below the pavement surface and backfilled with temporary asphalt concrete surfacing. The CONTRACTOR shall take all necessary steps to assure continuous flow of sewage. Bypassing of untreated wastewater to surface waters or courses will not be permitted.
8. The CONTRACTOR shall replace, at its own expense, any and all existing utilities or structures removed or damaged during construction, to their existing condition unless otherwise provided for in these Contract Documents.
9. The CONTRACTOR shall repair or replace, at its own expense, all pavement damaged during the construction, to its existing condition unless otherwise provided for in these Contract Documents.

D. Names of Known Utilities Serving the Area

1. The following is a list of the known public utilities serving the area:
 - a. City of Roseville:
 - 1) Water – (916) 774-5750.
 - 2) Recycled Water – (916) 774-5750.
 - 3) Sewer – (916) 774-5750
 - 4) Electric – (916) 797-6937
 - b. Pacific Gas and Electric (PG&E):
 - 1) Gas – (800) 743-5000

E. Railroads

1. The CONTRACTOR shall not perform work or occupy any part of railroad property without a permit authorizing the same.

F. Interfering Structures

1. The CONTRACTOR shall take necessary precautions to prevent damage to existing structures whether on the surface, aboveground, or underground. An attempt has

01110-7

been made to show major structures on the Drawings. While the information has been compiled from the best available sources, its completeness and accuracy cannot be guaranteed, and it is presented as a guide to avoid possible difficulties.

2. The CONTRACTOR shall protect all existing structures, trees, shrubs, and other items on the project site that are to be preserved, by substantial barricades or other devices commensurate with the hazard, from injury or destruction by vehicles, equipment, workmen, or other agents.
3. Where existing fences, gates, buildings, or any other structure must be removed to properly carry out the work, or are damaged during the work, they shall be restored at the CONTRACTOR's expense to their original condition or better.
4. Without additional compensation, the CONTRACTOR may remove and replace in a condition as good as or better than original, any small structures such as fences, and signposts that interfere with the CONTRACTOR's operations.

G. Field Relocation

1. During the progress of construction, it is expected that minor relocations of the work will be necessary.
2. Such relocations shall be made only by direction of the ENGINEER.
3. If existing structures are encountered that will prevent construction as shown, notify the ENGINEER before continuing with the work in order that the ENGINEER may make such field revisions as necessary to avoid conflict with the existing structures.
4. If the CONTRACTOR shall fail to notify the ENGINEER when an existing structure is encountered, and shall proceed with the work despite this interference, CONTRACTOR shall do so at their own risk.
5. Any CONTRACTOR request(s) for additional compensation or contract time resulting from necessary field relocations will be considered as set forth in the Agreement.
6. If the CONTRACTOR fails to notify the ENGINEER when a structure which interferes with construction is encountered, and proceeds with the work despite this obstruction, the CONTRACTOR shall do so at their own risk and at no additional cost to the OWNER.

1.7 REFERENCE POINTS AND SURVEYS

- A. Location and elevation of bench marks are shown on Drawings.
- B. Dimensions for lines and elevations for grades of structures, appurtenances, and utilities are indicated on Drawings, together with other pertinent information required for laying out Work. If conditions vary from those indicated, notify OWNER immediately, who will make or approve minor adjustments, as required.
- C. OWNER may perform checks to verify accuracy of CONTRACTOR's layout Work and that completed Work complies with Contract Documents.
- D. Any existing survey points or other control markers destroyed without proper authorization will be replaced by owner of the survey points or control markers at CONTRACTOR's expense.
- E. CONTRACTOR's Responsibilities:
 1. Provide all survey and layout required.
 2. Locate and protect reference points prior to starting site preparation.
 3. Notify OWNER at least 3 working days in advance when grade and line surveying will be performed by CONTRACTOR

01110-8

4. Check and establish exact location of existing facilities prior to construction of new facilities and any connections thereto.
5. In event of discrepancy in data provided by OWNER, request clarification before proceeding with Work.
6. Provide cut sheets for all staking.
7. Preserve and leave undisturbed control staking until ENGINEER has completed checks it deems necessary.
8. Re-establish reference points resulting from destruction by CONTRACTOR's operations.
9. Cooperate with ENGINEER so that checking and measuring may be accomplished with least interference to CONTRACTOR's operations.

1.8 SEQUENCE AND PROGRESS OF WORK

- A. The CONTRACTOR shall submit a Construction Schedule covering the entire Work in accordance with Section 01320, Progress Schedule.
- B. The CONTRACTOR shall incorporate the requirements of Section 01130, Special Project Constraints, into the Construction Schedule.
- C. Alternate Sequence:
 1. The CONTRACTOR's schedule may use a different sequence from that shown or specified, if techniques and methods known to the CONTRACTOR will result in cost and time savings to the OWNER, still achieve the required objective and maintain the same or greater level of treatment.
 2. The ENGINEER's determination on the acceptability of any alternative sequence from that shown or specified shall be final.

1.9 CONTRACTOR'S USE OF PREMISES

- A. The CONTRACTOR shall coordinate use of the premises, for the CONTRACTOR's storage and the operations of the CONTRACTOR's workmen, with OWNER and utility service companies.
- B. Restriction of Work Area:
 1. The full use of the premises for storage, the operations of workmen and for all other construction activities will not be available to the CONTRACTOR.
 2. The CONTRACTOR must operate entirely within the space allowed to the CONTRACTOR.
 3. The Drawings defines the area allocated to the CONTRACTOR.
- C. The CONTRACTOR shall be solely responsible for obtaining and paying all costs in connection with any additional work area, storage sites, access to the site or temporary right-of-way, which may be required for proper completion of the Work.
- D. Limitations on Use of Work Area:
 1. It shall be understood that responsibility for protection and safe-keeping of equipment and materials on or near the site will be entirely that of the CONTRACTOR and that no claim shall be made against the OWNER or their authorized representatives by reason of any act.
 2. It shall be further understood that should any occasion arise necessitating access to the sites occupied by these stored materials or equipment, the ENGINEER shall direct

01110-9

the CONTRACTOR owning or responsible for the stored materials and equipment to immediately move the same.

3. No materials or equipment may be placed upon the property of the OWNER, other than in the designated areas as shown on the Drawings, unless the ENGINEER has agreed to the location contemplated by the CONTRACTOR to be used for storage.
 4. All stored materials shall be labeled according to the appropriate contractor or Subcontractor with the manufacturer's label as well.
 5. Appropriate material safety data sheets (e.g., MSDS) shall be provided.
- E. The CONTRACTOR shall be required to share use of the premises with other Contractors whose services the OWNER has obtained or will obtain for construction of other facilities on the site.

1.10 USE OF OWNER'S FACILITIES

- A. The CONTRACTOR may use existing facilities or equipment in the Work for construction purposes, only if the OWNER's written permission is obtained.
- B. Restore existing facilities and equipment used for temporary purposes to original condition in a manner satisfactory to OWNER.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

++ END OF SECTION ++

01110-10

SECTION 01130

SPECIAL PROJECT CONSTRAINTS

PART 1 - GENERAL

1.1 LIMIT OF CONSTRUCTION ACTIVITIES ON WORK SITE

A. Traffic Control:

1. During non-work hours, the CONTRACTOR shall keep all lanes of traffic open and clear. All trenches shall be backfilled or covered with suitable steel plates and open to traffic.
2. No equipment, construction material or excavated material that will interfere with traffic shall be stored on streets or roadways at any time.

1.2 SEQUENCE OF WORK

A. General:

1. The CONTRACTOR shall schedule and sequence their work to complete the Work by the specified completion date.
2. The OWNER's water distribution, recycled water, sewer collection and storm drain systems must remain operational at all times, with scheduled shutdowns as necessary to complete the Work and with prior approval of Owner, as described herein.
3. Re-vegetation of graded areas shall take place as quickly as possible as weather permits.

