RESOLUTION NO. 22-127

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, INITIATING PROCEEDINGS FOR THE ANNUAL LEVY OF ASSESSMENTS FOR THE OLYMPUS POINTE LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2022/2023, PURSUANT TO THE PROVISIONS OF PART 2 OF DIVISION 15 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Olympus Pointe Landscaping and Lighting District (hereafter referred to as the "District") pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the "Act"), that provides for levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of street lighting, landscaping, and all appurtenant facilities and operations related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer") for the purpose of assisting with the establishment of the assessments, the annexation of territory, and to prepare and file an Engineer's Annual Levy Report (hereinafter referred to as the "Engineer's Report") with the City Clerk in accordance with the act, and in accordance with the California Constitution, Articles XIIIC and XIIID;

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE OLYMPUS POINTE LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Engineer's Report: The City Council hereby orders the Engineer to prepare and file with the City Clerk the Engineer's Report concerning the levy of assessments for the District in accordance with Chapter 3, Section 22622 of the Act.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: project identification signs and surrounding landscape and hardscape, special street materials, sculpture and sculpture park, special lighting for the project identification signs, sculpture and sculpture park, landscape street medians, special street signs, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer's Report describes all new improvements or substantial changes in existing improvements.

RESOLUTION NO. 22-128

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, DECLARING ITS INTENTION TO LEVY ANNUAL ASSESSMENTS FOR THE OLYMPUS POINTE LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2022/2023

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Olympus Pointe Landscaping and Lighting District (hereafter referred to as the "District"), and initiated proceedings for Fiscal Year 2022/2023, pursuant to the provisions of the *Landscaping and Lighting Act of 1972*, *Part 2 of Division 15 of the Streets and Highways Code of California*, *beginning with Section 22500* (hereafter referred to as the "Act") that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of all improvements and facilities related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services for the purpose of assisting with the Annual Levy of the District, and to prepare and file an Engineer's Annual Levy Report (hereinafter referred to as the "Engineer's Report") with the City Clerk in accordance with the Act; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE OLYMPUS POINTE LANDSCAPING AND LIGHTING DISTRICT, PURSUANT TO *CHAPTER 3, SECTION 22624* OF THE ACT, AS FOLLOWS:

Section 1 Intention: The City Council hereby declares that it is its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay the annual costs of the improvements.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: project identification signs and surrounding landscape and hardscape, special street materials, sculpture and sculpture park, special lighting for the project identification signs, sculpture and sculpture park, landscape street medians, special street signs, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer's Report describes all new improvements or substantial changes in existing improvements.

Section 3 Boundaries and Designation: The boundaries of the District are described as the boundaries previously defined in the formation documents of the original District. The District includes the parcels generally within the area known as the Olympus Pointe Landscaping and Lighting Disrict. The District is known and designated as the:

"Olympus Pointe Landscaping and Lighting District"

Section 4 Proposed Assessment Amounts: The proposed assessments are outlined in the Engineer's Annual Levy Report. District Assessments are calculated in accordance with the method of apportionment established for the District and do not exceed the assessment rates and annual inflationary adjustment previously authorized by City Council and approved by the property owners in accordance with the provisions of the California State Constitution, Article XIIID.

Section 5 Public Hearing(s): The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22626* of the Act.

Section 6 Notice: The City Clerk shall give notice of the time and place of the Public Hearing by causing the publishing of this Resolution once in the local newspaper not less than ten (10) days before the date of the hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices.

Section 7 Time and Place of Public Hearing: Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Wednesday, May 18, 2022 at 6:00 p.m.** or as soon thereafter as feasible in the regular meeting chambers located at 311 Vernon Street, Roseville, California.

RESOLUTION NO. 22-129

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR PRELIMINARY APPROVAL OF THE ENGINEER'S ANNUAL LEVY REPORT FOR THE OLYMPUS POINTE LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2022/2023

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, the City Council has, by previous Resolutions, ordered the preparation of an Engineer's Annual Levy Report (hereafter referred to as the "Engineer's Report") for the district known and designated as the Olympus Pointe Landscaping and Lighting District (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California*, *beginning with Section 22500* (hereinafter referred to as the "Act"); and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer"), for the purpose of assisting with the establishment of the assessments and to prepare and file an Engineer's Report with the City Clerk in accordance with the Act, and in accordance with the requirements of the California Constitution, Articles XIIIC and XIIID; and,

WHEREAS, there has now been presented to this City Council the Engineer's Report as required by *Chapter 1, Article 4, Section 22566* of said Act; and,

WHEREAS, this City Council has carefully examined and reviewed the Engineer's Report as presented, and is preliminarily satisfied with the District, each and all of the budget items and documents as set forth therein, and is satisfied that the assessments, on a preliminary basis, have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within each Zone, as set forth in said Report; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE OLYMPUS POINTE LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Engineer's Report as presented, consists of the following:

a. A Description of Improvements
b. The Annual Budget (Costs and Expenses of Maintenance, Services, Operations and District Administration)
c. The Assessment Roll containing the Fiscal Year 2022/2023 Levy for each Assessor Parcel within the District

Section 3 The Engineer's Report is hereby approved on a preliminary basis, and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 4 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Engineer's Report.

APPENDIX A – DISTRICT BOUNDARY MAP 20

APPENDIX B — FY 2022/23 ASSESSMENT ROLL 22

I. OVERVIEW

A. INTRODUCTION

The City of Roseville ("City") annually levies and collects special assessments in order to maintain the certain public improvements within the Olympus Pointe Landscaping and Lighting District ("District") within the City. The District, which was formed in 1989, is levied annual assessments pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code (the "1972 Act").

The Engineer's Report ("Report") describes the District boundaries, any new annexations, improvements maintained by the District and the proposed assessments for the period of July 1, 2022 through June 30, 2023.

The District consists of two (2) benefit Zones ("Zones"). The improvements that benefit properties within each Zone and the costs associated with those improvements are identified and budgeted separately. Each parcel within a Zone is assessed proportionately for only those improvements and services that are a direct and special benefit to the properties within the respective Zone. The assessments are based on the historical and estimated cost to maintain the improvements that provide a direct and special benefit to properties within the District.

The word "parcel," for the purposes of this Report, refers to an individual property assigned its own Assessor's Parcel Number ("APN") by the Placer County Assessor's Office.

Following approval of the Report, the City Council will by resolution, order the improvements to be made, if any, and confirm the levy and collection of assessments herein pursuant to the 1972 Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council defines the assessments to be applied to each parcel within the District and respective Zones for Fiscal Year ("FY") 2022/23. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved by the City Council.

B. COMPLIANCE WITH CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the 1972 Act and are in compliance with the substantive and procedural requirements of the California State Constitution Articles XIIIC and XIIID ("Article XIIIC" and "Article XIIID") and the provisions of the Proposition 218 Omnibus Implementation Act [Government Code Section 53750 and following] (the "Implementation Act"). Articles XIIIC and XIIID and the Implementation Act collectively are hereinafter referred to as "Proposition 218".

The District's Maximum Assessment Rates for all Zones and the Inflationary Adjustment Factor were previously approved and confirmed through property owner ballot proceedings and as such, comply with the provisions of Proposition 218.

Pursuant to the 1972 Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls.

C. CLARIFICATION OF ZONE DESIGNATIONS

In order to increase consistency with the City's other districts and to facilitate presentation within the Engineer's Report, the names of both Zones were redesignated, commencing with FY 2007/2008, as follows:

- The "Non-Residential/Multi-Family Residential Zone" was redesignated to "Zone A". (1)

- The "Residential Zone" was redesignated to "Zone D". (2)

(1) Prior to FY 2005/2006, this territory was known as "Zone A". In FY 2005/2006, Zone A was redesignated to the "Non-Residential/Multi-Family Residential Zone".

(2) Prior to FY 2005/2006, this territory was known as "Zones B & C". In FY 2005/2006, Zones B & C were combined and redesignated to the "Residential Zone".

D. GENERAL DESCRIPTION OF DISTRICT

The Olympus Pointe Landscaping and Lighting District is located in the City of Roseville at the southerly edge of Placer County, northeast of the intersection of Interstate 80 and Douglas Boulevard. The site is generally bounded by Interstate 80 on the west, East Roseville Parkway and Olympus Drive to the north, Douglas Boulevard to the south and Sierra College Boulevard to the east. See Appendix A for a rendering of the District boundary map.

The District consists of two zones as described below. These zones were established by the City through a District reengineering commencing with the FY 2005/2006 levy. Additional information regarding the reengineering is provided in Section III of the Report.

Zone A

Zone A includes land zoned for non-residential and multi-family residential uses. The Zone comprises the majority of the District and is primarily west and south of East Roseville Parkway, east of Interstate 80 north of Douglas Boulevard. This Zone contains 581.78 acres of assessable land that was originally designated as "Zone A". The area was then redesignated as the "Non-Residential/Multi-Family Zone" commencing with the FY 2005/06 and then redesignated back to "Zone A" commencing with the FY 2007/08 levy.

Zone D

Zone D includes two single-family residential developments on the eastern side of the District. The Zone is bisected by Olympus Drive and Sierra College Boulevard on the District's eastern boundary and includes 468 developed single-family residences. Originally, each residential development was designated as separate zone (Zones B and C). The area was redesignated as the "Residential Zone" commencing with the FY 2005/2006 levy and then redesignated to the "Zone D" commencing with the FY 2007/2008 levy.

E. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to a proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or

servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.

- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the

improvements and collect those advanced moneys from the annual installments collected through the assessments.

- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

F. DESCRIPTION AND LOCATION OF IMPROVEMENTS

This District, through the levy special assessments, provides funding for the maintenance and operation of the following improvements located within the public rights-of-way and dedicated easements: project identification signs, including surrounding landscape and hardscape; special street materials; sculptures and sculpture park; special street signs; special lighting for the project identification signs and special illuminated street signs; and landscaped street medians (the "Improvements"). The specific locations of the improvements within the district are described as follows:

1. Zone A

a. Landscaped Median Islands:

- Eureka Road from Douglas Boulevard to Taylor Road Connector
- Sunrise Avenue from southern boundary of the Northeast Roseville Specific Plan (the "NERSP") to East Roseville Parkway
- East Roseville Parkway from Douglas Boulevard to Rocky Ridge Drive
- Douglas Boulevard from eastern boundary of NERSP to Rocky Ridge Drive

b. Project identification signs (granite entryways) and special paving materials:

- Eureka Road at Douglas Boulevard
- East Roseville Parkway at Douglas Boulevard
- Eureka Road at Taylor Road

c. Sculpture and Sculpture Park:

- Aris Demetrio's original sculpture located on Parcel 14
- Sculpture park (0.85 acres located on Parcel 14)

d. Special street signs:

- Eureka Road at Sunrise Avenue, Rocky Ridge Drive, Lead Hill Drive and Douglas Boulevard
- Lead Hill Drive at Rocky Ridge Drive
- Sunrise Avenue at Auto Mall entrance
- East Roseville Parkway at Taylor Road, Lead Hill Drive, Olympus Drive and Douglas Boulevard

- Olympus Drive at Sierra College Boulevard:

2. Zone D

a. Landscaped Frontage:

- Southern side of Olympus Drive from East Roseville Parkway to Sierra College Boulevard, excluding any landscaping not within or adjacent to the Zone
- Northern side of Olympus Drive from the Zone boundary (the former Zone C boundary), which is 175 feet southwest of Corniche Lane, to Sierra College Boulevard, western side of Sierra College Boulevard from Olympus Drive to the Zone boundary (the former Zone C boundary), which is approximately 600 feet.

b. Project identification signs and special paving materials:

- Sierra College Boulevard at Olympus Drive

G. DESCRIPTION OF MAINTENANCE AND SERVICES

Maintenance means the furnishing of services and materials for the ordinary and usual maintenance, operation and servicing of the Improvements and appurtenant facilities, including repair, removal or replacement of all or part of any of Improvements or appurtenant facilities; providing for the life, growth, health and beauty of the Improvements including cultivation, irrigation, trimming, mowing, spraying, fertilizing and treating for disease or injury; the removal of trimmings, rubbish, debris and other solid waste.

Servicing means the furnishing of water and electricity for the Improvements including any decorative lighting and the furnishing of electric current or energy, gas or other illuminating agent for the special street signs.

II. METHOD OF APPORTIONMENT

A. GENERAL

The Act permits the establishment of assessment districts by public agencies for the purpose of providing certain public improvements, which include the construction, maintenance, and servicing of street lights, traffic signals and landscaping facilities. Streets and Highways Code Section 22573 requires that maintenance assessments be levied according to benefit rather than the assessed value.

> *"The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements."*

In addition, Article XIIID and the Implementation Act require that a parcel's assessment may not exceed the reasonable cost for the proportional special benefit conferred to that parcel. Article XIIID and the Implementation Act further provide that only special benefits are assessable and the City must separate the general benefits from the special benefits. They also require that publicly owned properties, which specifically benefit from the improvements, be assessed.

B. BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIIID addresses several key criteria for the levy of assessments, notably:

Article XIIID Section 2d defines District as follows:

"District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service";

Article XIIID Section 2i defines Special Benefit as follows:

"Special benefit" means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute "special benefit."

Article XIIID Section 4a defines proportional special benefit assessments as follows:

"An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel

shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel."

The City initiated and conducted property owner protest ballot proceedings in accordance with Article XIIID and the Implementation Act for both the Non-Residential/Multi-Family Zone (Zone A) and the Residential Zone (Zone D). Each Zone's Improvements, the associated costs and assessments had been reviewed, identified and allocated based on special benefit pursuant to the provisions of the Constitution and Act.

All Improvements associated with these Zones have been identified as necessary, required and/or desired for the orderly development of the properties to their full potential. As such, these Improvements would be necessary and required of individual property owners for the development of such properties and the ongoing operation, servicing and maintenance of these Improvements would be the financial obligation of those properties. Therefore, the Improvements and the annual costs of ensuring the maintenance and operation of the Improvements are of direct and special benefit to the properties.

The method of apportionment (method of assessment) is based on the premise that each of the assessed parcels within these Zones receives special benefit from the Improvements maintained and financed by the assessments. Specifically, the assessments associated with the Zones are for the maintenance of the Improvements installed as part of the original development of the parcels within the Zones. The desirability and security of properties within each Zone is enhanced by the close proximity of these amenities to those properties.

The annual assessments outlined in this Report are proposed to cover the estimated costs to provide all necessary service, operation, administration, and maintenance required to keep the Zone Improvements in a healthy, vigorous, and satisfactory condition.

The special benefits associated with these improvements are specifically:

- Enhanced desirability of properties through association with the improvements.
- Improved aesthetic appeal of properties within the Zones providing a positive representation of the area.
- Enhanced adaptation of the urban environment within the natural environment from adequate green space and landscaping.
- Environmental enhancement through improved erosion resistance, and dust and debris control.

- Increased sense of pride in ownership of property within the District resulting from well-maintained improvements associated with the properties.
- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the District through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels within the Zones by moderating temperatures, providing oxygenation and attenuating noise.

All of the preceding special benefits allowed the property to be developed for the enjoyment of the property owners and contribute to an ongoing specific enhancement and desirability of each of the assessed parcels within the Zones.

The improvements are for the special benefit, enhancement and use of properties within the Zones. Although the improvements include public easements, rights-of-way, streets and other amenities available or visible to the public at large, the construction and installation of these Improvements were only necessary for the development of properties within the Zones and were not required nor necessarily desired by any properties or developments outside the Zone's boundaries. Therefore, any public access or use of the Improvements by others is incidental and there is no measurable general benefit to properties outside the Zones or to the public at large. In making this determination, it should be noted that all parkway and perimeter landscaping within the City is both funded and maintained by a special district, individual property owners or through some type of association.

C. ASSESSMENT METHODOLOGY

To establish the special benefit to the individual lots and parcels within the District an Equivalent Benefit Unit ("EBU") system is used. The EBU method of apportioning benefit is typically seen as the most appropriate and equitable assessment methodology for districts formed under the Act, as the benefit to each parcel from the Improvements are apportioned as a function of land use type, size and development. Acreage of common area parcels shall be apportioned to the remaining assessable parcels of a subdivision and/or parcel split(s) related to the creation of the common area parcel(s).

EBU Application Table

Land Use	EBU per Unit/Acre
Single Family Residential	1.00 per Unit
Multi-Family Residential	1.00 per Acre
Non-Residential	1.00 per Acre
Exempt	0.00 per Acre

1. Definitions and Formulas Related to the Product Type EBU Method

Single-Family Residential — This land use is defined as a fully subdivided residential parcel that is part of a final tract map.

Multi-Family Residential — This land use is defined as a residential parcel anticipated to have or has more than one residential unit.

Non-Residential — Parcels that are not considered Single Family Residential, Multi- Family Residential or Exempt.

Exempt Parcels — This land use identifies properties that are not assessed and are assigned 0.0 EBU per acre. This land use classification may include, but is not limited, to lots or parcels identified as public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas, greenbelts, parkways, park properties and other publicly owned properties that are part of the District Improvements. These types of parcels are considered to receive little or no benefit from the Improvements and are therefore exempted from assessment.

2. Zone Benefit Formula

The benefit formula applied to parcels within each Zone is based on the preceding Equivalent Benefit Unit (EBU) Application Table. Each parcel's EBU correlates the parcel's special benefit received as compared to all other parcels benefiting from the Improvements.

The following formula is used to calculate the EBU for each parcel (proportional benefit).

Parcel Type EBU x Units/Acres = Parcel EBU

The total number of Equivalent Benefit Units (EBUs) is the sum of all individual EBUs applied to parcels within each Zone that receive a special benefit from the Improvements. An assessment amount per EBU (Assessment Rate) for each Zone is established by taking the total costs associated with the Zone's Improvements and dividing that amount by the total number of EBUs within each Zone of all parcels benefiting from those Improvements. This Rate is then applied back to each individual parcel based on their assigned EBUs to determine the parcel's proportionate special benefit and assessment obligation from those Improvements.

Zone Budget/ Total EBU = Assessment per EBU

Assessment per EBU x Parcel EBU = Maximum Parcel Assessment Amount

D. ASSESSMENT RANGE FORMULA

The purpose of establishing an Assessment Range Formula is to provide for reasonable increases and inflationary adjustment to annual assessments rather than initiating protest ballot proceedings to approve small increases in annual costs. This District provides for an annual adjustment to the Maximum Assessment Rate in an amount equal to three percent (3%).

The Maximum Assessment Rate is adjusted annually and is calculated independent of the District's annual budget and proposed annual assessment. Any proposed annual assessment rate (less than or equal to this Maximum Assessment Rate) is not considered an increased assessment, even if the proposed assessment is greater than the assessment applied in the prior fiscal year.

Although the Maximum Assessment Rate will increase each year, the actual assessment rate may go up and down as compared to the previous year(s). The Maximum Assessment Rate adjustment is designed to allow for the adjustment of the annual assessment for inflation in order to maintain the original purchasing power of the District budget. The Maximum Assessment Rate calculated each year does not require or facilitate an increase to the annual assessment and neither does it restrict assessments to the adjusted maximum amount. If the budget and assessment for the fiscal year do not require an increase, or the increase is less than the adjusted Maximum Assessment Rate, then the required budget and assessment may be applied without additional property owner balloting. If the budget and assessments calculated requires an increase greater than the adjusted Maximum Assessment Rate, then the assessment is considered an increased assessment and would be subject to Proposition 218 balloting requirements.

E. BASE MAXIMUM ASSESSMENT RATES

The base assessment rates and the annual inflationary adjustment to each Zone are listed in the table below:

Zone	Base Year	Base Year Maximum Assessment Rate per EBU	Annual Inflationary Adjustment [1]
Zone A	FY 2005/06	$296.65	3.00%
Zone D	FY 2005/06	$99.76	3.00%

(1) The Annual Inflationary Adjustment commences with the Fiscal Year 2006/2007 assessments.

III. DISTRICT BUDGET

A. FY 2022/23 BUDGET

DESCRIPTION	ZONE A Fund 2006	ZONE D Fund 2007
DIRECT COSTS		
Contract Maintenance - Landscaping	$24,226.00	$32,148.00
Contract Maintenance - Parks	4,969.00	0.00
Repair & Maintenance - Landscaping/Parks	25,000.00	11,000.00
Repair & Maintenance - Tree Work	2,886.00	5,460.00
Utilities	37,800.00	21,000.00
Maintenance - Parks City Staff	14,767.00	0.00
Rehab Reserve Project Expenditures	41,800.00	19,500.00
Total Direct Costs	**$151,448.00**	**$89,108.00**
ADMINISTRATION COSTS		
City Administration	$2,510.00	$306.00
Contract Administration - Park's Dept	13,000.00	3,000.00
County Auditor Fees	1,311.04	771.68
Consulting & Professional Services	4,291.00	522.00
Public Hearing Publishing Costs	346.00	43.00
Total Administrative Costs	**$21,458.04**	**$4,642.68**
Total Direct and Administration Costs	**$172,906.04**	**$93,750.68**
BUDGET ADJUSTMENTS		
Replenishment /(Use of) Operating Reserve	$0.00	$0.00
Contribution for /(Use of) Rehab Reserve	(41,800.00)	(16,583.05)
Rounding Adjustment	(8.00)	(3.79)
Total Adjustments	**($41,808.00)**	**($16,586.84)**
BALANCE TO LEVY	**$131,098.04**	**$77,163.84**

Fund balance information of each Zone is reported in Section C on the following page.

B. FY 2022/23 ASSESSMENT RATES

DESCRIPTION	ZONE A Fund 2006	ZONE D Fund 2007
FY 2022/23 ASSESSMENT RATES		
Total Assessable Parcels	358	468
Total Assessable Acreage	530.8045	n/a
Total Assessable Units	186	468
Total Equivalent Benefit Units (EBUs)	**716.8045**	**468**
Assessment Rates per Equivalent Benefit Unit (EBU)		
Assessment Rates to be Applied per EBU	$182.8923	$164.8800
Maximum Assessment Rates per EBU	$490.3173	$164.8881
Potential Maximum Assessment Per Zone	**$351,462**	**$77,168**

C. FY 2022/23 FUND BALANCE INFORMATION

DESCRIPTION	ZONE A Fund 2006	ZONE D Fund 2007
OPERATING RESERVE		
Beginning Operating Reserve Balance 7-1-2022 (est.)	**$124,767.78**	**$59,717.21**
add: Replenish from FY 22/23 Levy		
less: Use for FY 22/23 Expenses		
Transfer from/(to) the Rehab Reserve	(49,043.78)	(15,163.21)
Ending Operating Reserve Balance 6-30-2023 (est.)	**$75,724.00**	**$44,554.00**
REHABILITATION RESERVE		
Beginning Rehab Reserve Balance 7-1-2022 (est.)	**$149,754.96**	**$60,759.11**
add: Collect from FY 22/23 Levy		2,916.95
less: Use for FY 22/23 Rehab Projects	(41,800.00)	(19,500.00)
Transfer from/(to) the Operating Reserve	49,043.78	15,163.21
Ending Rehab Reserve Balance 6-30-2023 (est.)	**$156,998.74**	**$59,339.27**

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping – Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping improvements, irrigation and related drainage systems, as well as maintenance of appurtenant

facilities (the “improvements”). Cost to maintain improvements within the District’s entryway areas are not included in this amount.

Contract Maintenance - Parks - Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of park improvements, as well as maintenance of appurtenant facilities (the “improvements”).

Repair & Maintenance - Landscaping/Parks - This line item includes repairs or maintenance items that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc.

Maintenance - Parks City Staff - This line item includes maintenance items that are performed by the Parks staff.

Repair & Maintenance – Tree Work - This line item includes annual costs for tree maintenance not included in the annual contract maintenance portion of the budget. If zero, this line item may not be shown in the budget.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year’s assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer’s Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park’s Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department’s estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's' Report.

Public Hearing Publishing Costs –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A "Replenishment" increases the levy in order to replenish the Operating Reserve. On the other hand, a "Use" of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Contribution for / (Use of) Rehab Reserve — A "Contribution" increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a "Use of" of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

APPLIED ASSESSMENT RATES

Total Assessable Acreage - The total acreage within each zone expected to be assessed in the current fiscal year.

Total Assessable Units - The total number of assessable single-family units within each zone expected to be assessed in the current fiscal year.

Total Equivalent Benefit Units ("EBUs") - Total assessable EBUs within the District for the current fiscal year. Each assessable parcel is assigned EBUs as shown in Section II C of this Report.

Applied Assessment Rate per Equivalent Benefit Unit (EBU) - The assessment rate per EBU to be applied to the applicable Zone for the current fiscal year.

Maximum Assessment Rate per Equivalent Benefit Unit (EBU) - The maximum assessment rate per EBU that can be applied to the applicable Zone for the current fiscal year.

Potential Maximum Assessment Per Zone – The total amount that can be assessed to all parcels within each Zone for the current fiscal year based upon the expected number of assessable units and acres.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2022 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2022 to December 31, 2022, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 22/23 Levy – This amount is added to the FY 2022/23 levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2022 (the beginning of the Fiscal Year) through December 31, 2022. If zero, this line item may not be shown in the budget.

Use for FY 22/23 Expenses – The amount of the Operating Reserve to be used to fund FY 2022/23 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2022 (the beginning of the Fiscal Year) through December 31, 2022. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2023 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2023. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2022 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2022. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 22/23 Levy — This amount is added to the FY 2022/23 levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 22/23 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2023 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2023. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

Should the District have no Rehabilitation Reserve or related activity, the Rehabilitation Reserve information may not be presented in the Report.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

The Report provides a five-year Capital Improvement Plan ("CIP") which shows projected expenditures by Zone related to the rehabilitation, restoration and/or replacement of District improvements, and other allowable costs. The Current Fiscal Year CIP is shown in the preceding Budget Section A. The projected CIP costs for the remaining four years are shown in the table below.

Zone A

Description	FY 2023-24	FY 2024-25	FY 2025-26	FY 2026-27	4 Year Total
Stone wall repair and medians	$500	$1,000	$600	$0	$2,100
Rehabilitate Sculpture Park	3,000	2,000			5,000
Repaint Cosmos Statue	45,000				45,000
Non-routine tree work	5,000	5,000	5,000	5,000	20,000
Replace irrigation controller(s)	20,000	20,000	20,000	20,000	80,000
Replace, repair, renovate and/or refurbish plants, landscapes & related materials	2,500		2,500		5,000
Total Projected Expenses	**$76,000**	**$28,000**	**$28,100**	**$25,000**	**$157,100**

Zone D

Description	FY 2023-24	FY 2024-25	FY 2025-26	FY 2026-27	4 Year Total
Rehabilitate, renovate and/or replace project entryway improvements	$0	$6,000	$0	$5,000	$11,000
Non-routine tree work	5,000	5,000	5,000	5,000	20,000
Replace irrigation controller(s)	10,000	10,000	10,000	10,000	40,000
Replace, repair, renovate and/or refurbish plants, landscape & related materials		2,000		2,000	4,000
Total Projected Expenses	**$15,000**	**$23,000**	**$15,000**	**$22,000**	**$75,000**

Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map for the District has previously been submitted to the Clerk of the City in the format required under the Act and is, by reference, hereby made part of this Report. These District Boundary Maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a rendering of the District's Boundaries is presented herein.

APPENDIX B — FY 2022/23 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, may be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-way, including public greenbelts and parkways; utility rights-of-way; small parcels vacated by the County, bifurcated lots, and other property that cannot be developed, excepting common area parcels. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2022/23. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2022/23 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the current fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 22-130

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, INITIATING PROCEEDINGS FOR THE ANNUAL LEVY OF ASSESSMENTS FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, FOR FISCAL YEAR 2022/2023, PURSUANT TO THE PROVISIONS OF PART 2 OF DIVISION 15 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Riverside Avenue Landscaping and Lighting District (hereafter referred to as the "District") pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the "Act"), that provides for levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of street lighting, landscaping, and all appurtenant facilities and operations related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer") for the purpose of assisting with the establishment of the assessments, the annexation of territory, and to prepare and file an Engineer's Annual Levy Report (hereinafter referred to as the "Engineer's Report") with the City Clerk in accordance with the act, and in accordance with the California Constitution, Articles XIIIC and XIIID;

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Engineer's Report: The City Council hereby orders the Engineer to prepare and file with the City Clerk the Engineer's Report concerning the levy of assessments for the District in accordance with Chapter 3, Section 22622 of the Act.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: maintenance, servicing, administration and operation of landscape, lighting and streetscape improvements, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer's Report describes all new improvements or substantial changes in existing improvements.

RESOLUTION NO. 22-131

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, DECLARING ITS INTENTION TO LEVY ANNUAL ASSESSMENTS FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2022/2023

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Riverside Avenue Landscaping and Lighting District (hereafter referred to as the "District"), and initiated proceedings for Fiscal Year 2022/2023, pursuant to the provisions of the *Landscaping and Lighting Act of 1972*, *Part 2 of Division 15 of the Streets and Highways Code of California*, *beginning with Section 22500* (hereafter referred to as the "Act") that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of all improvements and facilities related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services for the purpose of assisting with the Annual Levy of the District, and to prepare and file a report with the City Clerk in accordance with the Act; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, PURSUANT TO *CHAPTER 3, SECTION 22624* OF THE ACT, AS FOLLOWS:

Section 1 Intention: The City Council hereby declares that it is its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay the annual costs of the improvements.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: maintenance, servicing, administration and operation of landscape, lighting and streetscape improvements, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer's Report describes all new improvements or substantial changes in existing improvements.

Section 3 Boundaries and Designation: The boundaries of the District are described as the boundaries previously defined in the formation documents of the original District. The District is known and designated as:

"Riverside Avenue Landscaping and Lighting District"

Section 4 Proposed Assessment Amounts: The proposed assessments are outlined in the Report. District Assessments are calculated in accordance with the method of apportionment established for the District and do not exceed the assessment rates and annual inflationary adjustment previously authorized by City Council and approved by the property owners in accordance with the provisions of the California State Constitution, Article XIIID.

Section 5 Public Hearing(s): The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22626* of the Act.

Section 6 Notice: The City Clerk shall give notice of the time and place of the Public Hearing by causing the publishing of this Resolution once in a local newspaper not less than ten (10) days before the date of the hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices.

Section 7 Time and Place of Public Hearing: Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Wednesday, May 18, 2022 at 6:00 p.m.**, or as soon thereafter as feasible in the regular meeting chambers located at 311 Vernon Street, Roseville, California.

RESOLUTION NO. 22-132

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR PRELIMINARY APPROVAL OF THE ENGINEER'S ANNUAL LEVY REPORT FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2022/2023

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, the City Council has, by previous Resolutions, ordered the preparation of an Annual Levy Report (hereafter referred to as the "Engineer's Report") for the district known and designated as the Riverside Avenue Landscaping and Lighting District (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California*, *beginning with Section 22500* (hereinafter referred to as the "Act"); and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer"), for the purpose of assisting with the establishment of the assessments and to prepare and file an Engineer's Report with the City Clerk in accordance with the Act, and in accordance with the requirements of the California Constitution, Articles XIIIC and XIIID; and,

WHEREAS, there has now been presented to this City Council the Engineer's Report as required by *Chapter 1, Article 4, Section 22566* of said Act; and,

WHEREAS, this City Council has carefully examined and reviewed the Engineer's Report as presented, and is preliminarily satisfied with the District, each and all of the budget items and documents as set forth therein, and is satisfied that the assessments, on a preliminary basis, have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within the District, as set forth in said Engineer's Report; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE RIVERSIDE AVENUE LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Engineer's Report as presented, consists of the following:

a. A Description of Improvements
b. The Annual Budget (Costs and Expenses of Maintenance, Services, Operations and District Administration)
c. The Assessment Roll containing the Fiscal Year 2022/2023 Levy for each Assessor Parcel within the District

Section 3 The Engineer's Report is hereby approved on a preliminary basis, and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 4 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Engineer's Report.

APPENDIX B — FY 2022/23 ASSESSMENT ROLL 21

I. OVERVIEW

A. INTRODUCTION

The City of Roseville ("City") annually levies and collects special assessments in order to maintain the improvements within the Riverside Avenue Landscaping and Lighting District ("District"). The District was formed in January of 2007 and is levied annual assessments pursuant to *the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code* ("1972 Act").

The Engineer's Report ("Report") describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2022 through June 30, 2023. The special benefit assessments are based on historical and estimated costs to maintain the District improvements. These assessments, which provide a direct and special benefit to properties within the District, will provide funding for the operation and maintenance of District improvements.

The word "parcel," for the purposes of this Report, refers to an individual property assigned its own Assessor's Parcel Number ("APN") by the Placer County Assessor's Office. The Placer County Auditor/Controller uses Assessor's Parcel Numbers and specific Tax Code Accounts, to identify on the County's tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will by resolution, order the improvements to be made and confirm the levy and collection of assessments herein pursuant to the 1972 Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council defines the assessments to be applied to each parcel within the District for Fiscal Year ("FY") 2022/23. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved by the City Council.

B. COMPLIANCE WITH CURRENT LEGISLATION

The City Council, pursuant to the provisions of the "Landscaping and Lighting Act of 1972", being Division 15, Part 2 of the Streets and Highways Code of the State of California, beginning with Section 22500 (the "1972 Act"); Article XIIID of the Constitution of the State of California ("Article XIIID"); and the Proposition 218 Omnibus Implementation Act, beginning with Government Code Section 53750 (the "Implementation Act") (the 1972 Act, Article XIIID and the Implementation Act are referred to collectively as the "Assessment Law") initiated proceedings for the formation of the District on November 15, 2006 and to levy and collect annual assessments against lots and parcels within the District for FY 2007/08. On January 17, 2007, pursuant to Assessment Law, the City conducted a Public Hearing and tabulated the returned ballots. The City determined that a majority protest did not exist and approved the District's maximum assessment rate and annual inflationary adjustment factor.

Pursuant to the 1972 Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the1972 Act and Assessment Law.

C. DESCRIPTION OF DISTRICT BOUNDARIES

The proposed territory within the District consists of all lots, parcels and subdivisions of land as shown on the Boundary Map titled "Boundary Map of Riverside Avenue Landscaping and Lighting District" contained within this report in Appendix A-1.

The District is bounded by Douglas Boulevard to the north, Darling Way to the south and includes parcels that front Riverside Avenue. It is centrally located between Interstate 80 and Downtown Roseville and is east of the Union Pacific Railroad.

The District currently has a mix of different types of land uses including automotive related retail and car lots, community/neighborhood retail, offices, services, and residential units.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to a proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.

- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.

- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF THE IMPROVEMENTS AND MAINTENANCE

The District, through the levy of special assessments, is to provide funding for ongoing maintenance, operation and servicing of landscaping and lighting improvements located within the public rights-of-ways and dedicated easements located within the District. These improvements may include, but are not limited to, all materials, equipment, utilities, labor, and appurtenant facilities related to the ongoing maintenance of the improvements. The improvements to be maintained and services are generally described as follows:

Landscaping Improvements

The general landscaping improvements in the District are to be consistent with the improvements on Vernon Street located north of the District, which intersects Riverside Avenue. As a gateway to downtown Roseville, Riverside Avenue's compatibility with Vernon Street links the downtown area and Riverside Gateway area together.

The landscaping improvements have been designed to enhance the area within the District and may include, but are not limited to ground cover, shrubs and plants, trees, irrigation and drainage systems, ornamental lighting, masonry walls or other fencing, hardscape improvements, monuments and landmarks, mid-block bulbs, bulb-outs, and associated appurtenant located within the street rights-of-way and public areas within the District. Specifically, the proposed landscape improvement areas for this District are:

- Landscaping and hardscape improvements within the public rights-of-way of the streets within the District including, but not limited to, Riverside Avenue including the corners of Riverside Avenue and Second Street, Third Street, Fourth Street, Fifth Street, Sixth Street, Darling Way, Fern Street, Cherry Street, and Bonita Street.
- Decorative banners along Riverside Avenue.
- Transit facilities including bus stop seating and decorative shelters.
- Roundabout improvements including plantings, paving, and landmark feature located at the intersection of Vernon St., Douglas Blvd., and Riverside Ave.
- A Gateway feature located at the intersection of Darling Way and Riverside Avenue.

- Various amenities associated with the landscape improvements and public areas within the District, including, but not limited to, trash receptacles, street furniture, bike racks, entry signs, sidewalks, fencing, and retaining walls.

Specifically, not included as District improvements are those improvements located on private property, improvements and facilities that are outside the boundaries of the District and/or area funded by other sources available to the City.

Public Lighting Improvements

The lighting improvements may include, but are not limited to, the cost of providing, maintaining and servicing of lighting fixtures, poles, meters, conduits, electrical cable, and associated appurtenant facilities associated with:

- Lighting facilities within the landscaped areas and public areas including safety lights, security lights or ornamental lights installed as part of the District improvements; and
- Public street light improvements located on the streets within the District. Specifically excluded from the assessment are the street light energy costs. These costs are to be paid for by the City from other revenue sources.

Detailed maps and descriptions of the location and extent of the specific improvements to be maintained by the District are on file in the Office of Public Works and by reference are made part of this Report.

Description of Maintenance and Services

Maintenance means the furnishing of services and materials for the ordinary and usual maintenance, operation and servicing of landscaping and street lighting improvements facilities and appurtenant facilities, including repair, removal or replacement of all or part of any of the landscaping and street lighting improvements, or appurtenant facilities; providing for the life, growth, health and beauty of landscaping improvements including cultivation, irrigation, trimming, mowing, spraying, fertilizing and treating for disease or injury; the removal of trimmings, rubbish, debris and other solid waste; and the cleaning sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Servicing means the furnishing of water and electricity for the irrigation of the landscape improvements or appurtenant facilities and the furnishing of electric current or energy for the operation of the landscaping improvements or appurtenant facilities. The street lighting improvements shall be maintained to provide adequate illumination; however, the City will be paying the actual energy costs of the streetlights.

II. METHOD OF APPORTIONMENT

A. GENERAL

The Implementation Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements, which include the construction, maintenance, and servicing of landscaping improvements, streetlights and traffic signals.

Streets and Highways Code Section 22573 requires that maintenance assessments be levied according to benefit rather than the assessed value.

> *"The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements."*

In addition, Article XIIID and the Implementation Act require that a parcel's assessment may not exceed the reasonable cost for the proportional special benefit conferred to that parcel. Article XIIID and the Implementation Act further provides that only special benefits are assessable, and the City must separate the general benefits from the special benefits. They also require that publicly owned properties that specifically benefit from the improvements be assessed.

B. SPECIAL BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIIID addresses several key criteria for the levy of assessments, notably:

Article XIIID Section 2d defines District as follows:

"District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service";

Article XIIID Section 2i defines Special Benefit as follows:

"Special benefit" means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute "special benefit."

Article XIIID Section 4a defines proportional special benefit assessments as follows:

"An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel."

This District was formed to establish and provide for the improvements that enhance the presentation of the surrounding properties and developments. These improvements will directly benefit the parcels to be assessed within the District. The assessments and method of apportionment is based on the premise that the assessments will be used to construct and install landscape and lighting improvements within the District as well as provide for the annual maintenance of those improvements, and the assessment revenues generated by District will be used solely for such purposes.

The costs of the proposed improvements have been identified and allocated to properties within the District based on special benefit. The improvements to be provided by this District and for which properties will be assessed have been identified as an essential component and local amenity that provides a direct reflection and extension of the properties within the District which the property owners and residents have expressed a high level of support.

The method of apportionment (method of assessment) set forth in the Report is based on the premise that each assessed property receives special benefits from the landscape and lighting improvements within the District, and the assessment obligation for each parcel reflects that parcel's proportional special benefits as compared to other properties that receive special benefits.

To identify and determine the proportional special benefit to each parcel within the District, it is necessary to consider the entire scope of the improvements provided as well as the properties that benefit from those improvements. The improvements and the associated costs described in this Report, have been carefully reviewed and have been identified and allocated based on a benefit rationale and calculations that proportionally allocate the net cost of only those improvements determined to be of special benefit to properties within the District. The various public improvements and the associated costs have been identified as either "general benefit" (not assessed) or "special benefit".

Proper maintenance and operation of parkway landscaping and streetlights provides special benefit to adjacent properties by providing community character, security, safety and vitality. In addition, these improvements will enhance the ability of property owners to attract and maintain customers as well as increase the viability of commercial development.

Landscaping Special Benefit

Landscaping and appurtenant facilities, if well maintained, provide beautification, shade and enhancement of the desirability of the surroundings, and therefore increase property value. Specifically, they provide a sense of ownership and a common theme in the community providing aesthetic appeal and increased desirability of properties.

Landscaping provides special benefit to those developments that are directly adjacent to the public streets.

Landscaping General Benefit

The Improvements were installed to directly benefit the property owners in the District to enhance business and development opportunities. Therefore, it has been determined that there are no general benefits associated with the landscaping improvements.

Lighting Special Benefit

The operation, maintenance and servicing of lighting along local streets and arterial streets of a development provide the following special benefits:

- Improved security of lots and parcels along the perimeter of the development;
- Improved nighttime visibility for the local access of emergency vehicles; and
- Improved safety and traffic circulation to and from parcels.

Street Lights General Benefit

Similar to the landscaping improvements described above, the Improvements were installed to directly benefit the property owners in the District to enhance business and development opportunities. Therefore, it has been determined that there are no general benefits associated with lighting improvements.

C. ASSESSMENT METHODOLOGY

To establish the special benefit to the individual parcels within the District, a formula that spreads the costs of the maintenance based on the special benefit must be established. The improvements have been reviewed and a formula has been established to apportion the maintenance costs based on benefit.

The method of assessment is based on the front footage of each parcel located within the District. The parcel's Front Footage was determined based on Assessor Parcel maps or other sources. Only Front Footage on Riverside Avenue was used.

Based on the above formula, the FY 2007/08 maximum assessment rate approved on January 17, 2007 through a property owner balloting (the "Initial

Assessment Rate" or the "Base Year Maximum Assessment Rate") is $6.45 per each foot of frontage.

The following formulas were used to first calculate the District's Initial Assessment Rate and then each parcel's FY 2007/08 assessment (proportional benefit):

Step 1:

Balance to Levy ÷ Total Front Footage =
Maximum Front Footage Rate

Step 2:

Parcel Front Footage x Maximum Front Footage Rate =
Maximum Assessment

The Total Front Footage was the sum of all the Front Feet within the District. The Initial Assessment Rate per Front Foot was established by taking the total cost of improvements (Balance to Levy) and dividing that amount by the Total Front Footage within the District. The Initial Assessment Rate per Front Foot, which is also the FY 2007/08 Maximum Front Footage Rate, is then applied back to each individual parcel's Front Footage to determine the parcel's proportionate special benefit and assessment obligation (The FY 2007/08 Maximum Assessment).

D. ASSESSMENT RANGE FORMULA

The purpose of establishing an Assessment Range Formula is to provide for reasonable increases and inflationary adjustment to annual assessment rates without requiring the District to go through the requirements of Proposition 218 in order to get a small increase in assessments. This District provides for an annual adjustment to the Maximum Assessment Rate of the lesser of the percentage change in the area's Local Consumer Price Index for All Urban Consumers, which is currently the San Francisco-Oakland-Hayward Consumer Price Index for All Urban Consumers (the "CPI") or three percent (3%) (the "Escalation Percentage"). The CPI in this adjustment shall be determined through CPI data from the Bureau of Labor Statistics from December to December, beginning with the period from December 2006 to December 2007.

In applying this year's inflationary adjustment, the Escalation Percentage will increase the FY 2022/23 maximum assessment rate by 3% over that of the prior year.

The Assessment Range Formula shall be applied to all future assessments within the District beginning in fiscal year 2008/09. Generally, if the proposed annual assessment rate for the current fiscal year is less than or equal to the calculated Maximum Assessment Rate, then the proposed annual assessment is not considered an increased assessment. The Maximum Assessment Rate is equal to the FY 2007/08 Maximum Assessment Rate, which was approved on January 17, 2007 through a property owner balloting (the “Initial Assessment Rate” or “Base Year Assessment Rate”) and adjusted annually by the Escalation Percentage.

Beginning in the second fiscal year (Fiscal Year 2008/09) and each fiscal year thereafter, the Maximum Assessment Rate would be recalculated, and a new Maximum Assessment Rate established within the District.

The Maximum Assessment Rate is adjusted annually and is calculated independent of the District’s annual budget and proposed annual assessment. Any proposed annual assessment is not considered an increased assessment, even if the proposed assessment is greater than the assessment applied in the prior fiscal year.

Although the Maximum Assessment Rate will increase each year, the actual assessment rate may remain unchanged. The Maximum Assessment Rate adjustment is designed to establish a reasonable limit on assessments. The Maximum Assessment Rate calculated each year does not require or facilitate an increase to the annual assessment rate and neither does it restrict assessments to the adjusted maximum amount. If the budget and assessment for the fiscal year do not require an increase, or the increase is less than the adjusted Maximum Assessment Rate, then the required budget and assessment may be applied without additional property owner balloting. If the budget and assessments calculated requires an increase greater than the adjusted Maximum Assessment, then the assessment is considered an increased assessment and would be subject to balloting.

III. DISTRICT BUDGET

A. FY 2022/23 BUDGET

DESCRIPTION	AMOUNT (FUND 2023)
DIRECT COSTS	
Contract Maintenance - Landscaping	$7,638.00
Repair & Maintenance - Landscaping	9,000.00
Repair & Maintenance - Lighting	1,000.00
Repair and Maintenance - Streetscape and Signage	2,500.00
Repair and Maintenance - Tree Work	1,466.00
Utilities	9,540.00
Rehab Reserve Expenditures	8,400.00
Total Direct Costs	**$39,544.00**
ADMINISTRATION COSTS	
City Administration	$899.00
Contract Administration - Park's Dept	1,738.00
County Auditor Fees	382.60
Consulting & Professional Services	3,727.00
Public Hearing Publishing Costs	369.00
Total Administrative Costs	**$7,115.60**
Total Direct and Administration Costs	**$46,659.60**
BUDGET ADJUSTMENTS	
Replenishment/(Use) of Operating Reserve	$0.00
Contribution for /(Use of) Rehab Reserve	(8,400.00)
Rounding Adjustment	(0.72)
Total Adjustments	**($8,400.72)**
BALANCE TO LEVY	**$38,258.88**

Fund balance information is reported in Section C on the following page.

B. FY 2022/23 ASSESSMENT RATES

DESCRIPTION	AMOUNT (FUND 2023)
FY 2022/23 ASSESSMENT RATES	
Number of Assessable Parcels	76

C. FY 2022/23 FUND BALANCE INFORMATION

DESCRIPTION	AMOUNT (FUND 2023)
OPERATING RESERVE	
Beginning Operating Reserve Balance 7-1-2022 (est.)	**$117,045.48**
add: Replenish from FY 22/23 Levy	
less: Use for FY 22/23 Expenses	
Transfer from/(to) the Rehab Reserve	(97,273.48)
Ending Operating Reserve Balance 6-30-2023 (est.)	**$19,772.00**
REHABILITATION RESERVE	
Beginning Rehab Reserve Balance 7-1-2022 (est.)	**$20,832.12**
add: Collect from FY 22/23 Levy	0.00
less: Use for FY 22/23 Rehab Projects	(8,400.00)
Transfer from/(to) the Operating Reserve	97,273.48
Ending Rehab Reserve Balance 6-30-2023 (est.)	**$109,705.60**

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET:

DIRECT COSTS

Contract Maintenance - Landscaping - Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping improvements, irrigation and related drainage systems, as well as maintenance of appurtenant facilities (the "improvements").

Repair & Maintenance - Landscaping - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc.

Repair & Maintenance – Lighting - This line item includes bulb replacement and repairs that are generally unforeseen. This may include repair of damaged amenities due to vandalism, storms, etc.

Repair & Maintenance - Streetscape/Signage - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc.

Repair & Maintenance – Tree Work - This line item includes annual costs for tree maintenance not included in the annual contract maintenance portion of the budget. If zero, this line item may not be shown in the budget.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's' Report.

Public Hearing Publishing Costs –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A "Replenishment" increases the levy in order to replenish the Operating Reserve. On the other hand, a "Use" of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Contribution for /(Use of) Rehab Reserve — A "Contribution" increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a "Use of" of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the

Rehabilitation Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

APPLIED ASSESSMENT RATE

Number of Assessable Parcels - The total number of parcels that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public rights-of-way or easements, common areas, and/or parcels within the boundaries of the District currently do not benefit from the improvements and are therefore not assessed.

Total Assessable Front Footage - The total amount of assessable Front Footage within the District in accordance with the Method of Assessment Section of this Report.

Applied Assessment Rate - The assessment rate to be applied to the front footage of each non-exempt parcel within the District for the current fiscal year.

Maximum Assessment Rate - The Maximum Assessment Rate per front foot for the current fiscal year.

Potential Maximum Assessment – The total amount that can be assessed against all non-exempt District parcels for the current fiscal year based upon the expected assessable front footage within the District.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2022 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2022 to December 31, 2022, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All

Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 22/23 Levy – This amount is added to the FY 2022/23 levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2022 (the beginning of the Fiscal Year) through December 31, 2022. If zero, this line item may not be shown in the budget.

Use for FY 22/23 Expenses – The amount of the Operating Reserve to be used to fund FY 2022/23 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2022 (the beginning of the Fiscal Year) through December 31, 2022. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2023 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2023. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2022 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2022. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 22/23 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 22/23 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2023 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2023. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

The Report provides a five-year Capital Improvement Plan ("CIP") which shows projected expenditures related to the rehabilitation, restoration and/or replacement of District improvements, and other allowable costs. The Current Fiscal Year CIP is shown in the preceding Budget Section A. The projected CIP costs for the remaining four years are shown in the table below.

Description	FY 2023-24	FY 2024-25	FY 2025-26	FY 2026-27	4 Year Total
Improve hardscapes, monuments, landmarks, gateway features	$5,000	$5,000	$5,000	$5,000	**$20,000**
Non-routine tree work	3,000	3,000	3,000	3,000	**12,000**
Improve street furniture, trash receptacles, bike racks, bus stop shelters	5,000	3,000	5,000	3,000	**16,000**
Replace plants, landscaping, irrigation and/or drainage systems	7,000	5,000	7,000	5,000	**24,000**
Replace public street lights, lighting fixtures, poles/meters, safety, security, ornamental lights	10,000	5,000	7,000	5,000	**27,000**
Replace entry signs and decorative banners and hardware	3,000	3,000	2,000	3,000	**11,000**
Total Projected Expenses	**$33,000**	**$24,000**	**$29,000**	**$24,000**	**$110,000**

From time to time, funds held in a Rehabilitation Reserve may be needed to respond to changing needs due to the condition of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the District's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and/or operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map for the District has previously been submitted to the Clerk of the City in the format required under the Act and is, by reference, hereby made part of this Report. These District Boundary Maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a summary of the District's Boundaries is presented herein.

APPENDIX B — FY 2022/23 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, shall be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways including public greenbelts and parkways; utility rights-of-ways; common areas; landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2022/23. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2022/23 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

RESOLUTION NO. 22-133

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, INITIATING PROCEEDINGS FOR THE ANNUAL LEVY OF ASSESSMENTS FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, FOR FISCAL YEAR 2022/2023, PURSUANT TO THE PROVISIONS OF PART 2 OF DIVISION 15 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Vernon Street Landscaping and Lighting District (hereafter referred to as the "District") pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the "Act"), that provides for levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of street lighting, landscaping, and all appurtenant facilities and operations related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer") for the purpose of assisting with the establishment of the assessments, the annexation of territory, and to prepare and file an Engineer's Annual Levy Report (hereinafter referred to as the "Engineer's Report") with the City Clerk in accordance with the act, and in accordance with the California Constitution, Articles XIIIC and XIIID;

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 Engineer's Report: The City Council hereby orders the Engineer to prepare and file with the City Clerk the Engineer's Report concerning the levy of assessments for the District in accordance with Chapter 3, Section 22622 of the Act.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: maintenance, servicing, administration and operation of landscape, lighting and streetscape improvements, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer's Report describes all new improvements or substantial changes in existing improvements.

RESOLUTION NO. 22-134

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, DECLARING ITS INTENTION TO LEVY ANNUAL ASSESSMENTS FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2022/2023

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, The City Council has, by previous Resolutions, formed the Vernon Street Landscaping and Lighting District (hereafter referred to as the "District"), and initiated proceedings for Fiscal Year 2022/2023, pursuant to the provisions of the *Landscaping and Lighting Act of 1972*, *Part 2 of Division 15 of the Streets and Highways Code of California*, *beginning with Section 22500* (hereafter referred to as the "Act") that provides for the levy and collection of assessments by the County of Placer for the City of Roseville to pay the maintenance and services of all improvements and facilities related thereto; and,

WHEREAS, the City Council has retained Willdan Financial Services for the purpose of assisting with the Annual Levy of the District, and to prepare and file a report with the City Clerk in accordance with the Act; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, PURSUANT TO *CHAPTER 3, SECTION 22624* OF THE ACT, AS FOLLOWS:

Section 1 Intention: The City Council hereby declares that it is its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay the annual costs of the improvements.

Section 2 Proposed improvements and any substantial changes in existing improvements: The improvements within the District include: maintenance, servicing, administration and operation of landscape, lighting and streetscape improvements, other public improvements within the street right of way areas and all appurtenant facilities related thereto within the District. The Engineer's Report describes all new improvements or substantial changes in existing improvements.

Section 3 Boundaries and Designation: The boundaries of the District are described as the boundaries previously defined in the formation documents of the original District. The District is known and designated as:

"Vernon Street Landscaping and Lighting District"

Section 4 Proposed Assessment Amounts: The proposed assessments are outlined in the Report. District Assessments are calculated in accordance with the method of apportionment established for the District and do not exceed the assessment rates and annual inflationary adjustment previously authorized by City Council and approved by the property owners in accordance with the provisions of the California State Constitution, Article XIIID.

Section 5 Public Hearing(s): The City Council hereby declares its intention to conduct a Public Hearing annually concerning the levy of assessments for the District in accordance with *Chapter 3, Section 22626* of the Act.

Section 6 Notice: The City Clerk shall give notice of the time and place of the Public Hearing by causing the publishing of this Resolution once in a local newspaper not less than ten (10) days before the date of the hearing and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices.

Section 7 Time and Place of Public Hearing: Notice is hereby given that a Public Hearing on these matters will be held by the City Council on **Wednesday, May 18, 2022 at 6:00 p.m.**, or as soon thereafter as feasible in the regular meeting chambers located at 311 Vernon Street, Roseville, California.

RESOLUTION NO. 22-135

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, FOR PRELIMINARY APPROVAL OF THE ENGINEER'S ANNUAL LEVY REPORT FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, FISCAL YEAR 2022/2023

The City Council of the City of Roseville, California (hereafter referred to as the "City Council") does resolve as follows:

WHEREAS, the City Council has, by previous Resolutions, ordered the preparation of an Annual Levy Report (hereafter referred to as the "Engineer's Report") for the district known and designated as the Vernon Street Landscaping and Lighting District (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California*, *beginning with Section 22500* (hereinafter referred to as the "Act"); and,

WHEREAS, the City Council has retained Willdan Financial Services (hereinafter "Engineer"), for the purpose of assisting with the establishment of the assessments and to prepare and file an Engineer's Report with the City Clerk in accordance with the Act, and in accordance with the requirements of the California Constitution, Articles XIIIC and XIIID; and,

WHEREAS, there has now been presented to this City Council the Engineer's Report as required by *Chapter 1, Article 4, Section 22566* of said Act; and,

WHEREAS, this City Council has carefully examined and reviewed the Engineer's Report as presented, and is preliminarily satisfied with the District, each and all of the budget items and documents as set forth therein, and is satisfied that the assessments, on a preliminary basis, have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within the District, as set forth in said Engineer's Report; and,

NOW, THEREFORE, BE IT RESOLVED, DETERMINED, AND ORDERED BY THE CITY COUNCIL FOR THE VERNON STREET LANDSCAPING AND LIGHTING DISTRICT, AS FOLLOWS:

Section 1 That the above recitals are all true and correct.

Section 2 That the Engineer's Report as presented, consists of the following:

a. A Description of Improvements
b. The Annual Budget (Costs and Expenses of Maintenance, Services, Operations and District Administration)
c. The Assessment Roll containing the Fiscal Year 2022/2023 Levy for each Assessor Parcel within the District

Section 3 The Engineer's Report is hereby approved on a preliminary basis, and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

Section 4 That the City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of the Engineer's Report.

APPENDIX B — FY 2022/23 ASSESSMENT ROLL 20

I. OVERVIEW

A. INTRODUCTION

The City of Roseville ("City") annually levies and collects special assessments in order to maintain the improvements within the Vernon Street Landscaping and Lighting District ("District"). The District was formed in January of 2001 and is levied annual assessments pursuant to *the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code* ("1972 Act").

The Engineer's Report ("Report") describes the District, any new annexations, changes to the District, and the proposed assessments for the period of July 1, 2022 through June 30, 2023. The special benefit assessments are based on historical and estimated costs to maintain the District improvements. These assessments, which provide a direct and special benefit to properties within the District, will provide funding for the operation and maintenance of District improvements.

The word "parcel," for the purposes of this Report, refers to an individual property assigned its own Assessor's Parcel Number ("APN") by the Placer County Assessor's Office. The Placer County Auditor/Controller uses Assessor's Parcel Numbers and specific Tax Code Accounts, to identify on the County's tax roll, properties assessed for special district benefit assessments.

Following approval of the Report, the City Council will by resolution, order the improvements to be made and confirm the levy and collection of assessments herein pursuant to the Act. The assessment rates and method of apportionment described in this Report as approved or modified by the City Council defines the assessments to be applied to each parcel within the District for Fiscal Year ("FY") 2022/23. The assessments as approved will be submitted to the Placer County Auditor/Controller to be included on the property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved by the City Council.

B. COMPLIANCE WITH THE CURRENT LEGISLATION

All assessments described in this Report and approved by the City Council are prepared in accordance with the 1972 Act and are in compliance with the provisions of the California Constitution Article XIIID (Proposition 218).

The District has been formed pursuant to the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the California Streets and Highways Code. Pursuant

to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls. The assessments described in this Report have been prepared in accordance with the Act.

Prior to FY 2001/02, the City initiated (Resolution 00-523) and conducted property owner protest ballot proceedings (Resolution 01-22) in accordance with Article XIIID of the California Constitution ("Article XIIID") for the parcels within the District. An annual rate escalator was also included in the ballot that allows for an annual inflationary increase equal to the percentage change in the Consumer Price Index of the San Francisco-Oakland-Hayward Area (the "CPI") of each succeeding year (the "Escalation Percentage"). At the conclusion of the Public Hearing held on January 17, 2001, all property owner ballots returned were tabulated to determine if majority protest existed. The result of the protest proceeding was an approval of the assessment rate and the annual inflationary increase for maintaining the improvements within the District.

Pursuant to the Act, an annual Public Hearing is conducted by the City Council to accept property owner and public comments, to review the Engineer's Annual Levy Report prior to approving the annual assessments to be levied on the County tax rolls.

C. DESCRIPTION OF DISTRICT BOUNDARIES

The District is located in downtown Roseville and includes all parcels that front along Vernon Street between Folsom Road and the Riverside/Douglas Boulevard. See Appendix A for District boundary map.

D. IMPROVEMENTS AUTHORIZED BY THE 1972 ACT

As applicable or may be applicable to a proposed District, the 1972 Act defines improvements to mean one or any combination of the following:

- The installation or planting of landscaping.
- The installation or construction of statuary, fountains, and other ornamental structures and facilities.
- The installation or construction of public lighting facilities.
- The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof, including, but not limited to, grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities.
- The maintenance or servicing, or both, of any of the foregoing.
- The acquisition of any existing improvement otherwise authorized pursuant to this section.

Incidental expenses associated with the improvements including, but not limited to:

- The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
- The costs of printing, advertising, and the publishing, posting and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Any expenses incidental to the issuance of bonds or notes pursuant to Section 22662.5.
- Costs associated with any elections held for the approval of a new or increased assessment.

The 1972 Act defines "Maintain" or "maintenance" to mean furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement, including:

- Repair, removal, or replacement of all or any part of any improvement.
- Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury.
- The removal of trimmings, rubbish, debris, and other solid waste.
- The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti.

Furthermore, the 1972 Act specifies that where the cost of improvements (other than maintenance and operations) is greater than can be conveniently raised from a single annual assessment, an assessment to be levied and collected in annual installments. In that event, the governing body may choose to do any of the following:

- Provide for the accumulation of the moneys in an improvement fund until there are sufficient moneys to pay all or part of the cost of the improvements.
- Provide for a temporary advance to the improvement fund from any available and unencumbered funds of the local agency to pay all or part of the cost of the improvements and collect those advanced moneys from the annual installments collected through the assessments.
- Borrow an amount necessary to finance the estimated cost of the proposed improvements. The amount borrowed, including amounts for bonds issued to finance the estimated cost of the proposed improvements.

E. DESCRIPTION OF THE IMPROVEMENTS AND MAINTENANCE

The District ensures the continued maintenance, servicing, administration and operation of various landscape, lighting and streetscape improvements and associated appurtenances that are required to keep the improvements in a healthy, vigorous, and satisfactory condition. The assessable parcels receive benefit from the above improvements within the District.

Specific improvements include installation, maintenance and servicing of public facilities, including, but not limited to street trees, sidewalks, curbs, gutters, parking stripes, turf, brick pavers, planters, gateways, benches, bike racks, signage, trash receptacles, and lighting throughout the boundaries of the District (the "Improvements').

As applied herein, "installation" means the construction of public Improvements, including, but not limited to, land preparation, such as grading, leveling, cutting and filling, sod, landscaping, irrigation systems, sidewalks and drainage, lights, equipment, turf, brick pavers, planters, gateways, benches, bike racks and signage.

"Maintenance" means the furnishing of services and materials for the ordinary and usual maintenance, operation and servicing of any Improvement, including repair, removal or replacement of all or any part of any Improvement; providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury; the removal of trimmings, rubbish, debris, and other solid waste, and the cleaning, sandblasting, and painting of Improvements to remove or cover graffiti.

"Servicing" means the furnishing of electric current, or energy, gas or other illuminating agent for any public lighting facilities or for the lighting or operation of any other Improvements; or water for the irrigation of any landscaping, the operation of any fountains, or the maintenance of any other Improvements.

Plans and specification for the Improvements to be maintained are on file in the office of the Economic and Community Services Director at 311 Vernon Street, Roseville, CA 95678.

All assessable parcels identified as being within the District share in both the cost and the benefits of the improvements. The costs associated with the Improvements are equitably spread among all benefiting parcels within the District. Only parcels that receive direct benefit from the Improvements are assessed, and each parcel is assessed in proportion to the estimated benefit received. The funds collected are dispersed and used for only the services and operation provided to the District.

II. METHOD OF APPORTIONMENT

A. GENERAL

The 1972 Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements which include the construction, maintenance and servicing of public lights, landscaping and appurtenant facilities. The 1972 Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

> *"The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements."*

The formula used for calculating assessments in the District therefore reflects the composition of the parcels, and the Improvements and services provided, to fairly apportion the costs based on estimated benefit to each parcel.

B. BENEFIT ANALYSIS

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIIID addresses several key criteria for the levy of assessments, notably:

Article XIIID Section 2d defines District as follows:

"District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service";

Article XIIID Section 2i defines Special Benefit as follows:

"Special benefit" means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute "special benefit."

Article XIIID Section 4a defines proportional special benefit assessments as follows:

"An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be

imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel."

This District was formed to establish and provide for the improvements that enhance the presentation of the surrounding properties and developments. These improvements will directly benefit the parcels to be assessed within the District. The assessments and method of apportionment is based on the premise that the assessments will be used to construct and install landscape and lighting improvements within the District as well as provide for the annual maintenance of those improvements, and the assessment revenues generated by District will be used solely for such purposes.

The costs of the proposed improvements have been identified and allocated to properties within the District based on special benefit. The improvements to be provided by this District and for which properties will be assessed have been identified as an essential component and local amenity that provides a direct reflection and extension of the properties within the District which the property owners and residents have expressed a high level of support.

The method of apportionment (method of assessment) set forth in the Report is based on the premise that each assessed property receives special benefits from the landscape and lighting improvements within the District, and the assessment obligation for each parcel reflects that parcel's proportional special benefits as compared to other properties that receive special benefits.

To identify and determine the proportional special benefit to each parcel within the District, it is necessary to consider the entire scope of the improvements provided as well as the properties that benefit from those improvements. The improvements and the associated costs described in this Report, have been carefully reviewed and have been identified and allocated based on a benefit rationale and calculations that proportionally allocate the net cost of only those improvements determined to be of special benefit to properties within the District. The various public improvements and the associated costs have been identified as either "general benefit" (not assessed) or "special benefit". The City initiated and conducted property owner protest ballot proceedings in accordance with Article XIIID. Each of the proposed Improvements, the associated costs and assessments were identified and allocated based on special benefit pursuant to the provisions of Article XIIID and 1972 Act. Additionally, the Improvements and the annual costs of ensuring the maintenance and operation of the Improvements are of direct and special benefit to the properties.

The City annually levies and collects special benefit assessments in order to maintain and service the District Improvements. The District provides for specific Improvements and services that include the maintenance and operation of landscaping and lighting Improvements and associated appurtenances located within the District's public rights-of-way and dedicated easements. The annual assessment is based on the historical and estimated cost to maintain the Improvements that provide a benefit to properties within these Districts. The

Improvements within the District and the costs of those Improvements are identified and budgeted separately, including all expenditures, deficits, surpluses, revenues, and reserves.

All Improvements within the District and the properties associated with those Improvements were reviewed for benefit prior to the formation of the District. Because the Improvements affront the benefited parcels, it has been determined that there is no measurable general benefit to properties outside the District or to the public at large. In making this determination it should be noted that similar improvements within California are typically maintained by individual property owners, through some type of association or a special district as allowed by State Law since the on-going maintenance of these improvements are a special benefit to the properties associated with those improvements.

The method of apportionment (method of assessment) for the District is based on the premise that each of the assessed parcels within the District receives special benefit from the Improvements maintained and financed by District assessments. The presence of these Improvements and the close proximity of the Improvements to the properties within the District enhance the desirability and security of properties within the District.

The landscape Improvements provided by the District may include landscaped parkways, perimeters, entryways, local medians, slopes, internal amenities and appurtenant facilities. Street lighting Improvements may include all energy costs and necessary maintenance to the facilities related thereto. The annual assessments outlined in this Report are proposed to cover the estimated costs to provide all necessary service, operation, administration, and maintenance required to keep these Improvements in a healthy, vigorous, and satisfactory condition. The special benefits associated with the local landscaping Improvements are specifically:

The special benefits associated with all landscaping Improvements are specifically:

- Enhanced desirability of properties through association with the Improvements.
- Improved aesthetic appeal of properties providing a positive representation of the area and properties.
- Enhanced adaptation of the urban environment within the natural environment from adequate landscaping.
- Environmental enhancement through improved dust and debris control, and fire prevention.
- Increased sense of pride in ownership of property within the District resulting from well-maintained Improvements associated with the properties.
- Enhanced quality of life through well-maintained landscaped areas.

- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the District through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels by moderating temperatures, providing oxygenation and attenuating noise.

The special benefits of street lighting are the convenience, safety, and security of property, improvements, and goods. Specifically:

- Enhanced deterrence of crime and the aid to police protection.
- Increased nighttime safety on streets and roads within the Districts.
- Improved ability of pedestrians and motorists to see.
- Improved ingress and egress to property.
- Reduced vandalism and other criminal acts and damage to Improvements or property.
- Improved traffic circulation and reduced nighttime accidents and personal property loss.
- Increased promotion of business during nighttime hours in the case of commercial properties.

All of the preceding special benefits contribute to a specific enhancement and desirability of each of the assessed parcels within the District.

C. DESCRIPTION OF THE METHOD OF APPORTIONMENT

Pursuant to the 1972 Act, the costs of the District may be apportioned by any formula or method that fairly distributes the net amount to be assessed, among all assessable parcels within the District in proportion to the estimated special benefits to be received by each such parcel from the Improvements. The special benefit formula used should reflect the composition of the parcels, the Improvements and services provided to fairly proportion the costs based on estimated special benefit to each parcel within the District. All assessable parcels within the District shall receive a direct special benefit from the services and Improvements provided by the District.

Article XIIID of the California Constitution specifies that only special benefits are assessable and that the City must separate the general benefits from the special benefits conferred on any parcel. Since the District is a downtown business area and the Improvements that affront each District parcel primarily attract and retain an increased customer base, these benefits enhance the District parcels and there is no measurable benefit to the public at large. Therefore, 100% of the Improvements are considered special benefit to the District parcels. The cost of

maintaining the Improvements is therefore identified as special benefit and has been allocated to the special assessments.

It was determined that a uniform assessment rate per foot of frontage upon Vernon Street would fairly distribute the net amount to be assessed due to the following reasons:

1. The assessments are based upon a specific property owner's special benefit received from the Improvements.
2. The special benefits should be directly related to the extent at which a property fronts the improvements, relative to other properties in the District.

The base assessment rate for the District was $4.59 per linear foot in FY 2001/02 and was determined using the formula below.

$$\textbf{\textit{Assessment Rate Per Foot}} = \frac{\textbf{\textit{Balance to Levy}}}{\textbf{\textit{Total Feet of Frontage}}}$$

The annual assessment amount for each parcel was then determined using the formula below:

Parcel Front Footage x Rate per Linear Foot = Parcel Assessment Amount

D. ANNUAL INFLATIONARY ADJUSTMENT

Commencing with FY 2002/03, the maximum assessment rate is to increase annually by the percentage change in the Consumer Price Index of the San Francisco-Oakland-Hayward ("CPI") as of January of each succeeding year (the "Escalation Percentage"). Since the Department of Labor, Bureau of Labor Statistics does not publish a CPI for January; the CPI for preceding month shall be used since this is the CPI *available* in the month of January. The District's starting CPI Index of 184.1, December of 2000, is hereby established as the base CPI (the "Base Year CPI Index").

In applying this year's CPI increase, the Escalation Percentage will increase the FY 2022/23 maximum assessment rate by 4.24% over that of the prior year.

If the proposed assessment increases over the prior fiscal year by a percentage no greater than the Escalation Percentage as defined above, then the proposed assessment is not considered an increase. This assessment range formula shall be applied to all future assessments within the District. Generally, if the proposed annual assessment rate for the Current Fiscal Year is less than or equal to the calculated maximum assessment rate, then the proposed annual assessment is not considered an increased assessment.

E. APPEALS AND INTERPRETATION

Any property owner, who believes that the assessment levied on the subject property is in error as a result of incorrect information being used to apply the foregoing method of assessment, may file a written appeal with the Finance Director of the City of Roseville or his or her designee. Any such appeal is limited to correction of an assessment during the then Current Fiscal Year. Upon the filing of any such appeal, the Director of Housing and Redevelopment or his or her designee will promptly review the appeal and any information provided by the property owner. If the Director of Housing and Redevelopment or his or her designee finds that the assessment should be modified, the appropriate changes shall be made to the assessment roll. However, if any such changes are approved after the County of Placer's deadline for adjustments to the tax roll, the Director of Housing and Redevelopment or his or her designee is authorized to approve a refund of the reduction amount to the property owner. Any dispute over the decision of the Director of Housing and Redevelopment or his or her designee, shall be referred to the City Council of the City of Roseville and the decision of the City Council of the City of Roseville shall be final.

F. DETERMINATION OF FRONT FOOTAGE

The front footage of each assessable parcel is subject to revision and/or correction using measurements of front footage found on the then current Placer County Assessor's Parcel Maps or through direct measurement by City personnel. Any such correction that increases a Parcel Assessment shall not be considered an increased assessment subject to the procedural provisions of Article XIIID.

III. DISTRICT BUDGET

A. FY 2022/23 BUDGET

DESCRIPTION	AMOUNT (FUND 2019)
DIRECT COSTS	
Contract Maintenance - Landscaping	$5,018.00
Repair & Maintenance - Landscaping	8,400.00
Repair & Maintenance - Lighting	5,000.00
Repair and Maintenance - Streetscape and Signage	1,250.00
Repair and Maintenance - Tree Work	4,500.00
Utilities	10,300.00
Rehab Reserve Project Expenditures	7,250.00
Total Direct Costs	**$41,718.00**

Total Administrative Costs	**$7,759.86**
Total Direct and Administration Costs	**$49,477.86**
BUDGET ADJUSTMENTS	
Replenishment/(Use) of Operating Reserve	$0.00
Contribution for /(Use of) Rehab Reserve	(7,191.81)
Rounding Adjustment	(1.89)
Total Adjustments	**($7,193.70)**
BALANCE TO LEVY	**$42,284.16**

Fund balance information is reported in Section C on the following page.

B. FY 2022/23 ASSESSMENT RATES

DESCRIPTION	AMOUNT (FUND 2019)
FY 2022/23 ASSESSMENT RATES	
Number of Assessable Parcels	60
Total Assessable Front Footage	5,370.76
Assessment Rates	
Applied Assessment Rates per each Foot of Frontage	$7.8730
Maximum Assessment Rates per each Foot of Frontage	$7.8734
Potential Maximum Assessment	**$42,286**

C. FY 2022/23 FUND BALANCE INFORMATION

DESCRIPTION	AMOUNT (FUND 2019)
OPERATING RESERVE	
Beginning Operating Reserve Balance 7-1-2022 (est.)	**$80,162.19**
add: Replenish from FY 22/23 Levy	
less: Use for FY 22/23 Expenses	
Transfer from/(to) the Rehab Reserve	(59,303.19)
Ending Operating Reserve Balance 6-30-2023 (est.)	**$20,859.00**
REHABILITATION RESERVE	
Beginning Rehab Reserve Balance 7-1-2022 (est.)	**$8,827.62**
add: Collect from FY 22/23 Levy	58.19
less: Use for FY 22/23 Rehab Projects	(7,250.00)
Transfer from/(to) the Operating Reserve	59,303.19
Ending Rehab Reserve Balance 6-30-2023 (est.)	**$60,939.00**

D. DESCRIPTION OF BUDGET ITEMS

Description of the terms used in the preceding Budget, Assessment Rates and Fund Balance tables are listed below:

BUDGET

DIRECT COSTS

Contract Maintenance - Landscaping - Includes all regularly scheduled contract labor, materials, supplies and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping corridors, street medians, entryways, irrigation and related drainage systems as well as maintenance of appurtenant facilities (the “improvements”).

Repair & Maintenance – Landscaping - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc. If zero, this line item may not be shown in the budget.

Repair & Maintenance – Lighting - This line item includes bulb replacement and repairs that are generally unforeseen. This may include repair of damaged amenities due to vandalism, storms, etc.

Repair & Maintenance - Streetscape/Signage - This line item includes repairs that are generally unforeseen and not normally included in the annual maintenance contract costs. This may include repair of damaged amenities due to vandalism, storms, etc.

Repair & Maintenance – Tree Work - This line item includes annual costs for tree maintenance not included in the annual contract maintenance portion of the budget. If zero, this line item may not be shown in the budget.

Utilities - The furnishing of water and electricity required for the operation and maintenance of the improvements.

Rehab Reserve Project Expenditures – Expected costs for installation, replacement or planned upgrades of District improvements for the current year that were previously funded or accumulated in the Rehabilitation Reserve. The Rehabilitation Reserve is used to accumulate funds for costs associated with the future rehabilitation or replacement of District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the budget.

ADMINISTRATION COSTS

City Administration – Estimated costs incurred by the City Finance Department and other Departments in preparing the annual budget for the Engineer's Report, together with other financial information required to determine the annual assessment. These costs would also include the preparation, posting and publishing of public notices required for City Council action relating to the District, as well as costs to perform legal review of documents.

Contract Administration – Park's Dept – Estimated Costs of Park and Recreation Department staff to coordinate and oversee the maintenance contracts and overall repair and maintenance of the District. This amount also includes the cost of the Department's estimates and analysis of certain budget items, estimated costs and useful lives of certain District Improvements.

County Auditor Fees - A fee of 1% of the total levy amount that is charged to the District by the County for placing assessments on property tax bills.

Consulting and Professional Services – Includes the costs and expenses of contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's' Report.

Public Hearing Publishing Costs –Includes the out of pocket costs to publish public notices required for City Council action relating to the District.

Total Direct and Administration Costs – The total expected costs of the District.

BUDGET ADJUSTMENTS

Replenishment/(Use) of Operating Reserve – A "Replenishment" increases the levy in order to replenish the Operating Reserve. On the other hand, a "Use" of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the budget. Further information regarding the function of the Operating Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Contribution for /(Use of) Rehab Reserve — A "Contribution" increases the levy in order to generate funding for the Rehabilitation Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation projects or replacements in future years. On the other hand, a "Use of" of the Rehabilitation Reserve provides current year funding of rehabilitation projects or replacements from available funds within the Rehabilitation Reserve. If zero, this line item may not be shown in the budget. Further information regarding the function of the Rehabilitation Reserve is provided under "FUND BALANCE INFORMATION" in the following pages of this Section.

Rounding Adjustment – The necessary rounding adjustment(s) due to limitations of the County property tax system that requires even penny levy amounts to be placed on the secured tax roll.

BALANCE TO LEVY - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the total District costs together with any applicable adjustments to the budget as described above.

ASSESSMENT RATES:

APPLIED ASSESSMENT RATE

Number of Assessable Parcels - The total number of parcels that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public rights-of-way

or easements, common areas, and/or parcels within the boundaries of the District currently do not benefit from the improvements and are therefore not assessed.

Total Assessable Front Footage - The total linear footage of that portion of each assessable parcel's boundary that is contiguous with Vernon Street.

Applied Assessment Rate per Front Foot - This amount represents the rate being applied to the front footage of each parcel for the Current Fiscal Year.

Maximum Assessment Rate per Front Foot - This amount represents the maximum rate that can be being applied to the front footage of each parcel for the Current Fiscal Year.

Maximum Potential Assessment – The total amount that is expected to be assessed against all parcels within the District for the Current Fiscal Year.

FUND BALANCE INFORMATION:

OPERATING RESERVE

Beginning Operating Reserve Balance 7-1-2022 (est.) - The anticipated beginning balance of cash and receivables net of any unpaid prior year obligations for each Zone. These beginning balances shall be used to fund each Zone's expenditures from July 1, 2022 to December 31, 2022, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

Replenish from FY 22/23 Levy – This amount is added to the FY 2022/23 levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2022 (the beginning of the Fiscal Year) through December 31, 2022. If zero, this line item may not be shown in the budget.

Use for FY 22/23 Expenses – The amount of the Operating Reserve to be used to fund FY 2022/23 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Balance to an amount no greater than the expected District costs for the period of July 1, 2022 (the beginning of the Fiscal Year) through December 31, 2022. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Rehab Reserve — The amount of Operating Reserve monies to be transferred to or from the Rehabilitation Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all

funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Operating Reserve Balance 6-30-2023 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each Zone as of June 30, 2023. The size of each Zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance, service and incidental expenses from the first day of the fiscal year (July 1) to the date that the Agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each Zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Rehabilitation Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the Report.

REHABILITATION RESERVE

Beginning Rehab Reserve Balance 7-1-2022 (est.) — The projected balance of funds in the Rehabilitation Reserve as of July 1, 2022. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Collect from FY 22/23 Levy — This amount is added to the levy to accumulate funding of future year rehabilitation projects, replacements, restorations or upgrades of District improvements. If zero, this line item may not be shown in the budget.

Use for FY 22/23 Rehab Projects – The amount of Rehabilitation Reserve monies expected to be transferred out of the Rehabilitation Reserve to fund the costs of installation, replacement or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the budget.

Transfer from/(to) the Operating Reserve — The amount of Rehabilitation Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Rehabilitation Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Parks and Recreation Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the budget.

Ending Rehab Reserve Balance 6-30-2023 (est.) - The projected balance of funds in the Rehabilitation Reserve as of June 30, 2023. These funds shall be used

to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment. Should the District have no Rehabilitation Reserve balances or related activity, no Rehabilitation Reserve information shall be presented in the Report.

E. REHABILITATION RESERVE – CAPITAL IMPROVEMENT PLAN

Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

The Report provides a five-year Capital Improvement Plan ("CIP") which shows projected expenditures related to the rehabilitation, restoration and/or replacement of District improvements, and other allowable costs. The Current Fiscal Year CIP is shown in the preceding Budget Section A. The projected CIP costs for the remaining four years are shown in the table below.

Description	FY 2023-24	FY 2024-25	FY 2025-26	FY 2026-27	4 Year Total
Repair, replace and/or refurbish street furniture	$3,000	$1,000	$3,000	$1,000	**$8,000**
Non-routine tree work	2,250	2,250	2,250	2,250	**9,000**
Replace, repair, renovate and/or refurbish plants, landscaping & related materials	10,000	3,000	7,000	2,000	**22,000**
Replace, repair, and/or refurbish light standard	2,000	5,000	2,000	5,000	**14,000**
Replace, repair electrical outlets	2,000	2,000	2,000	2,000	**8,000**
Total Projected Expenses	**$19,250**	**$13,250**	**$16,250**	**$12,250**	**$61,000**

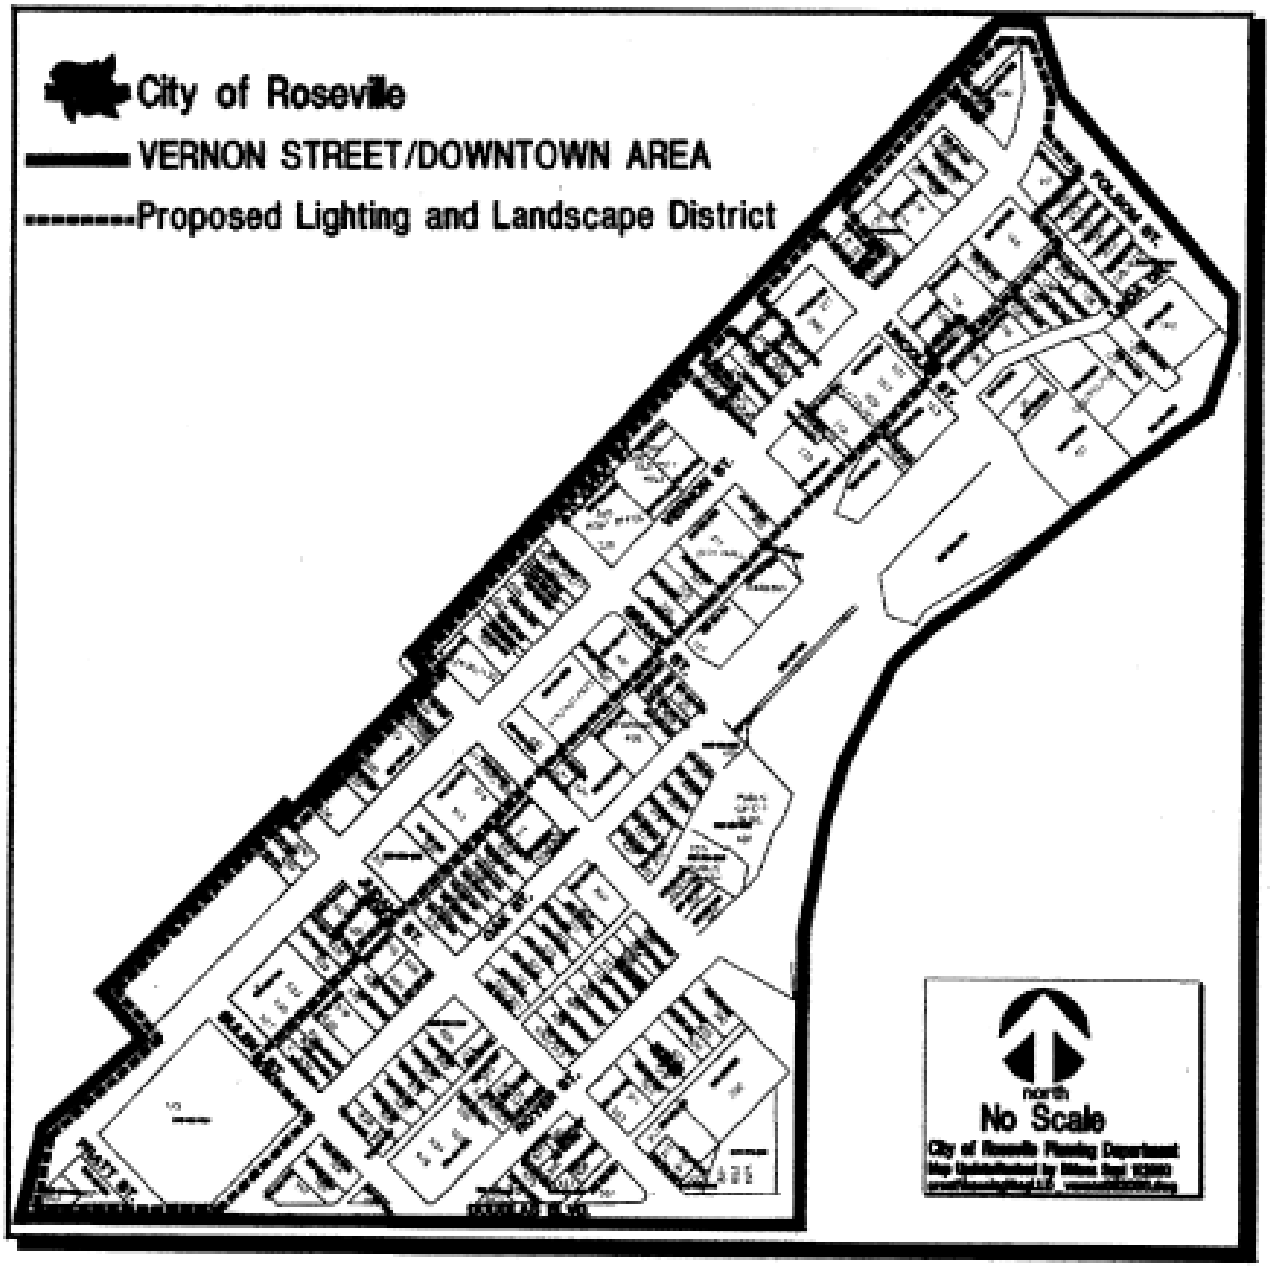
From time to time, funds held in a Rehabilitation Reserve may be needed to respond to changing needs due to the condition of the improvements or other factors. Accordingly, any or all funds held in a Rehabilitation Reserve are subject to transfer into the Districts' Operating Reserve, at the discretion of the Parks and Recreation Department or equivalent, in order to provide for the maintenance and/or operation of the improvements.

APPENDIX A – DISTRICT BOUNDARY MAP

The boundary map for the District has previously been submitted to the Clerk of the City in the format required under the 1972 Act and is, by reference, hereby made part of this Report. These District Boundary Maps are available for inspection at the office of the City Clerk during normal business hours.

For general reference purposes, a summary of the District's Boundaries is presented herein.

Assessment diagram



APPENDIX B — FY 2022/23 ASSESSMENT ROLL

Parcel identification, for each lot or parcel within the District, shall be the parcel as shown on the Placer County Assessor's map for the year in which this Report is prepared.

A listing of parcels to be assessed within this District, along with the proposed assessment amounts, shall be submitted to the City Clerk, under a separate cover, and by reference is made part of this Report.

Non-assessable lots or parcels may include areas of public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas and rights-of-ways including public greenbelts and parkways; utility rights-of-ways; common areas; landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempted from assessment.

At the conclusion of the public hearing for the District and the proposed assessments, approval of the Report (as submitted or as modified) confirms the method of apportionment and the assessment rate to be levied against each eligible parcel and thereby constitutes the approved levy and collection of assessments for FY 2022/23. The listing of parcels and the amount of assessment to be levied shall be submitted to the County Auditor/Controller and included on the FY 2022/23 property tax roll for each parcel.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the Current Fiscal Year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate approved in this Report. Therefore, if a single parcel has changed to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

COUNCIL COMMUNICATION

CC #: 2015
File #: 0800-03

Title:	Utility Billing Field Collection System - Master Sales Agreement Amendment
Contact:	Jason Kemp 916-746-1284 jkemp@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 7.9.

RECOMMENDATION TO COUNCIL

Staff recommends City Council adopt a resolution authorizing the City Manager to execute a Second Amendment to the Master Sales Agreement with Itron, Inc. Furthermore, staff requests that the City Manager or his designee is authorized to execute four (4) additional one (1) year renewals without further City Council approval, provided that the applicable budget is approved by the City Council each year, or until City staff determines that continuing with the same vendor is not in the City's best interest.

BACKGROUND

The City currently contracts with Itron to provide hardware and software for meter reading and billing purposes. This Second Amendment to the Master Sales Agreement is for the purpose of licensing the Field Tools Advanced software to the agreement. This software provides advanced features needed to support the meter upgrade project.

FISCAL IMPACT

The total annual cost of the second amendment is not to exceed $3,905. The first year is pro-rated and will cost $2,527.92. Funding for this amendment is included in the adopted FY2021-22 Electric Fund budget. This recommendation has no impact on the City's General Fund.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) only applies to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3)).

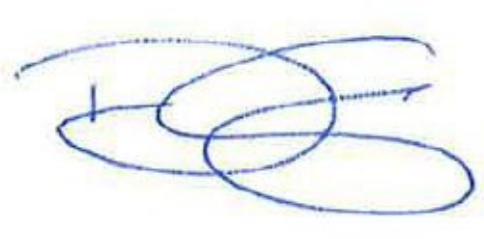
CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal E - Deliver exceptional city services

Respectfully Submitted,

Jason Kemp, Utility Billing and Field Services Supervisor

Daniel Beans, Electric Utility Director



_____

Dominick Casey, City Manager

Description

Resolution 22-095

Amendment

RESOLUTION NO. 22-095

APPROVING A SECOND AMENDMENT TO THE MASTER SALES AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND ITRON, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, the Second Amendment to the Master Sales Agreement, regarding licensing for Field Tools Advanced software, between the City of Roseville and Itron, Inc., has been reviewed by the Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said Second Amendment to the Master Sales Agreement is approved and the City Manager is authorized to execute it on behalf of the City of Roseville.

BE IT FURTHER RESOLVED that the City Manager or his designee is authorized to execute four (4) additional one (1) year renewals without further City Council approval, provided that the applicable budget is approved by the City Council each year, or until City staff determines that continuing with the same vendor is not in the City's best interest.

Second Amendment

This Second Amendment (this "***Amendment***") is effective as of the last date of execution below ("***Amendment Effective Date***").

RECITALS

WHEREAS Itron, Inc. ("Itron") and City of Roseville, California ("***Customer***") entered into that certain Master Sales Agreement dated December 20, 2017 (the "***Agreement***").

WHEREAS the Parties executed the First Amendment on September 17, 2020 whereby Customer Licensed Field Collection Service and added an Itron Mobile subscription to the Agreement.

WHEREAS the Parties now wish to amend the Agreement for the purpose of licensing Field Tools Advanced to the Agreement.

NOW, THEREFORE, in consideration of the mutual promises and obligations below, Itron and *Customer* agree to the foregoing recitals and as follows:

1. Capitalized terms used herein that are not otherwise defined in this Amendment shall have their meanings specified in the Agreement.

2. Add to Transaction Summary, the following row to the "Pricing Summary (Attached)".

BMR# 23476-22 Ver4 Mar, March 9, 2022

3. Add to the Technology & Services Addendum, Software as a Service Addendum, Service Level Attachment to Software as a Service Addendum, Section 1 Sizing Criteria:
   Add to the Itron Solution Application(s) row: **Field Tools Advanced**

4. Section 5.1 of the Agreement is hereby amended in its entirety to read:

   The initial term of this Agreement runs from the Effective Date until November 30, 2022, at which time it shall automatically renew for successive one (1) year periods-with up to a maximum of three (3) annual renewal terms in total - unless either Party provides one hundred eighty (180) days' prior written notice by either Party of intent not to renew prior to the applicable expiration date.

5. Except as provided in this Amendment, all terms and conditions of the Agreement remain unchanged and in full force and effect. In the event of a conflict or ambiguity between this Amendment and the Agreement, this Amendment shall control.

6. This Amendment may be executed in counterparts, which may be delivered by email, facsimile transmission or similar means.

INTENDING TO BE LEGALLY BOUND, each party represents and warrants that it has all necessary power and authority to enter into this Amendment to the Agreement.

Pricing Summary for

City of Roseville, California

BMR# 23476-22 Ver4 Mar
March 9, 2022

Item	Part Number	Description	Qty	Unit Price	Extended Price	Notes
Itron Cloud Services						*(1,2)*
Setup Fees						
1	FTA-SETUP-FEE	Field Tools Advanced Value-Add Setup Fee			$250.00	
Annual Subscription Fees					**7-Month Total**	
2	FTA H-SUB	Field Tools Advanced, From 100,001 - 150,000 Endpoints, Electronic Delivery ***May 1, 2022 through November 30, 2022***			$2,277.92	
		Itron Cloud Services Total			**$2,527.92**	

Notes and Assumptions

(1) Every new Field Tools Advanced customer must have Itron setup their Business Unit to make the Advanced Value-add features available to the Field Tools app or mobile client.

(2) Subscriptions are an annual fee shown in List Price, to gain access to the Advanced Value-add features of Field Tools. Quantity pricing is based on the total number of distinct endpoints owned by the utility.

(3) Unless otherwise agreed by the parties, Itron reserves the right to renew Recurring Services after the first year at the then-current price list.

(4) Freight and taxes are not included. Prices are in US dollars.

(5) Pricing is valid for 60 Days from the date of this quote. If a PO is not submitted within 60 Days, a new quote will be required.

COUNCIL COMMUNICATION

File #: 0800-03

Title: Load Research System Software - Sole Source Master Sales Agreement
Contact: Joanna Cucchi 916-746-1609 jcucchi@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 7.10.

RECOMMENDATION TO COUNCIL

Staff recommends City Council adopt a resolution authorizing the City Manager to execute a three year Master Sales Agreement (MSA) with Itron for three separate software licenses including Load Research System (LRS), MetrixLT, and MetrixND for utility data analytics.

BACKGROUND

Roseville Electric Utility uses Itron's Load Research System (LRS), MetrixLT, and MetrixND software to accomplish a variety of data analysis tasks. The LRS software is used to analyze customer energy usage at the 15 minute interval level. This data allows the Utility to develop cost-based rates and structures by customer group in compliance with the City Council approved ratemaking polices. The LRS software is also used to forecast future energy demand and develop energy efficiency programs.

Itron's MetrixLT and MetrixND are statistical analysis software packages that allow the Utility to develop forecasts for energy demand and revenue. MetrixND forecasts monthly energy and revenue used in budget planning, financial forecasting, and long term power contracting. MetrixLT translates the monthly forecast into load shapes used for the Integrated Resource Plan and distribution system planning.

Roseville Electric Utility has utilized Itron's fully integrated electric load analysis tools for load research and forecasting for several years. This relationship has afforded the Utility access to industry best practices and tools, maintained software interface continuity and compatibility, and will support the future development and implementation of time of use rate structures.

FISCAL IMPACT

The total cost for the three year master sales agreement is $86,527.41, which includes licensing for all three software products. The licensing costs for Year 1 is $26,141.24 and funding is available in the approved Electric FY2021-22 budget. Future funding requirements are

$28,755.33 for FY2022-23 and $31,630.86 for FY2023-24.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378.
The Master Sales Agreement for software licenses meets the above criteria and is not subject to CEQA. No additional environmental review is required.

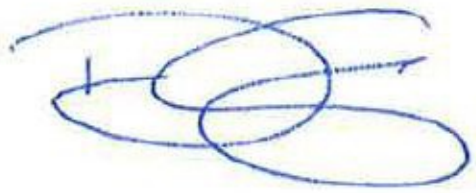
CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Remain fiscally responsible in a changing world.

Respectfully Submitted,

Joanna Cucchi, Senior Electric Business Analyst

Daniel Beans, Electric Utility Director



_____
Dominick Casey, City Manager

MASTER SALES AGREEMENT

General Terms and Conditions

This Master Sales Agreement (this "**Agreement**") is made between Itron, Inc. an entity organized under the laws of Washington having an address at 2111 N. Molter Road, Liberty Lake, WA 99019, USA ("**Itron**") and City of Roseville, California, an entity organized under the laws of California, having an address at Account Payable 311 Vernon Street Roseville, CA 95678-2649 ("**Customer**") on March 1, 2022 ("**Effective Date**"). Itron and Customer are collectively referred to as the "Parties" or a "Party", as applicable.

1 Introduction

1.1 Scope and Structure.
This Agreement applies to certain products and services provided by Itron to Customer and consists of these General Terms and Conditions, Addenda, Order Documents and Statements of Work.

1.2 General Terms and Conditions.
These General Terms and Conditions contain terms and conditions that are generally applicable to all products and services provided by Itron to Customer under this Agreement.

1.3 Addenda.
Addenda contain supplemental terms and conditions applicable to certain categories of products and services. Addenda incorporated into this Agreement on the Effective Date are identified on the Attachment Schedule. The Parties may add additional Addenda to this Agreement by written amendment after the Effective Date.

1.4 Order Documents.
Order Documents contain Fees and any related Statement of Work and supplemental terms and conditions applicable to specific products and/or services. Order Documents incorporated into this Agreement on the Effective Date are identified on the Attachment Schedule. The Parties may execute additional Order Documents after the Effective Date.

1.5 Order of Precedence.
In the event of a conflict between these General Terms and Conditions and an Addendum, the Addendum shall control. In the event of a conflict between an Order Document and these General Terms and Conditions or an Addendum, the Order Document shall control, but only with respect to the applicable products and services. These General Terms and Conditions, an Addendum or Order Document, as applicable, shall control over any conflict with a Statement of Work.

1.6 Purchase Order Requirement.
Customer shall purchase or license products or services described in each Order Document or Statement of Work under this Agreement by issuing a purchase order or similar ordering document accepted by Itron ("Purchase Order") indicating specific products and services, Itron part numbers, quantity, unit price, total purchase price, shipping instructions, requested shipping dates, bill-to and ship-to addresses, tax exempt certifications, if applicable, and contract reference. No contingency contained on any Purchase Order shall be binding upon Itron. The terms of this Agreement shall apply, regardless of any additional or conflicting terms of any Purchase Order or other correspondence or documentation

submitted by Customer to Itron, and any such additional or conflicting terms are deemed rejected by Itron.

2 Definitions.

The following defined terms are used throughout this Agreement. Additional terms may be defined in Addenda, Order Documents and Statements of Work.

Affiliate means any legal entity that directly or indirectly controls, is controlled by, or is under common control with, a Party to this Agreement, where "control" means ownership of at least fifty (50) percent of the equity having the power to vote on or direct the affairs of the entity.

Claim means an unaffiliated third-party claim, action, cause of action, or demand for damages, cost or expense (including reasonable attorney's fees) or other relief.

Confidential Information means any confidential, trade secret or other proprietary information disclosed by a Party or a Party's Affiliate related to its business that is designated as "confidential" or which a reasonable person knows or should understand to be confidential, regardless of the form of disclosure and whether of a technical, business or financial nature, including but not limited to processes and methods, product design and details of operation, product plans, prototypes, schedules, results, reports, computer programs, databases, compilations of data, engineering activity, manufacturing activity, analytical methods, strategies, and the like, but excluding information that: (i) is now or becomes generally available to the public through no fault or breach of the receiving Party; (ii) is rightfully in the receiving Party's possession, or known by it, prior to its receipt from the disclosing Party; (iii) is rightfully disclosed to the receiving Party by a third- party, free of any obligation of confidentiality; (iv) is developed by the receiving Party independently and without reference to the disclosing Party's Confidential Information, or (v) is rightfully disclosed pursuant to the applicable laws or regulations, or rules of any stock exchange, or orders of the court or other government authorities with notice to the disclosing Party.

Customer Data means all data about Customer's existing or prospective end users that Itron acquires, develops, or derives in connection with performance under this Agreement. Such customer data may include, without limitation, any personally identifying information relating to a Customer's existing or prospective end user, or any other information that, either individually or when combined with other information could be used to identify a particular Customer end user or a prospective Customer end user, which information is not generally available to the public.

Defended Party means a Party entitled to defense and indemnification from the other Party under Section 7 ("Third-Party Claims") of these General Terms and Conditions.

Defending Party means a Party obligated to provide defense and indemnification to the other Party under Section 7 ("Third Party Claims") of these General Terms and Conditions.

Documentation means user manuals, training materials, product descriptions and specifications, technical manuals, supporting materials and other documentation relating to products and services offered by Itron, which Itron customarily makes available to its customers.

Fees means all amounts payable to Itron by Customer for products and services provided under this Agreement, as set forth in an Order Document or Statement of Work.

Intellectual Property and **Intellectual Property** Rights mean all industrial and intellectual property, including, without limitation, patents, patent applications, invention registrations, and all other rights in inventions, copyrights in published and unpublished works, whether registered or unregistered, know-how, trade secrets, and confidential and proprietary information, whether such intellectual property has been created, applied for or obtained anywhere throughout the world.

Order Document means (i) any document attached hereto and identified as an Order Document or SOW on the Attachment Schedule on the Effective Date, and (ii) any other document identified as an Order Document or SOW that contains Fees and any related Statement of Work and

supplemental terms and conditions applicable to specific products and/or services, references this Agreement, and is executed by the Parties after the Effective Date.

Statement of Work or SOW means any document describing services to be provided by Itron that is (i) attached hereto and identified as a Statement of Work on the Attachment Schedule, or attached to an Order Document, on the Effective Date, or (ii) any other document identified as a Statement of Work that references this Agreement and is executed by the Parties, or is attached to an Order Document that is executed by the Parties, after the Effective Date.

Territory means the country in which Itron delivers products and services to Customer.

3 Term.

The initial term of this Agreement begins on the Effective Date and expires three (3) years following the Effective Date. Thereafter, the term of this Agreement will automatically renew for successive one-year periods, unless either Party provides the other with written notice of its intent not to renew at least ninety (90) days prior to commencement of the next renewal period. Any in-process Statements of Work and any accepted Purchase Orders as of the expiration date of this Agreement shall be completed by the Parties and the term of this Agreement will be extended solely for that purpose until completion. This section is subject to Section 11 ("Termination") of these General Terms and Conditions.

4 Warranties and Disclaimer.

4.1 Warranties.

All warranties relating to products and services provided by Itron under this Agreement are set forth in the applicable Addendum or Order Document.

4.2 Disclaimer.

EXCEPT FOR THE EXPRESS WARRANTIES PROVIDED BY ITRON UNDER SECTION 4.1 ("WARRANTIES") OF THESE GENERAL TERMS AND CONDITIONS, ITRON MAKES NO WARRANTY OF ANY KIND RELATING TO PRODUCTS AND SERVICES AND DISCLAIMS ALL IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION, (I) IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, (II) WARRANTIES OF TITLE AND AGAINST INFRINGEMENT, AND (III) WARRANTIES ARISING FROM A COURSE OF DEALING, USAGE OR TRADE PRACTICE. TO THE EXTENT ANY IMPLIED WARRANTY CANNOT BE EXCLUDED, SUCH WARRANTY IS LIMITED IN DURATION TO THE EXPRESS WARRANTY PERIOD. ITRON AND ITS SUPPLIERS DO NOT WARRANT OR REPRESENT THAT PRODUCTS OR SERVICES WILL BE FREE FROM BUGS, ERRORS OR THAT THEIR USE WILL BE UNINTERRUPTED OR ERROR-FREE. ITRON ASSUMES NO LIABILITY OR RESPONSIBILITY FOR ANY INTERRUPTION OR CESSATION OF TRANSMISSION TO OR FROM ITS DATA CENTERS OR DATA CENTERS OF ITS VENDORS VIA WAN, CELLULAR OR OTHER PUBLIC COMMUNICATIONS OR BROADBAND SYSTEMS (INCLUDING OUTAGES, DEVICE NON-REACHABILITY, LOSS OR INACCURATE READING) OR FOR ANY CONSEQUENCES, LOSSES, OR DAMAGES ARISING FROM CHANGES MADE BY CUSTOMER TO THE CONTENT OR PROGRAMMING OF EQUIPMENT (UNLESS CAUSED BY A DEFECTIVE PRODUCT). THESE DISCLAIMERS WILL APPLY NOTWITHSTANDING ANY FAILURE OF THE ESSENTIAL PURPOSE OF ANY LIMITED REMEDY PROVIDED UNDER THIS AGREEMENT.

5 Intellectual Property.

5.1 Reservation of Intellectual Property.

Subject to the limited rights expressly granted by Itron to Customer under this Agreement: (i) Itron reserves all rights, title and interest in and to all of its Intellectual Property, and (ii) as between the Parties, Itron owns all rights, title and interest in and to its Confidential Information and the products, services and related deliverables provided by Itron under this Agreement. Subject to the limited rights expressly granted by Customer to Itron under this Agreement, Customer reserves all rights, title and interest in and to all of its Intellectual Property, and (ii) as between the Parties, Customer owns all right, title and interest in and to its Confidential Information and Customer Data. All rights, titles, and interests

not specifically and expressly granted by either Party hereunder are hereby reserved. Nothing in this Agreement will be understood to preclude or limit Itron from providing software, materials, or services for itself or other clients, irrespective of the possible similarity of such software, materials or services to those delivered to Customer.

5.2 Customer Suggestions.
Itron shall have a royalty-free, worldwide, irrevocable, perpetual license to use and incorporate into any products and services any suggestions, enhancement requests, recommendations or other feedback provided by Customer.

6 Fees, Invoicing, Payment, and Taxes.

6.1 Fees.
Fees for products and services are set forth in the applicable Order Document or Statement of Work. Unless otherwise provided in an applicable Addendum, Order Document, or Statement of Work, Fees for products and services are in US Dollars and valid for one (1) year from the effective date of the Order Document or Statement of Work.

6.2 Invoicing.
Itron will invoice Customer for products and services in accordance with the applicable Addendum, Order Document or Statement of Work. Itron will issue invoices to Customer via US Mail to an address which Customer shall designate. Electronic copies of invoices can be emailed to an email address, which Customer shall designate.

6.3 Payment.
Customer must pay each invoice within thirty (30) days of the invoice issuance date. Payment must be made in US Dollars and made by electronic transfer to a bank account designated by Itron.

6.4 Invoice Disputes.
Customer shall notify Itron in writing of any dispute with any invoice (along with substantiating documentation and a reasonably detailed description of the dispute) within ten (10) days from the original invoice date. Invoices for which no such timely notification is received shall be deemed accepted by Customer as true and correct, and Customer shall pay all amounts due under such invoices within the period set forth in Section 6.3. The Parties shall seek to resolve all such disputes expeditiously and in good faith in accordance with the dispute resolution provisions set forth in Section 14. Notwithstanding anything to the contrary, each Party shall continue performing its obligations under this Agreement during any such dispute, including, without limitation, payment by Customer of all undisputed amounts due and payable under this Agreement.

6.5 Late Payment.
Except for invoiced payments that Customer has timely disputed, all late payments shall bear interest at the lesser of the rate of one percent (1%) per month or the highest rate permissible under applicable law, calculated daily and compounded monthly. Customer shall also reimburse Itron for all reasonable costs incurred in collecting any late payments, including, without limitation, attorneys' fees. In addition to all other remedies available under this Agreement or at law (which Itron does not waive by the exercise of any rights hereunder), Itron shall be entitled to suspend the provision of any services and/or delivery of any products if Customer fails to pay any undisputed amounts when due hereunder and such failure continues for fifteen (15) days following written notice thereof.

6.6 Right to Sell Receivables.
Customer agrees that Itron is entitled to sell and assign amounts due by Customer related to an undisputed invoice to any third party. Customer agrees to promptly sign all such documents, and take all such further actions, as Itron may reasonably request from time to time to facilitate and/or evidence such sale and assignment.

6.7 No Setoff.
Customer shall not withhold payment of any amounts due and payable under this Agreement by reason of any setoff of any claim or dispute with Itron, whether relating to Itron's breach, bankruptcy, or otherwise.

6.8 Taxes.
All prices are exclusive of any taxes, however designated, including without limitation sales or use, goods and services, consumption or other similar fees or taxes imposed on it with respect to the payments due to Itron under this Agreement. Customer shall be responsible for and pay on a timely basis any taxes imposed on it related to products and services provided by Itron pursuant to this Agreement (except for taxes based on Itron's net income) or shall present Itron with an exemption certificate or direct pay permit authorized by the relevant taxing authorities. Applicable taxes shall, to the extent practical, be billed as a separate item on the invoice. The Parties agree to fully cooperate with one another regarding taxes and any related issues arising from this Agreement and to use reasonable efforts to make use of any lawful reliefs or exemptions that could apply. Customer shall indemnify and hold Itron and its affiliates harmless from any tax liability assessed against Itron or its affiliates but rightfully owed by Customer arising from or related to transactions relating to this Agreement.

7 Third-Party Claims.

7.1 General Claims.
The Defending Party will defend the Defended Party from and against Claims arising from personal bodily injury, death, or damage to tangible personal property or real property, and will indemnify the Defended Party from resulting settlements approved by the Defending Party and final judgments entered against the Defended Party, to the extent caused by the negligence of the Defending Party.

7.2 Infringement Claims.
Itron will defend, or at its option settle, any Claim against Customer alleging that any Itron-branded products or services, as delivered to Customer, infringe upon any third party's Intellectual Property Rights within the Territory. If Itron receives notice of an alleged infringement by any products or services, or if Itron reasonably believes that an infringement Claim is likely, Itron may stop delivery of the affected products or services without liability for failure to deliver them. Itron will have the right, at its sole option, to obtain the right for Customer to continue use of the affected products or services, or to replace or modify the affected products or services so that they are no longer alleged or believed to infringe, if it can be done without significant loss of functionality. If neither of the foregoing options are available to Itron on commercially reasonable terms, Itron may terminate Customer's use of the affected products or Services without further liability under this section, in which case Itron will refund to Customer the depreciated value of the affected product and any prepaid unused portion of the service.

7.3 Conditions to Defense.
As a condition to the Defending Party's obligations under Section 7.1 or Section 7.2 above, the Defended Party must: (i) promptly notify the Defending Party in writing of the Claim; (ii) give the Defending Party all reasonably requested information and assistance in connection with the Claim in a timely manner; and (iii) give the Defending Party the sole right to control the defense and settle of the Claim. The Defending Party shall not enter into any settlement of a Claim against a Defended Party without the Defended Party's prior written consent unless: (a) there is no admission of fault of the Defended Party; (b) there is no injunctive or other non-monetary relief against the Defended Party; and, (c) the settlement includes the claimant's or plaintiff's release of the Defended Party from all liability in respect of the Claim.

7.4 Exclusions to Infringement Claim Defense.
Itron will have no obligation under Section 7.2 above for any infringement Claim in which infringement is alleged or caused by (i) the combination, operation or use of any product or service provided by Itron

with any product or service (including third-party software and equipment) not provided by Itron, (ii) any modification to products or services made either without Itron's prior written consent or by a person other than Itron or an authorized representative of Itron , (iii) failure to use updated or modified products or services as provided by Itron, (iv) use of any release of Itron software or any firmware other than the most current release made available to Customer, (v) use of products or services not in accordance with this Agreement and applicable Documentation, or (vi) Itron's compliance with any designs, specifications, or instructions provided by Customer. In addition, Itron shall not be liable for enhanced or punitive damages that could have been avoided or reduced by actions within the control of Customer.

7.5 EXCLUSIVE REMEDY. THIS SECTION 7 CONSTITUTES CUSTOMER'S SOLE AND EXCLUSIVE REMEDY WITH RESPECT TO THIRD PARTY CLAIMS BROUGHT AGAINST CUSTOMER.

8 Insurance.

Itron will maintain the following minimum levels of insurance (i) workers' compensation insurance for Itron employees equal to applicable statutory limits and an employer's liability policy in an amount not less than $1,000,000.00; (ii) an occurrence form commercial general liability policy or policies in an amount not less than $1,000,000 per occurrence and $2,000,000.00 aggregate; (iii) an automobile liability policy or policies in an amount not less than $1,000,000.00 combined single limit; and (iv) a professional liability policy or policies insuring against liability for errors and omissions covering professional activities contemplated under this Agreement in an amount not less than $1,000,000.00. Upon written request, Itron will provide Certificates of Insurance evidencing the coverage described, so long as Itron is providing products or services under this Agreement.

9 Data Protection.

The Parties must implement and establish reasonable security protocols for the protection and retention of Customer Data. As between Customer and Itron, Customer will retain its rights in Customer Data; provided, however, Customer hereby grants Itron a non-exclusive, royalty-free, perpetual, worldwide license to copy, modify, use, sublicense, distribute, display, create derivative works of all Customer Data for the purposes of (i) providing products and services to Customer, (ii) testing, troubleshooting, and optimizing performance and quality of Itron's products and services, and (iii) so long as Customer is not identifiable and all personally identifiable information is either removed or anonymized, developing new products and services. Itron assumes no responsibility for Customer or third-party content carried on Customer's or Itron's systems. Customer warrants and represents that, during the term of this Agreement, (a) it has the legal right and authority to grant Itron access to view, store, and use the Customer Data to provide products and services, and (b) Itron's transmission, use and storage of any such Customer Data in accordance with this Agreement will not violate any applicable laws or regulations or cause a breach of any agreement or obligation between Customer and any third-party.

10 Confidentiality.

Each Party receiving, possessing, accessing or otherwise acquiring Confidential Information of the other Party acknowledges that the disclosing Party's Confidential Information is the property of and confidential to, or a trade secret of, the disclosing Party. The receiving Party: (a) must keep the disclosing Party's Confidential Information confidential and may not directly or indirectly disclose, divulge or communicate that Confidential Information to, or otherwise place that Confidential Information at the disposal of, any other person without the disclosing Party's prior written approval; (b) must take all reasonable steps to secure and keep secure all disclosing Party's Confidential Information coming into its possession or control; (c) may not disclose any Confidential Information to anyone other than the receiving Party's employees, agents, contractors or subcontractors and professional advisors, or those of its Affiliates, who have a need to know such Confidential Information; (d) must use the Confidential Information solely for purposes related to the subject matter of this Agreement or for potential future commercial transactions between the Parties not otherwise covered by a separate agreement; and (e) must ensure that any person to whom it discloses Confidential Information in accordance with this provision is subject to binding confidentiality obligations that are at least as restrictive as those set forth in this Agreement.

11 Termination.
Either Party may terminate this Agreement by providing the other Party with written notice if the other Party (i) becomes insolvent, executes a general assignment for the benefit of creditors or becomes subject to bankruptcy or receivership proceedings, or (ii) commits a material breach of this Agreement that remains uncured for thirty (30) days following delivery of written notice of such breach. Any notice of breach must specify (a) the nature of the breach, and (b) the specific act or acts that the non-breaching Party contends would correct such breach. For the avoidance of doubt, Customer's failure to pay invoices timely will be deemed a material breach of this Agreement.

12 Survival.
The following sections of these General Terms & Conditions shall survive termination or expiration of this Agreement or any Order Document or Statement of Work: 1 (Introduction), 2 (Definitions), 3 (Term), 4.2 (Disclaimer), 5 (Intellectual Property), 6 (Fees, Invoicing, Payment and Taxes), 9 (Data Protection), 10 (Confidentiality), 11 (Termination), 12 (Survival), 13 (Limitation of Liability), 14 (Disputes), 15 (Governing Law and Venue), 17 (Publicity), 18 (Sub-contractor and Outsourcer), 19 (Independent Contractor), and 20 (Miscellaneous). An Addendum or Order Document may also contain provisions that expressly survive termination or expiration of this Agreement or any Order Document or Statement of Work.

13 Limitation of Liability.
Except for Customer's violation of Itron's Intellectual Property Rights, neither Party will be liable to the other Party for any consequential, indirect, special, incidental, punitive or exemplary damages arising out of this Agreement or products or services provided hereunder (including, but not limited to, damages for loss of data, goodwill, profits other than amounts payable by Customer to Itron hereunder, investments, use of money or facilities; interruption in use or availability of data; stoppage of other work or impairment of other assets), whether or not foreseeable and even if such Party has been advised of the possibility of such damages. Except for Customer's payment obligations hereunder or violation of Itron's Intellectual Property Rights, neither Party's total, aggregate liability to the other Party arising out of or related to this Agreement or any products or services provided hereunder shall exceed available insurance limits

14 Disputes.
The Parties shall resolve any dispute, controversy, or claim arising out of or relating to this Agreement, or the breach, termination or invalidity hereof (each, a "**Dispute**") in accordance with this Section. A Party shall send written notice to the other Party of any Dispute ("**Dispute Notice**"). The Parties shall first attempt in good faith to resolve any Dispute set forth in the Dispute Notice by negotiation and consultation between themselves. In the event that such Dispute is not resolved on an informal basis within thirty (30) Business Days after one Party delivers the Dispute Notice to the other Party, either Party may, by written notice to the other Party ("**Escalation to Executive Notice**"), refer such Dispute to the executives of each Party designated by such Party in a written notice to the other Party ("**Executive(s)**"). If the Executives cannot resolve any Dispute during the time period ending thirty (30) Business Days after the date of the Escalation to Executive Notice (the last day of such time period, the "**Escalation to Mediation Date**"), either Party may submit the Dispute to any mutually agreed to mediation service for mediation by providing to the mediation service a joint, written request for mediation, setting forth the subject of the dispute and the relief requested. The Parties shall cooperate with one another in selecting a mediation service and shall cooperate with the mediation service and with one another in selecting a neutral mediator and in scheduling the mediation proceedings. The Parties covenant that they will use commercially reasonable efforts in participating in the mediation. The Parties agree that the mediator's fees and expenses and the costs incidental to the mediation will be shared equally between the Parties. If the Parties cannot resolve any Dispute for any reason, including, but not limited to, the failure of either Party to agree to enter into mediation or agree to any

settlement proposed by the mediator, within sixty (60) Business Days after the Escalation to Mediation Date, either Party may proceed in accordance with the provisions of Section 15 (Governing Law and Venue). Notwithstanding the foregoing, nothing in this Section shall be construed as preventing a Party from seeking available equitable relief, including without limitation, specific performance and injunctive relief in a court of competent jurisdiction.

15 Governing Law and Venue.

This Agreement and all related documents, including all addenda attached hereto, and all matters arising out of or relating to this Agreement, whether sounding in contract, tort, or statute are governed by, and construed in accordance with, the laws of the State of California, United States of America (including its statutes of limitations), without giving effect to the conflict of laws provisions thereof to the extent such principles or rules would require or permit the application of the laws of any jurisdiction other than those of the State of California. The Parties agree that the United Nations Convention on Contracts for the International Sale of Goods does not apply to this Agreement.

Each Party irrevocably and unconditionally agrees that it will not commence any action, litigation, or proceeding of any kind whatsoever against any other Party in any way arising from or relating to this Agreement and all contemplated transactions, including, but not limited to, contract, equity, tort, fraud, and statutory claims, in any forum other than in Placer County, California. Each Party irrevocably and unconditionally submits to the exclusive jurisdiction of such venue and agrees to bring any such action, litigation, or proceeding only in the Superior Court for Placer County of California or, if such court does not have subject matter jurisdiction, the courts of the State of California. Each Party agrees that a final judgment in any such action, litigation, or proceeding is conclusive and may be enforced in other jurisdictions by suit on the judgment or in any other manner provided by law.

16 Legal Compliance.

Each Party must comply with all applicable laws. Itron's products and services delivered under this Agreement are subject to the U.S. Export Administration Regulations ("EAR"; 15 CFR part 730 et seq.) and any applicable laws and regulations of the particular country to which such items are shipped or received. Customer shall comply with all applicable export control laws and shall not cause, directly or indirectly, the export, re-export, or transfer of any such items or services to destinations or persons without obtaining any required prior authorization from the U.S. Government and any other applicable local authorities. Customer shall not do anything to cause Itron to violate such export control laws, including, but not limited to, requesting support for a product that has been unlawfully re-exported or requesting delivery of a product or service intended for a U.S. sanctioned region or person. Each party represents that it is not listed on a U.S. Government restricted party list for export control or trade sanctions purposes, and is not 50% or more owned, in the aggregate, by one or more restricted parties. Customer shall maintain any required export records related to Itron's products or services and make such records available to Itron upon request. The Parties must comply with all anti-bribery laws and may not make any payments or transfer any item of any value for the purpose of bribing any individual or group, or accepting or participating in any extortion, kickbacks, or other unlawful or improper means to obtain business related to this Agreement or products and services orderable under this Agreement.

17 Publicity.

Neither Party may issue a press release related to this Agreement or their relationship without the other Parties' prior written consent. The Parties will create and approve for publication a press release announcing their relationship under this Agreement. Itron may use Customer's name and logo as a part of Itron's normal marketing materials.

18 Nuclear Applications.

Customer acknowledges that products and services orderable under this Agreement are not designed or intended for use in the design, construction, operation or maintenance of any nuclear facility.

19 Sub-contractor and Outsourcer.
Itron may hire, engage, or retain the services of one or more subcontractors and/or outsourcing providers to perform any or all of its obligations related to its product development, network operations, and/or any portion of services provided under this Agreement. Subcontractors and outsourcing providers that have access to Customer Data will be bound by written obligations of confidentiality and data security requirements as restrictive as those required under this Agreement.

20 Independent Contractor.
This Agreement does not create a partnership, franchise, joint venture, agency, fiduciary, or employment relationship between the Parties. The Parties are independent contractors. Neither Party has any authority to act on behalf of, or to bind the other to any obligation.

21 Force Majeure.
Neither Party (the "Impacted Party") shall be liable or responsible to the other Party, nor be deemed to have defaulted under or breached this Agreement, for any failure or delay in fulfilling or performing any term of this Agreement (except for Customer's obligations to make payments to Itron under this Agreement), when and to the extent such failure or delay is caused by or results from acts or omissions (whether in effect on or after the Effective Date of this Agreement) beyond the Impacted Party's reasonable control and without the Impacted Party's negligence, including, without limitation: (a) acts of God; (b) severe weather, flood, fire, earthquake or explosion; (c) war, invasion, hostilities (whether war is declared or not), terrorist threats or acts, riot, or other civil unrest; (d) changes in applicable laws or regulations; (e) embargoes or blockades; (f) action or inaction by any governmental authority; (g) national or regional emergency; (h) strikes, labor stoppages, or slowdowns or other industrial disturbances; (i) shortage of adequate materials, qualified labor, power or transportation; (j) epidemics, pandemics or quarantines; and (k) other similar or dissimilar circumstances outside the Impacted Party's reasonable control and without the Impacted Party's negligence (each a "**Force Majeure**").

22 Miscellaneous.
(a) If any provision of this Agreement is found to be unenforceable by a court of competent jurisdiction or arbitration panel, such provision will be deleted and the remaining terms will be construed so as to give maximum lawful effect to any such deleted terms. (b) Section numbers and captions are provided for convenience of reference and do not constitute a part of this Agreement. Any references to a particular section of this Agreement will be deemed to include reference to any and all subsections thereof. (c) The Parties agree that neither of them will be deemed the drafter of this Agreement and that no provision will be construed in favor of one Party on the ground that such provision was drafted by the other. (d) No waiver by either Party of any breach under this Agreement will constitute a waiver of any other breach. (e) This Agreement is not made for the benefit of any third parties. (f) All notices under this Agreement must be sent in writing to the addresses identified in this Agreement or to such other address as such Party has notified the other in writing, will be effective on the date received (unless the notice specifies a later date) and must be sent by a courier service that confirms delivery in writing, or by certified or registered mail, postage prepaid, return receipt requested. All communications and notices to be made or given pursuant to this Agreement must be in English. (g) Customer may not assign this Agreement or any of its rights hereunder without Itron's prior written consent. Subject to the foregoing, this Agreement will bind and inure to the benefit of the Parties and their respective successors and permitted assigns, but any assignment in violation of this provision will be void. (h) This Agreement may be executed and delivered in counterparts, including by a facsimile or by scan and electronic transmission, each of which will be deemed an original. Any document generated by the Parties related to this Agreement may be imaged and stored electronically and introduced as evidence in any proceeding as if original business records. (i) This Agreement contains the complete and entire agreement between the Parties as to its subject matter, and replaces and supersedes any prior or contemporaneous communications, representations, or agreements, whether oral or written with respect to such subject matter. (j) This Agreement may not be modified except by mutual written agreement signed by the Parties' authorized representatives expressly modifying this Agreement. Electronic communications do not constitute a "written agreement" under this provision

- Maintenance and Support Services Addendum
- Software Addendum
- Sales Order Document
- Pricing Summary

MAINTENANCE AND SUPPORT SERVICES ADDENDUM

1 Relationship to General Terms and Conditions.
This Addendum is governed by the General Terms and Conditions and applicable Order Documents.

2 Additional Definitions.
The following defined terms are in addition to those defined in the General Terms and Conditions:

Annual Adjustment means Itron's annual price increase.

Annual Fees means the annual fees identified in an Order Document for each category of Covered Product, plus the Annual Adjustment, if any.

Client Services Guidelines Documents means the following documents as they may be updated by Itron from time to time: "Product Contact Information Sheet", "After Hours Support", "Itron Equipment Repair Center Locations", and "Working Effectively with Itron Global Services". Copies of the Client Services Guidelines Documents may be obtained by calling (877) 487-6602 or such other number or process provided by Itron to Customer.

Covered Equipment means Itron equipment identified as "Covered Equipment" in an Order Document.

Covered Firmware means Itron's network and application firmware embedded within a communicating device identified in an Order Document (e.g., network interface cards, meters, endpoints, network equipment, etc.) for which Customer has purchased firmware Maintenance Services.

Covered Products mean Covered Firmware, Covered Software, Covered Equipment and Third Party Covered Products.

Covered Software means Itron software identified as "Covered Software" in an Order Document.

Error means a material failure of Covered Firmware or Covered Software to comply with applicable published Itron specifications.

Fix means a correction or workaround for an Error.

Global Support Services means those support services provided by Itron technical representatives via telephone, email, website or other means to assist Customer's Primary Service Contacts with questions or issues related to the operation of Covered Products.

Improvement means an update, modification, enhancement and/or extension to Covered Software functionality that is included in a Release.

M&S Commencement Date means the date upon and after which a Covered Product will be entitled to receive Maintenance Services, which unless otherwise provided in the applicable Order Document, will be as follows:

Covered Product	M&S Commencement Date
On premise Covered Software	First day of month following date Covered Software is made available to Customer
Covered Firmware	Date of shipment of the applicable communicating device
Covered Software provided as Software-as-a-Service or Hybrid SaaS subscription	The earlier of (1) validation of Software-as-a-Service implementation by Itron pursuant to the applicable Statement of Work, or (2) sixty (60) days after completing application system setup
Covered Equipment	End of warranty period
Third Party Covered Products	Per applicable third-party service provider terms and conditions

Maintenance Billing Cycle means a period of one year beginning on the Effective Date or any anniversary thereof.

Maintenance Services means services provided under this Addendum.

Operating Condition means performance in accordance with applicable published Itron specifications.

Primary Services Contacts means Customer's primary support staff who provides internal support to Customer's operations personnel and who are key interface to Itron for all Maintenance Services.

Release means a collection of Fixes and / or Improvements made available by Itron to Customer.

Service Levels means the defined level of impact and associated response time, effort level, and escalation path procedures and guidelines described in Attachment A-1 to this Addendum.

Service Request means an Itron tracked Customer request for Global Support Services.

Third Party Covered Products means third-party equipment and third-party software identified as "Third Party Covered Products" in an Order Document.

3 End of Support.

Itron may discontinue Maintenance Services for any Covered Equipment, Covered Firmware or Covered Software, effective as of the end of the applicable Maintenance Billing Cycle, by giving Customer written notice of such discontinuance no less than one hundred eighty (180) days prior to the end of such Maintenance Billing Cycle. The end of support date for a Third Party Covered Product shall be the date specified by the applicable third-party service provider, which date will be promptly communicated by Itron to Customer following the date of receipt.

If the end of support date is scheduled within a subsequent Maintenance Billing Cycle, Annual Fees for that subsequent Maintenance Billing Cycle will be pro-rated through the end of

support date. At Customer's request, or as defined in a related SaaS addendum / Order Document, Itron may elect to provide custom support for products for which Maintenance Services have been discontinued at Itron's then-current rates. Unless otherwise agreed by the Parties in accordance with the foregoing sentence, Itron shall have no obligation to provide Maintenance Services with respect to Covered Products for which Itron has discontinued Maintenance Services.

Periodically, Itron will make available product plan publications, including product information letters (PIL), product newsletters or written technology roadmaps which outline Itron's general plans for continued support and end of support of applicable Covered Products. Product publications are used as general guidelines for Customer communications and planning, which may be updated from time to time.

4 Principal Services Contacts.

4.1 Designation by Customer.

Customer shall designate a minimum of one and not more than two Primary Services Contacts for each Covered Product line, to serve as administrative liaisons for all matters pertaining to Maintenance Services for such Covered Product line and shall provide their contact information to Itron's customer account representative. Primary Services Contacts shall promptly report problems with Covered Products by submitting a Service Request for entry into Itron's support tracking system. Although it is Customer's sole right to choose its Primary Services Contacts, Customer and Itron acknowledge that each Primary Services Contact must have the appropriate technical skills and training for the position. If Customer replaces a Primary Services Contact, Customer will provide updated contact information to Itron's customer account representative, and the new Primary Services Contact will be properly trained prior to interfacing with Itron support personnel.

4.2 Training of Principal Services Contacts.

Before a Primary Services Contact interfaces with Itron support personnel, he/she will attend training sessions offered by Itron, an Itron-approved trainer, or Customer's training program approved by Itron to ensure that the Primary Services Contact is (i) knowledgeable about operation of the applicable Covered Products, and (ii) qualified to perform problem determination and remedial functions with respect to such Covered Products. Customer may perform Itron-approved training or may engage Itron to perform training of Primary Services Contacts at Itron's then current rates. Itron will make training sessions available by remote video conference or training will be made available at a location or in a manner mutually agreed by the Parties. Customer shall be responsible for all Customer's associated travel-related expenses and, if the Parties agree that training will be provided at a location other than an Itron-designated facility (e.g., at a Customer-proposed facility), Customer will also reimburse Itron's travel-related expenses. The Primary Services Contacts must have the skills and capabilities to train other Customer personnel on Covered Products. Itron may update Covered Product training from time to time and, upon receiving notice of such updates from Itron, Customer shall promptly provide such training to its Primary Services Contacts in accordance with this Section.

4.3 Global Support Services.
Itron will make support representatives available to provide technical support during its then current normal business hours as set forth in the Product Contact Information Sheet included within the Client Services Guidelines Document. Global Support Services include troubleshooting & problem diagnosis relating to Covered Products; release or system management consulting; and recommendations for fully utilizing Covered Products. Customer acknowledges and agrees that Global Support Services are not intended as a substitute for training of Customer personnel, field support, or Itron professional services. Nor will Customer use Global Support Services in lieu of having qualified and trained support personnel of its own.

4.4 Service Request Process.
Customer shall submit Service Requests in the manner required by the Client Services Guidelines Documents and Service Levels. Customer may submit Service Requests on a 24/7/365 basis and Itron will respond to such Service Requests in accordance with the Service Levels. When Customer submits a Service Request, Customer will reasonably assess its urgency according to the appropriate Severity Level in Attachment A-1 to this Addendum. Itron will designate the initial Severity Level and the Parties will resolve any perceived gap regarding the Severity Level designation as soon as is reasonably practical.

4.5 Field Support.
At Customer's request, and Itron's approval, Itron will dispatch support personnel to Customer's location to provide onsite Global Support Services ("*Requested Field Support*") related to a reported problem which cannot be addressed remotely. Requested Field Support will be billed at Itron's then-current rates, and Customer will reimburse Itron's travel-related expenses, unless the cause of the reported problem is found to be the fault of Itron.

5 Itron Firmware and Software Maintenance.

5.1 Scope.
Firmware Maintenance Services covers its associated Covered Firmware embedded within the applicable communicating device. Software Maintenance Services covers its associated Covered Software sold as any of the following: (i) on premise software license, and (ii) Software-as-a-Service or SaaS Hybrid subscription for software residing in the Itron cloud.

5.2 Modifications.
Itron may modify or replace Covered Firmware and Covered Software so long as such modifications or replacements do not eliminate key, documented functionality provided by the most current System Release.

5.3 Fixes.
Itron shall provide Fixes in accordance with the Service Levels. Itron's obligations with respect to Service Levels are contingent upon Customer (i) devoting the same level of effort to resolving the Error as is required of Itron, (ii) responding to requests made by Itron within the applicable Response Time, (iii) assigning only qualified personnel to help Itron address the Error, and (iv) providing all information, access, and assistance reasonably requested by Itron to address the Error.

5.4 Improvements.
Itron shall provide Improvements, if any, at no charge to Customer if such Improvements are made within the current product specifications and are made available to Itron customers generally at no charge. Improvements released as new add-on modules/features and not part of the products original specifications, may require additional licensing and support fees and will be made available at Itron's then current rates.

5.5 Software Releases.
5.5.1 Release Numbering Convention.
Upgrades, Fixes and/or Improvements are made available to customers through periodic Software Releases. For informational purposes, Itron's current practice (which may be changed by product, at any time in Itron's discretion) is to provide Software Releases using the numbering guideline, "X.X.X.X"

5.5.2 The first place, "X.X.X.X", in Itron's numbering convention refers to a "Major Release", or "System Release", which consists of a new version of Covered Software. A Major Release may include architectural changes, Improvements, Fixes and / or interfaces to new functional modules or platforms. A Major release may require infrastructure or component updates which affect compatibility with previous release versions.

5.5.3 The second place, "X.X.X.X", in Itron's numbering convention refers to a "Minor Release, which is an update to a current Major Release. A Minor Release may include consolidation of previous Service Packs, Improvements, Fixes, platform / 3rd party updates. Minor Release are provided to Itron customers on a regularly scheduled basis.

5.5.4 The third place "X.X.X.X", in Itron's numbering convention refers to a "Service Pack, which is an update to specific modules found in a current Major Release. A Service Pack may include Fixes to Severity 1 - Severity 4 issues for a specified Minor or Major Release.

5.5.5 The fourth place, "X.X.X.X", in Itron's numbering convention refers to a "Hot Fix," which is an un-scheduled release provided to one or more customers as a short-term, temporary fix to a critical Severity Level 1 Error. While not utilized by all Itron software product lines, Hot Fix releases are not made available to Itron customers generally but may be included in the next scheduled Minor Release or Service Pack for general release.

5.6 Support for Covered Firmware.
Itron will only provide Maintenance Services for Covered Firmware if Customer: (i) is current on all applicable fees for such Maintenance Services, (ii) tests and installs the latest Covered Firmware Fix within twelve (12) months of being made available to Customer, and (ii) tests and installs the latest Covered Firmware Improvement within twenty-four (24) months of being made available by Itron.

5.7 Support for On Premise Itron Enterprise Edition and OpenWay Software.
Itron will only provide Maintenance Services for on premise Itron Enterprise Edition and OpenWay software if Customer: (i) pays the applicable fees for such Maintenance Services, (ii) tests and installs Service Pack Releases associated with the Major or Minor Release in use by Customer within twelve (12) months of such Service Pack Releases being made available

to Customer, and (iii) tests and installs the latest Major or Minor Releases within twenty-four (24) months to thirty-six (36) months of such Software Release being made available by Itron.

5.8 Support for Other On Premise Covered Software.
Itron will only provide Maintenance Services for other on premise Covered Software if Customer: (i) pays the applicable fees for such Maintenance Services, and (ii) tests and installs Major, Minor and Service Pack Releases within twelve (12) months of such Software Releases being made available by Itron.

5.9 Support for SaaS or IaaS.
Itron will only provide Maintenance Services for Covered Software sold as a Software-as-a-Service or Hybrid SaaS subscription if Customer: (i) is current on all applicable fees for such Software-as-a-Service or SaaS Hybrid subscription and related Maintenance Services, and (ii) tests a Release as installed by Itron either in Customer's production Software-as-a-Service or Hybrid SaaS environment, or in Customer's funded non-production Software-as-a-Service or Hybrid SaaS environment, prior to Customer's full production use of the Release.

5.10 Support for Unsupported Itron Software and Firmware.
At Customer's request, Itron may elect to provide Maintenance Services for an unsupported Release at its then-current rates.

5.11 Mandatory Revisions.
Customer must install all on premise Mandatory Revisions. "Mandatory Revisions" are releases intended to address an Error, a material security breach, or a third-party infringement claim or suit of any kind. ITRON DISCLAIMS ALL LIABILITY RELATED TO OR ARISING OUT OF CUSTOMER'S FAILURE TO INSTALL AN ON PREMISE MANDATORY REVISION IN A TIMELY FASHION.

5.12 Installation Services for On Premise Releases.
Maintenance Services for on premise Covered Software and Covered Firmware includes the following Release installation services: limited, remote consulting support, during standard business hours, for Covered Software and Covered Firmware on Itron-approved server configurations for one production server and one non-production server (test, training, or back-up – for example) owned / operated by Customer. At Customer's request, Itron may provide on premise Software Release installation services for System Releases or Service Packs on current certified production servers, additional production servers or nonproduction servers, at its then-current rates. Itron will install Releases to Covered Software sold as a Software-as-a-Service or Infrastructure-as-Service subscription in accordance with the applicable terms and conditions for such services.

5.13 Restoring Firmware or Software to Maintenance Services.
If Customer declines or discontinues Maintenance Services for Covered Firmware or Covered Software and thereafter wishes to resume such Maintenance Services for the most recent Release of that Covered Firmware or Covered Software, Customer shall, prior to receiving Maintenance Services, notify Itron in writing of its request for Maintenance Services and pay Itron's then-current re-initiation fee, which shall not exceed an amount equal to all Annual Fees that would have been invoiced for the applicable Covered Firmware or Covered Software if Customer had not elected to decline or discontinue Maintenance Services for that Covered

Firmware or Covered Software, plus a five percent (5%) markup, in addition to prorated Annual Fees for the then-current Maintenance Billing Cycle.

5.14 Exclusions.
Itron shall have no obligation to provide Maintenance Services for, or liability to Customer for Covered Software adversely affected by (i) use of Covered Firmware or Covered Software by anyone other than Itron in combination with software, equipment, or communications networks not referenced in the Documentation as being compatible with the Covered Firmware or Covered Software; (ii) modification or recompiling of Covered Firmware or Covered Software or Covered Software installation instructions / installation scripts or database schema scripts, or improper installation of a Release, by anyone other than Itron, (iii) failure to perform customer responsibilities describe in this Addendum, (iv) use of an unsupported version of Covered Firmware or Covered Software by anyone other than Itron; (v) Customer's failure to implement an on premise Mandatory Revision; (vi) maintenance and/or support of Covered Firmware or Covered Products other than by Itron; or (vii) viruses introduced through no fault of Itron.

5.15 Documentation and Backup.
Itron will make an electronic copy of the Documentation available to Customer at no additional charge via physical media or download access. Itron will also maintain a copy of its most recent supported version of executable Covered Firmware and on premise Covered Software to be made available to Customer or installed by Itron as necessary in the event of corrupted or inoperative Covered Firmware or on premise Covered Software. Said copy of executable Covered Firmware or on premise Covered Software or Third-Party software does not relieve Customer of its responsibility to backup and managed its Covered Firmware or on-premise software installation as part of ongoing system operation.

5.16 Customer Responsibilities.
The provision of Maintenance Services for Covered Firmware or Covered Software by Itron assumes that Customer will facilitate such services as follows:

5.16.1 Service Requests.
Customer will support Itron investigation and restoration efforts as defined in the Service Level table and will act upon / implement support solutions and workarounds recommended by Itron in a timely fashion. When escalating a Service Request with Itron, Customer's Primary Service Contact shall collect and provide all data logs, findings, analysis, and any relevant forensic information pertaining to the issue as outlined in Client Services Guideline Documents.

5.16.2 Data Review.
If Itron determines that it is necessary to evaluate Customer data to reproduce error conditions not reproducible with Itron's standard test data sets, Customer will provide Itron with reasonable access to such data. Itron shall not be liable for any delay or failure to resolve the problem if access to such Customer data is denied to Itron.

5.16.3 Installation and Upgrades.
Customer will engage Itron Global Support Services or their Itron account team for any Covered Firmware or on premise Covered Software installations and upgrades which require support beyond that provided herein.

5.16.4 Remote Access.
Customer is responsible for supporting necessary remote access to Covered Firmware or on premise Covered Software by Itron support personnel assigned to provide Maintenance Services for purposes of remote diagnosis and troubleshooting of Covered Firmware or on premise Covered Software. Itron shall not be liable for any delay or failure to resolve a problem if remote access to Covered Firmware or on premise Covered Software is denied to Itron.

5.16.5 System Configuration, Operation and Maintenance.
Customer is responsible for the configuration, operation, and maintenance of equipment, system peripherals, operating system, and data communications environment associated with on premise Covered Software. These activities include but are not limited to checking audit logs, clearing discovered exceptions, and performing daily, weekly, and monthly operational tasks and systems responsibilities. Customer is responsible for any change made to Customer's software system, operating system, database or network configuration or any change to installation procedures, scripts, or any other provisions that materially affect the usability or operation of on premise Covered Software. Customer will consult with Itron prior to making any material changes that may affect the installation or operation of on premise Covered Software.

5.16.6 Network Administration.
Customer is responsible to monitor and maintain, repair, replace and upgrade its local, and wide area network components (if any)—including network servers, network clients, network hubs, routers, modems, and other software components necessary for efficient and reliable network operations associated with Covered Firmware or on premise Covered Software—to ensure continued conformance with the applicable published Itron specifications. In addition, Customer is responsible to administer related host names, Internet Protocol addresses, network interfaces, access, security, communications, and equipment and software version control.

5.16.7 Database Administration.
Customer is responsible to administer the agreed upon database(s) associated with on premise Covered Software, including hardware and software components, in accordance with the Documentation, which administration shall include, monitoring the database server, backing up electrical power sources, and configuring and administering of database schema, application interfaces, networking operating system, communications, and file transfer software. Customer is responsible to maintain database files (e.g., truncate, cleanup, and delete files consistent with industry standard practices) and perform regular data backup and data archiving.

6 Itron Equipment Maintenance.

6.1 Preventive and Corrective Maintenance.
Upon receipt of an item of Covered Equipment, Itron shall (i) perform preventative Maintenance Services necessary to maintain the Covered Equipment in Operating Condition, and (ii) diagnose and correct any failure in the Covered Equipment as necessary to meet Operating Condition, excluding minor cosmetic deficiencies such as blemishes, dents or scratches.

6.2 Maintenance Procedures.
Customer shall initiate a request for Maintenance Services for Covered Equipment by delivering the Covered Equipment to the applicable Itron Certified Repair Center identified on the Itron Equipment Repair Table. Return of Covered Equipment shall be at Customer's expense and in accordance with Itron's then-current Return Material Authorization ("RMA") procedures. Upon receipt of Covered Equipment (with the required information) under Itron's RMA procedures, Itron shall assess the item to determine (a) whether it is in fact Covered Equipment and (b) whether the maintenance requested is included within the Maintenance Services ordered by Customer and not otherwise excluded from coverage. If the returned equipment is determined to be Covered Equipment and the maintenance requested is included in the Maintenance Services ordered by Customer, Itron shall provide the applicable Maintenance Services and return the item of Covered Itron Equipment to Customer at Itron's expense within the applicable turnaround time identified on the Itron Equipment Repair Table. If Itron determines that returned equipment is not Covered Equipment or is excluded from the Maintenance Services ordered by Customer, then Itron will proceed in accordance with the estimation fees section below.

6.3 Exclusions.
Covered Equipment Maintenance Services do not include repairs related to: (i) damage due to accident, abuse, misuse, inadequate maintenance, problems caused by electrical power surges or acts of God outside of the tolerances set forth in the applicable published Itron specifications; (ii) service or repair processes (including installation or de-installation of equipment, parts, or firmware/software) not performed or authorized by Itron; (iii) use of parts, configurations or repair depots not certified or authorized by Itron; or (iv) Customer's failure to perform material Customer responsibilities in accordance with this Addendum, including caring for Covered Equipment in accordance with applicable Documentation.

6.4 Estimation Fees.
Itron will provide Customer with a price quote for the estimated cost (including current inspection fees), including labor, materials and shipping, for any repairs to equipment that are requested, which Itron determines are excluded from or not included within the Maintenance Services ordered by Customer. If Customer elects not to proceed with the requested repair, Itron will return the item of equipment at Customer's expense and Itron may charge Customer its then-current inspection fee.

6.5 Adding/Restoring Equipment to Maintenance Services.
Following the Effective Date, additional Covered Equipment purchased by Customer, of a similar type and model already covered under this Addendum, shall automatically be deemed to be Covered Equipment following the M&S Commencement Date. If Customer declines or discontinues Maintenance Services for any Covered Equipment and thereafter wishes to add or restore such equipment as Covered Equipment, Itron may, prior to such equipment being included as Covered Equipment, inspect such equipment at Itron's then current rates to determine whether it is in Operating Condition and/or charge Itron's then current re-certification fee, in addition to prorated Annual Fees for the then-current Maintenance Billing Cycle (the "Re-initiation Costs"). At Customer's request, Itron will provide Customer with a quote for estimated Re-initiation Costs for equipment that Customer wishes to add or restore as Covered Equipment under this section.

6.6 Equipment Responsibilities.
Itron shall make available, and Customer shall obtain, a copy of the Documentation for Covered Equipment and Customer will be responsible to perform preventive maintenance for each such item in accordance with such Documentation. Customer shall also keep accurate records of Covered Equipment serial numbers and locations to assist Itron with performing Maintenance Services

7 Fees and Invoicing.
As compensation for the Maintenance Services, Customer shall, in advance, pay to Itron Annual Fees for each Maintenance Billing Cycle in which it receives Maintenance Services. Itron shall invoice Customer for Maintenance Services to be provided during the first Maintenance Billing Cycle as soon as practicable following the Effective Date. For Maintenance Services provided during any subsequent Maintenance Billing Cycle, including Maintenance Services for newly purchased or licensed Covered Products, Itron shall provide Customer with a renewal notice at least 120 days prior to the commencement of each Maintenance Billing Cycle. Customer may discontinue Maintenance Services for any Covered Product(s) by providing Itron with written notice of non-renewal for such Covered Product(s) no less than 90 days prior to the commencement of any subsequent Maintenance Billing Cycle. Otherwise, approximately 20 days prior to the commencement of each subsequent Maintenance Billing Cycle, Itron shall provide Customer with an invoice for Annual Fees payable by Customer for the forthcoming Maintenance Billing Cycle. Itron may, in its discretion, invoice Customer for Maintenance Services for a Covered Product that is added during any Maintenance Billing Cycle as soon as such Maintenance Services have been added (at a prorated amount) or at the beginning of the next Maintenance Billing Cycle. The Annual Fee for any partial Maintenance Billing Cycle (i.e., for Covered Products with a Maintenance Commencement Date or an increase in the applicable Annual Fees that falls after the beginning of the Maintenance Billing Cycle) shall be prorated based on the applicable M&S Commencement Date or Annual Fee increase date and the remaining number of months Customer is to receive Maintenance Services during such Maintenance Billing Cycle.

8 Support for Third Party Products.
Itron shall provide first tier Global Support Services for Third Party Covered Products by handling all Customer inquiries, attempting to identify the component involved in the problem and obtaining appropriate documentation of such inquiry or problem. In addition, Itron shall make commercially reasonable efforts to facilitate Customer's receipt of maintenance and support for such Third-Party Covered Products consistent with the third-party maintenance terms identified on the applicable Order Document. Notwithstanding anything else to the contrary, Itron's sole obligation under this Addendum with respect to Third Party Covered Products shall be as set forth in this section.

9 Survival.
The following sections of this Addendum shall survive termination or expiration of this Agreement or any Order Document or Statement of Work: Section 3 (End of Support), 6.14 (Exclusions), 7.3 (Exclusions), Section 8 (Fees and Invoicing) and 10 (Survival).

Attachment 1 to Maintenance & Support Services Addendum
– Software Maintenance & Support Service Levels –

Severity Level	Response Times	Effort Level and Restoration	Escalation
Severity Level 1* **Business Impact: Critical Impact / System Down.** A Production System Error for which there is no work-around, which causes Covered Firmware or Covered Software Product or a critical business function / process of said product to be unavailable such that system operation cannot continue. **Example:** a) Billing cannot be completed, b) Major documented function not working, c) System hung or completely down	During regular business-hours Itron will begin the Service Request process during Customer's initial call. During after-hour periods, Itron will respond to a critical support voice messages within 15 minutes by a return call to Customer, to validate receipt of the critical support call and begin the Service Request process. Following the start of the Service Request process Itron will respond to Customer's Service Request within two (2) business hours with an investigation response. Itron will update Customer at three (3) hour intervals during each day the Service Request remains unresolved, or as otherwise agreed by the Parties. Customer will respond to an Itron inquiry or request within three (3) hours.	Itron will make diligent efforts on a 24x7 basis, or as otherwise agreed by the Parties, to: i) restore Covered Firmware or Covered Software with a change to eliminate root cause, ii) provide a workaround which restores Covered Firmware or Covered Software and downgrades the Severity Level to S2, S3, S4. Customer Support Staff must be available 24x7 to work cooperatively with Itron continuously until such time restoration is achieved.	An unresolved Service Request shall be escalated to Itron management as follows: **After 30 minutes:** Technical Customer Support Team Lead **After 8 hours**: Manager, Technical Client Services **After 16 hours**: Director, Global Support Services **After 48 hours**: Service Request. Vice President, Services and Delivery **After 72 hours**: President, Itron

Severity Level	Response Times	Effort Level and Restoration	Escalation
Severity Level 2* **Business Impact: Major impact, degraded Operation**. An Error other than a Severity Level 1 Error, for which there is no work-around, which degrades or limits operation of major system functions causing Covered Firmware or Covered Software to miss required business interface or deadlines. Covered Firmware or Covered Software remains available for operation but in a highly restricted fashion. **Example:** a) Billing cannot be completed on time, b) Major function is operating outside documented timing / term, c) Covered Firmware or Covered Software operating slow, missing data, data delivery, daily mission.	During regular business-hours Itron will respond to Customer regarding Service Request within one (1) business day. While Service Request remains unresolved, Itron will update the Customer and the Service Request at least every other business day, or as otherwise agreed by the parties. Customer will respond to an Itron inquiry or request within one (1) business day.	Itron will make diligent efforts during normal business hours to: i) restore Covered Firmware or Covered Software with a change to eliminate root cause, ii) a workaround which restores Covered Firmware or Covered Software and downgrade the Severity Level to S3, S4.	An unresolved Service Request shall be escalated to Itron management as follows: **After 1 hours:** Technical Customer Support Team Lead **After 8 hours**: Manager, Technical Client Services **After 24 hours**: Director, Global Support Services **After 30 Days**: Vice President, Services and Delivery

Severity Level	Response Times	Effort Level and Restoration	Escalation
Severity Level 3** **Business Impact: Minor Business Impact, compromised operations.** An Error other than a Severity Level 1 or Severity Level 2 Error that has moderate impact on use of or access, with low business impact, but not preventing Customer from performing daily activities. Example: The Service Request affects use by Covered Firmware or Covered Software users, allowing Customer's functions to continue to meet daily business needs.	During regular business-hours Itron will respond to Customer regarding Service Request within two (2) business days. While Service Request remains unresolved, Itron will update the Service Request weekly, or as otherwise agreed by the parties. Customer will respond to an Itron inquiry or request within two (2) business days.	Itron will work during normal business hours to: i) restore Covered Firmware or Covered Software with a change to eliminate root cause, ii) a workaround which restores Covered Firmware or Covered Software and downgrades the Severity Level to S4.	

Severity Level	Response Times	Effort Level and Restoration	Escalation
Severity Level 4 **Business Impact: Standard Operations intact.** A low or no-impact Error other than a Severity Level 1, Severity Level 2 or Severity Level 3 Error, or a request for enhancement / new functionality Example: Generally, a cosmetic Error or an Error which does not degrade Customer's use of the product or system.	During regular business-hours Itron will respond to Customer regarding Service Request within three (3) business days.	Itron GSS Management Team will make commercially reasonable efforts during normal business hours to understand the Service Request and provide applicable recommendations as to when a Fix may be schedule in a future release, or how to proceed with a formal enhancement request to Itron's product and delivery teams.	

* Severity Level 1 and Severity Level 2 must be reported by phone to insure they are addressed under the appropriate severity level response process. Service Requests entered by email or Web access are generally addressed as a Severity Level 3.

** Service Request opened on Non-production servers / environments are entered as a Severity Level 3.

SOFTWARE ADDENDUM

1 Relationship to General Terms and Conditions.
This Addendum is subject to the General Terms and Conditions and applicable Order Documents.

2 Additional Definitions.
The following defined terms are in addition to those defined in the General Terms and Conditions:

Authorized Installations means installations of Itron Software only on one production environment and one test environment on Customer premises.

Endpoints means a physical device (e.g., a meter, encoder-receiver-transmitter module, or other measuring, monitoring or sensing device) capable of being used in connection with Itron Software.

Itron Software means the machine readable (object code) version of computer programs listed on an Order Document to be licensed to Customer under this Agreement that are developed by or on behalf of Itron.

License Term means the duration of the Itron Software license granted by Itron to Customer under this Addendum.

Software means Itron Software and Third-Party Software.

Software Warranty Period means a period of 90 days from the date of delivery, unless otherwise specified in the applicable Order Document.

Third-Party Software means the machine readable (object code) version of computer programs listed on an Order Document to be licensed to Customer by a third-party and that are not developed by or on Itron's behalf.

3 Ordering Software.
Customer shall order Software by issuing a Purchase Order to Itron in accordance with this Agreement.

4 Invoicing.
Itron will invoice Customer for Fees due for Software upon the date of delivery.

5 Itron Software License.
Subject to Customer's payment of all applicable Fees and compliance with this Agreement, Itron hereby grants to Customer a non-exclusive and non-transferable license during the License Term to use Authorized Installations of Itron Software and related Documentation for Customer's internal business purposes solely i) within the Territory ii)in connection with the number of Endpoints or other devices specified on the applicable Order Document; and iii) in accordance with any other restrictions specified on the applicable Order Document. Customer is not permitted to copy Itron Software other than to make one machine readable copy for disaster recovery or archival purposes.

6 Third-Party Software.

All Third-Party Software and related documentation is separately licensed to customer by the applicable third-party, and Customer's rights and responsibilities with respect to such software or documentation shall be governed in accordance with the third-party licensor's applicable software license. If Customer chooses to order Third Party Software, Customer shall enter into or accept one or more separate third-party agreements as part of the ordering, fulfilment, installation and/or download processes for such Third Party Software.

7 Documentation.

Itron will make its standard Documentation for Itron Software available via download. Itron will provide Customer with download instructions.

8 Itron Software License Restrictions.

Customer is not permitted to (i) modify or create any derivative works from Itron Software, (ii) distribute the Itron Software, (iii) include or combine Itron Software with any software, equipment, or hardware other than as expressly authorized in writing by Itron, (iv) use Itron Software to provide services to third-parties, (v) reverse assemble, decompile, reverse engineer Itron Software or otherwise attempt to derive its source code except as may be permitted by applicable law, (vi) export Itron Software out of the Territory, or (vii) use any Itron Software to create products or services that compete with any of Itron's products or services. Customer's breach of these restrictions or use of Itron Software or Documentation other than as licensed hereunder shall constitute a material breach of this Agreement and shall result in revocation and immediate termination of all rights and licenses granted under this Agreement. Revocation does not preclude Itron from pursuing any legal and equitable remedies for Customer's breach of these restrictions.

U.S. Government Contracts Only. If a Software license is acquired under a United States government contract, Customer acknowledges that Software, Updates and associated Documentation (i) are "Commercial Computer Software" as defined in 48 C.F.R. 12.212 of the Federal Acquisition Regulations (FAR) and in 48 C.F.R. 227.7014(a)(i) of the Department of Defense Federal Acquisition Regulations Supplement (DFARS), and (ii) are provided with only the commercial rights and subject to the restrictions described in this Agreement.

9 Limited Itron Software Warranty.

For the Software Warranty Period, Itron warrants solely to Customer that the Itron Software will substantially conform in all material respects to the applicable Itron published specifications. As Customer's sole and exclusive remedy for any breach of this warranty, Itron will, at its option, during the warranty period set forth in this section, repair or replace non- conforming Itron Software to substantially conform to the foregoing warranty, provided that Itron will have no obligation to repair or replace any non-conforming Itron Software if this Agreement or applicable Order Document has terminated or expired. The foregoing warranty does not apply to non-conformities in Itron Software due to: (i) modifications not made or approved by Itron in writing; (ii) Customer's or any third party's negligence or intentional acts; (iii) misuse or abuse, including the failure to use or install Itron Software in accordance with the Documentation; (iv) incorrect data, or data entry or output, as applicable, by Customer or a third party; (v) use with third party software, hardware or firmware not provided or authorized by Itron in writing; (vi) a Force Majeure event; or (vii) viruses or security vulnerabilities introduced into the Itron Software or Customer's systems through no

fault of Itron. After the ninety (90) day period described above, any Itron Software errors will be addressed under maintenance and support terms.

10 Effect of Expiration or Termination for Cause.

Upon termination of an Itron Software license for cause or expiration of a License Term, whichever occurs first, Customer shall immediately discontinue use of the applicable Itron Software and related Documentation, and Customer will destroy or return to Itron any and all copies. Upon Itron's request, Customer will confirm in writing that Customer has destroyed or has returned Itron Software and related Documentation in compliance with this section. This requirement applies to copies in all forms, partial and complete, in all types of media and computer memory, and whether or not modified or merged into other files or materials. Termination of an Itron Software license for cause will not restrict Itron from pursuing any other remedies available to it, including injunctive relief, nor will it relieve Customer of its obligation to pay all fees that accrued prior to such termination.

11 Third-Party Software Warranty.

Itron is not the owner of Third-Party Software and makes no representations or warranties whatsoever, directly or indirectly, express or implied, as to the suitability, durability, and fitness for use, merchantability, condition, quality, performance or non-infringement of any Third-Party Software. Third-Party Software shall be subject to any warranties provided by the Third-Party Software provider. Itron will pass through to Customer, or make commercially reasonable efforts to enforce on Customer's behalf, any warranties and remedies received from the Third Party Software provider.

12 License Use Verification & Audit.

12.1 License Use Verification.

Promptly upon Itron's written request, and no more than once annually, Customer must furnish Itron with a letter signed by an officer of Customer, verifying that Itron Software is being used by Customer in compliance with the licenses granted, and confirming the number, identification, type and location of Endpoints and other devices being managed by Customer using Itron Software.

12.2 Audit.

Itron has the right to reasonably audit Customer records to verify the number of Endpoints and other devices being managed by Customer using Itron Software and otherwise confirm Customer's compliance with license restrictions and Fee obligations of this Agreement. Itron must provide Customer with at least thirty (30) days prior written notice of the audit. The audit must be conducted during Customer's normal business hours at a mutually agreeable location. Itron's right to conduct an audit under this section is limited to one time per year, unless Itron has reason to believe that Customer is out of compliance with the license restrictions and Fee obligations of this Agreement. Itron has the right to use an independent auditor to conduct the audit. The audit shall be at Itron's sole cost and expense, unless the audit identifies a deficiency in Fees or other amounts owed or reimbursable by Customer during the audited period that is greater than five percent (5%) of the total amounts payable by Customer – in which case Customer must reimburse Itron for all reasonable costs of the audit. All amounts found to be owed by Customer under this Section will be payable within thirty (30) days after receipt of invoice from Itron.

13 Survival.

The following sections of this Addendum shall survive termination or expiration of this Agreement or any Order Document or Statement of Work: 1 (Relationship to General Terms and Conditions), 2 (Additional Definitions), 4 (Invoicing), 5 (Itron Software License) except to the extent applicable license rights expire or are terminated in accordance with this Agreement, 6 (Third-Party Software), 8 (Itron Software License Restrictions), 8 (U.S. Government Contracts Only), 9 (Limited Itron Software Warranty), 10 (Effect of Termination for Cause), 11 (Itron Disclaimer of Third-Party Software Warranty), 12 (License Use Verification & Audit) and 13 (Survival).

SALES ORDER DOCUMENT

This Order Document is governed by the Master Sales Agreement between Customer and Itron dated March 1, 2022, including any amendments thereto (the "**Agreement**"). Except as otherwise defined in this Order Document, capitalized terms herein have the meanings assigned to them in the Agreement.

This Order Document applies only to the products and services described in the pricing summary attached thereto as Attachment A.

Except as otherwise expressly provided or modified in this Order Document, the (i) terms and conditions of the Agreement remain in full force and effect, and (ii) this Order Document and the Agreement constitute the entire and exclusive agreement between the Parties regarding the subject matter hereof, and supersede all proposals and prior agreements, oral or written, and all other communications. In the event of a conflict between this Order Document and the Agreement, this Order Document shall govern.

Each Party has executed this Order Document by its duly authorized representative.

COUNCIL COMMUNICATION

CC #: 2016
File #: 0400-04-18

Title:	Campus Oaks CO-11, 13, 14 & 16 - Notice of Completion
Contact:	Danny Jacobo 916-223-7486 djjacobo@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 7.11.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt the attached resolution accepting Campus Oaks CO-11, 13, 14 & 16, CWJ#190166 as complete and authorizing the City Engineer to execute the Notice of Completion.

BACKGROUND

The Engineering Division has made a final inspection of the above project and has found the roadway infrastructure work complete in accordance with the improvement plans and City specifications.

FISCAL IMPACT

The actions requested as part of this action have no impact to the City's General Fund. Construction costs were paid by the developer.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of a Notice of Completion meets the above criteria and is not subject to CEQA. No additional environmental review is required.

COUNCIL COMMUNICATION

CC #: 2017
File #: 0400-04-18

Title: Campus Oaks CO-12 - Phase 1 - Notice of Completion
Contact: Danny Jacobo 916-223-7486 djjacobo@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 7.12.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt the attached resolution accepting Campus Oaks CO-12 (Phase 1), CWJ#190322 as complete and authorizing the City Engineer to execute the Notice of Completion.

BACKGROUND

The Engineering Division has made a final inspection of the above project and has found the roadway infrastructure work complete in accordance with the improvement plans and City specifications.

FISCAL IMPACT

The actions requested as part of this recommendation have no impact to the City's General Fund. Construction costs were paid by the developer.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of a Notice of Completion meets the above criteria and is not subject to CEQA. No additional environmental review is required.

CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal F - Invest in well-planned infrastructure and growth

Respectfully Submitted,

Danny Jacobo, Construction Inspector II

Mike Isom, Development Services Director

COUNCIL COMMUNICATION

CC #: 2018
File #: 0400-04-18

Title:	Campus Oaks CO-12 - Phase 2 - Notice of Completion
Contact:	Danny Jacobo 916-223-7486 djjacobo@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 7.13.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt the attached resolution accepting Campus Oaks CO-12 (Phase 2), CWJ# 190412 as complete and authorizing the City Engineer to execute the Notice of Completion.

BACKGROUND

The Engineering Division has made a final inspection of the above project and has found the roadway infrastructure work complete in accordance with the improvement plans and City specifications.

FISCAL IMPACT

The actions requested as part of this recommendation have no impact to the City's General Fund. Construction costs were paid by the developer.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of a Notice of Completion meets the above criteria and is not subject to CEQA. No additional environmental review is required.

CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal F - Invest in well-planned infrastructure and growth

Respectfully Submitted,

Danny Jacobo, Construction Inspector

COUNCIL COMMUNICATION

CC #: 2027
File #: 0400-04-12-1 & 0400-07

Title:	Sierra Vista KT-1A - Final Map and Subdivision Agreement
Contact:	Jeff Hendrix 916-774-5463 jhendrix@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 7.14.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council take the following actions:

1. Approve the final map on file with the City Clerk and accept on behalf of the public the public utility easements offered thereon and accept, subject to improvement, Lots A, B, C and D and all rights of way offered thereon; and
2. Adopt the attached resolution approving the Subdivision Agreement and authorize the City Manager to execute the agreement on behalf of the City.

BACKGROUND

The Development Services, Engineering Division, has reviewed the subject final map and found that it is in compliance with the Subdivision Map Act and the City's Subdivision Ordinance and all conditions of the tentative map have been met. This map will create 60 residential lots and 4 public landscape lots.

FISCAL IMPACT

There is no fiscal impact to the City's General Fund associated with this approval.

ENVIRONMENTAL REVIEW

Approval of the Sierra Vista KT-1A final map is an action that is subject to California Environmental Quality Act (CEQA). Project level CEQA compliance for the Sierra Vista KT-1A final map was accomplished with preparation of the Sierra Vista Specific Plan EIR (Adopted: May 5, 2010) (SCH#2008032017) and the Mitigated Negative Declaration (MND) and associated Mitigation Monitoring Program approved by the City of Roseville on June 6, 2012. Because the Sierra Vista KT-1A final map is consistent with the project evaluated in the Sierra Vista Specific Plan Environmental Impact Report (EIR), no new effects would be expected to occur and all applicable mitigation measures from the Sierra Vista Specific Plan EIR will be implemented. As

such, no additional CEQA action is required at this time.

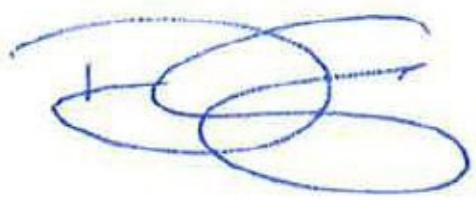
CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal F - Invest in well-planned infrastructure and growth.

Respectfully Submitted,

Jeff Hendrix, Associate Engineer

Mike Isom, Development Services Director



_____
Dominick Casey, City Manager

SUBDIVISION AGREEMENT

Sierra Vista KT-1A SUBDIVISION

THIS AGREEMENT, made and entered into this ___ day of _____, 20__, by and between the CITY OF ROSEVILLE, a municipal corporation ("CITY"), and Sierra Vista Communities LLC, by Lennar Homes of California, LLC, a California Limited Liability Company, ("SUBDIVIDER"),

W I T N E S S E T H:

WHEREAS, SUBDIVIDER is possessed of a tract of land lying in the City of Roseville, County of Placer, known as "Sierra Vista KT-1A Subdivision" (Subdivision no. PL17-0305; "the Subdivision"); and

WHEREAS, a tentative map of the Subdivision was approved by the City Planning Commission on the 10 day of December, 2015, and the final map of the Subdivision has been approved subject to the execution of this Agreement; and

WHEREAS, the final map has been filed on the ____ day of _____, 20__ in Book _____ of Parcel/Subdivision Maps at Page _____ in the Official Records, Placer County Recorder, file no. _____; and

WHEREAS, Section 18.20.110 of the Roseville Municipal Code, regulating the subdivision of land in the City, requires that SUBDIVIDER shall execute and file an agreement between itself and CITY relating to the improvements to be made in a subdivision, prior to the approval by the City Council of the final map.

NOW, THEREFORE, the parties agree as follows:

1. Rights-of-Way. Except as otherwise provided by this Agreement, CITY rejects all lands, right-of-ways, and easements offered for dedication on the final map of the Subdivision. All such offers shall, however, remain open, and shall constitute irrevocable offers of dedication in accordance with Government Code Section 66477.2. All such offers may be accepted by CITY in its sole discretion at any later date without further notice to SUBDIVIDER as provided by law.

By way of explanation only, it is the current intention of CITY to accept all or part of such irrevocable offers to dedicate upon acceptance of the improvements called for in this Agreement.

2. Improvements - Time Limit. SUBDIVIDER agrees to cause all improvements to be made and constructed in the Subdivision to fully comply with the requirements of the Roseville Municipal Code and the Subdivision Map Act of the State of California according to the improvement plans for the Subdivision prepared by R.E.Y. Engineers, Inc., dated March 19, 2021 and approved by the City Engineer and including any changes or

alterations to such improvements required by the City Engineer, and to install, on or before December 31, 2023, such survey monuments as may be required by the City Engineer ("the Work"). SUBDIVIDER agrees to pay for any materials, provisions or other supplies used in, upon, for or about the performance of the Work, or for any work or labor of any kind done in connection with the Work, or for any amounts due under the Unemployment Insurance Act with respect to such work or labor.

SUBDIVIDER agrees to complete all of the Work on or before twenty-four (24) months from the date of this Agreement. If in the opinion of the City Engineer of CITY, an extension of this Agreement is not detrimental to the public welfare, he or she is, in his or her sole discretion, hereby authorized to extend the time within which the Work shall be completed for a period not to exceed twelve (12) months. Upon a written application made by SUBDIVIDER, further extensions, not to exceed an additional six (6) months, shall be reviewed and approved at the discretion of the City Engineer of CITY. Any such application extension request by SUBDIVIDER shall fully state the grounds and facts relied upon for the granting of additional extensions.

In the event that SUBDIVIDER shall fail to complete the Work within the time provided by this Agreement, CITY may, in its sole discretion and in addition to any other remedy provided in this Agreement or by law, enter upon the Subdivision and complete the Work and recover the full cost and expense of such construction from SUBDIVIDER, SUBDIVIDER's successors and assigns, or from the then owner of the Subdivision, and/or place a lien upon the Subdivision for such cost and expense.

If at anytime prior to the expiration of the time provided by this Agreement the City Engineer of CITY determines that a safety hazard exists within an existing public right-of-

way, the City Engineer shall give written notice to SUBDIVIDER to eliminate the safety hazard. If SUBDIVIDER fails to eliminate the safety hazard within five (5) calendar days of the written notice, CITY may, in its sole discretion and in addition to any other remedy provided in this Agreement or by law, eliminate the safety hazard and recover the full cost and expense of such work from SUBDIVIDER, SUBDIVIDER's successors and assigns, or from the then owner of the Subdivision, and/or place a lien upon the Subdivision for such cost and expense.

3. Acquisition and Dedication of Easements or Rights-of-Ways. If any of the Work is to be constructed or installed on land not within the Subdivision or already existing public right-of-way, no construction or installation shall be commenced before:

a. The irrevocable offer of dedication or conveyance to CITY of appropriate right-of-ways, easements or other interest in real property, and appropriate authorization from the property owner to allow construction or installation of the improvements or work; or

b. The issuance of an order of possession by a court of competent jurisdiction pursuant to the State Eminent Domain Law. SUBDIVIDER shall comply in all respects with any such order of possession.

Nothing in this Section 3 shall be construed as authorizing or granting an extension of time to SUBDIVIDER for completion of the Work.

4. Inspection Fees and Costs. The City Engineer shall inspect all of the Work improvements made in the Subdivision to see that they comply with CITY's subdivision regulations and specifications. SUBDIVIDER shall deposit the estimated inspection fee and reimburse CITY for the cost of such inspections in accordance with Roseville Municipal Code section 18.20.070.

5. Securities.

a. SUBDIVIDER shall file with this Agreement two (2) improvement securities as set forth in Roseville Municipal Code Sections 18.20.150 and 18.20.160. Each security shall be in the amount of one hundred percent (100%) of the total estimated cost of the Work as determined by the City Engineer which amount is the sum of $1,386,646.07. One improvement security shall secure faithful performance of this Agreement as required by Section 66499.3(a) of the Government Code of the State of California (the "faithful performance" security). The second improvement security shall, as required by Section 66499.3(b) of the Government Code of the State of California, secure the obligations set forth in Title 15 (commencing with Section 3082) of Part 4 of Division 3 of the Civil Code of the State of California for payment to the contractor, his subcontractors and to persons renting equipment or furnishing labor or materials to them for the Work (the "payment security"). The improvement securities required under this paragraph shall also secure placement of monumentation and guarantee payment therefor as provided by California Government Code section 66496.

b. SUBDIVIDER shall also file with this Agreement a "guarantee and warranty security" in the amount of ten percent (10%) of the City Engineer's estimated cost of the Work as set forth in Section 18.20.170 of the Roseville Municipal Code to guarantee and warrant the Work for a period of one year following its completion and acceptance against any defective work or labor done, or defective materials furnished, as required by Section 66499(a)(5) of the Government Code of the State of California. The guarantee and warranty security shall be released upon SUBDIVIDER's request following expiration of the warranty period and subject to the reasonable determination of the City Engineer that SUBDIVIDER's warranty obligations have been satisfied.

c. Any bonds submitted as security pursuant to this section shall be executed by a surety company authorized to transact a surety business in the State of California. All required securities shall be in a form approved by the City Attorney of CITY.

6. Successors and Assigns – Covenant Running with the Land. This Agreement shall inure to the benefit of, and be binding upon, the successors and assigns of the respective parties. It shall be recorded in the Office of the Recorder of Placer County concurrently with the final map of the Subdivision, and shall constitute a covenant running with the land and an equitable servitude upon the real property within the Subdivision.

7. Acceptance of Improvements Upon Completion. Upon satisfactory completion of the Work, in accordance with this Agreement, CITY agrees to accept the Work and its improvements and the offers of dedication described in paragraph 1, subject to the provisions of paragraphs 1 and 10 of this Agreement.

8. Notice Regarding Construction. SUBDIVIDER shall notify the City Engineer of CITY in writing three (3) days prior to the commencement of construction of the Work.

9. Subdivider's Obligation to Warn Public During Construction. Until final acceptance of the Work, SUBDIVIDER shall give good and adequate warning to the public of each and every dangerous condition which may exist in the Work, and will take all reasonable actions to protect the public from any such dangerous condition.

10. Warranty.

a. SUBDIVIDER guarantees and warrants the public improvements which constitute the Work required by this Agreement, and agrees to remedy any defects in the improvements or the Work arising from faulty or defective materials or construction of said improvements or the Work occurring within twelve (12) months after their acceptance by CITY.

SUBDIVIDER agrees to permit inspection of all improvements in the Subdivision by the City Engineer of CITY for such period, and to reimburse CITY for the cost of such inspections.

b. If, within the warranty period, the Work or improvement or any part of the Work done, furnished, installed, or constructed fails to fulfill any of the requirements of this Agreement or the improvement plans and specifications, SUBDIVIDER shall, without delay or cost to CITY, repair, replace or reconstruct any defective or otherwise unsatisfactory part or parts of the Work. CITY may, at its sole option, perform such repair or replacement itself if SUBDIVIDER has failed to commence such repair within twenty (20) days after CITY has mailed written notice of default to SUBDIVIDER and to SUBDIVIDER'S Surety. In such event, SUBDIVIDER agrees to pay the cost of such repair and replacement by CITY and CITY may, at its option, recover such cost as a lien against the Subdivision should the cost exceed the inspection fee deposited pursuant to paragraph 4 of this Agreement.

Should CITY determine that the public safety requires repairs or replacements to be made before SUBDIVIDER can be notified, CITY may, in its sole discretion, make the necessary repairs or replacement or perform the necessary work. SUBDIVIDER shall pay to CITY the cost of such repairs and CITY may at its option recover such cost as a lien against the Subdivision.

11. Indemnification. To the fullest extent allowed by law, SUBDIVIDER shall defend, indemnify, and save and hold harmless CITY, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of SUBDIVIDER 's willful misconduct or negligent act or omission while engaged in the performance of obligations or

exercise of rights created by this Agreement, except those matters arising from CITY's sole or active negligence or willful misconduct. The parties intend that this provision shall be broadly construed.

SUBDIVIDER's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

12. Insurance. SUBDIVIDER agrees to continuously maintain, in full force and effect, at a minimum the following policies of insurance during the term of this Agreement.

COVERAGE	LIMITS OF LIABILITY
General Liability	$2,000,000 per occurrence $4,000,000 aggregate Personal Injury: $2,000,000 per occurrence $4,000,000 aggregate
Automobile Liability	$1,000,000 combined single limit
Workers' Compensation	Statutory

a. Form. SUBDIVIDER shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

b. Additional Insureds. SUBDIVIDER shall also provide a separate endorsement form or section of the policy showing CITY, its officers, agents, employees and volunteers as additional insureds for each type of coverage, except for Workers' Compensation, for ongoing and completed operations. Such insurance shall specifically cover the contractual

liability of SUBDIVIDER. The additional insured coverage under the SUBDIVIDER's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from CITY's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office ("ISO") CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

c. Cancellation/Modification. SUBDIVIDER shall provide ten (10) days written notice to CITY prior to cancellation or modification of any insurance required by this Agreement.

d. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of CITY (if agreed to in a written contract) before CITY's own insurance shall be called upon to protect it as a named insured.

e. Self-Insured Retentions. All self-insured retentions ("SIR") must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or CITY. CITY reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

f. Waiver of Subrogation. SUBDIVIDER hereby agrees to waive subrogation which any insurer of SUBDIVIDER may acquire from SUBDIVIDER by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of CITY, its officers, agents, employees and volunteers for all worked performed by SUBDIVIDER, its employees, agents and subcontractors.

g. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve SUBDIVIDER of liability in excess of such coverage, nor shall it preclude CITY from taking such other actions as are available to it under any other provisions of this Agreement or law.

13. Irrevocability of Security. The improvement securities furnished pursuant to paragraph 5 shall be irrevocable, shall not be limited as to time (except as to the one-year guarantee and warranty period specified in paragraph 10) and shall provide that they may be released, in whole or part, only upon the written approval of the City Engineer of CITY.

14. Attorney's Fees; Venue; Governing Law. Any action by any party to this Agreement, or any action concerning a security furnished pursuant to paragraph 5, shall be brought in the appropriate court of competent jurisdiction within the County of Placer, State of California, notwithstanding any other provision of law which may provide that such action may be brought in some other location. In the event it becomes necessary for either party to bring an action with respect to enforcement of the provisions of this Agreement, or the security therefor, the prevailing party in such action shall be awarded a reasonable attorney's fee, as may be

determined by the Court. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

15. Release of Faithful Performance Security. Release of faithful performance security shall be in compliance with and pursuant to the procedures set forth in Government Code Section 66499.7. Upon the completion of all secured Work by SUBDIVIDER and written acceptance of that completed Work by CITY, and the furnishing of the warranty security as required by paragraph 5(b), the City Engineer shall authorize the release of the remaining faithful performance security.

16. Release of Payment Security. Thirty-five (35) days after a notice of completion is recorded with respect to the Work, the City Engineer of CITY may authorize the release of the payment security, in the event that no claims have been filed against said security. In the event that claims or actions are filed against the security, the City Engineer may release so much of such security as is in excess of the total of the claims made against it, plus a reasonable amount of costs and attorney's fees.

17. Automatic Termination Upon Completion and Sale of Residential Unit. This Agreement and any lien pursuant hereto shall automatically be terminated, without any further action by either party or need to record any additional document, with respect to any single-family residential lot within a parcel designated by the Specific Plan for residential use, upon completion of construction and issuance by the City of a final inspection for a dwelling unit upon such residential lot and conveyance of such improved residential lot to a bona-fide good faith purchaser thereof. In connection with its issuance of a final inspection for such improved lot, City shall confirm that: (i) all improvements which are required to serve the lot, as determined by City, have been accepted by City; (ii) the lot is included within the Maintenance CFD required

by Section 3.20 or other financing mechanism acceptable to the City, to the extent required hereby; and (iii) if and to the extent applicable to such lot, an affordable purchase or rental housing agreement has been recorded on the lot. Termination of this Agreement for any such residential lot as provided for in this section shall not in any way be construed to terminate or modify any assessment district or Mello-Roos Community Facilities District lien affecting such lot at the time of termination.

18. Failure of Performance. In addition to any other remedies provided in this Agreement or by law, in the event SUBDIVIDER fails to perform one or more of the covenants or conditions of this Agreement, CITY shall have recourse to the security given to guarantee the performance of such acts. CITY may do, or cause to be done, those acts required of SUBDIVIDER, and shall have recourse against so much of the security as is necessary to discharge the responsibility of SUBDIVIDER. In the event CITY seeks recourse against a security, CITY shall also have recourse against SUBDIVIDER for any and all amounts necessary to complete the obligations of SUBDIVIDER in the event the security is insufficient to pay such amounts. All administrative costs, including reasonable attorney's fees pursuant to Section 66499.4 of the Government Code, incurred by CITY, in addition to the costs of the improvements, shall be a proper charge against the security and SUBDIVIDER.

19. Integration. This Agreement is an integrated agreement. It supersedes all prior negotiations, representations, or agreements, either written or oral.

20. Modification. This Agreement and each provision contained herein may be waived, amended, supplemented or eliminated only by mutual written agreement of the parties.

21. Notices. Any notices sent to the parties relating to this Agreement shall be sent by first class mail, postage prepaid or delivered to the following addresses:

Marc Stout, City Engineer

311 Vernon Street
Roseville, CA 95678

Lennar Homes of California
1025 Creekside Ridge Dr. #240
Roseville, CA 95678
Attn: Larry Gualco

Either party may amend its address by giving written notice to the other.

22. Severability. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attestation by its City Clerk under authority of Resolution No. ____, adopted by the Council of the City of Roseville on the ___ day of _____, 20__, and SUBDIVIDER has caused this Agreement to be executed.

NOTES:

1. THE TOTAL AREA OF THIS SUBDIVISION IS 14.08 ACRES +/-, GROSS, CONSISTING OF 60 RESIDENTIAL LOTS AND 4 LANDSCAPE LOTS.
2. ALL CURVES ARE DIMENSIONED WITH RADIUS, DELTA, ARC LENGTH, CHORD BEARING AND CHORD LENGTH. CHORD LENGTHS MAY CONTAIN SOME ROUNDING ERROR. DISTANCES SHOWN HEREON ARE IN FEET AND DECIMALS THEREOF AND ARE "GROUND" DISTANCES.
3. A PRELIMINARY SOILS REPORT WAS PREPARED BY WALLACE KUHL & ASSOCIATES DATED FEBRUARY 12, 2018; PROJECT NUMBER WKA NO. 11712.02P AND ON FILE WITH THE CITY OF ROSEVILLE DEVELOPMENT - ENGINEERING DEPARTMENT FILE #308-876.
4. ALL FRONT CORNERS ARE MARKED BY A 1" BRASS MARKER STAMPED "LS 7944" IN THE SIDEWALK ON THE EXTENSION OF SIDE LOT LINES 1.00' FROM THE PROPERTY LINE UNLESS OTHERWISE NOTED.
5. ALL REAR CORNERS AND ANGLE POINTS WILL BE SET WITH A 5/8" REBAR AND PLASTIC CAP STAMPED "LS 7944", WHERE REAR CORNER FALLS WITHIN A MASONRY RETAINING WALL, MASONRY SOUND WALL OR CONCRETE FOOTING, A 5/8" REBAR WITH PLASTIC CAP STAMPED "LS 7944" WILL BE SET ON THE SIDE LOT LINE 4.00 FOOT OFFSET TO THE REAR CORNER OR A BRASS TAG STAMPED "LS 7944" WILL BE SET WITH EPOXY TO THE FACE WALL 2.00 FOOT ABOVE GROUND OR ON TOP OF WALL WHERE AS OFFSET MONUMENT CANNOT BE SET.
6. THE I.O.D./R.O.W. ON LOT 4 AS SHOWN AND SO DESIGNATED ON THAT CERTAIN FINAL MAP ENTITLED "SIERRA VISTA - KT PROPERTIES PHASE 2 LARGE LOT SUBDIVISION SUBDIVISION NUMBER PL 15-0192", FILED FOR RECORD ON OCTOBER 1, 2020 IN BOOK FF OF MAPS, AT PAGE 18, PLACER COUNTY RECORDS, IS FULLY CONTAINED WITHIN THE RIGHT OF WAY SHOWN HEREON.
7. COVENANTS, CONDITIONS AND RESTRICTIONS AFFECTING THE LOTS SHOWN HEREON ARE RECORDED AS DOCUMENT NO. 2020-0042952 OFFICIAL RECORDS OF PLACER COUNTY.

COUNCIL COMMUNICATION

CC #: 2007
File #: 0206-10-01

Title:	Downtown Roseville Property and Business Improvement District - 2021 Annual Report and 2022 Budget
Contact:	Wayne Wiley 916-774-5283 wwiley@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 7.15.

RECOMMENDATION TO COUNCIL

Staff recommends that Council adopt a resolution approving the 2021 Downtown Roseville Property and Business Improvement District Annual Report and approve the 2022 Budget for the Downtown Roseville Partnership.

BACKGROUND

On July 16, 2014, the City Council approved the formation of the Downtown Roseville Property and Business Improvement District (DRPBID) for a term of five years commencing January 1, 2015, and terminating December 31, 2019. The overarching goal of the DRPBID was to facilitate improvements and activities that would provide a special benefit to assessed parcels. Based on the success of the DRPBID, on January 9, 2019, Council adopted a resolution renewing the DRPBID and Management Plan. With that approval, the amended documents established the assessment formula, required indemnification terms, insurance coverage limits, and levying of the annual assessments for an additional ten-year period (beginning January 1, 2020 and ending December 31, 2029).

The annual assessment provides funding for a budget that is managed by the established owner's association, the Downtown Roseville Partnership (DRP). The DRP Board ensures that the budget is applied to activities and expenses defined in the Management Plan/Engineer's Report accepted by Council as part of the district formation. In addition, the Management Plan includes the following requirement:

"VI. GOVERNANCE

C. Annual Report

The Downtown Roseville Partnership shall present an annual report at the end of each year of operation to the City Council pursuant to Streets and Highways Code §36650…. The annual report is a prospective report for the upcoming year and must include:

· Any proposed changes in the boundaries of the DRPID or in any benefit zones or classifications of property within the district;

· The improvements and activities to be provided for that fiscal year;
· An estimate of the cost of providing the improvements or activities for that fiscal year;
· The method and basis of levying the assessment in sufficient detail to allow each real property owner to estimate the amount of the assessment to be levied against his or her property for the fiscal year;
· The amount of any surplus of deficit revenues to be carried over from a previous fiscal year; and
· The amount of any contributions to be made from sources other than assessments levied pursuant to this Plan."

The 2021 DRPBID Annual Report is provided in Attachment 1 of this staff report. Additional supporting documents that further address the elements required in each annual report to Council are the 2021 financial statements and district map and assessment roll, which are included within Attachments 2 and 3.

Additionally, the 2022 budget is included as Attachment 4 for reference, and has been approved by the DRP Board. No changes to the district boundaries or levying of assessments is proposed and the key elements of this year's budget (totaling $181,200) are broken down into the following service categories followed by the percentage of funds allocated to each sector (consistent with the previous year).

Marketing & Events - 30%
Clean & Safe - 26%
Administration - 21%
Improvements - 18%
Contingency - 5%

It should be noted that the above referenced allocations are not anticipated to significantly change; however, it may be necessary to redistribute funds between categories to provide flexibility in addressing impacts related to the changing economy.

FISCAL IMPACT

The City contributes to the PBID each year in the form of parcel assessments for City-owned property in Downtown Roseville. The 2021 City assessment was $74,220.06 and the total assessment collected for the district was $214,195.32. Receiving the annual report has no impact on the General Fund and a maximum of 2% of the property assessment will be retained by the City to cover the costs of administration of the management agreement.

ECONOMIC DEVELOPMENT / JOBS CREATED

The establishment of the Downtown PBID has substantially increased the amount of funding available to market, promote and improve Downtown Roseville.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not

considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Adoption of this resolution meets the above criteria and is not subject to CEQA. No additional environmental review is required.

RESOLUTION NO. 22-093

APPROVING THE 2021 DOWNTOWN ROSEVILLE PROPERTY AND BUSINESS IMPROVEMENT DISTRICT ANNUAL REPORT AND 2022 BUDGET

WHEREAS, on July 16, 2014, the City Council approved the formation of the Downtown Roseville Property and Business Improvement District ("DRPBID") to facilitate improvements and activities ; and

WHEREAS, the annual assessment provides funding for a budget that is managed by the established owner's association, the Downtown Roseville Partnership (DRP); and

WHEREAS, the DRP Board ensures that the budget is applied to activities and expenses defined in the Management Plan/Engineer's Report accepted by Council as part of the district formation; and

WHEREAS, the DRP is required to submit an annual report and budget to the City; and

WHEREAS, the 2021 Downtown Roseville Property and Business Improvement District Annual Report and 2022 Budget have been reviewed by the City Council.

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that the 2021 Downtown Roseville Property and Business Improvement District Annual Report and the 2022 Budget are hereby approved.

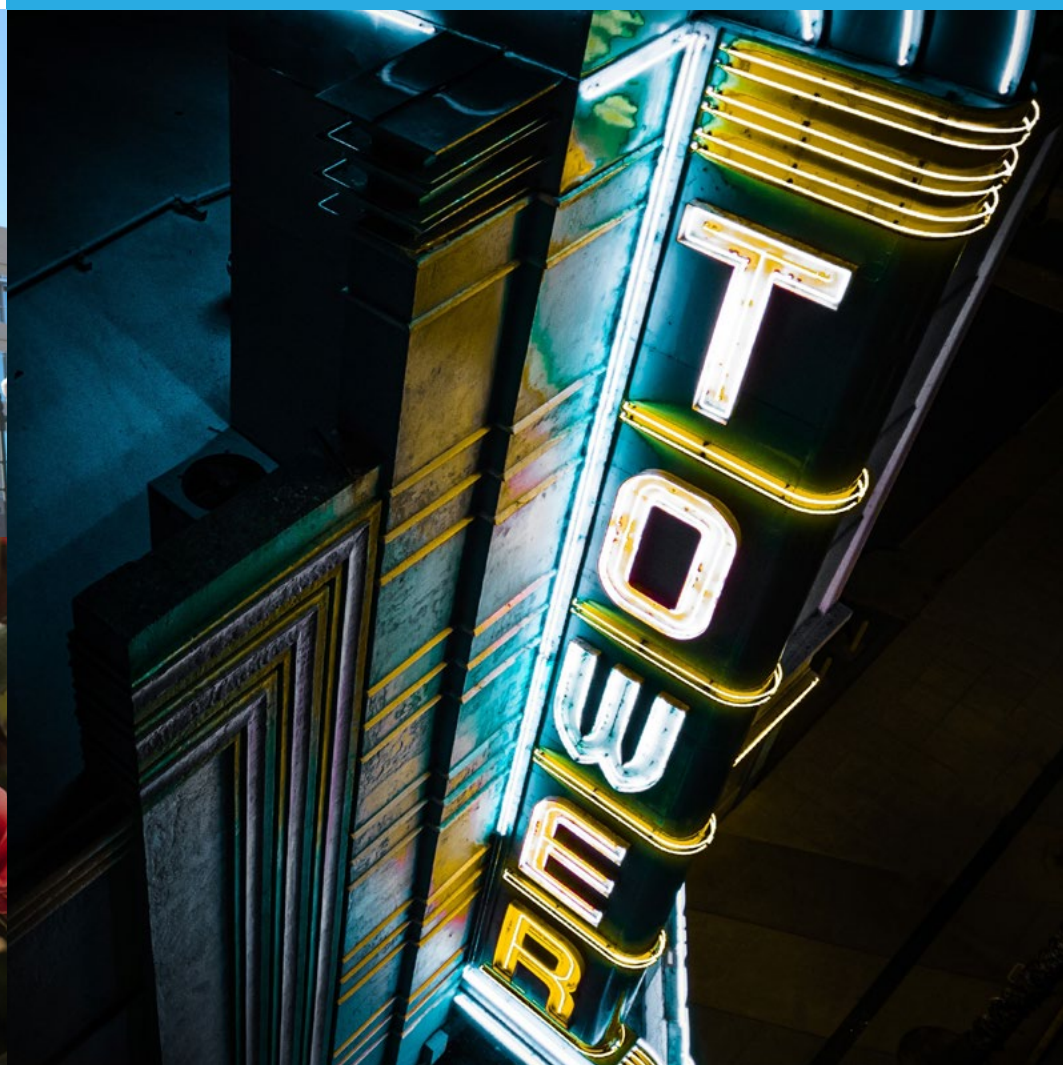
DOWN TOWN ROSE VILLE

PARTNERSHIP

2021 ANNUAL REPORT



A MESSAGE FROM BOARD PRESIDENT DAVE PICHES

As an architect with an office in Downtown, I am honored to serve as president of Downtown Roseville Partnership and work with an amazing group of dedicated, tireless board members and a caring, astute director, Kat Maudru, to strive for the success of our Downtown district. The word "partnership" cannot be overused when we speak of our work as, every step of the way, we continue to work with the support of City of Roseville, Chamber of Commerce, Blue Line Arts and other local organizations.

Much of our work and resources this past year have been focused on safety and security, as we have received the message that these are the ultimate concerns of our property owners and merchants. Thus, we have made efforts to revitalize our security and our homeless support forces and update our day porter activities.

In the realm of improvement, with our partnership with the City, we continued the Façade Grant Program that provided funding for exterior improvements for Downtown properties. In addition, because of the planning and funding required, we have spent many hours setting the stage for additional projects in 2022 including signage grants that will fund new high-quality sidewalk signage for merchants, a reorganization of the Tree Lighting Program to ensure street trees are lighted consistently and harmoniously throughout fall and winter, and a mural program to revitalize the streetscape along the Atlantic Street blocks.

I would be remiss if I didn't acknowledge that the pandemic has made it another challenging year for our Downtown businesses, especially our restaurants and retail establishments. Regardless, DRP was the principal sponsor of the new Third Saturday Art Walk orchestrated by Blue Line Arts last summer, Drive-Thru Trick-or-Treat, and the Annual Sylvia Besana Holiday Parade.

Perseverance in 2020 became resilience in 2021 and DRP has been inspired and strengthened in support of our Downtown community because of it. As we hopefully return to a normal business climate, I hope to find new opportunities to forge additional partnerships with groups and organizations that will build on the success of our Downtown and the community.

Sincerely,

Dave Piches, AIA LEED AP
2021 President
Downtown Roseville Partnership Board of Directors

VISION

Downtown Roseville Partnership is an action-oriented, collaborative group of volunteers that champions a vibrant and authentic downtown.

MISSION

We are proactive in promoting, marketing and providing services that attract businesses and visitors to the District and manage the District's business affairs in a transparent, fiscally-responsible manner.

2021 BOARD OF DIRECTORS

Tom Carlson (5) is the owner of Carlson Tax Consultants Inc. and a member of the AICPA and the Roseville Area Chamber of Commerce. As a board member with DRP, he is able to serve downtown business and property owners and give back to the local business community.

Mike Esparza (3) is president and CFO of All-Cal Insurance Agency. He owns properties located at 501, 503 and 505 Vernon Street and joined the DRP board to further the future plans and expected growth of the District.

Jamie Hazen (2) is the owner of Jamie Hazen Consulting. She has been active in our community for decades and serves on the board for the Downtown Roseville Merchants, the Roseville Police Activities League, the Performing Arts of Roseville and the Placer Visitors Bureau.

David Herrick (8) is SVP/Controller for Consolidated Communications, one of the larger employers in Downtown Roseville. He enjoys supporting the interests of residents and businesses.

Clarissa Oliveira (9) is DRP's newest board member. She is a captain and pastor with Salvation Army. She enjoys spending time with family, painting and seeing God's grace at work. We appreciate her insight and look forward to working with her to make Downtown Roseville a wonderful place to visit.

David Piches (6) founded Piches Architecture at 115 Taylor Street in Downtown Roseville. He has served on many boards including Roseville Area Chamber of Commerce, Roseville Merchant's Association, Roseville Arts Center and Roseville Urban Forest Foundation. With DRP, Dave works to foster creative design solutions and encourage actions that will maintain existing improvements.

Lisa Peters (7) is CEO and president of Randy Peters Catering and Events Center, a certified woman-owned business, and 105 Noshery. Lisa has been a staple in the business community for decades and brings unparalleled experience as a small business owner.

Mark Vespoli (4) owns several Downtown Roseville properties, including 219, 400, 404 and 601 Vernon Street and 106 Judah Street. He brings to the board the perspective of a property owner and entrepreneur in Downtown Roseville.

Wayne Wiley (1) is the economic development manager for the City of Roseville, where he helps develop and implement economic development initiatives to ensure business enrichment within our community. Wayne has always had a passion for Downtown and enjoys working closely with the merchants, business owners and residents.

***Kat Maudru** is DRP's director of operations and is instrumental in promoting Downtown through community and public relations.

2021 NOTABLES

- To create community and a sense of place, we installed 20 additional "We Are Roseville" banners along Vernon Street.
- We sponsored a variety of arts-focused events such as Blue Line Arts' *Comunidad:* Hispanic Heritage Month Exhibition that included lectures, educational activities, and a residency opportunity for regional artists.
- By popular demand, 3rd Saturday Art Walk was brought back as a summertime favorite monthly event.
- We partnered on a variety of community-building events including 8th Annual Family Fest, Roseville Crime Stoppers Run Crime Out of Roseville, Placer Breast Cancer Foundation's Hot Pink Fun Run, RPAL Bacon and Brew Bash, and 60th Annual Sylvia Besana Holiday Parade.
- The holidays were celebrated beginning with our 2nd Annual Halloween Drive Thru to the Annual Tree Lighting and Salvation Army Christmas Food Basket Program.
- Downtown Roseville is a beautiful place to be thanks to our Clean and Safe Program, power washing services throughout the District, and extended Vernon Street tree lights.

WHAT TO EXPECT IN 2022

- Buildings facing Atlantic Street will soon feature decorative murals in partnership with Blue Line Arts.
- In collaboration with the City, the next round of our Façade Grant Program will inspire and incentivize reinvestment into Downtown business storefronts.
- Businesses on Vernon Street can expect new blade signs to improve foot traffic.
- Mark your calendars for our continued community events: Downtown Tuesday Nights, 3rd Saturday Art Walk, additional holiday festivities, and more.
- Look for us on social media as we continue our promotion of Downtown as the place to eat, shop and stay.

COUNCIL COMMUNICATION

CC #: 2036
File #: 0721 & 0214

Title:	Dry Creek Greenway East Phase 2 (Rocky Ridge Drive to Old Auburn Road) - Active Transportation Program Grant Authorization
Contact:	Alison Winter 916-774-5365 awinter@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 7.16.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt a resolution authorizing the City Manager or his designee to submit an ATP Cycle 6 application to the California Transportation Commission (CTC) and to execute all related forms and agreements for the Dry Creek Greenway East Trail Phase 2 (Rocky Ridge Drive to Old Auburn Road).

BACKGROUND

The State of California recently released a call for projects for Cycle 6 of the Active Transportation Program (ATP). The ATP is a competitive program that provides funding for projects that encourage increased use of active modes of transportation, such as walking and biking. Funding for the ATP was augmented in 2017 through the passage of Senate Bill 1, the Road Repair and Accountability Act. The City has received funding in prior ATP cycles for the Downtown Bridges, Washington Bike/Ped Project, and Dry Creek Greenway East Phase 1 (Riverside Avenue to Rocky Ridge Drive).

Per the General Plan and Bicycle Master Plan, the Dry Creek Greenway East Trail Project is an approved paved multi-use trail along Dry, Cirby, and Linda Creeks from Darling Way/Riverside Avenue to the City limits at S. Cirby Way/Old Auburn Road, a distance of 4.25 miles. The project alignment and a phasing plan were approved by the City Council on March 20, 2019, along with certification of the Dry Creek Greenway East Trail Project Final Environmental Impact Report (EIR) (SCH: 2014032087). As noted above, Phase 1 has already received an ATP award in ATP Cycle 3.

The City applied to the ATP Cycle 5 for the construction of Phase 2, Rocky Ridge Drive to Old Auburn Road. The project scored well but did not receive funding. Staff believes that the project has the potential to compete well for ATP Cycle 6 construction funding. If ATP construction funding is approved, staff will return to City Council with an action plan for locally-funded final design, permitting, and right-of-way acquisition to facilitate trail construction as early as 2025. Right-of-way to implement the project is required from nine (9) undeveloped properties in the floodplain. However, staff is exploring an on-street "cycle track" approach along lightly used

portions of North Cirby Way and Samoa Way to reduce or eliminate acquisition needs.

FISCAL IMPACT

The estimated total cost for the Dry Creek Greenway Multi-Use Trail – Segment 2 (from Rocky Ridge Drive to Old Auburn Road) Project is approximately $7.5 million. The estimated cost of Plans, Specifications, and Estimates (PS&E), permitting, and right-of-way is approximately $850,000, which will be funded through local transportation funds. If the ATP Cycle 6 grant is successful, it will provide up to $6.5 million for construction and non-infrastructure costs (i.e., additional Safe Routes to School Program funding). General fund monies will not be used for the project.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) only applies to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. (CEQA Guidelines §15061(b)(3)). The proposed ATP Cycle 6 application and accompanying forms and agreements meet the above criteria, and no CEQA action is required at this time.