1.3 PROJECT CONSTRAINTS

A. Maintenance of OWNER's Operations:

1. Constraints listed herein involve limits on activities during construction. These limits relate to the critical nature of the existing water system.
2. Continuous operation of OWNER's facilities is of critical importance. Schedule and conduct activities to enable existing facilities to operate continuously, unless otherwise specified.
3. Work Plan:
 - a. The CONTRACTOR shall submit a detailed Work Plan and time schedule for all construction activities that will make it necessary to remove a tank, pipeline, electrical circuit, equipment, structure, road or other facilities from service, including the critical outages identified herein.
 - b. The Work Plan shall, at a minimum, identifying:
 - 1) the date and time when each activity will occur;
 - 2) what equipment will be present including standby equipment;
 - 3) what assistance will be required by OWNER's operating personnel;
 - 4) an emergency backup plan identifying what action will be taken if Work cannot be completed within the allotted time; and
 - 5) what individual will be in charge of the activity.
 - c. Submit Work Plan 10 working days prior to the scheduled activity.
4. Perform Work continuously during critical connections and changeovers, and as required to prevent interruption of OWNER's operations.
5. Shutdowns:

01130-1

- a. Coordinate proposed Work with OWNER and facility operations personnel before affecting unit shutdowns. The CONTRACTOR shall provide written confirmation of the shutdown date and time five (5) working days prior to the actual shutdown.
 - b. Under no circumstances shall the CONTRACTOR cease Work at the end of a normal working day or at the end of a working week if such actions may inadvertently cause a cessation of any facility operating process, in which case, remain onsite until necessary repairs are complete.
 - 6. Do not close lines, open valves or gates, shut down equipment, or take other action which would affect the operation of existing systems, except as specifically required by the Contract Documents and after approval of OWNER.
 - 7. Do not proceed with Work affecting a facility's operation without obtaining OWNER's advance approval of the need for and duration of such Work.
- B. Relocation of Existing Facilities:
- 1. During construction, it is expected that minor relocations of Work will be necessary.
 - 2. Provide complete relocation of existing structures and Underground Facilities, including piping, utilities, equipment, structures, electrical conduit wiring, electrical duct bank, and other necessary items.
 - 3. Use only new materials for relocated facility. Match materials of existing facility, unless otherwise shown or specified.
 - 4. Perform relocations to minimize downtime of existing facilities.
 - 5. Install new portions of existing facilities in their relocated position prior to removal of existing facilities, unless otherwise accepted by OWNER.
- C. Hours of Work and Overtime:
- 1. Normal working hours at the Construction Site for the project shall be 7A.M. to 5P.M., weekdays, no work during the weekend nor during City observed holidays.
 - a. Conduct Work outside normal working hours only after obtaining prior written consent and approval from the OWNER.
 - 1) Contractor shall request work-hour variations in writing, a minimum of ten (10) days prior to the start of the proposed work period.
 - 2) Contractor shall not rely on approval of work outside of normal working hours without prior consent of the OWNER. Approval shall be at the sole discretion of the OWNER.
 - b. Contractor will develop Project Schedule assuming work during normal working hours only.
 - 2. All overtime Work by the CONTRACTOR necessary to conform to the requirements of this Section and related Sections shall be performed by the CONTRACTOR, at no cost to the OWNER and shall be performed in accordance with the Agreement. The CONTRACTOR shall make no claims for extra compensation as a result thereof.

1.4 CONSTRUCTION SEQUENCING CONSTRAINTS

- A. No specific construction sequencing constraints other than those listed in this or other Specification section have been determined at the time of Final Design.
- B. Construction sequencing constraints will be developed by Design-Assist Team as necessary.

1.5 PROJECT STAFFING

- A. Project superintendent (Job Superintendent, serving as resident Superintendent and Contractor's authorized representative), employed by the Contractor, shall be on-site five

01130-2

days per week for 8 hours a day and in responsible charge of all work, quality control, subcontractors, permit compliance, and the site.

- B. Qualified Storm Water Pollution Prevention Plan (SWPPP) Practitioner (QSP) , employed by Contractor, must be on call to come to the site when a Rain Event Action Plan (REAP) needs to be prepared.

1.6 STORMWATER MANAGEMENT

- A. CONTRACTOR responsible for stormwater management for the duration of the project.

PART 2 - PRODUCTS (NOT USED)

2.1 PRODUCTS

- A. All material that contacts potable water shall be "lead free" to the extent defined in the California Assembly Bill 1953 Chapter 853 and NSF 61 approved.

PART 3 - EXECUTION (NOT USED)

+ + END OF SECTION + +

01130-3

THIS PAGE INTENTIONALLY LEFT BLANK

01130-4

SECTION 01140

WATER POLLUTION CONTROL

PART 1 - GENERAL

1.1 DESCRIPTION

A. Scope:

1. Provide all labor, materials and resources to fully comply with applicable local, State and Federal regulations and requirements for water pollution prevention and control.
2. The preliminary SWPPP has been prepared and posted to the City of Roseville's Public Purchase website. It is made available for the convenience of the CONTRACTOR. The CONTRACTOR shall develop, update, revise and finalize as needed to comply with all requirements.
3. CONTRACTOR to comply with the City's municipal separate storm sewer system (MS4) Stormwater Management Program.

1.2 SUBMITTALS

A. Stormwater Pollution Prevention Plan (SWPPP) Information:

1. Within 10 business days of the contract being signed, the CONTRACTOR shall provide the following information:
 - a. Provide project SWPPP to comply with Construction General Permit Requirements and all other requirements of the Contract Documents;
 - b. Provide the Prime CONTRACTOR's company name, address, contact person (with office phone and emergency/cell phone) for Sections 100.1 and 500.1;
 - c. Provide the Qualified SWPPP Practitioner's (QSP) name, company name, address, office phone and emergency/cell phone for Section 500.1. Provide a copy of their current QSP certification from California Stormwater Quality Association (CASQA) including the license expiration date. If a SMARTs certified QSD is being used then provide documentation from SMARTs;
 - d. Provide a Subcontractor List (with names, addresses, phone numbers, areas of responsibility, etc.);
 - e. Provide a Project Schedule.
2. Provide Storm Water Quality Construction Site Inspection Checklist to be used by CONTRACTOR during construction.

1.3 REGULATORY REQUIREMENTS

A. Laws and Regulations:

1. The CONTRACTOR is responsible for complying with the Clean Water Act Section 401, Stormwater Pollution Prevention Plan (SWPPP) for all anticipated construction activities.
2. The OWNER shall submit a Notice of Intent (NOI) to the State Water Resources Control Board to obtain coverage under the National Pollution Discharge Elimination System (NPDES) and pay all filing fees associated with the NOI.
3. The Contractor shall perform construction operations to comply, and ensure subcontractors comply, with applicable Federal, State, and local laws, orders, regulations and water quality standards concerning control and abatement of water pollution, and terms and conditions of applicable permits issued by permit issuing

01140-1

authority. If conflict occurs between Federal, State, and local laws, regulations, and requirements, the most stringent shall apply.

4. The CONTRACTOR shall know and fully comply with applicable provisions of the Permits and all modifications thereto, and Federal, State, and local regulations and requirements that govern the CONTRACTOR's operations and stormwater and non-stormwater discharges from both the project site and areas of disturbance outside the project limits during construction.

B. Permit

1. As part of the water pollution control work, a Storm Water Pollution Prevention Plan (SWPPP) is required for this contract. The SWPPP and amendments shall be considered to fulfill the provisions in this section, "Water Pollution Control," of the Standard Specifications for development and submittal of a Water Pollution Control Program.
2. Approval shall not constitute a finding that the SWPPP complies with applicable requirements of the Permit, the Manuals and applicable Federal, State and local laws, regulations, permits, and requirements, nor does approval supersede the requirements and provisions of these special provisions, the Permit, or any other federal, state, or local regulations or permit in the event of a conflict.
3. The SWPPP shall identify the Qualified SWPPP Practitioner (QSP) as required by the Permit.
4. A Preliminary SWPPP will be provided to the CONTRACTOR. The CONTRACTOR will be required to revise and finalize the SWPPP as needed to comply with Construction General Permit Requirements and all other pertinent laws, rules, and regulations. Only a Qualified SWPPP Developer (QSD) is allowed to revise or amend the SWPPP. All revisions and Amendments must be accepted by Legally Responsible Person (LRP). The CONTRACTOR shall provide all Permit Registration Documents (PRDs). PRDs consist of:
 - a. Notice of Intent (NOI)
 - b. Risk assessment
 - c. Site Map
 - d. Storm Water Pollution Prevention Plan (SWPPP)
 - e. Annual Fee
 - f. Signed Certification Statement
 - g. Notice of termination (NOT)
 - h. Changes of Termination
 - i. Annual Reporting
 - j. Other Compliance Documents
5. The OWNER will submit the PRDs electronically to the State Water Resources Control Board (State) website, entitled Stormwater Multi Application Reporting and Tracking System (SMARTS). For the purposes of the Permit, the City of Roseville is the owner of the Permit and is the Legally Responsible Person (LRP). The LRP will retain authority for assigning the Approved Signatories and Data Submitters in SMARTS. The CONTRACTOR's QSP and/or QSD will be designated as Data Submitters in SMARTS, including the responsibilities thereof, as required by the Permit. LRP will submit the appropriate fee to the State and obtain a certified NOI and Waste Discharge Identification Number (WDID) for the project
6. No ground disturbing work shall occur until the PRD and SWPPP have been uploaded to the State website. The ENGINEER will notify the CONTRACTOR in writing upon completion of the document upload which will allow ground disturbing work to begin. The SWPPP shall apply to the areas within or immediately outside of the right-of-way that are directly related to all construction activities including, but not limited to, material borrow or disposal areas, staging areas, storage yards, and access roads,

01140-2

- including those on-site areas developed by the CONTRACTOR with third parties for use during the project.
7. The CONTRACTOR shall develop a Water Pollution Control Schedule that describes the timing of grading or other work activities that could affect water pollution. The Water Pollution Control Schedule shall be updated by the CONTRACTOR to reflect changes in the CONTRACTOR's operations that would affect the necessary implementation of water pollution control practices.
 8. Water pollution control practices include the "Minimum Requirements" and other CONTRACTOR-selected water pollution control practices from the "SWPPP" and the "Project-Specific Minimum Requirements" identified in the Water Pollution Control Cost Break-Down of this section. Listing of these minimum requirements shall not relieve the Contractor of meeting all permit requirements.
 9. The requirements described herein are considered minimum requirements. Additional BMPs may be required to meet the requirements set forth in the SWPPP and the Permit. All BMPs shall be designed, installed, maintained, and otherwise managed pursuant to the provisions set forth in the most stringent and most recent of the following: the City of Roseville Stormwater Quality BMP Guidance Manual for Construction, West Placer Storm Water Quality Design Manual, California Department of Transportation (Caltrans) Stormwater Quality Handbook - Construction Site BMP Manual or the California Stormwater Quality Association (CASQA) - California Stormwater BMP Handbook for Construction. The CONTRACTOR shall prepare an amendment to the SWPPP as required by the Permit, such as when there is a change in construction activities or operations which may affect the discharge of pollutants to surface waters, ground waters, storm drain systems; when the CONTRACTOR's activities or operations violate a condition of the Permit; when there is a change in the schedule that affects the discharge of pollutants; when there is a change in the schedule that affects the Risk Level required by the Permit; or when directed by the ENGINEER. Amendments shall identify additional water pollution control practices or revised operations, including those areas or operations not identified in the initially approved SWPPP. Amendments to the SWPPP shall be prepared and submitted for review and approval within the time required by the Permit and approved by the ENGINEER, but in no case longer than the time specified for the initial submittal and review of the SWPPP. Approved amendments shall be submitted electronically to the ENGINEER within 24 hours of approval. At a minimum, the SWPPP shall be amended annually as required by the Permit, and an electronic copy submitted to the ENGINEER.
 10. The CONTRACTOR shall keep one copy of the approved SWPPP and approved amendments at the project site. The SWPPP shall be made available upon request by a representative of the Regional Water Quality Control Board, State Water Resources Control Board, United States Environmental Protection Agency, or the local storm water management agency. Requests by the public shall be directed to the ENGINEER.
 11. The CONTRACTOR shall notify the ENGINEER immediately upon request from the regulatory agencies to enter, inspect, sample, monitor, or otherwise access the project site or the CONTRACTOR's records pertaining to water pollution control work.
 12. Cost Break-down
 - a. The CONTRACTOR shall include a Water Pollution Control Cost Break-Down which itemizes the water pollution control work portion of the GMP. The CONTRACTOR shall use the Water Pollution Control Cost Break-Down provided in this section (See attached supplement) as the basis for the cost break-down submitted with the SWPPP information. The CONTRACTOR shall use the Water Pollution Control Cost Break-Down to identify items, quantities and non-adjustable values for water

01140-3

pollution control work, excluding water pollution control practices for which are separated in the Schedule of Values. The CONTRACTOR shall be responsible for the accuracy of the quantities and non-adjustable values used in the cost break-down submitted with the SWPPP. Partial payment for the item of water pollution control will not be made until the Water Pollution Control Cost Break-Down is approved by the ENGINEER.

- b. Line items indicated in the Water Pollution Control Cost Break-Down in this section with a specified Estimated Quantity shall be considered "Project-Specific Minimum Requirements." The CONTRACTOR shall incorporate Project-Specific Minimum Requirements with CONTRACTOR-designated quantities and values into the Water Pollution Control Cost Break-Down submitted with the SWPPP.
- c. Line items indicated in the Water Pollution Control Cost Break-Down in this section without a specified Estimated Quantity shall be considered by the CONTRACTOR for selection to meet the applicable requirements for water pollution control work required in the SWPPP. In the Water Pollution Control Cost Break-Down submitted with the SWPPP, the CONTRACTOR shall list only those water pollution control practices selected for the project, including quantities and non-adjustable values required to complete the work for those items.
- d. The sum of the amounts for the items of work listed in the Water Pollution Control Cost Break-Down shall be equal to the value for water pollution control include in the GMP. Overhead and profit shall be included in the individual items listed in the cost break-down.
- e. No adjustment in compensation will be made to the GMP for water pollution control due to differences between the quantities shown in the approved cost break-down and the quantities required to complete the work as shown on the approved SWPPP. No adjustment in compensation will be made for ordered changes to correct SWPPP work resulting from the CONTRACTOR's own operations or from the CONTRACTOR's negligence.
- f. The approved cost break-down will be used to determine partial payments during the progress of the work and as the basis for calculating the adjustment in compensation for the item of water pollution control due to increases or decreases of quantities ordered by the ENGINEER. When an ordered change increases or decreases the quantities of an approved cost break-down item, the adjustment in compensation will be determined in the same manner specified for increases and decreases in the quantity of a contract item of work in conformance with the Agreement. If an ordered change requires a new item which is not on the approved cost break-down, the adjustment in compensation will be determined in the same manner specified for Changes In the Work in the Agreement.

PART 2 - PRODUCTS

- A. Provide all materials in accordance with provisions set forth in the most stringent and most recent of the following: City of Roseville Stormwater Quality BMP Guidance Manual for Construction, West Placer Storm Water Quality Design Manual, California Department of Transportation (Caltrans) Stormwater Quality Handbook, Construction Site BMP Manual or of the California Stormwater Quality Association (CASQA), California Stormwater BMP Handbook for Construction.
- B. Only biodegradable wattles containing no plastic can remain on a site when applying for a Notice of Termination (NOT). Wattles containing plastic netting (including plastic specified as biodegradable) are not permitted on this project.