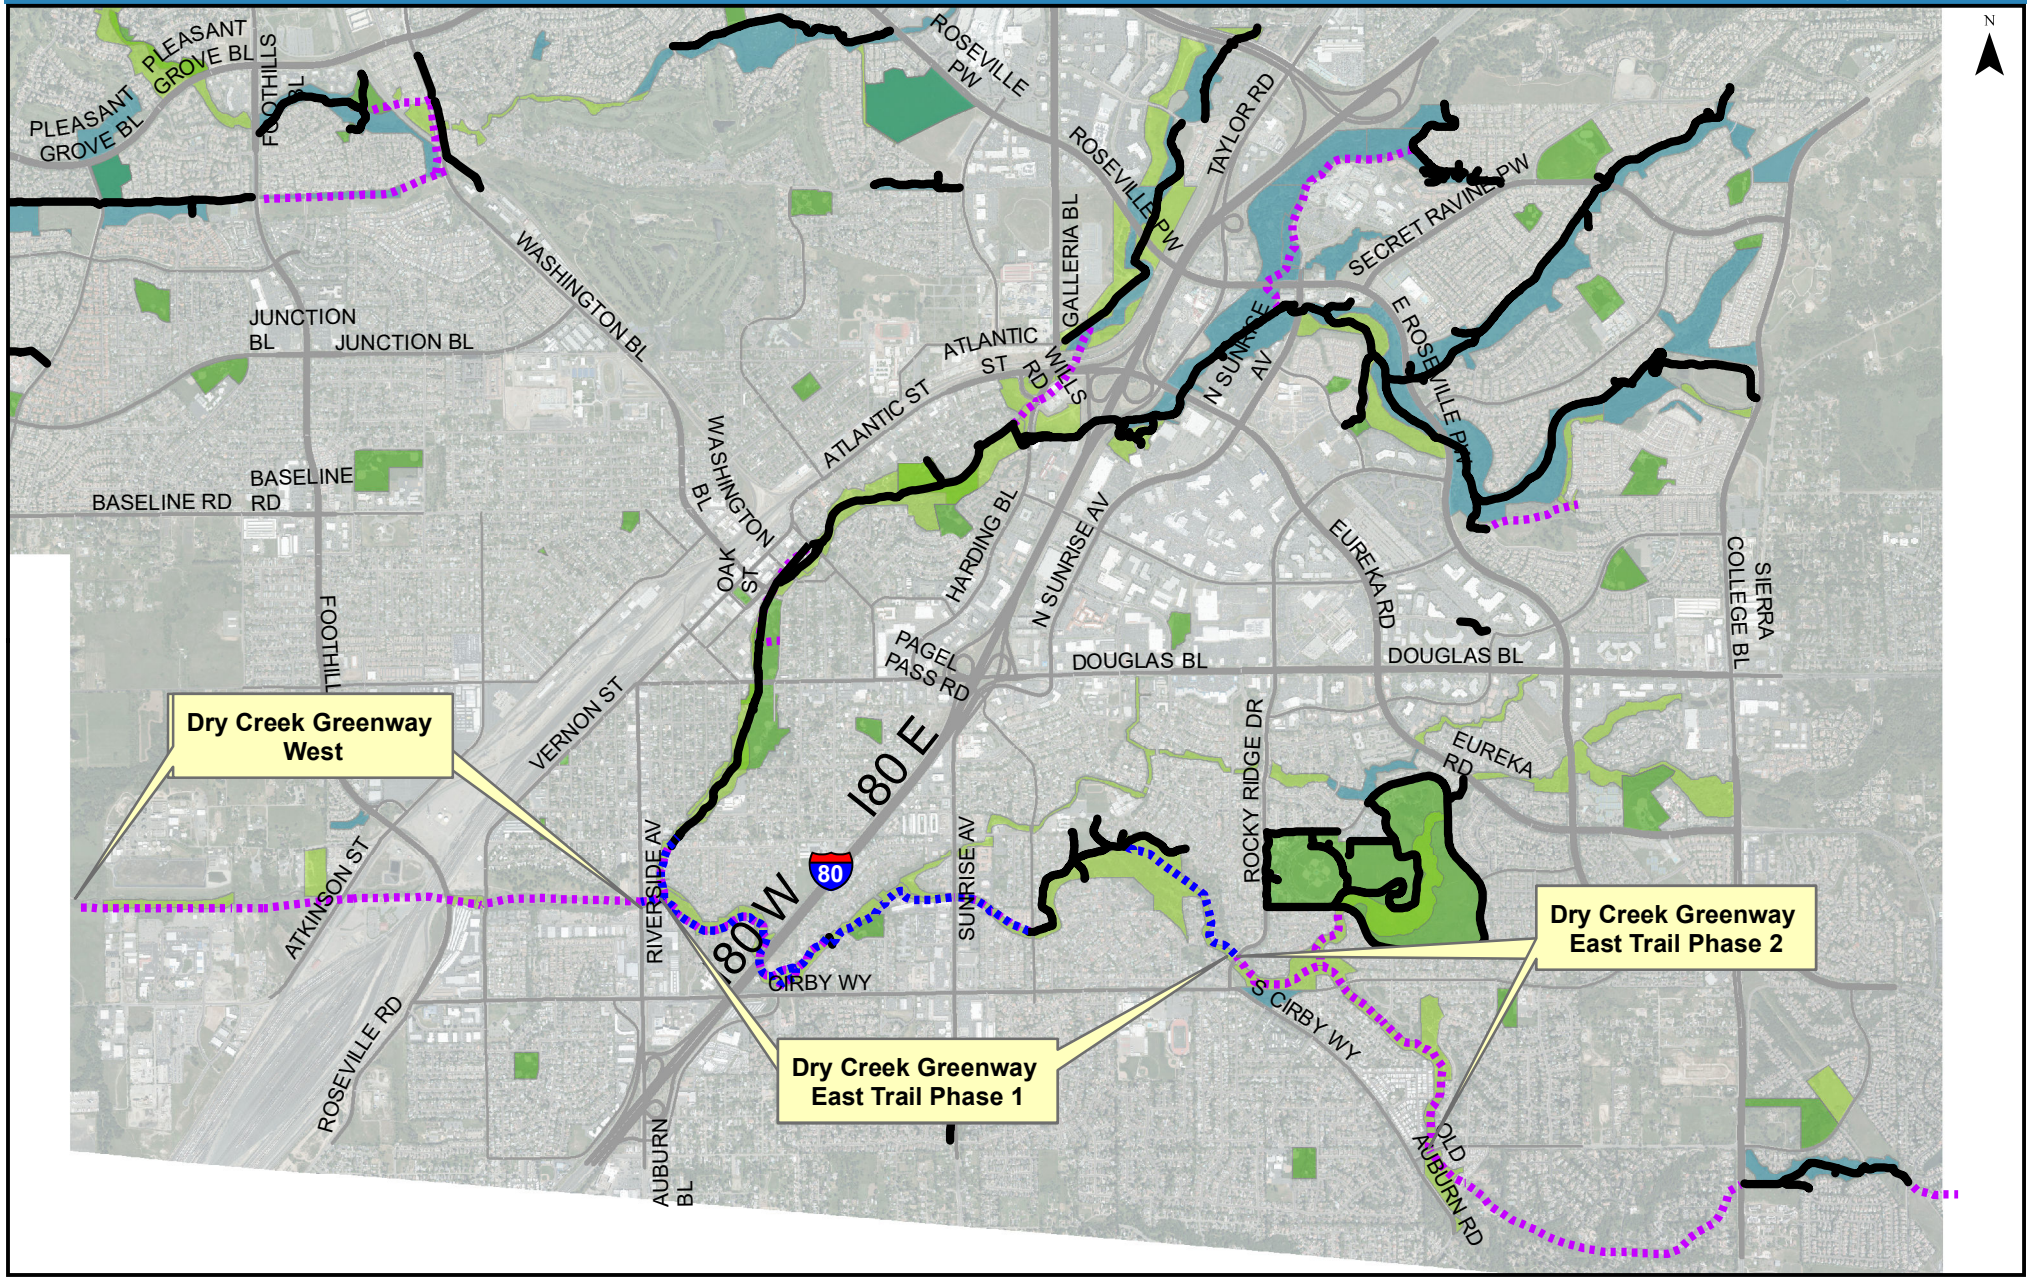
Resolution 22-111

CITY OF ROSEVILLE CALIFORNIA

Dry Creek Greenway Trail

Public Works - Alternative Transportation Division



RESOLUTION NO. 22-111

APPROVING A GRANT APPLICATION TO THE CALIFORNIA TRANSPORTATION COMMISSION, AND AUTHORIZING THE CITY MANAGER OR HIS DESIGNEE TO EXECUTE ALL RELATED FORMS AND AGREEMENTS ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, the State of California recently released a call for projects for Cycle 6 of the Active Transportation Program (ATP); and

WHEREAS, the ATP is a competitive program that provides funding for projects that encourage increased use of active modes of transportation, such as walking and biking; and

WHEREAS, per the General Plan and Bicycle Master Plan, the Dry Creek Greenway East Trail Project is a proposed paved multi-use trail; and

WHEREAS, the project alignment and a phasing plan were approved by the City Council on March 20, 2019; and

WHEREAS, staff recommends City Council approve filing a grant application to the California Transportation Commission in the amount of $6,500,000, to be applied towards the construction and non-infrastructure costs.

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Roseville hereby approves filing of the grant application to the California Transportation Commission.

BE IT FURTHER RESOLVED that the City Manager or his designee is authorized to execute all related forms and agreements on behalf of the City of Roseville.

COUNCIL COMMUNICATION

CC #: 2024
File #: 0900-02 & 0201-01

Title: Pleasant Grove Pump Station Modifications Project – Budget Adjustment
Contact: Jason Marks 916-342-9573 jtmarks@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 7.17.

RECOMMENDATION TO COUNCIL

Staff recommends that City Council adopt an ordinance to approve a budget adjustment initiating the Pleasant Grove Pump Station Modifications Project with a total budget of $690,000 using available resources in the Water Rehabilitation Fund.

BACKGROUND

The Pleasant Grove Pump Station Modifications Project (#500227) will provide the City with drought resiliency and improved operational efficiency. The modifications will add variable frequency drives to the pump station allowing operators to maintain pressures in the water distribution system resulting in more optimal use of existing infrastructure. In addition, automating valves will allow City staff to operate the pump station remotely, leading to faster response times in an emergency and improved use of staff resources.

FISCAL IMPACT

The recommended budget adjustment will fund the Pleasant Grove Pump Station Modifications Project (#500227) with $690,000 ($600,000 for capital outlay and $90,000 for City staff labor) from available resources in the Water Rehabilitation Fund.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of the proposed budget adjustment and pump station modifications meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Ordinance 6474

Budget Adjustment

ORDINANCE NO. 6474

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AUTHORIZING CERTAIN AMENDMENTS TO THE FISCAL YEAR 2021-22 BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY EFFECTIVE AS AN APPROPRIATION MEASURE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. The City of Roseville Annual Budget, Fiscal Year 2021-22, is hereby amended as listed on the attached budget adjustment for the Pleasant Grove Pump Station Modifications Project.

SECTION 2. This ordinance is hereby declared to be an appropriation measure, immediately effective pursuant to the provisions of Section 5.03 of the Charter.

SECTION 3. The City Clerk is hereby authorized and directed to post a true copy of the foregoing ordinance in each of three (3) conspicuous locations in the City and she shall immediately after such posting enter in the ordinance book, under the record of the ordinance, a certificate under her hand stating the time and place of such publication by posting.

Fund	Account	Center	Project	Adjustment	
6130				(690,000)	Reduce available resources - Water Rehabilitation Fund
			TOTAL	(690,000)	

Justification for Budget Adjustment:

This new project, Pleasant Grove Pump Station Modifications (#500227), will improve the City's drought resiliency. The modifications will add variable frequency drives to the pump station allowing operators to maintain pressures in the water distribution system resulting in more optimal use of existing infrastructure. In addition, automating valves will allow City staff to operate the pump station remotely, leading to faster response times in an emergency and improved staff efficiency. This project's $690,000 budget ($600,000 for capital outlay and $90,000 for staff secondary labor) will come from the available resources in the Water Rehabilitation Fund (6130). The reimbursement for staff secondary labor is already budgeted in the Water Operations Fund and will be programmed in those same budgets for FY2022-23. This project is expected to be completed by the end of FY2022-23.

Title:	Zero-Emission Battery Electric Buses - Purchase Order and Budget Adjustment
Contact:	Ed Scofield 916-869-9109 ecscofield@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 7.18.

RECOMMENDATION TO COUNCIL

Staff recommends City Council approve a purchase order for five (5) zero-emission battery-electric buses for a total purchase price not to exceed $5,408,493 and adopt an ordinance approving a budget adjustment in the amount of $5,587,587.

BACKGROUND

The South Placer Express Transit project is a 3-year pilot program to provide fixed-route bus service between the City of Lincoln, the Westfield Galleria, Kaiser Roseville Hospital, Sutter Roseville Hospital, and the Watt / I-80 light rail station. The project is intended to address mobility and traffic along the State Route 65 and Interstate 80 corridors. This weekday bus route will consist of a 30-minute frequency from approximately 6:00 a.m. to 9:00 p.m. beginning in 2023.

The project was developed by the Placer Country Transportation Planning Agency (PCTPA). Roseville Transit was selected to be the operator. PCTPA, in cooperation with the City of Roseville, has secured grants and other regional funding to support the project's capital and operational costs. This funding includes a $6,000,000 Solutions for Congested Corridors Program (SCCP) grant to purchase five new electric buses and five charging stations, including two overhead chargers installed at the Galleria.

The proposed budget adjustment and authorization to purchase five (5) electric buses is the first step toward implementing this project. Staff has worked with Proterra to select options based on Roseville Transit needs and proposes purchasing five (5) 40-foot ZX5 Proterra electric buses, with a total 660 kWh battery pack each, under the State of California statewide contract for Zero-Emission Transit Buses (CA state contract #1-19-23-17C).

Staff will request separate City Council actions later this year for 1) Construction of the Corporation Yard Charging Depot and; 2) the purchase and installation of chargers for the South Placer Express. The purchase of battery-electric buses and future purchase of chargers are consistent with the Roseville Transit Zero Emission Business Plan accepted by the City Council on May 20, 2020.

FISCAL IMPACT

The proposed budget adjustment will increase the South Placer Express Bus Service Project budget by $5,587,587. This adjustment will facilitate the purchase of the five electric buses (including a 2% contingency to address potential minor specification adjustments), professional design services for the Galleria on-route chargers, contract inspections by a consultant, final vehicle preparation, and inspections by Roseville's Fleet Services Division, and staff labor.

The sources of funds included in the recommended budget adjustment include:

SCCP Grant	$ 4,705,000
Local Transportation Fund (LTF)	$ 820,771
South Placer Regional Transportation Authority (SPRTA)	$ 136,816
Western Placer Consolidated Transportation Services Agency (WPCTA) Grant	($75,000)
Total	**$ 5,587,587**

The negative $75,000 reflects replacing a previously budgeted WPCTA grant with funding from the SCCP Grant, LTF, and SPRTA.

On behalf of the City of Roseville, Proterra recently applied to the California Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project (HVIP) for vouchers for the buses. If approved, the vouchers will effectively reduce the purchase price of the five buses and reduce the project's reliance on LTF by up to $690,000. Also, staff recently submitted the funding allocation request for the SCCP funds to the California Transportation Commission (CTC). We anticipate approval of the allocation at the CTC's May 18-19, 2022 meeting.

No General Funds are being used for this project.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The proposed bus purchase meets the above criteria and is not subject to CEQA. No additional environmental review is required.

CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal C - Maintain a safe and healthy community
Goal D - Enhance economic vitality
Goal E - Deliver exceptional city services

CC #: 2023
File #: 0214 & 0201-01

Title:	Personal Thermal Imaging Cameras - Grant Award and Budget Adjustment
Contact:	Jason Rizzi 916-774-5802 jrizzi@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 7.19.

RECOMMENDATION TO COUNCIL

Staff recommends:
1. City Council accept the award from the Department of Homeland Security - Urban Area Security Initiative to purchase thermal imaging cameras for firefighting operation.
2. Adopt a resolution authorizing the City Manager to execute the Subaward Agreement with the City of Sacramento.
3. Adopt an ordinance to approve the associated budget adjustment of $40,317 in revenue and $40,317 in expenditures related to the grant.

BACKGROUND

The Roseville Fire Department was awarded a $40,317 grant by the City of Sacramento as a sub-grantee from the California Office of Emergency Services (CalOES) for the 2019 Department of Homeland Security Grant - Urban Area Security Initiative to purchase thermal imaging cameras for firefighting operations. The thermal imaging cameras will provide each individual firefighter the ability to improve situational awareness during firefighting operations. Handheld cameras allow firefighting personnel the ability to visualize heat and see through smoke, increasing firefighter safety.

FISCAL IMPACT

No matching funds are required. Maintenance costs for these new thermal imaging cameras are included in the department's existing budget in the General Fund. This is a cost-neutral request with no impact on the General Fund.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines

§15060(c)(3) and §15378. Acceptance of a Grant Award and Budget Adjustment meet the above criteria and are not subject to CEQA. No additional environmental review is required.

CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Goal A - Remain fiscally responsible in a changing world
Goal C - Maintain a safe and healthy community

UASI Contract

Ordinance 6475

Budget Adjustment

RESOLUTION NO. 22-103

ACCEPTING A GRANT AWARD FROM THE U.S. DEPARTMENT OF HOMELAND SECURITY THROUGH THE CALIFORNIA OFFICE OF EMERGENCY SERVICES ON BEHALF OF THE CITY OF ROSEVILLE

WHEREAS, the Roseville Fire Department was awarded a $40,317 grant by the City of Sacramento as a sub-grantee from the California Office of Emergency Services (CalOES) for the 2019 Homeland Security Grant – Urban Area Security Initiative for the purchase of Personal Thermal Imaging Cameras; and

WHEREAS, no matching funds are required to accept the grant award.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Roseville that as the grant recipient, the City of Roseville agrees to comply with all conditions and requirements related to conduct for the award; and

BE IT FURTHER RESOLVED, that the City of Roseville accepts the grant award from the U.S. Department Homeland Security through the California Office of Emergency Services; and

BE IT FURTHER RESOLVED, that the City Manager is authorized to execute the Subaward Agreement with the City of Sacramento and all other necessary grant documents on behalf of the City of Roseville.

ORDINANCE NO. 6475

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AUTHORIZING CERTAIN AMENDMENTS TO THE FISCAL YEAR 2021-22 BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY EFFECTIVE AS AN APPROPRIATION MEASURE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. The City of Roseville Annual Budget, Fiscal Year 2021-22, is hereby amended as listed on the attached budget adjustment for Personal Thermal Imaging Cameras.

SECTION 2. This ordinance is hereby declared to be an appropriation measure, immediately effective pursuant to the provisions of Section 5.03 of the Charter.

SECTION 3. The City Clerk is hereby authorized and directed to post a true copy of the foregoing ordinance in each of three (3) conspicuous locations in the City and she shall immediately after such posting enter in the ordinance book, under the record of the ordinance, a certificate under her hand stating the time and place of such publication by posting.

			TOTAL	40,317	

NET ADJUSTMENT	-	

FUND BALANCE

ACCOUNT STRING				BUDGET ($)	DESCRIPTION
Fund	Account	Center	Project	Adjustment	
			TOTAL	-	

Justification for Budget Adjustment:

The Fire Department is requesting a budget adjustment to recognize the $40,317 in revenue and $40,317 in expenses related to the purchase of personal thermal imaging cameras. The department has been awarded as a subgrantee through City of Sacramento Fire Department, Urban Area Search Initative a $40,317 in a grant to provide important thermal imaging camera equipment to the department. There are no matching funds required and the net effect to the General Fund is zero.

Description

Ordinance 6476

Ordinance 6477

ORDINANCE NO. 6476

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING SECTION 19.10.030 OF CHAPTER 19.10 OF TITLE 19 OF THE ROSEVILLE MUNICIPAL CODE REGARDING RESIDENTIAL ZONES, AMENDING SECTIONS 19.28.040, 19.28.060, AND 19.28.100 OF CHAPTER 19.28 OF TITLE 19 OF THE ROSEVILLE MUNICIPAL CODE REGARDING RESIDENTIAL DENSITY BONUS, AND AMENDING SECTION 19.60.080 OF CHAPTER 19.60 OF TITLE 19 OF THE ROSEVILLE MUNICIPAL CODE REGARDING ACCESSORY DWELLING UNITS

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Section 19.10.030 of Chapter 19.10 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

19.10.030 Residential zone general development standards.

A. Residential Development Standards. Permitted uses and associated structures shall comply with the following development standards, in addition to any other applicable requirements of this title:

RESIDENTIAL ZONE GENERAL DEVELOPMENT STANDARDS

	Requirement by Zoning District					
	R1	**RS** with attached sidewalk (10)	**RS** with separated sidewalk (8), (10)	**R2**	**R3**(2)	**RMU**
Area, interior lot	6,000 sq ft	4,500 sq ft	4,275 sq ft	6,000 sq ft	6,000 sq ft	None (7)
Area, corner lot	7,500 sq ft	5,500 sq ft	4,710 sq ft	7,500 sq ft	7,500 sq ft	
Width, interior	60 ft	45 ft	45 ft	60 ft	60 ft	
Width, corner	75 ft	55 ft	50 ft	75 ft	75 ft	
Residential Density						
Maximum number of primary dwelling units per lot	2 dwellings (1)	2 dwellings (1)	2 dwellings (1)	2 dwellings (1)	As provided by General Plan, but a minimum of 3	As provided by General Plan

	Requirement by Zoning District					
	R1	**RS** with attached sidewalk (10)	**RS** with separated sidewalk (8), (10)	**R2**	**R3**(2)	**RMU**
					dwellings	
Maximum number of accessory/junior dwelling units per lot(11)	Up to 2 dwellings	Up to 2 dwellings	Up to 2 dwellings	Up to 2 dwellings	Up to 2 dwellings	Up to 2 dwellings
See Chapter 19.22 for accessory structure development standards for the following standards						
Setbacks (minimum)						
Front(9) (1)	20 ft for interior lots; 15 ft for corner lots; 20 ft minimum driveway depth	15 ft to living space or side wall of garage; 12.5 ft to porch; 18 ft minimum driveway depth(6)	10 ft to first floor living space or side wall of garage; 7.5 ft to porch, but in no case may encroach into a PUE; 15 ft to second floor living space; 18 ft minimum driveway depth(6)	20 ft for interior lots; 15 ft for corner lots; 20 ft minimum driveways depth	20 ft minimum on all street frontages	None(7)
Sides(9) (1)	5 ft interior; 15 ft street side on corner	5 ft interior; 12.5 ft street side on first floor; 15 ft street side on second	5 ft interior; 10 ft street side on first floor; 13 ft street side on second	5 ft interior; 15 ft street side on corner	5 ft interior; 20 ft minimum on all street frontages	None(7)

	Requirement by Zoning District					
	R1	**RS** with attached sidewalk (10)	**RS** with separated sidewalk (8), (10)	**R2**	**R3**(2)	**RMU**
		floor	floor			
Rear(1)	20% of lot depth; need not exceed 20 ft; 10 ft minimum (3)	10 ft minimum with minimum useable open space of 700 sq ft or 500 sq ft where a usable front porch is provided (4)	10 ft minimum with minimum useable open space of 500 sq ft(4)	20% of lot depth; need not exceed 20 ft; 10 ft minimum	20 ft; 20 ft minimum on all street frontages	None(7)
Lot Coverage (primary buildings)	35% for 2 story; 45% for 1 story	None(4)	None(4)	40%	50%	None(7)
Height Limits	35 ft	35 ft	35 ft	35 ft	45 ft(5)	None(7)
Additions to the primary structure greater than 700 square feet in area(12)	May only be permitted upon approval of an Administrative Permit					

Notes:

(1) Up to two residential units are permitted in the R1 and RS zone districts provided the criteria of 19.10.030 (G) are met. Residential units may be attached or detached in the R1, RS, or R2 zone districts.

(2) The general development standards for the R3 district may be modified through approval of a Design Review Permit.

(3) On corner lots, the minimum rear setback may be determined by using an average of three measurements taken at the ends of the structure and a point midway between the ends of the structure. The measurements shall be made perpendicular to the rear lot line.

(4) The rear and side yards may be utilized to meet the minimum usable open space provided the minimum dimension, measured perpendicular to the applicable rear or side yard is 10 feet. Maximum coverage is a

function of lot size, required setbacks and usable open space. A minimum usable open space of 500 square feet may be applied where a front porch is provided with minimum dimensions of six feet by 10 feet exclusive of entry way.

(5) Except for residential units immediately adjacent to the R1 and RS zone districts, where the height limit shall be 35 feet.

(6) Minimum driveway depth of 18 feet requires a roll-up garage door.

(7) As provided in development standard overlay or special area overlay district.

(8) Sidewalk separated from back of curb by five-foot planter strip.

(9) Front setback (and side setback where adjacent to street) measured from back of walk. Fence side yard setback is five feet from back of walk where facing a street. In the absence of sidewalk, setbacks measured from the edge of right-of-way.

(10) Variations to the standards and other housing product types may be permitted subject to processing of a Design Review Permit for Residential Subdivision (DRRS) concurrent with the approval of a tentative subdivision map and review of product type.

(11) A combination of up to two accessory dwelling/junior accessory dwelling units are permitted within areas zoned to allow single-family, two-family or multi-family residential use provided the lot contains an existing or proposed single-family dwelling, two-family or multi-family residential unit as defined in Sections 19.08.080(F)(1) and (F)(2) (Residential Use Types) and the accessory dwelling/junior accessory dwelling unit complies with the standards identified in Chapter 19.60 (Accessory Dwelling Units). See Chapter 19.60 for the maximum number and combination of units allowed per lot. For purposes of density, accessory dwelling units shall be deemed to be an accessory use or an accessory building or structure and shall not be considered to exceed the allowable density for the lot upon which it is located.

(12) Additions (attached or detached) to primary structures that exceed 700 gross square feet in area may be permitted upon approval of an Administrative Permit, which may include a public hearing as provided in Sections 19.74.010 and 19.78.020. Excludes accessory dwelling units complying with the standards identified in Chapter 19.60 (Accessory Dwelling Units).

B. Clear Vision Triangle, Residential. The following standards shall apply to the installation of structures on corner parcels:

1. On a corner parcel, no fence, wall, sign or other structure, mounds of earth, or other visual obstruction over 36 inches in height above the top of the existing or planned curb elevation shall be erected or placed within a residential clear vision triangle (see Chapter 19.95 Definitions).

2. The foregoing provision shall not apply to public utility poles; trees trimmed (to the trunk) to a line at least eight feet above the elevation of the intersection; saplings or plant species of open growth habits and not planted in the form of a hedge, which are so planted and trimmed as to leave, at all seasons, a clear and unobstructed cross view; supporting members of appurtenances to permanent structures existing on the date that the ordinance codified in this section becomes effective; and official warning signs or signals.

C. Exceptions to Height Limits. Notwithstanding the requirements of subsection A, the following structures are permitted to exceed the maximum height limits, as follows:

Architectural features, mechanical equipment, chimneys, vents, and other architectural or mechanical appurtenances on buildings may be a maximum of 15 percent higher than the height limit of the applicable zone.

D. Exceptions to Setbacks. Notwithstanding the requirements of subsection A, the following structures are permitted to encroach into the required development setbacks, as follows:

1. Architectural features, such as but not limited to: cornices, eaves, canopies, fireplaces and similar features, but not any flat wall or addition creating living space, may encroach up to two feet into any required setback.

2. Covered, unenclosed projections attached to the primary structure may encroach up to six feet into any front yard setback.

E. Manufactured Homes. Manufactured homes are permitted in residential zones provided they meet the following architectural standards:

1. The manufactured home shall be covered with exterior material customarily used on conventional dwellings within the subdivision. The exterior covering material shall extend to the ground as close to grade as allowed by the manufacturer's recommendation;

2. The manufactured home shall have a minimum of 16-inch roof overhangs and roofing material on the manufactured home shall be compatible with other dwellings existing in the area and shall consist of materials customarily used on conventional dwellings. The roof shall have a minimum 2 1/2 in 12 pitch.

F. Landscaping Requirements in Setback Areas.

1. Single-Family and Two-Family Dwellings—Front-Yard and Street Side-Yard Setbacks.

a. Setback Area Paving Restrictions. A maximum of 50 percent of the required front-yard setback may be paved for off-street parking, driveways, walkways, or uncovered patio use. A maximum of 50 percent of the required street side-yard setback may be paved for off-street parking, driveways, walkways, or uncovered patio use; however, this maximum limitation does not apply to that portion of the street side-yard located behind a fence that is in compliance with the street side fence requirements set forth in Chapter 19.22 of this code. These requirements may be modified with approval of a Design Review Permit for Residential Subdivision (DRRS), as provided for in Article V of this title.

b. Landscape and Maintenance Requirements. The unpaved portion of a front-yard setback and street side-yard setback shall be landscaped, irrigated, and maintained. The landscape shall include grass, annuals, perennials, groundcover, shrubs, trees, or other living vegetation. Synthetic grass or artificial turf may be used if it is permeable and has a minimum pile height of 1.25 inches. Design elements like planters, rocks, mulch, or similar elements are permitted when integrated as part of the landscape. All landscaping materials shall be mowed, trimmed, and maintained as often as necessary to prevent overgrowth and blight. No junk, debris, or other similar materials shall be stored in the landscaped setback area.

c. Height Restrictions for Landscaping Located in the Clear Vision Triangle. All landscaping located within the clear vision triangle for corner lots, as defined in Section 19.95.030 of this code, shall not exceed three feet in height, except that trees exceeding three feet in height are allowed if the tree is maintained free of branches eight feet above the curb grade.

d. Vehicle Parking Requirements. Vehicles, including without limitation, automobiles, boats, campers, trailers, and other recreational vehicles, must be parked on a paved surface, as provided for in Section 11.20.110 of this code. Vehicles shall not be parked within the landscaped setback area.

2. Multi-Family Dwellings (Three or More Residential Units)—Front-Yard and Street Side-Yard Setbacks. All minimum front-yard and street side-yard setbacks shall be landscaped, irrigated and maintained with primarily low ground cover or turf. The landscape shall include grass, annuals, perennials, groundcover, shrubs, trees, or other living vegetation. Synthetic grass or artificial turf may be used if it is permeable and has a minimum pile height of 1.25 inches. Design elements like planters, rocks, mulch, or similar elements are permitted when integrated as part of the landscape. All landscaping materials shall be mowed, trimmed, and maintained as often as necessary to prevent overgrowth and blight. No junk, debris, or other similar materials shall be stored in the landscaped setback area. Driveways and uncovered walkways are permitted to cross over the required front-yard and street side-yard setback. The required front-yard and street side-yard setbacks may not be paved for parking or patio areas.

G. Criteria for Two Residential Units in Single-Family Zones. The City's single-family zones are R1 and RS. Parcels in single-family zones are permitted one residential unit, and may have a second residential unit subject to the following criteria and restrictions:

1. Demolition or Alteration of Existing Housing. The housing development shall not require demolition or alteration of housing:

a. Subject to a recorded covenant, ordinance, or law that restricts rents to levels affordable to persons and families of moderate, low, or very low income;
b. Subject to any form of rent or price control through a public entity's valid exercise of its police power;
c. That has been occupied by a tenant at any time within the past three years.

Demolition or alteration is permitted if none of the above conditions apply.

2. Use Restrictions.

a. Short term Rentals. Residential units constructed pursuant to this section may not be rented for a period of less than 31 consecutive calendar days. Accordingly, short-term rentals, as authorized pursuant to Chapter 4.25 (Short-Term Rentals), are not permitted for residential units constructed pursuant to this section.

b. Accessory Dwelling Units/Junior Accessory Dwelling Units. An accessory dwelling unit and/or junior accessory dwelling shall not be permitted on parcels that have used this section to build two residential units and which are the result of a parcel map pursuant to Municipal Code Chapter 18.05.

c. Use Classification. Whether they are detached or attached, residential units constructed pursuant to this section shall be considered single-family buildings.

3. Development Standards. The new structure(s) shall be consistent with the development standards of the zone district in which they are located, except:

a. Parking Requirements. No off-street parking shall be required for new residential units constructed pursuant to this section if the parcel is located within ½ mile walking distance of either a high-quality transit corridor as defined in Public Resources Code Section 21155(b), as may be amended from time to time; or a major transit stop, as defined in Public Resources Code Section 21064.3, as may be amended from time to time; or if there is a car share vehicle located within one block of the parcel. In all other cases, new residential units constructed pursuant to this section shall provide a minimum of one off-street parking space. Off-street parking shall be designed consistent with the requirements of Chapter 19.26.040.

b. Setbacks. No setback shall be required for conversion of an existing structure or a structure constructed in the same location (i.e. footprint) and to the same or smaller dimensions as an existing structure. In all other cases, a setback of four feet from the side and rear lot lines shall be required for new residential units constructed pursuant to this section, including any garages, porches, decks, balconies, stairs, and patios which are attached to and for the use of the residential unit.

c. Waivers. Notwithstanding anything to the contrary contained within this section, a development standard applicable to the zone district in which the proposed residential units are located shall be waived if application of the standard would physically preclude either of the two residential units from being at least 800 square feet in floor area.

4. Site Limitations or Restrictions. To qualify for a second residential unit, a parcel shall meet the following criteria:

a. The parcel shall satisfy the requirements specified in Government Code Section 65913.4(a)(6)(B) to (K), as may be amended from time to time, including but not limited to not being within a special flood hazard area, a regulatory floodway, and/or a habitat for protected species.

b. Government Code Section 7060 et seq., as may be amended from time to time, to withdraw accommodations from rent or lease within 15 years before the date that the development proponent submits an application.

c. The parcel shall not be located within a historic district or property included on the State Historic Resources Inventory, as defined in Public Resources Code Section 5020.1, as may be amended from time to time, or listed as a city or county landmark or historic property or district pursuant to a city ordinance.

5. Reasons for Denial of Permit. A building permit for a second residential unit or two new residential units, pursuant to this section, shall be denied by written findings of the building official where, based on a preponderance of the evidence, the building official has determined the housing development would have a specific, adverse impact as defined and determined in Government Code Section 65589.5(d)(2), as may be amended from time to time, upon public health and safety or the physical environment and for which there is no feasible method to satisfactorily mitigate or avoid the specific, adverse impact.

SECTION 2. Section 19.28.040 of Chapter 19.28 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

19.28.040 Eligibility for bonus.

A developer of a housing development containing five or more units may qualify for a density bonus and at least one other incentive as provided by this chapter if the developer does one of the following:

A. Agrees to construct and maintain at least five percent of the units for rental or sale dedicated to very low income households;

B. Agrees to construct and maintain at least 10 percent of the units for rental or sale dedicated to lower income households;

C. Agrees to construct and maintain at least 10 percent of the units of a housing development to be sold to moderate income households, provided that all units in the development are offered to the public for purchase;

D. Agrees to construct and maintain a senior citizen housing development, as defined in Section 19.28.020 of this chapter, or a mobilehome park that limits residency based on age requirements for housing for older persons pursuant to Section 798.76 or 799.5 of the California Civil Code, as may be amended from time to time;

E. Donates land to the City dedicated for the construction of very low income units pursuant to Section 19.28.080 of this chapter;

F. Includes a qualifying child care facility as described in Section 19.28.070 of this chapter in addition to providing housing as described in subsections A through C of this section;

G. Agrees to construct and maintain at least 10 percent of the units of a housing development for transitional foster youth, as defined in Section 66025.9 of the California Education Code, as may be amended from time to time, disabled veterans, as defined in Section 18541 of the California Government Code, as may be amended from time to time, or homeless persons, as defined in the federal McKinney-Vento Homeless Assistance Act (42 U.S.C. Sec. 11301 et seq.), as may be amended from time to time, dedicated to very low income households;

H. Agrees to construct and maintain at least 20 percent of the units for lower income students in a student housing development pursuant to Section 19.28.085 of this chapter; or

I. Agrees to construct and maintain 100 percent of the units, including total units and density bonus units, but exclusive of a manager's unit or units, dedicated to lower income households, except that up to 20 percent of the units, including total units and density bonus units, may be dedicated to moderate income households.

SECTION 3. Section 19.28.060 of Chapter 19.28 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

19.28.060 Eligibility and application requirements for incentives.

A. Available Incentives. A housing development qualifying for a density bonus may be entitled to at least one incentive. Incentives may include, but are not limited to:

1. A reduction in site development standards such as:

a. Reduced minimum lot sizes and/or dimensions.

b. Reduced minimum lot setbacks.

c. Reduced minimum outdoor and/or private outdoor living area.

d. Increased maximum lot coverage.

e. Increased maximum building height and/or stories.

f. Reduced on-site parking requirements.

g. Reduced street standards.

2. A reduction in architectural design requirements.

3. A density bonus greater than the amount required by this chapter.

4. Other regulatory incentives proposed by the developer or the City, which result in identifiable, financially sufficient, and actual cost reductions.

B. Parking Requirements. If an applicant qualifies for a density bonus pursuant to this chapter, the applicant may request, in addition to any requested incentive(s), that reduced parking requirements be applied to the project in place of the City's current parking requirements. The parking requirement is inclusive of accessible and guest parking for the entire housing development, but shall not include on-street parking spaces in the count towards the parking requirement. The housing development may provide onsite parking through tandem or uncovered parking, but not through on-street parking. In calculating the number of parking spaces required for a development, if the total number of parking spaces is other than a whole number, the number shall be rounded up to the next whole number.

1. Except as otherwise provided in this subsection, the following parking requirements shall apply:

a. Zero to one bedroom: one on-site parking space.

b. Two to three bedrooms: one and one-half on-site parking spaces.

c. Four or more bedrooms: two and one-half on-site parking spaces.

2. If the housing development includes at least 20 percent lower income units or at least 11 percent very low income units, is located within one-half mile of a major transit stop, and there is unobstructed access to the major transit stop from the development, then the parking requirement shall be one-half on-site parking space per unit.

3. If a housing development consists solely of rental units, exclusive of a manager's unit or units, with an affordable housing cost to lower income families, as provided in Section 50052.5 of the California Health and Safety Code, then no parking spaces shall be required as long as the development meets either of the following criteria:

a. The development is located within one-half mile of a major transit stop and there is unobstructed access to the major transit stop from the development; or

b. The development is a for-rent housing development for individuals who are 62 years of age or older that complies with Sections 51.2 and 51.3 of the California Civil Code and the development has either paratransit service or

unobstructed access, within one-half mile, to fixed bus route service that operates at least eight times per day.

4. If a housing development consists solely of rental units, exclusive of a manager's unit or units, with an affordable housing cost to lower income families, as provided in Section 50052.5 of the California Health and Safety Code, and the development is either a special needs housing development, as defined in Section 51312 of the California Health and Safety Code, or a supportive housing development, as defined in Section 50675.14 of the California Health and Safety Code, then no parking spaces shall be required. A development that is a special needs housing development shall have either paratransit service or unobstructed access, within one-half mile, to fixed bus route service that operates at least eight times per day.

5. Upon the request of the developer, the parking requirement (inclusive of parking for persons with a disability and guests) shall be 0.5 spaces per bedroom if all of the following are met:

a. The housing development includes at least 40 percent moderate-income units and at least 10 percent of the units of the housing development are sold to moderate-income households, provided that all units in the development are offered to the public for purchase; and
b. The housing development is located within one-half mile of a major transit stop, as defined in Public Resources Code Section 21155(b), as may be amended from time to time; and
c. The residents of the development have unobstructed access to the major transit stop from the development.

C. Eligibility for Incentives. Incentives are available to a housing developer as follows:

1. One incentive for housing developments that: (a) restrict at least 10 percent of the total units to lower income households, at least five percent for very low income households, or at least 10 percent for persons and families of moderate income in a development in which the units are for sale; or (b) are for senior housing.

2. Two incentives for housing developments that restrict at least 17 percent of the total units to lower income households, at least 10 percent for very low income households, or at least 20 percent for persons and families of moderate income in a development in which the units are for sale.

3. Three incentives for housing developments that restrict at least 24 percent of the total units for lower income households, at least 15 percent for very low income households, or at least 30 percent for persons and families of moderate income in a development in which the units are for sale.

4. Four incentives for housing developments that restrict 100 percent of the units, including total units and density bonus units, but exclusive of a manager's unit or units, dedicated to lower income households, except that up to 20 percent of the units, including total units and density bonus units, may be dedicated to moderate income households. If the project is located within one-half mile of a major transit stop, the applicant shall also receive a height increase of up to three additional stories, or 33 feet.

5. One incentive or concession for projects that include at least 20 percent of the total units for lower income students in a student housing development.

SECTION 4. Section 19.28.100 of Chapter 19.28 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

19.28.100 Findings for approval for density bonus and/or incentive(s).

A. Density Bonus Approval. The following finding shall be made by the approving authority in order to approve a density bonus request:

1. The density bonus request meets the requirements of this chapter.

B. Density Bonus Approval with Incentive(s). The following findings shall be made by the approving authority in order to approve a density bonus and incentive(s) request:

1. The density bonus request meets the requirements of this chapter;

2. The incentive is required in order to provide affordable housing; and

3. Approval of the incentive(s) will have no specific adverse impacts upon health, safety or on any real property that is listed in the California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact without rendering the development unaffordable to very low, low, and moderate income households.

C. Denial of a Request for an Incentive(s). The approving authority shall make the following findings prior to disallowing an incentive (in the case where an accompanying density bonus may be approved, or in the case of where an incentive(s) is requested for senior housing or child care facility):

1. That the incentive is not necessary in order to provide for affordable housing costs as defined in Section 19.28.020 of this chapter, or for rents for the targeted units to be set as specified in Section 19.28.020 of this chapter.

2. That the incentive would result in specific adverse impacts upon health, safety or on any real property that is listed in the California Register of Historical Resources and for which there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact without rendering the development unaffordable to very low, low, and moderate income households.

3. That the incentive would be contrary to State or Federal law.

SECTION 5. Section 19.60.080 of Chapter 19.60 of Title 19 of the Roseville Municipal Code is hereby amended to read as follows:

19.60.080 Use restrictions.

A. Sales Prohibited, Exceptions. Accessory dwelling units shall not be sold independently of the primary dwelling unit on the lot unless all of the criteria of Government Code Section 65852.26, as may be amended from time to time, are met, including that the accessory dwelling unit or the primary dwelling unit was built or developed by a qualified nonprofit corporation and there are affordability restrictions on the sale and conveyance of the

accessory dwelling unit or primary residence that ensure the accessory dwelling unit and primary dwelling will be preserved for low income housing for 45 years for owner-occupied housing units and will be sold or resold to a qualified buyer.

B. Rentals. Accessory dwelling units may be rented as long as the rental term exceeds 30 calendar days. Accordingly, short-term rental permits authorized pursuant to Chapter 4.25 (Short-Term Rentals) will not be issued for accessory dwelling units. (

SECTION 6. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 7. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

ORDINANCE NO. 6477

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING SECTIONS 18.04.025, 18.04.030 AND 18.04.060 OF CHAPTER 18.04 OF TITLE 18 OF THE ROSEVILLE MUNICIPAL CODE REGARDING CITY COUNCIL, COMMISSION AND COMMITTEE POWERS, ADDING CHAPTER 18.05 TO TITLE 18 OF THE ROSEVILLE MUNICIPAL CODE REGARDING TENTATIVE MAP APPLICATIONS – MINISTERIAL, AMENDING SECTIONS 18.06.030, 18.06.050 AND 18.06.080 OF CHAPTER 18.06 OF TITLE 18 OF THE ROSEVILLE MUNICIPAL CODE REGARDING TENTATIVE MAP APPLICATIONS, AMENDING SECTIONS 18.10.010, 18.10.050, 18.10.060, 18.10.070, 18.10.080, 18.10.090, AND 18.10.100 OF CHAPTER 18.10 OF TITLE 18 OF THE ROSEVILLE MUNICIPAL CODE REGARDING LOT LINE ADJUSTMENTS AND VOLUNTARY MERGERS, AND AMENDING SECTIONS 18.24.010 AND 18.24.015 OF CHAPTER 18.24 OF TITLE 18 OF THE ROSEVILLE MUNICIPAL CODE REGARDING APPEALS.

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Section 18.04.025 of Chapter 18.04 of Title 18 of the Roseville Municipal Code is hereby amended to read as follows:

18.04.025 Design committee.

The design committee is designated as an "advisory agency" as the term is used in the Subdivision Map Act and for the purposes defined herein. As such, the design committee shall either approve, conditionally approve or deny all tentative maps (vesting or otherwise), lot line adjustments, voluntary mergers, minor tentative map modifications, major tentative map modifications involving four or fewer parcels, tentative map extensions (vesting or otherwise), and parcel map waivers involving four or fewer parcels (refer to Table 18.04.030.A) when these permits are processed concurrently with a design review permit, with the following exceptions:

A. The director has the authority to forward the application to the planning commission if the improvements proposed or required will extend beyond the immediate front of the lot, if the project may cause an undue hardship to the adjacent parcels, or if there are potential significant environmental impacts which may result from the project.
B. A parcel map, lot line adjustment, and/or voluntary merger associated with a residential multi-unit (three or more units) or mixed use housing project that provides a minimum of 20 percent of the units as affordable units for low, very-low or extremely low income households and where the applicant agrees to enter into an Affordable Housing Agreement prior to issuance of building permits, will be approved though the ministerial engineering permit process.

SECTION 2. Section 18.04.030 of Chapter 18.04 of Title 118 of the Roseville Municipal Code is hereby amended to read as follows:

NOTICE TYPES:

Type "H": PUBLIC HEARING IS REQUIRED. NOTICE OF THE HEARING SHALL BE MAILED OR DELIVERED AT LEAST 10 DAYS PRIOR TO THE PUBLIC HEARING TO THE APPLICANT, PROPERTY OWNER, PROPERTY OWNERS AS SHOWN ON THE MOST RECENT SECURED ASSESSOR'S ROLL, OF PROPERTY WITH 300 FEET OF THE PROPERTY INVOLVED IN THE APPLICATION, AND ALL PERSONS WHO HAVE REQUESTED NOTICE PURSUANT TO SECTION 18.06.130.

Type "N": NO PUBLIC HEARING OR NOTICE REQUIRED.

Type "A": THE PUBLIC HEARING MAY BE WAIVED. NOTICE OF INTENT TO APPROVE ENTITLEMENT SHALL BE MAILED OR DELIVERED AT LEAST 10 DAYS PRIOR TO AN ACTION TO APPLICANT, PROPERTY OWNER, AND THE OWNERS, AS SHOWN ON THE MOST RECENT SECURED ASSESSOR'S ROLL, OF PROPERTY WITHIN 300 FEET OF THE PROPERTY INVOLVED IN THE APPLICATION, AND ALL PERSONS WHO HAVE REQUESTED NOTICE, PURSUANT TO SECTIONS 18.06.125 AND 18.10.060 OF THIS TITLE.

* WHEN PROCESSED CONCURRENTLY WITH A DESIGN REVIEW PERMIT, REZONE, GENERAL PLAN AMENDMENT, ETC.

** FOR QUALIFYING PROJECTS PURSUANT TO SECTION 18.10 OR SECTION 18.05

SECTION 3. Section 18.04.060 of Chapter 18.04 of Title 18 of the Roseville Municipal Code is hereby amended to read as follows:

18.04.060 Director.

The director shall be responsible for providing application forms and processing applications. For all tentative maps, minor and major tentative map amendments, lot line adjustments, voluntary mergers, reversions to acreage, parcel map waivers, tentative map extensions and minor and major parcel or final map amendments and corrections subject to the approving authority of the director (refer to Table 18.04.030.A), the director shall refer all applications to the affected departments and agencies which have an interest in the project. The director shall prepare a report for such applications at least three calendar days prior to action or the public hearing. The report shall have in it a recommended action for the application.

The director is designated as an "advisory agency" as the term is used in the Subdivision Map Act and for the purposes defined herein.

The director shall either approve, conditionally approve or deny all tentative parcel map applications (vesting or otherwise), lot line adjustments, voluntary mergers, minor tentative map modifications, tentative map extensions (vesting or otherwise) subject to the approving authority of the director (refer to Table 18.04.030.A); except that the director has the authority to forward the application to the commission if the improvements proposed or required will extend beyond the immediate front of the lot, if the project may cause an undue hardship to the adjacent parcels, or if there are potential significant environmental impacts which may result from the project.

SECTION 4. Chapter 18.05 of Title 18 of the Roseville Municipal Code is hereby added to read as follows:

18.05 PARCEL MAP APPLICATIONS – MINISTERIAL

18.05.010 Tentative map required.

A tentative map shall be required wherever a final map or parcel map is required by the Subdivision Map Act, unless specifically waived by the provisions of this title or the Subdivision Map Act. (Ord. 2747 § 1, 1993.)

18.05.020 Application Required.

Whenever a tentative map is required, the subdivider shall submit to the director a complete tentative map application to be processed in accordance with the provisions of this chapter and title. An application shall be processed pursuant to Chapter 18.06 unless it is a parcel map associated with a residential multi-unit (three or more units) or mixed use housing project that provides a minimum of 20 percent of the units as affordable units for low, very-low or extremely low income households and where the applicant agrees to enter into an Affordable Housing Agreement prior to recordation of the parcel map (hereinafter Affordable Housing Project), or the application meets the following qualifying criteria for a ministerial parcel map:

A. The parcel is located within a single-family residential zone, which are the City's single-family residential (R1) and small lot residential (RS) zones.

B. The parcel map subdivides an existing parcel to create no more than two new parcels of approximately equal lot area provided that one parcel shall not be smaller than 40 percent of the lot area of the original parcel proposed for subdivision.

C. Both newly-created parcels are a minimum of 1,200 square feet.

D. The parcel being subdivided has not been established through prior exercise of a parcel map pursuant to this section, nor has the owner or any person acting in concert with the owner previously subdivided an adjacent parcel pursuant to this section.

E. The proposed parcel map would not require demolition or alteration of any of the following types of housing:

    1. Housing subject to a recorded covenant, ordinance, or law that restricts rents to levels affordable to persons and families of moderate, low, or very low income.

    2. Housing which has been occupied by a tenant anytime within the last three years.

    3. Housing subject to any form of rent or price control through a public entity's valid exercise of its police power.

    4. A parcel or parcels on which an owner of residential real property has exercised the owner's rights under Chapter 12.75 (commencing with Section 7060) of Division 7 of Title 1 to withdraw accommodations from rent or lease within 15 years before the date that the development proponent submits an application.

F. The parcel is not located within a historic district or property included on the State Historic Resources Inventory, as defined in Section 5020.1 of the Public Resources Code, or within a site that is designated or listed as a city or county landmark or historic property or district pursuant to a city or county ordinance.

G. The parcel is not located on a site that is or contains any of the following, pursuant to Government Code subparagraphs (B) to (K), inclusive, of paragraph (6) of subdivision (a) of Section 65913.4:

1. Either prime farmland or farmland of statewide importance, as defined pursuant to United States Department of Agriculture land inventory and monitoring criteria, as modified for California, and designated on the maps prepared by the Farmland Mapping and Monitoring Program of the Department of Conservation, or land zoned or designated for agricultural protection or preservation by a local ballot measure that was approved by the voters of that jurisdiction.
2. Wetlands, as defined in the United States Fish and Wildlife Service Manual, Part 660 FW 2 (June 21, 1993).
3. Within a very high fire hazard severity zone, as determined by the Department of Forestry and Fire Protection pursuant to Section 51178, or within a high or very high fire hazard severity zone as indicated on maps adopted by the Department of Forestry and Fire Protection pursuant to Section 4202 of the Public Resources Code. This subparagraph does not apply to sites excluded from the specified hazard zones by a local agency, pursuant to subdivision (b) of Section 51179, or sites that have adopted fire hazard mitigation measures pursuant to existing building standards or state fire mitigation measures applicable to the development.
4. A hazardous waste site that is listed pursuant to Section 65962.5 or a hazardous waste site designated by the Department of Toxic Substances Control pursuant to Section 25356 of the Health and Safety Code, unless the State Department of Public Health, State Water Resources Control Board, or Department of Toxic Substances Control has cleared the site for residential use or residential mixed uses.
5. Within a delineated earthquake fault zone as determined by the State Geologist in any official maps published by the State Geologist, unless the development complies with applicable seismic protection building code standards adopted by the California Building Standards Commission under the California Building Standards Law (Part 2.5 (commencing with Section 18901) of Division 13 of the Health and Safety Code), and by any local building department under Chapter 12.2 (commencing with Section 8875) of Division 1 of Title 2.
6. Within a special flood hazard area subject to inundation by the 1 percent annual chance flood (100-year flood) as determined by the Federal Emergency Management Agency in any official maps published by the Federal Emergency Management Agency. If a development proponent is able to satisfy all applicable federal qualifying criteria in order to provide that the site satisfies this subparagraph and is otherwise eligible for streamlined approval under this section, a local government shall not deny the application on the basis that the development proponent did not comply with any additional permit requirement, standard, or action adopted by that local government that is applicable to that site. A development may be located on a site described in this subparagraph if either of the following are met:
    a. The site has been subject to a Letter of Map Revision prepared by the Federal Emergency Management Agency and issued to the local jurisdiction.
    b. The site meets Federal Emergency Management Agency requirements necessary to meet minimum flood plain management criteria of the National Flood Insurance Program pursuant to Part 59 (commencing with Section 59.1)

and Part 60 (commencing with Section 60.1) of Subchapter B of Chapter I of Title 44 of the Code of Federal Regulations.

7. Within a regulatory floodway as determined by the Federal Emergency Management Agency in any official maps published by the Federal Emergency Management Agency, unless the development has received a no-rise certification in accordance with Section 60.3(d)(3) of Title 44 of the Code of Federal Regulations. If a development proponent is able to satisfy all applicable federal qualifying criteria in order to provide that the site satisfies this subparagraph and is otherwise eligible for streamlined approval under this section, a local government shall not deny the application on the basis that the development proponent did not comply with any additional permit requirement, standard, or action adopted by that local government that is applicable to that site.
8. Lands identified for conservation in an adopted natural community conservation plan pursuant to the Natural Community Conservation Planning Act (Chapter 10 (commencing with Section 2800) of Division 3 of the Fish and Game Code), habitat conservation plan pursuant to the federal Endangered Species Act of 1973 (16 U.S.C. Sec. 1531 et seq.), or other adopted natural resource protection plan.
9. Habitat for protected species identified as candidate, sensitive, or species of special status by state or federal agencies, fully protected species, or species protected by the federal Endangered Species Act of 1973 (16 U.S.C. Sec. 1531 et seq.), the California Endangered Species Act (Chapter 1.5 (commencing with Section 2050) of Division 3 of the Fish and Game Code), or the Native Plant Protection Act (Chapter 10 (commencing with Section 1900) of Division 2 of the Fish and Game Code).
10. Lands under conservation easement.

18.05.030 Application Materials Required.

Whenever a tentative map is required, the subdivider shall submit to the director a complete tentative map application to be processed in accordance with the provisions of this chapter and title.

A complete application shall include the following:

A. Application Form.

1. The application shall be in a form specified by the director and shall be accompanied with the correct filing fee;

2. A description of the applicant's interest in the property shall be stated on the application form;

3. A dated signature by the property owner, or owners, authorizing the processing of the application, and, if so desired by the property owner, authorizing a representative to bind the property owner on matters addressed in the application.

B. Tentative Map: Preparation, Form and Number of Copies.

1. The tentative map shall be clearly and legibly drawn and prepared by or under the direction of a registered civil engineer or licensed land surveyor.

2. The scale of the map shall be at least one inch equals 40 feet unless otherwise specified by the director. If necessary to provide the proper scale, more than one sheet may be used, but the relation of the several sheets shall be clearly shown on each.

3. No single sheet shall exceed 60 inches in length and 42 inches in width.

4. Full size copies, and one copy reduced to eight and one-half inches by 11 inches (suitable for reproduction) of the tentative map. The number of the tentative map copies shall be specified by the director.

C. The following information shall appear on the face of the tentative map:

1. The proposed subdivision name;

2. Names, addresses and telephone numbers of the record owner and subdivider of the land;

3. Name, address and telephone number of the person, firm or organization that prepared the tentative map, and the applicable registration or license number;

4. Date of preparation, north arrow and scale of the map;

5. If the tentative map is based on a survey, the date of the survey;

6. A vicinity map of appropriate scale sufficiently covering adjoining territory to clearly indicate the nearby street patterns, major access streets, property lines, and other adjacent properties in the subdivider's ownership (north arrow pointing in the same direction as the north direction of the subdivision);

7. A statement of existing and proposed zoning and general plan categories, and existing and proposed uses of the property, with the approximate areas of the proposed uses by type;

8. Boundaries and dimensions of the property(ies) involved in the subdivision, with sufficient information to locate the property(ies), and the total area of the subdivision;

9. A list of all service providers and districts, including water, sewer, electric, natural gas, phone, cable and schools;

10. The name of all adjacent subdivisions, if any, and property lines sufficient to show their relationship to the proposed subdivision;

11. Contour lines at intervals of not more than two feet where the general slope of the property is less than 10 percent, and/or at five-foot intervals where the general slope of the property exceeds 10 percent. Contour lines shall extend beyond the tract boundaries where necessary to show drainage conditions on surrounding property which may affect the subdivision;

12. Topographic information shall be sufficient to fully show the configuration of the land and any and all depressions that present drainage problems;

13. The location and general description of any trees with notations as to their specimen type, and other significant natural features with notations as to their retention or destruction;

14. The location of all structures within the subdivision boundaries, notations if they are to remain or be removed, and their distances from other structures and existing or proposed streets and lot lines;

15. The locations, widths and purposes of all existing and proposed easements for utilities, drainage and other public or private purposes, shown by dashed lines, within and adjacent to the subdivision;

16. The location of any 100-year future floodplain. The city engineer may require additional hydrologic analysis to update or determine the boundaries of the 100-year floodplain;

17. Any area of fill or excavation and their respective quantities within the 100-year future floodplain;

18. The locations, widths and names or designations of all existing or proposed streets, alleys, pedestrian ways and other rights-of-way, whether public or private, within and adjacent to the subdivision (including the radius of each centerline curve);

19. The lines and approximate dimensions of all lots, with sequential numbers assigned to each;

20. The total number of lots (listed by phase, if applicable);

21. The total area in square footage or acreage to the nearest one-tenth acre of each lot proposed to be utilized for other than single-family or two-family housing; and

22. A statement on the face of the tentative map declaring that all easements of record are shown on the tentative map and will appear on the final maps.

D. Additional Information and Plans Required With Ministerial Tentative Map Application. In addition, the following plans and information shall be submitted with a tentative map application:

1. A statement of proposed improvements, including all utilities and landscaping; and

2. A preliminary title report issued not more than six months prior to its submission to the city.

3. Except for an Affordable Housing Project, an affidavit signed by the applicant stating that the applicant intends to occupy one of the housing units as their principal residence for a minimum of three years from the date of the approval of the parcel map. This requirement shall not apply to an applicant that is a "community land trust," as defined in clause (ii) of subparagraph (C) of paragraph (11) of subdivision (a) of Section 402.1 of the Revenue and Taxation Code, or is a "qualified nonprofit corporation" as described in Section 214.15 of the Revenue and Taxation Code. The affidavit shall further state that the applicant understands that uses allowed on the newly-created lots shall be limited to residential uses.

18.05.040 Prefiling.

Within 30 days of receiving a tentative map application the planning department shall, in writing, determine if the application meets the requirements of Section 18.05.020 and Section 18.05.030. When an application is either ineligible for the ministerial parcel map process or is missing any required information it will not be processed. Prefiling occurs on the date that the application is received with all required information. (Ord. 3286 § 3, 1998; Ord. 2747 § 1, 1993.)

18.05.050 Application referral.

Within five days of prefiling the director will refer copies of the tentative map application to any city department, local, state or federal agency, or other individual or group the director believes may be interested in the project. If no response is received within 21 days of the referral date, the director will assume that the outside agency, individual or group has no comments. (Ord. 2747 § 1, 1993.)

18.05.060 Acceptance of application.

Pursuant to Government Code Section 65943, a tentative map application shall be accepted as complete by the director if it meets the requirements of Section 18.05.030 of this title.

Within 30 days of prefiling, the director shall send a letter to the applicant indicating:

A. If all of the required information for a tentative map application has been correctly submitted pursuant to Section 18.05.030; and

B. All information necessary to accept a complete application and to clarify, amplify, correct or supplement the application; and

C. Suggested design changes or conditions of approval which may need to be met in order to receive approval.

If the director determines additional information is required, and the additional information has not been received within six months of the letter requesting the information, then the application shall be deemed withdrawn, unless extended pursuant to § 18.06.150. (Ord. 2747 § 1, 1993.)

18.05.070 Application deemed "filed."

An application shall be deemed filed in accordance with Section 66452.1 of the Subdivision Map Act on the date the tentative map application is accepted as complete as specified in Section 18.05.060. (Ord. 2747 § 1, 1993.)

18.05.080 Approval by City Engineer.

After an application is filed, the City Engineer shall approve the tentative map based upon the minimum findings below, and in accordance with the requirements of this title.

A. The tentative map conforms to all applicable objective requirements of the Subdivision Map Act (Division 2 (commencing with Section 66410)), except as otherwise expressly provided in this section.

B. The tentative map conforms to objective zoning standards, objective subdivision standards, and objective design review standards, except that conformance is not required where imposition of the standards would have the effect of physically precluding the construction of two units on either of the resulting parcels or that would result in a unit size of less than 800 square feet, nor shall it be required to correct existing non-conforming zoning conditions.

C. The tentative map provides necessary easements for the provision of public services and facilities.

D. The parcels have access to, provide access to, or adjoin the public right-of-way.

E. The project will not have a specific, adverse impact, as defined and determined in paragraph (2) of subdivision (d) of Section 65589.5, upon public health and safety or the physical environment and for which there is no feasible method to satisfactorily mitigate or avoid the specific, adverse impact.

SECTION 5. Section 18.06.030 of Chapter 18.06 of Title 18 of the Roseville Municipal Code is hereby amended to read as follows:

CHAPTER 18.06 TENTATIVE MAP APPLICATIONS – DISCRETIONARY

18.06.030 Application required to process a tentative map.

Whenever a tentative map is required, the subdivider shall submit to the director a complete tentative map application to be processed in accordance with the provisions of this chapter and title.

A complete application shall include the following:

A. Application Form.

1. The application shall be in a form specified by the director and shall be accompanied with the correct filing fee;

2. A description of the applicant's interest in the property shall be stated on the application form;

3. A dated signature by the property owner, or owners, authorizing the processing of the application, and, if so desired by the property owner, authorizing a representative to bind the property owner on matters addressed in the application.

B. Tentative Map: Preparation, Form and Number of Copies.

1. The tentative map shall be clearly and legibly drawn and prepared by or under the direction of a registered civil engineer or licensed land surveyor.

2. The scale of the map shall be at least one inch equals 40 feet unless otherwise specified by the director. If necessary to provide the proper scale, more than one sheet may be used, but the relation of the several sheets shall be clearly shown on each.

3. No single sheet shall exceed 60 inches in length and 42 inches in width.

4. Full size copies, and one copy reduced to eight and one-half inches by 11 inches (suitable for reproduction) of the tentative map. The number of the tentative map copies shall be specified by the director.

C. Information Required on a Discretionary Tentative Map. The following information shall appear on the face of the tentative map:

1. The proposed subdivision name;

2. Names, addresses and telephone numbers of the record owner and subdivider of the land;

3. Name, address and telephone number of the person, firm or organization that prepared the tentative map, and the applicable registration or license number;

4. Date of preparation, north arrow and scale of the map;

5. If the tentative map is based on a survey, the date of the survey;

6. A vicinity map of appropriate scale sufficiently covering adjoining territory to clearly indicate the nearby street patterns, major access streets, property lines, and other adjacent properties in the subdivider's ownership (north arrow pointing in the same direction as the north direction of the subdivision);

7. A statement of existing and proposed zoning and general plan categories, and existing and proposed uses of the property, with the approximate areas of the proposed uses by type;

8. Boundaries and dimensions of the property(ies) involved in the subdivision, with sufficient information to locate the property(ies), and the total area of the subdivision;

9. A list of all service providers and districts, including water, sewer, electric, natural gas, phone, cable and schools;

10. The name of all adjacent subdivisions, if any, and property lines sufficient to show their relationship to the proposed subdivision;

11. Contour lines at intervals of not more than two feet where the general slope of the property is less than 10 percent, and/or at five-foot intervals where the general slope of the property exceeds 10 percent. Contour lines shall extend beyond the tract boundaries where necessary to show drainage conditions on surrounding property which may affect the subdivision;

12. Topographic information shall be sufficient to fully show the configuration of the land and any and all depressions that present drainage problems;

13. The location and general description of any trees with notations as to their specimen type, and other significant natural features with notations as to their retention or destruction;

14. The location of all railroad rights-of-way and grade crossings; approximate locations of all existing wells, abandoned wells and sumps; and an indication of any physical restrictions or conditions in the subdivision which affect the use of the property;

15. The location of all structures within the subdivision boundaries, notations if they are to remain or be removed, and their distances from other structures and existing or proposed streets and lot lines;

16. The locations, widths and purposes of all existing and proposed easements for utilities, drainage and other public or private purposes, shown by dashed lines, within and adjacent to the subdivision;

17. The location of any 100-year future floodplain. The city engineer may require additional hydrologic analysis to update or determine the boundaries of the 100-year floodplain;

18. Any area of fill or excavation and their respective quantities within the 100-year future floodplain;

19. The proposed method of providing storm water, drainage and erosion control;

20. The locations, widths and names or designations of all existing or proposed streets, alleys, pedestrian ways and other rights-of-way, whether public or private, within and adjacent to the subdivision (including the radius of each centerline curve);

21. Any planned line for street widening or for any other public project in and adjacent to the subdivision;

22. The lines and approximate dimensions of all lots, with sequential numbers assigned to each;

23. The total number of lots (listed by phase, if applicable);

24. The total area in square footage or acreage to the nearest one-tenth acre of each lot proposed to be utilized for other than single-family or two-family housing;

25. The boundaries and acreages of existing and proposed public areas in and adjacent to the subdivision, with the nature of each indicated thereon with the acreage thereof;

26. Land to be offered for dedication for park or recreation purposes, for school purposes, for purposes of providing public access to any public waterway, river or stream, or other public purpose, shall be so designated;

27. Any changes to the subdivision design standards requested pursuant to Section 18.08.090 of this title must be shown on the tentative map and shall be clearly labeled and identified;

28. If multiple final or parcel maps are to be filed on portions of the property shown on the tentative map, a clear statement on the face of the tentative map indicating the intent of the subdivider to do so. Except that if a development agreement obligates the subdivider to show proposed phasing of multiple final maps, then the subdivider shall show the phases on the tentative map; and

29. A statement on the face of the tentative map declaring that all easements of record are shown on the tentative map and will appear on the final maps.

D. Additional Information and Plans Required With Discretionary Tentative Map Application. In addition, the following plans and information shall be submitted with a tentative map application:

1. A preliminary grading plan prepared in conformance with the improvement standards;

2. A preliminary soils report shall be submitted with every tentative map application. The preliminary soils report may be waived by the city engineer if the city engineer determines that, due to the knowledge the city engineer has as to the soil qualities of the subdivision, a preliminary soils analysis is not necessary. If the preliminary soils report indicates the presence of critically expansive soils or other soil problems, including seepage, rocks or liquids containing deleterious chemicals which, if not corrected, would lead to structural defects or the deterioration of construction materials, a soils investigation of each lot in the subdivision may be required by the city engineer as a condition precedent to consideration of the tentative map. Any soils investigation done pursuant to this title shall be prepared by or under the direction of a registered civil engineer, engineering geologist or geologist, specializing and recognized in soil mechanics and foundation engineering, and licensed in the state of California.

3. A statement of proposed improvements, including all utilities and landscaping;

4. Sufficient information concerning the existing use of land and water areas in the vicinity of the proposed project, insofar as the applicant can reasonably ascertain.

5. Any alterations proposed to the subdivision design standards shall be accompanied by supporting drawings, statements and other data as required in Section 18.08.090;

6. A preliminary title report issued not more than six months prior to its submission to the city;

7. A traffic study, if required by the criteria established in the improvement standards;

8. A master transportation, grading, and utility plans for subdivisions which exceed 100 acres or 250 parcels, or when required by the city engineer. The plans shall include all

necessary supporting technical data and computations as required by the city engineer and the city's improvement standards; and

9. Any other information the director deems necessary to review the application.

E. Additional Information Required for Vesting Tentative Maps. A subdivider who chooses to submit a vesting tentative map as provided for in this chapter shall also submit the following detailed information with the tentative map application:

1. Height, size, and location of all existing or proposed buildings, or structures;
2. Utility, sewer, water, storm drain, and road details;
3. Detailed grading plans adequate for issuance of a grading permit;
4. Complete applications for all other discretionary entitlements which are necessary for the proposed use(s);
5. Traffic circulation and impact;
6. Floodway control and impact;
7. A description of the proposed use(s) of the land.

SECTION 6. Section 18.06.050 of Chapter 18.06 of Title 18 of the Roseville Municipal Code is hereby amended to read as follows:

18.06.050 Application referral.

Within five days of prefiling the director will refer copies of the tentative map application to any city department, local, state or federal agency, or other individual or group the director believes may be interested in the project. If no response is received within 21 days of the referral date, the director will assume that the outside agency, individual or group has no comments. Comments related to an environmental document for a project may still be accepted and considered during its public review period.

SECTION 7. Section 18.06.080 of Chapter 18.06 of Title 18 of the Roseville Municipal Code is hereby amended to read as follows:

18.06.080 Environmental review of application.

A. Within 30 days of accepting a complete tentative map application, the director shall determine the appropriate environmental document pursuant to the California Environmental Quality Act (CEQA).

B. The director shall prepare and circulate for public review and comment the appropriate environmental document in accordance with CEQA. If the tentative map application is exempt from CEQA, a notice of exemption will be prepared.

SECTION 8. Section 18.10.010 of Chapter 18.10 of Title 18 of the Roseville Municipal Code is hereby amended to read as follows:

18.10.010 Applications required.

A. Whenever a lot line is adjusted between two or more lots, where the land taken from one lot is added to another lot, and where a greater number of lots than currently exists will not be created, a lot line adjustment application shall be filed with the director. A lot line adjustment associated with a residential multi-unit (three or more units) or mixed use housing project that provides a minimum of 20 percent of the units as affordable units for low, very-low or extremely

low income households and where the applicant agrees to enter into an Affordable Housing Agreement prior to recordation of the lot line adjustment, will be approved though the ministerial engineering permit process in lieu of the discretionary lot line adjustment process.

B. Whenever two or more adjacent lots are to be merged voluntarily pursuant to Section 66499.20-3/4 of the Subdivision Map Act, a voluntary merger application shall be filed with the director. A voluntary merger associated with a residential multi-unit (three or more units) or mixed use housing project that provides a minimum of 20 percent of the units as affordable units for low, very-low or extremely low income households and where the applicant agrees to enter into an Affordable Housing Agreement prior to recordation of the voluntary merger, will be approved though the ministerial engineering permit process in lieu of the discretionary lot line adjustment process.

C. In accordance with Government Code Section 66499.20-1/2, subdivided lands may be merged and resubdivided without reverting to acreage by complying with all applicable provisions of the Subdivision Map Act and this title. All such requests shall be processed as a tentative map application in accordance with the requirements of Section 18.06.040 et seq. The filing of the final map or parcel map shall constitute the legal merger of the separate parcels into one parcel and the resubdividing of such parcel.

SECTION 9. Section 18.10.050 of Chapter 18.10 of Title 18 of the Roseville Municipal Code is hereby amended to read as follows:

18.10.050 Acceptance of application.

Following the referral period, the director shall send a letter to the applicant stating whether or not all required information for the lot line adjustment or voluntary merger application has been submitted, and itemizing all information necessary to accept the application. For discretionary applications the letter may also include recommended design changes or conditions of approval which may be recommended to the advisory agency.

If the director determines additional information is required, and the additional information has not been received within six months of the letter requesting the information, then the application shall be deemed withdrawn.

If the director determines that the application meets the requirements above, then the director shall:

A. For ministerial applications, forward the project to the city engineer for review and approval.

B. For discretionary applications, notice the project and pursuant to Table 18.04.030.A and set a tentative action date. Except that the director has the authority to forward the application to the commission for it to act upon.

SECTION 10. Section 18.10.060 of Chapter 18.10 of Title 18 of the Roseville Municipal Code is hereby amended to read as follows:

18.10.060 Minimum notice of a public hearing.

A. A notice of an intent to approve shall be provided for all lot line adjustment and voluntary merger applications except that no notice of intent shall be required to be provided for

a prototype development plan project located within the Riverside Gateway specific plan area or for ministerial projects. Lot line adjustments and voluntary mergers associated with a Riverside Gateway specific plan area prototype development plan project shall be processed as stipulated in the Riverside Gateway specific plan implementation procedures. For all other discretionary lot line adjustments and voluntary mergers, notice of the intent to approve shall be given at least 10 days in advance of the approval as follows:

1. By mailing, U.S. first class postage prepaid, to the applicant, the property owner of the affected property and to the property owners of all property within 300 feet of the affected property as such owners are shown on the last equalized assessment roll of Placer County.

B. Each notice to approve shall contain at a minimum:

1. The name(s) of the applicant(s) and property owner(s) of the affected property;

2. The file number assigned to the application;

3. The location of the affected property, both in text and graphically in the form of a map;

4. A description of the nature of the request;

5. A preliminary environmental determination;

6. Identification of the advisory agency as community development/planning director and the scheduled date for action; and

7. The following statement:

"The purpose of this notice is to inform you that an application for the described project has been submitted to the Roseville Planning Department. The Community Development/Planning Director may act on the application without holding a public hearing, unless a public hearing is requested in writing by you or any individual wanting to comment on the project prior to the scheduled approval date."

8. A notice that if the decision is challenged in court, the challenge may be limited to raising only those issues which were raised at the public hearing, if a public hearing is requested, or in written correspondence delivered to the community development/planning director at, or prior to, the public hearing; and

9. A discussion of the procedure for requesting a public hearing or filing an appeal.

C. Written notice shall also be given to any person requesting in writing notice of a particular application.

D. In addition to these notification procedures, the city may choose to give notice of the public hearing in any other way it deems necessary or desirable.

SECTION 11. Section 18.10.070 of Chapter 18.10 of Title 18 of the Roseville Municipal Code is hereby amended to read as follows:

18.10.070 Withdrawal by applicant.

Requests for withdrawal of any application pursuant to this title shall be submitted to the director in writing, unless made at the public hearing. Upon receipt of such request, the director shall notify all concerned parties of the withdrawal. A refund of the filing fee shall be made in accordance with adopted resolutions and ordinances in effect at the time the withdrawal is made.

SECTION 12. Section 18.10.080 of Chapter 18.10 of Title 18 of the Roseville Municipal Code is hereby amended to read as follows:

18.10.080 Approval, conditional approval or denial by advisory agency.

A. Following the notice, the advisory agency shall approve, conditionally approve, or deny the application in accordance with the requirements of this title. All decisions of the advisory agency may be appealed in accordance with the appeal procedures of Chapter 18.24.

B. The advisory agency shall attach conditions to the approval of a lot line adjustment to facilitate the following:

1. Compliance with the Zoning Ordinance for the district in which the parcels are located; except that if the parcels or structures are nonconforming with respect to Zoning Ordinance requirements, the lot line adjustment does not increase the degree of nonconformance;

2. Compliance with the local building regulations, including the UBC; and,

3. The relocation of existing infrastructure or easements.

C. The advisory agency may, for a voluntary merger, attach conditions in addition to those listed above to achieve compliance with the general plan, any applicable specific plan, the Zoning Ordinance, The Roseville Municipal Code, the subdivision design standards in Chapter 18.08, and any other applicable policy or standard adopted by the city council.

SECTION 13. Section 18.10.090 of Chapter 18.10 of Title 18 of the Roseville Municipal Code is hereby amended to read as follows:

18.10.090 Notice of decision.

Within two working days of the action by the advisory agency, the director shall mail a notice of the decision to the applicant at the address appearing on the application, or to such other address designated in writing by the applicant. The notice shall contain the following information:

A. Findings upon which the decision was based;

B. The environmental document prepared and date ratified, unless exempt;

C. The action of the advisory agency;

D. Conditions of approval;

E. An application expiration date and renewal requirements;

F. Notice of the appeal period and brief description; and

G. Notice of need to pursue administrative remedies.

SECTION 14. Section 18.10.100 of Chapter 18.10 of Title 18 of the Roseville Municipal Code is hereby amended to read as follows:

18.10.100 Effective date.

A decision by the advisory agency to approve or conditionally approve a discretionary application shall be effective upon the expiration of the 10-calendar-day appeal period, unless an

appeal is received. A decision by the city engineer to approve a ministerial application shall be effective upon the approval date.

SECTION 15. Section 18.24.010 of Chapter 18.24 of Title 18 of the Roseville Municipal Code is hereby amended to read as follows:

18.24.010 Appeal authority.

The appeal authority is designated according to Table 18.24.015 to hear appeals from any decision made pursuant to this title, including those relating to acceptance of prefiling materials, and to hear appeals of any decision of an advisory agency as designated in this title. Ministerial applications are not subject to appeal.

SECTION 16. Section 18.24.015 of Chapter 18.24 of Title 18 of the Roseville Municipal Code is hereby amended to read as follows:

18.24.015 Appeal authority, notice requirement and required hearing.

APPEAL AUTHORITY, NOTICE REQUIREMENT AND REQUIRED HEARING

Appeal from Action or Decision of	Appeal Authority	Notice Requirement
City Engineer	Planning Commission	H*
Community Development/Planning Director	Planning Commission	H*
Design Committee	City Council	H*
Planning Commission	City Council	H*

Notice Type:

Type "H": Public Hearing—Notice of the public hearing shall be provided consistent with Public Hearing Notice requirement in 18.06.130.

SECTION 17. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 18. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

COUNCIL COMMUNICATION

CC #: 2008
File #: 0600-02

Title: Out-of-State Travel Request - Police Department
Contact: Mark Peinado 916-774-5021 mcpeinado@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 7.21.

RECOMMENDATION TO COUNCIL

Staff requests that City Council approve out-of-state travel for three Police Department staff members to attend the Tyler New World Connect Conference in Indianapolis, Indiana, from May 15th to May 18th, 2022.

BACKGROUND

The Police Department uses a variety of Tyler Technology Public Safety software, including the recently deployed Enterprise Mobile Software Stop Data program (formerly known as Brazos) which is being used by the department to collect the state-mandated demographic data for compliance with AB953, the Racial and Identity Profiling Act of 2015. The Police Department's involvement in the development of Tyler's Stop Data program resulted in the agency being nominated for and winning the Tyler Excellence Award which will be presented to agency staff onsite at the Tyler Conference. Additionally, the conference programming will allow staff to learn to maximize the use of the public safety products utilized by the agency and to collaborate with the vendor and other users to improve efficiency and increase functionality of the Enterprise Mobile Software Stop Data program.

FISCAL IMPACT

Funding for travel, lodging, and conference cost is estimated at $3,000 per attendee for a total of $9,000. There are sufficient funds in the FY2021-22 Police Department budget in the General Fund to cover the expenditure. No additional funds are being requested.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. Approval of out-of-state travel meets the above criteria and is not

subject to CEQA. No additional environmental review is required.

Description

Resolution - Lorrie McClain

Resolution

WHEREAS, Lorrie McClain began her distinguished career with the City of Roseville on August 2, 1999, as a Human Resources Technician in the Human Resources Department. She was promoted to Senior Human Resources Technician on April 29, 2017; and

WHEREAS, for the past 23 years, Lorrie has been on various teams within Human Resources. Her unmatched work ethic and commitment to the City made her an employee that people wanted on their team; and

WHEREAS, in her years of outstanding service, Lorrie received six Pride of Roseville Awards:

In 2003, Pride of Roseville "Commendation for Excellence" for her exceptional work to send care packages regularly to five City employees called to active duty; and

In 2007, Pride of Roseville "Outstanding Work Performance Team" for her work on the Wellness Committee. She served as staff to the committee, passionately promoting and supporting the wellness activities; and

In 2009, Pride of Roseville "Outstanding Work Performance Team" for her work on Rose U that went live June 16, 2008. Its success was due to the Learning Management System team member's dedication to the project; and

In 2011, Pride of Roseville "Outstanding Work Performance Team" for her work as a First Aid and CPR instructor. The team demonstrated superior knowledge, amazing skills, and abilities to handle special projects and additional assignments; and

In 2013, Pride of Roseville "Outstanding Work Performance Team" – Successful conversion of RoseU; and

In 2015, Pride of Roseville "Outstanding Work Performance Team" for filling in at the benefits desk in the HR Department during open enrollment; and

WHEREAS, Lorrie's work ethic and dedication to quality work made Lorrie an outstanding team member. Her strong customer service approach and genuine concern for her fellow employees upheld the City's core "Focus on People" competency. Employees who interacted with Lorrie felt valued; and

WHEREAS, Lorrie is now retiring after almost 23 years of honorable service to the City of Roseville and will be dearly missed and remembered by her friends, co-workers, and most of all, the City's Human Resources Team.

NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF ROSEVILLE, CALIFORNIA, that Lorrie McClain be commended for her outstanding service and dedication to the City of Roseville, congratulated for her many accomplishments, and wished a long, healthy, and enjoyable retirement.

CITY OF ROSEVILLE

COUNCIL COMMUNICATION

CC #: 2026
File #: 0709-03-02

Title:	Reservation of Affordable Housing Funds for Development of Affordable Housing Projects
Contact:	Trisha Isom 916-746-1239 tisom@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 8.1.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt a resolution to reserve $7.5 million in funding for the following affordable housing projects:

1. Reserve $1,364,239 from the City of Roseville Local Housing Trust Fund and $1,135,761 from the State Local Housing Trust Fund toward the construction of Hampstead's affordable housing project, Prospera at Fiddyment Ranch; and

2. Reserve $2,500,000 from the City of Roseville Local Housing Trust Fund toward the construction of Mercy Housing's affordable housing project, Pleasant Grove Apartments; and

3. Reserve $2,500,000 from the City of Roseville Local Housing Trust Fund, Affordable Housing Fund and Low/Mod Fund toward the construction of Bridge Housing's affordable housing project, 505 Royer Apartments.

BACKGROUND

The California Housing and Community Development Department (HCD) released a Notice of Funding Availability (NOFA) for approximately $57 million in funds for the Local Housing Trust Fund (LHTF) Program on May 3, 2021. This funding provides matching grants to Local Housing Trust Funds established by cities and counties, Native American Tribes and incorporated 501(c)(3) non-profit organizations. The objective of the LHTF grant is to expand funding sources in order to increase the supply of affordable housing. Eligible activities include construction loans and/or permanent financing loans to pay for predevelopment costs, acquisition costs, and other costs associated with the development or rehabilitation of affordable rental housing projects, or emergency shelters, transitional housing, permanent supportive housing, and affordable homebuyer/homeowner projects.

As part of the application process, applicants must identify the project(s) that will be funded with the local match and LHTF Program funds. HCD's scoring criteria also provides extra points

specifically for Housing Trust Funds that completed a first phase funding process to identify multifamily rental projects. To meet these requirements, the Roseville Housing Division released a Notice of Funding Availability (NOFA) on June 15, 2021 and requested applications from qualified affordable housing developers and project sponsors. The Housing Division received three responses to the NOFA and all three were placed on the City's Affordable Housing Pipeline Report (Attachment 1) subject to full project underwriting and approval of funding by City Council.

Council authorized staff to complete and submit a LHTF application in July 2021 and an application was submitted to HCD for $5 million in matching funds on August 3, 2021. In December 2021, the City received notice of a successful application and a LHTF program award of $5 million from HCD. Staff sent commitment letters notifying the three developers of full funding awards in early January 2022. Unfortunately, the City was misinformed and in January 2022, HCD issued a corrected award letter reducing the award amount to $1,135,761.

Although the City cannot fully commit to the initial funding amounts requested for each of the affordable housing projects, staff recommends proceeding with an award of $2.5 million to each of the projects listed in the Affordable Housing Pipeline, as shown on Attachment 1. The proposed funding reservations are necessary to demonstrate a commitment of local funds and will support all three projects in qualifying for additional state and federal affordable housing funds.

The City also intends to apply for the 2022 LHTF program utilizing the existing Affordable Housing Pipeline report. If successful, it will allow the City to fully fund all three affordable housing projects as initially requested. Once the projects are successful in securing full funding, staff will bring forward the necessary loan and regulatory agreement documents required for development of the projects for Council review and consideration.

FISCAL IMPACT

The City's Local Housing Trust Fund receives funding from developer in-lieu fees, payoffs from resales and payoffs from developer subsidy loans. The Housing Division has funding available in the Local Housing Trust Fund, Affordable Housing Fund and Low/Mod Fund in the amount of $6.4 million, in addition to the $1,135,761 in state funds, and plans to leverage these funds for this purpose. No General Fund resources will be used for the Local Housing Trust Fund reservation of funds.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The request for reservation of funds to develop affordable housing meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Description

Resolution 22-105

Affordable Housing Pipeline Reservations

RESOLUTION NO. 22-105

APPROVING THE RESERVATION OF $7,500,000 IN AFFORDABLE HOUSING FUNDS FOR DEVELOPMENT OF AFFORDABLE HOUSING PROJECTS

WHEREAS, on May 3, 2021, the California Housing and Community Development Department (HCD) released a Notice of Funding Availability (NOFA) for approximately $57 million in funds for the Local Housing Trust Fund (LHTF) Program; and

WHEREAS, as part of the application process, applicants must identify the project(s) that will be funded with the local match and LHTF Program funds; and

WHEREAS, the Roseville Housing Division released a Notice of Funding Availability (NOFA) on June 15, 2021 and requested applications from qualified affordable housing developers and project sponsors; and

WHEREAS, the Housing Division received three responses to the NOFA and all three were placed on the City's Affordable Housing Pipeline Report; and

WHEREAS, as requested by Council, staff submitted a LHTF application in July 2021 and an application was submitted to HCD for $5M in matching funds on August 3, 2021; and

WHEREAS, in December 2021, the City received notice of a successful application and a LHTF program award of $5M from HCD; and

WHEREAS, HCD issued a corrected award letter reducing the award amount to $1,135,761; and

WHEREAS, since the City cannot fully commit to the initial funding amounts requested for each of the affordable housing projects, staff recommends proceeding with an award of $2.5M to each of the projects listed in the Affordable Housing Pipeline; and

WHEREAS, the proposed funding reservations are necessary to demonstrate a commitment of local funds and will support all three projects in qualifying for additional state and federal affordable housing funds.

NOW, THEREFORE, BE IT RESOLVED, by the Council of the City of Roseville, that it hereby approves reserving $1,364,239 from the City of Roseville Local Housing Trust Fund and $1,135,761 from the State Local Housing Trust Fund toward the construction of Prospera at Fiddyment Ranch; reserving $2,500,000 from the City of Roseville Local Housing Trust Fund toward the construction of Pleasant Grove Apartments; and reserving $2,500,000 from the City of Roseville Local Housing Trust Fund, Affordable Housing Fund and Low/Mod Fund toward the construction of 505 Royer Apartments.

Title: Council Discretionary Funds - Lincoln Veterans Memorial Coalition
Contact: Cary Camilleri 916-746-1350 cacamilleri@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 9.1.

RECOMMENDATION TO COUNCIL

Recommend City Council consider a request from The Lincoln Veterans Memorial Coalition for Council Discretionary Funds. The choice of sponsorship level of any amount is greatly appreciated.

The City Council has $14,509 available at this time in the FY2021-22 budget.

BACKGROUND

The Lincoln Veterans Memorial Coalition for Council Discretionary Funds to help provide funding for the Placer County Veterans Monument at McBean Memorial Park in Lincoln, California. The monument is built and currently includes Roseville veterans. The Lincoln Veterans Memorial Coalition is looking to raise $100,000 for the next phase of the monument. They are not asking for any specific amount, however, the sponsorship request will allow for additional plaques available to purchase for all verified Placer County & Roseville veterans.

The Citizens' Benefit Fund was established in 1993 with the net proceeds from the sale of the Roseville Hospital. The City Council may, after receiving the recommendation of the Roseville Grants Advisory Commission, annually appropriate up to 90 percent of the annual earnings of the Citizens' Benefit Fund to improve the quality of life for the citizens of the City of Roseville. In addition, without the recommendation of the Roseville Grants Advisory Commission, the City Council may annually appropriate a minor amount of up to $15,000 of the annual earnings to improve the quality of life in Roseville.

The request is from The Lincoln Veterans Memorial Coalition for materials and labor costs for constructing the Placer County Veterans Monument at McBean Memorial Park in Lincoln, California.

FISCAL IMPACT

There is no fiscal impact on the City's General Fund. Annually the City Treasurer allocates $15,000 of the annual earnings on the Citizens' Benefit Fund per section 4.06.04 in the Municipal Code and is included in the annual budget along with the Citizens' Benefit Fund available for appropriation each year. These earnings are restricted for the purpose of improving the quality of life for the citizens in Roseville and appropriated by the City Council.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The award of funds meets the above criteria and is not subject to CEQA. No additional environmental review is required.

COUNCIL COMMUNICATION

CC #: 2010
File #: 0103-22

Title: Measure B Local Sales Tax Citizens' Oversight Committee Report
Contact: Dennis Kauffman 916-774-5313 dkauffman@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 9.2.

RECOMMENDATION TO COUNCIL

Staff recommends City Council receive an informational report and presentation from the Local Sales Tax Citizens' Oversight Committee on the fiscal year 2020-21 revenue and expenditures of the Measure B sales and use tax.

BACKGROUND

The Local Sales Tax Citizens' Oversight Committee (Committee) was created when Measure B was passed by Roseville voters in the November 6, 2018 election. The Committee is charged with the annual review and report to the City Council on the revenue and expenditures of the Measure B sales and use tax.

As part of the EngageRoseville effort that led to Measure B, the City asked the community about its priorities for city services to help guide the City in developing future budgets. Those priorities, along with Council priorities, were reflected in the FY2020-21 budget as follows:

Services maintained
- Specialized police and fire services
- Fire engine company
- Recreation and library programs
- Street maintenance levels
- Job-creation and business recruitment initiatives

Services restored
- Library hours
- 4th of July fireworks
- Fire training and investigations
- Goat grazing for thatch management in open space
- Park maintenance standards
- Industry training and development

Services added
- Establish new police beat in West Roseville
- Maintenance for three citywide parks, allowing for construction to occur

Fiscal health investments

- Build economic stabilization reserve fund
- Pay down CalPERS pension obligation
- Pay down retiree health liability

On November 30, 2021, at the Committee's request, City staff, with the assistance of an external consulting firm, Management Partners, developed a draft Measure B scorecard to be used as a tool for the committee's annual evaluation of Measure B revenues and expenditures.

The Committee met on February 8, 2022, and received a presentation on the City's year-end report from staff. The presentation was a summary of the information provided to the Committee, including the following documents:

- Measure B Scorecard
- 2021 City of Roseville Annual Comprehensive Financial Report (ACFR)
- Fourth Quarter Report FY2020-21
- General Ledger Detail
- General Fund Reserves Policy
- FY2020-21 Annual Budget
- FY2020-21 Year-end Report and Budget Adjustment Council Communication
- Roseville Citizens' Oversight Committee Memo March 17, 2021 Final

The Committee met again on March 29, 2022, to finalize its annual review and report to the City Council on the revenue and expenditures of the Measure B sales and use tax.

FISCAL IMPACT

There is no fiscal impact related to receiving this report.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The report to the City Council from the Local Sales Tax Citizens' Oversight Committee meets the above criteria and is not subject to CEQA. No additional environmental review is required.

CITY COUNCIL STRATEGIC PLAN/OVERARCHING GOALS

Description

Local Sales Tax Citizens Oversight Committee Report to Council

Memorandum

To: Roseville City Council

From: Local Sales Tax Citizens' Oversight Committee

Date: March 29, 2022

Subject: Citizens' Oversight Committee update for April 20, 2022 Roseville City Council Meeting

History of Measure B

- Measure B is a half-cent local sales and use tax to protect Roseville's essential services and was approved by voters in the November 6, 2018 election, with the expected annual revenue of $16 to $19 million.
- On April 1, 2019, the sales and use tax rate in Roseville increased from 7.25% to 7.75%.

Role of the Citizen Oversight Committee

- The Citizens' Oversight Committee (Committee) was proposed as an independent citizen oversight on the Measure B funds.
- The Committee was created when Measure B passed in the November 6, 2018 election.
- The Committee is charged with the annual review and report to the City Council on the revenue and expenditures of the Measure B sales and use tax.

Current Members	Term End
Richard Duffy	6/30/2023
Stephanie Hill	6/30/2025
Kathryn Kitchell	6/30/2023
Meghan Krafka	6/30/2023
John Speight	6/30/2025

Measure B is a General Tax and the monies collected are appropriated to the General Fund where revenues are not allocated and tracked for a specific purpose. The Measure B ballot information stated that "the City may use the funds for any municipal purpose, including but not limited to essential services such as neighborhood police patrols, fire protection, 9-1-1 emergency response; crime suppression/investigation; street and pothole repair; libraries, parks and recreation; and job creation and economic improvement programs." It is not possible for the Committee to determine the exact programs/services supported by Measure B revenues.

Review of Committee Meetings

- The November 30, 2021 meeting consisted of the following:

- Review of the Brown Act by Joe Mandell, Senior Deputy City Attorney
- Presentation by Dennis Kauffman, Assistant City Manager/Chief Financial Officer:
  - Committee Overview
  - Draft Measure B Scorecard

The Measure B Scorecard (Scorecard) was prepared by staff, in conjunction with a consultant, as an additional resource for the Committee in its review of compliance of the use of Measure B Funds with the original purpose for Measure B as stated in the ballot. The Committee agreed the format of the Draft Scorecard, with some minor changes, is a helpful tool.

- The February 8, 2022 meeting consisted of the following:
  - Presentation of the City's year-end report by Dennis Kauffman, Assistant City Manager/Chief Financial Officer. The presentation was a summary of information provided to the Committee as exhibits:

    - Year-end Report: Discussion of Fiscal year July 1, 2020 to June 30, 2021 General Fund revenues and expenditures
      - Annual Budget overview
      - Fourth Quarter and Year End results
      - Memo to City Council proposing a budget adjustment
      - Status of reserve accounts
      - General impacts of the COVID-19 pandemic
    - Final Measure B Scorecard

  - Recommendation by the City staff that the Committee designate one or two Committee members to prepare the Committee's report to the City Council.

Citizens' Oversight Committee Report of the Funds from Fiscal Year 2020/2021

- Fiscal year 2020/2021 resulted in $24.5M in Measure B revenue which was $5.9M more than budgeted. Actual Measure B revenues exceeded budget primarily due to the conservative approach in budgeting for major tax revenues to compensate for impacts of the COVID-19 pandemic and general economic recovery.
- The Committee notes that because Measure B revenue is a general tax comingled with other General Fund revenue and pooled for General Fund expenditures, it is not possible to trace specific expenditures back to Measure B revenue.
- General Fund expenditures were $7M less than budgeted. The bulk of this reduction was in Development Services ($1.6M), Public Works ($.83M), and Parks, Recreation and Libraries ($2.62M). The reduction in Parks, Recreation and Libraries expenditures resulted primarily from temporary closures of facilities and services due to the pandemic.
- The Police and Fire Departments spent virtually 100% of their budgets.
- Actual results for the year indicate a one-time surplus of $28.5M. Staff prepared a memo to City Council requesting the following partial use of the surplus:

- $4.4M for street resurfacing
- $.7M for replacement of a tractor drawn fire truck
- $.3M to replace funds used from the Contingency Fund for replacement of the Roseville Aquatics Center slide and water play structure.

The $23.1M remaining surplus will be discussed at the Council Priorities Workshop. Staff generally suggest one-time surplus amounts be spent on capital expenditures or placed in reserves for future needs.

- The Scorecard (attached) provided the Committee with additional information in determining the level of services in comparison to the base year (FY2020, when a full year of Measure B revenues were collected). The Scorecard indicates that budgeted expenditures, staffing levels, and Economic Stabilization Reserve and Emergency Reserve balances for FY2021 were comparable to those in the base year.
- The Scorecard also indicates (through specific reported results of the National Community Survey, a City-wide effort) that the community continues to be generally satisfied with the services provided by the City.
- The Committee concludes that, based on the data provided by City staff and our analysis as described above, police, fire, public works, and parks, recreation and library services were all maintained as evidenced by an increase in expenditures and continued resident satisfaction. The Committee also concludes FY2021 Measure B funds were used for their intended purpose, with the following condition: the Council Priorities Workshop and determination of the use of the $23.1M remaining surplus was not known by the Committee at the time of this report preparation. The Committee suggests the report for FY2022 include a section addressing how the surplus was utilized.

CC: Dennis Kauffman, Assistant City Manager/Chief Financial Officer
Terry Bradley, Recording Secretary

Attachment: Measure B Scorecard

Measure B Scorecard

Measure B is a half-cent local sales and use general purpose tax passed by voters during the November 6, 2018 election to protect Roseville's essential services.

The primary function of Measure B is to maintain essential services. Prior to the passage of Measure B, the City of Roseville faced significant reductions in services, under-funding of long-term obligations, and growing expenses. Revenue generated by Measure B allows the City of Roseville to provide for the continuity of services by restoring and maintaining priority service levels and building and maintaining an Economic Stabilization Reserve Fund as a safeguard for the future.

Roseville's Measure B scorecard uses a green, yellow, red scoring method to present how Measure B funds have impacted services.

- Green indicates restored or enhanced level of resources.
- Yellow indicates maintained level of resources.
- Red indicates diminished level of resources.

Below is a dashboard snapshot; additional details follow.

[1]*Community Indicators are part of the National Community Survey report of results from 2021.*

Measure B revenues continue to allow the City to maintain current service levels, restore services, and strategically invest in high-priority areas while still achieving a balanced budget.

Measure B Priorities

Measure B was passed by voters with the commitment to maintain service levels, invest in high-priority service areas, and build and maintain the City's economic stabilization reserve fund. Measure B sales tax revenue has helped stabilize General Fund services, protect Roseville's quality of life, and increase reserves to weather future economic downturns.

Measure B-related investments in Fiscal Year 2020-21:

- Maintained essential services
  - Cost of doing business increases
  - Specialized police and fire services
  - Fire engine company
  - Recreation and library programs
  - Street maintenance levels
  - Job-creation and business-recruitment initiatives
  - One additional dispatcher
  - Unsheltered camp cleanup
  - Library, parks and events stabilization
  - Maintenance at citywide parks
    - Crabb Park
    - Central Park
    - Pistachio Park
  - Street paving
- Restored services that had been reduced prior to Measure B
  - Library hours
  - 4th of July fireworks
  - Fire training and investigations
  - Goat grazing for thatch management in open space
  - Park maintenance standards
  - Industry training and development
- Services Added
  - Establish new police beat in West Roseville
  - One additional police traffic officer
  - Maintenance for three citywide parks, allowing for construction to occur
- Fiscal Health Investments
  - Build an economic stabilization reserve fund
  - Pay down CalPERS pension obligation
  - Pay down retiree health liability

General Fund Department Data

A primary objective of Measure B is to ensure the continuity of services for residents. This is demonstrated by the level of investment in General Fund operating departments. The City seeks to keep pace with growth while maintaining a high level of service and meeting the needs of the community.

This scorecard uses a green, yellow, red scoring method to present how Measure B funds have impacted services.

- Green indicates restored or enhanced level of resources.
- Yellow indicates maintained level of resources.
- Red indicates diminished level of resources.

	Adopted Expenditures				Adopted Staffing			
Department	FY 2020	FY 2021	Increase		FY 2020	FY 2021	Increase	
Police	$44,518,481	$46,426,362	4%		201	204	1%	
Fire	$34,178,936	$34,649,868	1%		119	119	0%	
Parks, Recreation and Library	$24,677,839	$26,412,290	7%		115	117	2%	
Public Works	$7,204,894	$8,016,401	11%		111	111	0%	
Development Services	$9,371,317	$10,125,452	8%		70	69	-1%	
All other General Fund departments	$40,777,385	$40,664,703	-0%		130	136	4%	
Total	$160,728,852	$166,295,076	3.5%		746	755	1%	

Notable Changes

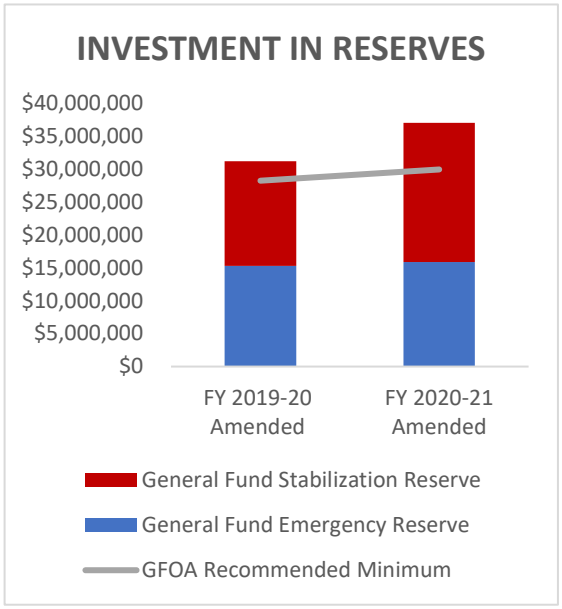
The FY 2020-21 budget was adopted as a primarily status quo budget, given the fiscal uncertainty surrounding the COVID-19 pandemic, and included known cost increases for labor contracts and vendor agreements. The Police Department added two positions in FY 2020-21, a dispatcher and a school resource officer, after also adding one position during FY 2019-20. The increase in expenditures for the Parks, Recreation and Libraries Department is due to higher costs for park and open space maintenance, as well as adding two new positions. The increase in Public Works expenditures is the result of lower reimbursements from other funding sources due to the timing of work on multi-year projects. The increase in Development Services expenditures is partly due to adding two limited-term building inspectors to maintain service levels, while the reduction in regular staffing is due to removing a position that had been added temporarily to allow cross training prior to a retirement.

FY 2020-21 actual expenditures were 96% of the adopted budget, with the Police and Fire departments expending 100% of their budgets, and the Parks, Recreation and Libraries Department expending 90% of their budget due to impacts from the pandemic.

Investment in Reserves

Through June 30, 2021, the City Council had transferred nearly $16 million received from Measure B to the Economic Stabilization Reserve. These funds strengthen the City's financial position and will help provide for the continuation of essential services during a future economic downturn.

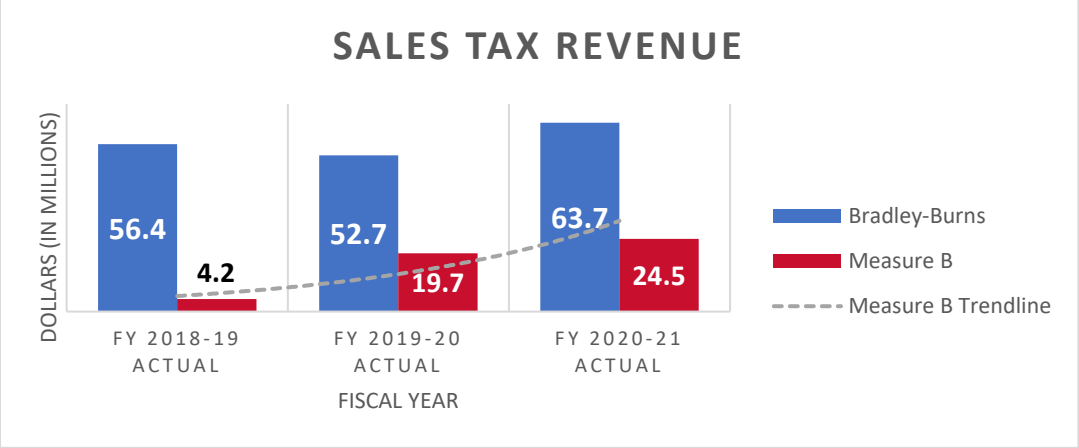
The adopted FY 2020-21 budget assumed a transfer of $2.1 million would be necessary to balance the budget after tax revenues were conservatively estimated based on impacts from the pandemic. Because of strong sales tax results during the fiscal year, no transfer from the reserve was necessary. In addition, $7.27 million was transferred during the year from the General Fund into the Economic Stabilization Reserve from the FY 2019-20 year-end budget surplus.



The Government Finance Officers Association (GFOA) recommends a minimum 17% reserve. The City of Roseville's total reserves (Economic Stabilization + Emergency) is approximately $41 million per the FY 2021-22 adopted budget, which equates to the Council-adopted policy target of 25% of operating expenditures.

Trending: Sales Tax Revenue

Measure B revenue (shown in red) has steadily increased and enables the City of Roseville to maintain and expand service priorities to meet the needs of a growing population.



Measure B Helps Support Roseville's High Marks on National Community Survey

In January and February 2021, residents were asked to complete the National Community Survey to benchmark and track resident satisfaction levels and priorities. The National Community Survey (the

NCS™) is a statistically valid instrument recognized as the nation's premier community survey. It is developed and provided by the National Research Center at Polco. Invitations to take part in the survey were mailed at random to 3,000 Roseville residents, with 476 residents completing the survey (16%). This provides a level of confidence of 95% and a margin of error of plus or minus 5%.

Measure B funding has enabled the City of Roseville to not only sustain, but also increase service levels within the city, which aided in making Roseville residents among the most satisfied in the country.

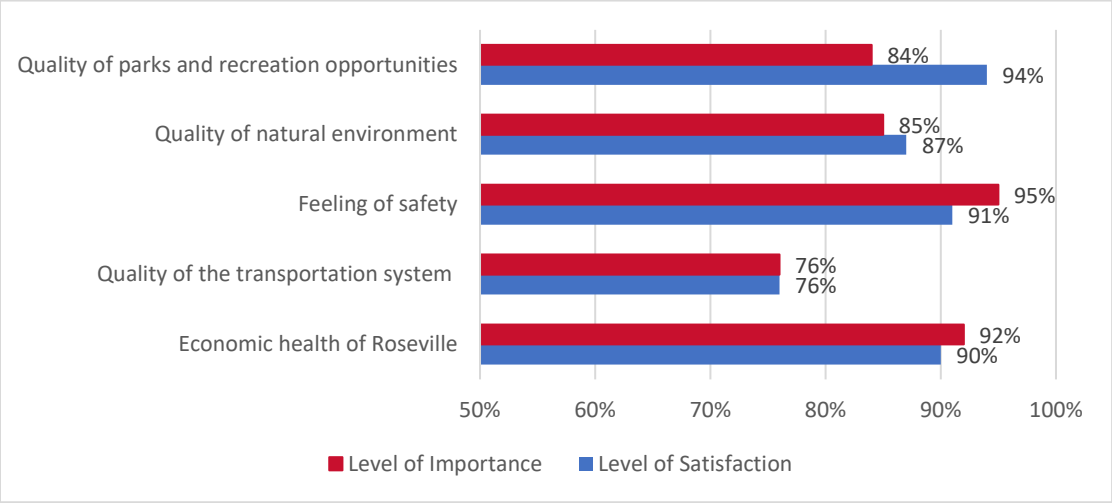
Roseville's Measure B scorecard uses a green, yellow, red scoring method to present how Measure B funds have impacted services. For purposes of rating public perspective via the National Community Survey, the follow standards have been applied.

- Green indicates a score of 75% or above on the National Community Survey.
- Yellow indicates a score between 50% and 74% on the National Community Survey.
- Red indicates a score below 50% on the National Community Survey.

Key Community Indicators Relating to Measure B Priorities

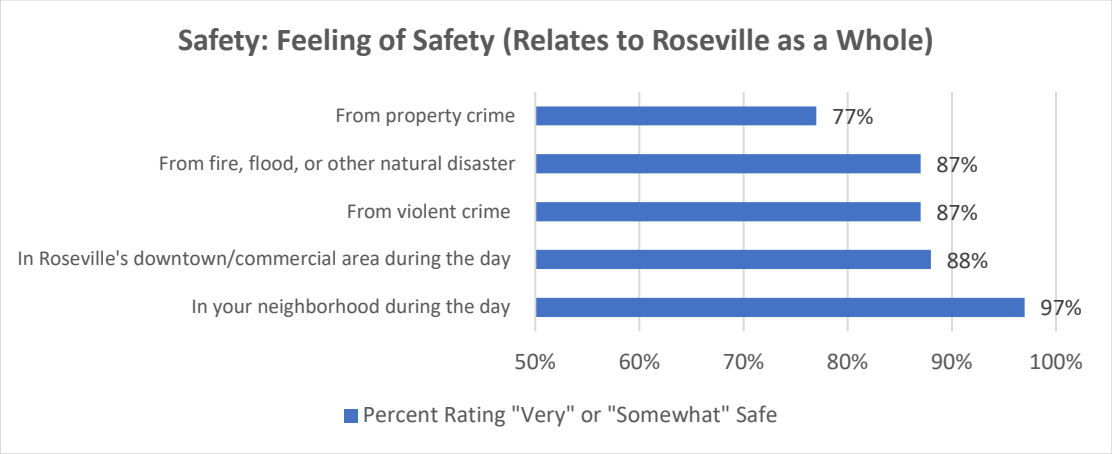
Facets of Livability

The charts below show the proportion of residents who rated key community facets positively for quality and show the level of importance residents place on the facet for the next two years.



Safety

91% of respondents rated the overall feeling of safety in Roseville as "excellent" or "good." Additional ratings regarding safety follow.



Parks, Recreation and Library Services

COUNCIL COMMUNICATION

CC #: 2041
File #: 0800-03

Title:	Western Placer Waste Management Authority - Flow Control Commitment
Contact:	Devin Whittington 916-774-5783 dwhittington@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 9.3.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt a resolution authorizing the City Manager to execute the Agreement for Delivery of Solid Waste between the Western Placer Waste Management Authority (WPWMA) and the City of Roseville (Agreement), and all other documents necessary to effectuate said Agreement on behalf of the City of Roseville, concerning our flow control commitment for the delivery of waste materials thereunder.

BACKGROUND

Flow Control Commitments are required by Western Placer Waste Management Authority (WPWMA) to issue debt. The debt will be used to construct improvements at the WPWMA site to process organics and improve the Materials Recovery Facility (MRF). Roseville will be required to deliver per fiscal year (July 1 to June 30) a minimum of thirty-eight thousand (38,000) tons of Municipal Solid Waste (MSW), a minimum of nine thousand (9,000) tons of co-collected residential greenwaste and foodwaste, and all Construction and Demolition (C&D) waste collected within the geographic jurisdiction of the City of Roseville. This tonnage comprises the median amount of the other WPWMA members, who are Placer County, the City of Rocklin, and the City of Lincoln.

The purpose of median tonnage flow commitment is flexibility – ensuring that the City has options with respect to SB 1383 compliance. The flexibility also allows the City to increase long-term disposal capacity. The City can accomplish this because it owns and operates the solid waste enterprise and directly controls operations. The median threshold amount also allows tonnages and financial impacts to be more equitable among members.

Flow Control Commitments have been the primary source of debt collateral since WPWMA constructed the current MRF and other facility upgrades. The site needs to upgrade infrastructure to process organics to comply with SB 1383. Staff recommends executing an agreement with WPWMA for a minimum of the median tonnage supplied by the other member agencies as described in the attached Agreement.

Flow Control Commitments and Agreement

The primary deal points of the flow control commitment are:

- Roseville will commit its equitable portion of waste compared to other WPWMA members for the term of the Agreement.
- Roseville will commit this amount of waste until the debt WPWMA secures for facility improvements is repaid.
- Roseville retains flexibility by committing a portion rather than all of its waste.

The term of the Agreement will be effective upon execution of the Agreement and last one year after all debt is repaid. The City is committing 38,000 tons of mixed waste, 9,000 tons of comingled food and greenwaste and all construction and demolition tons from the City. WPWMA will need to ensure that it can process comingled food and greenwaste as this will be a key part of the City's compliance pathway for SB 1383.

The other member agencies, Placer County, the City of Rocklin and the City of Lincoln, all have contingent agreements and have delegated authority to their respective city managers to negotiate and execute agreements. After approval by Council, this Agreement will need to be approved by the WPWMA Board.

FISCAL IMPACT

The fiscal impact will be the future tipping fee multiplied by the tonnage. The funds will be budgeted in the FY2021-22 Waste Services Operation Fund 6301.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) only applies to projects which have the potential to cause a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA (CEQA Guidelines §15061(b)(3)). Execution of the proposed Flow Control Commitment would not result in a potential environmental impact. Consequently, no CEQA action is required.

City Clerk

AGREEMENT FOR DELIVERY OF SOLID WASTE BETWEEN
THE WESTERN PLACER WASTE MANAGEMENT AUTHORITY AND
THE CITY OF ROSEVILLE

THIS AGREEMENT is made as of _____2022 by and between the **WESTERN PLACER WASTE MANAGEMENT AUTHORITY** (the "WPWMA") and the **CITY OF ROSEVILLE** (the "City").

RECITALS

1. The WPWMA is a public entity organized pursuant to California Government Code Sections 6500 et seq. for the purpose of constructing, operating, and maintaining a materials recovery facility including an organics management facility, and sanitary landfill and related facilities; and

2. The WPWMA owns and operates the Western Regional Sanitary Landfill (the "Landfill") and the Western Placer Materials Recovery Facility (the "Materials Recovery Facility"). Collectively, the Landfill and Materials Recovery Facility are referred to as the "Facility"; and

3. The members of the WPWMA are the City of Roseville, City of Lincoln, City of Rocklin, and County of Placer (collectively, the "Member Agencies"); and

4. The WPWMA, in order to assist its Member Agencies in achieving the Solid Waste diversion goals required by the California Integrated Waste Management Act of 1989, Public Resources Code Section 40000 et seq., (the "Act"), has constructed a Materials Recovery Facility whose functions include the recovery and subsequent marketing of Recyclable Materials such as paper, cardboard, yard and green wastes, wood, glass, metals and plastics, thereby diverting them from land disposal; and

5. An expansion to the Materials Recovery Facility is needed in order to handle anticipated growth Solid Waste diversion goals required by the CalRecycle Short-lived Climate Pollutants: Organic Waste Reductions regulations, California Code of Regulations Title 14, Division 7, Chapter 3 et seq. ("SB1383") and the California Green Building Standards Code, California Code of Regulations Title 24, Part 11 et seq ("CalGreen"); and

6. The WPWMA has determined that, in order to assure the successful and cost-effective operation of the expanded Materials Recovery Facility, it will be necessary to obtain additional long-term contractual commitments from its Member Agencies and other municipalities now using the Facility, that Solid Waste generated within their respective jurisdictions will be delivered to the Facility; and

7. The City wishes to support the WPWMA's efforts to expand the Materials Recovery Facility and recognizes the interrelationship between the assurance of Solid Waste flow (both in terms of quantity and composition) and the successful operation of the Facility.

Now, therefore, in consideration of the mutual promises and covenants contained in this Agreement, and for other good and valuable consideration, the Parties agree as follows:

1. TERM

The term of this Agreement shall commence immediately upon execution by the Parties and shall expire no earlier than one (1) year after full repayment of all financing mechanisms obtained by the WPWMA, or by others on behalf of the WPWMA, for the purposes of modifying the Materials Recovery Facility. This Agreement will remain in full force and effect regardless of whether the City continues to be a member of the WPWMA.

2. MODIFICATION OF THE MATERIALS RECOVERY FACILITY

The WPWMA shall, provided it receives assurances of Solid Waste deliveries of the type contemplated in Section 1 from its Member Agencies and other Authorized Users of the Facility sufficient in the WPWMA's sole judgment to successfully and economically operate the Facility, diligently pursue expansion of the Materials Recovery Facility in a manner generally consistent with Request For Proposals 20123, entitled " Material Recovery, Organics Processing, and C&D Debris Recovery Facilities Conceptual Designs and Operational Services".

3. DELIVERY OF SOLID WASTE

The City shall deliver, or cause to be delivered, to the Facility per fiscal year (July 1 to June 30) a minimum of thirty-eight thousand (38,000) tons of Mixed Solid Waste (MSW), a minimum of nine thousand (9,000) tons of co-collected residential greenwaste and foodwaste, and all Construction and Demolition (C&D) waste collected within the geographic jurisdiction of the City (collectively, the "City Minimum Amounts") by 1) City-operated programs and 2) any franchise or other contractual agreements between the City and a Solid Waste Enterprise. All Solid Waste so collected shall be delivered to the Facility without any Processing after having been collected, except as provided for herein. WPWMA shall provide quarterly tonnage reporting to the City for tracking and verification purposes.

City shall be entitled to deliver co-collected residential greenwaste and foodwaste to another facility if WPWMA is unable to accept such waste. For the purposes of this Agreement, permissible bases for non-acceptance shall be: 1) if WPMWA's permit to accept and process such waste is conclusively revoked; and, 2) if WPWMA's equipment to process such waste is significantly damaged or otherwise rendered non-functional by fire or other event.

If, in the future, the City elects to replace the City-operated Solid Waste collection program, in whole or in part, with a program operated by a Solid Waste Enterprise, it shall require such Solid Waste Enterprise to continue to deliver, Unprocessed, all Solid Waste collected to the Facility for the Term of this Agreement.

4. RECYCLING AND RECYCLABLE MATERIALS

The Parties recognize that assurances of the delivery of minimum quantities of Solid Waste, with a stable portion thereof representing materials with recyclable value, is essential in order (a) to design an expansion to the Materials Recovery Facility and (b) to structure the economic terms of an agreement for its construction and operation by third parties favorable to the WPWMA and, therefore, to its Member Agencies.

The Parties also recognize, however, that Member Agencies may have to conduct, or authorize, source reduction and recycling activities in addition to those conducted by the WPWMA at the Facility to meet the requirements of the Act, SB 1383 and/or CalGreen. For that reason, it is not the intent of this Agreement to preclude all such source reduction or recycling activities by the City but rather to require that such activities be consistent with the terms of this Agreement.

In light of these considerations, the Parties agree:

A. (1) The City shall not initiate additional City-operated or authorized Recycling programs which would have the effect of diverting Solid Waste from the Facility or of reducing the amount of Recyclable Materials in the Solid Waste delivered to the Facility from within the City, except with the prior written consent of the WPWMA. For purposes of this Agreement, the phrase "additional City-operated or authorized Recycling programs" shall mean any Solid Waste Recycling program or activity not currently operated, approved, or authorized by the City within its boundaries as of the effective date of this Agreement which the City may hereafter operate, approve, permit, franchise, or authorize. The WPWMA may in its sole discretion withhold its consent to the City's engaging in a new Recycling program unless the City demonstrates to the WPWMA's sole satisfaction that such a program is necessary in order for the City to comply with the Act, SB 1383 and/or CalGreen, that the goals of such program cannot be achieved by the City's continued use of the Facility, and that such a program will not materially interfere with the WPWMA's successful and/or economic operation of the Facility.

   (2) Section 4(A)(1) is not intended to apply to programs conducted by City employees in which materials generated in construction and maintenance of City roads and other City-owned property (such as asphalt, concrete, dirt, and wood trimmings) are Recycled and reused. The City shall have sole discretion and responsibility for marketing materials collected through City-operated or authorized Recycling programs.

B. The City shall not authorize, through provisions in a franchise or contract, any Solid Waste Enterprise to engage in the recovery of Recyclable Materials from the City waste stream prior to delivery to the Facility without the prior written consent of the WPWMA. If the WPWMA gives such written consent but thereafter, if the WPWMA's Board of Directors finds, at a public meeting and on the basis of a staff report, that any such recovery program by City-franchised Solid Waste Enterprises is materially interfering with the WPWMA's ability to successfully and/or economically

operate its Facility, WPWMA may give notice of such finding to the City, requesting that the City take action to prohibit or regulate such programs. Upon receipt of a notice containing such a finding and request, the City shall promptly, and to the extent that it determines it has legal authority to do so, modify franchise provisions so as to prohibit such recovery program or to require that materials recovered by such Solid Waste Enterprises be delivered to the Facility without further Processing.

C. The Parties agree that Sections 4(A)(1) and 4(B) shall apply only to the City Minimum Amounts. City agrees to notify WPWMA in writing at least ninety (90) days in advance of any material changes in either quantity or composition of Solid Waste above the City Minimum Amounts delivered to WPWMA.

5. POWERS OF WPWMA

The City agrees that the WPWMA has the power and duty to establish rules and regulations for the use of its Facility including, but not limited to:

A. Fees for the use of the Facility, including the right to refuse entry to the Facility to vehicles of persons to whom credit has been extended who are delinquent in payment.

B. Restrictions or prohibitions on entry to the Facility to vehicles of persons which are violating obligations of their franchise, contract, license, permit or other authorization from the City, after written notification and action by the WPWMA's Board of Directors authorizing enforcement of such restrictions.

C. Determinations of the types of materials which will be accepted for Processing at the Materials Recovery Facility and those which will be delivered directly to the Landfill for disposal.

D. Restrictions and/or prohibitions on the delivery of hazardous waste, medical wastes, designated wastes, and other Solid Wastes which may not, under applicable laws, regulations and permits, be accepted for Processing at the Materials Recovery Facility or disposal of at the Landfill.

6. REGULATION OF WASTE BY CITY

The WPWMA recognizes that the City has limited ability to control the presence of small quantities of Household Hazardous Wastes in the Solid Waste placed for delivery by residents and businesses and collected by the City or Solid Waste Enterprises. The WPWMA acknowledges that the City cannot and does not guarantee that no Household Hazardous Wastes will be delivered by Solid Waste Enterprises and/or members of the public to the Facility.

The City, in turn, recognizes that the cost of operating the Facility will depend, in part, on the effectiveness of programs implemented by the City, the other Member Agencies and the Authorized Users to minimize the presence of Household Hazardous Waste in the residential/commercial Solid Waste stream.

The City has adopted programs and policies designed to exclude the introduction of Household Hazardous Waste into the Solid Waste stream and thus its delivery to the

Facility. The City shall maintain these programs and policies in effect and shall use good faith efforts to implement them, to enforce their use by Solid Waste Enterprises operating under a franchise, contract, license, permit or other authorization from the City, and to encourage their use by City residents. The City will likewise encourage its residents to use the WPWMA's Household Hazardous Waste programs.

7. REVENUES FROM SALE OF RECYCLE MATERIALS

In order to facilitate the WPWMA's redevelopment of a Facility, the City hereby relinquishes, waives, and abandons for the term of this Agreement any claim it may now have or may in the future have to any portion of the revenues received by the operator of the Facility and/or the WPWMA from the sale or other disposition of materials (whether source-separated or recovered through on-site Processing) delivered to the Facility.

8. NOTICE

Any notice required by or allowed under this Agreement shall be in writing and delivered to the parties by deposit in the United States mail, postage prepaid, certified mail, addressed as follows:

If to the WPWMA:
Western Placer Waste Management Authority
3013 Fiddyment Road
Roseville, CA 95747
Attn: Executive Director

If to the City:
City of Roseville
311 Vernon Street
Roseville, CA 95678
Attn: City Manager

Either party may change the address to which notices to it are to be sent.

9. EXHIBITS

No exhibits are attached to this Agreement.

10. AMENDMENTS

This Agreement may only be amended by a writing signed by both Parties.

11. DEFINITIONS

The following terms shall have the following meanings unless the context clearly requires otherwise:

A. **Authorized Users:** means the cities of Auburn, Colfax, and Loomis.

B. **City:** means the City of Roseville.

C. **Disposal:** means the management of Solid Waste through landfilling or transformation at permitted Solid Waste facilities.

D. **Facility:** means the Materials Recovery Facility and Landfill, collectively.

E. **Household Hazardous Waste:** means waste which meets the definition of Hazardous Waste, but which is of residential origin and exempt from the Resource Conservation and Recovery Act. Household Hazardous Waste includes "Universal Waste" as that phrase is defined in the California Code of Regulations, Division 4.5, Chapter 23.

F. **Landfill:** means the Western Regional Sanitary Landfill.

G. **Materials Recovery Facility:** means the WPWMA's municipal Solid Waste Processing area, construction and demolition debris processing area, organics processing and composting area, self haul material drop-off area, scalehouse complexes and all related and supporting infrastructure.

H. **Member Agencies:** means the City of Roseville, City of Rocklin, City of Lincoln and the County of Placer.

I. **Person:** means an individual, firm, association, co-partnership, political subdivision, government agency, municipality, industry, public or private corporation, or any other entity whatsoever.

J. **Processing:** means the reduction, separation, recovery, conversion or recycling of Solid Waste.

K. **Recycle; Recycling:** means the process of collecting, sorting, cleaning, treating and reconstituting materials that would otherwise become Solid Waste and returning them to the economic mainstream in the form of raw material for new, reused, or reconstituted products which meet the quality standards necessary to be used in the marketplace.

L. **Recyclable Materials:** means materials contained in the Solid Waste stream that can be Recycled after recovery through source-separation and collection or through Processing at a central facility for mixed materials.

M. **Solid Waste:** means all putrescible and nonputrescible solid, semisolid and liquid wastes, including garbage, trash, refuse, paper, rubbish, ashes, industrial wastes, demolition, and construction wastes, discarded home and industrial appliances, dewatered, treated, or chemically fixed sewage sludge which is not hazardous waste, vegetable, or animal solid and semi-solid wastes and other discarded solid and semi-solid wastes.

Solid Waste includes recyclable materials, and mixed recyclables, which have been discarded or otherwise set aside for collection by the generator thereof.

Solid Waste does not include:

(1) hazardous wastes or low level radioactive waste regulated under Sections 25800 et seq. of the Health and Safety Code;
(2) medical waste which is regulated under Sections 25015 et seq. of the Health and Safety Code;
(3) abandoned vehicles and parts thereof.

N. **Solid Waste Enterprise:** means any individual, partnership, joint venture, unincorporated private organization, private corporation, public agency or other person which is regularly engaged in the business of providing Solid Waste Handling services.

O. **Solid Waste Handling:** means the collection, transformation, storage, transfer, or processing of Solid Waste.

P. **Source-Separation:** means the segregation, by the waste generator, of materials designated for separate collection for some form of materials recovery or special handling.

Q. **Transformation:** means incineration, pyrolysis, distillation, gasification or biological conversion other than composting.

R. **Unprocessed:** means without having undergone Processing.

S. **WPWMA:** means the Western Placer Waste Management Authority.

COUNCIL COMMUNICATION

CC #: 2039
File #: 0600-01

Title: City Manager and City Attorney Compensation
Contact: Linda Hampton 916-774-5215 lhampton@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 9.4.

RECOMMENDATION TO COUNCIL

Staff recommends that City Council adopt an ordinance to approve an attached City Council Appointed Positions (CCAP) salary schedule (Appendix P) reflecting a 3% salary increase for the City Manager and City Attorney effective April 23, 2022.

BACKGROUND

The City has an existing employment contract with City Manager Dom Casey and City Attorney Michelle Sheidenberger. The Council has completed the annual performance review of these city council appointed officials and approved a 3% salary increase to recognize a positive evaluation for each official and to address compaction with their direct reports who received a 3% general wage increase in January.

FISCAL IMPACT

From	Current Salary & Benefits	Proposed Salary & Benefits	FTE	Annual Impact *	Impact for remaining FY 2021-22
City Manager	$465,385	$479,347	1	$13,962	$2,685
City Attorney	$401,621	$413,670	1	$12,049	$2,317
				$26,010	**$5,002**

* This amount includes the estimated annual pension cost of $1,819.
With the implementation of this change, there will be an impact of $2,685 to the City Manager's Office budget and $2,317 to the City Attorney's Office budget, both of which can be absorbed in the current fiscal year budget. The additional annual cost of the salary and benefit increases will be included in the fiscal year 22-23 budget planning.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment, or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The proposed salary changes meet the above criteria and are not subject to CEQA. No additional environmental review is required.

Ordinance 6481

2022-04-23 CCAP Salary Schedule

ORDINANCE NO. 6481

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING ORDINANCE NO. 6346 THE SALARY ORDINANCE FOR CITY COUNCIL APPOINTED POSITIONS, AS AMENDED BY APPENDIX "P" TO BE EFFECTIVE APRIL 23, 2022 AS AN URGENCY MEASURE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Title and Purpose.

Ordinance No. 6346 the Salary Ordinance for City Council Appointed Positions, is hereby amended as shown on Appendix "P" attached hereto.

SECTION 2. Salary Plan Effective Date.

This Ordinance shall be effective April 23, 2022 as an urgency measure.

SECTION 3. Urgency Ordinance.

This ordinance is hereby declared to be an urgency measure, immediately necessary for the public peace, health and safety and shall take effect April 23, 2022. A statement of urgency is as follows:

It is necessary to amend the Salary Ordinance to comply with recently approved changes for the orderly and necessary continuance of operations of the City.

SECTION 4. Posting.

The City Clerk is hereby authorized and directed to post a true copy of the foregoing ordinance in each of three (3) conspicuous locations in the City and she shall immediately after such posting enter in the Ordinance Book under the record of the ordinance a certificate under her hand stating the time and place of said publication by posting.

COUNCIL COMMUNICATION

CC #: 2020
File #: 0215

Title:	Adoption of Master Schedule of User and Regulatory Fees
Contact:	Jeannine Thrash 916-774-5473 jthrash@roseville.ca.us Dennis Kauffman 916-774-5313 dkauffman@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 10.1.

RECOMMENDATION TO COUNCIL

Staff recommends the City Council approve a resolution adopting a Schedule of User and Regulatory Fees effective July 1, 2022 through June 30, 2023, and authorize the Assistant City Manager/Chief Financial Officer to make automatic annual inflationary adjustments for various fees identified in the schedule.

BACKGROUND

The City's Schedule of User and Regulatory Fees identifies fees for services and activities provided at the request of, or on behalf of, a single party as opposed to the public at large. The fee schedule is intended to be reviewed annually, with staff conducting bi-annual studies to identify the City's costs of providing fee-related services based on current labor rates and service delivery methods. The proposed fee schedule, effective July 1, 2022, through June 30, 2023, is based on the results of a user and regulatory fee study completed in March 2022.The report is included as an attachment to this City Council communication. In interim years, fees are authorized to be adjusted based on the CPI change from October to October of the immediately preceding year. User and regulatory fees are established by the City Council. The prior Council-adopted fee schedule, delayed due to the COVID-19 pandemic, was presented to Council on October 21, 2020, and became effective for the period of January 4, 2021 through June 30, 2021, with an inflationary adjustment in the interim year that took effect July 1, 2021 through June 30, 2022.

PUBLIC HEARING

This item and staff's recommendations are intended to be considered upon completion of a public hearing. The public hearing provides all interested parties with an opportunity to comment or request clarification regarding any of the fees proposed for update. Prior to the public hearing, the City publishes a newspaper notice of the public hearing, and notifies all interested parties that have requested to be notified regarding proposed fee updates.

PROPOSED ADJUSTMENTS

The following provides a brief summary of primary changes the City Council is being asked to consider:

Summary of Changes to Fees Examined

Description	Count	Percentage	Note
Fees Proposed to Remain Unchanged	179	41%	[a]
Fees Proposed to Increase by 5% or Less	245	57%	
Fees Proposed to Increase by More than 5%	6	1%	
New Fees Proposed	3	1%	
Total Fees Examined	433	100%	

* Amounts in the percentage column are rounded for illustrative purposes.

[a] For this table, fees include fee multipliers that City staff may use to aid in the calculation of fees. Modification of fee multipliers directly influences total fees, consequently they are included in this table.

No new development fees are proposed

Fees Proposed to Remain Unchanged or Increase by Five Percent (5%) or Less

Ninety-eight percent (98%) of user and regulatory fees are proposed to remain unchanged or increase by five percent (5%) or less. Any modifications to fees are simply meant to avoid degradation of existing cost recovery levels per hour of City service provided.

Fees Proposed to Increase by More than Five Percent (5%)

There are six fees proposed to increase by more than five percent (5%). The fees are listed below.

Electric Fees:

The following changes are intended to capture increased costs of materials, equipment, and personnel:

1) Residential PV Net-Meter:
   - Current fee: $782; Proposed fee: $857 (100% recovery)
2) Business PV Net-Meter (<10kW system size)
   - Current fee: $1,659; Proposed fee: $2,029 (100% recovery)
3) Pedestal Meter Fee
   - Current fee: $332; Proposed fee: $584 (100% recovery)
4) Temp Power Meter Set - Residential
   - Current fee: $270; Proposed fee: $584 (100% recovery)

Photography & Filming Permits and Special Event Application Fees:

Staff is working to increase cost recovery for these services. The cost recovery increases will be phased-in over a multi-year period. Fees for FY 22/23 are proposed to increase by $25.

5) Photography & Filming Permit Application Fee
   - For cast and crew up to three persons: Current fee $135; Proposed fee $160 (75% cost recovery)
   - For cast and crew of four or more persons, or with street closures: Current fee $275; Proposed fee $300 (25% cost recovery)

Note: Non-commercial photography and photography/film not requiring exclusivity does not need a permit. The Department Director may waive fees for bona fide student film/photography projects and non-profit projects.

6) Special Event Permit Application Fee

- Event requiring limited site plan review, no street closures, etc.: Current fee $135; Proposed fee $160 (37% cost recovery)
- Event that requires, but not limited to, street/parking lot closures, site/plan review, trail use, etc. (i.e., fun runs, festivals, parking garage, etc.): Current fee $275; Proposed fee $300 (17% cost recovery)

New Fees Proposed

Three new fees are proposed.

1) Police Department Citation Sign-Off Fee (only applies to sign-offs for non-Roseville issued citations):
   - The proposed fee is $10. Similar fees are collected by neighboring agencies. Adding a minor fee for service will help offset costs of Roseville staff to sign-off on non-Roseville issued citations; for example, when a driver of a vehicle is issued, in another jurisdiction, a "fix-it" citation concerning a component or aspect of their vehicle, but asks our Police Department to sign off on the citation. Roseville Police Department will continue to review and sign-off for Roseville issued citations free of charge for Roseville residents.
2) Change of Address Fee
   - The proposed fee is $460. The proposed fee targets full cost recovery. The fee applies to discretionary actions processed subsequent to initial development. The service is currently provided without a corresponding fee to offset the costs of service.
3) Street Name Change Fee
   - The proposed fee is $828. The proposed fee targets full cost recovery. The fee applies to discretionary actions processed subsequent to initial development. The service is currently provided without a corresponding fee to offset the costs of service.

FISCAL IMPACT

The fiscal impact of the proposed fee changes is approximately $469,000 annually in additional revenue citywide. It is important to note that while adjusting fees will provide a fiscal impact in the form of additional revenue, the revenue is not intended to be used to fund new services; rather, the revenue is intended to offset the costs of providing existing services that are recoverable from fees. Consequently, while fees may rise annually, typically labor costs (the primary driver of fee-related costs) also rise annually. Recalibration of these fees simply provides an offset of existing expenditures/needs rather than a source of funding for expanded service levels.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment or is otherwise not considered a project as defined by CEQA Statute §21065 and CEQA State Guidelines §15060(c)(3) and §15378. The approval of the resolution meets the above criteria and is not subject to CEQA. No additional environmental review is required.

Description

Resolution 22-100

Exhibit A

Report

RESOLUTION NO. 22-100

ADOPTING A MASTER SCHEDULE OF USER AND REGULATORY FEES, EFFECTIVE JULY 1, 2022 THROUGH JUNE 30, 2023

WHEREAS, user and regulatory fees are established by the City Council; and

WHEREAS, the City recently completed a study to identify the cost of providing various user and regulatory fee-related services; and

WHEREAS, the majority of the City's fees have been adjusted during the last several years; and

WHEREAS, adopting a master schedule of user and regulatory fees allows for consolidation of the schedule of fees and helps formally continue a pattern on annual review and update, including annual inflationary adjustments; and

WHEREAS, staff recommends adopting the Schedule of User and Regulatory Fees, effective July 1, 2022 through June 30, 2023, attached hereto as Exhibit "A;" and

WHEREAS, staff further recommends authorizing the Chief Financial Officer to make annual inflationary adjustments for various fees identified in the Schedule of User and Regulatory Fees based on all-urban Consumer Price Index (CPI) for the San Francisco-Oakland-Hayward area; and

WHEREAS, inflationary adjustments will be based on the CPI change from October to October of the immediately preceding year; and

WHEREAS, if the CPI does not change or goes down, no change shall be made to the fee schedule for that year unless an adjustment is made to targeted cost recovery levels or fee study findings indicate that an adjustment is appropriate; and

NOW THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said schedule of User and Regulatory Fees, effective July 1, 2022 through June 30, 2023 is hereby adopted.

BE IT FURTHER RESOLVED, the Chief Financial Officer has authority to make annual inflationary adjustments for various fees identified in the Schedule of User and Regulatory Fees based on the all-urban Consumer Price Index (CPI) for the San Francisco-Oakland-Hayward area.

Full Cost Deposits and Deposit Replenishment

Applicants for Full Cost Entitlement Applications shall pay for all City staff time required to process the application. A full cost reimbursement agreement shall be included with the project application submittal package. Projects outside the scope of this fee schedule (as determined by the Development Services Director) will be subject to a full cost reimbursement agreement to be approved by the City Council. This reimbursement agreement will include the identification of a work program and will include cost estimates for both City staff time and consultant services based on a defined scope of work.

Initial deposits as shown on the fee schedule will be collected and held by the City in a deposit account at the time the application is submitted. The cost of staff time will be drawn from the deposit account. A positive account balance shall be maintained at all times during the review process. No work will be performed on a project with a negative fund balance. If the deposit is reduced to below 20% of the initial deposit amount, the applicant will be notified and required to supplement the deposit account with an additional amount no less than 50% of the original deposit.

When more than one Full Cost application is submitted, the sum total of the initial full cost deposit amount can be reduced by 20%.

Funds expended for staff time shall not be dependent upon the City's approval or disapproval of the application request. The deposit account will be held open for 90 days after project approval for City to complete any miscellaneous clean up items and to account for all project related costs. Any deposit amounts remaining after final project close out will be returned to applicant. In the event that the deposit account is exhausted prior to final close out, the balance owed to the City will be credited against the plan check and inspection fee deposit at time of improvement plan review.

As may be required by the Development Services Department for project evaluation or environmental review, all payment for consultant work shall be the responsibility of the applicant.

** Note regarding annual inflationary adjustment: The Initial deposit amounts will not be inflated annually, but the underlying hourly billing rates should inflate annually by the change in hourly labor rates and/or indirect cost rate multipliers.*

Planning (Entitlement) Fees

Refund Policy
Application fees are not refundable except as follows: A. Refund of 100% shall be made if a determination is made by the Development Services Director that the permit and associated fee are not required by the City of Roseville Municipal Code or adopted City Resolution. B. If an applicant requests to withdraw a fixed fee application prior to the PEM, refund of 50% of the applicable fee shall be refunded. C. No refund of application fees shall be made after a Project Evaluation Meeting has been held, unless a fee waiver is approved by the Roseville City Council.

[a] Appeals - This fee reimburses the administrative costs associated with an appeal. Applicants for Citywide Full Cost Entitlements shall continue to pay for all City staff time and materials, consistent with the full cost reimbursement agreement, required to complete the processing of an application in the event of an appeal.

[b] Development Agreement Review/Compliance Fee pertains to individual development agreements. Fee will be distributed to landowners on a pro-rata basis.

[c] Pre Application Meetings – The City will provide up to 2 meetings with staff to discuss the initial project review and City policies relative to the proposed project. Additional meetings and staff review prior to a formal application shall be billed on a time and material basis. The project proponent will be asked to submit the pre application deposit and a full cost reimbursement agreement. Staff will record all time against the deposit account. Balances remaining in the deposit account will be applied to the application deposit account or refunded within 60 days. Negative balances will be due in full along with the application deposit or fee at time of Entitlement Application submittal.

[d] Non-Residential - Per Building Code, this includes Commercial and Multi-family developments. Plan Check Fees to be assessed as part of Building Department Plan Check Fee. This fee shall be 15% of the building Plan Check Fee for New Non-Residential construction (Commercial and Multi-family). Fee to be collected with Building's Plan Check Fee.

[e] Parking In-Lieu Fee is an optional fee that non-residential uses in the Downtown Specific Plan Area can utilize instead of providing required parking on-site. Fees for the 1st stall will be 10% of the parking in-lieu fee, 2nd stall 25%, 3rd Stall 50%, 4th stall 75% and 5 or more stalls 100% of the in-lieu fee.

[f] In-Lieu Tree Mitigation Fee for the removal of protected trees is calculated per inch of the diameter at breast height of the tree.

Development Services Engineering and Encroachment Permit Fees

	Fee Description	FY 22-23 Fee	Initial Deposit	Fee Paid	Bond Amount [a]	Note	Y'rly In'fltr
1	Final Subdivision Map	Billed hourly based on total labor hrs	$2,500 plus $10 per lot	At submittal			Y
2	Final Parcel Map						
	a) base fee	$1,528		At submittal		[b]	Y
	b) per lot fee	$61		At submittal		[b]	Y
3	Lot Line Adjustment (per adjusted line)	$275		At submittal		[c]	Y
4	Improvement Plan Check/Inspection	Billed hourly based on total labor hrs $1,000 minimum	5% of Eng. cost est. 2.5% at submittal 2.5% at plan approval	2.5% at submittal 2.5% at plan approval	100% of improvements		Y
5	Grading Plan						
	a) Subdivision, Commercial, or Industrial Sites	Billed hourly based on total labor hrs $1,000 minimum	5% of Eng. cost est. 2.5% at submittal 2.5% at plan approval	2.5% at submittal 2.5% at plan approval	10% of erosion control and grading		Y
	b) All Other Sites						
	i) Up to 500 Cubic Yards	$367	$100 at submittal	$100 at submittal remainder due at permit issuance	10% of erosion control and grading		Y
	ii) Greater than 500 Cubic Yards	Billed hourly based on total labor hrs	$1,000 at submittal	$1,000 at submittal balance due prior to final signoff	10% of erosion control and grading		Y
6	Encroachment Permit:						
	a) Dumpster	$73		At submittal	$0		Y
	b) Sidewalk	5% of Project Cost $150 minimum		At submittal	$1,000 / contractor		N
	c) Driveway	5% of Project Cost $150 minimum		At submittal	$500/resident $1,000/c'ntrctr		N
	d) Lane Closure	$183		At submittal	$0		Y
	e) Swim Pool Access	$183		At submittal	TBD by Director		Y
	f) Monitoring Wells	5% of Project Cost $150 minimum		At submittal	$2,000 per well		N
	g) All Others	Billed hourly based on total labor hrs	5% of Eng. cost est. 2.5% at submittal 2.5% at plan appr'vl; $1,000 minimum	2.5% at submittal 2.5% at plan appr'vl	100% of improvements		Y
7	Technology Fee	3% of permit fee		At permit issuance			N

** Note regarding annual inflationary adjustment: The Initial deposit amounts will not be inflated annually, but the underlying hourly billing rates should inflate annually by the change in hourly labor rates and/or indirect cost rate multipliers.*

[a] Bond amounts paid at permit issuance.

[b] Final parcel map fee collected as base fee plus per lot fee.

[c] Lot line adjustment fee is fee for each adjusted line.

Trench Cut Recovery Fees

	Fee Description	FY 22-23 Permit Fee	FY 22-23 Trench Cut Fee	Cut Fee Unit	Note	Y'rly In'fltr
	Trench Cuts Requiring Pmt. of Admin. Permit Fee Only					
1	Street scheduled for resurfacing within next fiscal year	$367	$0.00			Y
2	Proposed excavation includes an overlay	$367	$0.00			Y
3	Proposed excavation for a CIP	$367	$0.00			Y
4	Street pavement quality index (PQI) 0-4	$367	$0.00			Y
	All Other Trench Cuts					
5	Longitudinal Cut					
	a) Cut within 3' of lane line					
	i) PQI: 4.1 - 6.5	$367	$15.84	per LF		Y
	ii) PQI: 6.6 - 8.4	$367	$21.12	per LF		Y
	iii) PQI: 8.5 or greater	$367	$26.40	per LF		Y
	b) Cut within one lane width					
	i) PQI: 4.1 - 6.5	$367	$11.88	per LF		Y
	ii) PQI: 6.6 - 8.4	$367	$15.84	per LF		Y
	iii) PQI: 8.5 or greater *(moratorium street)*	$367	$19.80	per LF	[a]	Y
6	Traverse Cut					
	i) PQI: 4.1 - 6.5	$367	$9.66	per LF		Y
	ii) PQI: 6.6 - 8.4	$367	$12.87	per LF		Y
	iii) PQI: 8.5 or greater *(moratorium street)*	$367	$16.08	per LF	[a]	Y
7	Cut is a Patch					
	i) PQI: 4.1 - 6.5	$367	$10.69	per LF		Y
	ii) PQI: 6.6 - 8.4	$367	$14.25	per LF		Y
	iii) PQI: 8.5 or greater *(moratorium street)*	$367	$17.82	per LF	[a]	Y

[a] Moratorium streets require director approval for trenching.

Building Fees

A. Construction Valuation Table - Table A is the construction valuation table adopted for the purpose of establishing permit fees as construction valuation is a factor in the cost of providing permitting services. These valuations correlate to the square footage costs of permitting, plan review, and inspection services based upon the hourly rate for building services identified in this fee schedule.

Table A - Construction Valuation

	Group	FY22/23 Valuation		Unit	Y'rly In'fltr
		A	B		
1	A-1 Assembly, theaters, with stage	$93.60	$46.80	per SF	N
2	A-1 Assembly, theaters, without stage	$93.60	$46.80	per SF	N
3	A-2 Assembly, nightclubs	$93.60	$46.80	per SF	N
4	A-2 Assembly, restaurants, bars, banquet halls	$111.80	$55.90	per SF	N
5	A-3 Assembly, churches	$93.60	$46.80	per SF	N
6	A-3 Assembly, general, community halls, libraries, museums	$88.40	$44.20	per SF	N
7	A-4 Assembly, arenas	$105.30	$52.65	per SF	N
8	B Business	$88.40	$44.20	per SF	N
9	E Educational	$94.90	$47.45	per SF	N
10	F-1 Factory and Industrial, moderate hazard	$49.40	$24.70	per SF	N
11	F-2 Factory and Industrial, low hazard	$49.40	$24.70	per SF	N
12	H-1 High Hazard, explosives	$49.40	$24.70	per SF	N
13	H-2,3,4 - High Hazard	$49.40	$24.70	per SF	N
14	H-5 - HPM	$79.30	$39.65	per SF	N
15	I-1 Institutional, supervised environment	$126.72	$63.36	per SF	N
16	I-2 Institutional, hospitals	$131.29	$65.65	per SF	N
17	I-2 Institutional, nursing homes	$249.09	$124.55	per SF	N
18	I-3 Institutional, restrained	$145.80	$72.90	per SF	N
19	I-4 Institutional, day care facilities	$126.72	$63.36	per SF	N
20	M Mercantile	$62.40	$31.20	per SF	N
21	R-1 Residential, hotels	$97.50	$48.75	per SF	N
22	R-2 Residential, multiple-family	$100.18	$50.09	per SF	N
23	R-3 Residential, one- and two-family	$110.00	$55.00	per SF	N
24	R-4 Residential, care/assisted living facilities	$106.60	$53.30	per SF	N
25	S-1 Storage, moderate hazard	$42.90	$21.45	per SF	N
26	S-2 Storage, low hazard	$41.60	$20.80	per SF	N
27	U Utility, miscellaneous	$32.50	$16.25	per SF	N

Building Fees

B. Determination of Construction Valuations - The building official shall determine construction valuations as follows:

1 **New Construction.** New construction shall be based upon the square footage of the proposed project multiplied by the amount stated in **Column A of Table A** corresponding to the occupancy group, as determined by the building official, for a total construction value.

2 **Improvements.** Improvements to existing buildings shall be based upon the square footage of the proposed improvements multiplied by the amount stated in **Column B of Table A** corresponding to the occupancy group, as determined by the building official, for a total construction value.

C. Commercial Building Valuations - Minimum commercial building valuations are stated below for the purposes of establishing minimum permit fees to cover the cost of service for the project listed. The higher valuation shall be assessed unless otherwise stated.

1 **Tenant Improvements Processed Over the Counter (OTC Permits).** Tenant Improvement OTC permits shall have a minimum valuation of $8,000.

2 **Tenant Improvements Requiring Plan Submittal.** Tenant Improvements (TIs) requiring plan submittal shall have a minimum valuation based upon Column B of Table A. For purposes of this section, a tenant improvement is defined as any improvement, maintenance or other updating on commercial property; improvement, maintenance or other updating on multi-family property; improvement, maintenance or other updating on residential care facilities and model home sales complexes, including sales trailers.

3 **Commercial Photovoltaic.** Commercial photovoltaic permits shall be based on a set valuation of $40,000.

4 **Electrical Service Upgrade.** Electrical service upgrade permit fees shall have a minimum valuation of $3,000.

5 **Commercial Reroofing.** Commercial reroofing permits shall have a minimum valuation of $423.17 per 100 square feet of roof area or a total minimum valuation of $20,000.

6 **OTC Permits for Commercial Projects.** OTC permits for commercial projects such as demolition, electrical, mechanical, plumbing and other work not otherwise defined shall have a minimum valuation of $3,000.

7 **OTC Permits for Commercial Projects.** OTC permits for commercial projects such as demolition, electrical, mechanical, plumbing and other work not otherwise defined shall have a minimum valuation of $3,000.

8 **Cell Towers - Change out of Antennas Only.** Cell towers requiring change-out of antennas only shall be considered a TI remodel with a minimum valuation of $3,000.

9 **Cell Towers - Major Remodel.** Cell towers undergoing a major remodel shall have a minimum valuation of $8,000.

10 **Shelves and Racking.** Permits for shelves and racking shall be considered a TI remodel. Construction valuation for fee setting purposes shall be the GREATER OF $8,000 OR the construction valuation calculated by multiplying the square footage by the amount stated in Column B of Table A for the U, Utility, Miscellaneous Occupancy Group.

11 **Stucco or Siding on Multi-Family.** For permits for stucco or siding on multi-family units, construction valuation for fee setting purposes shall be the GREATER OF $8,000 OR the construction valuation calculated by multiplying the linear footage of exterior home and garage x 1 SF (= remodel SF) by the amount stated in Column B of Table A for the R-2, Residential Multi-Family Occupancy Group.

12 **Stair Repair on Multi-Family.** For permits for stair repair on multi-family units, construction valuation for fee setting purposes shall be the GREATER OF $8,000 OR the construction valuation calculated by multiplying the square footage of the stair area(s) x number of floors of the building(s) by the amount stated in Column B of Table A for the R-2, Residential Multi-Family Occupancy Group.

13 **Pool Replaster and Repairs.** For permits for commercial pool replaster and/or repairs, the construction valuation for fee setting purposes shall be the GREATER OF $8,000 OR the construction valuation calculated by multiplying the pool square footage by the amount stated in Column B of Table A for the U, Utility, Miscellaneous Occupancy Group.

Building Fees

14 **Electronic Gates.** For permits for electronic gates, the construction valuation for fee setting purposes shall be the GREATER OF $8,000 OR the construction valuation calculated by multiplying the lineal footage of the gate and replacement fence x 1 SF (=SF) by the amount stated in Column A of Table A for the U, Utility, Miscellaneous Occupancy Group.

15 **Facade Remodel.** For permits for facade remodel, the construction valuation for fee setting purposes shall be the GREATER OF $8,000 OR the construction valuation calculated by multiplying the lineal footage of the facade x 1 SF (=SF) by the amount stated in Column B of Table A for the Occupancy Group listed on the certificate of occupancy.

16 **Spray Booth.** For permits for spray booth installation, the construction valuation for fee setting purposes shall be the GREATER OF $8,000 OR the construction valuation calculated by multiplying the square footage of the booth area by the amount stated in Column B of Table A for the F, Factory and Industrial Occupancy Group.

17 **Parking Lot Restriping: Site Work.** Permits for parking lot restriping shall have a minimum valuation of $8,000.

18 **ADA Upgrades.** Permits for ADA upgrades shall have a minimum valuation of $8,000.

19 **Barrier Removal.** Permits for barrier removal shall have a minimum valuation of $8,000.

20 **Crane install runways.** Permits for crane install runways shall have a minimum valuation of $8,000.

21 **Construction Trailer.** For permits for construction trailers hooking up to water/sewer and/or electric, the construction valuation for fee setting purposes shall be calculated by multiplying the trailer square footage by the amount stated in Column B of Table A for the B, Business Occupancy Group.

22 **Commercial Charging Station.** For permits for commercial charging stations, the construction valuation for fee setting purposes shall be based on the construction valuation provided by the applicant with a minimum valuation of $8,000.

23 **Emergency Generator to Cell Site.** Permits for emergency generators to cell sites shall have a minimum valuation of $8,000.

24 **Pumpkin Lot/Tree Lot.** Permits for pumpkin or tree lots shall have a minimum valuation of $8,000.

D. Residential Building Valuations - Minimum residential building valuations are stated below for the purposes of establishing minimum permit fees to cover the cost of service for the project listed. The higher valuation shall be assessed unless otherwise stated.

1 **Custom, Non-listed Patio Covers.** Custom, non-listed patio covers shall have minimum valuation based upon new construction valuation of Column A of Table A.

2 **Pre-Engineered, Listed Patio Covers.** Pre-engineered, listed patio covers shall have a set valuation of $3,000 for the purposes of establishing the building permit fee. The patio construction contract valuation shall be reported on the permit application if such amount exceeds $3,000.

3 **Swimming Pools.** Swimming pools shall have a set valuation of $25,000 for the purposes of establishing the building permit fee. The swimming pool construction contract valuation shall be reported on the permit application if such amount exceeds $25,000.

4 **Residential Remodel.** Residential remodel permits shall have a minimum valuation based upon Column B of Table A.

5 **Residential Additions.** Residential additions shall have a minimum valuation based upon Column A of Table A (new construction).

6 **Combination of Residential Remodel and Residential Addition.** With respect to a permit application for a combination residential remodel and residential addition subsection (D)(3) shall apply with respect to the residential remodel portion and subsection (D)(4) shall apply with respect to the residential addition (new construction) portion for a total construction valuation for the permit.

7 **Photovoltaic.** Photovoltaic permits shall be based upon a set valuation of $18,000 for the purposes of establishing the permit fee.

8 **Reroof.** Reroof permits for residential structures shall have a minimum valuation of $239.49 per 100 square feet of roof area or a total minimum valuation of $2,400.

Building Fees

9 **Plumbing OTC Permits.** OTC permits pertaining to plumbing shall have a minimum valuation of $900.

10 **Mechanical, Electrical, Car Charging Stations, Demolition and Other OTC Permits Not Specified in this Section.** OTC permits for mechanical, electrical, car charging stations, demolition, and other permits not specified in this section shall have a minimum valuation of $2,400.

11 **Stucco or Siding.** For permits for stucco or siding on residential units, construction valuation for fee setting purposes shall be the GREATER OF $2,400 OR the construction valuation calculated by multiplying the linear footage of exterior home and garage x 1 SF (= remodel SF) by the amount stated in Column B of Table A for the R-3, Residential, One- and Two-Family Occupancy Group.

12 **Fence or Retaining Wall.** For permits for residential fences or retaining walls, the construction valuation for fee setting purposes shall be the GREATER OF $2,400 OR the construction valuation calculated by multiplying the linear footage of fence or wall x 1 SF (= SF) by the amount stated in Column A of Table A for the U, Utility, Miscellaneous Occupancy Group.

13 **Windows.** Permits for residential windows shall have a minimum valuation of $2,400.

14 **Freestanding Fireplace.** Permits for a freestanding fireplace shall have a minimum valuation of $2,400.

15 **BBQ.** Permits for a barbeque (BBQ) shall have a minimum valuation of $2,400.

16 **Pool Replaster and Repairs.** For permits for residential pool replaster and/or repairs, the construction valuation for fee setting purposes shall be the GREATER OF $2,400 OR the construction valuation calculated by multiplying the pool square footage by the amount stated in Column B of Table A for the U, Utility, Miscellaneous Occupancy Group.

17 **Shed.** For permits for residential sheds, the construction valuation for fee setting purposes shall be the GREATER OF $2,400 OR the construction valuation calculated by multiplying the square footage of the shed (= SF) by the amount stated in Column A of Table A for the U, Utility, Miscellaneous Occupancy Group.

18 **Deck Repair.** For permits for deck repair, the construction valuation for fee setting purposes shall be the GREATER OF $2,400 OR the construction valuation calculated by multiplying the square footage of the deck area being repaired (= SF) by the amount stated in Column B of Table A for the U, Utility, Miscellaneous Occupancy Group.

19 **Fire Repair.** For permits for residential fire repair, the construction valuation for fee setting purposes shall be calculated in the same manner as a residential remodel.

Building Fees

E. Permit Fees - Subject to any applicable minimum permit fees stated elsewhere in this schedule, Table B and B.1, shall apply for the purpose of establishing minimum permit fees.

Table B - Permit Fees

Total Valuation	FY 22-23 Permit Fee					Y'rly In'fltr
$1 to $500	$61.10					Y
$501 to $1,000	$61.10	for the first $500	plus	$2.94	for each add'l $100 or fraction thereof, to and including $1,000	Y
$1,001 to $3,000	$75.82	for the first $1,000	plus	$3.24	for each add'l $100 or fraction thereof, to and including $3,000	Y
$3,001 to $25,000	$140.53	for the first $3,000	plus	$12.94	for each add'l $1,000 or fraction thereof, to and including $25,000	Y
$25,001 to $50,000	$425.23	for the first $25,000	plus	$10.59	for each add'l $1,000 or fraction thereof, to and including $50,000	Y
$50,001 to $100,000	$689.88	for the first $50,000	plus	$7.35	for each add'l $1,000 or fraction thereof, to and including $100,000	Y
$100,001 to $500,000	$1,057.39	for the first $100,000	plus	$5.88	for each add'l $1,000 or fraction thereof, to and including $500,000	Y
$500,001 to $1,000,000	$3,407.04	for the first $500,000	plus	$4.42	for each add'l $1,000 or fraction thereof, to and including $1,000,000	Y
$1,000,001 and up	$5,616.14	for the first $1,000,000	plus	$2.35	for each additional $1,000 or fraction thereof	Y

Production Home Permit Fees - Building permits for production homes (those homes that are one and two family homes having an approved master plan, which is a complete set of building plans from which multiple homes may be constructed) shall have a minimum permit fee as calculated in Table B.1.

Table B.1 - Production Home Permit Fees

Total Valuation	FY 22-23 Permit Fee					Y'rly In'fltr
$0 to $120,000	$1,445.77					Y
$120,001 and up	$1,445.77	for the first $120,000	plus	$9.78	for each add'l $11,000 or fraction thereof	Y

Building Fees

F. Administration Fee - In addition to the permit fee, an administration fee is established for the city to recover the cost of permit application processing, permit issuance, and plan review and shall be applied as follows:

	Fee Description	FY 22-23 Fee	Y'rly In'fltr
1	Permits Requiring Plan Submittal for Review	95% of the Building Permit Fee	N
2	Over the Counter Permits Requiring Minimal or No Plan Review	25% of the Hourly Rate or Actual Cost (for time in excess of 1/2 hour)	N
3	Tenant Improvement Environmental Utilities Review		
	a) Same Use[1]	$376	Y
	b) Change of Use[2]	$1,026	Y
4	Production Home Permits	37% of the Building Permit Fee	N
5	Plans Submitted for the Purposes of Being Mastered	95% of the Building Permit Fee (based on SF valuation of proposed design)	N
6	Emergency Water Heater Repair	Exempt From the Admin Fee (allocated one inspection visit. If add'l visits are required re-inspection fees apply for add'l visits)	N

Determination of Tenant Improvement (TI) Environmental Utilities Review Fee:

[1]"Same Use" fee applies to any tenant improvement that requires review (by applicable statute) by the Placer County Department of Environmental Health (typical uses include restaurants, hair salons, and medical/dental offices), or tenant improvements that result in changes to equipment such as (but not limited to) triple compartment sinks, sewer lines within kitchen and maintenance areas, grease waste capturing equipment and tanks, water services including fire, domestic and irrigation, and exterior trash enclosures, etc. The fee does not apply to tenant improvements that do not involve new or modifications to existing plumbing. Examples of tenant improvements where the same use fee would not apply include: addition of new fixtures (sinks, toilets, etc) where no modification to plumbing is proposed, and addition or relocation of interior walls where no new or modification to existing plumbing is proposed. The fee shall also not apply to minor tenant improvements charged the minimum building permit fee based on project valuation.

[2] "Change of Use" fee applies to tenant improvements that result in a change from one use to another, such as (but not limited to) office/retail to restaurant, or office/retail to dental/medical office. The change in use fee also applies to plan review of modifications to commercial landscaping for compliance with water efficient landscape requirements.

Building Fees

G. Additional Time and Materials Fees and Refunds and Appeals - Building permits are subject to additional time and material fees where the cost of service provided by city exceeds the amount collected at application. Such fees shall be calculated as follows:

	Fee Description	FY 22-23 Fee	Unit	Note	Y'rly In'fltr
1	Additional Services (1/2 hour minimum)	$190	per hour	[a]	Y
2	Re-inspections (per scheduled stop)	$111	per stop	[b]	Y
3	Inspections Outside of Normal Business Hours	$190	per hour	[c]	Y
4	Work Commenced without a Permit	$190	minimum	[d]	Y
5	Certificate of Occupancy (1 hour minimum)	$190	per hour	[e]	Y
6	Permit Extension or Reinstatement of an Expired Permit	$190	per hour	[f]	Y
7	Third Party Plan Review (fee is in addition to City Administration Fee in Section F)	pass through of consultant fee		[g]	N
8	Fees for Services Not Listed in this Schedule	Actual Cost		[h]	N
9	Refunds and Appeals				
	a) Fees erroneously paid by applicant or collected or charged by the agency	100% refund		[i][l]	N
	b) When no work has been commenced	up to 75% refund		[j][l]	N
	c) Expired permit applications and permits	0% refund		[k][l]	N

[a] Additional Services (e.g. administrative and plan review) Fees shall be assessed at time of permit issuance and/or prior to final inspection at application. Additional service is defined as follows:

1. Plan Reviews in excess of three (3) submittals to city for review and approval.
2. Plan Review by city departments other than the development services department for projects affecting other City services and not covered by any fees set forth in this section.
3. Other staff time and resources for the purposes of facilitating and approving permit applications and permits.
4. Expedited plan review, when available, and additional resources required to facilitate the expedited plan review process, including consultants and/or other city departments and divisions whose assistance is required for plan approval.

[b] Re-inspections may be assessed based on any of the following:

1. Inspections which are not ready at the time of the scheduled inspection, as determined by a city inspector.
2. Failure by applicant to complete inspection items from previous correction notices.
3. Inspections additional to the inspection with respect to emergency water heater permits.

[c] Inspections outside of normal business hours will be subject to a 2-hour minimum for evening work and a 4-hour minimum for weekend work.

[d] Whenever any work for which a permit is required has been commenced without first applying for a building permit and receiving permission by the building official, a minimum fee for investigation and administration shall be assessed in addition to the full cost of any required permits.

[e] The fee for a certificate of occupancy shall be a minimum of one hour, and any additional costs beyond one hour of staff time to approve such certificates.

Building Fees

[f] Permit applications and permits shall expire per the provisions of the California Building Code. Reinstatement and extensions may be granted provided that all costs incurred by the city to date of the request are paid for by the permit applicant. For this purpose, cost is defined as the hours expended for review and administration multiplied by the hourly rate.

[g] Third party plan review, when available, shall be assessed and paid at time of permit application. The fee for this service is the hourly or flat rate charged by the consulting firm performing the review. This fee is in addition to the permit Administration Fees identified in "Section F" of this fee schedule for the additional resources required to facilitate the process.

[h] Fees for services not otherwise listed in this schedule shall be determined by the building official and based upon the actual cost of providing the service.

[i] The building official may authorize refunding of any fee paid, or portion thereof, which was erroneously paid by applicant or collected by city.

[j] The building official may authorize refunding of not more than seventy-five percent (75%) of fees paid when no work has been done under a permit application or an issued permit in accordance with the adopted California Code of Regulations. In no case shall the refund exceed the cost of services provided to date of cancellation of permit issuance.

[k] Permit applications and building permits that have expired as defined in the California Building Code shall not be subject to any refund.

[l] A building permit applicant may, upon payment of the requested permit fees to city and otherwise complying with California Government Code Section 66022, protest the requested amount to the city council by lodging an appeal with the building official. City staff shall schedule the appeal to be heard by the city council as soon as reasonably practicable.

Building Fees

H. Technology Fee, General Plan Maintenance Fee, Strong Motion Impact Fee, SB 1473 Fee

	Fee Description	FY 22-23 Fee	Note	Y'rly In'fltr
1	Technology Fee (applicable to building permits, fire permits, improvement plan, and entitlement fees)	3%	[a]	N
2	General Plan Update Fee	$0.50 per $1,000 valuation, not to exceed $20,000		N
3	Strong Motion Impact (SMI) Fee Calculation			
	a) Residential	$0.50 or valuation x .00013	[b]	N
	b) Commercial	$0.50 or valuation x .00028	[b]	N
4	Building Standards Administration Special Revolving Fund (SB 1473) Fee Calculation			
	Valuation:			
	a) $1 - $25,000	$1	[b]	N
	b) $25,001 - $50,000	$2	[b]	N
	c) $50,001 - $75,000	$3	[b]	N
	d) $75,001 - $100,000	$4	[b]	N
	e) Every $25,000 or fraction thereof above $100,000	Add $1	[b]	N
5	"SCIP" Administrative Fee			
	a) Per Single Family Dwelling Permit	$515	[c]	Y - See Note
	b) Per Non-Residential Building Permit	$1,441	[c]	Y - See Note

[a] "Building permit" means the permit issued or required by the city for the construction or modification of any structure pursuant to and as defined by the building code. "Fire permit" means the permit issued or required by the city for the construction or ongoing operations of a structure or business pursuant to and as defined by the fire code. "Improvement plan" means the permit issued or required by the city for the construction of any public or private site improvements as defined by the city's improvement and construction standards. "Entitlement" means those approvals provided under Title 19, Zoning.

[b] Fee set by State.

[c] In accordance with Resolution No. 19-92, the Statewide Community Infrastructure Program "SCIP" Administrative Fee shall increase annually by 2% or the change in the consumer price index from October to October.

Building Fees

I. Findings Regarding Permit Fees for Residential Rooftop Solar Energy Systems - Pursuant to Section 66015 of the California Government Code (Fees for Rooftop Solar Energy Systems), the city council finds that the reasonable cost to issue a permit for a residential rooftop solar energy system exceeds $450 plus $15 per kilowatt (kW) for each kW above 15 because issuance of the permit requires all of the following:

1. One-half (1/2) hour administration time for application and data input
2. 1/2 hour administration time for permit issuance and one hour plan review time including up to two (2) submittals
3. Typically 2 inspections at a minimum of 1/2 hour of staff time
4. Other applicable fees assessed by the State of California and by the Roseville Electric Department pursuant to the Roseville Electric Solar Energy Program Meter Upgrade Charges, as amended from time to time

This higher fee results in a quick and streamlined approval process.

Development Impact Fee Deferral and SCIP Fees

	Fee Description	FY 22-23 Fee	Unit	Note	Y'rly In'fltr
1	Development Impact Fee Deferral				
	a) Residential	$312	per deferral		Y
	b) Non-Residential				
	i) Administrative Fee	$873	per deferral		Y
	ii) Interest Charge on Deferred Fees	equal to unearned interest based on City's 10-yr avg pooled interest rate	per deferral	[a]	N

[a] Fee deferral will result in a loss of interest income on monies deferred over the construction timeframe. The interest charge is intended to cover these costs.

City of Roseville
Schedule of User and Regulatory Fees

Housing Fees

	Fee Description	FY 22-23 Fee	Unit	Note	Y'rly In'fltr
1	Reconveyance Fee	$359	per occurrence		Y
2	Subordination Fee	$417	per occurrence		Y

Electric Fees

	Fee Description	FY 22-23 Fee	Unit	Note	Y'rly In'fltr
	Solar Energy Program - Meter Upgrade Charges				
1	Residential PV Net-Meter	$856.54			N
2	Business PV Net-Meter (<10kW system size)	$2,028.76			N
3	Business PV Net & PBI Meter (10-100kW system size, up to 200amp PBI panel)	$2,756.27		[a]	N
4	Business PV Net & PBI Meter (10-100kW system size, >200amp PBI panel)	$4,535.68		[a]	N
5	Variance Review Request	$211.40	per hour		N
6	Plan Reviews or Field Meets Exceeding the Initial and Subsequent Submittal Limit	$211.40	per hour	[b]	N
	Other Service Fees				
7	Pedestal Meter Fee	$584.35			N
8	Temporary Power Meter Set				
	a) Temp Power Meter Set Fee - Residential	$584.35			N
	b) Temp Power Meter Set Fee - Commercial	Actual Cost			N
9	Extension of Facilities	Actual Cost			N
10	Svc Connections and Facilities on Customer's Premises	Actual Cost			N
11	Meter Test				
	a) Test - More than six-months since prior test	$0.00			N
	b) Test - Within six-months of meter install or prior test	Actual Cost			N
12	Overhead-to-Underground Conversion of Overhead Utilities	Actual Cost			N
13	Small Cell Plan Check Fee	$782.12			N
14	Technology Fee	3%			N

** Note regarding annual inflationary adjustment: For items billed at actual cost or items billed at average labor and material rates, the underlying hourly billing rates should inflate annually by the change in hourly labor rates and/or indirect cost rate multipliers.*

* All meter upgrade costs must be paid prior to receiving interconnection approval to operate the PV system.

[a] Customer is required to supply a dedicated working phone line and monitoring for the duration of the PBI payment term. See the construction standards for phone line requirements.

[b] The initial and first resubmittal plan review and the initial and first resubmittal field inspections are included in the basic Meter Upgrade Charge.

31	Water Continuity Testing	Actual Cost		Y
32	Spark Testing	Actual Cost		Y
33	Mapping	Actual Cost		Y
34	Standby	Actual Cost		Y
35	Disposal of Chlorinated or Contaminated Water	Actual Cost		Y
36	Tee Installation	Actual Cost		Y
37	401 Transition Pipe	Actual Cost		Y
38	Pipe Coating	Actual Cost		Y

** Note regarding annual inflationary adjustment: For items billed at actual cost, the underlying hourly billing rates should inflate annually by the change in hourly labor rates and/or indirect cost rate multipliers.*

[a] Installation, repair, or replacement of a backflow prevention assembly shall be performed by a licensed contractor, or with customer approval, by City personnel. The cost to the City for materials and labor at the prevailing wage shall be paid by the owner
[b] Reinspection fee is the fee required to be paid upon finding by an inspector that the backflow prevention assembly is defective or not in compliance backflow prevention assembly standards.
[c] Fee is 50% refundable if denied.

Fire & Life Safety Fees

	Fee Description	FY 22-23 Fee	Unit	Note	Y'rly In'fltr
	Permits to Operate (Type of Permit Activity)				
1	Amusement Building	$356			Y
2	Carnivals and Fairs	$356			Y
3	Combustible Dust Operations	$356			Y
4	Covered Mall Buildings	$356			Y
5	Exhibits and Trade Shows	$356			Y
6	Explosives or Blasting Agents	$890			Y
7	Mobile Fueling	$356			Y
8	Recreational or Bon Fire	$180			Y
9	Theatrical Fire Performance	$356			Y
10	High Pile Storage	$356			Y
11	Hot Work Operations	$356			Y
12	Industrial Ovens	$356			Y
13	Lumber Yards	$356			Y
14	Misc. Combustible Storage	$356			Y
15	Places of Assembly				
	a) Less than 300 occupant load	$356			Y
	b) 300 - 999 occupant load	$534			Y
	c) 1,000 or more occupant load	$710			Y
16	Commercial Day Care Facility				
	a) 7 - 49 persons	$356			Y
	b) 50 - 149 persons	$534			Y
	c) 150 or more persons	$710			Y
17	Institutional				
	a) Less than 6 patients	$356			Y
	b) 6 or more patients	$534			Y
	c) Detention facilities	$710			Y
18	Apartments/Hotels/Motels				
	a) 3 - 16 units	$270			Y
	b) 17 - 32 units	$356			Y
	c) 33 or more units	$534			Y
19	Large Family Day Care				
	a) Pre-inspection (at hourly rate)	$180	per hour		Y
20	850 Inspections				
	a) 850 Inspection (at hourly rate)	$180	per hour		Y
21	Residential Care Facilities				
	a) 7 or more residents	$534			Y
	b) Pre-inspection (at hourly rate)	$180	per hour		Y
22	Temporary Membrane Structures (Tents/Canopies)				
	a) 401 - 1,499 SF	$270			Y
	b) 1,500 - 2,999 SF	$356			Y
	c) 3,000 - 5,999 SF	$534			Y
	d) 6,000 or more SF	$710			Y

91	Fire Extinguisher Training	$534			Y
92	Late Payment Penalty for Permits				
	a) 30 days past due	$50			N
	b) 60 days past due	$100			N
	c) 90 days past due	$200			N

[a] Third party plan review, when available, shall be assessed and paid at time of permit application. The fee for this service is the hourly or flat rate charged by the consulting firm performing the review. This fee is in addition to the permit Administration Fees identified in the "Plan Review (Including Inspection Service) Plan Review Conducted by City Approved Consultant" of this fee schedule for the additional resources required to facilitate the process.
[b] Fee includes Hazardous Waste Generator < 55 gal.

General Information
* All fees or charges shall be calculated at one (1) hour minimum unless otherwise specified.
* All fees for specified services shall be calculated by the Fire Department.
* When required, no permit or approval shall be issued until facility or process is brought into compliance with applicable codes and the required service fee is paid in full.
* When a requester fails to cancel a requested inspection prior to the scheduled time of inspection, the standard inspection fee shall be charged, with a one hour minimum fee.

Emergency Medical Services First Responder Fee

22	Supplemental Law Enforcement Services				
	a) Hourly Rates for Police Dept Personnel				
	i) Community Service Officers	$50	per hour		Y
	ii) Police Officers	$86	per hour		Y
	iii) Sergeants	$104	per hour		Y
	iv) Dispatchers	$67	per hour		Y
	b) Hourly Rates for Marked Vehicles				
	i) Base Rate	$25	per hour		N
	ii) Per mile rate, for each mile over 50	$0.585	per mile	[e]	N
23	Concealed Weapon License	n/a - issued by Placer County Sheriff		[f]	N

** Note regarding annual inflationary adjustment: For items billed at actual cost, the underlying hourly billing rates should inflate annually by the change in hourly labor rates and/or indirect cost rate multipliers.*

[a] Fines are determined by the combined number of both burglary and duress/robbery false alarms. Reimbursement may be waived by the police chief where uncommon circumstances not considered an emergency resulted in false alarm and where the permittee has undertaken to correct alarm system deficiencies.

[b] This fee shall be collected only from the registered owner or agent of the registered owner. This fee shall not apply to vehicles impounded as the result of automobile accidents, abatement program, or lien sale, unless the sale is sufficient in amount to pay the lienholder's total charges and administrative costs.

[c] This fee is not established by the City of Roseville. It may be collected on behalf of, or directly by, a third party (e.g. vendor; other public agency). The fee schedule is intended to mirror amounts adopted by third parties. If the amount charged by a third party changes, the amounts collected by the City on behalf of the third party are presumed to change simultaneously. Amounts shown in the fee schedule will be updated as soon as practicable after the City receives notice of the fee change.

[d] Fee amounts shown are for non-state certified massage therapist applications. There is no fee for State-certified massage therapists/practitioners registering to provide massage services or activities within the City of Roseville.

[e] Set to match IRS standard mileage rates.

[f] Any Roseville resident wishing to apply for a license to carry a concealed weapon shall be directed to the Placer County Sheriff's Office for permit application and the permit process.

Animal Licensing and Permit Fees

	Fee Description	FY 22-23 Fee	Unit	Note	Y'rly In'fltr
1	Animal License (Dog or Cat)				
	a) 1 Year				
	i) Certified altered animal	$24	each		Y
	ii) Non-altered animal	$48	each		Y
	iii) Senior Discount	$5 off standard fee	each		N
	b) 2 Years				
	i) Certified altered animal	$47	each		Y
	ii) Non-altered animal	$95	each		Y
	iii) Senior Discount	$10 off standard fee	each		N
	c) 3 Years				
	i) Certified altered animal	$70	each		Y
	ii) Non-altered animal	$142	each		Y
	iii) Senior Discount	$15 off standard fee	each		N
	d) Transfer of active license from other jurisdiction	$0	each		Y
2	Delinquent Penalty for Failure to Renew License within 15 days of Expiration				
	a) Altered dog	$5	flat fee		N
	b) Unaltered dog	$10	flat fee		N
3	Lost License or Tag	$5	flat fee		N
4	Rabies Test	Pass-through of actual cost	flat fee		N
5	Kennel License				
	a) Initial	$127	each		Y
	b) Renewal	$63	each		Y
6	Special Animal Permit				
	a) Initial	$63	each		Y
	b) Renewal	$63	each		Y
7	Voluntary Disposal Fee				
	a) Dogs and Other Animals Commonly Considered Pets	$42	per animal/litter		Y
	b) Wild Animals	$42	per animal		Y
8	Appeal of Decision to Destroy Vicious Animal	$100	flat fee		N

* Per RMC 7.16.070, license fees are waived for: service dog owned by a person with a need for assistance; dog used by any law enforcement personnel; dog owned by any government entity or political subdivision

Oversize Vehicle Permit Fees and Building Moving Permit Fees

	Fee Description	FY 22-23 Fee	Unit	Note	Y'rly In'fltr
1	Oversize Vehicle Permit				
	a) Single trip permit	$16	per vehicle	[a]	N
	b) Annual permit	$90	per vehicle	[a]	N
2	Building Moving Permit				
	a) Base Fee	$30	per request		Y
	b) Costs of plan review, utility and street light moving, tree trimming, traffic directing, etc.	actual costs	per request		Y

** Note regarding annual inflationary adjustment: For items billed at actual cost, the underlying hourly billing rates should inflate annually by the change in hourly labor rates and/or indirect cost rate multipliers.*

[a] Oversize vehicle permit fees set to match fees adopted by California Department of Transportation (CalTrans).

Parking Permit Fees

	Fee Description	FY 22-23 Fee	Unit	Note	Y'rly In'fltr
1	Residential Parking Permit	$0	per vehicle		N
2	Merchant Parking Permit				
	a) January 1st through December 31st	$20	per vehicle		N
	b) July 1st through December 31st	$10	per vehicle		N

* Permit is valid only for the calendar year issued. A merchant parking permit is issued to a specific vehicle and is not transferable. A valid merchant parking permit decal must be appropriately displayed on the left rear bumper or left rear window of the permittee's vehicle.

Special Event, Film, and Banner Permit Fees

	Fee Description	FY 22-23 Fee	Unit	Note	Y'rly In'fltr
1	Special Event Permit				
	a) Application Fee				
	i) Event that requires limited site/plan review, no closures, etc. (i.e. park rentals/activities, misc. events, etc.)	$160	per event	[a]	Y
	ii) Event that requires, but not limited to, street/parking lot closures, site/plan review, trail use, etc. (i.e. fun runs, festivals, parking garage, etc.)	$300	per event	[a]	Y
	b) Service Charges	actual costs			Y
	c) Park/facility rental fee	varies by location	per event		N
2	Photography and Filming Permit				
	a) Application Fee				
	i) Cast and Crew Totaling One to Three Persons	$160	per permit	[a],[b]	Y
	ii) Cast and Crew Totaling Four or More Persons; or with Street Closure	$300	per permit	[a],[b]	Y
	b) Service Charges	actual costs			Y
3	Banner Permit	$70			Y

[a] Application fees are non-refundable.

[b] Non-commercial photography and photography/film not requiring exclusivity does not need a permit. The Department Director may waive fees for bona fide student film/photography projects and non-profit projects. The permitting process for filming/photography is still applicable for these projects (i.e. permit is required). Service charges are still applicable.

** Note regarding annual inflationary adjustment: For items billed at actual cost, the underlying hourly billing rates should inflate annually by the change in hourly labor rates and/or indirect cost rate multipliers.*

Parks, Recreation, & Libraries Department Fees

	Fee Description	FY 22-23 Fee	Unit	Note	Y'rly In'fltr
1	Parks, Recreation, & Libraries Department Program, Class, Facility Use, and Service Fees	See Note		[a]	N
2	Capital Replacement Fee	Not to exceed 10% of program fee	per registration		N

[a] See Department for Recreation Guide and Programs, Events, and Classes information, Facility Use, and Service Fees. Information is updated seasonally. Fees are approved by the Department Director. Fees are established and updated using the Departmental Pricing Policy.

City of Roseville
User and Regulatory Fee Study

Table of Contents

Executive Summary 1
Legislative Guidance 5
Study Methodology and Data Sources 6
Appendices 8
- Appendix A – Summary of Current and Proposed Fees
- Appendix B – Fee-Related Cost of Service Analysis
- Appendix C – Parks, Recreation, & Libraries Department Pricing Policy

Executive Summary

The purpose of this study is to identify the City's current cost of providing fee-related services and activities and to update the City's Schedule of User and Regulatory Fees (fee schedule). Any fee updates adopted as part of this study are intended for use during Fiscal Year 2022-23. Recovering the costs of providing fee-related services directly influences the City's goal of maintaining fiscal stability while continuing to provide high-quality essential services.

The fee schedule is intended to be reviewed annually, with staff conducting biannual studies to identify the city's cost of providing fee-related services based on current labor rates and service delivery methods. In the interim year, fees are authorized to be adjusted based on the CPI change from October to October of the immediately preceding year.

Annual review and adjustment of fees provides multiple benefits, including:

- Increasing the availability of General Fund revenues to be used for services and activities available to all Roseville residents and businesses, such as public safety services.
- Keeping pace with general cost inflation.
- Avoiding fee spikes that are more likely to occur when municipalities leave fees unchanged for a multiyear period.
- Providing fee payers, city staff, and city policymakers with a pattern of consistency that provides information for forecasting and decision-making purposes.
- Encouraging generational equity among fee payers by avoiding long-term stagnation of fees followed by significant fee increases.

Fee Categories that Were Examined in this Study Include

This study specifically examined the following categories of fees:

- **Planning Fees**, such as entitlement review and review for compliance with the zoning code
- **Engineering Fees**, such as encroachment and public improvement review
- **Building Fees**, such as permitting of new construction or modifications to existing structures
- **Utility Fees**, such as requests for new water or electric meters
- **Police Fees**, such as vehicle impound and animal licensing fees
- **Fire Fees**, such as annual inspections conducted to ensure compliance with the fire code
- **Recreation Fees**, such as swimming and other sports program related fees
- **Facility Rental Fees**, such as requests for rental of meetings spaces, or picnic shelters

Fee/Fine Categories that Were Not Examined in this Study

This study specifically excluded examination of the following:

- **Assessments**
- **Development Impact Fees**
- **Fines or Penalties**
- **Franchise Fees**
- **Taxes**
- **Utility Rates and Services Charges**

These items are subject to different approval thresholds or are not subject to the same cost of service limitations as the fees examined as part of this study. Consequently, they are specifically excluded from the scope of this study.

Primary Recommendations for City Council Consideration

The following provides a summary of primary changes the City Council is being asked to consider based on this study.

Table 1 – Summary of Changes to Fees Examined

Description	Count	Percentage	Note
Fees Proposed to Remain Unchanged	179	41%	[a]
Fees Proposed to Increase by 5% or Less	245	57%	
Fees Proposed to Increase by More than 5%	6	1%	
New Fees Proposed	3	1%	
Total Fees Examined	433	100%	

* Amounts in the percentage column are rounded for illustrative purposes.

[a] For this table, fees include fee multipliers that City staff may use to aid in the calculation of fees. Modification of fee multipliers directly influences total fees, consequently they are included in this table.

No new development fees are proposed.

Fees Proposed to Remain Unchanged or Increase by 5% or Less

Ninety-eight percent (98%) of user and regulatory fees are proposed to remain unchanged or increase by five percent or less (5%). Any modifications to fees are simply meant to avoid degradation of existing cost recovery levels per hour of City service provided.

Fees Proposed to Increase by More than Five Percent (5%)

There are six fees proposed to increase by more than 5%. The fees are listed below

Electric Fees

1) Residential PV Net-Meter:
    - Current fee: $782; Proposed fee: $857 (100% recovery)
2) Business PV Net-Meter (<10kW system size)
    - Current fee: $1,659; Proposed fee: $2,029 (100% recovery)
3) Pedestal Meter Fee
    - Current fee: $332; Proposed fee: $584 (100% recovery)
4) Temp Power Meter Set - Residential
    - Current fee: $270; Proposed fee: $584 (100% recovery)

Photography & Filming Permits and Special Event Application Fees

Staff is working to increase cost recovery for these services. The cost recovery increases will be phased-in over a multi-year period. Fees for FY 22/23 are proposed to increase by $25.

5) Photography & Filming Permit Application Fee
    - For cast and crew up to three persons:
        - Current fee $135; Proposed fee $160 (75% cost recovery)
    - For cast and crew of four or more persons, or with street closures:
        - Current fee $275; Proposed fee $300 (25% cost recovery)

    Note: Non-commercial photography and photography/film not requiring exclusivity does not need a permit. The Department Director may waive fees for bona fide student film/photography projects and non-profit projects.
6) Special Event Permit Application Fee
    - Event requiring limited site plan review, no street closures, etc.:
        - Current fee $135; Proposed fee $160 (37% cost recovery)
    - Event that requires, but not limited to, street/parking lot closures, site/plan review, trail use, etc. (i.e. fun runs, festivals, parking garage, etc.):
        - Current fee $275; Proposed fee $300 (17% cost recovery)

New Fee Proposed

Three new fees are proposed.

1) Police Department Citation Sign-Off Fee (Only Applies to Sign-offs for non-Roseville issued citations)
    - The proposed fee is $10. Similar fees are collected by neighboring agencies. Adding a minor fee for service will help offset costs of Roseville staff to sign-off on non-Roseville issued citations. Roseville Police Department will continue to review and sign-off for Roseville issued citations free of charge for Roseville residents.
2) Change of Address Fee
    - The proposed fee is $460. The proposed fee targets full cost recovery. The fee applies to discretionary actions processed subsequent to initial development. The service is currently provided without a corresponding fee to offset the costs of service.
3) Street Name Change Fee
    - The proposed fee is $828. The proposed fee targets full cost recovery. The fee applies to discretionary actions processed subsequent to initial development. The service is currently provided without a corresponding fee to offset the costs of service.

Revenue Impact of Proposed Fee Changes

The anticipated revenue impact of the proposed changes included in the fee schedule update is $469,000. This change assumes approximately 5% increase in revenue from the fees included in the City's fee schedule and expenditure offsets related to deposit-based billings.

It is important to note that while adjusting fees and billing rates will provide a fiscal impact in the form of additional revenue, the revenue is not intended to be used to fund new services, rather the revenue is intended to offset the costs of providing existing services that are recoverable from fees. Consequently, while fees may rise annually, typically labor costs (the primary driver of fee-related costs) also rise annually. Recalibration of these fees simply provides an offset of existing expenditures/needs rather than a source of funding for expanded service levels.

Legislative Guidance

The objectives of the study, the methodology used to complete the study, and the proposed fees were significantly influenced by Article 13C of the California Constitution and Section 66014 of the California Government Code.

Article 13C states that the local government bears the burden of proving by a preponderance of the evidence that a levy, charge, or other exaction is not a tax, that the amount is no more than necessary to cover the reasonable costs of the governmental activity, and that the manner in which those costs are allocated to a payor bear a fair or reasonable relationship to the payor's burdens on, or benefits received from, the governmental activity. Additionally, Article 13C identifies the following as items that are *not* defined as taxes:

1) A charge imposed for a specific benefit conferred or privilege granted directly to the payor that is not provided to those not charged, and which does not exceed the reasonable costs to the local government of conferring the benefit or granting the privilege.
2) A charge imposed for a specific government service or product provided directly to the payor that is not provided to those not charged, and which does not exceed the reasonable costs to the local government of providing the service or product.
3) A charge imposed for the reasonable regulatory costs to a local government for issuing licenses and permits, performing investigations, inspections, and audits, enforcing agricultural marketing orders, and the administrative enforcement and adjudication thereof.
4) A charge imposed for entrance to or use of local government property, or the purchase, rental, or lease of local government property.
5) A fine, penalty, or other monetary charge imposed by the judicial branch of government or a local government, as a result of a violation of law.
6) A charge imposed as a condition of property development.
7) Assessments and property-related fees imposed in accordance with the provisions of Article XIII D.

Section 66014(a) of the California Government Code includes the following, "Notwithstanding any other provision of law, when a local agency charges fees for zoning variances; zoning changes; use permits; building inspections; building permits; …the processing of maps under the provisions of the Subdivision Map Act…; or planning services…; those fees may not exceed the estimated reasonable cost of providing the service for which the fee is charged, unless a question regarding the amount of the fee charged in excess of the estimated reasonable cost of providing the services or materials is submitted to, and approved by, a popular vote of two-thirds of those electors voting on the issue.

Study Methodology and Data Sources

The study calculated the estimated reasonable cost of providing fee-related services and activities (services). The majority of these services are commonly identified as development review services. Broad categories of development review services include, project entitlement review, review of requests for land dedications, parcel mergers, lot line adjustments, encroachment in the public right-of-way, and building permitting, plan review, and inspection services. Additionally, the City collects fees for recreation programs, administrative services, vehicle impound release, etc.

Generally, the estimated reasonable cost of providing the fee-related services and activities examined in the study can be calculated as the product of the estimated labor time required to process a typical request for service and the composite fully-burdened hourly labor rate of the division responsible for providing services. The estimated reasonable cost of service also includes costs or fees imposed by outside agencies or contract service providers used by the City to provide the requested services.

A combination of sources was used to complete the analysis and develop the findings and recommendations of this study. The data sources included, but were not limited to:

- Adopted revenue and expenditures budgets and personnel salary and benefit information.
- Historical project volume and revenues from fees.
- Current schedule of fees for each department.
- Citywide cost allocation plan.
- Interviews with City staff.

The following page provides a summary of the steps utilized to complete this study.

Summary of methodology used to calculate estimated costs of service and cost recovery levels

Step One

Identify annual hours spent providing fee services for each division → This information is developed and tested using a combination of interviews, questionnaires, historical project information, and historical revenue information.

Step Two

Identify annual cost of providing fee services for each division → This information is developed and tested using a combination of information found in the City's adopted budget, expenditure history, and the overhead cost plan.

Step Three

Calculate the estimated hourly rate using information from Steps 1 and 2 → ***Annual cost ÷ Annual hours = Hourly rate***

Step Four

Estimate labor time required to process individual request for service → This information is developed and tested using a combination of interviews, questionnaires, commonly-used measures, and information developed in Step 1.

Step Five

Calculate estimated cost of service using information from Steps 3 and 4 → ***Hourly rate * Labor hours = Cost of service***

Step Six

Calculate current cost recovery level for a specific service → ***Current fee ÷ Cost of service = Current Cost recovery***

Step Seven

Use laws, industry standards, goals and policies, and historical trends to determine targeted cost recovery → ***Proposed fee ÷ Cost of service = Targeted Cost Recovery***

Step Eight

Test to confirm forecast revenue from fees will not exceed program costs → Use historical permit volume and proposed fees to forecast anticipated revenue from fees. Forecast revenues should not exceed program costs.

Appendices

The appendices provide detailed analytical findings from the study, including the amount of cost, or estimated cost, required to provide the services for which the fee or service charge is levied and the revenue sources anticipated to provide the service, including General Fund revenues. For any fees targeted to recover less than 100% of the estimated reasonable cost of service, it is anticipated that General Fund revenues of the City will fund the difference between the targeted recovery level and 100% recovery of the estimated cost of service unless the fee-related services are provided by Enterprise Funds (e.g. Electric fees and Environmental Utilities fees). These amounts are identified in the appendices.

Appendix A – Summary of Current and Proposed Fees

Planning (Entitlement) Fees

Fee Description	FY 21-22 Fixed Fee	FY 21-22 Deposit	FY 22-23 Fixed Fee	FY 22-23 Deposit	Note	Y'rly In'fltr
Full Cost Deposits and Deposit Replenishment						

Applicants for Full Cost Entitlement Applications shall pay for all City staff time required to process the application. A full cost reimbursement agreement shall be included with the project application submittal package. Projects outside the scope of this fee schedule (as determined by the Development Services Director) will be subject to a full cost reimbursement agreement to be approved by the City Council. This reimbursement agreement will include the identification of a work program and will include cost estimates for both City staff time and consultant services based on a defined scope of work.

Initial deposits as shown on the fee schedule will be collected and held by the City in a deposit account at the time the application is submitted. The cost of staff time will be drawn from the deposit account. A positive account balance shall be maintained at all times during the review process. No work will be performed on a project with a negative fund balance. If the deposit is reduced to below 20% of the initial deposit amount, the applicant will be notified and required to supplement the deposit account with an additional amount no less than 50% of the original deposit.

When more than one Full Cost application is submitted, the sum total of the initial full cost deposit amount can be reduced by 20%.

Funds expended for staff time shall not be dependent upon the City's approval or disapproval of the application request. The deposit account will be held open for 90 days after project approval for City to complete any miscellaneous clean up items and to account for all project related costs. Any deposit amounts remaining after final project close out will be returned to applicant. In the event that the deposit account is exhausted prior to final close out, the balance owed to the City will be credited against the plan check and inspection fee deposit at time of improvement plan review.

As may be required by the Development Services Department for project evaluation or environmental review, all payment for consultant work shall be the responsibility of the applicant.

** Note regarding annual inflationary adjustment: The Initial deposit amounts will not be inflated annually, but the underlying hourly billing rates should inflate annually by the change in hourly labor rates and/or indirect cost rate multipliers.*

Planning (Entitlement) Fees

Refund Policy
Application fees are not refundable except as follows: A. Refund of 100% shall be made if a determination is made by the Development Services Director that the permit and associated fee are not required by the City of Roseville Municipal Code or adopted City Resolution. B. If an applicant requests to withdraw a fixed fee application prior to the PEM, refund of 50% of the applicable fee shall be refunded. C. No refund of application fees shall be made after a Project Evaluation Meeting has been held, unless a fee waiver is approved by the Roseville City Council.

[a] Appeals - This fee reimburses the administrative costs associated with an appeal. Applicants for Citywide Full Cost Entitlements shall continue to pay for all City staff time and materials, consistent with the full cost reimbursement agreement, required to complete the processing of an application in the event of an appeal.

[b] Development Agreement Review/Compliance Fee pertains to individual development agreements. Fee will be distributed to landowners on a pro-rata basis.

[c] Pre Application Meetings – The City will provide up to 2 meetings with staff to discuss the initial project review and City policies relative to the proposed project. Additional meetings and staff review prior to a formal application shall be billed on a time and material basis. The project proponent will be asked to submit the pre application deposit and a full cost reimbursement agreement. Staff will record all time against the deposit account. Balances remaining in the deposit account will be applied to the application deposit account or refunded within 60 days. Negative balances will be due in full along with the application deposit or fee at time of Entitlement Application submittal.

[d] Non-Residential - Per Building Code, this includes Commercial and Multi-family developments. Plan Check Fees to be assessed as part of Building Department Plan Check Fee. This fee shall be 15% of the building Plan Check Fee for New Non-Residential construction (Commercial and Multi-family). Fee to be collected with Building's Plan Check Fee.

[e] Parking In-Lieu Fee is an optional fee that non-residential uses in the Downtown Specific Plan Area can utilize instead of providing required parking on-site. Fees for the 1st stall will be 10% of the parking in-lieu fee, 2nd stall 25%, 3rd Stall 50%, 4th stall 75% and 5 or more stalls 100% of the in-lieu fee.

[f] In-Lieu Tree Mitigation Fee for the removal of protected trees is calculated per inch of the diameter at breast height of the tree.

Development Services Engineering and Encroachment Permit Fees

	Fee Description	FY 21-22 Fee	Initial Deposit	FY 22-23 Fee	Initial Deposit	Fee Paid	Bond Amount [a]	Note	Y'rly In'fltr

** Note regarding annual inflationary adjustment: The Initial deposit amounts will not be inflated annually, but the underlying hourly billing rates should inflate annually by the change in hourly labor rates and/or indirect cost rate multipliers.*

[a] Bond amounts paid at permit issuance.

[b] Final parcel map fee collected as base fee plus per lot fee.

[c] Lot line adjustment fee is fee for each adjusted line.

Trench Cut Recovery Fees

	Fee Description	FY 21-22 Permit Fee	FY 21-22 Trench Cut Fee	FY 22-23 Permit Fee	FY 22-23 Trench Cut Fee	Cut Fee Unit	Note	Y'rly In'fltr
	Trench Cuts Requiring Pmt. of Admin. Permit Fee Only							
1	Street scheduled for resurfacing within next fiscal year	$349	$0.00	$367	$0.00			Y
2	Proposed excavation includes an overlay	$349	$0.00	$367	$0.00			Y
3	Proposed excavation for a CIP	$349	$0.00	$367	$0.00			Y
4	Street pavement quality index (PQI) 0-4	$349	$0.00	$367	$0.00			Y
	All Other Trench Cuts							
5	Longitudinal Cut							
	a) Cut within 3' of lane line							
	i) PQI: 4.1 - 6.5	$349	$15.08	$367	$15.84	per LF		Y
	ii) PQI: 6.6 - 8.4	$349	$20.11	$367	$21.12	per LF		Y
	iii) PQI: 8.5 or greater	$349	$25.14	$367	$26.40	per LF		Y
	b) Cut within one lane width							
	i) PQI: 4.1 - 6.5	$349	$11.31	$367	$11.88	per LF		Y
	ii) PQI: 6.6 - 8.4	$349	$15.08	$367	$15.84	per LF		Y
	iii) PQI: 8.5 or greater *(moratorium street)*	$349	$18.86	$367	$19.80	per LF	[a]	Y
6	Traverse Cut							
	i) PQI: 4.1 - 6.5	$349	$9.20	$367	$9.66	per LF		Y
	ii) PQI: 6.6 - 8.4	$349	$12.26	$367	$12.87	per LF		Y
	iii) PQI: 8.5 or greater *(moratorium street)*	$349	$15.31	$367	$16.08	per LF	[a]	Y
7	Cut is a Patch							
	i) PQI: 4.1 - 6.5	$349	$10.18	$367	$10.69	per LF		Y
	ii) PQI: 6.6 - 8.4	$349	$13.58	$367	$14.25	per LF		Y
	iii) PQI: 8.5 or greater *(moratorium street)*	$349	$16.97	$367	$17.82	per LF	[a]	Y

[a] Moratorium streets require director approval for trenching.

Building Fees

A. Construction Valuation Table - Table A is the construction valuation table adopted for the purpose of establishing permit fees as construction valuation is a factor in the cost of providing permitting services. These valuations correlate to the square footage costs of permitting, plan review, and inspection services based upon the hourly rate for building services identified in this fee schedule.

Table A - Construction Valuation

	Group	FY21/22 Valuation		FY22/23 Valuation		Unit	Y'rly In'fltr
		A	B				
1	A-1 Assembly, theaters, with stage	$93.60	$46.80	$93.60	$46.80	per SF	N
2	A-1 Assembly, theaters, without stage	$93.60	$46.80	$93.60	$46.80	per SF	N
3	A-2 Assembly, nightclubs	$93.60	$46.80	$93.60	$46.80	per SF	N
4	A-2 Assembly, restaurants, bars, banquet halls	$111.80	$55.90	$111.80	$55.90	per SF	N
5	A-3 Assembly, churches	$93.60	$46.80	$93.60	$46.80	per SF	N
6	A-3 Assembly, general, community halls, libraries, museums	$88.40	$44.20	$88.40	$44.20	per SF	N
7	A-4 Assembly, arenas	$105.30	$52.65	$105.30	$52.65	per SF	N
8	B Business	$88.40	$44.20	$88.40	$44.20	per SF	N
9	E Educational	$94.90	$47.45	$94.90	$47.45	per SF	N
10	F-1 Factory and Industrial, moderate hazard	$49.40	$24.70	$49.40	$24.70	per SF	N
11	F-2 Factory and Industrial, low hazard	$49.40	$24.70	$49.40	$24.70	per SF	N
12	H-1 High Hazard, explosives	$49.40	$24.70	$49.40	$24.70	per SF	N
13	H-2,3,4 - High Hazard	$49.40	$24.70	$49.40	$24.70	per SF	N
14	H-5 - HPM	$79.30	$39.65	$79.30	$39.65	per SF	N
15	I-1 Institutional, supervised environment	$126.72	$63.36	$126.72	$63.36	per SF	N
16	I-2 Institutional, hospitals	$131.29	$65.65	$131.29	$65.65	per SF	N
17	I-2 Institutional, nursing homes	$249.09	$124.55	$249.09	$124.55	per SF	N
18	I-3 Institutional, restrained	$145.80	$72.90	$145.80	$72.90	per SF	N
19	I-4 Institutional, day care facilities	$126.72	$63.36	$126.72	$63.36	per SF	N
20	M Mercantile	$62.40	$31.20	$62.40	$31.20	per SF	N
21	R-1 Residential, hotels	$97.50	$48.75	$97.50	$48.75	per SF	N
22	R-2 Residential, multiple-family	$100.18	$50.09	$100.18	$50.09	per SF	N
23	R-3 Residential, one- and two-family	$110.00	$55.00	$110.00	$55.00	per SF	N
24	R-4 Residential, care/assisted living facilities	$106.60	$53.30	$106.60	$53.30	per SF	N
25	S-1 Storage, moderate hazard	$42.90	$21.45	$42.90	$21.45	per SF	N
26	S-2 Storage, low hazard	$41.60	$20.80	$41.60	$20.80	per SF	N
27	U Utility, miscellaneous	$32.50	$16.25	$32.50	$16.25	per SF	N

Building Fees

B. Determination of Construction Valuations - The building official shall determine construction valuations as follows:

1 **New Construction.** New construction shall be based upon the square footage of the proposed project multiplied by the amount stated in **Column A of Table A** corresponding to the occupancy group, as determined by the building official, for a total construction value.

2 **Improvements.** Improvements to existing buildings shall be based upon the square footage of the proposed improvements multiplied by the amount stated in **Column B of Table A** corresponding to the occupancy group, as determined by the building official, for a total construction value.

C. Commercial Building Valuations - Minimum commercial building valuations are stated below for the purposes of establishing minimum permit fees to cover the cost of service for the project listed. The higher valuation shall be assessed unless otherwise stated.

1 **Tenant Improvements Processed Over the Counter (OTC Permits).** Tenant Improvement OTC permits shall have a minimum valuation of $8,000.

2 **Tenant Improvements Requiring Plan Submittal.** Tenant Improvements (TIs) requiring plan submittal shall have a minimum valuation based upon Column B of Table A. For purposes of this section, a tenant improvement is defined as any improvement, maintenance or other updating on commercial property; improvement, maintenance or other updating on multi-family property; improvement, maintenance or other updating on residential care facilities and model home sales complexes, including sales trailers.

3 **Commercial Photovoltaic.** Commercial photovoltaic permits shall be based on a set valuation of $40,000.

4 **Electrical Service Upgrade.** Electrical service upgrade permit fees shall have a minimum valuation of $3,000.

5 **Commercial Reroofing.** Commercial reroofing permits shall have a minimum valuation of $423.17 per 100 square feet of roof area or a total minimum valuation of $20,000.

6 **OTC Permits for Commercial Projects.** OTC permits for commercial projects such as demolition, electrical, mechanical, plumbing and other work not otherwise defined shall have a minimum valuation of $3,000.

7 **OTC Permits for Commercial Projects.** OTC permits for commercial projects such as demolition, electrical, mechanical, plumbing and other work not otherwise defined shall have a minimum valuation of $3,000.

8 **Cell Towers - Change out of Antennas Only.** Cell towers requiring change-out of antennas only shall be considered a TI remodel with a minimum valuation of $3,000.

9 **Cell Towers - Major Remodel.** Cell towers undergoing a major remodel shall have a minimum valuation of $8,000.

10 **Shelves and Racking.** Permits for shelves and racking shall be considered a TI remodel. Construction valuation for fee setting purposes shall be the GREATER OF $8,000 OR the construction valuation calculated by multiplying the square footage by the amount stated in Column B of Table A for the U, Utility, Miscellaneous Occupancy Group.

11 **Stucco or Siding on Multi-Family.** For permits for stucco or siding on multi-family units, construction valuation for fee setting purposes shall be the GREATER OF $8,000 OR the construction valuation calculated by multiplying the linear footage of exterior home and garage x 1 SF (= remodel SF) by the amount stated in Column B of Table A for the R-2, Residential Multi-Family Occupancy Group.

12 **Stair Repair on Multi-Family.** For permits for stair repair on multi-family units, construction valuation for fee setting purposes shall be the GREATER OF $8,000 OR the construction valuation calculated by multiplying the square footage of the stair area(s) x number of floors of the building(s) by the amount stated in Column B of Table A for the R-2, Residential Multi-Family Occupancy Group.

13 **Pool Replaster and Repairs.** For permits for commercial pool replaster and/or repairs, the construction valuation for fee setting purposes shall be the GREATER OF $8,000 OR the construction valuation calculated by multiplying the pool square footage by the amount stated in Column B of Table A for the U, Utility, Miscellaneous Occupancy Group.

14 **Electronic Gates.** For permits for electronic gates, the construction valuation for fee setting purposes shall be the GREATER OF $8,000 OR the construction valuation calculated by multiplying the lineal footage of the gate and replacement fence x 1 SF (=SF) by the amount stated in Column A of Table A for the U, Utility, Miscellaneous Occupancy Group.

15 **Facade Remodel.** For permits for facade remodel, the construction valuation for fee setting purposes shall be the GREATER OF $8,000 OR the construction valuation calculated by multiplying the lineal footage of the facade x 1 SF (=SF) by the amount stated in Column B of Table A for the Occupancy Group listed on the certificate of occupancy.

16 **Spray Booth.** For permits for spray booth installation, the construction valuation for fee setting purposes shall be the GREATER OF $8,000 OR the construction valuation calculated by multiplying the square footage of the booth area by the amount stated in Column B of Table A for the F, Factory and Industrial Occupancy Group.

17 **Parking Lot Restriping: Site Work.** Permits for parking lot restriping shall have a minimum valuation of $8,000.

Building Fees

18 **ADA Upgrades.** Permits for ADA upgrades shall have a minimum valuation of $8,000.

19 **Barrier Removal.** Permits for barrier removal shall have a minimum valuation of $8,000.

20 **Crane install runways.** Permits for crane install runways shall have a minimum valuation of $8,000.

21 **Construction Trailer.** For permits for construction trailers hooking up to water/sewer and/or electric, the construction valuation for fee setting purposes shall be calculated by multiplying the trailer square footage by the amount stated in Column B of Table A for the B, Business Occupancy Group.

22 **Commercial Charging Station.** For permits for commercial charging stations, the construction valuation for fee setting purposes shall be based on the construction valuation provided by the applicant with a minimum valuation of $8,000.

23 **Emergency Generator to Cell Site.** Permits for emergency generators to cell sites shall have a minimum valuation of $8,000.

24 **Pumpkin Lot/Tree Lot.** Permits for pumpkin or tree lots shall have a minimum valuation of $8,000.

D. Residential Building Valuations - Minimum residential building valuations are stated below for the purposes of establishing minimum permit fees to cover the cost of service for the project listed. The higher valuation shall be assessed unless otherwise stated.

1 **Custom, Non-listed Patio Covers.** Custom, non-listed patio covers shall have minimum valuation based upon new construction valuation of Column A of Table A.

2 **Pre-Engineered, Listed Patio Covers.** Pre-engineered, listed patio covers shall have a set valuation of $3,000 for the purposes of establishing the building permit fee. The patio construction contract valuation shall be reported on the permit application if such amount exceeds $3,000.

3 **Swimming Pools.** Swimming pools shall have a set valuation of $25,000 for the purposes of establishing the building permit fee. The swimming pool construction contract valuation shall be reported on the permit application if such amount exceeds $25,000.

4 **Residential Remodel.** Residential remodel permits shall have a minimum valuation based upon Column B of Table A.

5 **Residential Additions.** Residential additions shall have a minimum valuation based upon Column A of Table A (new construction).

6 **Combination of Residential Remodel and Residential Addition.** With respect to a permit application for a combination residential remodel and residential addition subsection (D)(3) shall apply with respect to the residential remodel portion and subsection (D)(4) shall apply with respect to the residential addition (new construction) portion for a total construction valuation for the permit.

7 **Photovoltaic.** Photovoltaic permits shall be based upon a set valuation of $18,000 for the purposes of establishing the permit fee.

8 **Reroof.** Reroof permits for residential structures shall have a minimum valuation of $239.49 per 100 square feet of roof area or a total minimum valuation of $2,400.

9 **Plumbing OTC Permits.** OTC permits pertaining to plumbing shall have a minimum valuation of $900.

10 **Mechanical, Electrical, Car Charging Stations, Demolition and Other OTC Permits Not Specified in this Section.** OTC permits for mechanical, electrical, car charging stations, demolition, and other permits not specified in this section shall have a minimum valuation of $2,400.

11 **Stucco or Siding.** For permits for stucco or siding on residential units, construction valuation for fee setting purposes shall be the GREATER OF $2,400 OR the construction valuation calculated by multiplying the linear footage of exterior home and garage x 1 SF (= remodel SF) by the amount stated in Column B of Table A for the R-3, Residential, One- and Two-Family Occupancy Group.

12 **Fence or Retaining Wall.** For permits for residential fences or retaining walls, the construction valuation for fee setting purposes shall be the GREATER OF $2,400 OR the construction valuation calculated by multiplying the linear footage of fence or wall x 1 SF (= SF) by the amount stated in Column A of Table A for the U, Utility, Miscellaneous Occupancy Group.

13 **Windows.** Permits for residential windows shall have a minimum valuation of $2,400.

14 **Freestanding Fireplace.** Permits for a freestanding fireplace shall have a minimum valuation of $2,400.

15 **BBQ.** Permits for a barbeque (BBQ) shall have a minimum valuation of $2,400.

16 **Pool Replaster and Repairs.** For permits for residential pool replaster and/or repairs, the construction valuation for fee setting purposes shall be the GREATER OF $2,400 OR the construction valuation calculated by multiplying the pool square footage by the amount stated in Column B of Table A for the U, Utility, Miscellaneous Occupancy Group.

Building Fees

17 **Shed.** For permits for residential sheds, the construction valuation for fee setting purposes shall be the GREATER OF $2,400 OR the construction valuation calculated by multiplying the square footage of the shed (= SF) by the amount stated in Column A of Table A for the U, Utility, Miscellaneous Occupancy Group.

18 **Deck Repair.** For permits for deck repair, the construction valuation for fee setting purposes shall be the GREATER OF $2,400 OR the construction valuation calculated by multiplying the square footage of the deck area being repaired (= SF) by the amount stated in Column B of Table A for the U, Utility, Miscellaneous Occupancy Group.

19 **Fire Repair.** For permits for residential fire repair, the construction valuation for fee setting purposes shall be calculated in the same manner as a residential remodel.

Building Fees

E. Permit Fees - Subject to any applicable minimum permit fees stated elsewhere in this schedule, Table B and B.1, shall apply for the purpose of establishing minimum permit fees.

Table B - Permit Fees

Total Valuation	FY 21-22 Permit Fee				FY 22-23 Permit Fee				Y'rly In'fltr
$1 to $500	$58.20				$61.10				Y
$501 to $1,000	$58.20	for the first $500	plus	$2.91 for each add'l $100 or fraction thereof, to and including $1,000	$61.10	for the first $500	plus	$2.94 for each add'l $100 or fraction thereof, to and including $1,000	Y
$1,001 to $3,000	$72.75	for the first $1,000	plus	$3.20 for each add'l $100 or fraction thereof, to and including $3,000	$75.82	for the first $1,000	plus	$3.24 for each add'l $100 or fraction thereof, to and including $3,000	Y
$3,001 to $25,000	$136.75	for the first $3,000	plus	$12.80 for each add'l $1,000 or fraction thereof, to and including $25,000	$140.53	for the first $3,000	plus	$12.94 for each add'l $1,000 or fraction thereof, to and including $25,000	Y
$25,001 to $50,000	$418.35	for the first $25,000	plus	$10.47 for each add'l $1,000 or fraction thereof, to and including $50,000	$425.23	for the first $25,000	plus	$10.59 for each add'l $1,000 or fraction thereof, to and including $50,000	Y
$50,001 to $100,000	$680.10	for the first $50,000	plus	$7.27 for each add'l $1,000 or fraction thereof, to and including $100,000	$689.88	for the first $50,000	plus	$7.35 for each add'l $1,000 or fraction thereof, to and including $100,000	Y
$100,001 to $500,000	$1,043.60	for the first $100,000	plus	$5.81 for each add'l $1,000 or fraction thereof, to and including $500,000	$1,057.39	for the first $100,000	plus	$5.88 for each add'l $1,000 or fraction thereof, to and including $500,000	Y
$500,001 to $1,000,000	$3,367.60	for the first $500,000	plus	$4.37 for each add'l $1,000 or fraction thereof, to and including $1,000,000	$3,407.04	for the first $500,000	plus	$4.42 for each add'l $1,000 or fraction thereof, to and including $1,000,000	Y
$1,000,001 and up	$5,552.60	for the first $1,000,000	plus	$2.33 for each additional $1,000 or fraction thereof	$5,616.14	for the first $1,000,000	plus	$2.35 for each additional $1,000 or fraction thereof	Y

Production Home Permit Fees - Building permits for production homes (those homes that are one and two family homes having an approved master plan, which is a complete set of building plans from which multiple homes may be constructed) shall have a minimum permit fee as calculated in Table B.1.

Table B.1 - Production Home Permit Fees

Total Valuation	FY 21-22 Permit Fee				FY 22-23 Permit Fee				Y'rly In'fltr
$0 to $120,000	$1,376.93				$1,445.77				Y
$120,001 and up	$1,376.93	for the first $120,000	plus	$9.31 for each add'l $11,000 or fraction thereof	$1,445.77	for the first $120,000	plus	$9.78 for each add'l $11,000 or fraction thereof	Y

Building Fees

F. Administration Fee - In addition to the permit fee, an administration fee is established for the city to recover the cost of permit application processing, permit issuance, and plan review and shall be applied as follows:

	Fee Description	FY 21-22 Fee	FY 22-23 Fee	Y'rly In'fltr
1	Permits Requiring Plan Submittal for Review	95% of the Building Permit Fee	95% of the Building Permit Fee	N
2	Over the Counter Permits Requiring Minimal or No Plan Review	25% of the Hourly Rate or Actual Cost (for time in excess of 1/2 hour)	25% of the Hourly Rate or Actual Cost (for time in excess of 1/2 hour)	N
3	Tenant Improvement Environmental Utilities Review			
	a) Same Use[1]	$358	$376	Y
	b) Change of Use[2]	$977	$1,026	Y
4	Production Home Permits	37% of the Building Permit Fee	37% of the Building Permit Fee	N
5	Plans Submitted for the Purposes of Being Mastered	95% of the Building Permit Fee (based on SF valuation of proposed design)	95% of the Building Permit Fee (based on SF valuation of proposed design)	N
6	Emergency Water Heater Repair	Exempt From the Admin Fee (allocated one inspection visit. If add'l visits are required re-inspection fees apply for add'l visits)	Exempt From the Admin Fee (allocated one inspection visit. If add'l visits are required re-inspection fees apply for add'l visits)	N

Determination of Tenant Improvement (TI) Environmental Utilities Review Fee:

[1]"Same Use" fee applies to any tenant improvement that requires review (by applicable statute) by the Placer County Department of Environmental Health (typical uses include restaurants, hair salons, and medical/dental offices), or tenant improvements that result in changes to equipment such as (but not limited to) triple compartment sinks, sewer lines within kitchen and maintenance areas, grease waste capturing equipment and tanks, water services including fire, domestic and irrigation, and exterior trash enclosures, etc. The fee does not apply to tenant improvements that do not involve new or modifications to existing plumbing. Examples of tenant improvements where the same use fee would not apply include: addition of new fixtures (sinks, toilets, etc) where no modification to plumbing is proposed, and addition or relocation of interior walls where no new or modification to existing plumbing is proposed. The fee shall also not apply to minor tenant improvements charged the minimum building permit fee based on project valuation.

[2] "Change of Use" fee applies to tenant improvements that result in a change from one use to another, such as (but not limited to) office/retail to restaurant, or office/retail to dental/medical office. The change in use fee also applies to plan review of modifications to commercial landscaping for compliance with water efficient landscape requirements.

Building Fees

G. Additional Time and Materials Fees and Refunds and Appeals - Building permits are subject to additional time and material fees where the cost of service provided by city exceeds the amount collected at application. Such fees shall be calculated as follows:

	Fee Description	FY 21-22 Fee	FY 22-23 Fee	Unit	Note	Y'rly In'fltr
1	Additional Services (1/2 hour minimum)	$190	$190	per hour	[a]	Y
2	Re-inspections (per scheduled stop)	$111	$111	per stop	[b]	Y
3	Inspections Outside of Normal Business Hours	$190	$190	per hour	[c]	Y
4	Work Commenced without a Permit	$190	$190	minimum	[d]	Y
5	Certificate of Occupancy (1 hour minimum)	$190	$190	per hour	[e]	Y
6	Permit Extension or Reinstatement of an Expired Permit	$190	$190	per hour	[f]	Y
7	Third Party Plan Review (fee is in addition to City Administration Fee in Section F)	pass through of consultant fee	pass through of consultant fee		[g]	N
8	Fees for Services Not Listed in this Schedule	Actual Cost	Actual Cost		[h]	N
9	Refunds and Appeals					
	a) Fees erroneously paid by applicant or collected or charged by the agency	100% refund	100% refund		[i][l]	N
	b) When no work has been commenced	up to 75% refund	up to 75% refund		[j][l]	N
	c) Expired permit applications and permits	0% refund	0% refund		[k][l]	N

[a] Additional Services (e.g. administrative and plan review) Fees shall be assessed at time of permit issuance and/or prior to final inspection at application. Additional service is defined as follows:

1. Plan Reviews in excess of three (3) submittals to city for review and approval.

2. Plan Review by city departments other than the development services department for projects affecting other City services and not covered by any fees set forth in this section.

3. Other staff time and resources for the purposes of facilitating and approving permit applications and permits.

4. Expedited plan review, when available, and additional resources required to facilitate the expedited plan review process, including consultants and/or other city departments and divisions whose assistance is required for plan approval.

[b] Re-inspections may be assessed based on any of the following:

1. Inspections which are not ready at the time of the scheduled inspection, as determined by a city inspector.

2. Failure by applicant to complete inspection items from previous correction notices.

3. Inspections additional to the inspection with respect to emergency water heater permits.

[c] Inspections outside of normal business hours will be subject to a 2-hour minimum for evening work and a 4-hour minimum for weekend work.

[d] Whenever any work for which a permit is required has been commenced without first applying for a building permit and receiving permission by the building official, a minimum fee for investigation and administration shall be assessed in addition to the full cost of any required permits.

[e] The fee for a certificate of occupancy shall be a minimum of one hour, and any additional costs beyond one hour of staff time to approve such certificates.

[f] Permit applications and permits shall expire per the provisions of the California Building Code. Reinstatement and extensions may be granted provided that all costs incurred by the city to date of the request are paid for by the permit applicant. For this purpose, cost is defined as the hours expended for review and administration multiplied by the hourly rate.

[g] Third party plan review, when available, shall be assessed and paid at time of permit application. The fee for this service is the hourly or flat rate charged by the consulting firm performing the review. This fee is in addition to the permit Administration Fees identified in "Section F" of this fee schedule for the additional resources required to facilitate the process.

[h] Fees for services not otherwise listed in this schedule shall be determined by the building official and based upon the actual cost of providing the service.

[i] The building official may authorize refunding of any fee paid, or portion thereof, which was erroneously paid by applicant or collected by city.

Building Fees

[j] The building official may authorize refunding of not more than seventy-five percent (75%) of fees paid when no work has been done under a permit application or an issued permit in accordance with the adopted California Code of Regulations. In no case shall the refund exceed the cost of services provided to date of cancellation of permit issuance.

[k] Permit applications and building permits that have expired as defined in the California Building Code shall not be subject to any refund.

[l] A building permit applicant may, upon payment of the requested permit fees to city and otherwise complying with California Government Code Section 66022, protest the requested amount to the city council by lodging an appeal with the building official. City staff shall schedule the appeal to be heard by the city council as soon as reasonably practicable.

Building Fees

H. Technology Fee, General Plan Maintenance Fee, Strong Motion Impact Fee, SB 1473 Fee

	Fee Description	FY 21-22 Fee	FY 22-23 Fee	Note	Y'rly In'fltr
1	Technology Fee (applicable to building permits, fire permits, improvement plan, and entitlement fees)	3%	3%	[a]	N
2	General Plan Update Fee	$0.50 per $1,000 valuation, not to exceed $20,000	$0.50 per $1,000 valuation, not to exceed $20,000		N
3	Strong Motion Impact (SMI) Fee Calculation				
	a) Residential	$0.50 or valuation x .00013	$0.50 or valuation x .00013	[b]	N
	b) Commercial	$0.50 or valuation x .00028	$0.50 or valuation x .00028	[b]	N
4	Building Standards Administration Special Revolving Fund (SB 1473) Fee Calculation				
	Valuation:				
	a) $1 - $25,000	$1	$1	[b]	N
	b) $25,001 - $50,000	$2	$2	[b]	N
	c) $50,001 - $75,000	$3	$3	[b]	N
	d) $75,001 - $100,000	$4	$4	[b]	N
	e) Every $25,000 or fraction thereof above $100,000	Add $1	Add $1	[b]	N
5	"SCIP" Administrative Fee				
	a) Per Single Family Dwelling Permit	$496	$515	[c]	Y - See Note
	b) Per Non-Residential Building Permit	$1,388	$1,441	[c]	Y - See Note

[a] "Building permit" means the permit issued or required by the city for the construction or modification of any structure pursuant to and as defined by the building code. "Fire permit" means the permit issued or required by the city for the construction or ongoing operations of a structure or business pursuant to and as defined by the fire code. "Improvement plan" means the permit issued or required by the city for the construction of any public or private site improvements as defined by the city's improvement and construction standards. "Entitlement" means those approvals provided under Title 19, Zoning.

[b] Fee set by State.

[c] In accordance with Resolution No. 19-92, the Statewide Community Infrastructure Program "SCIP" Administrative Fee shall increase annually by 2% or the change in the consumer price index from October to October.

Building Fees

I. Findings Regarding Permit Fees for Residential Rooftop Solar Energy Systems - Pursuant to Section 66015 of the California Government Code (Fees for Rooftop Solar Energy Systems), the city council finds that the reasonable cost to issue a permit for a residential rooftop solar energy system exceeds $450 plus $15 per kilowatt (kW) for each kW above 15 because issuance of the permit requires all of the following:

1. One-half (1/2) hour administration time for application and data input
2. 1/2 hour administration time for permit issuance and one hour plan review time including up to two (2) submittals
3. Typically 2 inspections at a minimum of 1/2 hour of staff time
4. Other applicable fees assessed by the State of California and by the Roseville Electric Department pursuant to the Roseville Electric Solar Energy Program Meter Upgrade Charges, as amended from time to time

This higher fee results in a quick and streamlined approval process.

Development Impact Fee Deferral and SCIP Fees

	Fee Description	FY 21-22 Fee	FY 22-23 Fee	Unit	Note	Y'rly In'fltr
1	Development Impact Fee Deferral					
	a) Residential	$297	$312	per deferral		Y
	b) Non-Residential					
	i) Administrative Fee	$831	$873	per deferral		Y
	ii) Interest Charge on Deferred Fees	equal to unearned interest based on City's 10-yr avg pooled interest rate	equal to unearned interest based on City's 10-yr avg pooled interest rate	per deferral	[a]	N

[a] Fee deferral will result in a loss of interest income on monies deferred over the construction timeframe. The interest charge is intended to cover these costs.

Housing Fees

	Fee Description	FY 21-22 Fee	FY 22-23 Fee	Unit	Note	Y'rly In'fltr
1	Reconveyance Fee	$346	$359	per occurrence		Y
2	Subordination Fee	$402	$417	per occurrence		Y

Electric Fees

	Fee Description	FY 21-22 Fee	FY 22-23 Fee	Unit	Note	Y'rly In'fltr
	Solar Energy Program - Meter Upgrade Charges					
1	Residential PV Net-Meter	$782.02	$856.54			N
2	Business PV Net-Meter (<10kW system size)	$1,659.21	$2,028.76			N
3	Business PV Net & PBI Meter (10-100kW system size, up to 200amp PBI panel)	$2,715.88	$2,756.27		[a]	N
4	Business PV Net & PBI Meter (10-100kW system size, >200amp PBI panel)	$4,419.92	$4,535.68		[a]	N
5	Variance Review Request	$203.66	$211.40	per hour		N
6	Plan Reviews or Field Meets Exceeding the Initial and Subsequent Submittal Limit	$203.66	$211.40	per hour	[b]	N
	Other Service Fees					
7	Pedestal Meter Fee	$331.67	$584.35			N
8	Temporary Power Meter Set

[a] Third party plan review, when available, shall be assessed and paid at time of permit application. The fee for this service is the hourly or flat rate charged by the consulting firm performing the review. This fee is in addition to the permit Administration Fees identified in the "Plan Review (Including Inspection Service) Plan Review Conducted by City Approved Consultant" of this fee schedule for the additional resources required to facilitate the process.

[b] Fee includes Hazardous Waste Generator < 55 gal.

General Information
* All fees or charges shall be calculated at one (1) hour minimum unless otherwise specified.
* All fees for specified services shall be calculated by the Fire Department.
* When required, no permit or approval shall be issued until facility or process is brought into compliance with applicable codes and the required service fee is paid in full.
* When a requester fails to cancel a requested inspection prior to the scheduled time of inspection, the standard inspection fee shall be charged, with a one hour minimum fee.

22	Concealed Weapon License	n/a - issued by Placer County Sheriff	n/a - issued by Placer County Sheriff		[f]	N

** Note regarding annual inflationary adjustment: For items billed at actual cost, the underlying hourly billing rates should inflate annually by the change in hourly labor rates and/or indirect cost rate multipliers.*

[a] Fines are determined by the combined number of both burglary and duress/robbery false alarms. Reimbursement may be waived by the police chief where uncommon circumstances not considered an emergency resulted in false alarm and where the permittee has undertaken to correct alarm system deficiencies.

[b] This fee shall be collected only from the registered owner or agent of the registered owner. This fee shall not apply to vehicles impounded as the result of automobile accidents, abatement program, or lien sale, unless the sale is sufficient in amount to pay the lienholder's total charges and administrative costs.

[c] This fee is not established by the City of Roseville. It may be collected on behalf of, or directly by, a third party (e.g. vendor; other public agency). The fee schedule is intended to mirror amounts adopted by third parties. If the amount charged by a third party changes, the amounts collected by the City on behalf of the third party are presumed to change simultaneously. Amounts shown in the fee schedule will be updated as soon as practicable after the City receives notice of the fee change.

[d] Fee amounts shown are for non-state certified massage therapist applications. There is no fee for State-certified massage therapists/practitioners registering to provide massage services or activities within the City of Roseville.

[e] Set to match IRS standard mileage rates.

[f] Any Roseville resident wishing to apply for a license to carry a concealed weapon shall be directed to the Placer County Sheriff's Office for permit application and the permit process.

Animal Licensing and Permit Fees

	Fee Description	FY 21-22 Fee	FY 22-23 Fee	Unit	Note	Y'rly In'fltr

7	Voluntary Disposal Fee					
	a) Dogs and Other Animals Commonly Considered Pets	$40	$42	per animal/litter		Y
	b) Wild Animals	$40	$42	per animal		Y
8	Appeal of Decision to Destroy Vicious Animal	$100	$100	flat fee		N

* Per RMC 7.16.070, license fees are waived for: service dog owned by a person with a need for assistance; dog used by any law enforcement personnel; dog owned by any government entity or political subdivision

Oversize Vehicle Permit Fees and Building Moving Permit Fees

	Fee Description	FY 21-22 Fee	FY 22-23 Fee	Unit	Note	Y'rly In'fltr
1	Oversize Vehicle Permit					
	a) Single trip permit	$16	$16	per vehicle	[a]	N
	b) Annual permit	$90	$90	per vehicle	[a]	N
2	Building Moving Permit					
	a) Base Fee	$29	$30	per request		Y
	b) Costs of plan review, utility and street light moving, tree trimming, traffic directing, etc.	actual costs	actual costs	per request		Y

** Note regarding annual inflationary adjustment: For items billed at actual cost, the underlying hourly billing rates should inflate annually by the change in hourly labor rates and/or indirect cost rate multipliers.*

[a] Oversize vehicle permit fees set to match fees adopted by California Department of Transportation (CalTrans).

Parking Permit Fees

	Fee Description	FY 21-22 Fee	FY 22-23 Fee	Unit	Note	Y'rly In'fltr
1	Residential Parking Permit	$0	$0	per vehicle		N
2	Merchant Parking Permit					
	a) January 1st through December 31st	$20	$20	per vehicle		N
	b) July 1st through December 31st	$10	$10	per vehicle		N

* Permit is valid only for the calendar year issued. A merchant parking permit is issued to a specific vehicle and is not transferable. A valid merchant parking permit decal must be appropriately displayed on the left rear bumper or left rear window of the permittee's vehicle.

Special Event, Film, and Banner Permit Fees

	Fee Description	FY 21-22 Fee	FY 22-23 Fee	Unit	Note	Y'rly In'fltr
1	Special Event Permit					
	a) Application Fee					
	i) Event that requires limited site/plan review, no closures, etc. (i.e. park rentals/activities, misc. events, etc.)	$135	$160	per event	[a]	Y
	ii) Event that requires, but not limited to, street/parking lot closures, site/plan review, trail use, etc. (i.e. fun runs, festivals, parking garage, etc.)	$275	$300	per event	[a]	Y
	b) Service Charges	actual costs	actual costs			Y
	c) Park/facility rental fee	varies by location	varies by location	per event		N
2	Photography and Filming Permit					
	a) Application Fee					
	i) Cast and Crew Totaling One to Three Persons	$135	$160	per permit	[a],[b]	Y
	ii) Cast and Crew Totaling Four or More Persons; or with Street Closure	$275	$300	per permit	[a],[b]	Y
	b) Service Charges	actual costs	actual costs			Y
3	Banner Permit	$65	$70			Y

[a] Application fees are non-refundable.

[b] Non-commercial photography and photography/film not requiring exclusivity does not need a permit. The Department Director may waive fees for bona fide student film/photography projects and non-profit projects. The permitting process for filming/photography is still applicable for these projects (i.e. permit is required). Service charges are still applicable.

** Note regarding annual inflationary adjustment: For items billed at actual cost, the underlying hourly billing rates should inflate annually by the change in hourly labor rates and/or indirect cost rate multipliers.*

Parks, Recreation, & Libraries Department Fees

36001	City Clerk	8.00	$ 629,756	2,080	16,640	$ 38	$ 83	**2.19**	$ 1,164,872	

Source: Estimated labor and FTE information based on FY 21/22 position budgeting data. Estimated recurring non-labor expenditures and estimated citywide overhead based on conservative estimates developed for purposes of this analysis only (see footnotes [a],[b], and [c] for additional details regarding estimates for recurring non-labor and citywide overhead expenditures).

[a] The calculated hourly rate is intended to comply with Government Code 6253(b). The hourly rate shown represents only the labor costs of City Clerk personnel that typically perform reproduction services. Estimated non-labor and citywide overhead costs are deliberately excluded.

[b] In accordance with footnote [a], estimated recurring non-labor only include the Division's direct share of insurance, IT, and facilities costs, etc. attributable to the division.

[c] In accordance with footnote [a], the hourly rate calculation for public records requests, exlcudes the division's share of allocated citywide overhead costs.

[d] Annual leave assumes the following: Holiday - 12 days; Vacation - 14 days; Sick - 12 days; Mgmt/Jury/Other - 2 days. Actual amounts may vary based on employee length of service and job title. Amounts shown are intended to serve as reasonable for purposes of estimation.

[e] Indirect activities and services may include mandatory rest periods, meetings, training, and other administrative activities. However, these amounts have been excluded in order to err on the side of caution in an effort to comply with Government Code 6253(b) regarding requests for public records. The hourly rate shown represents only the labor costs of City Clerk personnel that typically perform reproduction services.

Source: Estimated labor and FTE information based on FY 21/22 position budgeting data. Estimated recurring non-labor expenditures based on FY 21/22 adopted budget. Estimated citywide overhead based on conservative estimates developed for purposes of this analysis only (see footnote [a] for additional details regarding estimates for citywide overhead).

[a] Amount is intended to serve as a reasonable, conservative, estimate of central service support received by the City Clerk Department from other central service units, such as finance, attorney, city manager, etc. The City's existing overhead cost allocation plan allocates central service costs to direct service units. Consequently, there is no formal allocation of citywide overhead to the City Clerk. While, the City Clerk Department primarily operates as a central service unit, for certain fee-related services the department provides direct services. The overhead allocation is intended to provide an estimate of support received by the City Clerk Department that enables staff to perform direct services, when requested.

[b] Annual leave assumes the following: Holiday - 12 days; Vacation - 14 days; Sick - 12 days; Mgmt/Jury/Other - 2 days. Actual amounts may vary based on employee length of service and job title. Amounts shown are intended to serve as reasonable for purposes of estimation.

[c] Indirect activities and services may include mandatory rest periods, meetings, training, and other administrative activities.

Source: Estimated labor and FTE information based on FY 21/22 position budgeting data. Estimated recurring non-labor expenditures based on FY 21/22 adopted budget. Estimated citywide overhead assumes 10% of direct salaries (conservative allocation to account for divisional restructuring).

[a] Adjustment to exclude distorting expenses. This is intended to serve as a conservative estimate and corresponds to recurring services and supplies share for the budget unit.

[b] Annual leave assumes the following: Holiday - 12 days; Vacation - 14 days; Sick - 12 days; Mgmt/Jury/Other - 2 days. Actual amounts may vary based on employee length of service and job title. Amounts shown are intended to serve as reasonable for purposes of estimation.

[c] Amounts shown are intended to serve as conservative estimates. Indirect activities and services may include mandatory rest periods, meetings, training, public information and assistance, and other administrative activities.

Source: Expenditures are based on FY 21/22 adopted budget. Estimated citywide overhead based on Citywide overhead cost allocation plan for use in FY 22/23. Estimated labor and FTE information based on FY 21/22 position budgeting data.

[a] Allocation assumes 60% to Planning and Engineering and 40% to Building and Code Enforcement. Although Building has the highest permit volume, the most significant time required from personnel in the Administration division occurs in the project planning and land development stages.

[b] Allocation assumes 80% of development services GIS and business services benefit to Building and Engineering. Remainder to Planning and Code Enforcement.

[c] Includes budget unit (Center) 66021 - Contract Building Plan Review.

[d] Amounts intended to serve as reasonable estimates developed for purposes of this analysis. Amount will vary annually, and by employee. Amount based on FY 21/22 position allocation, historical allocations for City of Roseville, and consultant experience working with similar municipalities.

Source: Estimated labor and FTE information based on FY 21/22 position budgeting data. Estimated recurring non-labor expenditures based on FY 21/22 adopted budget. Estimated citywide overhead based on conservative estimates developed for purposes of this analysis only (see footnote [a] for additional details regarding estimates for citywide overhead.

[a] Amount is intended to serve as a reasonable, conservative, estimate of central service support received by the Economic Development Department from other central service units, such as finance, attorney, city manager, etc. The City's existing overhead cost allocation plan allocates central service costs to direct service units. Consequently, there is no formal allocation of citywide overhead to the Economic Development Department. While, the Department primarily operates as a central service unit, for certain fee-related services the department provides direct services. The overhead allocation is intended to provide an estimate of support received by the Department that enables staff to perform direct services, when requested.

[b] Adjustment to exclude budgeted expenditures for: Acct #5301 - Professional Services; Acct #5471 - Memberships. Adjustments were made to calculate a conservative estimate of expenditures typically associated with processing development impact fee deferrals (i.e. include labor costs and indirect labor support costs.).

[c] Annual leave assumes the following: Holiday - 12 days; Vacation - 14 days; Sick - 12 days; Mgmt/Jury/Other - 2 days. Actual amounts may vary based on employee length of service and job title. Amounts shown are intended to serve as reasonable for purposes of estimation.

[d] Indirect activities and services may include mandatory rest periods, meetings, training, and other administrative activities, public information and assistance, etc.

48020	Fire Prevention	$ 2,045,241	$ 721,515	35%

Estimated Share of Divisional Expenditures Recovered from Fees - Proposed

Org Key	Description	Estimated Share of Recurring Expenses	Proposed Revenue from Fee-Related Services	Divisional Cost Recovery from Fees
48020	Fire Prevention	$ 2,045,241	$ 750,879	37%

Source: Estimated labor and FTE information based on FY 21/22 position budgeting data. Estimated recurring non-labor expenditures based on FY 21/22 adopted budget. Estimated citywide overhead based on citywide overhead cost allocation plan.

[a] Public Information Officer, and Admin Tech positions are budgeted to Fire & Life Safety Division. However, for purposes of this analysis, the positions are considered departmental administration and allocated amongst Fire Prevention and Fire Operations divisions. Amounts have been separated for allocation purposes and to avoid double counting of expenditures.

[b] Estimated departmental overhead allocated based on FTE count of functional units developed for this analysis.
[c] FY 21/22 positional budgeting included 10.0 FTE, 1.0 FTE was Safety Inspector II. This analysis assumes Inspector II will be reclassified to Inspector I.
[d] See accompanying worksheet for estimate of direct service ratio and estimated direct service hours.

Source: Estimated labor and FTE information based on FY 21/22 position budgeting data. Estimated recurring non-labor expenditures based on FY 21/22 adopted budget. Estimated citywide overhead based on Citywide overhead cost allocation plan.

[a] Amounts exclude estimated overtime and temporary help wages.

[b] Police Communications expenditures are allocated to direct service units via the citywide overhead cost allocation plan.

[c] Estimated recurring expenditures for Animal Control exclude $957,000 in FY 21/22 budgeted contract/professional services expenditures for contract animal control services.

[d] Annual leave assumes the following: Holiday - 12 days; Vacation - 14 days; Sick - 12 days; Mgmt/Jury/Other - 2 days. Actual amounts may vary based on employee length of service and job title. Amounts shown are intended to serve as reasonable for purposes of estimation.

[e] Amounts shown are intended to serve as conservative estimates. Indirect activities and services may include mandatory rest periods, meetings, training, public information and assistance, and other administrative activities.

[f] Indirect ratio assumes roughly 1 hour out of every eight hour day spent on indirect activities.

[a] Although the Permit Center primarily acts in a support function to development services departments, it also provides a limited number of parking permits per year. This worksheet calculates a conservative estimate of the costs of providing parking permits. This worksheet is not intended to be used for any fees other than parking permit fees.

[b] Annual leave assumes the following: Holiday - 12 days; Vacation - 14 days; Sick - 12 days; Mgmt/Jury/Other - 2 days. Actual amounts may vary based on employee length of service and job title. Amounts shown are intended to serve as reasonable for purposes of estimation.

[c] Indirect activities and services may include mandatory rest periods, meetings, training, and other administrative activities.

Source: Estimated labor and FTE information based on FY 21/22 position budgeting data. Estimated recurring non-labor expenditures based on FY 21/22 adopted budget adjusted to err on the side of conservative (e.g. recurring, direct labor related expenditures). Estimated citywide overhead based on Citywide overhead cost allocation plan.

[a] Estimates developed for this fee analysis only. For operational purposes, City staff may view allocation of resources differently.
[b] This analysis assumes that any citywide overhead costs allocable to the Parks Administration Division have been allocated to the direct service units of the department (i.e. the citywide overhead assigned to Parks Development includes a share of any overhead allocated to the Parks Administration Division and re-allocated to the Parks direct service units).

[c] Parks Department Administration distributed via the citywide overhead cost allocation plan.
[d] Annual leave assumes the following: Holiday - 12 days; Vacation - 14 days; Sick - 12 days; Mgmt/Jury/Other - 2 days. Actual amounts may vary based on employee length of service and job title. Amounts shown are intended to serve as reasonable for purposes of estimation.

[e] Amounts shown are intended to serve as conservative estimates. Indirect activities and services may include mandatory rest periods, meetings, training, public information and assistance, and other administrative activities.

User and Regulatory Fee Study
Capital Replacement Fee
Cost of Service Calculation

	Description	Total	Notes
1	Annual Need	$1,500,000	[a]
2	Fee-related Revenues Eligible for Surcharge	$9,000,000	[b]
3	**Target Annual Revenue from Capital Replacement Fee**	**$200,000**	[c]
4	Surcharge Required if Applied to All Eligible Programs	2%	[d]
5	Share of Total Annual Need Funded by Surcharge	13%	[e]

[a] Source: Parks CIP Rehab Summary (Draft document). The annual need amount is intended to represent a conservative estimate of the annual rehabilitation needs for the next ten years. The amount has been rounded for illustrative purposes. The amount excludes turf conversions and several new programs that could add an average of $200,000 per year in required rehabilitation over the next five years. This amount should be used for estimation purposes only. The actual amount changes annually as amounts are continued to be deferred or other rehabilitation needs are identifed.

[b] Source: Parks, Recreation, & Libraries Department initial analysis of annual revenues and program areas potentially eligible for application of capital replacement fee (e.g. amount excludes donations/gifts, grants and other amounts received from other agencies).

[c] Conservative estimate that assumes the fee will not exceed 10% of any program fees and will not be applied to all programs (e.g. if the additional fee is anticipated to have a negative effect on consumer demand or if the City already collects program fees at the upper end of the spectrum of fees collected by other agencies, the fee may not be applied).

[d] This is an estimate that assumes targeted recovery amount was collected from all eligible programs, in practice the fee may fluctuate between 0% and 10% depending on the program area.
[e] The remaining need would require alternative funding sources, such as unobligated General Fund revenues, grant funding, donations, etc.

Source: Estimated labor and FTE information based on FY 21/22 position budgeting data. Estimated recurring non-labor expenditures and estimated citywide overhead based on conservative estimates developed for purposes of this analysis only (see footnote [a] for additional details regarding estimates for recurring non-labor and citywide overhead expenditures). Department non-labor includes an estimate for Department Administration.

[a] Amounts are intended to serve as reasonable estimates. It is difficult to capture only fee-related non-labor expenditures and citywide overhead since many of these expenditures are linked to significant vehicle repair, fuel, and contract services expenditures.

[b] Annual leave assumes the following: Holiday - 12 days; Vacation - 14 days; Sick - 12 days; Mgmt/Jury/Other - 2 days. Actual amounts may vary based on employee length of service and job title. Amounts shown are intended to serve as reasonable for purposes of estimation.

[c] Amounts shown are intended to serve as reasonable for purposes of estimation. Indirect activities and services may include mandatory rest periods, meetings, training, and other administrative activities.

Why set a pricing policy

Setting a pricing policy serves as a tool for evaluating services and establishing appropriate fees. Standardizing how we set prices ensures that the resulting price meets Department goals and provides the framework to ensure consistency for all Roseville residents for the value received. A pricing policy creates transparency and consistency in fees and charges for programs and services.

Establishing a pricing policy yields lasting benefits including:

- Stretching taxpayer investment to realize the optimal return
- Allowing prices to reflect users' investment in themselves based on individual benefit
- Promoting program respect or ownership
- Developing deeper commitment to the programs users help support

The dollars customers invest in their parks, recreation and libraries experiences will come back to them in better quality services and facilities.

Statement of Philosophy

The City of Roseville Parks, Recreation & Libraries Department is dedicated to fostering healthy lifestyles and helping the community thrive. Our Mission is to enhance lives and the community by providing exceptional experiences. As the City continues to grow and facilities age, the Department must be prepared to maintain this high level of service and develop a financial system to continue this community investment.

The Department offers a variety of programs, which benefit the residents and visitors of Roseville. While the community as a whole benefits, different levels of community investment are appropriate based on level of benefit. The goal of this policy is to create a balance between user fees and taxpayer investment for our programs, services and facilities, ensuring that all citizens have equal access and choice in participation.

Pricing Policy

The Parks, Recreation & Libraries Department strives to efficiently offer the most diversified services ensuring that all have equal access and ability to participate in a wide variety of programs and services. The Department prices programs, services and facilities in a manner that balances user fees and taxpayer investment. Pricing takes into consideration the public benefit, users' ability to pay, level of benefit and exclusivity the user receives above what a general taxpayer receives. Pricing ensures equity; those who benefit the most should pay the most. Pricing ensures that users pay appropriate fees and available taxpayer funds are used to achieve the optimal return on investment and ensure access to parks and programs.

Pricing Objectives

This formal pricing policy establishes a comprehensive long-term strategy to address current and future needs of the Roseville community. The objectives of effective pricing are:
Equity – Those who benefit from the service should pay for it. Those who benefit the most should pay the most.

Value – Provide the customer with a benefit in relation to or exceeding the relative monetary worth.

Revenue Production – Producing revenue assists in the overall operations of the Department. It provides flexibility to offer programs which may not otherwise be possible if they are not funded through tax dollars.

Efficiency – Expenditures are made with the most efficient use of our resources so the right mix of programs, facilities and events are offered. Priorities are made to enhance the customer's experience.

Revenue Distribution – Revenues are distributed to the cost center providing expenditures. This pays for direct costs, indirect costs and in some situations future improvement and/or equipment replacement.

Assistance – Not all customers have the same ability to pay and opportunities must exist to waive, reduce or provide scholarship opportunities where appropriate.

Pricing Strategy

To successfully determine price, the Department takes the following steps:

- Identify/classify programs/services/facilities
- Identify core services
- Identify direct and indirect costs
- Establish cost recovery goals/recovery range
- Identify pricing methods
- Determine price
- Determine market value/benchmarking

Core Services

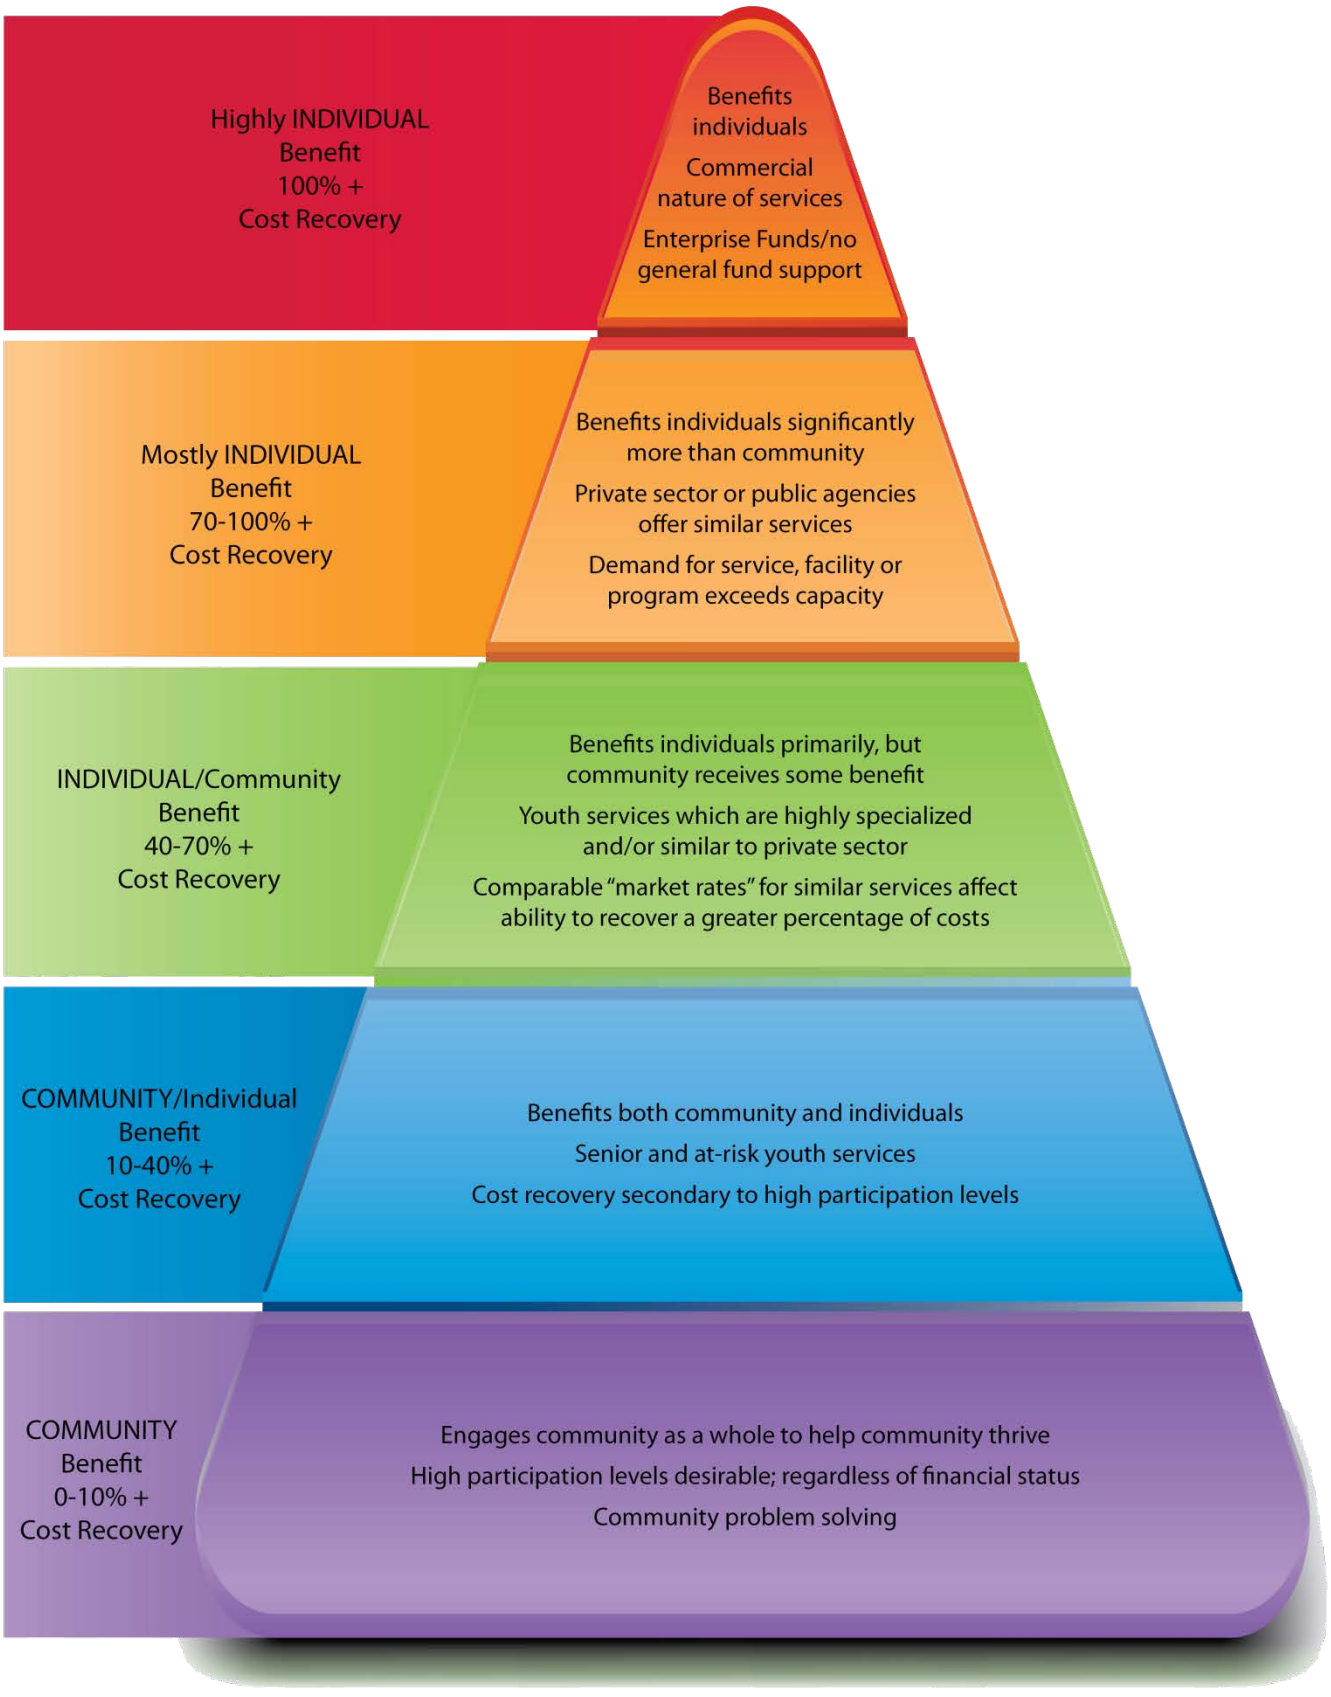
Core services are those which are central and vital to fulfilling our mission. The Department has identified the following core services:

- Access to recreation and cultural experiences for all ages, abilities and demographics
- Existing facilities open, programmed and maintained
- Existing parks maintained and available for community use
- Youth beginning skill development
- Community problem solving
- Community wellness and fitness
- Safe and healthy community
- Access to information
- Literacy
- Parks and facility development
- Preservation of natural resources/open space

The Department concentrates on providing and growing core services and continually evaluates the need for non-core services.

Type of Use

Parks, Recreation & Library services are classified into five different categories. The type of service directly determines the cost recovery strategy or pricing methods to be used in the pricing of services and products. The five categories are listed in the pyramid figure that follows.



Highly INDIVIDUAL
Benefit
100% +
Cost Recovery
Benefits individuals
Commercial nature of services
Enterprise Funds/no general fund support
Mostly INDIVIDUAL
Benefit
70-100% +
Cost Recovery
Benefits individuals significantly more than community
Private sector or public agencies offer similar services
Demand for service, facility or program exceeds capacity
INDIVIDUAL/Community
Benefit
40-70% +
Cost Recovery
Benefits individuals primarily, but community receives some benefit
Youth services which are highly specialized and/or similar to private sector
Comparable "market rates" for similar services affect ability to recover a greater percentage of costs
COMMUNITY/Individual
Benefit
10-40% +
Cost Recovery
Benefits both community and individuals
Senior and at-risk youth services
Cost recovery secondary to high participation levels
COMMUNITY
Benefit
0-10% +
Cost Recovery
Engages community as a whole to help community thrive
High participation levels desirable; regardless of financial status
Community problem solving

Conceptually, the base level of the pyramid represents the mainstay of public parks, recreation and library programs. Programs appropriate to higher levels of the pyramid should only be offered when the preceding levels below are full enough to provide a foundation for the next level. This foundation and upward progression is intended to represent the parks, recreation and library's core services, while also reflecting the growth and maturity of an organization as it enhances its program and facility offerings.

Parks, recreation and library programs are built with a broad supporting base of core service, enhanced with more specialized services as resources allow.

COMMUNITY Benefit

The foundational level of the pyramid is the largest and includes those programs, facilities and services that benefit the COMMUNITY as a whole. These programs, facilities and services may increase property values, provide safety, address social needs, and enhance quality of life for residents. The community generally expects the City to offer these services and supports paying for these services and facilities through taxes. These services are offered to residents at a minimal fee or no fee and support the core services of the Department. A large percentage of the tax support of the agency would fund this level of the pyramid.

COMMUNITY/Individual Benefit

The second and a smaller level of the pyramid represents programs, facilities and services which promote individual physical and mental well-being, and provide recreation skill development. They may have a community benefit but to a smaller group of the community. They are generally the more traditional, expected services and beginner instructional levels. These programs, services and facilities are typically assigned fees based on a specific percentage of direct and indirect costs. Costs are partially offset by both a tax subsidy to account for the COMMUNITY benefit and participant fees to account for the INDIVIDUAL benefit.

INDIVIDUAL/Community Benefit

The third and even smaller level of the pyramid represents services with less of a community benefit which promote individual, physical and mental well-being and provide an intermediate level of recreational skill development. This level provides more INDIVIDUAL benefit and less COMMUNITY benefit and is priced to reflect this. The individual fee recovers more costs or has a higher cost recovery goal than programs and services that fall within the lower levels of the pyramid.

Mostly INDIVIDUAL Benefit

The fourth level of the pyramid represents specialized services generally for specific groups and may have a competitive focus. In this level, programs and services may be priced to recover full cost including all direct and department indirect costs.

Highly INDIVIDUAL Benefit

The top level of the pyramid represents activities that are highly individualized and may even fall outside our core services. In this level, programs and services should be priced to recover full cost including all direct and department and city-wide indirect costs.

Cost Recovery

The Parks, Recreation & Libraries Department sets revenue and expenditure goals annually using criteria set forth in this policy through the budget process approved by the City Council. Programs and services are assigned a cost recovery percentage based on the characteristics outlined below. Programs are evaluated to ensure they fall within the appropriate cost recovery goals.

The Department has identified five cost recovery ranges – Very Low, Low, Medium, High and High+ and each service provided by the Department is assigned to one of these ranges based on type of use. It is important to note the cost recovery percentages assigned to each service represents what the Department would expect to recover under optimal conditions. However, the Department's ability to realize these cost recovery percentages may be constrained by a variety of internal and external factors. These include:

- Market rates and/or competition with other service providers
- Equity in opportunity and the ability to pay
- Community sentiment and expectations
- Political and social will
- Negotiations with external parties
- Program/service viability with decreased participation
- Time and demand of facilities and programs
- Sponsorships/partnerships

The difference between the cost and the revenue recovered represents the public investment in providing the service.

COMMUNITY Benefit (0%-10%) Very Low-Range Cost Recovery Activities
Services in this range have one or more of the following characteristics:

- Community generally and reasonably expects and supports the City to provide these services
- Engage the community as a whole to help the community thrive
- Primarily benefit the community as a whole, though individuals may also benefit
- High levels of resident participation are desirable, regardless of finance status
- Engage children and teens in safe, constructive activities
- Solve a community problem
- Engage seniors in enjoyable, life enhancing activities
- Celebrate the City's history and cultural diversity
- Have offsetting revenue sources to offer program at little or no cost

Services in this range include, but are not limited to:

- Ability to visit and enjoy facilities on an informal basis
- Parks and facility planning and design
- Parks maintenance
- Senior activities/games (cards, chess, knitting, crafts)
- Senior support groups
- Community special events (holidays, tree lighting)
- Veterans Ceremonies
- Free family night swim at Johnson Pool
- Storytime
- Literacy programs for all ages
- Lending library materials/access to online resources
- Homework help
- Public Art

COMMUNITY/Individual Benefit (10%-40%) Low-Range Cost Recovery Activities

Services in this range have one or more of the following characteristics:

- Both individuals (or private parties) and the community as a whole receive benefits from the service
- Primarily for youth, but some alternative opportunities are available
- For youth at-risk or senior services
- Cost recovery is of secondary importance to high participation levels, particularly in the case of core services
- Provided for special populations, which would not, or are unable to, participate in other services

Services in this range include, but are not limited to:

- City sponsored special events
- Adaptive programs
- Neighborhood park program
- Nature centers/interpretive centers/museums
- Public swim
- Youth arts programs

INDIVIDUAL/Community Benefit (40%-70%) Medium-Range Cost Recovery Services

Services in this range have one or more of the following characteristics:

- Individuals (or private parties) are the primary beneficiaries of the service, but the community as a whole receives some benefits
- Comparable "market" rates for similar services affect ability to recover a greater percentage of the costs
- Services are for youth, but are highly specialized and/or similar to those in the private sector
- Services are for adults addressing a need or problem, but full-cost recovery would adversely impact participation rates
- Contribute to improved health & wellness or other overarching Council goals

Services in this range include, but are not limited to:

- Cultural arts programs
- Entry level instructional programs
- Lifeguard training
- Group swim lessons
- Adaptive pool party
- Tot read, take & make

Mostly INDIVIDUAL Benefit (70% to 100%) High-Range Cost Recovery Services

Services in this range have one or more of the following characteristics:

- Individuals (or private parties) benefit significantly more than the community as a whole
- Similar services are offered by the private sector or other public agencies
- Adults are the primary beneficiaries
- Demand for service, facility or program exceeds capacity
- Need to recover most of direct and indirect costs

Services in this range include, but are not limited to:

- Day Camps
- Youth sports (flag football, soccer, basketball)
- Youth special interest programs (babysitting, dance, Lego, chef, math)
- Adult/Senior classes (trips, cooking, Spanish)
- Birthday Parties

- Semiprivate swim lessons – stroke development
- Competitive swim teams
- Fitness memberships

Highly INDIVIDUAL Benefit (100%+) High+ Range Cost Recovery Services
Services in this range have one or more of the following characteristics:

- High individual benefit
- Similar services are offered by the private sector or other public agencies
- Adults are the primary beneficiaries
- Services have a commercial nature
- Demand for service, facility or program exceeds capacity
- Enterprise funds – services operated as a business where no taxpayer support is provided
- Need to recover direct and indirect costs

Services in this range include, but are not limited to:

- Adventure Club
- Preschool
- Golf
- Adult sports (basketball, volleyball, softball)
- Facility rentals
- Commercial recreation
- Personal Training
- Private swim lessons

Facilities

The City maintains a significant inventory of buildings, parks, fields and other facilities. **Basic services** such as the maintenance of safe, clean, attractive parks and buildings, the provision of recreation and library services for the general public, and the preservation and promotion of physical and mental well-being will continue to be supported by taxpayer resources. However, the Department shall prepare and maintain a schedule of fees and charges for **special use of facilities**, those where revenues are necessary to support continued use and individuals pay a fee for the privilege of using the facility to the exclusion of others and without interference.

Basic facilities and services for informal/self-directed recreation include but are not limited to:

- Unscheduled, unlighted, unmarked outdoor athletic facilities and sports courts
- Unreserved picnic tables and shelters
- Parks, playgrounds & town squares
- Parking lots for general facility use
- Trails, paths and restrooms
- Open space

Special uses of facilities include:

- Scheduled/reserved use of indoor or enclosed facilities (gyms, meeting rooms, all weather fields, batting cages, courts, etc.)
- Scheduled use of tennis courts
- Formal, directed, or lighted baseball, soccer, softball, football or other sports specific facilities
- Golf courses
- Maintenance necessary for sports programs
- Swimming pools with lifeguards

- Outdoor theater facilities
- Use of parks for special events
- Reserved picnic tables and shelters

The City has a variety of facilities available for rent including picnic areas, athletic fields, meeting rooms, pools and community centers. Differential pricing is established for these rentals based on the facility and type of use (i.e. resident, non-profit, non-resident, commercial).

Capital Expenditures

Capital expenditures are those costs incurred in constructing a facility and in its later modification, renovation or improvement. For example, a swimming pool may be built, resurfaced, or striped to delineate lanes. Investments in this type of capital have historically been recognized as a benefit to the community as a whole and are borne by the general tax base. In some cases, a portion of fees may be reinvested back into facilities.

Direct/Indirect Costs

Direct costs are those costs which are easily and clearly identifiable to the cost objective (program, service or facility). Indirect costs benefit more than one cost objective and must be allocated proportionally. For example the instructor fee for a class is a direct cost but the electricity for the building benefits all classes and is an indirect cost. (e.g. it must be allocated among the classes proportionately)

Each department operational division records the total costs of operations including both direct and indirect costs. In general, these costs can be identified as follows:

Direct	**Indirect**
Instructor salaries & benefits	Indirect staffing (administration/supervision)
Part-time employees salaries & benefits	Maintenance
Service contracts	Capital replacement
Materials/supplies/equipment	Facility use
Field lighting	Marketing – advertising & promotion
	Utilities

The specific direct costs and estimates of indirect costs are recorded on evaluation sheets for each program and service.

In addition to the department indirect costs listed above, citywide indirect costs (such as human resources, finance and IT) are recovered from enterprise fund operations.

Pricing Methods

The Department recognizes that not all cases are “one price fits all” and the pricing policy must be built to recognize the Department’s priorities and provide the highest amount of flexibility. Use of differential pricing accomplishes these goals by permitting the price to fluctuate based on predetermined factors such as optimal conditions or target user group. By incorporating differential pricing methods when appropriate, the policy also allows users to choose what level of service quality or quantity they want and pay accordingly. The Department implements differential pricing by utilizing the following pricing methods:

Primetime & non-primetime – Pricing premiums for primetime versus non-primetime use assists in allocating the high demand primetime usage and optimizing the non-primetime usage.

Full-time & part-time – Pricing based on amount of time a participant is committed to the use of the program while recognizing priority of full-time.

Season & off-season – Pricing based on season versus off-season permits the usage of service year-round while recognizing priority in specific time periods.

Location – Pricing based on one location versus another provides flexibility in recognizing that not all fields/facilities are the same size nor provide identical amenities.

Age segment – Pricing based on target age segment (i.e. adult, senior, teen, youth) provides flexibility to recognize service priorities and permits variable recovery percentages.

Economic gain – Pricing based on economic gain ensures that when Department property is used by private or closed membership groups for private economic gain, user fees charged are comparable to commercial rates. (Commercial rates for commercial purposes)

Exclusive use – Pricing based on private exclusive use of public property.

Incentives – Pricing which provides incentives for such preferences as early trip registration, season passes, group admissions, annual passes/memberships or frequent use encourages enrollment and return customers.

Move demand – Pricing based on the desire to move participants to another location, time or program.

Resident status – The Department's services historically attract and are open to residents of neighboring communities. While the Department welcomes these customers, we must also be mindful of the impact to our Roseville residents. Although non-resident customers may pay some sales taxes in the City, they do not pay property taxes or neighborhood or community park fees. In an attempt to mitigate this disparity, the Department includes a non-resident surcharge in its pricing strategy. The rate of surcharge varies between zero and 50% based on market demand which considers the following factors:

- The demand from City residents for the program
- The supply/availability of program openings
- The degree of subsidy from the taxpayer for the particular program
- The demand from non-residents for the program
- The viability of the program without non-resident participation
- Recovery goals

These factors directly influence the surcharge. For instance, when there is a demand from City residents for the program and/or low supply or availability of program openings, the surcharge is higher. Additionally, the greater the taxpayer support for the program, the higher non-resident surcharge. When a market condition exists where a high supply of program offerings exist and/or a lower demand by residents, the Department may elect to charge the same fee for residents and non-residents alike or assess a low non-resident surcharge. If non-resident participation was essential or the program would be marginally successful without additional participation, a no or low non-resident surcharge would be appropriate.

There are a number of program areas that the City does not assess a non-resident surcharge. The City does not charge a non-resident surcharge at our golf courses or at Adventure Clubs. Both of these programs are enterprise funds that do not receive taxpayer support. Additionally, the City does not charge a different non-resident fee for fitness memberships or admission at our pools, batting cages and other facilities where it would be impractical to collect such a fee.

This pricing method is communicated to our customers as a resident discount rather that a non-resident surcharge.

Types of Fees

Admission Fees (public swim, drop in fitness & soccer, climbing wall, etc.)
Admission fees are described as one-time (single entry) charges made to enter a facility, structure or special program. Access is controlled and attendance is regulated. Objectives include:

1. To generate funds for the operation and maintenance
2. To produce revenue to offset the cost of programs

User Fees (classes, programs, fitness, etc.)
These fees shall be charged for use of a facility, program or access to a controlled area to recover program costs. Objectives include:

1. To pay for or augment the operation and maintenance of a program or facility
2. To recover cost for material fees such as books, supplies, entrance fees
3. To control use of the facility
4. To assess a portion of the costs to users who may not be taxpayers
5. To enable the Department to provide facilities or programs which might not otherwise be available

Security Deposit (rentals, etc.)
Security deposit fees are charged to secure contracted use of a facility. The objective for this fee is to secure a funding source for unanticipated repair for damages, cleanup or extended time for rental.

Rental Fees (facility, picnic or field rental, etc.)
Rental fees are incurred for the privilege of exclusive use of the facility. This fee gives the user the right to enjoy the advantages of the facility, program or equipment. Rental fees should be sufficient to pay for the replacement of the equipment and the cost of operating the rental service which includes direct staff costs plus a portion of indirect costs. These fees may also be referred to as extra fees. Objectives include:

1. To establish the benefit of exclusive use and secure use for a specific time
2. To provide for the equipment which visitors may not have supplied

Sales Fees (gift shop, concession, etc.)
Payment may be obtained from operation of gift shops and concessions which includes the sale of merchandise. Objectives include:

1. To provide needed supplies
2. To provide merchandise that adds to the visitor's enjoyment of the area
3. To provide revenue to offset indirect costs

Permit Fees (metal detector, model airplanes, commercial use of facility, etc.)
These fees are charged for any permit (written permission) issued by or under the authority of the Parks, Recreation & Libraries Department. Objectives include:

1. To control the conduct of the activity
2. To grant special privilege to the applicant
3. To provide revenue to offset costs of control and operations as well as indirect costs

Additional Service Fees (extra staff, trash removal, road closures, etc.)
Fees may be charged for supplying extraordinary activities or services as an accommodation to the user. These fees may also be referred to as extra fees. Objectives include:

1. To enable special services to be rendered by the Department
2. To provide revenue to offset costs of the special service (additional staff, overtime for staff or contracting for services)
3. To improve the quality of the recreation program by adding value, service or variety
4. Surcharge for enhanced maintenance or fee for marketing programs

Advertising Fees & Sponsorships
Fees may be charged for brochures, signs, banners or other forms of advertising or promotion. Funding may also be paid for support of special events or programs.

Administration Fees (Non-Sufficient Fund fee, returned payment, pay arrangements, etc.)
Fees may be charged for direct and indirect costs associated with administration and oversight of a program or service.

Registration Fees
Registration fees are a type of administrative fee charged specifically in the area of child care and preschool. Such fees cover administrative costs, facility repairs, materials fees and annual child care licensing fees.

Library Materials Fees
Fees are charged to borrowers who do not return library materials by the designated due date. These fees vary depending on the item type and length of time overdue. Additional fees may be charged for lost or damaged items and processing fees.

Reinvestment Fees
Fees may be charged to set aside funds for replacement of existing facilities, amenities or technology.

Setting the Price

While not quite as simple as determining the costs and applying the recovery goal, this is the basic concept behind determining the price. The pricing pyramid assists us in establishing the base level of cost recovery and where the program fits. We then look at our revenue goals and other pricing factors to establish the price for the program. This can be done with the use of a multiplier for each program or through individual analysis. Just as the expenditures and recovery goals vary for each program/service/facility, so does the pricing methods and actual determination of the price. A pricing model is developed for each program/service/facility and assists staff in determining the price.

Pricing model development:

Step 1: Identify the program, service or facility.
Is this a core service? Do any special circumstances exist?

Step 2: Determine the actual cost and include direct and indirect costs.

Step 3: Review the cost recovery range and cost recovery goals to identify the percentage recovery.

Step 4: Multiply the recover percentage by the total cost to arrive at the recovery amount.

Step 5: Divide the recovery amount by the minimum number of people required to hold the class or activity.

Step 6: Adjust the price in accordance with the appropriate pricing methods to establish differential pricing.

Step 7: Review the price against industry standards, customer expectations and previous experiences.

Step 8: Set final price.

The pricing of services is a very conscious procedure that requires continual investigation and review by staff. Fees may be adjusted for market conditions and targeted customers as described in the policy. Services may be provided at a discount to stimulate demand or may be waived to accommodate the disadvantaged or non-profit organizations.

Note: Our Child Care programs are required to give 30 calendar days prior written notice of any basic rate change per State of California, Child Care Center General Licensing Requirements Regulation #101219(4).

Staff use the Pre-Program Analysis worksheet (Attachment A) to assist with fee development. Seasonally the Post-Program Analysis worksheet (Attachment B) is used to evaluate the financial aspects of a program. This analysis helps determine the program success and if it should be continued.

Scholarships

The City of Roseville wants every resident youth to have an opportunity to participate in parks, recreation and library programs. The Department recognizes that not all customers possess the same ability to pay for our programs, services and facilities. The community benefits from the active participation of targeted demographic groups (youth & seniors) as we foster healthy lifestyles. The Department offers a variety of fee and free programs and services to help meet this need.

The Department has several scholarship/grant opportunities available to encourage program participation by reducing, waiving or subsiding fees. Examples of these program include Youth Program Passport, Sparks program assistance, Child Care subsidies, Operation Swim swim lessons, RPAL, teen and senior fitness membership discounts.

Discounts

The Department recognizes discounts encourage participation in fee-based programs and are a valuable marketing tool. Discounts may be used to:

- Increase program/event enrollment or rentals
- Reward continuing/frequent customers and partners
- Encourage customers to try something new
- Facilitate early registration
- Promote registration for multiple sessions of a whole program
- Promote memberships or multiple visit passes

- Provide reduced rates for residents

All discounts are tracked and evaluated for their success. New discounts must be approved by the Parks, Recreation & Libraries Director.

Partnerships

Partnerships bring together at least two entities to jointly develop, operate or maintain parks, recreation and library programs, events and facilities and share risk, operational costs, responsibilities and asset management based on the strengths and weaknesses of each partner. The Department may partner with an organization, individual or business to provide a community benefit, create social interaction, raise awareness or raise money to support a core service. The Department evaluates each partnership opportunity in terms of potential benefits, challenges and drawbacks. When new partnerships are developed, the functions and services of the partnering organizations are recognized and the Department's and the partner's vision, mission and activities are communicated. Additionally, the level of equity commitment required by each partner is identified and agreed to and measureable outcomes for both partners are tracked annually.

The Department has numerous partnerships with local school districts, governmental agencies and both not-for-profit organizations and commercial businesses and will continue to explore new opportunities to create partnerships. Examples of some of these partnerships are outlined below.

Providing high quality athletic facilities for youth compliments the City's overarching goal of creating a safe and healthy community. A component of this effort is to work with not-for-profit organizations within the City to reach this goal while balancing the needs for informal self-directed recreation. Youth league organizations partner with the City to provide athletic opportunities for the community. Organizations must recognize that sports fields require significantly more attention and maintenance and therefore, significantly more resources than basic park facilities. Organizations must invest in this teamwork approach by partnering with the City to ensure our youth have ample opportunity to participate in athletics at various ability levels and to ensure our fields remain safe and of high quality. City personnel allocate fields between these partnering organizations based on resident requirements and the specific seasons. Field allocation policies specifically address this program. Opportunity exists to strengthen these partnerships and invite other organizations to become partners with us. The goal is to be more than a provider of fields but a true partner in the provision of youth athletics in a safe and healthy environment.

Placer Valley Tourism partners with the City to attract tournaments and events that require overnight stays in local hotels. These types of sporting and social events benefit the City overall with tax dollars received from hotel stays, restaurant visits and time spent at Roseville entertainment establishments such as water parks and movie theaters. In these cases, the Parks, Recreation and Libraries Department's goal is to receive 100% of direct costs and a negotiated portion of the indirect costs.

Library materials, programming and technology support are provided by non-profit organizations and help to supplement needed services. For example, the Friends of the Roseville Public Library fund some library programming through book sales, and the Library Foundation helps support mobile library technology.

Summary

The City of Roseville Parks, Recreation & Libraries Department is dedicated to fostering healthy lifestyles and helping the community thrive. The Department strives to maintain its reputation for providing exceptional parks, places, programs and services at a good value to our taxpayers and customers and for preserving and protecting our City's natural resources. Our community size and population is expected to double over the next twenty years and our Department must be prepared to grow accordingly. The formalization of our pricing policy provides us with a comprehensive long-term strategy to address current and future needs of the Roseville community and demands upon the Department.

COUNCIL COMMUNICATION

CC #: 2028
File #: 0400-04-12-1 & 0400-04

Title:	Sierra Vista Specific Plan Parcels KT-40A & KT-40B - Specific Plan Amendment and Development Agreement Amendments
Contact:	Kinarik Shallow 916-746-1309 kshallow@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 10.2.

RECOMMENDATION TO COUNCIL

At the March 24, 2022, Planning Commission meeting, the Planning Commission recommended the City Council take the following actions on the project:

1. Consider the 7th Addendum to the Sierra Vista Specific Plan Environmental Impact Report (EIR);
2. Adopt a resolution approving text and land use map amendments to the Sierra Vista Specific Plan;
3. Adopt the five (5) findings of fact and introduce for first reading an ordinance approving the First Amendment of the Development Agreement by and between the City of Roseville and KV Sierra Vista, LLC ("Baybrook DA"); and
4. Adopt the five (5) findings of fact and introduce for first reading an ordinance approving the Second Amendment of the Development Agreement by and between the City of Roseville and KV Sierra Vista, LLC ("Baseline P&R DA").

BACKGROUND

This Council Communication provides a summary evaluation of the project and a summary of the March 24, 2022, Planning Commission hearing. More detailed background and evaluation are provided in the Planning Commission staff report, included in Attachment 1.

Background/Project Description

The project site is approximately 24 acres and is located on Parcels KT-40A and KT-40B of the Sierra Vista Specific Plan (SVSP), near the northwestern intersection of Santucci Boulevard and Baseline Road. The site is a single parcel with two large lot numbers. The property has a land use designation of Community Commercial/Commercial Mixed Use (CC/CMU) and a zoning designation of Commercial Mixed Use/Special Area (CMU/SA). The CMU/SA zone is described in the SVSP as intended for mixed-use centers that allow for a combination of commercial, office, and residential uses at a minimum density of 13 units per acre. The SVSP allocates a total of 209

residential units to the site. The site is currently undeveloped but consists of abandoned structures in the northwestern portion of the property. The site has frontage on Baseline Road to the south, adjacent to the Curry Creek open space preserve to the north and east, and an undeveloped Park and Recreation parcel to the west planned for a Citywide park.

The City Council approved the SVSP on May 5, 2010. Development Agreements (DAs) with the property owners of the SVSP parcels and the City were entered into to outline development obligations within the Plan area. The project site is currently covered under two different DAs—the "Baybrook DA" and the "Baseline P&R DA."

The requested entitlements will facilitate the development of a multi-family residential project consisting of 209 rental dwelling units, consistent with the site's specific plan unit allocation. The project is designed with "duet style homes," which are attached single-family homes for rent. The applicant is requesting a Specific Plan Amendment to reflect the subdivision of the site into three parcels and to modify the applicable CMU/SA description in the SVSP. The two Development Agreements (Baseline P&R DA and Baybrook DA) applicable to the property will be amended so that the property is covered under one Development Agreement (Baseline P&R DA).

Associated with this request was a Tentative Subdivision Map to subdivide the parcel into three lots (KT-40A, KT-40B, and KT-40C); a Design Review Permit to allow construction of 209 multi-family residential units on Parcel KT-40A; and a Tree Permit to allow the removal of two (2) native oak trees on the site. The Planning Commission unanimously approved these entitlements at the March 24, 2022 meeting. Further discussion and exhibits for these entitlements are included in the Planning Commission staff report (see Attachment 1).

Summary Evaluation

The proposed project was found to be substantially consistent with the SVSP goals and policies. The project will maintain the allocated number of units designated in the SVSP. As such, there will be no impacts on planned infrastructure, roadways, or other public facilities. The land use table, land use map, and all applicable exhibits in the SVSP document will be amended to reflect the subdivision of the project site into three parcels. The SVSP change pages are included as Exhibit B. Parcel KT-40A will be 16.49 gross acres and will have 209 units allocated to the site, resulting in a density of approximately 13 units per net acre. Parcel KT-40B will be 3.44 gross acres, and Parcel KT-40C will be 3.94 gross acres. No changes to the land use or zoning designation are proposed. Parcels KT-40B and KT-40C are not proposed to be developed at this time and will therefore require approval of future Design Review Permits.

Presently, the CMU/SA zone is intended for a mixed-use center with an assumed development allocation of 60% commercial/office and 40% high-density residential with a minimum density of 13 units per acre. Given the 209 allocated units to the site will be developed only on Parcel KT-40A, the applicant is proposing to modify the description of the overlay zone to specify that Parcel KT-40A will be allocated the 209 residential units while Parcels KT-40B and KT-40C will be anticipated for future commercial uses. The permitted uses on KT-40B and KT-40C will be modified with a revised SA overlay to ensure compatibility with the adjacent residential use. The table of permitted uses is included with the SVSP change pages in Exhibit B.

The project includes a first amendment of the Baybrook DA (included as Exhibit C) and a second amendment of the Baseline P&R DA (included as Exhibit D). Each DA in the SVSP consists of a cost-sharing agreement between the landowners, which includes fees that are required to be paid per unit or per commercial building square footage. These fees differ between the DAs because

they have different obligations related to infrastructure/land dedication and Citywide parkland dedication. The portion of the project site subject to the Baybrook DA is 5.2 net acres with an allocation of 46 of the units. The remaining 18.3 net acres have an allocation of 136 units and are subject to the Baseline P&R DA. As a result, there is an inconsistency in the applicable development fees for the project. The applicant proposes to rectify this by amending the Baybrook DA to exclude the portion of the project site and including it with the Baseline P&R DA. This necessitates amendments to the legal description of the covered properties in each DA and changes to Section 2.2 to update the land use acreages. In addition, Section 4.8.2.1 is added to the Baseline P&R DA, which outlines the infrastructure fee allocations for Parcels KT-40A, KT-40B, and KT-40C. Lastly, Section 3.17.1.2(i) of the Baseline P&R DA, relating to the SVSP fee program, will be amended to remove the previous fee deferrals, except for the deferrals of the South Placer Regional Transportation Authority (SPRTA) Tier II Traffic Fee and the City-wide Park fee. This is consistent with the fee deferrals removed with prior DA Amendments in the SVSP area.

Items that are not addressed in the amendments are subject to the terms of the original DAs and prior Amendment. In summary, the Planning Commission has found the proposed DA Amendments to be consistent with the General Plan, SVSP, and the Zoning Ordinance. The DA Amendments are in conformance with the public health, safety, and welfare and will not adversely affect the orderly development of the property or the preservation of property values.

Summary of Planning Commission Meeting

The City's Planning Commission heard the project on March 24, 2022. The Commission asked questions regarding the enforcement of the condition to prevent garages from being used for storage, the orientation of the units relative to parking areas, specifically related to vehicle lights shining into units, and for examples of this product type in other locations. Staff and the applicant provided the following answers; keeping the garages clear for cars is a condition of approval which will be enforced through code enforcement, the applicant uses landscaping and window design to prevent vehicle lighting from shining into the units, and the applicant is constructing similar developments in Bradenton, Florida and the greater Phoenix area.

During the public comment period, one member of the public asked whether staff considered the commute and traffic and stated he thinks the project is modern and attractive. Staff indicated that traffic was analyzed for the site, and there was a reduction in trips from what was originally anticipated.

The Commission was supportive of this unique housing option and suggested this product type meets a need of the community. The Commission indicated support for various housing types in Roseville with varying densities and price points for residents with different income levels and at varying stages of life.

After deliberating on the item, the Planning Commission considered the 7th Addendum to the SVSP Environmental Impact Report (EIR), approved the Tentative Subdivision Map, Design Review Permit, and Tree Permit, and recommended the City Council approve the Specific Plan Amendment and Development Agreement Amendments, with a vote of 6 aye, 0 nay, 1 absent.

Public Outreach

The proposed project was distributed to all internal and external agencies and departments who have requested such notice, and all comments or recommended conditions of approval have

been incorporated into the project as appropriate. Early notification of the project was posted on the Roseville Coalition of Neighborhood Associations (RCONA)'s website. Notice of both the Planning Commission hearing and the City Council hearing was published in the Roseville Press Tribune and on the Roseville Coalition of Neighborhood Associations website and mailed to all property owners and residents within a 300-foot radius of the project site. As of the writing of this report, staff has not received any public comments regarding the project.

FISCAL IMPACT

The project is not anticipated to result in any negative impacts to the City's General Fund. The project will generate construction jobs.

ENVIRONMENTAL REVIEW

Consistent with CEQA Guidelines Section 15164, regarding previously certified and adopted Environmental Impact Reports (EIR), a 7th Addendum to the Sierra Vista Specific Plan EIR (SCH #2008032115, certified May 5, 2010) has been prepared to cover the minor technical changes and additions necessary to describe the impacts of the proposed project (see Exhibit A). The 7th Addendum did not identify any new environmental impacts from the project. The project is conditioned to comply with the applicable SVSP EIR mitigation measures.

Planning Division Staff Report
Planning Commission Meeting ***March 24, 2022***
Prepared by: Kinarik Shallow, Associate Planner

ITEM 6.3: **Specific Plan Amendment, Development Agreement Amendment, Design Review Permit, Tentative Subdivision Map, and Tree Permit – 6350 Baseline Road – SVSP PCL KT-40A & KT-40B – Estia – File #PL21-0256**

REQUEST

The proposed project is a Tentative Subdivision Map to subdivide the 23-acre property into three parcels (KT-40A, KT-40B, and KT-40C), a Tree Permit to remove two native oak trees, and a Design Review Permit to allow construction of 209 multi-family residential units on parcel KT-40A. In addition, a Specific Plan Amendment is requested to reflect the subdivision of the site and to modify the applicable Commercial Mixed Use/Special Area (CMU/SA) description in the Sierra Vista Specific Plan. The two Development Agreements ("Baseline P&R DA" and "Baybrook DA") applicable to the property will be amended so that the property is covered under one Development Agreement (Baseline P&R DA).

Applicant – Jeff Pemstein, Towne Development of Sacramento
Property Owner – KV Sierra Vista, LLC

SUMMARY RECOMMENDATION

The Planning Division recommends the Planning Commission take the following actions:

1. Consider the 7th Addendum to the Sierra Vista Specific Plan Environmental Impact Report;
2. Recommend the City Council approve the Specific Plan Amendment;
3. Recommend the City Council adopt the five (5) findings of fact and approve the Development Agreement Amendment ("Baseline P&R DA");
4. Recommend City Council adopt the five (5) findings of fact and approve the Development Agreement Amendment ("Baybrook DA");
5. Adopt the four (4) findings of fact and approve the Design Review Permit subject to ninety-three (93) conditions of approval;
6. Adopt the three (3) findings of fact and approve the Tentative Subdivision Map subject to forty-seven (47) conditions of approval; and
7. Adopt the two (2) findings of fact and approve the Tree Permit subject to twenty (20) conditions of approval.

SUMMARY OF OUTSTANDING ISSUES

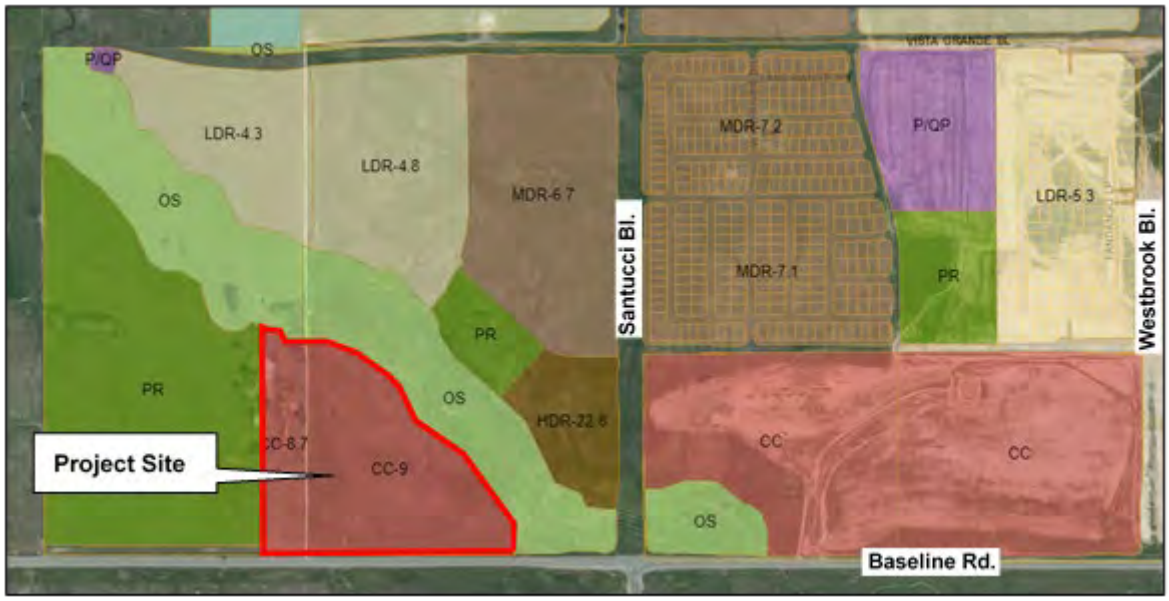
There are no outstanding issues associated with this request. The applicant has reviewed and is in agreement with all recommended conditions of approval.

BACKGROUND

The 23-acre project site is located at 6350 Baseline Road (APN 499-010-014-000), on Parcel KT-40A and KT-40B within the Sierra Vista Specific Plan (SVSP) area (see Figure 1 below). The site is a single parcel with two large lot numbers. The property has a land use designation of Community Commercial/Commercial Mixed Use (CC/CMU) and a zoning designation of Commercial Mixed Use/Special Area (CMU/SA). The CMU/SA zone is described in the SVSP as intended for mixed-use centers that allow for a combination of commercial, office, and residential uses at a minimum density of 13 units per acre. The SVSP allocates a total of 209 residential units to the site. The site is currently

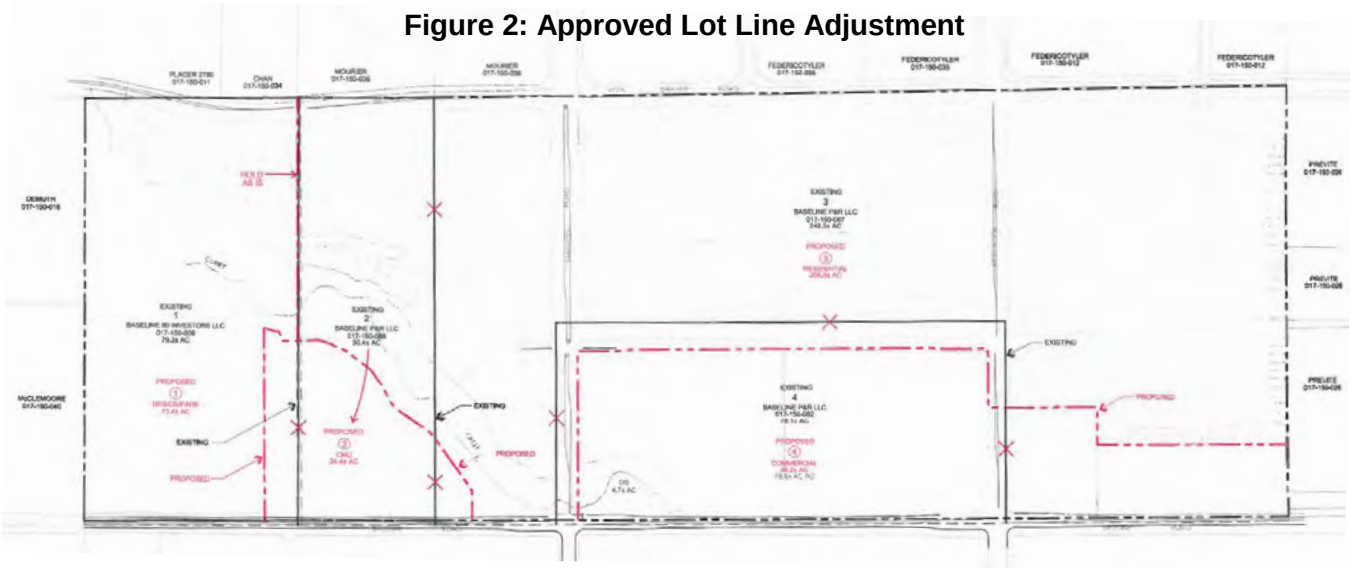
undeveloped but consists of abandoned structures in the northwestern portion of the property. The site has frontage on Baseline Road to the south, and is adjacent to the Curry Creek open space preserve to the north and east, and an undeveloped Park and Recreation parcel to the west that is planned for a Citywide park.

Figure 1: Project Location



The SVSP was approved by the City Council on May 5, 2010 (file #2007PL-044). Development Agreements (DAs) with the property owners of the SVSP parcels and the City were entered into to outline development obligations within the Plan area. In January 2014, a lot line adjustment (file #PL13-0236) was approved administratively by the Planning Manager to modify the boundaries of four (4) fee parcels that encompassed approximately 450 acres of the SVSP (see Figure 2 below). The property boundaries were adjusted to conform to the lot lines as configured on the approved SVSP Phased Large Lot Tentative Subdivision Map and the SVSP Land Use Plan. Originally, Parcel KT-40A was located on Parcel 1 and Parcel KT-40B was located on Parcel 2. In addition, these parcels were covered under two different DAs—Parcel 1 was covered under the "Baybrook DA" and Parcel 2 was covered under the "Baseline P&R DA". The lot line adjustment resulted in both Parcels KT-40A and KT-40B being located on Parcel 2, however the parcels remain subject to two different DAs.

Figure 2: Approved Lot Line Adjustment



Proposed Project

The proposed project includes a Tentative Subdivision Map to subdivide the 23-acre property into three parcels (KT-40A, KT-40B, and KT-40C), a Design Review Permit to allow construction of 209 multi-family residential units on the resulting Parcel KT-40A, and a Tree Permit to allow removal of two (2) native oak trees. Approximately 7.5 acres of the site, which will be the resulting parcels KT-40B and KT-40C fronting on Baseline Road, will remain undeveloped and designated for future commercial uses. A separate Design Review Permit will be required prior to development of parcels KT-40B and KT-40C. The project requires a Specific Plan Amendment to reflect the subdivision of the site and to modify the applicable CMU/SA description in the SVSP. Lastly, the two Development Agreements (Baseline P&R DA and Baybrook DA) applicable to the property will be amended so that the property is covered under one Development Agreement (Baseline P&R DA).

The proposed multi-family residential development, Estia, will consist of 209 rental dwelling units. The project is designed as a "duet" style, which consists of attached single-family homes. There will be a mix of single-story, one-bedroom and two-bedroom units ranging from 709 to 1,083 square feet, with three (3) total plan types. The community will be gated and the units will have private entries, limited shared walls, covered porches, and private fenced backyards with covered patios. The project includes a clubhouse building with a fitness center, a maintenance building, and site amenities such as an outdoor swimming pool, a courtyard with bocce ball and cornhole, a dog park, paseos, and landscaping. A portion of the parking spaces provided will be located in rentable garages that will have separate storage units for residents.

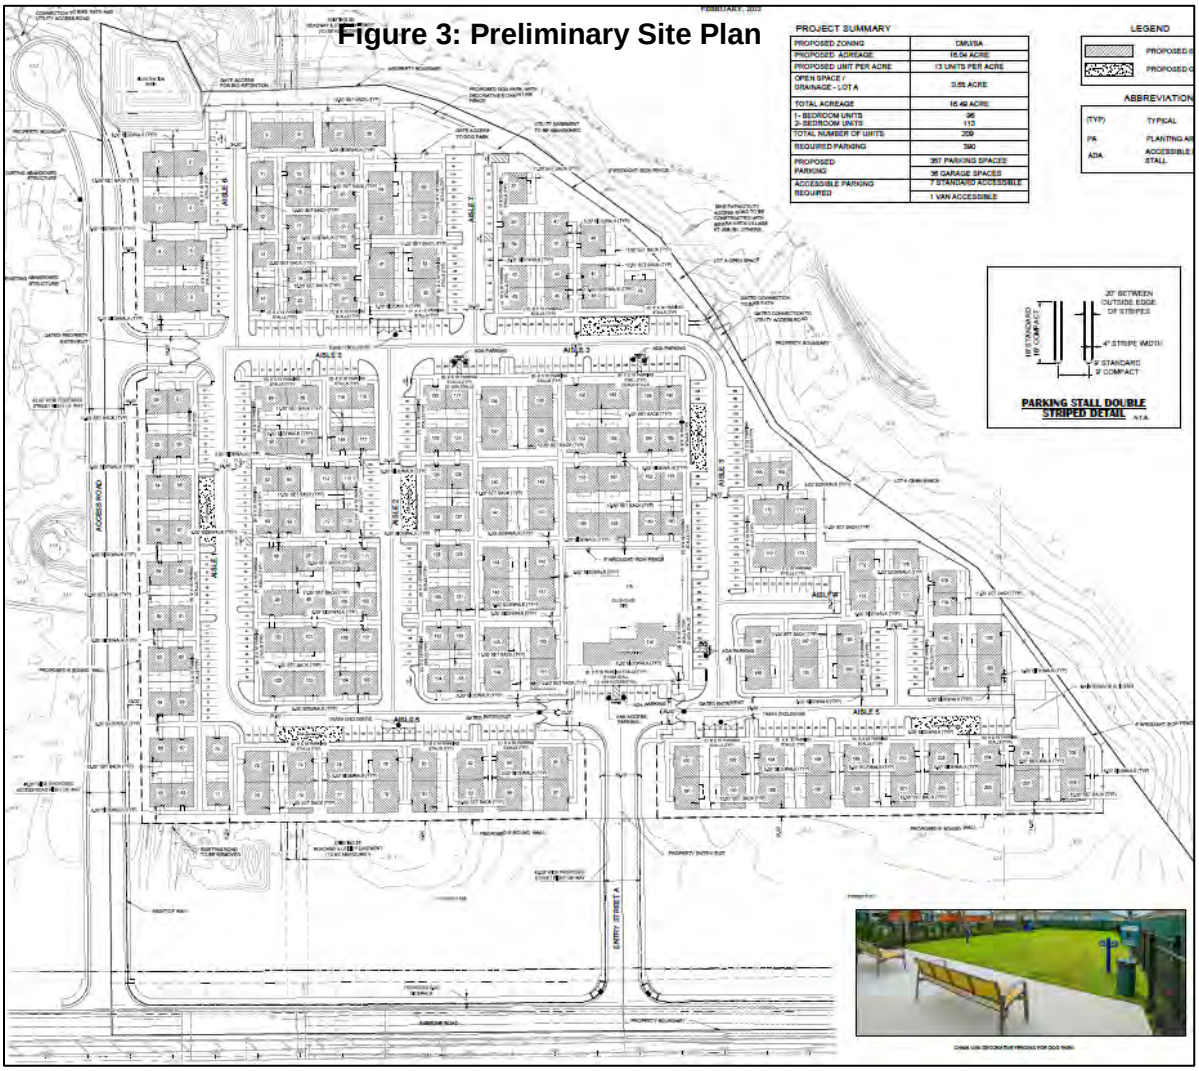


Figure 3: Preliminary Site Plan

EVALUATION – SPECIFIC PLAN AMENDMENT

Specific Plan Amendments (SPA) are analyzed for consistency with the goals and policies of the affected plan. The project will allow development of 209 multi-family residential units, which is the same number of units allocated to Parcels KT-40A and KT-40B in the SVSP. The land use table, land use map, and all applicable exhibits in the SVSP will be amended to reflect the subdivision of the site into three parcels (KT-40A, KT-40B, and KT-40C). Parcel KT-40A will be 16.49 gross acres and will have 209 units allocated to the site. Parcel KT-40B will be 3.44 gross acres and Parcel KT-40C will be 3.94 gross acres. No changes to the land use or zoning designation are proposed. The project will maintain the same number of units in the SVSP. As such, there will be no impacts to planned infrastructure, roadways, or other public facilities.

The SPA also consists of amending the Special Area (SA) overlay description of the CMU zone. Presently, the CMU/SA zone is intended to be a mixed-use center with an assumed development allocation of 60% commercial/office and 40% high-density residential with a minimum density of 13 units per acre. Given the 209 allocated units to the site will be developed only on Parcel KT-40A, the applicant is proposing to modify the description to specify Parcel KT-40A will be allocated the 209 residential units while Parcels KT-40B and KT-40C will be anticipated for commercial uses. The permitted uses on KT-40B and KT-40C will be modified with the SA overlay to ensure compatibility with the adjacent residential use. The table of permitted uses is included with the SVSP change pages in Exhibit A.

EVALUATION – DEVELOPMENT AGREEMENT AMENDMENT

Section 19.84.040 of the City of Roseville Zoning Ordinance specifies that recommendations for approval or denial of a Development Agreement (DA), including Amendments, shall include consideration of the following:

1. ***Consistency with the objectives, policies, general land uses and programs specified in the General Plan and the Sierra Vista Specific Plan;***

2. ***Consistency with the provisions of the City of Roseville Zoning Ordinance;***

3. ***Conformity with the public health, safety and general welfare;***

4. ***The effect on the orderly development of the property or the preservation of property values; and***

5. ***Whether the provisions of the Agreement shall provide sufficient benefit to the City to justify entering into the Agreement.***

The project includes a first amendment of the Development Agreement (DA) by and between the City of Roseville and Baybrook Limited Partnership relative to the Sierra Vista Specific Plan (or the Baybrook DA) and a second amendment of the DA by and between the City of Roseville and Baseline P&R, LLC relative to the Sierra Vista Specific Plan (or the Baseline P&R DA). The DA Amendments are included as Exhibits B and C.

Development Agreements are binding contracts that set the terms, rules, conditions, regulations, entitlements, responsibilities, and other provisions relating to the development of the covered properties. Each DA in the SVSP includes a cost sharing agreement between the landowners, which includes fees that are required to be paid per unit or per commercial building square footage. These fees differ between the DAs because they have different obligations related to infrastructure/land dedication and Citywide park land dedication. The portion of the project site subject to the Baybrook DA is 5.2 net acres and 46 of the units. The remaining 18.3 net acres and 136 units are subject to the Baseline P&R DA. As a result, there is an inconsistency in the applicable development fees for the project. The applicant proposes to rectify this by amending the Baybrook DA to exclude the portion of the project site and

including it with the Baseline P&R DA. This necessitates amendments to the legal description of the covered properties in each DA and changes to Section 2.2 to update the land use acreages. In addition, Section 4.8.2.1 is added to the Baseline P&R DA, which discusses the infrastructure fee allocations for Parcels KT-40A, KT-40B, and KT-40C. Lastly, Section 3.17.1.2(i) of the Baseline P&R DA, relating to the SVSP fee program, will be amended to remove the previous fee deferrals, except for the deferrals of the South Placer Regional Transportation Authority (SPRTA) Tier II Traffic Fee and the City-wide Park fee.

Items that are not addressed in the amendments are subject to the terms of the original DAs and prior Amendment. In summary, City staff has found the proposed DA Amendments to be consistent with the General Plan, SVSP, and the Zoning Ordinance. The DA Amendments are in conformance with the public health, safety, and welfare, and will not adversely affect the orderly development of the property or the preservation of property values. Therefore, the proposed DA Amendments are consistent with items 1-5 above.

EVALUATION – DESIGN REVIEW PERMIT

The evaluation of the Design Review Permit has been based on the applicable development and design standards within the City's Zoning Ordinance, the City's Community Design Guidelines (CDG), and the SVSP. Section 19.78.060(B) of the City of Roseville Zoning Ordinance requires four findings of fact be made in order to approve a Design Review Permit. The four findings for approval of the Design Review Permit are listed below in ***italicized, bold*** text and are followed by an evaluation of the project in relation to each finding.

1. ***The project as approved preserves and accentuates the natural features of the property, such as open space, topography, trees, wetlands and water courses; provides adequate drainage for the project; and allows beneficial use to be made of the site for development.***

The project site is currently undeveloped and is comprised mostly of annual grasslands. The northwestern corner of the parcel consists of a mix of evergreen and deciduous trees as well as abandoned structures. Two of the existing trees are considered protected oak trees and will require approval of a Tree Permit. Further discussion is provided in the Tree Permit evaluation section of this report. No other biological resources exist on the site. Aerials of the site show evidence of previous ground disturbance due to construction of adjacent roadways. A bioretention basin is proposed on the northwestern corner of the site. The project has been reviewed by the City's Engineering Division and has been designed consistent with City standards related to drainage improvements and stormwater quality facilities. The proposed project will allow a beneficial use to be made of the site.

2. ***The project site design as approved provides open space; access; vehicle parking; vehicle, pedestrian and bicycle circulation; pedestrian walks and links to alternative modes of transportation; loading areas; landscaping; irrigation; and lighting which results in a safe, efficient, and harmonious development and which is consistent with the applicable goals, policies and objectives set forth in the General Plan, the Community Design Guidelines and the applicable specific plan and/or applicable design guidelines.***

Multi-family residential development guidelines are included within the City's Community Design Guidelines (CDG). The guidelines include recommendations for site planning, circulation, architecture, and other aspects of development. The following discussion provides an evaluation with respect to the applicable design guidelines in the CDG.

Site Planning

The Estia project will be constructed on Parcel KT-40A, which will be setback ±220 feet north of Baseline Road. Access to the community will be gated. The site plan is designed with the clubhouse building situated at the entry to the development with the outdoor area facing internal to the site. The residential units are primarily arranged in clusters of four with fenced backyards facing each other. The design of the fence will

be determined at the time of building permit submittal. The setbacks between the rear of the buildings range from approximately 22 feet to 25 feet. Some units will side on to the proposed roadway on the west and will be setback 25 feet from the back of sidewalk. The units siding on to the adjacent commercial parcels will be setback 10 feet from the property line. A 6-foot-tall masonry wall will be constructed along the southern and western boundary of Parcel KT-40A to provide sound attenuation from the future commercial parcels and adjacent roadways. Consistent with the SVSP design guidelines, a 6-foot-tall wrought-iron fence will be constructed adjacent to the open space along the northeastern boundary.

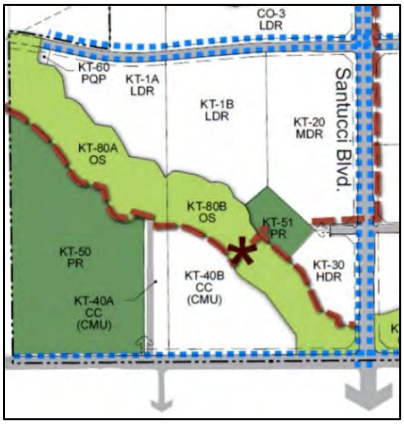
Vehicle Access and Circulation

The existing access road that runs through the property will be removed. A 42-foot-wide roadway ("Entry Street A") will be constructed in between Parcels KT-40B and KT-40C that will provide a connection to the Estia Development from Baseline Road to the south. Baseline Road will ultimately have six lanes, however the project will provide interim improvements that will provide for four lanes with an auxiliary lane, a 6-foot-wide bike lane, and 8-foot-wide sidewalks. A 46-foot-wide access road ("Access Road") will also be constructed along the western boundary of the project site between the future Citywide park parcel. As required by the SVSP, infrastructure will be installed for a traffic signal at the intersection of Baseline Road and Access Drive. The Estia project will have a 34-foot-wide driveway located on Access Road that will provide for a secondary gated entry/exit for residents.

The project consists of several internal drive aisles aisle that will provide access to the parking areas. The project was reviewed by the City Engineering and City Fire Department staff and was found to comply with refuse service standards and with emergency circulation requirements.

Pedestrian Access and Circulation

Figure 4: Portion of SVSP Figure 6-21



Pedestrian connections will be provided throughout the project site. Five-foot wide sidewalks will connect the parking lot areas to the residential units. These sidewalks will also connect to the perimeter sidewalks on Baseline Road and Access Road. Per SVSP Figure 6-21, which is shown in Figure 4 on the right, a Class I bikeway is planned along a portion of the open space adjacent to the site (represented by the red dashed line) with a trail crossing connecting to the northern side. The project will provide a gated pedestrian connection to the bike path consistent with the SVSP requirements. A second connection to the bike path will be provided via the sidewalk along the access road on the west.

Parking

Parking for the site is based on the Zoning Ordinance parking requirement for multi-family residential uses, which requires 1.5 spaces per 1-bedroom unit and 2 spaces per 2+ bedroom units. In addition, projects with 10 or more dwelling units must provide one (1) additional space for every 10 dwelling units or portion thereof. The project consists of 209 units, which will require 20 guest parking spaces. The project consists of 96 one-bedroom units and 113 two-bedroom units. Based on this, the project requires a total of 390 parking spaces (which includes guest parking). The site plan indicates 357 parking spaces and 36 garage spaces will be provided for a total of 393 spaces, exceeding the parking requirement. The parking spaces are evenly distributed throughout the site. A condition of approval has been placed on the project requiring the CC&Rs to include a clause prohibiting storage in the garages that displaces vehicle parking (see Condition 27d of the Tentative Subdivision Map).

Landscaping and Open Space

CDG Policy MF-44 recommends using landscaping throughout the site, placing trees to provide shading for sidewalks and public spaces, using native or drought-tolerant plants where possible, and providing a

minimum of 50% shading (based on 15-year maturity) over the parking spaces. The proposed landscape plan is included in Exhibit J. Landscaping will be provided around the perimeter of the site, at project entries, within the parking lot areas, in front of the units, and around the clubhouse building. The trees used within the parking lot areas provide 51% shade coverage of the uncovered parking spaces, which meets the CDG requirement. The project includes a 15-foot wide landscape setback along Access Road. Primary street trees proposed within the setback consist of a mix of shade and accent trees consistent with the SVSP recommended plant palette. Landscaping adjacent to the preserve is conditioned to consist of California native, drought-tolerant groundcover, shrubs, plants, and trees. Overall, the landscape design is consistent with the SVSP design guidelines, the CDG and the City's Water Efficient Landscape Ordinance. Because development of the commercial parcels is not proposed at this time, landscaping along Baseline Road will be reviewed as part of the Design Review Permit required for Parcels KT-40B and KT-40C.

As encouraged by the CDG, the project includes open space areas and other recreational amenities. Each unit will consist of a covered porch and fenced backyard with a covered patio. The Unit 1 patio areas will be 70 square feet and the Unit 2 patio areas will be 80 square feet. The clubhouse will have an outdoor area enclosed with a 6-foot-tall wrought-iron fence. The outdoor area will feature a pool, an outdoor fire pit and BBQ grills, and recreational amenities such as bocce ball and cornhole. A gated dog park will also be provided in the northern portion of the site as an additional amenity for residents.

Lighting

The project will consist of building-mounted light fixtures that complement the architectural style of the buildings. The project is conditioned to comply with the City's minimum lighting level requirements (0.5 foot-candles in pedestrian areas and 1.0 foot-candles in vehicle areas). In addition, pole mounted lighting shall be no taller than twenty-five (25) feet and lighting sources shall have cut off lenses and be located to avoid light spillage and glare on adjacent properties.

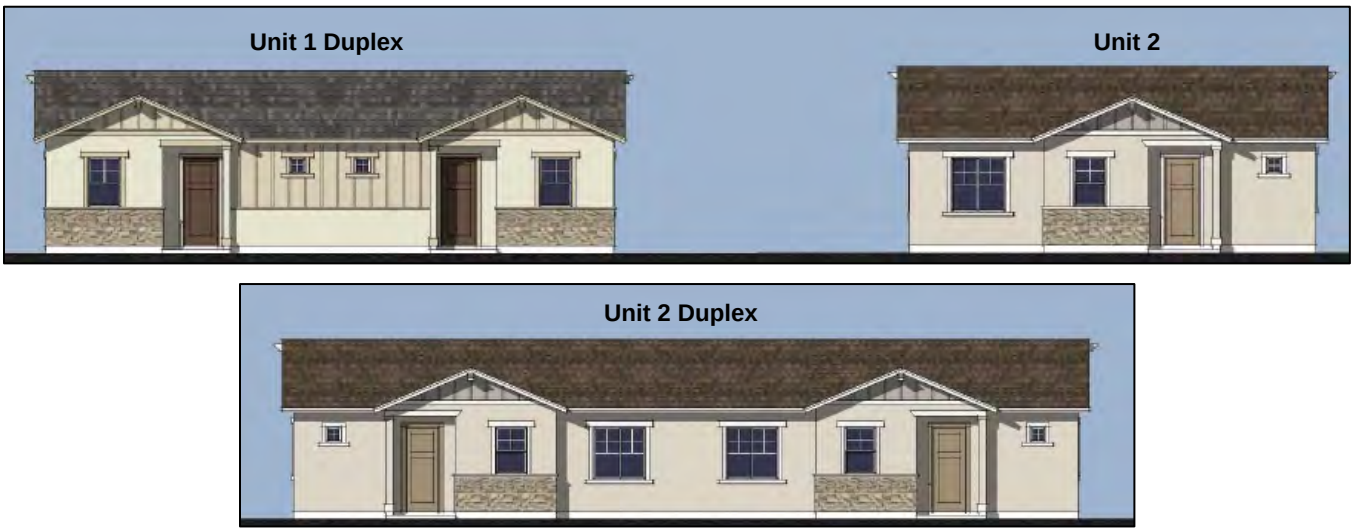
3. The building design, including the materials, colors, height, bulk, size and relief, and the arrangement of the structures on the site, as approved is harmonious with other development and buildings in the vicinity and which is consistent with the applicable goals, policies and objectives set forth in the General Plan, the Community Design Guidelines and the applicable specific plan and/or applicable design guidelines.

Key guidelines related to architectural design within the CDG for multi-family residential projects include direction to define development character through the use of a consistent design concept (MF-26), to use variation in wall planes and building form to create visually engaging designs (MF-28), to use a variation of colors and materials (MF-32), and to apply architectural treatment to all elevations of a building (MF-33).

Unit Designs

Figure 5 below includes the front building elevations for the three plan types offered (Unit 1 Duplex, Unit 2, and Unit 2 Duplex), which are all single-story with an overall height of approximately 16 feet. The Unit 1 Duplex will consist of two attached units that are 709 square feet each. Unit 2 is 1,083 square feet and will be offered as either a detached or attached unit. Of the 209 units, 96 units will be one-bedroom units and 113 units will be two-bedroom units. The units are designed to resemble single-family homes with a craftsman style, utilizing a mix of stucco and board and batten siding, stacked stone veneer, low pitched gable roofs with composition asphalt shingles, and decorative wood corbels. Five (5) color schemes consisting of complimentary neutral and earth tones will be used throughout the project. Consistent with CDG Policy MF-33, architectural treatment is applied to all elevations of the buildings and all windows and doors are trimmed.

Figure 5: Front Building Elevations



Clubhouse Building

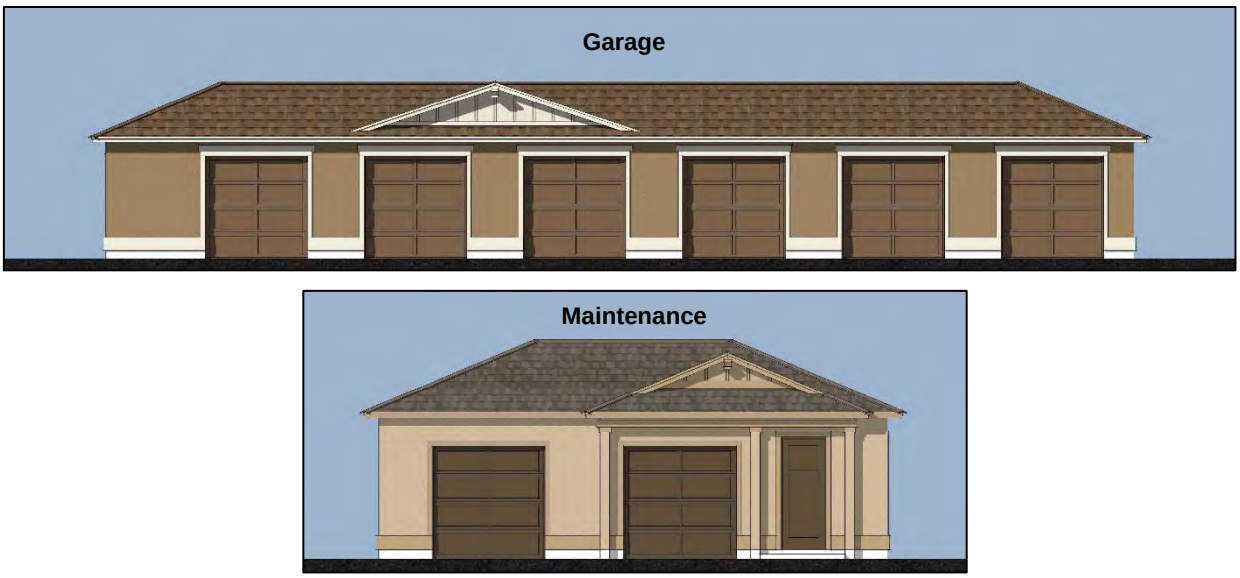
The clubhouse building is a 3,551-square-foot single-story building that will consist of a leasing office, fitness center, club room, and an outdoor area enclosed with a 6-foot tall wrought iron fence. The front building elevation is shown in Figure 6 below. The building will utilize one of the color schemes applied for the residential units and is designed consistent with the craftsman theme of the project. Similar to the residential units, the building primarily consists of stucco and utilizes stacked stone veneer and board and batten siding in accent areas to add decorative detail. The variation in building height and wall planes combined with the mix in colors and materials creates a visually engaging design consistent with the CDG.

Figure 6: Clubhouse Building

Garages and Maintenance Buildings

The garage and maintenance buildings are shown in Figure 7 below. There will be six (6) garage buildings that will consist of six (6) parking spaces each. The garages will be approximately 1,500 square feet and will be distributed throughout the parking lot. As shown in Exhibit H, the left elevation of the garages will consist of four (4) storage spaces that will be available for rent. Each storage space will be approximately 100 square feet. There will be one 794-square-foot maintenance building in the southeastern portion of the site. The garage and maintenance buildings are designed consistent with the residential units and clubhouse building.

Figure 7: Garage/Storage & Maintenance Buildings



Overall, the elevations are designed to include variation in colors, materials, wall planes, and rooflines to create a visually interesting design that is compatible with neighborhoods in the vicinity of the project and the CDG.

4. ***The design of the public services, as approved, including, but not limited to, trash enclosures and service equipment are located so as not to detract from the appearance of the site, and are screened appropriately and effectively using construction materials, colors and landscaping that are harmonious with the site and the building designs.***

All trash containers will be screened within a trash enclosure. The project will provide a total of three trash enclosures that will match the color and materials of the residential buildings. The enclosures will surround the three non-accessible sides of the trash containers, and will also be screened with landscaping. All other service equipment will be screened from public view, consistent with the conditions of approval.

EVALUATION – TENTATIVE SUBDIVISION MAP

Section 18.06.180 of the City of Roseville Subdivision Ordinance requires that three findings be made to approve or conditionally approve a Tentative Subdivision Map. The three findings are listed below in ***italicized, bold*** text and are followed by an evaluation of the map in relation to each finding.

1. ***The size, design, character, grading, location, orientation and configuration of lots, roads and all improvements for the tentative subdivision map are consistent with the density, uses, circulation and open space systems, applicable policies and standards of the general plan or any applicable specific plan for the area, whichever is more restrictive, and the design standards of Title 18 (Subdivision Ordinance) of the Roseville Municipal Code.***

Parcel size, design, character, location, orientation and configuration: The proposed subdivision will result in the creation of three development parcels—KT-40A, KT-40B, and KT-40C. Parcel KT-40A will be 16.49 gross acres, Parcel KT-40B will be 3.44 gross acres, and Parcel KT-40C will be 3.94 gross acres. A 0.55-acre parcel (Parcel A) will also be created and dedicated to the City as open space and will be located along the existing open space parcel to the north. Parcels KT-40B and KT-40C will have frontage on Blue Oaks Boulevard to the south and Parcel KT-40A will be located to the north of these parcels. The Map Act and Subdivision Ordinance do not contain any maximum or minimum lot sizes.

Based on the Design Review Permit evaluation section, the lots are large enough to adequately allow for the proposed development on the parcels.

Grading and Drainage: Grading and drainage required for development of the parcels have been reviewed with the Design Review Permit and have been determined to comply with City standards as shown in the grading and drainage plan, and as conditioned.

Access & Circulation: The project is conditioned to ensure the access roads and driveways are constructed to comply with the City's design standards. On-site circulation has been reviewed with the Design Review Permit and found to be adequate. Access and circulation is consistent with the City's Subdivision Ordinance and the City's Improvement Standards.

2. The subdivision will result in lots which can be used or built upon. The subdivision will not create lots which are impractical for improvement or use due to the steepness of terrain or location of watercourses in the area; the size or shape of the lots or inadequate building area; inadequate frontage or access; or, some other physical condition of the area.

The proposed parcels are of sufficient size and shape to accommodate the proposed development and are consistent with the applicable zoning and design requirements, as discussed in the Design Review Permit evaluation section of the staff report. There are no watercourses or other natural features on the site that would impede development.

3. The design and density of the subdivision will not violate the existing requirements prescribed by the Regional Water Quality Control Board for the discharge of waste into the sewage system, pursuant to Division 7 of the Water Code.

Anticipated water quality impacts and discharge of waste are not affected by the proposed Tentative Subdivision Map. The design of the sewer lines in the project area and treatment capacity at the City's sewage treatment plant have adequate conveyance and capacity to accommodate development on the proposed parcels created by the Tentative Subdivision Map.

EVALUATION – TREE PERMIT

Pursuant to Zoning Ordinance Section 19.66.030, a Tree Permit is required for any removal of native oak trees or for more than 20% encroachment into the dripline of a native oak tree. The proposed project will result in the removal of several native oak trees. The required findings to approve a Tree Permit are listed below.

1. Approval of the Tree Permit will not be detrimental to the public health, safety or welfare, and approval of the Tree Permit is consistent with the provisions of Chapter 19.66.

2. Measures have been incorporated into the project or permit to mitigate impacts to remaining trees or to provide replacement for trees removed.

An arborist report including a tree inventory summary was provided by California Tree and Landscape Consulting, Inc., dated February 20, 2020 (see Exhibit K). All of the trees present on the property, which are located in the northwestern portion of the site, will be removed to facilitate development of the site. Two (2) of these trees were identified as protected oak trees with a total aggregate diameter of 54 inches (see Table 1 below).

Table 1: Protected Oak Tree Removals

Tree #	Common Name	Botanical Name	Diameter at Breast Height (DBH)	Tree Condition
8511	Interior Live Oak	*Quercus wislizeni*	31”	Fair – Minor Problems
8513	Interior Live Oak	*Quercus wislizeni*	23”	Extreme Structure or Health Problems

The applicant has proposed to comply with the compensation requirements of the City’s Tree Preservation Ordinance. The total number of mitigation inches for this project is 54. Mitigation will be completed with a combination of on-site planting and payment into the City’s in-lieu fee program. The funds in the City’s in-lieu fee program are used for the replanting and preservation of trees throughout the City and are calculated at a rate of $118 per inch of tree removed when measured at the tree’s diameter at breast height (DBH). The tree mitigation fees are required to be paid prior to the removal of the trees.

The Tree Permit contains all of the standard conditions of approval, which includes a requirement to follow all of the recommendations of the Arborist Report. The arborist’s recommendations include monitoring any excavation for the retaining wall footings for the trees to remain on the site. The removal of these trees will not be detrimental to the public health, safety, or welfare, and measures have been incorporated to mitigate impacts.

PUBLIC OUTREACH

The proposed project was distributed to all internal and external agencies and departments who have requested such notice, and all comments or recommended conditions of approval have been incorporated into the project, as appropriate. Early notification of the project was posted on the Roseville Coalition of Neighborhood Associations (RCONA)’s website. A notice of the public hearing was published in the Roseville Press Tribune on March 11, 2022 and a notice of the hearing was also distributed to all property owners within 300 feet of the site and posted on the RCONA website. No comments have been received as of publication of the staff report.

ENVIRONMENTAL DETERMINATION

Consistent with CEQA Guidelines Section 15164, regarding a previously certified and adopted Environmental Impact Report (EIR), an Addendum to the Sierra Vista Specific Plan EIR (SCH #2008032115, certified May 5, 2010) has been prepared to cover the minor technical changes and additions necessary to describe the impacts of the proposed project (see Attachment 1). The Addendum did not identify any new environmental impacts from the project. The project is conditioned to comply with the applicable SVSP EIR mitigation measures.

RECOMMENDATION

The Planning Division recommends the Planning Commission take the following actions:

1. Consider the **7th Addendum to the Sierra Vista Specific Plan Environmental Impact Report**;
2. Recommend the City Council approve the **SPECIFIC PLAN AMENDMENT – 6350 BASELINE ROAD – SVSP PCL KT-40A & KT-40B – ESTIA – FILE #PL21-0256**;

3. Recommend the City Council adopt the five (5) findings of fact and approve the **DEVELOPMENT AGREEMENT AMENDMENT ("BASELINE P&R DA")** – **6350 BASELINE ROAD – SVSP PCL KT-40A & KT-40B – ESTIA – FILE #PL21-0256**;

4. Recommend the City Council adopt the five (5) findings of fact and approve the **DEVELOPMENT AGREEMENT AMENDMENT ("BAYBROOK DA")** – **6350 BASELINE ROAD – SVSP PCL KT-40A & KT-40B – ESTIA – FILE #PL21-0256**;

5. Adopt the four (4) findings of fact and approve the **DESIGN REVIEW PERMIT – 6350 BASELINE ROAD – SVSP PCL KT-40A & KT-40B – ESTIA – FILE #PL21-0256** subject to ninety-three (93) conditions of approval;

6. Adopt the three (3) findings of fact and approve the **TENTATIVE SUBDIVISION MAP** – **6350 BASELINE ROAD – SVSP PCL KT-40A & KT-40B – ESTIA – FILE #PL21-0256** subject to forty-seven (47) conditions of approval; and

7. Adopt the two (2) findings of fact and approve the **TREE PERMIT** – **6350 BASELINE ROAD – SVSP PCL KT-40A & KT-40B – ESTIA – FILE #PL21-0256** subject to twenty (20) conditions of approval.

CONDITIONS OF APPROVAL FOR THE DESIGN REVIEW PERMIT – FILE #PL21-0256

1. This Design Review Permit approval shall be effectuated within a period of two (2) years from **March 24, 2022** and if not effectuated shall expire on **March 24, 2024**. Prior to said expiration date, the applicant may apply for an extension of time, provided this approval does not extend the expiration beyond **March 24, 2025**. (Planning)

2. The project is approved as shown in Exhibit A—L and as conditioned or modified below. (Planning)

3. The project shall comply with all required environmental mitigation identified in the Sierra Vista Specific Plan (SVSP) EIR and the 7th Addendum to the SVSP EIR (Attachment 1), and shall include all applicable mitigation measures as notes on the grading plans. (All Departments)

4. A Design Review Permit shall be required prior to issuance of building permits for the development of Parcels KT-40B and KT-40C. (Planning)

5. The project shall be addressed as 6350 Baseline Rd. All projects with multi-tenants or buildings must submit a site plan with building footprint(s), upon initial building permit submittal, to the Development Services Department (Business Services – Addressing) for building/unit addressing review. (Business Services)

6. The applicant shall pay City's actual costs for providing plan check, mapping, GIS, and inspection services. This may be a combination of staff costs and direct billing for contract professional services. Project billing may occur up to two (2) months after the end of warranty or the Notice of Termination date for the SWPPP, whichever occurs later. (Engineering, Environmental Utilities, Electric, Finance)

7. The design and construction of all improvements shall conform to the Design and Construction Standards of the City of Roseville, or as modified by these conditions of approval, or as directed by the City Engineer. (Engineering)

8. The developer shall not commence with any on-site improvements until such time as grading and/or improvement plans have been submitted for review and are approved and grading and/or encroachment permits are issued by the Development Services- Engineering (Engineering)

9. The approval of a Tentative Map and/or tentative site plan does not constitute approval of proposed improvements as to size, design, materials, or location, unless specifically addressed in these conditions

of approval. The Developer shall submit civil drawings to the Department of Development Services – Engineering Division for review and approval. (Engineering)

10. Garage spaces shall not be utilized for storage that displaces vehicle parking. (Planning)

PRIOR TO ISSUANCE OF BUILDING PERMITS:

11. Parking lot design shall conform to the City's design standards, including the following minimum standards for parking stalls:

    a. All parking stalls shall be double-striped. Parking stalls adjacent to sidewalks, landscaped areas or light fixtures, and all Accessible stalls shall abut a 6-inch raised curb or concrete bumper. (Planning)

    b. Standard – 9 feet x 18 feet; Compact – 9 feet x 16 feet; Accessible – 14 feet x 18 feet (a 9-foot-wide parking area plus a 5-foot-wide loading area) and a minimum of one (1) parking space shall be Accessible van accessible – 17 feet x 18 feet (9-foot-wide parking area plus an 8-foot-wide loading area). (Planning)

    c. An 'exterior routes of travel' site accessibility plan incorporating slope, cross-slope, width, pedestrian ramps, curb ramps, handrails, signage, detectable warnings or speed limit signs or equivalent means shall comprise part of the site improvement plans submitted to City for review, prior to building plan check approvals. This site accessibility plan shall also include:

        i. Accessible parking stalls shall be dispersed and located closest to accessible entrances. The total number of accessible parking spaces shall be established by Table 11B-208.2 of the CBC.

        ii. Accessible Parking spaces and crosswalks shall be signed, marked and maintained as required by Chapter 11 of the CBC.

        iii. Accessible parking and exterior route of travel shall comply with CBC, Sections 11B-206 and 11B-208. (Building)

12. Signs and/or striping shall be provided on-site as required by the Planning Department to control on-site traffic movements. Parking lot striping and signage shall be maintained in a visible and legible manner. (Planning)

13. The plans submitted to the Building Division for permits shall indicate all approved revisions/alterations as approved by the Commission including all conditions of approval. (Planning)

14. The project Landscape Plans shall comply with the following:

    a. The Landscape Plan shall indicate the location of, and be designed to avoid conflicts with, all pole-mounted light fixtures and utility equipment including (but not limited to) electric transformers, switchgear, and overhead lines; backflow preventers; fire department connections; and public water, sewer, and storm drain facilities. (Planning, Fire, Environmental Utilities, Electric, Engineering)

    b. The tree plantings in the parking lot shall be designed to provide a minimum of 50% shade coverage after 15 years. (Planning)

    c. At a minimum, landscaped areas not covered with live material shall be covered with a rock, (3") bark (no shredded bark) or (3") mulch covering. (Planning)

d. The landscape plan shall comply with the Landscape Guidelines for Sierra Vista Specific Plan and the City of Roseville Water Efficient Landscape Ordinance. (Planning, Environmental Utilities)

e. Landscaping adjacent to preserve areas shall consist of California native, drought-tolerant groundcover, shrubs, plants, and trees. (Open Space, Planning)

f. All landscaping in areas containing electrical service equipment shall conform to the Electric Department's Landscape Requirements and Work Clearances as outlined in Section 10.00 of the Departments "Specification for Commercial Construction." (Electric)

g. Slopes within landscape planters shall be no more than 3:1. A two-foot flat bench located at back-of-walk shall be included in the landscape area to slow or allow absorption of nuisance run-off from the planters. (Parks, Recreation, and Libraries)

h. All landscaping shall conform to the standards of crime prevention through environmental design with the intent to create natural surveillance, controlling access, and territorial reinforcement to property boundaries. (Police)

15. Any roof-mounted equipment and satellite dishes proposed shall be shown on the building plans. The equipment shall be fully screened from public streets and the surrounding properties. (Planning)

16. At the time of building permit application and plan submittal, the project applicant shall submit a proposed plan which shows the proposed addressing for the building and dwelling unit numbers. The Building Official, or the designee, shall approve said plan prior to building permit approval. Refer to the *City of Roseville Addressing Guidelines*. (Building)

17. A separate Architectural Site Accessibility Plan which details the project's site accessibility information as required by California Title 24, Part 2 shall be submitted as part of the project Building Permit Plans for the Clubhouse. (Building)

18. For Multiple Building Complexes: As part of the required Architectural Site Accessibility Plan, the developer shall delineate the extent of the site accessibility improvements being installed as part of the initial improvements for the project, and those that are planned to be developed as part of subsequent phases (i.e. around future pad buildings). (Building)

19. Building permit plans shall comply with all applicable code requirements (California Building Code – CBC – based on the International Building Code, California Green Building Standards Code–CGBSC, California Mechanical Code – CMC – based on the Uniform Mechanical Code, California Plumbing Code – CPC – based on the Uniform Plumbing Code, California Fire Code – CFC – based on the International Fire Code – with City of Roseville Amendments – RFC, California Electrical Code – CEC – based on the National Electrical Code, and California Energy Standards – CEC T-24 Part 6), California Title 24 and the American with Disabilities Act - ADA requirements, and all State and Federally mandated requirements in effect at the time of submittal for building permits (contact the Building Division for applicable Code editions). (Building)

20. For restaurants, other food services, or commercial swimming pools: The developer shall obtain all required approvals and permits from the Placer County Health Department and the City of Roseville Industrial Waste Division. (Building, Environmental Utilities)

21. Maintenance of copy of building plans: Health and Safety Code section 19850 requires the building department of every city or county to maintain an official copy of the building plans for the life of the building. As such, each individual building shall be submitted as a separate submittal package. Building plan review, permit issuance and archiving is based on each individual building address. (Building)

22. For all work to be performed off-site, permission to enter and construct shall be obtained from the property owner, in the form of a notarized right-of-entry. Said notarized right-of-entry shall be provided to Public Works prior to approval of any plans. (Engineering)

23. The Improvement Plans shall include a complete set of Landscape Plans. The Landscape Plans shall be approved with the Improvement Plans. (Planning, Engineering, Fire, Environmental Utilities, Electric)

24. Baseline Road/Access Drive – install signal infrastructure including conduit, loops and poles as part of the Estia project improvements per the Development Agreement. Provide 40' minimum width of pavement for the Access Drive to accommodate a city standard southbound right turn lane. (Engineering)

25. Landowner shall be responsible for the costs of construction of the traffic signals as shown on Exhibit "K" of the Baybrook LP and Baseline P & R LLC Development Agreement. The developer shall receive fee credits for the completion of the traffic signals as part of the City's TMF Set-Aside Fund. (Engineering)

26. The entry drive for the project shall consist of 36' width of pavement to allow for an eventual striped center turn lane. The applicant to provide city standard 3' vertical curb-gutter and 5' sidewalk on both sides of the street. See Sheet 1, Section B of the Tentative Parcel Map. (Engineering).

27. Any backbone improvements, not constructed adjacent to (or needed to serve) a proposed project shall be completed by the applicant. (Engineering)

28. Baseline Road improvements shall be constructed to a four lane arterial with auxiliary lane. The roadway section shall include providing an additional paving (from the existing pavement as shown, as part of the Baseline Road & Watt Avenue Infrastructure Plans- EN20-0362) and 3' vertical curb and gutter and 8' separated sidewalk. The roadway section will include two (2) 11' travel lanes, a 6' bike lane, a 10' auxiliary lane and the aforementioned 3' curb and gutter. The dimension from the ultimate centerline of Baseline Road to back curb will be 60'. (Engineering)

29. A note shall be added to the grading plans that states:

    *"Prior to the commencement of grading operations, the contractor shall identify the site where the **excess/borrow** earthen material shall be imported/deposited. If the **borrow/deposit** site is within the City of Roseville, the contractor shall produce a report issued by a geotechnical engineer to verify that the exported materials are suitable for the intended fill, and shall show proof of all approved grading plans. Haul routes to be used shall be specified."* (Engineering)

30. The site shall include a designated Dial-a-Ride drop off and pick up area with an accessible path of travel to the main entrance of the building. Applicant shall install a pole for Dial-A-Ride sign (sign provided by Alternative Transportation). A covered seating area for our Dial-a-Ride passengers shall be located at the main entrance and it will be visible from the drive aisle of the drop-off and pick-up area. (Alternative Transportation, Planning, and Engineering)

31. If not constructed prior to the project, per the Development Agreement, the developer shall be responsible for preliminary design, permitting and rough grading of the trail. In this case, developer may request reimbursement for this work by obtaining a reimbursement agreement prior to approval of improvement plans. (Engineering, Alternative Transportation)

32. If not constructed prior to the project, per the Development Agreement, if the City has sufficient funds to reimburse Landowner, Landowner shall prepare the final design and construct Class I bike trail improvements where adjacent to residential subdivisions. The developer shall provide an estimate for trail construction prior to or concurrent to the first submittal of improvement plans. (Alternative Transportation)

33. The design of the trail shall be consistent with City standards and shall incorporate the following:

    a. Where an overland release crosses a bike trail, the trail design shall accommodate the potential drainage through grading, concrete paving and scour control while meeting trail design standards as determined necessary by Development Services/Engineering. (Engineering, Alternative Transportation)

34. Per the Sierra Vista Specific plan, pedestrian sidewalks along the open spaces will be installed at the time of adjacent roadway construction. (Engineering, Alternative Transportation)

35. The design of the on-site connection to the bike trail shall be reviewed and approved by Development Services/Engineering and Alternative Transportation. (Engineering, Alternative Transportation)

36. The applicant shall dedicate all necessary rights-of-way or Public Utility Easement for the widening of any streets or transfer of public utilities across and over any portion of the property as required with this entitlement. A separate document shall be drafted for approval and acceptance by the City of Roseville, and recorded at the County Recorder's Office. (Engineering)

37. All storm drainage, including roof drains, shall be collected on site and treated with Best Management Practices (BMP's) per the City's Stormwater Quality Design Manual. All storm water shall be routed to the nearest existing storm drain system or natural drainage facility. Drain outfalls shall extend down to the receiving water and shall be constructed with adequate velocity attenuation devices. The grading/improvement plans for the site shall be accompanied with a shed map that defines that area tributary to this site and all drainage facilities shall be designed to accommodate the tributary flow. The storm drain system and proposed BMP's shall be privately owned and maintained by the property owner. Prior to the issuance of any permits, the owner shall provide a plan for the maintenance of the proposed BMP's. (Engineering)

38. Prior to approval of improvement plans, drainage calculations must be submitted that are consistent with the Master Drainage Study for Sierra Vista or the Master Drainage Study shall be amended as necessary to accommodate any change in sheds. Detention and drainage swales shall also be consistent with the Master Drainage Study or the Master Drainage Study amended to reflect any proposed changes. (Engineering)

39. Prior to the approval of the Improvement Plans, the project proponent shall provide proof of preparation and submittal of a Storm Water Pollution Prevention Plan (SWPPP) to the Regional Water Quality Control Board (RWQCB). Proof shall be in the form of the Waste Discharge Identification Number (WDID#), provided to the applicant from RWQCB, placed on the coversheet of the improvement plans. Upon approval of the improvement plans, a copy of the SWPPP shall be required onsite and available for viewing by City inspection staff upon request. (Engineering)

40. To ensure that the design for any necessary widening, construction, or modifications of Public Streets does not conflict with existing dry utilities generally located behind the curb and gutter, and prior to the submittal of design drawings for those frontage improvements, the project proponent shall have the existing dry utilities pot holed for verification of location and depth. (Engineering)

41. Sight distances for all driveways shall be clearly shown on the improvement plans to verify that minimum standards are achieved. It will be the responsibility of the project proponent to provide appropriate landscaping and improvement plans, and to relocate and/or modify existing facilities as needed to meet these design objectives. (Engineering)

42. Improvement plans shall show the Preserve boundary and label it as a protected area. The Pre-Construction meeting shall address the presence of the Preserve, the sensitive habitats present and minimization of disturbance to the Preserve. During grading and construction the preserve area shall be avoided and shall not be used for parking, storage, or project staging. The contractor shall remove

all trash blown into the preserve from adjacent construction on a daily basis. After construction is complete, the temporary fencing shall be removed from the preserve, along with all temporary erosion control measures (e.g., straw bales, straw waddles and stakes, silt fencing). (Engineering, Development Services Department, Planning)

43. Prior to construction within any phase of the project, high visibility temporary construction fencing shall be installed along the parcel adjacent to the Preserve. Fencing shall be maintained daily until permanent fencing is installed, at which time the temporary fencing shall be removed from the project site. (Engineering, Development Services Department, Planning)

44. With the exception of access required for maintenance and/or emergency vehicles, the project shall be designed to prevent vehicle access into the Preserve. Post and cable fencing or other improvements shall be utilized to meet this requirement. (Public Works, Development Services Department, Planning)

45. Prior to the approval of the improvement plans, it will be the project proponent's responsibility to pay the standard City Trench Cut Recovery Fee for any cuts within the City streets that are required for the installation of underground utilities. (Engineering)

46. Prior to the issuance of building permits, the property owner shall pay into the following fee programs: Citywide Drainage Fee, Citywide Traffic Mitigation Fee (TMF), Highway 65 Joint Partners Association (JPA), South Placer Regional Transportation Authority (SPRTA), and City/County Fee. (Engineering)

47. Prior to the issuance of a grading permit or approval of Improvement Plans, the grading plans shall clearly identify all existing water, sewer and recycled water utilities within the boundaries of the project (including adjoining public right of way). Existing utilities shall be identified in plan-view and in profile-view where grading activities will modify existing site elevations over top of or within 15 feet of the utility. Any utilities that could potentially be impacted by the project shall be clearly identified along with the proposed protection measures. The developer shall be responsible for taking measures and incurring costs associated with protecting the existing water, sewer and recycled water utilities to the satisfaction of the Environmental Utilities Director. (Environmental Utilities)

48. The applicant shall pay all applicable water and sewer fees. (Environmental Utilities)

49. Water and sewer infrastructure shall be designed pursuant to the adopted City of Roseville Improvement Standards and the City of Roseville Construction Standards and shall include:

    a. Utilities or permanent structures shall not be located within the area which would be disturbed by an open trench needed to expose sewer trunk mains deeper than 12 feet unless approved by Environmental Utilities in these conditions. The area needed to construct the trench is a sloped cone above the sewer main. The cone shall have 1:1 side slopes.

    b. Water, sewer and recycled mains shall not exceed a depth of 12 feet below finished grade, unless authorized in these conditions of approval.

    c. All sewer manholes shall have all-weather, 10-ton vehicle access unless otherwise authorized by these conditions of approval. (Environmental Utilities)

50. Recycled water infrastructure shall be designed pursuant to the adopted City of Roseville Improvement Standards and the City of Roseville Construction Standards. The applicant shall pay all applicable recycled water fees. Easements shall be provided as necessary for recycled water infrastructure. (Environmental Utilities)

51. This project will require some units to be served by sewer mains installed through landscaping. Sewer mains outside of the paved areas shall be privately owned and maintained. (Environmental Utilities)

52. Trash enclosures, recycling areas, and enclosure approaches shall be designed to current Refuse Division specifications, the materials and colors shall match the building, and the location of such facilities shall be reviewed and approved by the Refuse Division, Planning and the Fire Department. The enclosure must have inside dimensions of 12 feet wide and 9 feet deep and be built to the specifications of the Solid Waste Department's Enclosure Description. (Refuse, Planning, Fire)

53. Access to trash enclosures shall have an inside turning radius of 25 feet and an outside turning radius of 45 feet must be maintained to allow the refuse truck access to and from the enclosure. Enclosures must have a clear approach of 65 feet in front of the enclosure to allow servicing bins. (Refuse)

54. A trash enclosure and recycling enclosure is required for each building and each tenant, otherwise, the building owner is responsible for the trash service. (Refuse)

55. The design and installation of all fire protection equipment shall conform to the California Fire Code and the amendments adopted by the City of Roseville, along with all standards and policies implemented by the Roseville Fire Department. (Fire)

56. The applicable codes and standards adopted by the City shall be enforced at the time construction plans have been submitted to the City for permitting. (Fire)

57. The Electric Department requires the submittal of the following information in order to complete the final electric design for the project:

    a. one (1) set of improvement plans

    b. load calculations

    c. electrical panel one-line drawings

58. No new drainage/run off into the open space shall occur, all landscaping adjacent to the open space shall be native and non-invasive and all irrigation shall avoid run-off or over-spray into the open space. Lot A shall have a non-living finish to deter weed growth and to minimize long-term maintenance. (Parks)

59. All on-site external lighting shall be installed and directed to have no off-site glare. Lighting within the parking areas and pedestrian walkways shall provide a maintained minimum of one (1) foot-candle, and 0.5 foot-candle of light, respectively. All exterior light fixtures shall be vandal resistant. (Planning, Police)

60. The parking lot shall have properly posted signs that state the use of the parking area is for the exclusive use of employees and customers of this project. (See California Vehicle Code Sections 22507.8, 22511.5, 22511.8, 22658(a), and the City of Roseville Municipal Code Section 11.20.110). The location of the signs shall be shown on the approved site plan. (Planning, Police)

61. It is the developer's responsibility to notify PG&E of any work required on PG&E facilities. (PG&E)

DURING CONSTRUCTION & PRIOR TO ISSUANCE OF OCCUPANCY PERMITS:

62. Any backflow preventers visible from the street shall be painted green to blend in with the surrounding landscaping. The backflow preventers shall be screened with landscaping and shall comply with the following criteria:

    a. There shall be a minimum clearance of four feet (4'), on all sides, from the backflow preventer to the landscaping.

b. For maintenance purposes, the landscaping shall only be installed on three sides and the plant material shall not have thorns.

c. The control valves and the water meter shall be physically unobstructed.

d. The backflow preventer shall be covered with a green cover that will provide insulation. (Planning, Environmental Utilities)

63. The following easements shall be provided by separate instrument and shown on the site plan, unless otherwise provided for in these conditions:

a. A 12.5'-foot-wide public utilities easement along all public road frontages.

b. Water, sewer, and reclaimed water easements.

c. Additional internal easements will be required to cover primary electrical facilities to the project when the final electrical design is completed. (Electric)

64. Prior to releasing building permits, the existing 25' PG&E Roadway & Utility easement shall be abandoned or a quitclaim process completed. (Engineering)

65. Easement widths shall comply with the City's Improvement Standards and Construction Standards. Separate document easements required by the City shall be prepared in accordance with the City's "Policy for Dedication of Easements to the City of Roseville". All legal descriptions shall be prepared by a licensed land Surveyor. All existing public utility, electric, water, sewer and reclaimed water easements shall be maintained unless otherwise authorized by these conditions of approval. (Engineering, Environmental Utilities, Electric)

66. Inspection of the potable water supply system on new commercial/industrial/office projects shall be as follows:

a. The Environmental Utilities Inspector will inspect all potable water supply up to the downstream side of the backflow preventer.

b. The property owner/applicant shall be responsible for that portion of the water supply system from the backflow preventer to the building. The builder/contractor shall engage a qualified inspector to approve the installation of this portion of the water supply. The Building Division will require from the builder/contractor, a written document certifying that this portion of the potable water supply has been installed per improvement plans and in accordance with the Uniform Plumbing Code. This certificate of compliance shall be submitted to the Building Division before a temporary occupancy or a building final is approved.

c. The building inspectors will exclusively inspect all potable water supply systems for the building from the shutoff valve at the building and downstream within the building. (Building, Environmental Utilities)

67. All improvements being constructed in accordance with the approved grading and improvement plans shall be accepted as complete by the City. (Engineering)

68. The words "traffic control appurtenances" shall be included in the list of utilities allowed in public utilities easements (PUE's) located along public roadways. (Engineering)

69. Water, sewer and reclaimed water shall be constructed pursuant to the adopted City of Roseville Improvement Standards and the City of Roseville Construction Standards. (Environmental Utilities)

70. All water backflow devices shall be tested and approved by the Environmental Utilities Department. (Environmental Utilities)

71. **Restaurants or other Food Service Establishment (FSE).** The applicant shall design for installation and/or install an exterior grease interceptor if the proposed business could potentially discharge substances containing fats, oils and grease (FOG) into the sewer system. The grease interceptor shall be adequate to separate and remove FOG contained in the wastewater from FSE's prior to discharge to the public sewer. (Environmental Utilities)

72. In the event an exterior grease interceptor cannot be installed due to space limitation, the developer shall install a grease trap, per City Standards, that will mechanically separate the FOG contained in the wastewater from the FSE prior to discharge to the public sewer. (Environmental Utilities)

73. Pursuant to the Municipal Code, the applicant shall apply for and obtain a FOG waste discharge permit (FOG WDP) from the Environmental Utilities Industrial Waste Division prior to occupancy or prior to discharging waste to the public sewer. The applicant shall submit information required by the Environmental Utilities Department for evaluation, including but not limited to: site plans, floor plans, mechanical and plumbing plans, and details to show all sewers, FOG control device, grease interceptor or other pretreatment equipment and appurtenances by size, location and elevation. Additional information related to the applicant's business operations and potential discharge may be requested to properly evaluate the FOG WDP application. (Environmental Utilities)

74. All Electric Department facilities, including streetlights where applicable, shall be designed and built to the "City of Roseville Specifications for Commercial Construction." (Electric)

75. The City of Roseville Electric Department has electrical construction charges which are to be paid by the developer and which are explained in the City of Roseville "Specification for Commercial and Residential Construction." These charges will be determined upon completion of the final electrical design. (Electric)

76. Any relocation, rearrangement, or change of existing electric facilities due to this development shall be at the developer's expense. (Electric)

77. Any facilities proposed for placement within public/electric utility easements shall be subject to review and approval by the Electric Department before any work commences in these areas. This includes, but is not limited to, landscaping, lighting, paving, signs, trees, walls, and structures of any type. (Electric)

78. All electric metering shall be directly outside accessible. This can be accomplished in any of the following ways:

    a. Locate the metered service panel on the outside of the building.

    b. Locate the metered service panel in a service room with a door that opens directly to the outside. The developer will be required to provide a key to the door for placement in a lock box to be installed on the outside of the door. Any doors leading from the service room to other areas of the building shall be secured to prohibit unauthorized entry. (Electric)

79. One ¾-inch conduit with a 2-pair phone line shall be installed from the building's telephone service panel to the meter section of the customer's electrical switchgear or panel. (Electric)

80. It is the responsibility of the developer to ensure that all existing electric facilities remain free and clear of any obstruction during construction and when the project is complete. (Electric)

81. The Developer will be responsible for extending mainline infrastructure on the north side of baseline from Santucci Boulevard west to the project site. These improvements shall be installed in the ultimate Public Utility Easement location along Baseline Road. These improvements shall include point of connections for parcels 40B and 40C. (Electric)

OTHER CONDITIONS OF APPROVAL:

82. Signs shown on the elevations are not approved as part of the Design Review Permit. A Sign Permit is required for all project signs. (Planning)

83. Following the installation of the landscaping, all landscape material shall be maintained in a healthy and weed-free condition; dead plant material shall be replaced immediately. All trees shall be maintained and pruned in accordance with the accepted practices of the International Society of Arboriculture (ISA). (Planning)

84. The City reserves the right to restrict vehicle turning movements within the public right-of-way in the future if deemed necessary by the City Engineer. (Engineering)

85. The required width of fire apparatus access roads shall not be obstructed in any manner, including the parking of vehicles. Minimum required widths and vertical clearances established by the Fire Code shall be maintained at all times during construction. Closure of accesses for fire apparatus by gates, barricades and other devices shall be prohibited unless approved by the Fire Chief. (Fire)

86. Temporary aboveground storage tanks may be used at construction sites for diesel fuel only and shall not exceed 1,000 gallon capacity. Tanks shall comply with all provisions found within the Fire Code. A Fire Department Permit shall be obtained prior to tank installation. The permit shall expire after 90 days from the date of issuance, unless extended by the Fire Chief. (Fire)

87. If site survey or earth moving work results in the discovery of hazardous materials in containers or what appears to be hazardous wastes released into the ground, the contractor or person responsible for the building permit must notify the Roseville Fire Department immediately. A representative from the Fire Department will make a determination as to whether the incident is reportable of not and if site remediation is required. (Fire)

88. The location and design of the gas service shall be determined by PG&E. The design of the gas service for this project shall not begin until PG&E has received a full set of City approved improvement plans for the project. (PG&E)

89. All residential units must install a Seasonal Energy Efficiency Rating ("SEER") of 2 points above the minimum, as defined by the State of California in the current Title 24 of the Code of California regulations, up to a total maximum of 16 points including the 2 point premium, an Energy Efficiency Ratio ("EER") of 12 or greater, and a thermal expansion valve "TXV"). The SEER rating of 2 points above the minimum, as defined by the current Title 24, up to a maximum of 16 points, and an EER rating of 12 or greater along with a TXV will be specified on building plans and Title 24 compliance certificates at the time building permits are requested. If Title 24 of the Code of California Regulations in effect at the time of request for building permits requires higher SEER or EER ratings, residential units in the Plan Area shall comply with such State requirements. The SEER and EER ratings will be verified with appropriate documentation. These requirements shall be utilized in the overall energy compliance calculations required for issuance of a building permit for any residential unit. Any variances must be approved by the Electric Department's Retail Energy Services Department. (Building, Electric)

90. The project is subject to the noise standards established in the City's Noise Ordinance. In accordance with the City's Noise Ordinance, project construction is exempt between the hours of seven a.m. and seven p.m. Monday through Friday, and between the hours of eight a.m. and eight p.m. Saturday and

Sunday, provided that all construction equipment shall be fitted with factory installed muffling devices and be maintained in good working order. (Building)

91. The developer (or designated consultant) shall certify that the building foundation location has been placed according to all approved setback requirements shown on the approved site plan. The developer shall prepare a written statement confirming building placement and provide an original copy to the City Building Division Field Inspector at the time of or prior to the foundation inspection. (Building)

92. Prior to Certificate of Occupancy, the applicant may apply for a Temporary Certificate of Occupancy (TCO) of the building. If a TCO is desired, the applicant must submit a written request to the Building Division a minimum of thirty (30) days prior to the expected temporary occupancy date and shall include a schedule for occupancy and a description of the purpose for the Temporary Certificate of Occupancy. (Building)

93. Concurrent with submittal for plan check and prior to a request for final building inspection, the applicant may request City approval of an occupancy phasing plan to allow individual or multiple building occupancies. This request shall be made in writing to the Building Division and shall include the following:

    a. A description of measures that will be undertaken to minimize conflict between residents/building occupants and construction traffic (e.g. fencing, etc.);

    b. A phasing plan showing the proposed buildings, internal roads and access routes, landscaping, trash enclosure locations, and any other improvements planned for each phase; and

    c. An estimated time frame for each phase and a specific date for the first phase. (Planning, Building)

CONDITIONS OF APPROVAL FOR THE TENTATIVE SUBDIVISION MAP – FILE #PL21-0256

1. The project shall comply with all required environmental mitigation identified in the Sierra Vista Specific Plan (SVSP) EIR and 7th Addendum to the SVSP EIR, and shall include all applicable mitigation measures as notes on the plans. (Planning)

PRIOR TO ISSUANCE OF A GRADING PERMIT AND/OR IMPROVEMENT PLANS

2. Grading around the native oak trees or other natural features shall be as shown on the tentative map or as approved in these conditions. (Planning)

3. The applicant shall submit to the Planning and Engineering Departments the applicable Army Corps of Engineers permit or clearance, the California Department of Fish and Game Stream Bed Alteration Agreement, and/or the Regional Water Quality Control Board Water Quality Certificate. (Planning)

4. The grading and improvement plans shall be designed in accordance with the City's Improvement Standards and Construction Standards and shall reflect the following:

    a) Street improvements including, but not limited to, curb, gutter, sidewalk, pavement, drainage systems, traffic striping, signing, medians and markings, etc. along all existing and proposed City streets, as required by Engineering.

    b) Grading shall comply with the City grading ordinance. There shall be no cut and/or fill slopes steeper than a 4:1 ratio. Erosion control devices (sediment traps, ditches, straw bales, etc.) shall be shown on the grading plans and all erosion control shall be installed prior to the onset of wet weather. Erosion control is installed to minimize silt discharge from the project site; it

is the applicant's responsibility to ensure that necessary measures are taken to minimize silt discharge from the site. Modification of the erosion control plan may be warranted during wet weather conditions.

c) A rough grading permit may be approved by the Engineering Department prior to approval of the improvement plans.

d) Access to the floodplain shall be provided as required by Engineering and the Streets Department.

e) Standard accessible ramps shall be installed at all curb returns per City Standards. (Engineering)

5. The applicant shall apply for and obtain an encroachment permit from the Engineering Department prior to any work conducted within the City right-of-way and/or City easements. (Engineering)

6. All drainage facilities shall conform to natural drainage sheds. (Engineering)

7. The following note shall be added to the Grading and/or Improvement Plans:

   To minimize dust/grading impacts during construction the applicant shall:

   a) Spray water on all exposed earth surfaces during clearing, grading, earth moving and other site preparation activities throughout the day.

   b) Use tarpaulins or other affective covers on all stockpiled earth material and on all haul trucks.

   c) Sweep the adjacent streets frontages at least once a day or as needed to remove silt and other dirt which is evident from construction activities.

   d) Ensure that construction vehicles are cleaned prior to leaving the construction site to prevent dust and dirt from being tracked off site.

   e) *The City shall have the authority to stop all grading operations if, in the opinion of city staff, inadequate dust control measures are being practiced or excessive wind conditions contribute to fugitive dust emissions. (Engineering)*

8. The grading plans for the site shall be accompanied with a shed map that defines that area tributary to this site. All drainage facilities shall be designed to accommodate the tributary flow. All on-site storm drainage shall be collected on-site and shall be routed to the nearest existing storm drain stub of the natural drainage course. (Engineering)

9. The grading plans shall be accompanied with engineered structural calculations for all retaining walls greater than four (4) feet in height. All retaining walls shall be of either split-faced masonry units, keystone type construction, or cast in place concrete with fascia treatment. (Engineering)

10. Landscaping adjacent to the Preserve shall be California native, drought-tolerant groundcover, shrubs, plants, and trees. (Development Services, Planning)

11. Prior to the approval of the improvement plans, it will be the project proponent's responsibility to pay the standard City Trench Cut Recovery Fee for any cuts within the City streets that are required for the installation of underground utilities. (Engineering)

PRIOR TO ISSUANCE OF GRADING PERMIT OR IMPROVEMENT PLANS

12. Prior to the approval of Improvement Plans, the applicant shall submit to the Development Services Engineering Division a paper copy and an electronic copy of the final set of Improvement Plans per the Division's "Digital Submission of Utility Composites" standards. Additionally, the applicant shall submit approved/proposed street names for the approved subdivision map. Final street names for the subdivision shall be approved by the Engineering Division prior to the approval of the Improvement Plans. The approved street names shall be included on the final set of Improvement Plans. (Engineering)

13. Fire hydrants shall be located as required by the Fire Department. The maximum distance between fire hydrants shall not exceed 1,000 feet on center. (Fire)

14. Minimum fire flow is 1,500 gallons per minute with 20 pounds per square inch residual pressure. A change in any of the conditions may increase the required fire flow. (Fire)

15. There shall be two points of access for all phasing plans. (Fire)

16. Testing of all fire systems shall be performed prior to the sales office being opened for business. (Fire)

17. Framing construction cannot commerce until access roads and public fire hydrants are approved by the Fire Department. (Fire)

18. If this project will be phased, the fire department requirements for access and circulation throughout shall be reviewed and approved by the Fire Department. Access roads shall comply with the California Fire Code and the City of Roseville's Amendments. (Fire)

19. Any facilities proposed for placement within public/electric utility easements shall be subject to review and approval by the Electric Department before any work commences in these areas. This includes, but is not limited to, landscaping, lighting, paving, signs, trees, walls, and structures of any type. (Electric)

20. The design for electrical service for this project will begin when the Electric Department has received a full set of improvement plans for the project. (Electric)

21. All landscaping in areas containing electrical service equipment shall conform to the "Electric Department Landscape Design Requirements" as outlined in Section 10.00 of the Electric Department's "Specifications for Commercial Construction." (Electric)

22. The Electric Department requires the submittal of the following information in order to complete the final electric design for the project:

    a) one (1) set of improvement plans

    b) load calculations

    c) electrical panel one-line drawings

23. The location and design of the gas service shall be determined by PG&E. The design of gas service for this project shall not begin until PG&E has received a full set of City approved improvement plans for the project. (PG&E)

24. It is the developer's responsibility to notify PG&E of any work required on PG&E facilities. (PG&E)

PRIOR TO OR UPON RECORDATION OF FINAL MAP

25. All existing easements shall be maintained, unless otherwise provided for in these conditions. (Environmental Utilities, Electric, Engineering)

26. Separate document easements required by the City shall be prepared in accordance with the City's "Policy for Dedication of Easements to the City of Roseville." All legal descriptions shall be prepared by a licensed Land Surveyor (Environmental Utilities, Electric, Engineering)

27. A declaration of Conditions, Covenants and Restrictions (CC&Rs), in a form approved by the City Attorney, shall be recorded on the entire property concurrently with the Final/Parcel Map. The CC&Rs shall include the following item(s):

    a) A clause stating that the property owners within this subdivision shall agree to participate in a Transportation Systems Management (TSM) Plan and shall agree to enter into a Transportation Management Agreement with the City of Roseville. (Attorney)

    b) A clause prohibiting the amendment, revision or deletion of any sections in the CC&Rs required by these conditions of approval without the prior written consent of the City Attorney. (Attorney)

    c) A clause excluding any property owned by the City from the terms of the CC&Rs. (Attorney)

    d) A clause prohibiting storage in the garages that displaces vehicle parking. (Planning)

28. The City shall not approve the Final Map for recordation until either:

    a) A subdivision agreement is entered into along with the necessary bonds and insurance as required by the City. Said agreement shall be in a form acceptable to the City Attorney.

    OR

    b) The improvement plans are approved, and the improvements are constructed and accepted as complete. In this case, the subdivider shall enter into a one-year maintenance agreement concurrent with the recordation of the Final Map. (Engineering)

29. Any structures crossing Lot/Parcel lines created by the Final/Parcel map shall be removed. (Engineering)

30. Lot/Parcel A shall be dedicated as an easement (or in fee) to the City for the purposes of open space. (Engineering)

31. Street names shall be approved by the City of Roseville. (Engineering)

32. In the event that the Final (Parcel) Map will record prior to the completion of on-site construction, all utility and access easements shall be placed on the face of the Map to the satisfaction of the City Engineer. If all on-site improvements are complete prior to the recordation of the map, then a separate agreement allowing all parcels/lots the rights of reciprocal access, rights to construct, and parking shall be submitted to the City as a part of final/parcel map submittal. Said agreement shall be in a form acceptable to the City Attorney and referenced on the face of the recorded map. (Engineering)

33. The Final/Parcel Map shall include an irrevocable offer to dedicate public rights-of-way and public and/or private easements as required by the City. (Engineering)

34. The words "traffic control appurtenances" shall be included in the list of utilities allowed in public utilities easements (PUEs) located along public roadways. (Engineering)

35. The Final/Parcel Map shall be submitted per "The Digital Submittal of Cadastral Surveys." A plot or print of the submittal shall accompany the electronic copy. The complete submittal shall occur after the

Engineering Department approval but prior to City Council approval of the Final/Parcel Map. (Engineering)

36. The cost of any facilities, which are identified in the Capital Improvement Program and are beyond those needed for this project, may be reimbursed to the developer. In accordance with §66485 and §66486 of the Subdivision Map Act, for any improvements constructed by the subdivider which contain supplemental size, capacity, number, or length for the benefit of property not within the subdivision and which are to be dedicated to the public, the subdivider shall be entitled to reimbursement for that portion of the cost of the improvements which is in excess of the construction required for the subdivision. (Engineering)

37. Electric construction costs incurred by the City of Roseville Electric Department for this project shall be paid for by the developer per the applicable policy. (Electric)

38. Additional internal easements will be required to cover primary electrical facilities to the project when the final electrical design is completed. (Electric)

39. All Electric Department facilities, including streetlights where applicable, shall be designed and built to the "City of Roseville Specifications for Commercial Construction." (Electric)

40. The City of Roseville Electric Department has electrical construction charges which are to be paid by the developer and which are explained in the City of Roseville "Specification for Commercial Construction." These charges will be determined upon completion of the final electrical design. (Electric)

41. The Environmental Utilities Department shall make a determination that there is adequate conveyance and treatment capacity in the City sewer system to handle the newly created Lot/Parcels. (Environmental Utilities)

42. The applicant shall pay all applicable water and sewer fees. (Environmental Utilities)

OTHER CONDITIONS OF APPROVAL

43. Any relocation, rearrangement, or change to existing electric facilities due to this development shall be at the developer's expense. (Electric)

44. It is the responsibility of the developer to ensure all existing electric facilities remain free and clear of any obstructions during construction and when the project is complete. (Electric)

45. The project is subject to the noise standards established in the City's Noise Ordinance. In accordance with the City's Noise Ordinance, provided all construction equipment is fitted with factory installed muffling devices and is maintained in good working order, project construction noise is exempt between the hours of seven a.m. and seven p.m. Monday through Friday, and between the hours of eight a.m. and eight p.m. Saturday and Sunday. (Engineering)

46. If site survey or earthmoving work results in the discovery of hazardous materials in containers or what appears to be hazardous wastes released into the ground, the contractor shall notify the Roseville Fire Department immediately. A representative from the Fire Department will make a determination as to whether the incident is reportable or not and if site remediation is required. Non-emergency releases or notifications about the presence of containers found shall be reported to the Fire Department. (Fire)

47. The Tentative Subdivision Map shall not be deemed approved until the actions on the Development Agreement Amendment and Specific Plan Amendment are approved and become effective. (Planning)

CONDITIONS OF APPROVAL FOR THE TREE PERMIT – FILE #PL21-0256

PRIOR TO ISSUANCE OF ANY PERMITS OR ANY CONSTRUCTION ON-SITE

1. All recommendations contained in the Arborist Report(s) (Attachment 2) are incorporated by reference into these conditions, except as modified herein. (Planning)

2. Trees #8511 and #8513 (or as listed in Attachment 2 and identified on Exhibit D) are approved for removal with this tree permit. All other native oak trees shall remain in place. Trees to be removed shall be clearly marked in the field and inspected by Planning Staff prior to removal. Removal of the trees shall be performed by or under the supervision of a certified arborist. (Planning)

3. The developer shall be responsible for the replacement of the total number of inches proposed for removal prior to any tree removal. The total number of inches for this project is 54. Mitigation must be provided prior to tree removal in the form of payment of in-lieu fees ($118 per inch) and/or combination of native and non-native tree plantings, unless otherwise approved in the tree replacement plan or in these conditions. (Planning)

4. No activity shall be permitted within the protected zone of any native oak tree beyond those identified by this report. (Planning)

5. A $10,000 cash deposit or bond (or other means of security provided to the satisfaction of the Planning Division) shall be posted to ensure the preservation of all remaining trees during construction. The cash deposit or bond shall be posted in a form approved by the City Attorney. Each occurrence of a violation on any condition regarding tree preservation shall result in forfeiture of all or a portion of the cash deposit or bond. (Planning)

6. A violation of any of the conditions of this Tree Permit is a violation of the Roseville Municipal Code, the Zoning Ordinance (Chapter 19.74) and the Tree Preservation Ordinance (Chapter 19.66). Penalties for violation of any of the conditions of approval may include forfeiture of the bond, suspension or revocation of the permit, payment of restitution, and criminal penalties. (Planning)

7. A fencing plan shall be shown on the approved site plan and/or improvement plans demonstrating the Protected Zone for the affected trees. A maximum of three feet beyond the edge of the walls, driveways, or walkways will be allowed for construction activity and shall be shown on the fencing plan. The fencing plan shall be reviewed and approved by the Planning Division prior to the placement of the protective fencing. (Planning)

8. The applicant shall install a minimum of a five-foot high chain link fence (or acceptable alternative) at the outermost edge of the Protected Zone of the oak tree. Where encroachment is permitted pursuant to Condition 4, above, the fencing for encroachments shall be installed at the limit of construction activity. The applicant shall install signs at two equidistant locations on the temporary fence that are clearly visible from the front of the lot and where construction activity will occur. The size of each sign shall be a minimum of two feet (2') by two feet (2') and must contain the following language: "WARNING THIS FENCE SHALL NOT BE REMOVED OR RELOCATED WITHOUT WRITTEN AUTHORIZATION FROM THE PLANNING DIVISION". (Planning)

9. Once the fencing is installed, the applicant shall schedule an appointment with the Planning Division to inspect and approve the temporary fencing before beginning any construction. (Planning)

10. The applicant shall arrange with the arborist to perform, and certify in writing, the completion of deadwooding, fertilization, and all other work recommended for completion prior to the approval of

improvement plans. Pruning shall be done by an Arborist or under the direct supervision of a Certified Arborist, in conformance with International Society of Arboriculture (I.S.A.) standards. Any watering and deep root fertilization which the arborist deems necessary to protect the health of the trees as noted in the arborist report or as otherwise required by the arborist shall be completed by the applicant. (Planning)

11. A utility trenching pathway plan shall be submitted depicting all of the following systems: storm drains, sewers, water mains, and underground utilities. The trenching pathway plan shall show the proposed locations of all lateral lines. (Planning)

12. A Site Planning Meeting shall be held with the applicant, the applicant's primary contractor, the Planning Division and the Engineering Division to review this permit, the approved grading or improvement plans, and the tree fencing prior to any grading on-site. The Developer shall call the Planning Division and Engineering Division two weeks prior to the start of grading work to schedule the meeting and fencing inspection. (Planning)

13. The following information must be located on-site during construction activities: Arborist Report, approved site plan/improvement plans including fencing plan, and conditions of approval for the Tree Permit. All construction must follow the approved plans for this tree permit without exception. (Planning)

14. All preservation devices (aeration systems, oak tree wells, drains, special paving, etc.) shall be designed and installed as required by these conditions and the arborist's recommendations, and shall be shown on the improvement plans or grading plans. (Planning)

15. If any native ground surface fabric within the Protected Zone must be removed for any reason, it shall be replaced within forty-eight (48) hours. (Planning)

16. Storage or parking of materials, equipment, or vehicles is not permitted within the Protected Zone of any oak tree. Vehicles and other heavy equipment shall not be operated within the Protected Zone of any oak tree. (Planning)

17. Where recommended by the arborist, portions of the foundation shall be hand dug under the direct supervision of the project arborist. The certified arborist shall immediately treat any severed or damaged roots. Minor roots less than one (1) inch in diameter may be cut, but damaged roots shall be traced back and cleanly cut behind any split, cracked or damaged area. Major roots over one (1) inch in diameter may not be cut without approval of an arborist and any arborist recommendations shall be implemented. (Planning)

18. The temporary fencing shall remain in place throughout the entire construction period and shall not be removed without obtaining written authorization from the Planning Division. In no event shall the fencing be removed before the written authorization is received from the Planning Division. (Planning)

PRIOR TO ISSUANCE OF FINAL

19. Within 5 days of the completion of construction, a Certification Letter from a certified arborist shall be submitted to and approved by the Planning Division. The certification letter shall attest to all of the work (regulated activity) that was conducted in the protected zone of the tree, either being in conformance with this permit or of the required mitigation still needing to be performed. (Planning)

20. The approval of this Tree Permit shall expire on **March 24, 2024**. (Planning)

PRELIMINARY ARBORIST REPORT & TREE INVENTORY

RE: Sierra Vista, 6400 Baseline Road, APN 499-010-014, City of Roseville Jurisdiction

Executive Summary

Towne Development of Sacramento contacted California Tree and Landscape Consulting, Inc. to inventory and evaluate the trees on the site for purposes of providing preliminary tree information for planning for development of the parcel. The property is located at 6400 Baseline Road, in the City of Roseville, California, and is subject to the jurisdiction of Roseville. See Supporting Information Appendix 1 – Tree Inventory Map.

Edwin E. Stirtz, ISA Certified Arborist #WE-0510A, and Thomas M. Stein, ISA Certified Arborist WE-12854A, were on the site on May 5, 2021, to provide species identification, measurements of diameter and canopy, field condition notes, and arborist ratings. A total of 41 trees were included in the inventory, 9 of which are protected by the City of Roseville Tree Preservation Municipal Code 19.66.

Tree Species	Trees Inventoried	Trees on the Site[1]	Protected Trees	Trees Proposed for Removal	Trees impacted by the proposed development and requiring special protection measures	Predicted Impact	Diameter Inches Proposed for Removal or Impact
Interior Live Oak	2	2	2	1	n/a	n/a	n/a
Non-Protected: Aleppo Pine, Almond, American Elm, Arizona Cypress, Black Locust, Black Walnut, Casuarina, Eucalyptus, European Olive, Honey Locust, Interior Live Oak, Mulberry, Oregon Ash, Unknown	39	39	0	13	n/a	n/a	n/a
Totals	**41**	**41**	**2**	**14**	**n/a**	**n/a**	**n/a**

See Appendices for specific information on each tree and preservation requirements and/or restrictions.

[1] CalTLC is not a licensed land surveyor. Tree locations are approximate and we do not determine tree ownership. Trees which appear to be on another parcel are listed as off-site and treated as the property of that parcel.

Methods

Appendix 2 in this report is the detailed inventory of the trees. The following terms will further explain our methods and findings.

The protected trees evaluated as part of this report have a numbered tag that was placed on each one that is 1-1/8" x 1-3/8", green anodized aluminum, "acorn" shaped, and labeled: CalTLC, Auburn, CA with 1/4" pre-stamped tree number and Tree Tag. They are attached with a natural-colored aluminum 10d nail, installed at approximately 6 feet above ground level on the approximate north side of the tree. The tag should last ~10-20+ years depending on the species, before it is enveloped by the trees' normal growth cycle.

A Level 2 – Basic Visual Assessment was performed in accordance with the International Society of Arboriculture's best management practices. This assessment level is limited to the observation of conditions and defects which are readily visible. Additional limiting factors, such as blackberries, poison oak, and/or debris piled at the base of a tree can inhibit the visual assessment.

Tree Location: The GPS location of each tree was collected using the ESRI's ArcGIS collector application on an Apple iPhone or Samsung. The data was then processed in ESRI's ArcMap by Julie McNamara, M.S. GISci, to produce the Tree Location Map.

Tree Measurements: DBH (diameter breast high) is normally measured at 4'6" (above the average ground height for "Urban Forestry"), but if that varies then the location where it is measured is noted. A steel diameter tape was used to measure the diameter. A Stanley laser distance meter was used to measure distances. Canopy radius measurements may also have been estimated due to obstructions, such as steep slopes, fences, or other trees.

Terms

Field Tag #	The pre-stamped tree number on the tag which is installed at approximately 6 feet above ground level on the north side of the tree.
Old Tag #	If additional field tags are found on the trees and are legible, they are listed here.
Species	The species of a tree is listed by our local and correct common name and botanical name by genus (capitalized) and species (lower case). Oaks frequently cross-pollinate and hybridize, but the identification is towards the strongest characteristics.
DBH	Diameter breast high' is normally measured at 4'6" (above the average ground height for "Urban Forestry"), but if that varies then the location where it is measured is noted in the next column "measured at"
Measured at	Height above average ground level where the measurement of DBH was taken.
Canopy Radius	The farthest extent of the crown composed of leaves and small twigs. Most trees are not evenly balanced. This measurement represents the longest extension from the trunk to the outer canopy. The dripline measurement is from the center point of the tree and is shown on the Tree Location Map as a circle. This measurement further defines the protection zone if specified in the local ordinance as such or can indicate if pruning may be required for development
Protected Root Zone	The radius of the protected root zone is a circle equal to the trunk diameter inches converted to feet and factored by tree age, condition and health pursuant to the industry standard. Best Management Practices: Managing Trees During Construction, the companion publication to the Approved American National Standard, provides guidance regarding minimum tree root protection zones for long term survival. In instances where a tree is multi-stemmed, the protected root zone is equal to the extrapolated diameter (sum of the area of each stem converted to a single stem) factored by tree age, condition and health.

Arborist Rating

Subjective to condition and is based on both the health and structure of the tree. All of the trees were rated for condition, per the recognized national standard as set up by the Council of Tree and Landscape Appraisers and the International Society of Arboriculture (ISA) on a numeric scale of 5 (being the highest) to 0 (the worst condition, dead) as in Chart A. The rating was done in the field at the time of the measuring and inspection.

No problem(s)	Excellent	**5**	No problems found from a visual ground inspection. Structurally, these trees have properly spaced branches and near perfect
No apparent problem(s)	Good or Fair to Good	**4**	The tree is in good condition and there are no apparent problems that a Certified Arborist can see from a visual ground inspection. If potential structural or health problems are tended to at this stage future hazard can be reduced and more serious health problems can be averted.
Minor problem(s)	Fair	**3**	The tree is in fair condition. There are some minor structural or health problems that pose no immediate danger. When the recommended actions in an arborist report are completed correctly the defect(s) can be minimized or eliminated and/or health can be improved.
Major or uncorrectable problems (2)	Fair to Poor	**2**	The tree has major problems. If the option is taken to preserve the tree, additional evaluation to identify if health or structure can be improved with correct arboricultural work including, but not limited to: pruning, cabling, bracing, bolting, guying, spraying, mistletoe removal, vertical mulching, fertilization, etc. Additionally, risk should be evaluated as a tree rated 2 may have structural conditions which indicate there is a high likelihood of some type of failure. Tree rated 2 should be removed if these additional evaluations will not be performed.
Extreme problem(s)	Poor	**1**	The problems are extreme. This rating is assigned to a tree that has structural and/or health problems that no amount of work or effort can change. The issues may or may not be considered a dangerous situation.
Dead	Dead	**0**	This indicates the tree has no significant sign of life.

Notes: Provide notable details about each tree which are factors considered in the determination of the tree rating including: (a) condition of root crown and/or roots; (b) condition of trunk; (c) condition of limbs and structure; (d) growth history and twig condition; (e) leaf appearance; and (f) dripline environment. Notes also indicate if the standard tree evaluation procedure was not followed (for example - why DBH may have been measured at a location other than the standard 54”). Additionally, notes will list any evaluation limiting factors such as debris at the base of a tree.

Actions Recommended actions to increase health and longevity.

Development Impacts Projected development impacts are based solely on distance relationships between tree location and grading. Field inspections and findings during the project at the time of grading and trenching can change relative impacts. Closely followed guidelines and requirements can result in a higher chance of survival, while requirements that are overlooked can result in a dramatically lower chance of survival. Impacts are measured as follows:

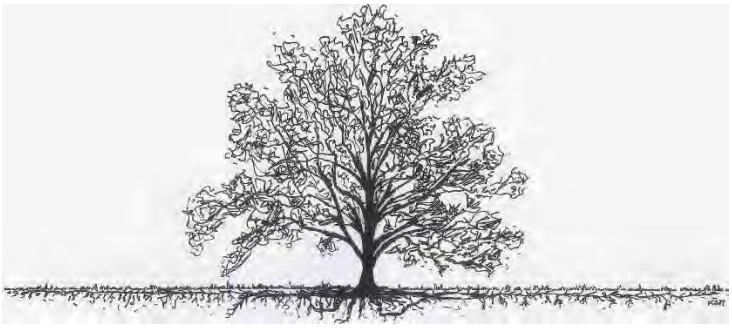
Impact Term:	Long Term Result of Impact:
Negligible	Tree is unlikely to show any symptoms. Chance of survival post development is excellent. Impacts to the Protected Root Zone are less than 5%.
Minor	Tree is likely to show minor symptoms. Chance of survival post development is good. Impacts to the Protected Root Zone are less than 15% and species tolerance is good.
Moderate	Tree is likely to show moderate symptoms. Chance of survival post development is fair. Impacts to the Protected Root Zone are less than 35% and species tolerance is good or moderate.
Severe	Tree is likely to show moderate symptoms annually and a pattern of decline. Chance of long-term survival post development is low. Impacts to the Protected Root Zone are up to 50% and species tolerance is moderate to poor.
Critical	Tree is likely to show moderate to severe symptoms annually and a pattern of decline. Chance of long-term survival post development is negligible. Impacts to the Protected Root Zone are up to 80%.

Discussion

Trees need to be protected from normal construction practices if they are to remain on the site and are expected to survive long term. While construction damage in the root zone is often the death of a tree, the time from when the damage occurs to when the symptoms begin and/or the tree dies can be years. Our recommendations are based on experience and the local ordinance requirements to enhance tree longevity. It requires the calculated root zone must remain intact as an underground ecosystem despite the use of heavy equipment to install foundations, driveways, underground utilities, and landscape irrigation systems. Simply walking and driving on soil can have serious consequences to tree health. The Tree Preservation Requirements and General Development Guidelines should be incorporated into the site plans and enforced onsite. The project arborist should be included in the development team during construction to provide expertise and make additional recommendations if additional impacts occur or tree response is poor.

Root Structure

The majority of a tree's roots are contained in a radius from the main trunk outward approximately two to three times the canopy of the tree. These roots are located in the top 6" to 3' of soil. It is a common misconception that a tree underground resembles the canopy. The correct root structure of a tree is in the drawing below. All plants' roots need both water and air for survival. Poor canopy development or canopy decline in mature trees after development is often the result of inadequate root space and/or soil compaction.



The reality of where roots are generally located

Pruning Mature Trees for Risk Reduction and/or Development Clearance

There are few good reasons to prune mature trees. Removal of deadwood, directional pruning, removal of decayed or damaged wood, and end-weight reduction as a method of mitigation for structural faults are the only reasons a mature tree should be pruned. Live wood over 3" should not be pruned unless absolutely necessary. Pruning cuts should be clean and correctly placed. Pruning should be done in accordance with the American National Standards Institute (ANSI) A300 standards.

Pruning causes an open wound in the tree. Trees do not "heal" they compartmentalize. It is far better to use more small cuts than a few large cuts as small pruning wounds reduce risk while large wounds increase risk. Any wound made today will always remain, but a healthy tree, in the absence of decay in the wound, will 'cover it' with callus tissue. Large, old pruning wounds which did not close with callous tissue often have advanced decay. These wounds are a likely failure point. Mature trees with large wounds have a high risk of failure.

Overweight limbs are a common structural fault in suppressed trees. There are two remedial actions for over- weight limbs (1) prune the limb to reduce the extension of the canopy, or (2) cable the limb to reduce movement. Cables do not hold weight they only stabilize the limb and additionally require annual inspection.

Arborist Classifications

There are different types of Arborists:

Tree Removal and/or Pruning Companies: These companies may be licensed by the State of California to do business as a tree removal company, but they do not necessarily know anything about trees biology.

Arborists: Arborist is a broad term intended to mean someone with specialized knowledge of trees, but it is often used to imply knowledge that is not there.

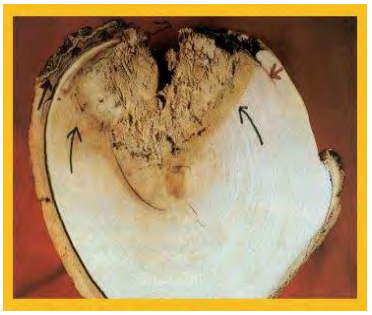
ISA Certified Arborist: An International Society of Arboriculture Certified Arborist is someone who has trained, met the qualifications for application, and been tested to have specialized knowledge of trees. You can look up certified arborists at the International Society of Arboriculture website: isa-arbor.org.

Consulting Arborist: An American Society of Consulting Arborists Registered Consulting Arborist is someone who has been trained and then tested to have specialized knowledge of trees; and trained and tested to provide high quality reports and documentation. You can look up registered consulting arborists at the American Society of Consulting Arborists website: ASCA-consultants.org.

Decay in Trees

Decay (in General): Fungi cause all decay of living trees. Decay is considered a disease because cell walls are altered, wood strength is affected, and living sapwood cells may be killed. Fungi decay wood by secreting enzymes. Different types of fungi cause different types of decay through the secretion of different chemical enzymes. Some decays, such as white rot, cause less wood strength loss than others because they first attack the lignin (causes cell walls to thicken and reduces susceptibility to decay and pest damage) secondarily the cellulose (another structural component in a cell walls). Others, such as soft rot, attack the cellulose chain and cause substantial losses in wood strength even in the initial stages of decay. Brown rot causes wood to become brittle and fractures easily with tension. Identification of internal decay in a tree is difficult because visible evidence may not be present.

According to Evaluation of Hazard Trees in Urban Areas (Matheny, 1994) decay is a critical factor in the stability of the tree. As decay progresses in the trunk, the stem becomes a hollow tube or cylinder rather than a solid rod. This change is not readily apparent to the casual observer. Trees require only a small amount of bark and wood to transport water, minerals and sugars. Interior heartwood can be eliminated (or degraded) to a great degree without compromising the transport process. Therefore, trees can contain significant amounts of decay without showing decline symptoms in the crown. Compartmentalization of decay in trees is a biological process in which the cellular tissue around wounds is changed to inhibit fungal growth and provide a barrier against the spread of decay agents into additional cells. The weakest of the barrier zones is the formation of the vertical wall. Accordingly, while a tree may be able to limit decay progression inward at large pruning cuts, in the event that there are more than one pruning cut located vertically along the main trunk of the tree, the likelihood of decay progression and the associated structural loss of integrity of the internal wood is high.



Oak Tree Impacts

Our native oak trees are easily damaged or killed by having the soil within the Protected Root Zone (PRZ) disturbed or compacted. All of the work initially performed around protected trees that will be saved should be done by people rather than by wheeled or track type tractors. Oaks are fragile giants that can take little change in soil grade, compaction, or warm season watering. Don't be fooled into believing that warm season watering has no adverse effects on native oaks. Decline and eventual death can take as long as 5-20 years with poor care and inappropriate watering. Oaks can live hundreds of years if treated properly during construction, as well as later with proper pruning, and the appropriate landscape/irrigation design.

RECOMMENDATIONS: Summary of Tree Protection Measures

The Owner and/or Developer should ensure the project arborist's protection measures are incorporated into the site plans and followed. Tree specific protection measures can be found in Appendix 2 – Tree Data.

- The project arborist should inspect the fencing prior to grading and/or grubbing for compliance with the recommended protection zones.
- All stumps within the root zone of trees to be preserved shall be ground out using a stump router or left in place. **No trunk within the root zone of other trees shall be removed using a backhoe or other piece of grading equipment.**
- Prior to any grading, or other work on the site that will come within 50' of any tree to be preserved, irrigation will be required from April through September and placement of a 4-6" layer of chip mulch over the protected root zone of all trees that will be impacted. Chips should be obtained from onsite materials and trees to be removed.
- Clearance pruning should include removal of all the lower foliage that may interfere with equipment PRIOR to having grading or other equipment on site. The Project Arborist should approve the extent of foliage elevation and oversee the pruning to be performed by a contractor who is an ISA Certified Arborist.

- Clearly designate an area on the site outside the drip line of all trees where construction materials may be stored, and parking can take place. No materials or parking shall take place within the root zones of protected trees.
- Any and all work to be performed inside the protected root zone fencing shall be supervised by the project arborist.
- Trenching inside the protected root zone shall be by a hydraulic or air spade, placing pipes underneath the roots, or boring deeper trenches underneath the roots.
- Follow all of the General Development Guidelines, Appendix 3, for all trees.

TOTAL INVENTORIED TREES = 41 trees (932 aggregate diameter inches)
TOTAL RECOMMENDED REMOVALS = 14 trees (320 aggregate diameter inches)
Rating (0-5, where 0 is Dead) = 0=2 trees; 1=11 trees; 2=26 trees; 3=2 trees
Total Non-Protected Trees = 39 trees (878 aggregate diameter inches)
Total Protected Trees = 2 trees (54 aggregate diameter inches)

**Non-Protected Trees for identification purposes, not numbered in the field.*

***Protected Trees tagged in the field.*

APPENDIX 3 – GENERAL PRACTICES FOR TREE PROTECTION

Definitions

Root zone: The roots of trees grow fairly close to the surface of the soil, and spread out in a radial direction from the trunk of tree. A general rule of thumb is that they spread 2 to 3 times the radius of the canopy, or 1 to 1 ½ times the height of the tree. It is generally accepted that disturbance to root zones should be kept as far as possible from the trunk of a tree.

Inner Bark: The bark on large valley oaks and coast live oaks is quite thick, usually 1" to 2". If the bark is knocked off a tree, the inner bark, or cambial region, is exposed or removed. The cambial zone is the area of tissue responsible for adding new layers to the tree each year, so by removing it, the tree can only grow new tissue from the edges of the wound. In addition, the wood of the tree is exposed to decay fungi, so the trunk present at the time of the injury becomes susceptible to decay. Tree protection measures require that no activities occur which can knock the bark off the trees.

Methods Used in Tree Protection:

No matter how detailed Tree Protection Measures are in the initial Arborist Report, they will not accomplish their stated purpose unless they are applied to individual trees and a Project Arborist is hired to oversee the construction. The Project Arborist should have the ability to enforce the Protection Measures. The Project Arborist should be hired as soon as possible to assist in design and to become familiar with the project. He must be able to read and understand the project drawings and interpret the specifications. He should also have the ability to cooperate with the contractor, incorporating the contractor's ideas on how to accomplish the protection measures, wherever possible. It is advisable for the Project Arborist to be present at the Pre-Bid tour of the site, to answer questions the contractors may have about Tree Protection Measures. This also lets the contractors know how important tree preservation is to the developer.

Root Protection Zone (RPZ): Since in most construction projects it is not possible to protect the entire root zone of a tree, a Root Protection Zone is established for each tree to be preserved. The minimum Root Protection Zone is the area underneath the tree's canopy (out to the dripline, or edge of the canopy), plus 10'. The Project Arborist must approve work within the RPZ.

Irrigate, Fertilize, Mulch: Prior to grading on the site near any tree, the area within the Tree Protection fence should be fertilized with 4 pounds of nitrogen per 1000 square feet, and the fertilizer irrigated in. The irrigation should percolate at least 24 inches into the soil. This should be done no less than 2 weeks prior to grading or other root disturbing activities. After irrigating, cover the RPZ with at least 12" of leaf and twig mulch. Such mulch can be obtained from chipping or grinding the limbs of any trees removed on the site. Acceptable mulches can be obtained from nurseries or other commercial sources. Fibrous or shredded redwood or cedar bark mulch shall not be used anywhere on site.

Fence: Fence around the Root Protection Zone and restrict activity therein to prevent soil compaction by vehicles, foot traffic or material storage. The fenced area shall be off limits to all construction equipment, unless there is express written notification provided by the Project Arborist, and impacts are discussed and mitigated prior to work commencing.

No storage or cleaning of equipment or materials, or parking of any equipment can take place within the fenced off area, known as the RPZ.

The fence should be highly visible, and stout enough to keep vehicles and other equipment out. I recommend the fence be made of orange plastic protective fencing, kept in place by t-posts set no farther apart than 6'.

In areas of intense impact, a 6' chain link fence is preferred.

In areas with many trees, the RPZ can be fenced as one unit, rather than separately for each tree.

Where tree trunks are within 3' of the construction area, place 2" by 4" boards vertically against the tree trunks, even if fenced off. Hold the boards in place with wire. Do not nail them directly to the tree. The purpose of the boards is to protect the trunk, should any equipment stray into the RPZ.

Elevate Foliage: Where indicated, remove lower foliage from a tree to prevent limb breakage by equipment. Low foliage can usually be removed without harming the tree, unless more than 25% of the foliage is removed. Branches need to be removed at the anatomically correct location in order to prevent decay organisms from entering the trunk. For this reason, a contractor who is an ISA Certified Arborist should perform all pruning on protected trees.[2]

Expose and Cut Roots: Breaking roots with a backhoe, or crushing them with a grader, causes significant injury, which may subject the roots to decay. Ripping roots may cause them to splinter toward the base of the tree, creating much more injury than a clean cut would make. At any location where the root zone of a tree will be impacted by a trench or a cut (including a cut required for a fill and compaction), the roots shall be exposed with either a backhoe digging radially to the trunk, by hand digging, or by a hydraulic air spade, and then cut cleanly with a sharp instrument, such as chainsaw with a carbide chain. Once the roots are severed, the area behind the cut should be moistened and mulched. A root protection fence should also be erected to protect the remaining roots, if it is not already in place. Further grading or backhoe work required outside the established RPZ can then continue without further protection measures.

Protect Roots in Deeper Trenches: The location of utilities on the site can be very detrimental to trees. Design the project to use as few trenches as possible, and to keep them away from the major trees to be protected. Wherever possible, in areas where trenches will be very deep, consider boring under the roots of the trees, rather than digging the trench through the roots. This technique can be quite useful for utility trenches and pipelines.

Protect Roots in Small Trenches: After all construction is complete on a site, it is not unusual for the landscape contractor to come in and sever a large number of "preserved" roots during the installation of irrigation systems. The Project Arborist must therefore approve the landscape and irrigation plans. The irrigation system needs to be designed so the main lines are located outside the root zone of major trees, and the secondary lines are either laid on the surface (drip systems), or carefully dug with a hydraulic or air spade, and the flexible pipe fed underneath the major roots.

Design the irrigation system so it can slowly apply water (no more than ¼" to ½" of water per hour) over a longer period of time. This allows deep soaking of root zones. The system also needs to accommodate infrequent irrigation settings of once or twice a month, rather than several times a week.

Monitoring Tree Health During and After Construction: The Project Arborist should visit the site at least twice a month during construction to be certain the tree protection measures are being followed, to monitor the health of impacted trees, and make recommendations as to irrigation or other needs. After construction is complete, the arborist should monitor the site monthly for one year and make recommendations for care where needed.

Chemical Treatments: The owner or developer shall be responsible to contact an arborist with a pesticide applicators license to arrange for an application of a root enhancing hormone, such as Paclobutrazol, to mitigate the stress produced by the development **prior to grading**. Additionally, at the discretion of the project arborist, an insect infestation preventative for both boring insects and leaf feeding insects and/or fungal preventative for leaf surfaces may be required. Roots pruned during the course of performing a cut may be required to be treated with a biofungicide such as Bio-Tam.

[2] International Society of Arboriculture (ISA), maintains a program of Certifying individuals. Each Certified Arborist has a number and must maintain continuing education credits to remain Certified.

Community Commercial (CC) – Mixed Use

FAR & Density:	Commercial/Office: Up to 3.0 FAR Residential: 13.0 dwelling units per acre and higher
Applied Zoning Districts:	CMU/SA – Commercial Mixed Use/Special Area overlay
Description:	Sites with a Community Commercial (CC) – Mixed Use designation are intended to develop as mixed-use centers that allow for a combination of commercial, office, and residential uses. To foster this type of development pattern, these sites have a Commercial Mixed Use (CMU) zoning district, which is combined with a Special Area (SA) overlay. These sites are intended to promote a variety of commercial use types and the flexible citing of other uses that are typically considered to be compatible with commercial development. The permitted uses on these parcels could be mixed in either a horizontal or vertical manner. This means that a commercial/office component could be co-located on the same site with a residential component, or that a commercial/office component could be located on the ground floor of a multi-story residential component. This allows flexibility for future market conditions while maintaining sites for local neighborhood services. At full buildout of the Plan Area, these CMU parcels can accommodate approximately 366,000 sq. ft. of commercial/office uses (assuming FAR of 0.4 for the portion of each site assumed to be non-residential) and ~~255~~ 249 residential units. The development allocation is assumed to be 60% commercial/office and 40% high-density residential. While the intent is that each CMU site develops with a mixture of uses, it could develop solely as a commercial use, or with a different mixture of commercial/residential uses, provided some non-residential use is provided. Therefore, the final development plan for each site may ultimately deviate from the square footage/ dwelling unit assumptions listed in Table 4-2. See Figure B-23 for an illustrative concept plan. Parcel KT-40A is designated for 209 multi-family residential units and Parcels KT-40B and KT-40C are designated for commercial uses. See Table 4-3 on the following page for a list of permitted uses for Parcels KT-40B and KT-40C.
Permitted Uses & Development Standards	As specified in the City of Roseville Zoning Ordinance.

BASIS OF BEARINGS:

THE BASIS OF BEARINGS FOR THIS SITE IS THE FOUND MONUMENTS ON THE WEST BOUNDARY AS SHOWN ON THAT CERTAIN FINAL MAP ENTITLED "SIERRA VISTA - KT PROPERTIES PHASE 2 LARGE LOT SUBDIVISION" FILED FOR RECORD ON OCTOBER 1, 2020 IN BOOK FF OF MAPS, AT PAGE 18, PLACER COUNTY RECORDS, SAID BEARING BEING N00°38'36"W.

BENCHMARK:

IDENTIFICATION NO.: CITY BM 126
ELEVATION: 118.03(NGVD29
3-1/4" BRASS DISK STAMPED SEPTEMBER 2014, LS-7331 LOCATED AT THE NORTHEAST CORNER OF THE INTERSECTION OF FIDDYMENT ROAD AND WESTLAKE DRIVE ON THE TOP OF CURB AT NORTH CURB RETURN.
LAT=38°45'27", LONG=121°21'30"

PROPERTY DESCRIPTION:

BEING A PORTION OF THE LANDS OF BASELINE P & R, LLC AS DESCRIBED IN THE GRANT DEED RECORDED AS DOCUMENT #2001-0117909 AND A PORTION OF THE LANDS OF BASELINE 80 INVESTORS, LLC AS DESCRIBED IN THE GRANT DEED RECORDED AS DOCUMENT #2013-0047229, OF OFFICIAL RECORDS, PLACER COUNTY RECORDS, AND LOCATED IN THE CITY OF ROSEVILLE, COUNTY OF PLACER, STATE OF CALIFORNIA, MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGINNING AT A POINT WHICH IS THE SOUTHWEST CORNER OF SAID LANDS OF BASELINE P & R, LLC, SAID SOUTHWEST CORNER BEING THE SOUTHEAST CORNER OF SAID LANDS OF BASELINE 80 INVESTORS, LLC, SAID CORNER ALSO BEING A POINT ON THE NORTHERLY LINE AS DESCRIBED IN THE DEED RECORDED IN BOOK 55, AT PAGE 641, SAID COUNTY RECORDS; THENCE LEAVING SAID POINT OF BEGINNING, ALONG THE SOUTH LINE OF SAID LANDS OF BASELINE 80 INVESTORS, LLC, SAID SOUTH LINE ALSO BEING SAID NORTHERLY LINE OF LAST SAID DEED, SAID SOUTH LINE ALSO BEING 30.00 FEET NORTHERLY OF AND PARALLEL WITH THE SOUTH LINE OF SECTION 34, TOWNSHIP 11 NORTH, RANGE 5 EAST, M.D.B. & M., SOUTH 89° 30' 37" WEST, A DISTANCE OF 206.88 FEET;

THENCE LEAVING SAID SOUTH LINE, ENTERING INTO AND CROSSING LAST SAID LANDS, THE FOLLOWING SIX (6) COURSES AND DISTANCES:

1. NORTH 00° 38' 36" WEST A DISTANCE OF 1190.34 FEET;
2. SOUTH 72° 13' 16" EAST, A DISTANCE OF 60.42 FEET;
3. SOUTH 84° 17' 15" EAST, A DISTANCE OF 32.90 FEET;
4. SOUTH 26° 11' 00" EAST, A DISTANCE OF 65.03 FEET;
5. NORTH 89° 39' 56" EAST, A DISTANCE OF 59.57 FEET;
6. NORTH 87° 15' 49" EAST, A DISTANCE OF 33.89 FEET TO A POINT ON THE EAST LINE OF LAST SAID LANDS, SAID EAST LINE ALSO BEING THE WEST LINE OF SAID LANDS OF BASELINE P & R, LLC; THENCE LEAVING SAID WEST LINE, ENTERING INTO AND CROSSING SAID LANDS OF BASELINE P & R, LLC, THE FOLLOWING NINE (9) COURSES AND DISTANCES:

1. NORTH 87° 15' 49" EAST, A DISTANCE OF 121.07 FEET;
2. SOUTH 73° 56' 55" EAST, A DISTANCE OF 69.64 FEET;
3. SOUTH 66° 12' 56" EAST, A DISTANCE OF 111.82 FEET;
4. SOUTH 53° 39' 22" EAST, A DISTANCE OF 193.94 FEET;
5. SOUTH 35° 59' 17" EAST, A DISTANCE OF 111.83 FEET;
6. SOUTH 29° 12' 09" EAST, A DISTANCE OF 147.49 FEET;
7. SOUTH 49° 30' 58" EAST A DISTANCE OF 67.92 FEET;
8. SOUTH 55° 47' 35" EAST, A DISTANCE OF 223.87 FEET;
9. SOUTH 36° 36' 24" EAST, A DISTANCE OF 45.55 FEET TO A POINT ON THE WEST LINE OF THE LANDS OF BASELINE P & R, LLC AS DESCRIBED IN THE RESOLUTION TO APPROVE A MINOR BOUNDARY LINE ADJUSTMENT RECORDED AS DOCUMENT #2008-0020215, SAID COUNTY RECORDS, SAID WEST LINE ALSO BEING THE COMMON SECTION LINE FOR SAID SECTION 34 AND SECTION 35, TOWNSHIP 11 NORTH, RANGE 5 EAST, M.D.B.& M.

THENCE LEAVING SAID WEST LINE, ENTERING INTO AND CROSSING LAST SAID LANDS, THE FOLLOWING FOUR (4) COURSES AND DISTANCES:

1. SOUTH 36° 36' 24" EAST, A DISTANCE OF 111.50 FEET;
2. SOUTH 36° 14' 35" EAST, A DISTANCE OF 275.76 FEET;
3. SOUTH 09° 07' 22" EAST, A DISTANCE OF 16.39 FEET;
4. SOUTH 00° 11' 16" EAST, A DISTANCE OF 171.92 FEET TO A POINT ON THE SOUTH LINE OF LAST SAID LANDS, SAID SOUTH LINE ALSO BEING THE NORTHERLY LINE OF SAID DEED RECORDED IN BOOK 55, AT PAGE 641;

THENCE ALONG SAID SOUTH LINE, SAID SOUTH LINE ALSO BEING SAID NORTHERLY LINE OF LAST SAID DEED, SAID SOUTH LINE BEING 30.00 FEET NORTHERLY OF AND PARALLEL WITH THE SOUTH LINE OF SECTION 35, TOWNSHIP 11 NORTH, RANGE 5 EAST, M.D.B.& M., SOUTH 89° 29' 55" WEST, A DISTANCE OF 227.35 FEET TO A POINT ON SAID COMMON SECTION LINE; THENCE CONTINUING ALONG A LINE BEING 30.00 FEET NORTHERLY OF AND PARALLEL WITH SAID SOUTH LINE OF SAID SECTION 34, SOUTH 89° 30' 37" WEST, A DISTANCE OF 845.69 FEET TO THE POINT OF BEGINNING.

SAID LAND BEING DESCRIBED UNDER RESULTANT PARCEL 2 IN THAT CERTAIN LOT LINE ADJUSTMENT CERTIFICATE OF COMPLIANCE, RECORDED FEBRUARY 18, 2014, SERIES NO. 2014-0010531, OFFICIAL RECORDS AND RE-RECORDED APRIL 21, 2014, SERIES NO. 2014-0024961, OFFICIAL RECORDS.

Concept Plant Pallette

A suggested plant pallette is provided below. Water use has been derived from a review of the University of California 'WUCOLS IV' database whereas the potential use of each plant corresponds with the Legend found on the right side of this plan. This list is not all inclusive and will be used, modified and refined during the preparation of detailed plans associated with building permits. The list is only intended to show the intent of the plan to meet City of Roseville guidelines for design and water use.