01140-4

PART 3 - EXECUTION

3.1 THIRD PARTY SWPPP OVERSIGHT AND PRACTITIONER SUBCONSULTANT

- A. CONTRACTOR shall retain a third-party firm to provide SWPPP oversight and QSP services including:
 - 1. Print out daily weather report
 - 2. Read and record rain gauge daily
 - 3. Prepare REAPs
 - 4. Perform all inspections (pre-and post-storm, quarterly, non-stormwater inspections)
 - 5. Write inspection reports to document inspections
 - 6. Prepare annual report for OWNER to certify
 - 7. Perform and document all sampling (stormwater, non-stormwater, and discharge)
 - a. Sampling must occur every business day that runoff or discharges are leaving the site
 - 8. Provide staff trainings as needed and keep records of trainings
 - 9. Organize all paperwork for project closeout
 - 10. Maintain the pH meter and turbidimeter, perform calibration of equipment and provide calibration records.
- B. All weather reports, rain gauge log, inspection reports, sampling records, REAPs, and training records shall be maintained daily in the SWPPP binder at the project site.
- C. SWPPP subconsultant shall be a QSP and responsible for development and maintenance of SWPPP throughout construction and post-construction until acceptance of NOT by Board.
- D. The SWPPP subconsultant shall be registered on SMARTS and linked to the project as Data Submitters.
- E. CONTRACTOR shall be responsible for all means and methods related to implementation of SWPPP throughout construction and post-construction until acceptance of NOT by Board.
- F. SWPPP subconsultant shall attend all weekly construction progress meetings in person.
- G. SWPPP subconsultant shall prepare and submit on a monthly basis a certification that the site is in compliance with all SWPPP requirements and all documentation related to the site has been prepared and submitted in accordance with the General Permit Requirements. Certification shall be made by signing the certification form and submitting it to the CONTRACTOR, with a copy sent to the OWNER.
- H. SWPPP subconsultant shall be responsible for the following:
 - 1. Prepare ad hoc reports and exceedance reports as needed;
 - 2. Submit such reports to SMARTS, as needed; and,
 - 3. Prepare and upload on SMARTS change of information applications, annual reports and Notice of Termination, as needed.
- I. Signed certification shall be submitted with all Monthly Pay Requests by CONTRACTOR. Failure to submit Certification signed by SWPPP subconsultant shall result in rejection of monthly pay request.

01140-5

3.2 IMPLEMENTATION

- A. If there is a discrepancy between the project Permit and these special provisions, the Permit language shall supersede. If there is a discrepancy between the SWPPP and these special provisions, the special provisions shall supersede. Unless otherwise specified, upon approval of the SWPPP, the CONTRACTOR shall be responsible throughout the duration of the project for installing, constructing, inspecting, maintaining, replacing, removing, and disposing of temporary water pollution control practices, and installing, constructing, inspecting, maintaining, and replacing permanent water pollution control practices specified in the SWPPP and in the amendments. The duration of work includes that time period between initial mobilization to the site and acceptance of the work. Unless otherwise directed by the ENGINEER, the CONTRACTOR's responsibility for SWPPP implementation shall continue throughout temporary suspensions of work. Requirements for installation, construction, inspection, maintenance, replacement, removal, and disposal of water pollution control practices shall conform to the requirements in these special provisions and to project permits.
- B. Installing, inspecting and maintaining water-pollution control practices on areas outside the designated work area not specifically arranged and provided for by the City for the execution of this contract, will not be paid for.
- C. If the CONTRACTOR or the ENGINEER identifies a deficiency in the implementation of the approved SWPPP or amendments, the deficiency shall be corrected immediately unless requested by the CONTRACTOR and approved by the ENGINEER in writing but shall be corrected prior to the onset of precipitation. If the CONTRACTOR fails to correct the identified deficiency by the date agreed or prior to the onset of precipitation, the project shall be in nonconformance with this section, "Water Pollution Control."
- D. If the CONTRACTOR fails to conform to the provisions of this section, the ENGINEER may order the suspension of construction operations and/or may hire a third party to correct the deficiency. Additional project costs will be deducted from the CONTRACTOR's retention until the CONTRACTOR complies with the requirements.

3.3 YEAR-ROUND IMPLEMENTATION REQUIREMENTS

- A. The CONTRACTOR shall have a year-round program for implementing, inspecting and maintaining water pollution control practices for wind erosion control, tracking control, non-storm water management, and waste management and materials pollution control.
- B. The National Weather Service weather forecast shall be monitored and used by the CONTRACTOR on a daily basis. If 50 percent or greater precipitation is predicted, the necessary water pollution control practices shall be deployed prior to the onset of the precipitation. If there is less than a 50 percent chance of precipitation, the CONTRACTOR shall still be responsible for ensuring the project site does not result in a discharge of pollutants off-site. Regardless of the chances of precipitation, the CONTRACTOR shall allow adequate time to properly install all required BMPs prior to precipitation.
- C. Disturbed soil areas shall be considered active whenever the soil disturbing activities have occurred, continue to occur or will occur during the ensuing 14 days. Non-active areas shall be stabilized with water pollution control practice within 14 days of cessation of soil disturbing activities or prior to the onset of precipitation, whichever occurs first.

01140-6

3.4 MAINTENANCE

- A. To ensure the proper implementation and functioning of water pollution control practices, the CONTRACTOR shall regularly inspect and maintain the construction site for the water pollution control practices identified in the SWPPP. The construction site shall be inspected by the CONTRACTOR as follows:
 - 1. Prior to a forecast storm.
 - 2. After a precipitation event which causes site runoff.
 - 3. At 24 hour intervals during extended precipitation events.
 - 4. Routinely, a minimum of once every week
- B. The CONTRACTOR shall use a Storm Water Quality Construction Site Inspection Checklist approved by the ENGINEER. One copy of each site inspection record shall be submitted to the ENGINEER within 24 hours of completing the inspection.

3.5 CONTRACTOR VIOLATIONS:

- A. If noncompliance occurs, immediately (verbally) report noncompliance to the ENGINEER. Submit specific information within 2 days.
- B. Consistent violations of applicable Federal, State, or local laws, orders, regulations, or Water Quality Standards may result in the ENGINEER stopping all site activity until compliance is ensured.
- C. The CONTRACTOR shall not be entitled to extension of time, claim for damage, or additional compensation by reason of such a work stoppage.
- D. Corrective measures required bringing activities into compliance, or fines imposed by a regulating authority, shall be at the CONTRACTOR's expense.

3.6 REPORTING REQUIREMENTS

- A. Report of Discharges, Notices or Orders
 - 1. If the CONTRACTOR identifies discharges from the project site, regardless of source, in a manner causing, or potentially causing, a condition of pollution in surface waters or drainage systems, the CONTRACTOR shall immediately inform the ENGINEER. In addition, the CONTRACTOR shall submit a written Notice of Discharge report to the ENGINEER within 24 hours of the discharge event. The report shall include the following information:
 - a. The date, time, location, nature of the operation, and type of discharge, including the cause or nature of the notice or order.
 - b. The water pollution control practices deployed before the discharge event.
 - c. The date of deployment and type of water pollution control practices deployed after the discharge event, including additional measures installed or planned to remediate and clean-up the discharge, and/or reduce or prevent reoccurrence.
 - d. An implementation and maintenance schedule for affected water pollution control practices.
- B. Report of First-Time Non-Storm Water Discharge
 - 1. The CONTRACTOR shall notify the ENGINEER at least 3 days in advance of first-time non-storm water discharge events, excluding exempted discharges. The CONTRACTOR shall notify the ENGINEER of the operations causing non-storm water discharges and shall obtain field approval for first-time non-storm water discharges.

01140-7

Non-storm water discharges shall be monitored at first-time occurrences and routinely thereafter.

2. If the CONTRACTOR receives a written Notice, Order, or other non-compliance action letter from a regulatory agency as a result of storm water or other discharges from the project site, the CONTRACTOR shall immediately notify the ENGINEER. The CONTRACTOR shall be solely responsible for responding to and complying with the Notice, Order, or action letter, unless otherwise directed by the ENGINEER.
3. Unless otherwise directed in this Section, and in addition to the requirements of the Permit, the CONTRACTOR shall submit for approval, all required inspection reports, monitoring reports, action plans, notices, amendments, and other documentation required to satisfy requirements of the Permit, to the ENGINEER within 3 days of their completion. The ENGINEER will have 3 days to approve the documents as complete and sufficient to satisfy the Permit or other agency requirements. If the documents are not complete and sufficient, the ENGINEER will return them to the CONTRACTOR for resubmittal. The CONTRACTOR shall be responsible for submitting complete, accurate, and detailed reporting documents sufficient to satisfy all conditions of the Permit and regulatory agency requirements.

C. Annual Report

1. The CONTRACTOR shall maintain all records for use in the annual report.
2. The CONTRACTOR should prepare the annual report using the SMARTS system by no later July 30. The OWNER will certify and submit the report.