Botanical Name	Common Name	Water Use	Potential Use	Size
TREES				
Pistacia chinensis (D)	Chinese Pistache	Low	Shade Tree	15 gal
Acer rubrum (D)	Red Maple	Mod	Shade Tree, Edge	15 gal
Zelkova serrata (D)	Elm 'Summer Sprite'	Mod	Small Shade Tree	15 gal
Ginkgo biloba (D)	Maidenhair Tree	Mod	Accent Shade Tree, Edge	15 gal
Gleditsia triacanthos (D)	Honey locust	Low	Accent Shade Tree	15 gal
Acacia melanoxylon (E)	Blackwood Acacia	Low	Accent Shade Tree	15 gal
Quercus lobata (E)	Valley Oak	Low	Edge Shade Tree	15 gal
Schinus molle (E)	California Pepper	Low	Edge Shade Trees	15 gal
Washingtonia robusta (E)	Mexican Fan Palm	Low	Entry Accent	15 gal
Magnolia grandiflora 'Draivl' (E)	Southern Magnolia	Low	Small Shade Tree	15 gal
Podocarpus gracilior (E)	Fern Pine	Low	Small Shade Tree	15 gal
Cedrus deodara (E)	Deodar	Low	Edge Shade Tree	15 gal
Prunus cerecifera (D)	Cherry Plum	Low	Small Shade Tree, Accent	15 gal
SHRUBS				
Prunus caroliniana (E)	Carolina Cherry Laurel	Low	Perimeter, Screen	15 gal
Ceanothus 'Concha' (E)	'Concha' Ceanothus	Low	Perimeter, Interior Foundation	1 gal
Pittosporum crassifolium (E)	Evergreen Pittosporum	Mod	Interior Foundation	5 gal
Rhaphiolepis umbellata (E)	Yeddo Hawthorn	Low	Interior Foundation, Featured	5 gal
Pyracantha spp. (E)	Firethorn	Low	Interior Featured	1 gal
Nandina domestica (E)	Heavenly Bamboo	Low	Interior Featured	5 gal
Myrtus communis (E)	True Myrtle	Low	Perimeter, Interior Foundation	15 gal
Ligustrum ovalifolium (D)	California Privet	Low	Perimeter, Interior Foundation	15 gal
Lavandula spp. (E)	Lavender	Low	Interior Featured	5 gal
Keckiella antirrhinoides (E)	Yellow Penstemon	Low	Interior Featured	1 gal
Grevillea spp. (E)	Grevillea	Low	Interior Featured	5 gal
Berberis aquifolium (E)	Oregon Grape	Low	Interior Featured	5 gal
Rosa 'Radcon' (E)	Pink Knock Out Rose	Low	Interior Featured	5 gal
Cotoneaster spp. (E)	Cotoneaster	Low	Interior Featured	5 gal
Euonymus japonicus (E)	Japanese Euonymus	Low	Perimeter	5gal
Rosmarinus officinalis (E)	Rosemary	Low	Interior Foundation, Featured	5 gal
Perovskia spp. (P)	Russian Sage	Low	Interior Featured	5 gal
GROUND COVERS				
Coprosma x kirkii (E)	Creeping Coprosma	Low	Interior, Accent	1 gal
Teucrium chamaedrys (E)	Germander	Low	Interior, Accent	1 gal
Arctostaphylos hookeri (E)	Wayside Manzanita	Low	Interior, Screen	1 gal
Rosmarinus ovs. (E)	Trailing Rosemary	Low	Interior, Accent	1 gal
Salvia leucophylla (E)	Purple Sage	Low	Interior, Accent	1 gal
Romneya coulteri (P)	Matilija Poppy	Very Low	Interior, Accent	1 gal
Lupinus excubitus (P)	Grape Soda Lupine	Very Low	Interior, Accent	1 gal
Mimulus aurantiacus (P)	Sticky Monkey Flower	Low	Interior, Screen	1 gal
Acacia redolens (E)	Prostrate Acacia	Very Low	Interior, Screen	1 gal
Bougainvillea spp. (E)	Bougainvillea	Low	Interior, Accent	1 gal
Ceanothus thyrsiflorus (E)	Highlight Ceanothus	Low	Interior, Screen	1 gal
Bracteantha ovs. (P)	Strawflower	Low	Interior, Accent	1 gal
Saponaria x lempergi (P)	Hybrid Soapwort	Low	Interior, Accent	1 gal
Vinca major (E)	Periwinkle	Low	Interior, Accent	1 gal
Ajuga reptans (E)	Carpet Bugle	Low	Interior, Accent, Entry	1 gal
Boutelous gracilis	UC Verde Buffalo Grass	Low	Dog Park, Selected	Sod

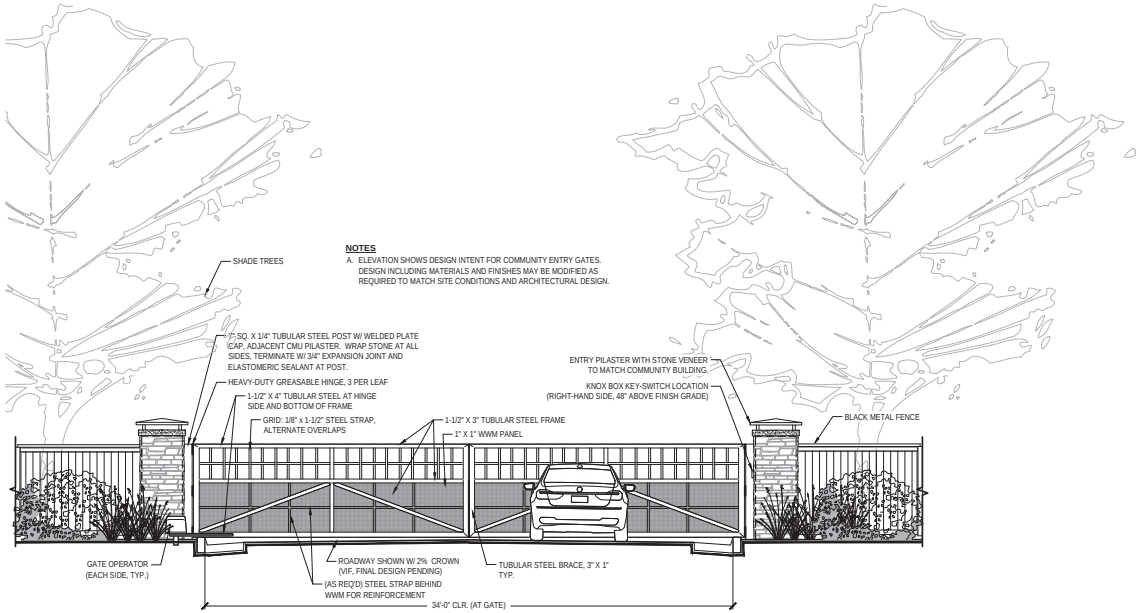
COMMUNITY ENTRY GATES

1/4" = 1'-0" ELEVATION



SECONDARY ENTRY GATES

1/4" = 1'-0" ELEVATION

BASIS FOR DESIGN

1. BUILDING CODE: CALIFORNIA BUILDING CODE 2016
2. SOIL PARAMETERS:
   - ACTIVE PRESSURE ..... 40 PCF
   - SOIL WEIGHT ..... 120 PCF
   - SOIL BEARING PRESSURE ..... 3000 PSF
   - PASSIVE PRESSURE ..... 300 PCF
   - FRICTION COEFFICIENT 0.30
3. SEISMIC DESIGN:
   - SS(0.2 SECOND) 0.548
   - S1(1.0 SECOND) 0.263
   - SITE CLASS ..... D
   - SDS (SHORT PERIOD) 0.497
   - SD1(1-SECOND PERIOD) 0.329
   - PGA_M 0.262
4. WIND DESIGN:
   - WIND SPEED ..... 100 MPH
   - RISK CATEGORY II
   - EXTERIOR PRESSURE COEFFICIENT (CP) 1.4
   - WIND EXPOSURE C
5. FOUNDATION DESIGN AND SOIL PARAMETERS PER RECOMMENDATIONS BY WALLACE KUHL & ASSOCIATES, REPORT NO. 11712.02, DATED DECEMBER 27, 2017

GENERAL REQUIREMENTS

1. THESE DOCUMENTS HAVE BEEN PREPARED USING STANDARDS OF PROFESSIONAL CARE AND SKILL ORDINARILY EXERCISED UNDER SIMILAR CONDITIONS BY PROFESSIONAL CONSULTANTS PRACTICING IN THE SAME FIELD AT THE SAME TIME IN THE SAME OR SIMILAR LOCALITY. THEY ASSUME THAT THE WORK DEPICTED WILL BE PERFORMED BY AN EXPERIENCED CONTRACTOR AND/OR WORKMEN WHO HAVE A WORKING KNOWLEDGE OF THE APPLICABLE CODE STANDARDS AND REQUIREMENTS AND INDUSTRY ACCEPTED STANDARD GOOD PRACTICE AS NOT EVERY CONDITION OR ELEMENT IS (OR CAN BE) EXPLICITLY SHOWN ON THESE DRAWINGS, THE CONTRACTOR SHALL USE INDUSTRY ACCEPTED STANDARD GOOD PRACTICE FOR MISCELLANEOUS WORK NOT EXPLICITLY SHOWN.
2. ENGINEER SHALL NOT AT ANY TIME SUPERVISE, DIRECT OR HAVE CONTROL OVER CONTRACTOR'S WORK, NOR SHALL ENGINEER HAVE AUTHORITY OVER OR RESPONSIBILITY FOR THE MEANS, METHODS, TECHNIQUES, SEQUENCES, OR PROCEDURES OF CONSTRUCTION SELECTED OR USED BY CONTRACTOR, FOR SECURITY OR SAFETY AT THE SITE NOR FOR SAFETY PRECAUTIONS AND PROGRAMS INCIDENT TO CONTRACTOR'S WORK.
3. ALL INSPECTIONS REQUIRED BY THE LOCAL BUILDING DEPARTMENTS, BUILDING CODES OR BY THESE PLANS SHALL BE PROVIDED BY THE BUILDING DEPARTMENT OR BY AN APPROVED INDEPENDENT INSPECTION COMPANY.
4. ALTHOUGH NOT NECESSARILY INDICATED AT A SPECIFIC LOCATION ON THE PLANS, TYP DETAILS AND NOTES SHALL APPLY. DETAILS MAY SHOW ONLY ONE SIDE OF CONNECTION OR MAY OMIT INFORMATION FOR CLARITY.
5. WHERE REFERENCE IS MADE TO VARIOUS TEST STANDARDS FOR MATERIALS, SUCH REFERENCE SHALL BE THE LATEST EDITION OR ADDENDA.
6. RETAINING WALLS SHALL NOT BE SURCHARGED OR USED IN A STACKED CONFIGURATION, UNO ON PLANS/DETAILS. A NON-SURCHARGED/NON-STACKED CONFIGURATION EXISTS WHEN UPPER STRUCTURES ARE A MIN DISTANCE OF (1)H(MAX RETAINED HEIGHT) AWAY, MEASURED FROM BACK FACE OF RETAINING WALL, UNLESS DEFINED OTHERWISE BY APPROVED GEOTECHNICAL REPORT.

FOUNDATION

1. SITE PREPARATION AND GRADING REQUIREMENTS FROM THE GEOTECHNICAL REPORT AND ANY ADDENDA ALONG W/ ANY TESTS, INSPECTIONS, FIELD OBSERVATIONS, OR APPROVAL FROM THE GEOTECHNICAL ENGINEER RECOMMENDED BY THE GEOTECHNICAL REPORT SHALL BE COMPLETED PRIOR TO CONSTRUCTION OF FOOTINGS. IF NO GEOTECHNICAL REPORT IS SUBMITTED, SITE PREPARATION AND GRADING SHALL BE PER CBC SECTION 1804.
2. W/IN THE TIME OF CONSTRUCTION AND W/IN THE LIFETIME OF THE WALL, THE OWNER MUST ENSURE THAT ALL SURFICIAL DRAINAGE IS DIRECTED AWAY FROM THE WALL SYSTEM.
3. FOUNDATION INSPECTION PRIOR TO PLACEMENT OF CONCRETE INCLUDES: FOOTING STEEL LOCATION AT GRADE, AND SIZE/DEPTH AND CLEANLINESS OF FOUNDATION. ADDITIONAL SPECIAL INSPECTION AS REQUIRED BY JURISDICTION.
4. FOOTING SHALL BE LEVEL, STEP FOOTING, AS REQ'D, WHERE GROUND SLOPES. HEIGHT OF STEP SHALL BE EQUAL TO HEIGHT OF CMU COURSE.

CONCRETE

1. MINIMUM 28 DAY COMPRESSIVE STRENGTH OF CONCRETE (f'C) SHALL BE 2500 PSI. CONCRETE MIX SHALL BE DESIGNED BY AN APPROVED LABORATORY. CONCRETE SHALL BE NORMAL WEIGHT OF 145 PCF USING HARD ROCK AGGREGATES CONFORMING TO ASTM C33.
2. MAXIMUM SLUMP SHALL BE 5 INCHES. WATER SHALL BE CLEAN AND POTABLE.
3. USE TYPE V PORTLAND CEMENT, AS REQ'D BY OWNER, JURISDICTION, OR SOILS ENGINEER, CONFORMING TO ASTM C150
4. A MAXIMUM OF 90 MINUTES MAY ELAPSE BETWEEN CONCRETE AND/OR GROUT BATCHING AND FIELD PLACEMENT.
5. CONCRETE QUALITY, MIXING, WEATHER PROTECTION AND PLACING SHALL CONFORM TO CBC SECTION 1905.

BACKFILL

1. BACKFILL MATERIAL AND PLACEMENT SHALL BE IN ACCORDANCE W/ RECOMMENDATIONS BY THE GEOTECHNICAL ENGINEER OR CBC SECTION 1804 IF GEOTECHNICAL REPORT NOT SUBMITTED.
2. BACKFILL SHALL NOT BE PLACED AGAINST WALLS BELOW GRADE OR ATOP FOUNDATIONS UNTIL GROUT AND CONCRETE HAVE REACHED DESIGN STRENGTH.
3. RETAINING WALL SYSTEM IS NOT DESIGNED TO WITHSTAND HYDROSTATIC PRESSURE. DRAINAGE SYSTEM SHALL BE PROVIDED TO PREVENT BUILD UP OF HYDROSTATIC PRESSURE. IN ADDITION, DRAINAGE SYSTEM SHALL NOT ADVERSELY AFFECT THE INTEGRITY OF THE RETAINING SYSTEM.

REINFORCING

1. REINFORCING STEEL SHALL CONFORM TO ASTM A615, WELDABLE REINFORCING STEEL SHALL CONFORM TO ASTM A706. REINFORCING SHALL BE GRADE 60.
2. LATEST ACI DETAILING MANUAL, ACI 318 AND CRSI MANUAL OF STANDARD PRACTICE APPLY TO REINFORCEMENT SPLICING, DETAILING, BENDING, AND PLACEMENT.
3. REFER TO TYPICAL WALL INTERSECTION DETAIL FOR REINFORCING REQUIREMENTS AT WALL AND FOOTING INTERSECTIONS.
4. REFER TO LAP SCHEDULE FOR MINIMUM O.C. SPACING, LAP SPLICE LENGTHS IN CONCRETE AND MASONRY, AND HOOK LENGTHS. NO WELDING (TACK, SPOT ETC.) OR REINFORCING ALLOWED. STAGGER SPLICES A MINIMUM OF (1) LAP LENGTH.

REINFORCING (CONT)

5. ALL REINFORCEMENT SHALL BE BENT COLD. NO FIELD BENDING OF BARS IS ALLOWED UNLESS APPROVED BY THE ENGINEER.
6. SUPPORT REINFORCEMENT ADEQUATELY TO SECURE REINFORCEMENT AGAINST DISPLACEMENT DURING CONCRETE PLACEMENT IN THE FOOTING AND GROUT PLACEMENT IN THE CMU.
7. PROVIDE VERTICAL REINFORCING BARS, W/ HOOKS INTO FOOTING PER APPLICABLE DETAIL SECTION, IN GROUTED CELLS AT ALL WALL INTERSECTIONS, CORNERS, WALL ENDS, AND EACH SIDE OF CONTROL JOINTS. EXTEND ALL VERTICAL REINFORCING TO FOUNDATION EITHER CONTINUOUS OR WITH SUFFICIENT LAP REQUIREMENTS, AS INDICATED PER APPLICABLE DETAIL SECTIONS.
8. HORIZONTAL REINFORCING SHALL BE 9 GAGE DIAMETER WIRE AND CONFORM TO ASTM A82 LADDER TYPE, 9 GAGE DIAMETER, LAP JOINT REINFORCING ONE FULL CROSS SQUARE (6" MINIMUM LAP). HORIZONTAL REINF SHALL BE HOT-DIPPED GALVANIZED OR APPROVED EQUIVALENT.

CONVENTIONAL MASONRY

1. HOLLOW, NORMAL-WEIGHT, LOAD BEARING PRECISION CONCRETE MASONRY UNITS (CMU) SHALL CONFORM TO ASTM C 90. MINIMUM COMPRESSIVE STRENGTH OF CMU SHALL BE 2000 PSI. ALL BLOCKS SHALL BE PLACED IN RUNNING BOND CONSTRUCTION, UNO W/ ALL VERTICAL CELLS IN ALIGNMENT.
2. GROUT SHALL CONFORM TO ASTM C476. MINIMUM GROUT COMPRESSIVE STRENGTH EQUALS OR EXCEEDS f'M BUT NOT LESS THAN 2000 PSI. HOLD DOWN GROUT 1-1/2" BELOW TOP OF BLOCK AT GROUT LIFT JOINTS.
3. MORTAR SHALL CONFORM TO ASTM C270 & CBC 2103, TYPE S, 2000 PSI MIN. MORTAR MUST BE A MIN OF 4 HOURS OLD PRIOR TO INITIAL TENSIONING.
4. NET AREA COMPRESSIVE STRENGTH OF MASONRY SHALL BE (f'M) 2000 PSI MIN, PER THE UNIT STRENGTH METHOD. FOR POST-TENSIONED MASONRY DESIGN AND 1500 PSI MIN, PER THE UNIT STRENGTH METHOD, FOR CONVENTIONAL MASONRY DESIGN.
5. THICKNESS OF BED JOINTS SHALL NOT EXCEED 5/8".
6. GROUT SOLID ALL CELLS BELOW GRADE UNLESS NOTED OTHERWISE.
7. MASONRY CONSTRUCTION, INCLUDING BUT NOT LIMITED TO PREPARATION, ERECTION, REINFORCEMENT INSTALLATION AND GROUT PLACEMENT SHALL COMPLY WITH CBC SECTION 2104 AND W/ ACI 530.1.
8. DAMPPROOF ALL CMU IN CONTACT W/ SOIL PER CBC SECTION 1805.
9. TONGUE AND GROOVE CMU MAY BE USED AT FENCE WALLS.

PROTO II

1. PROTO II HARDWARE IS DEFINED AS: TENSION RODS, BEARING PLATES, COUPLERS, NUTS, ALL THREADS, DTI, PLASTIC SADDLES. ALL OF THIS HARDWARE SHALL BE SUPPLIED BY ONLY AN APPROVED PROTO II LICENSEE TO THE CERTIFIED INSTALLER. POST TENSION RODS SHALL BE 7/16" DIAMETER W/ 1/2" ROLL THREADS CONFORMING TO ASTM A641 (fy=60 KSI) AND HAVE STEEL CHEMISTRY SO THAT BENDING AND THREADING CAN BE ACCOMPLISHED W/OUT DAMAGE TO THE POST TENSION ROD. MIN. OF TENSION ROD=1503 SQ IN. BEARING PLATES ARE 1/4" THICK (fy=50 KSI). SEE DETAIL TYPICAL TOP OF PROTO II WALL FOR WIDTHS. 1/2" COUPLERS SHALL BE PER ASTM A563 GRADE A, AND THE COUPLER NUT MUST FULLY ENGAGE THE UPPER AND LOWER ROD, FULLY ENGAGED AS DEFINED AS 1/2" MIN INTO COUPLER. "U" NUTS ARE TO BE GRADE B, PER ASTM A325. 1/2" ALL THREADS PER ASTM A307, GRADE 60. DTI IS NPPD ASTM F959. PLASTIC REBAR SADDLES ARE NON-STRUCTURAL.
2. PROVIDE CONT FULL HEIGHT RODS W/ MIN OF 3" "L" HOOK AT BOTTOM END AT TENSION ROD INTO FOOTING PER APPLICABLE DETAIL SECTION AND AT CONTROL JOINTS PER TYP DETAIL AT CONTRACTOR'S OPTION RODS MAY BE STABBED INTO WET CONCRETE OR TIED INTO PLACE.
3. IN LIEU OF FULL HEIGHT RODS, CONTRACTOR MAY USE SHORTER RODS, 1/2" COUPLERS AND STRAIGHT RODS THREADED BOTH ENDS FOR ADDITIONAL LIFTS. NO COUPLERS MAY OCCUR DIRECTLY BELOW AND IN CONTACT W/ THE BEARING PLATE. NO BOND BEAM BLOCK MAY BE USED AT PLATE/TENSION LOCATION.
4. A PROTO II DTI SHALL BE INSTALLED AT EVERY TENSION ROD BETWEEN THE BEARING PLATE AND NUT W/ THE DTI TABS FACING UP AGAINST THE BOTTOM OF THE NUT. THE SPECIAL DEPUTY INSPECTION REQUIRED AT THE TIME OF POST TENSIONING BY A DEPUTY INSPECTOR SHALL VERIFY FINAL TENSIONING TO 6,000 LBS BY 1 OF 2 METHODS; METHOD 1: VISUAL INSPECTION OF DTI, TABS FACING UP AND COLLAPSED AGAINST NUT W/ NO LIGHT LEAKAGE BETWEEN THE PROTO II DTI AND BOTTOM OF NUT. METHOD 2: USE OF A CALIBRATED TORQUE WRENCH TORQUED TO 55 FT-LBS. (DTI MUST STILL BE PLACED WITH METHOD 2. NO VISUAL INSPECTION OF DTI REQUIRED WHEN USING METHOD 2). INSPECTOR SHALL OBSERVE THE USE OF THREAD LUBRICANT, THE POSITION OF PLATE ON BLOCK, AND INTEGRITY OF MORTAR JOINTS. IN ADDITION, THE INSTALLER SHALL PROVIDE A SIGNED REPORT TO ALL APPROPRIATE PARTIES. PROTO II MASONRY DESIGN IS BASED ON THIS SPECIAL INSPECTION.
5. VERTICAL CONTROL JOINTS TO BE PLACED AT MAX 36'-0" O.C. IN ALL NON-STUCCOED WALLS AND 20'-0" O.C. IN STUCCOED WALLS W/ CLEAN VERTICAL BREAK OF ALL MATERIALS.
6. CONCRETE AT FOOTING SHALL BE A MIN OF 48 HOURS OLD. CMU BLOCK SHALL BE A MIN OF 7 DAYS OLD, & MORTAR SHALL BE A MIN OF 24 HRS OLD PRIOR TO FINAL TENSIONING.

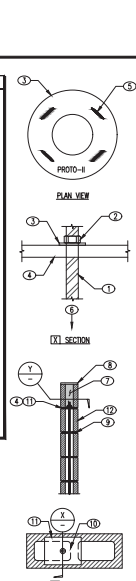
#5	9 ⅜"	2'-0"	2'-7"	3'-4"
#6	11 ¼"	2'-5"	3'-1"	4'-2"

3 TYP REINF LAP SCHEDULE
NO SCALE



KEYNOTES

1. POST TENSION ROD
2. NUT
3. DTI
4. BEARING TOP PLATE
5. COLLAPSIBLE TABS
6. MIN TENSION TO BE 6,000 LBS LOAD AND CONFIRMED BY ONE OF TWO METHODS PER NOTES "B" AND "C" BELOW
7. AFTER TENSION INSPECTION, PLACE MORTAR MOUND OVER THE TOP OF ROD/PLATE/NUT LOCATION BLOCK
8. OPT CAP BLOCK
9. CONTINUOUS HORIZONTAL JOINT REINFORCING PER GSN
10. CENTER WEB OR END FACE SHELL BELOW
11. STEEL PLATE SIZES:
    - A. 4" PROTO II: 1 1/4"x3"x6"
    - B. 4" SLUMP PROTO II: 1 1/4"x3"-1/2"x6"
    - C. 6" PROTO-II: 1 1/4"x4-1/2"x6"
    - D. 6" SLUMP PROTO-II: 1 1/4"x4-1/2"x6"
    - E. 8" PROTO-II: 1 1/4"x6-1/2"x6"

    STEEL PLATE TO BE PLACED AT THE EDGE OF THE CELL SO THAT THE PLATE BEARS FULLY ON THREE SIDES
12. DO NOT USE BOND BEAM BLOCK AT BEARING PLATE LOCATIONS

NOTES

A. PROTO-II DTI TO BE USED AT EACH TENSION ROD, TABS FACING UP AGAINST BOTTOM OF 1/2" NUT AND TABS COLLAPSED TO ACHIEVE TENSION (NO LIGHT PASSES BETWEEN BOT OF NUT AND DTI)

B. AS ALTERNATE TO VISUAL INSPECTION OF TABS, INSPECTION OF NUT TORQUE MAY BE ACHIEVED BY USE OF CALIBRATED TORQUE WRENCH. TORQUE NUTS TO 55 FT-LBS. DTI STILL MUST BE PLACED ON ROD IS USING TORQUE WRENCH METHOD. SEE GSN FOR ADD'L INFO

C. DEPUTY INSPECTOR SHALL PERFORM A VISUAL INSPECTION TO CONFIRM THE DTI IS COLLAPSED W/ NO LIGHT LEAKS BETWEEN THE TABS AND BOTTOM OF NUT

D. INSTALLER MUST HAVE SPECIAL INSPECTION OF TENSIONING PERFORMED PER ONE OF THE TWO METHODS NOTED ABOVE. SPECIAL INSPECTOR TO PROVIDE A COMPLETED REPORT TO LISTED PARTIES

SUBJECT: SVSP PCL KT-40A & KT-40B – Estia
File # PL21-0256
Citywide Job # 190748

On **MARCH 24, 2022**, the *Planning Commission* **CONSIDERED** the **7th ADDENDUM TO THE SIERRA VISTA SPECIFIC PLAN ENVIRONMENTAL IMPACT REPORT**; **RECOMMENDED APPROVAL** of a request for **SPECIFIC PLAN AMENDMENT**, **DEVELOPMENT AGREEMENT AMENDMENT ("BASELINE P&R DA")**, and **DEVELOPMENT AGREEMENT AMENDMENT ("BAYBROOK DA"**); and, **APPROVED** the request for a **TENTATIVE SUBDIVISION MAP** to subdivide the 23-acre property into three parcels (KT-40A, KT-40B, and KT-40C), a **TREE PERMIT** to remove two native oak trees, and a **DESIGN REVIEW PERMIT** to allow construction of 209 multi-family residential units on parcel KT-40A, located at **6350 BASELINE RD**.

ADVISORY ACTION
The Planning Commission action on the **SPECIFIC PLAN AMENDMENT**, **DEVELOPMENT AGREEMENT AMENDMENT ("BASELINE P&R DA")**, and **DEVELOPMENT AGREEMENT AMENDMENT ("BAYBROOK DA"**) is a recommendation and does not grant the applicant any entitlements. These items require action by the City Council. The City Council will consider these items at a later date.

EXPIRATION DATE
You have two (2) years from the date of the Planning Commission's approval in which to effectuate the permit, or else the **TENTATIVE SUBDIVISON MAP**, **TREE PERMIT** and **DESIGN REVIEW PERMIT** approval becomes null and void.

The expiration date of this request is **MARCH 24, 2024**.

EXTENSION OF PERMIT

You many request that the **TENTATIVE SUBDIVISION MAP** be extended for a period up to a maximum of six (6) years. An application for an extension shall be submitted to the Planning Division prior to the expiration date indicated above. No notice will be sent to you prior to the date of permit expiration.

You many request that the **TREE PERMIT** and **DESIGN REVIEW PERMIT** be extended for a period up to a maximum of one (1) year. An application for an extension shall be submitted to the Planning Division prior to the expiration date indicated above. No notice will be sent to you prior to the date of permit expiration.

YOU WILL BE RESPONSIBLE FOR REQUESTING ANY EXTENSION.

FEE NOTIFICATION

Per Government Code Section 66000, et seq, this notice shall serve as notification that the 90 day appeal period has begun in which the applicant may protest the imposition of fees, dedications, reservations, or other exactions imposed under the provisions of Government Code Section 66020 to the City Council. The appeal shall be filed in writing or on a form provided by the City stating the reasons for the appeal as provided for in Government Code Section 66020. **The appeal shall be filed with the City Clerk**.

APPEAL PROCEDURE

The decision of the Planning Commission is final unless appealed. This decision must be appealed to the City Council by filing a written appeal and paying the required fee **within *ten (10)* calendar days of March 24, 2022. The appeal shall be filed with the City Clerk**.

You may be precluded from filing a lawsuit to challenge this decision unless you use this opportunity for administrative appeal and raise any issues you believe to be wrongly decided.

Persons wishing to commence a court case challenging this decision must do so within ninety (90) days of the final decision (after all administrative appeals are exhausted) pursuant to Code of Civil Procedures Section I094.6. (See Roseville City Council Resolution No. 82-8I)

CONDITIONS OF APPROVAL FOR DESIGN REVIEW PERMIT, FILE # PL21-0256

1. This Design Review Permit approval shall be effectuated within a period of two (2) years from **March 24, 2022** and if not effectuated shall expire on **March 24, 2024**. Prior to said expiration date, the applicant may apply for an extension of time, provided this approval does not extend the expiration beyond **March 24, 2025**. (Planning)

2. The project is approved as shown in Exhibit A - L and as conditioned or modified below. (Planning)

3. The project shall comply with all required environmental mitigation identified in the Sierra Vista Specific Plan (SVSP) EIR and the 7th Addendum to the SVSP EIR (Attachment 1), and shall include all applicable mitigation measures as notes on the grading plans. (All Departments)

4. A Design Review Permit shall be required prior to issuance of building permits for the development of Parcels KT-40B and KT-40C. (Planning)

5. The project shall be addressed as 6350 Baseline Rd. All projects with multi-tenants or buildings must submit a site plan with building footprint(s), upon initial building permit submittal, to the Development Services Department (Business Services – Addressing) for building/unit addressing review. (Business Services)

6. The applicant shall pay City's actual costs for providing plan check, mapping, GIS, and inspection services. This may be a combination of staff costs and direct billing for contract professional services. Project billing may occur up to two (2) months after the end of warranty or the Notice of Termination date for the SWPPP, whichever occurs later. (Engineering, Environmental Utilities, Electric, Finance)

7. The design and construction of all improvements shall conform to the Design and Construction Standards of the City of Roseville, or as modified by these conditions of approval, or as directed by the City Engineer. (Engineering)

8. The developer shall not commence with any on-site improvements until such time as grading and/or improvement plans have been submitted for review and are approved and grading and/or encroachment permits are issued by the Development Services – Engineering (Engineering)

9. The approval of a Tentative Map and/or tentative site plan does not constitute approval of proposed improvements as to size, design, materials, or location, unless specifically addressed in these conditions of approval. The Developer shall submit civil drawings to the Department of Development Services – Engineering Division for review and approval. (Engineering)

10. Garage spaces shall not be utilized for storage that displaces vehicle parking. (Planning)

PRIOR TO ISSUANCE OF BUILDING PERMITS:

11. Parking lot design shall conform to the City's design standards, including the following minimum standards for parking stalls:

    a. All parking stalls shall be double-striped. Parking stalls adjacent to sidewalks, landscaped areas or light fixtures, and all Accessible stalls shall abut a 6-inch raised curb or concrete bumper. (Planning)

    b. Standard – 9 feet x 18 feet; Compact – 9 feet x 16 feet; Accessible – 14 feet x 18 feet (a 9-foot-wide parking area plus a 5-foot-wide loading area) and a minimum of one (1)

parking space shall be Accessible van accessible – 17 feet x 18 feet (9-foot-wide parking area plus an 8-foot-wide loading area). (Planning)

c. An 'exterior routes of travel' site accessibility plan incorporating slope, cross-slope, width, pedestrian ramps, curb ramps, handrails, signage, detectable warnings or speed limit signs or equivalent means shall comprise part of the site improvement plans submitted to City for review, prior to building plan check approvals. This site accessibility plan shall also include:

   i. Accessible parking stalls shall be dispersed and located closest to accessible entrances. The total number of accessible parking spaces shall be established by Table 11B-208.2 of the CBC.

   ii. Accessible Parking spaces and crosswalks shall be signed, marked and maintained as required by Chapter 11 of the CBC.

   iii. Accessible parking and exterior route of travel shall comply with CBC, Sections 11B-206 and 11B-208. (Building)

12. Signs and/or striping shall be provided on-site as required by the Planning Department to control on-site traffic movements. Parking lot striping and signage shall be maintained in a visible and legible manner. (Planning)

13. The plans submitted to the Building Division for permits shall indicate all approved revisions/alterations as approved by the Commission including all conditions of approval. (Planning)

14. The project Landscape Plans shall comply with the following:

    a. The Landscape Plan shall indicate the location of, and be designed to avoid conflicts with, all pole-mounted light fixtures and utility equipment including (but not limited to) electric transformers, switchgear, and overhead lines; backflow preventers; fire department connections; and public water, sewer, and storm drain facilities. (Planning, Fire, Environmental Utilities, Electric, Engineering)

    b. The tree plantings in the parking lot shall be designed to provide a minimum of 50% shade coverage after 15 years. (Planning)

    c. At a minimum, landscaped areas not covered with live material shall be covered with a rock, (3") bark (no shredded bark) or (3") mulch covering. (Planning)

    d. The landscape plan shall comply with the Landscape Guidelines for Sierra Vista Specific Plan and the City of Roseville Water Efficient Landscape Ordinance. (Planning, Environmental Utilities)

e. Landscaping adjacent to preserve areas shall consist of California native, drought-tolerant groundcover, shrubs, plants, and trees. (Open Space, Planning)

f. All landscaping in areas containing electrical service equipment shall conform to the Electric Department's Landscape Requirements and Work Clearances as outlined in Section 10.00 of the Departments "Specification for Commercial Construction." (Electric)

g. Slopes within landscape planters shall be no more than 3:1. A two-foot flat bench located at back-of-walk shall be included in the landscape area to slow or allow absorption of nuisance run-off from the planters. (Parks, Recreation, and Libraries)

h. All landscaping shall conform to the standards of crime prevention through environmental design with the intent to create natural surveillance, controlling access, and territorial reinforcement to property boundaries. (Police)

15. Any roof-mounted equipment and satellite dishes proposed shall be shown on the building plans. The equipment shall be fully screened from public streets and the surrounding properties. (Planning)

16. At the time of building permit application and plan submittal, the project applicant shall submit a proposed plan which shows the proposed addressing for the building and dwelling unit numbers. The Building Official, or the designee, shall approve said plan prior to building permit approval. Refer to the *City of Roseville Addressing Guidelines*. (Building)

17. A separate Architectural Site Accessibility Plan which details the project's site accessibility information as required by California Title 24, Part 2 shall be submitted as part of the project Building Permit Plans for the Clubhouse. (Building)

18. For Multiple Building Complexes: As part of the required Architectural Site Accessibility Plan, the developer shall delineate the extent of the site accessibility improvements being installed as part of the initial improvements for the project, and those that are planned to be developed as part of subsequent phases (i.e. around future pad buildings). (Building)

19. Building permit plans shall comply with all applicable code requirements (California Building Code – CBC – based on the International Building Code, California Green Building Standards Code–CGBSC, California Mechanical Code – CMC – based on the Uniform Mechanical Code, California Plumbing Code – CPC – based on the Uniform Plumbing Code, California Fire Code – CFC – based on the International Fire Code – with City of Roseville Amendments – RFC, California Electrical Code – CEC – based on the National Electrical Code, and California Energy Standards – CEC T-24 Part 6), California Title 24 and the American with Disabilities Act - ADA requirements, and all State and Federally mandated requirements in effect at the time of submittal for building permits (contact the Building Division for applicable Code editions). (Building)

20. For restaurants, other food services, or commercial swimming pools: The developer shall obtain all required approvals and permits from the Placer County Health Department and the City of Roseville Industrial Waste Division. (Building, Environmental Utilities)

21. Maintenance of copy of building plans: Health and Safety Code section 19850 requires the building department of every city or county to maintain an official copy of the building plans for the life of the building. As such, each individual building shall be submitted as a separate submittal package. Building plan review, permit issuance and archiving is based on each individual building address. (Building)

22. For all work to be performed off-site, permission to enter and construct shall be obtained from the property owner, in the form of a notarized right-of-entry. Said notarized right-of-entry shall be provided to Public Works prior to approval of any plans. (Engineering)

23. The Improvement Plans shall include a complete set of Landscape Plans. The Landscape Plans shall be approved with the Improvement Plans. (Planning, Engineering, Fire, Environmental Utilities, Electric)

24. Baseline Road/Access Drive – install signal infrastructure including conduit, loops and poles as part of the Estia project improvements per the Development Agreement. Provide 40' minimum width of pavement for the Access Drive to accommodate a city standard southbound right turn lane. (Engineering)

25. Landowner shall be responsible for the costs of construction of the traffic signals as shown on Exhibit "K" of the Baybrook LP and Baseline P & R LLC Development Agreement. The developer shall receive fee credits for the completion of the traffic signals as part of the City's TMF Set-Aside Fund. (Engineering)

26. The entry drive for the project shall consist of 36' width of pavement to allow for an eventual striped center turn lane. The applicant to provide city standard 3' vertical curb-gutter and 5' sidewalk on both sides of the street. See Sheet 1, Section B of the Tentative Parcel Map. (Engineering).

27. Any backbone improvements, not constructed adjacent to (or needed to serve) a proposed project shall be completed by the applicant. (Engineering)

28. Baseline Road improvements shall be constructed to a four lane arterial with auxiliary lane. The roadway section shall include providing an additional paving (from the existing pavement as shown, as part of the Baseline Road & Watt Avenue Infrastructure Plans- EN20-0362) and 3' vertical curb and gutter and 8' separated sidewalk. The roadway section will include two (2) 11' travel lanes, a 6' bike lane, a 10' auxiliary lane and the aforementioned 3' curb and gutter. The dimension from the ultimate centerline of Baseline Road to back curb will be 60'. (Engineering)

29. A note shall be added to the grading plans that states:

"Prior to the commencement of grading operations, the contractor shall identify the site where the ***excess/borrow*** *earthen material shall be imported/deposited. If the* ***borrow/deposit*** *site is within the City of Roseville, the contractor shall produce a report issued by a geotechnical engineer to verify that the exported materials are suitable for the intended fill, and shall show proof of all approved grading plans. Haul routes to be used shall be specified."* (Engineering)

30. The site shall include a designated Dial-a-Ride drop off and pick up area with an accessible path of travel to the main entrance of the building. Applicant shall install a pole for Dial-A-Ride sign (sign provided by Alternative Transportation). A covered seating area for our Dial-a-Ride passengers shall be located at the main entrance and it will be visible from the drive aisle of the drop-off and pick-up area. (Alternative Transportation, Planning, and Engineering)

31. If not constructed prior to the project, per the Development Agreement, the developer shall be responsible for preliminary design, permitting and rough grading of the trail. In this case, developer may request reimbursement for this work by obtaining a reimbursement agreement prior to approval of improvement plans. (Engineering, Alternative Transportation)

32. If not constructed prior to the project, per the Development Agreement, if the City has sufficient funds to reimburse Landowner, Landowner shall prepare the final design and construct Class I bike trail improvements where adjacent to residential subdivisions. The developer shall provide an estimate for trail construction prior to or concurrent to the first submittal of improvement plans. (Alternative Transportation)

33. The design of the trail shall be consistent with City standards and shall incorporate the following:

    a. Where an overland release crosses a bike trail, the trail design shall accommodate the potential drainage through grading, concrete paving and scour control while meeting trail design standards as determined necessary by Development Services/Engineering. (Engineering, Alternative Transportation)

34. Per the Sierra Vista Specific plan, pedestrian sidewalks along the open spaces will be installed at the time of adjacent roadway construction. (Engineering, Alternative Transportation)

35. The design of the on-site connection to the bike trail shall be reviewed and approved by Development Services/Engineering and Alternative Transportation. (Engineering, Alternative Transportation)

36. The applicant shall dedicate all necessary rights-of-way or Public Utility Easement for the widening of any streets or transfer of public utilities across and over any portion of the property as required with this entitlement. A separate document shall be drafted for approval and acceptance by the City of Roseville, and recorded at the County Recorder's Office. (Engineering)

37. All storm drainage, including roof drains, shall be collected on site and treated with Best Management Practices (BMP's) per the City's Stormwater Quality Design Manual. All storm water shall be routed to the nearest existing storm drain system or natural drainage facility. Drain outfalls shall extend down to the receiving water and shall be constructed with adequate velocity attenuation devices. The grading/improvement plans for the site shall be accompanied with a shed map that defines that area tributary to this site and all drainage facilities shall be designed to accommodate the tributary flow. The storm drain system and proposed BMP's shall be privately owned and maintained by the property owner. Prior to the issuance of any permits, the owner shall provide a plan for the maintenance of the proposed BMP's. (Engineering)

38. Prior to approval of improvement plans, drainage calculations must be submitted that are consistent with the Master Drainage Study for Sierra Vista or the Master Drainage Study shall be amended as necessary to accommodate any change in sheds. Detention and drainage swales shall also be consistent with the Master Drainage Study or the Master Drainage Study amended to reflect any proposed changes. (Engineering)

39. Prior to the approval of the Improvement Plans, the project proponent shall provide proof of preparation and submittal of a Storm Water Pollution Prevention Plan (SWPPP) to the Regional Water Quality Control Board (RWQCB). Proof shall be in the form of the Waste Discharge Identification Number (WDID#), provided to the applicant from RWQCB, placed on the coversheet of the improvement plans. Upon approval of the improvement plans, a copy of the SWPPP shall be required onsite and available for viewing by City inspection staff upon request. (Engineering)

40. To ensure that the design for any necessary widening, construction, or modifications of Public Streets does not conflict with existing dry utilities generally located behind the curb and gutter, and prior to the submittal of design drawings for those frontage improvements, the project proponent shall have the existing dry utilities pot holed for verification of location and depth. (Engineering)

41. Sight distances for all driveways shall be clearly shown on the improvement plans to verify that minimum standards are achieved. It will be the responsibility of the project proponent to provide appropriate landscaping and improvement plans, and to relocate and/or modify existing facilities as needed to meet these design objectives. (Engineering)

42. Improvement plans shall show the Preserve boundary and label it as a protected area. The Pre-Construction meeting shall address the presence of the Preserve, the sensitive habitats present and minimization of disturbance to the Preserve. During grading and construction the preserve area shall be avoided and shall not be used for parking, storage, or project staging. The contractor shall remove all trash blown into the preserve from adjacent construction on a daily basis. After construction is complete, the temporary fencing shall be removed from the preserve, along with all temporary erosion control measures (e.g., straw bales, straw waddles and stakes, silt fencing). (Engineering, Development Services Department, Planning)

43. Prior to construction within any phase of the project, high visibility temporary construction fencing shall be installed along the parcel adjacent to the Preserve. Fencing shall be maintained daily until permanent fencing is installed, at which time the temporary fencing shall be removed from the project site. (Engineering, Development Services Department, Planning)

44. With the exception of access required for maintenance and/or emergency vehicles, the project shall be designed to prevent vehicle access into the Preserve. Post and cable fencing or other improvements shall be utilized to meet this requirement. (Public Works, Development Services Department, Planning)

45. Prior to the approval of the improvement plans, it will be the project proponent's responsibility to pay the standard City Trench Cut Recovery Fee for any cuts within the City streets that are required for the installation of underground utilities. (Engineering)

46. Prior to the issuance of building permits, the property owner shall pay into the following fee programs: Citywide Drainage Fee, Citywide Traffic Mitigation Fee (TMF), Highway 65 Joint Partners Association (JPA), South Placer Regional Transportation Authority (SPRTA), and City/County Fee. (Engineering)

47. Prior to the issuance of a grading permit or approval of Improvement Plans, the grading plans shall clearly identify all existing water, sewer and recycled water utilities within the boundaries of the project (including adjoining public right of way). Existing utilities shall be identified in plan-view and in profile-view where grading activities will modify existing site elevations over top of or within 15 feet of the utility. Any utilities that could potentially be impacted by the project shall be clearly identified along with the proposed protection measures. The developer shall be responsible for taking measures and incurring costs associated with protecting the existing water, sewer and recycled water utilities to the satisfaction of the Environmental Utilities Director. (Environmental Utilities)

48. The applicant shall pay all applicable water and sewer fees. (Environmental Utilities)

49. Water and sewer infrastructure shall be designed pursuant to the adopted City of Roseville Improvement Standards and the City of Roseville Construction Standards and shall include:

    a. Utilities or permanent structures shall not be located within the area which would be disturbed by an open trench needed to expose sewer trunk mains deeper than 12 feet unless approved by Environmental Utilities in these conditions. The area needed to construct the trench is a sloped cone above the sewer main. The cone shall have 1:1 side slopes.

    b. Water, sewer and recycled mains shall not exceed a depth of 12 feet below finished grade, unless authorized in these conditions of approval.

c. All sewer manholes shall have all-weather, 10-ton vehicle access unless otherwise authorized by these conditions of approval. (Environmental Utilities)

50. Recycled water infrastructure shall be designed pursuant to the adopted City of Roseville Improvement Standards and the City of Roseville Construction Standards. The applicant shall pay all applicable recycled water fees. Easements shall be provided as necessary for recycled water infrastructure. (Environmental Utilities)

51. This project will require some units to be served by sewer mains installed through landscaping. Sewer mains outside of the paved areas shall be privately owned and maintained. (Environmental Utilities)

52. Trash enclosures, recycling areas, and enclosure approaches shall be designed to current Refuse Division specifications, the materials and colors shall match the building, and the location of such facilities shall be reviewed and approved by the Refuse Division, Planning and the Fire Department. The enclosure must have inside dimensions of 12 feet wide and 9 feet deep and be built to the specifications of the Solid Waste Department's Enclosure Description. (Refuse, Planning, Fire)

53. Access to trash enclosures shall have an inside turning radius of 25 feet and an outside turning radius of 45 feet must be maintained to allow the refuse truck access to and from the enclosure. Enclosures must have a clear approach of 65 feet in front of the enclosure to allow servicing bins. (Refuse)

54. A trash enclosure and recycling enclosure is required for each building and each tenant, otherwise, the building owner is responsible for the trash service. (Refuse)

55. The design and installation of all fire protection equipment shall conform to the California Fire Code and the amendments adopted by the City of Roseville, along with all standards and policies implemented by the Roseville Fire Department. (Fire)

56. The applicable codes and standards adopted by the City shall be enforced at the time construction plans have been submitted to the City for permitting. (Fire)

57. The Electric Department requires the submittal of the following information in order to complete the final electric design for the project:

    a. one (1) set of improvement plans

    b. load calculations

    c. electrical panel one-line drawings

58. No new drainage/run off into the open space shall occur, all landscaping adjacent to the open space shall be native and non-invasive and all irrigation shall avoid run-off or over-spray into

the open space. Lot A shall have a non-living finish to deter weed growth and to minimize long-term maintenance. (Parks)

59. All on-site external lighting shall be installed and directed to have no off-site glare. Lighting within the parking areas and pedestrian walkways shall provide a maintained minimum of one (1) foot-candle, and 0.5 foot-candle of light, respectively. All exterior light fixtures shall be vandal resistant. (Planning, Police)

60. The parking lot shall have properly posted signs that state the use of the parking area is for the exclusive use of employees and customers of this project. (See California Vehicle Code Sections 22507.8, 22511.5, 22511.8, 22658(a), and the City of Roseville Municipal Code Section 11.20.110). The location of the signs shall be shown on the approved site plan. (Planning, Police)

61. It is the developer's responsibility to notify PG&E of any work required on PG&E facilities. (PG&E)

DURING CONSTRUCTION & PRIOR TO ISSUANCE OF OCCUPANCY PERMITS:

62. Any backflow preventers visible from the street shall be painted green to blend in with the surrounding landscaping. The backflow preventers shall be screened with landscaping and shall comply with the following criteria:

    a. There shall be a minimum clearance of four feet (4'), on all sides, from the backflow preventer to the landscaping.

    b. For maintenance purposes, the landscaping shall only be installed on three sides and the plant material shall not have thorns.

    c. The control valves and the water meter shall be physically unobstructed.

    d. The backflow preventer shall be covered with a green cover that will provide insulation. (Planning, Environmental Utilities)

63. The following easements shall be provided by separate instrument and shown on the site plan, unless otherwise provided for in these conditions:

    a. A 12.5’-foot-wide public utilities easement along all public road frontages.

    b. Water, sewer, and reclaimed water easements.

    c. Additional internal easements will be required to cover primary electrical facilities to the project when the final electrical design is completed. (Electric)

64. Prior to releasing building permits, the existing 25' PG&E Roadway & Utility easement shall be abandoned or a quitclaim process completed. (Engineering)

65. Easement widths shall comply with the City's Improvement Standards and Construction Standards. Separate document easements required by the City shall be prepared in accordance with the City's "Policy for Dedication of Easements to the City of Roseville". All legal descriptions shall be prepared by a licensed land Surveyor. All existing public utility, electric, water, sewer and reclaimed water easements shall be maintained unless otherwise authorized by these conditions of approval. (Engineering, Environmental Utilities, Electric)

66. Inspection of the potable water supply system on new commercial/industrial/office projects shall be as follows:

    a. The Environmental Utilities Inspector will inspect all potable water supply up to the downstream side of the backflow preventer.

    b. The property owner/applicant shall be responsible for that portion of the water supply system from the backflow preventer to the building. The builder/contractor shall engage a qualified inspector to approve the installation of this portion of the water supply. The Building Division will require from the builder/contractor, a written document certifying that this portion of the potable water supply has been installed per improvement plans and in accordance with the Uniform Plumbing Code. This certificate of compliance shall be submitted to the Building Division before a temporary occupancy or a building final is approved.

    c. The building inspectors will exclusively inspect all potable water supply systems for the building from the shutoff valve at the building and downstream within the building. (Building, Environmental Utilities)

67. All improvements being constructed in accordance with the approved grading and improvement plans shall be accepted as complete by the City. (Engineering)

68. The words "traffic control appurtenances" shall be included in the list of utilities allowed in public utilities easements (PUE's) located along public roadways. (Engineering)

69. Water, sewer and reclaimed water shall be constructed pursuant to the adopted City of Roseville Improvement Standards and the City of Roseville Construction Standards. (Environmental Utilities)

70. All water backflow devices shall be tested and approved by the Environmental Utilities Department. (Environmental Utilities)

71. **Restaurants or other Food Service Establishment (FSE).** The applicant shall design for installation and/or install an exterior grease interceptor if the proposed business could

potentially discharge substances containing fats, oils and grease (FOG) into the sewer system. The grease interceptor shall be adequate to separate and remove FOG contained in the wastewater from FSE's prior to discharge to the public sewer. (Environmental Utilities)

72. In the event an exterior grease interceptor cannot be installed due to space limitation, the developer shall install a grease trap, per City Standards, that will mechanically separate the FOG contained in the wastewater from the FSE prior to discharge to the public sewer. (Environmental Utilities)

73. Pursuant to the Municipal Code, the applicant shall apply for and obtain a FOG waste discharge permit (FOG WDP) from the Environmental Utilities Industrial Waste Division prior to occupancy or prior to discharging waste to the public sewer. The applicant shall submit information required by the Environmental Utilities Department for evaluation, including but not limited to: site plans, floor plans, mechanical and plumbing plans, and details to show all sewers, FOG control device, grease interceptor or other pretreatment equipment and appurtenances by size, location and elevation. Additional information related to the applicant's business operations and potential discharge may be requested to properly evaluate the FOG WDP application. (Environmental Utilities)

74. All Electric Department facilities, including streetlights where applicable, shall be designed and built to the "City of Roseville Specifications for Commercial Construction." (Electric)

75. The City of Roseville Electric Department has electrical construction charges which are to be paid by the developer and which are explained in the City of Roseville "Specification for Commercial and Residential Construction." These charges will be determined upon completion of the final electrical design. (Electric)

76. Any relocation, rearrangement, or change of existing electric facilities due to this development shall be at the developer's expense. (Electric)

77. Any facilities proposed for placement within public/electric utility easements shall be subject to review and approval by the Electric Department before any work commences in these areas. This includes, but is not limited to, landscaping, lighting, paving, signs, trees, walls, and structures of any type. (Electric)

78. All electric metering shall be directly outside accessible. This can be accomplished in any of the following ways:

    a. Locate the metered service panel on the outside of the building.

    b. Locate the metered service panel in a service room with a door that opens directly to the outside. The developer will be required to provide a key to the door for placement in a lock box to be installed on the outside of the door. Any doors leading from the service

room to other areas of the building shall be secured to prohibit unauthorized entry. (Electric)

79. One ¾-inch conduit with a 2-pair phone line shall be installed from the building's telephone service panel to the meter section of the customer's electrical switchgear or panel. (Electric)

80. It is the responsibility of the developer to ensure that all existing electric facilities remain free and clear of any obstruction during construction and when the project is complete. (Electric)

81. The Developer will be responsible for extending mainline infrastructure on the north side of baseline from Santucci Boulevard west to the project site. These improvements shall be installed in the ultimate Public Utility Easement location along Baseline Road. These improvements shall include point of connections for parcels 40B and 40C. (Electric)

OTHER CONDITIONS OF APPROVAL:

82. Signs shown on the elevations are not approved as part of the Design Review Permit. A Sign Permit is required for all project signs. (Planning)

83. Following the installation of the landscaping, all landscape material shall be maintained in a healthy and weed-free condition; dead plant material shall be replaced immediately. All trees shall be maintained and pruned in accordance with the accepted practices of the International Society of Arboriculture (ISA). (Planning)

84. The City reserves the right to restrict vehicle turning movements within the public right-of-way in the future if deemed necessary by the City Engineer. (Engineering)

85. The required width of fire apparatus access roads shall not be obstructed in any manner, including the parking of vehicles. Minimum required widths and vertical clearances established by the Fire Code shall be maintained at all times during construction. Closure of accesses for fire apparatus by gates, barricades and other devices shall be prohibited unless approved by the Fire Chief. (Fire)

86. Temporary aboveground storage tanks may be used at construction sites for diesel fuel only and shall not exceed 1,000 gallon capacity. Tanks shall comply with all provisions found within the Fire Code. A Fire Department Permit shall be obtained prior to tank installation. The permit shall expire after 90 days from the date of issuance, unless extended by the Fire Chief. (Fire)

87. If site survey or earth moving work results in the discovery of hazardous materials in containers or what appears to be hazardous wastes released into the ground, the contractor or person responsible for the building permit must notify the Roseville Fire Department immediately. A representative from the Fire Department will make a determination as to whether the incident is reportable of not and if site remediation is required. (Fire)

88. The location and design of the gas service shall be determined by PG&E. The design of the gas service for this project shall not begin until PG&E has received a full set of City approved improvement plans for the project. (PG&E)

89. All residential units must install a Seasonal Energy Efficiency Rating ("SEER") of 2 points above the minimum, as defined by the State of California in the current Title 24 of the Code of California regulations, up to a total maximum of 16 points including the 2 point premium, an Energy Efficiency Ratio ("EER") of 12 or greater, and a thermal expansion valve "TXV"). The SEER rating of 2 points above the minimum, as defined by the current Title 24, up to a maximum of 16 points, and an EER rating of 12 or greater along with a TXV will be specified on building plans and Title 24 compliance certificates at the time building permits are requested. If Title 24 of the Code of California Regulations in effect at the time of request for building permits requires higher SEER or EER ratings, residential units in the Plan Area shall comply with such State requirements. The SEER and EER ratings will be verified with appropriate documentation. These requirements shall be utilized in the overall energy compliance calculations required for issuance of a building permit for any residential unit. Any variances must be approved by the Electric Department's Retail Energy Services Department. (Building, Electric)

90. The project is subject to the noise standards established in the City's Noise Ordinance. In accordance with the City's Noise Ordinance, project construction is exempt between the hours of seven a.m. and seven p.m. Monday through Friday, and between the hours of eight a.m. and eight p.m. Saturday and Sunday, provided that all construction equipment shall be fitted with factory installed muffling devices and be maintained in good working order. (Building)

91. The developer (or designated consultant) shall certify that the building foundation location has been placed according to all approved setback requirements shown on the approved site plan. The developer shall prepare a written statement confirming building placement and provide an original copy to the City Building Division Field Inspector at the time of or prior to the foundation inspection. (Building)

92. Prior to Certificate of Occupancy, the applicant may apply for a Temporary Certificate of Occupancy (TCO) of the building. If a TCO is desired, the applicant must submit a written request to the Building Division a minimum of thirty (30) days prior to the expected temporary occupancy date and shall include a schedule for occupancy and a description of the purpose for the Temporary Certificate of Occupancy. (Building)

93. Concurrent with submittal for plan check and prior to a request for final building inspection, the applicant may request City approval of an occupancy phasing plan to allow individual or multiple building occupancies. This request shall be made in writing to the Building Division and shall include the following:

a. A description of measures that will be undertaken to minimize conflict between residents/building occupants and construction traffic (e.g. fencing, etc.);

b. A phasing plan showing the proposed buildings, internal roads and access routes, landscaping, trash enclosure locations, and any other improvements planned for each phase; and

c. An estimated time frame for each phase and a specific date for the first phase. (Planning, Building)

CONDITIONS OF APPROVAL FOR THE TENTATIVE SUBDIVISION MAP, FILE # PL21-0256

1. The project shall comply with all required environmental mitigation identified in the Sierra Vista Specific Plan (SVSP) EIR and 7th Addendum to the SVSP EIR, and shall include all applicable mitigation measures as notes on the plans. (Planning)

PRIOR TO ISSUANCE OF A GRADING PERMIT AND/OR IMPROVEMENT PLANS

2. Grading around the native oak trees or other natural features shall be as shown on the tentative map or as approved in these conditions. (Planning)

3. The applicant shall submit to the Planning and Engineering Departments the applicable Army Corps of Engineers permit or clearance, the California Department of Fish and Game Stream Bed Alteration Agreement, and/or the Regional Water Quality Control Board Water Quality Certificate. (Planning)

4. The grading and improvement plans shall be designed in accordance with the City's Improvement Standards and Construction Standards and shall reflect the following:

   a. Street improvements including, but not limited to, curb, gutter, sidewalk, pavement, drainage systems, traffic striping, signing, medians and markings, etc. along all existing and proposed City streets, as required by Engineering.

   b. Grading shall comply with the City grading ordinance. There shall be no cut and/or fill slopes steeper than a 4:1 ratio. Erosion control devices (sediment traps, ditches, straw bales, etc.) shall be shown on the grading plans and all erosion control shall be installed prior to the onset of wet weather. Erosion control is installed to minimize silt discharge from the project site; it is the applicant’s responsibility to ensure that necessary measures are taken to minimize silt discharge from the site. Modification of the erosion control plan may be warranted during wet weather conditions.

   c. A rough grading permit may be approved by the Engineering Department prior to approval of the improvement plans.

d. Access to the floodplain shall be provided as required by Engineering and the Streets Department.

e. Standard accessible ramps shall be installed at all curb returns per City Standards. (Engineering)

5. The applicant shall apply for and obtain an encroachment permit from the Engineering Department prior to any work conducted within the City right-of-way and/or City easements. (Engineering)

6. All drainage facilities shall conform to natural drainage sheds. (Engineering)

7. The following note shall be added to the Grading and/or Improvement Plans:

   To minimize dust/grading impacts during construction the applicant shall:

   a. Spray water on all exposed earth surfaces during clearing, grading, earth moving and other site preparation activities throughout the day.

   b. Use tarpaulins or other affective covers on all stockpiled earth material and on all haul trucks.

   c. Sweep the adjacent streets frontages at least once a day or as needed to remove silt and other dirt which is evident from construction activities.

   d. Ensure that construction vehicles are cleaned prior to leaving the construction site to prevent dust and dirt from being tracked off site.

   e. *The City shall have the authority to stop all grading operations if, in the opinion of city staff, inadequate dust control measures are being practiced or excessive wind conditions contribute to fugitive dust emissions. (Engineering)*

8. The grading plans for the site shall be accompanied with a shed map that defines that area tributary to this site. All drainage facilities shall be designed to accommodate the tributary flow. All on-site storm drainage shall be collected on-site and shall be routed to the nearest existing storm drain stub of the natural drainage course. (Engineering)

9. The grading plans shall be accompanied with engineered structural calculations for all retaining walls greater than four (4) feet in height. All retaining walls shall be of either split-faced masonry units, keystone type construction, or cast in place concrete with fascia treatment. (Engineering)

10. Landscaping adjacent to the Preserve shall be California native, drought-tolerant groundcover, shrubs, plants, and trees. (Development Services, Planning)

11. Prior to the approval of the improvement plans, it will be the project proponent's responsibility to pay the standard City Trench Cut Recovery Fee for any cuts within the City streets that are required for the installation of underground utilities. (Engineering)

PRIOR TO ISSUANCE OF GRADING PERMIT OR IMPROVEMENT PLANS

12. Prior to the approval of Improvement Plans, the applicant shall submit to the Development Services Engineering Division a paper copy and an electronic copy of the final set of Improvement Plans per the Division's "Digital Submission of Utility Composites" standards. Additionally, the applicant shall submit approved/proposed street names for the approved subdivision map. Final street names for the subdivision shall be approved by the Engineering Division prior to the approval of the Improvement Plans. The approved street names shall be included on the final set of Improvement Plans. (Engineering)

13. Fire hydrants shall be located as required by the Fire Department. The maximum distance between fire hydrants shall not exceed 1,000 feet on center. (Fire)

14. Minimum fire flow is 1,500 gallons per minute with 20 pounds per square inch residual pressure. A change in any of the conditions may increase the required fire flow. (Fire)

15. There shall be two points of access for all phasing plans. (Fire)

16. Testing of all fire systems shall be performed prior to the sales office being opened for business. (Fire)

17. Framing construction cannot commerce until access roads and public fire hydrants are approved by the Fire Department. (Fire)

18. If this project will be phased, the fire department requirements for access and circulation throughout shall be reviewed and approved by the Fire Department. Access roads shall comply with the California Fire Code and the City of Roseville's Amendments. (Fire)

19. Any facilities proposed for placement within public/electric utility easements shall be subject to review and approval by the Electric Department before any work commences in these areas. This includes, but is not limited to, landscaping, lighting, paving, signs, trees, walls, and structures of any type. (Electric)

20. The design for electrical service for this project will begin when the Electric Department has received a full set of improvement plans for the project. (Electric)

21. All landscaping in areas containing electrical service equipment shall conform to the "Electric Department Landscape Design Requirements" as outlined in Section 10.00 of the Electric Department's "Specifications for Commercial Construction." (Electric)

22. The Electric Department requires the submittal of the following information in order to complete the final electric design for the project:

    a. one (1) set of improvement plans

    b. load calculations

    c. electrical panel one-line drawings

23. The location and design of the gas service shall be determined by PG&E. The design of gas service for this project shall not begin until PG&E has received a full set of City approved improvement plans for the project. (PG&E)

24. It is the developer's responsibility to notify PG&E of any work required on PG&E facilities. (PG&E)

PRIOR TO OR UPON RECORDATION OF FINAL MAP

25. All existing easements shall be maintained, unless otherwise provided for in these conditions. (Environmental Utilities, Electric, Engineering)

26. Separate document easements required by the City shall be prepared in accordance with the City's "Policy for Dedication of Easements to the City of Roseville." All legal descriptions shall be prepared by a licensed Land Surveyor (Environmental Utilities, Electric, Engineering)

27. A declaration of Conditions, Covenants and Restrictions (CC&Rs), in a form approved by the City Attorney, shall be recorded on the entire property concurrently with the Final/Parcel Map. The CC&Rs shall include the following item(s):

    a. A clause stating that the property owners within this subdivision shall agree to participate in a Transportation Systems Management (TSM) Plan and shall agree to enter into a Transportation Management Agreement with the City of Roseville. (Attorney)

    b. A clause prohibiting the amendment, revision or deletion of any sections in the CC&Rs required by these conditions of approval without the prior written consent of the City Attorney. (Attorney)

    c. A clause excluding any property owned by the City from the terms of the CC&Rs. (Attorney)

    d. A clause prohibiting storage in the garages that displaces vehicle parking. (Planning)

28. The City shall not approve the Final Map for recordation until either:

a. A subdivision agreement is entered into along with the necessary bonds and insurance as required by the City. Said agreement shall be in a form acceptable to the City Attorney.

   OR

b. The improvement plans are approved, and the improvements are constructed and accepted as complete. In this case, the subdivider shall enter into a one-year maintenance agreement concurrent with the recordation of the Final Map. (Engineering)

29. Any structures crossing Lot/Parcel lines created by the Final/Parcel map shall be removed. (Engineering)

30. Lot/Parcel A shall be dedicated as an easement (or in fee) to the City for the purposes of open space. (Engineering)

31. Street names shall be approved by the City of Roseville. (Engineering)

32. In the event that the Final (Parcel) Map will record prior to the completion of on-site construction, all utility and access easements shall be placed on the face of the Map to the satisfaction of the City Engineer. If all on-site improvements are complete prior to the recordation of the map, then a separate agreement allowing all parcels/lots the rights of reciprocal access, rights to construct, and parking shall be submitted to the City as a part of final/parcel map submittal. Said agreement shall be in a form acceptable to the City Attorney and referenced on the face of the recorded map. (Engineering)

33. The Final/Parcel Map shall include an irrevocable offer to dedicate public rights-of-way and public and/or private easements as required by the City. (Engineering)

34. The words "traffic control appurtenances" shall be included in the list of utilities allowed in public utilities easements (PUEs) located along public roadways. (Engineering)

35. The Final/Parcel Map shall be submitted per “The Digital Submittal of Cadastral Surveys.” A plot or print of the submittal shall accompany the electronic copy. The complete submittal shall occur after the Engineering Department approval but prior to City Council approval of the Final/Parcel Map. (Engineering)

36. The cost of any facilities, which are identified in the Capital Improvement Program and are beyond those needed for this project, may be reimbursed to the developer. In accordance with §66485 and §66486 of the Subdivision Map Act, for any improvements constructed by the subdivider which contain supplemental size, capacity, number, or length for the benefit of property not within the subdivision and which are to be dedicated to the public, the subdivider shall be entitled to reimbursement for that portion of the cost of the improvements which is in excess of the construction required for the subdivision. (Engineering)

37. Electric construction costs incurred by the City of Roseville Electric Department for this project shall be paid for by the developer per the applicable policy. (Electric)

38. Additional internal easements will be required to cover primary electrical facilities to the project when the final electrical design is completed. (Electric)

39. All Electric Department facilities, including streetlights where applicable, shall be designed and built to the "City of Roseville Specifications for Commercial Construction." (Electric)

40. The City of Roseville Electric Department has electrical construction charges which are to be paid by the developer and which are explained in the City of Roseville "Specification for Commercial Construction." These charges will be determined upon completion of the final electrical design. (Electric)

41. The Environmental Utilities Department shall make a determination that there is adequate conveyance and treatment capacity in the City sewer system to handle the newly created Lot/Parcels. (Environmental Utilities)

42. The applicant shall pay all applicable water and sewer fees. (Environmental Utilities)

OTHER CONDITIONS OF APPROVAL

43. Any relocation, rearrangement, or change to existing electric facilities due to this development shall be at the developer's expense. (Electric)

44. It is the responsibility of the developer to ensure all existing electric facilities remain free and clear of any obstructions during construction and when the project is complete. (Electric)

45. The project is subject to the noise standards established in the City's Noise Ordinance. In accordance with the City's Noise Ordinance, provided all construction equipment is fitted with factory installed muffling devices and is maintained in good working order, project construction noise is exempt between the hours of seven a.m. and seven p.m. Monday through Friday, and between the hours of eight a.m. and eight p.m. Saturday and Sunday. (Engineering)

46. If site survey or earthmoving work results in the discovery of hazardous materials in containers or what appears to be hazardous wastes released into the ground, the contractor shall notify the Roseville Fire Department immediately. A representative from the Fire Department will make a determination as to whether the incident is reportable or not and if site remediation is required. Non-emergency releases or notifications about the presence of containers found shall be reported to the Fire Department. (Fire)

47. The Tentative Subdivision Map shall not be deemed approved until the actions on the Development Agreement Amendment and Specific Plan Amendment are approved and become effective. (Planning)

CONDITIONS OF APPROVAL FOR THE TREE PERMIT, FILE # PL21-0256

PRIOR TO ISSUANCE OF ANY PERMITS OR ANY CONSTRUCTION ON-SITE

1. All recommendations contained in the Arborist Report(s) (Attachment 2) are incorporated by reference into these conditions, except as modified herein. (Planning)

2. Trees #8511 and #8513 (or as listed in Attachment 2 and identified on Exhibit D) are approved for removal with this tree permit. All other native oak trees shall remain in place. Trees to be removed shall be clearly marked in the field and inspected by Planning Staff prior to removal. Removal of the trees shall be performed by or under the supervision of a certified arborist. (Planning)

3. The developer shall be responsible for the replacement of the total number of inches proposed for removal prior to any tree removal. The total number of inches for this project is 54. Mitigation must be provided prior to tree removal in the form of payment of in-lieu fees ($118 per inch) and/or combination of native and non-native tree plantings, unless otherwise approved in the tree replacement plan or in these conditions. (Planning)

4. No activity shall be permitted within the protected zone of any native oak tree beyond those identified by this report. (Planning)

5. A $10,000 cash deposit or bond (or other means of security provided to the satisfaction of the Planning Division) shall be posted to ensure the preservation of all remaining trees during construction. The cash deposit or bond shall be posted in a form approved by the City Attorney. Each occurrence of a violation on any condition regarding tree preservation shall result in forfeiture of all or a portion of the cash deposit or bond. (Planning)

6. A violation of any of the conditions of this Tree Permit is a violation of the Roseville Municipal Code, the Zoning Ordinance (Chapter 19.74) and the Tree Preservation Ordinance (Chapter 19.66). Penalties for violation of any of the conditions of approval may include forfeiture of the bond, suspension or revocation of the permit, payment of restitution, and criminal penalties. (Planning)

7. A fencing plan shall be shown on the approved site plan and/or improvement plans demonstrating the Protected Zone for the affected trees. A maximum of three feet beyond the edge of the walls, driveways, or walkways will be allowed for construction activity and shall be shown on the fencing plan. The fencing plan shall be reviewed and approved by the Planning Division prior to the placement of the protective fencing. (Planning)

8. The applicant shall install a minimum of a five-foot high chain link fence (or acceptable alternative) at the outermost edge of the Protected Zone of the oak tree. Where encroachment is permitted pursuant to Condition 4, above, the fencing for encroachments shall be installed at the limit of construction activity. The applicant shall install signs at two equidistant locations on the temporary fence that are clearly visible from the front of the lot and where construction activity will occur. The size of each sign shall be a minimum of two feet (2') by two feet (2') and must contain the following language: "WARNING THIS FENCE SHALL NOT BE REMOVED OR RELOCATED WITHOUT WRITTEN AUTHORIZATION FROM THE PLANNING DIVISION". (Planning)

9. Once the fencing is installed, the applicant shall schedule an appointment with the Planning Division to inspect and approve the temporary fencing before beginning any construction. (Planning)

10. The applicant shall arrange with the arborist to perform, and certify in writing, the completion of deadwooding, fertilization, and all other work recommended for completion prior to the approval of improvement plans. Pruning shall be done by an Arborist or under the direct supervision of a Certified Arborist, in conformance with International Society of Arboriculture (I.S.A.) standards. Any watering and deep root fertilization which the arborist deems necessary to protect the health of the trees as noted in the arborist report or as otherwise required by the arborist shall be completed by the applicant. (Planning)

11. A utility trenching pathway plan shall be submitted depicting all of the following systems: storm drains, sewers, water mains, and underground utilities. The trenching pathway plan shall show the proposed locations of all lateral lines. (Planning)

12. A Site Planning Meeting shall be held with the applicant, the applicant's primary contractor, the Planning Division and the Engineering Division to review this permit, the approved grading or improvement plans, and the tree fencing prior to any grading on-site. The Developer shall call the Planning Division and Engineering Division two weeks prior to the start of grading work to schedule the meeting and fencing inspection. (Planning)

13. The following information must be located on-site during construction activities: Arborist Report, approved site plan/improvement plans including fencing plan, and conditions of approval for the Tree Permit. All construction must follow the approved plans for this tree permit without exception. (Planning)

14. All preservation devices (aeration systems, oak tree wells, drains, special paving, etc.) shall be designed and installed as required by these conditions and the arborist's recommendations, and shall be shown on the improvement plans or grading plans. (Planning)

15. If any native ground surface fabric within the Protected Zone must be removed for any reason, it shall be replaced within forty-eight (48) hours. (Planning)

16. Storage or parking of materials, equipment, or vehicles is not permitted within the Protected Zone of any oak tree. Vehicles and other heavy equipment shall not be operated within the Protected Zone of any oak tree. (Planning)

17. Where recommended by the arborist, portions of the foundation shall be hand dug under the direct supervision of the project arborist. The certified arborist shall immediately treat any severed or damaged roots. Minor roots less than one (1) inch in diameter may be cut, but damaged roots shall be traced back and cleanly cut behind any split, cracked or damaged area. Major roots over one (1) inch in diameter may not be cut without approval of an arborist and any arborist recommendations shall be implemented. (Planning)

18. The temporary fencing shall remain in place throughout the entire construction period and shall not be removed without obtaining written authorization from the Planning Division. In no event shall the fencing be removed before the written authorization is received from the Planning Division. (Planning)

PRIOR TO ISSUANCE OF FINAL

19. Within 5 days of the completion of construction, a Certification Letter from a certified arborist shall be submitted to and approved by the Planning Division. The certification letter shall attest to all of the work (regulated activity) that was conducted in the protected zone of the tree, either being in conformance with this permit or of the required mitigation still needing to be performed. (Planning)

20. The approval of this Tree Permit shall expire on **March 24, 2024**. (Planning)

NOTICE TO PROJECT APPLICANT: All materials introduced at a public hearing or included with the project's staff report, including but not limited to exhibits, photographs, video or audio tapes, plan sets, architectural drawings, models, color and materials palettes, and maps must be retained by the Planning Division as a part of the public record for one year following the City's final action on the project. Official project file materials will be kept in conformance with the Planning Division's adopted retention schedule. Color renderings and material boards will be disposed of after the project is built and the project receives a certificate of occupancy or at the end of one year, whichever is later.

CITY OF ROSEVILLE CALIFORNIA

DEVELOPMENT SERVICES DEPARTMENT–PLANNING DIVISION

311 Vernon St, Roseville, CA 95678 (916) 774-5276

7th ADDENDUM TO THE SIERRA VISTA SPECIFIC PLAN ENVIRONMENTAL IMPACT REPORT (SCH #2008032115, ADOPTED ON MAY 5, 2010)

Project Title/File Number:	SVSP PCL KT-40A & KT-40B- Estia; File #PL21-0256
Project Location:	6350 and 6400 Baseline Road, Roseville, Placer County, CA (APN 499-010-014-000)
Project Description:	The proposed project will create 209 multi-family residential units within the Sierra Vista Specific Plan (SVSP). The proposed project is a Tentative Parcel Map to subdivide the 23-acre property into three parcels (KT-40A, KT-40B, and KT-40C), a Tree Permit to remove two native oak trees, and a Design Review Permit to allow construction of 209 multi-family residential units on parcel KT-40A. In addition, a Specific Plan Amendment is requested to reflect the subdivision of the site and to modify the applicable Commercial Mixed Use/Special Area (CMU/SA) description in the Sierra Vista Specific Plan. The two Development Agreements ("Baseline P&R" and "Baybrook") applicable to the property will be amended so that the property is covered under one Development Agreement ("Baseline P&R"). Approximately 7.5 acres of the site, which will be the resulting parcels KT-40B & KT-40C, will remain undeveloped and designated for future commercial uses.
Project Applicant:	Vanessa Humphrey, REY Engineers
Property Owner:	KV Sierra Vista, LLC
Lead Agency Contact:	Kinarik Shallow, Associate Planner; Phone (916) 746-1309

An Addendum to a previously certified and adopted negative declaration or environmental impact report may be prepared for a project if only minor technical changes or additions are necessary or none of the conditions calling for the preparation of a subsequent EIR or negative declaration have occurred (California Environmental Quality Act Guidelines [CEQA] Section 15164). Consistent with CEQA Guidelines Section 15164, the below analysis has been prepared in order to demonstrate that none of the conditions described in Section 15162 of the CEQA Guidelines calling for preparation of a subsequent EIR have occurred and that only minor technical changes or additions are necessary in order to deem the adopted negative declaration adequate to describe the impacts of the proposed project. CEQA Guidelines Section 15164 also states that an addendum need not be circulated for public review, but can be included in or attached to the adopted negative declaration for consideration by the hearing body. This Addendum focuses only on those aspects of the project or its impacts which require additional discussion.

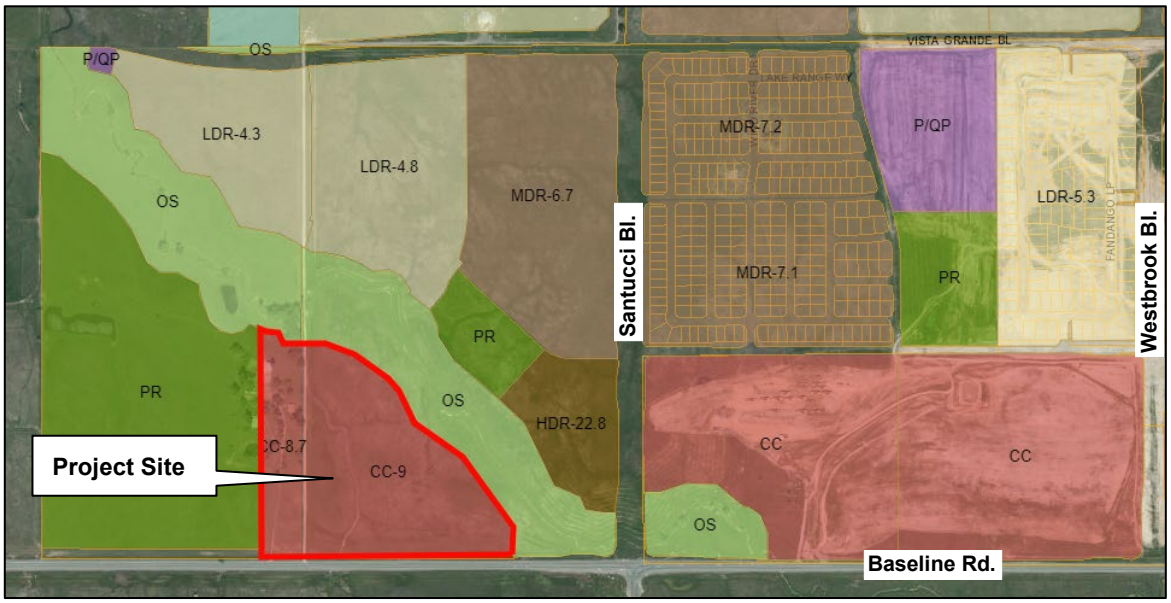
PROJECT DESCRIPTION

Project Location

The 23-acre project site is located at 6350 Baseline Road (APN 499-010-014-000), on Parcel KT-40A and KT-40B within the Sierra Vista Specific Plan area (see Figure 1). The site is a single parcel with two large lot numbers.

Figure 1: Project Location



Background

The SVSP was approved by the City Council on May 5, 2010 (file #2007PL-044). An Environmental Impact Report (EIR) was certified on May 5, 2010 (SCH #2008032115) and a Mitigation Monitoring Program was adopted with the SVSP. The plan area includes 2,064 acres west of Fiddyment Road, north of Baseline Road. The SVSP at a program level anticipated development of the plan area with a mix of residential, commercial, parks and open space land uses. Additionally, Development Agreements with the property owners of the SVSP parcels and the City were entered into to outline development obligations within the SVSP.

Parcels KT-40A and KT-40B are designated as Community Commercial/Commercial Mixed Use (CC/CMU) parcels in the SVSP with a zoning designation of Commercial Mixed Use/Special Area (CMU/SA). The CMU/SA zone is described in the SVSP as intended for mixed-use centers that allow for a combination of commercial, office, and residential uses at a minium density of 13 units per acre. The SVSP allocates a total of 209 residential units to the site.

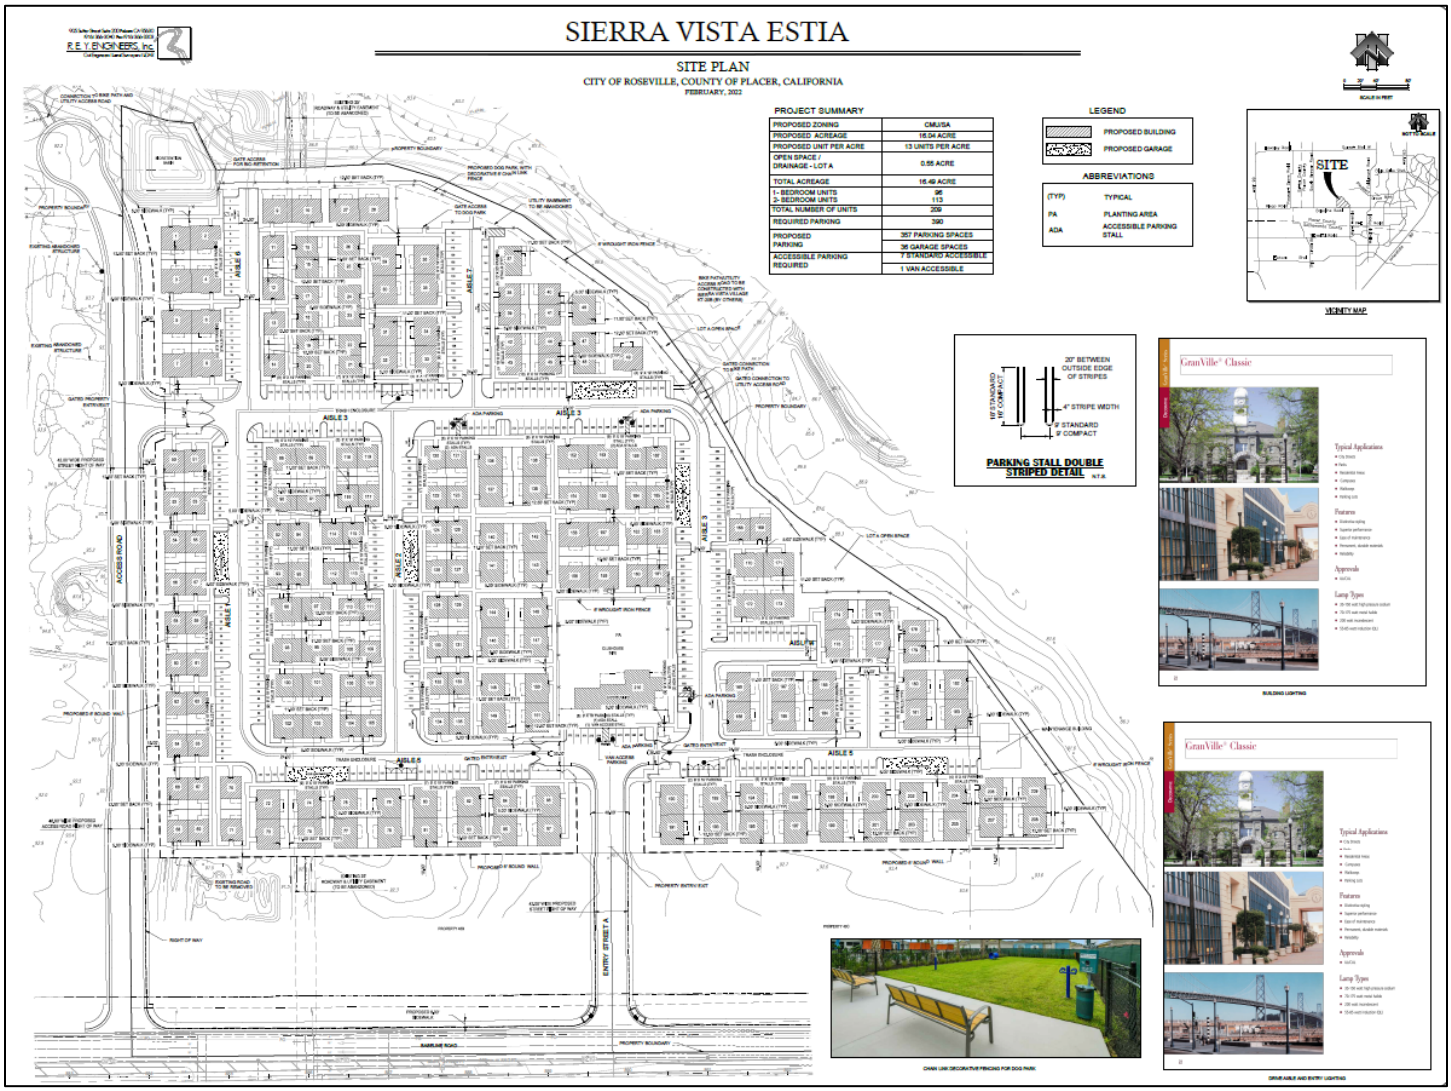
Environmental Setting

The project site is currently undeveloped and is comprised mostly of annual grasslands. The northwestern corner of the parcel consists of a mix of evergreen and deciduous trees as well as abandoned structures. A 25-foot-wide roadway and overhead power lines traverse the property in a north to south direction. Aerials of the site show evidence of previous ground disturbance due to construction of adjacent roadways. The parcel has frontage on Blue Oaks Boulevard to the south, and is adjacent to Curry Creek open space to the north and east, and an undeveloped Park and Recreation parcel to the west.

Table 1: Surrounding Zoning and Land Uses

Location	Zoning	General Plan Land Use	Actual Use of Property
Site	Commercial Mixed Use/Special Area (CMU/SA)	Community Commercial (CC-9)	Vacant
North	Open Space (OS)	Open Space (OS)	Curry Creek Open Space
South	Unincorporated Placer County	Unincorporated Placer County	Unincorporated Placer County
East	OS	OS	Open Space
West	Parks & Recreation (PR)	Parks & Recreation (PR)	Vacant

Figure 2: Preliminary Site Plan



Proposed Project

The preliminary site plan of the proposed project is shown in Figure 2 above. The proposed project is a Tentative Parcel Map to subdivide the 23-acre property into three parcels (KT-40A, KT-40B, and KT-40C), a Tree Permit to remove two native oak trees, and a Design Review Permit to allow construction of 209 multi-family residential units on parcel KT-40A. In addition, a Specific Plan Amendment is requested to reflect the subdivision of the site and to modify the applicable Commercial Mixed Use/Special Area (CMU/SA) description in the Sierra Vista Specific Plan. The two Development Agreements ("Baseline P&R" and "Baybrook") applicable to the property will be amended so that the property is covered under one Development Agreement ("Baseline P&R"). Approximately 7.5 acres of the site, which will be the resulting parcels KT-40B and KT-40C, will remain undeveloped and will be designated for future commercial uses. A separate Design Review Permit will be required prior to development of parcels KT-40B and KT-40C.

PURPOSE AND SCOPE OF ADDENDUM

This Addendum has been prepared to identify and assess the anticipated environmental impacts of the above-described project. The document relies on previous environmental documents and site-specific studies prepared to address in detail the effects or impacts associated with the project as well as updated technical analyses, prepared by qualified consultants. This document has been prepared to satisfy the California Environmental Quality Act (CEQA), (Public Resources Code, Section 21000 et seq.) and the State CEQA Guidelines (14 CCR 15000 et seq.). CEQA requires that all state and local government agencies consider the environmental consequences of projects over which they have discretionary authority before acting on those projects.

Where, as here, an EIR addressing an earlier version of the project has been previously prepared and certified, the lead agency considers the relevance of that prior EIR in light of the current modified version of the project and changed circumstances since the time of the preparation of the prior EIR. Pursuant to CEQA Guidelines §15162-15163, if the lead agency determines, based on substantial evidence, that new information of substantial importance, or changes to the project or surrounding circumstances will require major revisions to the previous EIR due either to a new significant effect or a substantial increase in the severity of a previously identified significant effect on the environment, the lead agency is required to prepare a Subsequent EIR or an EIR Supplement to analyze the project at hand. Pursuant to CEQA Guidelines §15164, if the agency finds no basis for requiring the preparation of either a Subsequent EIR or an EIR Supplement, but some changes or additions are necessary, an Addendum shall be prepared.

The Sierra Vista Specific Plan EIR was adopted by City Council on May 5, 2010. The document analyzed the impacts that would occur as a result of development of the SVSP area. A copy of the SVSP EIR is available for review online at www.roseville.ca.us/planning under Specific Plans and then the Sierra Vista Specific Plan page. The City Council adopted a Statement of Overriding Considerations when it certified the SVSP EIR. The EIR identified the following impacts associated with development of the SVSP area, including the buildout of the project area, as significant and unavoidable:

- Conversion of agricultural land to developed uses
- Inducement of substantial population growth
- Increased traffic on City of Roseville roadways
- Increased traffic on State Highways, including Interstate 80
- Increased traffic on Placer County roadways
- Increased emissions of fugitive dust and PM10 from grading and trenching activities (short term)
- Increased emissions of ozone precursors during construction (short-term)
- Increased emissions of air pollutants during operation
- Loss of oak trees of greater than 6 inches diameter breast height (dbh) (short-term)
- Removal of historically significant properties and/or loss of historic integrity of such resources

- Increased demand for solid waste services at the Western Regional Sanitary Landfill
- Increased demand for solid waste services at the Materials Recovery Facility (MRF)
- Construction debris demand for solid waste services
- Alteration of the visual character of the site and vicinity
- New sources of light and glare

For build out of the SVSP project area, the SVSP EIR also identified the following cumulative impacts as significant and unavoidable:

- Agricultural land conversion
- Air pollutant emissions from construction
- Air pollutant emissions from operation
- Contribution to greenhouse gas emissions/global warming
- On-site noise levels that exceed City standards
- Off-site noise levels that exceed City standards
- Traffic impacts to Roseville, Placer County, Sacramento County, Sutter County and State facilities
- Increased demand for water
- Increased demand for recycled water distribution system
- Increased generation of solid waste
- Change in visual character

The analyses below rely on the EIR analysis with minor supplements or technical updates where appropriate. Most of the project impacts remain identical to the impacts of the SVSP EIR, because the proposed project is consistent with the land uses anticipated for the site and does not change the development footprint or anticipated grading for the site. Impacts to physical resources (such as agricultural land, biological resources, etc.) are based on the grading and development of an area, not on the land use designation of the property. For other types of impacts which are affected by land use type, the project uses reduce or maintain the same level of potential impacts.

ENVIRONMENTAL CHECKLIST FOR ADDENDUM ENVIRONMENTAL REVIEW

The purpose of this checklist is to evaluate the categories in terms of any "changed condition" (i.e. changed circumstances, project changes, or new information of substantial importance) that may result in a changed environmental result. A "no" answer does not necessarily mean there are no potential impacts relative to the environmental category, but that there is no change in the condition or status of the impact since it was analyzed and addressed in prior environmental documents.

EXPLANATION OF CHECKLIST EVALUATION CATEGORIES

Where Impact was Analyzed
This column provides a cross-reference to the pages of the prior environmental documents where information and analysis may be found relative to the environmental issue listed under each topic.

Do Proposed Changes Involve New Significant Impacts?
Pursuant to Section 15162(a)(1) of the CEQA Guidelines, this column indicates whether the changes represented by the current project will result in new significant impacts that have not already been considered and mitigated by the prior environmental review documents and related approvals, or will result in a substantial increase in the severity of a previously identified impact.

Any new Circumstances Involving New Impacts?
Pursuant to Section 15162(a)(2) of the CEQA Guidelines, this column indicates whether there have been changes to the project site or the vicinity (circumstances under which the project is undertaken) which have

occurred subsequent to the certification or adoption of prior environmental documents, which would result in the current project having new significant environmental impacts that were not considered in the prior environmental documents or that substantially increase the severity of a previously identified impact.

Any new Information Requiring New Analysis or Verification?
Pursuant to Section 15162(a)(3)(A–D) of the CEQA Guidelines, this column indicates whether new information of substantial importance which was not known and could not have been known with the exercise of reasonable diligence at the time the previous environmental documents were certified or adopted is available requiring an update to the analysis of the previous environmental documents to verify that the environmental conclusions and mitigation measures remain valid. Either "yes" or "no" will be answered to indicate whether there is new information showing that: (A) the project will have one or more significant effects not discussed in the prior environmental documents; (B) that significant effects previously examined will be substantially more severe than shown in the prior environmental documents; (C) that mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or (D) that mitigation measures or alternatives which are considerably different from those analyzed in the prior environmental documents would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative. If "no," then no additional environmental documentation (supplemental or subsequent EIR) is required.

Mitigation Measures Implemented or Addressing Impacts
Pursuant to Section 15162(a)(3) of the CEQA Guidelines, this column indicates whether the prior environmental documents provide mitigation measures to address effects in the related impact category. In some cases, the mitigation measures have already been implemented. A "yes" response will be provided in any instance where mitigation was included, regardless of whether the mitigation has been completed at this time. If "none" is indicated, this environmental analysis concludes a significant impact does not occur with this project, no mitigation was previously included, and no mitigation is needed.

DISCUSSION AND MITIGATION SECTIONS

Discussion
A discussion of the elements of the checklist is provided under each environmental category in order to clarify the answers. The discussion provides information about the particular environmental issue, how the project relates to the issue and the status of any mitigation that may be required or has already been implemented.

Mitigation Measures
Applicable mitigation measures from the prior environmental review that apply to the project are listed under each environmental category.

Conclusions
A discussion of the conclusion relating to the analysis contained in each section.

OHER CONSIDERATIONS

Since certification of the SVSP EIR, the Office of Planning and Research (OPR) has updated CEQA Guidelines Appendix G (Environmental Checklist Form), effective early 2019[1]. These updates address legislative changes to CEQA, clarify language, and update language consistent with case law. None of the changes to the checklist require new analysis related to impacts which were not known or which could not have been known at the time the SVSP EIR was prepared. The majority of the checklist changes clarify language, reorganize existing language, or eliminate analysis requirements. For analysis requirements which have been eliminated, this is in response to case law affirming that analysis must focus on impacts caused by the project, not impacts to the project. An example of each of these types of changes is included below:

- Cultural Resources (a): Cause a substantial adverse change in the significance of an historic resource ~~as defined in~~ pursuant to Section 15064.5?

  The replacement of "as defined in" with "pursuant to" is a phrasing change which has no impact on required analysis.

- Cultural Resources (c) has been moved to Geology and Soils (f).

  Moving the topical section of this analysis requirement (which is related to paleontological resources) from Cultural Resources to Geology and Soils has no impact on required analysis.

- Noise (b): ~~Exposure of persons to or~~ Generation of excessive ground borne vibration of ground borne noise levels?

  The above changes redirect the analysis from considering overall exposure of persons to ground borne vibration, and focus the analysis on any ground borne vibration generated by a project. This same change is reflected in all other checklist questions related to noise. Therefore, the EIR included more analysis than is currently required, because they included analysis related to exposing neighboring areas to noise, but also analyzed the effect of noise on the proposed uses; the latter analysis is no longer required.

The updated CEQA Guidelines Appendix G also includes three new sections (Tribal Cultural Resources, Energy, and Wildfire) and includes new and modified requirements as part of the Transportation/Traffic section. Although the Tribal Cultural Resources section is new, the analysis of this impact area was included in the SVSP EIR as part of the Cultural Resources section. The new Energy section was formerly included in CEQA Guidelines Appendix F, but has been moved into the Appendix G, so while it is new to the checklist it is not new to the CEQA Guidelines. The changes to the Transportation/Traffic section—which is now called simply Transportation—refocuses the analysis on vehicle miles traveled (VMT).

As evaluated below, none of the modifications to CEQA Guidelines Appendix G require new analysis related to impacts which were not known or which could not have been known at the time the SVSP EIR was prepared. Therefore, an Addendum is the appropriate environmental document to describe the impacts of the proposed project.

[1]Although the older checklist could be used for this Addendum because of the date of publication of the original EIR, the updated checklist is used instead as part of a good-faith effort to provide the most up-to-date information to decision-makers and the public (Public Resources Code Section 21002.1(e); CEQA Guidelines Sections 15002(a)(1), 15003(c)).

CHECKLIST

I. Aesthetics

	Where Impact Was Analyzed in Prior Environmental Documents	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a. Have a substantial adverse effect on a scenic vista?	SVSP EIR Section 4.14	No	No	No	None
b. Substantially damage scenic resources, including but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	Same	No	No	No	None
c. In non-urbanized area, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from a publicly accessible vantage point.) If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?	Same	No	No	No	None
d. Create a new source of substantial light or glare, which would adversely affect day or nighttime views in the area?	Same	No	No	No	SVSP EIR MM 4.13-1

Discussion: Impacts to visual and aesthetic resources were adequately addressed in the SVSP EIR as it relates to the proposed project, and were previously identified as significant and unavoidable. There is no significant change in the proposed project that would change the environmental impact for this section. The proposed land use change and subdivision map do not introduce development to properties not already planned for development. The proposed uses are substantially consistent with the build out assumptions and would not increase the severity of already identified significant impacts.

The project has been evaluated for compliance with the City's Community Design Guidelines (CDG) and the design guidelines established in the SVSP. The CDG establishes common design elements and expectations for development within the City. The CDG includes provisions related to architectural design, site design and landscape design, to enhance the visual character of the urban environment. The CDG recommends preserving, to the extent feasible, visual resources such as native oak trees and creek or wetland resources. The site does not contain any creek or wetland resources; however, the project will require the removal of one native oak tree on the project site, and therefore requires a Tree Permit. Consistent with the City's Tree Preservation ordinance (RMC Ch. 19.66), the Tree Permit would contain conditions of approval that require

compliance with mitigation measures. These measures include payment of in-lieu mitigation fees to compensate for oak tree removal. The project has been reviewed by City staff and was found to be consistent with the goals and policies of the CDG, the SVSP, and applicable zoning regulations.

As it relates to light and glare, Mitigation Measure (MM) 4.13-1 requires all light fixtures for commercial and office uses to have glare shields and all new buildings to be constructed with low-glare materials. While the project does not involve development of the commercial parcels at this time, MM 4.13-1 is still applicable. Given the project's proximity to the Curry Creek open space to the north, SVSP MM 4.14-3 will also apply, which ensures lighting would not adversely affect wildlife in open space areas and along Curry Creek. In addition, lighting is conditioned to comply with City standards (i.e., CDG) to limit the height of light standards and also require cut-off lenses and glare shields to minimize light and glare impacts. Based on the reasons listed in this section, there would be no new significant impacts not previously identified in the SVSP EIR. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred" relative to aesthetic resources.

Mitigation Measures: SVSP EIR Mitigation Measures 4.13-1 (use low-glare materials) and 4.14-3 (avoid light spill over into Curry Creek open space) remain applicable to the proposed project. These mitigation measures can be found in the table of applicable mitigation measures included with this Addendum (see Attachment 1).

II. Agricultural & Forestry Resources

	Where Impact Was Analyzed in Prior Environmental Documents	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	SVSP EIR Section 4.1	No	No	No	SVSP EIR MM 4.1-2
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?	Same	No	No	No	None
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?	Same	No	No	No	None
d) Result in the loss of forest land or conversion of forest land to non-forest use?	Same	No	No	No	None
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	Same	No	No	No	None

Discussion: Agricultural resources were adequately addressed in the SVSP EIR as it relates to the proposed project. There is no significant change in the proposed project that would change the environmental impact for this section. The SVSP EIR concluded development of the project area would convert fallow grazing land to urbanized development. The proposed project will result in the same impact, as it falls within the planned development footprint of the SVSP. The project site is not used for agricultural purposes, does not include agricultural zoning, is not within or adjacent to one of the areas of the City designated as a protected farmland category on the Placer County Important Farmland map, is not within

or adjacent to land within a Williamson Act Contract, and is not considered forest land. For these reasons, no subsequent or supplemental EIR is required for the project with respect to agricultural and forestry resources.

Mitigation Measures: SVSP EIR Mitigation Measure (MM) 4.1-2 required preservation of open space within Placer County in order to mitigate for the loss of open space in the SVSP. Though this measure remains applicable to the project, the measure has been completed via an established fee program that directs funds to the Placer Land Trust, which then sets aside land.

III. Air Quality

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Conflict with or obstruct implementation of the applicable air quality plan?	SVSP EIR Section 4.4	No	No	No	None
b) Result in a cumulatively considerable net increase of any criteria for which the project region is non-attainment under an applicable federal or state ambient air quality standard?	Same	No	No	No	SVSP EIR MM 4.4-1, MM 4.5-1, and MM 4.5-2
c) Expose sensitive receptors to substantial pollutant concentrations?	Same	No	No	No	None
d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?	Same	No	No	No	None

Discussion: The SVSP EIR concluded that standard dust control and other construction measures would be sufficient to avoid particulate matter and ozone precursor construction impacts, but that reactive organic gases would remain significant. Construction activity associated with the proposed project remains consistent with the scale of activity and resulting scope of impacts anticipated in the SVSP EIR. The proposed project is consistent with the land use designation for the site and evaluated in the SVSP EIR, and is substantially consistent with the build out assumptions. Therefore, operational impacts of the proposed project remain consistent with the scope of impacts and mitigation already established in the SVSP EIR. Based on the foregoing, there would be no new significant impacts not previously identified in the SVSP EIR. Pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred" relative to air quality impacts.

Mitigation Measures: Mitigation Measures 4.4-1 (construction emissions), 4.5-1 (operational emissions), 4.5-2 (greenhouse gas emissions) from the SVSP EIR remain applicable to the proposed project, and have been incorporated into the design of the project as appropriate. These mitigation measures can be found in the table of applicable mitigation measures included with this Addendum (see Attachment 1).

IV. Biological Resources

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	SVSP EIR Section 4.8	No	No	No	SVSP EIR MM 4.8-1 to 4.8-7
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies or regulations or by the California Department of Fish and Wildlife or U.S. Fish and Wildlife Service?	Same	No	No	No	SVSP EIR MM 4.8-4 to 4.8-7
c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	Same	No	No	No	SVSP EIR MM 4.8-1 to 4.8-7
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	Same	No	No	No	SVSP EIR MM 4.8-4 to 4.8-7
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	Same	No	No	No	None

f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	Same	No	No	No	None

Discussion: Biological Resources were adequately addressed in the SVSP EIR as it relates to the proposed project. Mitigation measures were adopted to reduce impacts to wetlands, vernal pool species, Swainson's hawk, burrowing owl, and other protected raptors nesting and foraging habitat to less-than-significant levels. There is no significant change in the proposed project that would change the environmental impact for this section and the proposed project is located on properties already anticipated for development.

An Arborist Report was prepared for the project by California Tree and Landscape Consulting, Inc. (see Attachment 2) that inventoried a total 41 trees on the site. The Tree Preservation Chapter (Chapter 19.66) of the City's Zoning Ordinance identifies a protected tree as any native oak tree equal to or greater than six inches diameter at breast height (DBH), and requires a Tree Permit for the removal of a protected tree. All trees on the site will be removed, however, only two are considered protected trees—Tree #8511 (31" DBH interior live oak) and Tree #8513 (23" DBH interior live oak). The trees could potentially provide habitat for nesting birds and construction activities could also have the potential to disrupt offsite nesting species. The SVSP EIR adopted MM 4.8-3 which requires pre-construction nesting surveys to ensure that nesting birds are not harmed during construction. Compliance with this measure was found to render potential impacts to nesting birds as less than significant. In addition, the SVSP EIR concluded that compliance with the City's Zoning Ordinance Tree Preservation Chapter 19.66 would ensure that removal of oak trees would be adequately replaced. Consistent with the Zoning Ordinance, the project includes a request for a Tree Permit to allow removal of the protected oak trees. The Tree Permit will have conditions of approval requiring compliance with the SVSP EIR mitigation measures. The SVSP EIR mitigation measures were found to render potential impacts less than significant.

The proposed project would not result in any new or modified impacts to biological resources beyond what was previously analyzed in the SVSP EIR. The project site is devoid of vernal pools and other water features. The site is primarily populated by non-native annual grasses and aerial photography shows evidence of previous ground disturbance on the site due to construction of the adjacent roadways. The mitigation measures adopted with certification of the SVSP EIR remain applicable and no additional impacts will occur. Impacts remain less than significant upon compliance with the applicable mitigation measures.

Based on the reasons listed in this section, there would be no new significant impacts not previously identified in the SVSP EIR. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred" relative to impacts to biological resources.

Mitigation Measures: Mitigation Measure 4.8-1 (wetland permits and no net loss), 4.8-2 (relocate western spadefoot), 4.8-3 (protection for nesting birds), 4.8-4 (preservation of grassland habitat), 4.8-5 (wildlife movement protection), 4.8-6 (habitat restoration), 4.8-7 (off-site surveys for infrastructure), and 4.14-3 (avoid light spill over into Curry Creek open space) were identified to reduce the impacts to biological resources to less than significant. These measures also applicable to the proposed project.

V. Cultural Resources

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Cause a substantial adverse change in the significance of an historic resource pursuant to in Section 15064.5?	SVSP EIR Section 4.9	No	No	No	None
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?	Same	No	No	No	SVSP EIR MM 4.9-1 to 4.9-3
c) Disturb any human remains, including those interred outside of dedicated cemeteries?	Same	No	No	No	SVSP EIR MM 4.9-1 to 4.9-3

Discussion: The SVSP EIR discussed the potential for subsurface remains or deposits to be found on the site, and included a mitigation measure requiring a cessation of work should any item of cultural interest be found. The mitigation was found to render potential impacts less than significant. The project will result in the same impact, and the mitigation remains applicable to the proposed project. Consistent with state law, notice of the proposed project was mailed on September 14, 2021 to tribes which had requested such notice pursuant to Assembly Bill 32 (AB32) and Senate Bill 18 (SB18). No request for consultation was received during the request for consultation period.

Mitigation Measures: Mitigation Measure 4.9-1 (cease work and consult with archeologist), 4.9-2 (cease work and consult with paleontologist), and 4.9-3 (conduct appropriate studies) remain applicable to the proposed project.

VI. Energy

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?	SVSP EIR Section 4.12.5	No	No	No	None
b) Conflict with or obstruct a state or local plan for renewable energy or energy inefficiency?	SVSP EIR Section 4.12.5	No	No	No	None

Discussion: The SVSP EIR concluded that development and implementation of the SVSP would add land uses that would increase the demand for electrical services. However, Roseville Electric determined there were no constraints to providing a reliable energy source to serve the development proposed in the SVSP area. Electricity in the area is provided by Roseville Electric and natural gas is provided by Pacific Gas & Electric (PG&E). Impacts 4.12-5.1 and 4.12-5-2 in the SVSP EIR evaluated the potential for development of the SVSP to increase demands for electricity and natural gas and found these impacts to be less than significant.

The project would allow for the development of 209 multi-family residential units. The project would consume energy both during project construction and during project operation. During construction, fossil fuels, electricity, and natural gas would be used by construction vehicles and equipment. However, the energy consumed during construction would be temporary, and would not represent a significant demand on available resources. There are no unusual project characteristics that would necessitate the use of construction equipment or methods that would be less energy-efficient or which would be wasteful.

The completed project would consume energy related to building operation, exterior lighting, landscape irrigation and maintenance, and vehicle trips to and from the use. In accordance with California Energy Code Title 24, the Project would be required to meet the Building Energy Efficiency Standards. This includes standards for water and space heating and cooling equipment; insulation for doors, pipes, walls, and ceilings; and appliances, to name a few. The project would also be eligible for rebates and other financial incentives from both the electric and gas providers for the purchase of energy-efficient appliances and systems, which would further reduce the operational energy demand of the project. The project was distributed to both PG&E and Roseville Electric for comments, and was found to conform to the standards of both providers; energy supplies are available to serve the project.

The SVSP EIR included an assessment of energy impacts for the entire plan area. The analysis included consideration of transportation energy, and evaluated walkability, alternative transportation modes, and the degree to which the mix and location of uses would reduce vehicle miles

traveled in the plan area. The EIR also included a citywide assessment of energy demand based on the existing and proposed land uses within the City and Specific Plan. Impacts related to energy consumption were found to be less than significant. The proposed project is consistent with the existing land use designation, and therefore is consistent with the current citywide assessment of energy demand, and will not result in substantial unplanned, inefficient, wasteful, or unnecessary consumption of energy; impacts are less than significant.

Based on the reasons listed in this section, there would be no new significant impacts not previously identified in the SVSP EIR. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred" relative to energy impacts.

Mitigation Measures: None required for this Project.

VII. Geology and Soils

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:	SVSP EIR Section 4.7	No	No	No	None
i) Ruptures of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? (Refer to Division of Mines and Geology Special Publication 42.)	Same	No	No	No	None
ii) Strong seismic ground shaking?	Same	No	No	No	None
iii) Seismic-related ground failure, including liquefaction?	Same	No	No	No	None
iv) Landslides?	Same	No	No	No	None
b) Result in substantial soil erosion or the loss of topsoil?	Same	No	No	No	None
c) Be located in a geological unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	Same	No	No	No	None
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?	Same	No	No	No	None

e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?	Same	No	No	No	None
f) Directly or indirectly destroy a unique paleontological resource or site or unique geological feature?	SVSP EIR Section 4.7 and Section 4.9	No	No	No	SVSP EIR MM 4.9-2 to MM 4.9-3

Discussion: The project is not expected to expose people or structures to potential substantial adverse effects involving seismic shaking, ground failure or landslides. The project site is located in Roseville, which is in Placer County. The California Department of Mines and Geology classifies the South Placer area as a low severity earthquake zone. No active faults are known to exist within the County. The project site is considered to have low seismic risk with respect to faulting, ground shaking, seismically related ground failure and liquefaction.

The SVSP EIR indicated that compliance with existing regulations and permit requirements would be sufficient to avoid impacts related to these issues. This conclusion remains appropriate for the proposed project because there is no new information indicating that geologic conditions are different than previously understood. The SVSP EIR discussed the potential for paleontological resources to be found on the site, and included a mitigation measure requiring a cessation of work should any be found on site. The mitigation was found to render potential impacts less than significant. The project will result in the same impact, and the mitigation remains applicable to the proposed project.

Based on the reasons listed in this section, there would be no new significant impacts not previously identified in the SVSP EIR. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that “none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred” relative to geology and soil impacts.

Mitigation Measures: Mitigation Measure 4.9-2 (cease work and consult with paleontologist) and 4.9-3 (conduct appropriate studies) remain applicable to the proposed project.

VIII. Greenhouse Gases

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	SVSP EIR Section 4.4	No	No	No	SVSP EIR MM 4.4-1, 4.5-1 and 4.5-2
b) Conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	Same	No	No	No	None

Discussion: The SVSP EIR concluded that buildout of the project area would cause significant and unavoidable impacts with respect to greenhouse gases (GHG) emissions and mitigation measures were adopted to reduce the project's GHG emissions and resultant impacts. Construction activity associated with the proposed project remains consistent with the scale of activity and resulting scope of impacts anticipated in the SVSP EIR. The proposed project is consistent with the land use designation for the site and evaluated in the SVSP EIR, and is substantially consistent with the build out assumptions. Greenhouse gas emissions, from both the construction and operational phases, will result in impacts consistent with those analyzed in the SVSP EIR. The project will comply with the required mitigation in the SVSP EIR. Thus, pursuant to CEQA Guidelines Section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred" relative to GHG emissions.

Mitigation Measures: Mitigation Measures 4.4-1 (construction emissions), 4.5-1 (operational emissions), and 4.5-2 (greenhouse gas emissions) from the SVSP EIR remain applicable to the proposed project, and have been incorporated into the design of the project as appropriate.

IX. Hazards and Hazardous Materials

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	SVSP EIR Section 4.10	No	No	No	None
b) Create a significant hazard to the public or the environment though reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	Same	No	No	No	SVSP EIR MM 4.10-1
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	Same	No	No	No	None
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	Same	No	No	No	None
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard or excessive noise for people residing or working in the project area?	Same	No	No	No	None
f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	Same	No	No	No	None

g) Expose people or structures either directly or indirectly to a significant risk of loss, injury or death involving wildland fires?	Same	No	No	No	None

Discussion: The SVSP EIR includes a brief overview for each impact topic, concluding that compliance with existing federal, state, and local regulations regarding the use, transport and disposal of hazardous materials would ensure most impacts will be less than significant. The exception was for unknown soil contamination, as land which was used for agricultural purposes may include undiscovered, underground storage tanks or other contamination issues; mitigation for this was included. The project is not located on a site that is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5. The SVSP EIR analysis also found that there would be sufficient emergency services and facilities and that the area was not located within an airport land use plan or other aviation hazard area. These conclusions still fit for the proposed project, which is within the same development footprint.

Standard construction activities would require the use of hazardous materials such as fuels, oils, lubricants, glues, paints and paint thinners, soaps, bleach, and solvents. These are common household and commercial materials routinely used by both businesses and average members of the public. The materials only pose a hazard if they are improperly used, stored, or transported either through upset conditions (e.g. a vehicle accident) or mishandling. In addition to construction use, the operational project would result in the use of common hazardous materials as well, including bleach, solvents, and herbicides. Regulations pertaining to the transport of materials are codified in 49 Code of Federal Regulations 171–180, and transport regulations are enforced and monitored by the California Department of Transportation and by the California Highway Patrol. Specifications for storage on a construction site are contained in various regulations and codes, including the California Code of Regulations, the Uniform Fire Code, and the California Health and Safety Code. These same codes require that all hazardous materials be used and stored in the manner specified on the material packaging. Existing regulations and programs are sufficient to ensure that potential impacts as a result of the use or storage of hazardous materials are reduced to less than significant levels.

The California Department of Forestry and Fire Protection (CAL FIRE) is the state agency responsible for wildland fire protection and management. As part of that task, CAL FIRE maintains maps designating Wildland Fire Hazard Severity zones. The City is not located within a Very High Fire Hazard Severity Zone, and is not in a CAL FIRE responsibility area; fire suppression is entirely within local responsibility. The project site is in an urban area, and therefore would not expose people to any risk from wildland fire.

The proposed uses are substantially consistent with the build out assumptions and would not increase the severity of already identified significant impacts; therefore, there would be no new significant impacts not previously identified in the SVSP EIR regarding hazardous materials. Thus, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that “none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred” relative to hazards and hazardous materials.

Mitigation Measures: The SVSP EIR included a mitigation measure to address the low possibility that some contamination of soils still lingered due to past use of the land for agricultural purposes. The measure, Mitigation Measure 4.10-1, indicates that if evidence of contamination is observed (stained soils, unearthing of a tank, etc.) then proper testing and remediation is required, in coordination with the appropriate City Departments. This measure remains applicable to the project.

X. Hydrology and Water Quality

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?	SVSP EIR Section 4.13	No	No	No	None
b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	Same	No	No	No	None
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would:	Same	No	No	No	None
i) result in substantial erosion or siltation on or off-site;	Same	No	No	No	None
ii) substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site;	Same	No	No	No	None
iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater systems or provide substantial additional sources of polluted runoff; or	Same	No	No	No	None
iv) impede or redirect flood flows?	Same	No	No	No	None

d) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	Same	No	No	No	None
e) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?	Same	No	No	No	None
f) In flood hazard, tsunami, or seiches zones, risk release of pollutants due to project inundation?	Same	No	No	No	None

Discussion: A Drainage and Storm water Master Plan was prepared and approved by the City as part of the SVSP EIR. As noted in the EIR, the Drainage and Storm water Master Plan demonstrated that the increases in impervious surfaces being caused by buildout of the SVSP would be offset by proposed drainage facilities and storm water improvements. The project would offset increases in peak flow, no development would occur within the 100-year floodplain area, and consistency with existing City regulations would ensure that all homes would be elevated at least two feet above the 100-year water surface elevation. With regard to storm water quality, the EIR notes that there are existing programs, regulations, and permits in place to ensure that the project would not have significant effects related to water pollution from construction or operation, though a mitigation measure is included to require compliance with this regulations.

The project is in an area of flat topography and is not near any large water bodies or dams/levees, so would not be subject to losses due to dam/levee failure, seiche, tsunami, or mudflow. The project falls within the development footprint of the SVSP, and does not result in any changes to the scope or scale of impacts, and the prior conclusions remain appropriate.

Mitigation Measures: Mitigation Measure 4.13-1 was included to require compliance with the City's stormwater quality standards, including preparation of a Storm Water Pollution Prevention Plan (SWPPP). This measure remains applicable to the proposed project.

XI. Land Use and Planning

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Physically divide an established community?	SVSP EIR Section 4.1	No	No	No	None
b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation of an agency adopted for the purpose of avoiding or mitigating an environmental effect?	Same	No	No	No	SVSP EIR MM 4.1-3, 4.6-1 and 4.6-2

Discussion: The SVSP EIR concluded that there were some potential land use incompatibilities, but that these could be addressed by a mix of mitigation and compliance with the City Noise Ordinance and Grading Ordinance. Land use issues discussed and addressed included noise from McClellan overflights, agricultural uses in Placer County next to urban uses in the SVSP, construction noise, and commercial land use noise. The overflight noise is a potential nuisance discussion requiring disclosure to future purchasers within the Project area; noise volumes do not exceed standards. It was concluded that the project would not physically divide an established community and that the project did not conflict with any land use policies or regulations, or with a Habitat Conservation Plan (or similar). The EIR concluded that all impacts of the SVSP could be reduced to less than significant levels with mitigation. The project involves the same use types within the same development footprint, and therefore the conclusions of SVSP EIR remain applicable to the proposed project. In addition, the project is consistent with the policies of the Zoning Ordinance, SVSP, and the General Plan which are adopted for the purpose of avoiding environmental effects.

The project area has been planned for development, including adequate roads, pedestrian paths, and bicycle paths to provide connections within the community. The project involves frontage improvements including new driveways, sidewalks, and pedestrian connections. As such, the project will not physically divide an established community.

As described above, changes introduced by the project and/or new circumstances relevant to the project would not, as compared to the SVSP EIR, result in a new significant impact or significant impacts that are substantially more severe than significant impacts previously disclosed. Thus, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent EIR have occurred" relative to land use and planning.

Mitigation Measures: Mitigation Measure 4.1-3 (McClellan overflight disclosure), 4.6-1 (construction noise) and 4.6-2 (commercial noise controls). The measure regarding disclosure ensure that people purchasing property within the project area which could be affected by overflight noise are aware of this potential affects. The disclosure measure is implemented by including a Condition of Approval requiring that the deed

disclosures are a component of the Covenants, Conditions, and Restrictions for all affected properties. The condition has been addressed in the Development Agreement for the project area, so the measures are already complete. The construction noise and commercial noise control measures are applied during construction, so remain applicable to the proposed project.

XII. Mineral Resources

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
c) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?	SVSP EIR Section 4.7	No	No	No	None
d) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	Same	No	No	No	None

Discussion: The SVSP EIR indicated that there were no significant mineral resources in the area. Therefore, the project is not considered to have any impacts on mineral resources. Thus, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR have occurred" relative to mineral resources.

Mitigation Measures: None required for this Project.

XIII. Noise

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents' Mitigation Measures Implemented or Addressing Impacts.
a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	SVSP EIR Section 4.6	No	No	No	SVSP EIR MM 4.1-3, 4.6-1 and 4.6-4
b) Generation of excessive ground borne vibration of ground borne noise levels?	Same	No	No	No	SVSP EIR MM 4.6-1 and 4.6-4
c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?	Same	No	No	No	None

Discussion: The SVSP EIR addressed construction noise, roadway noise, noise from non-residential land uses, and aircraft overflight noise. Overflight noise has already been addressed in the Land Use section of this Addendum. Construction noise in general was discussed, and addressed via mitigation. Noise was determined to be an issue for all of the major roadways in the SVSP area, including Baseline Road. Mitigation was found to reduce noise volumes to levels within General Plan standards, and so impacts were found to be less than significant.

The project will be subdividing the property into three lots—KT-40A, KT-40B, and KT-40C. The 209 units allocated to the property will be built on KT-40A, while the remaining KT-40B and KT-40C will be designated for commercial uses and developed in the future. Consistent with the SVSP noise reduction mitigation measures, a 6-foot tall masonry sound wall will be constructed along the shared property line between the residential and commercial uses. The sound wall will also help mitigate noise resulting from Baseline Road and ensure that noise volumes are consistent with City standards.

Based on the foregoing, the project would not result in new or more severe impacts than described in the SVSP EIR, and the impact conclusions of the EIR are unchanged. Thus, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR have occurred" relative to noise.

Mitigation Measures: Mitigation Measures 4.1-3 (McClellan overflight disclosure), 4.6-1 (construction noise), and 4.6-4 (traffic noise attenuation) were applied in the SVSP EIR. Construction noise controls in the mitigation includes located fixed equipment away from noise sensitive uses and having a construction disturbance coordinator to address noise concerns. Traffic noise attenuation also calls for the use of masonry walls along major roadways. These mitigation measures remain applicable to the proposed project.

XIV. Population and Housing

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents Mitigation Measures Implemented or Addressing Impacts.
a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, though extension of roads or other infrastructure)?	SVSP EIR Section 4.2	No	No	No	None
b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?	Same	No	No	No	None

Discussion: The SVSP EIR indicated the SVSP would increase the number of housing units above those which had been anticipated in the General Plan, and analysis the effect on supporting services, infrastructure, and other issues related to environmental impacts. It was concluded that impacts would be significant and unavoidable. The project will construct 209 residential units, which is the total number of units allocated to the site. Given the project involves the same number of housing units as analyzed in the SVSP EIR, the project will result in the same previously identified impacts. No existing buildings or residents are present on the project site; therefore, no residences or communities would be displaced. The project would not result in new or more severe impacts than described in the SVSP EIR, and the impact conclusions of the EIR are unchanged. Thus, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that “none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR have occurred” relative to population and housing impacts.

Mitigation Measures: None required for this Project.

XV. Public Services

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents Mitigation Measures Implemented or Addressing Impacts.
Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any the public services:					
a) Fire protection?	SVSP EIR Section 4.11	No	No	No	None
b) Police protection?	Same	No	No	No	None
c) Schools?	Same	No	No	No	SVSP EIR MM 4.11-3
d) Parks?	Same	No	No	No	None
e) Other public facilities?	Same	No	No	No	None

Discussion: The SVSP EIR concluded that fire and police protection services, and other public services would not be negatively affected by the project. Existing City codes and regulations require adequate water pressure in the water lines, and construction must comply with the Uniform Fire and Building Codes used by the City of Roseville. Additionally, the applicant is required to pay a fire service construction tax, which is used for purchasing capital facilities for the Fire Department. Sales taxes and property taxes resulting from development will add revenue to the General Fund, which provides funding for police services. Existing codes, regulations, funding agreements, and facilities plans are sufficient to ensure less than significant impacts.

An analysis of impacts to schools was included in the SVSP EIR, which concluded that two new elementary schools and one new intermediate school would be required in the project area. The high school students generated from the SVSP were assumed in the nearby high schools located outside the plan area. A portion of the SVSP is located within the Center School District and a portion is located within the Roseville City School District, though the current project area is entirely within the Center School District. The project will not change the overall number of housing units in the SVSP; therefore, the conclusions of SVSP EIR remain applicable to the proposed project.

The project was routed to the School District for review, and no issues were identified. The project will be required to pay per-unit school fees to mitigate any impacts. Under state law, such payments are deemed to constitute "*full and complete mitigation*" of impacts to school facilities (Gov. Code, § 65995, subd. (h)). In addition, the developer is required to work with the School District to identify a Safe Routes to School program. Impacts to public services were determined to be less than significant, with mitigation.

The developer will be required to pay fees into a Community Facilities District, which provides funding for park services. Future park and recreation sites and facilities have already been identified as part of the Specific Plan process. The City charges fees for end-users for other services, such as garbage and greenwaste collection, in order to fund those services. Existing codes, regulations, funding agreements, and facilities plans are sufficient to ensure less than significant impacts.

Based on the evaluation above, the project would not result in new or more severe impacts than described in the SVSP EIR, and the impact conclusions of the EIR are unchanged. Thus, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR have occurred" relative to public services.

Mitigation Measures: Mitigation Measure 4.11-3 requires a Safe Routes to School program, which would be implemented at the time of school construction, and remains applicable to the proposed project.

XVI. Recreation

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents Mitigation Measures Implemented or Addressing Impacts.
a) Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that physical deterioration of the facility would occur or be accelerated?	SVSP EIR Section 4.11	No	No	No	None
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?	Same	No	No	No	None

Discussion: The SVSP indicates that the required parkland dedication was met by dedication of parkland and through payment of park dedication in-lieu fees. As noted in the EIR, the payment of Citywide and neighborhood park fees will be required, and the payment of fees combined with the dedication of parkland will ensure that impacts to park services are less than significant. The project involves the construction of 209 units, which is consistent with the number of units allocated to the site by the General Plan and the SVSP. As such, the project will not increase the number of residents anticipated for the SVSP nor decrease the amount of area dedicated to park and recreation uses; therefore, this conclusion remains applicable to the proposed project. Given the foregoing, the project would not result in new or more severe impacts than described in the SVSP EIR, and the impact conclusions of the EIR are unchanged. Thus, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR have occurred" relative to recreation impacts.

Mitigation Measures: None required for this Project.

XVII. Transportation

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents Mitigation Measures Implemented or Addressing Impacts.
a) Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities?	SVSP EIR Section 4.3	No	No	No	SVSP EIR MM 4.3-1 to 4.3-5
b) Conflict or be inconsistent with CEQA Guidelines Section 15064.3, subdivision (b)?	n/a	No	No	No	None
c) Substantially increase hazards due to a geometric design feature(s) (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	SVSP EIR Section 4.3	No	No	No	None
d) Result in inadequate emergency access?	Same	No	No	No	None

Discussion: The SVSP EIR evaluated the traffic impacts to existing and future roadways from traffic being generated by the anticipated uses within the plan area. The EIR concluded that with mitigation, impacts to City roadways would be less than significant. Impacts to adjacent agency roadways was identified as a significant and unavoidable impact, and mitigation to lessen the impact was accepted. The proposed project is consistent with the Community Commercial/Commercial Mixed Use designation of the site and will be building the same number of units contemplated for the site. Therefore, the project would not cause new or more severe impacts than already described in the SVSP EIR.

Checklist item b) focuses on Vehicle Miles Traveled (VMT). This was added to the checklist after publication of the SVSP EIR. However, the General Plan Update (GPU) EIR[2] used the Roseville travel forecasting model to estimate VMT for the City. The VMT data was then normalized to residents as a "per capita" rate. As described in the GPU EIR, and consistent with the VMT reductions in OPR's *Technical Advisory on Evaluating Transportation Impacts in CEQA*, the City has adopted a VMT significance threshold of 12.8 VMT/capita. This threshold represents a 15 percent reduction to baseline per capita VMT. The GPU EIR concluded that buildout of the remaining undeveloped areas of the City, consistent with existing land use designations and existing development agreements, would exceed the City's adopted threshold resulting in a

[2] General Plan Update EIR: www.roseville.ca.us/GeneralPlan

Significant Impact in both the constrained and unconstrained buildout scenarios; and that mitigation requiring land use changes was not feasible because of existing development agreements in place for the undeveloped areas of the City.

As stated in the GPU EIR and pursuant to the tiering provisions of CEQA, projects that are consistent with the General Plan do not require further VMT analysis. The proposed project is consistent with the General Plan land use and will allow the development of 209 residential units, which is consistent with the number of units allocated to the site in the General Plan and in the SVSP. The project does not change the total number of units anticipated for buildout of the SVSP and analyzed in the GPU EIR; therefore, it can be concluded that the project is consistent with the GPU EIR analysis as it relates to VMT, and the project does not require further VMT analysis.

The proposed project has no impact on air traffic patterns, and does not present substantial safety risks. The project design does not introduce hazards such as sharp curves or dangerous intersections. The project has been reviewed by the City Engineering Division and City Fire Department staff, and has been found to be consistent with the City's Design Standards. Furthermore, standard conditions of approval added to all City project require compliance with Fire Codes and other design standards. Compliance with existing regulations ensure that impacts are less than significant.

The proposed uses are substantially consistent with the build out assumptions and would not increase the severity of already identified significant impacts; therefore, there would be no new significant impacts not previously identified in the SVSP EIR relative to transportation. Thus, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR have occurred" relative to transportation.

Mitigation Measures: Mitigation was included for each impacted facility (see SVSP EIR MM 4.3-1 to 4.3-5), but these measures have already been incorporated into the City's Capital Improvement Program and fee programs. The measures are no longer necessary to impose on individual projects, as a mechanism for their funding and construction is already implemented.

XVIII. Tribal Cultural Resources

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents Mitigation Measures Implemented or Addressing Impacts.
Would the project cause a substantial adverse change in the significance of a Tribal Cultural Resource as defined in Public Resources Code Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:					
a) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k)?	SVSP EIR Section 4.9	No	No	No	None
b) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1? In applying the criteria set forth in subdivision (c) of Public Resources Code Section 5024.1 the lead agency shall consider the significance of the resource to a California Native American tribe.	Same	No	No	No	None

Discussion: In addition to archeological resources, tribal cultural resources are also given particular treatment. Tribal cultural resources are defined in Public Resources Code Section 21074, as either 1) a site, feature, place, geographically-defined cultural landscape, sacred place, or object with cultural value to a California Native American Tribe, that is listed or eligible for listing on the California Register or Historical Resources, or on a local register of historical resources or as 2) a resource determined by the lead agency, supported by substantial evidence, to be significant according to the historical register criteria in Public Resources Code section 5024.1(c), and considering the significance of the resource to a California Native American Tribe. This section was added to the CEQA Guidelines after the publication of the prior environmental document to which this Addendum is attached, but cultural resources were addressed in that document. The only item not completed was the required notice to tribes which have requested such notice pursuant to the Public Resources Code. As part of this Addendum, notice of the proposed project was mailed to tribes which had requested such notice, and no requests for consultation were received during the consultation period. Previously applied mitigation should be adequate to address potential impacts of the project, which require cessation of work should any item of cultural interest be found, to ensure the project will have a less than significant impact on cultural resources. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR have occurred" relative to Tribal Cultural Resources.

Mitigation Measures: Mitigation Measure 4.9-1 (cease work and consult with archeologist) and 4.9-2 (cease work and consult with paleontologist) remain applicable to the proposed project.

XIX. Utilities and Service Systems

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents Mitigation Measures Implemented or Addressing Impacts.
a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?	SVS EIR Section 4.12.1 & 4.12.3	No	No	No	None
b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry, and multiple dry years?	SVSP EIR Section 4.12.1	No	No	No	None
c) Result in a determination by the wastewater treatment provider which serves the project that it has adequate capacity to serve the project's projected demand in addition of the provider's existing commitments?	SVSP EIR Section 4.12.3	No	No	No	None
d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	SVSP EIR Section 4.12.4	No	No	No	None
e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?	Same	No	No	No	None

Discussion: The SVSP EIR addressed water demand for the plan area and determined there was adequate supply to meet the anticipated water demands from development of the plan area. Water demand and supply is based on existing land use designations and population projections. Because the project is consistent with the existing land use designations and will be building the same number of units allocated to the site, the project is consistent with the prior analysis.

Development of the project area will require the construction of water lines and sewer lines and facilities, but these were previously identified through the infrastructure master plans developed for the SVSP. Additionally, the project will have no effect on wastewater generation beyond that previously analyzed in the SVSP EIR. Given the project is consistent with the existing land use designations, Environmental Utilities determined that the project falls within the scope of the prior assessment. The SVSP EIR concluded that the Pleasant Grove Wastewater Treatment Plan was sized to accommodate flow from the plan area and that impacts would be less than significant. This conclusion remains applicable to the proposed project.

The SVSP EIR indicated that the Western Placer Waste Management Authority facilities would be used to dispose of solid waste, and that there was sufficient capacity to accept solid waste from the SVSP. Solid waste generation is based on population, and as the project will not change the estimated population for the plan area, the project falls within the scope of the prior analysis, and does not result in any new or expanded impacts to this previously-identified significant and unavoidable impact.

As described above, changes introduced by the project and/or new circumstances relevant to the project would not, as compared to the SVSP EIR, result in a new significant impact or significant impacts that are substantially more severe than significant impacts previously disclosed. Therefore, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that “none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR or negative declaration have occurred.”

Mitigation Measures: Mitigation Measures 4.12.4-1 (expand the landfill) and 4.12.4-2 (diversion of construction debris) were included to require payment of fees to be used for landfill expansion and to require a 50% reduction in the construction waste stream. The landfill expansion measure has already been implemented, as fees are already in place that will apply to the proposed project. The remaining measure regarding diversion of construction debris remains applicable, as it is a project-level measure that applies during construction.

XX. Wildfire

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents Mitigation Measures Implemented or Addressing Impacts.
If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:					
a) Substantially impair an adopted emergency response plan or emergency evacuation plan?	n/a	No	No	No	None
b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?	n/a	No	No	No	None
c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	n/a	No	No	No	None
d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	n/a	No	No	No	None
Discussion: The Wildfire section was added to the CEQA Guidelines after the publication of the prior environmental document to which this Addendum is attached. The California Department of Forestry and Fire Protection (CAL FIRE) is the state agency responsible for wildland fire protection and management. As part of that task, CAL FIRE maintains maps designating Wildland Fire Hazard Severity zones. The City is not located within a Very High Fire Hazard Severity Zone, and is not in a CAL FIRE responsibility area; fire suppression is entirely within local					

responsibility. Checklist questions a—d above do not apply, because the project site is not within a Very High Fire Hazard Severity Zone and is not in a CAL FIRE responsibility area. Therefore, there would be no impact to this criteria.

Mitigation Measures: None required for this Project.

XXI. Mandatory Findings of Significance

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents Mitigation Measures Implemented or Addressing Impacts.
a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of an endangered, threatened or rare species, or eliminate important examples of the major periods of California history or prehistory?	SVSP EIR	No	No	No	None
b) Does the project have impacts which are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)	SVSP EIR	No	No	No	None
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	SVSP EIR	No	No	No	None

Discussion: Long term environmental goals are not impacted by the proposed project. The cumulative impacts do not deviate beyond what was contemplated in the SVSP EIR, and mitigation measures have already been incorporated. With implementation of the City's Mitigating Ordinances, Guidelines, and Standards and best management practices, mitigation measures described in this chapter, and permit conditions, the proposed project will not have a significant impact on the habitat of any plant or animal species. Based on the foregoing, the project does not have the potential to degrade the quality of the environment, substantially reduce the habitat of any wildlife species, or create adverse effects on human beings. Thus, pursuant to CEQA Guidelines section 15164, subdivision (a), the City finds that "none of the conditions described in Section 15162 calling for preparation of a subsequent FEIR have occurred" relative to the mandatory findings of significance.

ENVIRONMENTAL DETERMINATION:

In reviewing the site specific information provided for this project and acting as Lead Agency, the City of Roseville, Development Services Department, Planning Division has analyzed the potential environmental impacts created by this project and determined that the findings of CEQA Section 15162 concerning the decision not to prepare a subsequent EIR or negative declaration and the findings of CEQA Section 15164 concerning the decision to prepare an Addendum can be made. As supported by substantial evidence within the Addendum to the Sierra Vista Specific Plan EIR (2008032115, adopted on May 5, 2010), the Lead Agency makes the following findings:

[**X**] No substantial changes are proposed in the project which would require major revisions of the previous EIR or Mitigated Negative Declaration.

[**X**] No substantial changes have occurred with respect to the circumstances under which the project is undertaken.

[**X**] There is no new information of substantial importance which was not known and could not have been known with the exercise of due diligence at the time the previous EIR was certified as complete or the Mitigated Negative Declaration was adopted.

[**X**] Only minor technical changes or additions are necessary in order to deem the adopted environmental document adequate.

Addendum Prepared by:

Kinarik Shallow

Kinarik Shallow, Associate Planner
City of Roseville, Development Services–Planning Division

1. SVSP Applicable Mitigation Measures
2. Arborist Report

TABLE OF APPLICABLE MITIGATION MEASURES

Mitigation Measure	Implementation	Timing	Reviewing Party	Documents to be Submitted to City	Staff Use Only
MM 4.4-1 Dust and Construction Control Measures In accordance with the PCAPCD, the applicant shall comply with all applicable rules and regulations as listed above (e.g., Rule 202, 218 and 228). In addition, at the time of tentative map the applicant(s) shall implement a minimum of five (5) of the following measures unless superseded by state or other more stringent standards: The following mitigation measures shall be implemented to reduce short-term construction-related air quality impacts. In addition, dust control measures are required to be implemented by all projects in accordance with the City of Roseville Grading Ordinance, and the PCAPCD Fugitive Dust Rule 228. • Applicant shall submit to PCAPCD a Construction Emission / Dust Control Plan within 30 days prior to groundbreaking. If the PCAPCD does not respond within 20 days, the plan shall be considered approved. The plan must address the minimum requirements found in section 300 and 400 of District Rule 228, Fugitive Dust (www.placer.ca.gov/airpollution/airpolut.htm). The applicant shall keep a hard or electronic copy of Rule 228, Fugitive Dust on-site for reference. • The Construction Emission/Dust Control Plan shall include a comprehensive inventory (i.e. make, model, year, emission rating) of all heavy-duty off-road equipment (50 horsepower (HP) of greater) that will be used an aggregate of 40 or more hours for the construction project. If any new equipment is added after submission of the inventory, the prime contractor shall the prime contractor shall contact the APCD prior to the new equipment being utilized. The project representative shall provide PCAPCD with the anticipated construction timeline including start date, and name and phone number of the project manager and on-site foreman. The plan shall demonstrate that the heavy-duty (> 50 HP) off-road vehicles to be used in the construction project, including owned, leased and subcontractor vehicles, will achieve a project wide fleet-average 20% NO_X reduction and 45% particulate reduction compared to the most recent ARB fleet average. PCAPCD shall be contacted for average fleet emission data. Acceptable options for reducing emissions may include use of late model engines, low-emission diesel products, alternative fuels, engine retrofit technology, after-treatment products, and/or other options as they become available. Contractors can access the Sacramento Metropolitan Air Quality Management District's web site to determine if their off-road fleet meets the requirements listed in this measure (http://www.airquality.org/ceqa/Construction_Mitigation_Calculator.xls). The following measures are also included to reduce construction-related ROG, NOx, PM10 and PM2.5 emissions: • All construction equipment shall be maintained in good operating condition. Contractor shall ensure that all construction equipment is being properly serviced and maintained as per the manufacturer's specifications. Maintenance records shall be available at the construction site for verification. This measure will reduce combustion emissions of all criteria air pollutants. • Prior to the issuance of any grading permits, all applicants shall submit construction plans denoting the proposed schedule and projected equipment use. Construction contractors shall provide evidence that low emission mobile construction will be used, or that their use was investigated and found to be infeasible for the project. Low emission equipment is defined as meeting the California Air Resources Board's Tier III standards. Contractors shall also conform to any construction measures imposed by the PCAPCD as well as City Planning Staff. This measure will primarily reduce ROG, NOx, PM10, and PM2.5 exhaust emissions. • Paints and coating shall be applied either by hand or by high volume, low-pressure spray. This measure will reduce evaporative ROG emissions. • All construction shall comply with the following measures to reduce fugitive dust related emissions of PM10 and PM2.5: ○ Maintain a minimum 24-inch freeboard on soil haul trucks or cover payloads using tarps or other suitable means. ○ Suspend grading operations during high winds (greater than 15 mph). ○ Sweep streets as necessary if silt is carried off-site to adjacent public thoroughfares or occurs as a result of hauling.	The applicants shall submit construction management plans as part of the Grading Permit application. Engineering will review plans for inclusion of these measures prior to issuance of permits or approval of plans.	*Pre-Construction*: Prior to issuance of Grading Permits or Improvement Plans. Add as note on Improvement Plans.	Engineering	Dust Control Plan and proof of submittal to PCAPCD	

○ Dispose of surplus excavated material in accordance with local ordinances and use sound engineering practices. ○ Schedule activities to minimize the amounts of exposed excavated soil during and after the end of work periods. ○ Phase grading into smaller areas to prevent the susceptibility of larger areas to erosion over extended periods of time. ○ Pave or apply gravel to any on-site haul roads. ○ Reestablish ground cover on the construction site through seeding and water. ○ Clean earth moving construction equipment with water or sweep clean, once per day, or as necessary (e.g., when moving onsite), consistent with National Pollutant Discharge Elimination System Best Management Practices and the Roseville Grading Ordinance. Water shall be applied to control dust as needed to prevent dust impacts offsite. Operational water truck(s), shall be on-site, as required, to control fugitive dust. Construction vehicles leaving the site shall be cleaned, as needed, to prevent dust, silt, mud, and dirt from being released or tracked off-site. ○ Spread soil binders on unpaved roads and employee/equipment parking areas. Soil binders shall be non-toxic in accordance with state and local regulations. Apply approved chemical soil stabilizers, or vegetated mats, etc. according to manufacturers' specifications, to all-inactive construction areas (previously graded areas which remain inactive for 96 hours). ○ Minimize diesel idling time to a maximum of five minutes. ○ Utilize existing power sources (e.g., power poles) or clean fuel generators rather than temporary diesel power generators, if feasible. ○ An applicant representative, ARB-certified to perform Visible Emissions Evaluations (VEE), shall routinely (i.e., once per week) evaluate project related off-road and heavy-duty on-road equipment emissions for compliance with this requirement for projects grading more than 20 acres in size, regardless of how many acres are to be disturbed daily. ○ Construction equipment exhaust emissions shall not exceed the PCAPCD Visible Emissions Rule 202. Fugitive dust is not to exceed 40% opacity and not go beyond property boundary at any time. Operators of vehicles and equipment found to exceed opacity limits are to be immediately notified and the equipment must be repaired within 72 hours. The following measures will be required: 1. Include the following standard note on the Improvement/Grading Plan: *If required by the Public Works Department, the contractor shall hold a pre-construction meeting prior to grading activities. The contractor shall invite the Placer County APCD to the pre-construction meeting in order to discuss the construction emission/dust control plan with employees and/or contractors.* 2. Prior to building permit approval, the applicant shall show, on the plans submitted to the Building Department, that electrical outlets shall be installed on the exterior walls of both the front and back of all residences or all commercial buildings to promote the use of electric landscape maintenance equipment. 3. Prior to building permit approval, the applicant shall show, on the plans submitted to the Building Department, provisions for construction of new residences, and where natural gas is available, the installation of a gas outlet for use with outdoor cooking appliances, such as a gas barbecue or outdoor recreational fire pits. 4. Prior to building permit approval, in accordance with District Rule 225, only U.S. EPA Phase II certified wood burning devices shall be allowed in single-family residences. The emission potential from each residence shall not exceed a cumulative total of 7.5 grams per hour for all devices. Masonry fireplaces shall have either an EPA certified Phase II wood burning device or shall be a U.L. Listed Decorative Gas Appliance. (Rule 225) 5. Wood burning or Pellet appliances shall not be permitted in multi-family developments. Only natural gas or propane fired fireplace appliances are permitted. These appliances shall be clearly delineated on the Floor Plans submitted in conjunction with the Building Permit application. (Rule 225 / section 302.2) 6. Prior to the issuance of a Building Permit, the applicant shall show that all flat roofs with parapets shall include a white or silver cap sheet to reduce energy demands. 7. Diesel trucks shall be prohibited from idling more than five minutes. Prior to the issuance of a Building Permit, the applicant shall show that all truck loading and unloading docks shall be					

equipped with one 110/208 volt power outlet for every two dock doors. Diesel Trucks idling for more than five minutes shall be required to connect to the 110/208 volt power to run any auxiliary equipment. 2'x3' signage which indicates "Diesel engine Idling Limited to a Maximum of 5 Minutes" shall be shown on the building elevations and shall be submitted to the Placer County APCD prior to the issuance of Building Permits for the project. 8. Prior to approval of Improvement Plans, an enforcement plan shall be established, and submitted to the APCD for review, in order to evaluate project-related on-and-off- road heavy-duty vehicle engine emission opacities on a weekly basis, using standards as defined in California Code of Regulations, Title 13, Sections 2180 – 2194. An Environmental Coordinator, hired by the prime contractor or property owner, and who is CARB-certified to perform Visible Emissions Evaluations (VEE), shall routinely evaluate project related off-road and heavy duty on-road equipment emissions for compliance with this requirement. Operators of vehicles and equipment found to exceed opacity limits will be notified by APCD and the equipment must be repaired within 72 hours. (California Code of Regulations, Title 13, Sections 2180 – 2194) *The project shall comply with all applicable Placer County Air Pollution Control District rules and regulations, and shall obtain applicable permits and/or clearances from the District prior to the start of construction.* • The contractor shall use CARB ultra-low sulfur diesel fuel for all diesel–powered equipment. In addition, low sulfur fuel shall be utilized for all stationary equipment. (California Standards for Motor Vehicle Diesel Fuel, title 13, article 4.8, chapter 9, California Code of Regulations). • Processes that discharge 2 pounds per day or more of air contaminants, as defined by Health and Safety Code Section 39013, to the atmosphere may require a permit. Permits are required for both construction and operation. Developers/contractors should contact the District prior to construction and obtain any necessary permits prior to the issuance of a Building Permit. (Rule 501) • Pursuant to the Placer County Air Pollution Control District Rule 501, General Permit Requirements, the proposed project may need a permit from the District prior to construction. In general, any engine greater than 50 brake horsepower or any boiler with heat greater than 1,000,000 Btu per hour shall require a permit issued by the District. (Rule 501) • All on-site stationary equipment which is classified as 50 hp or greater shall either obtain a state issued portable equipment permit or a Placer County APCD issued portable equipment permit. (California Portable Equipment Registration Program, Section 2452). • The contractor shall utilize existing power sources (e.g., power poles) or clean fuel generators rather than temporary diesel power generators if feasible. • During construction, the contractor shall minimize idling time to a maximum of 5 minutes for all diesel powered equipment. • During construction, traffic speeds on all unpaved surfaces shall be limited to 15 miles per hour or less. **(**Rule 228 / section 401.2)					
MM 4.6-2 & 4.4-1 Commercial Noise Controls For all commercial uses within 150 feet of residential uses, the developer shall implement the following or equally effective measures: • In general, where commercial land uses adjoin residential property lines, the following measures should be included in the design of the commercial use. If the primary noise sources are parking lot noise, HVAC equipment and light truck deliveries, then 6-7 foot tall masonry walls shall be constructed to provide adequate isolation of parking lot and delivery truck activities. HVAC equipment shall be located either at ground level, or when located on roof-tops the building facades shall include parapets for shielding. • Where commercial uses adjoin common residential property lines, and loading docks or truck circulation routes face the residential areas, the following mitigation measures shall be included in the project design: ○ Loading docks and truck delivery areas shall maintain a minimum distance of 30 feet from residential property lines; ○ Property line barriers shall be 6 to 8 feet in height. Circulation routes for trucks should be located a minimum of 30-feet from residential property lines;	Project plans will be reviewed for compliance.	*Pre-Construction:* Prior to issuance of Improvement Plans and/or Building Permits Add as note on Improvement Plans and Building Plans	Engineering will review Improvement Plans for compliance with wall requirements. Building will review Building Plans for compliance with HVAC requirements.	Acoustical Study if loading docks or truck delivery routes are less than 100 feet from residential property lines	

○ All heating, cooling and ventilation equipment shall be located within mechanical rooms where possible; ○ All heating, cooling and ventilation equipment shall be shielded from view with solid barriers; ○ Emergency generators shall comply with the local noise criteria at the nearest noise-sensitive receivers; In cases where loading docks or truck delivery circulation routes are located less than 100 feet from residential property lines, an acoustical evaluation shall be submitted to verify compliance with the City of Roseville Noise Level Performance Standards.					
MM 4.6- 4: Traffic Noise Attenuation **MM 4.6-4(a):** Masonry walls and/or landscaped berms shall be constructed along the major project-area roadways adjacent to proposed residential uses if acoustical studies warrant sound attenuation, otherwise standard wood fencing is acceptable. Draft EIR Table 4.6-10 data shall be consulted to determine appropriate barrier heights. If the assumptions shown in Table 4.6-10 vary considerably, a detailed analysis of exterior and interior mitigation measures should be conducted when tentative maps become available. **MM 4.6-4(b):** In areas requiring sound attenuation, noise barrier walls shall be constructed of concrete panels, concrete masonry units, earthen berms, or any combination of these materials. Wood is not recommended for construction due to eventual warping and degradation of acoustical performance. **MM 4.6-4c:** Tentative map applications for residential uses located along Fiddyment Road would be required to include an analysis of interior noise levels. The report shall be conducted by a qualified acoustical engineer and shall specify the measures required to achieve compliance with the City of Roseville 45 dB Ldn interior noise level standard.	The developer shall construct walls in locations consistent with the walls exhibit of the Specific Plan, which shall be a minimum of six feet tall per the Draft EIR. The developer shall include wall and/or landscaped berm details as part of Improvement Plans which demonstrate consistency with the design requirements of the measure.	*Pre-Construction:* Prior to issuance of Improvement Plans. Add as note on Improvement Plans and Building Plans	Engineering to review plans for consistency with measure.	An acoustical Study, if conditions or plans deviate from Specific Plan or EIR.	
WMM 4.7-13 Riparian Habitat Policies To protect riparian vegetation within the SOI Amendment Area SVSP and Urban Reserve areas, the following policies shall be implemented: a) The project applicant shall provide for temporary fencing along the top of the bank during construction of those areas of the proposed project adjacent to riparian habitat to discourage access to the riparian habitat by humans and pets. b) The project applicant shall provide for permanent fencing and/or a landscape barrier to discourage access to the riparian habitat by humans and pets. The fencing and/or landscape barrier shall be placed at the top of the bank of the creeks along those portions of the site adjacent to riparian habitat. The proposed recreation trail shall be on the project site side of the fence/landscape barrier. The fencing and/or landscape barrier shall be constructed of wood or other natural materials and shall allow for the viewing of the riparian habitat while discouraging access. c) Interpretive signs and displays shall be posted along the border of the riparian area to educate the public and route access away from sensitive areas. These informative signs will be posted at intervals determined appropriate by the City of Roseville Parks and Recreation Director along the border with information regarding the objectives of creek and riparian habitat protection. Signs should also include information regarding the importance of restricting access to the riparian area by household pets. Such signs will be made of wood or similar natural material, and be maintained by the Applicant. d) Lighting adjacent to riparian buffers should be shielded away from the riparian areas.	The applicants shall design the project to avoid and preserve riparian vegetation.	*Pre-Construction*: Temporary fencing shall be installed prior to construction. Permanent measures shall be shown on Improvement Plans. Add as note on Improvement Plans.	Engineering and Parks	None	
Use Low-Glare Materials for New Development In order to reduce the effects of daytime glare from development of commercial or office uses within the SVSP Area, building developers should make use, when feasible, of low-glare materials. **MM 4.14-3 Avoid Light Spill Over into Curry Creek and Open Space Areas** Outdoor lighting shall be placed, designed and directed so as to avoid light spillover into the habitat of Curry Creek and the Open Space Preserve areas located immediately adjacent to the open space, as shown on the Land Use Map as parcels KT-1, KT-40, KT-30, KT-41, DF-1, DF-2, DF-40, CG-1, CG-82m JM-21, JM-3, and JM-4.	Comply with the measure	*Pre-Construction:* Ensure fixtures shown on Improvement Plans and Building Plans comply with the measure. Add as note on Improvement Plans and Building Plans	Engineering and Building	None	

MM 4.6-1 Construction Noise Reduction **MM 4.6-1(a):** Construction activities shall comply with the requirements of the City of Roseville Noise Ordinance. **MM4.6-1(b):** Locate fixed construction equipment such as compressors and generators as far as possible from sensitive receptors. Shroud or shield all impact tools, and muffle or shield all in-take and exhaust ports on power construction equipment. **MM 4.6-1(c):** Designate a construction disturbance coordinator and conspicuously post the Coordinator's contact information around the project site and in adjacent public spaces. The disturbance coordinator will receive all public complaints about construction noise disturbances, and will be responsible for determining the cause of the complaint, and implementing any feasible measures to be taken to alleviate the problem. **MM 4.6-1(d):** Well drilling shall occur prior to construction of the adjacent subdivision, to the extent feasible. If construction timing for the wells occurs after subdivision construction, then measures to reduce noise shall include; hanging flexible sound control curtains around the drilling apparatus, and the drill rig, to the degree feasible, as determined by the Environmental Utilities Director, if located within 1,000-feet of an occupied residence.	Discuss during pre-construction meeting and comply with the measure.	*Pre-Construction and Construction*: During construction for MM 4.6-1(d), and prior to issuance of Improvement Plans and/or Building Permits for all others. Add as note on Improvement Plans and Building Plans	Engineering staff to discuss this measure during pre-construction meeting and ensure posting has occurred. Environmental Utilities to address well drilling.	None	
MM 4.8-3 Avoid Nesting Sites To ensure that fully protected bird and raptor species are not injured or disturbed by construction in the vicinity of nesting habitat, the project applicant shall implement the following measures: *Raptors* a) When feasible, all tree removal shall occur between August 30th and February 15th to avoid the breeding season of any raptor species that could be using the area, and to discourage hawks from nesting in the vicinity of an upcoming construction area. b) For Swainson's hawk, if avoidance of tree removal outside the breeding season is not feasible, and a nest is present, the applicants would be required to obtain a 2081 permit from CDFG to mitigate for potential "take" under CESA. If no nesting is occurring, a take permit would not be required. c) Prior to the beginning of mass grading, including grading for major infrastructure improvements, during the period between February 15th and August 30th, all trees and potential burrowing owl habitat within 350 feet of any grading or earthmoving activity shall be surveyed for active raptor nests or burrows by a qualified biologist no more than 30-days prior to disturbance. If active raptor nests or burrows are found, and the site is within 350-feet of potential construction activity, a highly visible temporary fence shall be erected around the tree or burrow(s) at a distance of up to 350-feet, depending on the species, from the edge of the canopy to prevent construction disturbance and intrusions on the nest area. d) Preconstruction and non-breeding season exclusion measures shall be developed in consultation with CDFG, and shall preclude burrowing owl occupation of the portions of the project site subject to disturbance such as grading. Burrowing owls may be passively excluded from burrows in construction areas by placing one-way doors in the burrows according to CDFG protocol. The one-way doors must be in place for a minimum of three days. All burrows that may be occupied by burrowing owls regardless of whether they exhibit signs of occupation must be cleared with the one way doors. Burrows that have been cleared through the use of the one-way doors shall then be closed or backfilled to prevent owls from entering the burrow. e) No construction vehicles shall be permitted within restricted areas (i.e., raptor protection zones) unless directly related to the management or protection of the legally protected species. f) If a legally protected species nest is located in a tree designated for removal, the removal shall be deferred until after August 30th or until the adults and young of the year are no longer dependent on the nest site as determined by a qualified biologist. *Black Rails and Tri-colored Blackbirds* Prior to earth moving that would disturb marsh habitat, a qualified biologist shall conduct surveys to determine the presence of the California black rail. If either of these species is found, all earth moving within 250 feet shall stop and measures, including establishing nest protection buffers along both sides of Curry Creek during the nesting season (generally February 1 through August 31st) shall be implemented. *Rookeries* No heron rookeries are present within the plan area. Prior to earthmoving that would disturb marsh habitat or tree removal of the eucalyptus grove, pre-construction surveys should be conducted to verify	Results of preconstruction surveys shall be submitted prior to the issuance of a grading permit or Improvement Plans. Applicable construction restrictions shall be reflected within plans. The applicants shall prepare annual reports on the status and success of mitigation and shall submit these reports to USFWS and CDFG. The applicants shall coordinate with USFWS and CDFG to modify as necessary any mitigation plans in an effort to attain mitigation success.	*Pre-Construction and Construction*: Surveys required prior to construction. If surveys are positive for birds, then remainder of mitigation steps are required prior to construction. Add as note on Improvement Plans.	Engineering	Nesting bird surveys	

that no rookeries have been established. If rookeries are present all earth moving within 250-feet shall stop, during the breeding season.					
MM 4.13-1 Implementation of construction activity stormwater protection standards Prior to the issuance of a City grading permit and the commencement of construction activities, compliance with the State's General Construction permit, the City of Roseville's Construction Standards, and the City's Stormwater BMP Guidance Manual will be met. This includes the creation of a Storm Water Pollution Prevention Plan (SWPPP) that will identify the site, the location of sensitive habitats or watercourses, drainage areas, discharge locations, soil disturbance areas, and the locations of all runoff, erosion control, and sediment control Best Management Practices (BMPs). On-going monitoring and adjustments to the SWPPP will occur when needed to address changes in the field as construction activities evolve.	The developer shall create a SWPPP, submit it to the City, and comply with its provisions.	*Pre-Construction and Construction*: Submit SWPPP and ensure that BMPs remain in place during construction. Add as note on Improvement Plans and Building Plans.	Engineering	SWPPP	
MM 4.9-1 Cease Work and Consult with Qualified Archaeologist Should any cultural resources, such as structural features, any amount of bone or shell, artifacts, human remains, or architectural remains, be encountered during any subsurface development activities, work shall be suspended within 100-feet of the find. The City of Roseville Planning and Public Works Staff shall be immediately notified. At that time, the City of Roseville shall coordinate any necessary investigation of the site with qualified archaeologists as needed, to assess the resource (i.e., whether it is an "historical resource" or a "unique archaeological resource") and provide proper management recommendations should potential impacts to the resources be found to be significant. Possible management recommendations for important resources could include resource avoidance or, where avoidance is infeasible in light of project design or layout or is unnecessary to avoid significant effects, data recovery excavations. The contractor shall implement any measures deemed feasible and necessary by City staff, in consultation with the archaeologists, to be to avoid or minimize significant effects to the cultural resources. In addition, pursuant to Section 5097.98 or the State Public Resources Code, and Section 7050.5 of the State Health and Safety Code, in the event of the discovery of human remains, the County Coroner shall be immediately notified. If the remains are determined to be Native American, guidelines of the Native American Heritage Commission shall be adhered to in the treatment and disposition of the remains.	This condition shall be reflected in all construction and building plans, and construction site workers shall be advised by the site manager of this measure.	*Construction*: Measure applies if resources are discovered during construction. Add as note on Improvement Plans and Building Plans.	Engineering and Building	None	
Mitigation Measure 4.9-3 Cease Work and Consult with Qualified Paleontologist Should any evidence of paleontological resources (e.g. fossils) be encountered during grading or excavation, work shall be suspended within 100 feet of the find, and the City of Roseville shall be immediately notified. At that time, the City shall coordinate any necessary investigation of the site with a qualified paleontologist to assess the resource and provide proper management recommendations. Possible management recommendations for important resources could include resource avoidance, if feasible in light of project design or layout, or data recovery excavations. The contractor shall implement any measures deemed feasible and necessary by City staff in consultation with the paleontologist for the protection of the paleontological resources.	This condition shall be reflected in all construction and building plans, and construction site workers shall be advised by the site manager of this measure.	*Construction*: Measure applies if resources are discovered during construction. Add as note on Improvement Plans and Building Plans.	Engineering and Building	None	
MM 4.10-1 Identify Potential Hazardous Materials (soil contamination, tank or well sites, lead based paint and/or asbestos) Prior to site development in the SVSP, recommended testing and remediation, if needed shall occur. Groundwater wells shall be properly closed. If evidence of soil contamination, septic tanks, or other underground storage tanks are encountered in previously unidentified locations in the SVSP area, work shall cease until the area can be tested, and if necessary remediated and/or properly removed or closed. Remediation activities could include removal of contaminated soil, and/or onsite treatment. As part of the process, the City shall ensure that any necessary investigation and/or remediation activities are coordinated with the Roseville Fire Department, Placer County Division of Environmental Health, and if needed, other appropriate federal, state and local agencies. Once a site is remediated, construction can continue.	The applicants shall be responsible for conducting soil testing and/or recommendation of the Phase I environmental site assessments, if conditions are encountered which warrant such studies.	*Construction*: Applies if conditions found which warrant assessment (e.g. stained soils, underground tanks). Add as note on Improvement Plans.	Engineering and Fire	Phase I environmental assessment, if conditions warrant	
MM 4.12.4-2 Divert Construction Debris The applicants shall ensure a 50% reduction in the construction waste stream generated from development within the SVSP. In Developer contracts with construction contractors and their sub-contractors, the Developer shall require that construction waste be reduced by 50%. The Developer shall further require that contractors and sub-contractors submit records of diversion and disposal to the City's Environmental Utilities Department in order to verify compliance with this requirement.	Comply with the measure	*Construction:* Contractor to ensure diversion occurs during construction. Add as note on Improvement Plans and Building Plans.	Environmental Utilities	Records of diversion	

NOTE: This table is provided as a courtesy to the developer, to highlight the text of measures which are required to be placed on Improvement Plans and/or Building Plans. Refer to the applicable environmental document (e.g. Environmental Impact Report) for a full list of measures, and for context. Other measures may be applicable, but are not included here because they have already been completed or they are addressed via other mechanisms (e.g. development fees).

PRELIMINARY ARBORIST REPORT & TREE INVENTORY

RE: Sierra Vista, 6400 Baseline Road, APN 499-010-014, City of Roseville Jurisdiction

Executive Summary

Towne Development of Sacramento contacted California Tree and Landscape Consulting, Inc. to inventory and evaluate the trees on the site for purposes of providing preliminary tree information for planning for development of the parcel. The property is located at 6400 Baseline Road, in the City of Roseville, California, and is subject to the jurisdiction of Roseville. See Supporting Information Appendix 1 – Tree Inventory Map.

Edwin E. Stirtz, ISA Certified Arborist #WE-0510A, and Thomas M. Stein, ISA Certified Arborist WE-12854A, were on the site on May 5, 2021, to provide species identification, measurements of diameter and canopy, field condition notes, and arborist ratings. A total of 41 trees were included in the inventory, 9 of which are protected by the City of Roseville Tree Preservation Municipal Code 19.66.

Tree Species	Trees Inventoried	Trees on the Site[1]	Protected Trees	Trees Proposed for Removal	Trees impacted by the proposed development and requiring special protection measures	Predicted Impact	Diameter Inches Proposed for Removal or Impact
Interior Live Oak	2	2	2	1	n/a	n/a	n/a
Non-Protected: Aleppo Pine, Almond, American Elm, Arizona Cypress, Black Locust, Black Walnut, Casuarina, Eucalyptus, European Olive, Honey Locust, Interior Live Oak, Mulberry, Oregon Ash, Unknown	39	39	0	13	n/a	n/a	n/a
Totals	**41**	**41**	**2**	**14**	**n/a**	**n/a**	**n/a**

See Appendices for specific information on each tree and preservation requirements and/or restrictions.

[1] CalTLC is not a licensed land surveyor. Tree locations are approximate and we do not determine tree ownership. Trees which appear to be on another parcel are listed as off-site and treated as the property of that parcel.

Methods

Appendix 2 in this report is the detailed inventory of the trees. The following terms will further explain our methods and findings.

The protected trees evaluated as part of this report have a numbered tag that was placed on each one that is 1-1/8" x 1-3/8", green anodized aluminum, "acorn" shaped, and labeled: CalTLC, Auburn, CA with 1/4" pre-stamped tree number and Tree Tag. They are attached with a natural-colored aluminum 10d nail, installed at approximately 6 feet above ground level on the approximate north side of the tree. The tag should last ~10-20+ years depending on the species, before it is enveloped by the trees' normal growth cycle.

A Level 2 – Basic Visual Assessment was performed in accordance with the International Society of Arboriculture's best management practices. This assessment level is limited to the observation of conditions and defects which are readily visible. Additional limiting factors, such as blackberries, poison oak, and/or debris piled at the base of a tree can inhibit the visual assessment.

Tree Location: The GPS location of each tree was collected using the ESRI's ArcGIS collector application on an Apple iPhone or Samsung. The data was then processed in ESRI's ArcMap by Julie McNamara, M.S. GISci, to produce the Tree Location Map.

Tree Measurements: DBH (diameter breast high) is normally measured at 4'6" (above the average ground height for "Urban Forestry"), but if that varies then the location where it is measured is noted. A steel diameter tape was used to measure the diameter. A Stanley laser distance meter was used to measure distances. Canopy radius measurements may also have been estimated due to obstructions, such as steep slopes, fences, or other trees.

Terms

Field Tag #	The pre-stamped tree number on the tag which is installed at approximately 6 feet above ground level on the north side of the tree.
Old Tag #	If additional field tags are found on the trees and are legible, they are listed here.
Species	The species of a tree is listed by our local and correct common name and botanical name by genus (capitalized) and species (lower case). Oaks frequently cross-pollinate and hybridize, but the identification is towards the strongest characteristics.
DBH	Diameter breast high' is normally measured at 4'6" (above the average ground height for "Urban Forestry"), but if that varies then the location where it is measured is noted in the next column "measured at"
Measured at	Height above average ground level where the measurement of DBH was taken.
Canopy Radius	The farthest extent of the crown composed of leaves and small twigs. Most trees are not evenly balanced. This measurement represents the longest extension from the trunk to the outer canopy. The dripline measurement is from the center point of the tree and is shown on the Tree Location Map as a circle. This measurement further defines the protection zone if specified in the local ordinance as such or can indicate if pruning may be required for development
Protected Root Zone	The radius of the protected root zone is a circle equal to the trunk diameter inches converted to feet and factored by tree age, condition and health pursuant to the industry standard. Best Management Practices: Managing Trees During Construction, the companion publication to the Approved American National Standard, provides guidance regarding minimum tree root protection zones for long term survival. In instances where a tree is multi-stemmed, the protected root zone is equal to the extrapolated diameter (sum of the area of each stem converted to a single stem) factored by tree age, condition and health.

Arborist Rating

Subjective to condition and is based on both the health and structure of the tree. All of the trees were rated for condition, per the recognized national standard as set up by the Council of Tree and Landscape Appraisers and the International Society of Arboriculture (ISA) on a numeric scale of 5 (being the highest) to 0 (the worst condition, dead) as in Chart A. The rating was done in the field at the time of the measuring and inspection.

No problem(s)	Excellent	**5**	No problems found from a visual ground inspection. Structurally, these trees have properly spaced branches and near perfect
No apparent problem(s)	Good or Fair to Good	**4**	The tree is in good condition and there are no apparent problems that a Certified Arborist can see from a visual ground inspection. If potential structural or health problems are tended to at this stage future hazard can be reduced and more serious health problems can be averted.
Minor problem(s)	Fair	**3**	The tree is in fair condition. There are some minor structural or health problems that pose no immediate danger. When the recommended actions in an arborist report are completed correctly the defect(s) can be minimized or eliminated and/or health can be improved.
Major or uncorrectable problems (2)	Fair to Poor	**2**	The tree has major problems. If the option is taken to preserve the tree, additional evaluation to identify if health or structure can be improved with correct arboricultural work including, but not limited to: pruning, cabling, bracing, bolting, guying, spraying, mistletoe removal, vertical mulching, fertilization, etc. Additionally, risk should be evaluated as a tree rated 2 may have structural conditions which indicate there is a high likelihood of some type of failure. Tree rated 2 should be removed if these additional evaluations will not be performed.
Extreme problem(s)	Poor	**1**	The problems are extreme. This rating is assigned to a tree that has structural and/or health problems that no amount of work or effort can change. The issues may or may not be considered a dangerous situation.
Dead	Dead	**0**	This indicates the tree has no significant sign of life.

Notes: Provide notable details about each tree which are factors considered in the determination of the tree rating including: (a) condition of root crown and/or roots; (b) condition of trunk; (c) condition of limbs and structure; (d) growth history and twig condition; (e) leaf appearance; and (f) dripline environment. Notes also indicate if the standard tree evaluation procedure was not followed (for example - why DBH may have been measured at a location other than the standard 54”). Additionally, notes will list any evaluation limiting factors such as debris at the base of a tree.

Actions Recommended actions to increase health and longevity.

Development Impacts Projected development impacts are based solely on distance relationships between tree location and grading. Field inspections and findings during the project at the time of grading and trenching can change relative impacts. Closely followed guidelines and requirements can result in a higher chance of survival, while requirements that are overlooked can result in a dramatically lower chance of survival. Impacts are measured as follows:

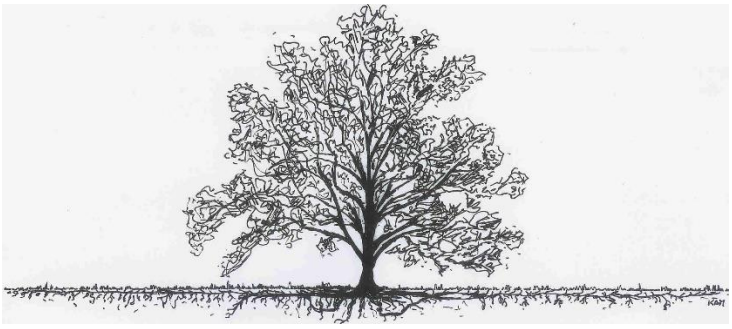
Impact Term:	Long Term Result of Impact:
Negligible	Tree is unlikely to show any symptoms. Chance of survival post development is excellent. Impacts to the Protected Root Zone are less than 5%.
Minor	Tree is likely to show minor symptoms. Chance of survival post development is good. Impacts to the Protected Root Zone are less than 15% and species tolerance is good.
Moderate	Tree is likely to show moderate symptoms. Chance of survival post development is fair. Impacts to the Protected Root Zone are less than 35% and species tolerance is good or moderate.
Severe	Tree is likely to show moderate symptoms annually and a pattern of decline. Chance of long-term survival post development is low. Impacts to the Protected Root Zone are up to 50% and species tolerance is moderate to poor.
Critical	Tree is likely to show moderate to severe symptoms annually and a pattern of decline. Chance of long-term survival post development is negligible. Impacts to the Protected Root Zone are up to 80%.

Discussion

Trees need to be protected from normal construction practices if they are to remain on the site and are expected to survive long term. While construction damage in the root zone is often the death of a tree, the time from when the damage occurs to when the symptoms begin and/or the tree dies can be years. Our recommendations are based on experience and the local ordinance requirements to enhance tree longevity. It requires the calculated root zone must remain intact as an underground ecosystem despite the use of heavy equipment to install foundations, driveways, underground utilities, and landscape irrigation systems. Simply walking and driving on soil can have serious consequences to tree health. The Tree Preservation Requirements and General Development Guidelines should be incorporated into the site plans and enforced onsite. The project arborist should be included in the development team during construction to provide expertise and make additional recommendations if additional impacts occur or tree response is poor.

Root Structure

The majority of a tree's roots are contained in a radius from the main trunk outward approximately two to three times the canopy of the tree. These roots are located in the top 6" to 3' of soil. It is a common misconception that a tree underground resembles the canopy. The correct root structure of a tree is in the drawing below. All plants' roots need both water and air for survival. Poor canopy development or canopy decline in mature trees after development is often the result of inadequate root space and/or soil compaction.



The reality of where roots are generally located

Pruning Mature Trees for Risk Reduction and/or Development Clearance

There are few good reasons to prune mature trees. Removal of deadwood, directional pruning, removal of decayed or damaged wood, and end-weight reduction as a method of mitigation for structural faults are the only reasons a mature tree should be pruned. Live wood over 3" should not be pruned unless absolutely necessary. Pruning cuts should be clean and correctly placed. Pruning should be done in accordance with the American National Standards Institute (ANSI) A300 standards.

Pruning causes an open wound in the tree. Trees do not "heal" they compartmentalize. It is far better to use more small cuts than a few large cuts as small pruning wounds reduce risk while large wounds increase risk. Any wound made today will always remain, but a healthy tree, in the absence of decay in the wound, will 'cover it' with callus tissue. Large, old pruning wounds which did not close with callous tissue often have advanced decay. These wounds are a likely failure point. Mature trees with large wounds have a high risk of failure.

Overweight limbs are a common structural fault in suppressed trees. There are two remedial actions for over- weight limbs (1) prune the limb to reduce the extension of the canopy, or (2) cable the limb to reduce movement. Cables do not hold weight they only stabilize the limb and additionally require annual inspection.

Arborist Classifications

There are different types of Arborists:

Tree Removal and/or Pruning Companies: These companies may be licensed by the State of California to do business as a tree removal company, but they do not necessarily know anything about trees biology.

Arborists: Arborist is a broad term intended to mean someone with specialized knowledge of trees, but it is often used to imply knowledge that is not there.

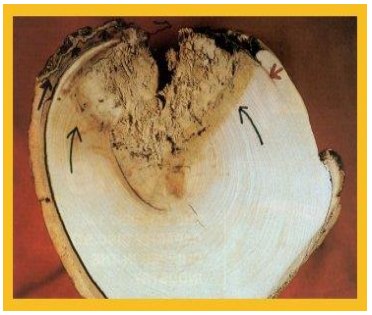
ISA Certified Arborist: An International Society of Arboriculture Certified Arborist is someone who has trained, met the qualifications for application, and been tested to have specialized knowledge of trees. You can look up certified arborists at the International Society of Arboriculture website: isa-arbor.org.

Consulting Arborist: An American Society of Consulting Arborists Registered Consulting Arborist is someone who has been trained and then tested to have specialized knowledge of trees; and trained and tested to provide high quality reports and documentation. You can look up registered consulting arborists at the American Society of Consulting Arborists website: ASCA-consultants.org.

Decay in Trees

Decay (in General): Fungi cause all decay of living trees. Decay is considered a disease because cell walls are altered, wood strength is affected, and living sapwood cells may be killed. Fungi decay wood by secreting enzymes. Different types of fungi cause different types of decay through the secretion of different chemical enzymes. Some decays, such as white rot, cause less wood strength loss than others because they first attack the lignin (causes cell walls to thicken and reduces susceptibility to decay and pest damage) secondarily the cellulose (another structural component in a cell walls). Others, such as soft rot, attack the cellulose chain and cause substantial losses in wood strength even in the initial stages of decay. Brown rot causes wood to become brittle and fractures easily with tension. Identification of internal decay in a tree is difficult because visible evidence may not be present.

According to Evaluation of Hazard Trees in Urban Areas (Matheny, 1994) decay is a critical factor in the stability of the tree. As decay progresses in the trunk, the stem becomes a hollow tube or cylinder rather than a solid rod. This change is not readily apparent to the casual observer. Trees require only a small amount of bark and wood to transport water, minerals and sugars. Interior heartwood can be eliminated (or degraded) to a great degree without compromising the transport process. Therefore, trees can contain significant amounts of decay without showing decline symptoms in the crown. Compartmentalization of decay in trees is a biological process in which the cellular tissue around wounds is changed to inhibit fungal growth and provide a barrier against the spread of decay agents into additional cells. The weakest of the barrier zones is the formation of the vertical wall. Accordingly, while a tree may be able to limit decay progression inward at large pruning cuts, in the event that there are more than one pruning cut located vertically along the main trunk of the tree, the likelihood of decay progression and the associated structural loss of integrity of the internal wood is high.



Oak Tree Impacts

Our native oak trees are easily damaged or killed by having the soil within the Protected Root Zone (PRZ) disturbed or compacted. All of the work initially performed around protected trees that will be saved should be done by people rather than by wheeled or track type tractors. Oaks are fragile giants that can take little change in soil grade, compaction, or warm season watering. Don't be fooled into believing that warm season watering has no adverse effects on native oaks. Decline and eventual death can take as long as 5-20 years with poor care and inappropriate watering. Oaks can live hundreds of years if treated properly during construction, as well as later with proper pruning, and the appropriate landscape/irrigation design.

RECOMMENDATIONS: Summary of Tree Protection Measures

The Owner and/or Developer should ensure the project arborist's protection measures are incorporated into the site plans and followed. Tree specific protection measures can be found in Appendix 2 – Tree Data.

- The project arborist should inspect the fencing prior to grading and/or grubbing for compliance with the recommended protection zones.
- All stumps within the root zone of trees to be preserved shall be ground out using a stump router or left in place. **No trunk within the root zone of other trees shall be removed using a backhoe or other piece of grading equipment.**
- Prior to any grading, or other work on the site that will come within 50' of any tree to be preserved, irrigation will be required from April through September and placement of a 4-6" layer of chip mulch over the protected root zone of all trees that will be impacted. Chips should be obtained from onsite materials and trees to be removed.
- Clearance pruning should include removal of all the lower foliage that may interfere with equipment PRIOR to having grading or other equipment on site. The Project Arborist should approve the extent of foliage elevation and oversee the pruning to be performed by a contractor who is an ISA Certified Arborist.

- Clearly designate an area on the site outside the drip line of all trees where construction materials may be stored, and parking can take place. No materials or parking shall take place within the root zones of protected trees.
- Any and all work to be performed inside the protected root zone fencing shall be supervised by the project arborist.
- Trenching inside the protected root zone shall be by a hydraulic or air spade, placing pipes underneath the roots, or boring deeper trenches underneath the roots.
- Follow all of the General Development Guidelines, Appendix 3, for all trees.

TOTAL INVENTORIED TREES = 41 trees (932 aggregate diameter inches)
TOTAL RECOMMENDED REMOVALS = 14 trees (320 aggregate diameter inches)
Rating (0-5, where 0 is Dead) = 0=2 trees; 1=11 trees; 2=26 trees; 3=2 trees
Total Non-Protected Trees = 39 trees (878 aggregate diameter inches)
Total Protected Trees = 2 trees (54 aggregate diameter inches)

**Non-Protected Trees for identification purposes, not numbered in the field.*

***Protected Trees tagged in the field.*

APPENDIX 3 – GENERAL PRACTICES FOR TREE PROTECTION

Definitions

Root zone: The roots of trees grow fairly close to the surface of the soil, and spread out in a radial direction from the trunk of tree. A general rule of thumb is that they spread 2 to 3 times the radius of the canopy, or 1 to 1 ½ times the height of the tree. It is generally accepted that disturbance to root zones should be kept as far as possible from the trunk of a tree.

Inner Bark: The bark on large valley oaks and coast live oaks is quite thick, usually 1" to 2". If the bark is knocked off a tree, the inner bark, or cambial region, is exposed or removed. The cambial zone is the area of tissue responsible for adding new layers to the tree each year, so by removing it, the tree can only grow new tissue from the edges of the wound. In addition, the wood of the tree is exposed to decay fungi, so the trunk present at the time of the injury becomes susceptible to decay. Tree protection measures require that no activities occur which can knock the bark off the trees.

Methods Used in Tree Protection:

No matter how detailed Tree Protection Measures are in the initial Arborist Report, they will not accomplish their stated purpose unless they are applied to individual trees and a Project Arborist is hired to oversee the construction. The Project Arborist should have the ability to enforce the Protection Measures. The Project Arborist should be hired as soon as possible to assist in design and to become familiar with the project. He must be able to read and understand the project drawings and interpret the specifications. He should also have the ability to cooperate with the contractor, incorporating the contractor's ideas on how to accomplish the protection measures, wherever possible. It is advisable for the Project Arborist to be present at the Pre-Bid tour of the site, to answer questions the contractors may have about Tree Protection Measures. This also lets the contractors know how important tree preservation is to the developer.

Root Protection Zone (RPZ): Since in most construction projects it is not possible to protect the entire root zone of a tree, a Root Protection Zone is established for each tree to be preserved. The minimum Root Protection Zone is the area underneath the tree's canopy (out to the dripline, or edge of the canopy), plus 10'. The Project Arborist must approve work within the RPZ.

Irrigate, Fertilize, Mulch: Prior to grading on the site near any tree, the area within the Tree Protection fence should be fertilized with 4 pounds of nitrogen per 1000 square feet, and the fertilizer irrigated in. The irrigation should percolate at least 24 inches into the soil. This should be done no less than 2 weeks prior to grading or other root disturbing activities. After irrigating, cover the RPZ with at least 12" of leaf and twig mulch. Such mulch can be obtained from chipping or grinding the limbs of any trees removed on the site. Acceptable mulches can be obtained from nurseries or other commercial sources. Fibrous or shredded redwood or cedar bark mulch shall not be used anywhere on site.

Fence: Fence around the Root Protection Zone and restrict activity therein to prevent soil compaction by vehicles, foot traffic or material storage. The fenced area shall be off limits to all construction equipment, unless there is express written notification provided by the Project Arborist, and impacts are discussed and mitigated prior to work commencing.

No storage or cleaning of equipment or materials, or parking of any equipment can take place within the fenced off area, known as the RPZ.

The fence should be highly visible, and stout enough to keep vehicles and other equipment out. I recommend the fence be made of orange plastic protective fencing, kept in place by t-posts set no farther apart than 6'.

In areas of intense impact, a 6' chain link fence is preferred.

In areas with many trees, the RPZ can be fenced as one unit, rather than separately for each tree.

Where tree trunks are within 3' of the construction area, place 2" by 4" boards vertically against the tree trunks, even if fenced off. Hold the boards in place with wire. Do not nail them directly to the tree. The purpose of the boards is to protect the trunk, should any equipment stray into the RPZ.

Elevate Foliage: Where indicated, remove lower foliage from a tree to prevent limb breakage by equipment. Low foliage can usually be removed without harming the tree, unless more than 25% of the foliage is removed. Branches need to be removed at the anatomically correct location in order to prevent decay organisms from entering the trunk. For this reason, a contractor who is an ISA Certified Arborist should perform all pruning on protected trees.[2]

Expose and Cut Roots: Breaking roots with a backhoe, or crushing them with a grader, causes significant injury, which may subject the roots to decay. Ripping roots may cause them to splinter toward the base of the tree, creating much more injury than a clean cut would make. At any location where the root zone of a tree will be impacted by a trench or a cut (including a cut required for a fill and compaction), the roots shall be exposed with either a backhoe digging radially to the trunk, by hand digging, or by a hydraulic air spade, and then cut cleanly with a sharp instrument, such as chainsaw with a carbide chain. Once the roots are severed, the area behind the cut should be moistened and mulched. A root protection fence should also be erected to protect the remaining roots, if it is not already in place. Further grading or backhoe work required outside the established RPZ can then continue without further protection measures.

Protect Roots in Deeper Trenches: The location of utilities on the site can be very detrimental to trees. Design the project to use as few trenches as possible, and to keep them away from the major trees to be protected. Wherever possible, in areas where trenches will be very deep, consider boring under the roots of the trees, rather than digging the trench through the roots. This technique can be quite useful for utility trenches and pipelines.

Protect Roots in Small Trenches: After all construction is complete on a site, it is not unusual for the landscape contractor to come in and sever a large number of "preserved" roots during the installation of irrigation systems. The Project Arborist must therefore approve the landscape and irrigation plans. The irrigation system needs to be designed so the main lines are located outside the root zone of major trees, and the secondary lines are either laid on the surface (drip systems), or carefully dug with a hydraulic or air spade, and the flexible pipe fed underneath the major roots.

Design the irrigation system so it can slowly apply water (no more than ¼" to ½" of water per hour) over a longer period of time. This allows deep soaking of root zones. The system also needs to accommodate infrequent irrigation settings of once or twice a month, rather than several times a week.

Monitoring Tree Health During and After Construction: The Project Arborist should visit the site at least twice a month during construction to be certain the tree protection measures are being followed, to monitor the health of impacted trees, and make recommendations as to irrigation or other needs. After construction is complete, the arborist should monitor the site monthly for one year and make recommendations for care where needed.

Chemical Treatments: The owner or developer shall be responsible to contact an arborist with a pesticide applicators license to arrange for an application of a root enhancing hormone, such as Paclobutrazol, to mitigate the stress produced by the development **prior to grading**. Additionally, at the discretion of the project arborist, an insect infestation preventative for both boring insects and leaf feeding insects and/or fungal preventative for leaf surfaces may be required. Roots pruned during the course of performing a cut may be required to be treated with a biofungicide such as Bio-Tam.

[2] International Society of Arboriculture (ISA), maintains a program of Certifying individuals. Each Certified Arborist has a number and must maintain continuing education credits to remain Certified.

RESOLUTION NO. 22-107

AMENDING THE SIERRA VISTA SPECIFIC PLAN

WHEREAS, a proposal has been submitted to amend the Special Area (SA) overlay description of the Commercial Mixed Use (CMU) zone applicable to Parcels KT-40A, KT-40B, and KT-40C of the Sierra Vista Specific Plan, as shown in Exhibit B, attached and incorporated herein by reference; and

WHEREAS, the land use map and exhibits in the Sierra Vista Specific Plan will be amended to reflect the subdivision of the site, as shown in Exhibit B, attached and incorporated herein by reference; and

WHEREAS, on March 24, 2022, the Planning Commission held a public hearing on the proposed amendments to the Sierra Vista Specific Plan and unanimously recommended that the City Council approve the proposed Specific Plan Amendment; and

WHEREAS, the Specific Plan Amendment as proposed and revised is consistent with the adopted City of Roseville General Plan; and

WHEREAS, on April 20, 2022, the City Council held a public hearing at which time the proposed amendments were considered; and

WHEREAS, on April 20, 2022, the City Council considered the 7th Addendum to the Sierra Vista Specific Plan Environmental Impact Report (EIR) (SCH #2008032115, certified May 5, 2010); and

WHEREAS, the Council of the City of Roseville has reviewed the findings of the Planning Commission recommending approval of the Specific Plan Amendment, and makes the following findings:

The Specific Plan Amendment is consistent with the objectives, policies, general land uses and programs specified in the City of Roseville General Plan and the Sierra Vista Specific Plan;

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Roseville that the proposed changes to the Sierra Vista Specific Plan are adopted as set forth in the attached Exhibit B.

PASSED AND ADOPTED by the Council of the City of Roseville this_____day of _____, 20___, by the following vote on roll call:

AYES COUNCILMEMBERS:

NOES COUNCILMEMBERS:

ABSENT COUNCILMEMBERS:

_____
MAYOR

ATTEST:

Community Commercial (CC) – Mixed Use

FAR & Density:	Commercial/Office: Up to 3.0 FAR Residential: 13.0 dwelling units per acre and higher
Applied Zoning Districts:	CMU/SA – Commercial Mixed Use/Special Area overlay
Description:	Sites with a Community Commercial (CC) – Mixed Use designation are intended to develop as mixed-use centers that allow for a combination of commercial, office, and residential uses. To foster this type of development pattern, these sites have a Commercial Mixed Use (CMU) zoning district, which is combined with a Special Area (SA) overlay. These sites are intended to promote a variety of commercial use types and the flexible citing of other uses that are typically considered to be compatible with commercial development. The permitted uses on these parcels could be mixed in either a horizontal or vertical manner. This means that a commercial/office component could be co-located on the same site with a residential component, or that a commercial/office component could be located on the ground floor of a multi-story residential component. This allows flexibility for future market conditions while maintaining sites for local neighborhood services. At full buildout of the Plan Area, these CMU parcels can accommodate approximately 366,000 sq. ft. of commercial/office uses (assuming FAR of 0.4 for the portion of each site assumed to be non-residential) and 249 residential units. The development allocation is assumed to be 60% commercial/office and 40% high-density residential. While the intent is that each CMU site develops with a mixture of uses, it could develop solely as a commercial use, or with a different mixture of commercial/residential uses, provided some non-residential use is provided. Therefore, the final development plan for each site may ultimately deviate from the square footage/ dwelling unit assumptions listed in Table 4-2. See Figure B-23 for an illustrative concept plan. Parcel KT-40A is designated for 209 multi-family residential units and Parcels KT-40B and KT-40C are designated for commercial uses. See Table 4-3 below for a list of permitted uses for Parcels KT-40B and KT-40C.
Permitted Uses & Development Standards	As specified in the City of Roseville Zoning Ordinance.

ORDINANCE NO.

ADOPTING A FIRST AMENDMENT OF THE DEVELOPMENT AGREEMENT BY AND BETWEEN THE CITY OF ROSEVILLE AND KV SIERRA VISTA, LLC ("BAYBROOK") RELATIVE TO THE SIERRA VISTA SPECIFIC PLAN AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. In accordance with Chapter 19.84 of Title 19 of the Roseville Municipal Code (the Zoning Ordinance) of the City of Roseville, the City Council has received the recommendation of the Planning Commission that the City of Roseville enter into a First Amendment of the Development Agreement by and between the City of Roseville and KV Sierra Vista, LLC pertaining to property located within the Sierra Vista Specific Plan area.

SECTION 2. Prior to considering the proposed First Amendment to Development Agreement, the City Council considered the 7th Addendum to the Sierra Vista Specific Plan Environmental Impact Report (EIR) (SCH #2008032115, certified May 5, 2010), pursuant to the California Environmental Quality Act, California Public Resources Code Section 21000 *et seq.*

SECTION 3. The Council of the City of Roseville has reviewed the findings of the Planning Commission recommending approval of the Second Amendment to Development Agreement, and makes the following findings:

1. The First Amendment to the Development Agreement is consistent with the objectives, policies, programs and land use designations of the City of Roseville General Plan and the Sierra Vista Specific Plan;

2. The First Amendment to the Development Agreement is consistent with the City of Roseville Zoning Ordinance;

3. The First Amendment to the Development Agreement is in conformance with the public health, safety and welfare;

4. The First Amendment to the Development Agreement will not adversely affect the orderly development of the property or the preservation of property values; and

5. The provisions of the First Amendment to the Development Agreement will provide sufficient benefit to the City to justify entering into said Amendment.

SECTION 4. The First Amendment to Development Agreement, by and between the City of Roseville and KV Sierra Vista, LLC, a copy of which is on file in the City Clerk's Department and incorporated herein by reference, is hereby approved and the City Manager is authorized to execute it on behalf of the City of Roseville.

SECTION 5. The City Clerk is directed to record the executed Development Agreement Amendment within ten (10) days of the execution of the agreement by the City Manager with the County Recorder's Office of the County of Placer.

SECTION 6. This ordinance shall be effective at the expiration of thirty (30) days from the date of its adoption.

SECTION 7. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

FIRST AMENDMENT OF DEVELOPMENT AGREEMENT BY AND BETWEEN THE CITY OF ROSEVILLE AND KV SIERRA VISTA, LLC RELATIVE TO THE SIERRA VISTA SPECIFIC PLAN

This First Amendment of Development Agreement is entered into this ____ day of _____, 2022, by and between the CITY OF ROSEVILLE, a municipal corporation ("City"), and KV SIERRA VISTA, LLC, a California limited liability company ("KV Sierra Vista") pursuant to Sections 65864 through 65869.5 of the Government Code of California.

RECITALS

A. Baybrook Limited Partnership, a Delaware limited partnership ("Baybrook Limited Partnership") and City entered into a Development Agreement (the "Development Agreement") which was approved by the City Council of City on May 19, 2010, and recorded on June 18, 2010, in the Official Records of Placer County as Document No. 2010-0045904-00.

B. Baybrook Limited Partnership and City entered into the Development Agreement relative to development within a portion of the Sierra Vista Specific Plan Area, as such is more precisely defined in Exhibits "A" and "B" of the Development Agreement (the "Property"). Except as otherwise defined herein, all capitalized terms used herein shall have the meanings ascribed thereto in the Development Agreement.

C. Baybrook Limited Partnership assigned its interest in the Original Development Agreement to Baseline 80 Investors LLC, a California limited liability company ("Baseline 80 Investors"), pursuant to that certain Assignment and Assumption Agreement Relative to the Development Agreement dated as of May 18, 2013, and

recorded June 12, 2013, as Document No. 2013-0057588-00, in the Official Records of Placer County, California.

D. Baseline 80 Investors assigned its interest in the Development Agreement to Baseline P&R, LLC,, a California limited liability company ("Baseline P&R"), pursuant to that certain Assignment and Assumption Agreement Relative to the Development Agreement dated as of June 24, 2015, and recorded June 24, 2015, as Document No. 2015-0053570-00, in the Official Records of Placer County, California.

E. Baseline P&R assigned its interest in the Development Agreement to KV Sierra Vista, pursuant to that certain Assignment and Assumption Agreement Relative to the Development Agreement dated as of June 24, 2015, and recorded June 24, 2015, as Document No. 2015-0053571-00, in the Official Records of Placer County, California.

F. This First Amendment to the Development Agreement (the "First Amendment") affects certain portions of the Property (the "First Amendment Property"), as described in Exhibit "A" attached to this First Amendment and shall run with the land described in Exhibit "A" hereto. KV Sierra Vista and City intend for this First Amendment to document certain unit transfers within the Plan Area..

G. This First Amendment is authorized by Section 1.4 of the Development Agreement.

NOW THEREFORE, THE PARTIES MUTUALLY AGREE AS FOLLOWS:

1. AMENDMENT OF DEVELOPMENT AGREEMENT.

a. The Property set forth in Recital B of the Development Agreement for the First Amendment Property is hereby revised as follows:

The subject of this Agreement is the development of those certain parcels of land, consisting of approximately 40.13± acres as described in Exhibit "A" and shown on Exhibit "B" (hereinafter the "Property"), attached hereto, which constitutes a portion of the larger area comprising 1,626± acres commonly referred to the Sierra Vista Specific Plan area ("Specific Plan", "SVSP" or "Plan Area" or the "Project").

b. The land use designations, approximate acreages, and unit counts in Section 2.2 of the Development Agreement for the First Amendment Property are hereby revised as follows:

Low Density Residential	62 units on 12.4 Net Acres;

Park	39.9 Net Acres;
Open Space (paseo)	17.9 Net Acres;
Schools	0.3 Net Acres;
Right of Way	4.1 Net Acres.

2. CONSISTENCY WITH GENERAL PLAN. The City Council has found and determined that this First Amendment of the Development Agreement is consistent with the General Plan and the Sierra Vista Specific Plan.

3. AMENDMENT LIMITED TO FIRST AMENDMENT PROPERTY. This First Amendment is limited to and applies only to development of the First Amendment Property and does not affect or apply in any manner with respect to the development of any other property within the Sierra Vista Specific Plan Area, including without limitation, any other portion of the Property.

4. AMENDMENT. This First Amendment amends, but does not replace or supersede, the Development Agreement, except as specified herein. As amended hereby with respect to the First Amendment Property, the Development Agreement remains in full force and effect.

5. FORM OF AMENDMENT. This First Amendment is executed in two duplicate originals, each of which is deemed to be an original.

[Remainder of Page Intentionally Blank; Signatures Follow on Next Page]

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this First Amendment in duplicate by its City Manager and attested to by its City Clerk under the authority of Ordinance No. _____, adopted by the Council of the City of Roseville on the 5th day of April, 2022.

ADOPTING A SECOND AMENDMENT OF THE DEVELOPMENT AGREEMENT BY AND BETWEEN THE CITY OF ROSEVILLE AND KV SIERRA VISTA, LLC ("BASELINE P&R") RELATIVE TO THE SIERRA VISTA SPECIFIC PLAN AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. In accordance with Chapter 19.84 of Title 19 of the Roseville Municipal Code (the Zoning Ordinance) of the City of Roseville, the City Council has received the recommendation of the Planning Commission that the City of Roseville enter into a Second Amendment of the Development Agreement by and between the City of Roseville and KV Sierra Vista, LLC pertaining to property located within the Sierra Vista Specific Plan area.

SECTION 2. Prior to considering the proposed Second Amendment to Development Agreement, the City Council considered the 7th Addendum to the Sierra Vista Specific Plan Environmental Impact Report (EIR) (SCH #2008032115, certified May 5, 2010), pursuant to the California Environmental Quality Act, California Public Resources Code Section 21000 *et seq.*

SECTION 3. The Council of the City of Roseville has reviewed the findings of the Planning Commission recommending approval of the Second Amendment to Development Agreement, and makes the following findings:

1. The Second Amendment to the Development Agreement is consistent with the objectives, policies, programs and land use designations of the City of Roseville General Plan and the Sierra Vista Specific Plan;

2. The Second Amendment to the Development Agreement is consistent with the City of Roseville Zoning Ordinance;

3. The Second Amendment to the Development Agreement is in conformance with the public health, safety and welfare;

4. The Second Amendment to the Development Agreement will not adversely affect the orderly development of the property or the preservation of property values; and

5. The provisions of the Second Amendment to the Development Agreement will provide sufficient benefit to the City to justify entering into said Amendment.

SECTION 4. The Second Amendment to Development Agreement, by and between the City of Roseville and KV Sierra Vista, LLC, a copy of which is on file in the City Clerk's Department and incorporated herein by reference, is hereby approved and the City Manager is authorized to execute it on behalf of the City of Roseville.

SECTION 5. The City Clerk is directed to record the executed Development Agreement Amendment within ten (10) days of the execution of the agreement by the City Manager with the County Recorder's Office of the County of Placer.

SECTION 6. This ordinance shall be effective at the expiration of thirty (30) days from the date of its adoption.

SECTION 7. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

SECOND AMENDMENT OF DEVELOPMENT AGREEMENT BY AND BETWEEN THE CITY OF ROSEVILLE AND KV SIERRA VISTA, LLC RELATIVE TO THE SIERRA VISTA SPECIFIC PLAN

This Second Amendment of Development Agreement is entered into this ____ day of _____, 2022, by and between the CITY OF ROSEVILLE, a municipal corporation ("City"), and KV SIERRA VISTA, LLC., a California limited liability company ("KV Sierra Vista") pursuant to Sections 65864 through 65869.5 of the Government Code of California.

RECITALS

A. Baseline P&R, LLC, a California limited liability company ("Baseline P&R") and City entered into a Development Agreement (the "Development Agreement") which was approved by the City Council of City on May 19, 2010, and recorded on June 18, 2010, in the Official Records of Placer County as Document No. 2010-0045892-00.

B. Baseline P&R and City entered into the Development Agreement relative to development within a portion of the Sierra Vista Specific Plan Area, as such is more precisely defined in Exhibits "A" and "B" of the Development Agreement (the "Property"). Except as otherwise defined herein, all capitalized terms used herein shall have the meanings ascribed thereto in the Development Agreement.

C. Baseline P&R assigned its interest in the Development Agreement to KV Sierra Vista, pursuant to that certain Assignment and Assumption Agreement Relative to the Development Agreement dated as of June 24, 2015, and recorded June 24, 2015, as Document No. 2015-0053571-00, in the Official Records of Placer County, California.

D. Sierra Vista Communities, LLC, a California limited liability company and City entered into a First Amendment to the Development Agreement (the "First Amendment") which affects certain portions of the Property (the "First Amendment Property"), as described in Exhibit "A" and Exhibit "B" attached thereto. The First Amendment was approved by the City Council of City on March 16, 2022 and has not been recorded as of the date of this amendment.

E. This Second Amendment to the Development Agreement (the "Second Amendment") affects certain portions of the Property (the "Second Amendment Property"), as described in Exhibit "A" attached to this Second Amendment and shall run with the land described in Exhibit "A" hereto. KV Sierra Vista and City intend for this Second Amendment to document certain unit transfers within the Plan Area, resolve allocation of fees, and to modify obligations under section 3.17.1.2(i) of the Development Agreement.

F. This Second Amendment is authorized by Section 1.4 of the Development Agreement.

NOW THEREFORE, THE PARTIES MUTUALLY AGREE AS FOLLOWS:

1. AMENDMENT OF DEVELOPMENT AGREEMENT.

a. The subject of this Agreement is the development of those certain parcels of land, consisting of approximately 24.42 acres as described in Exhibit B (hereinafter the "Property"), attached thereto, which constitutes a portion of the larger area comprising 1,626 +/- acres commonly referred to the Sierra Vista Specific Plan area ("Specific Plan", "SVSP" or "Plan Area", or the "Project").

b. The land use designations, approximate acreages, and unit counts in Section 2.2 of the Development Agreement for the Second Amendment Property are hereby revised as follows:

Low Density Residential	620 units on 120.5 Net Acres;
Medium Density Residential	536 units on 59.7 Net Acres;
High Density Residential	150 units on 7.5 Net Acres;
Community Commercial	64.0 acres;
Community Commercial/Commercial Mixed Use	209 units on 24.42 Net Acres;
Community Commercial/Business Professional	12.2 Net acres;
Park	11.8 Net Acres;
Open Space (paseo)	22.2 Net Acres;

Schools	12.0 Net Acres;
Right of Way	47.2 Net Acres.

c. Section 3.17.1.2(i) of the Development Agreement for the Second Amendment Property is hereby amended and revised in its entirety to read as follows:

"(i) For the Second Amendment Property, the previous fee deferral provisions of this subsection are hereby deemed null and void and the only fee deferral eligible to be paid with bond proceeds from future bond sales commencing in the year 31 timeframe shall be fifty percent (50%) of the SPRTA Tier II Traffic Fee pursuant to the terms and conditions of the Tier II Development Fee Deferral Program and one hundred percent (100%) of the City-Wide Park Fee that would otherwise be paid at the time of issuance of building permits for low, medium, and high density residential dwelling units. The amount of the SPRTA Tier II Traffic Fee deferral provided by this Section shall be adjusted as the SPRTA Tier II Traffic Fee may be subsequently adjusted. The amount of the City-Wide Park Fee deferral provided by this Section shall be adjusted as the City-Wide Park Fee may be subsequently adjusted pursuant to Section 3.12.4 of the Development Agreement."

d. Section 4.8.2.1 is added to the Development Agreement for the Second Amendment Property to read as follows:

"4.8.2.1 Infrastructure Fee Allocation. The Second Amendment Property was previously subject to two separate development agreements and assessed two separate fees under the Sierra Vista Specific Plan Fee Program. In the interests of proportionally allocating the fee called for under the Sierra Vista Fee Program, the infrastructure fee shall be allocated as follows:

4.8.2.1.1 Commercial Development. The fee allocated to the commercial development of KT 40B and KT 40C shall be based upon the proportional share of remaining infrastructure obligation determined by acreage and allocated per the following table:

Parcel	Acreage	Percent Allocation
KT 40B	2.77/6.17	45%
KT 40C	3.40/6.17	55%

The remaining infrastructure obligations called for under the Development Agreement multiplied by the above infrastructure fee percentage allocation table equals the parcel infrastructure fee obligation ("Parcel Infrastructure Fee Obligation").

The above fee allocation will be collected at building permit issuance as follows:

1. If the building permit is for total acreage of either KT-40B or KT-40C, City will verify that there is no reduction in density, or calculate shortfall payment amount, as applicable.

2. If the building permit is for a portion of acreage of either parcel KT-40B or KT-40C, City will determine percent of land area applicable to application and apply percentage to Parcel Infrastructure Fee Obligation.

If one or more structures on a single parcel have more than one building permit, the City may request Parcel Infrastructure Fee Obligation for the entire parcel with the first building permit within such parcel. At the City's discretion, the Parcel Infrastructure Fee Obligation could be allocated proportionally to all planned buildings on a parcel pro rata by building square footage to each building as compared to the building square footage from all buildings on a parcel.

Landowner may transfer fee credits, as available and as directed by the Constructing Owner (as defined by Exhibit JJ hereto), to reduce the amount of fees payable.

4.8.2.1.1 Residential Development. The total fee allocated to the residential development on KT-40A, KT-40B, and KT-40C shall be paid proportionally across the first 163 building permits issued.

2. CONSISTENCY WITH GENERAL PLAN. The City Council has found and determined that this Second Amendment of the Development Agreement is consistent with the General Plan and the Sierra Vista Specific Plan.

3. AMENDMENT LIMITED TO SECOND AMENDMENT PROPERTY. This Second Amendment is limited to and applies only to development of the Second Amendment Property and does not affect or apply in any manner with respect to the development of any other property within the Sierra Vista Specific Plan Area, including without limitation, any other portion of the Property.

4. AMENDMENT. This Second Amendment amends, but does not replace or supersede, the Development Agreement, except as specified herein. As amended hereby with respect to the Second Amendment Property, the Development Agreement remains in full force and effect.

5. FORM OF AMENDMENT. This Second Amendment is executed in two duplicate originals, each of which is deemed to be an original.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Second Amendment in duplicate by its City Manager and attested to by its City Clerk under the authority of Ordinance No. _____, adopted by the Council of the City of Roseville on the 7th day of April, 2022.

Legal Description for
Sierra Vista Development Agreement
Baseline P&R, LLC

All that real property situated within a portion of Section 34 and 35, Township 11 North, Range 5 East, Mount Diablo Meridian, City of Roseville, County of Placer, State of California and further described as follows:

APN 499-010-014 and 499-010-058

Being a portion of the Lands of Baseline P & R, LLC as described in the Grant Deed recorded as Document #2001-0117909 and a portion of the Lands of Baseline 80 Investors, LLC as described in the Grant Deed recorded as Document #2013-0047229, of Official Records, Placer County Records, and located in the City of Roseville, County of Placer, State of California, more particularly described as follows:

BEGINNING at a point which is the southwest corner of said Lands of Baseline P & R, LLC, said southwest corner being the southeast corner of said Lands of Baseline 80 Investors, LLC, said corner also being a point on the northerly line as described in the Deed recorded in Book 55, at Page 641, said County Records; thence leaving said POINT OF BEGINNING, along the south line of said Lands of Baseline 80 Investors, LLC, said south line also being said northerly line of last said Deed, said south line also being 30.00 feet northerly of and parallel with the south line of Section 34, Township 11 North, Range 5 East, M.D.B. & M., South 89° 30' 37" West, a distance of 206.88 feet; thence leaving said south line, entering into and crossing last said Lands, the following six (6) courses and distances:

1. North 00° 38' 36" West a distance of 1190.34 feet;
2. South 72° 13' 16" East, a distance of 60.42 feet;
3. South 84° 17' 15" East, a distance of 32.90 feet;
4. South 26° 11' 00" East, a distance of 65.03 feet;
5. North 89° 39' 56" East, a distance of 59.57 feet;
6. North 87° 15' 49" East, a distance of 33.89 feet to a point on the east line of last said Lands, said east line also being the west line of said Lands of Baseline P & R, LLC;

Thence leaving said west line, entering into and crossing said Lands of Baseline P & R, LLC, the following nine (9) courses and distances:

1. North 87° 15' 49" East, a distance of 121.07 feet;
2. South 73° 56' 55" East, a distance of 69.64 feet;
3. South 66° 12' 56" East, a distance of 111.62 feet;
4. South 53° 39' 22" East, a distance of 193.94 feet;
5. South 35° 59' 17" East, a distance of 111.83 feet;
6. South 29° 12' 09" East, a distance of 147.49 feet;
7. South 49° 30' 58" East a distance of 67.92 feet;
8. South 55° 47' 35" East, a distance of 223.87 feet;
9. South 36° 36' 24" East, a distance of 45.55 feet to a point on the west line of the Lands of

Baseline P & R, LLC as described in the Resolution To Approve A Minor Boundary Line Adjustment recorded as Document #2008-0020215, said County Records, said west line also being the common section line for said Section 34 and Section 35, Township 11 North, Range 5 East, M.D.B.& M.

Thence leaving said west line, entering into and crossing last said Lands, the following four (4) courses and distances:

1. South 36° 36' 24" East, a distance of 111.50 feet;
2. South 36° 14' 35" East, a distance of 275.76 feet;
3. South 09° 07' 22" East, a distance of 18.39 feet;
4. South 00° 11' 16" East, a distance of 171.92 feet to a point on the south line of last said Lands, said south line also being the northerly line of said Deed recorded in Book 55, at Page 641;

Thence along said south line, said south line also being said northerly line of last said Deed, said south line being 30.00 feet northerly of and parallel with the south line of Section 35, Township 11 North, Range 5 East, M.D.B.& M., South 89° 29' 55" West, a distance of 227.35 feet to a point on said common section line; thence continuing along a line being 30.00 feet northerly of and parallel with said south line of said Section 34, South 89° 30' 37" West, a distance of 845.69 feet to the POINT OF BEGINNING. Said land being described under Resultant Parcel 2 in that certain Lot Line Adjustment Certificate of Compliance, recorded February 18, 2014, Series No. 2014-0010531, Official Records and rerecorded April 21, 2014, Series No. 2014-0024961, Official Records.

Containing 24.42 acres of land, more or less.

See Exhibit "B", Plat to accompany description, attached hereto and made a part hereof.

Title:	Amoruso Ranch Specific Plan Environmental Impact Report Addendum, General Plan Amendments, Specific Plan Amendments, Rezone, and Development Agreement Amendments
Contact:	Shelby Maples 916-746-1347 smaples@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 10.3.

RECOMMENDATION TO COUNCIL

At the March 24, 2022 Planning Commission hearing, the Planning Commission recommended the City Council take the following actions on the project:

1. Consider the Addendum to the Amoruso Ranch Specific Plan Environmental Impact Report;
2. Adopt a resolution approving the land use amendments to the General Plan;
3. Adopt a resolution approving text and land use amendments to the Amoruso Ranch Specific Plan;
4. Adopt the two (2) findings of fact and introduce for first reading an ordinance adopting the Rezone;
5. Adopt the five (5) findings of fact and introduce for first reading an ordinance approving the Second Amendment of the Development Agreement by and between the City of Roseville, Brookfield Sunset, LLC, and Jennifer M. Amoruso, Successor Trustee of the Amoruso Family Living Trust Dated March 14, 2005 relative to the Amoruso Ranch Specific Plan (525.7 acres); and
6. Adopt the five (5) findings of fact and introduce for first reading an ordinance approving the Second Amendment of the Development Agreement by and between the City of Roseville, Brookfield Sunset, LLC, and Jennifer M. Amoruso, Successor Trustee of the Amoruso Family Living Trust Dated March 14, 2005 relative to the Amoruso Ranch Specific Plan (148.7 acres).

BACKGROUND

The Amoruso Ranch Specific Plan (ARSP) was approved by City Council in June 2016 to support the development of approximately 696 acres in the northwestern portion of the City, including 2,827 residential units, 51 acres of commercial, 17 acres of public/quasi-public, 22 acres of parks, 145 acres of open space, and 20 acres of urban reserve. An Environmental Impact Report (EIR) (SCH# 2013102057) was certified at the time of Specific Plan adoption. Annexation of the ARSP area into the City of Roseville was approved by the Placer County Local Agency

Formation Commission (LAFCO) on December 18, 2018.

An initial Tentative Large Lot Map which reflected the ARSP land use parcels was approved by the Planning Commission on January 10, 2019. However, during the coordination with the U.S. Army Corps of Engineers (USACE) for federal Clean Water Act (CWA) Section 404 permitting, the USACE required additional avoidance of wetland features that necessitated a modification of the land use plan. A General Plan Amendment (GPA), Specific Plan Amendment (SPA), Rezone (RZ), two Development Agreement Amendments (DAA), and Tentative Large Lot Map Modification application (File #PL19-0312) was reviewed by the Planning Commission on February 27, 2020 and approved by City Council on April 1, 2020. No changes were made to the overall acreage of the ARSP or to the number of housing units.

The proposed project includes a General Plan Amendment, (GPA), Specific Plan Amendment (SPA), Rezone, Development Agreement Amendments (DAA) to change the land use designations of Parcels AR-21, AR-25, AR-32, and AR-37 from Low Density Residential (LDR) to Medium Density Residential (MDR) and reallocate units throughout the Specific Plan. Each entitlement is discussed in more detail below. Entitlements for a Large Lot Tentative Subdivision Map Modification, Small Lot Tentative Subdivision Map, and a Design Review for Residential Subdivisions (DRRS) to align the large lot parcels with the modified land uses and subdivide 17 large lot parcels into 481 single-family residential parcels, 14 open space parcels, three (3) park parcels, one (1) public/quasi-public parcel for city utilities, as well as landscape and right-of-way parcels, were approved by the Planning Commission on March 24, 2022. The Planning Commission also forwarded a recommendation of approval to the City Council for the GPA, SPA, Rezone, and DAAs.

Project Description

The proposed project includes the following entitlements:

General Plan Amendment (GPA) – The project includes a GPA to make minor adjustments to the acreage of large lot parcels, as well as modify the density of large lot parcels AR-21, AR-25, AR-32, and AR-37 from Low Density Residential (LDR) to Medium Density Residential (MDR). These adjustments provide for a greater variety in housing types and require minor revisions to the General Plan and Specific Plan land use designations.

Specific Plan Amendment (SPA) – The project includes an Amendment to the ARSP, which includes the reallocation of units throughout the Specific Plan area, and modifying the land use for large lot parcels AR-21, AR-25, AR-32, and AR-37 from LDR to MDR. The overall unit count in the ARSP will remain the same, with 2,827 units for the overall plan and 1,334 units for Phase A1. Other modifications to the ARSP include updates to language regarding open space preserve management, consistent with the approved federal permits; as well as updates to maps, acreage calculations, and text throughout the ARSP to reflect project changes.

Rezone – All of the affected residential parcels have a zoning designation of RS/DS, which will remain unchanged. The Rezone is requested to adjust the acreages of zoning designations to be consistent with the proposed acreage adjustments of the large and small lot maps.

Development Agreement Amendments (DAA) – The project includes a second amendment to the ARSP Development Agreements to reflect the project modifications, as well as to update construction timing and responsibilities for a production well within the plan area.

Summary Evaluation

As described above and in the Planning Commission staff report, the project involves the reconfiguration of parcels and unit transfers among several large lot parcels within the ARSP area. The amendments will not change the overall number of residential units within the ARSP. The General Plan land use map and associated table will be updated to reflect the land use changes. Text, table, and figures of the ARSP document will be updated to reflect the land use changes and unit transfers. Additional amendments to the Specific Plan include updating the open space management discussion to reflect the completed federal permitting processes, as well as updates to the utilities and public facilities plans to show that the project will reduce water and sewer demand beyond what was previously anticipated. The proposed project was found to be substantially consistent with the General Plan and ARSP goals and policies.

The project also includes the second amendment of the two (2) Development Agreements within the ARSP. The DAs will be amended to reflect the project modifications, as well as to update the construction timing for a production well within the plan area. At present, the DA obligation requires that the production well be operational at occupancy of the 250th residential permit. The change would modify the timing from the 250th to the 1,250th building permit, allowing more flexibility in the timing. The modification also includes language to allow flexibility in the pipe sizing, to be determined by the Environmental Utilities Director. Finally, an amendment to section 3.8.8 adds language to ensure that building permits may move forward for the project even if the amendment of the service area boundaries is not yet complete. The Planning Commission found the proposed DAAs to be consistent with the General Plan, ARSP, and the Zoning Ordinance. The DAAs are in conformance with the public health, safety, and welfare, and will not affect the orderly development of the property or the preservation of property values.

Public Outreach

Early notification of the project was provided to the Roseville Coalition of Neighborhood Association (RCONA) board. A notice of the Planning Commission hearing was sent to neighbors and property owners within 300 feet of the project parcels, as well as published in the newspaper and online. One comment was received from an adjacent neighbor to the west of the Specific Plan, inquiring about changes to the drainage plan for the project. She noted that extensive work had been done with the original Specific Plan evaluation to ensure that no negative flooding impacts would occur to her property, and wanted to make sure those impacts had been assessed with the project revisions. Staff spoke to the neighbor and addressed her question during the Planning Commission hearing, explaining that the Master Drainage Study for the project had been revised for the proposed project and that no net increase in peak flows would occur as a result of the development.

Summary of Planning Commission Meeting

The project was heard by the City's Planning Commission on March 24, 2022. The applicant's representative addressed the Commission, spoke in favor of the project, and requested that the Commission take the actions recommended by staff. One individual spoke on the project, questioning the livability of the reduced lot sizes as requested with the Design Review for Residential Subdivisions entitlement. Ultimately, the Planning Commission approved the Large Lot Tentative Subdivision Map Modification, Small Lot Tentative Subdivision Map, and Design Review for Residential Subdivision entitlements, which would allow the modification of the large lot map and subdivision of 17 large lot parcels into 481 single-family residential parcels, 14 open space parcels, three (3) park parcels, one (1) public/quasi-public parcel for city utilities, as well as landscape and right-of-way parcels. Additionally, the Planning Commission recommended that the City Council approve the General Plan Amendment, Specific Plan Amendment, Rezone, and Development Agreement Amendments.

FISCAL IMPACT

The project is not anticipated to result in negative impacts to the City's General Fund.

ENVIRONMENTAL REVIEW

Pursuant to CEQA Guidelines Section 15164, a second Addendum to the Amoruso Ranch Specific Plan Environmental Impact Report (ARSP EIR) (SCH # 2013102057 certified June 15, 2016) has been prepared to address the minor technical changes needed to describe the proposed project. The ARSP EIR Addendum is provided as Exhibit A. The proposed project does not change the area of disturbance beyond what was previously evaluated in the ARSP EIR, and no new or substantially more severe impacts will occur with the development of the proposed project; therefore, no additional analysis is required.

Planning Division Staff Report
Planning Commission Meeting March 24, 2022

Prepared by: Shelby Maples, Associate Planner

ITEM 6.2: General Plan Amendment, Specific Plan Amendment, Rezone, Development Agreement Amendment, Large Lot Tentative Subdivision Map, Small Lot Tentative Subdivision Map, Design Review Permit for Residential Subdivision – 3884 Westbrook Bl. – Amoruso Ranch Specific Plan Amendments – PL21-0184

REQUEST

The project includes a General Plan Amendment and Specific Plan Amendment to the Amoruso Ranch Specific Plan (ARSP) to reallocate units throughout the Specific Plan, and modify the land use on Parcels AR-21, AR-25, AR-32, and AR-37 from Low Density Residential (LDR) to Medium Density Residential (MDR). No changes will be made to the overall unit count for the ARSP. The project proposes minor adjustments to the acreages of large lot parcels, which will require minor revisions to the General Plan and Specific Plan land use designations. The project includes a Rezone to adjust the acreages of zoning designations consistent with the acreage adjustments proposed with the map modifications. Additionally, the project proposes the second Amendment to the two ARSP Development Agreements by and between the City of Roseville and Brookfield Sunset, LLC and Jennifer M. Amoruso to reflect the project modifications, as well as modify language regarding water facility construction requirements and timing. A Large Lot Tentative Subdivision Map Modification is proposed for Phase A1 of the ARSP to align with the revised land use designations, and a Small Lot Tentative Subdivision Map is proposed to create 481 single-family residential lots, 14 open space parcels, three (3) park parcels, one (1) public/quasi-public parcel for city utilities, as well as landscape and right-of-way parcels. A Design Review for Residential Subdivisions (DRRS) is requested to modify development standards for the Small Lot Residential with Development Standards (RS/DS) zone.

Applicant- John Norman, Brookfield Sunset, LLC
Owner – Angela Eisenpress, Amoruso Family Trust

SUMMARY RECOMMENDATION

The Planning Division recommends that the Planning Commission take the following actions:

1. Consider the second Addendum to the Amoruso Ranch Specific Plan Environmental Impact Report
2. Recommend that the City Council approve the General Plan Amendment,
3. Recommend that the City Council approve the Specific Plan Amendment,
4. Recommend that the City Council adopt the two (2) findings of fact and approve the Rezone,
5. Recommend that the City Council adopt the five (5) findings of fact and approve the second amendments to the two (2) Development Agreement Amendments,
6. Adopt the three (3) findings of fact and approve the Large Lot Tentative Subdivision Map subject to five (5) conditions of approval.
7. Adopt the three (3) findings of fact and approve the Small Lot Tentative Subdivision Map subject to eighty-two (82) conditions of approval.
8. Adopt the two (2) findings of fact and approve the Design Review for Residential Subdivisions subject to seven (7) conditions of approval.

SUMMARY OF OUTSTANDING ISSUES

There are no outstanding issues associated with this request. The applicant has reviewed and is in agreement with the recommended conditions of approval.

BACKGROUND

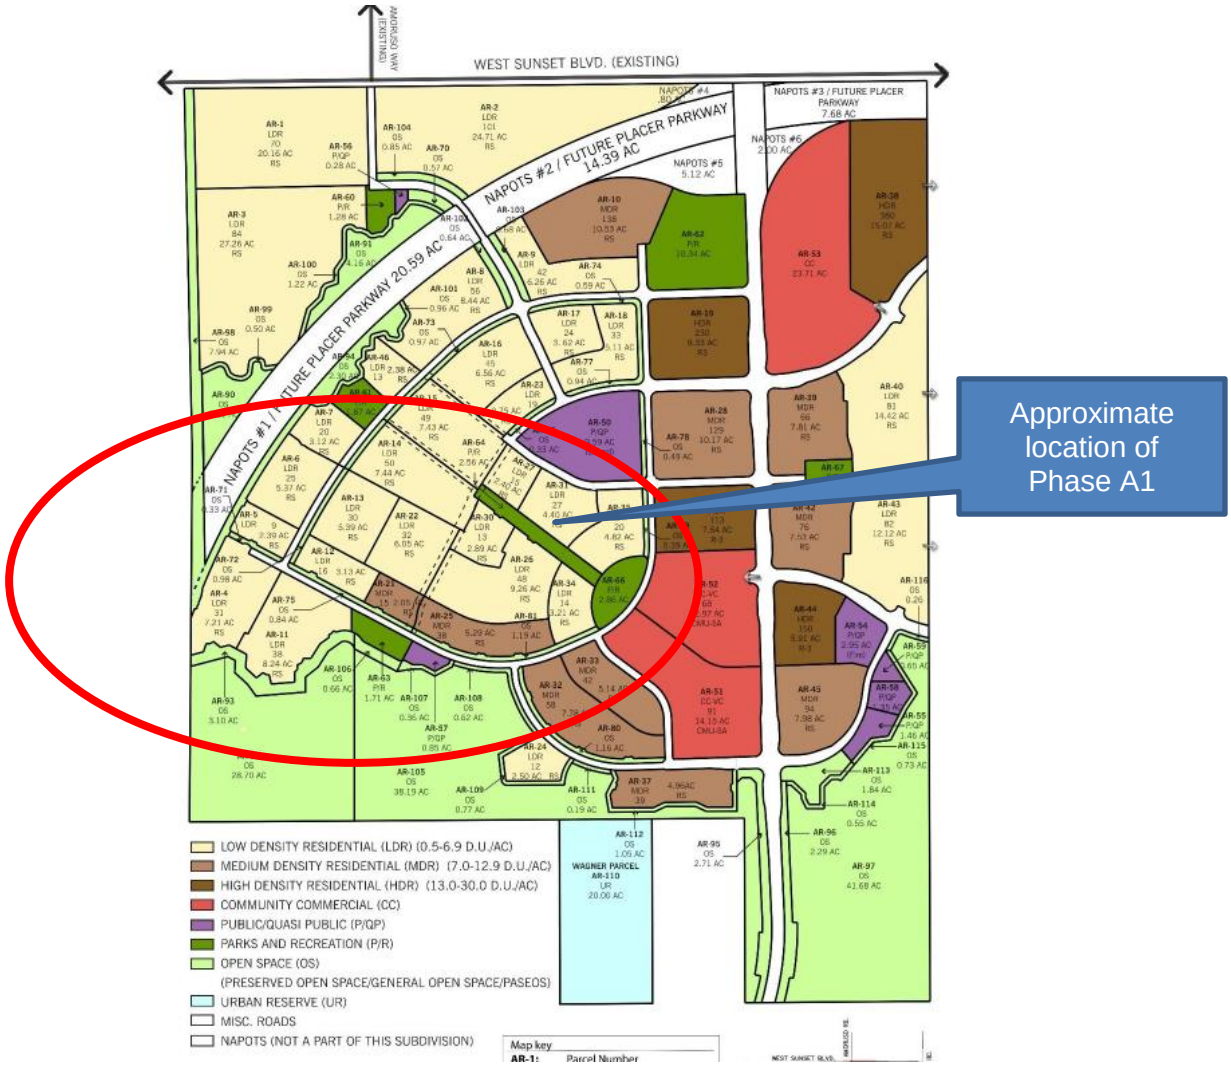
The Amoruso Ranch Specific Plan (ARSP) was approved by City Council in June 2016 to support the development of approximately 696 acres in the northwestern portion of the City, including 2,827

residential units, 51 acres of commercial, 17 acres of public/quasi-public, 22 acres of parks, 145 acres of open space, and 20 acres of urban reserve. An Environmental Impact Report (EIR) (SCH#) was certified at the time of Specific Plan adoption. Annexation of the ARSP area into the City of Roseville was approved by the Placer County Local Agency Formation Commission (LAFCO) on December 18, 2018.

An initial Tentative Large Lot Map which reflected the ARSP land use parcels was approved by the Planning Commission on January 10, 2019. However, during the coordination with the U.S. Army Corps of Engineers (USACE) for federal Clean Water Act (CWA) Section 404 permitting, the USACE required additional avoidance of wetland features that necessitated a modification of the land use plan. A General Plan Amendment (GPA), Specific Plan Amendment (SPA), Rezone (RZ), two Development Agreement Amendments (DAA), and Tentative Large Lot Map Modification application (File #PL19-0312) was reviewed by the Planning Commission on February 27, 2020 and approved by City Council on April 1, 2020. No changes were made to the overall acreage of the ARSP or to the number of housing units.

The proposed project includes a GPA, SPA, RZ, DAA, large and small lot Tentative Subdivision Maps, and a Design Review for Residential Subdivisions (DRRS) to modify the land use plan, as well as subdivide 17 large lot parcels into single-family residential parcels. A more detailed Project Description is provided below.

Figure 1 – Revised Land Use Plan



PROJECT DESCRIPTION

General Plan Amendment (GPA) – The project includes a GPA to make minor adjustments to the acreage of large lot parcels, as well as modify the density of large lot parcels AR-21, AR-25, AR-32, and AR-37 from Low Density Residential (LDR) to Medium Density Residential (MDR). These adjustment require minor revisions to the General Plan and Specific Plan land use designations. The GPA exhibit is included in Exhibit B.

Specific Plan Amendment (SPA) – The project includes an Amendment to the ARSP, which includes the reallocation of units throughout the Specific Plan area, and modifying the land use for large lot parcels AR-21, AR-25, AR-32, and AR-37 from LDR to MDR. The overall unit count in the ARSP will remain the same, with 2,827 units for the overall plan and 1,334 units for Phase A1. Other modifications to the ARSP include updates to language regarding open space preserve management, consistent with the approved federal permits; as well as updates to maps, acreage calculations, and text throughout the ARSP to reflect project changes. The SPA exhibit is included in Exhibit B.

Rezone – All of the affected residential parcels have a zoning designation of RS/DS, which will remain unchanged. The Rezone is requested to adjust the acreages of zoning designations to be consistent with the proposed acreage adjustments of the large and small lot maps. The Rezone exhibit is located in Exhibit B.

Development Agreement Amendment (DAA) – The project includes a second amendment to the ARSP Development Agreements to reflect the project modifications, as well as to update construction timing and responsibilities for construction of water facilities. The DAAs are included in Exhibits D and E.

Large Lot Tentative Subdivision Map – The applicant proposes a new Large Lot Tentative Subdivision Map (LLTSM) to align with the revised land use plan. The LLTSM is included as Exhibit F.

Small Lot Tentative Subdivision Map – The project proposes to subdivide approximately 120.04 acres into 481 single-family residential lots, 14 open space parcels, three (3) park parcels, one (1) public/quasi-public parcel for city utilities, as well as landscape and right-of-way parcels. Table 2 of this report provides a summary of the number of parcels per large lot (villages), and the Tentative Subdivision Map is included as Exhibit G.

Design Review for Residential Subdivision (DRRS) – The project proposes a DRRS to allow modified development standards for the RS/DS zone within Phase A1 of the ARSP. These modified development standards will apply to the MDR villages within the phase.

SITE INFORMATION

Location: The ARSP is located along the northwestern edge of the City, adjacent to Placer County land to the north and east (Placer Ranch). The western boundary of the Plan area is adjacent to Placer County and the Al Johnson Wildlife area. The Creekview Specific Plan is located to the south of the ARSP, as shown in Figure 1.

Total Size: 696 acres

Topography and Setting: The ARSP is in early phases of development, with mass grading efforts underway. The site is generally characterized by gently rolling terrain and contains nonnative annual grasslands, some wetlands, and University Creek, which runs east to west through the southwest portion of the Plan area (FEIR, pp. 2-4 to 2-6). Land to the north of the ARSP is in unincorporated Placer County, and is comprised of rural subdivisions with multi-acre parcels and agricultural land (FEIR p. 4.1-2). Land to the south, southwest, and west of the ARSP is located within the City. These areas include the Creekview

Specific Plan, which is primarily slated for residential development; the Al Johnson Wildlife Area; and an approximately 191 acre parcel currently under entitlement review to be considered as a future industrial development, known as Roseville Industrial Park (City File #PL21-0193).

EVALUATION: GENERAL PLAN AMENDMENT, SPECIFIC PLAN AMENDMENT, AND REZONE

The proposed land use (General Plan and ARSP) and zoning designation amendments are shown in Exhibit B. The proposed change pages to the ARSP are provided in Exhibit C.

Proposed amendments to the General Plan and Specific Plan are analyzed for consistency with the goals and policies of the respective plans. The Zoning Ordinance Section 19.86.050 specifies that recommendations for approval or denial of a rezone shall include consideration of the proposed amendment's consistency with:

1. ***The public interest, health, safety, or welfare of the City, and***

2. ***The General Plan and any applicable Specific Plan.***

Land Use and Zoning

The project proposes to reallocate units on 31 large lot parcels within the ARSP, as shown in Table 1 below. The zoning designation for all affected residential parcels is RS/DS, which will remain unchanged with the project. The General Plan and the ARSP will be amended to reflect the proposed reconfiguration of large lots and units. The Rezone is requested to adjust the acreages of zoning designations to be consistent with the proposed parcel adjustments, include modifications to residential, open space, park, and commercial parcels. A total of 83 large lot parcels will be adjusted with the proposed project.

The ARSP allow for residential units to be transferred between lots within the plan area. However, unit transfers which result in a change in land use or result in greater than a 20% difference when compared to the unit allocation established at the time of the original approval shall be evaluated with an amendment to the Specific Plan. In this case, large lot parcels AR-21, AR-25, AR-32, and AR-37 will change the land use from Low Density Residential (LDR) to Medium Density Residential (MDR), and Parcels AR-4, AR-5, AR-6, AR-30, AR-33, AR-34, and AR-39 proposed transfers which exceed 20% of the original number of units. All unit transfers and the percentage change proposed by the project are included in Table 1 below. The overall number of units will remain the same within the ARSP.

Table 1 – Unit Transfers

Parcel	Current Land Use	Proposed Land Use	Current Units	Proposed Units	Difference in Units	% Unit Change
AR-1	LDR	Unchanged	68	70	2	+2.9%
AR-2	LDR	Unchanged	97	101	4	+4.1%
AR-3	LDR	Unchanged	80	84	4	+5.0%
AR-4	LDR	Unchanged	41	31	10	-24.4%
AR-5	LDR	Unchanged	17	10	7	-41.2%
AR-6	LDR	Unchanged	34	25	9	-26.5%

AR-7	LDR	Unchanged	18	19	1	+5.5%
AR-8	LDR	Unchanged	52	56	4	+7.7%
AR-9	LDR	Unchanged	40	42	2	+5.0%
AR-11	LDR	Unchanged	55	38	17	-30.9%
AR-12	LDR	Unchanged	21	16	5	-23.8%
AR-13	LDR	Unchanged	40	30	10	-25.0%
AR-14	LDR	Unchanged	45	50	5	+11.1%
AR-15	LDR	Unchanged	45	49	4	+8.9%
AR-16	LDR	Unchanged	43	45	2	+4.7%
AR-18	LDR	Unchanged	31	33	2	+6.4%
AR-21	LDR	MDR	12	15	3	+25.0%
AR-22	LDR	Unchanged	28	32	4	+14.3%
AR-24	LDR	Unchanged	13	12	1	-7.7%
AR-25	LDR	MDR	28	38	10	+35.7%
AR-26	LDR	Unchanged	55	48	7	-12.7%
AR-30	LDR	Unchanged	23	13	10	-43.5%
AR-32	LDR	MDR	50	58	8	+16.0%
AR-33	MDR	Unchanged	61	42	19	-31.1%
AR-34	LDR	Unchanged	19	14	5	-26.3%
AR-35	LDR	Unchanged	24	20	4	-16.7%
AR-37	LDR	MDR	25	39	14	+56.0%
AR-39	MDR	Unchanged	54	66	12	+22.2%
AR-40	LDR	Unchanged	71	81	10	+14.1%
AR-42	MDR	Unchanged	66	76	10	+15.2%
AR-43	LDR	Unchanged	78	82	4	+5.1%
Total Units			**1,334**	**1,334**		

While changes are occurring on a large number of parcels due to the shifting of lines and redistribution of lots, the proposed modification is minor. The number of units remains the same within the Specific Plan, though the number of medium density lots increases from 542 to 695, and the number of low density lots decreases from 1,252 to 1,099. Acreage adjustments are proposed on 83 large lot parcels throughout the plan, the proposed modifications are consistent with the original intent of the Specific Plan. The proposed modifications have been reviewed by the relevant City Departments, and the project was found to be consistent with the intent of the original plan.

Utilities and Public Facilities

The proposed project includes updates to ARSP Wastewater Master Plan to show that downsizing of sewer lines is appropriate for the revised development. A technical memorandum prepared by Wood Rodgers, Inc. is included as an attachment to Exhibit A (Addendum to the ARSP EIR). In conformance with the adopted sewer study, which was analyzed with the previously certified EIR, the force main for the sewer line will be placed within the future Westbrook Bl. and cross under Pleasant Grove Creek. However, in developing the plans for the proposed large lot tentative map and refining the calculations, it was found that sewer demand is significantly lower than reported in the sewer study. The original demand calculations in the Sewer Study required a Central Pump Station sized for 4.18 mgd (million gallons per day), with 18-inch and 12-inch force mains. The Wood Rodgers Utility Study shows that based on the proposed land use plan, the demands on the pump station will be 2.83 mgd, and dual 12-inch force mains will be sufficient to reliably convey wastewater flows within the velocity criteria specified in the City's current design standards. While some pipe resizing is recommended, the system configuration remains generally the same as the original Wastewater Master Plan, as evaluated the previously certified EIR.

In addition, the project provided an updated Water Demand calculation to accompany the proposed land use modification, as approximately 153 units will change from LDR to MDR lots throughout the Plan area. According to the Water Master Plan evaluated with the previously certified EIR, the average daily demand with 2% gallon per minute (gpm) flow rate for the ARSP totals 931.9 gpm, with an average annual demand with 2% acre feet per year (AFY) of 1,503.2 AFY. Higher density land use categories have lower unit demand factors, so the increase in MDR properties results in a lower average daily demand for water, with 926.1 gpm for the Plan area. The average annual demand rate reduces to 1,493.9 AFY. Therefore, water demand will be reduced beyond what was previously evaluated.

Open Space

The project proposes to update the ARSP to reflect updates to Sections B.2 and B.3, which includes Off-Site Resource Mitigation for wetland resources. Since the time of plan adoption, the ARSP has been approved for a Clean Water Act Section 404 permit and Endangered Species Section 7 incidental take authorization, allowing them to move forward with the development process. The sections are being updated to reflect the completion of those permits. Per the permit approved by the USACE, U.S. Fish and Wildlife Service, Central Valley Regional Water Quality Control Board, and California Department of Fish and Wildlife, off-site mitigation will occur via a payment of fees to the Placer County Authority (PCA). The PCA is responsible for utilizing collected funds to acquire lands within Placer County for the purpose of open space protection and management, to be protected in perpetuity.

EVALUATION: DEVELOPMENT AGREEMENT AMENDMENT

Section 19.84.040 of the City of Roseville Zoning Ordinance specifies that recommendations for approval or denial of a Development Agreement (DA), including Amendments, shall include consideration of the following:

1. ***Consistency with the objectives, policies, general land uses and programs specified in the General Plan and the Amoruso Ranch Specific Plan;***

2. ***Consistency with the provisions of the City of Roseville Zoning Ordinance;***

3. ***Conformity with the public, health, safety, and general welfare;***

4. ***The effect on the orderly development of the property or the preservation of property values; and***

5. ***Whether the provisions of the Agreement shall provide sufficient benefit to the City to justify entering into the Agreement.***

Development Agreements (DA) are binding contracts that set the terms, rules, conditions, regulations, entitlements, obligations, and other provisions relating to the development of the covered properties. The ARSP is subject to two (2) nearly identical DAs, one covering a 525.7 acres of the Specific Plan and one covering a 148.7 acre portion of the Specific Plan. The current project proposes a modification to both DAs.

The proposed DAAs include updates to reflect the proposed project, including acreage adjustments, as well as to modify timing for construction of City facilities within the Plan area. For examples, the original DAs required that City utilities, such as a production well to serve the Plan area, be operational by occupancy of the 250th residential unit. The DAA changes the timing trigger from the 250th to the 1,250th building permit. The modification also includes language to allow flexibility in the pipe sizing, to be determined by the Environmental Utilities Director. Finally, an amendment to section 3.8.8 adds language to ensure that building permits may move forward for the project even if the amendment of the service area boundaries is not yet complete. The Environmental Utilities Department reviewed the project and determined that the proposed amendments were acceptable and consistent with City policy.

In summary, City staff has found the proposed DAAs to be consistent with the General Plan, ARSP, and the Zoning Ordinance. The DAAs are in conformance with the public health, safety, and welfare, and will not adversely affect the orderly development of the property or the preservation of property values. Therefore, the proposed DAA is consistent with items 1-5 above.

EVALUATION: LARGE LOT TENTATIVE SUBDIVISION MAP MODIFICATION

The City of Roseville Subdivision Ordinance (Section 18.06.290) establishes the processes by which an approved Tentative Subdivision Map may be modified. There are two types of modifications established: minor amendments and major amendments. A minor amendment involves changes that are substantially consistent with the intent of the original approval. They are generally limited to changes which make small modifications to parcel shapes and size or other small amendments to the subdivision layout. Any other type of modification is a major modification. Given the number of modifications required to accommodate the reallocation of units within the ARSP, the proposed project is considered a major modification.

Section 18.06.180 of the City of Roseville Subdivision Ordinance requires that three findings be made in order to approve or conditionally approve a Tentative Subdivision Map. The three findings are listed below in ***bold, italic text*** and are followed by an evaluation of the map in relation to each finding.

1. ***The size, design, character, grading, location, orientation, and configuration of lots, roads and all improvements for the tentative subdivision map are consistent with the density, uses, circulation and open space systems, applicable policies and standards of the General Plan and the Community Design Guidelines, and the design standards of Title 18 (Subdivision Ordinance) of the Roseville Municipal Code.***

2. ***The subdivision will result in lots which can be used or built upon. The subdivision will not create lots which are impractical for improvement or use due to: the steepness of terrain or location of watercourses in the area; the size or shape of the lots or inadequate building area; inadequate frontage or access; or, some other physical condition of the area.***

3. ***The design and density of the subdivision will not violate the existing requirements prescribed by the Regional Water Quality Control Board for the discharge of waste into the sewage system, pursuant to Division 7 of the Water Code.***

As proposed, the Large Lot Tentative Subdivision Map (LLTSM) is substantially consistent with the layout approved with the ARSP and subsequent modifications; however, the revised map is required to align with the proposed land use changes. The reconfiguration of the parcels will result in lots which can be used and built upon, and which are practical for improvement based on the existing topography. No conflicts with the General Plan, Subdivision Ordinance, or any wastewater discharge requirements have been identified.

EVALUATION: SMALL LOT TENTATIVE SUBDIVISION MAP

Section 18.06.180 of the City of Roseville Subdivision Ordinance requires that three findings be made in order to approve or conditionally approve a Tentative Subdivision Map. The three findings are listed below in ***bold, italic text*** and are followed by an evaluation of the map in relation to each finding.

1. ***The size, design, character, grading, location, orientation, and configuration of lots, roads and all improvements for the tentative subdivision map are consistent with the density, uses, circulation and open space systems, applicable policies and standards of the General Plan and the Community Design Guidelines, and the design standards of Title 18 (Subdivision Ordinance) of the Roseville Municipal Code.***

The proposed project includes a tentative subdivision map for Phase A1 of the ARSP to divide approximately 120.04 acres into 481 single-family residential lots, 14 open space parcels, three (3) park parcels, one public/quasi-public parcel for city utilities, as well as landscape and right-of-way parcels. Table 2 below provides a summary of each village within the proposed subdivision, as well as acreages for the other parcels within the phase. At least two entrance points will be provided into each subdivision, and all single-family lots are oriented with frontage on the public streets. The ARSP includes an open space and paseo system that provides pedestrian connections throughout the various villages within the subdivision. The subdivision layout and street design were reviewed by the City's Engineering Division and the Fire Department to ensure there is adequate street widths for circulation and emergency response.

Figure 2 – Small Lot Tentative Subdivision Map, Phase A1

Table 2 – Tentative Subdivision Map Parcels

Parcel Number	Land Use Designation	Zoning Designation	Dwelling Units	Gross Acreage	Density (du/ac)
Residential Lots					
AR-4	LDR	RS/DS	31	7.21	4.3
AR-5	LDR	RS/DS	10	2.39	4.2
AR-6	LDR	RS/DS	25	5.37	4.7
AR-11	LDR	RS/DS	38	8.24	4.6
AR-12	LDR	RS/DS	16	3.13	5.1
AR-13	LDR	RS/DS	30	5.39	5.6

AR-21	MDR	RS/DS	15	2.05	7.3
AR-22	LDR	RS/DS	32	6.05	5.3
AR-24	LDR	RS/DS	12	2.50	4.8
AR-25	MDR	RS/DS	38	5.29	7.2
AR-26	LDR	RS/DS	48	9.26	5.2
AR-30	LDR	RS/DS	13	2.89	4.5
AR-32	MDR	RS/DS	58	7.78	7.5
AR-33	MDR	RS/DS	42	5.14	8.2
AR-34	LDR	RS/DS	14	3.21	4.4
AR-35	LDR	RS/DS	20	4.82	4.1
AR-37	MDR	RS/DS	39	4.96	7.7
Total			**481 lots**	**85.67 acres**	
Landscape Lots					
"A"	LDR	RS/DS		0.06	
"B"	MDR	RS/DS		0.08	
"C"	MDR	RS/DS		0.10	
Total				**0.24 acres**	
Public/Quasi Public Parcels					
AR-57	P/QP	P/QP		0.85	
Total				**0.85 acres**	
Park Parcels					
AR-63	P/R	P/R		1.71	
AR-64A	P/R	P/R		0.74	
AR-66	P/R	P/R		2.86	
Total				**5.30 acres**	
Open Space Parcels					

AR-71	OS	OS		0.33	
AR-72A	OS	OS		0.64	
AR-75	OS	OS		0.84	
AR-79	OS	OS		0.39	
AR-80	OS	OS		1.16	
AR-81	OS	OS		1.19	
AR-93	OS	OS		3.10	
AR-98B	OS	OS		2.01	
AR-106	OS	OS		0.66	
AR-107	OS	OS		0.36	
AR-108	OS	OS		0.62	
AR-109	OS	OS		0.77	
AR-111	OS	OS		0.19	
AR-112	OS	OS		1.05	
Total				**13.31 acres**	

The Map Act and Subdivision Ordinance do not contain any maximum or minimum lot sizes. Instead, these standards are contained within the Zoning Ordinance and ARSP. All residential parcels included in the tentative subdivision map have a zoning designation of Small Lot Residential with Development Standards (RS/DS) overlay, though 12 of the villages have a Low Density Residential (LDR) land use designation and five (5) of the villages have a Medium Density Residential (MDR) land use designation. A developer may either use the RS/DS development standards established in the ARSP or may adopt adjusted standards through the Design Review Permit for Residential Subdivisions (DRRS) entitlement. It is also noted that pursuant to Zoning Ordinance Section 19.10.045, a DRRS application is required for all single-family housing units on property with the MDR land use designation. The applicant proposes adjusted development standards for the MDR parcels within Phase A1, as discussed in the DRRS Evaluation section of this report. No home designs are evaluated with the current project; however, Condition #3 has been added to the tentative subdivision map requiring approval of a DRRS prior to issuance of any building permits for homes within Parcels AR-21, AR-25, AR-32, AR-33, and AR-37.

LDR Villages AR-4, AR-5, AR-6, AR-11, AR-12, AR-13, AR-22, AR-24, AR-26, AR-30, AR-34, AR-35- The LDR villages within Phase A1 of the ARSP will result in a total of 289 single-family residential lots. As proposed, the LDR villages will conform to the RS/DS standards as provide in the Zoning Ordinance. Proposed densities range from 4.1 to 5.6 dwelling units per acre in the LDR portion of the subdivision.

MDR Villages AR-21, AR-25, AR-32, AR-33, and AR-37- The MDR villages within Phase A1 of the ARSP will result in a total of 192 single-family residential lots. The applicant has proposed modified RS/DS

development standards for the subdivision, which has a typical lot size of approximately 40 feet by 80 feet. All lots conform to the proposed standards, which are further evaluated by the DRRS section of this report.

2. ***The subdivision will result in lots which can be used or built upon. The subdivision will not create lots which are impractical for improvement or use due to: the steepness of terrain or location of watercourses in the area; the size or shape of the lots or inadequate building area; inadequate frontage or access; or, some other physical condition of the area.***

The proposed parcels are of sufficient size and shape to accommodate development that is consistent with the applicable zoning and design requirements. As mentioned above, the lots are consistent with the proposed development standards, or new development standards are proposed. The modified standards are consistent with other development standards that have been approved in adjacent Specific Plan areas. The RS/DS standards have been determined to be of adequate size and shape to support development consistent with the ARSP guidelines. The proposed parcel configurations preserve the location of watercourses and do not create a physical condition that would be impractical for the proposed improvements.

3. ***The design and density of the subdivision will not violate the existing requirements prescribed by the Regional Water Quality Control Board for the discharge of waste into the sewage system, pursuant to Division 7 of the Water Code.***

As part of the adoption for the ARSP, an assessment of wastewater demands was completed for the entire plan area. The proposed subdivision map is consistent with the total number of units anticipated within the Specific Plan, and therefore will not increase planned demands on sewage services. There will be no impacts to the existing requirements established by the Regional Water Quality Control Board.

EVALUATION – DESIGN REVIEW FOR RESIDENTIAL SUBDIVISIONS

Section 19.10.045 of the Zoning Ordinance specifies that a Design Review Permit is required for all compact residential development (attached or detached single-family units on land with a General Plan land use designation of Medium Density Residential or higher) or for any residential projects of any density on a parcel or parcels zoned Small Lot Residential (RS) where modifications to the RS supplemental design standards are requested. Design Review gives staff the opportunity to examine the proposed design to determine compatibility with the surrounding community, and compliance with the intent of the Community Design Guidelines and other applicable design standards. Pursuant to Zoning Ordinance Section 19.78.060, the required findings for a Design Review Permit for a Residential Subdivision (DRRS) are as follows:

1. ***The residential design, including the height, bulk, size, and arrangement of buildings is harmonious with other buildings in the vicinity.***

2. ***The residential design is consistent with the applicable design guidelines.***

The project is subject to the development standards of the City's Zoning Ordinance, Community Design Guidelines (CDG), and the ARSP. The applicant is proposing modified RS/DS development standards to allow for a smaller lot size and reduced setbacks. The proposed standards are included in Exhibit H. No conceptual elevations are proposed at this time, and Condition #3 for the Small Lot Tentative Subdivision Map requires that prior to issuance of building permits, an additional DRRS entitlement is required to evaluate the home designs for the MDR parcels.

The project request includes modified development standards to deviate from the RS/DS standards. Table 3 below provides a comparison to the RS/DS with attached sidewalks development standards that are provided in the Zoning Ordinance.

Table 3: Development Standard Comparison

Development Standard	RS/DS with attached sidewalk (Zoning Ordinance)	Proposed
Lot size – interior	4,500 square feet	3,200 square feet
Lot size – corner	5,500 square feet	4,000 square feet
Lot width – interior	45’	40’
Lot width – corner	55’	50’
Lot depth	--	80’
Lot coverage maximum	None- side and rear yards can be used to meet open space minimum requirements.	None
Building height	35’	30’
Front setback – living area	15’	10’
Front setback – Garage/driveway depth	18’	18’
Front setback – to porch	12.5’	7.5’ (shall not encroach into PUE)
Side yard setback	5’	4’
Side Street yard setback	12.5’ first floor, 15’ second floor	10’
Rear setback	10’, with minimum useable open space of 700 square feet, or 500 square feet where a front porch is provided.	10’

These reduced setbacks will help facilitate the higher density units proposed for the subdivision. Staff is supportive of the setback reductions as it helps provide flexibility and supports a broader range of unit types within the ARSP. Additionally, the setback reductions are consistent with other DRRS approvals within the City, such as in the Sierra Vista Specific Plan area. The architectural design will be evaluated to ensure consistency with the CDG with an additional DRRS, ensuring compliance with City standards.

PUBLIC OUTREACH

The proposed project was distributed to the various agencies and departments which have requested notice of City applications, and all comments were considered and incorporated into the Conditions of Approval, as appropriate. Notice of the application was also distributed to the Roseville Coalition of Neighborhood Associations. No comments were received. A public notice of the Planning Commission hearing was published on March 11, 2022, and was distributed to all property owners within 300 feet of the project site. To date, no comments have been received.

CONCLUSION

As demonstrated by the analyses in the foregoing sections, the proposed Project is consistent with the policies and intent of the General Plan and the ARSP. The project as proposed will not be detrimental to public health or safety, nor will it be detrimental to the public welfare. The findings for all requested entitlements can be made.

ENVIRONMENTAL DETERMINATION

Pursuant to CEQA Guidelines Section 15164, a second Addendum to the Amoruso Ranch Specific Plan Environmental Impact Report (ARSP EIR) (SCH # 2013102057 certified June 15, 2016) has been prepared to address the minor technical changes needed to describe the proposed project. The ARSP EIR Addendum is provided as Exhibit A. The proposed project does not change the area of disturbance beyond what was previously evaluated in the ARSP EIR, and no new or substantially more severe impacts will occur with the development of the proposed project; therefore, no additional analysis is required.

RECOMMENDATION

The Planning Division recommends the Planning Commission take the following actions:

A. Consider the second Addendum to the Amoruso Ranch Specific Plan Environmental Impact Report;

B. Recommend that the City Council approve the General Plan Amendment;

C. Recommend that the City Council approve the Specific Plan Amendment;

D. Recommend that the City Council adopt the two (2) findings of fact and approve the Rezone;

E. Recommend that the City Council adopt the five (5) findings of fact and approve the second amendments to the two (2) Development Agreement Amendments;

F. Adopt the findings of fact as stated in the staff report and approve the **Large Lot Tentative Subdivision Map Modification – 3884 Westbrook Bl. – Amoruso Ranch Specific Plan Amendments– PL21-0184** subject to five (5) conditions of approval;

G. Adopt the findings of fact as stated in the staff report and approve the **Small Lot Tentative Subdivision Map – 3884 Westbrook Bl. – Amoruso Ranch Specific Plan Amendments– PL21-0184** subject to eighty-two (82) conditions of approval; and

H. Adopt the findings of fact as stated in the staff report and approve the **Design Review for Residential Subdivision – 3884 Westbrook Bl. – Amoruso Ranch Specific Plan Amendments– PL21-0184** subject to seven (7) conditions of approval.

CONDITIONS OF APPROVAL FOR LARGE LOT TENTATIVE SUBDIVISION MAP FILE #PL21-0184

1. The Large Lot Tentative Subdivision Map is approved as shown in Exhibit D and as conditioned or modified below. (Planning)

2. The Large Lot Tentative Subdivision Map shall be valid for a period of two (2) years from **March 24, 2022** and shall expire on **March 24, 2024.** Prior to said expiration date, the applicant may apply for an extension of time, provided that the approval shall be extended for no more than five (5) from **March 24, 2022.**

3. The project shall comply with all required environmental mitigation identified in the Amoruso Ranch Specific Plan EIR and MMRP, as modified by File #PL19-0312, and include all applicable mitigation measures as notes on the grading and improvement plans.

4. The map is subject to the previously approved conditions of approval for the ARSP Tentative Large Lot Map (File #PL18-0345 and PL19-0312), except as modified below.

5. The landowner shall pay, as its fair share on a City-wide basis for the update of the City's Long Range Transit Master Plan, Short Range Transit Plan Update, and Bicycle Master Plan Update, the amounts of $4,166, $4,998, and $4,166, respectively, prior to the recordation of any Large Lot Final Map on the property. (Engineering and Alternative Transportation)

CONDITIONS OF APPROVAL FOR SMALL LOT TENTATIVE SUBDIVISION MAP FILE #PL21-0184

1. The project is approved as shown in Exhibit G and as conditioned or modified below. (Planning)

2. The Small Lot Tentative Subdivision Map shall be valid for a period of two (2) years from **March 24, 2022** and shall expire on **March 24, 2024**. Prior to said expiration date, the applicant may apply for an extension of time, provided that the approval shall be extended for no more than five (5) years from **March 24, 2022**.

3. Prior to issuance of building permits for home construction on MDR parcels, the home building shall be required to submit for a Design Review for Residential Subdivision (DRRS) approval to evaluate the proposed architecture. Detailed information (e.g. floor plans, additional architectural styles, materials, and color boards, etc.) shall be provided as part of the DRRS submittal. A separate Sign Permit is required for all project signs. (Planning)

4. The approval of a Tentative Map and/or tentative site plan does not constitute approval of proposed improvements as to size, design, materials, or location, unless specifically addressed in these conditions of approval. The Developer shall submit civil drawings to the Department of Development Services – Engineering Divisions for review and approval. (Engineering)

5. The design and construction of all improvements shall conform to the Design and Construction Standards of the City of Roseville, or as modified by these conditions of approval, or as directed by the City Engineer. (Engineering)

6. The applicant shall not commence with any on-site improvements or improvements within the right-of-way until such time as grading and/or improvement plans have been submitted for review and are approved with grading and/or encroachment permits issued by the Department of Development Services – Engineering Division. (Engineering)

7. The applicant shall pay City's actual costs for providing plan check, mapping, GIS, and inspection services. This may be a combination of staff costs and direct billing for contract professional services. Project billing may occur up to two (2) months after the end of the warranty or the Notice of Termination date for the SWPPP, whichever occurs later. (Engineering, Environmental Utilities, Finance)

8. The project shall comply with all required environmental mitigation identified in the Amoruso Ranch EIR, and shall include all applicable mitigation measures as notes on the grading plans. (All Departments)

PRIOR TO ISSUANCE OF A GRADING PERMIT AND/OR IMPROVEMENT PLANS

9. Landscape Plans for all landscape corridors and all landscaped common areas shall be approved with the improvement plans. Landscaping shall be installed for Substantial Completion of the subdivision improvements. Landscape corridors shall also successfully complete the required establishment period. The landscape plan shall comply with the Amoruso Specific Plan and the City of Roseville Water Efficient Landscape Ordinance. (Planning, Engineering, Parks, Fire, Environmental Utilities)

10. The applicant shall submit to the Engineering Division the appropriate Army Corps of Engineers permit or clearance, the California Department of Fish and Wildlife Stream Bed Alteration Agreement, and/or the Regional Water Quality Control Board Water Quality Certificate. (Planning)

11. The grading and improvement plans shall be designed in accordance with the City's Improvement Standards and Construction Standards and shall reflect the following:

    - Street improvements including, but not limited to, curb, gutter, sidewalk, pavement, drainage systems, traffic striping, signing, medians and markings, etc. along all existing and proposed City streets, as required by Engineering.

    - Grading shall comply with the City grading ordinance. Erosion control devices (sediment traps, ditches, straw bales, etc.) shall be shown on the grading plans. All erosion control shall be installed prior to the onset of wet weather. Erosion control is installed to minimize silt discharge from the project site. It is incumbent upon the applicant to ensure that necessary measures are taken to minimize silt discharge from the site. Therefore, modification of the erosion control plan may be warranted during wet weather conditions.

    - A rough grading permit may be approved by the Engineering Department prior to approval of the improvement plans.

    - Access to the floodplain as required by Engineering and the Streets Department.

    - Standard Accessible ramps shall be installed at all curb returns per City Standards. (Engineering)

12. For all work to be performed off-site, permission to enter and construct shall be obtained from the property owner, in the form of a notarized right-of-entry. Said notarized right-of-entry shall be provided to the Engineering Division prior to approval of any plans. (Engineering)

13. The applicant shall apply for and obtain an encroachment permit from the Engineering Department prior to any work conducted within the City right-of-way. (Engineering)

14. Prior to issuance of building permits, the property owner shall pay into the following fee programs: Citywide Drainage Fee, Citywide Traffic Mitigation Fee (TMF), Highway 65 Joint Partners Association (JPA), South Placer Regional Transportation Authority (SPRTA), and City/County Fee. (Engineering)

15. The applicant shall provide a temporary emergency vehicle access (EVA) as part of Phase 1 (Subphases A1 and A2). The Subphase A1 EVA will consist of a 24' wide paved roadway (min T.I. 5) from Westbrook Blvd./Road A to the northern property line of AR-52, continuing west to Road F. The Phase A1 EVA will be temporary and completely removed prior to the construction of Westbrook Boulevard. The Subphase A2 EVA will provide 2-way paved public access from Westbrook/Road A north to Road C, continuing west on Road C to Road F. See the Amoruso Infrastructure Phasing Plan as part of this entitlement.

16. The applicant shall remove and reconstruct any existing damaged curb, gutter, and sidewalk along the property frontage. During site inspection, Engineering will designate the exact areas to be reconstructed. (Engineering)

17. All Lots/Parcels shall conform to Class 1 drainage, pursuant to the adopted City of Roseville Improvement Standards, except as shown on the tentative map or as approved in these conditions. (Engineering)

18. The following note shall be added to the Grading and/or Improvement Plans:

    To minimize dust/grading impacts during construction the applicant shall:

    (a) *Spray water on all exposed earth surfaces during clearing, grading, earth moving, and other site preparation activities throughout the day.*

    (b) *Use tarpaulins or other affective covers on all stockpiled earth material and on all haul trucks.*

    (c) *Sweep the adjacent streets frontages at least one a day or as needed to remove silt and other dirt which is evident from construction activities.*

    (d) *Ensure that construction vehicles are cleaned prior to leaving the construction site to prevent dust and dirt from being tracked off site.*

    (e) *The City shall have the authority to stop all grading operations, if in the opinion of city staff, inadequate dust control measures are being practiced or excessive wind conditions contribute to fugitive dust emissions. (Engineering)*

19. Prior to the approval of the improvement plans, it will be the project proponent's responsibility to pay the standard City Trench Cut Recovery Fee for any cuts within the City streets that are required for the installation of underground utilities. (Engineering)

20. A note shall be added to the grading plans that states:

    "*Prior to the commencement of grading operations, the contractor shall identify the site where the **excess/borrow** earthen material shall be imported/deposited. If the **borrow/deposit** site is within the City of Roseville, the contractor shall produce a report issued by a geotechnical engineer to verify that the exported materials are suitable for the intended fill, and shall show proof of all approved grading plans. Haul routes to be used shall be specified."* (Engineering)

21. Traffic signals shall be constructed and reimbursed per Section 3.5.7 of the Development Agreement and the approved Amoruso Ranch Infrastructure Phasing Plan. This includes the following signals:

    - Westbrook/Road "A" – install signal infrastructure including conduit, loops, and poles as part of the construction of Phase A1.

22. Landowner shall be responsible for the construction cost of the traffic signals, as shown on Exhibit "I" of the Brookfield Sunset, LLC Development Agreement and described in the Phasing Plan through the payment of the TMF. The developer shall receive fee credits for the completion of the traffic signals as part of the City's TMF Set-Aside Fund. (Engineering)

23. Any backbone improvements not constructed adjacent to (or needed to serve) a proposed subdivision shall be completed by the applicant. (Engineering)

24. The phasing of infrastructure shall be consistent with Amoruso Ranch Infrastructure Phasing Plan, the Amoruso Specific Plan and as defined by the Development Agreement between the City of Roseville and Brookfield Sunset, LLC. (Engineering)

25. Per the Amoruso Specific Plan, pedestrian sidewalks along the open spaces shall be installed at the time of adjacent roadway construction. (Engineering, Alternative Transportation)

26. Per the Amoruso Specific Plan, standard bus shelter turnouts and pads shall be installed with adjoining roadway improvement at the following locations:

    - Northbound Westbrook Boulevard, north of Road A, adjacent to Parcel AR-45 (Shelter #325),
    - Eastbound Road B, east of Westbrook Boulevard, adjacent to Parcel AR-44 (Shelter #326),
    - Westbound Road B, west of Road A, adjacent to AR-43 (Shelter #327),
    - Eastbound Road D, east of Westbrook Boulevard, adjacent to Parcel AR-39 (Shelter #329),
    - Northbound Westbrook Boulevard, north of Road D, adjacent to Parcel AR-53 (Shelter #330),
    - Southbound Westbrook Boulevard, south of Road D, adjacent to Parcel AR-28 (Shelter #331), and
    - Southbound Westbrook Boulevard, south of Road A, at Parcel AR-95 (Shelter #334).

    Per the Amoruso Specific Plan, Bus Rapid Transit (BRT) bus shelter turnouts and pads shall be installed with adjoining roadway improvements at the following locations:

    - Northbound Westbrook Boulevard, north of Road B, adjacent to AR-42 (Shelter #328), and
    - Southbound Westbrook Boulevard, south of Road B, adjacent to AR-52 (Shelter #332).

27. Developer shall be responsible for the installation of a bus shelter and related improvements conforming to the City's current standards on the shelter pad located along southbound Westbrook Boulevard, south of Road A, in Parcel AR-95. Upon installation and final inspection by the City of Roseville, the bus shelter and related improvements shall become property of the City of Roseville. The Developer and City may enter into a construction fee agreement or other agreement based upon a construction cost of $10,000 per shelter for future construction of the Bus Shelter located along southbound Westbrook Boulevard, south of Road A, at Parcel AR-95 (Shelter number 334). (Engineering, Alternative Transportation)

28. The trail shall be constructed to meet City of Roseville Class 1 standards. Where the trail meets cul-du-sacs and roads adjacent to AR-4 and AR-11, the developer shall be responsible for installing access control measures (i.e. fencing and bollards) and signage per City Standards. (Engineering, Alternative Transportation)

29. The applicant shall dedicate all necessary rights-of-way for the widening of any streets required with this entitlement. A separate document shall be drafted for approval and acceptance by the City of Roseville, and recorded at the County Recorder's Office. (Engineering)

30. The applicant shall dedicate a separate drainage easement to the City of Roseville for the storm drain facility required to transfer public storm waters through the site. The easement document shall be drafted

for approval and acceptance by the City of Roseville, and recorded at the County Recorder's Office. (Engineering)

31. The grading plans for the site shall be accompanied with a shed map that defines the area tributary to the site. All drainage facilities shall be designed to accommodate the tributary flow. All on-site storm drainage shall be collected on site and shall be routed to the nearest existing storm drain stub of natural drainage course. (Engineering)

32. All storm drainage, including roof drains, shall be collected on site and treated with Best Management Practices (BMP's) per the City's Stormwater Quality Design Manual. All storm water shall be routed to the nearest existing storm drain system or natural drainage facility. Drain outfalls shall extend down to the receiving water and shall be constructed with adequate velocity attenuation devices. The grading/improvement plans for the site shall be accompanied with a shed map that defines the area tributary to this site and all drainage facilities shall be designed to accommodate the tributary flow. If located within a private subdivision that has privately maintained streets, the storm drain system and proposed BMP's shall be privately owned and maintained by the property owner or HOA, unless otherwise identified on the approved tentative map. Prior to the issuance of any permits, the owner shall provide a plan for the maintenance of the proposed BMP's. (Engineering)

33. Prior to approval of improvement plans, drainage calculations must be submitted that are consistent with the Master Drainage Study for Amoruso Ranch or the Master Drainage Study shall be amended as necessary to accommodate any change in sheds. Detention and drainage swales shall also be consistent with the Master Drainage Study or the Master Drainage Study amended to reflect any proposed changes. (Engineering)

34. Prior to approval of grading within the Open Space, the developer shall provide a plan that demonstrates that the proposed detention storage volume to mitigate the 100-year peak flows match the requirements as identified in the Drainage and Stormwater Master Plan. (Engineering)

35. The grading plans shall be accompanied with engineered structural calculations for all retaining walls greater than 4 feet in height. All retaining walls shall be of either split-faced masonry units, keystone type construction, or cast in place concrete with fascia treatment. (Engineering)

36. The developer shall be responsible for any necessary relocation of signal interconnect cables that may require re-location as a result of the construction of turn lanes and/or driveways. (Engineering)

37. To ensure that the design for any necessary widening, construction, or modifications of Public Streets does not conflict with existing dry utilities generally located behind the curb and gutter, and prior to the submittal of design drawings for those frontage improvements, the project proponent shall have the existing dry utilities pot holed for verification of location and depth. (Engineering)

38. Sight distances for all driveways shall be clearly shown on the improvement plans to verify that minimum standards are achieved. It will be the responsibility of the project proponent to provide appropriate landscaping and improvement plans, and to relocate and/or modify existing facilities as needed to meet these design objectives. (Engineering)

39. Improvement plans shall show the Preserve boundary and label it as a protected area. The Pre-Construction meeting shall address the presence of the Preserve, the sensitive habitats present and minimization of disturbance to the Preserve. During grading and construction the Preserve area shall be avoided and shall not be used for parking, storage, or project staging. The contractor shall remove all trash blown into the Preserve from adjacent construction on a daily basis. After construction is complete, the temporary fencing shall be removed from the Preserve, along with all temporary erosion control

measures (e.g. straw bales, straw wattles and stakes, silt fencing). (Engineering, Development Services, Planning)

40. Prior to construction within any phase of the project, high visibility temporary construction fencing shall be installed along the parcel adjacent to the Preserve. Fencing shall be maintained daily until permanent fencing is installed, at which time the temporary fencing shall be removed from the project site. (Engineering, Development Services, Planning)

41. With the exception of access required for maintenance and/or emergency vehicles, the project shall be designed to prevent vehicle access into the Preserve. Post and cable fencing or other improvements shall be utilized to meet this requirement. (Engineering, Development Services, Planning)

42. Landscaping adjacent to the Preserve shall be California native, drought-tolerant groundcover, shrubs, plants, and trees. (Development Services, Planning)

43. Prior to the approval of the Improvement Plans, the project proponent shall provide proof of preparation and submittal of a Stormwater Pollution Prevention Plan (SWPPP) to the Regional Water Quality Control Board (RWQCB). Proof shall be in the form of the Waste Discharge Identification Number (WDID#), provided to the applicant from RWQCB, placed on the coversheet of the improvement plans. Upon approval of the improvement plans, a copy of the SWPPP shall be required onsite and available for viewing by City inspection staff upon request. (Engineering)

44. Prior to the issuance of a grading permit or approval of Improvement Plans, the grading plans shall clearly identify all existing water, sewer, and recycled water utilities within the boundaries of the project (including adjoining public right of way). Existing utilities shall be identified in plan-view and in profile-view where grading activities will modify existing site elevations over top of or within 15 feet of the utility. Any utilities that could potentially be impacted by the project shall be clearly identified along with proposed protection measures. The developer shall be responsible for taking measures and incurring costs associated with protecting the existing water, sewer, and recycled water utilities to the satisfaction of the Environmental Utilities Director. (Environmental Utilities)

45. Water and sewer infrastructure shall be designed and constructed pursuant to the adopted City of Roseville Improvement Standards and Construction Standards and shall reflect the following:

    a) Sewer and water service laterals shall not be allowed off of water and sewer mains larger than 12 inches in diameter.

    b) Utilities or permanent structures shall not be located within the area which would be disturbed by an open trench needed to expose sewer trunk mains deeper than 12 feet unless approved by Environmental Utilities in these conditions. The area needed to construct the trench is a sloped cone over the sewer main. The cone shall have 1:1 side slopes.

    c) Water and sewer mains shall not exceed a depth of 12 feet below finished grade, unless authorized in these conditions.

    d) All sewer manholes shall have all-weather 10-ton vehicular access unless authorized by these conditions. (Environmental Utilities)

46. As part of the Phase A1 infrastructure, a 12” water main shall be constructed from future alignment of Westbrook Boulevard to Road F along the shared property line between AR-51 and AR-52. In addition, a 12’ wide access road consisting of 6” AB will be constructed adjacent to the 12” water main. (Environmental Utilities)

47. Recycled water infrastructure shall be designed pursuant to the adopted City of Roseville Improvement Standards and the City of Roseville Construction Standards. The applicant shall pay all applicable recycled water fees. Easements shall be provided as necessary for recycled water infrastructure. (Environmental Utilities)

48. Any backflow preventers visible from the street shall be painted green to blend in with the surrounding landscaping. The backflow preventers shall be screened with landscaping and shall comply with the following criteria:

    a) There shall be a minimum clearance of four feet (4') on all sides, from the backflow preventer to the landscaping.

    b) For maintenance purposes, the landscaping shall be installed on a maximum of three sides and the plant material shall not have thorns.

    c) The control valves and the water meter shall be physically unobstructed.

    d) The backflow preventer shall be covered with a green cover that will provide insulation. (Environmental Utilities)

49. A note shall be added to the improvement plans stating that all water backflow devices shall be tested and approved by the Environmental Utilities Department prior to the Notice of Completion for the improvements. (Environmental Utilities)

50. Fire hydrants shall be located as required by the Fire Department. The maximum distance between fire hydrants shall not exceed 500' on center. (Fire)

51. Minimum fire flow is 1,500 gallons per minute with 20 pounds of residual pressure. The fire flow and residual pressure may be increased, as determined by the Fire Marshall, where the project utilities lines will serve non-residential uses. (Fire)

52. Any facilities proposed for placement within public/electric utility easements shall be subject to review and approval by the Electric Department before any work commences in these areas. This includes, but is not limited to, landscaping, lighting, paving, signs, trees, walls, and structures of any type. (Electric)

53. All Electrical Department facilities, including street lights where applicable, shall be designed and built to the "City of Roseville Specifications for Residential Trenching". (Electric)

54. The design for electrical service for this project will begin when the Electric Department has received a full set of improvement plans for this project. (Electric)

55. All landscaping in areas containing electrical service equipment shall conform to the "Electric Department Landscape Design Requirements" as outlined in Section 7.00 of the Electric Departments' "Specifications for Residential Trenching." (Electric)

56. The location and design of the gas service shall be determined by PG&E. The design of gas service for this project shall not begin until PG&E has received a full set of City approved improvement plans for the project. (PG&E)

57. It is the developer's responsibility to notify PG&E of any work required on PG&E facilities. (PG&E)

PRIOR TO OR UPON RECORDATION OF FINAL MAP

58. The following easements shall be provided and shown on the Final Map or by separate instrument, unless otherwise provided for in these conditions:

    a) A 10-foot-wide minimum public utilities easement along all road frontages;

    b) The applicant shall dedicate a separate easement to the City of Roseville for future bus stops at the following locations:

        - Northbound Westbrook Boulevard, north of Road A, adjacent to Parcel AR-45 (Shelter #325);
        - Eastbound Road B, east of Westbrook Boulevard, adjacent to Parcel AR-44 (Shelter #326);
        - Westbound Road B, west of Road A, adjacent to AR-43 (Shelter #327);
        - *Northbound Westbrook Boulevard, north of Road B, adjacent to AR-42 (Shelter #328);
        - Eastbound Road D, east of Westbrook Boulevard, adjacent to Parcel AR-39 (Shelter #329);
        - Northbound Westbrook Boulevard, north of Road D, adjacent to Parcel AR-53 (Shelter #330);
        - Southbound Westbrook Boulevard, south of Road D, adjacent to Parcel AR-28 (Shelter #331);
        - *Southbound Westbrook Boulevard, south of Road B, adjacent to AR-52 (Shelter #332); and
        - Southbound Westbrook Boulevard, south of Road A, at Parcel AR-95 (Shelter #334).

        *indicates a Bus Rapid Transit (BRT) stop. (Alternative Transportation)

Easement widths shall comply with the City's Improvement Standards and Construction Standards. The easement documents shall be drafted for approval and acceptance by the City of Roseville and recorded at the Placer County Recorder's Office. (Environmental Utilities, Electric, Engineering, Alternative Transportation)

59. All existing easements shall be maintained, unless otherwise provided for in these conditions. (Environmental Utilities, Electric, Engineering)

60. Separate document easements required by the City shall be prepared in accordance with the City's "Policy for Dedication of Easements to the City of Roseville". All legal descriptions shall be prepared by a licensed land surveyor. (Alternative Transportation, Environmental Utilities, Electric, Engineering)

61. A declaration of Conditions, Covenants and Restrictions (CC&Rs), in a form approved by the City Attorney, shall be recorded on the entire property concurrently with the Final Map. The CC&Rs shall include the following items: (Attorney, Planning)

    a) A clause prohibiting the amendment, revision or deletion of any sections in the CC&Rs required by these conditions of approval without the prior consent of the City Attorney.

b) A clause excluding any property owned by the City from the terms of the CC&Rs.

c) Residents in areas that do not allow for standard turning movements for refuse vehicles shall be required to bring their trash bins to a designated trash pickup area on the main street, because refuse trucks are not able to turn around in dead end streets. Designated pick-up areas shall be established to Environmental Utilities satisfaction, and shall be memorialized in the CC&Rs. (Environmental Utilities)

d) For units, other than single-family detached, that include a two-car garage, add a clause noting that the two required vehicle parking spaces within the garage must be kept clear and maintained for parking at all times. Storage of items which causes an inability to park within the required spaces is prohibited.

e) There shall be clear language regarding maintenance and common easements agreement for servicing all fire protection systems and gates used by first responders. A service company shall be obtained to maintain all on-site fire protection systems including all common interior adjoining fire sprinkler-piping penetrations and private fire hydrants. An agreement between owners and tenants shall be made to allow permission to enter the premises to inspect all apparatuses associated with fire protection. Draft documents shall be provided to the Fire Department for review. (Fire)

62. The City shall not approve the Final Map for recordation until either:

    a) A subdivision agreement is entered into along with the necessary bonds and insurance as required by the City. Said agreement shall be in a form acceptable to the City Attorney.

    OR

    b) The improvement plans are approved, and the improvements are constructed and accepted as complete. In this case, the subdivider shall enter into a one-year maintenance agreement concurrent with the recordation of the Final Map. (Engineering)

63. Any structures crossing lot/parcel lines created by the Final Map shall be removed. (Engineering)

64. Street names shall be approved by the City of Roseville. (Engineering)

65. The subject property shall be annexed into CFD 3, Municipal Services prior to approval of the Final Map. This property is being added into this district in order to fulfill the Development Agreement requirement. It is the applicant's responsibility to prepare the appropriate documentation for the annexation of this property into the LLD. In order to allow the LLD to be in place at the beginning of the fiscal year, the documentation shall be provided to the Finance Department not later than March 15 of the year preceding the fiscal year in which this annexation will become effective. (Finance, Engineering)

66. A Community Facilities District (CFD) shall be formed for the subject property prior to approval of the Final Map. This district is being formed to cover the costs of maintenance in the district. It is the applicant's responsibility to prepare the appropriate documentation for the creation of this CFD. In order to allow the CFD to be in place at the beginning of the fiscal year, the documentation shall be provided to the Finance Department not later than March 15 of the year preceding the fiscal year in which this annexation will become effective. (Finance, Engineering)

67. The Final Map shall include an irrevocable offer to dedicate public rights-of-way and public and/or private easements as required by the City. Lettered lot/parcels along major roads shall be dedicated as landscape/pedestrian/public utility easements and in fee to the City as open space. (Engineering)

68. The words “traffic control appurtenances” shall be included in the list of utilities allowed in public utilities easements (PUEs) located along public roadways. (Engineering)

69. The Final Map shall be permitted per “the Digital Submittal of Cadastral Surveys”. Submittal shall occur after Engineering approval but prior to Council approval. (Engineering)

70. The cost of the facilities which are identified in the CIP and are beyond those needed for this project may be reimbursed to the developer. In accordance with §66485 and §66486 of the Subdivision Map Act, any improvements constructed by the subdivider which contain supplemental size, capacity, number, or length for the benefit of property not within the subdivision and which improvements are to be dedicated to the public, the subdivider shall be entitled to reimbursement for that portion of the cost of the improvements which is in excess of the construction required for the subdivision. (Engineering)

71. Electric construction costs incurred by the City of Roseville Electric Department for this project shall be paid for by the developer per the applicable policy. (Electric)

72. The Environmental Utilities Department shall make a determination that there is adequate conveyance and treatment capacity in the City sewer system to handle the newly create lot/parcels. (Environmental Utilities)

73. The applicant shall pay all applicable water and sewer fees. (Environmental Utilities)

OTHER CONDITIONS OF APPROVAL

74. The applicant shall pay City’s actual costs for providing plan check, installation and inspection services. This may be a combination of staff costs and direct billing for contract professional services. (Environmental Utilities, Engineering)

75. Any relocation, rearrangement, or change to existing electric facilities due to this development shall be at the developer’s expense. .(Electric)

76. It is the responsibility of the developer to ensure that all existing electric facilities remain free and clear of any obstructions during construction and when the project is complete. (Electric)

77. All residential units must install a Seasonal Energy Efficiency Rating ("SEER") of 2 points above the minimum, as defined by the State of California in the current Title 24 of the Code of California regulations, up to a total maximum of 16 points including the 2 point premium, an Energy Efficiency Ratio ("EER") of 12 or greater, and a thermal expansion valve "TXV"). The SEER rating of 2 points above the minimum, as defined by the current Title 24, up to a maximum of 16 points, and an EER rating of 12 or greater along with a TXV will be specified on building plans and Title 24 compliance certificates at the time building permits are requested. If Title 24 of the Code of California Regulations in effect at the time of request for building permits requires higher SEER or EER ratings, residential units in the Plan Area shall comply with such State requirements. The SEER and EER ratings will be verified with appropriate documentation. These requirements shall be utilized in the overall energy compliance calculations required for issuance of a building permit for any residential unit. Any variances must be approved by the Electric Department’s Retail Energy Services Department. (Building, Electric)

78. Existing public facilities damaged during the course of construction shall be repaired by the applicant, at the applicant’s expense, to the satisfaction of the City. (Engineering)

79. The project is subject to the noise standards established in the City’s Noise Ordinance. In accordance with the City’s Noise Ordinance project construction is exempt before the house of seven a.m. and seven p.m. Monday through Friday, and between the hours of eight a.m. and eight p.m. Saturday and Sunday.

Provided, however, that all construction equipment shall be fitted with factory installed muffling devices and that all construction equipment shall be maintained in good working order. (Engineering)

80. If site survey or earth moving work results in the discovery of hazardous materials in containers or what appears to be hazardous wastes released into the ground, the contractor shall notify the Roseville Fire Department immediately. A representative from the Fire Department will make a determination as to whether the incident is reportable or not and if site remediation is required. Non-emergency releases or notifications about the presence of containers found shall be reported to the Fire Department. (Fire)

81. All plant material shall be maintained under a 30 calendar day establishment period after initial planting. Upon completion of the establishment period, all plant material shall remain under warranty for an additional 9 months at a minimum. Any plant material which does not survive during the establishment period shall be immediately replaced. Any trees or shrubs which do not survive during the warranty period shall be replaced one month prior to the end of the warranty period. Tree or shrub replacement made necessary due to acts of God, neglect, or vandalism shall be exempt from the warranty. (Parks, Recreation, and Libraries)

82. The Tentative Subdivision Map shall not be deemed approved until the actions to the General Plan Amendment, Specific Plan Amendment, Development Agreement Amendment, and Rezone are approved and become effective. (Planning)

CONDITIONS OF APPROVAL FOR DESIGN REVIEW FOR RESIDENTIAL SUBDIVISION FILE #PL21-0184

1. The development standards for ARSP Phase A1 are approved as described in Exhibit G except as modified by these conditions of approval. (Planning)

2. This permit shall expire on the same date as the Small Lot Tentative Map for the Amoruso Ranch Specific Plan Amendment project, File # PL21-0184, which is **March 24, 2024**. Prior to said expiration date, the applicant may apply for an extension of time, provided this approval does not extend the expiration beyond **March 24, 2025**. Effectuation of this DRRS shall occur with the first residential Building Permit. (Planning)

3. Prior to issuance of building permits for home construction on MDR parcels within ARSP Phase A1, the home building shall be required to submit for a Design Review for Residential Subdivision (DRRS) approval to evaluate the proposed architecture. Detailed information (e.g. floor plans, additional architectural styles, materials, and color boards, etc.) shall be provided as part of the DRRS submittal. A separate Sign Permit is required for all project signs. (Planning)

4. The project shall comply with all required environmental mitigation identified in the ARSP EIR and shall include all applicable mitigation measures as notes on the grading plans. (All Departments)

5. The landscape plan shall comply with the Landscape Guidelines for the Amoruso Ranch Specific Plan and the City of Roseville Water Efficient Landscape Ordinance. (Planning)

6. Optional accessory structures (patio covers, gazebos, etc.) shall be consistent with the development standards outlined in Zoning Ordinance Section 19.22.030 (C). This includes setback, height, and coverage restrictions for both enclosed and unenclosed structures. (Planning)

7. Fences and walls shall be consistent with the locations and treatments specified in the Amoruso Ranch Specific Plan Design Guidelines. (Planning)

Note to Applicant and/or Developer: Please contact the Planning Division staff at (916) 774-5276 prior to the Commission meeting if you have any questions on any of the recommended conditions for your project. If you challenge the decision of the Commission in court, you may be limited to raising only those issues which you or someone else raised at the public hearing held for this project, or in written correspondence delivered to the Planning Manager at, or prior to, the public hearing.

CITY OF ROSEVILLE CALIFORNIA

DEVELOPMENT SERVICES DEPARTMENT–PLANNING DIVISION

311 Vernon St, Roseville, CA 95678 (916) 774-5276

ADDENDUM TO AMORUSO RANCH PROJECT SPECIFIC PLAN ENVIRONMENTAL IMPACT REPORT (SCH # 2013102057, CERTIFIED ON JUNE 15, 2016)

Project Title/File Number: Amoruso Ranch Specific Plan Amendments, File # PL21-0184 (Prior File # 2011PL-039 (ANN-000007, GPA-000061, SPA-000043, RZ-000058, DA-000047)

Project Location: Assessor Parcel Numbers (APN) 017-020-03, 017-020-036, 017-020-037, 017-010-010, 017-010-011; United States Geological Survey, "Pleasant Grove, CA" 7.5 Minute Topographic Quadrangle, Township 11 North Range 5 East, Sections 11 and 14, Mt. Diablo Baseline and Meridian.

Project Description: The Project as originally proposed and analyzed in the previously certified EIR includes the following components:

- Adoption of the ARSP, which establishes the land use and regulatory framework for approximately 695 acres of mixed-use development (residential, commercial, public/quasi-public, and open space);
- Approval of amendments to the City of Roseville (City) General Plan;
- Approval of pre-zoning designations;
- Approval of a large lot tentative subdivision map;
- Approval of development agreements by and between the City and the Applicant and landowners;
- Amendment of the City's sphere of influence to include the Project site; and
- Annexation of the project site into the City.

Proposed modifications to the Project and previously adopted EIR include the following:

- Adoption of amended ARSP and General Plan land use designations;
- Approval of amended zoning designations;
- Approval of a new large lot tentative subdivision map;
- Approval of a small lot tentative subdivision map and modified development standards;
- Approval of amended development between the City and Applicant.

See below for more detail.

Project Applicant: Brookfield Residential/Amoruso Family Trust

Property Owner: Angela Eisenpress, Successor Trustee of the Amoruso Family Living Trust, Dated March 14, 2005

	Brookfield Sacramento Holdings, LLC, a Delaware Limited Liability Company
Lead Agency Contact:	Shelby Maples, Associate Planner

An Addendum to a previously certified and adopted negative declaration or environmental impact report may be prepared for a project if only minor technical changes or additions are necessary or none of the conditions calling for the preparation of a subsequent EIR or negative declaration have occurred (California Environmental Quality Act Guidelines [CEQA] Section 15164). Consistent with CEQA Guidelines Section 15164, the below analysis has been prepared in order to demonstrate that none of the conditions described in Section 15162 of the CEQA Guidelines calling for preparation of a subsequent EIR have occurred and that only minor technical changes or additions are necessary in order to deem the adopted negative declaration adequate to describe the impacts of the proposed project. CEQA Guidelines Section 15164 also states that an addendum need not be circulated for public review, but can be included in or attached to the certified EIR for consideration by the hearing body. This Addendum focuses only on those aspects of the project or its impacts which require additional discussion.

PROJECT DESCRIPTION

Project Location

For a detailed description of the project location, refer to Chapter 2 of the Amoruso Ranch Specific Plan (ARSP) and Chapter 2 of the environmental impact report (EIR), included here as Attachment 1. The project site is located along the northern edge of the City of Roseville, approximately 6.5 miles west of Interstate 80 and State Route 65 and 5 miles northwest of downtown Roseville on approximately 695 acres. The Project site consists of APNs 017-020-030, 017-020-036, 017-020-037, 017-010-010, 017-010-011, and is found on the United States Geological Survey in the "Pleasant Grove, CA" 7.5 Minute Topographic Quadrangle, Township 11 North Range 5 East, Sections 11 and 14, Mt. Diablo Baseline and Meridian. See Figure 2-1 of the EIR and Figure 2.2 of the ARSP.

Background

For detailed Project background information, refer to Section 2.2 of the EIR. The ARSP was developed to comport with the City's growth vision and create a "comprehensively planned, residential-based community with a mix of land uses" to provide "employment opportunities" and "housing choices" to help the City meet "its obligation to accommodate…future population growth in the region" (Final EIR [FEIR] p. 2-9). In May 2011, a formal project application was submitted to the City, and in 2013 the Notice of Preparation (NOP) was released. The EIR was prepared to analyze potential environmental effects associated with adoption of the ARSP and affiliated Project components and entitlements. The Draft EIR (DEIR) was distributed for public review on March 1, 2016. Several public workshops and hearings were held from March 10 to April 11, 2016, after which the FEIR was prepared. On April 14, 2016, the Planning Commission recommended that the City Council adopt and approval all Project components and affiliated entitlements of the ARSP and certify the EIR, and on June 15, 2016, the City Council did so (Resolution No, 16-271).

Thereafter, the Applicant began coordination with the U.S. Army Corps of Engineers (USACE) for a federal Clean Water Act (CWA) Section 404 permit as required for development of land featuring jurisdictional wetlands (FEIR, p. 2-63). During this process, the USACE required additional avoidance of wetland features above what was initially proposed and analyzed in the EIR. To meet this requirement and effectuate other minor Project changes, the ARSP was amended by the first Amoruso Ranch Specific Plan Amendment project (City File #PL19-0312). The Amendment included land use modifications to the General Plan and Specific Plan, rezones, tentative large lot maps, and amendments to development agreements to modify approved layouts and increase the open space to meet USACE requirements. The project was evaluated by a first Addendum to the Amoruso Ranch EIR. The Planning Commission and City Council considered the first Addendum prior to taking action on the Project in April of 2020.

The current Project requests additional changes to the Specific Plan, including land use changes and modifications to the lot layout. The changes, which are discussed in more detail below and analyzed throughout this addendum, are minor; however, additional entitlements to make the modifications are required. As no new or substantially more severe impacts are anticipated due to the proposed changes, a second Addendum to the EIR has been prepared.

Environmental Setting

For a detailed description of the environmental setting of the project site and its surrounds, refer to the "Environmental Setting" subsections within Section 4.1 through 4.15 in Chapter 4 of the EIR; see also Section 2.3 and Figure 2-6 of the EIR. The project site's land uses have been re-designated and rezoned as detailed in Chapter 4 of the ARSP and Chapter 2 of the EIR (and discussed below) and at present are in early stages of development. Prior land use designations for the project site and existing land use designations of its surrounds can be found in Sections 2.3 and 4.1.2 of the EIR (see FEIR, Figure 4.1-2). Generally, the site is characterized

by gently rolling terrain and contains nonnative annual grasslands, some wetlands, and University Creek, which runs east to west through the southwest portion of the site (FEIR, pp.2-4 to 2-6). Land to the north, east, and west of the northern portion of the site is in unincorporated Placer County and is comprised of rural subdivision with multi-acre parcels and agricultural land (FEIR, p. 4.1-2). Land to the south, southwest, and west of the southern portion of the project site is in the City, a portion of which to the southeast will remain open space as the planned Al Johnson Wildlife Area; another portion of which to the south is slated to be developed as a 501-acres residential development (Id., p.4.1-4). This development is currently in construction. Additionally, a Notice of Preparation for a project known as the Roseville Industrial Park (SCH# 2021070186, City File # PL21-0193) was released on July 12, 2021, for a land use modifications, rezone, design review, and other associated entitlements to allow the development of an industrial park on approximately 191 acres to the southwest of the ARSP.

Proposed Project

Originally Proposed Project

For a detailed description of the originally proposed Project, refer to Chapter 4 of the ARSP and Chapter 2 of the EIR. A brief summary is included below.

Primary components of the originally proposed Project include:

- Adoption of the ARSP: The ASRP established the land use and regulatory framework for an approximate 695-acre mixed-use development that included 2,827 residential units (1,302 low density, 542 medium density, and 873 high density); 51 acres of commercial; 17 acres of public and quasi-public; 22 acres of parks; 145 acres of open space; and 20 acres for urban reserve uses. Development would occur over 30 years and three phases (FEIR, p. 2-58). The City Council adopted the ARSP and EIR on June 15, 2016.

- Approval of Amendments to the City General Plan: The project site was designated Agricultural/80-acre minimum in the Placer County General Plan (1994) and, as part of the Project, was annexed into the City and re-designated as indicated in Table 2-1 of the FEIR for future development as prescribed in Chapter 4 of the ARSP and Chapter 2 of the EIR. The General Plan amendments were approved by City Council on June 15, 2016.

- Approval of Pre-zoning Designations: The project site was zoned Building Site, 80 acres minimum (F-B- X 80 acre) by Placer County and, as part of the Project, was annexed into the City and rezoned as indicated in Table 2-1 of the FEIR for future development as prescribed in Chapter 4 of the ARSP and Chapter 2 of the EIR. The zoning designations were approved by City Council on June 15, 2016.

- Approval of Large Lot Tentative Subdivision Map: The large lot tentative subdivision map was approved by City Council on January 10, 2019; large lot final map recorded May 3, 2019, in Book EE of Maps, at Page 51, Official Records of Placer County.

- Approval of Development Agreements between City and the Applicant and Landowners: The development agreements are binding contracts through which the ARSP would be implemented. They were approved by City Council on June 15, 2016.

- Amendment of the City's Sphere of Influence: The City's sphere of influence would be amended to include the project site. The sphere of influence was approved for amendment by City Council on June 15, 2016.

- Annexation of Project site into City: The project site would be annexed into the City from the County upon request to LAFCO for annexation was approved by City Council on June 15, 2016. LAFCO approved annexation on December 18, 2018.

Proposed Project Modifications

Modifications to the proposed Project are described below and analyzed for their potential environmental effects throughout this Addendum.

- Adoption of Amended ARSP and General Plan land use: The ARSP and General Plan land use designations will be modified for several large lot parcels. Large lot parcels AR-21, AR-25, AR-32, and AR-37 will change land use from Low Density Residential (LDR) to Medium Density Residential (MDR). Units will be reallocated between 31 large lot parcels; however, the total number of units for Phase A1 of ARSP development, 1,334 units, will remain the same. Minor modifications to landscape, open space/paseo, right-of-way, and parks parcels will also be included to align with the tentative subdivision maps.

- Amended zoning designations: All of the affected residential parcels have a zoning designation of RS/DS, which will remain unchanged. The Rezone is requested to adjust the acreages of zoning designations to be consistent with the proposed acreage adjustments of the large and small lot maps.

- Large and small lot tentative subdivision maps: The project proposes to subdivide approximately 120.04 acres into 481 single-family residential lots, 14 open space parcels, three (3) park parcels, one (1) public/quasi-public parcel for city utilities, as well as landscape and right-of-way parcels. Modified development standards for the medium density RS/DS lots are proposed to allow smaller lot configurations. A large lot tentative subdivision map is also proposed to align with the land use designations.

- Amended Development Agreement between the City and the Applicant: The project includes the second Amendment to Development Agreement for the ARSP, to reflect project changes as well as to modify construction timing for water utilities.

PURPOSE AND SCOPE OF ADDENDUM

Basis for Addendum

This addendum has been prepared pursuant to CEQA Guidelines and legislative directives (CEQA Guidelines § 15164; Public Resources Code [PRC] §§ 21083, 21166). An addendum is an appropriate subsequent document to a previously certified EIR when some changes to a project are necessary, but those changes do not create new or increased significant environmental impacts that warrant major revisions to the previous document (CEQA Guidelines §§ 15162(a), 15164(a); see *Save Our Heritage Organization v. City of San Diego* (2018) 28 Cal.App.5th 656, 668). Also, an addendum is appropriate when circumstances surrounding a project have not substantially changed and when no new information of substantial importance has been uncovered that indicates the project would create new significant impacts or increase the severity of the previously identified signification impacts (Ibid). Substantial evidence presented in this Addendum demonstrates that the proposed Project modifications, described above and analyzed below, do not create any new significant impacts or increase the severity of previously identified significant impacts, nor are there any new circumstances or new information that would create such impacts or require more robust analysis (CEQA Guidelines § 15162 (a)). Therefore, an addendum is the appropriate CEQA document, and a subsequent or supplemental EIR is not warranted (Id., §15164(e)).

CEQA Checklist Update

Since certification of the previous EIR, the Appendix G Checklist in the CEQA Guidelines has been updated, effective early 2019. Although not required, the updated checklist is included in this second Addendum along with the prior version, as applicable as part of a good-faith effort to provide the most up-to-date information to decision makers and the public. This was also included with the first Addendum to the EIR. (PRC §§ 21002.1€, 210065; see CEQA Guidelines §§ 150020(a)(1), 15003(c).) The updated checklist is presented in strike

out/underline to clearly show changes, which are discussed in the analysis where appropriate. This revised checklist material is not considered "new information" as defined in CEQA Guidelines section 15162(a)(3). (See *Citizens Against Airport Pollution v. City of San Jose* (2014) 227 Cal.App.4th 788, 808; *Cleveland National Forest Foundation v. San Diego Assn. of Governments* (2017) 17 Cal.App.5th 413, 426.)

The EIR to which this addendum is being attached was certified by the City Council on June 15, 2016. It is currently available for review at the City of Roseville, Development Service Department, Planning Division, 311 Vernon Street, Roseville, CA, 95678, and online at https://www.roseville.ca.us under Government/Departments & Divisions/Planning/Specific Plans, Planning Areas & Development Agreements/Amoruso Ranch Specific Plan. See Background section above for more details.

Impact Conclusions in Previous EIR

The EIR to which this addendum is being attached was certified by the City Council on June 15, 2016. It is currently available for review at the City of Roseville, Development Services Department, Planning Division, 311 Vernon Street, Roseville, CA 95678, and online at https://www.roseville.ca.us under Government/Departments & Divisions/Planning/Specific Plans, Planning Areas & Development Agreements/Amoruso Ranch Specific Plan. See Background section above for more details.

The EIR identified the following impacts as significant and unavoidable:

- 4.1-3: Potential Incompatibility with Existing Agricultural and Other Land Uses in Placer County and the City of Roseville
- 4.1-8: Cumulative Impacts From Agricultural Resources Conversion
- 4.3-5: Increased Traffic Volumes at Intersections within Placer County, Sutter County, Sacramento County, or City of Lincoln Under Existing Conditions
- 4.3-6: Increased Traffic Volumes on Roadways Within Placer County, Sutter County, Sacramento County, or City of Rocklin Under Existing Conditions
- 4.3-8: Increased Traffic Volumes on State Highways Under Existing Conditions
- 4.3-9: Increased Traffic at City of Roseville Intersections Under 2035 CIP Conditions
- 4.3-11: Increased Traffic on Placer County, Sutter County, Sacramento County, City of Rocklin, or City of Lincoln Intersections Under 2035 CIP Conditions
- 4.3-12: Increased Traffic Volumes on Roadways within Placer County, Sutter County, Sacramento County, or City of Rocklin Under 2035 CIP Conditions
- 4.4-1: Generate Short-Term Construction Related Emissions of Criteria Air Pollutants
- 4.4-2: Generate Long-Term Operational Related (Regional) Emissions of Criteria Air Pollutants
- 4.4-5: Exposure of Sensitive Receptors to Odors
- 4.4-6: Consistency with Plans and Policies
- 4.5-1: Generate a Substantial Contribution To GHG Emissions that Conflicts with an Applicable Plan or Policy
- 4.6-1: Short-Term Noise Generated by Construction Activity
- 4.6-5: Substantial Permanent Increase in Ambient Noise Levels as a Result of the Existing Plus Project Increase in Traffic Noise
- 4.6-7: Substantial Permanent Increase in Ambient Noise Levels as a Result of the 2035 CIP Plus Project Increase in Traffic Noise Outside the Project Site
- 4.12.3-3: Construction or Expansion of Wastewater Treatment Facilities
- 4.13-6: Construction of Off-Site Stormwater Retention Facilities
- 4.14-1: Alteration of the Visual Character of the Site and Vicinity
- 4.14-2: New Sources of Light and Glare
- 4.14-3: Degradation of Scenic Resources and Scenic Vistas

The EIR also identified the following cumulative impacts as significant and unavoidable:

- 4.3-15: Increased Traffic on City of Roseville Intersections Under 2035 Cumulative Conditions
- 4.3-17: Increased Traffic on Placer County, Sutter County, Sacramento County, or City of Lincoln Intersections Under 2035 Cumulative Conditions
- 4.3-20: Increased Traffic Volumes on State Highways Under 2035 Cumulative Conditions
- 4.4-7: Result in a Cumulatively Considerable Net Increase in Criteria Pollutants
- 4.6-9: Substantial Permanent Increase in Ambient Noise Levels as a Result of the 2035 Cumulative Plus Project Increase in Traffic Noise Outside the Project Site
- 4.8-18: Cumulative Impacts to Biological Resources
- 4.12.1-4: Capacity of Water Treatment System to Meet Potable Water Demand
- 4.12.1-8: Cumulative Water Supply and Water Treatment Impacts
- 4.12.3-5: Cumulative Wastewater Impacts
- 4.12.4-5: Cumulative Solid Waste Impacts
- 4.14-4: Cumulative Aesthetic Impacts

No new impacts, including significant or unavoidable ones, occur as a result of proposed Project modifications, and none of the previously identified impacts are made substantially more severe (discussed in more detail below).

Issue Areas Removed from Additional Evaluation

Proposed Project modifications would not require additional construction or development on undeveloped land beyond what was previously analyzed in the certified EIR because there would be no increase in residential units and no other planned development where it was previously unplanned (see EIR, Figure 2-3, Section 2.11, and Section 4 compared with ARSP Amendment, Figure 4.1). The proposed Project modifications do not have the potential to change the regulatory framework, impact discussion, mitigation measures, or significance conclusions for the following issue areas: aesthetics, agriculture and forestry resources, air quality, biological resources, cultural resources, energy, geology and soils, greenhouse gas emissions, hazards and hazardous materials, hydrology and water quality, mineral resources, noise, population and housing, public services, recreation, transportation, tribal cultural resources, and wildfire. These areas are not analyzed further in the checklist but are discussed briefly below. CEQA only requires that environmental documents give decision makers sufficient detail on environmental consequences and does not purport to merely "generate paper" by excessively explaining consequences that are "so simple they are almost self-explanatory." (*Save our Residential Environment v. City of West Hollywood* (1992) 9 Cal.App.4th 1754; *Laurel Heights Improvement Assn. v. Regents of University of California* (1988) 47 Cal.3d 376, 393; *Save Our Residential Environment v. City of West Hollywood* (1992) 9 Cal.App.4th 1745, 1754).

Revisions made to the ARSP would not change the overall aesthetic nature of the planned development, and the revisions made by the prior Amendment (File #PL19-0312), such as open fencing and home placement restrictions that allow more open space to be viewed by visual receptors, are maintained. Therefore, aesthetics need not be further analyzed. Similarly, agriculture and forestry resources, biological resources, cultural resources, geology and soils, hydrology and water quality, mineral resources, recreation, and tribal cultural resources do not require additional analysis. These issue areas require disturbance of previously undisturbed land to incur environmental effects, and the proposed Project modifications will not disturb additional land beyond what was previously analyzed in the certified EIR. Further, no increase in "construction and/or operation" mean no additional or more severe impacts to, or from, energy, hazards and hazardous materials, noise, population and housing, public services, and recreation because there can be no physical environmental change to these issue areas without the impetus of such project action (FEIR p. 1-9; see CEQA Guidelines §§ 15358 (b), 15378(a)). And, changes to the water transmission and drainage systems are so minor that the systems remain "largely unchanged," with water and drainage flows remaining "the same," thereby precluding environmental impacts to issue areas as a result (see Utility Systems Updates Technical Memorandum.)

Impacts to transportation systems also would not increase because proposed Project modifications would not generate any significant amount of new vehicle trips beyond what was previously analyzed in the certified EIR (FEIR, pp. 4.3-43 to 4.3-44). Trip generation rates are based on development of structures and their respective land uses (e.g. high-density residential, low-density residential, commercial) FEIR, Appendix M [p.64]). No additional development will occur under proposed Project modifications, and the only relevant land-use shift will be a rezone that allows four large lot parcels to change from Low Density Residential (LDR) to Medium Density Residential (MDR). Units will be reallocated throughout the Specific Plan, and there is no overall increase in the number of units. Vehicle trips are not expected to change because the Project was analyzed with one external point of entry/egress only, which does not change with proposed modifications (see FEIR, Figure 4.3-5). No significant increase in vehicle trips, construction, or development means no increase in air pollutants and greenhouse gas emissions because these are the only relevant sources of project-related air pollutants (FEIR, p. 4.4-22 to 4.4-26, 4.5-20). Therefore, no additional environmental impacts to air quality and from greenhouse gas emissions would occur that could warrant further checklist evaluation. Lastly, wildfire need not be further addressed because the project site is not within a State Responsibility Area, which is a checklist threshold for wildfire analysis; upon annexation it received fire protection from the Roseville Fire Department and not CAL FIRE (FEIR, pp. 4.11-5, 4.11-8).

A full discussion of how these issue areas may be impacted by the Project can be found in Chapter 4 of the EIR. See also “No New Circumstances or New Information” below.

Issue Areas Receiving Additional Evaluation

Some proposed ARSP amendments and EIR revisions, however, are so closely tied to certain issue areas that, although no impacts are anticipated, were evaluated out of an abundance of caution, specifically: land use and planning, and utilities (water supply). See also “No New Circumstances or New Information” below.

No New Circumstances or New Information

Since certification of the previous EIR on June 15, 2016, circumstances surrounding the formerly proposed project and its location have not substantially changed nor has any new information of substantial importance come to light that indicates the Project would create new significant impacts or increase the severity of existing significant impacts (CEQA Guidelines § 15162(a)). No new projects beyond those discussed in the previously certified EIR have been approved or proposed within the vicinity of the project site that could impact or increase the Project’s environmental effects, and the City is not aware of any other new information that might bear relevance on the Project’s CEQA analysis. There is no new information of substantial importance showing that (i) mitigation measures or alternatives previously found to be infeasible would actually now be feasible and would substantially reduce one or more significant effects of the proposed project, but the project proponents decline to adopt the mitigation measure or alternative; or (ii) mitigation measures or alternatives considerably different from those analyzed in the previously certified CEQA documents would substantially reduce one or more significant effects, but the proponents decline to adopt the mitigation measure or alternative. Therefore, there is no evidence on the record, or otherwise reasonably discoverable, indicating that any new circumstances or new information that would (a) create new significant impacts; (b) substantially increase the severity of previously identified significant impacts; (c) or require additional analysis or verification. As a result, all boxes in the “New Circumstances” and “New Information” columns in the checklist below are marked “No”.

ENVIRONMENTAL CHECKLIST FOR ADDENDUM ENVIRONMENTAL REVIEW

The purpose of this checklist is to evaluate the categories in terms of any “changed condition” (i.e. changed circumstances, project changes, or new information of substantial importance) that may result in a changed environmental result. A “no” answer does not necessarily mean there are no potential impacts relative to the environmental category, but that there is no change in the condition or status of the impact since it was analyzed and addressed in prior environmental documents.

EXPLANATION OF CHECKLIST EVALUATION CATEGORIES

Where Impact was Analyzed
This column provides a cross-reference to the pages of the prior environmental documents where information and analysis may be found relative to the environmental issue listed under each topic.

Do Proposed Changes Involve New Significant Impacts?
Pursuant to Section 15162(a)(1) of the CEQA Guidelines, this column indicates whether the changes represented by the current project will result in new significant impacts that have not already been considered and mitigated by the prior environmental review documents and related approvals, or will result in a substantial increase in the severity of a previously identified impact.

Any new Circumstances Involving New Impacts?
Pursuant to Section 15162(a)(2) of the CEQA Guidelines, this column indicates whether there have been changes to the project site or the vicinity (circumstances under which the project is undertaken) which have occurred subsequent to the certification or adoption of prior environmental documents, which would result in the current project having new significant environmental impacts that were not considered in the prior environmental documents or that substantially increase the severity of a previously identified impact.

Any new Information Requiring New Analysis or Verification?
Pursuant to Section 15162(a)(3)(A–D) of the CEQA Guidelines, this column indicates whether new information of substantial importance which was not known and could not have been known with the exercise of reasonable diligence at the time the previous environmental documents were certified or adopted is available requiring an update to the analysis of the previous environmental documents to verify that the environmental conclusions and mitigation measures remain valid. Either "yes" or "no" will be answered to indicate whether there is new information showing that: (A) the project will have one or more significant effects not discussed in the prior environmental documents; (B) that significant effects previously examined will be substantially more severe than shown in the prior environmental documents; (C) that mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or (D) that mitigation measures or alternatives which are considerably different from those analyzed in the prior environmental documents would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative. If "no," then no additional environmental documentation (supplemental or subsequent EIR) is required.

Mitigation Measures Implemented or Addressing Impacts
Pursuant to Section 15162(a)(3) of the CEQA Guidelines, this column indicates whether the prior environmental documents provide mitigation measures to address effects in the related impact category. In some cases, the mitigation measures have already been implemented. A "yes" response will be provided in any instance where mitigation was included, regardless of whether the mitigation has been completed at this time. If "none" is indicated, this environmental analysis concludes a significant impact does not occur with this project, no mitigation was previously included, and no mitigation is needed.

DISCUSSION AND MITIGATION SECTIONS

Discussion
A discussion of the elements of the checklist is provided under each environmental category in order to clarify the answers. The discussion provides information about the particular environmental issue, how the project relates to the issue and the status of any mitigation that may be required or has already been implemented.

Mitigation Measures
Applicable mitigation measures from the prior environmental review that apply to the project are listed under each environmental category.

Conclusions
A discussion of the conclusion relating to the analysis contained in each section.

CHECKLIST

Land Use and Planning

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification? b) ~~Conflict~~ Cause a significant environmental impact due to a conflict with any ~~applicable~~ land use plan, policy, or regulation ~~of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance)~~ adopted for the purpose of avoiding or mitigating an environmental effect?	Impact 4.1-1 Impact 4.1-2 Impact 4.1-3 Impact 4.1-4	No	No	No	MM 4.6-1a-d MM 4.6-2 MM 4.4-1
~~c) Conflict with any applicable habitat conservation plan or natural community conservation plan?~~	Question deleted; see updated Land Use item b.				

Discussion: Land use and planning is discussed in Section 4.1 of the EIR. Impacts to land use and planning as a result of Project implementation are discussed in Section 4.1.4 of the EIR. The EIR addresses four impacts to land use and planning, three of which were found to be less than significant with mitigation. However, the EIR concluded that the Project would contribute to the significant and unavoidable impact of incompatibility with existing land uses.

The first Addendum to the ARSP EIR evaluated the increase of approximately 10 acres in land designated and zoned as Open Space, with an equivalent reduction in Low Density Residential (LDR) land, with assorted smaller acreage transfers from land designated/zoned residential to open space. It was found that those proposed amendments to zoning and land use did not change the overall nature of the Project, nor were any land uses introduced that dramatically changed those previously analyzed in the ARSP EIR. No new or substantially more severe impacts were introduced. Please refer to the first Addendum for a more thorough analysis and project description.

The current project includes land use modifications for four large lot parcels, AR-21, AR-25, AR-32, and AR-37. With the proposal, the land use for these four large lots will change from LDR to Medium Density Residential (MDR). The project also includes a modification of the existing large lots, resulting in unit transfers between 31 of the large lots within the Specific Plan area. The overall number of units will remain the same. Minor acreage shifts are also proposed to some paseo, landscape, and park parcels.

These proposed amendments to zoning and land use do not change the overall nature of the Project and proposed development, nor do they introduce any land uses that dramatically differ from those already analyzed in the previously certified EIR and approved by the City. These amendments would not physically divide an established community because, as stated in the EIR, “no community would be divided by the Proposed Project, as the project site is comprised of vacant land” (FEIR, p.4.1-31). Further, like the originally proposed Project, the proposed amendments to land use and zoning would not conflict with applicable land use plans, policies, and regulations including: the City Blueprint Implementation Strategies, the City General Plan (Community Design Goals, Community Form, Growth Management), some City Zoning Ordinances (allowed uses), CALTRANS Airport Land Use Handbook, and the McClellan Land Use Compatibility Plan (FEIR, pp. 4.1-31, 4.1-34, 4.1-37, 4.1-39, 4.1-43). There is no significant environmental effect as there is no conflict. Likewise with internal land uses within the proposed development and as outlined in the specific plan, the proposed changes would not conflict with the following applicable guidelines, and not cause a significant environmental effect as a result: the City Community Design Guidelines, City General Plan (Community Design Goals and Policies, Community Forum Goals and Policies) and City Zoning Ordinance (allowed uses), with implementation of mitigation for noise and construction emission reductions (FEIR, pp. 4.1-35 to 4.1-38).

Also, similar to the originally proposed Project, the proposed amendments have the potential to conflict with the City General Plan (Community Form – Relationship of New Development) and the Placer County General Plan (agricultural policies) in a way that causes a significant and unavoidable impact (FEIR pp. 4.1-39 to 4.1-43). There are no mitigation measures presented or available to reduce this impact. However, this impact would not be made substantially more severe by the proposed amendments because, as stated above, the proposed amendments do not change the overall nature of the Project and proposed development nor do they introduce any land uses that dramatically differ from those already analyzed. Therefore, no substantially new or more severe impacts to land use and planning as a result of the proposed Project modifications will occur.

Mitigation Measures: Proposed Project modifications will not increase the potential for new or more severe significant impacts. No additional mitigation measures are required for the Project.

Utilities and Service Systems

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts? e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?	Not Applicable				

Discussion: Proposed Utilities and service systems are discussed in Section 4.12 of the EIR. Impacts to utilities and service systems as a result of Project implementation are discussed in Sections 4.12.1.4, 4.12.2.4, 4.12.3.4, 4.12.4.4, and 4.12.5.4 of the EIR, and mitigation measures to reduce these impacts are included in Sections 4.12.1.5, 4.12.2.5, 4.12.3.5, and 4.12.5.5. The EIR addresses 25 impacts to utilities and service systems, most of which will be reduced to a less-than-significant level with mitigation. However, the EIR concluded that the project would contribute to five significant and unavoidable impacts to utilities and services systems, one of which occurs only in the cumulative scenario.

The proposed project includes updates to ARSP Wastewater Master Plan to show that downsizing of sewer lines is appropriate for the development. A technical memorandum prepared by Wood Rodgers, Inc. is included with this Addendum as Attachment 4. In conformance with the adopted sewer study, which was analyzed with the previously certified EIR, the force main for the sewer line will be placed within the future Westbrook Bl. and cross under Pleasant Grove Creek. However, in developing the plans for the proposed large lot tentative map and refining the calculations, it was found that sewer demand is significantly lower than reported in the sewer study; therefore, the force mains for the wastewater system can be reduced in size. The original demand calculations in the Sewer Study required a Central Pump Station sized for 4.18 mgd (million gallons per day), with 18-inch and 12-inch force mains. The Wood Rodgers Utility Study shows that based on the proposed land use plan, the demands on the pump station will be 2.83 mgd, and dual 12-inch force mains will be sufficient to reliably convey wastewater flows within the velocity criteria specified in the City's current design standards. While some pipe resizing is recommended, the system configuration remains generally the same as the original Wastewater Master Plan, as evaluated in Section 4.12.3 of the previously certified EIR. Impacts will be reduced beyond what was previously evaluated; therefore the Project modifications will not result in new or more severe significant impacts to the sewer system.

In addition, the project provided an updated Water Demand calculation to accompany the proposed land use modification, as approximately 153 units will change from LDR to MDR lots. According to the Water Master Plan evaluated with the previously certified EIR, the average daily demand with 2% gallon per minute (gpm) flow rate for the ARSP totals 931.9 gpm, with an average annual demand with 2% acre feet per year (AFY) of 1,503.2 AFY. Higher density land use categories have lower unit demand factors, so the increase in MDR properties results in a lower average daily demand for water, with 926.1 gpm for the Plan area. The average annual demand rate reduces to 1,493.9 AFY. Therefore, water demand will be reduced beyond what was previously evaluated; therefore the Project modifications will not result in new or more severe significant impacts to water demand.

Mitigation Measures: Proposed Project modifications will not increase the potential for new or more severe significant impacts to utilities and service systems. No new mitigation is required for the Project.

Mandatory Findings of Significance

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents Mitigation Measures Implemented or Addressing Impacts.
a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of an endangered, threatened or rare species, or eliminate important examples of the major periods of California history or prehistory?	See EIR Section 4.8 (Vegetation and Wildlife) See also "Purpose and Scope of Addendum" above	No	No	No	See EIR Section 4.8 (Vegetation and Wildlife) See also "Purpose and Scope of Addendum" above
b) Does the project have impacts which are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)	See EIR Sections 4.1 (Land Use and Agriculture), 4.8 (Vegetation and Wildlife), and 4.12.1 (Public Utilities Water)	No	No	No	See EIR Sections 4.1 (Land Use and Agriculture), 4.8 (Vegetation and Wildlife), and 4.12.1 (Public Utilities Water) See also "Purpose and Scope of Addendum" above

c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	See EIR Section 4.12.1 (Public Utilities Water) See also "Utilities and Service Systems" and "Purpose and Scope of Addendum" above.	No	No	No	See also "Utilities and Service Systems" and "Purpose and Scope of Addendum" above
2018 CEQA Checklist Update					
a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of an endangered, threatened, or rare species, or eliminate important examples of the major periods of California history or prehistory?	See above.				

Discussion: This section makes mandatory findings of significance only for those issue areas potentially impacted by proposed Project modifications, as described above and analyzed throughout this Addendum. The previously certified EIR discloses all potential environmental impacts, their level of significance, and mitigation measures to reduce significance for the originally proposed Project; mandatory findings of significance for which can be found in Appendix B of the FEIR.

As discussed above in this Addendum, no significant new or substantially more severe significant impacts would occur as a result of proposed Project modifications, and no new circumstance or information exist that would create significant impacts or require additional analysis. Therefore, there would be no additional and/or substantial adverse effect on, or additional and/or substantial degradation of, biological resources (habitat, species, and range of species) or human beings (directly or indirectly), or any new or more severe cumulatively considerable significant impacts. With implementation of applicable mitigation measures identified in the previously certified EIR and listed above under each issue area, proposed Project modifications would create no significant new or substantially more severe significant impacts to the relevant areas within these mandatory findings of significance categories.

ENVIRONMENTAL DETERMINATION:

In reviewing the site specific information provided for this project and acting as Lead Agency, the City of Roseville, Development Services Department, Planning Division has analyzed the potential environmental impacts created by this project and determined that the findings of CEQA Section 15162 concerning the decision not to prepare a subsequent EIR or negative declaration and the findings of CEQA Section 15164 concerning the decision to prepare an Addendum can be made. As supported by substantial evidence within the Addendum to the AMORUSO RANCH PROJECT SPECIFIC PLAN Environmental Impact Report (SCH #2013102057, certified on June 15, 2016), the Lead Agency makes the following findings:

[**X**] No substantial changes are proposed in the project which would require major revisions of the previous EIR.

[**X**] No substantial changes have occurred with respect to the circumstances under which the project is undertaken.

[**X**] There is no new information of substantial importance which was not known and could not have been known with the exercise of due diligence at the time the previous EIR was certified as complete.

[**X**] Only minor technical changes or additions are necessary in order to deem the adopted environmental document adequate.

DEVELOPMENT SERVICES DEPARTMENT–PLANNING DIVISION

311 Vernon St, Roseville, CA 95678 (916) 774-5276

ADDENDUM TO AMORUSO RANCH PROJECT SPECIFIC PLAN ENVIRONMENTAL IMPACT REPORT (SCH # 2013102057, CERTIFIED ON JUNE 15, 2016)

Project Title/File Number: Amoruso Ranch Specific Plan (ARSP) / 2011PL-039 (ANN-000007, GPA-000061, SPA-000043, RZ-000058 & DA-000047)

Project Location: Accessor Parcel Numbers (APN) 017-020-03, 017-020-036, 017-020-037, 017-010-010, 017-010-011; United States Geological Survey, "Pleasant Grove, CA" 7.5 Minute Topographic Quadrangle, Township 11 North Range 5 East, Sections 11 and 14, Mt. Diablo Baseline and Meridian.

Project Description

The Project as originally proposed and analyzed in the previously certified EIR includes the following components:

- Adoption of the ARSP, which establishes the land use and regulatory framework for approximately 695 acres of mixed-use development (residential, commercial, public/quasi-public, and open space);
- Approval of amendments to the City of Roseville (City) General Plan;
- Approval of pre-zoning designations;
- Approval of a large lot tentative subdivision map;
- Approval of development agreements between the City and the Applicant and landowners;
- Amendment of the City's sphere of influence to include the Project site; and
- Annexation of the project site into the City.

Proposed modifications to the Project and previously adopted EIR include the following:

- Adoption of amended ARSP;
- Approval of amended zoning designations;
- Approval of amended large lot tentative subdivision map;
- Approval of amended development agreement between the City and Applicant
- Adoption of Amended Mitigation Monitoring and Reporting Program (to Eliminate Mitigation Measure 4.12.1-1)

See below for more detail.

Project Applicant: Brookfield Residential / Amoruso Family Trust

Property Owner:

- Angela Eisenpress, Successor Trustee of the Amoruso Family Living Trust, Dated March 14, 2005

- Brookfield Sacramento Holdings, LLC, a Delaware Limited Liability Company

Lead Agency Contact: Gina McColl, Associate Planner

An Addendum to a previously certified and adopted environmental impact report (EIR) may be prepared for a project if only minor technical changes or additions are necessary or none of the conditions calling for the preparation of a subsequent EIR or negative declaration have occurred (California Environmental Quality Act Guidelines [CEQA] Section 15164). Consistent with CEQA Guidelines Section 15164, the below analysis has been prepared in order to demonstrate that none of the conditions described in Section 15162 of the CEQA Guidelines calling for preparation of a subsequent EIR have occurred and that only minor technical changes or additions are necessary in order to deem the certified EIR adequate to describe the impacts of the proposed project. CEQA Guidelines Section 15164 also states that an addendum need not be circulated for public review, but can be included in or attached to the certified EIR for consideration by the hearing body. This Addendum focuses only on those aspects of the project or its impacts that require additional discussion.

PROJECT DESCRIPTION

Project Location

For a detailed description of the project location, refer to Chapter 2 of the Amoruso Ranch Specific Plan (ARSP) and Chapter 2 of the environmental impact report (EIR), included here as Attachment 1. The project site is located along the northern edge of the City of Roseville, approximately 6.5 miles west of Interstate 80 and State Route 65 and 5 miles northwest of downtown Roseville on approximately 695 acres. The Project site consists of APNs 017-020-016-510, 017-020-017-510, 017-010-054-000, 017-010-010-000 and is found on the United States Geological Survey in the "Pleasant Grove, CA" 7.5 Minute Topographic Quadrangle, Township 11 North Range 5 East, Sections 11 and 14, Mt. Diablo Baseline and Meridian. See Figure 2-1 of the EIR and Figure 2.2 of the ARSP.

Background

For detailed Project background information, refer to Section 2.2 of the EIR. The ARSP was developed to comport with the City's growth vision and create a "comprehensively planned, residential-based community with a mix of land uses" to provide "employment opportunities" and "housing choices" to help the City meet "its obligation to accommodate…future population growth in the region" (Final EIR [FEIR], p. 2-9). In May 2011, a formal project application was submitted to the City, and in 2013 the notice of preparation (NOP) was released. The EIR was prepared to analyze potential environment effects associated with adoption of the ARSP and affiliated Project components and entitlements. The Draft EIR (DEIR) was distributed for public review on March 1, 2016. Several public workshops and hearings were held from March 10 to April 11, 2016, after which the FEIR was prepared. On April 14, 2016, the Planning Commission recommended that the City Council adopt and approve all Project components and affiliated entitlements of the ARSP and certify the EIR, and on June 15, 2016, the City Council did so (Resolution No. 16-271).

Thereafter, the Applicant began coordination with the U.S. Army Corps of Engineers (USACE) for a federal Clean Water Act (CWA) Section 404 permit as required for development of land featuring jurisdictional wetlands (FEIR, p. 2-63). During this process, the USACE required additional avoidance of wetland features above what was initially proposed and analyzed in the EIR. To meet this requirement and effectuate other minor Project changes, the ARSP has been amended, which in turn causes amendments to zoning designations, the large lot tentative subdivision map, and the development agreement between the City and Applicant, which are discussed in more detail below and analyzed throughout this addendum.

Environmental Setting

For a detailed description of the environmental setting of the project site and its surrounds, refer to the "Environmental Setting" subsections within Sections 4.1 through 4.15 in Chapter 4 of the EIR; see also Section 2.3 and Figure 2-6 of the EIR. The project site's land uses have been re-designated and rezoned as detailed in Chapter 4 of the ARSP and Chapter 2 of the EIR (and discussed below) and currently remains undeveloped. Prior land use designations for the project site and existing land use designations of its surrounds can be found in Sections 2.3 and 4.1.2 of the EIR (see FEIR, Figure 4.1-2). Generally, the site is characterized by gently rolling terrain and contains nonnative annual grasslands, some wetlands, and University Creek, which runs east to west through the southwest portion of the site (FEIR, pp. 2-4 to 2-6). Land to the north, east, and west of the northern portion of the site is in unincorporated Placer County and is comprised of rural subdivision with multi-acre parcels and agricultural land (FEIR, p. 4.1-2). Land to the south, southwest, and west of the southern portion of the project site is in the City, a portion of which to the southeast will remain open space as the planned Al Johnson Wildlife Area; another portion of which to the south is slated to be developed as a 501-acre residential development (Id., p. 4.1-4).

Proposed Project

Originally Proposed Project

For a detailed description of the originally proposed Project, refer to Chapter 4 of the ARSP and Chapter 2 of the EIR. A brief summary is included below.

Primary components of the originally proposed Project include:

- Adoption of the ARSP: The ASRP established the land use and regulatory framework for an approximate 695-acre mixed-use development that included 2,827 residential units (1,302 low density, 542 medium density, and 873 high density); 51 acres of commercial; 17 acres of public and quasi-public; 22 acres of parks; 145 acres of open space; and 20 acres for urban reserve uses. Development would occur over 30 years and three phases (FEIR, p. 2-58). The City Council adopted the ARSP and EIR on June 15, 2016.

- Approval of Amendments to the City General Plan: The project site was designated Agricultural/80-acre minimum in the Placer County General Plan (1994) and, as part of the Project, was annexed into the City and re-designated as indicated in Table 2-1 of the FEIR for future development as prescribed in Chapter 4 of the ARSP and Chapter 2 of the EIR. The General Plan amendments were approved by City Council on June 15, 2016.

- Approval of Pre-zoning Designations: The project site was zoned Building Site, 80 acres minimum (F-B-X 80 acre) by Placer County and, as part of the Project, was annexed into the City and rezoned as indicated in Table 2-1 of the FEIR for future development as prescribed in Chapter 4 of the ARSP and Chapter 2 of the EIR. The zoning designations were approved by City Council on June 15, 2016.

- Approval of Large Lot Tentative Subdivision Map: The large lot tentative subdivision map was approved by City Council on January 10, 2019; large lot final map recorded May 3, 2019, in Book EE of Maps, at Page 51, Official Records of Placer County.

- Approval of Development Agreements between City and the Applicant and Landowners: The development agreements are binding contracts through which the ARSP would be implemented. They were approved by City Council on June 15, 2016.

- Amendment of the City's Sphere of Influence: The City's sphere of influence would be amended to include the project site. The sphere of influence was approved for amendment by City Council on June 15, 2016.

- Annexation of Project site into City: The project site would be annexed into the City from the County upon approval by Placer County LAFCO. A request to LAFCO for annexation was approved by City Council on June 15, 2016. LAFCO approved annexation on December 18, 2018.

Proposed Project Modifications

Modifications to the proposed Project are described below and analyzed for their potential environmental effects throughout this addendum.

- Adoption of Amended ARSP: The ARSP will be amended to include additional avoidance of wetland features and implement other minor Project changes. Amendments listed below are discussed in revised Sections 4.1 through 4.3 of the ARSP Amendment, included here as Attachment 2, and reflected in revised Figure 4.1 and Tables 4.1 and 4.2. The Amended ARSP will require adoption by City Council.

- Increase of approximately 10-acres of land designated as Open Space and zoned Open Space (OS) in parcels AR-97 and AR-105 along the southern border of the project site, to accommodate USACE's requirement for additional wetland avoidance in order to obtain a CWA Section 404 permit;
  - To accommodate this increase in open space, the following would occur:
    - A reduction of approximately 10-acres of land designated as Low Density Residential and zoned Small Lot Residential (RS) in parcels AR-24 and AR-37, which abut the increased open space area at the southern border of the project site
    - A corresponding transfer of 50 Low Density Residential (LDR) units from these parcels to 50 Community Commercial – Village Center (CC-VC) residential units to be located within the inner core of the project site on AR-52;

- Assorted smaller acreage transfers from parcels designated and zoned for residential to those designated and zoned for open space to accommodate an increase in buffers between developed and undeveloped portions of the Project;

- Amended zoning designation for parcels AR-1, AR-2, and AR-3 from Single-Family Residential (R1) to Small Lot Residential (RS), to accommodate changing demographics and market trends;

- Division of parcel AR-55 into three separate parcels (AR-55, AR-58, and AR-59) to better match comparable specific plans within the City's sphere of influence that have created separate parcels for separate Public/Quasi Public land uses (ARSP Amendment, pp. 9-2, B-17), with AR-58 remaining reserved for water facilities (included the potential well site), AR-59 remaining reserved for recycled water and wastewater, and AR-55 remaining reserved for other undetermined community purposes. All three parcels will be dedicated to the City in fee.

- Removal of the planned 60 kilovolt (kV) electrical line along Westbrook Boulevard and Road A, to accommodate changes with the neighboring planned development Placer Ranch that will remain under Placer County jurisdiction instead of being annexed in to the City as previously planned (ARSP Amendment, pp. 9-13 to 9-14; see FEIR, p. 4.12-5-3); and

- Additional restrictions on fencing and housing placement along open space boundaries that require fencing to remain visually open no more than 50 percent of open space to have homes backing onto it (see ARSP Amendment, Appendix A, pp. A-4 to A-5).

- Minor changes to the water transmission and drainage systems in the southeastern portion of the project site to accommodate the above-described changes (see ARSP Amendment, pp. 9-4, 9-10; see also Utility Systems Updates Technical Memorandum, included here as Attachment 3).

- Approval of Amended Zoning Designations: The amended zoning designations described above will require City Council approval.

- Approval of Amended Large Lot Tentative Subdivision Map: The large lot tentative map has been amended to reflect the ARSP amendments described above and will require Planning Commission approval.

- Approval of Amended Development Agreement between City and Applicant: Amendments to the development agreement between the City and Applicant have been made to reflect the ARSP amendments described above and will require City Council approval. The amended development agreement is included here as Attachment 4.

- Re-adoption of Amended Mitigation Monitoring and Reporting Program (to Eliminate Mitigation Measure 4.12.1-1): Mitigation Measures (MM) 4.12.1-2 will be eliminated because it has been determined that the City is responsible for securing and ensuring a water supply to the project site—not the Applicant (FEIR, p. 4.12.1-67). In lieu, the Applicant shall pay the City water connection fees. The Mitigation Monitoring and Reporting Program (MMRP) adopted on June 15, 2016 (see Resolution No. 16-271) will be amended to exclude this measure and requires re-adoption by City Council.

PURPOSE AND SCOPE OF ADDENDUM

Basis for Addendum

This addendum has been prepared pursuant to CEQA Guidelines and legislative directives (CEQA Guidelines § 15164; Public Resources Code [PRC] §§ 21083, 21166). An addendum is an appropriate subsequent document to a previously certified EIR when some changes to a project are necessary, but those changes do not create new or increased significant environmental impacts that warrant major revisions to the previous document (CEQA Guidelines §§ 15162(a), 15164(a); see *Save Our Heritage Organisation v. City of San Diego* (2018) 28 Cal.App.5th 656, 668). Also, an addendum is appropriate when circumstances surrounding a project have not substantially changed and when no new information of substantial importance has been uncovered that indicates the project would create new significant impacts or increase the severity of the previously identified significant impacts (Ibid). Substantial evidence presented in this addendum demonstrates that the proposed Project modifications, described above and analyzed below, do not create any new significant impacts or increase the severity of previously identified significant impacts, nor are there any new circumstances or new information that would create such impacts or require more robust analysis (CEQA Guidelines § 15162(a)). Therefore, an addendum is the appropriate CEQA document, and a subsequent or supplemental EIR is not warranted (Id., § 15164(e)).

2018 CEQA Checklist Update

Since certification of the previous EIR, the Appendix G Checklist in the CEQA Guidelines has been updated, effective early 2019. Although not required, the updated checklist is included in this Addendum along with the prior version, as applicable as part of a good-faith effort to provide the most up-to-date information to decision makers and the public. (PRC §§ 21002.1(e), 210065; see CEQA Guidelines §§ 15002(a)(1), 15003(c).) The updated checklist is presented in strike out/underline to clearly show changes, which are discussed in the analysis where appropriate. This revised checklist material is not considered "new information" as defined in CEQA Guidelines section 15162(a)(3). (See *Citizens Against Airport Pollution v. City of San Jose* (2014) 227 Cal.App.4th 788, 808; *Cleveland National Forest Foundation v. San Diego Assn. of Governments* (2017) 17 Cal.App.5th 413, 426.)

Impact Conclusions in Previous EIR

The EIR to which this addendum is being attached was certified by the City Council on June 15, 2016. It is currently available for review at the City of Roseville, Development Service Department, Planning Division, 311 Vernon Street, Roseville, CA, 95678, and online at https://www.roseville.ca.us under Government/Departments & Divisions/Planning/Specific Plans, Planning Areas & Development Agreements/Amoruso Ranch Specific Plan. See Background section above for more details.

The EIR identified the following impacts as significant and unavoidable:

- 4.1-3: Potential Incompatibility with Existing Agricultural and Other Land Uses in Placer County and the City of Roseville

- 4.1-8: Cumulative Impacts From Agricultural Resources Conversion
- 4.3-5: Increased Traffic Volumes at Intersections within Placer County, Sutter County, Sacramento County, or City of Lincoln Under Existing Conditions
- 4.3-6: Increased Traffic Volumes on Roadways Within Placer County, Sutter County, Sacramento County, or City of Rocklin Under Existing Conditions
- 4.3-8: Increased Traffic Volumes on State Highways Under Existing Conditions
- 4.3-9: Increased Traffic at City of Roseville Intersections Under 2035 CIP Conditions
- 4.3-11: Increased Traffic on Placer County, Sutter County, Sacramento County, City of Rocklin, or City of Lincoln Intersections Under 2035 CIP Conditions
- 4.3-12: Increased Traffic Volumes on Roadways within Placer County, Sutter County, Sacramento County, or City of Rocklin Under 2035 CIP Conditions
- 4.4-1: Generate Short-Term Construction Related Emissions of Criteria Air Pollutants
- 4.4-2: Generate Long-Term Operational Related (Regional) Emissions of Criteria Air Pollutants
- 4.4-5: Exposure of Sensitive Receptors to Odors
- 4.4-6: Consistency with Plans and Policies
- 4.5-1: Generate a Substantial Contribution To GHG Emissions that Conflicts with an Applicable Plan or Policy
- 4.6-1: Short-Term Noise Generated by Construction Activity
- 4.6-5: Substantial Permanent Increase in Ambient Noise Levels as a Result of the Existing Plus Project Increase in Traffic Noise
- 4.6-7: Substantial Permanent Increase in Ambient Noise Levels as a Result of the 2035 CIP Plus Project Increase in Traffic Noise Outside the Project Site
- 4.12.3-3: Construction or Expansion of Wastewater Treatment Facilities
- 4.13-6: Construction of Off-Site Stormwater Retention Facilities
- 4.14-1: Alteration of the Visual Character of the Site and Vicinity
- 4.14-2: New Sources of Light and Glare
- 4.14-3: Degradation of Scenic Resources and Scenic Vistas

The EIR also identified the following cumulative impacts as significant and unavoidable:

- 4.3-15: Increased Traffic on City of Roseville Intersections Under 2035 Cumulative Conditions
- 4.3-17: Increased Traffic on Placer County, Sutter County, Sacramento County, or City of Lincoln Intersections Under 2035 Cumulative Conditions
- 4.3-20: Increased Traffic Volumes on State Highways Under 2035 Cumulative Conditions
- 4.4-7: Result in a Cumulatively Considerable Net Increase in Criteria Pollutants
- 4.6-9: Substantial Permanent Increase in Ambient Noise Levels as a Result of the 2035 Cumulative Plus Project Increase in Traffic Noise Outside the Project Site
- 4.8-18: Cumulative Impacts to Biological Resources
- 4.12.1-4: Capacity of Water Treatment System to Meet Potable Water Demand
- 4.12.1-8: Cumulative Water Supply and Water Treatment Impacts
- 4.12.3-5: Cumulative Wastewater Impacts
- 4.12.4-5: Cumulative Solid Waste Impacts
- 4.14-4: Cumulative Aesthetic Impacts

No new impacts, including significant or unavoidable ones, occur as a result of proposed Project modifications, and none of the previously identified impacts are made substantially more severe (discussed in more detail below).

Issue Areas Removed from Additional Evaluation

Proposed Project modifications would not require additional construction or development on undeveloped land beyond what was previously analyzed in the certified EIR because there would be no increase in residential units and no other planned development where it was previously unplanned (see EIR, Figure 2-3, Section 2.11, and Section 4, compared with to ARSP Amendment, Figure 4.1). In fact, the increase in open space and decrease in development of undeveloped acreage from the original ARSP would slightly reduce environmental impacts overall. As a result, proposed Project modifications do not have the potential to change the regulatory framework, impact discussion, mitigation measures, or significance conclusions for the following issue areas: aesthetics, agriculture and forestry resources, air quality, cultural resources, energy, geology and soils, greenhouse gas emissions, hazards and hazardous materials, hydrology and water quality, mineral resources, noise, population and housing, public services, recreation, transportation, tribal cultural resources, and wildfire. These areas are not analyzed further in the checklist but are discussed briefly below. CEQA only requires that environmental documents give decisionmakers sufficient detail on environmental consequences and does not purport to merely "generate paper" by excessively explaining consequences that are "so simple they are almost self-explanatory." (*Save Our Residential Environment v. City of West Hollywood* (1992) 9 Cal.App.4th 1745, 1754; *Laurel Heights Improvement Assn. v. Regents of University of California* (1988) 47 Cal.3d 376, 393; *Save Our Residential Environment v. City of West Hollywood* (1992) 9 Cal.App.4th 1745, 1754).

Revisions made to the ARSP would not change the overall aesthetic nature of the planned development, and some serve to reduce visual impacts—specifically the new open fencing and home placement restrictions that allow more open space to be viewed by visual receptors. Therefore, aesthetics need not be further analyzed. Similarly, agriculture and forestry resources, cultural resources, geology and soils, hydrology and water quality, mineral resources, recreation, and tribal cultural resources do not require additional analysis. These issue areas require disturbance of previously undisturbed land to incur environmental effects, and the proposed Project modifications will not disturb more undisturbed land than previously analyzed in the certified EIR because it does not include new construction or development. Further, no increase in "construction and/or operation" means no additional or more severe impacts to, or from, energy, hazards and hazardous materials, noise, population and housing, public services, and recreation because there can be no physical environmental change to these issue areas without the impetus of such project action (FEIR, p. 1-9; see CEQA Guidelines §§ 15358(b), 15378(a)). And, changes to the water transmission and drainage systems that will occur in the southeastern portion of the project site are so minor that the systems remain "largely unchanged," with water and drainage flows remaining "the same," thereby precluding environmental impacts to issue areas as a result (see Utility Systems Updates Technical Memorandum, pp. 5, 10).

Impacts to transportation systems also would not increase because proposed Project modifications would not generate any significant amount of new vehicle trips beyond what was previously analyzed in the certified EIR (FEIR, pp. 4.3-43 to 4.3-44). Trip generation rates are based on development of structures and their respective land uses (e.g., high-density residential, low-density residential, commercial) (FEIR, Appendix M [p. 64]). No additional development will occur under proposed Project modifications, and the only relevant land-use shift will be a rezone that allows 50 residential units to change from a lower density housing designation (LDR) to higher density housing designation (CC-VC). This rezone will result in a slight decrease in the amount of daily trip numbers shown in the FEIR and will not exceed the City's threshold for requiring additional analysis, which is set at an increase of 50 PM peak-hour trips (see FEIR, Table 4.3-7 [currently showing 609 PM peak-hour trips for multi-family residential units, significantly less than the 1,954 PM peak-hour trips for single-family residential]). Further, projected area distribution of vehicle trips will not change because the Project was analyzed with one external point of entry/egress only, which does not change with proposed modifications (see FEIR, Figure 4.3-5). No significant increase in vehicle trips, construction, or development means no increase in air pollutants and greenhouse gas emissions because these are only relevant sources of project-related air pollutants (FEIR, p. 4.4-22 to 4.4-26, 4.5-20). Therefore, no additional environmental impacts to air quality and from greenhouse gas emissions would occur that could warrant further checklist evaluation. Lastly, wildfire need not be further addressed because the project site is not within a State Responsibility Area, which is a checklist threshold for

wildfire analysis; upon annexation it received fire protection from the Roseville Fire Department and not CAL FIRE (FEIR, pp. 4.11-5, 4.11-8).

A full discussion of how these issue areas may be impacted by the Project can be found in Chapter 4 of the EIR. See also "No New Circumstances or New Information" below.

Issue Areas Receiving Additional Evaluation

Some proposed ARSP amendments and EIR revisions, however, are so closely tied to certain issue areas that, although no impacts are anticipated, were evaluated out of an abundance of caution, specifically: biological resources, land use and planning, and utilities (water supply). See also "No New Circumstances or New Information" below.

No New Circumstances or New Information

Since certification of the previous EIR on June 15, 2016, circumstances surrounding the formerly proposed project and its location have not substantially changed nor has any new information of substantial importance come to light that indicates the Project would create new significant impacts or increase the severity of existing significant impacts (CEQA Guidelines § 15162(a)). No new projects beyond those discussed in the previously certified EIR have been approved or proposed within the vicinity of the project site that could impact or increase the Project's environmental effects, and the City is not aware of any other new information that might bear relevance on the Project's CEQA analysis. Nor is there new information of substantial importance showing that: (i) mitigation measures or alternatives previously found to be infeasible would actually now be feasible and would substantially reduce one or more significant effects of the proposed project, but the project proponents decline to adopt the mitigation measure or alternative; or (ii) mitigation measures or alternatives considerably different from those analyzed in the previously certified CEQA documents would substantially reduce one or more significant effects, but the proponents decline to adopt the mitigation measure or alternative. Therefore, there is no evidence on the record, or otherwise reasonably discoverable, indicating that any new circumstances or new information exist that that would: (a) create new significant impacts; (b) substantially increase the severity of previously identified significant impacts; (c) or require additional analysis or verification. As a result, all boxes in the "New Circumstances" and "New Information" columns in the checklist below are marked "No." Note that USACE's requirement for additional wetland avoidance, discussed above in the "Background" section and below in Biological Resources," is a not a result of newly discovered wetlands or inadequate EIR analysis or mitigation measures but a product of unanticipated requirements by the agency.

ENVIRONMENTAL CHECKLIST FOR ADDENDUM ENVIRONMENTAL REVIEW

The purpose of this checklist is to evaluate the categories in terms of any "changed condition" (i.e. changed circumstances, project changes, or new information of substantial importance) that may result in a changed environmental result. A "no" answer does not necessarily mean there are no potential impacts relative to the environmental category, but that there is no change in the condition or status of the impact since it was analyzed and addressed in prior environmental documents.

EXPLANATION OF CHECKLIST EVALUATION CATEGORIES

Where Impact was Analyzed
This column provides a cross-reference to the pages of the prior environmental documents where information and analysis may be found relative to the environmental issue listed under each topic.

Do Proposed Changes Involve New Significant Impacts?
Pursuant to Section 15162(a)(1) of the CEQA Guidelines, this column indicates whether the changes represented by the current project will result in new significant impacts that have not already been considered

and mitigated by the prior environmental review documents and related approvals, or will result in a substantial increase in the severity of a previously identified impact.

Any New Circumstances Involving New Impacts?
Pursuant to Section 15162(a)(2) of the CEQA Guidelines, this column indicates whether there have been changes to the project site or the vicinity (circumstances under which the project is undertaken) which have occurred subsequent to the certification or adoption of prior environmental documents, which would result in the current project having new significant environmental impacts that were not considered in the prior environmental documents or that substantially increase the severity of a previously identified impact.

Any New Information Requiring New Analysis or Verification?
Pursuant to Section 15162(a)(3)(A–D) of the CEQA Guidelines, this column indicates whether new information of substantial importance which was not known and could not have been known with the exercise of reasonable diligence at the time the previous environmental documents were certified or adopted is available requiring an update to the analysis of the previous environmental documents to verify that the environmental conclusions and mitigation measures remain valid. Either "yes" or "no" will be answered to indicate whether there is new information showing that: (A) the project will have one or more significant effects not discussed in the prior environmental documents; (B) that significant effects previously examined will be substantially more severe than shown in the prior environmental documents; (C) that mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or (D) that mitigation measures or alternatives which are considerably different from those analyzed in the prior environmental documents would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative. If "no," then no additional environmental documentation (supplemental or subsequent EIR) is required.

Mitigation Measures Implemented or Addressing Impacts
Pursuant to Section 15162(a)(3) of the CEQA Guidelines, this column indicates whether the prior environmental documents provide mitigation measures to address effects in the related impact category. In some cases, the mitigation measures have already been implemented. A "yes" response will be provided in any instance where mitigation was included, regardless of whether the mitigation has been completed at this time. If "none" is indicated, this environmental analysis concludes a significant impact does not occur with this project, no mitigation was previously included, and no mitigation is needed.

DISCUSSION AND MITIGATION SECTIONS

Discussion
A discussion of the elements of the checklist is provided under each environmental category in order to clarify the answers. The discussion provides information about the particular environmental issue, how the project relates to the issue and the status of any mitigation that may be required or has already been implemented.

The discussion below relies on analysis conducted for the EIR with minor supplements were appropriate.

Mitigation Measures
Applicable mitigation measures from the prior environmental review that apply to the project are listed under each environmental category.

Conclusions
A discussion of the conclusion relating to the analysis contained in each section.

2018 CEQA Checklist Update:					
c) Have a substantial adverse effect on <u>state or</u> federally protected wetlands ~~as defined by Section 404 of the Clean Water Act~~ (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	See item c above				

Discussion: Biological resources are discussed in Section 4.8 of EIR. Impacts to biological resources as a result of Project implementation are discussed in Section 4.8.4 of the EIR, and mitigation measures to reduce these impacts are included in Section 4.8.5. The EIR addressed 18 impacts to biological resources, most of which were determined to be reduced to a less-than-significant level with mitigation. However, the EIR concluded that the Project would contribute to a significant and unavoidable cumulative impact to regional biological resources in conjunction with other regional development.

Relevant proposed Project modifications include an amendment to the ARSP to add 10 acres of open space by expanding parcels that are already approved and designated/zoned for open space and reducing parcels already approved and designated/zoned for residential development and, to a lesser degree, assorted other smaller acreage transfers from land designated/zoned residential to open space (see "Project Description" above). The purpose of this 10-acre increase in open space is for additional avoidance of federally protected wetlands that occur on the project site, at the behest of the USACE—the federal permitting agency with jurisdiction over the required Section 404 permit (FEIR, p. 4.8-36). As part of the Section 404 permitting process, the USACE requested that the Applicant develop an alternative that would result in reduced adverse impacts to the aquatic environment, specifically to wetland resources within the southern portion of the Project site. This request for additional wetland avoidance was not known or anticipated at the time the original ARSP and EIR were prepared and adopted/certified. The Applicant and City have undertaken extensive consultation with the USACE during Project and document planning and preparation between June 2011 and November 2013, which resulted in the wetland protection and mitigation outlined in the EIR (see FEIR, p. 4.8-35). However, after preparation and release of the draft environmental impact statement (EIS) as required under the National Environmental Policy Act (NEPA) for issuance of a Section 404 permit for the Project (USACE Action ID: SPK-2004-00888), the Applicant and the USACE continued to examine potential ways that the Project could be further modified to avoid wetlands, particularly in the southern portion of the Project site. As a result, the

proposed Project modifications include a revised land use plan that enlarges the southwestern open space area and reduces wetland impacts.

Parcels affected by this 10-acre transfer and other smaller acreage transfers are located on or near the southern/southwestern border of the project site and were found to contain terrestrial habitat (annual grassland) and aquatic habitat (vernal pools, seasonal wetland, seasonal wetland swale, intermittent drainage, seasonal creek/stream) along with vernal pool fairy shrimp, a federally protected special-status specie (see ARSP Amendment, Figure 4.1; FEIR, Figures 4.8-1 and 4.8-2, pp. 4.8-3 to 4.8-9 and 4.8-25 to 4.8-26). However, none of these, or any other, biological resources will be impacted by proposed Project modifications because no new or increased construction or development would occur that could impact habitat and species. In fact, the increase in open space will provide additional protection for habitat and species, specifically wetlands and fairy shrimp, essentially decreasing impacts and creating a beneficial effect that comports with, and does not conflict with, local policies/ordinances or conservation plans designed to protect species. Therefore, no substantially new or more severe significant impacts to biological resources as a result of proposed Project modifications will occur.

Mitigation Measures: Proposed Project modifications will not increase the potential for new significant or more severe significant impacts to biological resources, therefore no previous mitigation measures apply, and no new mitigation is warranted.

Conclusion: Proposed Project modifications will not create any significant new or substantially more severe significant impacts to biological resources; no mitigation is required.

Land Use and Planning

~~c) Conflict with any applicable habitat conservation plan or natural community conservation plan?~~	Question deleted; see updated Land Use item b and Biological Resources item f				

Discussion*:* Land use and planning is discussed in Section 4.1 of EIR. Impacts to land use and planning as a result of Project implementation are discussed in Section 4.1.4 of the EIR. The EIR addressed four impacts to land use and planning, three of which were less than significant level with mitigation. However, the EIR concluded that the Project would contribute to the significant and unavoidable impact of incompatibility with existing land uses.

Relevant proposed Project modifications include a 10-acre increase in land designated as Open Space and zoned Open Space (OS) and a commensurate 10-acre decrease in land designated as Low Density Residential and zoned Small Lot Residential (RS), along with assorted smaller acreage transfers from land designated/zoned residential to open space (see "Project Description" above). As a result of this acreage

shift, 50 proposed residential units would be transferred from parcels AR-24 and AR-37 to parcel AR-52 as higher density residential units (within the inner core of the project site). Additionally, amendments to zoning designations are proposed for parcels AR-1, AR-2, and AR-3 to rezone them from Single-Family Residential (R1) to Small Lot Residential (RS), to accommodate changing demographics and market trends. Further, a division of parcel AR-55 is proposed to create three separate parcels (AR-55, AR-58, and AR-59) in order to better match comparable specific plans within the City's sphere of influence that have created separate parcels for separate Public/Quasi Public land uses. After division, AR-58 will be reserved for water facilities, included a potential well site, AR-59 will be reserved for recycled water and wastewater facilities, and AR-55 will be reserved for other undetermined community purposes—all of these facilities were previously analyzed in the EIR (FEIR, pp. 2-12, 2-18, 4.12.1-36 to 4.12.1-67, 4.12.2-5 to 4.12.5-10). All three parcels will be dedicated to the City in fee.

These proposed amendments to zoning and land use do not change the overall nature of the Project and proposed development nor do they introduce any land uses that dramatically differ from those already analyzed in the previously certified EIR and approved by the City. These amendments would not physically divide an established community because, as stated in the EIR, “no community would be divided by the Proposed Project, as the project site is comprised of vacant land” (FEIR, p. 4.1-31). Further, like the originally proposed Project, the proposed amendments to land use and zoning would not conflict with (i.e., would be “consistent with”) applicable land use plans, policies, and regulations, including: the City Blueprint Implementation Strategies, the City General Plan (Community Design Goals, Community Form, Growth Management), some City Zoning Ordinances (allowed uses), CALTRANS Airport Land use Handbook, and the McClellan Land Use Compatibility Plan (FEIR, pp. 4.1-31, 4.1-34, 4.1-37, 4.1-39, 4.1-43). Because there would be no conflict, there would be no significant environmental effect as a result of a conflict. Likewise with internal land uses within the proposed development and as outlined in the specific plan, the proposed changes would not conflict with the following applicable guidelines, and not cause a significant environmental effect as a result: the City Community Design Guidelines, City General Plan (Community Design Goals and Policies, Community Forum Goals and Policies) and City Zoning Ordinance (allowed uses), with implementation of mitigation for noise and construction emission reductions (FEIR, pp. 4.1-35 to 4.1-38).

Also, similar to the originally proposed Project, the proposed amendments have the potential to conflict with the City General Plan (Community Form-Relationship of New Development) and the Placer County General Plan (agricultural policies) in a way that causes a significant and unavoidable impact (FEIR, pp. 4.1-39 to 4.1-43). Any conflicts with the City Zoning Ordinance discussed in the EIR under Impact 4.1-3 are not applicable here as the project site as already been zoned for development as prescribed in the original ARSP (see Resolution No. 16-271) (FEIR, pp. 4.1-42 to 4.1-43). There are no mitigation measures presented or available to reduce this impact. However, this impact would not be made substantially more severe by the proposed amendments because, as stated above, the proposed amendments do not change the overall nature of the Project and proposed development nor do they introduce any land uses that dramatically differ from those already analyzed. Further, there are no conflicts with applicable habitat conservation plan or natural community conservation plans; see “Biological Resources” above. Therefore, no substantially new or more severe significant impacts to land use and planning as a result of proposed Project modifications will occur.

Mitigation Measures: To lessen Impact 4.1-2, the following mitigation measure prescribed in the EIR are applicable to proposed Project modifications: MM 4.6-1a–d, MM 4.6-2, MM 4.4-1.

Conclusion: With implementation of applicable mitigation measures identified in the previously certified EIR and listed above, proposed Project modifications will not create any significant new or substantially more severe significant impacts to land use and planning.

Utilities and Service Systems

Discussion: Proposed Utilities and service systems are discussed in Section 4.12 of the EIR. Impacts to utilities and services systems as a result of Project implementation are discussed in Sections 4.12.1.4, 4.12.2.4, 4.12.3.4, 4.12.4.4, and 4.12.5.4 of the EIR, and mitigation measures to reduce these impacts are included in Sections 4.12.1.5, 4.12.2.5, 4.12.3.5, 4.12.4.5, and 4.12.5.5. The EIR addressed 25 impacts to utilities and services systems, most of which will be reduced to a less-than-significant level with mitigation. However, the EIR concluded that the Project would contribute to five significant and unavoidable impacts to utilities and services systems, one of which occurs only in the cumulative scenario.

The proposed Project modifications have limited interplay with utilities and services systems, which are, therefore, by and large not applicable for analysis here. The division of parcel AR-55 that establishes separate parcels for separate utility facilities does not change the proposed location or function of these facilities. The change is in name only (as re-parceling) and is proposed to better match other comparable specific plans within the City's sphere of influence that have created separate parcels for separate Public/Quasi Public land uses. These facilities and their locations were previously analyzed in the EIR (FEIR, pp. 2-12, 2-18, 4.12.1-36 to 4.12.1-67, 4.12.2-5 to 4.12.2-10). Removal of the planned 60 kV electrical line along the Westbrook Boulevard and Road A from the ARSP will not impact utilities for the Project because that line was intended to service the planned neighboring community of Placer Ranch at a time when it was assumed that the City would annex that land and be the lead agency (FEIR, p. 4.12-5-3). However, Placer Ranch will remain in Placer County and obtain its electrical service in another manner (see Final EIR for Sunset Area Plan/Placer Ranch Specific Plan, SCH # #2016112012; specific plan adopted by Placer County Board of Supervisors on December 10, 2019 [Resolution 2019-241]). And, changes to the water transmission and drainage systems that will occur in the southeastern portion of the project site are so minor that the systems remain "largely unchanged," with water and drainage flows remaining "the same," thereby precluding environmental impacts to utilities and service systems as a result and actually lowering "water use factors and lower wastewater generation rates for the project" overall (see Utility Systems Updates Technical Memorandum, pp. 5, 10).

The one proposed Project modification that could impact utilities and service systems is the elimination of MM 4.12.1-1 and subsequent amendment of the MMRP—the original version of which was adopted by the City on June 15, 2016 (see Resolution No. 16-271). Consequently, only water supply is substantively discussed here because the measure being eliminated purported to mitigate impacts to water supply.

Impacts to water supply as a result of Project implementation are discussed in Section 4.12.1.4 of the EIR; MM 4.12.1-1 was adopted to reduce these impacts. (See Section 4.12.1.5.) The EIR addressed eight impacts to water supply, one of which was considered potentially significant (Impact 4.12.1-1) and two of which were considered significant and unavoidable in the cumulative scenario (Impact 4.12.1-4 and Impact 4.12.1-8). MM 4.12.1-1 was included to reduce Impact 4.12.1-1 to a less-than-significant level.

MM 4.12.1-1 requires that the Applicant provide a "proportionate share of required funding to the City" for water supply, with the City entering into an agreement with Placer County Water Agency (PCWA) to secure water supply for the Project. Constraints were put on the water source in that it need be: (1) "legally available and sufficient" to meet Project demands, (2) consistent with applicable regulations, (3) subject to environmental review, (4) approved by the agency with jurisdiction over the water, and (5) funded (FEIR, p. 4.12.1-67). In lieu of this mitigation established in 2016, the Applicant shall instead pay the City water connection fees that are required pursuant to a recent update of the City Municipal Code section 14.08.025 - Water connection fees (see Ord. 6100 § 2, 2019). Section 14.08.025 calculates water connection fees based on a "dwelling unit equivalent" (DUE) wherein the fee amount depends on whether the DUE is designated Low Density Residential or High Density Residential; connection fees are adjusted annually.

To determine if an effect would be significant under CEQA, a lead agency develops or adopts thresholds of significance, either generally or on a case-by-case basis, compliance with which means the impact would be less than significant (CEQA Guidelines §§ 15064(b)(2), 15064.7(a)–(b)). Here, the City adopts its water connection fee as the threshold of significance for impacts to water supply (i.e., for "determining whether a project would have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years") because it creates a consistent standard by which usage, preservation, and maintenance of the local raw water supply can be measured and controlled to ensure sufficient water supplies are available to serve the Project and the remainder of the City during normal and dry years while not depleting supplies (see Municipal Code § 14.08.025(a); CEQA Guidelines § 15064.7(d); FEIR, p. 4.12.1-39; see also Municipal Code § 14.09.020). Thus, compliance with section 14.08.025 ensures less-than-significant impacts to water supply. Compliance with regulatory programs, such as municipal codes, generally provide sufficient evidence under CEQA that an impact will not have an effect on the environment and therefore does not require mitigation (see *Mission Bay Alliance v. Office of Community Investment & Infrastructure* (2016) 6 Cal.App.5th 160). Here, the Applicant must pay the water connection fee before the City will issue building permits for the planned development, therefore, compliance is ensured and impacts to water supply are less than significant—i.e., Impact 4.12.1-1 is reduced to less than significant without mitigation (see Municipal Code § 14.08.025(D); FEIR, p. 4.12.1-40). Further, as stated above, proposed modifications will result in "lower water use" overall (see Utility Systems Updates Technical Memorandum, p. 5).

Mitigation Measures: Proposed Project modifications will not increase the potential for new or more severe significant impacts to utilities and service systems, specifically water supply, because payment of the City water connection fee will ensure potential impacts (Impact 4.12.1-1) remain at a less-than-significant level; therefore no previous mitigation measures apply and no new mitigation is warranted.

Conclusion: Proposed Project modifications will not create any significant new or substantially more severe significant impacts to utilities and service systems, specifically water supply; no mitigation is required.

Mandatory Findings of Significance

	Where Impact Was Analyzed in Prior Environmental Documents.	Do Proposed Changes Involve New Significant Impacts or Substantially More Severe Impacts?	Any New Circumstances Involving New Significant Impacts or Substantially More Severe Impacts?	Any New Information Requiring New Analysis or Verification?	Prior Environmental Documents Mitigation Measures Implemented or Addressing Impacts.
a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of an endangered, threatened or rare species, or eliminate important examples of the major periods of California history or prehistory?	See EIR Section 4.8 (Vegetation and Wildlife) See also "Biological Resources" and "Purpose and Scope of Addendum" above	No	No	No	See EIR Section 4.8 (Vegetation and Wildlife) See also "Biological Resources" and "Purpose and Scope of Addendum" above
b) Does the project have impacts which are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)	See EIR Sections 4.1 Land Use and Agriculture), 4.8 (Vegetation and Wildlife), and 4.12.1 (Public Utilities Water) See also "Biological Resources," "Land Use and Planning," "Utilities and Service Systems," and "Purpose and	No	No	No	See EIR Sections 4.1 Land Use and Agriculture), 4.8 (Vegetation and Wildlife), and 4.12.1 (Public Utilities Water) See also "Biological Resources," "Land Use and Planning," "Utilities and Service Systems," and "Purpose and Scope of Addendum" above

	Scope of Addendum" above				
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	See EIR Section 4.12.1 (Public Utilities Water) See also "Utilities and Service Systems" and "Purpose and Scope of Addendum" above	No	No	No	See also "Utilities and Service Systems" and "Purpose and Scope of Addendum" above
2018 CEQA Checklist Update:					
a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or restrict the range of an endangered, threatened or rare species, or eliminate important examples of the major periods of California history or prehistory?	See above.				

Discussion:

This section makes mandatory findings of significance only for those issue areas potentially impacted by proposed Project modifications, as described above and analyzed throughout this addendum. The previously certified EIR discloses all potential environmental impacts, their level of significance, and mitigation measures to reduce significance for the originally proposed Project; mandatory findings of significance for which can be found in Appendix B of the FEIR.

As discussed above in this addendum, no significant new or substantially more severe significant impacts would occur as a result of proposed Project modifications, and no new circumstance or information exist that would create significant impacts or require additional analysis. Therefore, there would be no additional and/or substantial adverse effect on, or additional and/or substantial degradation of, biological resources (habitat, species, and range of species) or human beings (directly or indirectly), or any new or more severe cumulatively considerable significant impacts.

Mitigation Measures: See measures listed in each issue area discussion for those applicable to proposed Project modifications.

Conclusion: With implementation of applicable mitigation measures identified in the previously certified EIR and listed above under each issue area, proposed Project modifications would create no significant new or substantially more severe significant impacts to the relevant areas within these mandatory findings of significance categories.

ENVIRONMENTAL DETERMINATION:

Based on analysis conducted in this addendum and in the previously certified EIR, it is determined that implementation of proposed Project modifications, as described in this addendum, would not result in any new or substantially more severe environmental impacts, either directly or as a result of new circumstances or information. The City may take the following actions in compliance with CEQA:

- Adopt the amended ARSP
- Approve the amended land use designations
- Approve the amended zoning designations
- Approve the amended large lot tentative subdivision map
- Approve the amended development agreement between City and Applicant
- Re-adopt the amended MMRP

In reviewing the site specific information provided for this project and acting as Lead Agency, the City of Roseville, Development Services Department, Planning Division has analyzed the potential environmental impacts created by this project and determined that the findings of CEQA Section 15162 concerning the decision not to prepare a subsequent EIR and the findings of CEQA Section 15164 concerning the decision to prepare an Addendum can be made. As supported by substantial evidence within the Addendum to the AMORUSO RANCH PROJECT SPECIFIC PLAN Environmental Impact Report (SCH # 2013102057, certified on June 15, 2016), the Lead Agency makes the following findings:

[**X**] No substantial changes are proposed in the project which would require major revisions of the previous EIR.

[**X**] No substantial changes have occurred with respect to the circumstances under which the project is undertaken.

[**X**] There is no new information of substantial importance which was not known and could not have been known with the exercise of due diligence at the time the previous EIR was certified as complete.

[**X**] Only minor technical changes or additions are necessary in order to deem the certified environmental document adequate.

4.3 Land Use Designations

Land uses within the ARSP are implemented through the zoning designation assigned to each parcel. This includes the application of the Development Standards (DS) and Special Area (SA) overlay zones to provide customized Development Standards and permitted uses as allowed by the City's Zoning Ordinance. Development Standards and Permitted Uses applicable to the Plan Area are provided in Appendix A. Where Appendix A is silent, the permitted uses and development standards established by the City of Roseville's Zoning Ordinance and Community Design Guidelines shall apply.

The following summarizes the ARSP Land Use designations with descriptions for each Land Use related density and applied zoning districts:

A. Residential Land Uses

The ARSP utilizes three residential land use designations: Low Density Residential (LDR), Medium Density Residential (MDR), and High Density Residential (HDR). This mix of residential land uses and their corresponding range of density support the vision of a community that includes a wide variety of housing types and options. Home types and lot sizes are intended to mix seamlessly together on almost a block by block development pattern.

The mix of housing types addresses future growth anticipated in the City of Roseville and neighboring regions. Approximately 70 percent of ARSP units are designated for low and medium densities and the remaining units, approximately 30 percent are planned as high density units.

The densities and supporting development standards as detailed in Appendix A, provide for the various housing options including conventional detached single family homes on large and small lots, alley loaded homes facing streets, parks or paseos, clusters, duets, townhomes, and apartments. This Specific Plan encourages innovative and unique lot configurations and home types that support the overall vision of the community as an urban village.

Custom Homes
Custom homes may be designated for construction in the northwest area of the ARSP located between Placer Parkway and West Sunset Boulevard. Custom homes are single-family residential units with unique exterior styling and individualized interior floor plans, and each home's architectural design is distinct from others in the subdivision. Typically, custom homes have detailed architectural features and upscale amenities which give them an appearance and character similar to, or qualitatively exceeding individually designed homes found in the City's other custom and/or executive housing neighborhoods. If proposed, custom home subdivisions maybe approved through the City's tentative subdivision map process.

Memorandum

WOOD RODGERS
BUILDING RELATIONSHIPS ONE PROJECT AT A TIME

To: City of Roseville Planning, Public Works and Environmental Utilities
Attn: Greg Bitter, Planning Manager
Marc Stout, City Engineer
George Hanson, P.E., Principal Engineer

From: Paul Klein, Principal
Jim Fletter, Associate Engineer

Date: February 14, 2022

Subject: Technical Memorandum
Wastewater Master Plan Amendment #3, Amoruso Ranch Specific Plan Area

EXECUTIVE SUMMARY

Amoruso Ranch is a subdivision approved by the City of Roseville (City). A Sewer Master Plan entitled: "*Amoruso Ranch Specific Plan Area Wastewater Master Plan dated February 2016*" (Sewer Study) was prepared as part of the Specific Plan process and approved by the City. The Sewer Study identified size and location of major sewer infrastructure including sewer trunks, manholes, some collectors, and pump station. Subsequently, the City approved the Amoruso Ranch Specific Plan Amendment dated March 2020 (SPA). This amendment addressed land use changes and relocation of the sewer collection system and trunks over the entire Master Plan area.

Through a technical memo dated June 3, 2021 and subsequently approved by the City, Wood Rodgers recalculated the peak wet weather flow (PWWF) demand throughout the Master Plan area using Roseville sewer design standards and showed that the original master plan overstated the PWWF. This memo is provided in **Appendix A**. A subsequent technical memo dated August 17, 2021 amended the sewer layout of the system by relocating trunk segments due to final design of Phase 1 improvement plans.

The City requested that the Sewer Master Plan provide pipe conditions based on minimum slopes identified in the City's 2020 Design and Construction Manual. The Original approved master plan calculated gravity pipe performance based on slopes exceeding minimums. This technical memo reanalyzes sewer system based on minimum slopes, the most recent land use plan and the Large Lot Tentative Map (LLTM) date September 10, 2021.

ANALYSIS & FINDINGS

The sewer system layout prepared for the Master Plan provided in Appendix A was not used to develop the sewer layout provided in this Sewer Master Plan Amendment. The entire system was laid out based on the most recent LLTM and land use information. Utilizing the new layout, demand through the system was recalculated. The layout in Appendix B shows the new demands and pipe sizes. Comparing the demand calculations from the August 17, 2021 tech memo, the new calculations show that the total peak wet weather flow is reduced from 2.818 million gallons per minute (mgd) to 2.725 mgd. Though there were a few pipe size changes, generally the system is configured similarly to original Sewer Master Plan.

APPENDIX A

TECHNICAL MEMORANDUM

Amoruso Ranch Central Pump Station and Force Main Sizing

Memorandum

WOOD RODGERS
BUILDING RELATIONSHIPS ONE PROJECT AT A TIME

Jim Fletter, Associate Engineer

Date: June 3, 2021

Subject: Technical Memorandum
Amoruso Ranch Central Pump Station and Force Main Sizing

EXECUTIVE SUMMARY

Amoruso Ranch is a subdivision approved by the City of Roseville (City). A Sewer Master Plan entitled: "*Amoruso Ranch Specific Plan Area Wastewater Master Plan dated February 2016*" (Sewer Study) was prepared as part of the Specific Plan process and approved by the City. The Sewer Study identified the "Central Sewer Pump Station" needed to serve the subdivision. It also identified dual force mains to convey the pump station flows south along Westbrook Boulevard, through the Creekview Specific Plan Area, and terminating at a junction structure just north of Blue Oaks Boulevard.

Subsequently, the City approved the Amoruso Ranch Specific Plan Amendment dated March 2020 (SPA). Utilizing this new information, Wood Rodgers identified that the Sewer Study had oversized the pump station and force main when considering the original Specific Plan land use information and the City's design standards. Upon reevaluating the sewer demand from Amoruso Ranch based on the SPA, we confirmed that the pump station and force mains could be downsized. The original buildout sewer generation was identified as 4.18 million gallons-per-day (mgd) with a force main size of 18-inches; while the updated calculations show a correct sewer generation of 2.83 mgd with an acceptable conveyance force main of 12 inches in diameter.

At this time, Wood Rodgers is preparing improvement plans to construct a portion or the force main in Westbrook Boulevard including the crossing of Pleasant Grove Creek. Due to the potential modification in the sewer generation factor, this Technical Memo has been prepared by Wood Rodgers to present our findings and recommendations for design.

ANALYSIS

Wood Rodgers is preparing improvement plans for the future sewer force main that will serve the Amoruso Ranch Central Sewer Pump Station (pump station). In conformance with the adopted Sewer Study, the force main will be placed within the future Westbrook Boulevard and cross under Pleasant Grove Creek. The Sewer Study identified the ultimate location and size of the pump station and dual force main as shown in the attached **Exhibit A**.

Wood Rodgers' reviewed the SPA and prepared calculations for this memo for the wastewater generation project based on the current City standards for calculating sewer demands. These new calculations show that the sewer demand is significantly lower than reported in the Sewer Study; therefore, the Central Pump Station and its force

mains can be reduced in size. The Sewer Study determined that buildout sewer demand on the pump station to be 4.18 mgd. Consequently, the proposed force main to convey the wastewater to the downstream gravity discharge point was sized to 18-inch to provide a velocity of 3.2 feet per second (fps). The Sewer Study also proposed a second 12-inch force main to provide sufficient velocities during lower flows prior to buildout and to provide redundancy.

Our reanalysis of that demand, shown in both Table 1 and provided in more detail in Appendix B, concludes that the peak wet weather flow (PWWF) demand using the SPA information will be 2.83 mgd. Along with the SPA land use information, our calculations are based on Section 9 (Sanitary Sewer Design) of the City's Design Standards dated January 2019.

Table 1: Land Use Data and Average Dry Weather Flow (ADWF)

Land Use	Area (acres)	Dwelling Units (DU)	Flow Factor[1]	ADWF (mgd)
Residential (LDR & MDR)	289.61	1,794	190 per DU	0.341
Residential (HDR)	38.13	873	130 per DU	0.113
Commercial	23.85		850 per acre	0.020
Commercial - Mixed Use	27.27	159	2300 per acre	0.063
Public/Quasi-Public	17.23		660 per acre	0.011
Park	22.14		10 per acre	0.000
Open Space & Paseos	154.93		0	0
Backbone Roads	101.24		0	0
Urban Reserve	20.00		0	0
Toad Hill Estates (LDR)*	316.8	274	190 per DU	0.052
TOTAL	**694.4**	**2,826**		**0.600**

* Toad Hill Estates acreage estimated from record maps and the dwelling units obtained from the Sewer Study.

Calculations: <u>Pump Station/Force Main Demand</u>

ADWF = **0.600 mgd** *(see ADWF total from Table 1)*

Factored Flow (FF) = 0.600 mgd x 2.0 = **1.200 mgd** *(ADWF x 2.0 per Design Standards Section 9 Attachment A)*

Peaking Factor (PF) = **2.36** *(per Design Standards Section 9 Figure SS-1)*

PWWF = 1.200 mgd x 2.36 = **2.83 mgd** *(FF x PF)*

A PWWF of 2.83 mgd requires a force main with 12-inch inner diameter to convey flows with a velocity of 5.6 fps. A secondary 12-inch inner diameter force main can provide redundancy.

CONCLUSION

The original demand calculations in the Sewer Study required a Central Pump Station sized for 4.18 mgd with 18-inch and 12-inch force mains. Based on current information, Wood Rodgers recalculated the demands on the pump station to be 2.83 mgd with dual 12-inch force mains sufficient to reliably convey the wastewater flows within the velocity criteria specified in the City's current design standards. With concurrence and approval from the City, Wood Rodgers will prepare and submit improvement plans to construct the force main within Westbrook Blvd. and under Pleasant Grove Creek utilizing parallel 12-inch ductile iron force mains, maintaining PWWF velocities of 5.6 fps through a single force main or 2.8 fps through both force mains. In addition, we will prepare a Preliminary Design Report for the Central Lift Station based on a PWWF of 2.83 mgd.

Footnotes:

1. Land use area included in sewer demand calculations exclude major backbone roadways and open space areas.
2. Actual residential and multi-family units as shown on Amoruso Ranch Lotting Study, August 17, 2020.
3. Flows from Commercial & Community Commercial Allocated Units are accounted for with 2,300 gpd/acre and 130 gpd/DU calculation.
4. Toad Hill acreage and dwelling units obtained from approved Amoruso Ranch Specific Plan Area Wastewater Master Plan, February 2016.
5. d/D exceeds 1.0 at minimum slope. See subdivision improvement plans for actual slope (S=0.0043, max d/D=0.63, velocity=3.24 fps).

1. City of Roseville Planning Department land use designations for residential are as follows:
   Low Density Residential (LDR): 0.5 - 6.9 DU's / Acre
   Medium Density Residential (MDR): 7.0 - 12.9 DU's / Acre
   High Density Residential (HDR): 13.0 DU's / Acre and above
2. This water land use category includes two City planning land use categories.

RESOLUTION NO. 22-101

AMENDING THE GENERAL PLAN TO CHANGE THE LAND USE DESIGNATIONS ON CERTAIN REAL PROPERTY IN THE CITY OF ROSEVILLE

WHEREAS, a proposal has been submitted to amend the General Plan 2035 – Land Use Map and tables of the City of Roseville for that portion of certain real property within the City of Roseville known as Amoruso Ranch Specific Plan (ARSP) to change the land use designations of Parcels AR-21, AR-25, AR-32, and AR-37 from Low Density Residential (LDR) to Medium Density Residential (MDR) and reconfigure parcels throughout the ARSP, as shown in Exhibit B and incorporated herein by reference; and

WHEREAS, the Planning Commission held a public hearing on the proposed amendments to the General Plan on March 24, 2022; and

WHEREAS, on April 20, 2022, the City Council held a public hearing at which time the proposed amendments were considered; and

WHEREAS, on April 20, 2022, the City Council considered the second Addendum to the Amoruso Ranch Specific Plan Environmental Impact Report (EIR) (SCH #2013102057, certified June 15, 2016); and

WHEREAS, the Council of the City of Roseville desires to approve said amendments to the Roseville General Plan as conducive to public interest, health, safety and welfare, and consistent with the land use practices of the City.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Roseville that the amendments changing the Land Use Map and the text within the Land Use Element (attached as Exhibit B) are hereby adopted.

BE IT FURTHER RESOLVED, that the Development Services Director is hereby directed to retain said General Plan Amendments on permanent public display in the Development Services Department of the City of Roseville.

PASSED AND ADOPTED by the Council of the City of Roseville this_____day of _____, 2022, by the following vote onroll call:

RESOLUTION NO. 22-102

AMENDING THE AMORUSO RANCH SPECIFIC PLAN

WHEREAS, a proposal has been submitted to amend the land use designations of certain parcels of the Amoruso Ranch Specific Plan to: change the land use for Parcels AR-21, AR-25, AR-32, and AR-37 from Low Density Residential (LDR) to Medium Density Residential (MDR); adjust the acreage, unit allocation, density, and configuration of LDR Parcels AR-1 through AR-9, AR-11 through AR-18, AR-22, AR-24, AR-26, AR-27, AR-30, AR-34, AR-35, AR-40, and AR-43; adjust the acreage, unit allocation, density, and configuration of MDR Parcels AR-10, AR-28, AR-33, AR-39, and AR-42; adjust the acreage, density, and configuration for High Density Residential (HDR) Parcel AR-19, AR-36, AR-38, and AR-44; adjust the acreage and configuration for Public/Quasi Public Parcels AR-50 and AR-54; adjust the acreage and configuration for Commercial Parcels AR-51 through AR-53, adjust the acreage and configuration of Parks and Recreation Parcels AR-62 through AR-64, AR-66, and AR-67; adjust the acreage and configuration of Open Space Parcels AR-70 through AR-78, AR-80, AR-81, AR-91, AR-93, AR-95 through AR-99, AR-101 through AR-106, AR-108, AR-112, AR-113, AR-115, and adjust the acreage for Westbrook Boulevard right-of-way and roads throughout the Specific Plan, as shown in Exhibit B, attached and incorporated herein by reference; and

WHEREAS, a proposal for a Specific Plan Amendment has been submitted to modify the Amoruso Ranch Specific Plan figures and text based on the land use changes, and to update the text and figures regarding on and off-site wetland resource preservation, public utilities, and other minor adjustments, as shown in Exhibit C, attached and incorporated herein by reference; and

WHEREAS, the Planning Commission held a public hearing on the proposed amendments to the Amoruso Ranch Specific Plan on March 24, 2022; and

WHEREAS, on April 20, 2022, the City Council considered an Addendum to the Amoruso Ranch Specific Plan Environmental Impact Report (SCH #2013102057, certified June 15, 2016); and

WHEREAS, the Specific Plan Amendment is consistent with the adopted City of Roseville General Plan, as proposed and revised; and

WHEREAS, the Council of the City of Roseville has reviewed the findings of the Planning Commission recommending approval of the Specific Plan Amendment, and makes the following findings:

The Specific Plan Amendment is consistent with the objectives, policies, general land uses, and programs specified in the City of Roseville General Plan and the Amoruso Ranch Specific Plan;

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Roseville that the amendments changing the specific plan land use designations and specific plan text within the Amoruso Ranch Specific Plan (attached as Exhibits B and C) are hereby adopted.

PASSED AND ADOPTED by the Council of the City of Roseville this_____day of _____, 2022, by the following vote on roll call:

ORDINANCE NO.

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE
AMENDING ZONING ORDINANCE NO. 5428 OF THE CITY OF ROSEVILLE
CHANGING THE ZONING OF CERTAIN REAL PROPERTY LOCATED
WITHIN THE CITY OF ROSEVILLE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. The Council of the City of Roseville has reviewed the findings of the Planning Commission regarding approval of the rezone specified herein, and make the following findings pursuant to Section 19.86.050 of the Zoning Ordinance:

1. The rezone is in conformance with the public interest, health, safety, or welfare of the City; and

2. The rezone is consistent with the objectives, policies, programs, and land use designations of the City of the Roseville General Plan and the Amoruso Ranch Specific Plan.

SECTION 2. Section 19.06.020 of the Zoning Ordinance of the City of Roseville, Ordinance No. 5428, is amended to change the zoning of that portion of certain real property within the City of Roseville known as the Amoruso Ranch Specific Plan (ARSP), as shown and so designated in Exhibit "B", which is attached hereto and incorporated herein by reference, to adjust the acreage and configuration of zoning boundaries for Small Lot Residential (RS) Parcels AR-1 through AR-9, AR-11 through AR-16, AR-18, AR-21, AR-22, AR-24 through AR-26, AR-30, AR-32 through AR-35, AR-37, AR-39, AR-40, AR-42 and AR-43; adjust the acreage and configuration for Multifamily Residential (R3) Parcels AR-19, AR-36, AR-38, and AR-44; adjust the acreage and configuration for Public/Quasi Public Parcels (P/QP) AR-50 and AR-54; adjust the acreage and configuration for Commercial Parcels (CMU-SA and CC) AR-51 through AR-53, adjust the acreage and configuration of Parks and Recreation (P/R) Parcels AR-62 through AR-64, AR-66, and AR-67; adjust the acreage and configuration of Open Space (OS) Parcels AR-70 through AR-78, AR-80, AR-81, AR-91, AR-93, AR-95 through AR-99, AR-101 through AR-106, AR-108, AR-112, AR-113, AR-115, and adjust the acreage for Westbrook Boulevard right-of-way and roads throughout the Specific Plan.

SECTION 3. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 4. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

ORDINANCE NO.

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE ADOPTING A SECOND AMENDMENT OF THE DEVELOPMENT AGREEMENT BY AND BETWEEN THE CITY OF ROSEVILLE, BROOKFIELD SUNSET, LLC AND JENNIFER M. AMORUSO, SUCCESSOR TRUSTEE OF THE AMORUSO FAMILY LIVING TRUST DATED MARCH 14, 2005 RELATIVE TO THE AMORUSO RANCH SPECIFIC PLAN (525.7 ACRES) AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. In accordance with Chapter 19.84 of Title 19 of the Roseville Municipal Code (the Zoning Ordinance) of the City of Roseville, the City Council has received the recommendation of the Planning Commission that the City of Roseville enter into a Second Amendment of the Development Agreement by and between the City of Roseville, Brookfield Sunset, LLC, a California limited liability company ("Brookfield"), and Jennifer M. Amoruso, Successor Trustee of the Amoruso Family Living Trust Dated March 14, 2005 ("Amoruso")(collectively, "Landowner"), pertaining to the property located within the Amoruso Ranch Specific Plan area (525.7 acres).

SECTION 2. Prior to considering the proposed Second Amendment to Development Agreement, the City Council considered the Addendum to the Amoruso Ranch Specific Plan Environmental Impact Report (EIR) certified on June 15, 2016, pursuant to the California Environmental Quality Act, California Public Resources Code Section 21000 *et seq.*

SECTION 3. The Council of the City of Roseville has reviewed the findings of the Planning Commission recommending approval of the Second Amendment to Development Agreement, and makes the following findings:

1. The Second Amendment to Development Agreement is consistent with the objectives, policies, programs and land use designations of the City of Roseville General Plan and the Amoruso Ranch Specific Plan;

2. The Second Amendment to Development Agreement is consistent with the City of Roseville Zoning Ordinance;

3. The Second Amendment to Development Agreement is in conformance with the public health, safety and welfare;

4. The Second Amendment to Development Agreement will not adversely affect the orderly development of the property or the preservation of property values; and

5. The provisions of the Second Amendment to Development Agreement will provide sufficient benefit to the City to justify entering into said Amendment;

SECTION 4. The Second Amendment to Development Agreement, by and between the City of Roseville, Brookfield Sunset, LLC, a California limited liability company ("Brookfield"), and Jennifer M. Amoruso, Successor Trustee of the Amoruso Family Living Trust, Dated March 14, 2005, pertaining to the property located within the Amoruso Ranch Specific Plan area (525.7 acres), a copy of which is on file in the City Clerk's Department and incorporated herein by reference, is hereby approved and the City Manager is authorized to execute it on behalf of the City of Roseville.

SECTION 5. The City Clerk is directed to record the executed Development Agreement Amendment within ten (10) days of the execution of the agreement by the City Manager with the County Recorder's Office of the County of Placer.

SECTION 6. This ordinance shall be effective at the expiration of thirty (30) days from the date of its adoption.

SECTION 7. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

SECOND AMENDMENT OF DEVELOPMENT AGREEMENT BY AND BETWEEN THE CITY OF ROSEVILLE, BROOKFIELD SUNSET, LLC, AND JENNIFER M. AMORUSO, SUCCESSOR TRUSTEE OF THE AMORUSO FAMILY LIVING TRUST DATED MARCH 14, 2005 RELATIVE TO THE AMORUSO RANCH SPECIFIC PLAN

This Second Amendment of Development Agreement ("Second Amendment") is entered into this ____ day of _____, 2022, by and between the CITY OF ROSEVILLE, a municipal corporation ("City"), BROOKFIELD SUNSET, LLC, a California limited liability company ("Brookfield"), BROOKFIELD SACRAMENTO HOLDINGS, LLC, a Delaware limited liability company, ("Brookfield Sacramento"), and ANGELA EISENPRESS, Successor Trustee of the Amoruso Family Living Trust Dated March 14, 2005 ("Amoruso")(collectively, "Landowner"), pursuant to Sections 65864 through 65869.5 of the Government Code of the State of California.

RECITALS

A. Landowner and City entered into a Development Agreement (the "Development Agreement") which was approved by the City Council of City on July 6, 2016, and recorded on August 24, 2016, in the Official Records of Placer County as Document No. 2016-0070351-00. City and Landowner entered into the Development Agreement relative to development within a portion of the Amoruso Ranch Specific Plan ("Specific Plan", "ARSP", or "Plan Area"), as such is more precisely described in Exhibits "A" and "B" of the Development Agreement (the "Property"), as those exhibits are amended by Exhibits "A" and "B" attached hereto. Except as otherwise defined herein, all capitalized terms used herein shall have the meanings ascribed thereto in the Development Agreement.

B. Landowner and City entered into a First Amendment to the Development Agreement (the "First Amendment") which was approved by the City Council of City on April 1, 2020, and recorded on January 28, 2021, in the Official Records of Placer County as Document No. 2021-0012079-00.

C. Since approval of the Development Agreement, Brookfield Sacramento has become the fee title owner of a portion of the Property, as shown in Exhibit "D"

attached to the First Amendment, and Brookfield remains under contract to purchase the balance of the Property from Amoruso, with all persons holding legal or equitable interests in the Property being bound by the Development Agreement and this Second Amendment.

D. Concurrent with its consideration of this Second Amendment, City is processing a General Plan Amendment (Resolution No. _____), a Specific Plan Amendment (Resolution No. _____), a Rezone (Ordinance No. _____), and a Tentative Subdivision Map (TSM _____) for purposes of revising land use entitlements on the Property. City and Landowner wish to enter into this Second Amendment in order to provide consistency with these land use approvals.

E. This Second Amendment is authorized by Section 1.4 of the Development Agreement.

NOW, THEREFORE, THE PARTIES MUTUALLY AGREE AS FOLLOWS:

1. AMENDMENT OF DEVELOPMENT AGREEMENT. The following section and exhibits of the Development Agreement are hereby amended as follows:

a. REVISED SECTION 2.2. Section 2.2 of the Development Agreement is revised in its entirety to read as follows:

> "2.2 Vested Entitlements. Subject to the provisions and conditions of this Agreement, City agrees that City is granting, and grants herewith, a fully vested entitlement and right to develop the Property in accordance with the terms and conditions of the Entitlements, including, but not limited to, allocation of residential units to residentially designated parcels in the Specific Plan, minimum lot sizes, street locations and configurations in any approved tentative subdivision maps, and allocation of building square footage to commercially designated parcels in the Specific Plan. City acknowledges that the Entitlements include the following Specific Plan land use designations and approximate gross acreages for all land uses for the Property as shown in the Specific Plan Land Plan in Exhibit "E", attached hereto and summarized below:
>
> | | |
> |---|---|
> | Low Density Residential | 1,099 units on 219.1 Gross Acres; |
> | Medium Density Residential | 695 units on 69.3 Gross Acres; |
> | High Density Residential | 873 units on 37.9 Gross Acres; |
> | Community Commercial | 23.7 Gross Acres; |
> | Community Commercial/Village District | 159 units on 27.2 Gross Acres; |

Park	22.2 Gross Acres;
Open Space	144.6 Gross Acres;
Open Space (Paseos)	11.0 Gross Acres;
School	9.6 Gross Acres;
Public/Quasi Public	7.5 Gross Acres;
Right of Way	51.7 Gross Acres;
NAPOTS (Placer Parkway)	50.6 Gross Acres.
TOTAL	674.4 Gross Acres

Such uses shall be developed in accordance with the Entitlements, as such Entitlements provide on the Effective Date of this Agreement. Landowner's vested right to proceed with the development of the Property shall be subject to subsequent approvals, provided that any conditions, terms, restrictions and requirements for such subsequent approvals shall not prevent development of the Property for the uses set forth in the Entitlements, and as more fully set forth in Section 2.4.1 below."

b. REVISED SECTION 3.7.3. Section 3.7.3 of the Development Agreement is revised in its entirety to read as follows:

"3.7.3 Groundwater Well.

3.7.3.1 Parcel Dedication. Landowner shall dedicate to City Parcel AR-58 for City facilities, including a groundwater well, at the approximate location shown on Exhibit "L". Landowner shall construct frontage improvements for Parcel AR-58, including water, recycled water, wastewater, storm drainage, electric and communication fiber conduit.

3.7.3.2 Well Construction Requirements. As shown in Exhibits "L" and "N", the water facilities site shall be constructed adjacent to the 24" water line to be constructed in Road B, and be connected to that 24" water line with a 16" water line within Road A, or other pipe sizes as may be approved by City's Environmental Utilities Director pursuant to updated water studies. Landowner shall install a test well in a location mutually agreed upon by Landowner and City to determine if the well location utilized meets desired capacity and water quality. If the desired capacity and water quality are confirmed by the test well, Landowner shall be responsible for drilling and completing the production well (but not above ground well improvements such as pumping and treatment facilities) as further described below (the "Well Construction Requirements"). City shall be responsible for the construction and costs of above ground production well (topside) improvements such as pumping and treatment facilities. It is the intent of this section (and the Parties) that the groundwater well location identified within the Project shall be capable of achieving a yield of

approximately 1,800 gallons per minute, be designed for Aquifer Storage and Recovery, and the groundwater water is of such quality that only disinfection will be required to meet California Drinking Water Quality Standards. Should the City determine the available capacity or water quality does not achieve these objectives, Landowner shall, at its own cost, work with the City to relocate the well site within the Project to an alternative site mutually agreed to by City and Landowner until these objectives are satisfied.

Landowner shall contact the City Environmental Utilities Department prior to design and construction of the production well. The production well shall be in operation at the time of occupancy of the 1,250th residential unit in the Project. Landowner shall receive approval from the City of the well design and drilling method prior to commencement of this work. In addition, notwithstanding the foregoing, the well shall be drilled prior to the time of occupancy of any residential units within 500 feet of the well site. Landowner shall include noise curtains for the well if at the time of construction of the well homes are occupied between 500 feet and 1,000 feet of the well.

If City determines that the production well is required prior to the occupancy of the 1,250th residential unit in the Project, City has the right to construct the test well and the production well. Landowner shall reimburse City for the actual cost of the below ground improvements for the test well and production well, as set forth above, including annual CCI adjustments of such costs, upon occupancy of the 1,250th residential unit in the Project. If City constructs the test well and production well prior to the occupancy of the 1,250th residential unit in the Project, Landowner agrees to construct an all weather access roadway within either the Road A or Road B RoW and all associated infrastructure necessary to serve Parcel AR-58 as specified in this Section 3.7.3 within one (1) year of notification from City if Road B has not otherwise already been constructed by Landowner.

Notwithstanding the foregoing, if the City adopts a revised water connection fee which encompasses the cost of the Well Construction Requirements, Landowner shall be relieved of the Well Construction Requirements set forth in this Section 3.7.3.2.

Landowner shall, prior to the issuance of the first building permit in the Project phase where an existing well is located, destroy the well or wells in that particular Project phase from among the two existing agriculture irrigation wells and one domestic well in the Project Area. Landowner shall obtain from City a Well Permit and follow the California Well Standards for the destruction of the wells on the Property. All construction plans shall be designed pursuant to City's then current Standards and mutually agreed to by Landowner and the

Environmental Utilities Director, and subject to City plan review, construction inspection and final approval. Landowner shall pay the then current plan check, mapping and inspection costs as incurred by City for review, mapping, and inspection of the destruction of the wells."

c. REVISED SECTION 3.8.8. Section 3.8.8 of the Development Agreement is revised in its entirety to read as follows:

"3.8.8. Water Service Area Boundary Modification. Landowner shall reimburse City for all costs associated with modifying City's service area boundary to include the Project with the U.S. Bureau of Reclamation. There shall be no delay or refusal to issue building permits in the Project by City while City is modifying the service area boundary to include the Project."

d. REVISED SECTION 3.9.2. The third and fourth paragraphs of Section 3.9.2 of the Development Agreement are revised in their entirety to read as follows:

"Landowner shall likewise be required to contribute its pro-rata share of the cost of expansion of the WRSP recycled water tank and pump station located north of the Pleasant Grove Wastewater Treatment Plant that is required to serve the WRSP, as set forth in Section 3.27 and 3.28 of this Agreement, and as set forth in Exhibits "Q-1" and "Q-2". Landowner's pro-rata share of the cost of expansion of the WRSP recycled water tank and pump station referenced herein, estimated at $2.287 million, shall be paid though the CFD for the Project, with payment from the CFD not required until after the 1,250th building permit is issued in the Project.

If City institutes a recycled water connection fee, or such fee is embedded into City's revised water connection fee (which encompasses the estimated $2.287 million for expansion of the WRSP recycled water tank and pump station described in the preceding paragraph), prior to the issuance of any building permits in the Project, Landowner shall not be responsible for the payment of the estimated $2.287 million pro-rata share of the cost of the expansion of the WRSP recycled water tank and pump station except through the payment of the City recycled water connection fee, or City's revised water connection fee if a recycled water connection fee is embedded into City's revised water connection fee, or any special benefit fees as may be applicable to the Project to fund the expansion of the WRSP recycled water tank and pump station."

e. REVISED EXHIBITS. The following exhibits attached to the Development Agreement are replaced by new exhibits attached to this Second Amendment as follows:

Exhibit A Property Legal Description

Exhibit B	Property Map

2. CONSISTENCY WITH GENERAL PLAN. The City Council has found and determined that this Second Amendment of the Development Agreement is consistent with the General Plan and the Amoruso Ranch Specific Plan.

3. AMENDMENT. This Second Amendment amends, but does not replace or supersede, the Development Agreement, except as specified herein. As amended hereby, the Development Agreement remains in full force and effect.

4. FORM OF AMENDMENT. This Second Amendment is executed in two duplicate originals, each of which is deemed to be an original.

INTRODUCTION

The Amoruso Ranch Specific Plan (ARSP) Area Water Conservation Plan (Plan) has been prepared at the request of Brookfield Residential Properties, Inc. (Brookfield) to meet the City of Roseville's (City) requirements and in support of the ARSP process.

WATER CONSERVATION PLAN PURPOSE

In February 2008, then California Governor Arnold Schwarzenegger introduced a seven-part comprehensive plan for improving the Sacramento-San Joaquin Delta. As part of this effort, the Governor directed state agencies to develop a plan to reduce statewide per capita urban water use by 20 percent by the year 2020. In February 2010, the State Water Resources Control Board issued the 20x2020 Water Conservation Plan.

As part of the response to the 20x2020 Plan, the City has a requirement that all new specific plan projects incorporate water conservation measures into the overall project design such that the overall water demands (both potable and recycled) are reduced. The City has an overall conservation goal of 20% for potable and irrigation water usage throughout the City.

This Plan presents potentially feasible measures and guidance that can result in a reduction of the projected overall water usage within the ARSP Area, which will contribute towards the City-wide conservation goal. The projected reduction in water use will be established as part of this Plan through a process of: estimating the baseline water demands without conservation measures; identification of potentially feasible conservation measures; and estimation of the resultant water demands with application of the identified conservation measures. This Plan has been developed in conformance with the Water Efficient Landscape Ordinance (WELO) as a minimum.

ARSP AREA LOCATION AND DESCRIPTION

Project Vicinity

The ARSP Area consists of approximately 694.4 acres located in the northwest edge for the City of Roseville. Prior to the Specific Plan's adoption, the plan area was recognized as a logical growth extension for the City. The Specific Plan Area is bounded on the southwest by the Al Johnson Wildlife Area, to the west by the Gleason property, to the south by the Creekview Specific Plan Area, to the east by the future proposed Placer Ranch Specific Plan Area and to the north by the existing Toad Hills Ranches #1 area and unincorporated Placer County. The project vicinity is shown on Figure 1.

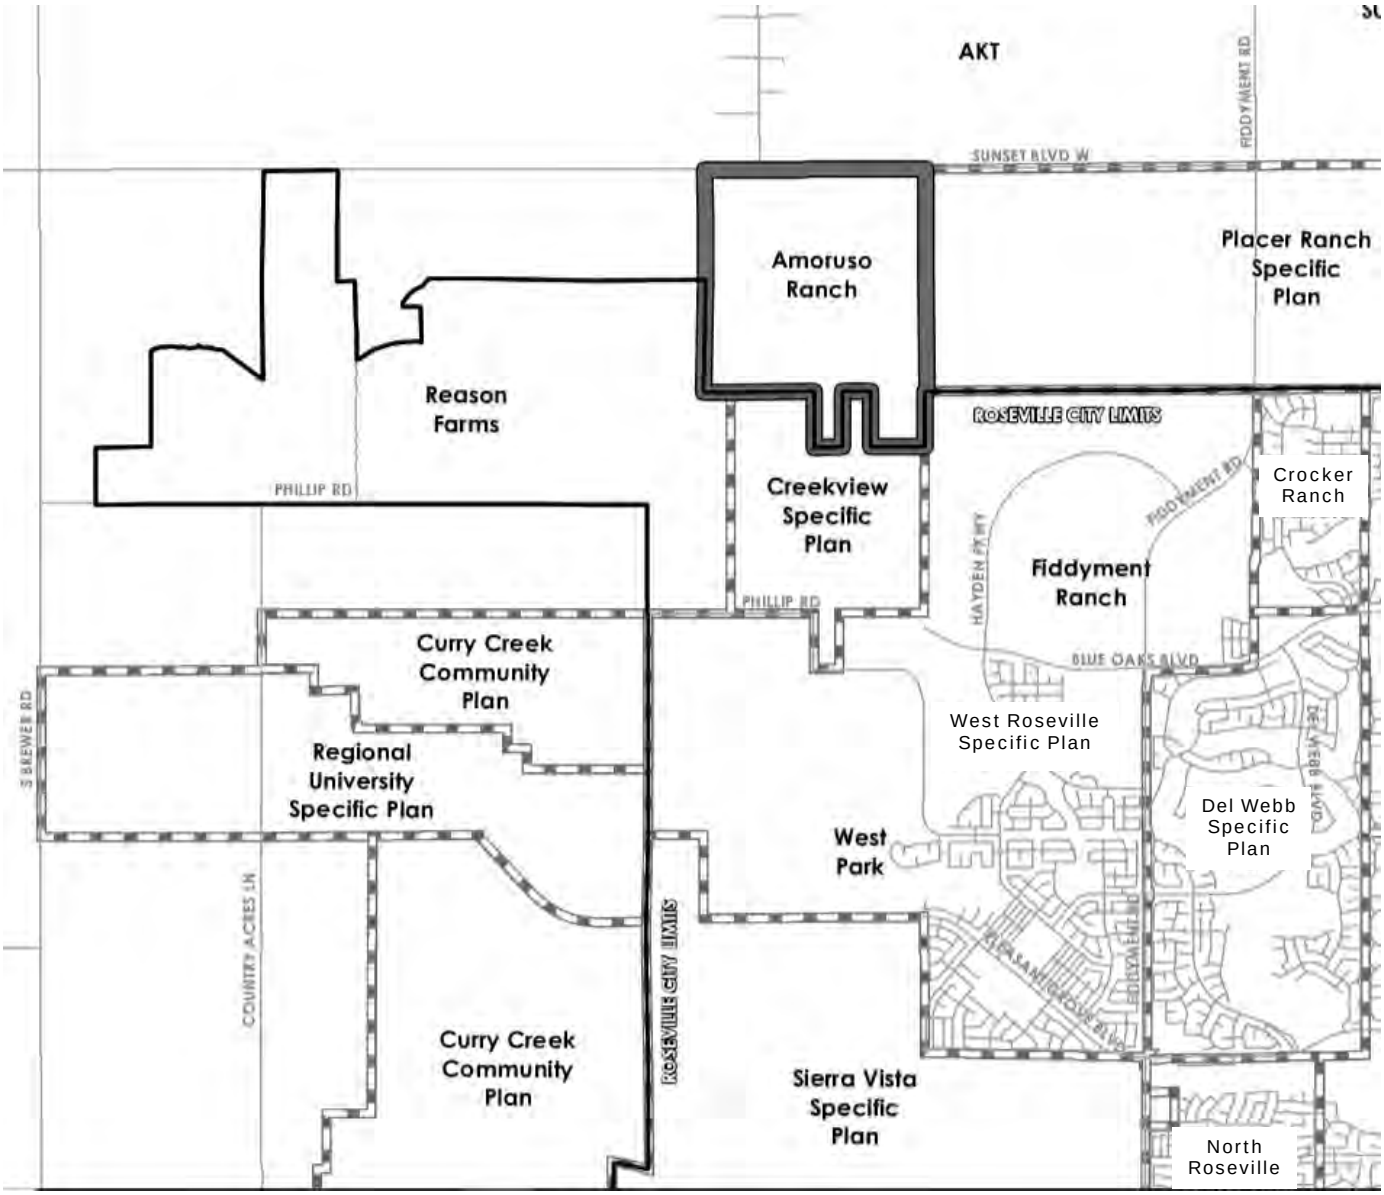

Figure 1 – ARSP Area Project Vicinity

NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

Pre-Development Conditions

The pre-development conditions of the ARSP Area were as a cattle ranch and for irrigated crops. The primary use was open grazing land, but included a small ranch house and out buildings. The land is gently rolling terrain generally trending to the west and south. Minor drainages flow in a radial pattern from a slight rise in the northeast quadrant of the property. The elevation changes from approximately 115 feet to 71 feet gently from the northeast down to the southwest.

The site vegetation is generally limited to short, seasonal grasses. There are several oak trees located along University Creek and a number of non-native trees located around the former ranch house. Wetland conditions and their associated flora and fauna are located in small areas typically along the drainage corridors and in flats along the southern boundary. Figure 2 highlights the ARSP Area pre-development conditions.

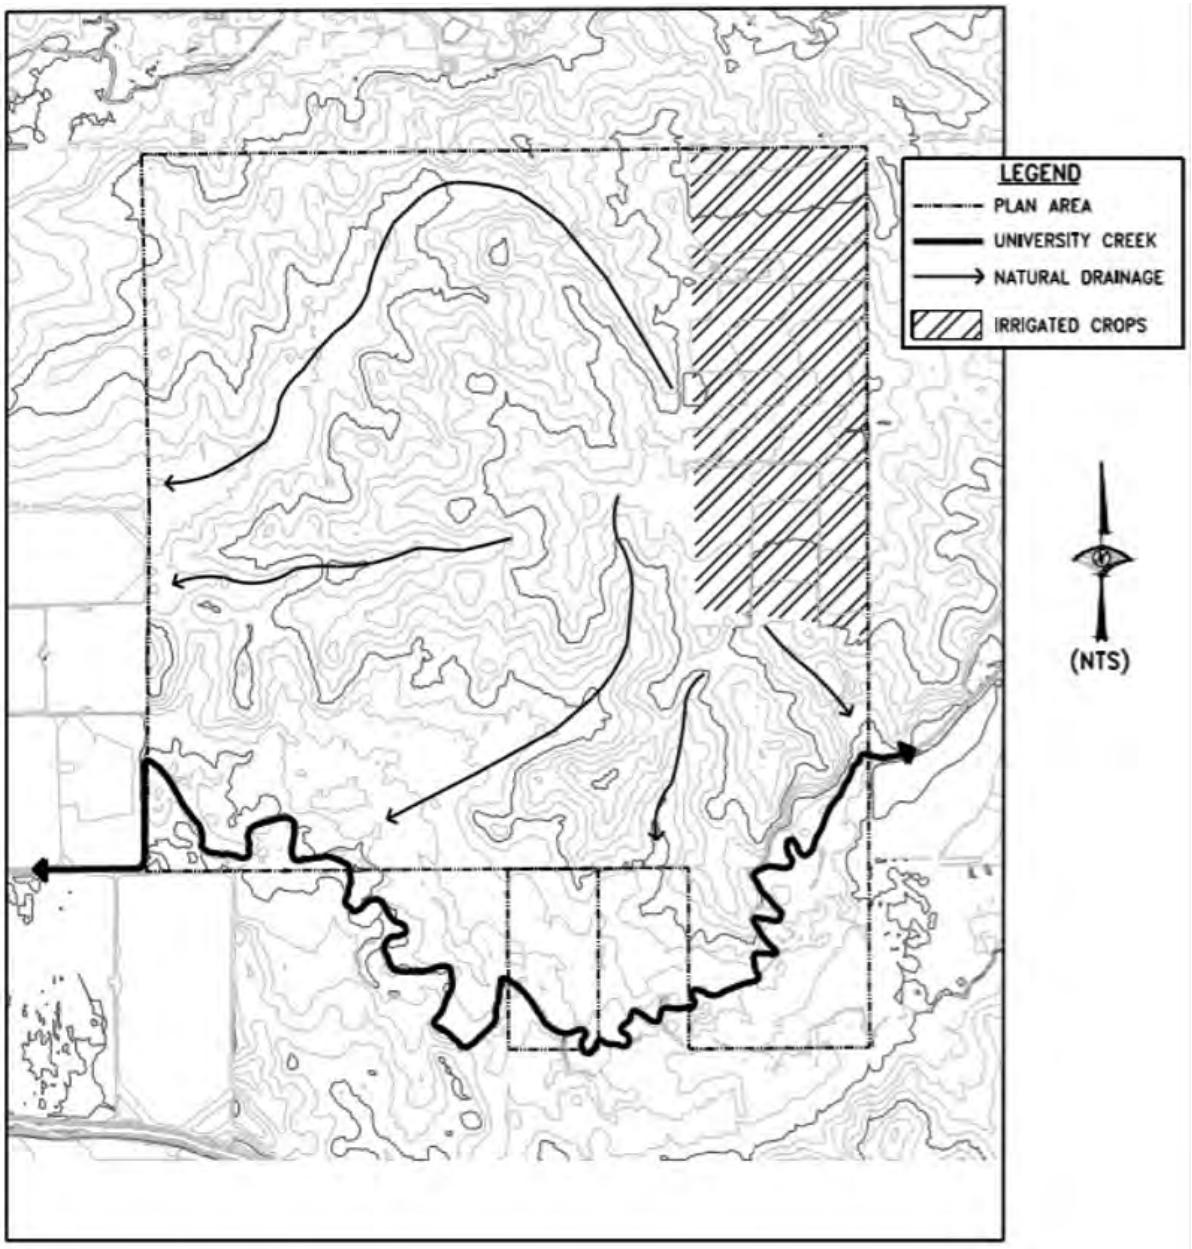

Figure 2 – ARSP Area Pre-Development Conditions

NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

ARSP Area Development Opportunities and Constraints

The proposed ARSP Area land use plan is influenced by several factors, including the physical setting, land use and circulation conditions, and public policies. Two significant aspects that influence the development of the land plan are described below and depicted on Figure 3.

Placer Parkway

The proposed Placer Parkway will be a dominant feature that sweeps through the ARSP Area. Interchanges at Fiddyment Road and Santucci Boulevard will provide access to the ARSP Area.

Open Space and Resources Preservation

The ARSP Area will support open space and resource preservation by providing permanent open space. In combination with the 1,700-acre open space afforded by the City of Roseville Al Johnson Wildlife Area, this open space provides connectivity with open space within the Creekview Specific Plan Area, and lands to the east of the ARSP Area.

The Amoruso Ranch Specific Plan will provide an open space corridor that includes a pedestrian and bike path linkage between this major open space area and the City's regional trail system. In addition, the corridor will provide a permanent preservation area for wetland resources.