3.7 CONSTRUCTION SITE MANAGEMENT

A. CONTRACTOR Construction Operations:

1. Perform construction activities by methods that will prevent entrance, or accidental spillage, of solid matter, contaminants, debris, or other pollutants or wastes into streams, flowing or dry watercourses, wetlands, or underground water sources.
2. Pollutants and wastes include, but are not restricted to: refuse, garbage, cement, sanitary waste, industrial waste, hazardous materials, radioactive substances, oil and other petroleum products, aggregate processing tailings, mineral salts, and thermal pollution.
3. Discharge of cement fines, drilling fluids, contaminated water, and other construction byproducts will not be allowed on site.
4. Discharge from dewatering and unwatering operations shall be contained in an onsite tank or containment/infiltration basin. Discharge to infiltration basins shall be limited to water and groundwater only.

B. Stockpiled or Deposited Materials:

1. Do not stockpile or deposit excavated materials or other construction materials, near or on, stream banks or other watercourse perimeters where they can be washed away by high water or storm runoff, or can in any way encroach upon the watercourse.

C. Oil Storage Tanks Management:

1. Place oil or other petroleum product (hereinafter referred to collectively as oil) storage tanks at least 150 feet from the edge of any water body.
2. Do not use underground storage tanks.
3. Construct storage area dikes at least 12 inches high or graded and sloped to permit safe containment of leaks and spills equal to the capacity located in each area plus a sufficient amount of freeboard to contain the 25-year rainstorm.
4. Line diked areas with an impermeable barrier at least 50 mils thick.

01140-8

D. Refueling Operations:

1. Provide areas used for refueling operations with an impermeable liner at least 10 mils thick buried under 2 to 4 inches of soil.

3.8 PAYMENT

A. General

1. No additional payment will be made to correct deficiencies in the SWPPP or Amendments.
2. The contract GMP shall include full compensation for furnishing all labor, materials, tools, equipment, and incidentals, and for doing all the work involved in installing, constructing, removing, and disposing of water pollution control practices, including non-storm water management, and waste management and materials for water pollution control practices as provided for in the approved SWPPP, except those for which there is a contract item of work as specified in the Standard Specifications and these special provisions, and as directed by the ENGINEER.
3. Full compensation for Permit reporting and compliance, including all monitoring, preparation of inspection reports, and stormwater sampling and analysis, and maintenance costs of Water Pollution Control Practices, Amendments, and Implementation of Amendments as specified in this section, "Water Pollution Control," shall be considered as included in the contract lump sum price paid for water pollution control and no additional compensation will be allowed therefore.
4. No additional payment will be made for Water Pollution Control Practices necessary to correct deficiencies in the approved SWPPP or Amendments.
5. Water pollution control practices, for which there is a contract item of work, will be measured and paid for as that contract item of work.

B. Retention of Funds:

1. Notwithstanding any other remedies authorized by law, the CITY may retain money due the CONTRACTOR under the contract, in an amount determined by the CITY, up to and including the entire amount of Penalties proposed, assessed, or levied as a result of the CONTRACTOR's violation of the Permit, or Federal or State law, regulations or requirements. Funds may be retained by the CITY until final disposition has been made as to the Penalties. The CONTRACTOR shall remain liable for the full amount of Penalties until such time as they are finally resolved with the entity seeking the Penalties.
2. Retention of funds for failure to conform to the provisions in this section, "Water Pollution Control," shall be in addition to the other retention amounts required by the contract. The amounts retained for the CONTRACTOR's failure to conform to provisions in this section will be released for payment on the next monthly estimate for partial payment following the date when an approved SWPPP has been implemented and maintained, and when water pollution has been adequately controlled, as determined by the ENGINEER.
3. When a regulatory agency identifies a failure to comply with the Permit and modifications thereto, or other Federal, State or local requirements, the CITY will retain money due the CONTRACTOR, in the amount of 10 percent of the work done to date or any fine whichever is greater, this amount is in addition to the retention specified in Section 9-3.2, Partial and Final Payment, subject to the following. The CITY will give the CONTRACTOR written notice of the CITY's intent to retain funds from partial payments which may become due to the CONTRACTOR prior to recording of the Notice of Completion.

01140-9

4. During the first estimate period that the CONTRACTOR fails to conform to the provisions in this section, "Water Pollution Control," the CITY may retain an amount equal to 25 percent of the estimated value of the contract work performed.
5. The CONTRACTOR shall notify the ENGINEER immediately upon request from the regulatory agencies to enter, inspect, sample, monitor, or otherwise access the project site or the CONTRACTOR's records pertaining to water pollution control work. The CONTRACTOR shall provide copies of correspondence, notices of violation, enforcement actions or proposed fines by regulatory agencies to the requesting regulatory agency.

3.9 REMOVAL

- A. Remove temporary works in accordance with Section 01810, Cleaning.

3.10 SUPPLEMENTS

- A. Water Pollution Control Cost Break-Down
- B. Certification Form

SECTION 01145

ENVIRONMENTAL PROTECTION

PART 1 - GENERAL

1.1 SECTION INCLUDES

- A. Requirements for Environmental Protection. During the progress of the work, keep Contractor occupied work areas in a neat and clean condition and protect the environment both onsite and offsite, throughout and upon completion of the construction project.

1.2 SUBMITTALS

- A. Develop a detailed Environmental Protection Plan and submit to the Engineer for review and approval prior to the beginning of construction. Distribute the favorably reviewed plan to all employees and to all subcontractors and their employees. The Environmental Protection Plan shall include, but not be limited to, the following items:
 - 1. Copies of required permits.
 - 2. Proposed disposal sites.
 - 3. Copies of any agreements with public or private landowners regarding equipment, materials storage, borrow sites, fill sites, or disposal sites. Any such agreement made by the Contractor shall be invalid if its execution causes violation of local or regional grading or land use regulations.

1.3 MITIGATION OF CONSTRUCTION IMPACTS

- A. All operations shall comply with federal, state and local regulations pertaining to water, air, solid waste and noise pollution.
- B. Definitions of Contaminants:
 - 1. Sediment: Soil and other debris that have been eroded and transported by runoff water.
 - 2. Solid Waste: Rubbish, debris, garbage and other discarded solid materials resulting from construction activities, including a variety of combustible and non-combustible wastes, such as ashes, waste materials that result from construction or maintenance and repair work, leaves and tree trimmings.
 - 3. Chemical Waste: Includes petroleum products, bituminous materials, salts, acids, alkalis, herbicides, pesticides, disinfectants, organic chemicals and inorganic wastes. Some of the above may be classified as "hazardous."
 - 4. Sanitary Wastes:
 - a. Sewage: That which is considered as domestic sanitary sewage.
 - b. Garbage: Refuse and scraps resulting from preparation, cooking, dispensing and consumption of food.
 - 5. Hazardous Materials: As defined by applicable laws and regulations. Undisclosed hazardous material contamination, if encountered will constitute a changed site condition. In the event that occurs, Contractor shall coordinate with Owner consistent with final EIR Mitigation Measure 4.9-1 as described in Section 1.3.D of this Specification.
- C. Protection of Natural Resources:

01145-1

1. General: It is intended that the natural resources within the project boundaries and outside the limits of grading performed under this Contract be preserved in their existing condition or be restored to an equivalent or improved condition upon completion of the work. Confine construction activities to areas defined by the public roads, easements, and work area limits shown on the Drawings. Return construction areas to their preconstruction elevations except where surface elevations are otherwise noted to be changed. Maintain natural drainage patterns except where surface drainage is otherwise noted to be changed. Conduct construction activities to avoid ponding stagnant water conducive to mosquito breeding.
2. Land Resources:
 - a. Do not remove, cut, deface, injure or destroy trees or shrubs outside the work area limits. Do not remove, deface, injure or destroy trees within the work area without permission from the Engineer.
 - b. Temporary Construction:
 - 1) Obliterate all signs of temporary construction facilities such as haul roads, work areas, structures, foundations of temporary structures, stockpiles of excess or waste materials, or any other vestiges of construction as directed by the Engineer.
 - 2) Level all temporary roads, parking areas and any other areas that have become compacted or shaped.
 - 3) Any unpaved areas where vehicles are operated shall receive a suitable surface treatment or shall be periodically wetted down to prevent construction operations from producing dust damage and nuisance to persons and property, at no additional cost to the Owner.
 - 4) Keep haul roads clear of any object which creates an unsafe condition.
 - 5) Promptly remove any contaminants or construction material dropped from construction vehicles.
 - 6) Do not drop mud and debris from construction equipment on public streets.
 - 7) Sweep clean turning areas and pavement entrances as necessary.
 - 8) Ensure no tracking occurs on City streets.
3. Water Resources:
 - a. Investigate and comply with all applicable federal, state and local regulations concerning the discharge (directly or indirectly) of pollutants to the City storm drain system and waters of the United States. Perform all work under this Contract in such a manner that any adverse environmental impacts are reduced to a level that is acceptable to the Engineer and regulatory agencies.
 - b. Oily Substances:
 - 1) Special measures shall be taken to prevent oily or other hazardous substances from entering the ground, drainage areas or local bodies of water in such quantities as to affect normal use, aesthetics or produce a measurable impact upon the area.
 - 2) Any soil or water which is contaminated with oily substances due to the Contractor's operations shall be disposed of in accordance with applicable regulations consistent with final EIR Mitigation Measure 4.9-1 as described in Section 1.3.D of this Specification.
 - c. Chlorinated Water:
 - 1) Take special measures to prevent chlorinated water from entering the ground or surface waters.
 - 2) De-chlorinate chlorinated water prior to discharge.
4. Cultural Resources:
 - a. The project does not pass through any known archaeological sites. However, it is conceivable that unrecorded archaeological sites could be discovered during the construction.

01145-2

- b. In the event that artifacts, human remains, or other cultural resources are discovered during excavations at locations of the Work, the Contractor shall protect the discovered items, notify the Engineer, and comply with applicable law consistent with final EIR Mitigation Measure 4.8-1 as described in Section 1.3.D of this Specification.
- 5. Dust Control, Air Pollution and Odor Control:
 - a. Employ measures to prevent the creation of dust, air pollution and odors consistent with final EIR Mitigation Measure 4.4-1 and 4.4-3 as described in Section 1.3.D of this Specification.
 - b. Comply with Placer County Air Pollution Control District's (PCAPCD) rules and regulations.
 - c. Unpaved areas where vehicles are operated shall be periodically wetted down or given an equivalent form of treatment, to eliminate dust formation.
 - d. Store all volatile liquids, including fuels or solvents in closed containers and provide secondary containment as needed.
 - e. No open burning of debris, lumber or other scrap will be permitted.
 - f. Properly maintain equipment to reduce gaseous pollutant emissions.
- 6. Construction Storage Areas:
 - a. It is the responsibility of the Contractor to secure a storage area for Contractor use. Storage of construction equipment and materials shall be limited to the designated Contractor's storage area.
 - b. Oil wastes (from equipment, etc.) shall not be allowed to flow onto the ground or into surface waters.
 - c. Containers shall be required at the construction site for the disposal of materials such as paint, paint thinner, solvents, motor oil, fuels, concrete wash water, resins and other environmentally deleterious substances.
 - d. No dumping of surplus concrete or grout on the site will be permitted.
- 7. Sanitation:
 - a. During the construction period, provide adequate and conveniently located chemical sanitation facilities, properly screened, for use of construction crews.
 - b. Facilities shall be placed behind sidewalks and at least fifty (50) feet from any drainage ditch, drain inlet, or water way.
 - c. Facilities shall be regularly maintained.
- 8. Fire Prevention:
 - a. Take steps to prevent fires including, but not limited to:
 - 1) Provide spark arrestors on all internal combustion engines.
 - 2) Store and handle flammable liquids in accordance with the Flammable and Combustible Liquids Code, NFPA 30.
 - 3) Provide fire extinguishers at hazardous locations or operations, such as welding.
- 9. Erosion and Sediment Transport Control:
 - a. Keep disturbed areas to the minimum necessary for construction.
 - b. Keep runoff away from disturbed areas during construction.
 - c. rap sediment before it leaves the site, using such techniques as check dams, sediment ponds, or siltation fences.
 - d. Confine earthwork operations to dry periods, whenever possible. If earthwork needs to be scheduled for a wet period, ensure that erosion and sediment transport control measures are ready for implementation prior to the onset of the storm.
 - e. Stabilize disturbed areas as quickly as possible.
 - f. Note that waterways under the jurisdiction of governmental agencies other than the City of Roseville may be subject to additional erosion and sediment control

measures or criteria and it is the responsibility of the Contractor to obtain and adhere to these additional requirements.

D. Environment Impact Report (EIR) Mitigation Measures

1. The following West Roseville Specific Plan (WRSP) EIR Mitigation Measures shall be implemented:
 - a. 4.4-1 Dust Control
 - 1) After review and approval by the PCAPCD, the developer, if required, shall apply approved chemical soil stabilizers according to manufacturer's specifications, to all inactive construction areas (previously graded areas which remain inactive for 96 hours).
 - 2) Reduce traffic speeds on all unpaved surfaces to 15 miles per hour or less.
 - 3) Create a dust control plan.
 - 4) No open burning of vegetation during project construction.
 - 5) Reestablish ground cover as soon as possible after construction.
 - 6) Suspend grading activities when winds exceed 25 mph.
 - b. 4.4-3 Reduction of Construction Emissions
 - 1) The prime contractor shall submit to the PCAPCD a comprehensive inventory (i.e., make, model, year, emission rating) of all the heavy-duty off-road equipment (50 horsepower or greater) that will be used an aggregate of 40 or more hours for the construction project. District personnel, with assistance from the California Air Resources Board, will conduct initial Visible Emission Evaluations of all heavy-duty equipment on the inventory list.
 - 2) An enforcement plan shall be established by the contractor in conjunction with the air district to weekly evaluate project-related on-and-off- road heavy-duty vehicle engine emission opacities, using standards as defined in California Code of Regulations, Title 13, Sections 2180–2194. An Environmental Coordinator, CARB-certified to perform Visible Emissions Evaluations (VEE), shall routinely evaluate project related off-road and heavy-duty on-road equipment emissions for compliance with this requirement. Operators of vehicles and equipment found to exceed opacity limits will be notified and the equipment must be repaired within 72 hours.
 - 3) Contractors shall provide a plan for approval by the PCAPCD demonstrating that the heavy-duty (>50 horsepower) off-road vehicles to be used in the construction project, including owned, leased and subcontractor vehicles, will achieve a project-wide fleet average 30 percent NO_x reduction and 45 percent particulate reduction compared to the most recent CARB fleet average. Acceptable options for reducing emissions may include use of late model engines, low-emission diesel products, alternative fuels, engine retrofit technology, after-treatment products, and/or other options as they become available.
 - 4) Minimize idling time to 10 minutes.
 - 5) Use low sulfur fuel for stationary construction equipment, if feasible.
 - 6) Utilize existing power sources (e.g., power poles) or clean fuel generators rather than temporary power generators.
 - 7) Use low emission on-site stationary equipment.
 - c. 4.7-6 Avoid Nesting Sites
 - 1) To ensure that fully protected bird and raptor species are not injured or disturbed by construction in the vicinity of nesting habitat, implement the following measures:
 - a) When feasible, all tree removal shall occur between August 30 and February 15 to avoid the breeding season of any raptor species that could be using the area, and to discourage hawks from nesting in the vicinity of