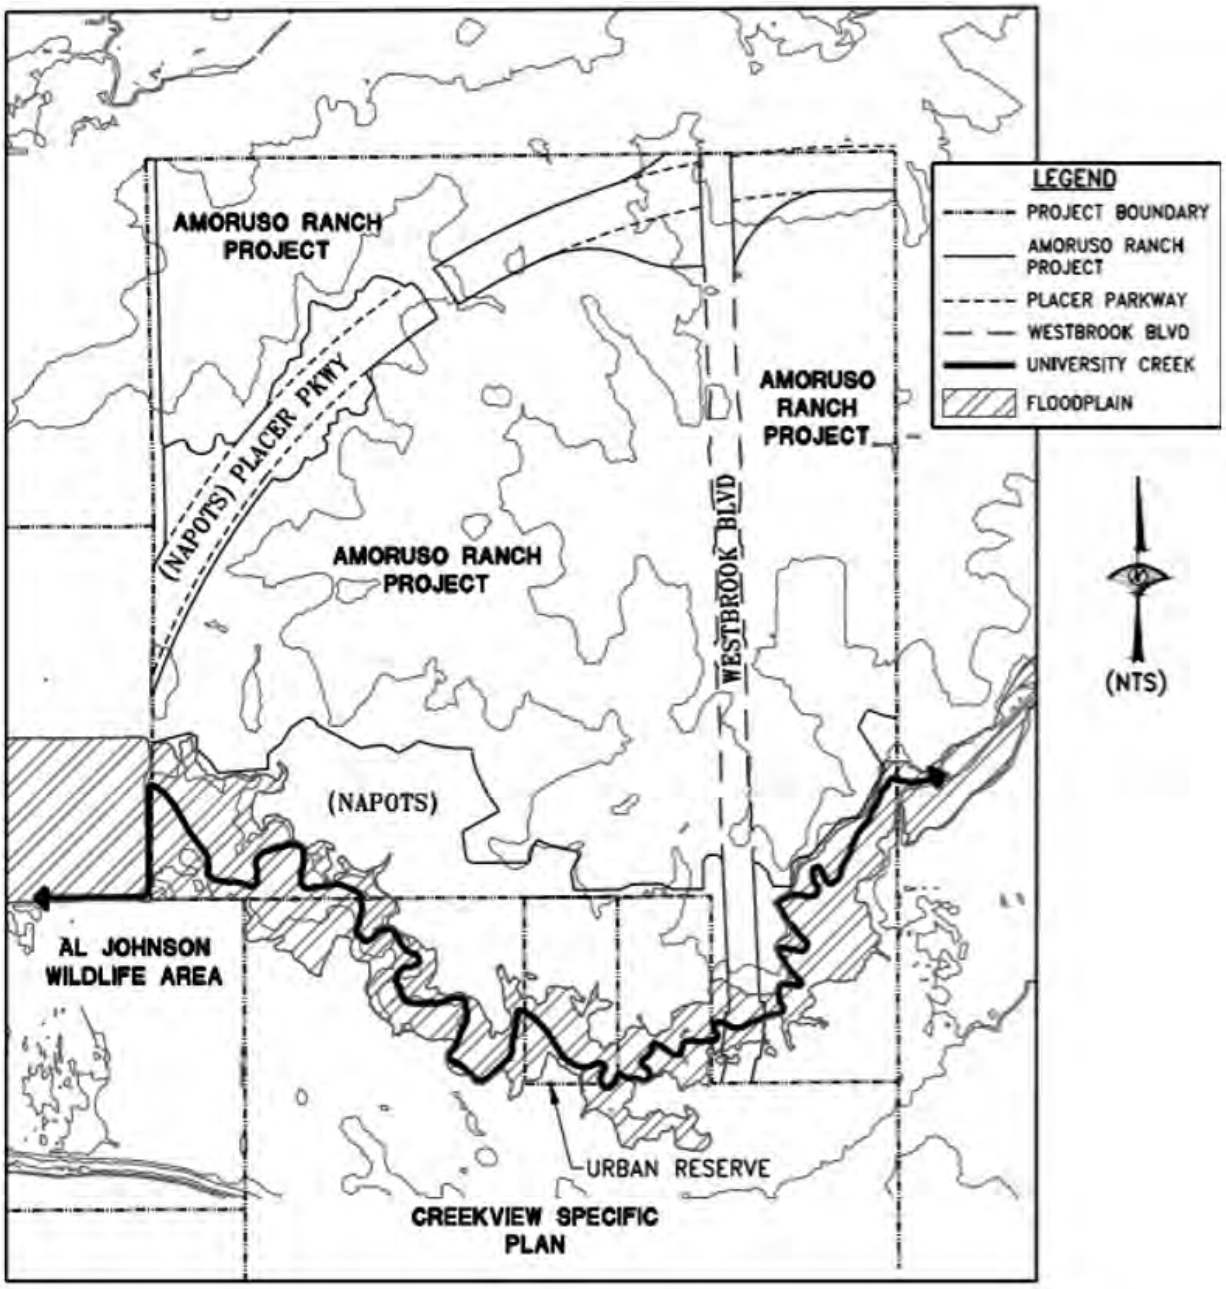

Figure 3 – ARSP Area Opportunities and Constraints

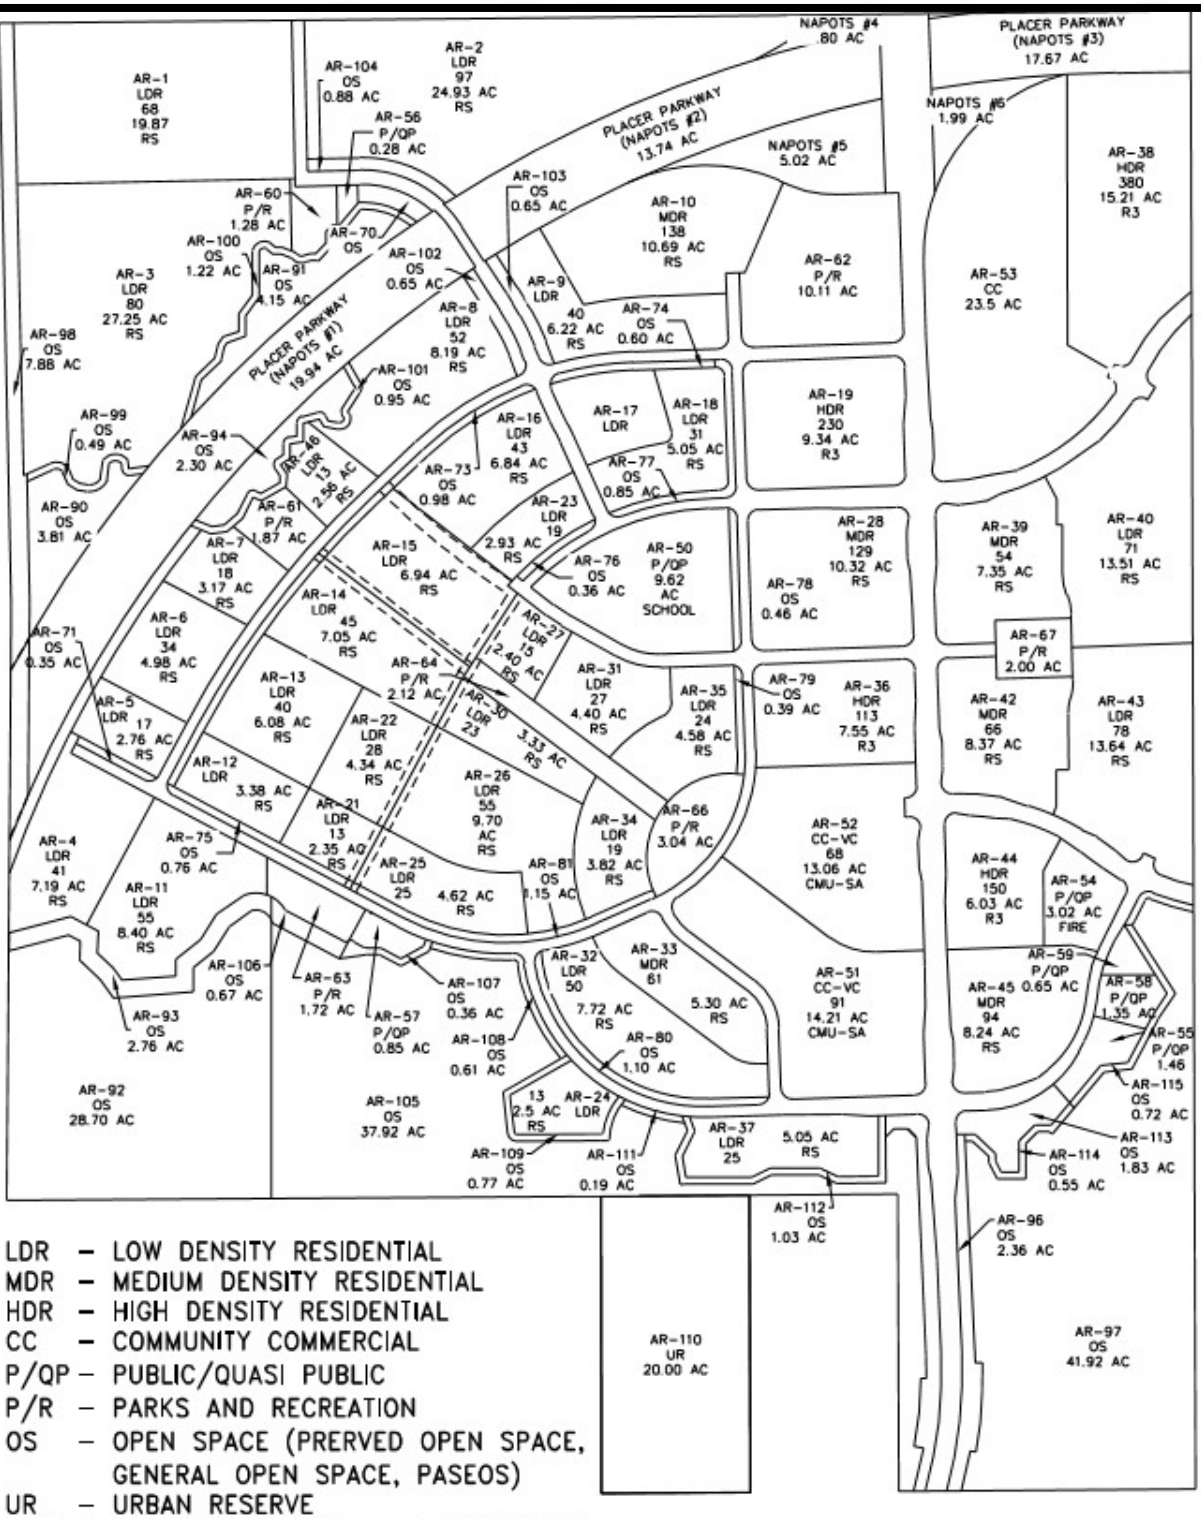
NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

ARSP Area Land Use Plan

The ARSP Area provides for a mix of land uses to achieve the desired community form and objectives. These land use designations include low-, medium- and high density residential uses; commercial and office uses; which in some cases are sited with one another and/or with residential uses, public and quasi-public uses for the schools and civic activities such as a fire station, parks and open space uses, and an urban reserve.

At buildout, the ARSP Area will provide for 2,827 dwelling units, it adds approximately 51 acres of commercial retail and office land uses, and provides approximately 22-acres of parks and 146-acres of open space. The ARSP Area Land Use Plan is shown in Figure 4.



LDR – LOW DENSITY RESIDENTIAL
MDR – MEDIUM DENSITY RESIDENTIAL
HDR – HIGH DENSITY RESIDENTIAL
CC – COMMUNITY COMMERCIAL
P/QP – PUBLIC/QUASI PUBLIC
P/R – PARKS AND RECREATION
OS – OPEN SPACE (PRERVED OPEN SPACE, GENERAL OPEN SPACE, PASEOS)
UR – URBAN RESERVE
NAPOTS – NOT A PART OF THIS SUBDIVISION

NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

BASELINE WATER USE ESTIMATION

The calculation of the baseline water use estimation was established based on the land use designations developed as part of the ARSP Area Land Use Plan shown on Figure 4.

The baseline water use for the project was established using the City's standard water use factors, as developed for the City by MWH in 2006. The City of Roseville employs standard demand factors for residential land uses of varying densities, as well as standard demand factors for commercial/other land uses. The residential demands are presented as gallons per day (GPD) per dwelling unit (DU), and the commercial/other demands are presented as GPD per acre. The City's demand factors are listed in Table 1.

Table 1
Amoruso Ranch Specific Plan
Water Conservation Plan
City of Roseville Demand Factors

General Plan Land Use Category	Average Day Demand
Residential GPD/DU	
LDR1: < 3.5 DU / Acre	728 GPD/DU
LDR2: > 3.5 to 5 DU / Acre	600 GPD/DU
LMDR1: > 5 to 6 DU / Acre	521 GPD/DU
LMDR2: > 6 to 8 DU / Acre	430 GPD/DU
MDR: > 8 to 12 DU / Acre	323 GPD/DU
HDR1: > 12 to 16 DU / Acre	288 GPD/DU
HDR2: > 16 DU / Acre	177 GPD/DU
Non-Residential GPD/Acre	
Commercial / Retail	2598 GPD/Acre
Business Professional	2598 GPD/Acre
Light Industrial	2598 GPD/Acre
Industrial	2562 GPD/Acre
Railroad Yard	109 GPD/Acre
Elementary School	3454 GPD/Acre
High School	4068 GPD/Acre
Public (Fire Station, etc)	1780 GPD/Acre
Park / Recreation	2988 GPD/Acre
Open Space / ROW	0 GPD/Acre
Vacant	0 GPD/Acre

Utilizing the City's demand factors, the estimated annual water use for the Low-, Medium- and High-Density Residential units proposed within the ARSP Area have been calculated. The basis of the Low-, Medium- and High-Density Residential water use is presented within Table 2.

Table 2
Amoruso Ranch Specific Plan
Water Conservation Plan
Water Use Estimation – LDR, MDR and HDR

Land Use Category Density	Number of Units	Average Day Demand (GPD/DU)	Total Average Day Demand (GPD)	Total Average Day Demand (AFY)	Total Average Day Demand with 2% (AFY)[1]
LDR1: < 3.5 DU / Acre	148	728	107,744	120.7	123.1
LDR2: > 3.5 to 5 DU / Acre	116	600	69,600	78.0	79.5
LMDR1: > 5 to 6 DU / Acre	401	521	208,921	234.0	238.7
LMDR2: > 6 to 8 DU / Acre	757	430	325,510	364.6	371.9
MDR: > 8 to 12 DU / Acre	155	323	50,065	56.1	57.2
HDR1: > 12 to 16 DU / Acre	380	288	109,440	122.6	125.0
HDR2: > 16 DU / Acre	760	177	134,520	150.7	153.7
Community Commercial - Village Center – Residential	109	288	31,392	35.2	35.9
Urban Reserve	1	728	728	0.8	0.8
Total	**2,827**	**-**	**1,037,920**	**1,162.6**	**1,185.9**

The water use estimation, as established by the City for purposes of water conservation does not distinguish between potable water and recycled water. Table 3 includes a summary of the estimated baseline water demands. Consistent with previous similar analyses completed by the City, a factor for water system losses has not been included in the water conservation calculations. It has, however, been included for informational purposes in both Tables 2 and 3.

[1] Demand accounts for 2% system losses.

Table 3
Amoruso Ranch Specific Plan

NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

SINGLE FAMILY RESIDENTIAL WATER USE DISTRIBUTION

Single family residential water use for land use designations for Low-, Medium- and High-Density (LDR, MDR and HDR) parcels can be further divided by the use within the home and the landscape irrigation demands outside of the home.

Table 4 represents the typical single family residential water usage that would be attributable to residential units within the land use designation of LDR and MDR. The percentage of total use will have a different distribution for HDR primarily attributable to the reduction in irrigated landscaped area.

Table 4
Amoruso Ranch Specific Plan
Water Conservation Plan
Single Family Residential Water Usage

Residential Use	Percentage of Total[1]
Landscaping	51%
Toilets	13%
Faucets, Cooking, Cleaning	10%
Showers	9%
Clothes Washing	8%
Bath	6%
Toilet Leaks	2%
Dishwasher	1%

Based on historic data the typical split between backyard and front yard irrigation of typical LDR and MDR parcels is approximately sixty-forty, with 60% of the landscape irrigation demand attributable to the backyard and 40% of the landscape irrigation attributable to the front yard. This is the result of typically smaller front yards than backyards along with less

[1] Percentage of total water use was derived from information obtained from the City of Roseville Frequently Asked Questions (FAQ) on the subject of water conservation.

landscape area in the front yard due to driveways and walks. Utilizing this ratio of front yard to backyard irrigation use, results in a further breakdown of the 51% total water use to 20.4% for the front yards and 30.6% for the backyards. The separation of front yard and backyard irrigation demands for LDR and MDR parcels allows analysis and application of different conservation measures between the two distinct areas.

The HDR units typically do not have front yard and backyard irrigation demand; however, there are common area irrigation demands that are attributable to HDR units. Average planning numbers for irrigation demands for HDR units is 20% of the estimated overall water usage. This value is expressed as 20% of the annual irrigation demand and not based on designation of demands split between front and back yard area designations. Table 5 presents a summary of demands based on the assumptions listed above.

Table 5
Amoruso Ranch Specific Plan
Water Conservation Plan
Residential Irrigation Water Demands

Land Use	Annual Demand (AFY)	Annual Demand Front Yard (AFY)	Annual Demand Backyard (AFY)	Annual Total Irrigation Demand (AFY)
Low Density Residential	739.5	150.86	226.29	377.15
Medium Density Residential	200.0	40.80	61.20	102.00
High Density Residential[1]	187.1	N/A	N/A	37.42
Urban Reserve	0.8	0.16	0.24	0.40
Total	**1,127.4**	**191.82**	**287.73**	**516.97**

[1] Demand for HDR parcels was calculated differently from LDR and MDR parcels, as described above. Demand for HDR parcels was not separated into front yard and backyard demand since traditional front and back yards are not present on HDR parcels.

Kimley»Horn

WATER USE REDUCTION STRATEGIES

A series of implementable water use reduction strategies have been identified for the ARSP Area. These strategies are discussed in more detail in the following subsections of this document, including the estimated percentage of water use reduction.

The water use reduction strategies identified for the ARSP Area include:

- Reduction of Residential Turf Areas
- Reduction of Park and Recreation and Common Area Turf (Non-Residential)
- Irrigation Management
- Water Conservation Methods

REDUCTION OF RESIDENTIAL TURF AREAS

As represented in the previous sections and tables, turf areas account for a significant portion of the water demand of the residential development. In turn, this correlates to one of the greatest opportunities to reduce the projected water demands. The ARSP project will adopt a strategy to encourage the new residential developments to reduce the magnitude of front yard turf areas and plant these areas with vegetation that uses far less water.

The City of Roseville estimates that for a same sized area of turf, in comparison to utilization of low-water consumption vegetation, could result in a savings of up to 70% in the amount of water required. Therefore, 30% of the amount of water would be required for the low consumption vegetation as compared to the lawn area's water demand.

Low water consumption vegetation, benefits not only from the reduced requirement for uptake by the plants, it also benefits from more efficient landscape irrigation systems. Low water consumption vegetation is typically irrigated by drip systems, as opposed to overhead spray systems for lawn and turf areas.

Typical front yard landscaping generally ranges between 75% and 85% irrigated area. For purposes of this analysis, the low-point of 75% irrigated area has been selected with 70% being lawn area and the remaining irrigated area being lower water using plants and planters.

It is reasonable to reduce irrigated lawn areas from 70% of the typical front yard for LDR and MDR, as well as reduce the common area lawns on HDR, to 42%. This results in an increase of low water consumption vegetation from 5% to 33%. An example of the potential reductions in turf area is shown in Figure 5. The comparisons of water demands for irrigation are shown in Table 6.

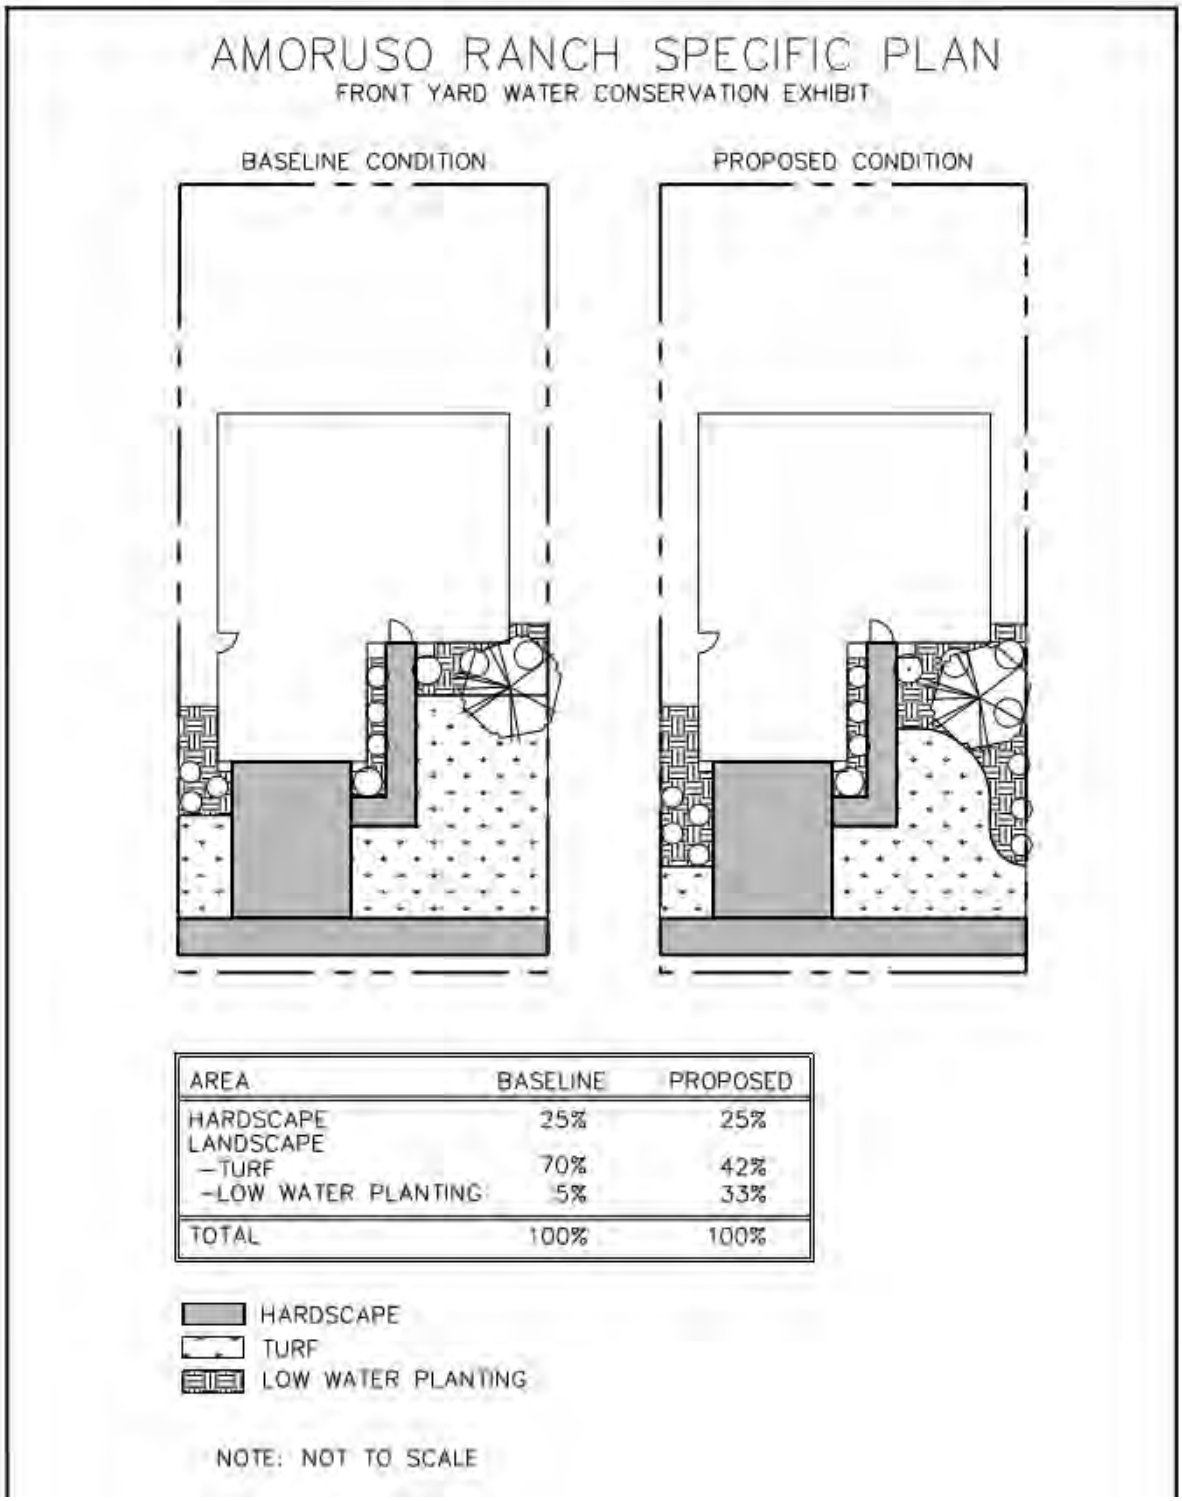

Figure 5 – Front Yard Water Conservation Comparison

NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

Table 6
Amoruso Ranch Specific Plan
Water Conservation Plan
Reduced Landscape Turf Area

Land Use	Front Yard Irrigated Area[1]	Base Condition		Base Condition with Water Conservation	
		Turf Area	Low Water Use Area	Turf Area	Low Water Use Area[2]
LDR, MDR and HDR[3]	75%	70%	5%	42%	33%

Table 7 is a comparison of the water use efficiencies that result from reduction in front yard turf areas. Since assumptions are based on similar reductions in turf areas for LDR, MDR and HDR product types, the water demands have been combined for presentation.

Table 7
Amoruso Ranch Specific Plan
Water Conservation Plan
Front Yard Irrigated Area Water Efficiencies

Land Use	Annual Demand Front Yard (AFY)[4]	New Front Yard Demand (AFY)	Annual Demand Savings (AFY)	Annual Demand Savings (%)	Water System Savings
Residential Properties LDR and MDR	191.82	139.24	52.58	27.4%	Potable
HDR	37.42	27.16	10.26	27.4%	Recycled
Total	**229.24**	**166.40**	**62.84**	**27.4%**	

As an example of how these values were calculated, the calculation for the annual front yard turf demand and the reduced annual front yard demand is presented below.

For the annual front yard turf demand, as calculated for low and medium density residential land uses, 75% of the front yard is landscaped with 70% turf and 5% low water use plantings. Since low water use plantings use 30% of the water required for turf, this 5%

[1] As a percentage of the front yard.
[2] Includes 5% existing low water use plantings plus 28% new low water use plantings.
[3] Represents the percentage of the entire exterior area for HDR.
[4] Front yard demand from Table 5. HDR is total since there is not a distinction between front and back yards.

area is equal to 1.5% turf area water demand. This results in the following annual front yard demands:

Turf (LDR & MDR):

$$191.82\ AFY * \left(\frac{70\%}{71.5\%}\right) = 187.80\ AFY$$

Low Water Use (LDR & MDR):

$$191.82\ AFY * \left(\frac{1.5\%}{71.5\%}\right) = 4.02\ AFY$$

For the reduced annual front yard demand, as calculated for low and medium density residential uses, reducing the base turf area in the front yards from 70% to 42% and replacing that (equivalent to 28%) with low water use plantings resulted in the following annual demands:

Reduced Demand Equation (LDR & MDR):

$$187.80\ AFY * \left(\frac{42\%}{70\%} + \frac{28\% * 30\%}{70\%}\right) + 4.02\ AFY = 139.24\ AFY$$

The same equations were generated for the HDR parcels as follows:

Turf (HDR):

$$37.42\ AFY * \left(\frac{70\%}{71.5\%}\right) = 36.63\ AFY$$

Low Water Use (HDR):

$$37.42\ AFY * \left(\frac{1.5\%}{71.5\%}\right) = 0.79\ AFY$$

Reduced Demand Equation (HDR):

$$36.63\ AFY * \left(\frac{42\%}{70\%} + \frac{28\% * 30\%}{70\%}\right) + 0.79\ AFY = 27.16\ AFY$$

REDUCTION OF PARK AND RECREATION AND COMMON AREA TURF (NON-RESIDENTIAL)

In addition to the turf areas for residential properties there are additional and significant turf areas throughout a typical development. These areas include the parks, irrigated paseos, commercial centers and school play fields. The estimated turf irrigation demand at each of these uses is as follows:

- It is estimated that parks utilize approximately 98% of their water demand for irrigation and 80% of their irrigated area for turf. This area is assumed to be reduced to 60% with the conversion of turf area (20%) to low water consumption vegetation or other uses.
- For the Roseville area, low water plantings were assumed to use 30% of the water used on turf (a 70% water savings).
- Low water use areas will utilize low volume irrigation systems like a drip or spray system (such as Netafim) designed to achieve a uniformity of 90% rather than an overhead spray irrigation system.
- Paseos are estimated to utilize 100% of their water demand for landscape irrigation. 80% of the paseo area is irrigated turf area. This area is assumed to be reduced to 60% with the conversion of turf area (20%) to low water consumption vegetation or other uses.

Based on these assumptions the water use efficiencies for the parks and paseos have been calculated and are presented in Table 8.

Table 8
Amoruso Ranch Specific Plan
Water Conservation Plan
Non-Residential Irrigated Area Water Efficiencies

Land Use	Annual Water Demand (AFY)[1]	Annual Irrigation Demand (AFY)	Base Turf Area	New Turf Area	Low Water Use Area	New Irrigation Demand (AFY)	Annual Demand Savings (AFY)	Annual Demand Savings (%)	Water System Savings
Park	4.3	4.21	80%	60%	20%	3.48	0.73	17.3%	Potable
Parks	69.8	68.40	80%	60%	20%	56.43	11.97	17.5%	Recycled
Paseos	4.8	4.80	80%	60%	20%	3.96	0.84	17.5%	Potable
Paseos	31.0	31.00	80%	60%	20%	25.58	5.42	17.5%	Recycled
Total	**109.9**	**108.41**				**89.45**	**18.96**	**17.5%**	

The new irrigation demand for the Parks is calculated as follows:

$$\frac{68.40\ AFY * 60\%}{80\%} = 51.30\ AFY$$

Demand remaining after turf reduction:

$$68.40\ AFY - 51.30\ AFY = 17.10 AFY$$

Low water plants use 30% of turf demand:

$$17.10\ AFY * 30\% = 5.13\ AFY$$

New irrigation demand:

$$51.30\ AFY + 5.13\ AFY = 56.43\ AFY$$

Similarly the new irrigation demand for the Paseos is calculated as follows:

$$\frac{31.00\ AFY * 60\%}{80\%} = 23.25\ AFY$$

[1]Annual water demand derived from Table 3.

Demand remaining after turf reduction:

$$31.00\ AFY - 23.25\ AFY = 7.75\ AFY$$

Low water plants use 30% of turf demand:

$$7.75\ AFY * 30\% = 2.33\ AFY$$

New irrigation demand:

$$23.25\ AFY + 2.33\ AFY = 25.58\ AFY$$

IRRIGATION MANAGEMENT

Smart and centrally located irrigation controllers restrict irrigation to times and rates necessary to maintain landscaping. They account for changes in the demand for water, which varies with weather patterns, seasonal influences and soil moisture content. In the ARSP, smart irrigation controllers, as defined in WELO, will be required for residential, commercial, and quasi-public parcels subject to turf reduction measures, and centrally controlled irrigation controllers for larger commercial and publicly maintained parcels.

As referenced in previous studies for the City of Roseville, a number of studies have been completed specifically on the conversion to smart irrigation controllers and the resultant water savings. Those studies suggest that water use reductions can be expected between 7% and 41%. This is a wide range of variability. Since ARSP is an entirely new development all significant irrigation applications will employ the use of smart irrigation controllers (per WELO). Therefore, a water use reduction value of 20% has been estimated for purposes of this analysis, consistent with previous analyses completed for similar developments within the City of Roseville. The sample calculation is presented below and the values are summarized in Table 9.

Smart Irrigation Equation:

$$139.24\ AFY * (80\%) = 111.39\ AFY$$

Table 9
Amoruso Ranch Specific Plan
Water Conservation Plan
Smart Irrigation Controller Water Efficiencies

Land Use	Annual Irrigation Demand (AFY)	New Irrigation Demand w/Controller (AFY)	Annual Demand Savings (AFY)	Annual Demand Savings (%)	Water System Savings
Residential Properties (Front)[1]	139.24	111.39	27.85	20%	Potable
Residential Properties (Back)[2]	287.73	230.18	57.55	20%	Potable
Residential Properties (HDR)[3]	27.16	21.73	5.43	20%	Recycled
Parks[4]	3.48	2.78	0.70	20%	Potable
Parks[5]	56.43	45.14	11.29	20%	Recycled
Paseos[6]	3.96	3.17	0.79	20%	Potable
Paseos[7]	25.58	20.46	5.12	20%	Recycled
Total	**543.58**	**434.85**	**108.73**	**20%**	

WATER CONSERVATION METHODS

There are many water conservation measures that can be implemented throughout the ARSP project. The reality is that a majority of the typical water conservation measures are already required or anticipated to be included in any new projects. These include low flow toilets, low flow shower heads, faucet aerators, etc.

One additional water conservation measure that will be considered for the ARSP project is the inclusion of recirculating hot water systems. Recirculating hot water systems feature a pump on a residential hot water line system which reduces the time necessary to receive hot water at any hot water faucet throughout the home. They provide hot water at the tap

[1] Annual irrigation demand derived from Table 7.
[2] Annual irrigation demand derived from Table 5.
[3] Annual irrigation demand derived from Table 7.
[4] Annual irrigation demand derived from Table 8.
[5] Annual irrigation demand derived from Table 8.
[6] Annual irrigation demand derived from Table 8.
[7] Annual irrigation demand derived from Table 8.

immediately upon engaging the hot water faucet, eliminating the waste of water as you wait for the water to transition from the cold water in the pipes to hot water. This type of system can be included on all residential units to generate additional water conservation. The amount of water savings with these systems varies based on the number of times hot water is utilized throughout the day. A typical conservative estimate indicates a water savings of approximately 1.25 gallons per use is saved by having "instant" hot water from the recirculation system. We have estimated that on average this would occur six times per day per residential unit, consistent with previous studies for the City of Roseville.

Re-Circulating Hot Water Equation:

$$2{,}827\ DU * 7.5 \frac{gal}{day} * \frac{AF}{325851\ gal} * 365\ day/yr = 23.75\ AFY$$

The estimated savings based on the installation of recirculating hot water systems is shown in Table 10.

Table 10
Amoruso Ranch Specific Plan
Water Conservation Plan
Recirculating Hot Water System Water Efficiencies

Land Use	Dwelling Unit Count	Savings per Dwelling Unit (Gal)	Annual Demand Savings (AFY)	Annual Demand Savings (%)	Water System Savings
Residential Units	2,827	7.5	23.75	1.6%	Potable

SUMMARY

A series of water conservation methods have been proposed for implementation as part of the ARSP project. These methods are readily implemented and are consistent with the goals and objectives of the Amoruso Ranch Specific Plan and the City of Roseville.

Table 11 provides a summary of the water conservation measures and their estimated savings in water use. As shown on Table 11, with implementation of all of the measures an estimated conservation of 14.5% of the projected water use would be realized within the ARSP Area.

Table 11
Amoruso Ranch Specific Plan
Water Conservation Plan
Summary of Water Efficiencies

Water Conservation Opportunity	Total Water Demand (AFY)	Potable Water Savings (AFY)	Recycled Water Savings (AFY)	Annual Demand Savings (AFY)	Annual Demand Savings (%)
Residential Properties Irrigation – Front[1]	**1,473.7**	52.58	10.26	62.84	4.3%
Non-Residential (Parks, ROW, School)[2]		1.57	17.39	18.96	1.3%
Smart Irrigation Controllers[3]		86.89	21.84	108.73	7.4%
Recirculating Hot Water System[4]		23.75	0	23.75	1.6%
Total		**164.79**	**49.49**	**214.28**	**14.5%**

The actual water conservation savings will be dependent on a number of factors including the participation and adherence by the actual homeowners. Constructing the residential units with a number of these measures already integrated (such as the hot water recirculation systems) will be beneficial to achieving the objective.

For the single family residential land uses there is anticipated to be ongoing outreach by the City to remind and reinforce the need for water conservation. This can include attachments to the water bill, water audits that can be made available to homeowners, the promotion of the City's water conservation website, and the availability of City water conservation staff to respond to specific questions. In addition, outreach can include educating homeowners on how to use and set up smart irrigation controllers along with including the installation and integration into their backyard irrigation system.

Guidance and education for the homeowners with regards to the landscaping of front and backyards will also be part of the overall plan including education in conformance with WELO.

[1] Annual demand savings derived from Table 7.
[2] Annual demand savings derived from Table 8.
[3] Annual demand savings derived from Table 9.

TECHNICAL MEMORANDUM

To: City of Roseville

Date: January 27, 2020

Subject: Amoruso Ranch Specific Plan Amendment
Amendment to Water Conservation Plan to Accommodate Revised Land Use Plan

INTRODUCTION

The Amoruso Ranch Specific Plan (ARSP) Amendment has been prepared at the direction of Brookfield Residential Properties, Inc. (Brookfield) to meet the City of Roseville's (City) planning requirements to address proposed land use changes resulting from the State and Federal Environmental Permitting Processes. The ARSP Amendment modifies the original approved plan dated June 2016.

The ARSP Area consists of approximately 694.4-acres located in the northwest edge of the City of Roseville. The Specific Plan Area is bounded on the west by the Al Johnson Wildlife Area, to the south by the Creekview Specific Plan Area, to the east by the future proposed Placer Ranch Specific Plan Area and to the north by the existing Toad Hill Ranches #1 area/Sunset Boulevard West.

The ARSP Area provides for a mix of land uses to achieve the desired community form and objectives. These land use designations include low-, medium- and high-density residential uses; commercial and office uses; which in some cases are sited with one another and/or with residential uses; public and quasi-public uses for the schools and civic activities such as a fire station; parks and open space uses; and an urban reserve.

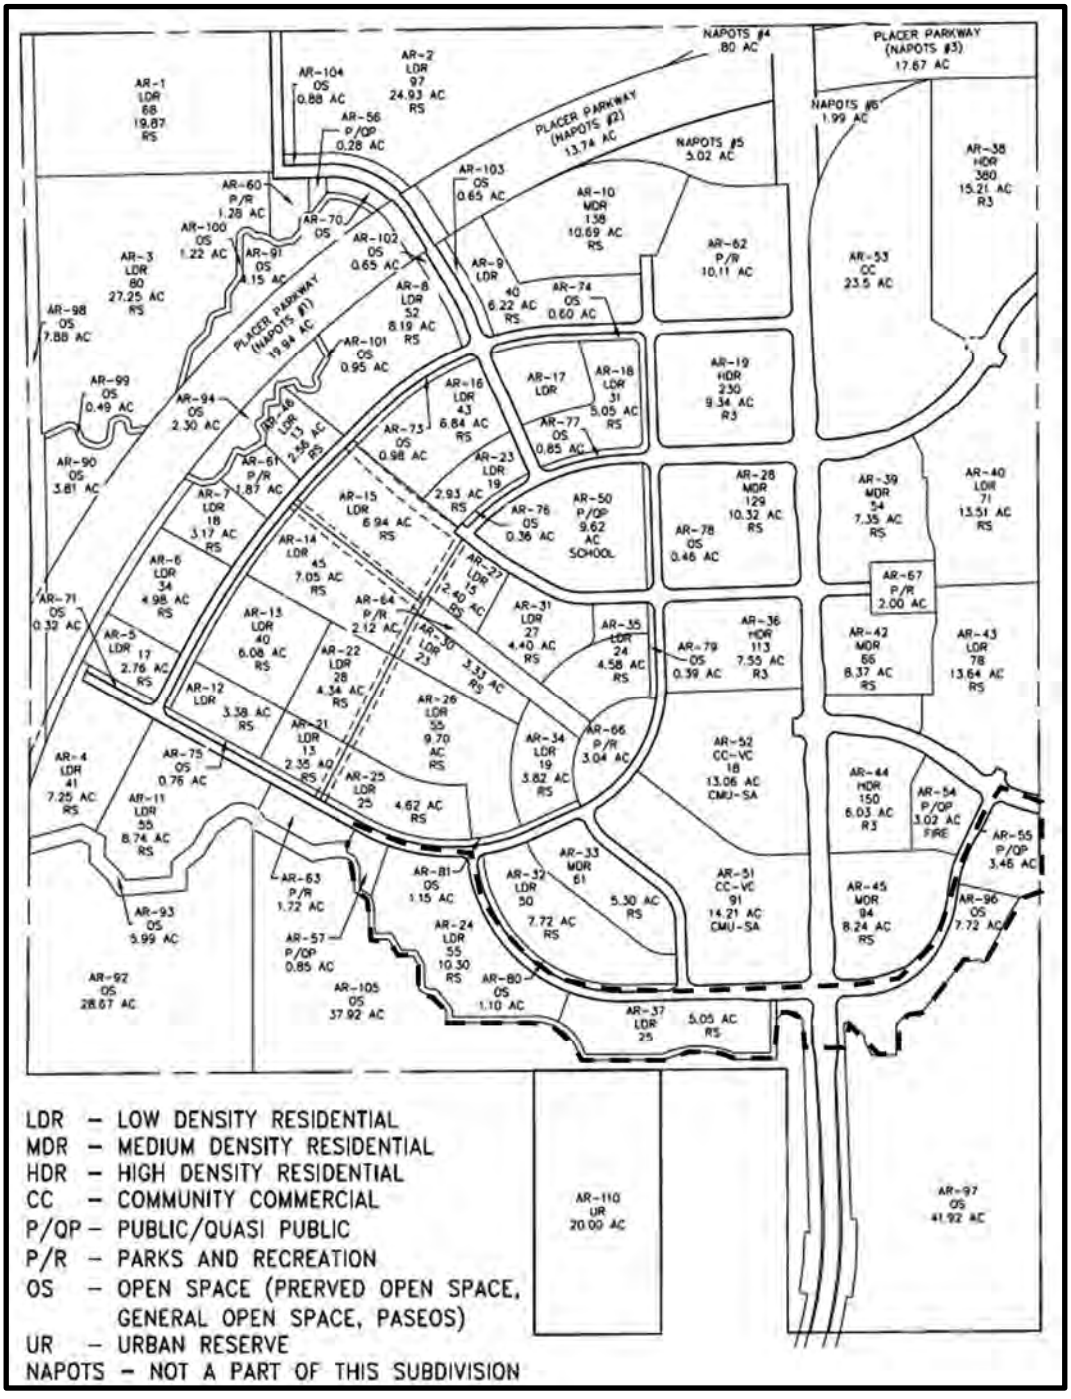
At buildout, as originally proposed, the ARSP Area will provide for 2,827 dwelling units, adds approximately 51 acres of commercial retail and office land uses, and provide approximately 22-acres of parks and 146-acres of open space.

With the changes in the land use plan, resulting from the environmental permitting processes, the project parameters are identical in terms of the number of units, acres of commercial, and acres of parks. However, the acres of open space have increased from approximately 146-acres to approximately 155-acres with a corresponding reduction in residential land use acreage.

As part of the original Specific Plan, the *"Brookfield Residential, Amoruso Ranch Specific Plan Area, Water Conservation Plan"*, dated April 2016, was prepared by Kimley-Horn and Associates. While the number of units proposed for the Specific Plan Area has not changed, the density of some of the units has been modified, which affects the calculations presented in the referenced Water Conservation Plan. This Technical Memorandum amends the referenced Water Conservation Plan to accommodate the changes in the land use plan.

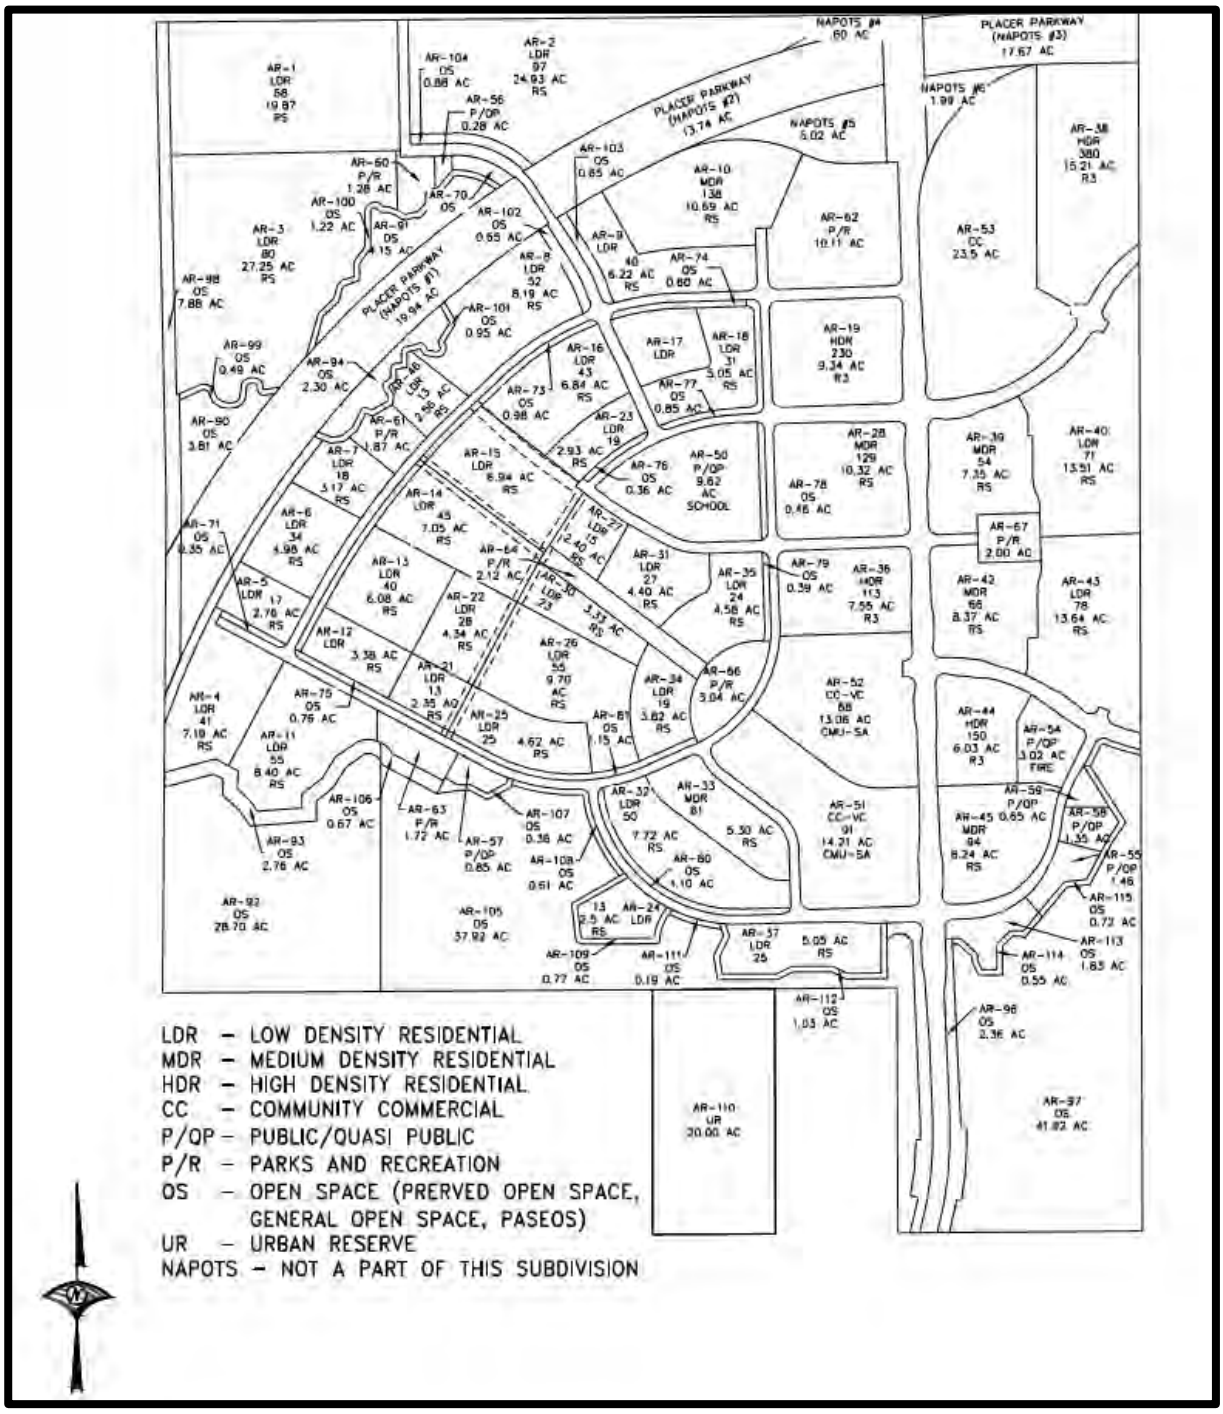
LAND USE PLAN UPDATE

As noted in the Introduction, the major change in the Land Use Plan occurs with the expansion of the open space and the coinciding reduction in the developable acres. The change represents approximately 9-acres that will be added to the open space, transitioning from developable land use. Figure TM-1 depicts the existing approved Land Use Plan that was adopted as part of the Amoruso Ranch Specific Plan in June 2016 by the City of Roseville. It depicts the area that was modified through the environmental permitting processes. The proposed and modified Land Use Plan is shown on Figure TM-2.



NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

Figure TM-1 – 2016 Approved Land Use Plan



The required modifications in the Land Use Plan occur along the southern edge of development, both to the east and west of Westbrook Boulevard, in locations where the development abuts the open space. The changes are depicted on Figure TM-2.

NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

While the land plan has a reduced number of developable acres, the total unit count has remained the same, with the displaced units reallocated to an existing developable parcel that can support the units, while conforming to the density ranges for the given product types.

Table TM-1 is a comparison of the unit allocation changes throughout the plan area.

Table TM-1
Unit Allocation Comparison

Parcel	Land Use	Acres			Units		
		2016	2019	Net Change	2016	2019	Net Change
AR-24	LDR	10.3	2.5	<7.8>	55	13	<42>
AR-37	LDR	6.28	5.05	<1.23>	33	25	<8>
AR-52	CC-VC	13.06	13.06	0	18	68	50
TOTAL				<9.03>			0

As noted in Table TM-1, the reallocated units are all located in the Community Commercial/Village Center (AR-52). This places the units very close to their original location. This also modifies the units from LDR to be CC/VC where the use factors for these units are consistent with HDR. This is important as it results in lower water use factors and lower wastewater generation rates.

The location of the affected land use parcels is shown on Figure TM-3 and indicated with a “blue circle”.

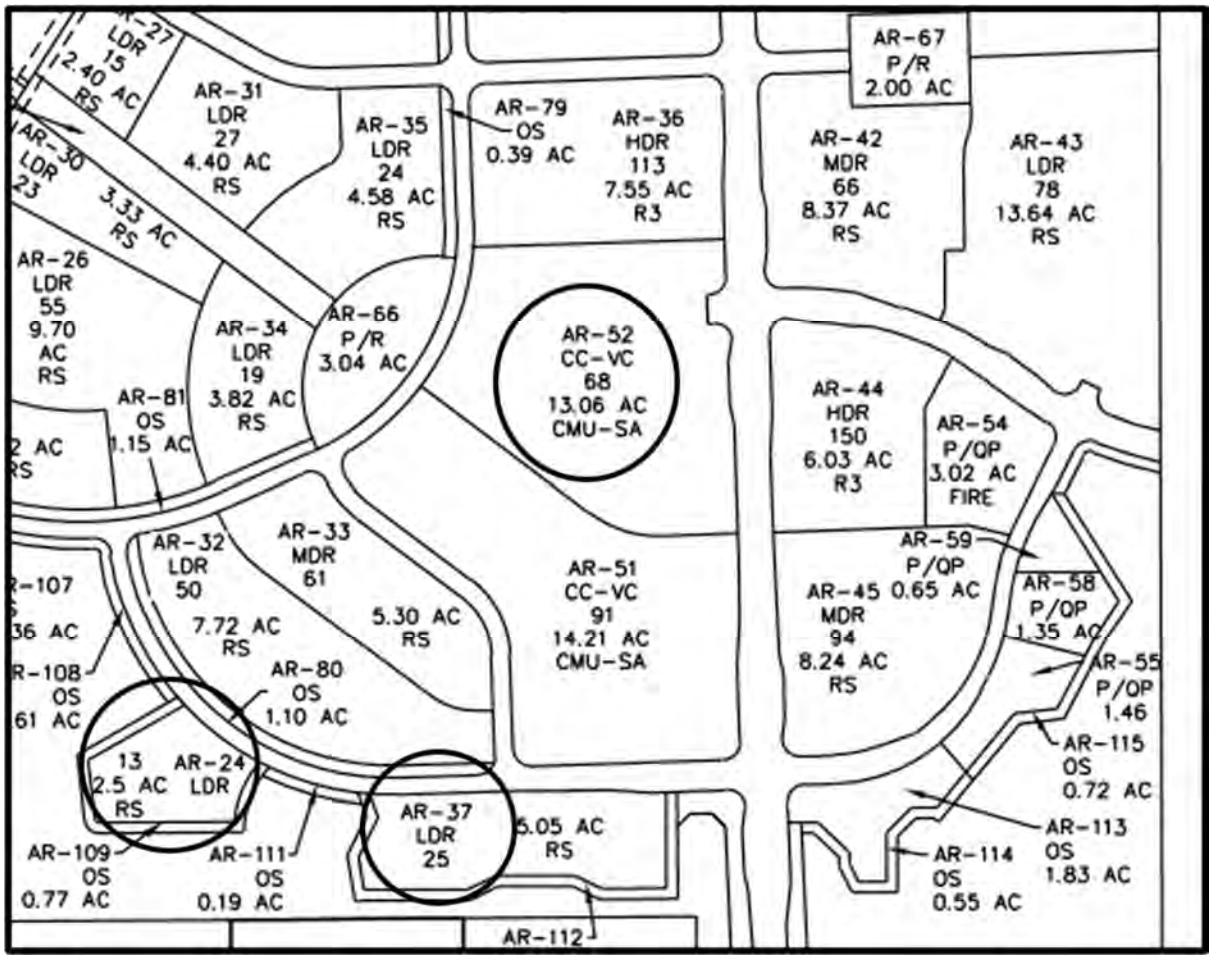


Figure TM-3 – Affected Land Use Parcels (Unit Transfer) (2019 Land Plan)

NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

WATER CONSERVATION PLAN

As noted above, the calculations related to water conservation for the development change as a result in the shift in density of some of the units. Provided below are the revised Water Conservation Plan Tables that have been updated based on the new land plan.

Water Conservation Plan Table 2 - Amended

Amoruso Ranch Specific Plan Amendment
Water Use Estimation – LDR, MDR and HDR

Land Use Category Density	Number of Units	Average Day Demand (GPD/DU)	Total Average Day Demand (GPD)	Total Average Day Demand (AFY)	Total Average Day Demand with 2% (AFY)[1]
LDR1: < 3.5 DU / Acre	148	728	107,744	120.7	123.1
LDR2: > 3.5 to 5 DU / Acre	116	600	69,600	78.0	79.5
LMDR1: > 5 to 6 DU / Acre	351	521	182,871	204.8	208.9
LMDR2: > 6 to 8 DU / Acre	757	430	325,510	364.6	371.9
MDR: > 8 to 12 DU / Acre	155	323	50,065	56.1	57.2

I. Introduction

Purpose of Report

This Parks Financing Plan was prepared for the Amoruso Ranch Specific Plan ("Project") by Development Planning and Financing Group, Inc. ("DPFG") as a strategy to fund and maintain the parks, bike trails, and paseos that are proposed in the Project. This document is an expansion of the Amoruso Ranch Public Facilities Financing Plan, and provides additional details regarding the costs and funding of neighborhood parks, citywide parks, bike trails, and paseos. The findings will provide a clear understanding of how the parks plan is feasible, the funding structure, and overall costs associated with the Project.

II. Amoruso Ranch Specific Plan

Parks and Open Space

The City of Roseville's Parks and Recreation Master Plan requires a ratio of 9 acres of parkland per 1,000 residents. The 9 acres of parkland includes; 3 acres/1,000 residents for neighborhood parks, 3 acres/1,000 residents for citywide parks, and 3 acres/1,000 residents for open space.

The parks program developed for Amoruso Ranch includes 157 acres of parkland on-site, including open space. The Project meets the neighborhood park and open space dedication requirement with at least 22.14 acres of each, but does not provide a citywide park. The project will pay a Citywide Park Fee which includes funding for park improvements and land (through an in-lieu calculation). Through the Citywide Park Fee, Amoruso Ranch will contribute its fair share to the creation of other planned facilities in the City. **Table 1** shows the required park acreage under the City's current Master Plan and project population assumptions. The developer is responsible for the budgeted park costs and the developer or City will be responsible for the construction of all the parks.

Seven neighborhood parks have been distributed throughout the Project. **Map 1** shows the location of all the neighborhood parks in the Amoruso Ranch project.

Bike Trails and Paseos

The bike trails and paseos planned within the Project are mainly located along roadways. Bike trails take the form of Class 1, Class 1A, Class 2, and Class 3. Only the Class 1 bike trails are located away from a roadway, and this bike trail class occurs on the south western portion of the Project and along Westbrook Boulevard through the southern open space. The paseos are expanded areas in addition to the normal landscaping along roadways. **Map 1** illustrates the paseos, while **Map 2** shows the bike trails.

III. Neighborhood Park Improvements

Facility Costs

Table 2 shows the total estimated neighborhood park facility costs. The parks program costs are estimated at roughly $7.1 million. The cost of the parks and recreation facilities include, but are not limited to, the following types of facilities:

- Landscaping
- Restrooms
- Parking
- Recreational fields
- Playgrounds
- Picnic areas

Detailed park improvements and costs are provided by The Collaborative West, and are attached as **Appendix A**.

Phasing

The development of Phase 1 would have park improvements that correspond to the amount of initial residential development. These improvements include five neighborhood parks at a size of 1.72 acres, 1.87 acres, 2.12 acres, 2.0 acres, and 3.04 acres, for a total of 10.75 acres. The estimated facilities cost for the park improvements for Phase 1 is approximately $3.9 million.

Funding Strategy – Existing Fee Programs

The neighborhood park impact fee funds the neighborhood park improvements in Amoruso Ranch. **Table 3** creates an updated fee for the Project by allocating the total neighborhood park improvement costs on a per residential unit basis. The costs were spread to the different residential land uses based on the persons per household that vary by unit size, using the same methodology as previous specific plans. This was done to create a tiered rate so that an HDR unit is not paying the same amount as an LDR unit.

Table 4 shows the neighborhood park impact fee revenues for Phase 1 and Build out.

IV. Citywide Park Improvements

The Citywide Park Improvement Fee funds the Project's fair share of the construction costs of a citywide park and the Citywide Park Land In-Lieu Fee will provide funding for the purchase of land that was not provided on site for a citywide park.

Facility Costs

Table 5 shows the total facility improvement costs and estimated in-lieu land costs. The Project's share of the citywide facilities costs are calculated by using the current Citywide Park Fee. The base fee for citywide park development is $2,111. A credit of $657 has been applied making the citywide park fee for ARSP $1,454 per unit.

Land Component

The Citywide Park land in-lieu was calculated using the acreage requirement determined in **Table 1**, multiplied by the land appraisal value of $135,000 per acre. This is the same value used in previous specific plans. A total in-lieu estimate of $2,988,900 was calculated for the ARSP. The land in-lieu fee per unit for citywide is $1,058 per unit.

Summary

The total citywide park improvement fee for facility costs and land in-lieu is $2,512 per unit.

The Citywide Park funds will be used to purchase land and/or build citywide park facilities in other locations throughout the City. Amoruso Ranch is currently not planned for citywide facilities to be built within the plan area.

Funding Strategy - Existing Fee Programs

The Citywide Park fee will fund the citywide park facilities throughout the City, and the in-lieu component will fund future land acquisitions or additional construction. **Table 6** creates the Citywide Park fee for the Amoruso Ranch project by allocating the total costs (construction and in-lieu) on a per residential unit. The costs were spread to the different residential land uses based on the persons per household that vary by unit size, using the same methodology as previous specific plans. This was done to create a tiered rate so that an HDR unit is not paying the same amount as an LDR unit.

Table 7 shows the citywide park fee revenues for Phase 1 and Build out.

V. Bike Trail Improvements

In the Amoruso Ranch project the Class 1 bike trail system is integrated with open space along the south west corner of the development and along Westbrook Boulevard in the open space on the south end of the development. **Map 2** illustrates the proposed bike trails in the project. The Class 1 bike trail system along with the other bike trails incorporated with the roadways (Class 1A, 2, and 3) are all included in the roadway backbone infrastructure costs outlined in the Amoruso Ranch Public Facilities Financing Plan. The developer will build these improvements as required, and as development progresses.

Phasing

The development of the Class 1 bike trail will occur entirely with the Phase 1 development.

Funding Strategy – Developer Built

The bike trail facilities will be built by the developer, without the formation of a fee program. These improvements will be an eligible facility to be funded and/or reimbursed by the project CFD when formed.

VI. Paseo Improvements

The paseos in Amoruso Ranch run along some segments of collector roadways. Paseos are expanded areas, in addition to landscape corridors with grass, trees, landscaping, and contain no facilities. **Map 1** illustrates the proposed layout of the paseos in the project. All of the paseo costs are included in the roadway backbone infrastructure costs outlined in the Amoruso Ranch Public Facilities Financing Plan. The developer will build these improvements as required, and as development progresses.

Phasing

The development of Phase 1 includes paseo improvements within the residential area on Road "E", "F", and Road "A", while the remaining improvements will be built in Phase 2 and 3 along Roads "F", "G", "E", and "D".

Funding Strategy – Developer Built

The paseo facilities will be built by the developer, without the formation of a fee program. These improvements will be an eligible facility to be funded and/or reimbursed by the project CFD when formed.

VII. Community Facilities District for Maintenance

The Developer will form a CFD for maintenance to finance the cost of operating and maintaining streets, landscaping, open space, parks, trails, paseos and storm water in the Project. A Rate and Method of Apportionment will be required in establishing a method of tax, a maximum special tax amount, and any escalation factors that will be implemented to allow the annual special tax to keep pace with inflation. **Table 8** details the quantities and cost assumptions to be used in the formation of the CFD with the exception of open space related items, while **Table 9** allocates the costs across the various product types to estimate the special tax amount. An updated Property Analysis Record ("PAR") will be required prior to CFD formation and based on 404 permit conditions, an inventory of all environmentally sensitive/protected areas within the open space, approved improvements, any mitigation requirements, final drainage channel design, vehicular access for maintenance, ultimate width of transition area, all ARSP specific permits, and other requirements/improvements outlined in the Overarching Open Space Management Plan and consistent with state/federal permits.

The maintenance CFD does not include the 645.5 acres of off-site open space. These parcels will be either conveyed to the City, pending agreed upon parameters for acceptance or deeded to a third party entity. If the City accepts these parcels, landowner shall annex these sites into the CFD for maintenance prior to formation. A PAR analysis for the cost of service shall be prepared prior to annexation.

Amoruso Ranch Specific Plan - Park Financing Plan
Neighborhood Park Cost Allocation

	Source	Total	Residential				Non-Residential	
			LDR	MDR	HDR	CMU	CC	CMU
Acres		388.3	248.8	50.3	38.2	5.5	23.9	21.8
Units		2,826	1,302	542	873	109	-	-
Square Feet		476,524	-	-	-	-	238,948	237,576
Neighborhood Parks	**Table 2**	**$7,137,239**		*PPH*				*PPH*
Use Factor[1]			2.61	2.23	1.85	1.85	-	-
Total Use		6,423.09	3,398.22	1,208.55	1,614.71	201.61	-	-
Percentage of Total Use		100%	53%	19%	25%	3%		
Cost Allocated to Use			$3,776,051.65	$1,342,926.51	$1,794,237.69	$224,022.80		
Neighborhood Parks Allocation per Unit/Sq.Ft.			$2,900.19	$2,477.72	$2,055.26	$2,055.26	-	-

Footnotes:

[1]The persons per household ("PPH") use factor assumed here, matches the average PPH of the City with an LDR unit. To create a tiered fee, the assumed PPH for the MDR and HDR land uses are then shown at a reduced amount. This methodology is consistent with what was done in the prior SVSP and CSP. The prior specific plans used an average PPH of 2.54, and thus land uses were assinged a PPH of 2.54 (LDR), 2.17 (MDR), and 1.8 (HDR). The updated factors asume the same percentage allocation of costs by land use as the prior specific plans, by using a PPH of 2.61 (LDR), 2.23 (MDR), and 1.85 (HDR).

NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

Table 4

Total Costs			**$835,071.85**

Source: City of Roseville, ECORP, and Kimley Horn.

Footnotes:

[1]Cost estimates derived from indepth analysis of City costs done for SVSP. Those costs have then been applied to all specific plans since.

[2]1/3 of streetsweeping miles.

[3]The Cost per Unit for Open Space placeholder of $575 per year was derived by simply averaging the City's proposed annual open space cost per acre of $1,000 and the Developer proposed annual open space cost per acre of $150. The actual annual open space cost per acre will be determined at the time of the formation of the maintenance CFD for this project as outlined in the Development Agreement. The ultimate cost per acre could be above or below the aforementioned range, depending upon the 404 permit conditions, an inventory of all environmentally sensitive/protected areas within the open space, approved improvements, any mitigation requirements, vehicular access for maintenance, final drainage channel design, ultimate width of transition area, all ARSP specific permits, other improvements outlined in the Overarching Open Space Management Plan, state and federal permits, and established city maintenance standards.

[4]Includes developed and undeveloped.

ORDINANCE NO.

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE ADOPTING A SECOND AMENDMENT OF THE DEVELOPMENT AGREEMENT BY AND BETWEEN THE CITY OF ROSEVILLE, BROOKFIELD SUNSET, LLC AND JENNIFER M. AMORUSO, SUCCESSOR TRUSTEE OF THE AMORUSO FAMILY LIVING TRUST DATED MARCH 14, 2005 RELATIVE TO THE AMORUSO RANCH SPECIFIC PLAN (148.7 ACRES) AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. In accordance with Chapter 19.84 of Title 19 of the Roseville Municipal Code (the Zoning Ordinance) of the City of Roseville, the City Council has received the recommendation of the Planning Commission that the City of Roseville enter into a Second Amendment of the Development Agreement by and between the City of Roseville, Brookfield Sunset, LLC, a California limited liability company ("Brookfield"), and Jennifer M. Amoruso, Successor Trustee of the Amoruso Family Living Trust Dated March 14, 2005 ("Amoruso")(collectively, "Landowner"), pertaining to the property located within the Amoruso Ranch Specific Plan area (148.7 acres).

SECTION 2. Prior to considering the proposed Second Amendment to Development Agreement, the City Council considered the Addendum to the Amoruso Ranch Specific Plan Environmental Impact Report (EIR) certified on June 15, 2016, pursuant to the California Environmental Quality Act, California Public Resources Code Section 21000 *et seq.*

SECTION 3. The Council of the City of Roseville has reviewed the findings of the Planning Commission recommending approval of the Second Amendment to Development Agreement, and makes the following findings:

1. The Second Amendment to Development Agreement is consistent with the objectives, policies, programs and land use designations of the City of Roseville General Plan and the Amoruso Ranch Specific Plan;

2. The Second Amendment to Development Agreement is consistent with the City of Roseville Zoning Ordinance;

3. The Second Amendment to Development Agreement is in conformance with the public health, safety and welfare;

4. The Second Amendment to Development Agreement will not adversely affect the orderly development of the property or the preservation of property values; and

5. The provisions of the Second Amendment to Development Agreement will provide sufficient benefit to the City to justify entering into said Amendment;

SECTION 4. The Second Amendment to Development Agreement, by and between the City of Roseville, Brookfield Sunset, LLC, a California limited liability company ("Brookfield"), and Jennifer M. Amoruso, Successor Trustee of the Amoruso Family Living Trust, Dated March 14, 2005, pertaining to the property located within the Amoruso Ranch Specific Plan area (148.7 acres), a copy of which is on file in the City Clerk's Department and incorporated herein by reference, is hereby approved and the City Manager is authorized to execute it on behalf of the City of Roseville.

SECTION 5. The City Clerk is directed to record the executed Development Agreement Amendment within ten (10) days of the execution of the agreement by the City Manager with the County Recorder's Office of the County of Placer.

SECTION 6. This ordinance shall be effective at the expiration of thirty (30) days from the date of its adoption.

SECTION 7. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville this ____ day of _____, 2022, by the following vote on roll call:

SECOND AMENDMENT OF DEVELOPMENT AGREEMENT BY AND BETWEEN THE CITY OF ROSEVILLE, BROOKFIELD SUNSET, LLC, AND JENNIFER M. AMORUSO, SUCCESSOR TRUSTEE OF THE AMORUSO FAMILY LIVING TRUST DATED MARCH 14, 2005 RELATIVE TO THE AMORUSO RANCH SPECIFIC PLAN

This Second Amendment of Development Agreement ("Second Amendment") is entered into this ____ day of _____, 2022, by and between the CITY OF ROSEVILLE, a municipal corporation ("City"), BROOKFIELD SUNSET, LLC, a California limited liability company ("Brookfield"), BROOKFIELD SACRAMENTO HOLDINGS, LLC, a Delaware limited liability company, ("Brookfield Sacramento"), and ANGELA EISENPRESS, Successor Trustee of the Amoruso Family Living Trust Dated March 14, 2005 ("Amoruso")(collectively, "Landowner"), pursuant to Sections 65864 through 65869.5 of the Government Code of the State of California.

RECITALS

A. Landowner and City entered into a Development Agreement (the "Development Agreement") which was approved by the City Council of City on July 6, 2016, and recorded on August 24, 2016, in the Official Records of Placer County as Document No. 2016-0070352-00. City and Landowner entered into the Development Agreement relative to development within a portion of the Amoruso Ranch Specific Plan ("Specific Plan", "ARSP", or "Plan Area"), as such is more precisely described in Exhibits "A" and "B" of the Development Agreement (the "Property"), as those exhibits are amended by Exhibits "A" and "B" attached hereto. Except as otherwise defined herein, all capitalized terms used herein shall have the meanings ascribed thereto in the Development Agreement.

B. Landowner and City entered into a First Amendment to the Development Agreement (the "First Amendment") which was approved by the City Council of City on April 1, 2020, and recorded on January 28, 2021, in the Official Records of Placer County as Document No. 2021-0012078-00.

C. Since approval of the Development Agreement, Brookfield Sacramento has become the fee title owner of a portion of the Property, as shown in Exhibit "D"

attached to the First Amendment, and Brookfield remains under contract to purchase the balance of the Property from Amoruso, with all persons holding legal or equitable interests in the Property being bound by the Development Agreement and this Second Amendment.

D. Concurrent with its consideration of this Second Amendment, City is processing a General Plan Amendment (Resolution No. _____), a Specific Plan Amendment (Resolution No. _____), a Rezone (Ordinance No. _____), and a Tentative Subdivision Map (TSM _____) for purposes of revising land use entitlements on the Property. City and Landowner wish to enter into this Second Amendment in order to provide consistency with these land use approvals.

E. This Second Amendment is authorized by Section 1.4 of the Development Agreement.

NOW, THEREFORE, THE PARTIES MUTUALLY AGREE AS FOLLOWS:

1. AMENDMENT OF DEVELOPMENT AGREEMENT. The following section and exhibits of the Development Agreement are hereby amended as follows:

a. REVISED SECTION 2.2. Section 2.2 of the Development Agreement is revised in its entirety to read as follows:

> "2.2 Vested Entitlements. Subject to the provisions and conditions of this Agreement, City agrees that City is granting, and grants herewith, a fully vested entitlement and right to develop the Property in accordance with the terms and conditions of the Entitlements, including, but not limited to, allocation of residential units to residentially designated parcels in the Specific Plan, minimum lot sizes, street locations and configurations in any approved tentative subdivision maps, and allocation of building square footage to commercially designated parcels in the Specific Plan. City acknowledges that the Entitlements include the following Specific Plan land use designations and approximate gross acreages for all land uses for the Property as shown in the Specific Plan Land Plan in Exhibit "E", attached hereto and summarized below:
>
> | | |
> |---|---|
> | Low Density Residential | 1,099 units on 219.1 Gross Acres; |
> | Medium Density Residential | 695 units on 69.3 Gross Acres; |
> | High Density Residential | 873 units on 37.9 Gross Acres; |
> | Community Commercial | 23.7 Gross Acres; |
> | Community Commercial/Village District | 159 units on 27.2 Gross Acres; |

Park	22.2 Gross Acres;
Open Space	144.6 Gross Acres;
Open Space (Paseos)	11.0 Gross Acres;
School	9.6 Gross Acres;
Public/Quasi Public	7.5 Gross Acres;
Right of Way	51.7 Gross Acres;
NAPOTS (Placer Parkway)	50.6 Gross Acres.
TOTAL	674.4 Gross Acres

Such uses shall be developed in accordance with the Entitlements, as such Entitlements provide on the Effective Date of this Agreement. Landowner's vested right to proceed with the development of the Property shall be subject to subsequent approvals, provided that any conditions, terms, restrictions and requirements for such subsequent approvals shall not prevent development of the Property for the uses set forth in the Entitlements, and as more fully set forth in Section 2.4.1 below."

b. REVISED SECTION 3.7.3. Section 3.7.3 of the Development Agreement is revised in its entirety to read as follows:

"3.7.3 Groundwater Well.

3.7.3.1 Parcel Dedication. Landowner shall dedicate to City Parcel AR-58 for City facilities, including a groundwater well, at the approximate location shown on Exhibit "L". Landowner shall construct frontage improvements for Parcel AR-58, including water, recycled water, wastewater, storm drainage, electric and communication fiber conduit.

3.7.3.2 Well Construction Requirements. As shown in Exhibits "L" and "N", the water facilities site shall be constructed adjacent to the 24" water line to be constructed in Road B, and be connected to that 24" water line with a 16" water line within Road A, or other pipe sizes as may be approved by City's Environmental Utilities Director pursuant to updated water studies. Landowner shall install a test well in a location mutually agreed upon by Landowner and City to determine if the well location utilized meets desired capacity and water quality. If the desired capacity and water quality are confirmed by the test well, Landowner shall be responsible for drilling and completing the production well (but not above ground well improvements such as pumping and treatment facilities) as further described below (the "Well Construction Requirements"). City shall be responsible for the construction and costs of above ground production well (topside) improvements such as pumping and treatment facilities. It is the intent of this section (and the Parties) that the groundwater well location identified within the Project shall be capable of achieving a yield of

approximately 1,800 gallons per minute, be designed for Aquifer Storage and Recovery, and the groundwater water is of such quality that only disinfection will be required to meet California Drinking Water Quality Standards. Should the City determine the available capacity or water quality does not achieve these objectives, Landowner shall, at its own cost, work with the City to relocate the well site within the Project to an alternative site mutually agreed to by City and Landowner until these objectives are satisfied.

Landowner shall contact the City Environmental Utilities Department prior to design and construction of the production well. The production well shall be in operation at the time of occupancy of the 1,250th residential unit in the Project. Landowner shall receive approval from the City of the well design and drilling method prior to commencement of this work. In addition, notwithstanding the foregoing, the well shall be drilled prior to the time of occupancy of any residential units within 500 feet of the well site. Landowner shall include noise curtains for the well if at the time of construction of the well homes are occupied between 500 feet and 1,000 feet of the well.

If City determines that the production well is required prior to the occupancy of the 1,250th residential unit in the Project, City has the right to construct the test well and the production well. Landowner shall reimburse City for the actual cost of the below ground improvements for the test well and production well, as set forth above, including annual CCI adjustments of such costs, upon occupancy of the 1,250th residential unit in the Project. If City constructs the test well and production well prior to the occupancy of the 1,250th residential unit in the Project, Landowner agrees to construct an all weather access roadway within either the Road A or Road B RoW and all associated infrastructure necessary to serve Parcel AR-58 as specified in this Section 3.7.3 within one (1) year of notification from City if Road B has not otherwise already been constructed by Landowner.

Notwithstanding the foregoing, if the City adopts a revised water connection fee which encompasses the cost of the Well Construction Requirements, Landowner shall be relieved of the Well Construction Requirements set forth in this Section 3.7.3.2.

Landowner shall, prior to the issuance of the first building permit in the Project phase where an existing well is located, destroy the well or wells in that particular Project phase from among the two existing agriculture irrigation wells and one domestic well in the Project Area. Landowner shall obtain from City a Well Permit and follow the California Well Standards for the destruction of the wells on the Property. All construction plans shall be designed pursuant to City's then current Standards and mutually agreed to by Landowner and the

Environmental Utilities Director, and subject to City plan review, construction inspection and final approval. Landowner shall pay the then current plan check, mapping and inspection costs as incurred by City for review, mapping, and inspection of the destruction of the wells."

c. REVISED SECTION 3.8.8. Section 3.8.8 of the Development Agreement is revised in its entirety to read as follows:

"3.8.8. Water Service Area Boundary Modification. Landowner shall reimburse City for all costs associated with modifying City's service area boundary to include the Project with the U.S. Bureau of Reclamation. There shall be no delay or refusal to issue building permits in the Project by City while City is modifying the service area boundary to include the Project."

d. REVISED SECTION 3.9.2. The third and fourth paragraphs of Section 3.9.2 of the Development Agreement are revised in their entirety to read as follows:

"Landowner shall likewise be required to contribute its pro-rata share of the cost of expansion of the WRSP recycled water tank and pump station located north of the Pleasant Grove Wastewater Treatment Plant that is required to serve the WRSP, as set forth in Section 3.27 and 3.28 of this Agreement, and as set forth in Exhibits "Q-1" and "Q-2". Landowner's pro-rata share of the cost of expansion of the WRSP recycled water tank and pump station referenced herein, estimated at $2.287 million, shall be paid though the CFD for the Project, with payment from the CFD not required until after the 1,250th building permit is issued in the Project.

If City institutes a recycled water connection fee, or such fee is embedded into City's revised water connection fee (which encompasses the estimated $2.287 million for expansion of the WRSP recycled water tank and pump station described in the preceding paragraph), prior to the issuance of any building permits in the Project, Landowner shall not be responsible for the payment of the estimated $2.287 million pro-rata share of the cost of the expansion of the WRSP recycled water tank and pump station except through the payment of the City recycled water connection fee, or City's revised water connection fee if a recycled water connection fee is embedded into City's revised water connection fee, or any special benefit fees as may be applicable to the Project to fund the expansion of the WRSP recycled water tank and pump station."

e. REVISED EXHIBITS. The following exhibits attached to the Development Agreement are replaced by new exhibits attached to this Second Amendment as follows:

Exhibit A Property Legal Description

Exhibit B	Property Map
Exhibit C	Annexation Area and Plan Area
Exhibit D	Specific Plan Property Ownership

2. CONSISTENCY WITH GENERAL PLAN. The City Council has found and determined that this Second Amendment of the Development Agreement is consistent with the General Plan and the Amoruso Ranch Specific Plan.

3. AMENDMENT. This Second Amendment amends, but does not replace or supersede, the Development Agreement, except as specified herein. As amended hereby, the Development Agreement remains in full force and effect.

4. FORM OF AMENDMENT. This Second Amendment is executed in two duplicate originals, each of which is deemed to be an original.

INTRODUCTION

The Amoruso Ranch Specific Plan (ARSP) Area Water Conservation Plan (Plan) has been prepared at the request of Brookfield Residential Properties, Inc. (Brookfield) to meet the City of Roseville's (City) requirements and in support of the ARSP process.

WATER CONSERVATION PLAN PURPOSE

In February 2008, then California Governor Arnold Schwarzenegger introduced a seven-part comprehensive plan for improving the Sacramento-San Joaquin Delta. As part of this effort, the Governor directed state agencies to develop a plan to reduce statewide per capita urban water use by 20 percent by the year 2020. In February 2010, the State Water Resources Control Board issued the 20x2020 Water Conservation Plan.

As part of the response to the 20x2020 Plan, the City has a requirement that all new specific plan projects incorporate water conservation measures into the overall project design such that the overall water demands (both potable and recycled) are reduced. The City has an overall conservation goal of 20% for potable and irrigation water usage throughout the City.

This Plan presents potentially feasible measures and guidance that can result in a reduction of the projected overall water usage within the ARSP Area, which will contribute towards the City-wide conservation goal. The projected reduction in water use will be established as part of this Plan through a process of: estimating the baseline water demands without conservation measures; identification of potentially feasible conservation measures; and estimation of the resultant water demands with application of the identified conservation measures. This Plan has been developed in conformance with the Water Efficient Landscape Ordinance (WELO) as a minimum.

ARSP AREA LOCATION AND DESCRIPTION

Project Vicinity

The ARSP Area consists of approximately 694.4 acres located in the northwest edge for the City of Roseville. Prior to the Specific Plan's adoption, the plan area was recognized as a logical growth extension for the City. The Specific Plan Area is bounded on the southwest by the Al Johnson Wildlife Area, to the west by the Gleason property, to the south by the Creekview Specific Plan Area, to the east by the future proposed Placer Ranch Specific Plan Area and to the north by the existing Toad Hills Ranches #1 area and unincorporated Placer County. The project vicinity is shown on Figure 1.

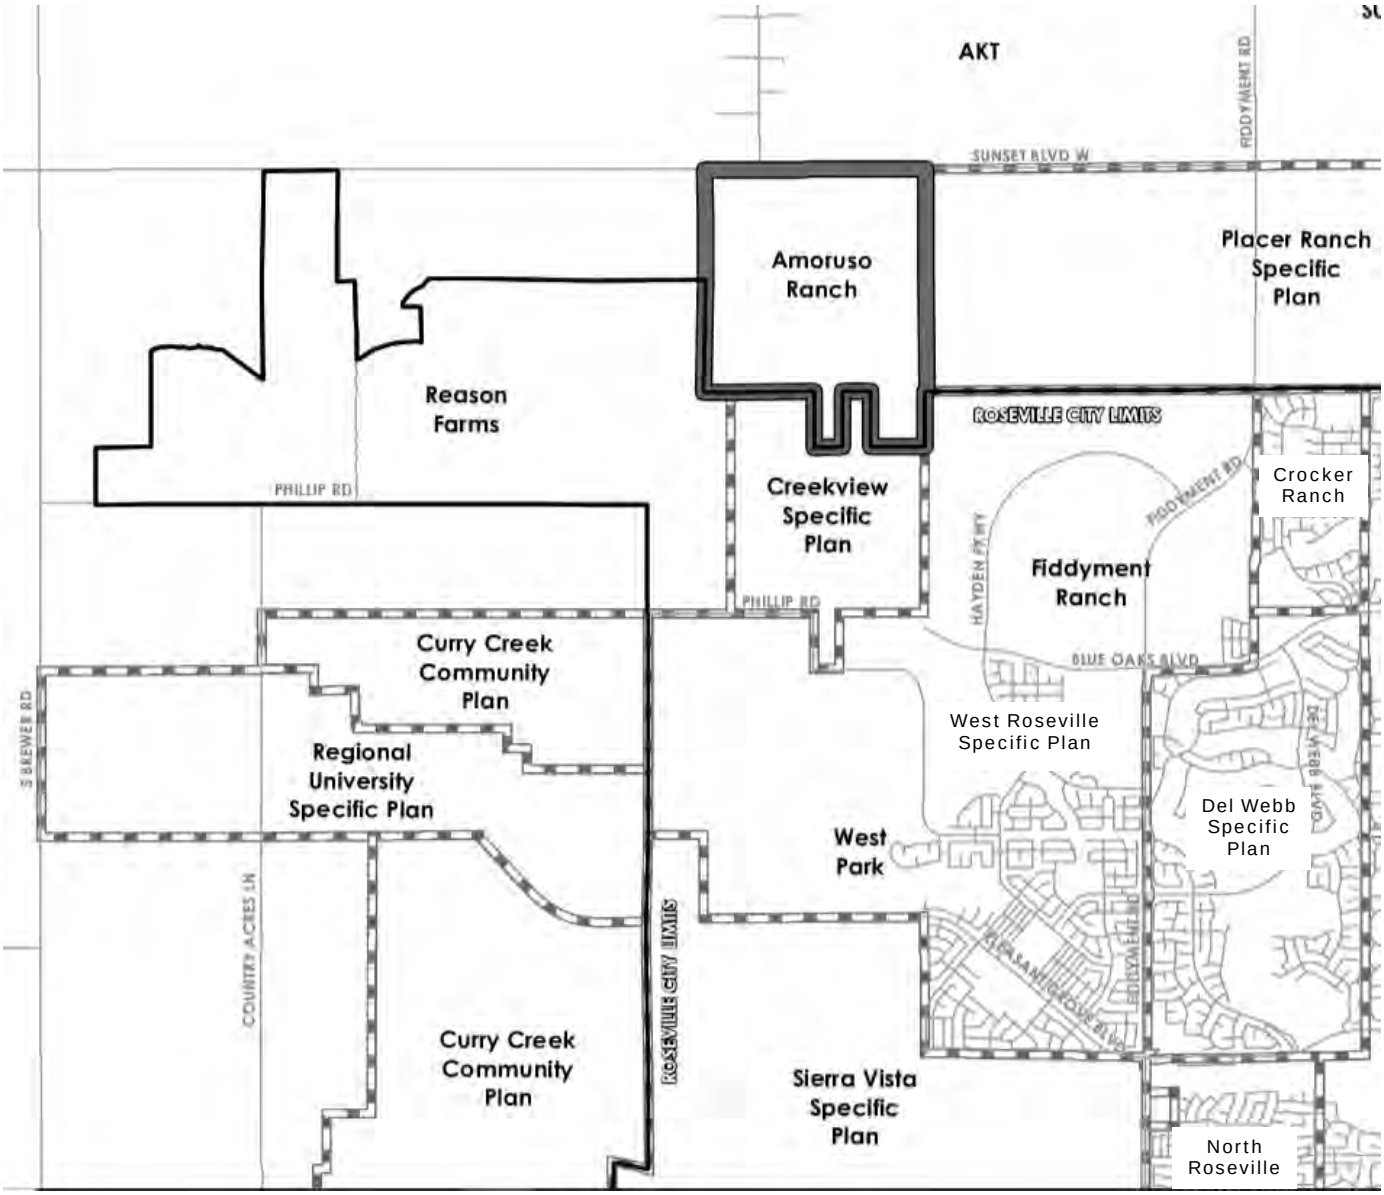

Figure 1 – ARSP Area Project Vicinity

NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

Pre-Development Conditions

The pre-development conditions of the ARSP Area were as a cattle ranch and for irrigated crops. The primary use was open grazing land, but included a small ranch house and out buildings. The land is gently rolling terrain generally trending to the west and south. Minor drainages flow in a radial pattern from a slight rise in the northeast quadrant of the property. The elevation changes from approximately 115 feet to 71 feet gently from the northeast down to the southwest.

The site vegetation is generally limited to short, seasonal grasses. There are several oak trees located along University Creek and a number of non-native trees located around the former ranch house. Wetland conditions and their associated flora and fauna are located in small areas typically along the drainage corridors and in flats along the southern boundary. Figure 2 highlights the ARSP Area pre-development conditions.

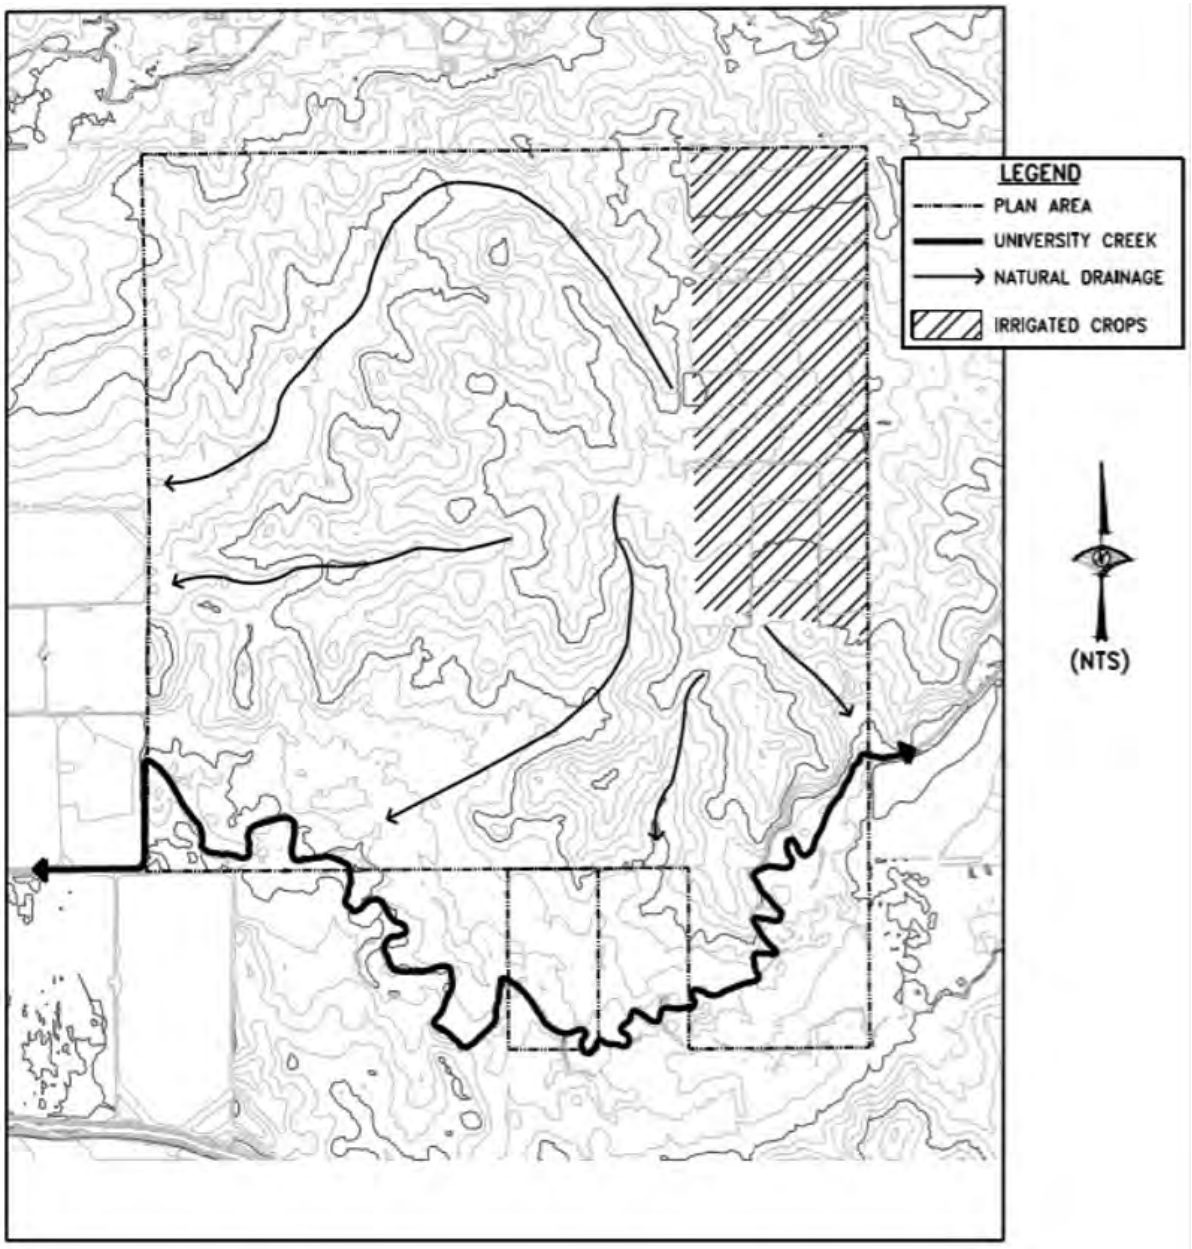

Figure 2 – ARSP Area Pre-Development Conditions

NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

ARSP Area Development Opportunities and Constraints

The proposed ARSP Area land use plan is influenced by several factors, including the physical setting, land use and circulation conditions, and public policies. Two significant aspects that influence the development of the land plan are described below and depicted on Figure 3.

Placer Parkway

The proposed Placer Parkway will be a dominant feature that sweeps through the ARSP Area. Interchanges at Fiddyment Road and Santucci Boulevard will provide access to the ARSP Area.

Open Space and Resources Preservation

The ARSP Area will support open space and resource preservation by providing permanent open space. In combination with the 1,700-acre open space afforded by the City of Roseville Al Johnson Wildlife Area, this open space provides connectivity with open space within the Creekview Specific Plan Area, and lands to the east of the ARSP Area.

The Amoruso Ranch Specific Plan will provide an open space corridor that includes a pedestrian and bike path linkage between this major open space area and the City's regional trail system. In addition, the corridor will provide a permanent preservation area for wetland resources.

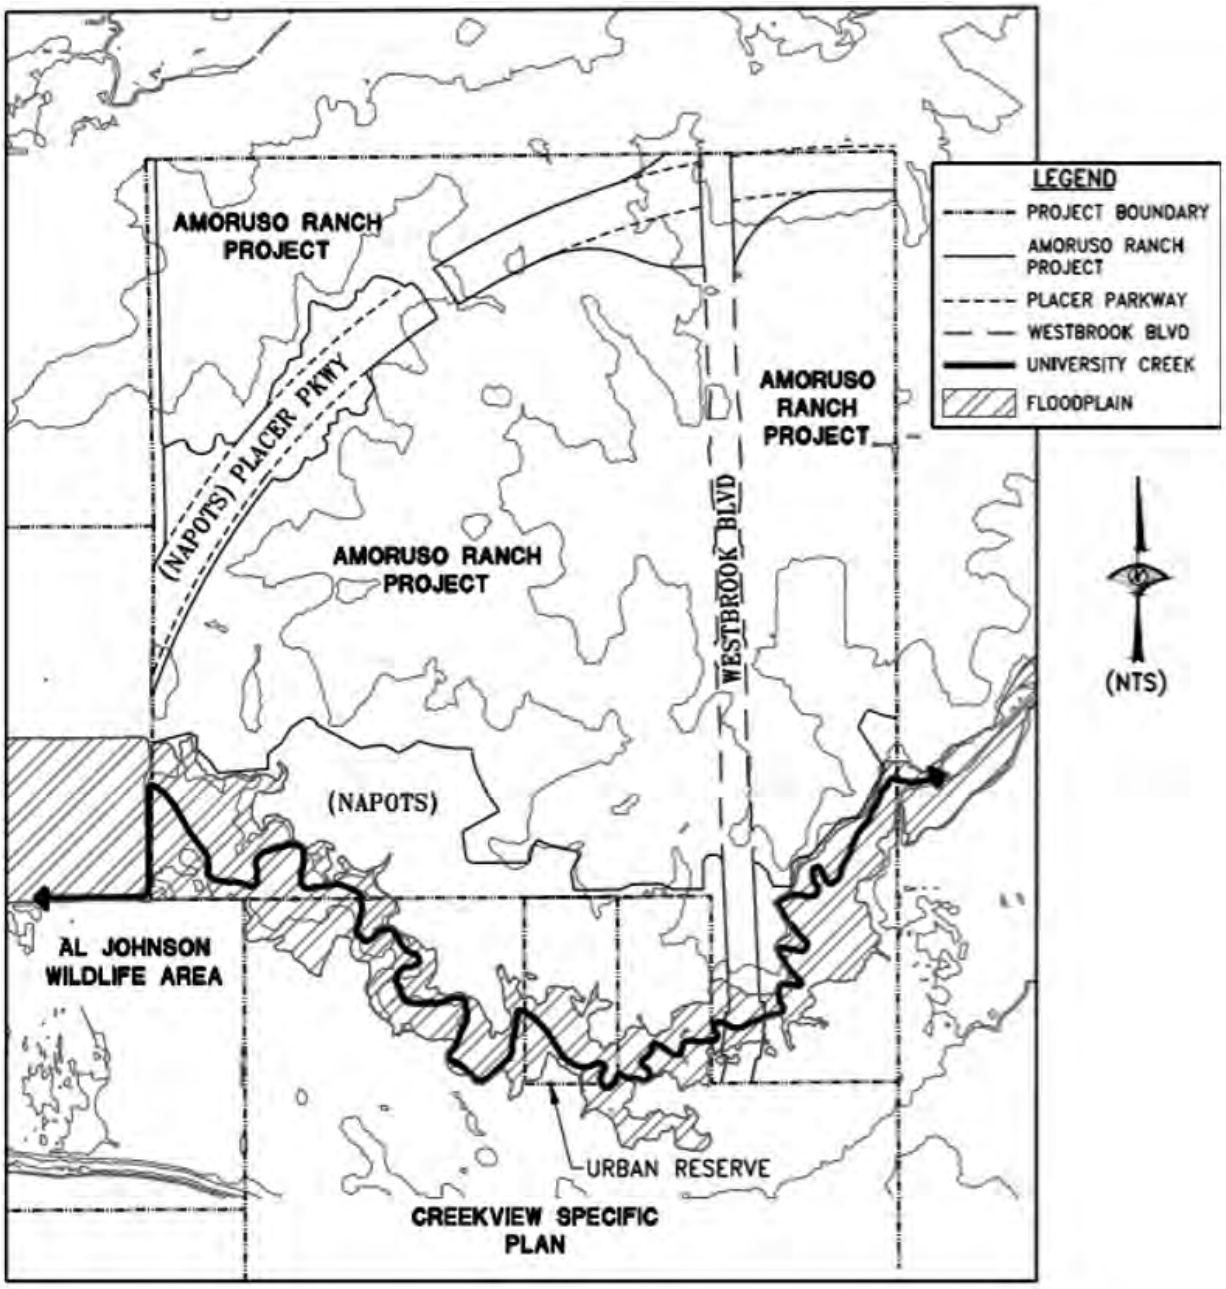

Figure 3 – ARSP Area Opportunities and Constraints

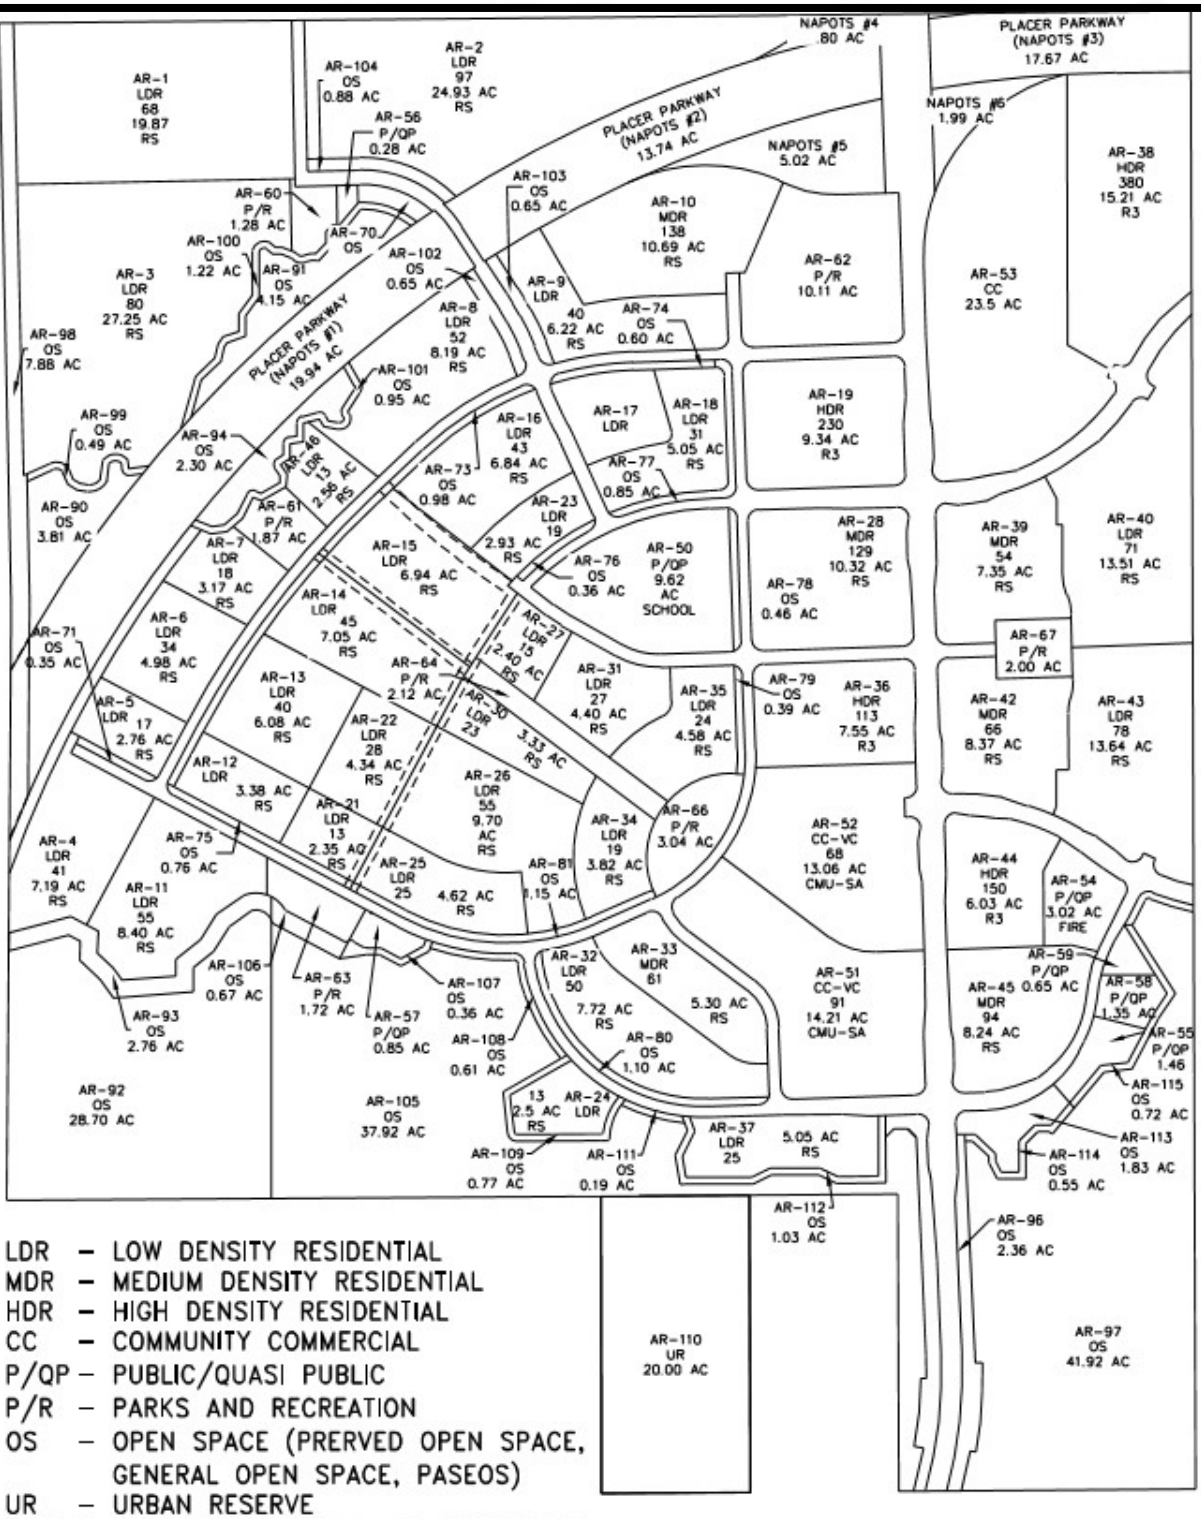
NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

ARSP Area Land Use Plan

The ARSP Area provides for a mix of land uses to achieve the desired community form and objectives. These land use designations include low-, medium- and high density residential uses; commercial and office uses; which in some cases are sited with one another and/or with residential uses, public and quasi-public uses for the schools and civic activities such as a fire station, parks and open space uses, and an urban reserve.

At buildout, the ARSP Area will provide for 2,827 dwelling units, it adds approximately 51 acres of commercial retail and office land uses, and provides approximately 22-acres of parks and 146-acres of open space. The ARSP Area Land Use Plan is shown in Figure 4.



LDR – LOW DENSITY RESIDENTIAL
MDR – MEDIUM DENSITY RESIDENTIAL
HDR – HIGH DENSITY RESIDENTIAL
CC – COMMUNITY COMMERCIAL
P/QP – PUBLIC/QUASI PUBLIC
P/R – PARKS AND RECREATION
OS – OPEN SPACE (PRERVED OPEN SPACE, GENERAL OPEN SPACE, PASEOS)
UR – URBAN RESERVE
NAPOTS – NOT A PART OF THIS SUBDIVISION

NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

BASELINE WATER USE ESTIMATION

The calculation of the baseline water use estimation was established based on the land use designations developed as part of the ARSP Area Land Use Plan shown on Figure 4.

The baseline water use for the project was established using the City's standard water use factors, as developed for the City by MWH in 2006. The City of Roseville employs standard demand factors for residential land uses of varying densities, as well as standard demand factors for commercial/other land uses. The residential demands are presented as gallons per day (GPD) per dwelling unit (DU), and the commercial/other demands are presented as GPD per acre. The City's demand factors are listed in Table 1.

Table 1
Amoruso Ranch Specific Plan
Water Conservation Plan
City of Roseville Demand Factors

General Plan Land Use Category	Average Day Demand
Residential GPD/DU	
LDR1: < 3.5 DU / Acre	728 GPD/DU
LDR2: > 3.5 to 5 DU / Acre	600 GPD/DU
LMDR1: > 5 to 6 DU / Acre	521 GPD/DU
LMDR2: > 6 to 8 DU / Acre	430 GPD/DU
MDR: > 8 to 12 DU / Acre	323 GPD/DU
HDR1: > 12 to 16 DU / Acre	288 GPD/DU
HDR2: > 16 DU / Acre	177 GPD/DU
Non-Residential GPD/Acre	
Commercial / Retail	2598 GPD/Acre
Business Professional	2598 GPD/Acre
Light Industrial	2598 GPD/Acre
Industrial	2562 GPD/Acre
Railroad Yard	109 GPD/Acre
Elementary School	3454 GPD/Acre
High School	4068 GPD/Acre
Public (Fire Station, etc)	1780 GPD/Acre
Park / Recreation	2988 GPD/Acre
Open Space / ROW	0 GPD/Acre
Vacant	0 GPD/Acre

Utilizing the City's demand factors, the estimated annual water use for the Low-, Medium- and High-Density Residential units proposed within the ARSP Area have been calculated. The basis of the Low-, Medium- and High-Density Residential water use is presented within Table 2.

Table 2
Amoruso Ranch Specific Plan
Water Conservation Plan
Water Use Estimation – LDR, MDR and HDR

Land Use Category Density	Number of Units	Average Day Demand (GPD/DU)	Total Average Day Demand (GPD)	Total Average Day Demand (AFY)	Total Average Day Demand with 2% (AFY)[1]
LDR1: < 3.5 DU / Acre	148	728	107,744	120.7	123.1
LDR2: > 3.5 to 5 DU / Acre	116	600	69,600	78.0	79.5
LMDR1: > 5 to 6 DU / Acre	401	521	208,921	234.0	238.7
LMDR2: > 6 to 8 DU / Acre	757	430	325,510	364.6	371.9
MDR: > 8 to 12 DU / Acre	155	323	50,065	56.1	57.2
HDR1: > 12 to 16 DU / Acre	380	288	109,440	122.6	125.0
HDR2: > 16 DU / Acre	760	177	134,520	150.7	153.7
Community Commercial - Village Center – Residential	109	288	31,392	35.2	35.9
Urban Reserve	1	728	728	0.8	0.8
Total	**2,827**	**-**	**1,037,920**	**1,162.6**	**1,185.9**

The water use estimation, as established by the City for purposes of water conservation does not distinguish between potable water and recycled water. Table 3 includes a summary of the estimated baseline water demands. Consistent with previous similar analyses completed by the City, a factor for water system losses has not been included in the water conservation calculations. It has, however, been included for informational purposes in both Tables 2 and 3.

[1] Demand accounts for 2% system losses.

SINGLE FAMILY RESIDENTIAL WATER USE DISTRIBUTION

Single family residential water use for land use designations for Low-, Medium- and High-Density (LDR, MDR and HDR) parcels can be further divided by the use within the home and the landscape irrigation demands outside of the home.

Table 4 represents the typical single family residential water usage that would be attributable to residential units within the land use designation of LDR and MDR. The percentage of total use will have a different distribution for HDR primarily attributable to the reduction in irrigated landscaped area.

Table 4
Amoruso Ranch Specific Plan
Water Conservation Plan
Single Family Residential Water Usage

Residential Use	Percentage of Total[1]
Landscaping	51%
Toilets	13%
Faucets, Cooking, Cleaning	10%
Showers	9%
Clothes Washing	8%
Bath	6%
Toilet Leaks	2%
Dishwasher	1%

Based on historic data the typical split between backyard and front yard irrigation of typical LDR and MDR parcels is approximately sixty-forty, with 60% of the landscape irrigation demand attributable to the backyard and 40% of the landscape irrigation attributable to the front yard. This is the result of typically smaller front yards than backyards along with less

[1] Percentage of total water use was derived from information obtained from the City of Roseville Frequently Asked Questions (FAQ) on the subject of water conservation.

landscape area in the front yard due to driveways and walks. Utilizing this ratio of front yard to backyard irrigation use, results in a further breakdown of the 51% total water use to 20.4% for the front yards and 30.6% for the backyards. The separation of front yard and backyard irrigation demands for LDR and MDR parcels allows analysis and application of different conservation measures between the two distinct areas.

The HDR units typically do not have front yard and backyard irrigation demand; however, there are common area irrigation demands that are attributable to HDR units. Average planning numbers for irrigation demands for HDR units is 20% of the estimated overall water usage. This value is expressed as 20% of the annual irrigation demand and not based on designation of demands split between front and back yard area designations. Table 5 presents a summary of demands based on the assumptions listed above.

Table 5
Amoruso Ranch Specific Plan
Water Conservation Plan
Residential Irrigation Water Demands

Land Use	Annual Demand (AFY)	Annual Demand Front Yard (AFY)	Annual Demand Backyard (AFY)	Annual Total Irrigation Demand (AFY)
Low Density Residential	739.5	150.86	226.29	377.15
Medium Density Residential	200.0	40.80	61.20	102.00
High Density Residential[1]	187.1	N/A	N/A	37.42
Urban Reserve	0.8	0.16	0.24	0.40
Total	**1,127.4**	**191.82**	**287.73**	**516.97**

[1] Demand for HDR parcels was calculated differently from LDR and MDR parcels, as described above. Demand for HDR parcels was not separated into front yard and backyard demand since traditional front and back yards are not present on HDR parcels.

Kimley»Horn

WATER USE REDUCTION STRATEGIES

A series of implementable water use reduction strategies have been identified for the ARSP Area. These strategies are discussed in more detail in the following subsections of this document, including the estimated percentage of water use reduction.

The water use reduction strategies identified for the ARSP Area include:

- Reduction of Residential Turf Areas
- Reduction of Park and Recreation and Common Area Turf (Non-Residential)
- Irrigation Management
- Water Conservation Methods

REDUCTION OF RESIDENTIAL TURF AREAS

As represented in the previous sections and tables, turf areas account for a significant portion of the water demand of the residential development. In turn, this correlates to one of the greatest opportunities to reduce the projected water demands. The ARSP project will adopt a strategy to encourage the new residential developments to reduce the magnitude of front yard turf areas and plant these areas with vegetation that uses far less water.

The City of Roseville estimates that for a same sized area of turf, in comparison to utilization of low-water consumption vegetation, could result in a savings of up to 70% in the amount of water required. Therefore, 30% of the amount of water would be required for the low consumption vegetation as compared to the lawn area's water demand.

Low water consumption vegetation, benefits not only from the reduced requirement for uptake by the plants, it also benefits from more efficient landscape irrigation systems. Low water consumption vegetation is typically irrigated by drip systems, as opposed to overhead spray systems for lawn and turf areas.

Typical front yard landscaping generally ranges between 75% and 85% irrigated area. For purposes of this analysis, the low-point of 75% irrigated area has been selected with 70% being lawn area and the remaining irrigated area being lower water using plants and planters.

It is reasonable to reduce irrigated lawn areas from 70% of the typical front yard for LDR and MDR, as well as reduce the common area lawns on HDR, to 42%. This results in an increase of low water consumption vegetation from 5% to 33%. An example of the potential reductions in turf area is shown in Figure 5. The comparisons of water demands for irrigation are shown in Table 6.

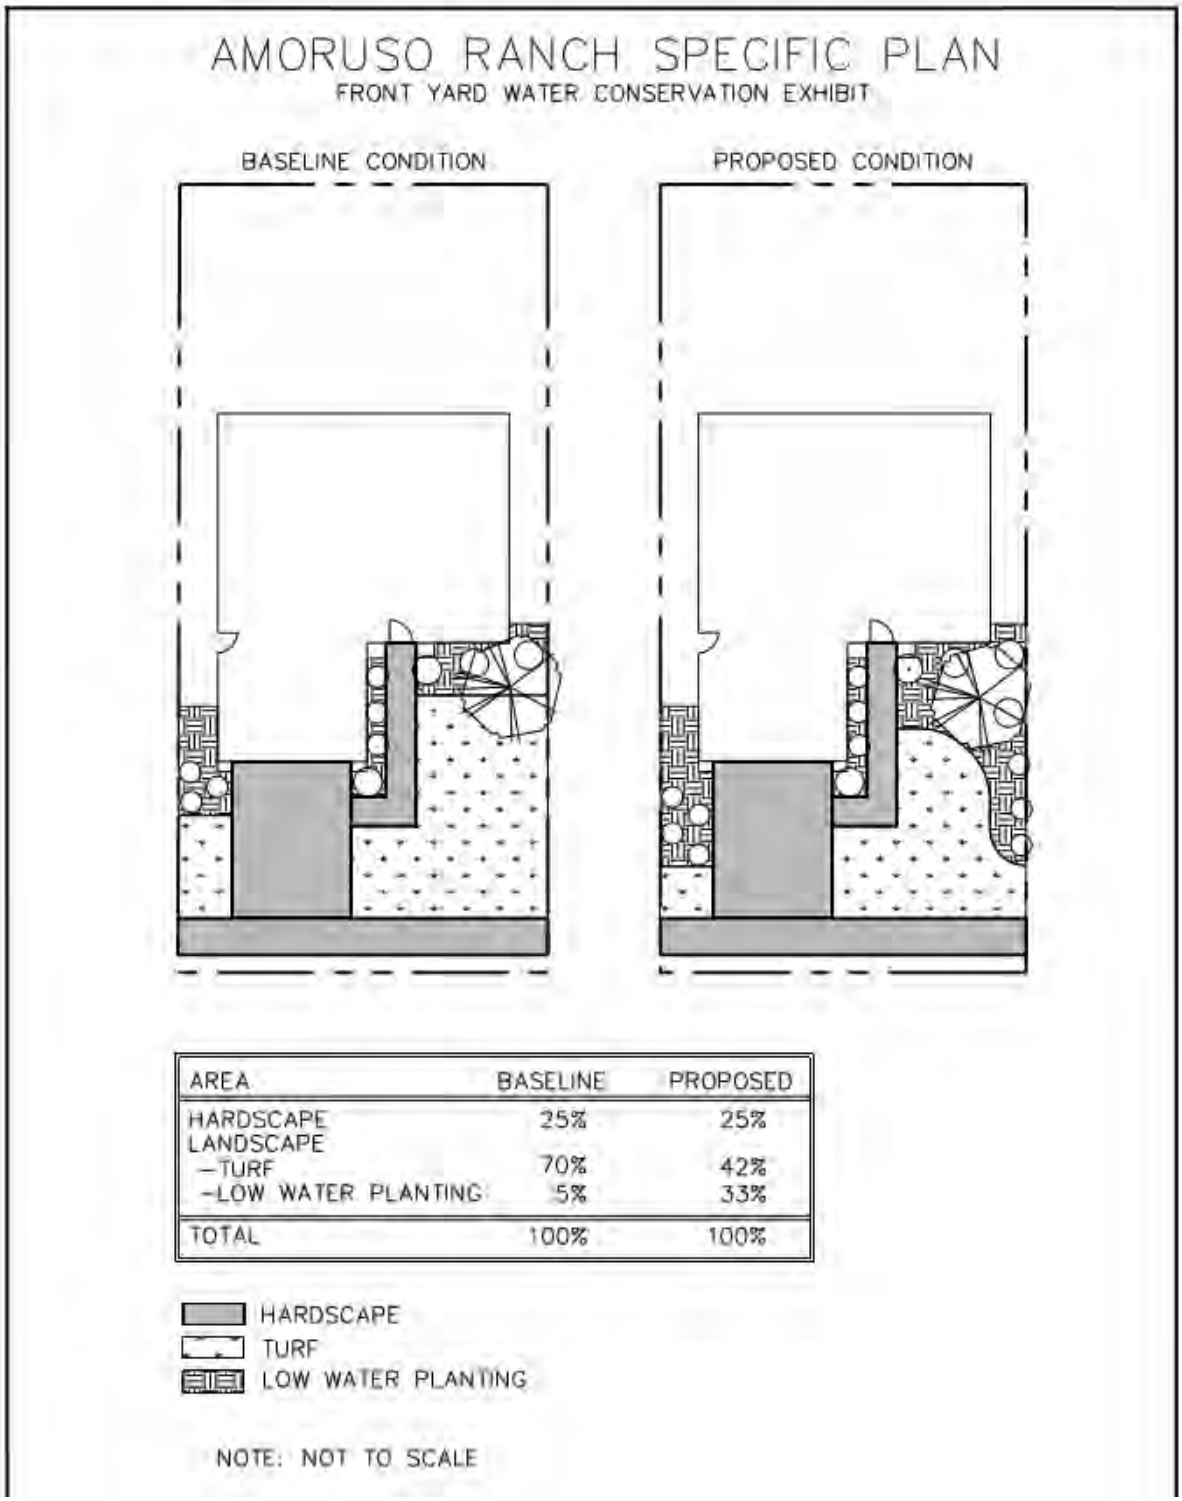

Figure 5 – Front Yard Water Conservation Comparison

NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

Table 6
Amoruso Ranch Specific Plan
Water Conservation Plan
Reduced Landscape Turf Area

Land Use	Front Yard Irrigated Area[1]	Base Condition		Base Condition with Water Conservation	
		Turf Area	Low Water Use Area	Turf Area	Low Water Use Area[2]
LDR, MDR and HDR[3]	75%	70%	5%	42%	33%

Table 7 is a comparison of the water use efficiencies that result from reduction in front yard turf areas. Since assumptions are based on similar reductions in turf areas for LDR, MDR and HDR product types, the water demands have been combined for presentation.

Table 7
Amoruso Ranch Specific Plan
Water Conservation Plan
Front Yard Irrigated Area Water Efficiencies

Land Use	Annual Demand Front Yard (AFY)[4]	New Front Yard Demand (AFY)	Annual Demand Savings (AFY)	Annual Demand Savings (%)	Water System Savings
Residential Properties LDR and MDR	191.82	139.24	52.58	27.4%	Potable
HDR	37.42	27.16	10.26	27.4%	Recycled
Total	**229.24**	**166.40**	**62.84**	**27.4%**	

As an example of how these values were calculated, the calculation for the annual front yard turf demand and the reduced annual front yard demand is presented below.

For the annual front yard turf demand, as calculated for low and medium density residential land uses, 75% of the front yard is landscaped with 70% turf and 5% low water use plantings. Since low water use plantings use 30% of the water required for turf, this 5%

[1] As a percentage of the front yard.
[2] Includes 5% existing low water use plantings plus 28% new low water use plantings.
[3] Represents the percentage of the entire exterior area for HDR.
[4] Front yard demand from Table 5. HDR is total since there is not a distinction between front and back yards.

area is equal to 1.5% turf area water demand. This results in the following annual front yard demands:

Turf (LDR & MDR):

$$191.82\ AFY * \left(\frac{70\%}{71.5\%}\right) = 187.80\ AFY$$

Low Water Use (LDR & MDR):

$$191.82\ AFY * \left(\frac{1.5\%}{71.5\%}\right) = 4.02\ AFY$$

For the reduced annual front yard demand, as calculated for low and medium density residential uses, reducing the base turf area in the front yards from 70% to 42% and replacing that (equivalent to 28%) with low water use plantings resulted in the following annual demands:

Reduced Demand Equation (LDR & MDR):

$$187.80\ AFY * \left(\frac{42\%}{70\%} + \frac{28\% * 30\%}{70\%}\right) + 4.02\ AFY = 139.24\ AFY$$

The same equations were generated for the HDR parcels as follows:

Turf (HDR):

$$37.42\ AFY * \left(\frac{70\%}{71.5\%}\right) = 36.63\ AFY$$

Low Water Use (HDR):

$$37.42\ AFY * \left(\frac{1.5\%}{71.5\%}\right) = 0.79\ AFY$$

Reduced Demand Equation (HDR):

$$36.63\ AFY * \left(\frac{42\%}{70\%} + \frac{28\% * 30\%}{70\%}\right) + 0.79\ AFY = 27.16\ AFY$$

REDUCTION OF PARK AND RECREATION AND COMMON AREA TURF (NON-RESIDENTIAL)

In addition to the turf areas for residential properties there are additional and significant turf areas throughout a typical development. These areas include the parks, irrigated paseos, commercial centers and school play fields. The estimated turf irrigation demand at each of these uses is as follows:

- It is estimated that parks utilize approximately 98% of their water demand for irrigation and 80% of their irrigated area for turf. This area is assumed to be reduced to 60% with the conversion of turf area (20%) to low water consumption vegetation or other uses.
- For the Roseville area, low water plantings were assumed to use 30% of the water used on turf (a 70% water savings).
- Low water use areas will utilize low volume irrigation systems like a drip or spray system (such as Netafim) designed to achieve a uniformity of 90% rather than an overhead spray irrigation system.
- Paseos are estimated to utilize 100% of their water demand for landscape irrigation. 80% of the paseo area is irrigated turf area. This area is assumed to be reduced to 60% with the conversion of turf area (20%) to low water consumption vegetation or other uses.

Based on these assumptions the water use efficiencies for the parks and paseos have been calculated and are presented in Table 8.

Table 8
Amoruso Ranch Specific Plan
Water Conservation Plan
Non-Residential Irrigated Area Water Efficiencies

Land Use	Annual Water Demand (AFY)[1]	Annual Irrigation Demand (AFY)	Base Turf Area	New Turf Area	Low Water Use Area	New Irrigation Demand (AFY)	Annual Demand Savings (AFY)	Annual Demand Savings (%)	Water System Savings
Park	4.3	4.21	80%	60%	20%	3.48	0.73	17.3%	Potable
Parks	69.8	68.40	80%	60%	20%	56.43	11.97	17.5%	Recycled
Paseos	4.8	4.80	80%	60%	20%	3.96	0.84	17.5%	Potable
Paseos	31.0	31.00	80%	60%	20%	25.58	5.42	17.5%	Recycled
Total	**109.9**	**108.41**				**89.45**	**18.96**	**17.5%**	

The new irrigation demand for the Parks is calculated as follows:

$$\frac{68.40\ AFY * 60\%}{80\%} = 51.30\ AFY$$

Demand remaining after turf reduction:

$$68.40\ AFY - 51.30\ AFY = 17.10 AFY$$

Low water plants use 30% of turf demand:

$$17.10\ AFY * 30\% = 5.13\ AFY$$

New irrigation demand:

$$51.30\ AFY + 5.13\ AFY = 56.43\ AFY$$

Similarly the new irrigation demand for the Paseos is calculated as follows:

$$\frac{31.00\ AFY * 60\%}{80\%} = 23.25\ AFY$$

[1]Annual water demand derived from Table 3.

Demand remaining after turf reduction:

$$31.00\ AFY - 23.25\ AFY = 7.75\ AFY$$

Low water plants use 30% of turf demand:

$$7.75\ AFY * 30\% = 2.33\ AFY$$

New irrigation demand:

$$23.25\ AFY + 2.33\ AFY = 25.58\ AFY$$

IRRIGATION MANAGEMENT

Smart and centrally located irrigation controllers restrict irrigation to times and rates necessary to maintain landscaping. They account for changes in the demand for water, which varies with weather patterns, seasonal influences and soil moisture content. In the ARSP, smart irrigation controllers, as defined in WELO, will be required for residential, commercial, and quasi-public parcels subject to turf reduction measures, and centrally controlled irrigation controllers for larger commercial and publicly maintained parcels.

As referenced in previous studies for the City of Roseville, a number of studies have been completed specifically on the conversion to smart irrigation controllers and the resultant water savings. Those studies suggest that water use reductions can be expected between 7% and 41%. This is a wide range of variability. Since ARSP is an entirely new development all significant irrigation applications will employ the use of smart irrigation controllers (per WELO). Therefore, a water use reduction value of 20% has been estimated for purposes of this analysis, consistent with previous analyses completed for similar developments within the City of Roseville. The sample calculation is presented below and the values are summarized in Table 9.

Smart Irrigation Equation:

$$139.24\ AFY * (80\%) = 111.39\ AFY$$

Table 9
Amoruso Ranch Specific Plan
Water Conservation Plan
Smart Irrigation Controller Water Efficiencies

Land Use	Annual Irrigation Demand (AFY)	New Irrigation Demand w/Controller (AFY)	Annual Demand Savings (AFY)	Annual Demand Savings (%)	Water System Savings
Residential Properties (Front)[1]	139.24	111.39	27.85	20%	Potable
Residential Properties (Back)[2]	287.73	230.18	57.55	20%	Potable
Residential Properties (HDR)[3]	27.16	21.73	5.43	20%	Recycled
Parks[4]	3.48	2.78	0.70	20%	Potable
Parks[5]	56.43	45.14	11.29	20%	Recycled
Paseos[6]	3.96	3.17	0.79	20%	Potable
Paseos[7]	25.58	20.46	5.12	20%	Recycled
Total	**543.58**	**434.85**	**108.73**	**20%**	

WATER CONSERVATION METHODS

There are many water conservation measures that can be implemented throughout the ARSP project. The reality is that a majority of the typical water conservation measures are already required or anticipated to be included in any new projects. These include low flow toilets, low flow shower heads, faucet aerators, etc.

One additional water conservation measure that will be considered for the ARSP project is the inclusion of recirculating hot water systems. Recirculating hot water systems feature a pump on a residential hot water line system which reduces the time necessary to receive hot water at any hot water faucet throughout the home. They provide hot water at the tap

[1] Annual irrigation demand derived from Table 7.
[2] Annual irrigation demand derived from Table 5.
[3] Annual irrigation demand derived from Table 7.
[4] Annual irrigation demand derived from Table 8.
[5] Annual irrigation demand derived from Table 8.
[6] Annual irrigation demand derived from Table 8.
[7] Annual irrigation demand derived from Table 8.

immediately upon engaging the hot water faucet, eliminating the waste of water as you wait for the water to transition from the cold water in the pipes to hot water. This type of system can be included on all residential units to generate additional water conservation. The amount of water savings with these systems varies based on the number of times hot water is utilized throughout the day. A typical conservative estimate indicates a water savings of approximately 1.25 gallons per use is saved by having "instant" hot water from the recirculation system. We have estimated that on average this would occur six times per day per residential unit, consistent with previous studies for the City of Roseville.

Re-Circulating Hot Water Equation:

$$2{,}827\ DU * 7.5 \frac{gal}{day} * \frac{AF}{325851\ gal} * 365\ day/yr = 23.75\ AFY$$

The estimated savings based on the installation of recirculating hot water systems is shown in Table 10.

Table 10
Amoruso Ranch Specific Plan
Water Conservation Plan
Recirculating Hot Water System Water Efficiencies

Land Use	Dwelling Unit Count	Savings per Dwelling Unit (Gal)	Annual Demand Savings (AFY)	Annual Demand Savings (%)	Water System Savings
Residential Units	2,827	7.5	23.75	1.6%	Potable

SUMMARY

A series of water conservation methods have been proposed for implementation as part of the ARSP project. These methods are readily implemented and are consistent with the goals and objectives of the Amoruso Ranch Specific Plan and the City of Roseville.

Table 11 provides a summary of the water conservation measures and their estimated savings in water use. As shown on Table 11, with implementation of all of the measures an estimated conservation of 14.5% of the projected water use would be realized within the ARSP Area.

Table 11
Amoruso Ranch Specific Plan
Water Conservation Plan
Summary of Water Efficiencies

Water Conservation Opportunity	Total Water Demand (AFY)	Potable Water Savings (AFY)	Recycled Water Savings (AFY)	Annual Demand Savings (AFY)	Annual Demand Savings (%)
Residential Properties Irrigation – Front[1]	**1,473.7**	52.58	10.26	62.84	4.3%
Non-Residential (Parks, ROW, School)[2]		1.57	17.39	18.96	1.3%
Smart Irrigation Controllers[3]		86.89	21.84	108.73	7.4%
Recirculating Hot Water System[4]		23.75	0	23.75	1.6%
Total		**164.79**	**49.49**	**214.28**	**14.5%**

The actual water conservation savings will be dependent on a number of factors including the participation and adherence by the actual homeowners. Constructing the residential units with a number of these measures already integrated (such as the hot water recirculation systems) will be beneficial to achieving the objective.

For the single family residential land uses there is anticipated to be ongoing outreach by the City to remind and reinforce the need for water conservation. This can include attachments to the water bill, water audits that can be made available to homeowners, the promotion of the City's water conservation website, and the availability of City water conservation staff to respond to specific questions. In addition, outreach can include educating homeowners on how to use and set up smart irrigation controllers along with including the installation and integration into their backyard irrigation system.

Guidance and education for the homeowners with regards to the landscaping of front and backyards will also be part of the overall plan including education in conformance with WELO.

TECHNICAL MEMORANDUM

To: City of Roseville

Date: January 27, 2020

Subject: Amoruso Ranch Specific Plan Amendment
Amendment to Water Conservation Plan to Accommodate Revised Land Use Plan

INTRODUCTION

The Amoruso Ranch Specific Plan (ARSP) Amendment has been prepared at the direction of Brookfield Residential Properties, Inc. (Brookfield) to meet the City of Roseville's (City) planning requirements to address proposed land use changes resulting from the State and Federal Environmental Permitting Processes. The ARSP Amendment modifies the original approved plan dated June 2016.

The ARSP Area consists of approximately 694.4-acres located in the northwest edge of the City of Roseville. The Specific Plan Area is bounded on the west by the Al Johnson Wildlife Area, to the south by the Creekview Specific Plan Area, to the east by the future proposed Placer Ranch Specific Plan Area and to the north by the existing Toad Hill Ranches #1 area/Sunset Boulevard West.

The ARSP Area provides for a mix of land uses to achieve the desired community form and objectives. These land use designations include low-, medium- and high-density residential uses; commercial and office uses; which in some cases are sited with one another and/or with residential uses; public and quasi-public uses for the schools and civic activities such as a fire station; parks and open space uses; and an urban reserve.

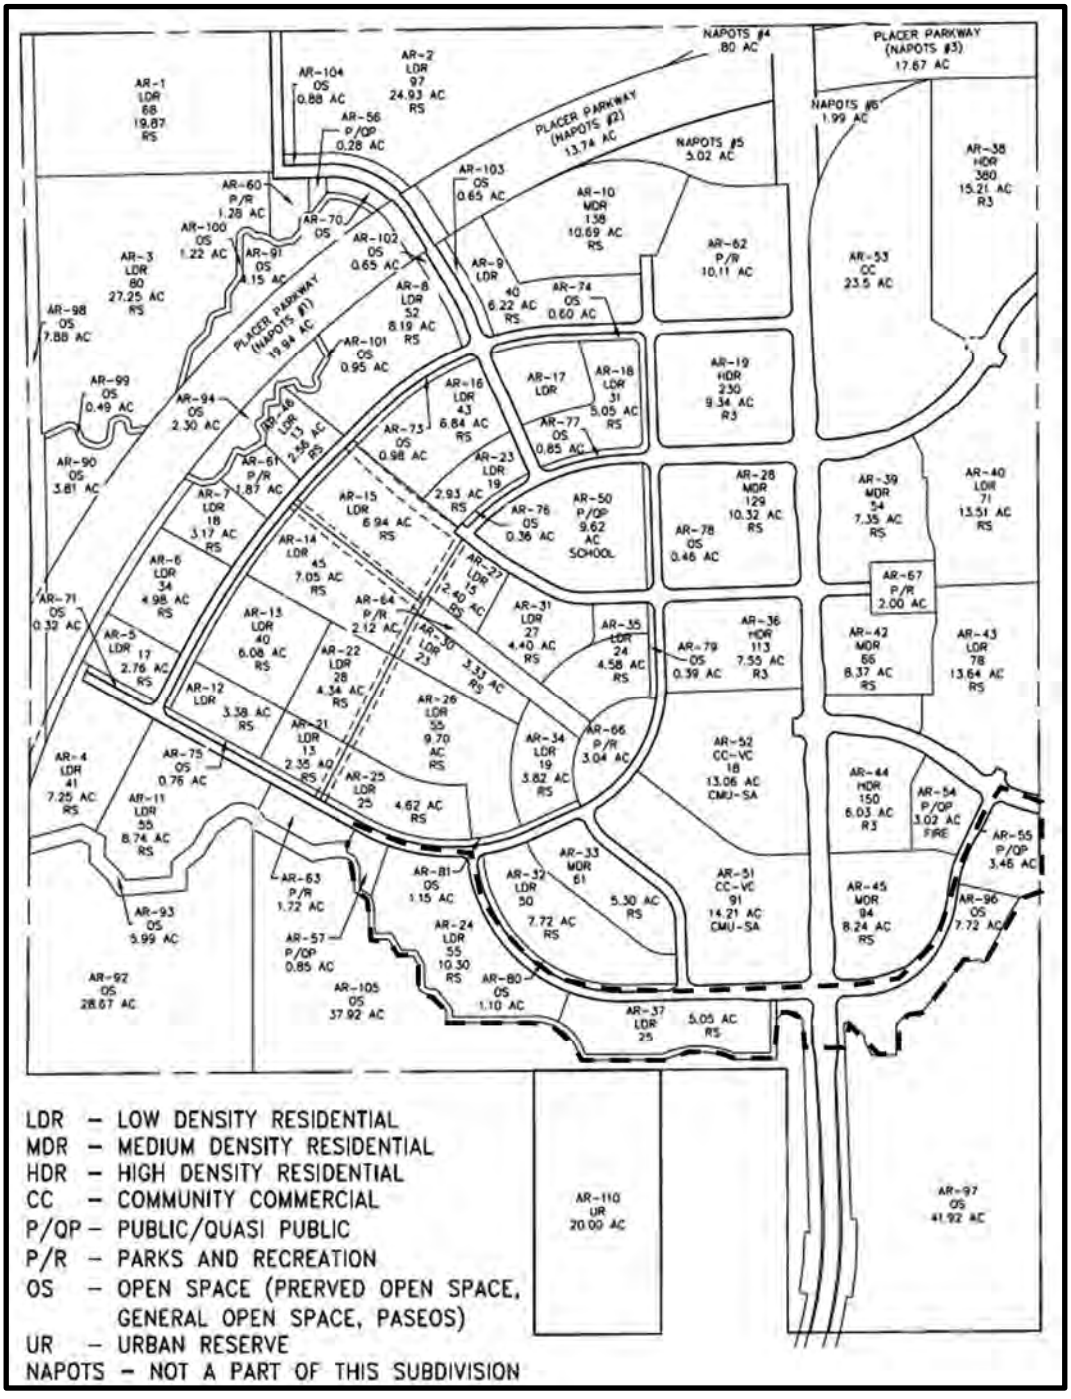
At buildout, as originally proposed, the ARSP Area will provide for 2,827 dwelling units, adds approximately 51 acres of commercial retail and office land uses, and provide approximately 22-acres of parks and 146-acres of open space.

With the changes in the land use plan, resulting from the environmental permitting processes, the project parameters are identical in terms of the number of units, acres of commercial, and acres of parks. However, the acres of open space have increased from approximately 146-acres to approximately 155-acres with a corresponding reduction in residential land use acreage.

As part of the original Specific Plan, the *"Brookfield Residential, Amoruso Ranch Specific Plan Area, Water Conservation Plan"*, dated April 2016, was prepared by Kimley-Horn and Associates. While the number of units proposed for the Specific Plan Area has not changed, the density of some of the units has been modified, which affects the calculations presented in the referenced Water Conservation Plan. This Technical Memorandum amends the referenced Water Conservation Plan to accommodate the changes in the land use plan.

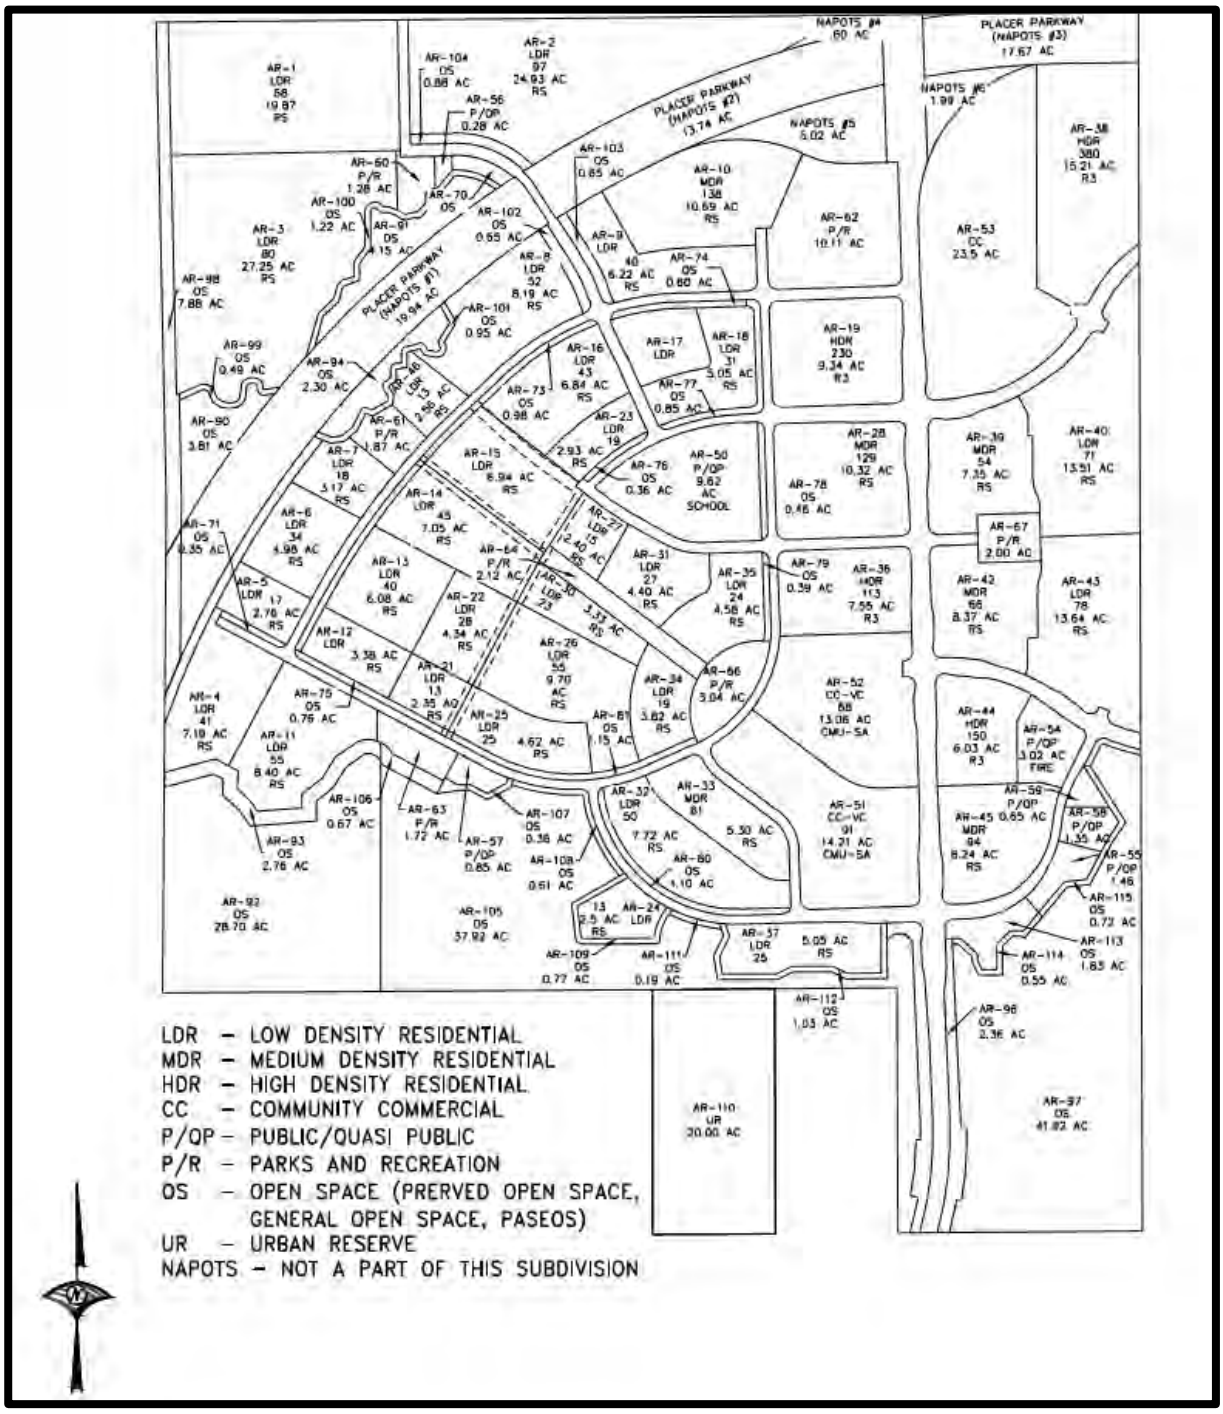
LAND USE PLAN UPDATE

As noted in the Introduction, the major change in the Land Use Plan occurs with the expansion of the open space and the coinciding reduction in the developable acres. The change represents approximately 9-acres that will be added to the open space, transitioning from developable land use. Figure TM-1 depicts the existing approved Land Use Plan that was adopted as part of the Amoruso Ranch Specific Plan in June 2016 by the City of Roseville. It depicts the area that was modified through the environmental permitting processes. The proposed and modified Land Use Plan is shown on Figure TM-2.



NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

Figure TM-1 – 2016 Approved Land Use Plan



The required modifications in the Land Use Plan occur along the southern edge of development, both to the east and west of Westbrook Boulevard, in locations where the development abuts the open space. The changes are depicted on Figure TM-2.

NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

While the land plan has a reduced number of developable acres, the total unit count has remained the same, with the displaced units reallocated to an existing developable parcel that can support the units, while conforming to the density ranges for the given product types.

Table TM-1 is a comparison of the unit allocation changes throughout the plan area.

Table TM-1
Unit Allocation Comparison

Parcel	Land Use	Acres			Units		
		2016	2019	Net Change	2016	2019	Net Change
AR-24	LDR	10.3	2.5	<7.8>	55	13	<42>
AR-37	LDR	6.28	5.05	<1.23>	33	25	<8>
AR-52	CC-VC	13.06	13.06	0	18	68	50
TOTAL				<9.03>			0

As noted in Table TM-1, the reallocated units are all located in the Community Commercial/Village Center (AR-52). This places the units very close to their original location. This also modifies the units from LDR to be CC/VC where the use factors for these units are consistent with HDR. This is important as it results in lower water use factors and lower wastewater generation rates.

The location of the affected land use parcels is shown on Figure TM-3 and indicated with a “blue circle”.

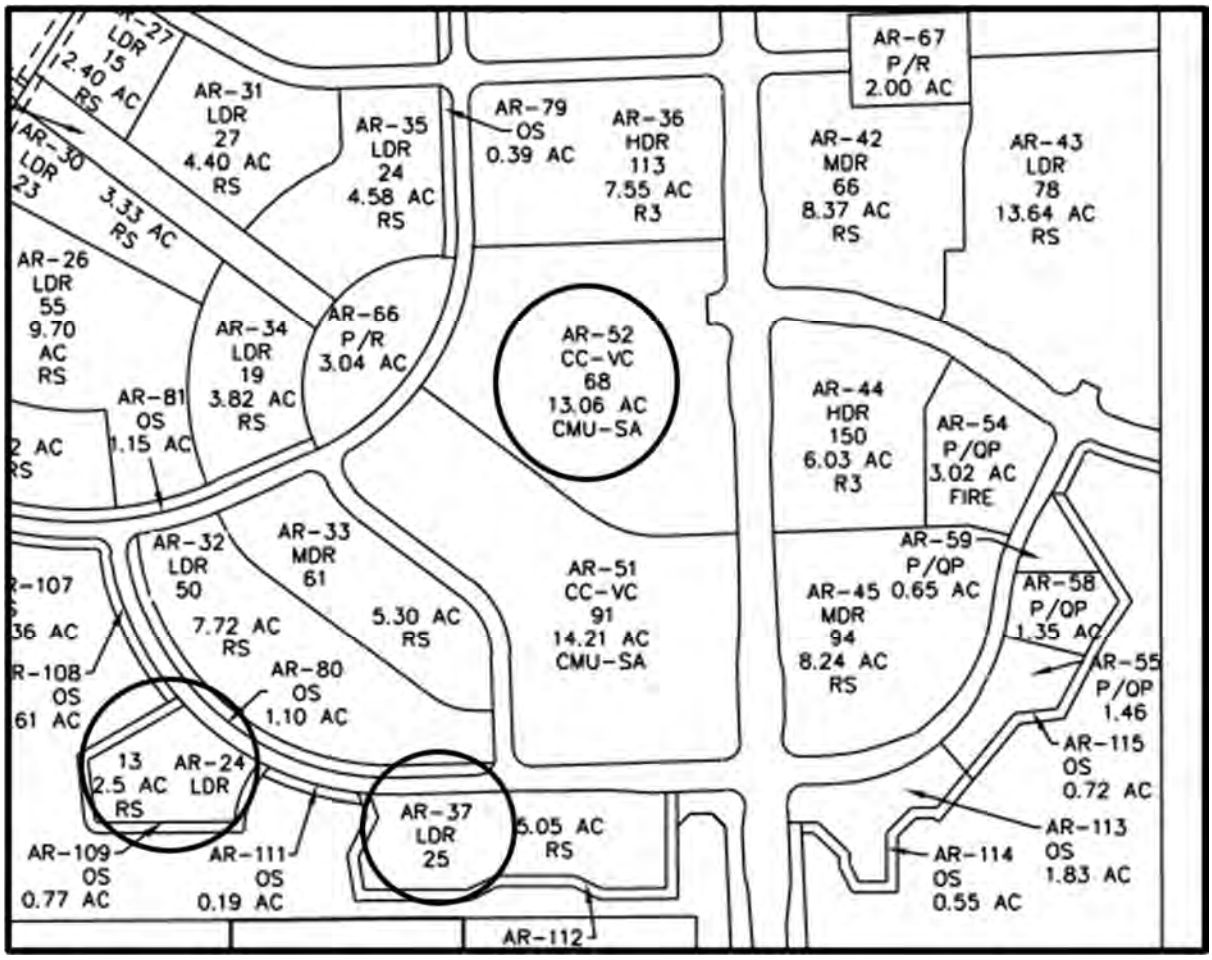


Figure TM-3 – Affected Land Use Parcels (Unit Transfer) (2019 Land Plan)

NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

WATER CONSERVATION PLAN

As noted above, the calculations related to water conservation for the development change as a result in the shift in density of some of the units. Provided below are the revised Water Conservation Plan Tables that have been updated based on the new land plan.

Water Conservation Plan Table 2 - Amended

Amoruso Ranch Specific Plan Amendment
Water Use Estimation – LDR, MDR and HDR

Land Use Category Density	Number of Units	Average Day Demand (GPD/DU)	Total Average Day Demand (GPD)	Total Average Day Demand (AFY)	Total Average Day Demand with 2% (AFY)[1]
LDR1: < 3.5 DU / Acre	148	728	107,744	120.7	123.1
LDR2: > 3.5 to 5 DU / Acre	116	600	69,600	78.0	79.5
LMDR1: > 5 to 6 DU / Acre	351	521	182,871	204.8	208.9
LMDR2: > 6 to 8 DU / Acre	757	430	325,510	364.6	371.9
MDR: > 8 to 12 DU / Acre	155	323	50,065	56.1	57.2
HDR1: > 12 to 16 DU / Acre	380	288	109,440	122.6	125.0
HDR2: > 16 DU / Acre	760	177	134,520	150.7	153.7
Community Commercial - Village Center – Residential	159	288	45,792	51.3	52.3
Urban Reserve	1	728	728	0.8	0.8
Total	**2,827**	**-**	**1,037,920**	**1,162.60**	**1,185.90**

I. Introduction

Purpose of Report

This Parks Financing Plan was prepared for the Amoruso Ranch Specific Plan ("Project") by Development Planning and Financing Group, Inc. ("DPFG") as a strategy to fund and maintain the parks, bike trails, and paseos that are proposed in the Project. This document is an expansion of the Amoruso Ranch Public Facilities Financing Plan, and provides additional details regarding the costs and funding of neighborhood parks, citywide parks, bike trails, and paseos. The findings will provide a clear understanding of how the parks plan is feasible, the funding structure, and overall costs associated with the Project.

II. Amoruso Ranch Specific Plan

Parks and Open Space

The City of Roseville's Parks and Recreation Master Plan requires a ratio of 9 acres of parkland per 1,000 residents. The 9 acres of parkland includes; 3 acres/1,000 residents for neighborhood parks, 3 acres/1,000 residents for citywide parks, and 3 acres/1,000 residents for open space.

The parks program developed for Amoruso Ranch includes 157 acres of parkland on-site, including open space. The Project meets the neighborhood park and open space dedication requirement with at least 22.14 acres of each, but does not provide a citywide park. The project will pay a Citywide Park Fee which includes funding for park improvements and land (through an in-lieu calculation). Through the Citywide Park Fee, Amoruso Ranch will contribute its fair share to the creation of other planned facilities in the City. **Table 1** shows the required park acreage under the City's current Master Plan and project population assumptions. The developer is responsible for the budgeted park costs and the developer or City will be responsible for the construction of all the parks.

Seven neighborhood parks have been distributed throughout the Project. **Map 1** shows the location of all the neighborhood parks in the Amoruso Ranch project.

Bike Trails and Paseos

The bike trails and paseos planned within the Project are mainly located along roadways. Bike trails take the form of Class 1, Class 1A, Class 2, and Class 3. Only the Class 1 bike trails are located away from a roadway, and this bike trail class occurs on the south western portion of the Project and along Westbrook Boulevard through the southern open space. The paseos are expanded areas in addition to the normal landscaping along roadways. **Map 1** illustrates the paseos, while **Map 2** shows the bike trails.

III. Neighborhood Park Improvements

Facility Costs

Table 2 shows the total estimated neighborhood park facility costs. The parks program costs are estimated at roughly $7.1 million. The cost of the parks and recreation facilities include, but are not limited to, the following types of facilities:

- Landscaping
- Restrooms
- Parking
- Recreational fields
- Playgrounds
- Picnic areas

Detailed park improvements and costs are provided by The Collaborative West, and are attached as **Appendix A**.

Phasing

The development of Phase 1 would have park improvements that correspond to the amount of initial residential development. These improvements include five neighborhood parks at a size of 1.72 acres, 1.87 acres, 2.12 acres, 2.0 acres, and 3.04 acres, for a total of 10.75 acres. The estimated facilities cost for the park improvements for Phase 1 is approximately $3.9 million.

Funding Strategy – Existing Fee Programs

The neighborhood park impact fee funds the neighborhood park improvements in Amoruso Ranch. **Table 3** creates an updated fee for the Project by allocating the total neighborhood park improvement costs on a per residential unit basis. The costs were spread to the different residential land uses based on the persons per household that vary by unit size, using the same methodology as previous specific plans. This was done to create a tiered rate so that an HDR unit is not paying the same amount as an LDR unit.

Table 4 shows the neighborhood park impact fee revenues for Phase 1 and Build out.

IV. Citywide Park Improvements

The Citywide Park Improvement Fee funds the Project's fair share of the construction costs of a citywide park and the Citywide Park Land In-Lieu Fee will provide funding for the purchase of land that was not provided on site for a citywide park.

Facility Costs

Table 5 shows the total facility improvement costs and estimated in-lieu land costs. The Project's share of the citywide facilities costs are calculated by using the current Citywide Park Fee. The base fee for citywide park development is $2,111. A credit of $657 has been applied making the citywide park fee for ARSP $1,454 per unit.

Land Component

The Citywide Park land in-lieu was calculated using the acreage requirement determined in **Table 1**, multiplied by the land appraisal value of $135,000 per acre. This is the same value used in previous specific plans. A total in-lieu estimate of $2,988,900 was calculated for the ARSP. The land in-lieu fee per unit for citywide is $1,058 per unit.

Summary

The total citywide park improvement fee for facility costs and land in-lieu is $2,512 per unit.

The Citywide Park funds will be used to purchase land and/or build citywide park facilities in other locations throughout the City. Amoruso Ranch is currently not planned for citywide facilities to be built within the plan area.

Funding Strategy - Existing Fee Programs

The Citywide Park fee will fund the citywide park facilities throughout the City, and the in-lieu component will fund future land acquisitions or additional construction. **Table 6** creates the Citywide Park fee for the Amoruso Ranch project by allocating the total costs (construction and in-lieu) on a per residential unit. The costs were spread to the different residential land uses based on the persons per household that vary by unit size, using the same methodology as previous specific plans. This was done to create a tiered rate so that an HDR unit is not paying the same amount as an LDR unit.

Table 7 shows the citywide park fee revenues for Phase 1 and Build out.

V. Bike Trail Improvements

In the Amoruso Ranch project the Class 1 bike trail system is integrated with open space along the south west corner of the development and along Westbrook Boulevard in the open space on the south end of the development. **Map 2** illustrates the proposed bike trails in the project. The Class 1 bike trail system along with the other bike trails incorporated with the roadways (Class 1A, 2, and 3) are all included in the roadway backbone infrastructure costs outlined in the Amoruso Ranch Public Facilities Financing Plan. The developer will build these improvements as required, and as development progresses.

Phasing

The development of the Class 1 bike trail will occur entirely with the Phase 1 development.

Funding Strategy – Developer Built

The bike trail facilities will be built by the developer, without the formation of a fee program. These improvements will be an eligible facility to be funded and/or reimbursed by the project CFD when formed.

VI. Paseo Improvements

The paseos in Amoruso Ranch run along some segments of collector roadways. Paseos are expanded areas, in addition to landscape corridors with grass, trees, landscaping, and contain no facilities. **Map 1** illustrates the proposed layout of the paseos in the project. All of the paseo costs are included in the roadway backbone infrastructure costs outlined in the Amoruso Ranch Public Facilities Financing Plan. The developer will build these improvements as required, and as development progresses.

Phasing

The development of Phase 1 includes paseo improvements within the residential area on Road "E", "F", and Road "A", while the remaining improvements will be built in Phase 2 and 3 along Roads "F", "G", "E", and "D".

Funding Strategy – Developer Built

The paseo facilities will be built by the developer, without the formation of a fee program. These improvements will be an eligible facility to be funded and/or reimbursed by the project CFD when formed.

VII. Community Facilities District for Maintenance

The Developer will form a CFD for maintenance to finance the cost of operating and maintaining streets, landscaping, open space, parks, trails, paseos and storm water in the Project. A Rate and Method of Apportionment will be required in establishing a method of tax, a maximum special tax amount, and any escalation factors that will be implemented to allow the annual special tax to keep pace with inflation. **Table 8** details the quantities and cost assumptions to be used in the formation of the CFD with the exception of open space related items, while **Table 9** allocates the costs across the various product types to estimate the special tax amount. An updated Property Analysis Record ("PAR") will be required prior to CFD formation and based on 404 permit conditions, an inventory of all environmentally sensitive/protected areas within the open space, approved improvements, any mitigation requirements, final drainage channel design, vehicular access for maintenance, ultimate width of transition area, all ARSP specific permits, and other requirements/improvements outlined in the Overarching Open Space Management Plan and consistent with state/federal permits.

The maintenance CFD does not include the 645.5 acres of off-site open space. These parcels will be either conveyed to the City, pending agreed upon parameters for acceptance or deeded to a third party entity. If the City accepts these parcels, landowner shall annex these sites into the CFD for maintenance prior to formation. A PAR analysis for the cost of service shall be prepared prior to annexation.

Cost Allocated to Use			$3,776,051.65	$1,342,926.51	$1,794,237.69	$224,022.80		
Neighborhood Parks Allocation per Unit/Sq.Ft.			$2,900.19	$2,477.72	$2,055.26	$2,055.26	-	-

Footnotes:

[1]The persons per household ("PPH") use factor assumed here, matches the average PPH of the City with an LDR unit. To create a tiered fee, the assumed PPH for the MDR and HDR land uses are then shown at a reduced amount. This methodology is consistent with what was done in the prior SVSP and CSP. The prior specific plans used an average PPH of 2.54, and thus land uses were assinged a PPH of 2.54 (LDR), 2.17 (MDR), and 1.8 (HDR). The updated factors asume the same percentage allocation of costs by land use as the prior specific plans, by using a PPH of 2.61 (LDR), 2.23 (MDR), and 1.85 (HDR).

NOTE: If any portion of this Exhibit is unclear, the complete original document is available at the Roseville City Clerk Department, 311 Vernon Street, Roseville, CA 95678

Source: City of Roseville, ECORP, and Kimley Horn.

Footnotes:

[1]Cost estimates derived from indepth analysis of City costs done for SVSP. Those costs have then been applied to all specific plans since.

[2]1/3 of streetsweeping miles.

[3]The Cost per Unit for Open Space placeholder of $575 per year was derived by simply averaging the City's proposed annual open space cost per acre of $1,000 and the Developer proposed annual open space cost per acre of $150. The actual annual open space cost per acre will be determined at the time of the formation of the maintenance CFD for this project as outlined in the Development Agreement. The ultimate cost per acre could be above or below the aforementioned range, depending upon the 404 permit conditions, an inventory of all environmentally sensitive/protected areas within the open space, approved improvements, any mitigation requirements, vehicular access for maintenance, final drainage channel design, ultimate width of transition area, all ARSP specific permits, other improvements outlined in the Overarching Open Space Management Plan, state and federal permits, and established city maintenance standards.

[4]Includes developed and undeveloped.

PREFACE – TABLE OF CONTENTS

CHAPTER 1 INTRODUCTION
1.1 Overview…….. 1-1
1.2 Specific Plan Objectives…….. 1-1
1.3 The Specific Plan Tool…….. 1-3
1.4 Related Documents…… 1-4
1.5 Specific Plan Organization…… 1-4

CHAPTER 2 PLAN SETTING & INFLUENCES
2.1 Project Location…….. 2-1
2.2 Project Setting…… 2-3
2.3 Factors that Influence the Specific Plan……. 2-5

CHAPTER 3 COMMUNITY FORM & PLANNING PRINCIPLES
3.1 Community Vision…….. 3-1
3.2 Community Design Principles…….. 3-2
3.3 Community Form…… 3-2
3.4 Community Form Elements…….. 3-2
3.5 Landscape Concept…… 3-15

CHAPTER 4 LAND USE PLAN
4.1 Overview…….. 4-1
4.2 Land Use Plan…… 4-2
4.3 Land Use Designations……. 4-6
4.4 Permitted Uses……... 4-10
4.5 Development Standards……... 4-10
4.6 Design Guidelines…….. 4-10

CHAPTER 5 AFFORDABLE HOUSING PLAN
5.1 Overview…….. 5-1
5.2 Definition of Housing Affordability…….. 5-2
5.3 Affordable Housing Program…… 5-3
5.4 Administration and Implementation…… 5-3
5.5 Affordable Rental Housing Agreement…… 5-5

CHAPTER 6 RESOURCE MANAGEMENT
6.1 Overview…….. 6-1
6.2 Wetland Resources…… 6-5
6.3 Operations & Management Plan…….. 6-18
6.4 Cultural and Historic Resources…….. 6-19

CHAPTER 7 CIRCULATION PLAN
7.1 Overview…….. 7-1
7.2 Roadways…… 7-2
7.3 Additional Street Design Standards…… 7-32
7.4 Intersection Corner Clips…….. 7-33
7.5 On-Street Parking…….. 7-34
7.6 Pedestrian Pathways, Bikeways, & Trails…….. 7-35
7.7 Traffic Calming…… 7-37
7.8 Public Transit…….. 7-38
7.9 Transportation System Management…….. 7-40
7.10 Vehicle Trip Reduction…… 7-40

CHAPTER 8 PUBLIC SERVICES
8.1 Public Facilities…….. 8-1
8.2 Fire and Emergency Services…….. 8-2

CHAPTER 1 - INTRODUCTION

1.1 Overview

The Amoruso Ranch Specific Plan (ARSP) establishes a comprehensive land use and regulatory framework to guide the development of approximately 694.4-acres located in the northwest edge of the City of Roseville. Prior to the Specific Plan's adoption, the Plan Area was recognized as a logical growth extension for the City. The Specific Plan Area is bounded on the southwest by the Al Johnson Wildlife Area (also known as Reason Farms), to the south by the Creekview Specific Plan Area, to the north, northwest and east by unincorporated Placer County including the existing Toad Hill Ranches #1 rural residential area and the future Placer Ranch area.

1.2 Specific Plan Objectives

This Specific Plan provides land use standards, development regulations, design guidelines, infrastructure improvements and an implementation plan for the ARSP community.

Complete Comprehensive Planning for the ARSP Area
The ARSP has been designed to respond to the City of Roseville's need to provide housing and services in an orderly growth pattern, that accommodates the City's regional share of population growth, that positively responds to adjacent land uses in a compatible manner, and that provides a benefit to the City.

Mix of Land Uses
ARSP will create a balanced community with 2,827 residential units, commercial and office uses, parks and open space, an elementary school and supporting public and quasi-public uses.

Existing Policies
The ARSP will satisfy all City policies, regulations and expectations as defined in the City of Roseville General Plan, Zoning Ordinance, Community Design Guidelines, Sign Ordinance and any other applicable City plans, documents and programs adopted by the City.

Blueprint Consistency
The ARSP provides for development that meets the City's nine identified Blueprint Implementation Strategies adopted by the Council in June of 2005. The ARSP achieves the design characteristics that are discussed within the City's General Plan by incorporating elements such as extensive park connections, a mix of land uses, preservation of open space, and connectivity between neighborhoods, commercial uses, the school, recreational uses, and parks.

Commercial/Employment Center
The ARSP provides for retail and office opportunities in multiple locations in the Plan Area. There are ample opportunities within the Village District located near the center of the Plan Area adjacent to Westbrook Boulevard as well as the Commercial area located in the northeast portion that would have visibility from Placer Parkway.

Housing Opportunities
The ARSP provides for 2,827 units in a variety of residential housing types in a range of densities that will attract a variety of buyers and market segments. Residential choices include a mix of single-family homes, townhomes, and multi-family homes. Affordable housing opportunities will be provided and will be consistent with the City's General Plan requirements.

Regional Housing Needs Allocation
The ARSP aids the City in fulfilling its recognized obligation to accommodate a percentage of future population growth in the region (as embodied in the Regional Housing Needs Allocation {RHNA} identified by the Sacramento Council of Governments {SACOG} and the California Department of Housing and Community Development {HCD}). By providing for a variety of residential units, the ARSP helps to satisfy a portion of the City's regional housing needs allocation.

Community Form
The shape and physical form of the ARSP creates a sense of community that will clearly define the northwestern edge of the City of Roseville. The ARSP provides walkable, appropriately sized and placed neighborhoods, a network of trails and parks that link together, an elementary school, and a Village District in the heart of the community. The plan seeks to establish a community form that will:

- Create a land use transition and connection from existing City of Roseville northerly, and westerly to the Al Johnson Wildlife Area and unincorporated Placer County;
- Organize neighborhoods to be identifiable and walkable, and to incorporate gathering places such as commercial areas, parks and schools.

Mixed-Use Nodes
Provide neighborhoods that are within a short walking distance to the Village District, which is planned as a vibrant, mixed-use area. The Village District will provide for a variety of services such as restaurants, shops, neighborhood serving uses, and offices.

Regional and Area Roadways
Provide a safe and efficient circulation system that interconnects uses and promotes pedestrian circulation and alternate transportation options. The ARSP will facilitate the expansion of Westbrook Boulevard to the northern edge of the Plan Area, provide for connections to future development to the east, and provide right-of-way dedications for the future Placer Parkway. Within the Specific Plan, neighborhood streets are provided in a safe, efficient and orderly manner. The Village District, higher-density housing, and the commercial area are all located adjacent to Westbrook Boulevard to take advantage of the frontage this roadway will provide for future transit opportunities.

Pedestrian & Bicycle Connections
An extensive network of trails and Class I and II bikeway facilities will provide connections throughout the Plan Area. Not only does this network connect the residential neighborhoods and commercial areas, but it also links to parks, paseos, and a large open space area that connects to regional open space located in both the Creekview and West Roseville Specific Plan Areas.

Public Transportation Options
Through implementation of City arterial and collector street improvement standards, provide the opportunity to install fixed-route bus stops and transit facilities in support of the City's overall transit planning efforts.

Park Facilities
The ARSP provides for a network of sidewalks, paseos and trails that link together all aspects of the community including a large neighborhood park close to Westbrook Boulevard, as well as other smaller neighborhood parks, an elementary school, and the Village District.

Habitat Conservation & Creation
The plan seeks to balance development with resource protection, including preservation of the creek corridors, sensitive habitat and wetland resources in an inter-connected, permanent open space. As part of the Army Corps Section 404 permit process, this will include development of an on- and off-site mitigation plan to preserve and create multi-functional habitat with water quality benefits within the open space areas.

Resource Management
Append the ARSP to the City's Open Space Preserve Overarching Management Plan (OSPOMP) to ensure open space preserve areas are managed consistent with the City's strategy.

Contribute to Regional Preserve Planning
Create open space preserves that provide regional benefit for habitat, resources, and open space amenities and complements the proposed Placer County Conservation Plan.

Fiscal Contribution
Include a mix of land uses and facilities which are fiscally feasible and implement funding mechanisms to maintain a neutral / positive fiscal impact to the City's General Fund.

Program-Level Parcel Objectives
The Wagner Parcel is designated as Urban Reserve and has one residential unit allocated to it. No additional or specific project objectives for this parcel have been identified as there are no specific development plans for this parcel at this time.

Long Term Growth
Plan for long term growth in order to be positioned to react to market demand. The ARSP is intended to guide development over a 20-year to 30-year horizon.

1.3 The Specific Plan Tool

A specific plan is a planning and regulatory tool intended to implement a city or county General Plan through the development of policies, programs and regulations used to guide the overall development of a site. The ARSP is the primary land use, policy and regulatory document used to guide the overall development of the site. The ARSP establishes a development framework for land use, circulation, utilities and services, resource protection and implementation. The intent is to promote the systematic and orderly development of the site, consistent with the overarching vision for the community. All subsequent development projects and related activities are required to be consistent with the ARSP.

The authority to prepare and adopt specific plans and the requirements for content are set forth in Sections 65450 through 65457 of the California Government Code (Planning and Zoning Law). As a mechanism for the implementation of the goals and policies of the City's General Plan, State law stipulates specific plans can only be adopted or amended if they are consistent with the jurisdiction's adopted General Plan. This specific plan is consistent with the policies of the City of Roseville 2035 General Plan, as well as other applicable State and local regulations.

The Specific Plan contains text and diagrams that call out the following in detail:

1. The distribution, location and extent of land uses within the area are covered by the plan.
2. The proposed distribution, location, extent and intensity of major components of public and private transportation, sanitary sewer, water, drainage, solid waste disposal, dry utilities, and other essential facilities proposed to be located within the area covered by the plan and needed to support the land uses described in the plan.
3. Standards and criteria by which development will proceed, including development standards, design guidelines, a phasing program, and standards for the conservation and utilization of open space, where applicable.
4. A program of implementation measures including regulations, programs, public works projects, and financing measures necessary to carry out items 1, 2, and 3.

The purpose of the ARSP is to provide a unique and appealing community that integrates with the existing City and provides a variety of amenities, through the implementation of a guiding plan and construction of infrastructure improvements necessary for the development.

1.4 Related Documents

Several documents work in tandem with this Specific Plan to provide policy guidance for implementation of the project. Existing documents including the City's General Plan, Municipal Code, Community Design Guidelines, Sign Ordinance, Design and Construction Standards, Storm Water Design Manual, and various City master plans (i.e., parks, utilities, bikeways, open space preserve overarching management plan, etc.), have been previously adopted by the City and are actively used to plan for, and implement, development projects. In addition, concurrent with the adoption of the ARSP; General Plan amendments, development agreements, and an Environmental Impact Report (EIR), including a Mitigation Monitoring and Reporting Plan (MMRP), were approved, each providing guidance for the ultimate buildout of the Plan Area.

The application of these standards and requirements and the execution of the specific plan are further discussed in Chapter 10, Implementation.

1.5 Specific Plan Organization

The ARSP is organized into the following chapters:

Chapter 1: Introduction
This chapter summarizes the purpose, organization, authority, and objectives of this Specific Plan and related documents.

Chapter 2: Plan Setting & Influences
This chapter introduces the project location, what influences the plan design, existing and planned roadways, and policy objectives.

Chapter 3: Community Form & Planning Principles
This chapter details out the community vision, form and defining element of the Plan Area.

Chapter 4: Land Use Plan
This chapter identifies land uses and corresponding zoning designations and regulations.

Chapter 5: Affordable Housing Plan: This chapter provides an affordable housing program for the Plan Area. It identifies the location and distribution of affordable units within the Plan.

Chapter 6: Resource Management
This chapter describes existing resources and measures derived to protect biological, open space or cultural resources.

Chapter 7: Circulation Plan
This chapter describes the circulation system for the movement of vehicles, pedestrians, bicyclists and transit through a network of paths, trails and roadways for vehicular and non-vehicular modes of transportation within the Plan Area.

Chapter 8: Public Services
This chapter identifies public services such as police and fire services, schools, and parks and open spaces uses and locations.

Chapter 9: Utilities Plan
This chapter describes water, wastewater, recycled water, storm drainage, electric, natural gas, solid waste, and other utility information for the Plan Area.

Chapter 10: Implementation & Administration
This chapter describes how the development of the plan will be carried out, the plan's relationship to City plans and policies, the phasing of the Plan Area, financing of public improvements, subsequent entitlements required, amendment procedures and unit transfers.

Appendix A: Development Standards
This section describes applicable zoning and development standards for the ARSP.

Appendix B: Design Guidelines
This section describes design attributes for the Plan Area's housing, commercial area, parks and open space areas, streetscapes, entry features, walls, fencing, signage and other common design elements.

(This page is intentionally left blank)

CHAPTER 2 – PLAN SETTING & INFLUENCES

2.1 Project Location

The Amoruso Ranch Specific Plan (ARSP) is located along the northern edge of the City of Roseville. The ARSP property is approximately 694.4-acres that includes 20 acres of urban reserve and abuts the northeast boundary of the City of Roseville Al Johnson Wildlife Area (formerly known as Reason Farms Stormwater Retention Area).

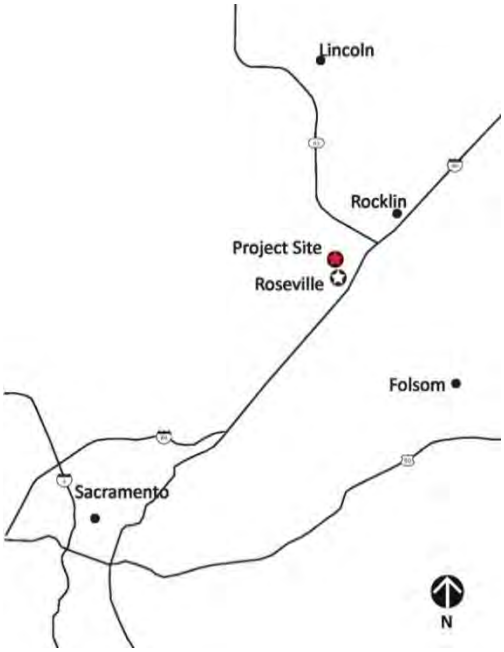

Figure 2.1: Regional Context Map

The ARSP is located between the West Roseville Specific Plan to the southeast, the Al Johnson Wildlife Area to the southwest and the Creekview Specific Plan to the south (Figure 2.2; Regional Location Map). The Placer Ranch area is located to the east.

Placer Parkway, a proposed six lane regional transportation facility, traverses the site. At its ultimate build out, Placer Parkway will run from Highway 65 in Lincoln to Highway 99.

Unincorporated Placer County is located to the northwest, including agriculturally-zoned property to the west, and an existing rural residential area referred to as Toad Hill Ranches #1 to the north. Existing West Sunset Boulevard, a two-lane rural County road is located adjacent to the northern boundary of ARSP.

At the time of specific plan approval, the ARSP was within unincorporated Placer County.

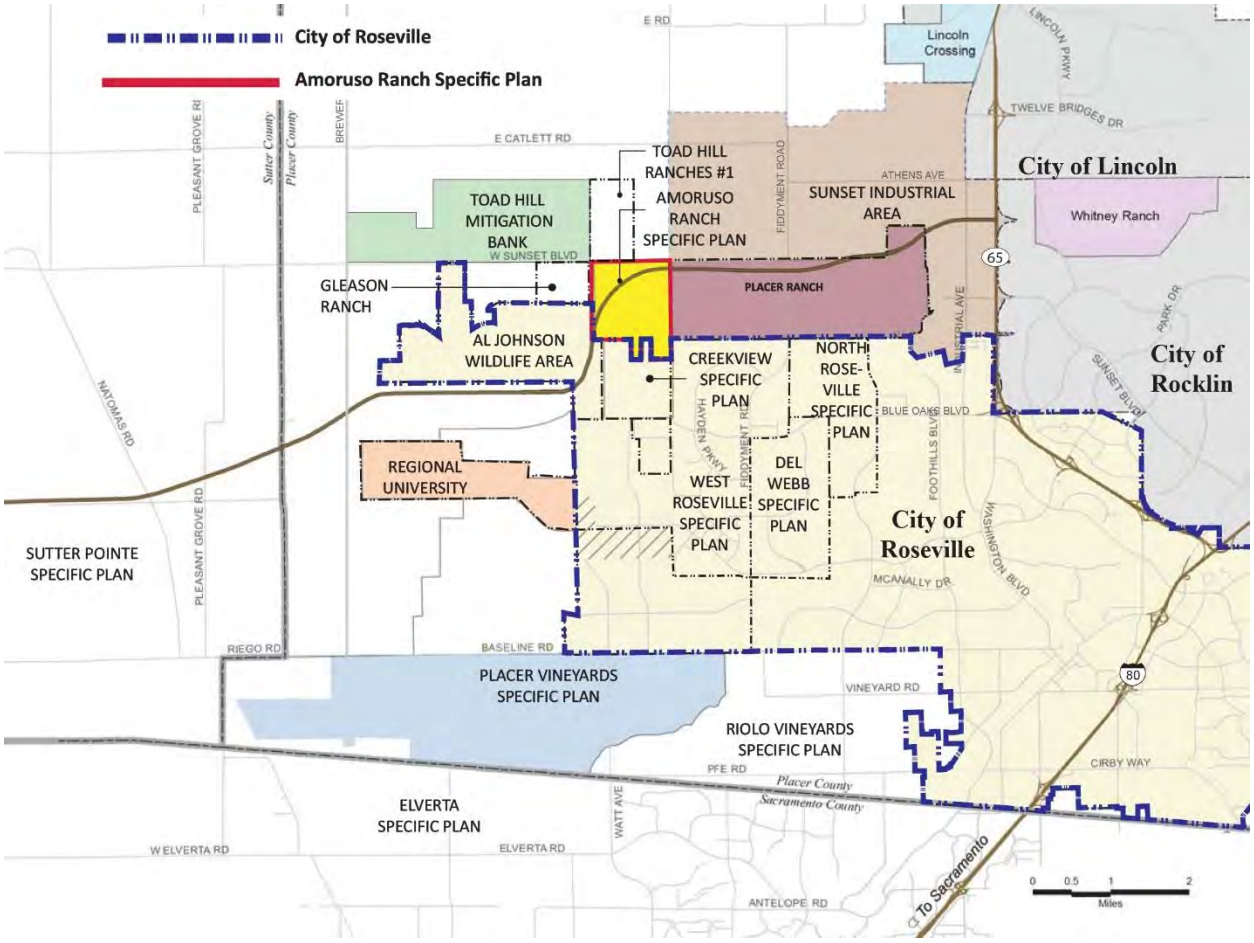

Figure 2.2: Regional Location Map

2.2 Project Setting

A. Regional Setting

The project site is located at the intersection of two planned transportation corridors, future Placer Parkway and Westbrook Boulevard.

To the northwest is agricultural land and the existing Toad Hill Ranches #1, a rural subdivision of two to five acre parcels. To the northeast, approximately one mile away is the Placer County Regional Landfill operation. The City of Lincoln Sphere of Influence extends south to approximately one mile north of the Plan Area.

To the southwest is the Al Johnson Wildlife Area project owned and planned by the City of Roseville. The City will develop the Al Johnson Wildlife Area as a major stormwater retention facility and future open space recreation facility.

Figure 2.2 shows the location of several other master-planned development projects in proximity to the ARSP. Each development proposal incorporates a mix of land uses, which is primarily residential, but also has non-residential components that include commercial, office, park, school, open space, university, and public/quasi-public uses. These include:

- ***Creekview Specific Plan (CSP)***, a 500-acre project located south of the ARSP, north of Blue Oaks Boulevard. The project includes 2,011 residential units. Major access to ARSP is provided through this plan via connections from Blue Oaks Boulevard and the extension of Westbrook Boulevard to the Plan Area. The CSP was approved by the City of Roseville in 2012.

- ***West Roseville Specific Plan (WRSP)***, a 3,162-acre project directly to the southeast of ARSP, approved by the City on February 4, 2004. This Plan Area is approved for 10,478 residential units.

- ***Sierra Vista Specific Plan (SVSP)***, a 2,064-acre project located south of the ARSP, west of Fiddyment Road and north of Baseline. The project includes 8,679 residential units and over 230 acres of commercial and office uses. This plan was approved by the City of Roseville in May 2010 and amended in June 2012 to include the Westbrook property.

- **Placer Ranch**, a 2,213 acre area to the east of the ARSP area. While no specific plan is pending at this time, given its location adjacent to local services and the County's Sunset Industrial Area, it is likely that development could occur in the future. It could include a new California State University campus that would accommodate up to 30,000 students and a mix of 6,000 residential units and commercial uses.

- ***Sunset Industrial Area Plan (SIA)*** is located east of Fiddyment Road and encompasses a portion of the Placer Ranch area. It is an 8,900-acre industrial, office park and commercial development area adopted by Placer County Board of Supervisors in June 1997, and currently undergoing a major master plan update.

- ***Placer Vineyards Specific Plan (PVSP)***, a 5,230-acre project located immediately south of the SVSP and Baseline Road. This project was approved by the Placer County Board of Supervisors in July 2007 and includes over 14,000 residential units and a mix of commercial uses.

- ***Regional University Specific Plan (RUSP)***, a 1,157-acre project located west of the West Roseville Specific Plan along the planned extension of Pleasant Grove Boulevard. This project was approved by the Placer County Board of Supervisors in December 2008.

B. Adjacent Uses

To the north is agricultural land and the existing Toad Hill Ranches #1, a rural subdivision of two to five acre parcels. To the northeast, approximately one mile away is the Western Regional Sanitary Landfill operation. The City of Lincoln Sphere of Influence extends south to approximately one mile north of the Plan Area.

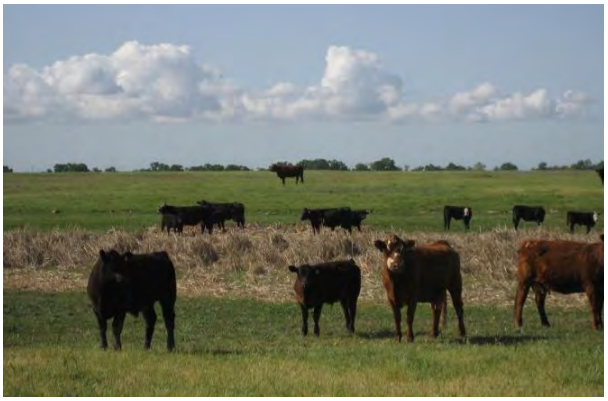
To the west is the Al Johnson Wildlife Area owned and planned by the City of Roseville.

C. Site Conditions

In its pre-development condition, the Plan Area was used as a cattle ranch as well as rice farming. The primary use was open grazing land, but included a small ranch house and out buildings. Agricultural wells and a septic system served the site.

The land has gently rolling terrain that generally slopes to the west and south. Minor drainages flow in a radial pattern from a slight rise in the northeast quadrant of the property. The elevation slopes gently from the northeast to the southwest.

The site vegetation is primarily annual grasslands. There are several oak trees located along University Creek and a number of non-native trees located around the former ranch house. Wetland features and their associated flora and fauna are located in small areas typically along the drainage corridors and in flats along the southern boundary. Figure 2.3 highlights the Amoruso Ranch project site conditions.



Site conditions prior to development of the Amoruso Ranch Specific Plan property.

Toad Hill Ranches #1neighborhood to the north.

View of the existing site conditions from W. Sunset Boulevard

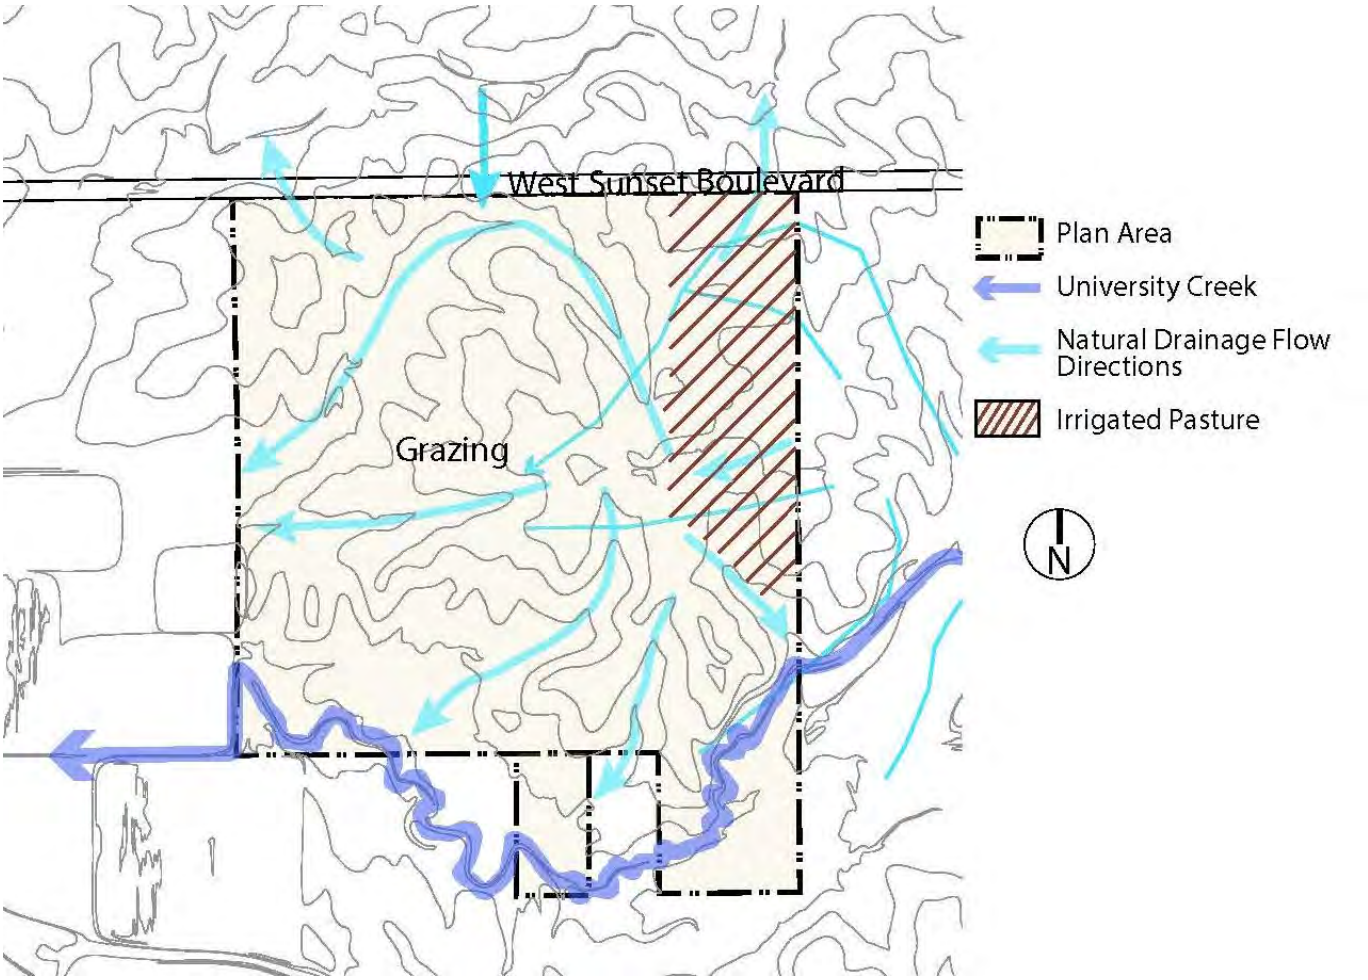


Figure 2.3: Site Conditions Map

2.3 Factors that Influence the Specific Plan

The proposed land use and circulation pattern in the ARSP is influenced by several factors, including the physical setting, conditions around the Plan Area, and public policies. This section identified the most important conditions and issues that influence the form of the proposed plan.

A. Placer Parkway

The proposed Placer Parkway will be a prominent road feature that sweeps through the Plan Area. Interchanges at Fiddyment Road to the east and Santucci Boulevard to the southwest would provide access to the ARSP Area. The partially revised Placer Parkway Tier 1 EIS/EIR analyzed an additional interchange within the northeast area of Amoruso Ranch, based on a potential future extension of Dowd Road southerly from the City of Lincoln. At the time of specific plan approval, this interchange was not proposed as part of the project; however, it is not precluded by the project. A grade separated intersection at Westbrook Boulevard may elevate Placer Parkway through portions of the site. The intersection of Road "G", a residential road within the Plan Area, will also be grade separated with Road "G" being depressed under

the future Placer Parkway. A potential extension of Dowd Road could connect to the Westbrook Boulevard alignment within Amoruso Ranch project in the future.

B. Blue Oaks Boulevard and Westbrook Boulevard Corridors

In planning for anticipated growth in western Placer County through the year 2035, Blue Oaks Boulevard and Westbrook Boulevard are components of the area circulation network. Blue Oaks Boulevard is an east/west travel corridor extending from Highway 65, west through Roseville, and will ultimately link to the future Placer Parkway southwest of the ARSP and the CSP areas. Blue Oaks Boulevard will provide access to the Plan Area via a connection to Westbrook Boulevard. Westbrook Boulevard is a north/south travel corridor extending from Baseline Road north through the Sierra Vista, West Roseville, Creekview and Amoruso Ranch Specific Plans. The ARSP provides a segment of Westbrook and provides land uses and densities compatible with a roadway of this scale. The ARSP orients higher density and nonresidential uses along the roadway, with an emphasis on creating an interface with the proposed Village District.

C. Public Transportation Opportunities

The Plan Area's land use is influenced by the potential for public transportation routes including Bus Rapid Transit (BRT) along the major arterial streets. Design standards in the Plan would ensure that future transit stops could be accommodated in these areas.

D. Open Space and Resources Preservation

The Amoruso Ranch project would support open space and resource preservation by preserving approximately 144 acres of permanent open space within the ARSP Area. ARSP wetland preserve open space areas would append to the City's Open Space Preserve Overarching Management Plan to ensure these future Preserve areas are managed consistent with the City's strategy. The open space on the southern end of the Plan Area is adjacent to other regionally significant open space amenities. The ARSP Area provides open space linkages between the WRSP to the southeast, CSP to the south, and the Al Johnson Wildlife Area to the southwest. Together with the ARSP, the interconnected open space would total approximately 2,159 acres.

The Al Johnson Wildlife Area is an approximately 1,700 acre property. It is currently undeveloped and planned for a regional flood control project, as well as compatible recreation and environmental restoration features.

The ARSP will provide an open space corridor that includes a pedestrian and bike path linkage between major open space areas and the City's regional trail system. These linkages are illustrated in Chapter 7, Circulation. The corridor could provide stormwater detention in the natural drainage corridor as well as a permanent wetland resources preservation area.

E. City/County Memorandum of Understanding

In 1997, the County of Placer and City of Roseville entered into an agreement regarding the future development of a 5,540-acre 'transition area' west of Fiddyment Road and north of Baseline Road, adjacent to Roseville's western city limits in Placer County. Forty acres of the ARSP is located within the Memorandum of Understanding (MOU) Transition Area. This MOU is intended to promote interagency communication and to foster cooperative land use planning within the transition area. The MOU specifies the mutually-agreed upon requirements for processing development applications within the transition area, and allows development applications to be processed either by the County or the City. Its terms include provisions for City/County consultation and review, application submittal, mitigation of project impacts, and minimum development standards. The ARSP was not anticipated as part of the MOU, except for the southerly 40 acre portion of the site. However, the City recognizing the benefit of the MOU, has coordinated this project with Placer County consistent with MOU provisions.

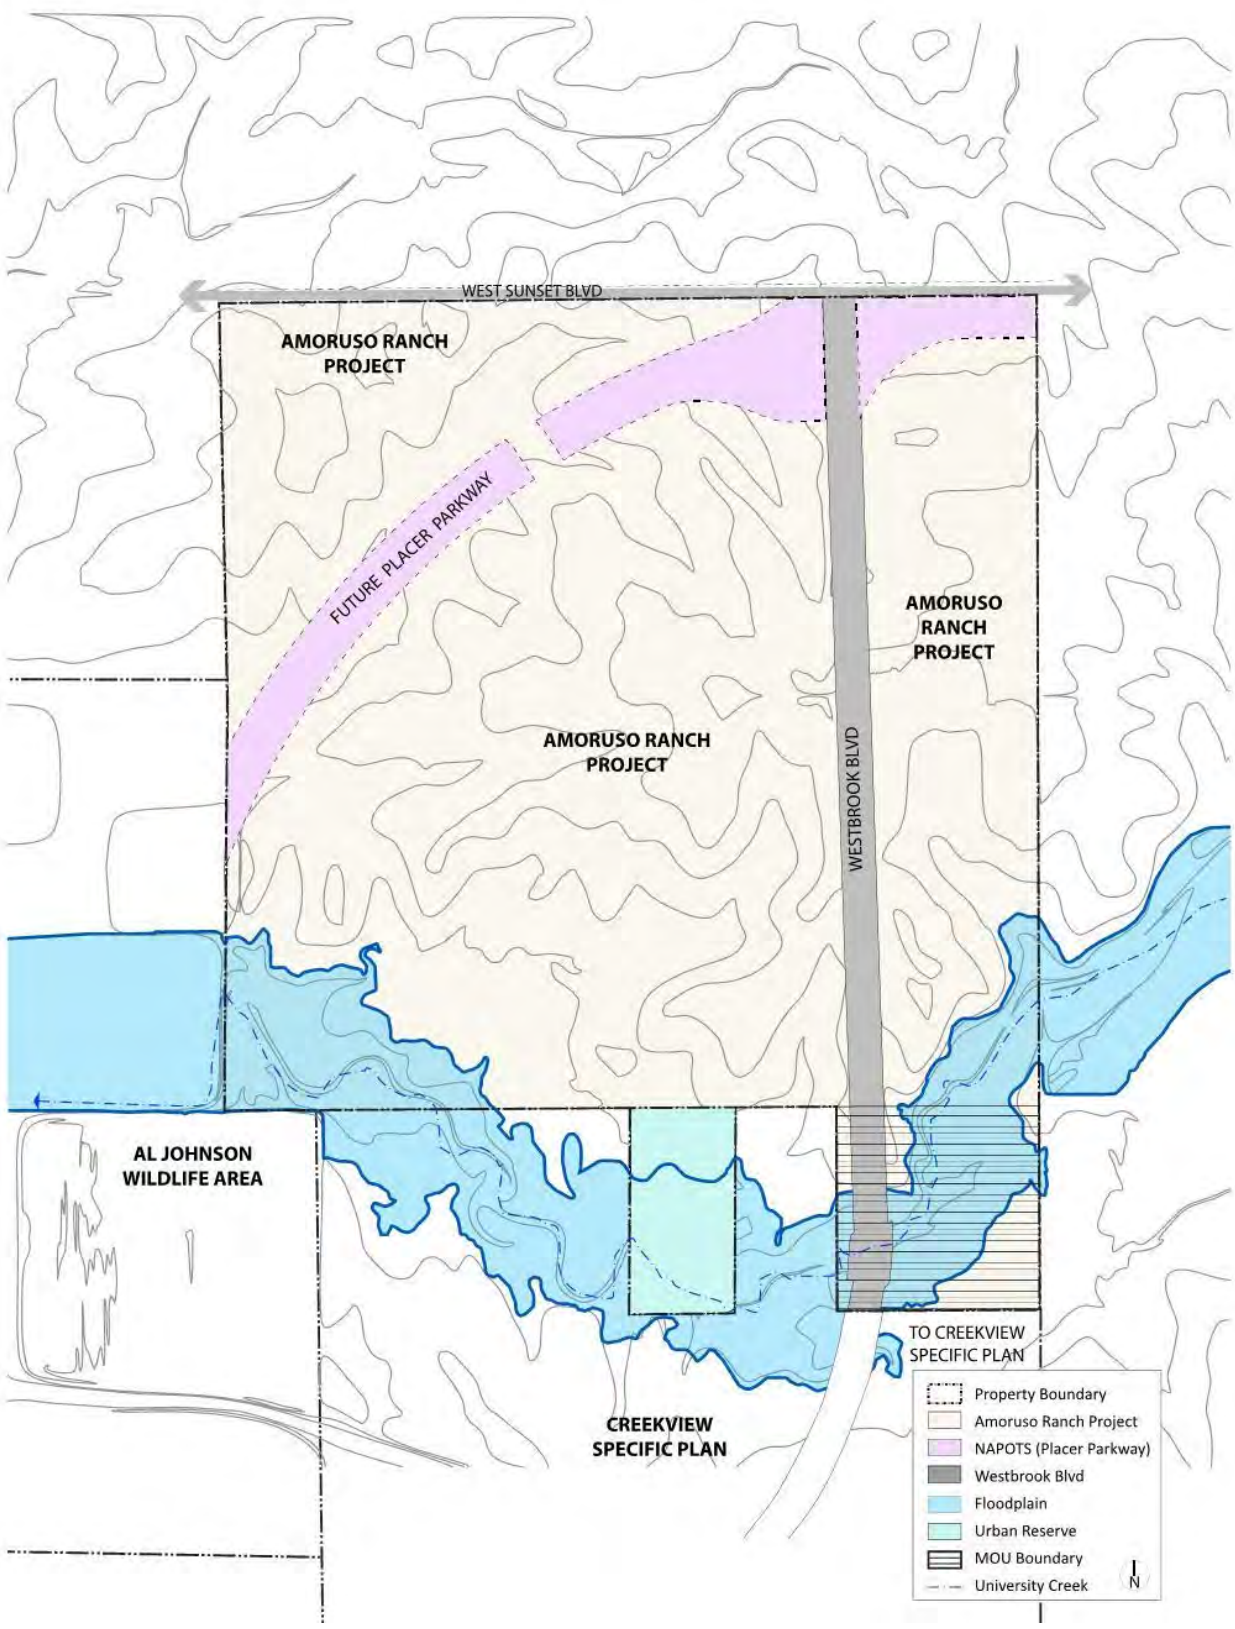

Figure 2.4: Elements that influence the Plan Area.

F. General Plan Growth Management Policies Guiding Principles

The City's General Plan Growth Management Element includes several "Guiding Principles" to direct the City's review of new development proposals located outside the City's corporate boundaries. The intent of these principles is to ensure new development meets or exceeds the City's existing policies, standards, and expectations, and does not unduly impact services to existing City residents. While some of the Guiding Principles address the City's governmental services and long-term fiscal sustainability, other principles address matters that guide the physical form of the land use plan. These include provisions to:

- Maintain the integrity of existing neighborhoods and create a sense of place in new neighborhoods.
- Aid in regional traffic solutions and in right of way preservation.
- Incorporate mechanisms to ensure new schools are available to serve the residents and shall not impact existing schools.
- Include a significant interconnected public open space component/conservation plan in coordination with the City of Roseville/ U.S. Fish and Wildlife Service Memorandum of Understanding.

G. Western Edge

The City's General Plan Growth Management Section of the Land Use Element includes several policies that are intended to provide for a "distinctive edge" and "physical and visual buffer between the City and County to assure that the identity and uniqueness of the City and County will be maintained."

Proponents shall provide a transitional area between City and County lands through a system of interconnecting Open Space land areas.

The ARSP supports the City's polices related to the Guiding principles for new development and the creation of a distinctive western edge, which are represented in the final design and form of the new community. The ARSP is bounded on the west by a portion of the Al Johnson Wildlife Area property where the City has approved a planned regional storm water retention project. On the northwest edge of the Plan Area adjacent to the Gleason Property, low density residential homes will be setback a minimum of 100-feet from the ARSP property line, separated by the proposed drainage channel, a maintenance path, and landscape setback or a single loaded street. This separation will provide both a physical and aesthetic separation from ongoing agricultural activities such as cattle raising etc.

H. Growth Management Visioning Committee

The Growth Management Visioning Committee (GMVC) was created in August 2004 to develop a vision to guide the City's growth through the year 2025. Through extensive public involvement and facilitated meetings, the GMVC developed recommendations to the City Council. A key recommendation was acknowledgement of the Plan Area as the next logical area for growth in the City of Roseville.

I. Resource Agency Early Consultation

In August 2000, the City and the United States Fish & Wildlife Service (USFWS) entered into a MOU to prepare a Habitat Conservation Plan (HCP) or equivalent to minimize incidental take of vernal pool species from future City growth. Consistent with this agreement, the City of Roseville, the ARSP landowner, the USFWS, US Environmental Protection Agency, the US Army Corps of Engineers, and the Regional Water Quality Control Board conducted an extensive early consultation process for this project starting in 2010 when the development application was submitted to the City. The group met and conducted field visits to review onsite resources and offsite mitigation properties with the following objective: to reach basic agreement on a land use plan and mitigation strategy which could be permitted under Section 404 of the Clean Water Act utilizing a Section 7 Consultation process for Endangered Species Act compliance. Key feedback received through this process influenced the land use plan and resulted in additional avoidance area. Also key, was determining the corridor for Placer Parkway that appears to have the least impacts to wetlands.

CHAPTER 3 – COMMUNITY FORM & PLANNING PRINCIPLES

3.1 Community Vision

The Amoruso Ranch Specific Plan (ARSP) will guide the development of the Plan Area towards a livable community where housing, recreation, education, retail and employment opportunities are integrated into an urban village. This village is envisioned as a contemporary version of a small walkable town, where the automobile can be replaced by walking and biking to recreation opportunities and to accomplish everyday errands.

Key components of this urban vision include pedestrian and bicycle friendly streets, open space connections and vistas to important community focal points, and an integration of land uses that give the feeling of “development over time.” These visual qualities create a community that has rich variety in the architectural character in both the non-residential and residential architecture. Public spaces such as plazas, urban parks, linear parks and pedestrian linkages are the primary form building features of the ARSP. With the plan as a backdrop, distinctive architecture and landscape elements establish a unique identity.

The ARSP guides the development of a livable community that integrates housing, education, recreation, open space, retail and employment uses and civic facilities into a unique and memorable community. The site forms the “confluence” in the regional road system and forms the northwest edge of the City making it a key parcel in the strategic planning of this part of the City.

3.2 Community Design Principles

The design vision for the ARSP Area has its foundation in the following Community Design Principles:

A. Community Designed Around Connectivity and Walking Paths:
The development areas within the Land Use Plan are linked together by a network of parks, paseos, sidewalks, and block level paseos.

B. Visually Open:
The use of walls is minimized to the extent feasible.

C. Parks Integrated Into the Neighborhood Fabric:
All neighborhoods are linked to a variety of neighborhood parks connected by a network of paseos or other connections.

D. Range of Housing Opportunities:
Building upon Roseville's established growth patterns, the ARSP supports the City's implementation of smart growth principles rooted in SACOG's regional Blueprint. In addition to advancing the City's efforts to meet its fair share obligation of the region's housing needs (RHNA), the ARSP demonstrates an emerging approach to development which results in a more efficient use of land, which will provide a range of housing types.

E. Sustainability:
The ARSP includes elements that embrace sustainable techniques such as narrow, tree-lined streets to reduce heat island effect. The land use plan includes a diversity of housing types, compact design, a local serving community commercial Village District, vehicular, pedestrian and bicycle circulation, resource preservation and proximate access to parks and open space.

F. Vibrant Village District:
The ARSP Area includes a walkable Village District that serves as a major focal point of the Plan Area with a wide range of neighborhood serving uses and recreational opportunities.

3.3 Community Form

The physical form and development pattern of the ARSP is shaped by site opportunities and constraints and policy factors described in **Chapter 2, Plan Setting & Influences**. Factors influencing the community's form include existing site features and natural resources, adjacent development patterns and roadways, the future Placer Parkway alignment, the extension of Westbrook Boulevard, the City's Guiding Principles for new development, Blueprint principles and the Growth Management Visioning Committee's vision.

3.4 Community Form Elements

The overall ARSP land use plan is shaped by three overarching form elements. The elements influencing the community form in each area of the plan are described below.

- Interconnected yet distinct districts
  - Village District
  - Northeast District
  - Central District
  - Northwest District
  - Southeast District
- Parks and Open Space
- Circulation System

A wide variety of residential opportunities will be provided within the various districts. This variety may include single family attached and detached homes, live/work row town homes, town homes, condominiums and apartments. Design of residential neighborhoods emphasizes pedestrian and bicycle connectivity while facilitating dispersed automobile traffic. The modified grid street network creates shorter, more traditional feeling block lengths. The result of this block scaling is that the various home types are woven together within the neighborhood fabric, rather than separated housing tracts of the same lot configuration. This was the traditional pattern of growth for neighborhoods prior to large scale tract housing development.

The following figures graphically illustrate those principles. Figure 3.1 is the Overall Districts diagram that highlights the major planning ideas and areas while the diagrams following those highlight individual districts in detail. Figure 3.2 illustrates a potential build out scenario.

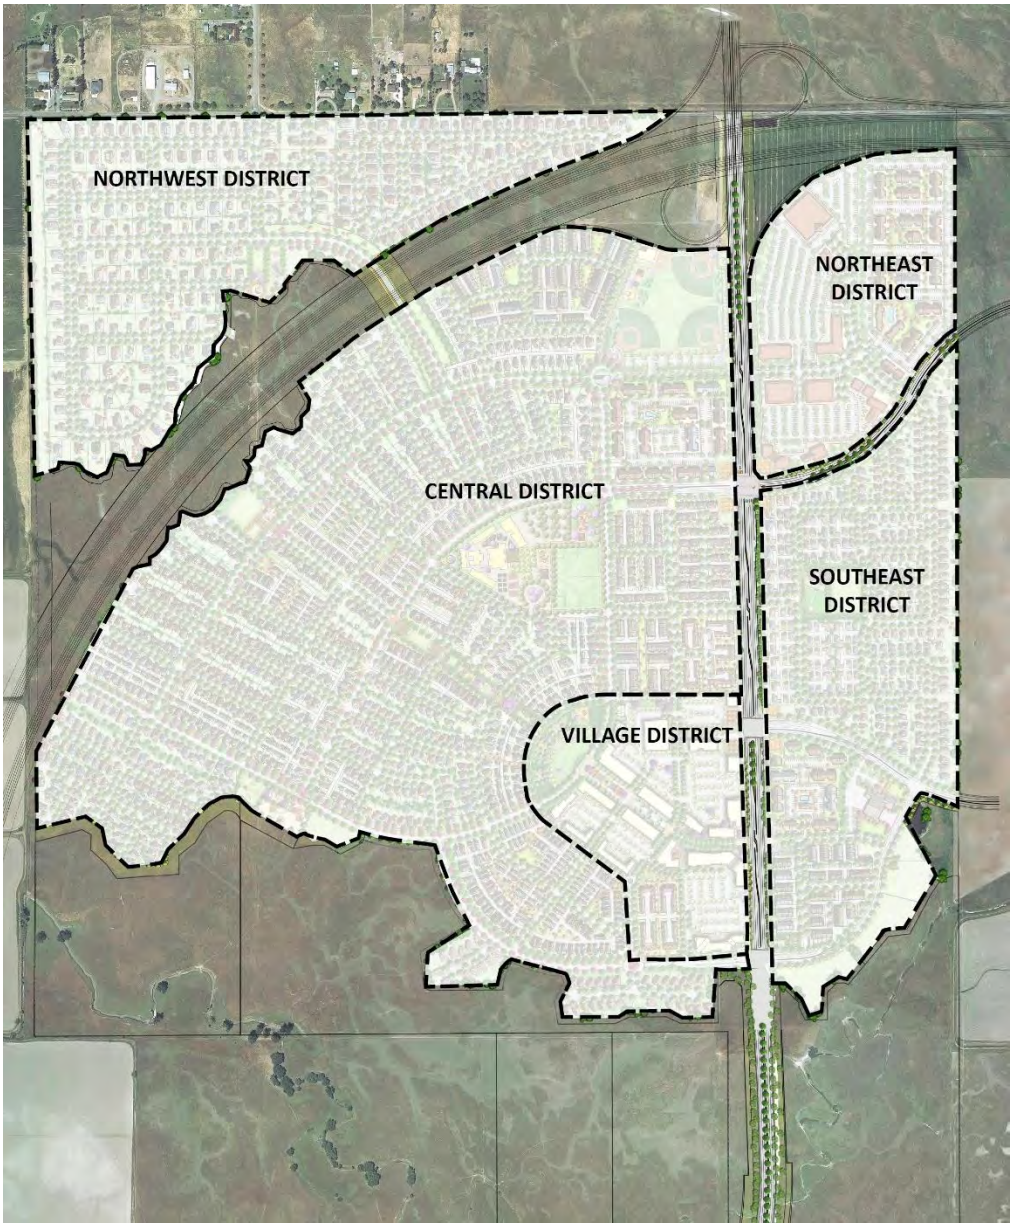

Figure 3.1: Overall Districts

Figure 3.2: Artist's Conceptual Illustrative Plan: Potential Build-out Scenario
The artist's Conceptual Illustrative Plan (above and details throughout this Document) presents the Specific Plan vision within the site context. Precise street alignments, lot locations and dimensions, and building locations shall be determined at the time of Tentative Map approval. Such alignments and locations shall be substantially consistent with the goals and policies of this Specific Plan.