- an upcoming construction area. This period may be modified with the authorization of the California Department of Fish and Wildlife (CDFW); or
- b) Prior to the beginning of mass grading, including grading for major infrastructure improvements, during the period between February 15 and August 30, all trees and potential burrowing owl habitat within 350 feet of any grading or earthmoving activity shall be surveyed by the City for active raptor nests or burrows by a qualified biologist no more than 30 days prior to disturbance. Biologist will be hired by the City. If active raptor nests or burrows are found, and the site is within 350 feet of potential construction activity, a fence shall be erected around the tree or burrow(s) at a distance of up to 350 feet, depending on the species, from the edge of the canopy to prevent construction disturbance and intrusions on the nest area. The appropriate buffer shall be determined by the City in consultation with CDFW.
 - c) No construction vehicles shall be permitted within restricted areas (i.e., raptor protection zones), unless directly related to the management or protection of the legally protected species.
 - d) In the event that a nest is abandoned, despite efforts to minimize disturbance, and if the nestlings are still alive, the City shall contact CDFW and, subject to CDFW approval, fund the recovery and hacking (controlled release of captive reared young) of the nestling(s).
 - e) If a legally protected species nest is located in a tree designated for removal, the removal shall be deferred until after August 30th, or until the adults and young of the year are no longer dependent on the nest site as determined by a qualified biologist.
 - f) The City will conduct a pre-construction survey within the phases of the project site that are scheduled for construction activities. The survey shall be conducted by a qualified biologist to determine if burrowing owls are occupying the project site. The survey shall be conducted no more than three weeks prior to grading of the project site. If the above survey does not identify burrowing owls on the project site, then no further mitigation would be required. However, should burrowing owls be found on the project site, the following measures shall be required:
 - g) Avoid all potential burrowing owl burrows that may be disturbed by project construction during the breeding season between February 15 and August 30 (the period when nest burrows are typically occupied by adults with eggs or young). Avoidance shall include the establishment of a 350-foot diameter non-disturbance buffer zone around any occupied burrows. The buffer zone shall be delineated by highly visible temporary construction fencing. Disturbance of any occupied burrows shall only occur outside of the breeding season (August 30 through February 15). Based on approval by the CDFW, preconstruction and nonbreeding season exclusion measures may be implemented to preclude burrowing owl occupation of the project site prior to project related disturbance (such as grading). Burrowing owls may be passively excluded from burrows in the construction area by placing one-way doors in the burrows according to current CDFW protocol. The one-way doors must be in place for a minimum of three days. All burrows that may be occupied by burrowing owls, regardless of whether they exhibit signs of occupation, must be cleared. Burrows that have been cleared through the use of the one-way doors shall then be closed or backfilled to prevent owls from entering the burrow. The one-way doors shall not be used more than two weeks before

01145-5

construction to ensure that owls do not recolonize the area of construction.

- d. 4.8-1 Cease Work and Consult with Qualified Archaeologist
 - 1) Should any cultural resources, such as structural features, any amount of bone or shell, artifacts, human remains, or architectural remains be encountered during any subsurface development activities, work shall be suspended within 100 feet of the find, and the City of Roseville shall be immediately notified. At that time, the City shall coordinate any necessary investigation of the site with qualified archaeologists as needed to assess the resource and provide proper management recommendations.
- e. 4.8-9 Provide Proper Management Recommendations
 - 1) Possible management recommendations for important resources could include resource avoidance or data recovery excavations. The Contractor shall implement any measures deemed necessary for the protection of the cultural resources.
 - 2) In addition, pursuant to section 5097.98 of the State Public Resources Code, and section 7050.5 of the State Health and Safety Code, in the event of the discovery of human remains, the County Coroner shall be immediately notified. If the remains are determined to be Native American, guidelines of the Native American Heritage Commission shall be adhered to in the treatment and disposition of the remains.
- f. 4.8.10 Cease Work Until Review Conducted by Qualified Paleontologist and Recommendations Implemented.
 - 1) Should any evidence of paleontological resources (e.g., fossils) be encountered during grading or excavation, work shall be suspended within 100 feet of the find, and the City of Roseville shall be immediately notified. At that time, the City shall coordinate any necessary investigation of the site with a qualified paleontologist to assess the resource and provide proper management recommendations.
 - 2) Possible management recommendations for important resources could include resource avoidance or data recovery excavations. The contractor shall implement any measures deemed necessary by the paleontologist for the protection of the paleontological resources.
- g. 4.9-1 Identify and Remediate Soil Contamination
 - 1) If evidence of soil contamination is encountered in previously unidentified locations in the WRSP Area, work shall cease until the area can be tested, and, if necessary, remediated.
 - 2) Remediation activities could include removal of contaminated soil and/or on-site treatment.
 - 3) As part of this process, the City shall ensure that any necessary investigation and/or remediation activities conducted in the WRSP Area are coordinated with the Roseville Fire Department, Placer County Division of Environmental Health, and, if needed, other appropriate state and/or local agencies.
 - 4) Once a site is remediated, construction may continue. The City shall also continue to update its records concerning contamination or hazards that could be present at facilities or sites adjacent to WRSP Area and take necessary action to ensure that the health and safety of the public is protected.

1.4 RESPONSIBLE PARTY

- A. The Contractor shall comply with all environmental pollution control rules, regulations, ordinances and statutes which apply to any work performed pursuant to the Contract (Refer to General Conditions Section 5 and Section D. Environmental Impact Report

01145-6

Mitigation Measures for additional requirements). In the event of any violations, Contractor shall be fully responsible for all fines, citations, penalties and all other judgements that shall be imposed.

PART 2 - PRODUCTS

2.1 INLET FILTERS

- A. Drain inlet filters may be employed.
- B. Horizontal mesh filters attached to the top of or below the drain inlet grate shall not be allowed.
- C. Only high flow volume, bag type filters or others as approved by the City of Roseville, Construction Inspector shall be used.

2.2 EROSION CONTROL BLANKETS

- A. Straw or curled wood fiber blanket between jute netting
- B. Biodegradable, containing no plastic
- C. Contains no weed seeds

2.3 STRAW WATTLES

- A. 100% biodegradable, containing no plastic
- B. Wrapped in medium weight natural burlap

2.4 HYDROMULCH

- A. Mixture of shredded wood fiber, water and tackifier.
 - 1. Wood fiber
 - a. Thermally processed and free of weed or plant seeds.
 - b. Colored with green dye tracer so applied mulch is easily visible
 - c. Produce a uniform slurry when mixed with water and not be toxic to plants or wildlife.
 - d. Apply at 2000 pounds per acre.
 - 2. Tackifier
 - a. Water soluble and, upon drying, will form a stable, nonflammable plastic film with a one-year effective life.
 - b. Non-toxic to plants and wildlife.
 - c. Apply at 150 pounds per acre.

PART 3 - EXECUTION

3.1 DISPOSAL OPERATIONS

- A. Solid Waste Management:
 - 1. Supply solid waste transfer containers. Daily remove all debris such as spent air filters, oil cartridges, cans, bottles, combustibles and litter. Take care to prevent trash and papers from blowing onto adjacent property. Encourage personnel to use refuse containers. Convey contents to a sanitary landfill.

01145-7

2. Washing of concrete containers without Contractor having a washout facility or system in place will not be permitted. Concrete on bare soil is prohibited. Remove any excess concrete to the sanitary landfill.
- B. Chemical Waste and Hazardous Materials Management:
1. Furnish containers for storage of spent chemicals used during construction operations. Provide secondary containment. Dispose of chemicals and hazardous materials in accordance with applicable regulations.
- C. Garbage:
1. Store garbage in covered containers, pick up daily and dispose of in a sanitary landfill.
- D. Dispose of vegetation, weeds, rubble, and other materials removed by the clearing, stripping and grubbing operations off site at a suitable disposal site in accordance with applicable regulations.
- E. Excavated Materials:
1. Native soil complying with the requirements of Section 02300, Earthwork, may be used for backfill, fill and embankments as allowed by that section.
 2. Spoil Material:
 - a. Remove all material which are excavated in excess of that required for backfill, and such excavated material which is unsuitable for backfill, from the site and dispose of offsite in accordance with applicable regulations.
 - b. No additional compensation will be paid to the Contractor for such disposal. Include all such costs in the lump sum prices bid for the project.
 - c. Remove rubbish and materials unsuitable for backfill immediately following excavation. Remove material in excess of that required for backfill immediately following backfill operations.
 - d. Rubbish shall consist of all materials not classified as suitable materials or rubble and shall include shrubbery, trees, timber, trash and garbage.