A. Village District

The Village District is an important component of the Plan Area and provides a dynamic center for the community. The intersection of Westbrook Boulevard and Main Street creates a high level of activity that establishes the core of the District. The Village District development pattern is not just a linear main street surrounded by parking lots. The plan creates a subtle block grid that forms more connection with the surrounding residential neighborhoods and better hides the parking from view. The Village District will provide retail and office space, with buildings organized along a Main Street, creating a classic small town main street character. Buildings with storefronts and tall floor plates, that may include office or residential units above, provide a sense of enclosure to the street.

The Main Street continues and "T's" at an Urban Park. Storefronts line the street in buildings that are broken into sections that establish a walkable rhythm, rather than block long single structures with consistent storefronts and setbacks. This rhythm is crucial to establish the pedestrian scale inherent to a classic main street. The variety in building character and setbacks makes the Village District visually interesting and creates an environment focused on the pedestrian.

Figure 3.3: Conceptual Plan Detail – Village District

The variety of building heights and facades of the buildings framing the Main Street adds to the character and architectural interest of the place, and lends an appearance of development over time. While there will be a consistent level of quality and some signature detailing, it is important that the buildings do not look too themed. They should have variety in their design to reinforce the downtown character. Their design is guided by the architectural guidelines in Section B.6 of Appendix B.

Sign guidelines, included in the ARSP in Appendix B are intended to guide merchants towards providing unique and individual signage that is critical in establishing the desired downtown character.

Buildings fronting on the Main Street may have residential or office uses above ground floor retail to energize the area. It is important to bring residential opportunities into this area to create a vibrant district, and to support the merchants. Decks and balconies are encouraged as they engage residents with the outdoor activities along the street and plaza.

Forming a transition from the Main Street retail and mixed-use to the surrounding neighborhoods, the edges of the Village District are anticipated to include medium or high density residential. This residential may be high density single family dwellings (SFD), row townhomes, or a mix of townhomes and flats. Vehicular access and guest parking for these homes provide a buffer to the residential parking areas.

Figure 3.4: Conceptual Plan Detail – Plaza Along Main Street

Figure 3.5: Parking Concept – Shared Lots Behind Main Street Building

Outdoor Dining Along a Main Street.

Main Street Promenade

At the block where Main Street meets the Urban Park, a wide median splits the street, creating the Main Street Promenade. Here auto traffic is subordinate to the pedestrian experience. This is a private street and this block may be closed to vehicular traffic for community events such as street fairs. There is no raised curb along the median to allow the spaces to flow together with special paving that links both sides of the street.

The buildings facing the Main Street Promenade should have taller first floor plates (10'-14') than standard residential heights, with residential units above, or may be row town homes with raised stoop or entries, such as a classic "brownstone". It is important that the homes have balconies large enough to be furnished and usable (minimum depth of 4 feet). Resident activity will add to the character of the street scene.

At the end of the median is a plaza. While privately owned and maintained, the space serves as an extension of the park and is designed more like a plaza than a median. It functions as an outdoor living room, with seating and other amenities such as a fire pit and it may contain a small specialty building that houses a coffee house, wine bar, flower shop or similar type use. This building is envisioned to be of a unique design and an urban jewel for the community.

The plaza is intended to create an intimate setting for uses such as street performers, or simply a wonderful place to "hang out" and people watch with a great cup of coffee. Buildings on either side may include restaurants that would provide outdoor dining creating a lively atmosphere.

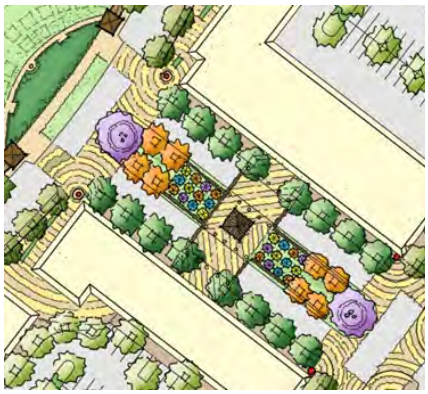

Figure 3.6: Conceptual Plan Detail – Main Street Promenade

Public Gathering Place.

Example of Specialty Building.

Figure 3.7: Conceptual View of Main Street Promenade

An urban park

Historically, many towns include a park near their downtowns. In the Amoruso Ranch community, an urban park forms a strong focal point at the termination of Main Street. At approximately 3 acres, the park is intended to be used for community wide gatherings and events. Parking for the park is provided on-street and it also shares the ample Village District off-street parking. The park is intentionally not over programmed. Homes front directly on this park allowing the residents to engage with the park events. To enhance the pedestrian experience, no residential driveways are accessed from the roads surrounding the park. Their design is guided by the standards in Section A.2 in Appendix A and guidelines in Section B.12 in Appendix B.

Twinkle Lights.

Street Furnishings.

Twinkle Lights.

Public Art.

Public Art.

Figure 3.8: Conceptual View of an urban park

.

Along its southeast side, the park may be fronted by live/work or row town homes, creating a transition to the commercial uses in the Village District. Street trees are within tree grates and the paving pattern is more indicative of a linear plaza than of standard sidewalk. The architecture has an urban flair with ground floor windows that are indicative of commercial storefronts that allow the Main Street character to expand. This strong urban streetscape may be further re-enforced by the inclusion of artwork that creates additional interest along the walk.

The Village District also includes a site appropriate for a market or grocer. This location allows for an appropriately scaled and visible parking area as well as several small pads for stand-alone buildings. These buildings are appropriate for larger chain restaurants or banks that are not well suited to a main street. The combination of a “Main Street” retail and traditional options provides for opportunities for a wide variety of retail and commercial options. In-line service-oriented shops link the market back to the Main Street completing the pedestrian grid.

Figure 3.9: Market Site

Figure 3.10: An Urban Park

Example of Stand-Alone Retail

B. Northeast District- Retail and Business Park

A 23-acre parcel in the northeast quadrant of the site, bounded by Placer Parkway, Westbrook Boulevard and Road “D”, is designated for retail and business park uses, as well as high density housing. This will be an ideal location for large format retail that will serve a wider area than Amoruso Ranch and the neighboring communities. Depending upon market demand, this site may include retail/office commercial or business park uses. Buildings should frame the road into the District, with large parking fields behind. A prominent building should be located at the intersection of Road D and Westbrook.

The 15-acre high density residential site provides residents the opportunity to walk to work and to retail services. Twenty-five spaces within the commercial parking lot will be provided for a park and ride lot. A small private park with amenities such as a play area, pool, or community building for use by the residents should be included. Parking should be broken into several lots and conveniently located for residents.

C. Central District

Figure 3.11: Conceptual Plan Detail – Northeast District

The Central District forms the heart of the Plan Area. It includes an elementary school, residential neighborhoods, and a variety of parks, including the crossing park that will provide pedestrian access throughout the area. A looped roadway with paseos around the District provides connectivity between the neighborhoods, parks, school, and the Village District for pedestrians and bicycles.

This District provides the broadest range of housing types and choices. Residents will be able to choose from homes as dense as apartments and townhomes, or single-family detached homes. This mixing of densities and lifestyle choices create a more fully integrated community.

A variety of parks serves the residents and creates options for recreation. A ten-acre park (AR-62) is located on the north end of the quadrant, adjacent to Westbrook Boulevard, south of Placer Parkway. Two smaller neighborhood parks are also proposed within the Central District. The linear east west park (AR-64), links the elementary school, parks, and Urban Park together.

The southern edge of the District has frontage along open space. Homes could front on, side on, or back on the open space creating a sequence of different experiences and edge conditions. A one-acre park (AR-63) and a pedestrian and bicycle path along the northern edge will provide visual and physical connections to the open space.

D. Northwest District

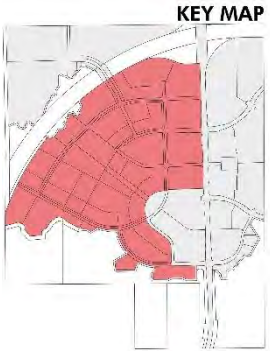

Figure 3.12: Conceptual Plan Detail – Central District

The northwest portion of the ARSP is located north of the proposed Placer Parkway. A roadway with striped on-street bike lanes provides access to the rest of the Plan Area. It is bordered by Sunset Boulevard to the north, and unincorporated land to the west. This area provides transition to existing rural uses within the County.

E. Southeast District

Figure 3.13: Conceptual Plan Detail – Northwest District

The Southeast District of the ARSP contains a mix of residential neighborhoods including high density apartments, townhomes, and single family detached, ranging from small to standard lot, as well as a one-acre park, and a fire station site.

This District is located between Westbrook Boulevard and the future Placer Ranch Plan Area. Two arterials connect Westbrook to the Placer Ranch Plan Area. The District also takes direct access from Westbrook Boulevard where a neighborhood street provides a direct focal point at the neighborhood park.

F. Parks and Open Space

Figure 3.14: Conceptual Plan Detail – Southeast District

Over twenty-three percent (23%) of the Plan Area is planned for park and open space uses, which is equivalent to 22 acres of park, 11 acres of open space paseo, and 155 acres of open space. The open space and park network provides a key element of the ARSP. In general, environmentally sensitive or significant land due to the presence of habitat, resources, natural features, or man-made features is designated as open space. Open space areas provide opportunities for scenic vistas, water conveyance and retention, stormwater quality/treatment, pedestrian/bike trails and resource avoidance and preservation.

The vision for the neighborhood parks is to create a variety of parks, both in size and activity, which are linked together via a paseo system. To create a "string of pearls," the parks range in size from one-acre to ten-acres. Design of each park is intended to be unique to create memory points or landmarks within the community. They are dispersed throughout the Plan Area so that almost all residents are within a quarter mile of a park, and have a pleasant route to walk or bike to that park. See Figure 8.2 Park Distribution and Figure 8.3 Walking Distances to Parks in Chapter 8.

To create a unique identity for each park, each conceptual layout draws from a wide variety of amenities at a minimum; parks will provide turf areas for informal activities, benches or tables for picnicking and shaded seating for larger group events as well as active, formal areas for organized play. See Chapter 8 for more information.

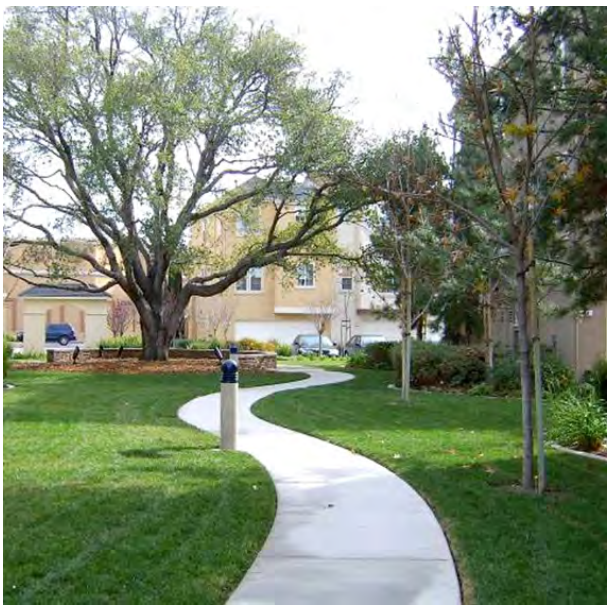
G. Circulation System

Figure 3.15: Conceptual Park on Western Edge

Figure 3.16: Conceptual Park on Eastern Edge

Informal Play Area.

Play Area.



Pedestrian Paseo.

The ARSP includes many of the City's Blueprint Implementation Strategies for multi-modal circulation, providing multiple transportation choices to address vehicles, public transit, bicyclists and pedestrians. The pedestrian and bicycle network forms the backbone of the Plan Area. It includes on-street bike lanes, pedestrian paths or paseos along specific streets, a network of sidewalks separated from driving or parking areas by landscaped parkways, and small, individual block serving paseos that link directly to homes. Where important pedestrian links occur, such as the street-side paseos, driveway access for individual homes are not allowed in order to reduce pedestrian/auto conflicts and reinforce the pedestrian friendly street experience.

This network links all land uses together within the ARSP and allows for connections to the regional system as well as off-site amenities such as the Al Johnson Wildlife Area. The pedestrian network is further defined in Chapter 7.

For vehicles, the backbone roadway system includes a combination of regional arterial and collector streets to provide connections from existing and planned roadways adjacent to the Plan Area. These roadways are designed to accommodate future anticipated local and area traffic demands, with opportunities for connections to future planned Placer Parkway and to roadways leading to the City of Lincoln. The design of the backbone roadway system supports the creation of a smaller "neighborhood" network of local roadways. This network forms a modified grid where high connectivity eliminates the need for collector streets within the community.

Many homes face onto pedestrian oriented streets, neighborhood serving parks, garden courts, small pocket parks and block level paseo connections. Curbcuts and driveway cuts are minimized along the streetside paseos creating a continuous and a safe path for walkers utilizing the pedestrian network. These homes may side on to the paseos, or have garages served by carriageways or alleys behind the unit. Mixed with traditional street loaded homes, this expands the housing choices for future residents within the Plan Area.

In keeping with the design philosophy of an integrated community, sound and privacy walls are eliminated wherever feasible by the creation of a street network that results in low Average Daily Trip (ADT) counts. Additionally, the Development Standards of the ARSP (Appendix A) places certain requirements on parcels adjacent to arterial roads to minimize walls. Appropriate land uses, orientation of structures and appropriate landscaped setbacks are some of the methods the Amoruso Ranch plan utilizes to mitigate noise while minimizing walls.

While no fixed guideway transit is currently planned for the area, the City of Roseville may, as funding allows, provide commuter, dial-a-ride, and local transit services to the Plan Area. This may include some form of bus service that would link the Amoruso Ranch community to the region. Locations for future convenient transit stops may be provided on both sides of Westbrook Boulevard and will provide amenities to support a Bus Rapid Transit (BRT) route through the Plan Area. Any transit shelter should be complementary to and reinforce the character of the Village District architecture. Potential transit facilities are further discussed in Circulation Plan Chapter 7.

3.5 Landscape Concept

The landscape design at Amoruso Ranch plays an important role in meeting the overall vision set forth by this document to create a truly memorable community. The vision behind the landscape concept at Amoruso Ranch is to design a community that achieves the following goals:

- Reinforce a strong identity and "sense of place" through landscape design.
- Create an interconnected pedestrian network supported by landscape character.
- Maintain a visually open character of the site.

Landscape character and design responds to each land use and becomes one of the main unifying elements for Amoruso Ranch. Continuity and consistency is key to achieving this goal. The “big idea” for the landscape at Amoruso Ranch is to create a landscape character with texture, variety and botanical diversity and interest in the planted forms.

Great streetscapes create initial impressions of a community. The Amoruso Ranch Plan strives to enhance the pedestrian experience. The street hierarchy and their corresponding street tree program help establish a sense of place and a certain visual continuity throughout the community. Detailed design guidelines for streetscape and landscape that include adherence to the City’s Water Efficient Landscape Ordinance are included in Section B.13 in Appendix B of this document.

CHAPTER 4 – LAND USE PLAN

4.1 Overview

The Amoruso Ranch Specific Plan (ARSP) provides for a mix of land uses including low, medium and high density residential uses; commercial and office uses (which in some cases are sited with one another, and/or with residential uses); public and quasi-public uses for the school and civic uses such as a fire station, parks and open space uses; and an urban reserve parcel.

At build out, the Plan Area will provide for approximately 2,827 dwelling units which would accommodate roughly 7,379 residents, add approximately 476,000 square feet of commercial retail and office uses with the potential to expand to a maximum of 766,000 square feet, and provide approximately 22-acres of parks and 155 acres of open space.

4.2 Land Use Plan

The land use designations identified in the ARSP are summarized below (Table 4.1), with an accompanying Land Use Map (Figure 4.1) and breakdown by parcel (Table 4.2) on the following pages.

Table 4.1
Land Use Summary

General Plan Land Use	*Applied Zoning District*	*Acres*	*% of Total Acres*	*Allocated Units*	*% of Total Units*
LDR (Low Density Residential)	RS	~~239.34~~219.05	~~34.47~~31.55%	~~1252~~1099 ~~1136~~	~~44~~38.88~~.29~~ %

4.3 Land Use Designations

Land uses within the ARSP are implemented through the zoning designation assigned to each parcel. This includes the application of the Development Standards (DS) and Special Area (SA) overlay zones to provide customized Development Standards and permitted uses as allowed by the City's Zoning Ordinance. Development Standards and Permitted Uses applicable to the Plan Area are provided in Appendix A. Where Appendix A is silent, the permitted uses and development standards established by the City of Roseville's Zoning Ordinance and Community Design Guidelines shall apply.

The following summarizes the ARSP Land Use designations with descriptions for each Land Use related density and applied zoning districts:

A. Residential Land Uses

The ARSP utilizes three residential land use designations: Low Density Residential (LDR), Medium Density Residential (MDR), and High Density Residential (HDR). This mix of residential land uses and their corresponding range of density support the vision of a community that includes a wide variety of housing types and options. Home types and lot sizes are intended to mix seamlessly together on almost a block by block development pattern.

The mix of housing types addresses future growth anticipated in the City of Roseville and neighboring regions. Approximately 70 percent of ARSP units are designated for low and medium densities and the remaining units, approximately 30 percent are planned as high density units.

The densities and supporting development standards as detailed in Appendix A, provide for the various housing options including conventional detached single family homes on large and small lots, alley loaded homes facing streets, parks or paseos, clusters, duets, townhomes, and apartments. This Specific Plan encourages innovative and unique lot configurations and home types that support the overall vision of the community as an urban village.

Custom Homes
Custom homes may be designated for construction in the northwest area of the ARSP located between Placer Parkway and West Sunset Boulevard. Custom homes are single-family residential units with unique exterior styling and individualized interior floor plans, and each home's architectural design is distinct from others in the subdivision. Typically, custom homes have detailed architectural features and upscale amenities which give them an appearance and character similar to, or qualitatively exceeding individually designed homes found in the City's other custom and/or executive housing neighborhoods. If proposed, custom home subdivisions maybe approved through the City's tentative subdivision map process.

Table 4.3 Low Density Residential (LDR)	
Applied Zoning Districts	RS Small Lot Residential
Density	.5 - 6.9 dwelling units per acre
Description	The Low-Density Residential (LDR) land use category is applied to lands that are comprised of detached single-family dwelling units. Lot configurations may include conventional (street accessed garages), alley loaded, and clusters.
Permitted Uses & Development Standards	Permitted uses per City of Roseville Zoning Ordinance. Development Standards for RS zoning per City of Roseville Zoning Ordinance. Standards for accessory uses and structures are as permitted by the City's Zoning Ordinance Chapter 19.22.

Table 4.4 Medium Density Residential (MDR)	
Applied Zoning Districts	RS Small Lot Residential
Density	7.0 - 12.9 dwelling units per acre
Description	The Medium Density Residential (MDR) land use category is applied to lands characterized by single family detached or attached dwelling units including a wide variety of lot types and configurations. This residential land use will accommodate a variety of housing types and designs on generally smaller lots.
Permitted Uses & Development Standards	Permitted uses per City of Roseville Zoning Ordinance. Development Standards per Appendix A of the ARSP. Standards for accessory uses and structures are as permitted by the City's Zoning Ordinance Chapter 19.22.

Table 4.5 High Density Residential (HDR)	
Applied Zoning Districts	R3 Attached Housing
Density	13.0 and more dwelling units per acre
Description	The High Density Residential (HDR) land use category accommodates a range of housing options that meet the minimum density of 13 du/ac. These may include attached or detached duets, townhomes, condominiums or apartments, alone or in combination on a parcel.
Permitted Uses & Development Standards	Permitted uses per City of Roseville Zoning Ordinance. Development Standards per Appendix A of the ARSP.

Design Review Permit for Residential Subdivisions (DRRS)
A design review permit for residential subdivisions shall be obtained when required concurrent with the processing of an application for a tentative residential subdivision map. The approving authority for design review for residential subdivisions is the Planning Commission.

Residential Unit Transfers
There may be a desire or need to adjust (reduce or increase) the number of units assigned to some large-lot residential parcels. These adjustments may be permitted, pursuant to the provisions outlined in Section 10.7 (Residential Unit Transfers) of this Specific Plan. If the provisions of that Chapter cannot be met approval of a Specific Plan Amendment and possibly a General Plan Amendment may be required.

B. Commercial Land Uses

The Commercial Land Uses in the ARSP consist of two areas. The first is a Village District, intended to create a true mixed-use urban village atmosphere. The second is a more traditional retail area located adjacent to a possible future interchange along Placer Parkway that would support regional commercial and business park uses.

Therefore there are two distinctly different commercial land uses, including Community Commercial - Village District and Community Commercial to allow their development standards to respond to the difference in uses and character. Tables 4.6 and 4.7 provide further detail into the Commercial Land Use category.

Table 4.6 **Community Commercial - Village District (CC-VC)**	
Applied Zoning Districts	CMU-SA/DS-AR Commercial Mixed-Use (Special Area Overlay): Village District
Description	The Community Commercial - Village District land use allows for a mix and density of land uses common to an urban setting or traditional downtown. Sites with a Community Commercial - Village District (CC-VC) designation are intended to be developed as mixed-use centers that allow for a combination of commercial, office, and residential uses. To foster this type of development pattern, these sites have a Commercial Mixed Use (CMU) zoning district, which is combined with a Special Area (SA) overlay and Development Standard Overlay. These sites are intended to promote a variety of commercial use types and the flexible siting of other uses that are typically considered to be compatible with commercial development. The permitted uses on these parcels could be mixed in either a horizontal or vertical manner. This means that a commercial/office component could be co-located on the same site with a residential component, or that a commercial/office component could be located on the ground floor of a multi-story residential component. This allows flexibility for future market conditions and encourages an active urban setting.
Permitted Uses & Development Standards	Permitted uses and Development Standards per Appendix A of the ARSP.

Table 4.7 **Community Commercial (CC)**	
Applied Zoning Districts	CC/DS Community Commercial with Development Standard Overlay
Description	The Community Commercial (CC) land use category is intended to provide a broad range of goods, services, and employment opportunities to an expanded service area.
Permitted Uses & Development Standards	Permitted uses per City of Roseville Zoning Ordinance. Development Standards per Appendix A of the ARSP.

C. Parks, Open Space & Public Uses

As illustrated in the Land Use Plan, a large portion of the ARSP is dedicated to Open Space and park land uses as well as civic uses. This includes parcels for Parks and Recreation (PR), Open Space (OS), and Public/Quasi-Public (P/QP) uses.

Table 4.8 Park & Recreation (P/R)	
Applied Zoning Districts	PR Park and Recreation
Description	The Park and Recreation (P/R) land use designation is applied to parcels where park facilities are planned. This includes a combination of both active and passive park spaces. The ARSP area includes neighborhood parks ranging in size from approximately 1-acre to 10-acres. These parks are spread evenly throughout the community. Refer to Chapters 3 and 8 for detailed information regarding the location and design intent for the neighborhood parks.
Permitted Uses & Development Standards	Permitted uses per City of Roseville Zoning Ordinance.

As stated in the City of Roseville General Plan Parks and Recreation Element, “It is the underlying goal of the Parks and Recreation Element to provide a variety of both passive and active recreational opportunities for all City residents.” The network of parks and their unique character and variety of amenities support this goal.

Table 4.9 Open Space (OS)	
Applied Zoning Districts	OS Open Space
Description	The Open Space (OS) land use designation is generally applied to lands that are environmentally sensitive or otherwise significant due to habitat and where preservation is required by federal permit. Land identified with the OS designation of the ARSP contains natural features and habitat area. The OS land use designation also applies to the Plan Area’s paseo parcels which are widened corridors along key roadways that provide pedestrian/ bikeway linkages throughout the Plan Area. However since they vary in their role and use when compared to larger open space parcels, the paseos are tabulated separately from the open space parcels in land use table.
Permitted Uses & Development Standards	Permitted uses and Development Standards per City of Roseville Zoning Ordinance and City of Roseville Open Space Preserve Overarching Management Plan.

Table 4.10 Public/Quasi-Public	
Applied Zoning Districts	P/QP Public/Quasi-Public
Description	The Public/Quasi-Public (P/QP) land use designation accommodates a variety of public-serving uses and facilities. These sites will provide for an elementary school, fire station, and areas for specific infrastructure related items such as a water storage well and any other facilities required by the Specific Plan.
Permitted Uses & Development Standards	Permitted uses per City of Roseville Municipal Code. Development Standards per Appendix A of the ARSP.

D. Urban Reserve

The ARSP includes one 20-acre parcel as Urban Reserve (UR).

Table 4.11 Urban Reserve	
Applied Zoning Districts	UR Urban Reserve
Description	The Urban Reserve (UR) land use designation is applied to lands that may receive urban land use entitlements at some time in the future. There is one UR parcel within the ARSP which will not be developed as a part of the ARSP.
Permitted Uses & Development Standards	Permitted uses per City of Roseville Zoning Ordinance.

4.4 Permitted Uses

Land uses within the ARSP will be regulated by the application of permitted, conditionally permitted and/or administratively permitted uses designated by the zoning district applied to each parcel. Except as otherwise provided in the ARSP, permitted uses are as specified by the City of Roseville Zoning Ordinance (Chapter 19).

4.5 Development Standards

Adoption of the ARSP by the City includes adoption of the development standards for each zoning district as described in Appendix A. The requirements of the Specific Plan shall take precedence over the City of Roseville Zoning Ordinance. In instances where the Specific Plan is silent, the City of Roseville Zoning Ordinance shall prevail.

Development Standards are detailed in Appendix A and within the City of Roseville Zoning Ordinance.

4.6 Design Guidelines

The ARSP includes Design Guidelines in Appendix B that as adopted will support the community vision through encouraged design approaches, and build upon the City of Roseville Community Design Guidelines.

CHAPTER 5 – AFFORDABLE HOUSING PLAN

5.1 Overview

State law (California Government Code Section 655584) requires each city and county plan to accommodate a fair share of the region's housing needs through zoning and land use. In urban areas, state law provides for councils of governments to prepare regional housing need allocation plans that assign a share of the region's housing need to each city and county. In the six-county greater Sacramento region, the Sacramento Area Council of Governments (SACOG) is the entity authorized to determine the future housing needs for the region. SACOG adopted the most recent Regional Housing Need Allocation (RHNA) Plan in 2012, for the planning period 2013 through the year 2021. Each city receives a total number of housing units it must plan for within this time frame. Each allocation includes a distribution for housing affordable to very low, low and moderate income households. The City of Roseville's General Plan Housing Element, which is consistent with state law, establishes a citywide goal to provide decent, safe, adequate and affordable housing in sufficient quantities for all economic segments of the community.

The City's Housing Element currently specifies an affordable housing goal of ten percent of all new housing units in the City be affordable to middle-, low- and very-low income households. The ARSP proposes a mix of housing types to provide the greatest opportunity to create affordable housing. The ARSP affordable housing program has been structured to be consistent with and implement the General Plan affordable housing goal.

Housing in the ARSP is planned to have a mix of housing types in low, medium and high density residential neighborhoods. Similar to existing low-density residential (LDR) areas of Roseville, it is anticipated that the LDR units provided in the ARSP area will provide market-rate housing affordable to moderate and above-moderate income households. The medium-density (MDR) and high-density (HDR) residential areas will provide greater opportunities for creating affordable housing for all income ranges. As outlined later in this chapter, the ARSP affordable housing plan focuses on HDR parcels and is structured to be consistent with the City's General Plan affordable housing goals.

5.2 Definition of Housing Affordability

Housing affordability is based on household income categories as defined by the U.S. Department of Housing and Urban Development (HUD). The standard measure of affordability is the median household income calculated for the Sacramento – Arden-Arcade – Roseville, CA Metropolitan Statistical Area. All jurisdictions within this Metropolitan Statistical Area, which includes all of Placer County, utilize the same basic income calculations irrespective of actual income level distribution in the community. Income categories are summarized in Table 5.1.

Table 5.1
Definition of Household Income Categories

Income Category	***Percent of Median Income***
Very-Low Income	Less than 50% of Median
Low-Income	51% to 80% of Median
Middle-Income	81% to 100% of Median
Moderate Income	101% to 120% of Median
Above Moderate Income	121% and Above of Median

Based on sales and rental qualifications and the definition of affordability, the City's Housing Element includes the following housing assistance needs identified for each income group:

- Very Low Income Households not currently owning their own home will not be able to qualify for home ownership without substantial subsidies, unless their incomes rise significantly. Rental subsidies for very-low income households are needed to maintain affordability.

- Low-Income Households not currently owning their own home will require loan subsidies to afford and qualify for homeownership. Rental subsidies for low-income households are needed to maintain affordability.

- Middle- and Moderate-Income Households may require some assistance in purchasing a home since the price range of new homes in Roseville may exceed their ability to pay. This group is likely to afford rental units without financial assistance.

- Above Moderate Income Households are considered financially able to find affordable units, both for purchase and rent, within Roseville's housing market.

Numerous assumptions are required to translate household income to affordable rental rates and purchase prices. Lenders ultimately determine the actual purchasing power of household income at a given point in time. A household can qualify to purchase a home based on annual income, down payment, level of other long-term financial obligation and interest rates.

For planning purposes, the City of Roseville assumes for rental units, low- and very-low income households should not spend more than thirty percent (30%) of their monthly gross income on housing costs, including utilities. For middle-income households, thirty-five (35%) of monthly gross income is used to determine housing affordability. Purchase housing costs include payment of principal, interest, taxes, insurance, and any homeowner's association dues.

It is recognized that various factors which determine affordability continually change, and project specific affordability standards need to be established and adjusted as development occurs. To that end, the 10 percent affordable housing goal is calculated for each Specific Plan Area based on the total residential units mapped.

5.3 Affordable Housing Program

Consistent with the City of Roseville's General Plan Housing Element, at least ten percent of the units in the ARSP have been designated for lower income households, specifically low- and very-low income households. This includes rental housing affordable to low- and very-low income households. To provide housing affordable to the income level households with the greatest needs, the ARSP provides a total of 283 rental units affordable to the low- and very-low income households, consistent with the City's ten percent affordable housing goal in the City's General Plan Housing Element. Sixty percent of affordable units in the ARSP will be affordable to low-income residents and forty percent to very-low income residents. The ARSP affordable housing goal is summarized below in Table 5.2.

Table 5.2
ARSP Affordable Housing Program

Dwelling Type	***Number of Units***	***Percentage***
Low-Income (Rental)	170 Units	60%
Very Low-Income (Rental)	113 Units	40%
Total Affordable Units	283 Units	100%
GP Affordable Housing Requirement	*283 Units*	

Table 5.3 lists the parcels in the Plan Area that have been identified for low and very low income units. Certain funding sources available for low and very low units are awarded based upon location and adjacency to services, and require the units to be located on one piece of property. This greatly affects non-profit developers in their ability to successfully bring these units to the market. The locations of the parcels for low and very low rental units are identified in Figure 5.1 below.

Table 5.3
Affordable Housing Allocation – Rental

Parcel	***Land Use***	***Total Units in Parcel***	***Total Affordable Allocation***	***Very-Low Income Rental***	***Low-Income Rental***
AR-19	HDR	230	170	68	102
AR-44	HDR	150	113	45	68
Total			**283 Units**	**113**	**170**

5.4 Administration and Implementation

Residential builders are encouraged to explore creative approaches in providing a range of housing opportunities to meet the needs of low- and very-low-income households. Over time, housing markets, income categories, funding programs, and other factors change, and it is important to retain some level of flexibility to ensure that affordable housing goals are achieved.

The options outlined below may be considered to assist in achieving the ARSP affordable housing goal. It should be noted that the City reserves the right to consider alternatives to achieving affordable housing within the ARSP (such as allowing carriage units or granny flats in LDR or MDR areas), should the cost of producing the affordable housing preclude the City from accessing federal and state financing programs, or if legislation mandates the City to alter its approach to affordable housing.

Transfers/Credits
Subject to administrative approval by the Director of the City's Housing Division or designee, the affordable housing allocations of 283 affordable rental units identified on Table 5.3 may be transferred among parcels within the ARSP. In addition, to the extent that the number of affordable units produced on a parcel exceeds the number of affordable units allocated to that parcel, the excess units may be credited

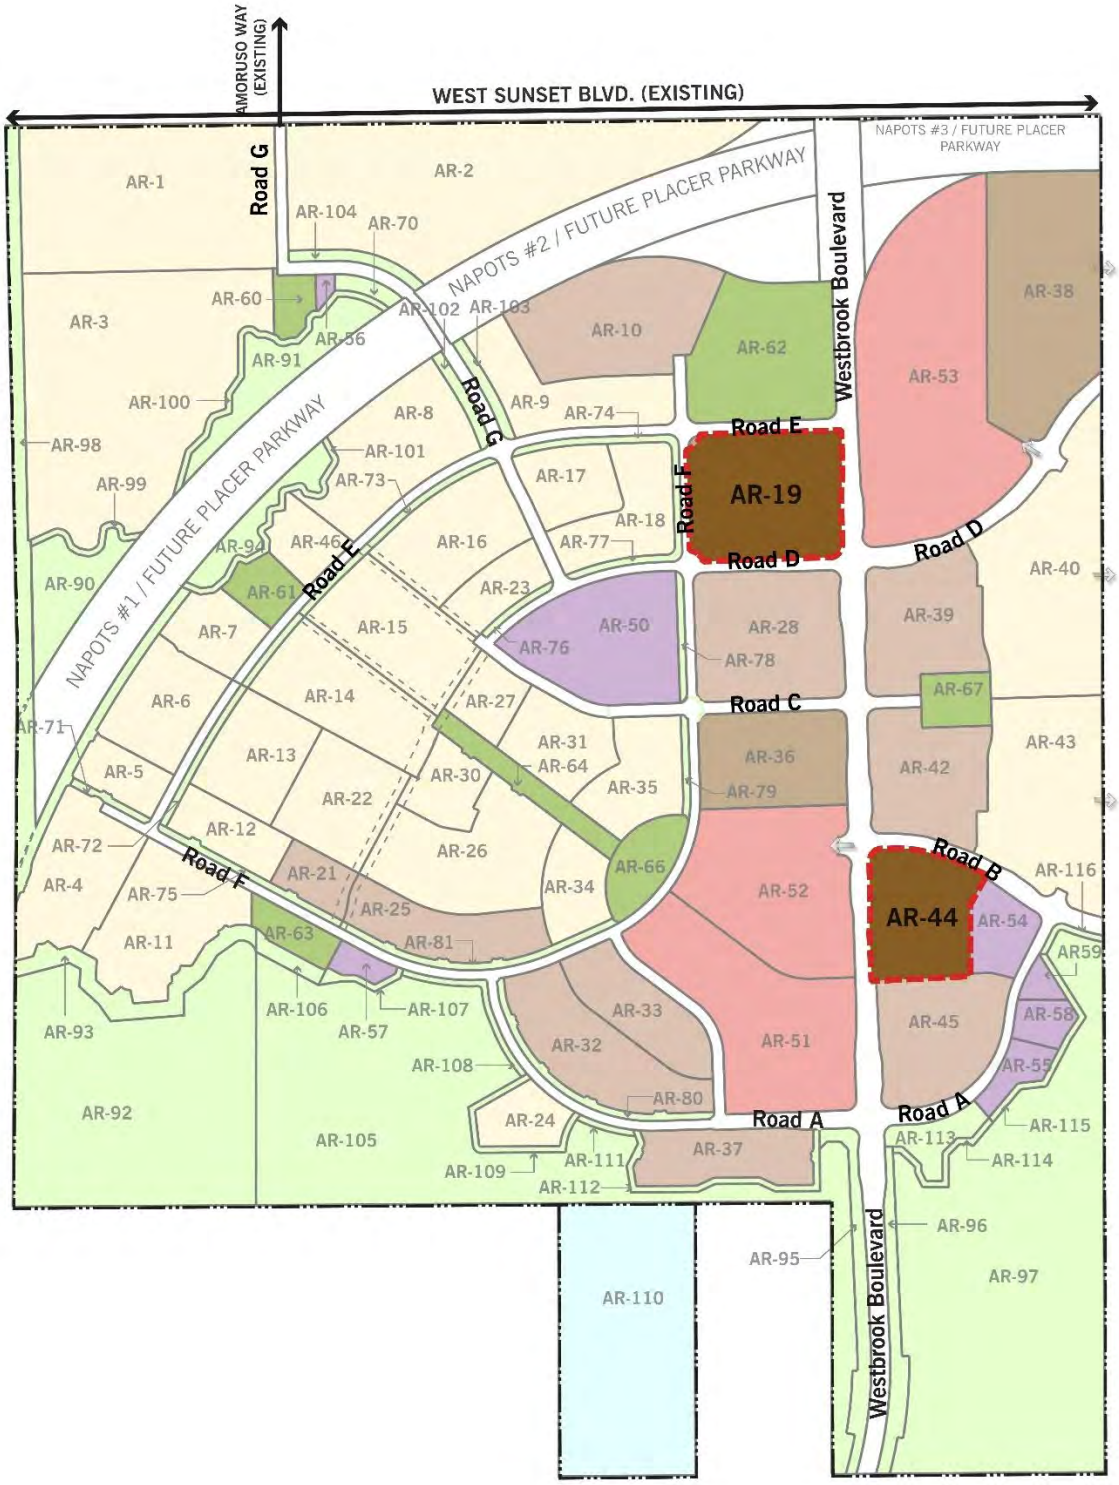

Figure 5.1: Low and Very Low Affordable Housing Distribution (updated May 2021)

towards meeting the ARSP affordable housing goal assigned to the other parcel. Transfer and/or credits may be approved by the Director of the City's Housing Division or designee, without the need for amendments to the ARSP or to the ARSP Development Agreements, if it is determined that the transfers/credits maintain the ability to produce affordable units and achieve the ARSP affordable housing goal and:

- The transfers/credits are applied to parcels within the ARSP and are covered by the same Development Agreement;

- The transfers/credits improve the ability to produce affordable units and achieve the affordable housing goal of the ARSP.

Requests for transfers and/or credits shall include information as deemed necessary by the City to ensure consistency with the ARSP's affordable housing program. In addition, a revised affordable housing allocation (Table 5.3) shall be provided reflecting adjusted affordable unit allocations. The City's housing division shall maintain all revisions to Table 5.3 as the official ARSP affordable housing allocation record. The affordable housing unit transfer shall be memorialized by way of a recorded Memorandum of Understanding (or substitute form as specified by the City).

Density Bonus
The City may, in accordance with its Density Bonus Ordinance (Zoning Ordinance, Chapter 19.28) and the General Plan Housing Element, assign additional residential units to projects for the purpose of achieving the affordable housing goal. The increase in units provided by the density bonus is intended to reduce average per unit development costs. In the ARSP, a density bonus is assigned by City approval of an Affordable Housing Agreement to individual projects on a case-by-case basis, and may constitute a portion of the subsidy (if required) for the provision of affordable units.

In-Lieu Fee
To the extent an in-lieu affordable housing fee is adopted on a citywide basis, a portion of the affordable very low housing allocation identified in Table 5.2 may be satisfied by paying an in-lieu fee, subject to approval by the Director of the City's Housing Division.

5.5 Affordable Rental Housing Agreement

An Affordable Rental Housing Agreement (or substitute form as specified by the City) is required to detail and secure the specific requirements and obligations. Among other provisions, the Affordable Rental Housing Agreement will:

- Specify the number of affordable units to be reserved at each income level;
- Specify the term of the affordability obligation;
- Set initial rent for the designated affordable units;
- Establish criteria and a basis for annual rent increases;
- Provide the City with a mechanism to monitor actual rents; and,
- Identify any City or other subsidies required to assist in meeting the affordability requirement and, if applicable, the basis and terms for refunding such subsidies.

Affordable Rental Housing Agreements require City approval prior to the issuance of building permits, or recordation of a final small lot map where a subdivision map is required, for any large-lot parcel with an affordable housing allocation. The total number of affordable units required is to be calculated based on the number of final units mapped.

(This page is intentionally left blank)

CHAPTER 6 – RESOURCE MANAGEMENT

6.1 Overview

The ARSP consists of relatively flat to gently rolling terrain situated at an elevation of approximately 70 to 100 feet above mean sea level. Historic uses of the site included planting of winter wheat and oats, as well as cattle ranching.

As shown in the site photos below, annual grassland is the dominant vegetation community on the site and is comprised primarily of non-native, naturalized Mediterranean grasses. Aquatic features are interspersed within the annual grassland community and include two marshes, an intermittent drainage/University Creek, an ephemeral drainage, seasonal wetland swales, and scattered vernal pools and seasonal wetlands. University Creek flows from east to west. It enters the site from the southeast, leaves the site along the southern boundary, then re-enters the Plan Area in the southwest corner.

Existing Farm on the Amoruso Ranch Property.

Vernal pool within proposed Open Space Preserve.

University Creek in the southern portion of the site.

The Plan Area has several project components as illustrated in Figure 6.1. These include the Amoruso Ranch Project with approximately 480 acres of development areas, an open space preserve, general open space – avoided area, and the approximately 18-acre Westbrook Boulevard that serves the Plan Area. Also occurring within the Plan Area is the approximately 49-acre future Placer Parkway Regional Transportation Improvement project (see Figure 6.1). This project, although within the overall Amoruso Ranch property, is a separate project and will be reviewed and processed by the City and County. An additional parcel of land, the approximately 20-acre Wagner parcel, lies to the south of the Amoruso Ranch property and is designated an Urban Reserve.

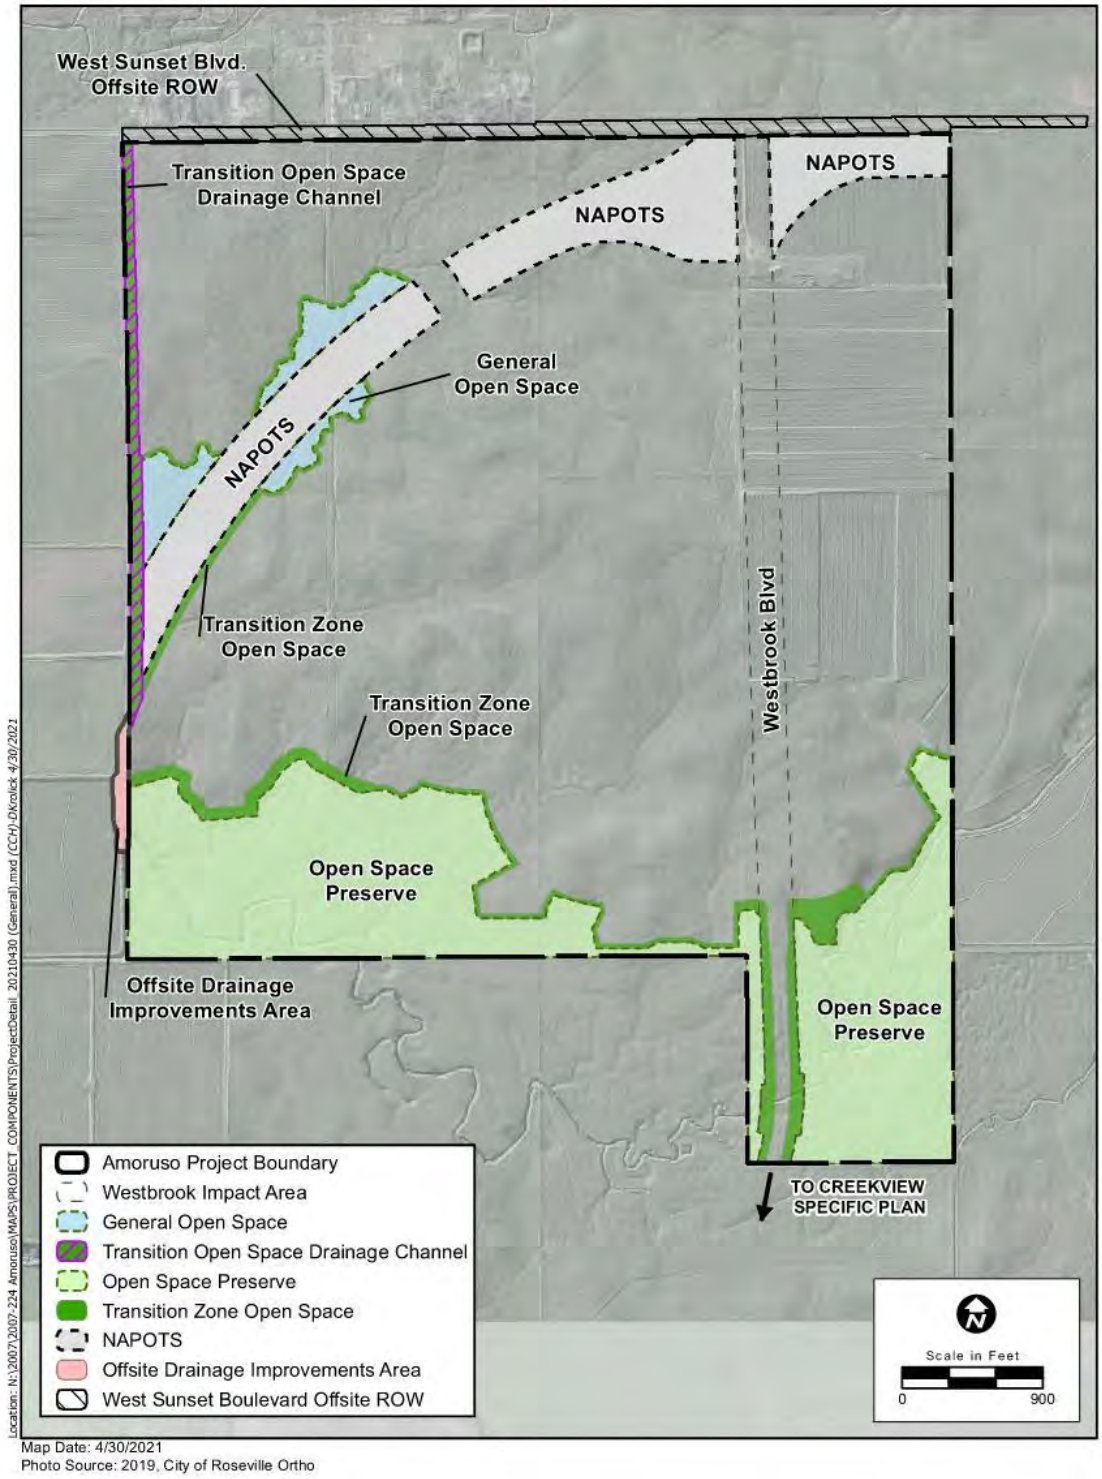

Figure 6.1: Project Components

The ARSP contains four types of open space totaling approximately ~~155~~ ~~154~~6 156 acres. These types include open space preserve (109 acres), general open space – avoided area (10 acres), transition zone open space (~~25~~ 26 acres), and paseos (11 acres).

Each type of open space has been designed to accommodate specific functions and activities, from very limited use to active recreation and infrastructure. The on-site **open space Preserve** will be permanently preserved to protect Waters of the U.S. and habitat for federally listed species. This protection will be provided by either a declaration of covenants and restrictions and/or a conservation easement to restrict access and activities within the preserve. The area would be managed in accordance with the City's OSPOMP. **General open space – avoided area** also contains Waters of the U.S. and species habitat. While these areas will be avoided by the Project development, they may be impacted by the future Placer Parkway and therefore are not currently proposed for protection by a deed restriction and/or conservation easement. The ultimate management strategy for the General Open Space – avoided areas will be determined during future Placer Parkway project federal permitting process. During the interim period the avoided area would be managed as General Open Space in accordance with the City's OSPOMP. **Transition Zone open space** consists of the parcels that boarder the open space Preserve and General open space – avoided areas. These parcels provide a buffer to the Preserve open space and will be utilized for activities such as slope grading, outfall/stormwater structures, bike trails, weed abatement activities, open space maintenance, and health and safety vehicle access. The Transition zone open space area will not be protected by conservation easement and all wetlands within this area will be permitted for fill. Examples of typical infrastructure elements within Transition Zone open space areas can be found in Figure 6.3 to 6.11. **Paseos** are linear parcels of open space that provide pedestrian trails and green space within development areas. Paseos will not be protected by conservation easement and all wetlands within this area will be permitted for direct fill. A list of the parcels in each open space type is shown in Table 6.1 below. Paseos are not addressed further in this Resource Management Chapter because they are developed/landscaped areas that do not contain natural resources and would not be subject to special resource management actions outlined in the City's OSPOMP.

Table 6.1
Open Space Parcels by Type

Grand Total		**~~154~~155.~~54~~70**

The ARSP is consistent with the goals of the City of Roseville's General Plan Open Space and Conservation Element. It establishes approximately 16 percent of the project as permanent open space preserve, designed to protect some of the most prominent natural resource areas within the Plan Area. The ARSP open space preserve is contiguous with other open space preserves and abuts portions of the Creekview Specific Plan's open space preserve to the south, portions of West Roseville Specific Plan's open space preserve to the southeast, and the City of Roseville's Al Johnson Wildlife Area to the southwest (Figure 6.2). The resource management approach is designed to be consistent with resource agency input received during an early consultation process completed for the project as an outgrowth of the May 2000

Memorandum of Understanding (MOU) between the City and the U.S. Fish and Wildlife Service (USFWS). The City conducts early consultation with the resource agencies for annexation projects proposed on the City of Roseville's western boundary, such as the ARSP.

The ARSP open space preserve is intended to complement larger-scale regional conservation strategies, such as the proposed Placer County Conservation Plan (PCCP), Placer County's proposed habitat conservation plan. Coordination with the conservation efforts of other agencies/projects is a fundamental principle and key objective of the Amoruso Ranch resource management approach. In addition to resource protection, the on-site open space preserve helps define the visual character of the site, ~~provides for passive recreation opportunities,~~ provides stormwater drainage and treatment, includes storm water conveyance, and provides land use buffering.

Based on the characteristics of the Amoruso Ranch property, the resources management approach in the Specific Plan focuses on wetlands, annual grassland habitat, wildlife, and providing connecting open space corridors. Additional resources are further addressed in the ARSP Environmental Impact Report (EIR). The ARSP proposes to append to the City's Open Space Preserve Overarching Management Plan for purposes of monitoring, reporting, and management of on-site open space areas.

6.2 Wetland Resources

A. Pre-Development Conditions

In its pre-development condition, several types of wetland features exist within the Plan Area (see site photos below). The most prominent of these are wetland swales, which are found throughout the site and carry water briefly during winter rainfall. As mentioned previously, University Creek is present within the southern portion of the site. University Creek currently flows with winter rainfall and runs dry (or below the surface) during the summer months. It receives some irrigation run-off from an irrigated pasture located in the northeast portion of the Amoruso Ranch site.

Seasonal wetland swale within proposed Open Space Preserve.

University Creek within proposed Open Space Preserve.

Outside of the swales and University Creek, vernal pools, seasonal wetlands, marshes, a stock pond, and an ephemeral drainage are scattered throughout the annual grassland community. The vernal pools and seasonal wetlands fill with rainwater during the winter months and can remain inundated until spring or early summer. These wetland areas include habitat potentially suitable for certain federal and/or state special-status plant and wildlife species. A total of 38.577 acres of wetlands and other Waters of the U.S. occur within the Amoruso Ranch property, Al Johnson Wildlife Area Improvements Area, and the Sunset Boulevard West right-of-way in its pre-development condition, as listed in Table 6.2.

Table 6.2 Potential Jurisdictional Wetlands Summary			
Type	***Amoruso Ranch Project [1]***	***Future Placer Parkway (Placer County Project) [2]***	***Total***
Wetlands			
Vernal Pool	9.055	0.753	9.808
Seasonal Wetland	4.160	0.674	4.833
Seasonal Wetland Swale	16.807	2.960	19.767
Farmed Wetland	0.017	0.000	0.017
Marsh	1.741	0.081	1.822
Other Waters			
Ephemeral Drainage	0.002	0.000	0.002
Intermittent Drainage	1.919	0.000	1.919
Seasonal Creek	0.043	0.000	0.043
Pond	0.233	0.132	0.364
Total	**33.978**	**4.599**	**38.577**

[1]Includes wetlands within the Westbrook Boulevard alignment, along the West Sunset Boulevard right-of-way, and within the Al Johnson Wildlife Area improvements area. Wetlands within the Al Johnson Wildlife Area are not yet verified and may be subject to change.
[2]Includes an estimate of wetlands within the future Placer Parkway regional improvement project that will occur within the Amoruso Ranch property but will be reviewed and processed as a separate project.

Additional information regarding impacted and avoided wetlands is provided in the EIR.

B. Avoidance & Mitigation Strategies

B.1 Avoidance

The ARSP is the result of comprehensive planning and is influenced by the desire to minimize impacts on wetlands and habitat for endangered species to the fullest extent feasible. The proposed open space preserve is shown on Figure 6-1. It has been designed to avoid impacts to University Creek, preserve the highest quality vernal pools and seasonal wetlands at the site, create an open space preserve that is contiguous with other open space preserves, and to provide buffers for habitat protection. Additional information regarding impacted and avoided wetlands, including mitigation strategies, is provided in the EIR.

Development of the Amoruso Ranch Plan Area ~~will be~~is subject to approvals from state and federal resources agencies including the USFWS, the U.S. Army Corps of Engineers (USACE), the California Regional Water Quality Control Board, and the California Department of Fish and Wildlife. The City of Roseville and the project proponent worked extensively with representatives of various federal and state agencies during an early consultation process to refine the plan to minimize impacts to resources, create open space preserves of regional benefit, and to ensure compliance with the Clean Water Act and the federal Endangered Species Act (ESA).

B.2 On-Site Resource Preservation

Wetland features and habitat within the ARSP open space preserve will be protected in perpetuity. The ARSP open space preserve will total approximately 109 acres and will be established within the overall Plan Area (see Figure 6-1). To ensure the open space preserve and its habitats are maintained, grading and drainage plans for the ARSP are designed to minimize impacts on the open space preserve's existing hydrology. ~~It is anticipated that~~The maintenance and management of the open space preserve will be conducted in perpetuity in accordance with the City of Roseville's Open Space Preserve Overarching Management Plan, discussed further in Section 6.3 below. ~~It is further anticipated that the resource agencies may require an endowment and conservation easement recorded in favor of a third party land trust to monitor in perpetuity any on-site endangered species habitat credited to the project through the Clean Water Act Section 404 and ESA Section 7 permit process.~~The onsite preserve will be protected in perpetuity with a conservation easement that will be held by the Placer County Authority (PCA) as a

condition of the Clean Water Act Section 404 permit and Endanger Species Act Section 7 incidental take authorization.

B.3 Off-Site Resource Mitigation

Where biological resources cannot be avoided or preserved within the Amoruso Ranch Plan Area, off-site mitigation ~~may be~~is required to off-set impacts to biological resources and endangered species habitat, including wetlands that fall within the USFWS Vernal Pool Recovery Plan designated Core Area within Western Placer County. Per the permit approved by USACE, USFWS, CVRWQCB and CDFW, off-site mitigation will occur via a payment of fees to the PCA. The PCA is responsible for utilizing collected funds to acquire lands within Placer County for the purpose of open space protection and management, and for the creation of wetland habitat for the purpose of mitigating impacts to wetlands and waters within the County. Land controlled by the PCA will be managed in accordance with an Operations and Management Plan developed by the Placer County Conservation Program. Off-site land will be managed in a manner to ensure that land will be strategically and effectively managed to support the survival and well-being of covered species, as well as hundreds of other species that are dependent on the same habitat. ~~Mitigation may be achieved by the purchase of habitat credits from established agency-approved mitigation banks or through agency-approved off-site wetland preservation, restoration, and/or creation. Offsite mitigation areas controlled by the specific plan proponent would be privately managed according to an individual Operations & Management (O&M) Plan approved by the agencies as part of the permit process. Alternatively, the offsite preserve properties may be dedicated to the City by the landowner, subject to approval by the City. The offsite preservation properties shall be consistent with the City's Open Space Preserve Overarching Management Plan or other management plan approved by the resource agencies. Where mitigation bank "credits" are purchased, preserve management would be in accordance with pre-approved mitigation bank O&M Plans.~~

C. Vegetation and Wildlife

Annual grassland is the dominant vegetation community present within the Amoruso Ranch Plan Area and is comprised primarily of non-native, naturalized Mediterranean grasses. The most common grassland plant species found within the site include soft brome (*Bromus hordeaceus*), ryegrass (*Festuca perennis*), wild oat (*Avena fatua*), barbed goatgrass (*Aegilops triuncialis*), little quaking grass (*Briza minor*), and medusahead grass (*Elymus caput-medusae*). Wetland features such as marshes, seasonal wetland swales, vernal pools, and seasonal wetlands and streams are embedded in the annual grassland habitat. Valley oak (*Quercus lobata*) trees are scattered along the intermittent drainage that runs through the southern portions of the site. The northeastern portion of the site consists of irrigated pasture and is dominated by the plant species Bermuda grass (*Cynodon dactylon*), tall flatsedge (*Cyperus eragrostis*), and Kentucky fescue (*Festuca arundinacea*). Surveys have shown that one blue elderberry (*Sambucus nigra* ssp. *caerulea*) shrub occurs among old farming equipment within the rural residence located in the northeast corner of the Amoruso Property.

The Amoruso Ranch property's various wetland habitats support a variety of wildlife species. These include waterfowl, wading birds, and several amphibian species which use the wetland areas in the winter and spring. Vernal pool fairy shrimp (*Branchinecta lynchi*), a federally listed threatened species, has been documented within several on-site vernal pools and is protected pursuant to the Federal ESA. In addition, the annual grassland habitat provides forging habitat for several raptor species, including Swainson's hawk (*Buteo swainsoni*) and burrowing owl (*Athene cunicularia*). Swainson's hawk is a state-listed threatened species and is protected pursuant to the California ESA. Although Swainson's hawks have not been located at the site, two Swainson's hawk nests have been previously documented within the 501-acre Creekview Specific Plan directly south of the Amoruso Ranch Plan Area. Several prey species are expected to occur within the annual grassland habitat on the site, including California vole (*Microtus californicus*), black-tailed jackrabbit (*Lepus californicus*), deer mouse (*Peromyscus maniculatus*), and pocket gopher (*Thomomys* spp.). Burrowing owl is a state species of concern and has been documented in the Amoruso Ranch Plan Area. The blue elderberry shrub is the exclusive host plant of the Valley elderberry longhorn beetle (*Desmocerus californicus dimorphus*), or VELB, a federally listed threatened species that is protected

pursuant to the federal ESA. The one blue elderberry shrub located on the Amoruso Ranch site is highly unlikely to provide habitat for VELB because it is located amongst old farming equipment and debris and is more than nine miles from the closest documented occurrence of VELB.

Trees

A total of 28 Valley oak trees occur along the intermittent drainage located in the southern portion of the Amoruso Ranch property and would be subject to regulation under the City of Roseville Native Oak Tree Preservation Ordinance. Oaks are important to a variety of wildlife species because they produce acorns, an extremely important food source for insects and wildlife. All oak trees present on the site will be preserved as part of the Amoruso Ranch project's open space preserve.

6.3 Operations & Management Plan

The ARSP's on-site open space preserve is expected to append to and be managed in accordance to the City of Roseville's Open Space Preserve Overarching Management Plan (OSPOMP). The OSPOMP guides the management of other open space areas owned by the City of Roseville and provides mechanisms for consistent application of preserve management strategies across the City. The OSPOMP outlines preserve management responsibilities and strategies as well as allowed and prohibited activities.

A. Preserve Transition Zone

OSPOMP includes a requirement to establish a 50-foot "transition zone" to serve as a buffer for preserve resources where the preserve abuts development property. According to the OSPOMP, indirect impacts to habitat adjacent to the 50-foot transition zone assessed by the agencies must be mitigated by the project proponent along with all direct impacts to habitat within the 50-foot transition zone. The transition zone may contain (but is not limited to) such improvements as public utility easements, storm water outfalls, constructed swales and ditches, bike trails, water quality BMPs, maintenance access ramps, slopes, and fencing. The ARSP open space preserve has been designed to be consistent with the intent of OSPOMP transition zone requirements. In fact, in many locations the proposed transition zone far exceeds the OSPOMP recommended 50-foot width. For example, the transition zone proposed adjacent to the southwest preserve is over 80 feet wide, accommodating a drainage channel with water quality features, outfalls, a Class I bike trail, and maintenance access ramps. In other locations, where specific plan infrastructure needs are less, the proposed transition zone is reduced to 30 feet, but in no location is it less than 30 feet (the minimum width determined necessary to provide protection to preserve resources). Additionally, there is a minimum 50 foot buffer extending further into the open space that provides protection to resources, essentially providing a cumulative minimum 80 foot transition zone from the edge of preserved wetlands to edge of urban development. The project's 404 permit allows for thisapplication ~~includes a request for an~~ exception to the City's OSPOMP minimum transition zone width requirement, allowing for a minimum transition zone of 30 feet, as shown in Figure 6.3. ~~The exception request will be addressed by the USACE and USFWS in the Section 404 Permit and Biological Opinion issued to the project.~~

~~In the unlikely event that the exception is denied, additional transition zone buffer width could be incorporated from the adjacent development parcel.~~

B. Dedication Timing and Management Responsibilities

The OSPOMP also outlines preserve maintenance, management, and reporting responsibilities that apply during the preserve establishment phase and in perpetuity. As outlined in the OSPOMP, during the preserve establishment phase, open space preserve parcels remain privately owned and managed while adjacent development is completed and all open space improvements are installed by the landowner/developer. This includes amenities located within the transition area like drainage channels, outfalls, water quality swales, maintenance access ramps, and post and cable fencing. Following buildout of adjacent areas and completion of transition area improvements, the on-site open space preserve is

expected to be dedicated to and managed by the City of Roseville following the process outlined in the OSPOMP Chapter 5.

~~In the unlikely event that the Amoruso Ranch on-site open space preserve is not appended to the OSPOMP, a separate O&M Plan will be developed and implemented in accordance with the applicable 404 permits to continually manage, monitor, maintain, report, and correct disturbance, if any, to the open space preserve. This document will ultimately be approved by the regulatory agencies and will specify the permitted activities and features within the Amoruso Ranch project's open space preserves.~~

C. Preserve Funding

Funding for the management of the on-site open space preserve will be provided by an annual tax levy via creation of a Communities Facilities District (or other funding mechanism) as further discussed in Chapter 10. ~~Should the project receive credit for on-site endangered species habitat preservation, a third party easement and monitoring by a qualified non-profit land trust may be required by the federal permitting agencies. Any required third party easement monitoring would be funded by a separate endowment established by the land owner/developer.~~

6.4 Cultural & Historic Resources

Historic use of the land includes agricultural use to plant and harvest winter wheat and oats and cattle ranching. Surrounding land uses include rural residences, cattle grazing, and agricultural fields. Prehistorically, the property was likely used for resource procurement and subsistence activities. Based on the results of ~~the pre-field~~ archival research~~,~~ ~~and~~ literature review, field studies and in consideration of the depositional environment of the Project Area, the area ~~was~~ is identified as being moderately sensitive for prehistoric and historic cultural resources. One historic-era residence with associated outbuildings was documented within the northeastern corner of the Amoruso Ranch project area. This complex was evaluated for significance by a qualified architectural historian and found to be not eligible for inclusion in the Natural Register of Historic Places or the California Register of Historical Resources. Therefore, no known historic properties will be affected by the proposed project. The ARSP EIR will provides more detailed information and ~~will provide~~ the measures for the appropriate management of unanticipated discoveries.

This page is intentionally left blank)

CHAPTER 7 – CIRCULATION PLAN

7.1 Overview

The circulation system for the Amoruso Ranch Specific Plan (ARSP) provides a hierarchy of streets, bikeways, walkways and multi-use trails throughout the development area that provide both connectivity to and the expansion of existing and planned future City and regional facilities, and public transit options that will serve the community. The placement of parks, landscape corridors and the alignment of the streets organize the community and promote traffic calming and pedestrian use. A modified grid pattern provides multiple ingress and egress points into and out of the Plan Area which helps to disperse traffic resulting in local streets that are pleasant to live on and walk or bike along. This street pattern, in conjunction with the pedestrian connections, provides a seamless network of connectivity throughout the Plan Area. By providing street trees and landscaping within the adjacent parkways, removing many of the driveway curb cuts and street-facing garages, and incorporating traffic calming measures such as bulbed intersections and roundabouts, the street design encourages alternate transportation modes including walking and biking throughout the community and to the outlying region.

In order to meet the City's roadway Level of Service (LOS) standards while at the same time creating a network of pedestrian and bicycle friendly streets, the ARSP establishes the following street design standards that are to be utilized for the design and construction of the streets within the ARSP.

7.2 Roadways

Existing and Proposed Regional System and Connections
The development of Amoruso Ranch Specific Plan is influenced by several existing and planned roadways that provide access to the Plan Area. These roads have been planned to accommodate the future growth of regional development and are the backbone of the circulation plan.

- Westbrook Boulevard – Westbrook Boulevard is a planned north/south six-lane arterial roadway and designated truck route that will begin at Baseline Road and extend north of Blue Oaks Boulevard, through the Creekview Specific Plan (CSP) area entering the southern portion of the ARSP, and extending north through the ARSP. Westbrook Boulevard will terminate at the intersection of West Sunset Boulevard with a signalized connection. The future planned extension of Westbrook Boulevard may continue north to the City of Lincoln, and the plan does not preclude a future connection to the future Placer Parkway.

- Placer Parkway – Placer Parkway is a planned 15-mile long, high-speed limited access transportation facility, which will connect State Route 65 in western Placer County to State Route 99 in south Sutter County and bisects the northwest area of the Plan Area. As currently planned, Placer Parkway will have 4-lanes from Hwy 65 west to the future extension of Santucci Boulevard (Watt Ave) and 6-lanes from Santucci Boulevard west to Hwy 99. The right-of-way for this planned facility, as it traverses through the ARSP will be dedicated to the Public as part of the planned development. While a connection to Westbrook Boulevard has not been precluded by the development of the ARSP, no connection to Westbrook Boulevard is planned at this time, and depending on the final design and traffic needs the connection could be on-grade or grade separated.

- West Sunset Boulevard – West Sunset Boulevard is an existing east/west two-lane rural roadway that is located along the northern boundary of the ARSP. The roadway is within unincorporated Placer County and will provide additional access points to the ARSP at the intersection to Road G and Westbrook Boulevard. With the development of the ARSP the adjacent portions of West Sunset Boulevard will be improved to meet the current County of Placer road standards for a rural road and landscape setbacks with improved sidewalk, landscaping and walls per City standards.

- Blue Oaks Boulevard - Blue Oaks Boulevard, a six-lane arterial which provides east/west circulation through the City, lies along the southern boundary of the CSP. Existing Blue Oaks Boulevard extends from Highway 65 west to approximately Hayden Parkway and will be extended to Westbrook Boulevard to provide access into the ARSP.

Planned ARSP System and Improvements
The ARSP roadway system is illustrated on Figure 7.1 Street Hierarchy Plan, with lane capacity, right-of-way, and landscape requirements summarized in Table 7-1. Typical roadway design sections are illustrated in this chapter, with corresponding landscaping standards and related design details included in the ARSP Design Guidelines (Appendix B). Additional streets sections than those defined in this chapter or different than the City of Roseville's street sections may be reviewed and approved with individual development applications.

Alley	2	26’	n/a	n/a	n/a	As Noted	7.2.k

Footnotes:
1. The right-of-way width will be adjusted to accommodate additional left-turn lanes where needed.
2. Landscape corridors adjacent to LDR and MDR along arterial and collector roadways will be incorporated within the ROW
3. Auxiliary lanes, right turn lanes, bus turn-outs and standard tapers are permitted reductions to the landscape corridors (PUE/LSE) or paseos. See Figure 7-4. Minimum landscape corridor width of 20’ shall be maintained behind bus shelters.
4. Private streets, no right-of-way dedication will be made. PUEs shall be dedicated for all public services.
5. 35’ LSE only on one side of the street.
6. As Modified Primary Residential Street Connections vary in width to accommodate turn lanes and traffic flows, they are not included in the table above
7. Curb adjacent sidewalks maybe constructed, at the direction of the Parks Department, along neighborhood park frontage.

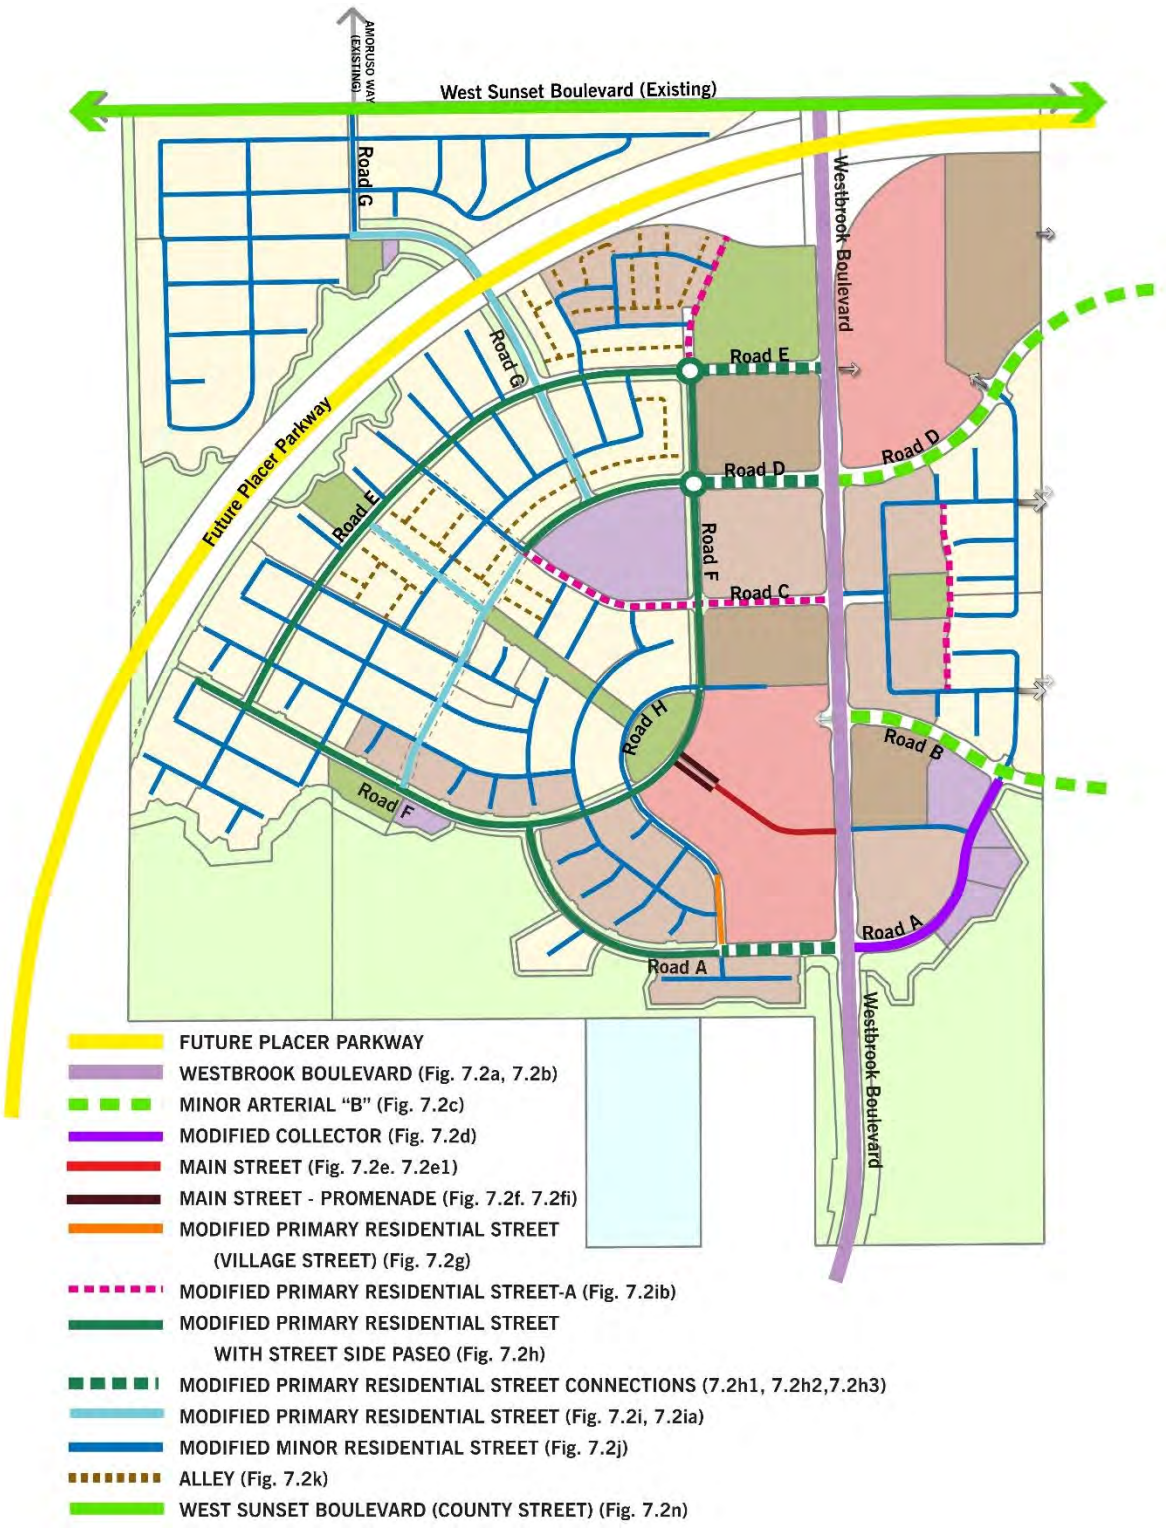

Figure 7.1 Street Hierarchy Plan (updated Octoberˢ~~May~~ 2021)

**Streets locations and types other than those indicated on the Land Use Plan are shown for illustrative purposes only.*

Arterial Roadways

Arterial roadways are primary circulation routes which provide connections between sections of the City and the regional circulation system. Arterial roadways carry relatively high traffic volumes and do not permit on-street parking. In the ARSP, arterials are either four or six lanes and include landscape medians, on-street bike lanes and adjacent landscape corridors with detached eight-foot sidewalks. The eight-foot sidewalk along the arterial streets also function as Class IA sidewalks, which provide an option for bicyclists to ride on a street separated path versus riding in the street. The ROW of the arterials will be adjusted as required to accommodate turn lanes as per the traffic report.

Westbrook Boulevard

Westbrook Boulevard provides the main access into the ARSP and upon completion will be the major north/south arterial roadway that provides connection to other major roadways in the northwestern parts of the City. Planned sections of Westbrook Boulevard currently exist in the CSP, West Roseville Specific Plan (WRSP), and the Sierra Vista Specific Plan (SVSP). When completed, Westbrook Boulevard will provide both pedestrian and vehicular traffic to the ARSP area and will provide considerations for future connectivity north to Dowd Road.

Westbrook Boulevard is planned as a 6-lane arterial roadway consistent with City Standards that consists of multiple lanes in the north and south directions, a landscaped median that also provides for left turn pockets, on-street striped bike lanes within the right-of-way, and landscaped corridors on either side. Within the landscaped corridors, public utilities easements and a Class I/IA sidewalk, which will provide pedestrian connectivity at a regional level, will be constructed. Stormwater Low Impact Development (LID) features will occur between the curb and pedestrian path in the landscaped parkway.

Westbrook Boulevard is shown in two figures to depict the roadway through the ARSP, north of Road A and south of Road A through the open space. The portion of Westbrook Boulevard south of Road A is a continuation of Westbrook as it comes north from the CSP area. This portion of Westbrook Boulevard provides a slightly reduced roadway section through the southern ARSP open space with a culvert crossing over University Creek that will be designed in accordance with the requirements of the project's 404 permit, the City of Roseville and other jurisdictional agencies.

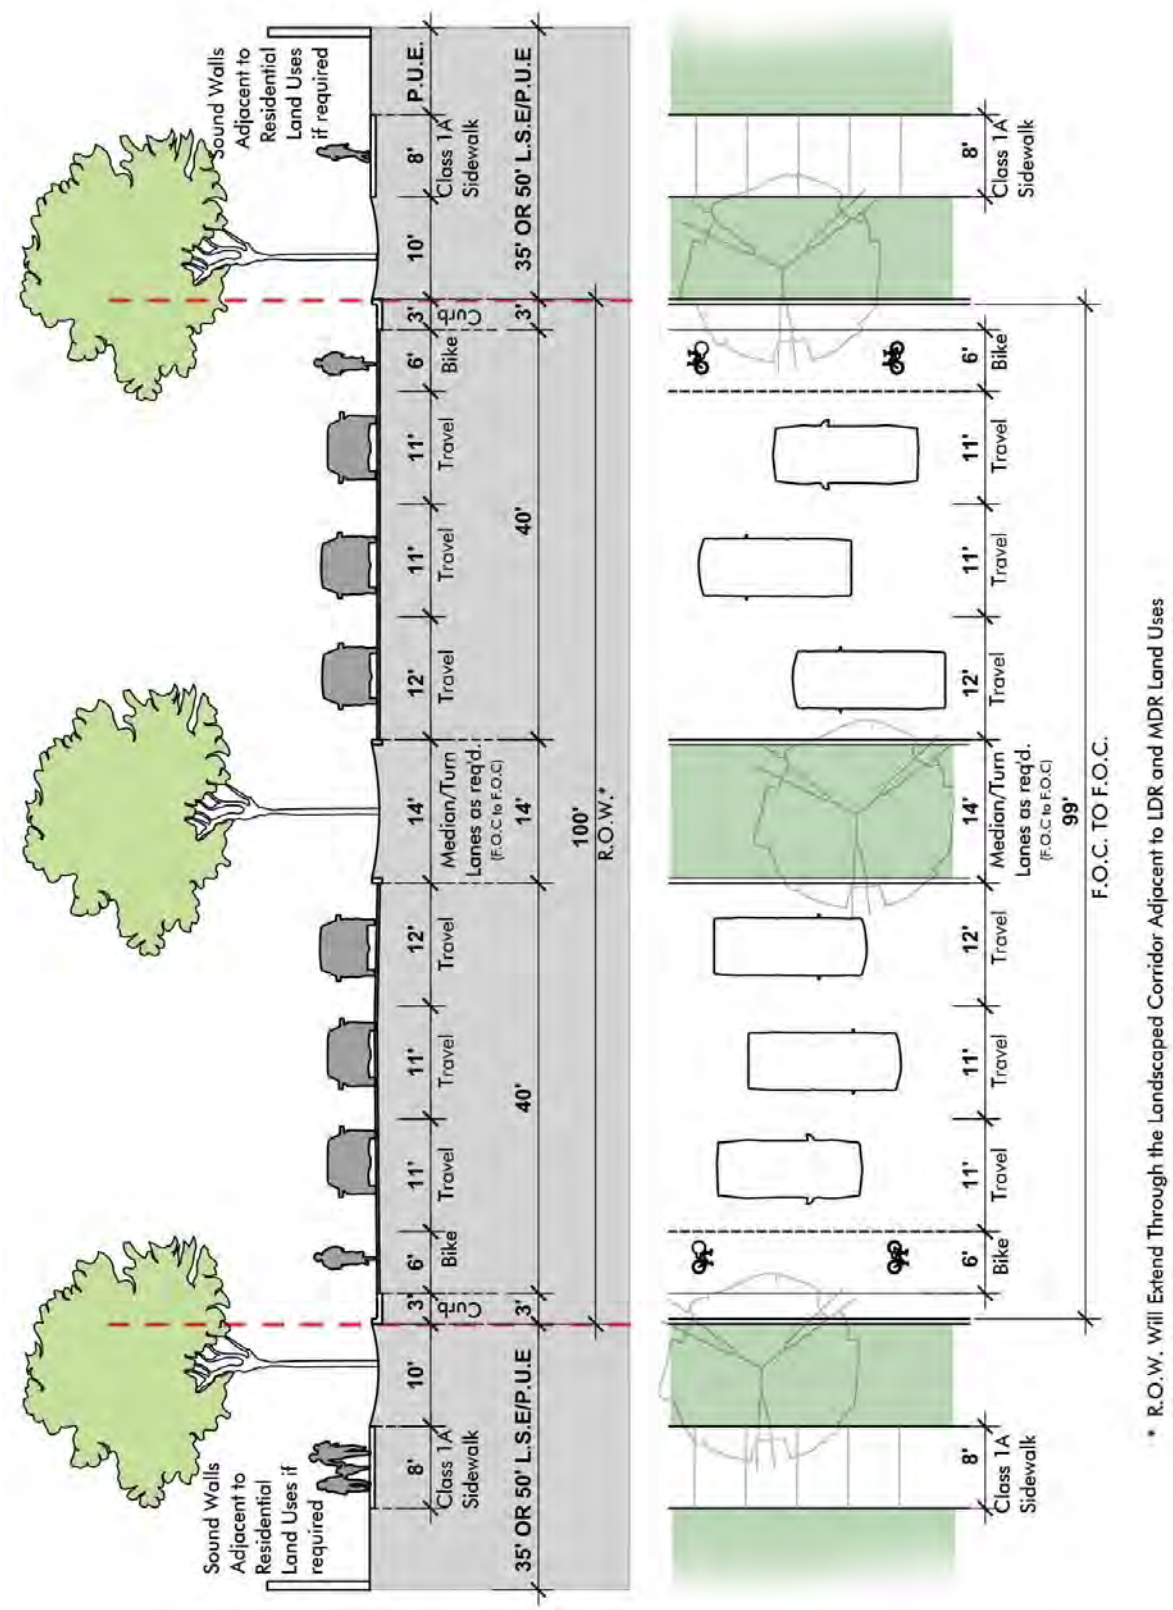

Figure 7.2a: Westbrook Boulevard – North of Road A

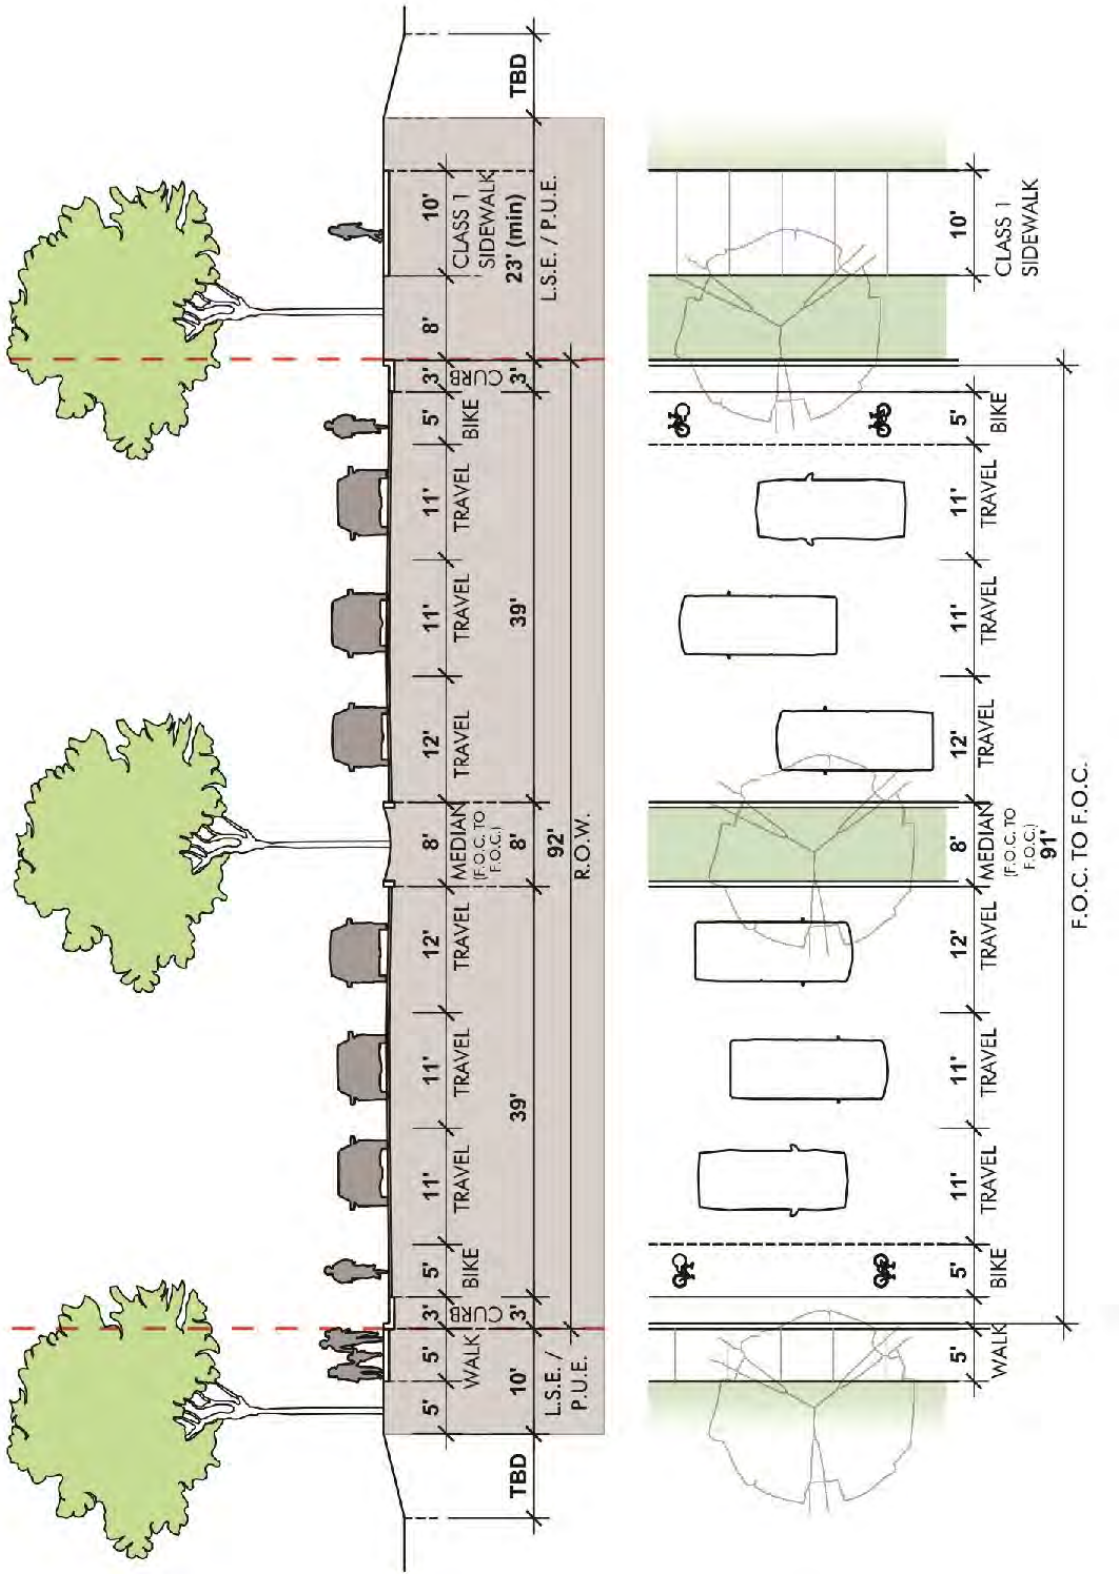

Figure 7.2b: Westbrook Boulevard – South of Road A

Minor Arterial "B"

The roadways designated as Minor Arterial "B" are planned as 4-lane minor arterial roadways consistent with City Standards and will provide local and regional east/west access to future developed properties to the east. These roadways will consist of two travel lanes with on-street striped bike lanes in each direction, separated by a landscaped median that allows for left turn pockets, within a 76-foot right-of-way. Public utilities easements occur along both sides as well as a Class IA sidewalk within a landscape corridor. Stormwater LID facilities may be located within the landscaped parkway between the curb and the pedestrian path.

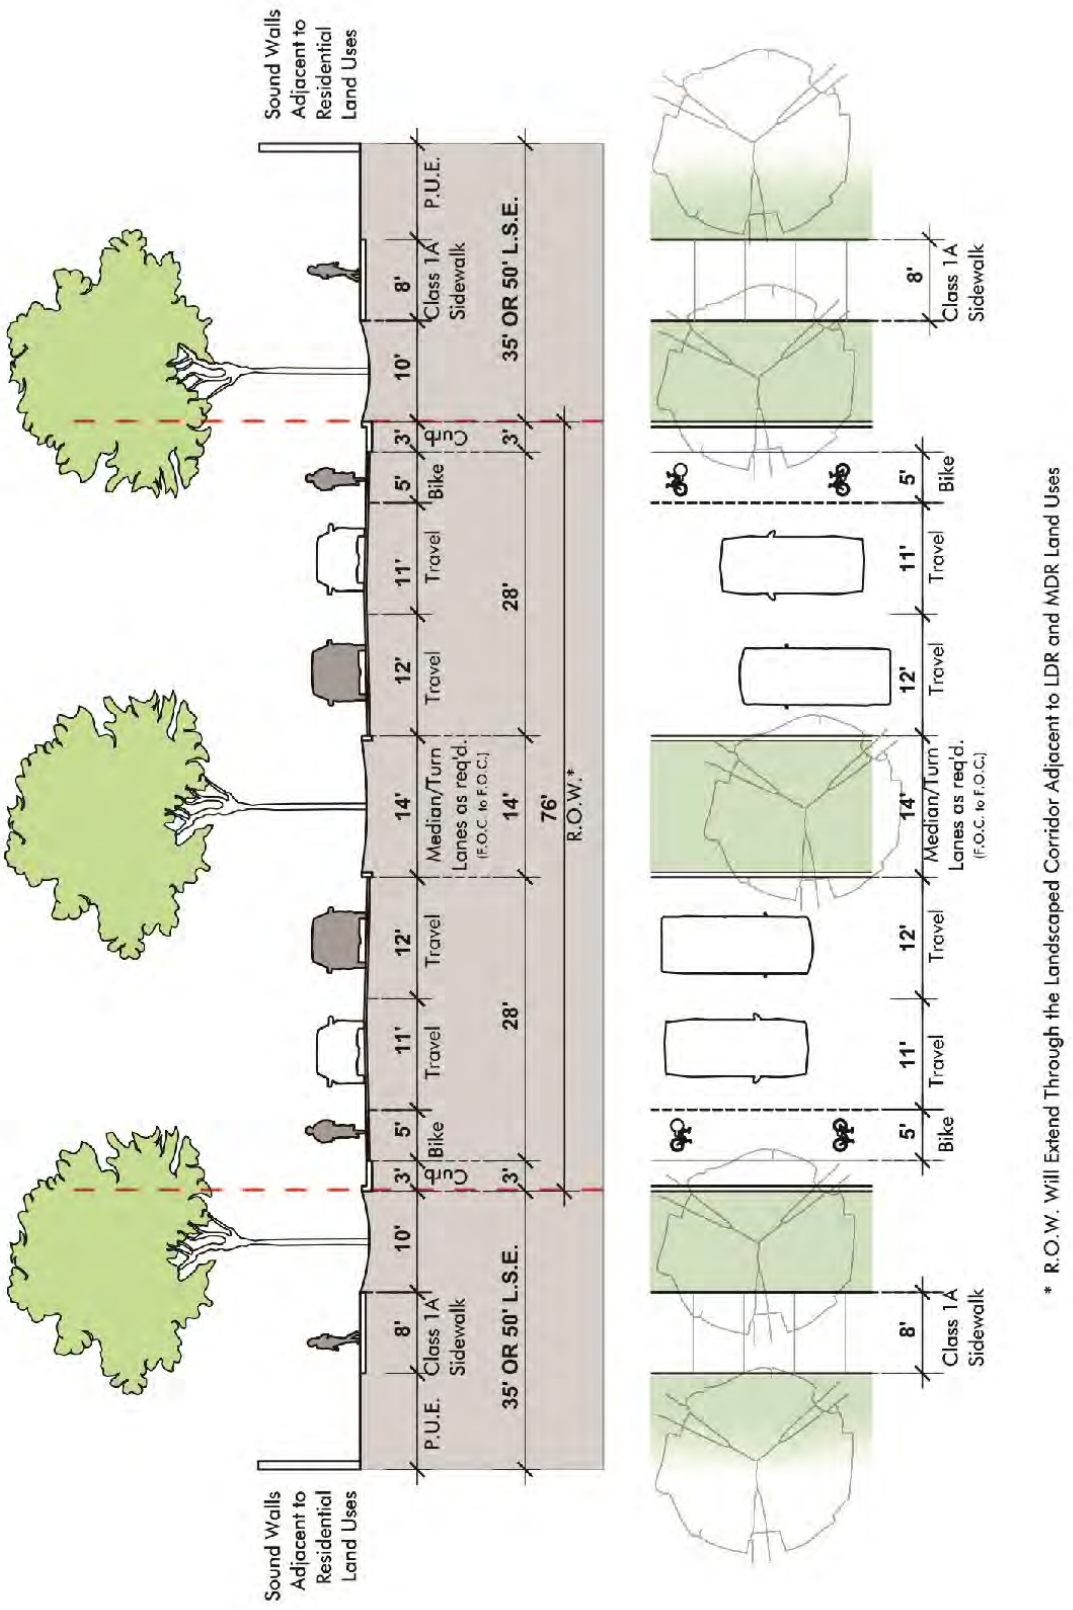

Figure 7.2c: Minor Arterial "B"

Collector Roadways

Collector roadways are secondary routes which generally distribute trips from the arterial street system to the local street system. Consistent with City Standards, the collector roadways within the ARSP, will provide two travel lanes and on-street Class II bike lanes. Where collector roadways intersect with arterial roads at signalized intersections, dedicated turn lanes will be constructed to accommodate vehicular movements. Within ARSP, travel lanes for collector roadways have been reduced and landscape corridors have been provided in order to promote traffic calming, reduce travel speed, and to create a more pedestrian friendly community. The ROW of collector roadways will be adjusted as required to accommodate turn lanes as per the traffic report.

Modified Collector

The Modified Collector provides for one travel lane and on-street striped bike lanes in each direction, separated by a striped center turn lane along with a landscaped parkway and sidewalk or pedestrian path on each side, within a 48-foot right-of-way. On the north side, a public utilities easement includes a sidewalk and landscaped parkway. On the south side, a public utilities easement/ landscape easement, and a Class IA sidewalk all parallel the street.

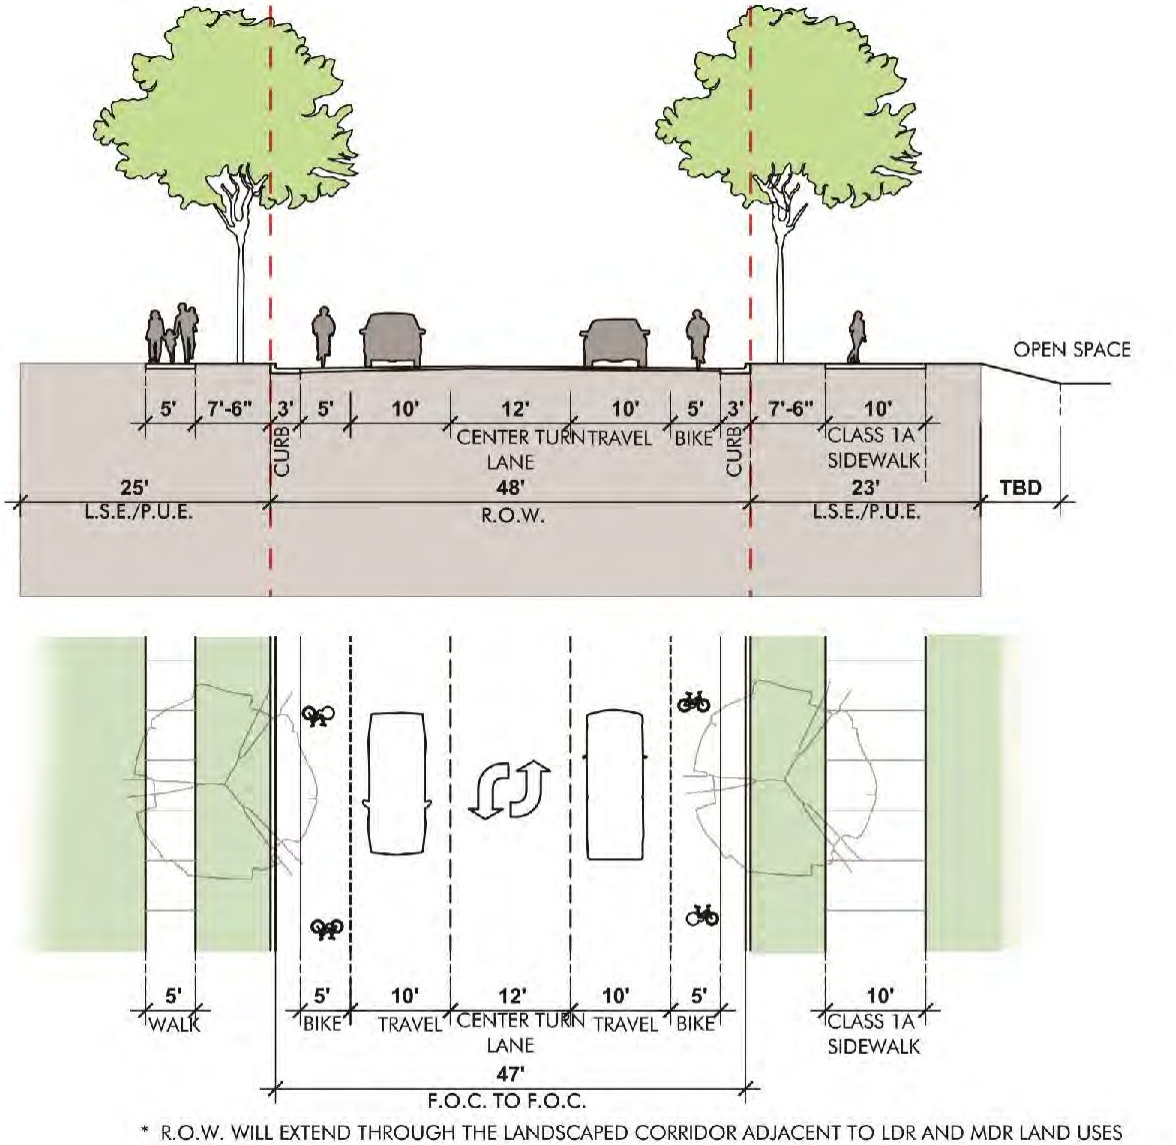

Figure 7.2d: Modified Collector

Local Roadways and Alleys

Local roadways provide direct access from the collector and arterial streets through neighborhoods to residential units. The typical standard for a local street, within the ARSP, includes two travel lanes with space for on-street parallel parking and a detached sidewalk. The ARSP provides several types of local roadway, depending on the location and the desired interface between land uses and the roadway system.

Main Street

The Main Street is a private street, which creates the organizational element for the Village District. It is a low speed urban street that includes landscaping and hardscape appropriate to an urban setting.

The Main Street consists of one travel way in each direction. Where parking is provided, it may be on either or both sides of the street. Parking may be provided in parallel parking bays, or as angled parking. Additional sections are discussed in Appendix A. The flexibility in this section is intended to allow for a variety of solutions that will lead to the most successful Village District. Street widths at intersections are reduced as a traffic calming measure and to shorten the walking distance for pedestrians. Street trees are located in tree wells with grates. In order to preserve the pedestrian experience, utilities are anticipated to be located behind the buildings, and not along the Main Street.

Buildings are setback from the right-of-way as described in Appendix A, Development Standards.

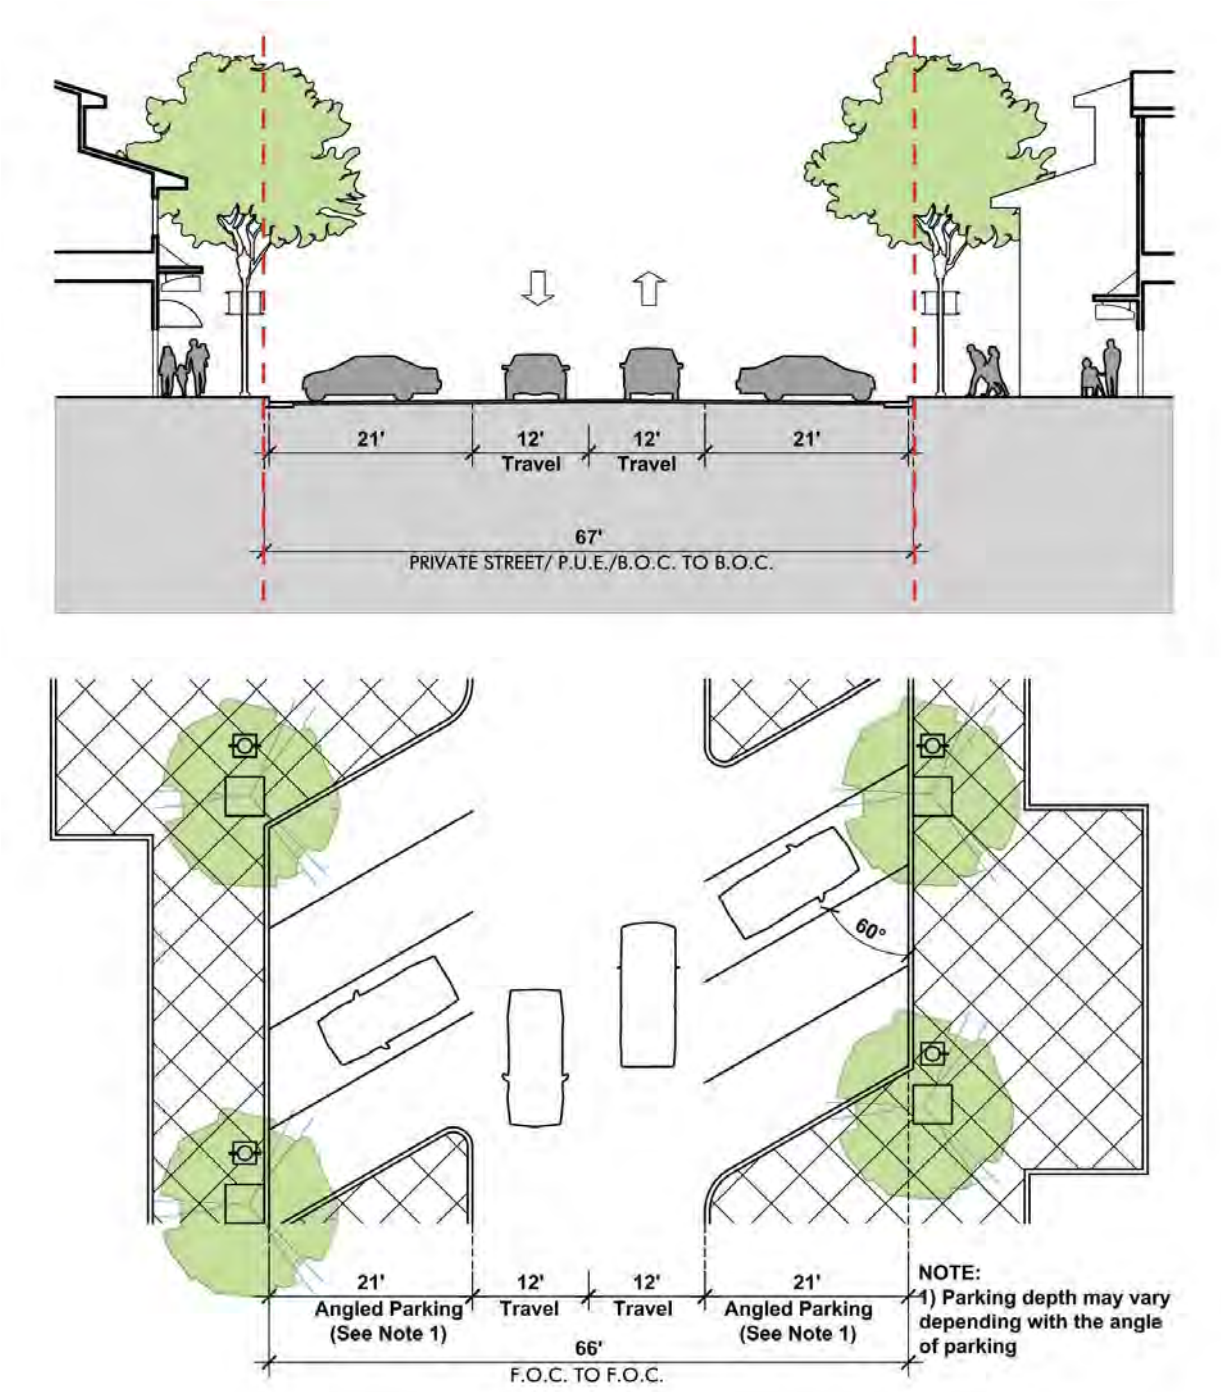

Figure 7.2e: Main Street (Private Street)

The figure below illustrates a typical intersection for the Main Street. The use of bulb outs at intersections helps reduce the speed of traffic, reduces the distance to be traversed by the pedestrian and also provides a safe refuge area for the pedestrian at the intersection.

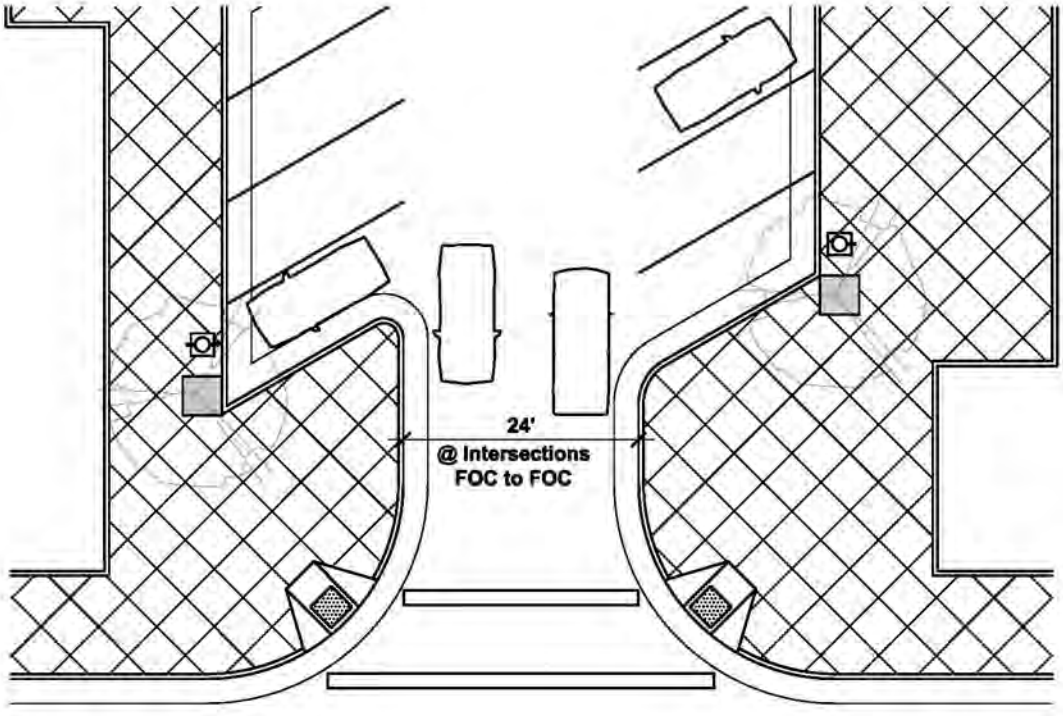

Figure 7.2e1: Main Street Intersection

Main Street Promenade

The Main Street Promenade is a private street - an extension of the Main Street. It is intended to be lined with retail, mixed-use, live-work, or row townhomes and function similar to a plaza where pedestrians share the roadway space for special events. It may be closed off to automobile traffic for special events such as a farmers market, art walk or street fair with an approved traffic control plan and encroachment permit issued by the City.

The Main Street Promenade consists of two vehicular travel ways separated by a wide median. The section includes parallel parking bays on both sides. While each travel way is 20-feet wide, the portion adjacent to the median is constructed with special paving such as pavers or stamped concrete. This mountable portion is designed for the heavy loads of emergency response vehicles and provides for a drivable surface if needed, but visually narrows the road area and reinforces the pedestrian focus of the street. The median and the roadway can function as a plaza, with hard-surface seating and landscaped areas. This median may contain kiosks and small retail establishments. Street widths at intersections are reduced, eliminating the parking bay, to shorten the crossing for pedestrians.

Sidewalks adjacent to the street are expected to fill the setback from the face of the building to the right-of-way, with the exception of special landscaped areas. Street trees are placed in tree grates.

Buildings are set back as described in Appendix A, Development Standards.

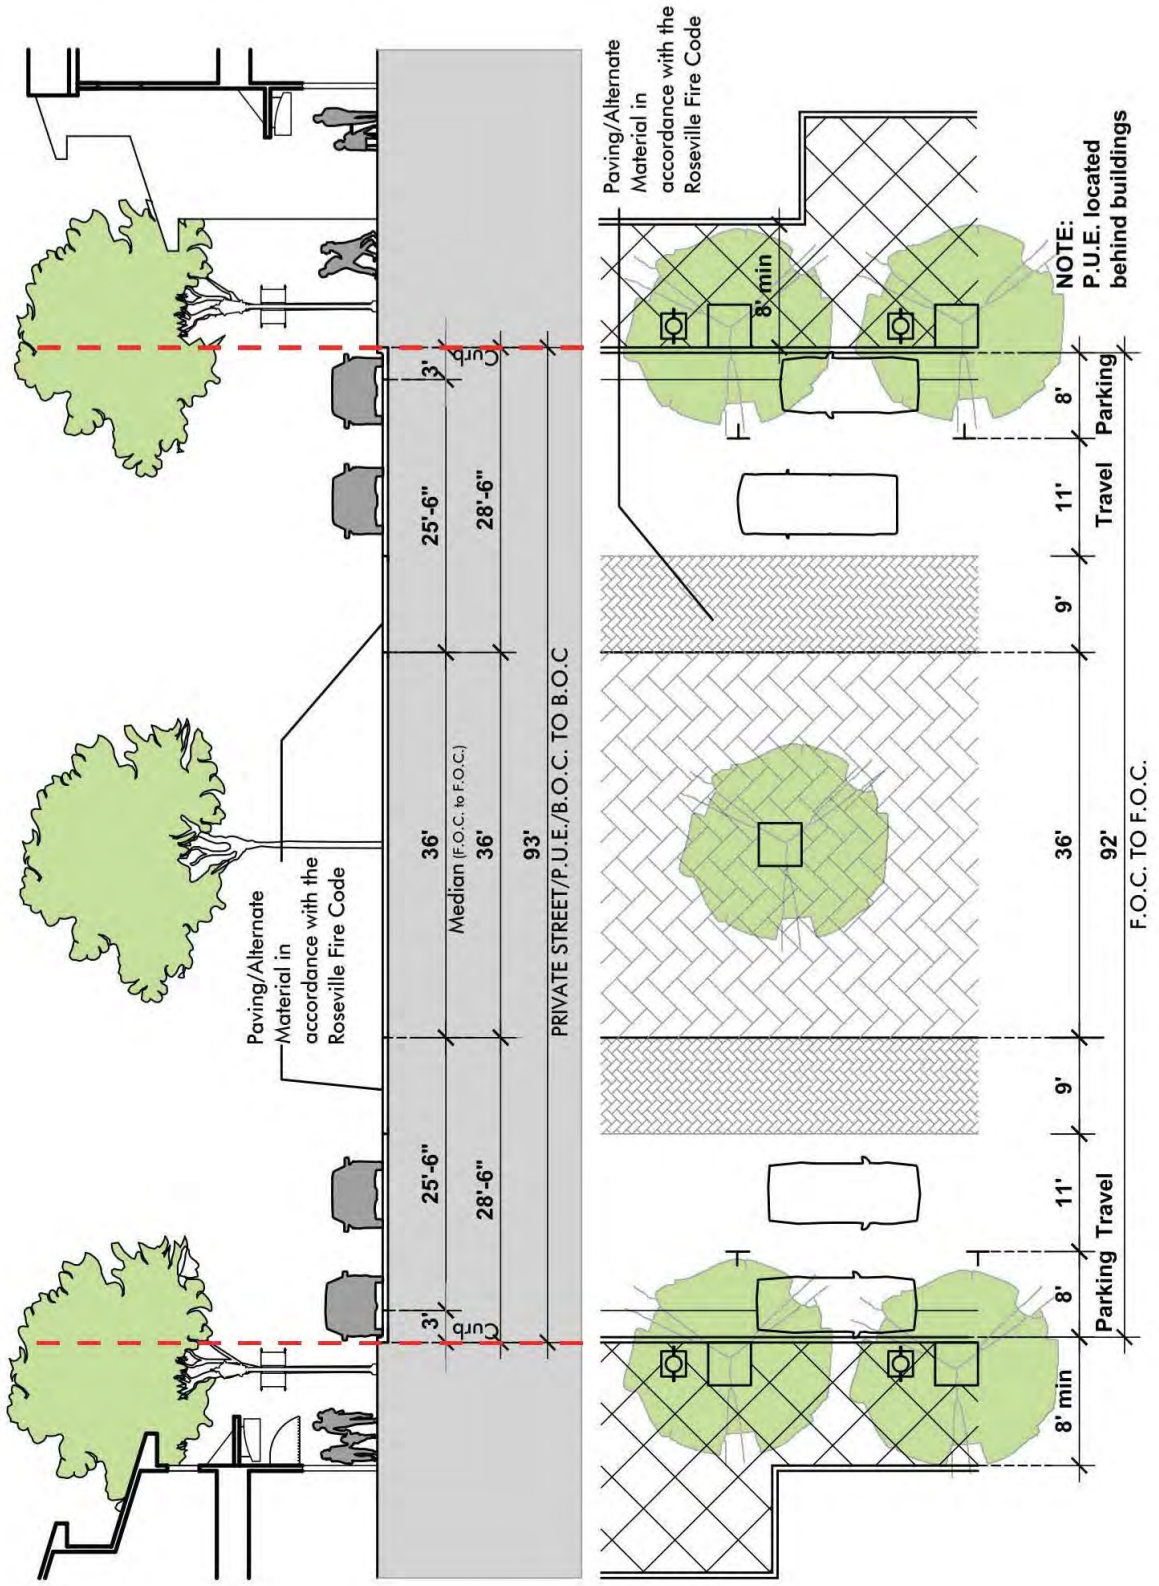

Figure 7.2f: Main Street Promenade (Private Street)

The figure below illustrates a typical intersection for the Main Street Promenade. The use of bulb outs at intersections helps reduce the speed of traffic, reduces the distance to be traversed by the pedestrian and also provides a safe refuge area for the pedestrian at the intersection.

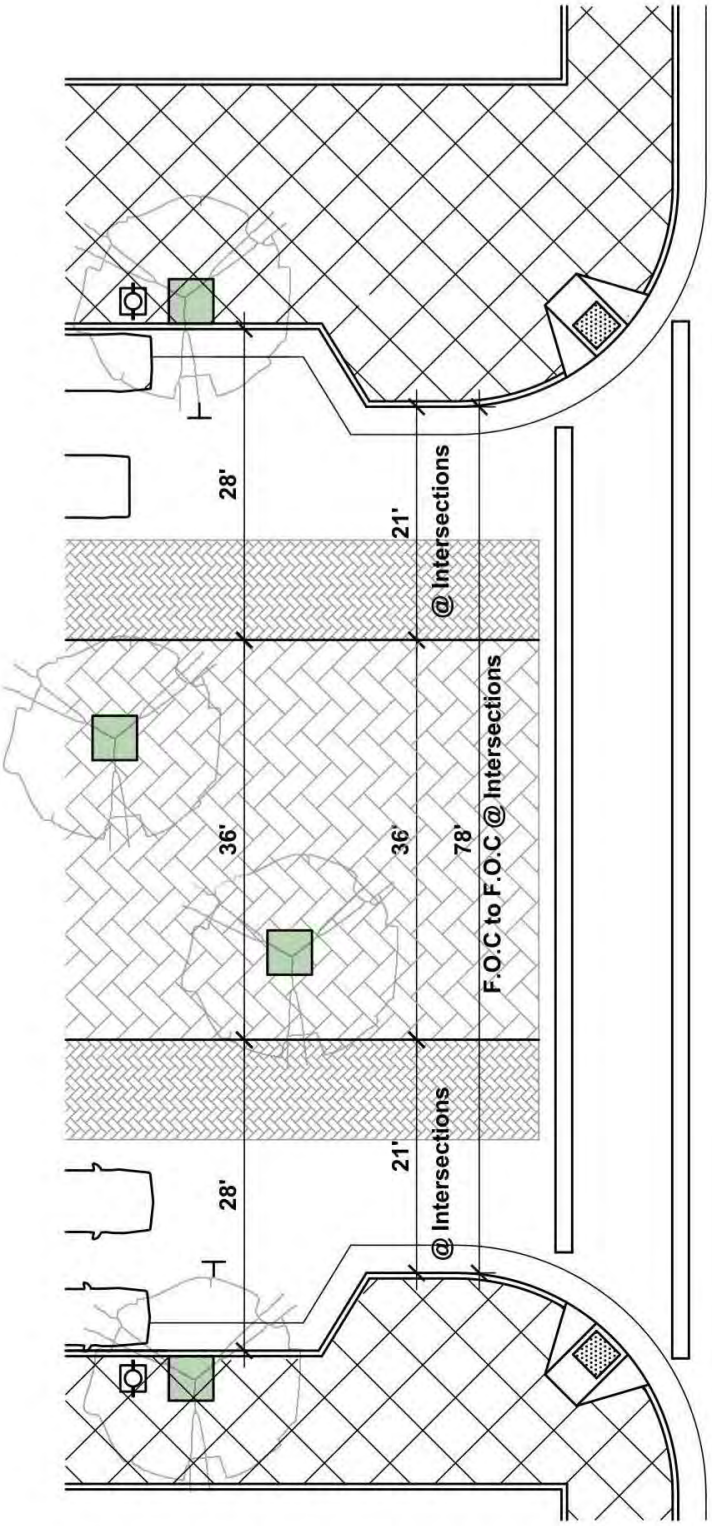

Figure 7.2f1: Main Street Promenade Intersection

Modified Primary Residential Street - Village Street

Modified Primary Residential Streets - Village Street are internal streets that serve the Village District and connect it to the residential areas. Modified Primary Residential Streets – Village Streets consist of one travel lane in each direction and on-street parallel parking on both sides in designated parking bays. Width at street intersections and between parking bays is reduced as a traffic calming measure and to shorten the walking distance for pedestrians.

Sidewalks are provided on each side. At a minimum, five foot sidewalks are provided on both sides and separated from the parking areas by a parkway strip where appropriate. Where roadways are adjacent to mixed-use or retail buildings, the sidewalk is permitted to extend from the back of curb to the face of the building and the street trees accommodated within tree grates. Where commercial uses front the street, it is anticipated that utilities will be provided at the back of the property or in parking lots at the side of the buildings.

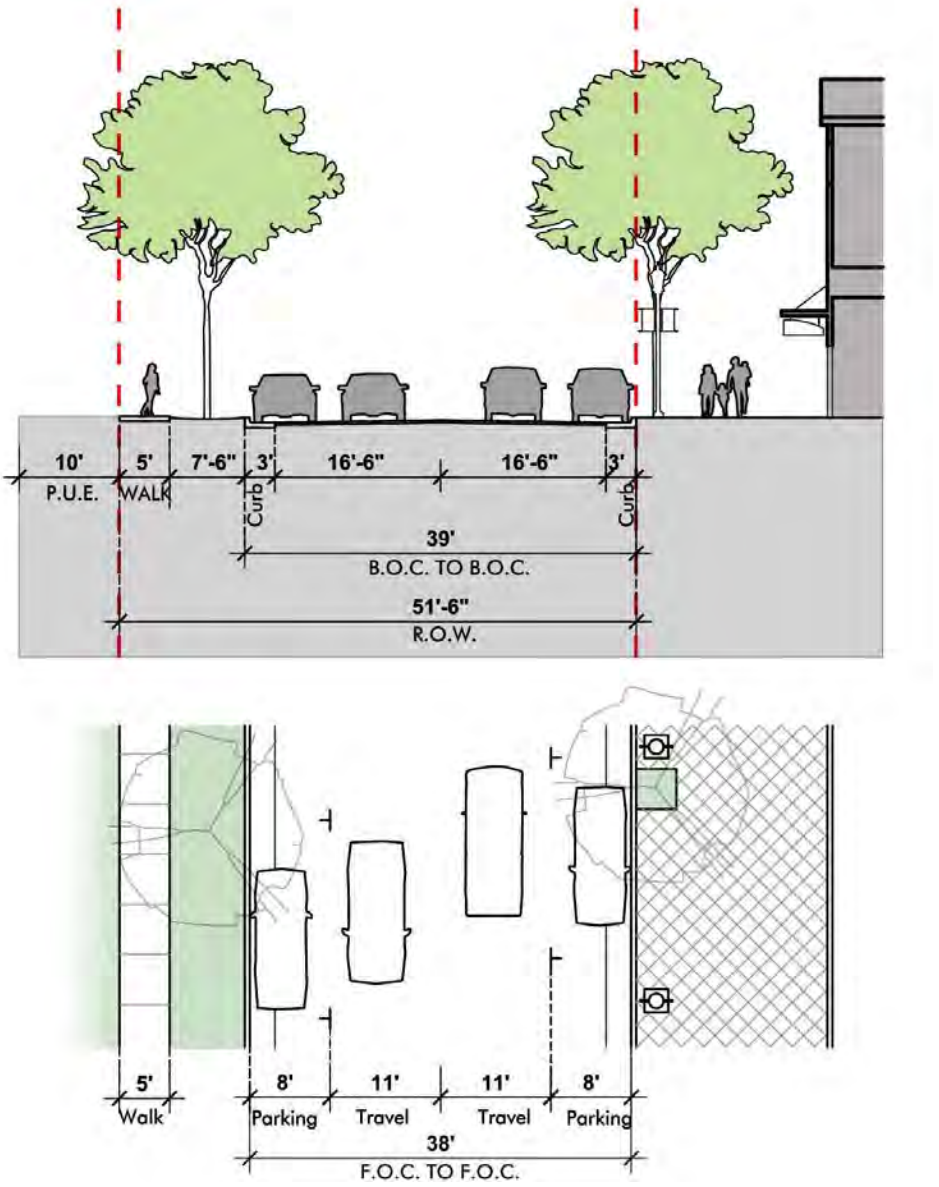

Figure 7.2g: Modified Primary Residential Street – Village Street

Modified Primary Residential Street with Streetside Paseo

The Modified Primary Residential Street with Streetside Paseo provides exceptional bicycle and pedestrian linkages to the Village District and park sites within the community.

The Modified Primary Residential Street with Streetside Paseo consists of one travel way in each direction and parallel parking on both sides in designated parking bays. Width at street intersections, and between parking bays, is reduced as a traffic calming measure and to shorten the walking distance for pedestrians.

A detached 5-foot wide sidewalk and 7.5-foot landscaped parkway is provided on one side of the street, with a 35-foot wide streetside paseo, including a detached 10-foot wide Class IA sidewalk on the other. The 10-foot wide Class IA sidewalk provides a safe route for recreational biking separated from vehicular traffic. Direct vehicular access and driveway cuts are not permitted to residential lots from the paseo side of the street which will have a vertical curb. Where alleys and streets cross the paseo, traffic calming measures will be considered as identified in Figures 7.7A, 7.7B and 7.7C. The landscape areas may contain rain gardens and other low impact ways of accommodating storm water.

Where adjacent to a park or school, the roadway width will be increased to a back of curb to back of curb dimension of 38-feet and the sidewalk location may vary to be incorporated into the design of the park. Within 250-feet of where these streets intersect with arterial roadways, additional dedicated turn lanes will be constructed and parking restrictions will limit parking.

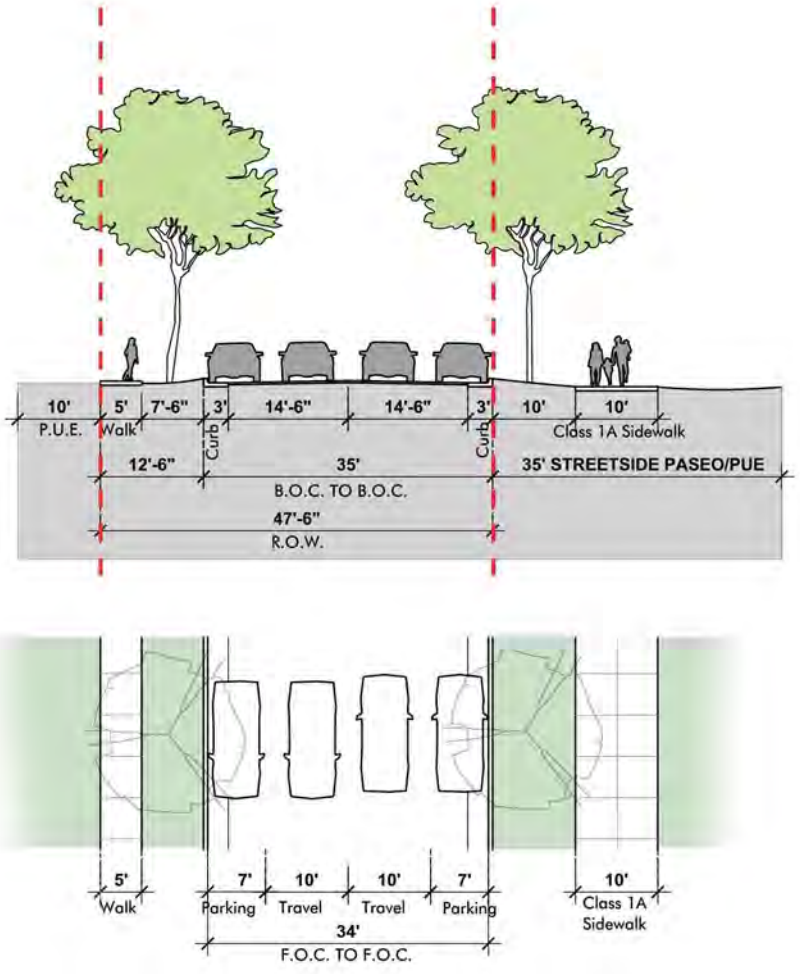

Figure 7.2h: Modified Primary Residential Street with Streetside Paseo

Modified Primary Residential Street Connections

The Modified Primary Residential Street Connections connect the Modified Primary Residential with Street Side Paseo to Westbrook Boulevard. Since these streets will need to be modified to accommodate higher volumes of traffic where they connect to Westbrook Boulevard, the travel lanes, widths and medians will vary. The plans below illustrate the adjustments to the streets (Road A, Road D, and Road E) that will be made to accommodate the change in traffic conditions.

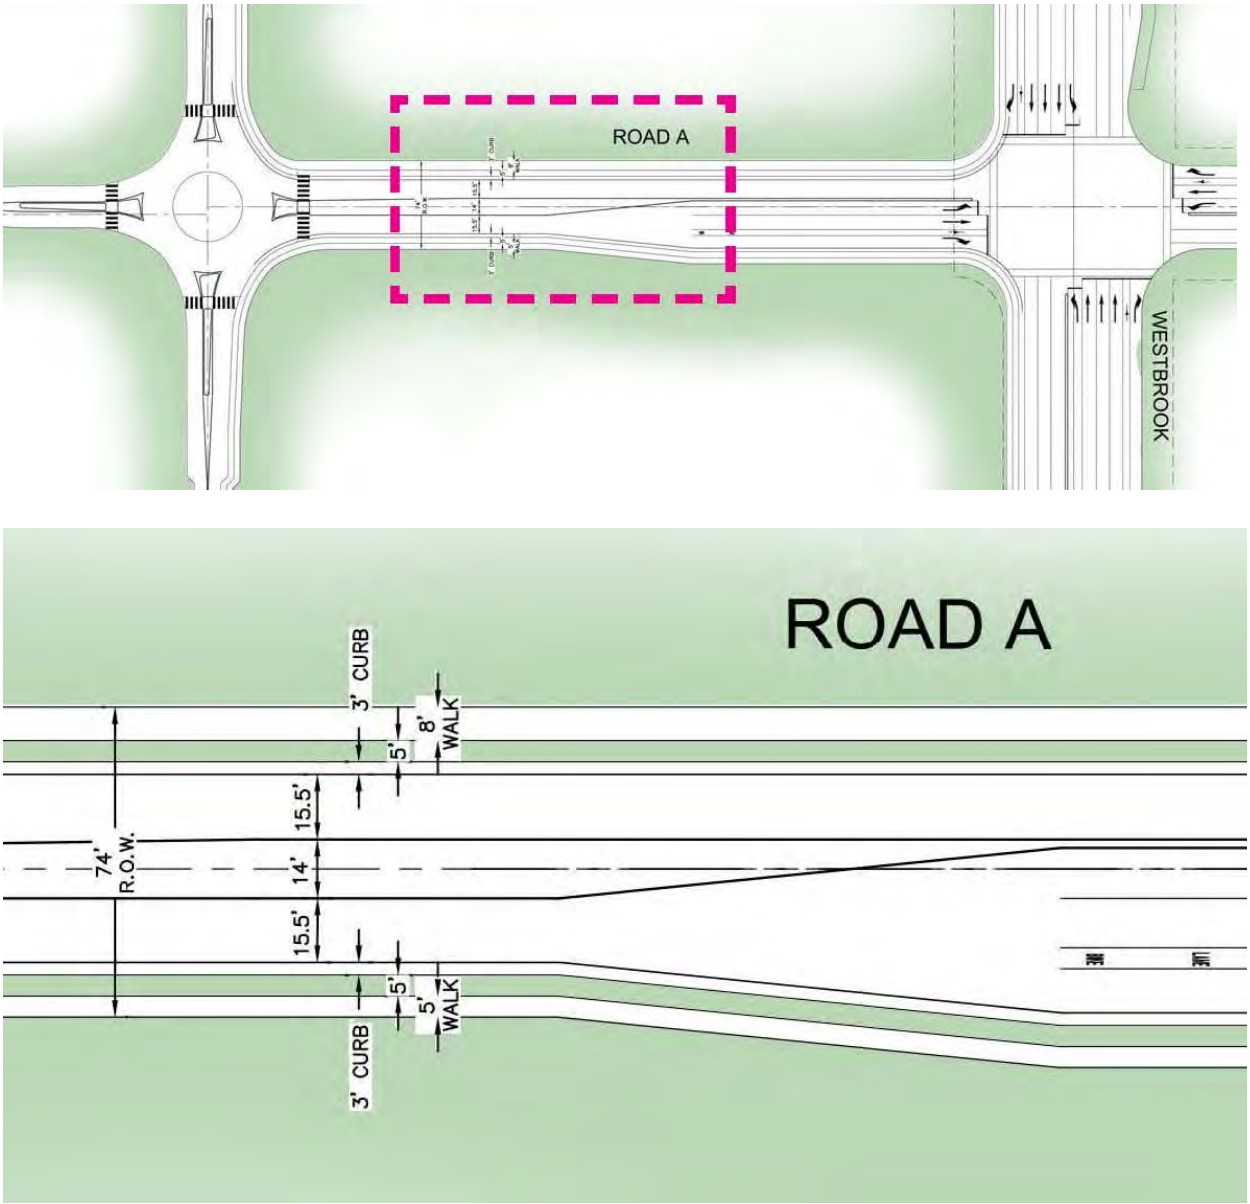

Figure 7.2h1: Modified Primary Residential Street Connections – Road A (Plan and Enlargement)

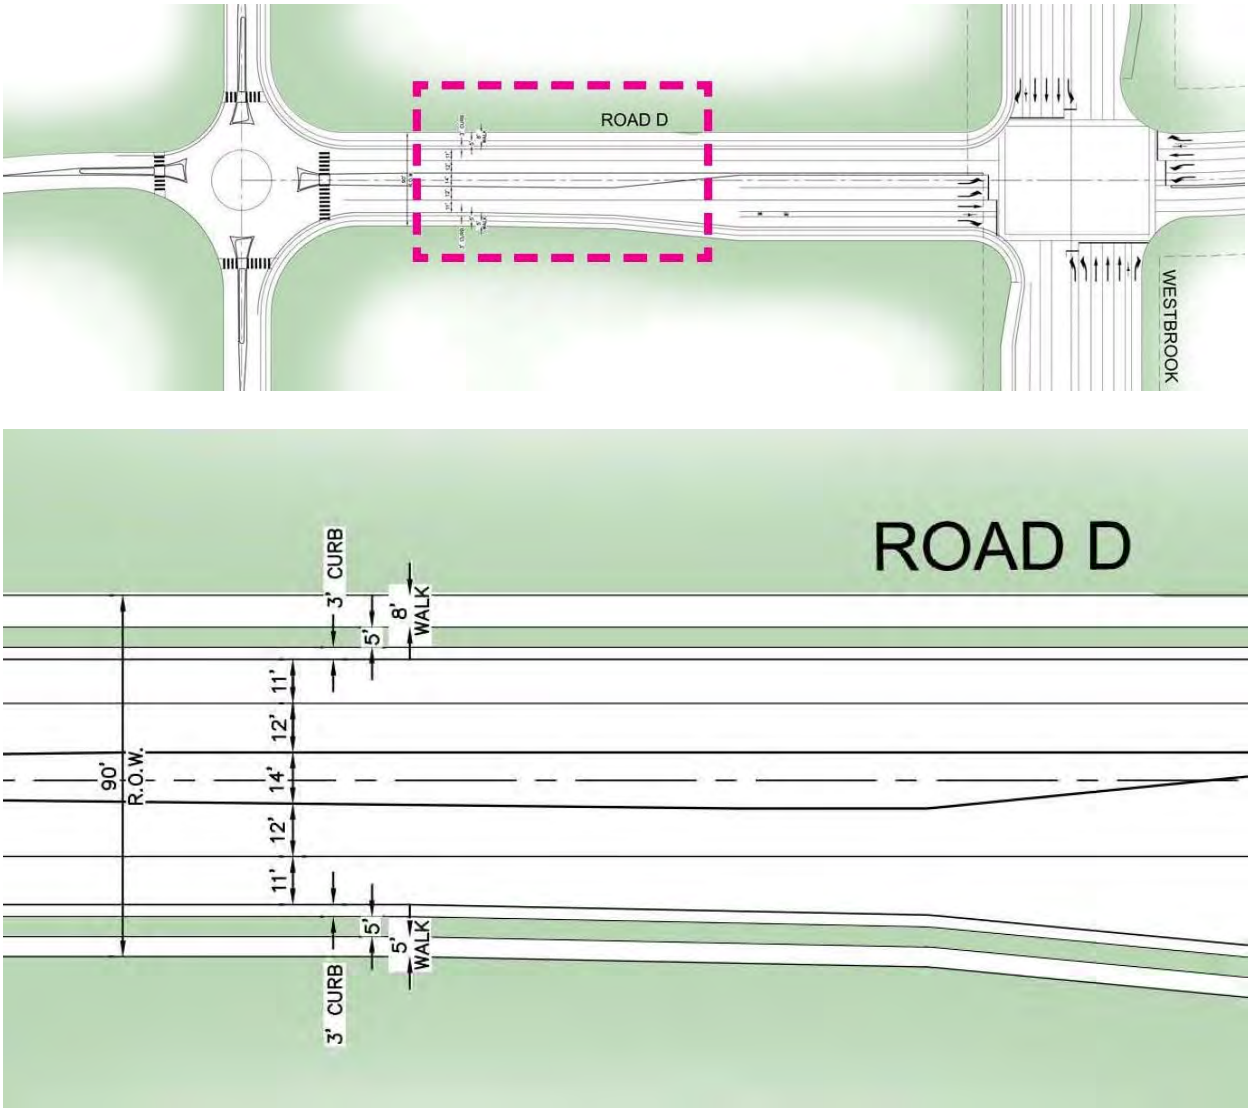

Figure 7.2h2: Modified Primary Residential Street Connections – Road D (Plan and Plan Enlargement)

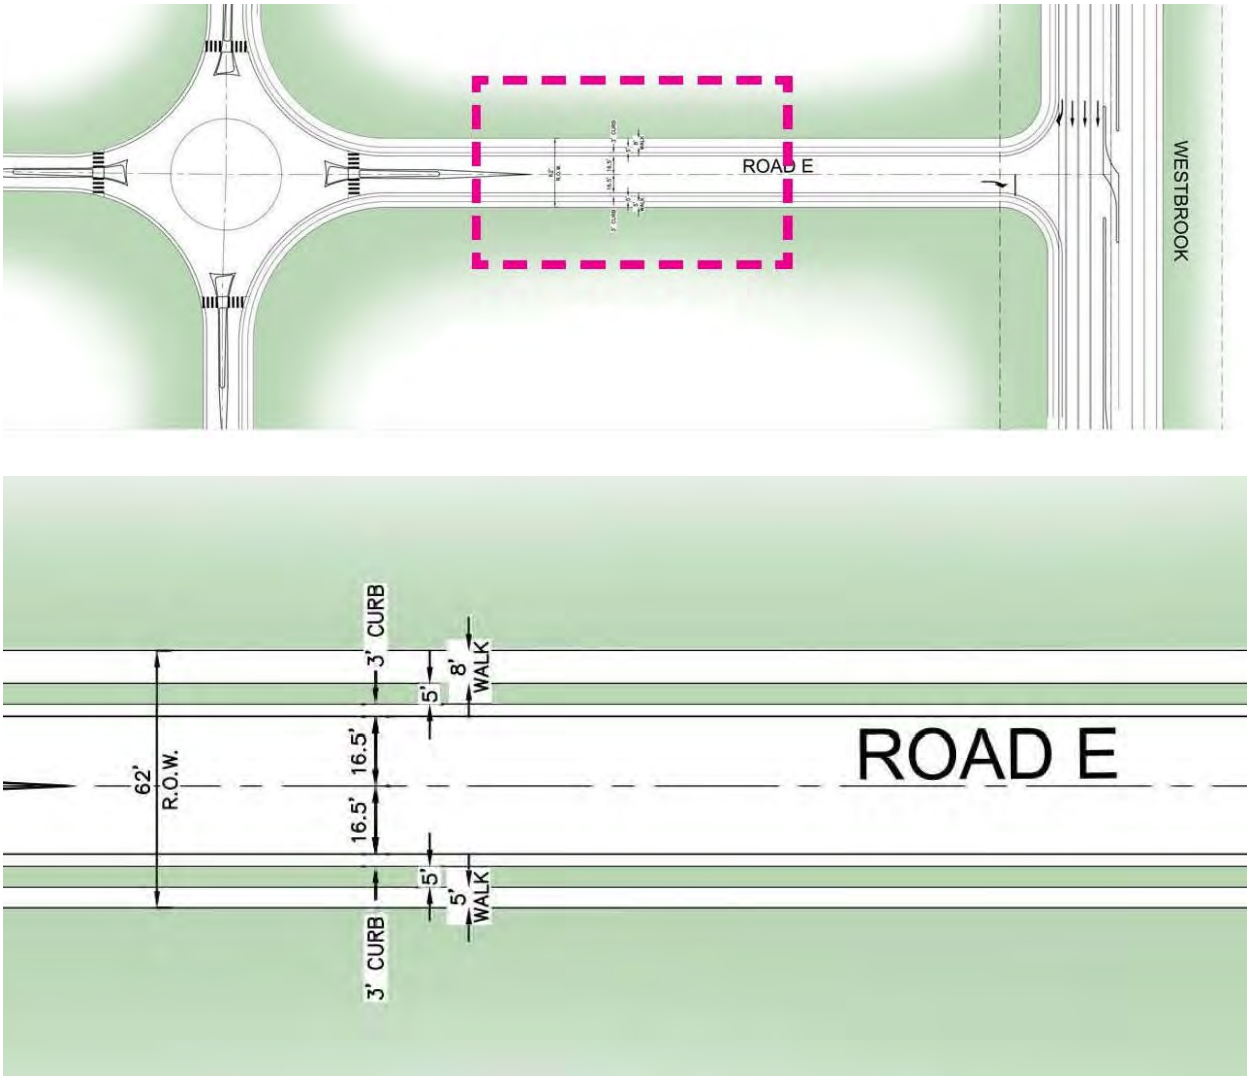

Figure 7.2h3: Modified Primary Residential Street Connections – Road E (Plan and Plan Enlargement)

Modified Primary Residential Street
Modified Primary Residential Streets link the neighborhoods together and to the rest of the community.

These streets consist of one travel lane in each direction and on-street parallel parking on both sides in designated parking bays. Width at street intersections, and between parking bays, is narrowed as a traffic calming measure and to shorten the walking distance for pedestrians.

A detached 10-foot wide Class IA sidewalk and a 7.5-foot landscaped parkway is provided on one side of the street to accommodate both bikes and pedestrians while the other side has a detached 5-foot wide sidewalk and a 7.5-foot landscape parkway. Direct driveway access is restricted across the 10-foot Class IA sidewalk and a vertical curb will be constructed. The landscape areas may contain areas for rain gardens and other low impact ways of accommodating storm water.

Where a Modified Primary Residential Street meets Westbrook Avenue, additional right and left turn lanes may be required.

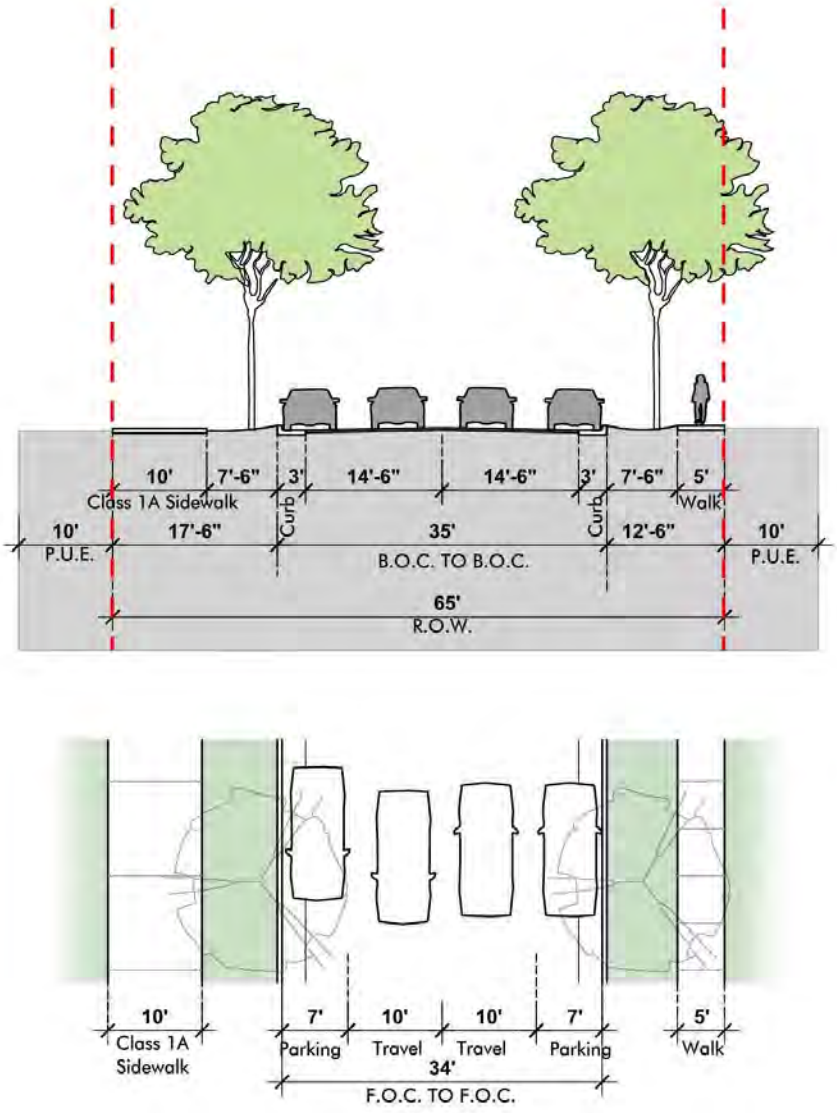

Figure 7.2i: Modified Primary Residential Street

Modified Primary Residential Street at Placer Parkway

Where this street type crosses under Placer Parkway, parking will be restricted and the pavement width can be narrowed to eliminate the parking lanes (back of curb to back of curb dimension of 30-feet). In this section the landscape parkways will be removed and travel lanes will be increased to 12-feet. 8-foot wide curb adjacent Class IA sidewalk shall provide pedestrian and bike access as illustrated in Figure 7.2ia.

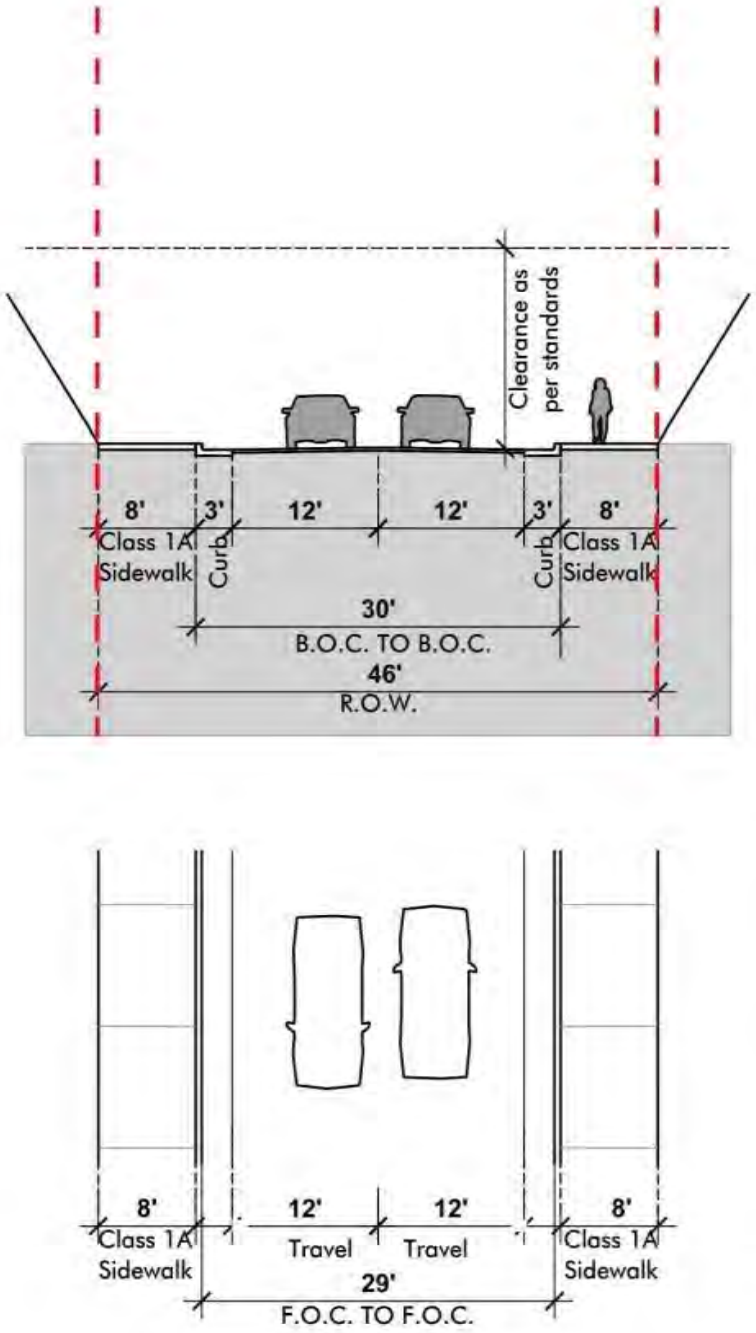

Figure 7.2ia-1: Modified Primary Residential Street at Placer Parkway

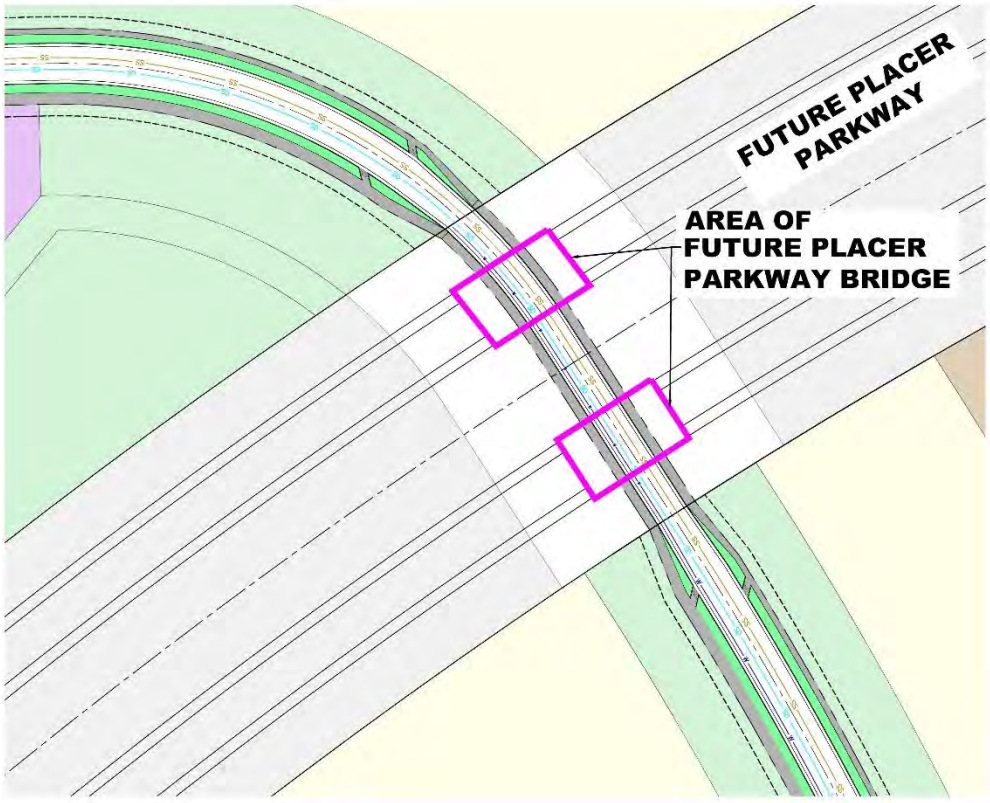

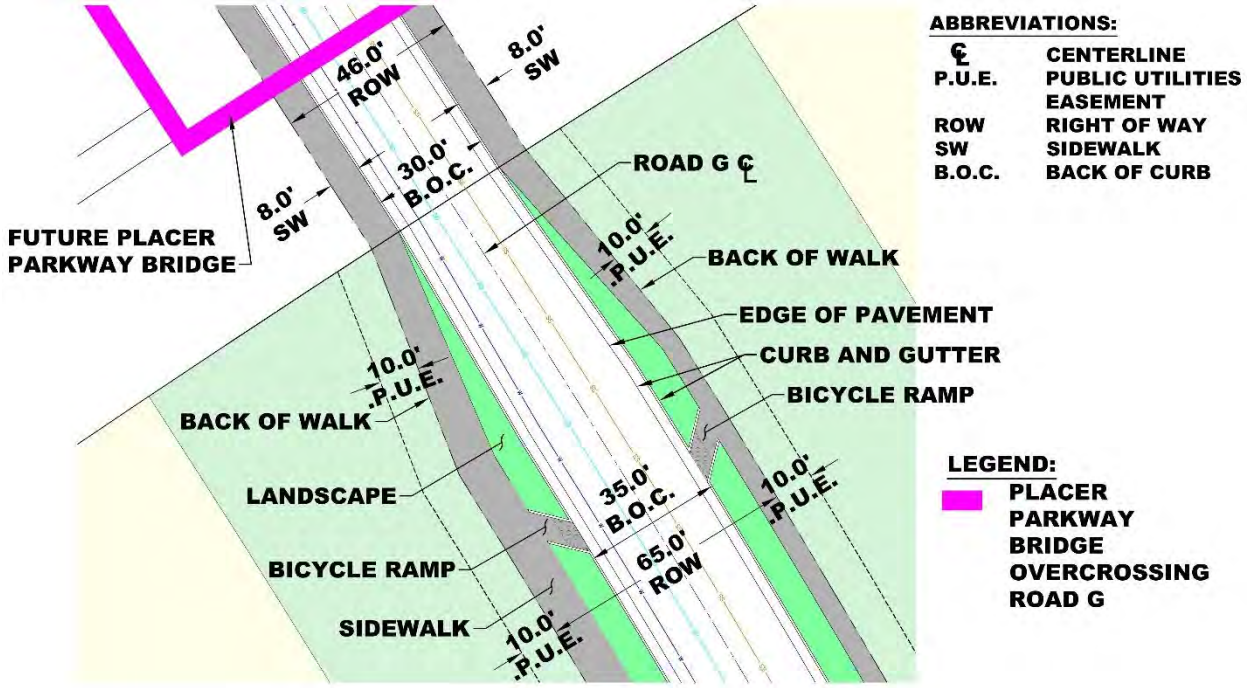

Figure 7.2ia-2: Modified Primary Residential Street at Placer Parkway (Plan and Enlargement)

Modified Primary Residential Street - A

Modified Primary Residential Street - A are streets located adjacent to the school and the parks at AR-62 and AR-67 are slightly wider the internal residential streets. This extra width accommodates the larger volume of traffic on these streets.

A detached 5-foot wide sidewalk and a 5-foot landscaped parkway is provided on both sides of the street. The streets consist of one 11-foot travel lane in each direction and 8-foot on-street parking on both sides in designated parking bays. Width at street intersections, and between parking bays, is narrowed as a traffic calming measure and to shorten the walking distance for pedestrians.

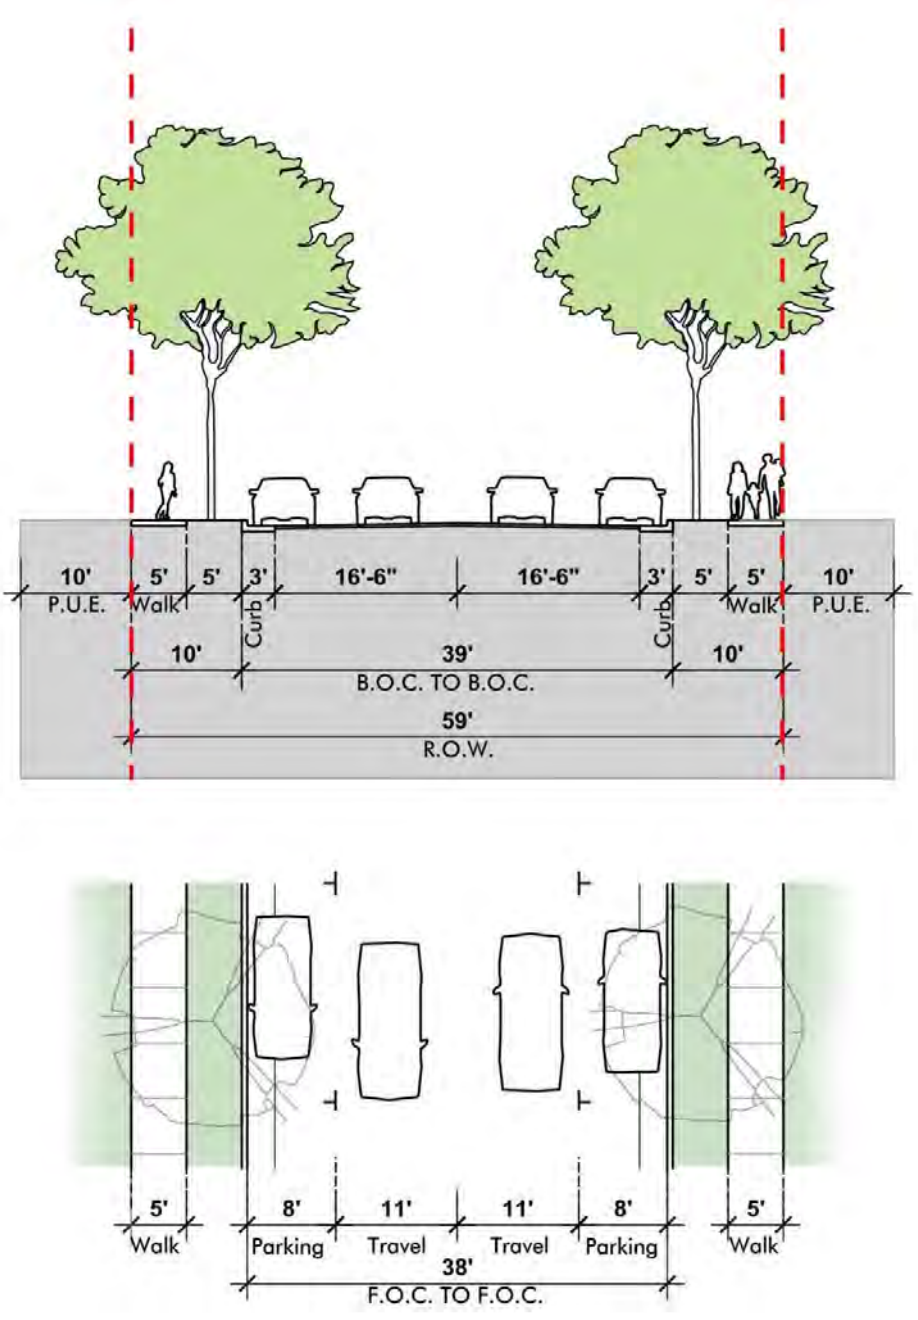

Figure 7.2ib: Modified Primary Residential Street-A

Modified Minor Residential Street

Modified Minor Residential Streets are internal streets, the primary purpose of which is to provide access between individual residences out to the regional network. These are low-volume streets.

Modified Minor Residential Streets consist of one travel lane in each direction and on-street parking along both sides of the street. Width at street intersections and between parking bays is reduced as a traffic calming measure and to shorten the walking distance for pedestrians.

5-foot wide detached sidewalks are provided on both sides of the street and separated from the back of the curb with a 5-foot wide landscaped parkway. Direct vehicular access is permitted from residential lots to the street. Where neighborhood streets cross the Crossing Park or Paseos, the on-street parking is eliminated so that the street is narrowed with wider landscaped parkways and easier pedestrian crossing. Within 250-feet of where these streets intersect with arterial roadways, additional dedicated turn lanes will be constructed, and parking restrictions will limit parking.

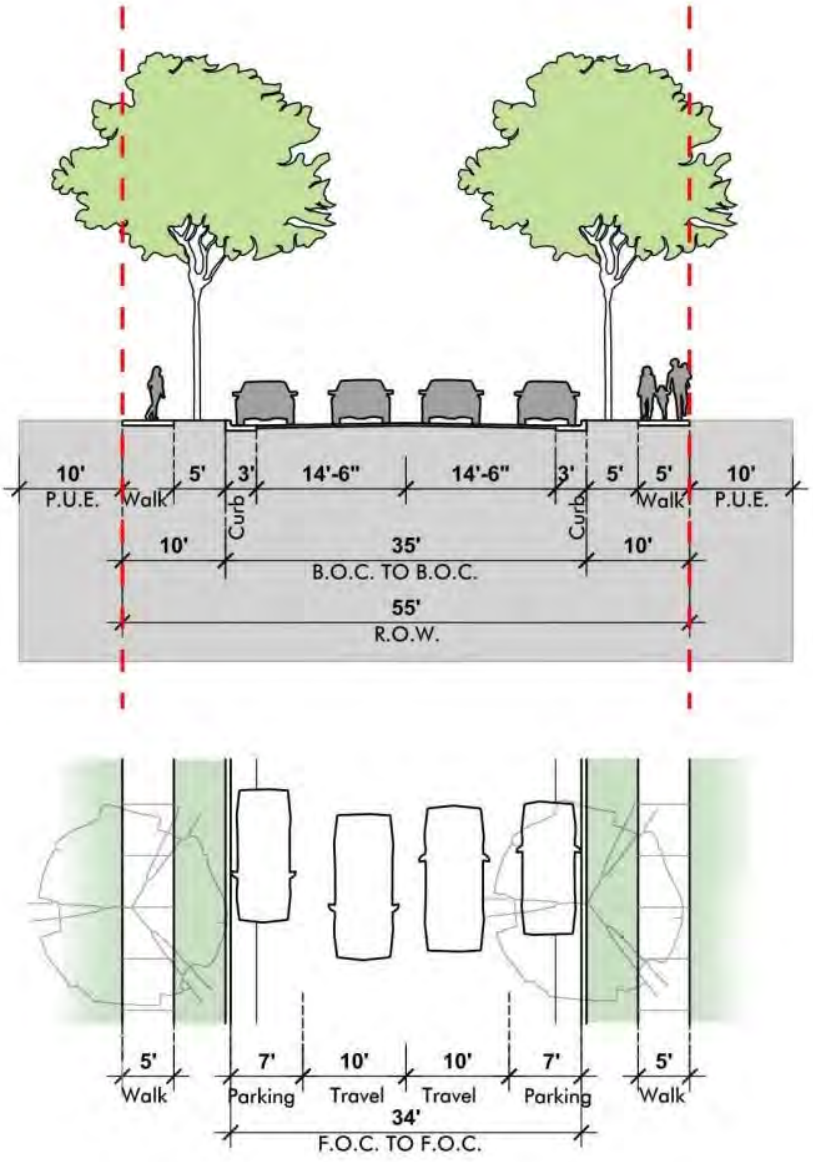

Figure 7.2j: Modified Minor Residential Street

Alley

Alleys are used to provide automobile access and service areas for residential lots with rear-loaded garages. The design standard for the alley provides a 26-foot wide paved area that allows two-way travel. Alley aprons may vary. Perpendicular and parallel parking is permitted within restricted areas outside the curbed areas. City of Roseville Fire Department standards will be met.

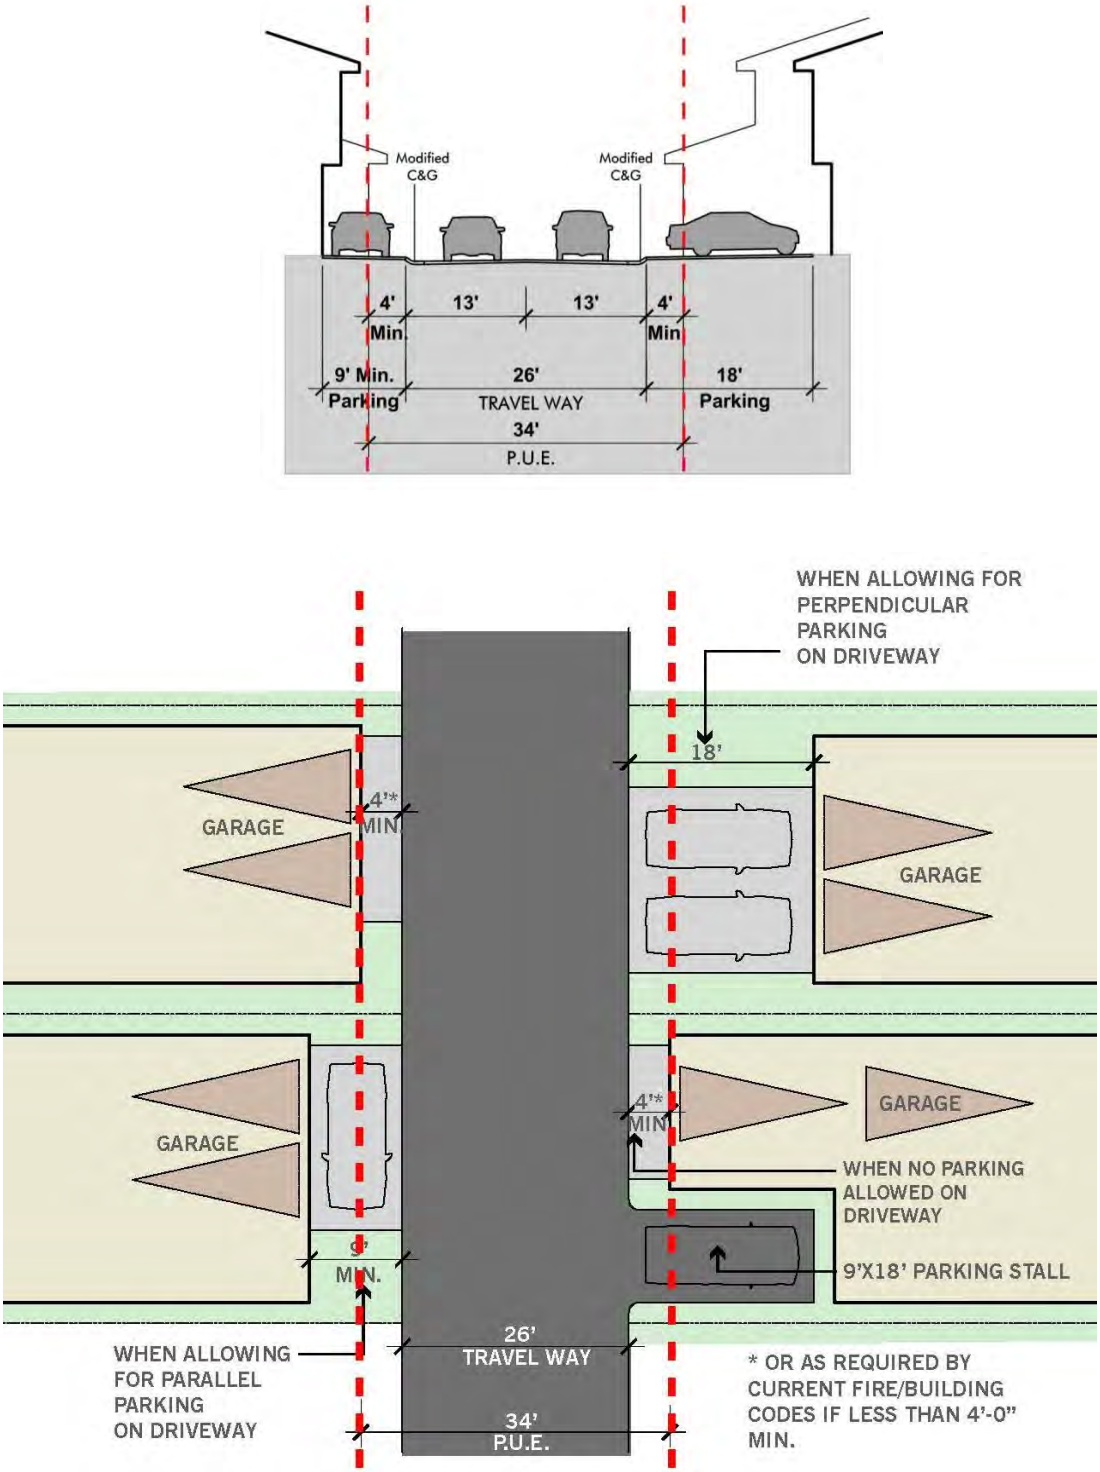

Figure 7.2k: Alley

Roundabouts

Roundabouts are a type of circular intersection in which the traffic moves in a counterclockwise direction around a circular island. Roundabouts are defined by specific design and traffic control principles which include yield control of all entering traffic, channelized approaches and geometric curvature and features to induce desirable vehicular speeds. Roundabouts are designed to make intersections safer and more efficient for both drivers and pedestrians. Speeds within roundabouts are usually significantly slower than typical intersections yet allow a more efficient flow of traffic. They also increase driver safety and reduce injury accidents as they only create angled movements where the possibility of high speed head on or broad-side collisions are eliminated.

Within the ARSP, roundabouts with 110-foot diameters will be constructed at certain intersections on the modified primary residential streets with paseos. These designated intersections are where Roads D and E intersect with Road F as shown on the circulation plan exhibit –In these locations, parking will be restricted on each side of the approaching roadway legs for a distance of 200-feet. Proper signage and standard design shall meet the National Cooperative Highway Research Program (NCHRP) Report 672

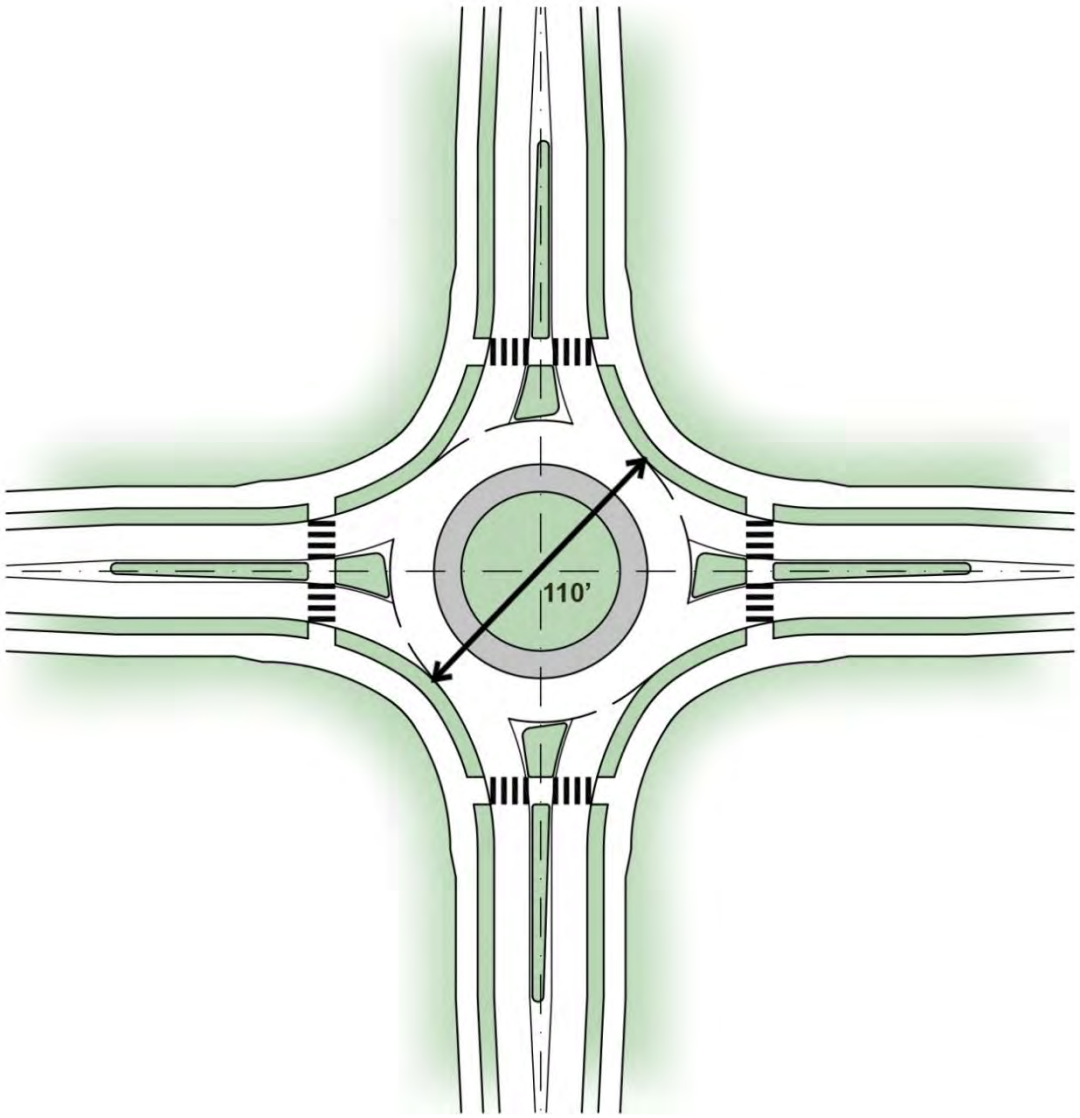

Figure 7.2l: Roundabout 1

(or latest Federal standards) and the California Manual on Uniform Traffic Control Devices (CA-MUTCD) guidelines.

Traffic Circles

Traffic Circles are small roundabouts that are most commonly used in urban environments with a low operating speed and occur in the same amount of area as a standard intersection. Many times they are used to resolve street intersections where the angle of intersection is significantly deviated from a standard 90 degree intersection, or an odd number of streets come together. The size of the Traffic Circle is very conducive to a pedestrian friendly environment because of the reduced pedestrian crossing widths and low speeds. Traffic Circles also feature a fully mountable central island to accommodate larger vehicles, while being designed to provide for enough space for passenger cars to negotiate the roundabout without the use of that mountable island. Proper signage and standard design shall meet the National Cooperative Highway Research Program (NCHRP) Report 672 (or latest Federal standards) and the California Manual on Uniform Traffic Control Devices (CA MUTCD) guidelines.

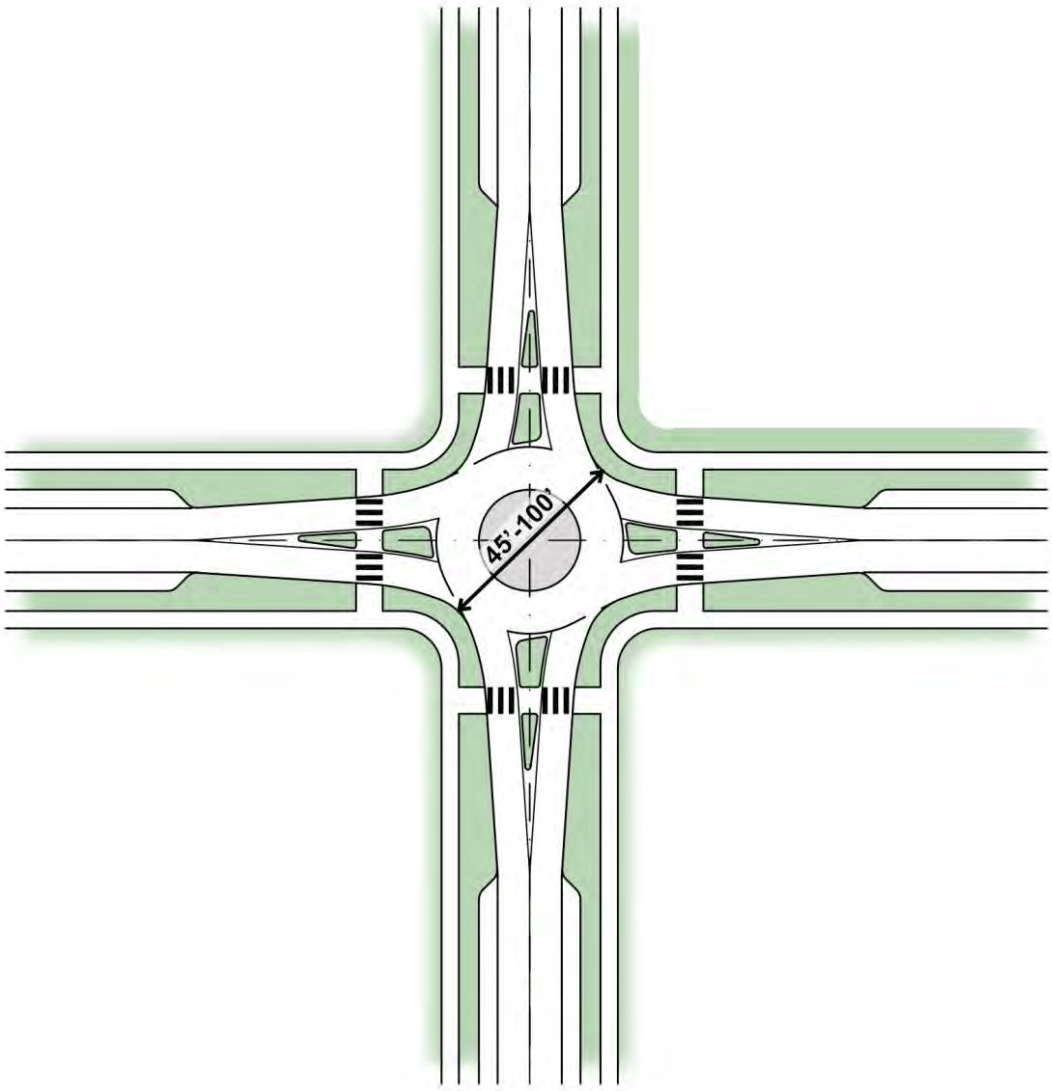

Figure 7.2m: Roundabout 2

Offsite Roadway

West Sunset Boulevard

West Sunset Boulevard is an existing two-lane rural roadway, within unincorporated Placer County, that is located along the northern boundary of the ARSP. The existing roadway will be improved to a Rural Secondary Roadway per Placer County Standards, as dictated by the phased development of the ARSP and County requirements. The proposed West Sunset Boulevard reduces the existing ROW while providing the County with two 12-foot travel lanes, two 4-foot shoulders, a new drainage ditch and the necessary turn lanes for access into the ARSP development. The roadway will also incorporate a 5-foot sidewalk within a 25 foot, City of Roseville owned, landscape corridor along the southern edge of the roadway. Figure 7.n.4 illustrates the intersection of Westbrook Boulevard and West Sunset Boulevard where additional turn lanes are used to accommodate for traffic flow.

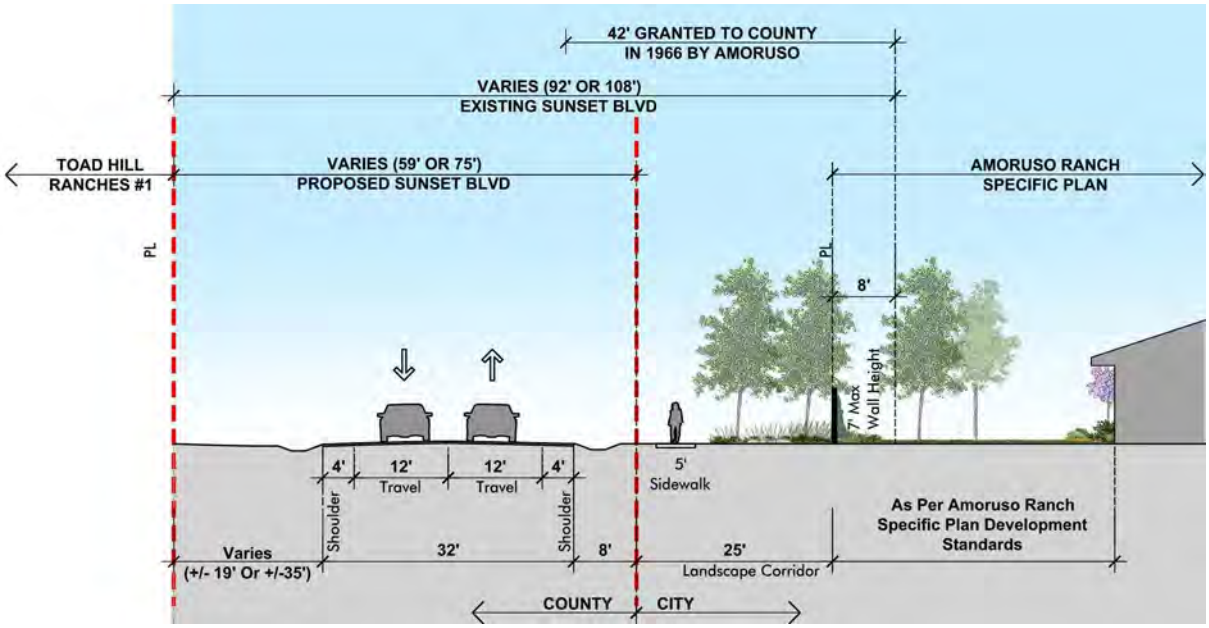

Figure 7.2n1: West Sunset Boulevard (County Street) Section 1-1

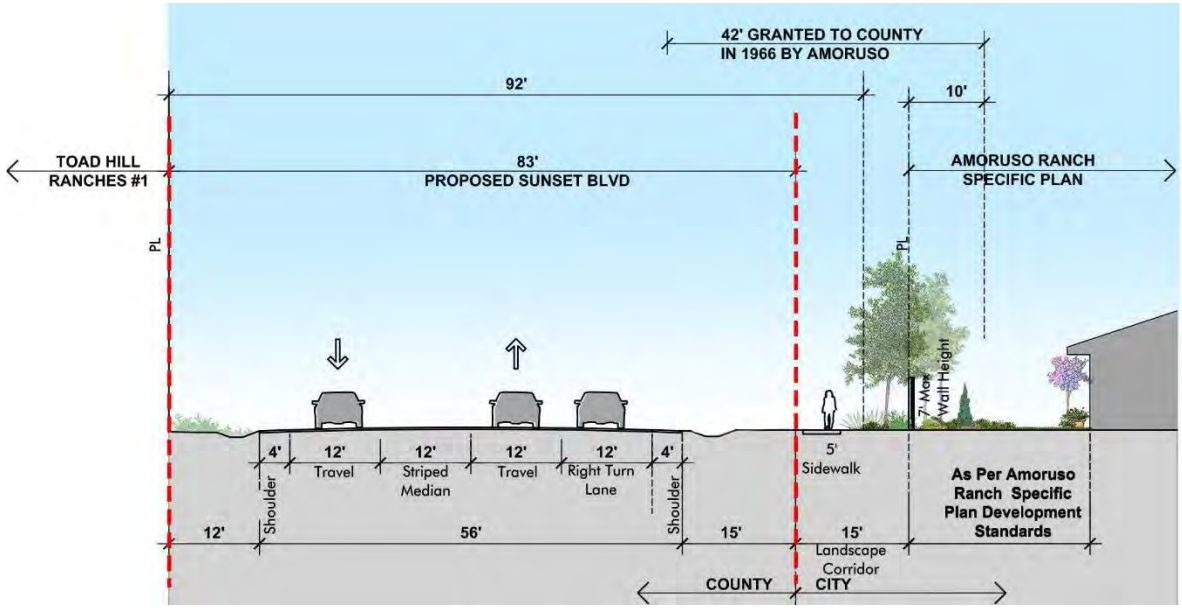

Figure 7.2n2: West Sunset Boulevard (County Street) Right Turn Lane Section 2-2

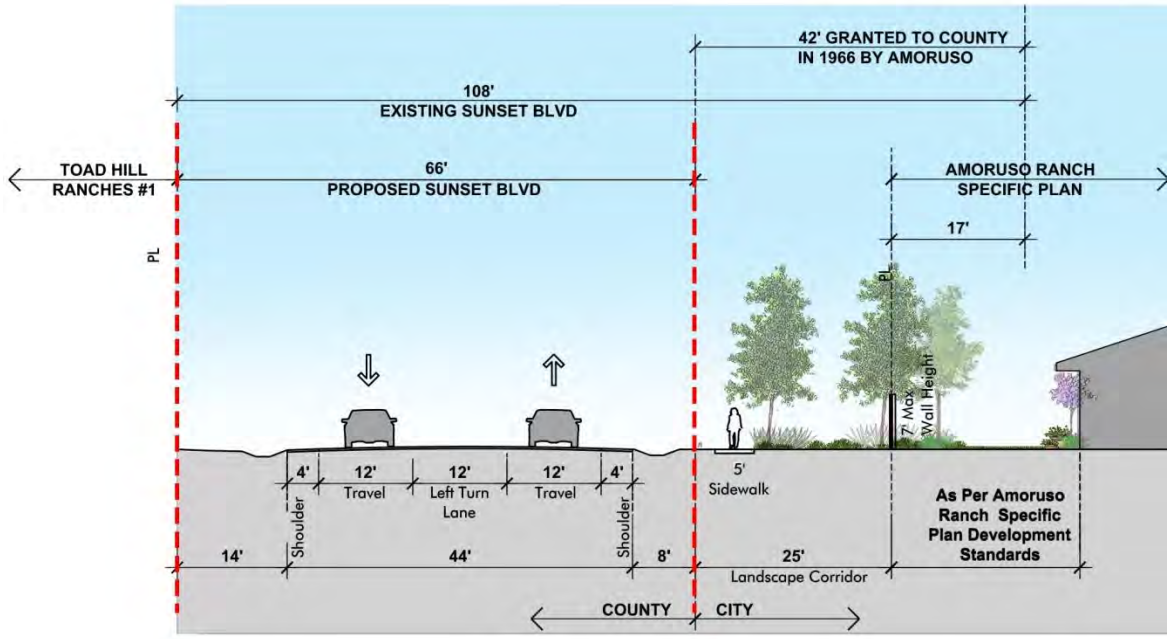

Figure 7.2n3: West Sunset Boulevard (County Street) Left Turn Lane Section 3-3

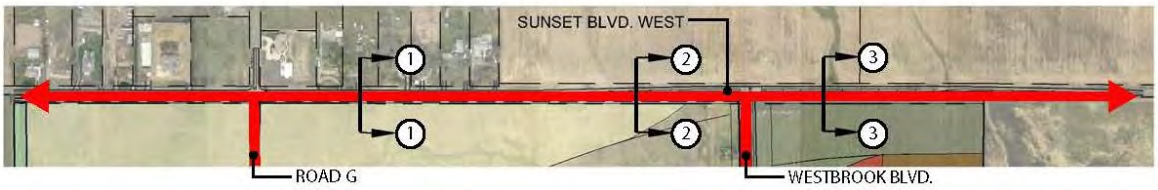

Figure 7.2n4: West Sunset Boulevard (County Street)- Key Map

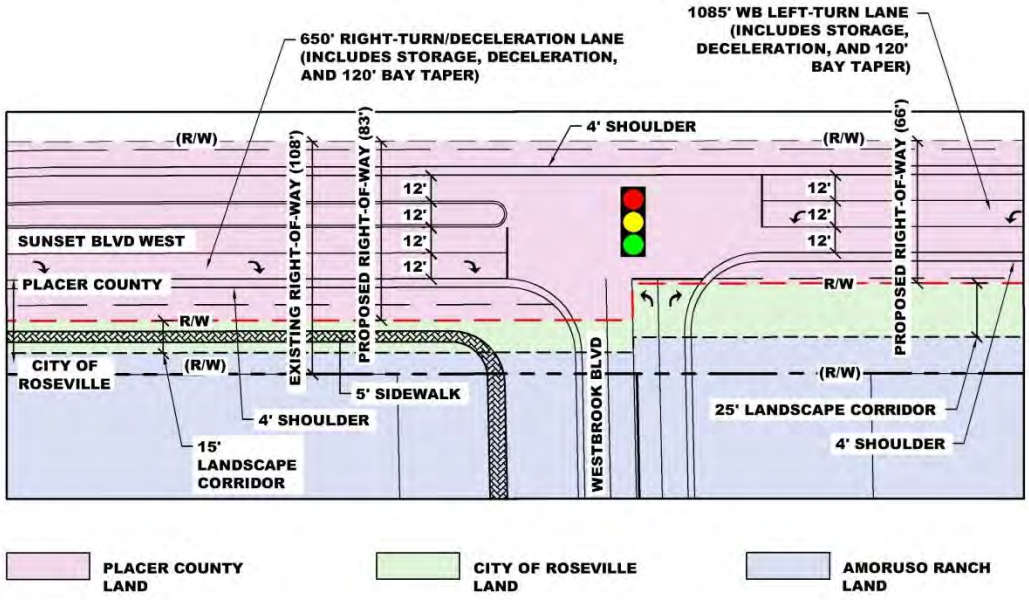

Figure 7.2n5: West Sunset Boulevard / Westbrook Boulevard Intersection (Interim condition)

7.3 Additional Street Design Standards

A. Traffic Signals and Median Breaks along Westbrook Boulevard

Westbrook Boulevard is designed to maximize efficiency for automobiles and enable safe movement for bicyclists and pedestrians. Locations of traffic signals and median breaks are identified to plan for left turn movements along arterial roadways, thereby enhancing the efficiency of traffic flow and minimizing interruptions to landscaped medians. The left turn movements at the median breaks are only permitted for the traffic turning left from the arterial. Left turn movements out from the streets to the arterial at these median break locations are prohibited. Additional median breaks may be allowed without amending the ARSP subject to approval by the City of Roseville Engineering Division and Planning Division per the Design Guidelines. Locations of signals and median breaks are illustrated on Figure 7.3.

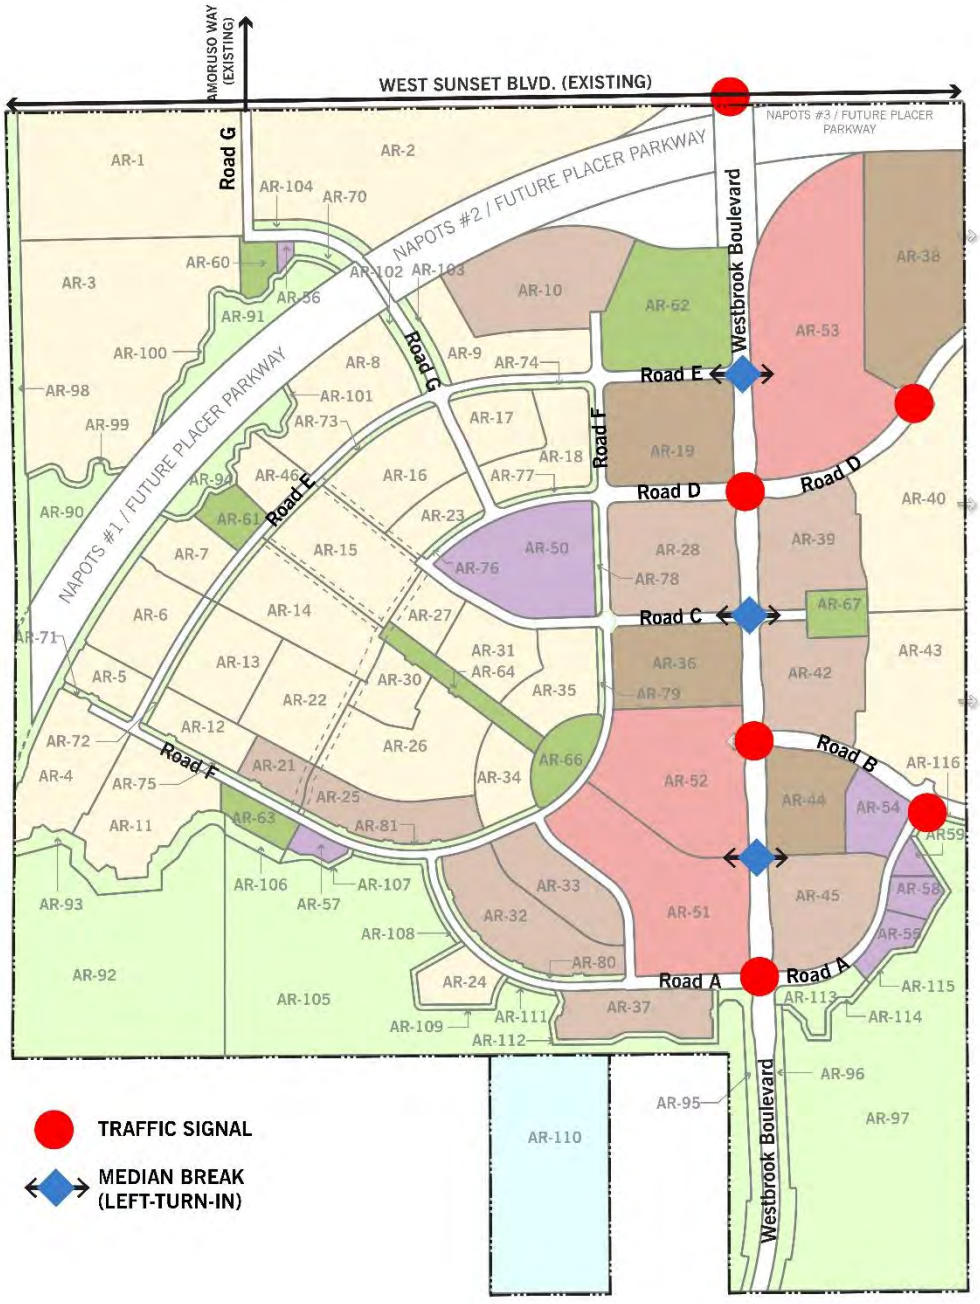

Figure 7.3: Traffic Signals and Median Breaks (updated May 2021)

7.4 Intersection Corner Clips

The intersection corner clip design accommodates landscaping at major roadway intersections to provide a high-quality streetscape, while accommodating for additional lanes needed for efficient automobile travel. A design standard for corner clips will compensate for width reduction of landscape corridors at street intersections. The corner clip design accommodates landscaping at major roadway intersections to ensure a high-quality streetscape, while accommodating the additional lanes needed for efficient automobile travel. The minimum design standard for intersections, including a typical design for a corner clip is provided in the Corner Clip Design Standard figure below.

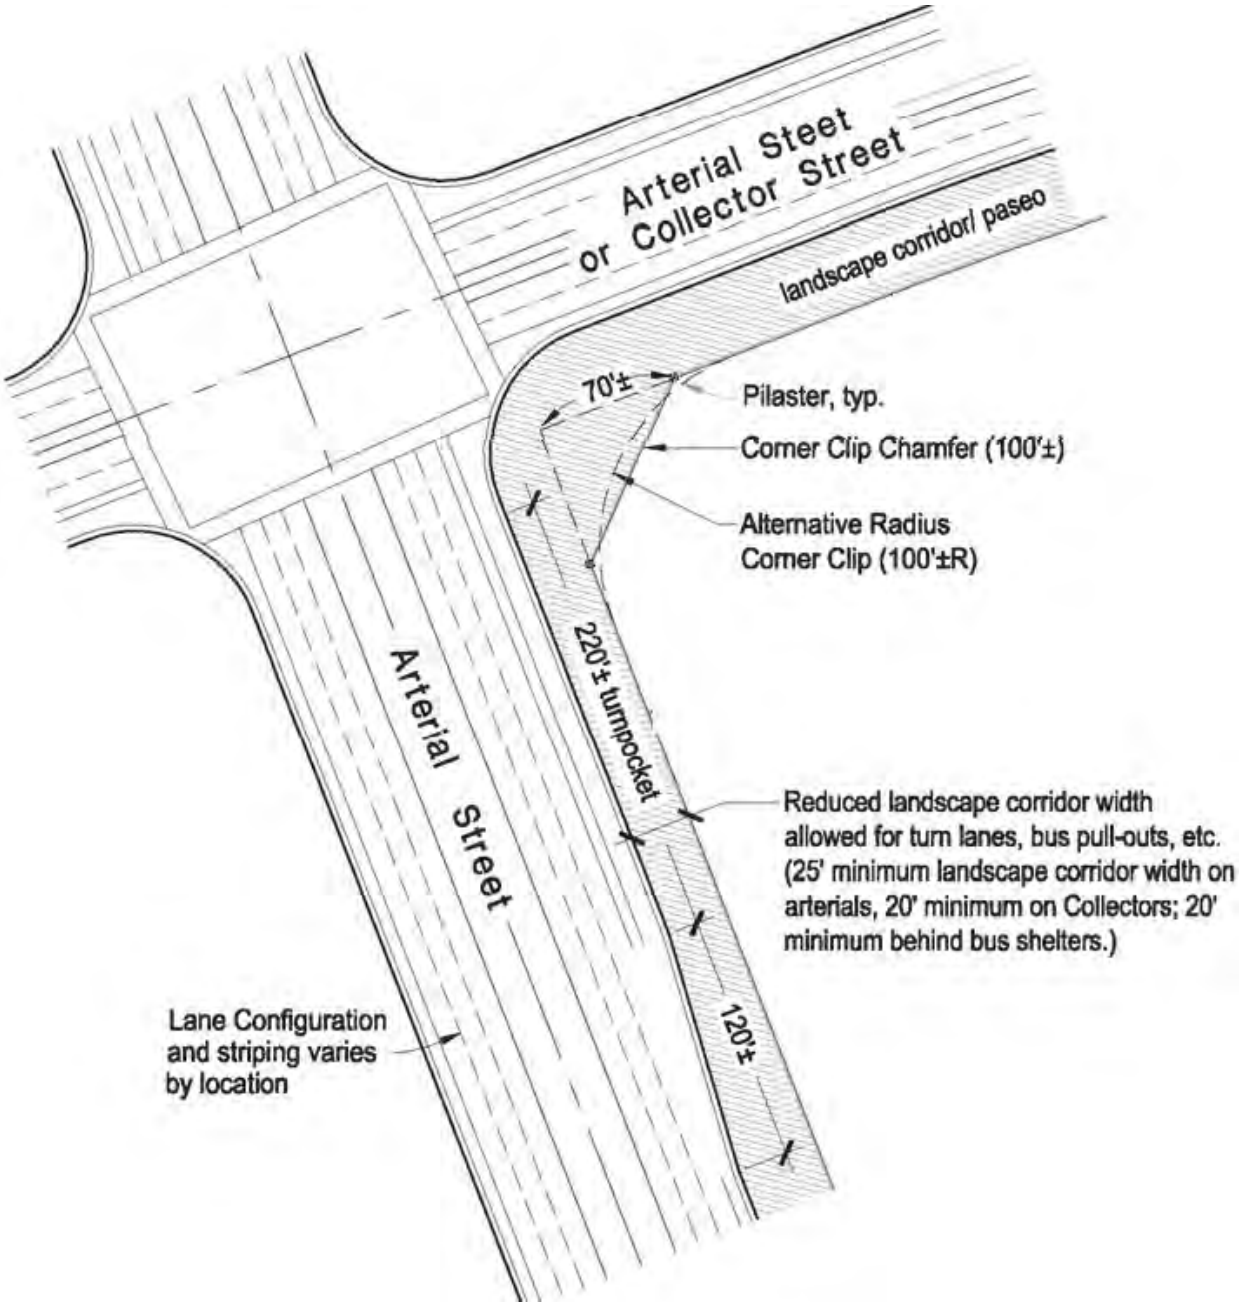

Figure 7.4: Intersection Corner Clip

7.5 On-street Parking

On-street parking is allowed on various streets per the street standards within this chapter. Parking is accommodated in either striped or non-striped parking bays. On streets that have striped parking bays, the bays shall be 22 feet x 8 feet as indicated in the graphic below. On residential streets where non-striped parking bays are provided, the bays shall adhere to the street sections within this chapter.

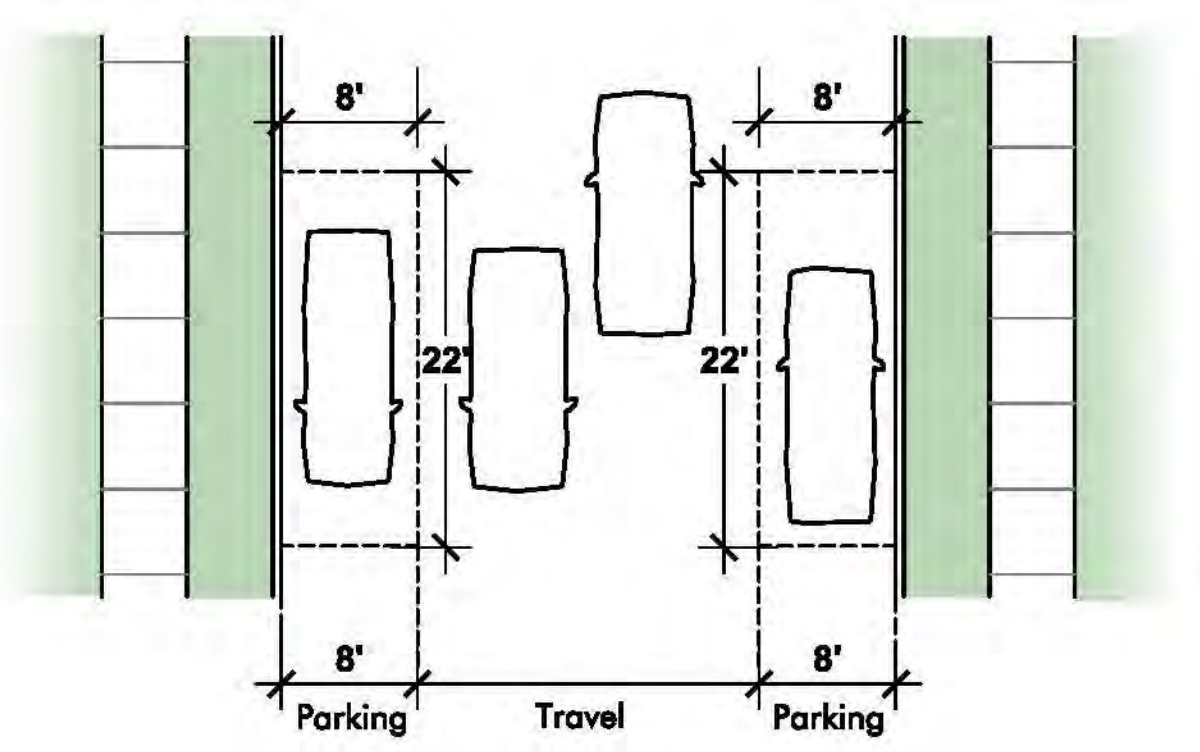

Figure 7.5: Typical On-street parking

7.6 Pedestrian Pathways, Bikeways, & Trails

The pedestrian and bikeway network is an important component in ensuring connectivity and promoting non-vehicular travel to and within the ARSP area. The network has been designed as an integral part of the community, providing easy and efficient access to the Village District, the elementary school, and parks.

This network of bicycle, multi-purpose trail, sidewalk and paseo connections within the community link the neighborhoods together, provides connections to the surrounding areas, and provides local and regional connections to the existing City of Roseville.

Pedestrian connection opportunities are provided to adjacent uses and allow for easy access to the regional trail and bicycle network that is currently present or planned in the City. Planned connections to adjacent land uses include: A Class I trail connection along Westbrook Boulevard south to the Creekview Specific Plan area; a Class IA trail connection along Road A and Road B to the east property boundary; and opportunities at the west end of the site for a connection(s). The streetside paseo system, which contains a Class IA sidewalk, connects to the Class I trail along the open space which will allow the City to connect to the future trail system within the Al Johnson Wildlife Area to the Amoruso Ranch trail network. For these trail and bicycle path locations, please see Figure 7.6 in this Chapter.

Sidewalks
Sidewalks form the day to day linkages throughout the community for the majority of pedestrians. All streets within Amoruso Ranch will have sidewalks on both sides, or a sidewalk on one side and a multipurpose trail on the other. The character of the sidewalks should reflect their adjacent land uses. For example, sidewalks within residential neighborhoods will be predominantly five feet wide and separated from the street by a landscaped parkway strip. In locations where a more urban character is desired such as in front of brownstone style row town homes, or adjacent to retail or commercial uses, the sidewalks may widen and become curb adjacent with street trees located in tree grates. This flexibility will create a community where the pedestrian experience responds to its context. Bicycle riding is allowed on all public sidewalks. Sidewalk bicycling on the privately owned Main Street, the Main Street Promenade and the Modified Primary Residential Street-Village Street may be prohibited if desired by the private property owner.