PART 5 - EXECUTION (NOT USED)

++ END OF SECTION ++

01145-8

SECTION 01310

PROJECT MEETINGS

PART 1 - GENERAL

1.1 PRE-CONSTRUCTION CONFERENCE

- A. Upon receipt of the Notice to Proceed, or at an earlier time if mutually agreeable, the ENGINEER will arrange a preconstruction conference to be attended by the CONTRACTOR's superintendent or other project representative authorized to commit on the behalf of the CONTRACTOR and to direct the performance of the work by others, the OWNER, the ENGINEER or ENGINEER's representative, and representatives of utilities, major subcontractors, and others involved in the execution of the work.
- B. The purpose of this conference will be to establish a working relationship and understanding between the parties and to discuss subjects as may be pertinent for the execution of the work.
- C. CONTRACTOR shall be prepared to discuss the following subjects, as a minimum:
 - 1. Required schedules.
 - 2. Status of Bonds and insurance.
 - 3. Sequencing of critical path work items.
 - 4. Progress payment procedures.
 - 5. Project changes and clarification procedures.
 - 6. Use of site, access, office and storage areas, security and temporary facilities.
 - 7. Major product delivery and priorities.
 - 8. CONTRACTOR's safety plan and representative.

1.2 PROGRESS MEETINGS

- A. The ENGINEER will arrange and conduct progress meetings. The ENGINEER will prepare and circulate a draft agenda of each meeting. The CONTRACTOR may add items as appropriate to the draft agenda.
- B. Progress meetings will be conducted on a regular basis, at such frequency as the OWNER and CONTRACTOR may mutually agree. Progress meetings shall be attended by the ENGINEER, OWNER Operations personnel, CONTRACTOR's superintendent or other project representative, and representatives of all subcontractors involved in the work at the time of the meeting, required by the CONTRACTOR, or requested by the OWNER.
- C. The purpose of the meetings will be to facilitate the work of the CONTRACTOR and any subcontractor or other organization that is not up to schedule, resolve conflicts, identify and resolve any potential delays or necessary changes in the work and in general, coordinate and facilitate the execution of the work.
- D. The agenda of progress meetings shall include review of work progress, the latest Construction Schedule submittal (monthly), potential project delays, the status of key shop drawings, submittal reviews, information requests, safety concerns, record drawings, and extra work items.

01310-1

1.3 CONSTRUCTION SCHEDULE REVIEW

- A. The Construction Schedule will be reviewed monthly during an agreed upon progress meeting to verify at a minimum:
 - 1. Actual start and finish dates of completed activities since the last progress meeting.
 - 2. Durations and progress of all activities not completed.
 - 3. Critical submittals/materials delivery problems.
 - 4. Potential project delays.
 - 5. Any activity behind schedule and CONTRACTOR's plan to bring it back on schedule.
 - 6. Reason, logic, time, and cost data for Change Order work that is to be incorporated into the Construction Schedule or payment request form.
 - 7. Payment due to the CONTRACTOR based on percentage complete of items in the submittal payment request form.
- B. At the progress meeting, the CONTRACTOR shall provide an update of the Construction Schedule as described in Section 01320, Progress Schedule.

PART 2 - PRODUCTS (NOT USED)

PART 3 - EXECUTION (NOT USED)

++ END OF SECTION ++

01310-2

SECTION 01320
PROGRESS SCHEDULE

PART 1 - GENERAL

1.1 WORK INCLUDED

- A. The work specified in this Section includes the preparation and submittal of a computerized Critical Path Method (CPM) Construction Schedule and of updates and revisions to the Construction Schedule.
- B. The computerized CPM schedule shall be completed using Microsoft Project for Windows or Primavera Project Planner scheduling system and software.
- C. The requirements specified under Section 01330, Submittal Procedures, also apply to the Construction Schedule initial submittal(s) and subsequent updates and revisions.

1.2 REFERENCE

- A. General:
 - 1. Applicable Reference shall be the Associated General Contractors of America (AGC) Publication No. 1107.1, "Construction Planning and Scheduling", latest edition.
 - 2. The preparation of the Construction Schedule, its principles, definitions and terms shall be as set forth in that reference.
 - 3. In case of conflict, the provisions specified in this Section shall govern and supersede conflicting provisions in such reference.

1.3 PREPARATION AND SUBMITTAL PROCEDURE

- A. Responsible Person:
 - 1. Within five days after Notice to Proceed, the CONTRACTOR shall designate, in writing, the person responsible for the preparation of the Construction Schedule.
 - 2. Such person shall have the authority to act on behalf of the CONTRACTOR and be knowledgeable in the preparation of CPM schedules of similar complexity.
 - 3. This person shall meet with the Engineer, within 10 days of the Notice to Proceed for a joint review and approval of the CONTRACTOR's approach.
- B. Initial Schedule Submittal:
 - 1. The Construction Schedule shall be completed and submitted to the Engineer within 30 days after Notice to Proceed.
 - 2. If the initial Construction Schedule submittal is not acceptable to the Engineer, it shall be revised in coordination with observations and comments from the Engineer and resubmitted within 7 days of the return of the schedule to the CONTRACTOR.
- C. By preparing and submitting the Construction Schedule the CONTRACTOR represents that the CONTRACTOR can and intends to execute the work and portions thereof within the specified times and constraints and that the CONTRACTOR's bid covers the costs associated with the execution of work in accordance with the Construction Schedule.
- D. Submittal package.
 - 1. Submittal of the Baseline Construction Schedule shall include the following:

01320-1

- a. Network Diagram:
 - 1) A graphic network diagram with legible letters with individual sheets sized approximately 24" by 48".
 - 2) Each activity shall be shown on the diagram with the activity number, description and duration in working days.
 - 3) Five copies and one reproducible shall accompany the submittal.
- b. Five sets of supporting data, if not indicated on the graphic network diagram, including:
 - 1) Number of work days per week.
 - 2) Holidays that will be observed during construction.
 - 3) Number of shifts per day.
 - 4) Major construction equipment used, identifying the time period and activity of use.
 - 5) Average manpower for each week and for each trade.
 - 6) Lost time allowance for weather or other conditions that can be anticipated or projected based on the requirements herein.
 - a) Contractor schedule shall include a minimum of 20 working days total, of lost time allowance.
- c. Five computer printouts as follows:
 - 1) Listing of all activities sorted by total float including early start (ES), late start (LS), early finish (EF), late finish (LF) and Total Float duration for each activity or work item. Each activity or work item will not take more than two lines.
 - 2) Lists of all activities sorted numerically including ES, LS, EF, LF, Total Float.
 - 3) List of all activities sorted numerically with Predecessor/Successor information of precedence network.
2. Submittals of updated Construction Schedules shall include, in addition to the items specified in the preceding subparagraph 1a, 1c, and 1d, the following:
 - a. Changes in the schedule due to approved Change Order or Change Directives or Force Account work.
 - b. CONTRACTOR elected changes in schedule logic, activity duration, or activity start or stop dates.
 - c. A narrative report as needed to define:
 - 1) Changes in logic, activity duration, and manpower and equipment utilization.
 - 2) Problem areas, anticipated delays, and the impact on the schedule.
 - 3) Corrective action recommended and its effect.
 - 4) The effect of changes on schedules of other contractors involved with the work.
 - 5) Coordination of work with others.
 - d. Percentage completion for each activity as agreed to for the monthly progress payments.
- E. If the Construction Schedule, its updates or its revisions, reflect anything not accepted by the Engineer, such Construction Schedule, update, or revision shall be considered as not having been accepted by the Engineer.

1.4 CONSTRUCTION SCHEDULE CONTENT

- A. The Construction Schedule shall be calendar-based, time-scaled, manpower and cost-loaded, using a precedence method diagram in the Critical Path Method (CPM) format indicating the critical path for the execution of the work utilizing the entire contract time.

01320-2

1. In the preparation of the Construction Schedule, the CONTRACTOR shall take into account all constraints and requirements specified.
2. Allowance in the Construction Schedule shall be made for Excusable Delays, as defined in the Agreement. These days shall be included as part of the 20 days of lost time allowance specified herein.
3. The diagram shall be clear, legible, and accurate, and show complete sequence of construction by activity and interdependence of activities. Separate discrete lines shall connect linked activities.
4. Activities related to the same physical areas of the work shall be grouped in the same area of the diagram.