Pedestrian Paths and Bikeways
Pedestrian and bicycle circulation forms the backbone of the Amoruso Ranch community plan. This network creates linkages to all portions of the community as well as connection opportunities to the regional system. This network contains the following components:

- *Class I Bike Trails:* A Class I Bike Trail is provided within open space as illustrated in Figure 7.6 and provides a link to the City owned Al Johnson Wildlife Area from ARSP. Additional trail connection opportunities may be available if maintenance roads adjacent to drainage channels are used as bike trails.

- *Class IA Sidewalks:* These sidewalks are located within a landscaped paseo or adjacent to modified primary residential road along key roads and link together the parks within the ARSP area. Here, casual cyclists and pedestrians share the path. Individual residential driveways are not allowed on the paseo side of the street to reduce conflict with vehicles.

- *Class II Bike Lanes:* Class II Bike Lanes are on-street striped lanes that enhance the community connectivity for more avid cyclists. They also occur on the regionally serving arterial streets thus connecting to the greater City of Roseville bike lane network.

- *Class III Bike Routes:* Class III bike routes are designated on roads that provide key connections between destinations, but do not include on-street bike lanes. Class III bike routes may be enhanced with “Share the Road/ Bicycles May Use Full Lane” signs, Shared Use Markings (arrows), directional signs or other features to inform the motoring public that bicycles are to be expected.

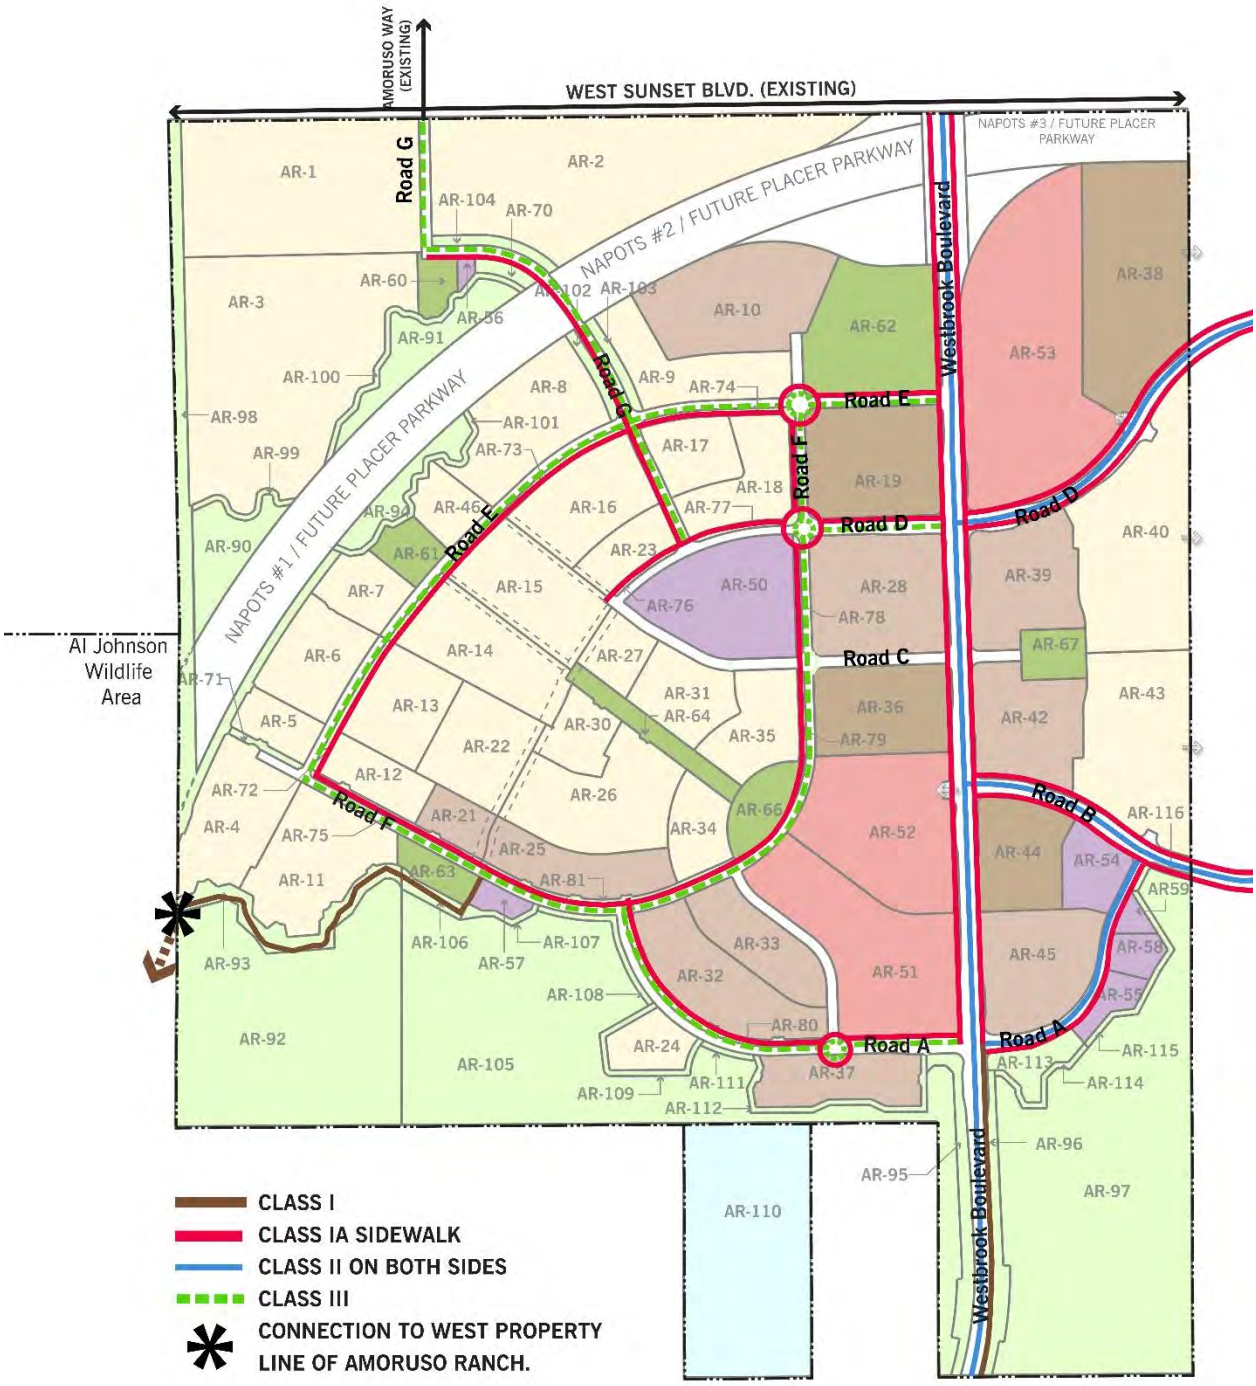

Figure 7.6 Bikeways (updated May 2021)

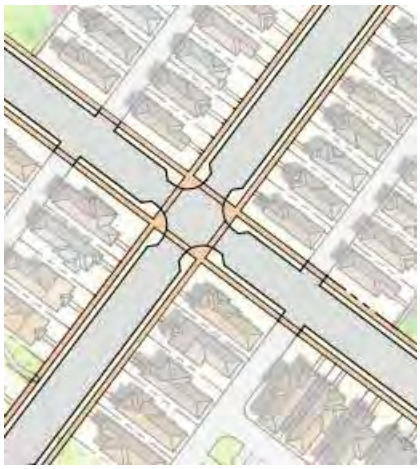
7.7 Traffic Calming

As a pedestrian and bicycle friendly community, traffic calming at intersections and key pedestrian crossings is an important element of street design.

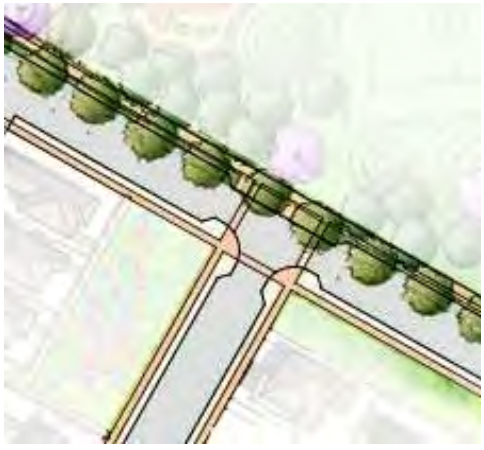


Traffic calming is intended to occur at all internal neighborhood street intersections to slow traffic and is achieved by eliminating the on-street parking lane, allowing the curbs to "bulb-out" at intersections and therefore shortening the crossing distance for pedestrians. These bulb-outs also provide clearly identified parking locations which keep parked cars from encroaching into pedestrian crossings at intersections.

Figure 7.7a: Conceptual Bulb-Out Intersection

This condition occurs where key pedestrian routes cross streets. Here, the parking lane is dropped from both sides of the street, narrowing the pedestrian crossing distance and slowing traffic. The pathway material and surface treatment is carried across the street to reinforce the pedestrian route and as an additional alert to drivers to watch for pedestrians. This allows pedestrian connectivity to flow throughout the community as uninterrupted as possible. "Table Topping" or raising the crosswalk area may also occur at key pedestrian route locations.

Figure 7.7b: Conceptual Midblock Crossing



At important "T" intersections, dropping the parking where one road "T's" into another creates enhanced landscaped areas and focal points within the community, and slows vehicular traffic. Where these occur along a streetside paseo, they become ideal locations for artwork or monumentation that becomes part of the way-finding for the community. These bulb-outs may be a combination of concrete, enhanced paving such as pavers and landscape. Landscaping at intersections must meet sight distance requirements.

Figure 7.7c: Conceptual "T" Intersection

The following graphic Figure 7.7d shows a typical residential bulbed intersection. Streetside landscape, signage and furniture shall maintain minimum standard sight distances as per the City of Roseville Design and Construction Standards.

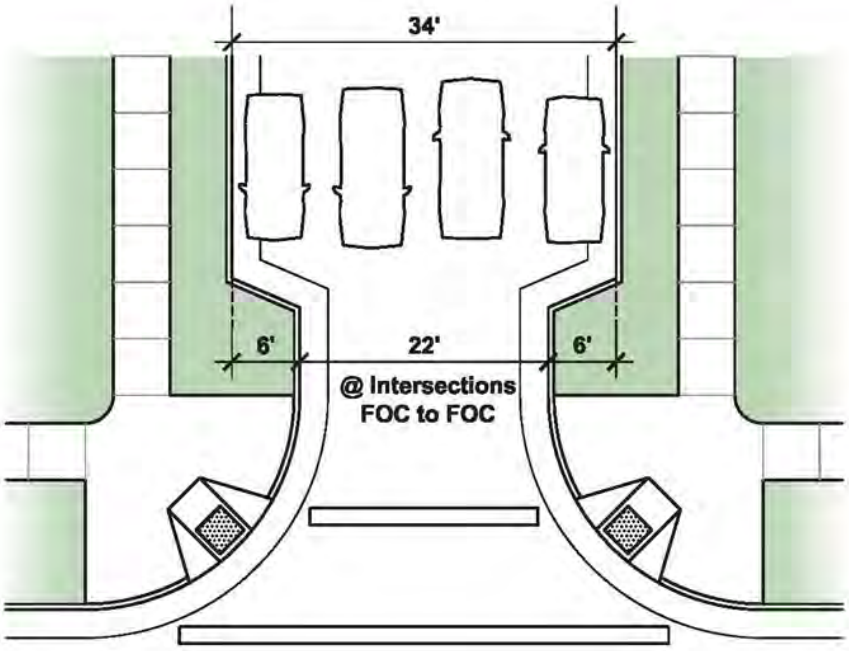


Figure 7.7d Typical Residential Intersection

7.8 Public Transit

Roseville Transit provides local fixed-route and Dial-A-Ride services within the City, as well as a fixed-route commuter service between Roseville and downtown Sacramento. The fixed-route local and commuter systems operate on regularly scheduled routes. The Dial-A-Ride system provides on-demand transit services to ADA paratransit customers and the general public. Roseville Transit users can connect to both Placer County Transit (PCT) and Sacramento Regional Transit (RT) at designated transfer points.

A proposed Bus Rapid Transit (BRT) route may extend from Sacramento Regional Transit's Light Rail Station at Watt Avenue/I80 north along Watt Avenue. North of Baseline Road, Watt Avenue has been renamed to Santucci Boulevard as it extends through the Sierra Vista Specific Plan (SVSP). Santucci Boulevard is planned to continue north to an intersection with Blue Oaks Boulevard. The proposed BRT route would extend along Blue Oaks and then north within Westbrook Boulevard through the CSP into the ARSP. BRT service is anticipated along Westbrook Boulevard to Future Placer Parkway. Alternatively, BRT may use Roads B and D.

Bus turnouts and shelters shall be located as shown on Figure 7.8 and constructed in accordance with City Improvement Standards. The BRT stops will include bus shelters and other appurtenances such as ticket vending machines, bike parking and other amenities. Easements for BRT stops shall be provided to facilitate future construction and operations in accordance with standards established by the City of Roseville and/or regional operators of the BRT service. BRT stops may also be utilized as local fixed-route transit stops. Twenty five parking spaces within the commercial uses of Parcel AR-53 will be designated for park and ride users as shown on Figure 7.8.

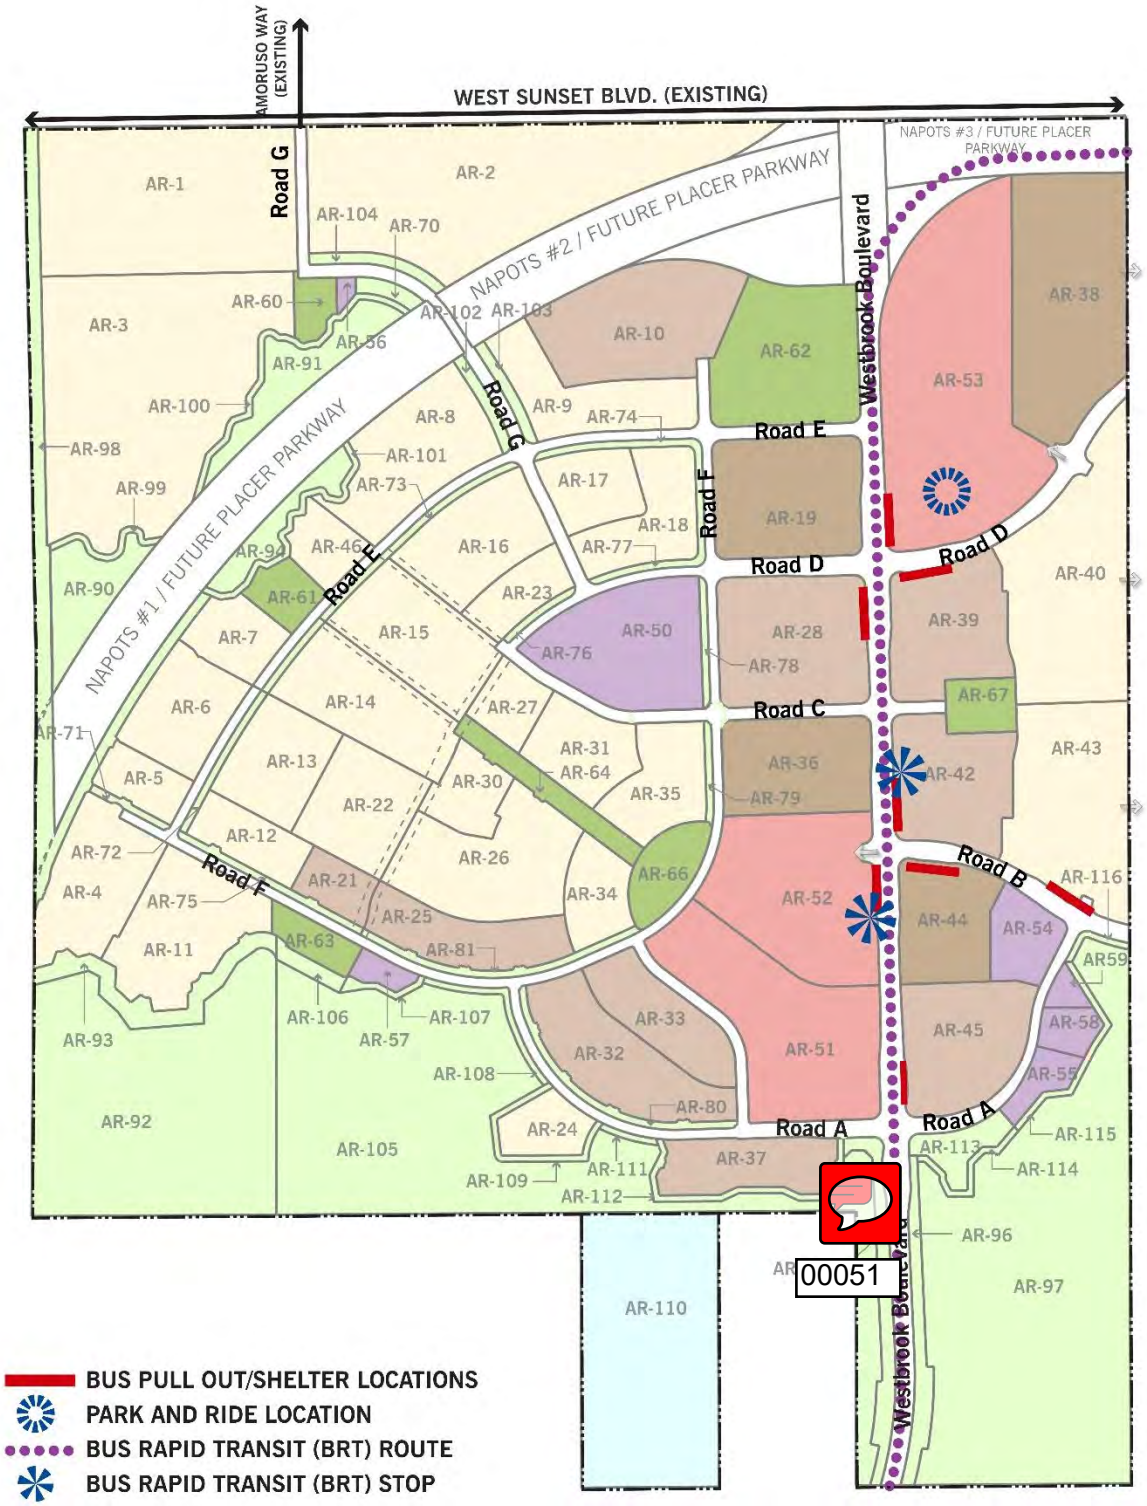

Figure 7.8: Transit Facilities (updated May 2021)

7.9 Transportation System Management

Transportation System Management (TSM) measures are designed to reduce the number and length of home-to-work commute trips through actions such as ride-sharing, flexible work hours and support of public transportation. Any project site, common work location or employer with 10 or more employees is required to comply with the City of Roseville TSM ordinance and shall incorporate TSM measures to the degree required by the ordinance. Additionally, Major Common Work Locations (those with 50 or more employees) will be required to prepare a TSM Plan and Agreement to document their trip reduction efforts.

7.10 Vehicle Trip Reduction

The ARSP strives to create a truly walkable community. Walkable communities not only promote healthier lifestyles, but encourage residents to leave their vehicles at home and enjoy the environment they chose to live in. Elements within the ARSP that support a walkable bicycle friendly community include:

- The streetside paseos that link most of the neighborhoods to the parks, school, and Village District. Here, individual residential driveways are prohibited to minimize interruptions.
- The Crossing Park that fully extends the direct access to the activities at the Urban Park and Village District into the neighborhoods.
- By centrally locating the elementary school, most homes are within a 10 minute walk via the streetside paseo or Crossing Park.
- Most homes are within a five minute walk to a neighborhood park.
- The Village District, which is linked to the neighborhoods via the streetside paseo and Crossing Park, provides local services, entertainment, and employment opportunities.

CHAPTER 8 – PUBLIC SERVICES

8.1 Public Facilities

The following is an overview of the public services necessary to meet the needs of the Amoruso Ranch Specific Plan (ARSP) area residents and employees in accordance with the policies of the City's General Plan. Phasing and financing obligations relating to public services are outlined in the Amoruso Ranch Development Agreement and in Chapter 10, Implementation and Administration. Table 8.1 summarizes the public service providers to the ARSP Area.

Figure 8.1 illustrates an approximate location for the public facilities that are a part of the ARSP.

Table 8.1
ARSP Service Providers

Service	***Provider***
Fire and Emergency Services	City of Roseville
Police Protection	City of Roseville
Schools	Roseville City School District Roseville Joint Union High School District
Parks & Recreation	City of Roseville
Library	City of Roseville

8.2 Fire and Emergency Services

The Roseville Fire Department will provide fire protection, suppression, emergency medical services and hazardous materials management to the Plan Area. A three-acre fire station site is located in the southeast portion of the Plan Area (Parcel AR-54). This station will provide first response within the Plan Area. Timing of construction and staffing of the fire station will be consistent with the Fire Department Standards of Response Coverage Study. Stations located outside the Plan Area will provide interim and secondary response determined by the fire department.

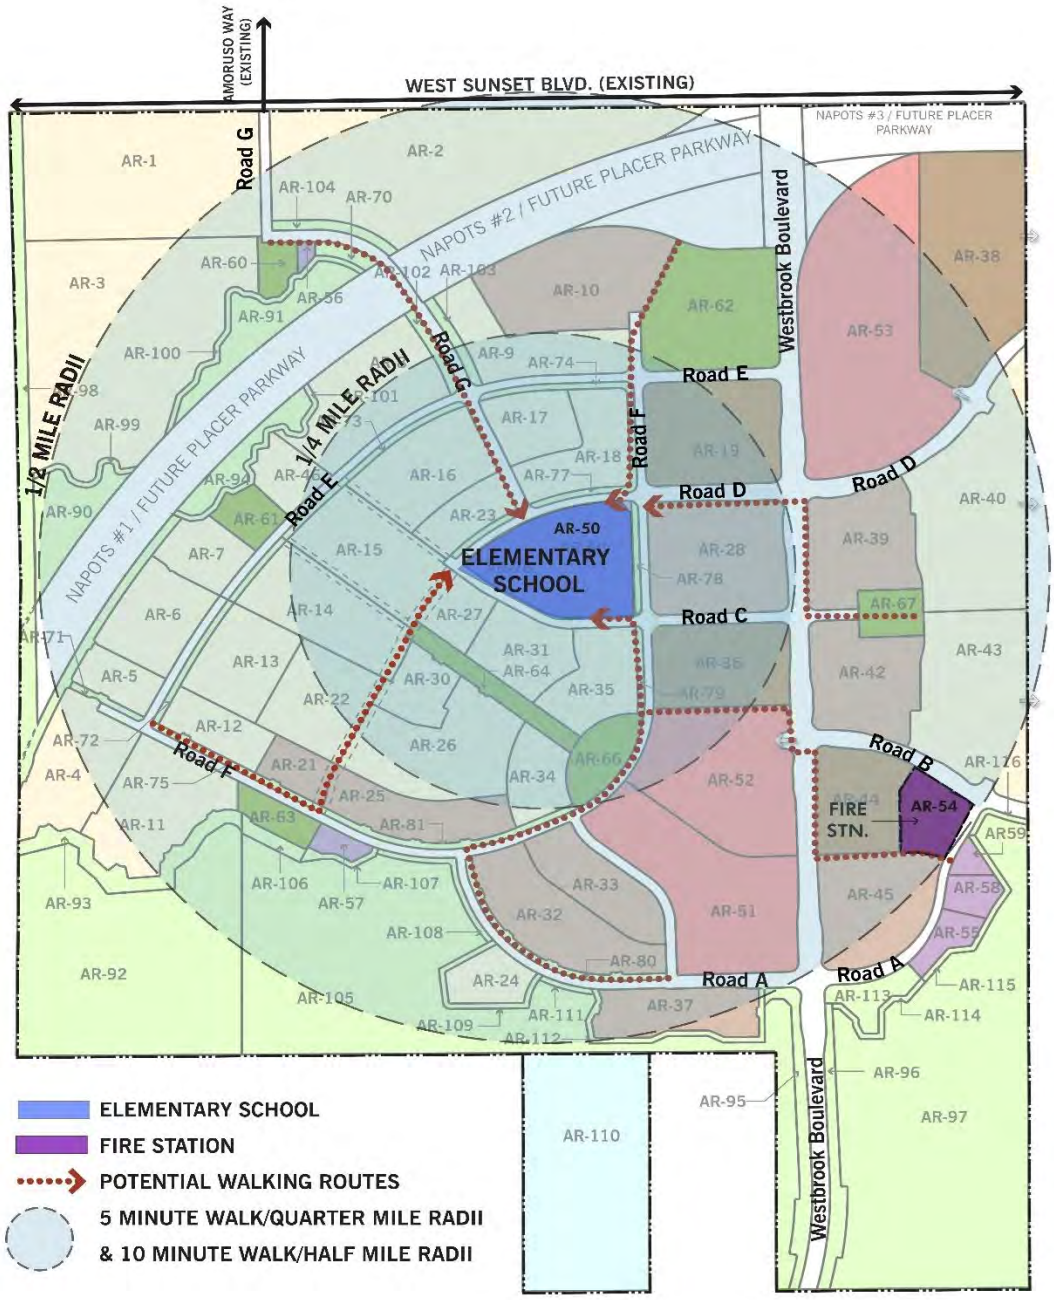

Figure 8.1: Public Facilities Map (updated May 2021)

Police Protection
The Roseville Police Department will serve the ARSP Area. The Police Department provides all operations and patrols out of its central station located on Junction Boulevard.

8.3 Schools

A. School Requirements

The ARSP Area is within the boundaries of the Roseville City School District (grades K-8) and Roseville Joint Union High School District (grades 9-12). The Plan Area will generate an estimated 745 elementary school students (K-5), 319 middle school students (6-8) and 485 high school students (9-12), as shown on Table 8.2. Location of the Elementary School site can be seen on the previous page in Figure 8.1; Public Facilities Map.

Table 8.2
Student Generation

	LDR/MDR Factor	***HDR Factor***	***Students Generated***	***School Capacity***	***Schools Required***
Roseville City School District					
Grades K-5	0.365	0.073	730	800	0.91
Grades 6-8	0.158	0.028	319	1000	0.31
Roseville Joint Union High School District					
Grades 9-12	0.227	0.067	485	1800	0.26

B. School Facility Provided

The number of elementary school students generates the need for one elementary school in the ARSP area. One 9-acre elementary school (parcel AR-50) is planned in the Central District of the ARSP. The school is located south of Road D. It is anticipated the school will be a two-story urban school that supports the community character of an urban village. The location of the elementary school is central to most neighborhoods and thus a focal point for the community. Middle school and high school students will attend schools outside of the ARSP area, such as Cooley Middle School or Chilton Middle School. High School students will attend the Roseville Joint Union High School District (RJUHSD) high school planned in the West Roseville Specific Plan (WRSP) area, on Hayden Parkway.

The elementary school site within the ARSP is reserved for the Roseville City School District. Facility planning and the sequencing of development of this site is to be determined by the District. The ARSP is required to enter into mutual benefit impact fee agreements and to fully mitigate school impacts in accordance with the ARSP Development Agreement and funding agreements with the applicable school districts.

8.4 Library

The City of Roseville operates a public library system that consists of three individual facilities. The City's original main library is located in the downtown Roseville area, a branch library facility is located in Maidu Regional Park and the Martha Riley Community Library is located at Mahany Park which provides services to the western portion of the City. Public Facilities Fees will be required to ensure the increase in population created by the ARSP meets the one library per 40,000 service population standard.

8.5 Parks & Recreation

The ARSP provides recreation facilities, parkland and open space areas that comply with the policies and requirements of the City's General Plan and Recreation Element.

A. City of Roseville Park and Recreation Requirements

The 2,827 dwelling units in the ARSP will generate an estimated population of 7,379 residents based on an average household size of 2.61 residents for conventional (not age-restricted) housing development. The City's General Plan requires the provision of nine acres of parkland per 1,000 residents comprised of three acres of city-wide park, three acres of neighborhood and community park, and three acres of credited open space. The City's policy of nine acres of parkland and open space per 1,000 residents requires a total of 66.42 acres of parkland and open space in the ARSP. This parkland dedication requirement is detailed in Table 8.3.

Table 8.3
Parkland Dedication Requirements

Type of Park/Open Space Required	*General Plan Standard*	*Acreage Required*
City-wide Park	3 acres per 1,000 residents	22.14 acres
Neighborhood/ Community Park	3 acres per 1,000 residents	22.14 acres
Open Space	3 acres per 1,000 residents	22.14 acres
Total Parkland	**9 acres per 1,000 residents**	66.42 acres

B. Credited Parkland and Open Space

The ARSP designates a total of 177.~~07~~ 7391 acres of park and open space uses. This includes 22.~~14~~ 1921 acres of active neighborhood parkland, 144.~~19~~ 5969 acres of open space uses and ~~10.74~~101.9501 acres of streetside paseos. Each acre set aside for active park use is credited as a full acre towards meeting the General Plan park dedication requirement. Depending on the ultimate use, recreational value, or application of ARSP open space parcels, full or partial credit may be granted for open space land containing informal recreational facilities, open space amenities or natural features. Parkland credits for park and open space parcels are outlined in Table 8.4. The credits applied are reflective of each parcel's recreational value as a park or open space amenity.

Table 8.4
Summary of Park and Open Space Land Credits

Parcel	*Type*	*Acreage*	*Credit Ratio*	*Credited Acreage*
City-wide Parks	City-wide Park	0 acres	1:1	0 acres
	Subtotal	0 acres		0 acres
Neighborhood/ Community Park	AR-60	1.28 acres	1:1	1.28 acres
	AR-61	1.87 acres	1:1	1.87 acres
	AR-62	10.~~11acres~~34 acres	1:1	10.3411 acres
	AR-63	1.~~72~~ 71 acres	1:1	1.712 acres
	AR-64	2.12 acres	1:1	2.12 acres
	AR-66	~~3.04~~2.867 acres	1:1	2.863.04 acres
	AR-67	2.~~00~~ 02 acres	1:1	2.020 acres
	Subtotal	**22.~~14~~ 19 acres**		**22.~~14~~ 19 acres**
Open Space	Open Space	144.~~19~~5969	1:1	144.~~19~~5969
	Paseos	~~10.74~~10.951.01	-	-
TOTAL		**177.~~07ACRES~~734 91ACRES**		**~~166.33 79~~8990 ACRES**

As shown on Table 8.4, the ARSP satisfies the City's open space and neighborhood parkland dedication requirements. The Citywide parkland dedication requirement will be satisfied using the City's park in-lieu fee, pursuant to General Plan policy and the In-Lieu Park Fee Ordinance.

In addition to park and open space areas, the ARSP includes a comprehensive system of paseos. Paseos are landscaped features with walkways and bike paths in an enhanced pedestrian environment. The ARSP includes adequate open space to meet the General Plan open space parkland requirement. Paseos are described in Chapter 7, Circulation and in the ARSP Design Guidelines (Appendix B).

C. Open Space

The ARSP contains four types of open space totaling approximately ~~155~~ 156 acres. These types include open space preserve (109 acres), general open space – avoided area (10 acres), transition zone open space (~~25~~ 26 acres), and paseos (11 acres).

Each type of open space has been designed to accommodate specific functions and activities, from very limited use to active recreation and infrastructure. The on-site **open space Preserve** will be permanently preserved to protect Waters of the U.S. and habitat for federally listed species. This protection will be provided by either a declaration of covenants and restrictions and/or a conservation easement to restrict access and activities within the preserve. The area would be managed in accordance with the City's Open Space Preserve Overarching Management Plan (OSPOMP). **General open space – avoided area** also contains Waters of the U.S. and species habitat. While these areas will be avoided by the Project development, they may be impacted by the future Placer Parkway and therefore are not currently proposed for protection by a deed restriction and/or conservation easement. The ultimate management strategy for the General open space – avoided areas will be determined during future Placer Parkway project federal permitting process. During the interim period the avoided area would be managed as General Open Space in accordance with the City's OSPOMP. **Transition Zone open space** consists of the parcels that boarder the open space Preserve and General open space – avoided areas. These parcels provide a buffer to the Preserve open space and will be utilized for activities such as slope grading, outfall/stormwater structures, bike trails, weed abatement activities, open space maintenance, and health and safety vehicle access. The Transition zone open space area will not be protected by conservation easement and all wetlands within this area will be permitted for fill. Examples of typical infrastructure elements within Transition Zone open space areas can be found in Figure 6.3 and 6.4 with additional details contained Appendix A, Development Standards. **Paseos** are linear parcels of open space that provide pedestrian trails and green space within development areas. Paseos will not be protected by conservation easement and all wetlands within this area will be permitted for direct fill (note: a list of the parcels in each open space type is provided in Table 6.1).

The southern open space is planned for permanent preservation as open space Preserve. This includes open space Preserve parcels 92, AR-97 and AR-105 which are separated by the Westbrook Boulevard corridor, including the roadway and landscape corridor (which include AR-95 and 96). The southern open space Preserve will contribute to a much larger regional open space area when combined with open space at the Al Johnson Wildlife Area, open space parcels preserved within the Creekview Specific Plan (CSP) and West Roseville Specific Plan (WRSP). Management of open space preserve areas is discussed in Chapter 6, Resource Management.

D. Park and Open Space Concept Plans

The ARSP park and open space system is designed to provide linkages and recreational opportunities within proximity to all residents and employees. Park designs include reduced turf areas as water conservation considerations focus on active recreational uses. Park designs will increase the use of water conserving landscapes, utilize recycled water for irrigation and include water efficient irrigation systems and controls.

E. Neighborhood Parks

The primary focus of a neighborhood park is to provide recreational space within immediate walking distance to the neighborhood it serves for, shaded seating areas, play areas, picnic areas and other passive and active recreation. Neighborhood parks are central to the area intended to serve and link together by the paseo network.

The ARSP includes seven neighborhood park sites distributed throughout the Plan Area. These sites range in size from one acre to ten acres and include a variety of facilities to accommodate the local recreation needs of the community. Each neighborhood park is intended to create unique experiences and have individual character. Below is a figure that illustrates the park distribution within the ARSP (Figure 8.2; Park and Open Space Distribution) and walking distances from residences to each park in quarter-mile radii (Figure 8.3; Walking Distances to Parks).

F. Conceptual Park Plans

Conceptual plans for the neighborhood parks, along with a description of the potential activities and amenities are as follows. The programming of each park is conceptual and final designs will be developed prior to construction and will consider recreational trends and available budget for both development and maintenance

-

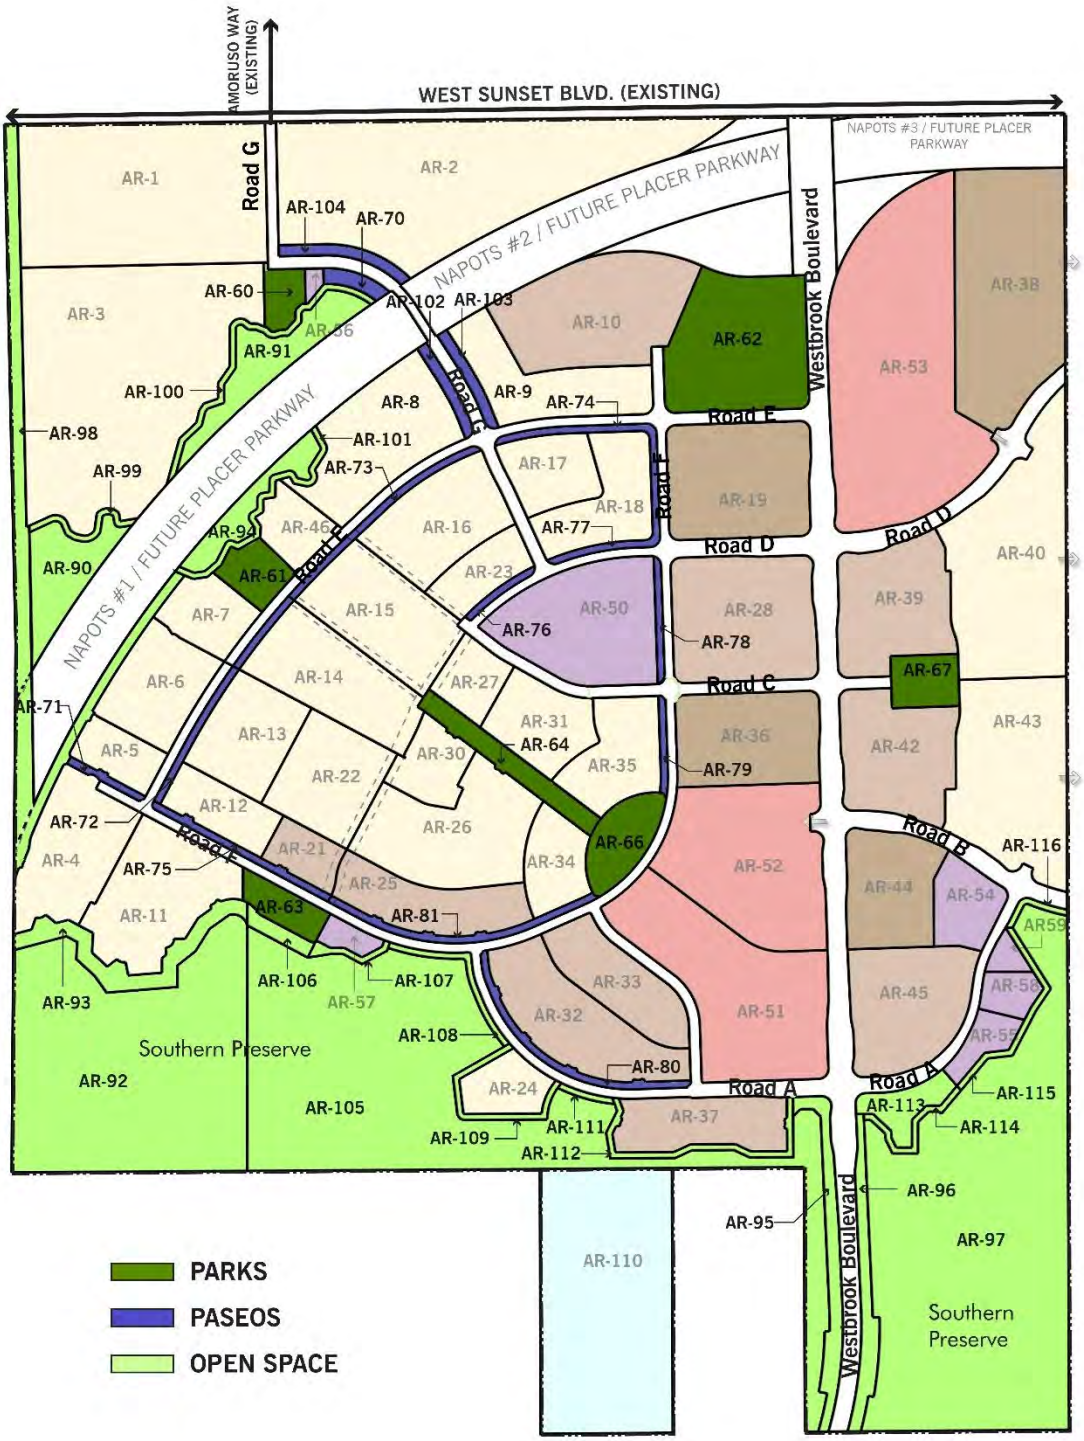

Figure 8.2: Park and Open Space Distribution Map (updated May 2021)

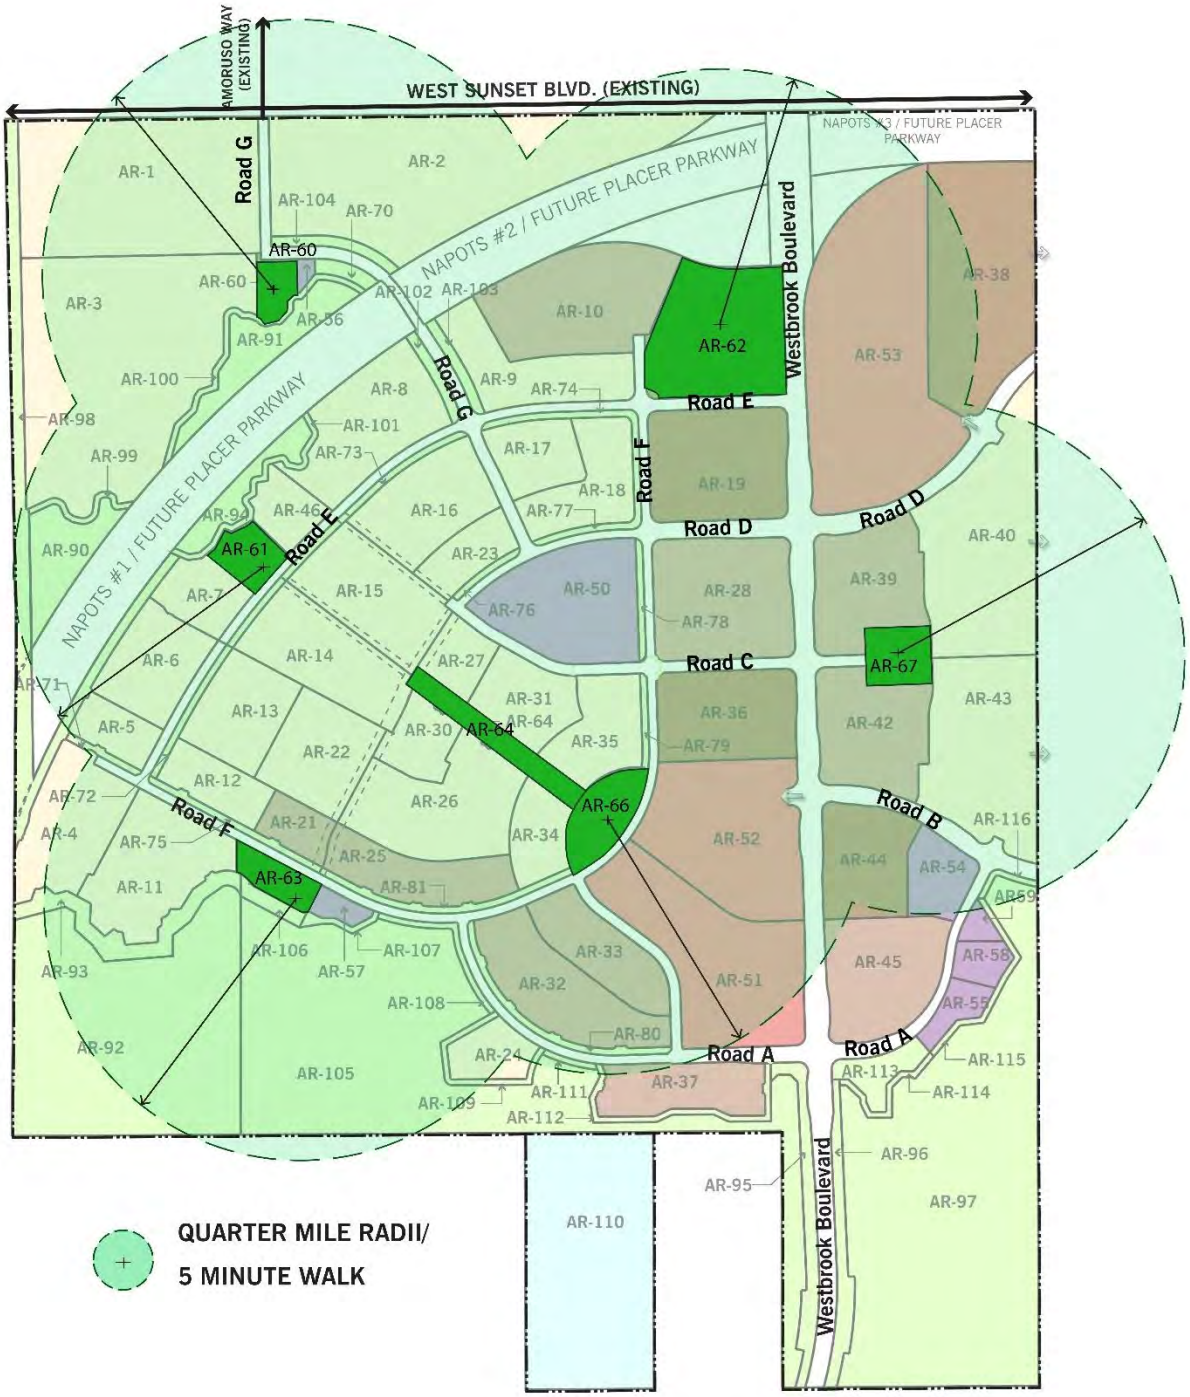

Figure 8.3: Walking Distances to Parks (updated May 2021)

AR-60:
The park is located in the northwest area of the community. This area is characterized by large lot homes with ample yards for daily family recreation. For this reason, the park is envisioned as a simple, passive park with a few small active spaces for children's play. Landscape is characterized by grasses and native plants. The large play area in the middle with grassy mounds add interest to the park and to create more opportunities for interpretive play.

The edge of the park borders one of the designated open spaces of Amoruso Ranch, similar to the AR-63. Against this edge there is opportunity for educational interpretive signage and quiet seating areas to enjoy the outdoors.

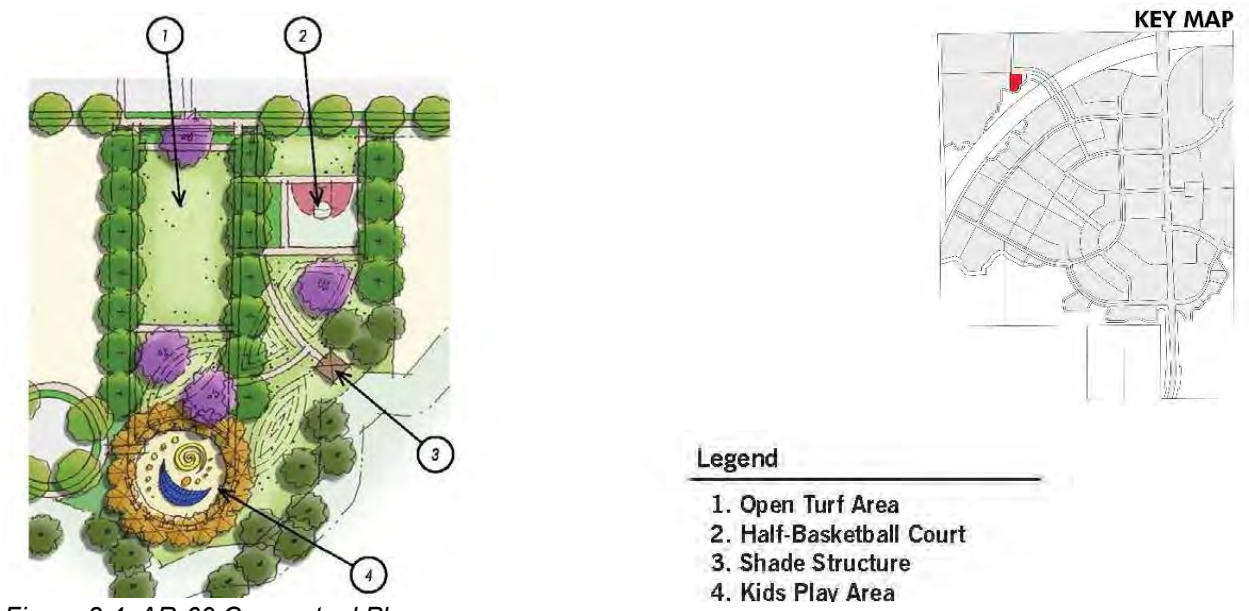

Figure 8.4: AR-60 Conceptual Plan.
Final designs will be developed prior to construction and will consider recreational trends and available budget for both development and maintenance. Curb adjacent sidewalks maybe constructed, at the direction of the Parks Department, along neighborhood park frontage.

AR-61:
This park is located at the western edge of the community. It will serve as the local social gathering space for this neighborhood.

The park is divided into three distinct spaces. The front portion of the park is split into a small children's play area. The children's play area would contain a shade structure along with some picnic tables and benches for seating. The landscape area could include a low water use planting. Along the back portion of the park is a large open turf area that can be used for informal play or picnicking.

Figure 8.5: AR-61 Conceptual Plan.
Final designs will be developed prior to construction and will consider recreational trends and available budget for both development and maintenance. Curb adjacent sidewalks maybe constructed, at the direction of the Parks Department, along neighborhood park frontage.

AR-62:
The largest neighborhood park is the 10-acre park (AR-62) which is intended to serve as the active/programmable recreational hub of the community. It provides for multiple active and passive uses for all ages. This site focuses on programmed sports fields clustered into one larger park, and includes support facilities and minimize the impacts to the surrounding neighborhoods.

The primary use at the park will be field sports which may include soccer, baseball and/or softball. Sports Fields may be lit. The park can accommodate various sized fields as well as a central concession and restroom building. As illustrated, promenades provide ample room for informal game viewing, formal bleacher set-up, and team staging areas.

Other amenities in the park could include a tot lot, half-court basketball courts, and multiple shade and picnic areas throughout the park. The park also includes on and off-street parking, to serve the intended uses and similar to parking provided at other active parks throughout Roseville.

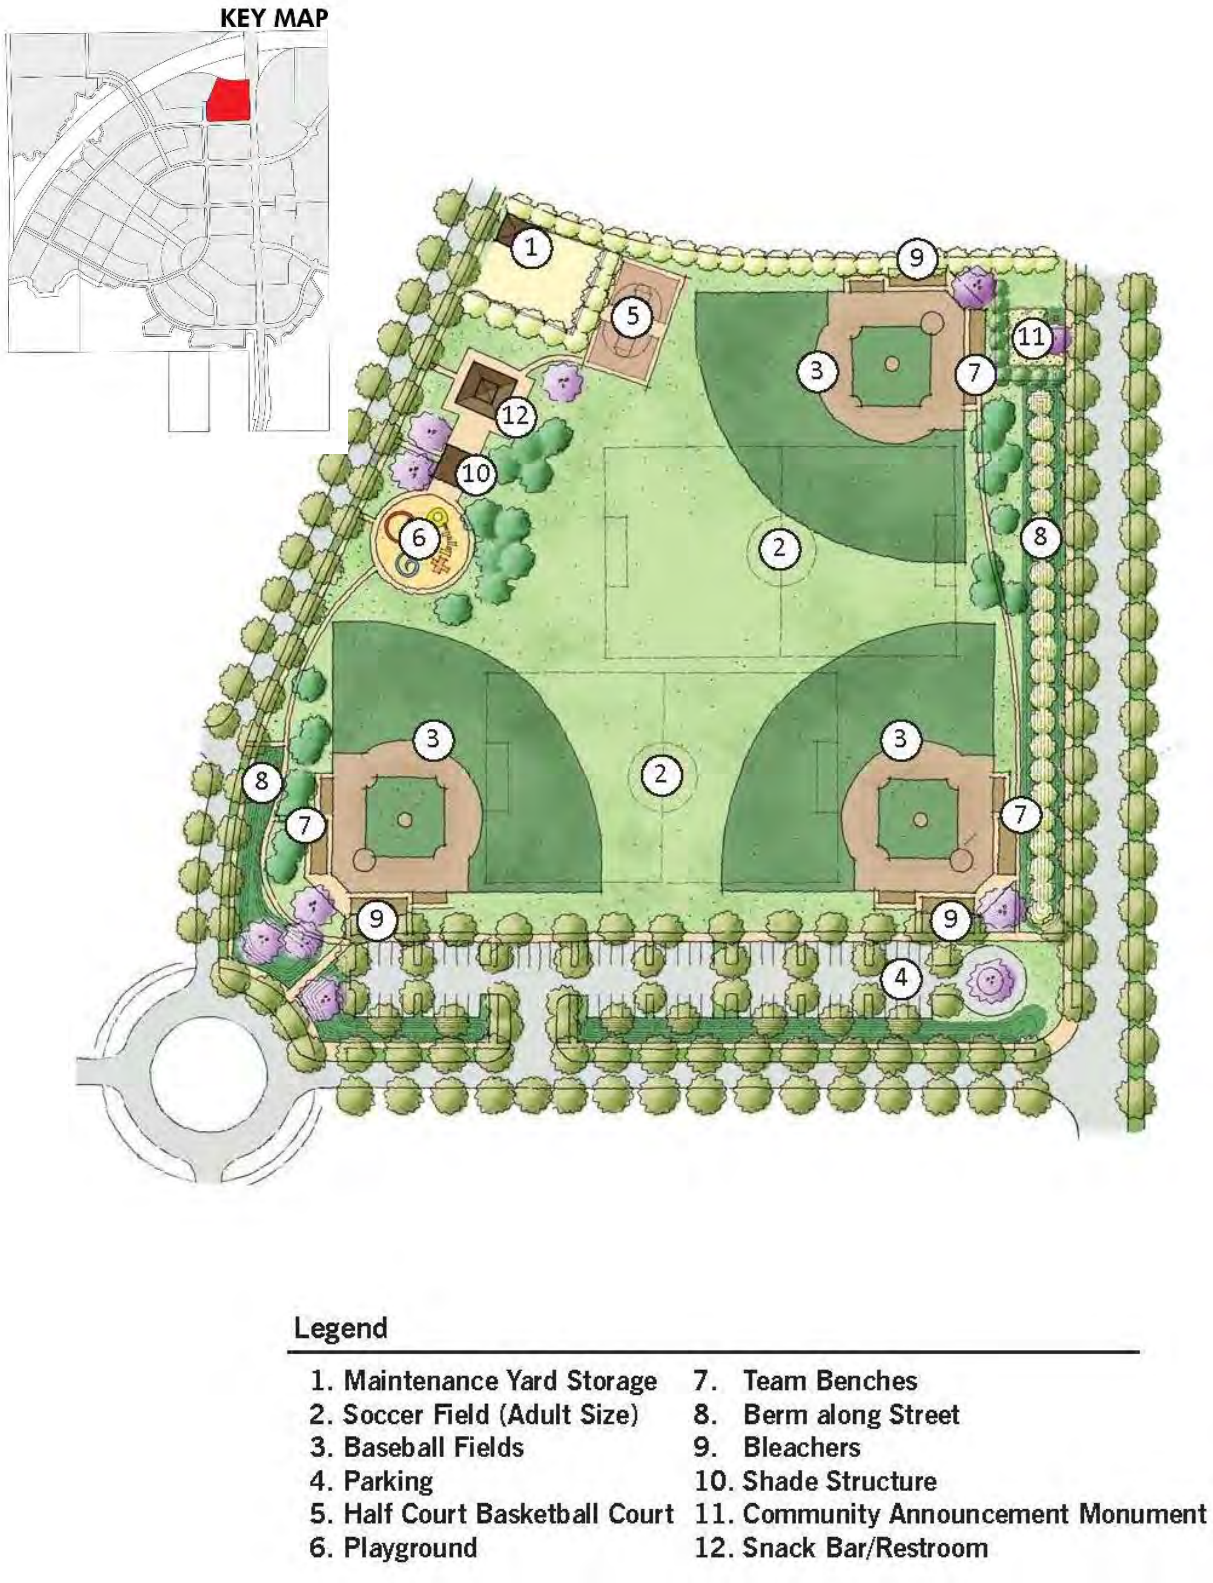

Figure 8.6: AR -62 Conceptual Plan.
Final designs will be developed prior to construction and will consider recreational trends and available budget for both development and maintenance. Curb adjacent sidewalks maybe constructed, at the direction of the Parks Department, along neighborhood park frontage.

AR-63:
The park is located along the southern development edge of ARSP adjacent to the open space to the south of Amoruso Ranch. The character of this park should draw upon that of the adjacent open space with native or naturalized plantings and soft informal forms.

The main amenity for this park may be a dog play area that could include a large shade structure with benches and seating. The area within the enclosed space of the park could also include large shade trees for relief from the sun on hot summer days.

Other amenities within this park could include small passive play areas with shaded seating and open lawn areas. The park also serves as the connection from the community to the bike trail along the open space.

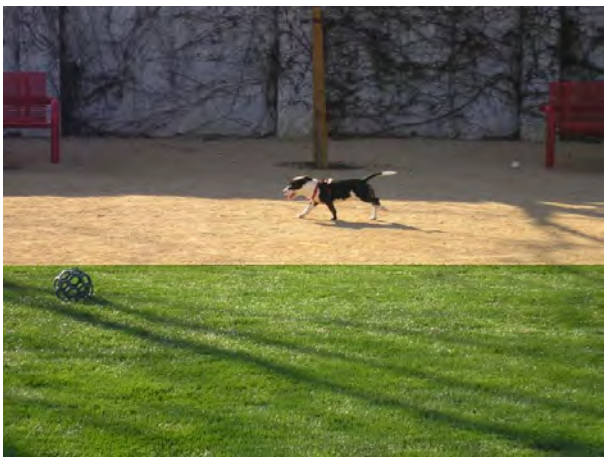

Figure 8.7: AR-63 Conceptual Plan
Final designs will be developed prior to construction and will consider recreational trends and available budget for both development and maintenance. Curb adjacent sidewalks maybe constructed, at the direction of the Parks Department, along neighborhood park frontage.

AR-64:
This long linear park is envisioned as a series of outdoor rooms that are linked from one to another to create a variety of experiences. Widths of these outdoor rooms will accommodate a variety of uses.

Located within this park are expanses of turf which could be used for passive activities such as, tossing the ball around. Other areas within this park contain shaded seating for picnicking. These could occur adjacent to the open turf areas. Where cul-de-sacs or side yard conditions occur, children's play areas or similar uses could be planned to minimize conflicts with adjacent residences. Additional uses in this park could be a series of small landscaped areas with benches for reading or quiet reflection.

Figure 8.8: Park Rendering (AR-64)

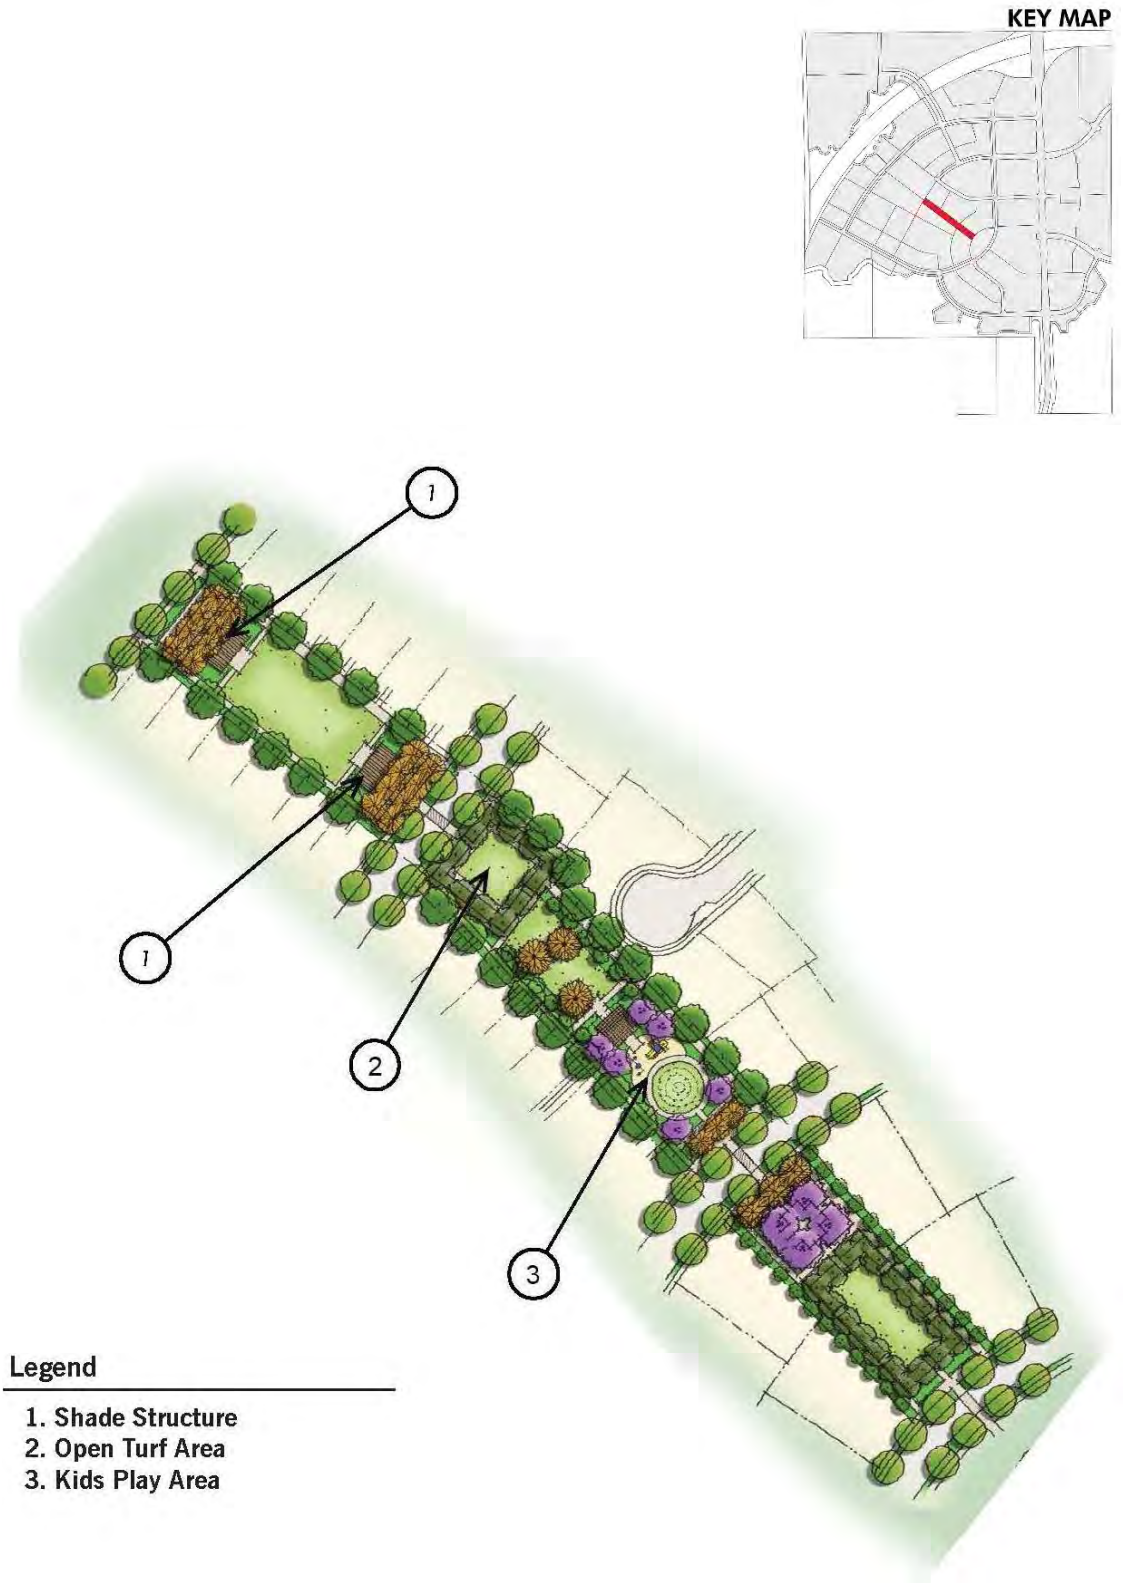

Figure 8.9: AR-64 Conceptual Plan
Final designs will be developed prior to construction and will consider recreational trends and available budget for both development and maintenance. Curb adjacent sidewalks maybe constructed, at the direction of the Parks Department, along neighborhood park frontage.

.***AR-66:***
The park is located at the terminus of the Main Street Promenade. It is planned as the social gathering hub of the community. It is intentionally not over-programmed to provide the flexibility to accommodate many different types of gatherings. The park may also be utilized for events in conjunction with a Village District restaurant or retail events.

The focal point of the park is the Grand Lawn. This open expanse of turf borders the Village District. This multipurpose turf area serves as the main gathering spot for organized events. A Property Business Improvement District or Business Improvement District may be formed to support event and recreational programming.

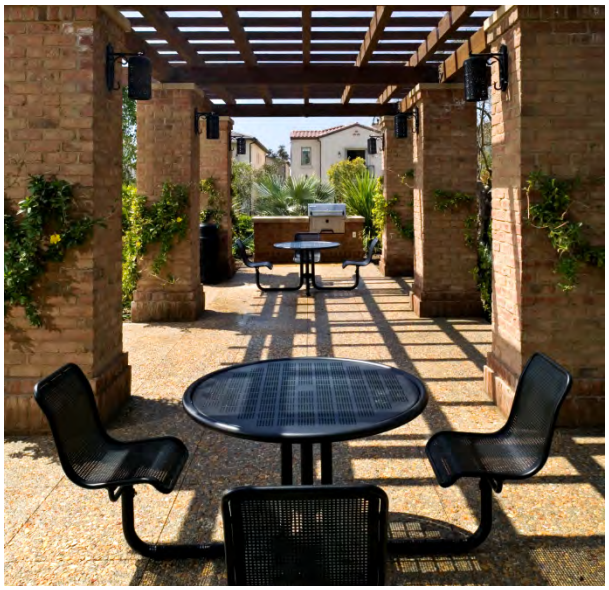

Figure 8.10: AR-66 Conceptual Plan
Final designs will be developed prior to construction and will consider recreational trends and available budget for both development and maintenance. Curb adjacent sidewalks maybe constructed, at the direction of the Parks Department, along neighborhood park frontage.

AR-67:
The Park is located on the eastern edge of the community and mainly serves the neighborhoods east of Westbrook Boulevard. The park is separated into two areas by a long, promenade style walk under an alley of trees linking the two ends of the park.

The west portion of the park contains a tot lot with shaded seating, benches and picnic tables. The east portion of the park contains an open lawn area that could contain a tot lot and can be used for passive play or as a place to picnic, or throw frisbees.

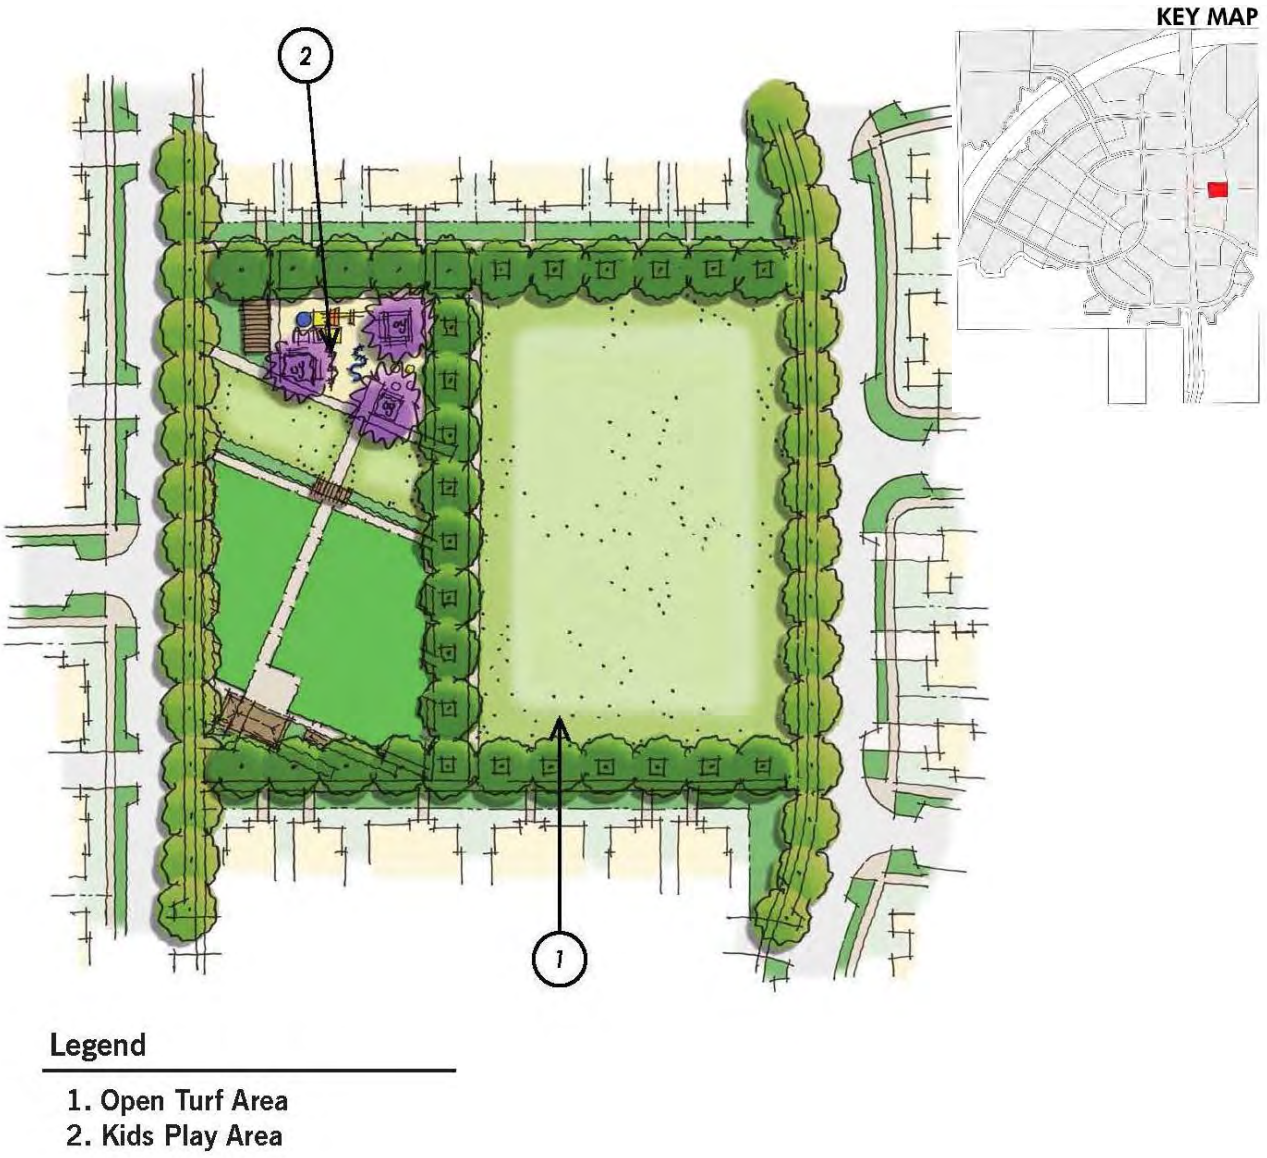

Figure 8.11: AR-67 Conceptual Plan
Final designs will be developed prior to construction and will consider recreational trends and available budget for both development and maintenance. Curb adjacent sidewalks maybe constructed, at the direction of the Parks Department, along neighborhood park frontage.

Pocket Parks

Within each of the residential neighborhoods, there may be smaller green spaces that provide urban relief. They are intended to create focal points within the individual neighborhood and may contain informal children's play areas, benches, open grassy areas, or garden art. Residential units may front onto these parks. It is anticipated that these small pocket parks will be owned and maintained by the neighborhood that surrounds them.

Figure 8.12: Pocket Park Concepts

Streetside Paseo

The Streetside Paseo links most of the neighborhood parks together and creates a strong pedestrian and bicycle amenity throughout the community. Places where the Paseo intersects with neighborhood parks, the Village District or other community features become focal points. These focal points may be highlighted with monumentation, art, signature landscaping elements, benches, drinking fountains or other amenities.

The Streetside Paseo will be a key component of the Amoruso Ranch fitness course that runs throughout the community. Fitness stations will be located intermittently along this loop as well as placards that show the distance traveled along the route.

The Streetside Paseos are specially designed landscape corridors along key roadway, which form a plan-wide network of street separated pathways for bicycle and pedestrian circulation. Situated within the paseo corridors are 10 foot wide Class IA sidewalk that serve both pedestrians and bicycles. The paseos are a significant component of ARSP's open space and network.

Paseos

A community wide system provides a street adjacent environment for walking, jogging, and bicycling, free from automobile interference. These paths may be used for casual bicycling, in-line skating, strolling and jogging. Benches and other amenities are available along the way and individual residential driveways are prohibited across these streets. In addition to the community wide network of paseos, smaller internal paseos provide a block level connection for residents and their guests.

Paseo Examples

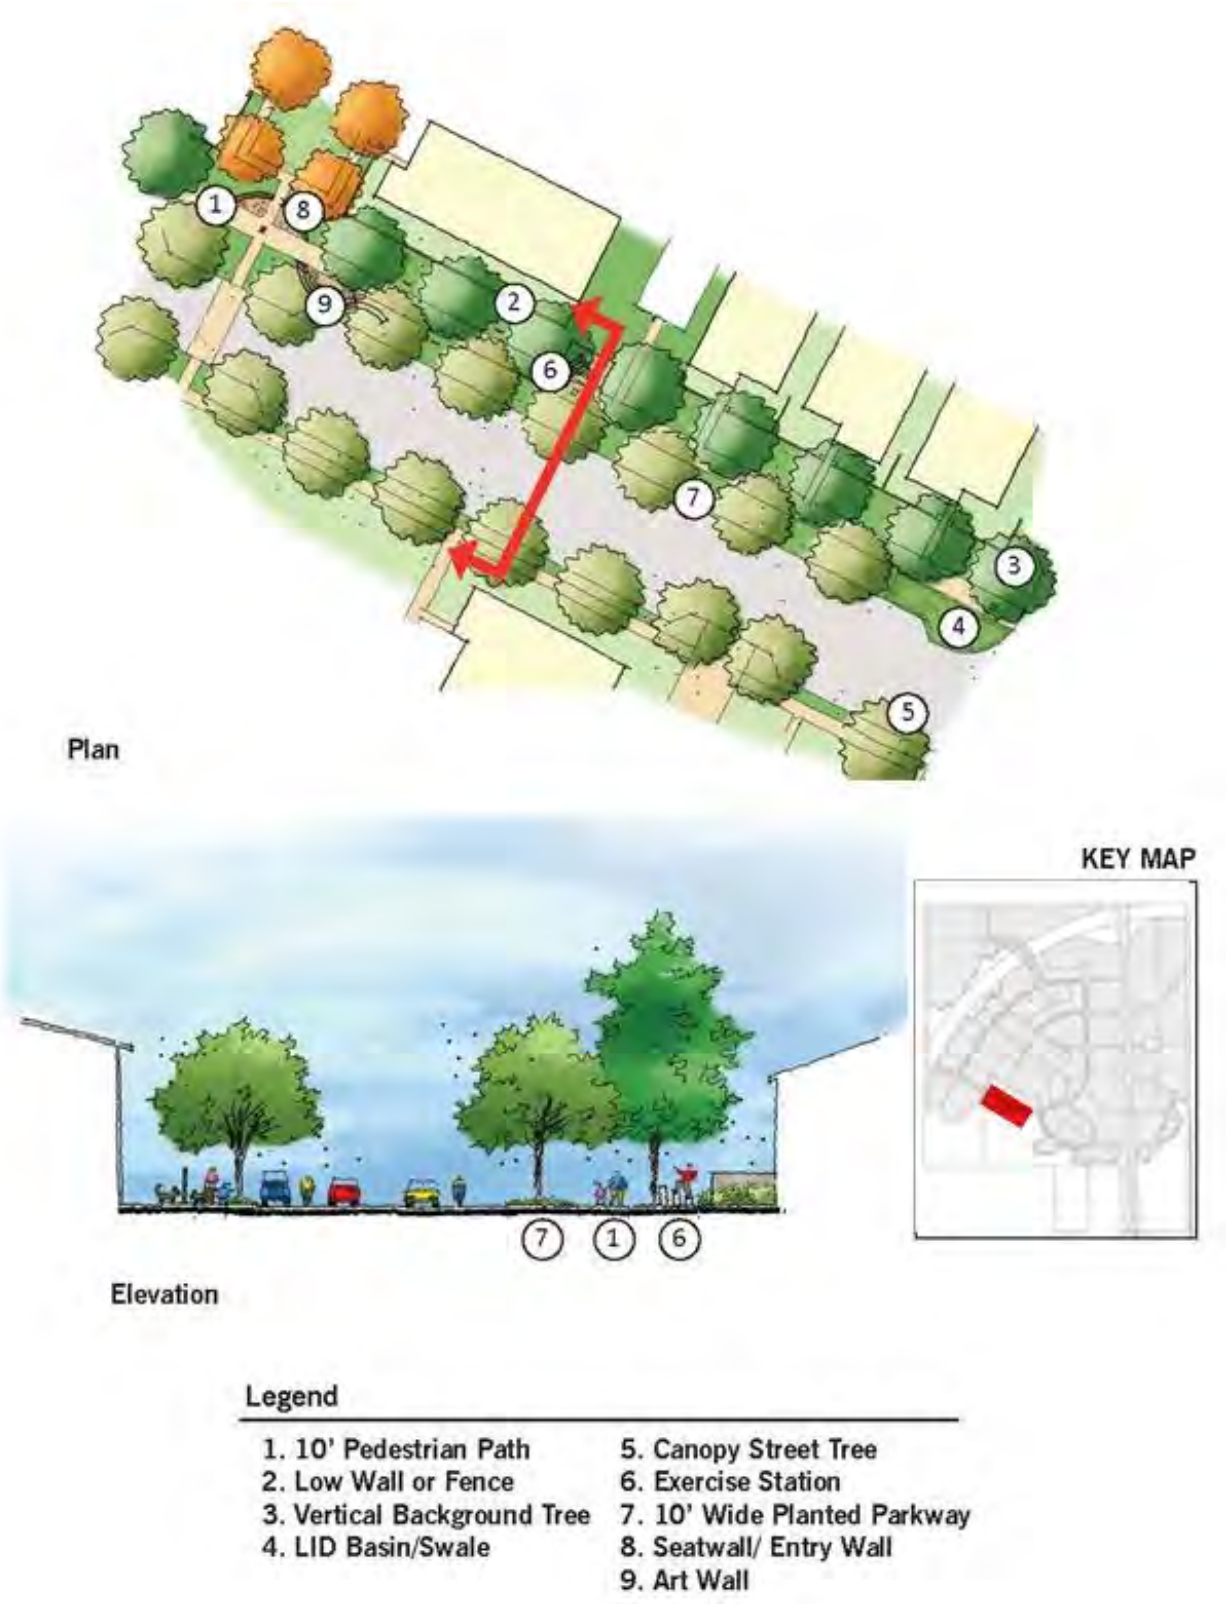

Figure 8.13: Streetside Paseo

Main Street Promenade

The Main Street is a private street that serves as the urban activity hub within the Amoruso Ranch community. The Main Street Promenade functions as the outdoor living room both for immediately adjacent neighbors and visitors. It will have an urban character that mixes uses and spaces with materials, color, architecture and pedestrian scale amenities. It can incorporate retail and dining experiences into public spaces and create comfortable urban lounging for people to mingle and relax. Art pieces can help to create visual points of interest and can be incorporated into the landscape and hardscape elements to capture the spirit and vitality of the Village District. The one-way streets on either side can be blocked off to vehicular traffic for community events such as a farmers market or street fair.

Amenities within the Main Street Promenade can include open plaza spaces, interactive gathering spaces for events, oversized chess sets and game tables and interactive children's play areas, comfortable seating areas, outdoor cafes and restaurant spaces, decorative planting pots, shade trees and focal heritage trees, community art and water features.

(This page is intentionally left blank)

CHAPTER 9 – UTILITIES PLAN

The Amoruso Ranch Specific Plan (ARSP) includes utility infrastructure required to serve the Plan Area. Each component of the utility infrastructure system is designed to accommodate build-out of the ARSP in a phased approach, generally moving from south to north, adjacent to Westbrook Boulevard. Phasing of infrastructure improvements and funding obligations are detailed in the Specific Plan development agreements. Table 9.1 summarizes the utility providers to the ARSP.

Table 9.1
Utility Providers

Utility	***Provider***
Potable Water	City of Roseville
Wastewater	City of Roseville
Recycled Water	City of Roseville
Drainage & Flood Control	City of Roseville
Electric Service	City of Roseville Electric
Natural Gas	Pacific Gas & Electric
Communications	AT&T, Comcast, Wave Broadband
Solid Waste Disposal	City of Roseville

Utility infrastructure will be constructed, dedicated, and easements provided consistent with this Specific Plan, the project development agreements, and other applicable standards and requirements of the City of Roseville.

9.1 Potable Water

The City of Roseville will provide potable water service (supply through wholesale water from the Placer County Water Agency (PCWA), and treatment, and conveyance to the ARSP. Water will be delivered to the site via the City's existing backbone system through the Creekview Specific Plan (CSP) along Westbrook Boulevard.

A. Water Supply and Demand
The water demand for the ARSP is approximately 1,503 acre-feet per year (AFY). With full implementation of water conservation measures described in Section B, below, the ARSP's overall water demand will be reduced by approximately 165 AFY. Water demand, after conservation measures, will be satisfied with a combination of potable and non-potable (recycled) water sources. Non-potable (recycled) water will be utilized for irrigation purposes with a semi-aggressive approach in both wet and dry years. Section 9.2 of this document discusses the proposed recycled water system and recycled water use plans in more detail. To supplement water supply the ARSP includes provisions for one onsite aquifer storage and recovery (ASR) groundwater well on Parcel AR-58. The well will be capable of providing a minimum total supply capacity of 1,800 gallons per minute (gpm).

B. Water Conservation Measures
The ARSP includes significant water-saving measures aimed at reducing overall water demands for potable and recycled water to the extent feasible. The following water conservation measures will be implemented in the ARSP in an effort to meet the City's water conservation goal:

Turf Reductions in Residential Areas
This measure involves limiting the amount of turf in the front yards of residential properties and using a higher percentage of low water use plant species in lieu of turf. Typically, about 75% of a total residential front yard is assumed to consist of landscaping, with the balance consisting of driveways, planters, or walkways. For the ARSP, limitations will be placed on the landscaped portion of each front yard, allowing up to 42% of the total landscaped area to be turf (instead of the typical 75%), with the remaining landscaped area comprised of low water use plant species. For the Roseville area, low water use plantings on average use approximately 65-75% less water than used on a typical turf lawn.

Turf Reductions in Non-Residential Areas (Parks, Paseos, and Landscape Corridors)
This measure involves limiting the use of turf on non-residential parcels, with a focus on water efficiencies at parks, paseos, and landscape corridors. For these areas, landscape design will reduce the area of turf and increase the area of low water use plant species. To achieve the desired water conservation, the following criteria will be implemented:

- Parks. It is assumed approximately 80% of a typical park's square footage consists of turf. The ARSP parks will have a maximum aggregate turf area of 60%, with the remaining 20% area comprised of low water use plant species. Less than 60% turf is acceptable provided it is compatible with the amenities planned for the park.

- Paseos and Landscape Corridors. It is assumed paseos and landscape corridors are typically comprised of 80% turf area. The ARSP paseos and landscape corridors will have a maximum of 60% turf area, with the remaining 20% of the area comprised of low water use plant species.

Smart Irrigation Controllers
Smart and centrally located irrigation controllers restrict irrigation to times and rates necessary to maintain landscaping. They account for changes in the demand for water, which varies with weather patterns and seasonal influences. In the ARSP, smart irrigation controllers will be required for residential, commercial, and quasi-public parcels subject to turf reduction measures, and centrally controlled irrigation controllers for larger commercial and publicly maintained parcels. It is anticipated that these controllers could result in approximately 20% total irrigation water demand reduction.

Re-circulating Hot Water Systems
Re-circulating hot water systems feature a pump on a residential hot water line system which reduces time necessary to receive hot water at any hot water faucet. This type of system will be included on all residential units to generate additional water conservation. It is anticipated that these systems could result in approximately 1.5% total potable water demand reduction.

With full implementation of the water conservation measures outlined above and the recycled water system, as described in Section 9.2, the ARSP will reduce the potable water demand by approximately 437 AFY, resulting in a total potable water demand of approximately 1066 AFY.

C. Water Transmission System

Water will be supplied to the ARSP area via a 24-inch main line extended from the south property line from the proposed CSP area. Within the ARSP, water will be distributed through an infrastructure system that parallels the collector and arterial roadway systems. The transmission and distribution system will consist of 6-inch to 24-inch diameter mains. Connections with neighboring proposed and existing neighborhoods and specific plans will be provided at the south terminations of Westbrook Boulevard, and the eastern terminations of Road “B” and Road “D”. All water improvements will be constructed to the City’s standards using a phased approach.

Figure 9.1 also depicts the overall backbone water distribution system and points of connection. Additionally, the ARSP includes provision for a groundwater well. The water distribution infrastructure will be designed to the City’s standards and constructed and installed over time to coincide with development entitlements, and would be designed to accommodate buildout of the ARSP.

Details regarding the water facilities are contained in the ARSP Water Master Plan and the ARSP Environmental Impact Report (EIR) on file with the City.

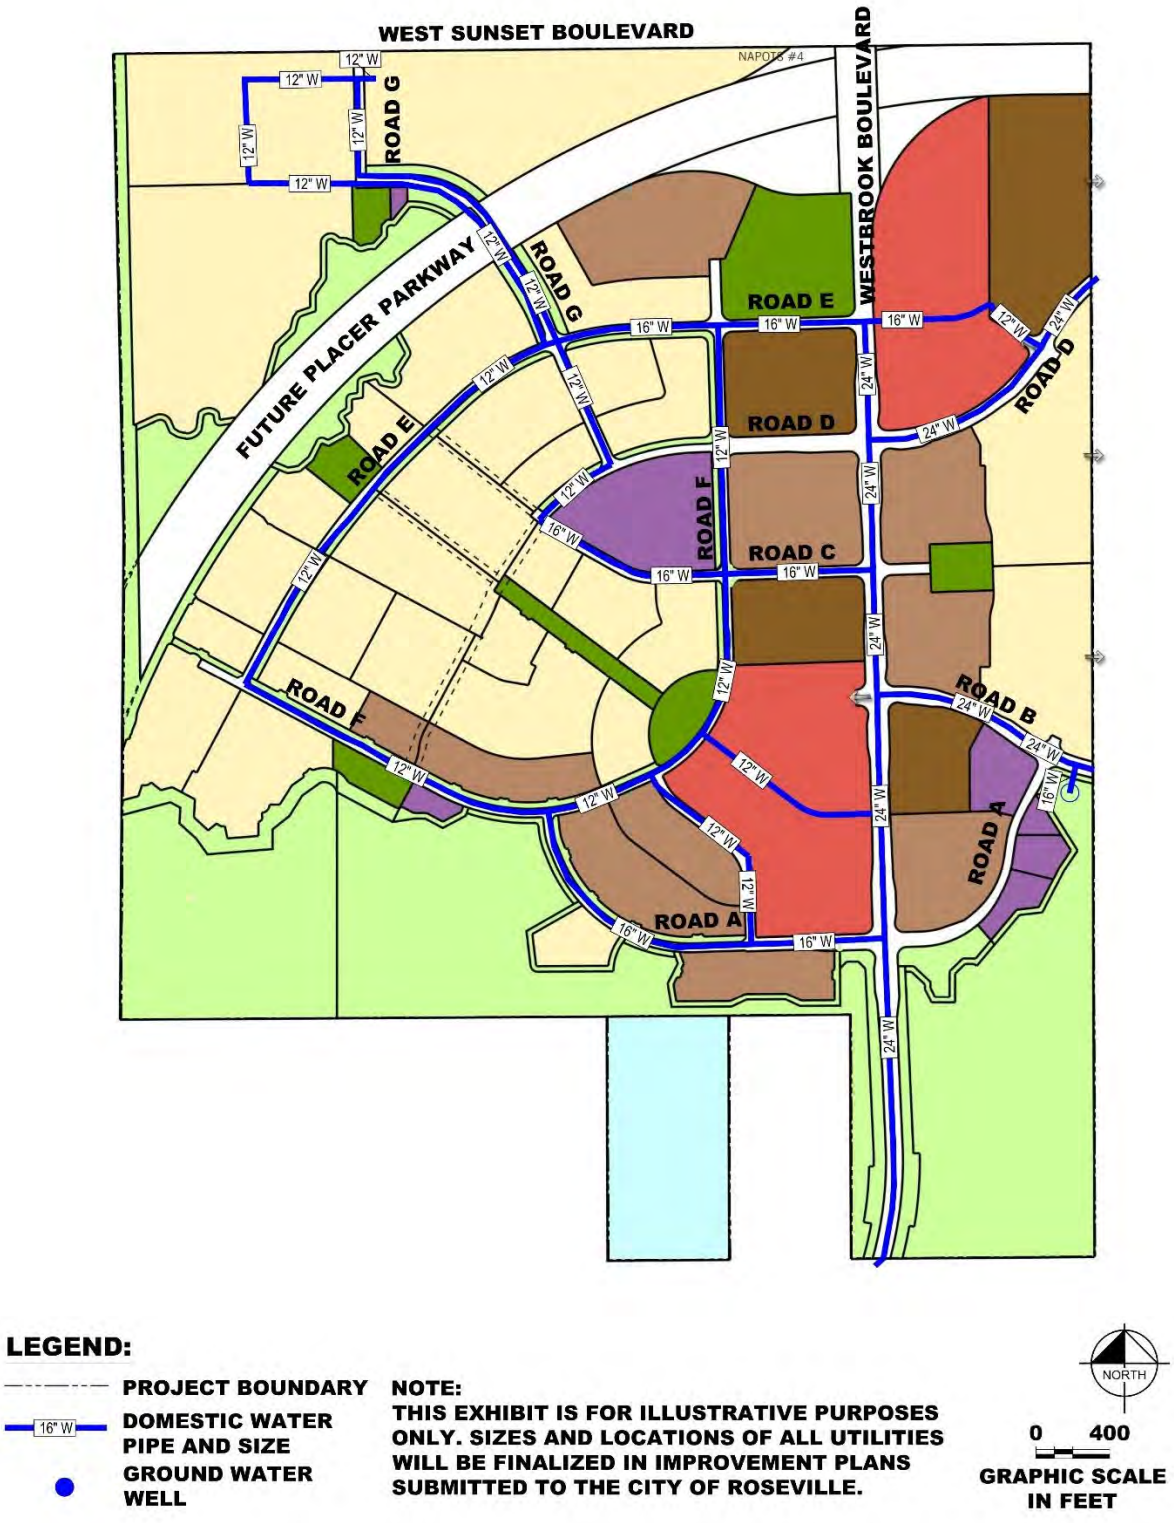

Figure 9.1: Water Distribution System & Facility Locations (updated ~~May 2021~~ January 2022)

9.2 Recycled Water

The City's recycled water system currently delivers approximately 3,000 AFY of recycled water to parks, street landscaping areas and golf courses within the City limits. The City has evaluated the ARSP as one of several Urban Growth Areas (UGAs) that will require additional recycled water.

The City will ultimately provide the ARSP with recycled water from the Pleasant Grove Wastewater Treatment Plant (PGWWTP). The ARSP will use recycled water to irrigate landscaping at the proposed community pocket parks, sports fields, the proposed school parks/sports fields, the commercial and village center areas, as well as publicly landscaped areas such as the organic and traditional paseos and other landscaped medians. Recycled water will also be used to irrigate landscaping within multi-family residential parcels. The estimated annual recycled water demand in the ARSP is approximately 272 AFY. Through implementation of water conservation measures described in Section 9.1B, above, this demand is reduced by approximately 50 AFY. The use of recycled water for irrigation purposes offsets potable water demand typically needed for irrigation.

Recycled water will be supplied to the ARSP via infrastructure within the West Roseville Specific Plan and the Creekview Specific Plan. In order to provide capacity to serve the ARSP's demand that may exceed the City's available committed supply, the ARSP will be required to provide storage facilities capable of storing recycled water demand during one peak day, which has been determined to be a 24-hour period in July. . The storage of recycled water for ARSP is planned to be located within an Infill Area adjacent to the City's existing Roseville Energy Park just north of Phillip Road at the intersection with West Park Drive. This proposed facility would also serve the storage needs of the Creekview Specific Plan. The ARSP onsite backbone system of dedicated non-potable water lines ranging in size from 6 inches to 12 inches will be constructed running parallel to the collector and arterial roadway system, and is depicted in Figure 9.2.

The recycled water distribution infrastructure will be constructed and installed over time to coincide with development entitlements, and would be designed to accommodate buildout of the ARSP. All recycled water improvements will be constructed to the City's standards using a phased approach. Specific details regarding the recycled water facilities and supplies, including technical analysis, are contained in the ARSP Recycled Water Study and the ARSP EIR on file with the City.

9.3 Wastewater / Sanitary Sewer

Sanitary sewer service will be provided by the City of Roseville. Wastewater generated within the ARSP will be treated at the City's Pleasant Grove Wastewater Treatment Plant (PGWWTP) The PGWWTP is located west of Phillip Road and south of Blue Oaks Boulevard, within the WRSP. The ARSP is estimated to generate approximately 0.61 million gallons per day (mgd) average daily wastewater flow.

The backbone wastewater collection system is illustrated on Figure 9.3. Wastewater flows from the ARSP will be directed to the PGWWTP through the southern portion of the site, where it will connect with an existing transmission line to be provided by the proposed CSP. Infrastructure within the CSP area was planned and sized to accommodate flow from the ARSP. On-site sewer collection pipes will range in size from 6 inches to 24 inches. Two lift station facilities will also be required. One small lift station (located on Parcel AR-56) will be needed to pump wastewater under the proposed Placer Parkway alignment from the northwest property corner. The second, and larger, lift station (located on Parcel AR-57) will be needed in order to pump the wastewater from the ARSP to a connection point within the CSP. The wastewater collection infrastructure will be constructed and installed over time to coincide with development entitlements, and would be designed to accommodate buildout of the ARSP.

All sewer improvements will be consistent with the South Placer Regional Wastewater and Recycled Water Systems Evaluation and will be constructed to the City's standards using a phased approach. Details regarding the sanitary sewer system are contained in the ARSP Sanitary Sewer Master Plan and the ARSP EIR on file with the City.

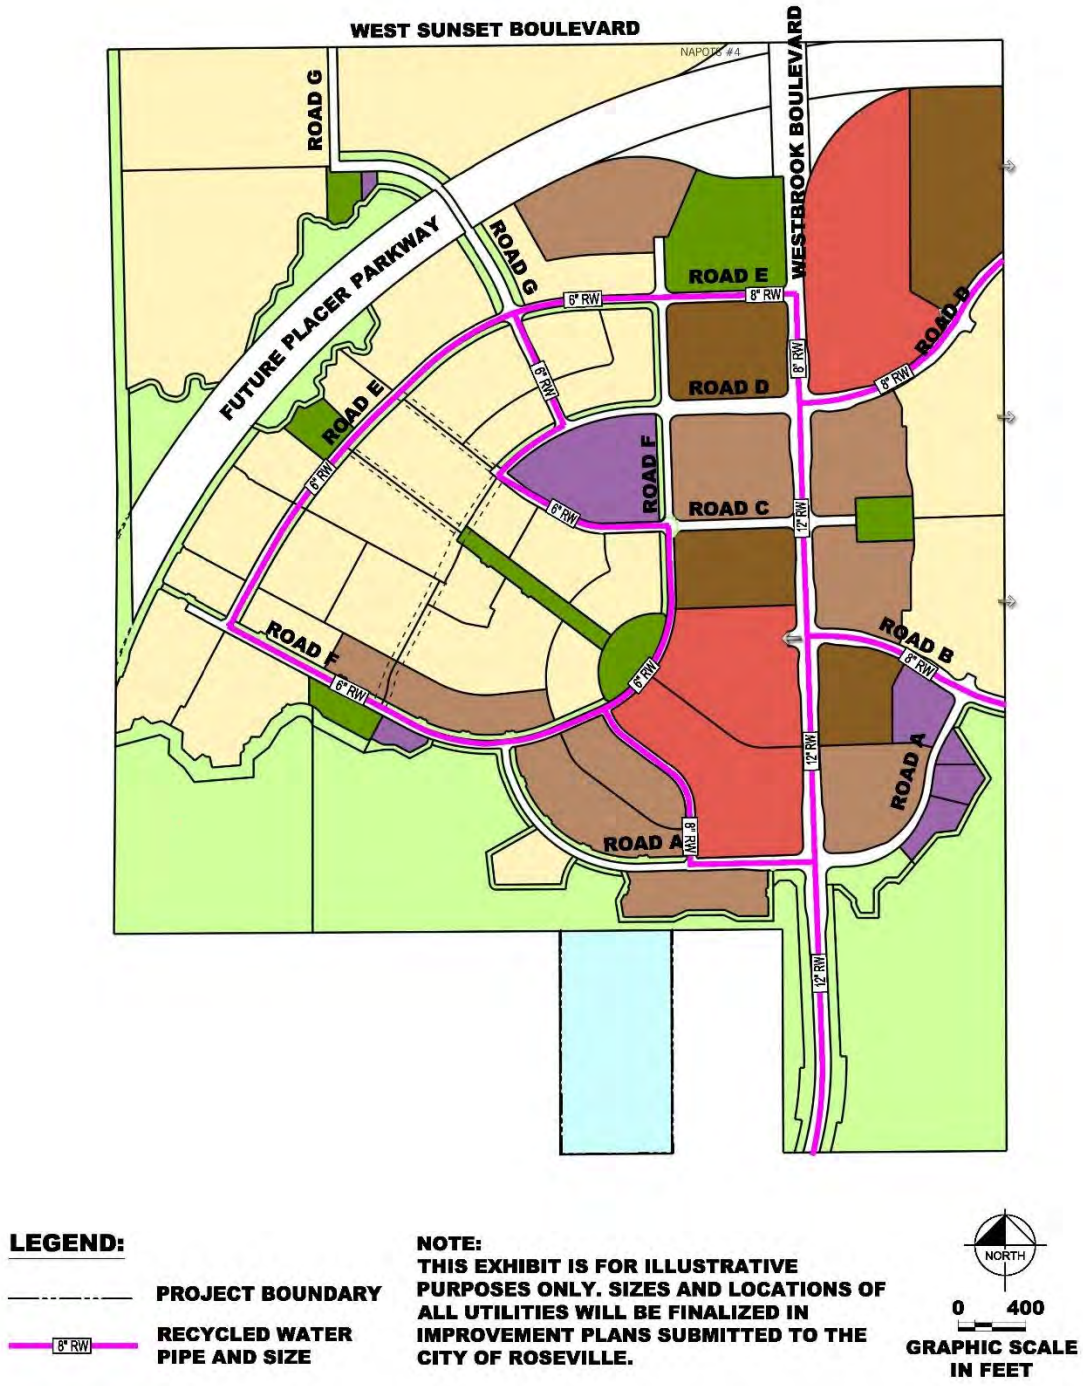

Figure 9.2: Recycled Water Distribution System & Facility Locations (updated May 2021)

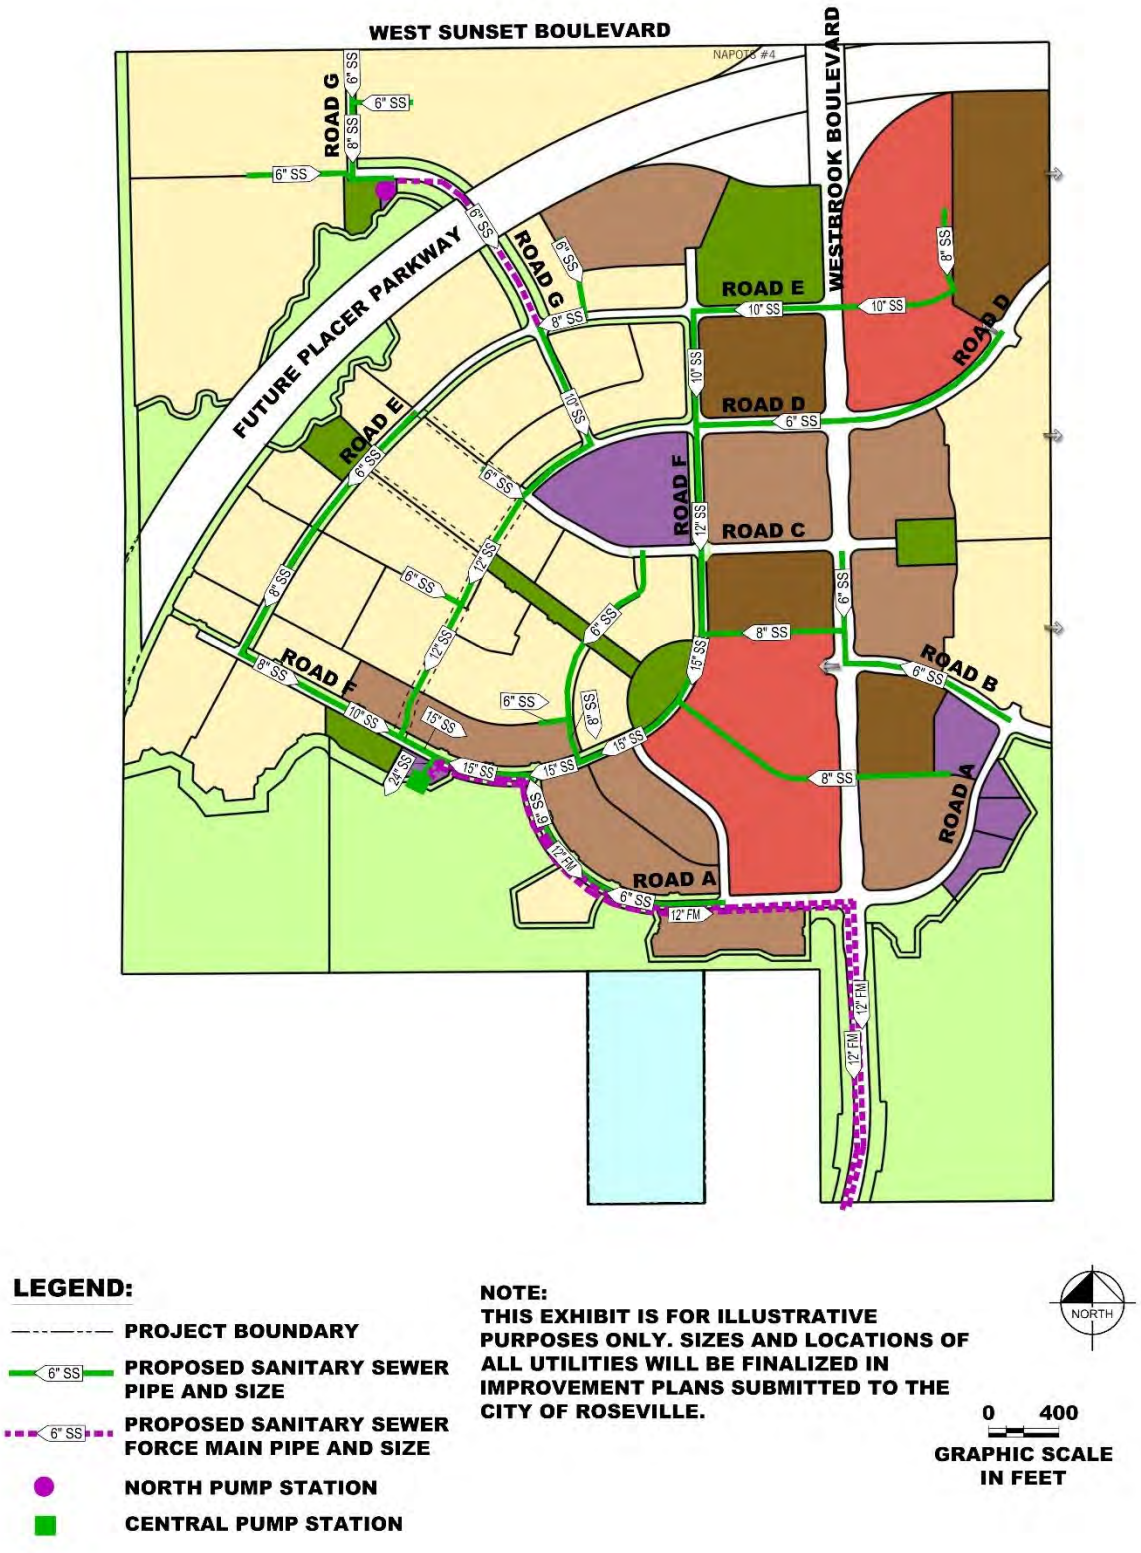

Figure 9.3: Sanitary Sewer Distribution System & Facility Locations (updated ~~May~~ ~~October~~ ~~2021~~ January 2022)

9.4 Drainage & Flood Control

A. Existing Conditions

The ARSP is entirely contained within the Pleasant Grove Creek watershed, which is located within the larger Natomas Cross Canal watershed of northwestern Placer County and southeastern Sutter County. The Pleasant Grove Creek watershed drains to the Pleasant Grove Canal, to the Natomas Cross Canal, and then to the Sacramento River.

Most of the ARSP drains to Pleasant Grove Creek by overland flow or through a few man-made agricultural channels.

University Creek, a tributary to the Pleasant Grove Creek, meanders westerly near the southern boundary of the ARSP, crossing both the southeast and southwest corners of the ARSP before and after passing through the Creekview Specific Plan (CSP) area (immediately south of the ARSP). An area around and including this tributary is covered by Zone A on the currently effective Flood Insurance Rate Map (FIRM) panel 06061C0400F dated June 8, 1998. The approximately four square mile University Creek drainage shed is relatively undeveloped. Rainfall within this drainage shed influences the peak flows of University Creek as it traverses through the Plan Area. The ARSP area is comprised of multiple drainage sheds that drain from the site in several directions, with the southern portion of the Plan Area draining directly into University Creek.

As a result of past farming practices, immediately downstream and to the west of the Plan Area, University Creek has been channelized and redirected to the south around agricultural (rice) fields before turning due west to its confluence with Pleasant Grove Creek. The property to the southwest of the project site is part of the City of Roseville's flood control Retention Basin Project designed to mitigate downstream volumetric impacts resulting from development within the City as described in the City of Roseville Retention Basin Project final Environmental Impact Report (EIR) dated January 10, 2003. The Final EIR refers to University Creek near the southern boundary of the project site as "Northern Tributary Two." The channeling of the natural creek system west of the Plan Area creates a bottleneck which restricts downstream conveyance of floodwaters resulting in an unnatural and expanded 100-year floodplain which results in raising water surface elevations higher than the historic floodplain conditions.

Further, existing County residents to the northwest and north have experienced flooding due to man-made alterations. The ARSP proposes to alleviate a portion of the existing off-site flooding by redirecting flows from the northern portion of the Plan Area that in the pre-project condition drain off the site to the north, to the south, and through the drainage system (Figure 9.4) with ultimate discharge into University Creek.

B. Proposed Site Grading

The project site will be graded such that the base building pad elevation will exceed the regulatory flood elevation by a minimum of two feet.

The project site will be generally graded from a high point in the northeast property corner to a low point in the southwest property corner, which generally follows the existing site topography. The major roadways will generally follow existing grades and connect with existing edge conditions at the south (Creekview Specific Plan), and at the north (Placer Parkway and West Sunset Boulevard.)

C. Drainage System

The Drainage Master Plan (DMP) for the project describes and evaluates a drainage system that collects on-site storm water and conveys it to two discharge points. Storm water generated from the northerly 300 acres of the site is redirected southward within open channels and combined with stormwater generated from portions of the southern area of the site to discharge into University Creek at the southwest corner of the site. The remaining storm water generated from the eastern portion of the site will be directed to the second discharge location and into University Creek.

The open channels within the plan are will be designed to convey 100-year flows with a minimum of 1-foot of free-board. A utility maintenance road will be constructed adjacent to the channels to provide future maintenance vehicle access and inspection. Ramps from the adjacent utility maintenance roads and into the bottom of the channels will be constructed to facilitate easy access into the channels. The bottom of the channels will be designed and constructed in a manner that will provide channel stability, maintenance vehicle stability, opportunity for infiltration, and vegetative growth that can be credited towards the overall water quality objectives. Maintenance costs for the channels will be assessed through the Community Facilities District for maintenance.

Peak flow rate increases resulting from the proposed development will be mitigated through such features that include vegetated treatment swales, and creation of additional conveyance with a created channel system located on the western boundary, and along the southern open space. Traditional permanent detention basins for peak stormwater flow-attenuation are not planned.

Onsite drainage improvements consist of a combination of conventional subsurface and surface drainage systems, construction of pipe conveyance systems and construction of culverts and bridges at roadway and trail crossings of creeks and tributaries. Where applicable, outfall structures will be extended past any planned bikeway alignments in the open space areas.

Prior to the collection and conveyance of the storm water into the drainage system, all storm water flows will be directed into low-impact-development (LID) and other storm water Best Management Practice (BMP) features throughout the site. The use of storm water LID's and BMP's is a requirement of the State Issued MS4 permit, further discussed below, which establishes the criteria that promotes improving the water quality discharges before entering the traditional underground storm drain network. The storm drain system will have a network of underground storm drainage pipes ranging in size from eight inches to 72 inches in diameter, as illustrated in Figure 9.4. The stormwater will then outfall either to a conventional outfall within open space parcel AR-96 (with a constructed swale to direct outfall flows to University Creek, or to one of the three open channels that converge into one discharge point that will ultimately discharge directly into University Creek near the southwestern corner of the ARSP. If detention basins are located on site they would be sized for hydromodification management of the development.

The City of Roseville Retention Basin project mitigates downstream volumetric impacts resulting from development projects constructed within the City. A drainage impact fee is assessed to all new development at the time of building permit issuance for the construction cost of the future facility. The retention facility is located on the City of Roseville's Al Johnson Wildlife Area site, immediately southwest of the ARSP. Per the Retention Basin Final Environmental Impact Report dated January 10, 2003 the retention facility will mitigate for the hypothetical 8-day, 100-year flood event. Although the ARSP was not contemplated as a contributing land mass as part of the MOU area subject to the drainage impact fee and the mitigations provided by the retention facility at the time it was established, the City will annex the ARSP into the MOU and assess a drainage mitigation fee to the ARSP for its contribution towards the construction of the retention basin. Therefore, the facility will be used to mitigate the ARSP volumetric increase.

The location and sizes of the drainage facilities are based on the best available information and is subject to refinement during the subdivision map and improvement plan approvals. Drainage facilities will be designed and constructed in conformance with the City of Roseville Improvement Standards and other permit criteria applicable at the time of development.

Specific detail regarding the drainage system is contained in the ARSP Drainage Master Plan and ARSP EIR on file with the City.

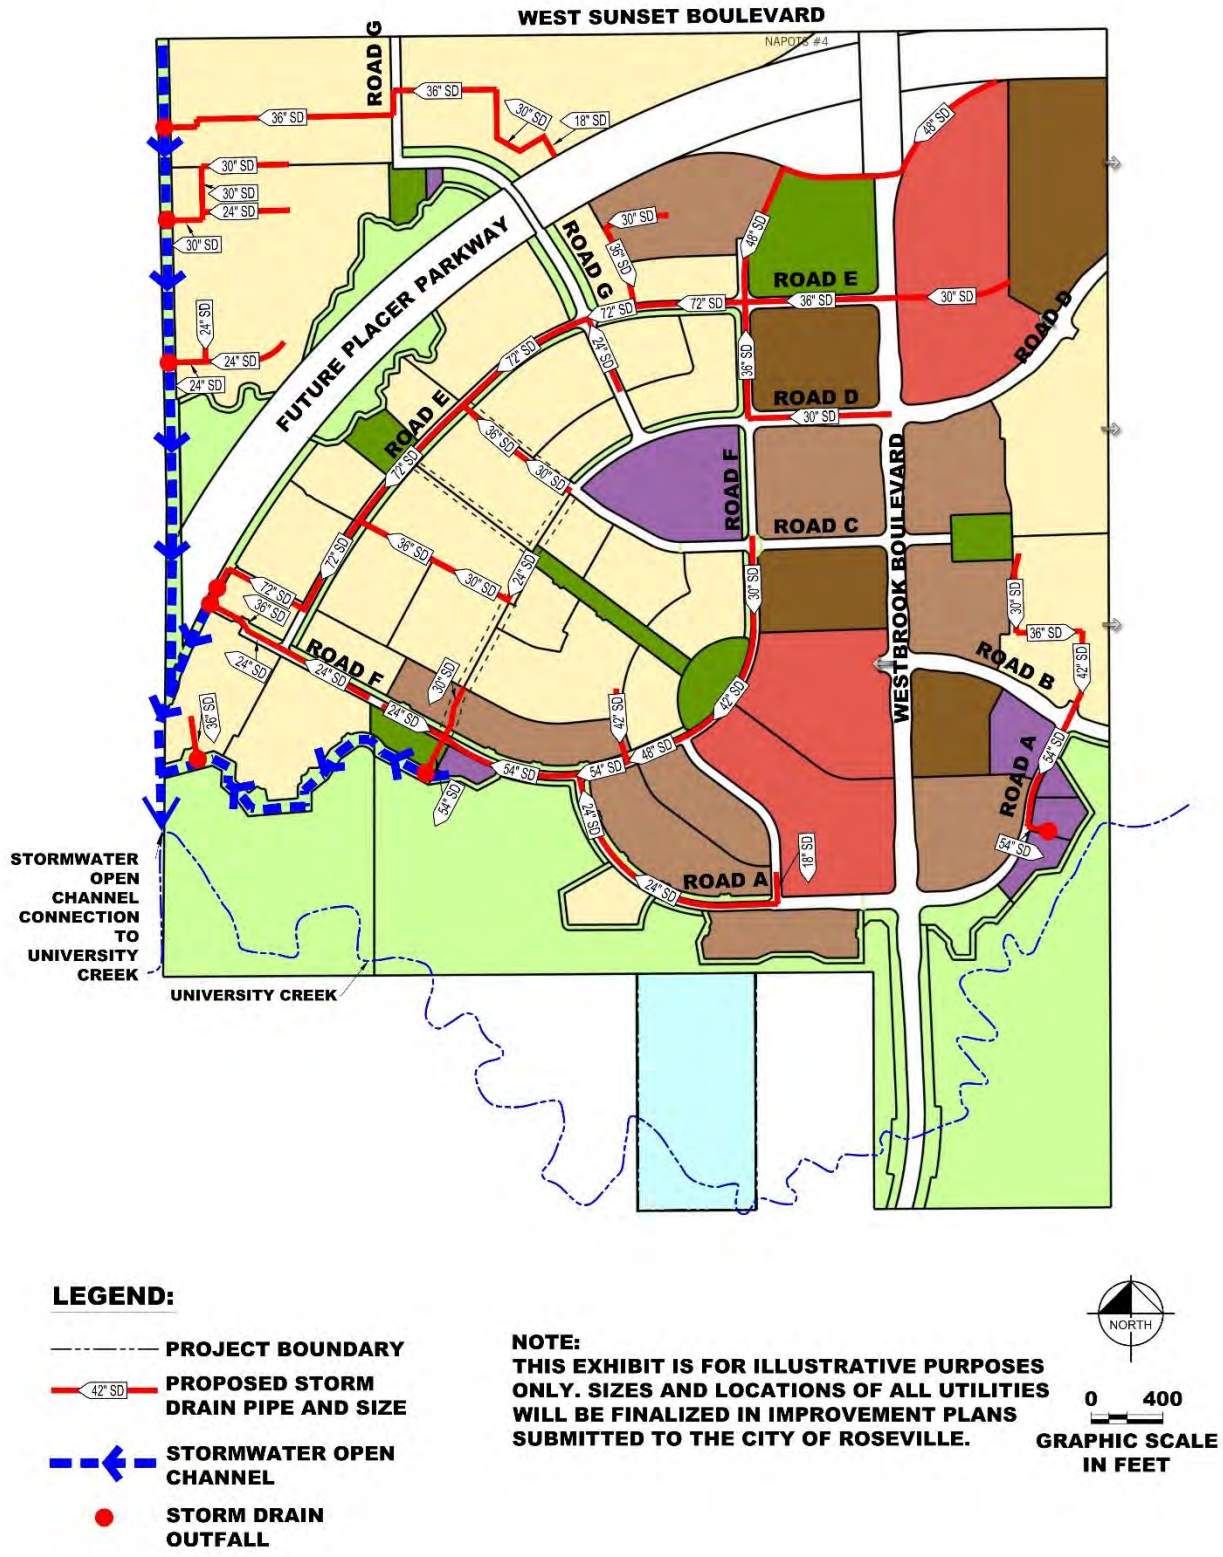

Figure 9.4: Storm Drainage System & Facility Locations (updated ~~October~~ ~~October 2021~~ January 2022)

9.5 Stormwater Quality

The ARSP provides a comprehensive plan for the management of urban runoff for flow control and water quality improvement. The integrated stormwater management system plan is reflected, in part, in specific design criteria contained in this section. The objectives of the stormwater management plan are intended to fulfill the requirements of the City's National Pollutant Discharge Elimination System (NPDES) Phase II Permit, as issued by the State Water Resources Control Board, and to minimize the negative effects of urban stormwater runoff on the natural open space areas, including wetland areas and principal drainage corridors.

The ARSP design will be in accordance with permit criteria applicable at the time of development. The stormwater management plan provides the framework for stormwater treatment during two components of the development process. First, during the construction phase while infrastructure is being built to support the community, and, then during the post-construction phase which will be part of the improvements that make up the community and continue to protect the natural resources in perpetuity. Each phase of the development will have specific stormwater quality features integrated for the construction and post-construction states, ensuring that water quality is maintained to agency standards even when the full development has not been built out.

A. Stormwater Management During Construction Activities
The release of on-site stormwater runoff during construction activities is regulated by the State General Construction Permit issued by the Regional Water Quality Control Board for all construction sites. The General Construction permit requires a Storm Water Pollution Prevention Plan (SWPPP) address how stormwater from the construction site will be maintained and treated prior to being discharged from the site. The SWPPP is an evolving document which changes with the dynamics of the site development.

The use of Best Management Practices (BMPs) during the construction process will generally incorporate erosion controls and sediment controls. Erosion and sediment control BMPs include such things as applying straw mulch to disturbed areas, the use of fiber rolls and silt fences, sedimentation basins, drain inlet protection, stabilized construction accesses, and material management. The final sizing and selection of nonmechanical BMPs will consider requirements specific to the Pleasant Grove watershed and proposed development activities.

B. Post Construction Stormwater Management
Post construction stormwater management is intended to treat the urban runoff generated on-site in perpetuity. The BMP techniques within the site will reduce and/or eliminate the pollutants from the urban stormwater runoff and prevent the contamination of receiving waters. The ARSP will work with the permit criteria applicable at the time of development and in conformance with the City of Roseville Improvement Standards, the City's Stormwater Quality Design Manual, the Placer County Flood Control Agency's Stormwater Management Manual, and the City's Open Space Preserve Overarching Management Plan, to design and address post construction stormwater treatment.

Post construction stormwater treatment is composed of three general elements: source control, runoff reduction (hydromodification) and treatment of runoff. All three elements will be used in the ARSP. The basic practice of source control is to minimize the potential for constituents to enter runoff at the source with the general premise of keeping clean water clean. LID and bio-retention measures are the main tool the ARSP will employ for runoff reduction and hydromodification attainment. Implementation of LID and bio-retention facilities includes construction of decentralized small-scale improvements designed to provide local infiltration and treatment opportunities that reduce the quantity of runoff entering the storm drain systems during the design rainfall events specified in the State Permit. LID and bio-retention will be implemented to offset runoff increases which occur with the development as a matter of the conversion of native ground surfaces to impervious cover. Additional treatment control BMPs may be located as end of the pipe treatment to provide further treatment of the stormwater before it enters into the natural creek system. The open channels will be designed to provide a certain level of treatment. Depending on the effectiveness of the above referenced strategies to reduce runoff of the design storm events, retention facilities will be incorporated to ensure that hydromodification objectives have been met.

C. Low Impact Development (LID) and Bio-retention

Low impact development (LID) and bio-retention is an approach to stormwater management emphasizing the use of small scale, natural, constructed and proprietary drainage features integrated throughout a project site to capture urban runoff and precipitation of the design storms. LID measures can slow, clean, infiltrate, and evaportranspire runoff, improving the quality and reducing the quantity of urban runoff entering the city storm drain systems. This is an integral runoff reduction strategy to achieve the hydromodification objectives of the permit. The added opportunities for infiltration offered by the use of LID can add water to local aquifers, increasing water reuse. It is a sustainable practice which benefits water quality protection, stream stability and can contribute to water supply.

The intent is to incorporate the systems of natural processes into a built environment and to mimic the natural environment in its capacity to absorb the storm water generated from the design storm events. In addition to traditional stormwater management, which collects and conveys stormwater runoff through storm drains, pipes, or other conveyances to a centralized stormwater facility, LID and bio-retention within the ARSP will take a different approach by using site design elements and stormwater management to minimize changes to the site's predevelopment runoff rates and volumes.

Key principles of low impact development include:

- Decentralize and manage urban runoff to integrate stormwater management throughout the watershed;
- Preserve the ecosystem's natural hydrological functions and cycles;
- Account for a site's topographic features in its design;
- Reduce directly connected impervious surfaces to slow runoff and provide additional infiltration opportunities; and
- Reduce impervious ground cover and maximize infiltration on-site.

As the ARSP develops, specific LID techniques, tools, and material, specified in construction documents, will control the amount of impervious surface, increase infiltration, and improve water quality by reducing runoff from the developed sites.

A number of LID elements may be implemented into development plans with ARSP to achieve an overall reduction in stormwater runoff. The selection and use of these elements may vary by development project, depending on the runoff reduction needed. The various LID options may include, but are not limited to, the following:

- Disconnected roof drains;
- Disconnected and separated pavement;
- Bio-retention facilities, rain gardens, and bioswales;
- Tree Planting;
- Grass swales and channels;
- Curb cuts and vegetated filter strips;
- Impervious surface reduction – permeable pavements and porous pavements;
- Stream Buffers;
- Soil Amendments; or
- Pollution prevention and good housekeeping practices.

An additional project design element within the open space areas will also provide benefits. The onsite open channel will provide additional floodplain storage capacity which will be factored into the project hydrology analysis. The channel will also provide LID and treatment potential including: added infiltration opportunities, evapo-transpiration opportunities, nutrient uptake, biological filtering, and stream buffers.

D. End of Pipe Stormwater Treatment Control

In addition to the implementation of the above-referenced LID and bio-retention measures, the storm drain system will be designed to provide additional protection of the natural environment and receiving water of Pleasant Grove Creek by providing nonmechanical end of pipe treatment techniques. This element adds to the treatment train and consists of final treatment elements such as grass treatment swales.

Special consideration will be taken to capture, convey and release the urban stormwater to the creek system. The treatment and conveyance of storm runoff in and through the open spaces will be made part of the Corp of Engineers 404 permitting process. Standard practices include the use of headwall structures, directly at the outfall location, to stabilize and protect the outlet pipe, surrounding topography and aid in velocity attenuation while minimizing future maintenance costs.

A conveyance "grassy swale" consistent with the City's Open Space Preserve Overarching Management Plan (OSPOMP) which directs stormwater from the pipe outlets to receiving waters while avoiding sensitive habitat will be used at each outfall. Depending on the size of and frequency of particular storm events, and the actual drainage area being conveyed, the conveyance swales will be armored with geo-synthetics to minimize the potential for future erosion and rilling of the open space. Soft-armoring will provide opportunities to create grassy swales and additional wetland habitat to aide in stormwater filtration and infiltration. Based on the LIDs planned, the need for additional filtration units is not anticipated. However, additional structural BMPs can be added to the treatment train and end of pipe treatment if needed. These may include such devices as:

- Installation of "fossil filter" or equivalent petroleum absorbing insert assemblies in the project drop inlets;
- Trash screen vaults; or
- Other structural BMPs as approved by the City.

The final selection of BMPs will consider requirements specific to the Pleasant Grove Creek watershed and proposed development flows. Other BMPs will involve prompt re-vegetation of disturbed areas and proper erosion protection per the NPDES permit during construction.

9.6 Dry Utilities

Electric, natural gas and telecommunications facilities will be extended in joint trenches and made available to all parcels in the ARSP. This will be accomplished by placing the joint trenches in public utility easements (PUEs) or road rights-of-way when appropriate as depicted in the Circulation Plan – Chapter 7. Reduced PUE's may go through the Design Review for Residential Subdivision (DRRS) during small lot tentative map process and be approved by the City so that homes with front porches close to the sidewalk are encouraged in a Plan Area.

A. Electric Service

Roseville Electric, the City's electric utility, will provide electric service to the ARSP. Roseville Electric operates the Roseville Energy Park (REP), a 160-megawatt natural gas-fired, electric power plant, which uses state-of-the-art equipment to locally generate approximately half of the City's electricity needs. The Roseville Energy Park is located south of the ARSP. Additional electricity resources needed to serve the ARSP, including state and federal mandated renewable electricity resources, will be purchased from outside sources or generated by new Roseville-owned generating facilities. As required by state regulations, Roseville will use energy efficiency programs and initiatives to meet electricity demand, before acquiring new electricity sources.

Electric Energy Efficiency and Conservation

The ARSP includes implementation of cost-effective energy efficiency, load management, and renewable energy programs to meet electricity demand, before new electricity sources are acquired.

Peak Electric Demand and Distribution

Peak electric demand for electrical service is estimated to be 21 mW per year at full build out. Currently, an electric substation is planned to be constructed within the Creekview Specific Plan Area. This substation is expected to be approximately 0.9 to 1.0 acres.

Underground electrical distribution will be extended to the ARSP area through a 12 kV system to individual parcels in conjunction with roadway improvements or as phasing requirements dictate. Street lighting, signal power and other ancillary power facilities will be provided along all public street frontages

as part of the overall roadway frontage improvements. All electric and street light facilities will be constructed to the City's standards at the time of construction.

B. Natural Gas

Pacific Gas & Electric Company (PG&E) will provide natural gas upon request and in accordance with the rules and tariffs of the California Public Utilities Commission. PG&E's long-range plans provide for availability of gas service to accommodate increased demand. Service will be provided to the ARSP through extensions planned by the CSP. Delivery of gas service to individual projects in the ARSP will be reviewed by PG&E at the time of proposal.

C. Communication

The ARSP is within the service areas of AT&T, Comcast, and Wave Broadband. Together, these providers offer both voice and data communication services. Distribution lines to individual parcels will be extended from existing infrastructure adjacent to the ARSP in accordance with the infrastructure Phasing Plan for dry utilities. The providers will review delivery of telephone, cable television, and high-speed data line services to individual projects in the ARSP at the time of proposal.

D. Locations of Above Ground Utility Structures

As an Urban Village, development within the Plan Area will be more integrated without the separations created by subdivision walls. This makes coordination between buildings, landscaping, and the necessary infrastructure components even more critical. As the design framework and guidelines are established by this Specific Plan, guidelines for locations of above ground utility structures are also established. Refer to Section 11.17 for guidelines related to siting and screening of above grade structures.

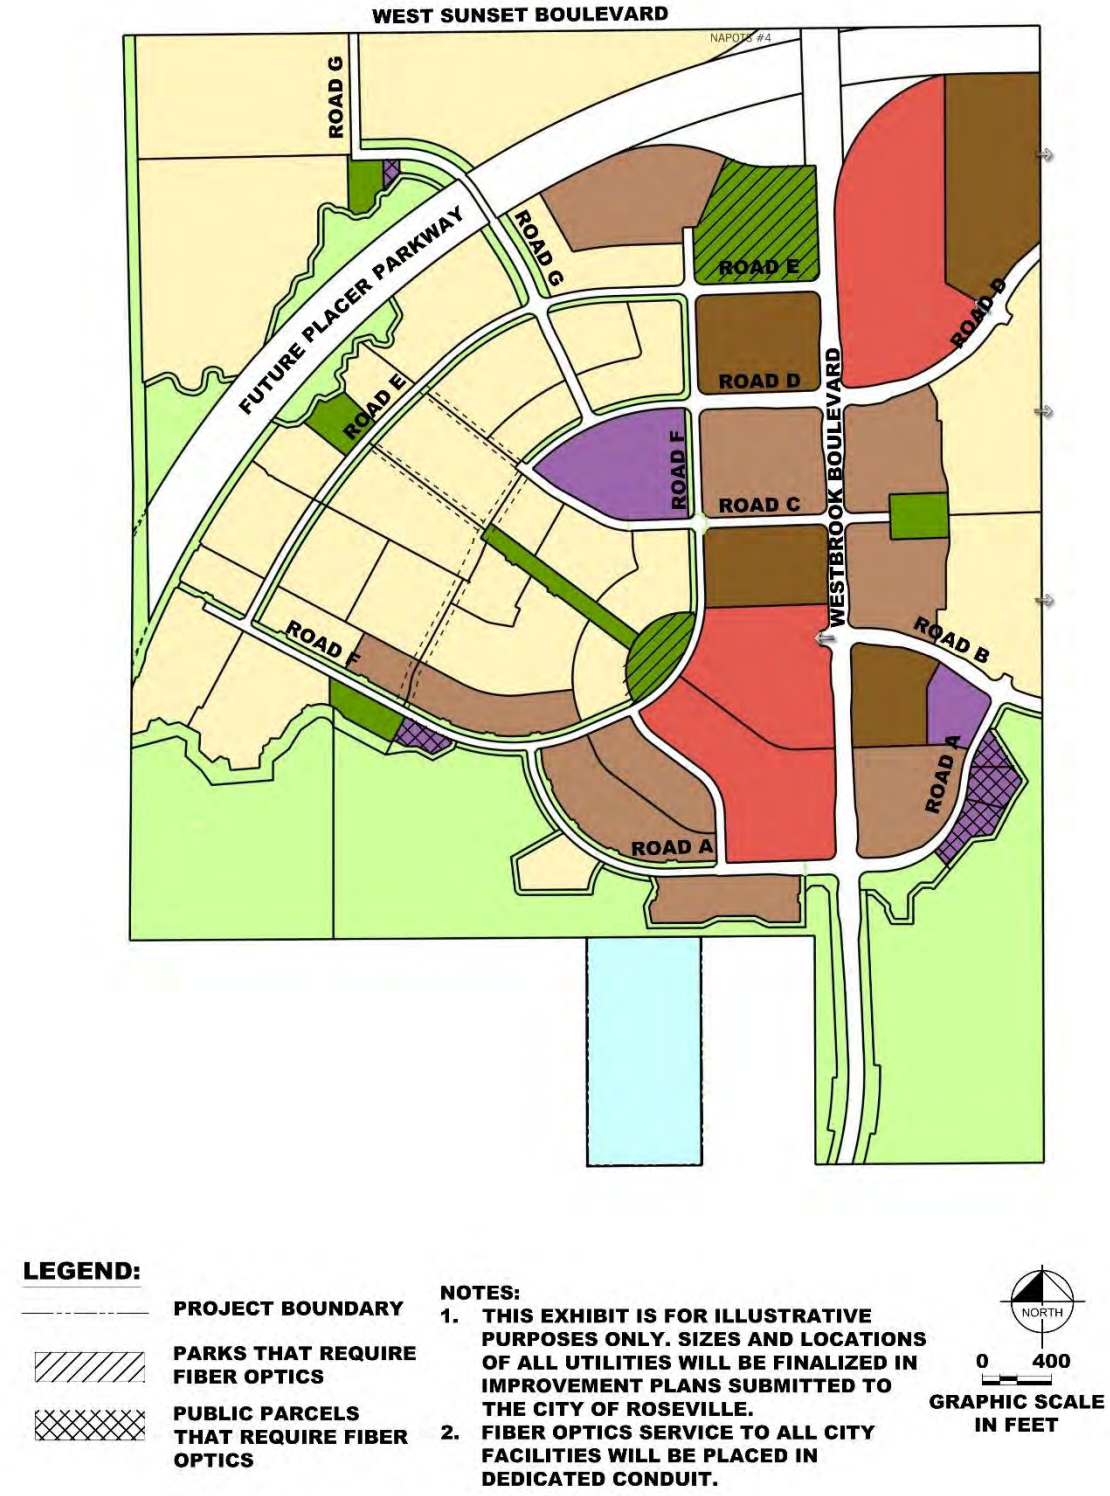

Figure 9.5: Dry Utilities Locations (updated May 2021)

9.7 Solid Waste

The City of Roseville will provide solid waste services to the ARSP. Solid waste will be collected and delivered to the Western Placer Waste Management Authority facility located north of the City at Athens Avenue and Fiddyment Road. The Authority owns a Material Recovery Facility (MRF) which receives, separates, processes, and markets recyclable materials removed from the waste stream. Residual waste is transferred to the Authority's Western Regional Sanitary Landfill located on the same site.

At full buildout, the ARSP is anticipated to generate approximately 8,660 tons of solid waste annually. A solid waste recycling area is planned within the ARSP on AR-55. This site will provide residents with a location to off-load recyclable materials.

CHAPTER 10 – IMPLEMENTATION & ADMINISTRATION

10.1 Overview

Government Code Section 65451 requires that a Specific Plan include a program of implementation measures necessary to carry out its proposed land uses, infrastructure, development standards, and criteria. Implementation of the Amoruso Ranch Specific Plan (ARSP) is to be administered by the City of Roseville and carried out in accordance with the terms and conditions of several related planning and program documents. These include project-related and approved development agreements, phasing plans, management plans, a financing plan, and an environmental impact report, which augment the policies and regulations set forth in the City's General Plan and Municipal Code. Additionally, implementation of the ARSP would be consistent with State and Federal permit conditions and the federal environmental review document. It is intended to result in the systematic and orderly development of the Plan Area. To achieve this intent, the Specific Plan includes a conceptual program for the phasing of infrastructure to support development, financing and construction of public improvements, review of individual development projects, transfer of residential units, and a process for Specific Plan amendments/minor modifications. These programs are summarized in this chapter, with details and specific requirements included in the above referenced documents.

Relationship to City Plans and Policies

A. General Plan

The City of Roseville General Plan serves as the long-term policy guide for the physical and economic development of the City. The City's core values are the foundation of the General Plan and the underlying basis for its vision and direction. The ARSP implements the goals and policies of the City's General Plan and augments these goals and policies by providing specific direction to reflect conditions unique to the Plan Area. At the time of Specific Plan approval, the City's General Plan and incorporated documents were amended to reflect Amoruso Ranch's land uses and development program. The ARSP is consistent with the City's General Plan and incorporated documents as amended.

B. Municipal Code

The Roseville Municipal Code is one of the primary tools for implementing the General Plan. For new development areas, the Municipal Code's key components are the City's Zoning Ordinance, Subdivision Ordinance, Storm Water Ordinance, and Tree Ordinance, which are used in tandem with this Specific Plan to implement the development program. In some instances, this Specific Plan modifies the permitted uses, development standards, or other regulations for some zoning districts within the Plan Area where unique development patterns are expected. In these cases, the zoning regulations provided in this Specific Plan (and attached Development Standards and Design Guidelines) supersede the City's Zoning Ordinance. However, where the ARSP is silent, the Zoning Ordinance's regulations will prevail.

10.2 Specific Plan Related Documents

A. Environmental Impact Report

An Environmental Impact Report (EIR) was certified concurrent with the approval of the ARSP. The EIR, prepared in accordance with the California Environmental Quality Act (CEQA), examined the potential direct and indirect environmental effects associated with development of the ARSP and identified appropriate mitigation measures to reduce impacts determined to be significant. The EIR analyzed the ARSP at a project level, and serves as the base environmental document for purposes of evaluating subsequent Plan Area-related entitlements.

B. Development Agreement

The property owners of the ARSP have executed development agreements with the City of Roseville to vest the development rights of their property. The development agreements were approved by the City in accordance with applicable State and local codes, and as such, function as legal and binding contracts between the City of Roseville, the property owner, and their successors-in-interest. The development agreements outline the specific development rights, establish obligations for infrastructure improvements and land dedications, secure the timing and methods for financing improvements, and specifies other performance obligations for development of the Plan Area.

C. Development Standards & Design Guidelines

Concurrent with the approval of the ARSP, the Amoruso Ranch Development Standards and Design Guidelines (appendices to the Specific Plan) were approved by the City of Roseville. The Development Standards constitute the zoning regulations for the Plan Area, establishing its permitted uses and development regulations. In many cases the Amoruso Ranch Development Standards modify the City's typical regulations in a manner to achieve a development pattern that would not be otherwise permitted by standard application of the City's Zoning Ordinance. Therefore, these standards are intended to be used in conjunction with the City's Zoning Ordinance. For matters where the Development Standards are silent, the City's Zoning Ordinance prevails.

Amoruso Ranch's Design Guidelines work in tandem with the Specific Plan and Development Standards documents, and provide additional detail in the design, review, and approval of individual projects within the Plan Area. Elements addressed include site design, architecture, landscaping, streetscapes, entries, lighting, signage, and low impact development concepts. All development within the Plan Area is required to comply with the ARSP Development Standards and Design Guidelines.

10.3 Phasing Plan for Public Facilities

The ARSP provides for a comprehensively planned infrastructure system with coordinated phasing and construction of facilities. Three infrastructure construction phases (Phases 1, 2, and 3) are anticipated as the ARSP builds out. The conceptual geographic boundaries of each phase are reflected on Figure 10.1, with anticipated residential unit and land use allocations by phase summarized in Table 10.1.

In general, the phasing plan has been structured to ensure that the improvements in each phase can support its respective development in compliance with City policies and standards, and that the development in each phase can support the costs of the required improvements.

Infrastructure phases identified in the phasing plan may be modified at the discretion of the Developer, in consultation with all affected City departments, subject to their approval and to criteria established in the Development Agreements for the project.

The infrastructure requirements for each phase of development include all on-site backbone infrastructure and off-site facilities necessary for the build out of each phase. These include roadways, sewer, water, recycled water, storm drainage, dry utility, paseos, schools, parks, and other facilities and improvements. All in-tract sewer, storm drain, water, dry utilities, and recycled water (if applicable) will be installed as part of local project improvements. Furthermore the Development Agreements will have further limits that trigger infrastructure phasing requirements, both on-site and offsite.

Table 10.1
Phasing Breakdown by Land Use Type

LAND TYPE	PHASE 1		PHASE 2		PHASE 3*		TOTAL	
	Acreage	Units	Acreage	Units	Acreage	Units	Acreage	Units

* Note: Phase 3 includes improvements to West Sunset Boulevard. West Sunset Boulevard improvements are not included in the acreage totals in the table above.

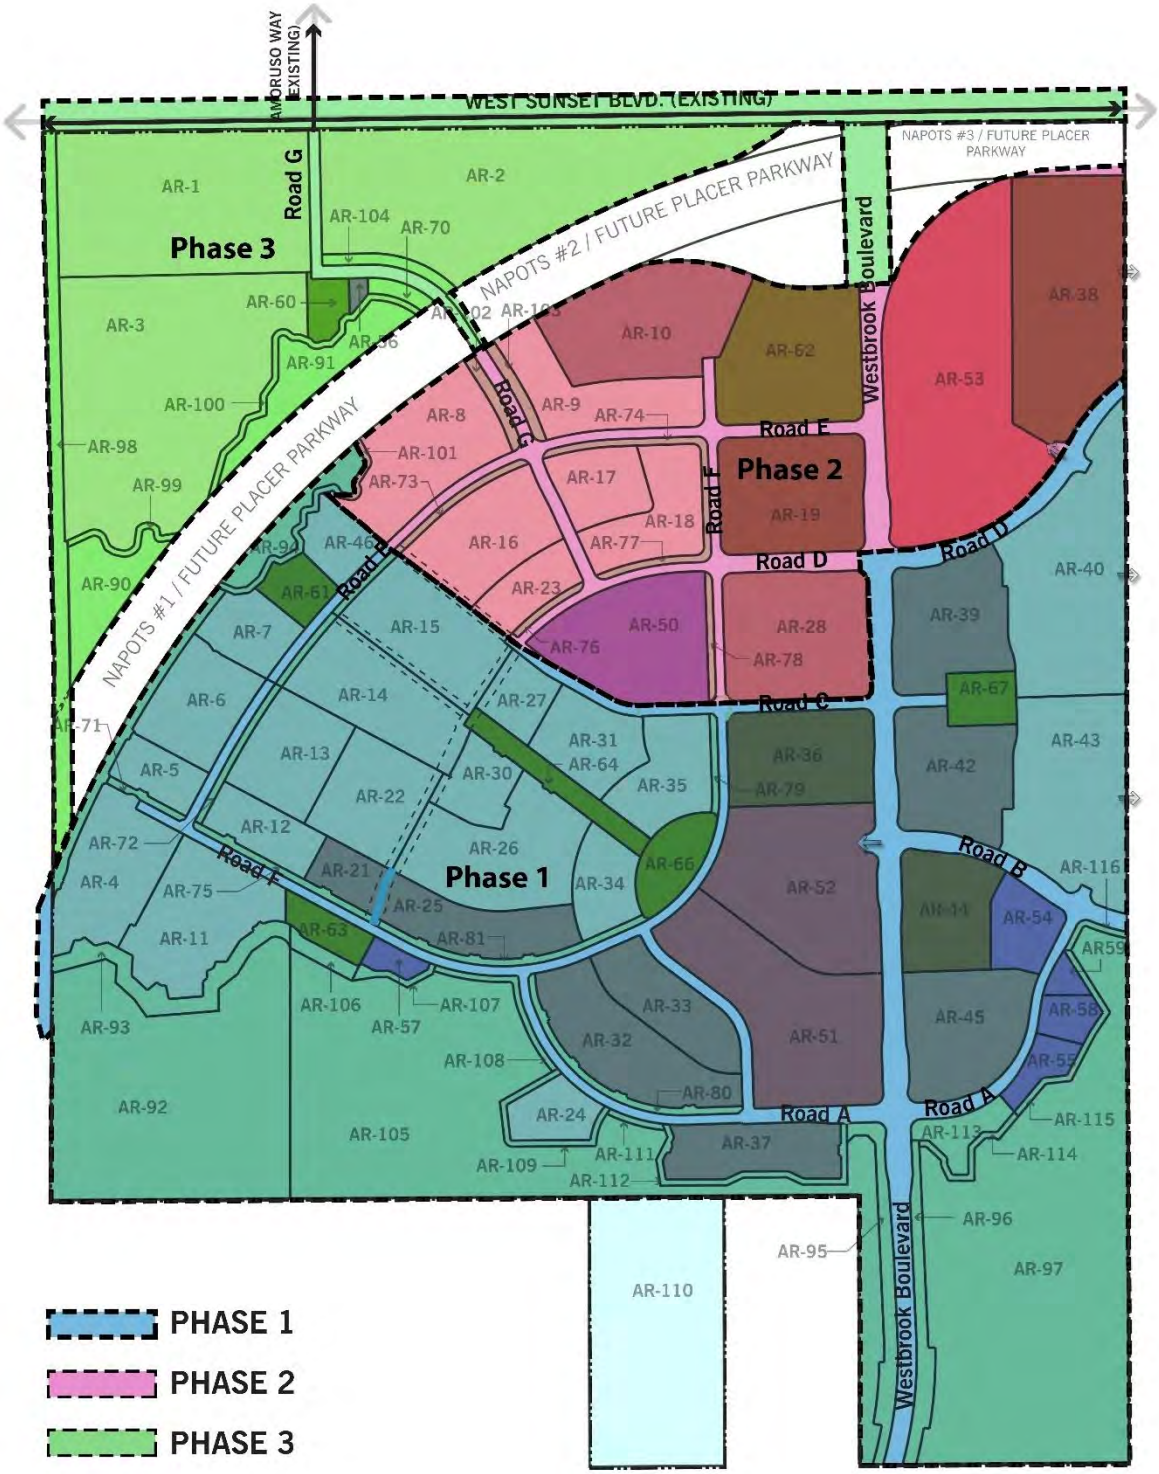

Figure 10.1: Phasing Plan (updated May 2021)

10.4 Financing of Public Improvements

Construction of public improvements to serve Amoruso Ranch will be funded by a variety of mechanisms including establishment of one or more Community Facilities Districts (CFD's), City Impact Fees, School Impact fees, developer financing, and other methods. A Financing Plan has been prepared for the project, and hereby incorporated by reference, which identifies the funding mechanisms that can be used to construct the Plan Area's public facilities. These various financing mechanisms are summarized on Table 10.2 and are described in general terms below. For specific details on the funding strategy, please refer to the Amoruso Ranch Financing Plan, available at the City of Roseville Finance Department.

Table 10.2
Public Improvement Financing Mechanisms

Improvement/Facility	***Financing Options***
Roadway Improvements	CFD/Traffic Fees/Developer Financing
Storm Drain Infrastructure	CFD/Developer Financing
Drainage Mitigation Structures	Drainage Fee/Developer Financing
Water Infrastructure	CFD/Water Connection Fee/Developer Financing
Sewer Infrastructure	CFD/Sewer Fee/Developer Financing
Recycled Water Infrastructure	CFD/Developer Financing
Electric Facilities	CFD/Developer Financing
Parks	Park Fees/Developer Financing
City-wide Parks	Park Fees / In-lieu Land Fee
Paseos	Paseo Fees/CFD/Developer Financing
Bike Trails	Bike Trail Fee/CFD/Developer Financing
Open Space Amenities	CFD/Park Fees/Developer Financing
Library	Public Facilities Fee
Fire Facilities	Fire Construction Equivalent Fee
Schools	School Impact Fees/State Funding
Other City Facilities	General Fund/CFD/Developer Financing/City Public Facilities Fee
County Facilities	County-Wide Facilities Fee
Maintenance Services[1]	CFD
Governmental Services[2]	General Fund/CFD

[1] Landscape corridors and medians on roadways, neighborhood parks and related facilities, paseos, open space areas, bike and pedestrian paths and/or trails, detention facilities.
[2] Police, Fire, Library, or general governmental services.

- ***Developer Financing*** – Direct developer/merchant builder financing may be used to contribute towards backbone improvements and facilities, shortfall financing, and for in-tract subdivision improvements.

- ***Community Facilities District*** – One or more Community Facilities Districts (CFD's) may be established to help fund the construction and/or acquisition of backbone infrastructure and facilities that serve Amoruso Ranch. The 1982 Mello-Roos Community Facilities Act enables cities and other entities to establish a CFD to fund various facilities and services. The proceeds of the Mello-Roos special tax can be used for direct funding of facilities and/or to service debt. A separate CFD for Public Services will be established for maintenance of a variety of public facilities that provide special benefit to the ARSP. Such facilities may include landscape corridors and medians, open space preserves, paseos, bike paths, storm water treatment and detention facilities, and neighborhood parks. In addition, the ARSP shall either establish a separate Municipal Services CFD or annex into

the City's existing CFD #3 to fund general fund services as provided in the ARSP Development Agreements.

- ***City Impact Fees*** – The City of Roseville has adopted a set of development impact fees to finance capital improvements. The fee structure requires the payment of fees prior to issuance of a building permit. The City collects park fees, drainage fees, sewer fees, solid waste fees, water connection fees, traffic mitigation fees, public facilities fees, and the fire service construction tax.

- ***School Impact Fees*** – The school district for the Plan Area has established fees, in accordance with Section 17620 of the California Education Code, to be used to construct school facilities. Pursuant to Section 65995 of the California Government Code, these school impact fees will be collected by the school district prior to issuance of a building permit.

As noted, other financing mechanisms may be utilized, including creation of private districts or associations to fund maintenance of certain facilities within the ARSP. Specific financing requirements, improvement obligations, fees, reimbursements, land and easement dedications and conveyances, maintenance, and other financing and improvement related obligations are detailed in the development agreements for the Plan Area.

Turn-Key Parks
The neighborhood park system within the ARSP is intended to create a series of unique experiences across the community. The neighborhoods adjacent to these parks focus on each park as a memory point and way-finding within the neighborhood. Because they are such strong design elements within the neighborhoods, the timing of their construction is critical to the community's success. Therefore, the Developer may elect to construct certain parks and turn them over to the City.

10.5 Subsequent Entitlements and Approvals

A. City Processing

Individual development projects within the ARSP are subject to review and approval of subsequent permits and entitlements by the City of Roseville (e.g., tentative subdivision maps, design review, conditional use permits, variances, and/or other permits). Application and processing requirements shall be in accordance with the City's Zoning Ordinance and other regulations, unless otherwise modified by this Specific Plan.

All subsequent development projects, public improvements, and other activities shall be consistent with this Specific Plan and accompanying Development Standards and Design Guidelines, the Specific Plan development agreements, all applicable City of Roseville policies, requirements, and standards and all State and Federal permit conditions, management plans and environmental review documents (CEQA and NEPA). In acting to approve a subsequent project or permit, the City may impose conditions that are reasonably necessary to ensure that the project is in compliance with the Specific Plan and all then applicable plans and regulations.

B. Environmental Review

Each subsequent development project shall be reviewed to ensure compliance with the California Environmental Quality Act (CEQA). The ARSP project EIR, which was certified concurrent with the specific plan, serves as the base environmental document for subsequent entitlements within the Plan Area. Development applications will be reviewed on a project-by-project basis to determine consistency with the EIR.

In general, if it is determined that a subsequent project is consistent with the Specific Plan and within the scope of the EIR, further environmental review may not be necessary. Section 65457(a) of the California Government Code and Section 15182(a) of the State CEQA Guidelines provide that no EIR or negative

declaration is required for any residential project undertaken in conformity with an adopted Specific Plan for which an EIR has been certified. If it is determined that a development application or City infrastructure, utility and/or facility improvement is inconsistent with the Specific Plan and/ or substantial evidence exists that supports the occurrence of any of the events set forth in CEQA Guidelines Section 15183, a determination will be made as to the appropriate subsequent environmental document. A mitigation monitoring program has been adopted with the EIR in accordance with Public Resources Code 21081.6 to ensure implementation of EIR mitigation measures.

C. Approvals from Other Agencies

Appropriate Local Agency Formation Commission (LAFCO), state, and federal approvals and permits are required prior to any development activity within the Plan Area. Plan implementation will be carried out consistent with all applicable permit conditions and federal environmental review documents.

10.6 Amendments & Minor Modifications

Proposed changes to a specific plan may require approval of a Specific Plan Amendment (SPA). SPAs are processed in the same manner as the initial Specific Plan adoption, requiring review by the Planning Commission and action by the City Council.

It is understood that the Plan Area will build out over many years. However, it is anticipated that in some instances the ARSP may need to be amended. To provide a degree of flexibility in SPAs, the ARSP allows for administrative approval of minor revisions to the Specific Plan, including the development standards and design guidelines in Appendices A and B. The Development Services Director or designee, shall determine whether a proposed revision is minor and maintains the intent and design character of the specific plan, and may act upon a minor revision to the Specific Plan and appendices administratively, as specified below.

A minor revision may be processed and acted on administratively if determined by the Development Services Director or designee to be in substantial conformance with:

1. The overarching vision and community design principles intended for the ARSP, including applicable development standards and design guidelines;
2. The applicable Specific Plan development agreement(s);
3. Applicable state and federal permits and the City's Open Space Preserve Overarching Management Plan (OSPOMP);
4. The City of Roseville General Plan; and,
5. The Specific Plan EIR.

Examples of minor revisions include, but are not limited to:

- The addition of new or updated information that does not substantively change the Specific Plan.
- Minor adjustments to land use boundaries of residential, commercial, or park parcels, or to open space edges between developed and non-developed land, or to street alignments, where the general land use pattern is maintained.
- Minor modifications to, and interpretations of, the development standards, as permitted by Section 19.74.020 of the Roseville Municipal Code for Administrative Variances, if it is determined that such changes are equal to or better than the original intent of the ARSP.
- Changes to the provision of public infrastructure and facilities that do not impact the level of service provided or affect the development capacity in the Plan Area.
- Modifications to the Design Guidelines, (such as revisions to design treatments, changes in specified plant materials, alterations of site concept plans, etc.), if it is determined that the design intent is maintained.
- Modifications to the provisions for infrastructure and construction timing that do not change the ability to provide adequate infrastructure for the development.

Any proposed minor revision to the Specific Plan may, at the sole discretion of the Development Services Director or designee, be referred to the Planning Commission and City Council for action. Determinations and actions by the Development Services Director or designee may be appealed to the Planning Commission.

If the Development Services Director or designee determines that a proposed amendment does not meet the above criteria, a SPA shall be required.

10.7 Minor Residential Unit Transfers

The large lot parcels on the ARSP land use plan are assigned a residential dwelling unit allocation, with associated gross land use density. These assignments were made at the time of Specific Plan approval based on an assessment of the constraints and opportunities of each large-lot parcel and anticipated long-term demand for various housing types. As individual residential small-lot parcel maps are processed over time, a more detailed assessment of site, market, and other conditions will occur. It is anticipated that this process may result in the need to adjust (reduce or increase) the number of units assigned to some large-lot residential parcels.

This Specific Plan includes a provision that allows the City to approve minor residential density adjustments and permit the transfer of residential units between large lot parcels. The Development Services Director or designee may administratively approve a residential unit transfer/density adjustment between any Specific Plan large lot parcels provided that the following conditions are satisfied:

1. The transfer and receiving parcels are located within the ARSP and are subject to a development agreement;
2. The transfer of units does not result in a change to the land use designation, specifically, the transfer does not: (a) reduce the number of units from the transfer parcel below the minimum number of units allowed by the applicable land use designation; or (b) increase the number of units to the receiving parcel above the maximum number of units allowed by the applicable land use designation;
3. The transfer of units does not result in increased impacts beyond those identified in the Specific Plan EIR and does not preclude the ability of the parcels to conform to the applicable standards or regulations contained in this Specific Plan and related Development Standards and Design Guidelines;
4. The transfer of units does not adversely impact planned infrastructure, roadways, schools, or other public facilities, or fee programs and assessment districts;
5. The cumulative increase or decrease in units resulting from the adjustment does not change the unit allocation by more than 20 percent of the units to either the transfer or receiving parcel, as established at the time of the original approval of the Specific Plan;
6. HDR units designated as affordable units may be transferred administratively until such time that they are encumbered by an Affordable Housing Regulatory Agreement (or other form as approved by the City); and
7. For HDR parcels, unit transfers may be approved between HDR parcels administratively, provided the resulting density of either parcel does not fall below 25 units per acre.

Minor density adjustments, if consistent with the above criteria, are contemplated by and consistent with the intent of this Specific Plan and the ARSP EIR and will not require an amendment to the Specific Plan, Development Agreements, or the City's General Plan.

To request a residential unit transfer, the owner or owners of both the transfer and receiving parcels shall submit a complete Administrative Permit application to the Development Services Director or designee that (a) identifies the affected parcels; (b) designates the number of units being transferred; (c) provides other documentation as required by Development Services Director or designee to determine compliance with the above unit transfer criteria; and (d) includes a revised Specific Plan Table 4.1, Plan Area Land Use Summary and Table 4.2, Land Use, Zoning, and Acreage by Parcel, reflecting the adjusted unit counts and densities. The revised table will be the official record tracking unit allocations to each large lot

residential parcel (this information shall be submitted per the City's Electronic Digital Submittal requirements).

If the Development Services Director or designee determines that the residential unit transfer is not consistent with the above criteria, the residential unit transfer may be denied or may be referred or appealed to the Planning Commission for action. Any determination of consistency may, at the discretion of the Development Services Director or designee, be forwarded to the Planning Commission for review.

The applicant may request density adjustments that do not comply with the above criteria. Such requests shall require an amendment to the ARSP through a SPA entitlement.

All unused units must be transferred prior to the City's approval of the last small lot final map or Design Review for Residential Subdivision Permit for any residential large lot parcel within the Plan Area. Any units assigned to a large lot parcel that are not used by a tentative map/Design Review for Residential Subdivision Permit or are not approved for transfer, shall revert to the City unit pool and landowners shall have no subsequent claim to such units.

(This page is intentionally left blank)

APPENDIX A – DEVELOPMENT STANDARDS

A.1 Standards Overview

The zoning and development standards listed below shall guide development within the ARSP development parcels. Where the ARSP is silent the City of Roseville's Zoning Ordinance and Community Design Guidelines shall prevail.

A.2 RS Development Standards

The ARSP provides a framework to guide the development of a unique urban village.

The City of Roseville's Residential Zone General Development Standards shall apply to the residential development within ARSP. To encourage a range of housing types and densities that can respond to a wide variety of household needs and market segments, deviations from the prescribed Zoning Ordinance Residential Development Standards are allowed pursuant to approval of a Design Review Permit for a Residential Subdivision (DRRS).

A Design Review for Residential Subdivision (DRRS) entitlement, consistent with the City's Community Design Guidelines is also required for housing products that are 7 dwelling units per acre and above.

A. Parking Requirements

Parking standards for the RS parcels shall be as per the City of Roseville Standards.

B. Residential Garages

Where private garages are provided, there may be a variety of configurations including single car garages, standard two or three car side-by-side, tandem garages, split garages or common garages, as appropriate to the product type. Individual private garages should provide adequate space for storage of trash recycling containers outside of the minimum parking dimensions required by the City's Zoning

Ordinance. Minimum space requirements for garages shall be as per the City of Roseville's Zoning Ordinance.

C. Carriage Houses / Expanded Living Areas

The ARSP encourages a wide range of housing options and opportunities within the Plan Area. To meet the needs of changing demographics, carriage houses/expanded living areas are encouraged throughout the plan. ~~These units are allowed on certain parcels as indicated on Figure A.1 and on lot sizes that accommodate the proposed structures that comply with all required development standards.~~

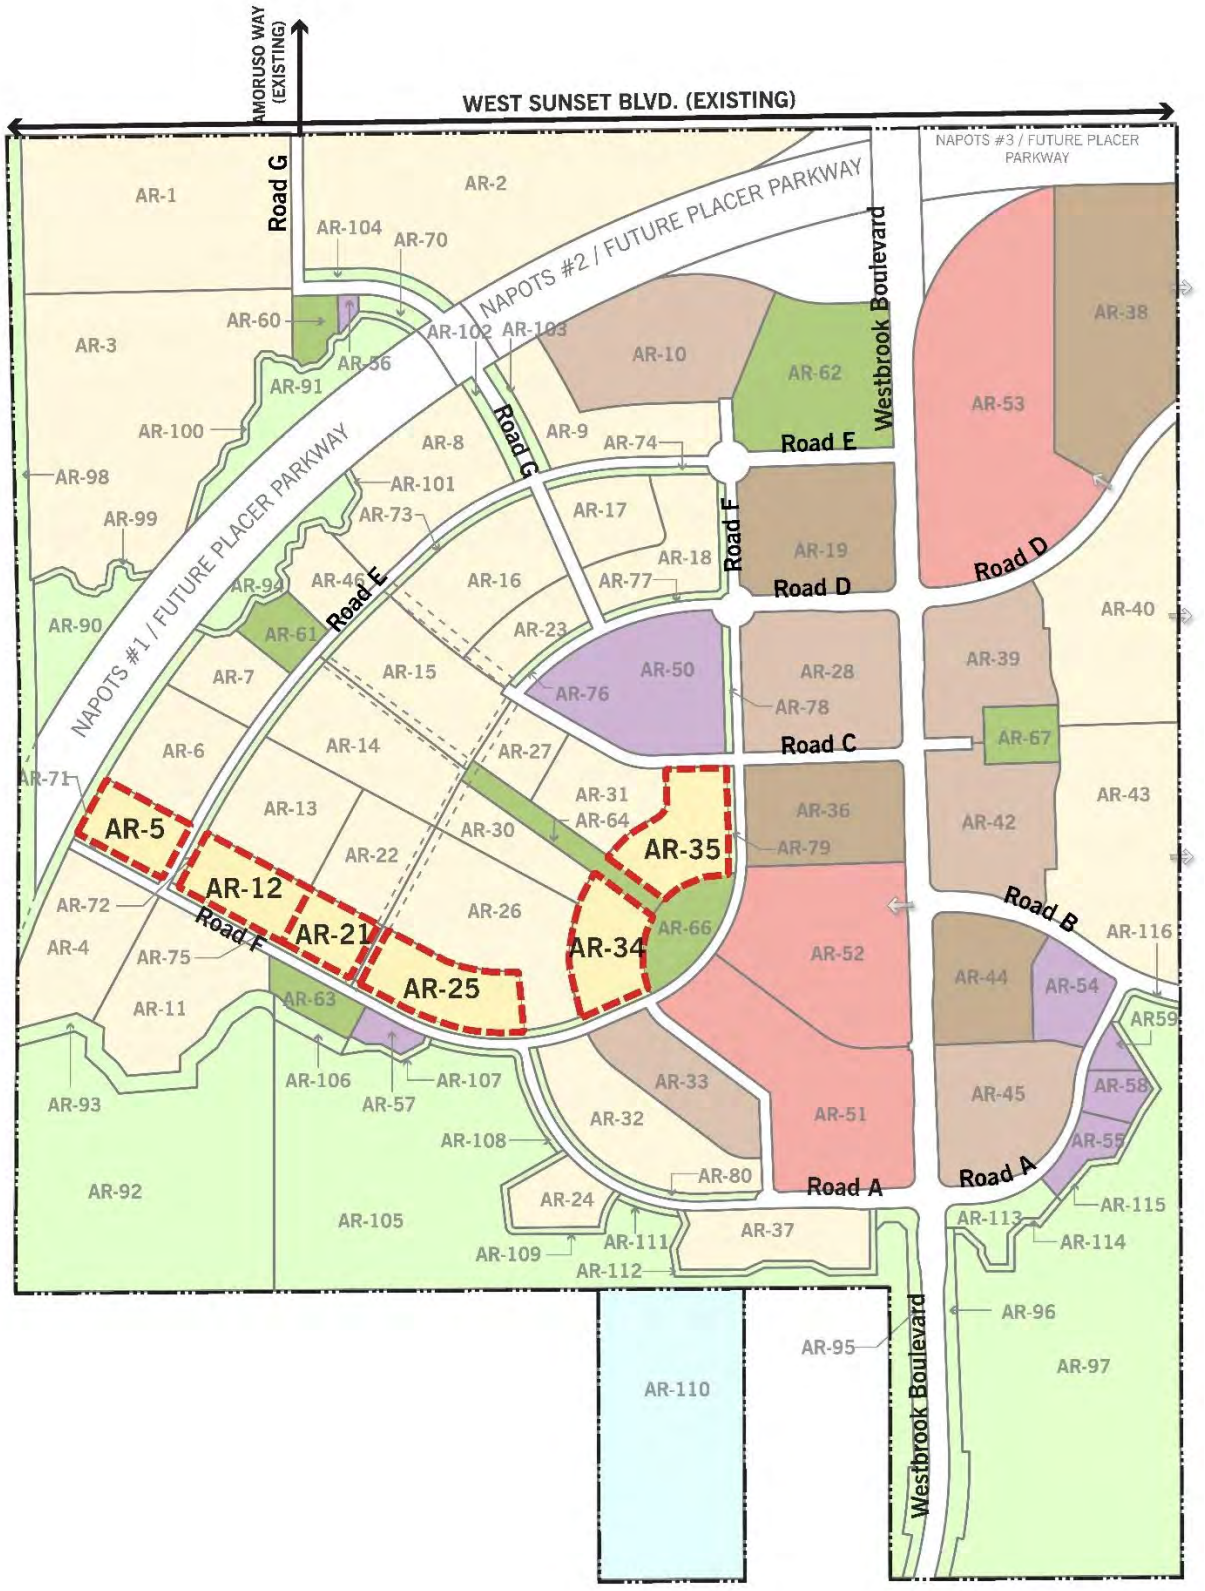
The carriage unit living areas generally range from 400-600 square feet and are either a studio or 1-bedroom configuration. They may be free-standing or attached to the main house with a private entrance. They may also be located above a 2 or 3-car garage. This space is flexible and may also be used as a home office or recreation room.

D. Residential Temporary Uses

In addition to the permitted temporary uses in the City Zoning Code, artists/artisans whose studios are located in their home in the Village District may conduct 5 "open studio" events by invitation or open to the public per calendar year.

E. Walls and Fence Standards

Walls and Fences shall comply with the City of Roseville Zoning Ordinance Accessory Structure standards.



~~Figure A.1: Carriage Unit Opportunities~~ (No longer applicable based on state law and current program)

Fencing Restrictions

Open fences are intended to provide a visually transparent barrier at developed edges adjacent to open space parcel and include materials such as wrought iron and tubular steel. Depending on interface, open fencing may be used between open space areas and the rear and side property line of residential parcels along a street adjacent to open space, or along pedestrian pathways at the edges of open space parcels. Open fences may also be used to separate different functions within landscape corridors (for example, to restrict access of dirt bikes and motorized vehicles) and at other miscellaneous locations within the Plan Area. Open fencing is the preferred fencing type adjacent to open space where a single-loaded street is not located adjacent to open space. Within residential subdivisions abutting open space fencing shall visually open, even if backing onto open space to maintain views.
Figure A.2 illustrates the development parcels that are required to comply with the fencing regulations.

Open fencing

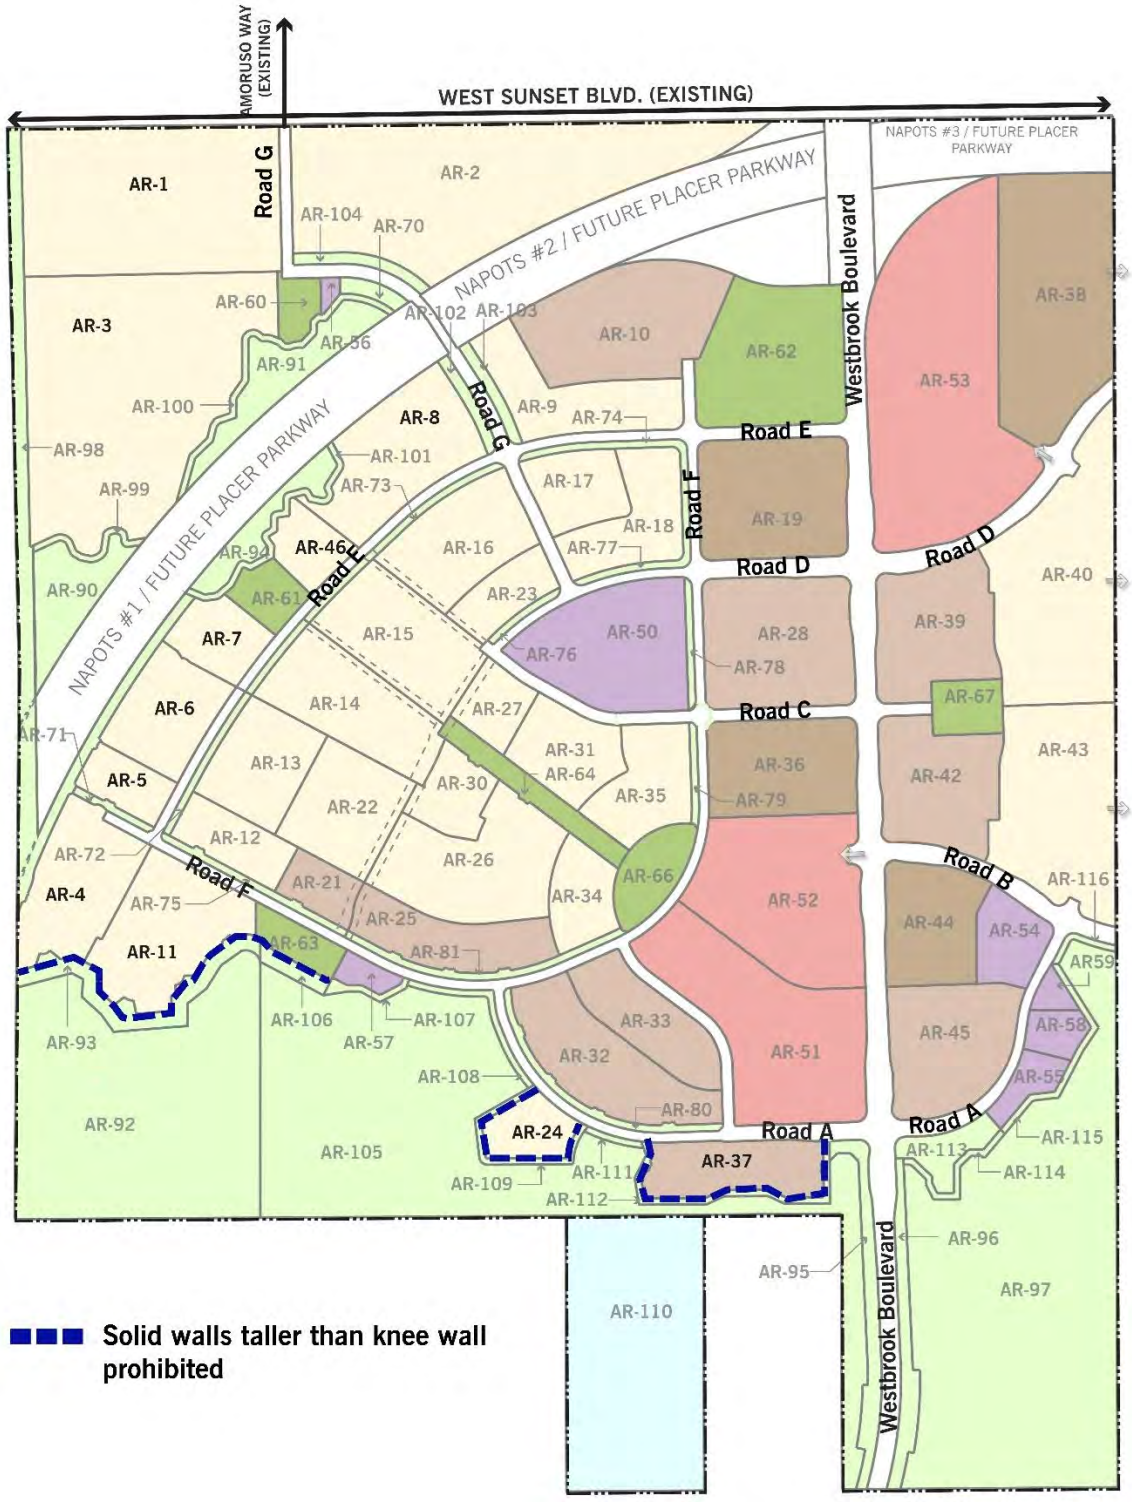


Figure A.~~2~~1: Additional Fence Restrictions (updated May 2021)

A.3 Village District Special Area

A. Introduction

As described in Chapter 3, the Village District is the heart and primary focal point of the ARSP. Made up of parcels AR-51 and AR-52, the Village District is envisioned to be anchored by retail oriented to a Main Street. Higher density row townhomes and mixed-use residential is also anticipated within the Village District.

B. Urban Form

The Village District is organized by a Main Street. It is anticipated that two “cross streets” will cross the Main Street, allowing for access to the parking areas behind the buildings. Off-street parking areas are not permitted directly fronting on the Main Street. These cross streets begin to establish pedestrian scaled blocks. It is intended for one of the cross streets to occur where the Main Street transitions to the Main Street Promenade. Street sections are provided in Chapter 7 Circulation. In addition to the angled parking shown for the Main Street, parallel or a combination of parallel and angled are acceptable parking configurations.

A goal of the ARSP is to create a focal point visible from Westbrook Boulevard, to draw passersby into the Main Street. This may be accomplished by creating a small plaza for social gatherings/events. As a focal point, some sort of vertical element is required. This requirement may be fulfilled by a sculpture, fountain, specimen tree, architectural tower, or any number of other vertical elements. Shared parking areas occur behind the Main Street buildings and do not front directly on the Main Street.

Figure A.~~3~~2: Village District Urban Form

C. Permitted Uses

As the focus of the community, the Village District is intended to create a very active environment. To that end, this Specific Plan modifies the City of Roseville Zoning Code by the following:

- *Live/Work Residential Units:*
  Live/Work Residential Units are permitted within the Village District. While not required, they should have ground floor space with larger windows such as storefront to express their use. Signage for commercial use is permitted and must meet the General and Commercial Mixed-Use Guidelines in Appendix B. Businesses within Live/Work units are allowed direct client contact and on premise sales. Businesses requiring commercial exhaust equipment or grease interceptors are prohibited.

- *Open Air Vending and Food Trucks:*
  The ARSP promotes Open Air Vending and Food Trucks in the Village District. Open Air Vending may occur along the Main Street, the Main Street Promenade, or within the parking areas behind the Main Street buildings. They may occur individually or in groupings, consistent with the City of Roseville's Zoning Ordinance Section 19.50 (excluding Item B of Section 19.50.030). Food trucks are not regulated by the City of Roseville.

  In an effort to promote food trucks and open air vending, they may be allowed on a temporary basis in the parking lot areas behind the Main Street buildings or in events when the Main Street is closed to thru-traffic.

- *Outdoor Restaurant Seating:*
  Outdoor restaurant seating is permitted within the Village District. Outdoor restaurant seating is permitted within the sidewalk area as long as a 6-8 foot wide clear pedestrian zone is maintained or on private streets.

- *Live Music:*
  Live music that is non-amplified (acoustic) and singing is permitted in restaurants, cafes, retail shops, and outdoor plaza areas within the Village District during all hours of operation, consistent with the Roseville Noise Ordinance. This excludes "Nightclubs" as defined by Zoning Ordinance Section19.08.090(T) which would require compliance with Zoning Code requirements.

- *Nightclubs:*
  Nightclub establishments located within the Village District are permitted to operate by obtaining the appropriate permits from the Planning Division and Police Department.

D. Community Commercial - Village District (CC-VC) Development Standards

The City of Roseville Zoning Ordinance and the Community Design Guidelines in conjunction with the appropriate Building Codes shall apply. The following Development Standards shall supersede conflicting City Standards:

- In order to create an urban character, buildings facing the Main Street and Main Street Promenade are not required to increase setbacks for levels above the ground floor.
- As an integrated urban village, masonry walls are not required between the commercial/retail uses within the Village District or adjacent to it. Masonry walls between the Main Street and Main Street Promenade uses and the surrounding residential uses are prohibited.
- No landscaped setback is required along the Main Street or Main Street Promenade.
- A wide variety of sign type and character is encouraged.
- Sidewalk areas will contain trees in grates and other landscape planter areas as well as street furnishings that may include items such as trash receptacles, benches, planters, bike racks, seating,

newsstands and community art and monumentation. A 6-8 foot wide pedestrian zone will be maintained at all sidewalks. The final layout of landscaping and street furniture will be part of a development proposal.

- Parapets shall screen rooftop mechanical or solar energy equipment from ground level view (any public right of way).

E. Shared Parking

As an urban environment, the Amoruso Ranch Specific Plan has been designed to encourage residents to utilize the extensive pedestrian and bicycle network to access the amenities and services, provided in the Village District. This can create a decrease in the automobile traffic in the Village District that would be generated by the residents. This Specific Plan anticipates a reduction in the need for overall parking required for the non-residential uses within the Village District. Parking within the Village District shall be shared by all of the commercial/retail uses, as well as the required residential guest parking. A shared parking plan will be reviewed as part of the project level approval process to ensure adequate parking is available and that parking will not overflow into the adjacent residential areas. The shared parking plan for the Village District shall follow the Downtown Code requirements.

F. Residential Development Standards

Residential units and live/work units will conform to the City of Roseville's Residential Zone General Development Standards for RS Zoning. Where mixed-use residential units occur above commercial/retail uses, building setbacks shall be governed by the ground floor commercial uses.

APPENDIX B – DESIGN GUIDELINES

B.1 Purpose and Intent

These Design Guidelines are an appendix to the Amoruso Ranch Specific Plan (ARSP) and supplement the City of Roseville Community Design Guidelines. They are intended to describe the unique visual character of the Amoruso Ranch community.

The Guidelines in this Chapter should be used in conjunction with applicable development standards established in Appendix A. Any proposed deviations from the standards outlined in Appendices A and B would be processed through the City's Design Review processes (DRRS Design Review for Residential Subdivision for residential projects or Design Review Permit for commercial and multi-family applications), as well as the various regulations and policy guidance provided throughout the Specific Plan. These elements are to be considered by City staff, Planning Commission, and City Council in their review of individual development projects.

The Guidelines are intended to encourage quality and creativity for individual development projects in ARSP. They are not to be applied as strict standards recognizing there are several design options which can achieve the desired intent. In addition, graphics, photos, and other imagery are used to help illustrate the successful application of guidelines and do not dictate specific styles or architectural character. Through these guidelines, the intent is to allow the community, commercial, neighborhood design elements that respond to market conditions, site constraints and opportunities, and other factors.

B.2 Relationship to Other City Documents

Development within the Amoruso Ranch Specific Plan area will comply with the City of Roseville's Community Design Guidelines. The guidelines in this Appendix are specific to the ARSP and seek to augment the City's Design Guidelines and Sign Ordinance. In instances where the Specific Plan is silent, the Zoning Ordinance, Sign Ordinance, and Community Design Guidelines will prevail. The standards and guidelines applicable to the ARSP, unless expressly called out in the ARSP Design Guidelines, are

set forth in the following documents, which should be referenced in the design of all uses in the Plan Area:

- Roseville Municipal Code- Title 19 Zoning Ordinance
- City of Roseville Community Design Guidelines
- Roseville Sign Ordinance
- Roseville Municipal Code – Title 24 Water Efficient Landscape Ordinance
- Roseville Design and Construction Standards
- Roseville Subdivision Ordinance
- Stormwater Quality Design Manual

Modification to ARSP Guidelines

These Design Guidelines are intended to help direct the design of ARSP's community design elements. It is expected the Plan Area will build out over several years, and conditions may change. The City recognizes the need for flexibility in the implementation of these Guidelines and new conditions affecting the appropriateness of some of the Guidelines may arise. The Specific Plan provides for the administrative approval of minor modifications to these Design Guidelines in Section 10.6. For administrative approval of minor modifications, requested deviations must be determined to be consistent with the spirit and intent of the design guidelines as well as the City of Roseville Zoning Ordinance and Community Design Guidelines.

B.3 Community Form

While the ARSP allows for flexibility in the physical development of the community over time, there are two key elements that form the framework of the plan; Paseos and the park system they connect to. The streetside paseo loop links the central neighborhoods together and to various amenities in the Plan Area. Its intent is to provide a pedestrian/bicycle loop for easy off-street access between neighborhoods, the school and the Village District.

Figure B.1: Streetside Paseo Loop

The strong pedestrian and bicycle linkage is possible by prohibiting individual driveway curb cuts across the paseos, as well as orientation and fencing guidelines for residential units along the paseo. The following examples illustrate how residential units should interface with the paseo.

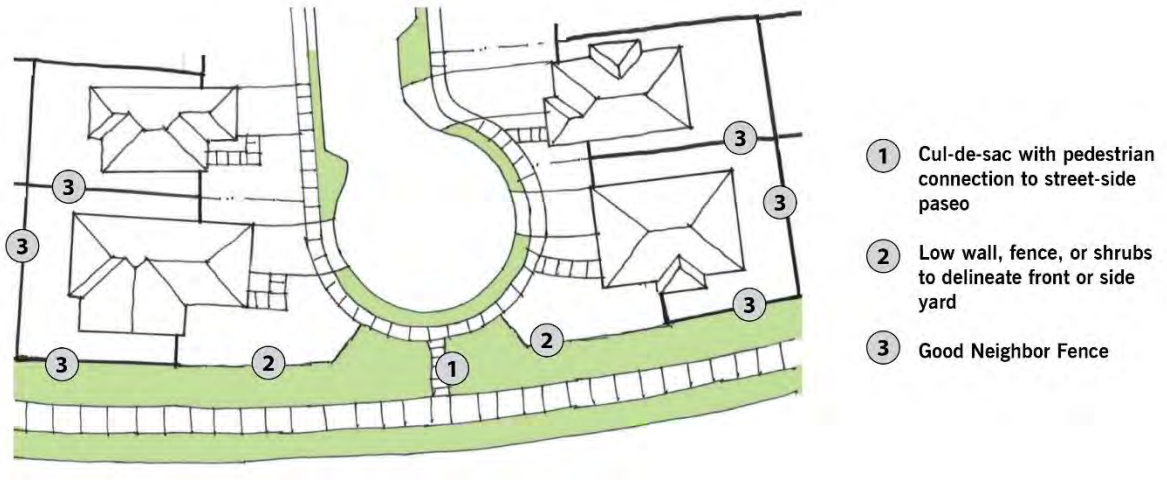

Figure B.2a: Streetside Paseo/Residential Interface (Front Loaded Homes)

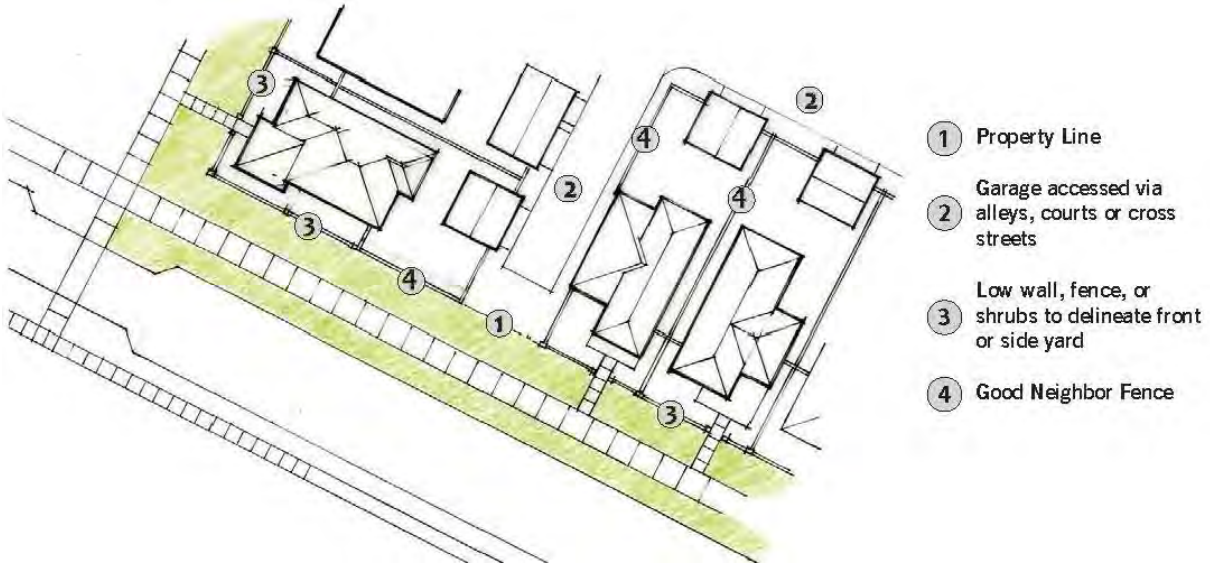

Figure B.2b: Streetside Paseo/Residential Interface (Alley Loaded Homes)

Figure B.2c: Conceptual Vignette of Streetside Paseo

The second important feature is the alignment of AR-64, an east west linear park. The park provides a strong visual and physical connection between the park of the western edge of the Property AR-61 to the urban core of the project at AR-66, AR-51 and AR-52.

The western edge of the park is bordered by pedestrian oriented streets that extend the pedestrian network into the community. Streets with 10 foot sidewalks connect the western edge of the park to the parks (AR-61, AR-63) along the western and the southern boundary of ARSP. These same enhanced landscape corridors and wider sidewalks provided a strong north, south pedestrian connection between the school site, east west linear park and, and neighborhood park (Parcel AR-63). This strong axial geometry creates identifiable focal points and organizing elements within the Plan Area.

Figure B.3: Linear Park and Pedestrian Linkages

B.4 Architectural Character

The Design Guidelines illustrate the desired character of the built environment by addressing site, building, and landscape design elements for both residential and non-residential projects. They are intended to guide development towards a mixed-use community with a distinctive sense of place and a consistent quality, yet allow for diversity and individual neighborhood character.

The Design Guidelines are provided as a way to achieve a compatible blend of architectural styles in combination with thoughtfully designed public spaces that will distinguish Amoruso Ranch from other areas within the City. The Guidelines are intended to be applied to all aspects of the community, based on the applicable land use, location, and site conditions.

The intended architectural character for the ARSP area draws from the region's agrarian roots. Buildings should draw upon simple form-based architecture without heavy orientation. A number of architectural images are included for reference. This is not to narrowly focus architectural character to one style or a limited number of styles, but to establish an overall character to the community. It is intended that variation will occur, particularly over time as the community is developed, yet a general character is maintained. The imagery included in the ARSP are not exclusive of other architecture styles but are included here to provide a design philosophy that will evolve over time.

B.5 Residential Design Guidelines

Residential Architectural Character
Architectural styles that inform the general residential character throughout Amoruso Ranch include:

- **Agrarian Modern**
  Influenced strongly by the homes of pre-railroad America, the Agrarian Modern style should rely on simple form based architecture with strong gable roof lines and inviting and useable front porches. These homes should not be overly adorned with decoration and attention should be paid to appropriately proportioned fenestration patterns that provide a specific rhythm to the façade of the building. Agrarian Modern style homes should be clean, crisp, more contemporary interpretations of the traditional style.

  Typical architectural elements include:
  - Simple plans;
  - Simple gable roofs with roof pitches of 6:12 or greater and with minimal gable end overhang;
  - Siding materials including lap, board and batten, corrugated metal, and light dash or smooth finish stucco or a combination;
  - Usable porches with simple door and window detailing; and
  - Rich color scheme.

- **Agrarian Traditional**
  Drawing from the Queen Anne and Folk Victorian homes of the late nineteenth and early twentieth centuries, Agrarian Traditional style homes should also be simple in massing form, typically with a predominant gable roof form to the front and a partial or full-width front porch. These homes will have appropriate decorative detailing that adds to the overall refinement of the architecture without detracting from it. Agrarian Traditional style homes should be familiar, welcoming residences.

  Typical Architectural elements include:
  - Gable roof forms with pitch breaks at porches;
  - Lap and board and batten siding, and may be combined with light dash stucco;
  - Useable porches with simple yet decorative columns and railings; and
  - White or light paint colors or rich earth tones accented with white or a contrasting accent color.

- **Craftsman**
  The Craftsman style was inspired by the English Arts & Crafts movement of the late 1800s. It became the dominant style for smaller houses built throughout the country during the period from about 1905 until the early 1920's. The Craftsman style originated in California, though it was quickly spread throughout the country by pattern books and popular magazines.

  Typical architectural elements include:
  - Deep front porches with heavy square or tapered columns;
  - Broad overhangs with exposed and shaped rafter tails;
  - Multi-pane windows; layered wood trim at windows and doors; Stone or brick accents, particularly at porches and columns;
  - Mix of siding materials such as lap side, board and batten, and light dash stucco; and
  - Mix of accent materials.

- **Monterey**
  The Monterey style is a combination of the original Spanish Colonial adobe construction methods with the basic two-story New England colonial building. Prior to this innovation in Monterey, all Spanish Colonial buildings were of single-story construction. First built by Thomas Larkin in 1835, this style introduced two-story construction and shingle roofs to California. This Monterey style and its single-story counterpart eventually had a major influence of the development of modern architecture in the 1930's.

  Typical architectural elements include:
  - Asymmetrical one and two-story massing;
  - Covered balconies at the second level with dark colored wood detailing;
  - Stucco exterior;
  - Shutters; and
  - Whites and light colors with rich contrasting accents.

In addition to the architectural styles and design standards noted above, all residential subdivisions in the ARSP are subject to the standards contained in the City's Subdivision Ordinance and for compact residential subdivisions, the City's Community Design Guidelines. Furthermore, given the extensive residential interface between projects, several additional architectural design considerations must be employed. To this end, the following criteria shall be employed when reviewing the home designs and street presentation of each residential subdivision.

Massing and Articulation

The collective streetscape is important, as it effectively becomes a shared amenity for all residents and visitors. To avoid bland homogenous neighborhoods and to ensure that the streetscape maintains a level of interest and variety, the following guidelines shall be applied:

- Incorporate a variety of compatible architectural styles within a neighborhood.
- Smaller enclaves of homes may utilize a single architectural style to create a distinct neighborhood statement.
- Unvarying repetitive facades that present a monolithic development should be avoided.
- Building forms should be appropriate to their style.
- Enhanced articulation and/or added architectural features shall be reflected in the building elevations facing streets, parks or other greenways in order to maximize visual impact to the user and minimize boxy structures.
- Provide a variety of both single and multi-story elements within multi-story home designs.
- Porches, entries, balconies or outdoor rooms are encouraged for homes that face public streets.
- As appropriate to the architectural style, add visual interest to wall planes by incorporating an array of architectural elements such as bay windows, dormers, balconies, window canopies, window awnings, etc.
- Provide additional articulation and variety to elements by changing materials, details, and/or color.

Porches and detailing wrap corners.

Porches create outdoor rooms.

Homes raised above sidewalk level are encouraged.

- To meet the design standard for enhanced elevations (front, sides and rear) where they are visible from the street, pathways or public and/or private open space, consider utilizing elements such as changes in building massing, roofline variation and window treatments.
- Porch and entry features should primarily be one-story elements. However, porches may also be incorporated into two-story vertical elements to break up the building mass facing the street or to provide visual interest to the streetscape consistent with the architectural style of the residence.
- Multi-unit buildings should incorporate smaller-scale architectural forms that are associated with its architectural style to visually reduce the height and scale of the building and emphasize the definition of individual units.
- Incorporate relief, texture and color in façades that enhance the pedestrian experience on the street that is consistent with the chosen architectural style for the unit.
- Varied building heights for multi-unit buildings are encouraged, both to provide visual interest and give the appearance of a collection of smaller structures.
- Larger multi-unit buildings should respond to adjacent lower density residential development with sensitive transitions in scale and massing.
- Expression of individual units within row town homes is encouraged.
- Functional and usable outdoor porches, patios, balconies, courtyards, or other areas for the use of building residents are encouraged for multi-unit buildings.

Simple massing with exposed structural detailing is encouraged.

Front porches break up elevation mass and provide outdoor rooms.

Gables and bays articulate building mass.

Windows and Doors

Windows and doors will naturally vary with the incorporation of a variety of architectural elevation styles.

- Entries should be given special attention as a whole system including door, side windows and porches.
- Entries should be inviting from the street with adequate weather protection.
- Windows should be appropriate to the building's architectural style and combined and arranged to establish clear and rhythmic patterns as appropriate for both the building's architectural style and scale.
- On all elevations, openings should be trimmed and articulated with an appropriate head, sill and jamb detail.
- If used, shutters should be appropriate to the architectural style, sized to match their window and at a minimum, lend the appearance of functionality.
- Window grids, if appropriate to the architectural style and used on the front elevation, should be used on all elevations that are visible from streets, open space, or other common areas.
- Though consistency of window use is generally desirable, windows may be provided in various shapes and sizes provided they are appropriate to the building's architectural style or as accents.
- Window placement should minimize the violation of a neighbor's indoor privacy.
- To provide visual interest and avoid an identical appearance, garage doors should incorporate some architectural detailing, such as patterned garage doors with window panels and painted trim, that is consistent with the overall architectural design.
- Garage doors should not be flush with the front wall plane.

Variety in windows can provide interest.

Brightly painted trim can add a playful element to the elevation.

Variety of detailing at roofline adds interest.

Entries including door, windows and porch, should be given special attention.

Expression of individual units within row town homes is encouraged.

Detailing is appropriate to style of architecture.

Entries to Multi-Unit Buildings

All entries for main buildings and for individual units should be pedestrian-scaled.

- Courtyard doors, gates, or other portals used at building entries such as for stacked flats or garden apartment buildings should be attractively designed as an important architectural feature of the building or development.
- Main building entries (i.e. those serving multiple units) should be differentiated from individual street-level unit entries with special detailing, awnings, canopies, or multi-story forms.
- Individual ground level unit entries should have a strong relationship to a fronting street, internal walkway, or courtyard as appropriate to the overall siting concept and housing type. To the extent appropriate to the architectural style, all ground level private dwelling unit entries particularly those fronting a public street should incorporate a porch element or recessed entryway.
- Each dwelling unit's entry should be emphasized and may be differentiated through architectural detailing and elements such as porches, stoops, or roof canopies.
- Where topography allows, street entries to row town homes should be elevated with raised porches or stoops to a height of at least three steps above the public sidewalk. Porches or stoops may be paired and share a single set of stairs.

Detailing, Materials and Colors

A complimentary variety of materials used on façades from home to home and within a single home creates a more diverse and interesting neighborhood. Creative and thoughtful use of color can be a very simple yet effective tool for creating visual diversity. Together, variety in color and materials can have a significant and positive impact on the overall appearance of a neighborhood.

- Signature or custom detailing should re-enforce and support the neighborhood character.
- Details and materials should be appropriate to the style the building is expressing. "Appliqué" of details or materials on inappropriate building forms should be avoided (i.e. English half-timbering on a ranch style home with a 4:12 roof pitch).
- Gutters, downspouts and rainwater leader heads should be integrated into the roof/wall detailing and designed as part of the trim. Chain drains are acceptable.
- Materials should be incorporated such that they do not appear to be merely surface applications but as an integral component of the architectural style.
- Natural and natural appearing materials should be used as details to complement the selected architectural style such as wood, stone, brick, iron and copper.
- Materials should be attractive, durable, sustainable, low maintenance, and appropriate to the character of the neighborhood. To the extent possible, materials should also be of local origin.
- When not used uniformly about a house, accent materials such as brick and stone used on street facing elevations should be returned to a logical point of termination such as an inside corner, on the adjacent side elevation.
- Color should be used as an important design element in a building's appearance. Garish and incompatible colors should be avoided. Appropriate use of more than one predominant paint color is encouraged. Compatible accent colors are encouraged to enhance important building elements.

Enhanced main entry

Individual unit entries have strong relationship to the street

Raised stoops entries

- On an individual building, color variety should relate to changes of building forms and materials, such as body, accent and trim.
- Use of accent colors to emphasize the building's details such as window sash, mullions, and trims is strongly encouraged when appropriate to an architectural style.

Roofs

A variety of roof plans and pitches is desired, as roof forms and their materials have a significant impact on the impression of variety within a neighborhood.

- Roofing materials should be appropriate to their related style and pitch.
- Roofs over one-story elements, such as those over porches or bays, provide additional articulation of the massing of larger two-story residences and are strongly encouraged.
- Variation in ridgeline heights and alignments should be incorporated in order to create visual interest.
- Flat or very shallow sloped roofs should be appropriate to their architectural style. Built-up or roll roofing and similar appearing materials that are predominantly used on flat roofs are only permitted if they are not visible from the street or other public area.
- Roof penetrations for vents should be consolidated and located on the rear side of roof ridges or a portion of the roof not visible from a public street, park or common green, whenever possible.

Masonry termination.

Chain drain.

Color is an important design element.

A variety of roof forms adds interest to a neighborhood.

Adding a variety of material creates a diverse neighborhood.

B.6 Commercial Mixed Use (CMU) District - Village District

The Village District is an area allowing for the uses, including but not limited to, retail, office, visitor service, recreation, and some residential. It is anticipated that the Village District may contain a small grocer, neighborhood serving retail uses such as a dry cleaner, hair salon, specialty retail and restaurant uses. This blending of uses creates energy and reinforces the urban character of the community.

As the “heart” of this community, the Main Street creates the hub of activity and focus for the overall project area. It presents the public face to the community at large, and the quality of design is important to the perception of the community. Site design, architecture and landscaping should create a village atmosphere where people are comfortable to mix, mingle and spend time. The following site design and architectural design guidelines shall apply.

Site Design

The goal of the Village District is to create an intimate shopping experience for residents within the Plan Area as well as the greater Roseville community. The Main Street creates a true urban gathering place where retail shops and restaurants can open their doors to the sidewalks and invite people inside. The Main Street connects Westbrook Boulevard through the retail area and is intended to intrigue and invite a passerby along Westbrook Boulevard to turn in and spend some time within the Village District.

Edges between adjacent land uses should appear seamless.

- As an urban village, there should be no walls between the commercial uses in the Village District and adjacent residential neighborhoods with the exception of those required for screening of mechanical trash or loading facilities.
- Create strong pedestrian links to the other land use areas.

The Main Street forms the backbone and focal point of the Village District.

- The Main Street should evoke a low speed urban character where cars and bicycles share the road.
- The Main Street cross section should be flexible enough to allow for diagonal or parallel parking, or a combination of both, with neck-downs at pedestrian crossing points.
- Parking lots may be accessible from, but should not front onto Main Street.
- Drive-through facilities should not be visible or accessed from the Main Street.
- Significant intersections should be highlighted with bollards, special paving, accent trees and opportunities for other monumentation such as art pieces or way-finding elements.

Strong, simple forms.

Architectural Character.

Parking areas should create an environment where pedestrians feel comfortable.

- Pedestrian routes across parking areas should be highlighted by special paving, accent landscaping, bollards, or other measures as appropriate to the overall urban character.
- Pedestrian scaled lighting fixtures should be provided.
- Trellis, awnings, and other sun protection devices are encouraged.
- Loading and services areas should be screened and not visible from public streets or adjacent residential neighborhoods.
- Buildings, parking, and service areas should be oriented to minimize impacts to residential uses without the use of walls.

Create a village environment framed by storefronts, awnings, and landscaping with an atmosphere where people are comfortable walking and spending time.

- Provide for a mix of sizes of businesses that creates a pedestrian friendly atmosphere.
- Outdoor dining is encouraged. Sidewalks should be scaled to accommodate seating while still leaving a minimum path of travel required by the building code.

To enhance the pedestrian experience, no private driveways are accessed from roads surrounding the Urban Park.

Low speed retail street with pedestrian crossings

Enhanced paving at pedestrian crossings

Diagonal parking along Main Street

Accented pedestrian crossing.

Pedestrian routes across parking areas should be clearly defined.

Areas for outdoor dining are encouraged.

Plazas and other outdoor seating areas should be provided to create gathering places for residents and visitors in order to enhance a village atmosphere.

- Focal points should be created with features such as fountains, outdoor performance areas, or opportunities for art pieces.
- A generous amount of outdoor seating should be provided and should include both sunny and sheltered areas.
- Both hard surface and planted areas should be incorporated into the design.
- Colored, decorative paving patterns should be used at special focal points.

Street Furnishings

The sidewalks and pedestrian promenades are an important feature of the Village District environment. These areas should be furnished with enriched materials and furnishings that create a comfortable, convenient, and entertaining experience. With the exception of features created as art pieces, the furnishings should be selected from a similar family of style, color, and finish to create a refined and uncluttered appearance.

- Create sidewalks that are scaled to accommodate cafe style seating and adequate landscaped areas.
- Seating areas should be created using benches, tables and chairs, seat walls, and raised planters.
- Newspaper racks should be of one cohesive design and integrated into the landscape design.
- Bicycle parking should be integrated into the landscape design and located to provide convenience in a safe, secure manner.
- Bollards may be placed to provide separation between auto and pedestrian crossings.
- Trash and ash receptacles should be placed at convenient locations to help keep those areas clean.
- Privately owned and maintained light standards should accept flower baskets or banners.

Art pieces as focal points.

Ample sidewalks for café seating.

Outdoor dining at plaza.

Decorative elements such as flower baskets are encouraged.

Awnings, trellises along retail street

Easily identifiable entries

Contemporary style based on traditional building form

Architecture

The goal of the Village District architecture is to create a character that is distinctive and memorable. The architecture should have a strong character, yet allow for variation and diversity in how that character is expressed.

Building upon the architectural character established by the residential styles, the commercial buildings within Amoruso Ranch Village District should reflect Agrarian roots, but with a contemporary interpretation. This aesthetic is expressed by strong, simple forms and detailing that is more industrial than formal.

Appropriate building materials include smooth or hard-troweled stucco, brick, pre-cast cementitious panels or stone and accented by steel, tile, heavy timber or other appropriate detailing. Buildings along the Main Street should have ground floors that are predominantly storefront glazing. However, the ground floor character should support upper level architecture. Heavy stucco textures are discouraged.

Public street facing facades of all buildings should have the same level of articulation and quality of details and materials as the front of the building.

- Long expanses of blank walls are discouraged, where they are unavoidable they should be articulated and softened with three-dimensional details, planters, vines, and other landscaping.
- A composition of distinct but related forms should be used.
- Loading and service areas should be integrated into the overall building composition.
- Architectural enclosures should be designed as integral elements of the building architecture.
- Long unbroken forms and flat planes are discouraged.

Public street facing building facades should incorporate three-dimensional facade elements that lend a pedestrian scale to the street level.

- Arcades, wide overhangs, deep reveals, permanent awnings, etc. are encouraged.
- Building and individual tenant entries should be easily identifiable.
- Flat unarticulated wall planes should not be used.

Buildings facing Main Street and the Main Street Promenade should have tall first floor plates.

- Retail ground floors should be a minimum 14 foot floor to floor.
- Residential units should have a minimum 10 foot first floor.

Roof design should be integral to the overall building design.

- Parapets shall screen rooftop mechanical or solar energy equipment from ground level view (any public right of way.
- Tower elements should be included at key locations to provide points of interest along the streetscape.
- Roofline variation along each block should be created by differing parapet heights.
- Materials should be appropriate to the building's style and character and suited to commercial construction.
- Materials such as stucco, masonry, storefront glazing and well-detailed precast concrete are encouraged.
- Accent materials such as brick, stone, tile, and anodized or powder-coated high quality metal finishes are encouraged.
- Any changes in materials should occur at inside corners where the building plane changes direction.
- Due to glare issues and aesthetic concerns mirror glazing should not be used.

Landscaping

The general landscape concept is to provide basic planting direction along streets and other public spaces, while allowing business owners and tenants to individualize their landscaping. The following information describes suggested landscaping:

- All plantings must comply with the City's Water Efficient Landscape Ordinance.
- Select appropriate plant species based on architectural style and size of planters.
- For each parcel use a mix of shrubs, ground cover and turf, as appropriate.
- Plant shrubs at the base of the building and walls, vines on trellis structures, enclosures or garden walls.
- Use larger shrubs adjacent to fences, walls and facades.
- Plant vines on walls, fences, trellis/arbor and structures.
- Provide access walkways to entries.
- Plant accent shrubs to highlight entries.
- Install an automatic water-efficient irrigation system.
- Plant shrubs and/or ground cover from back of walkways to face of wall or fence.

Deep awnings provide shelter.

Accent materials.

B.7 Community Commercial

The commercial center in the northeastern portion of the ARSP area allows for uses, including but not limited to, large and small format retail, entertainment, office and other uses as approved by the City's Zoning Ordinance. The following design guidelines supplement the City of Roseville Community Design Guidelines.

Site Design

The goal of the regional commercial center is to create a one-stop shopping experience, in additional to the existing retail areas in Roseville, for residents within the Plan Area as well as the greater Roseville community.

- Bicycle parking and utilities should be integrated into the landscape design to place these elements where they are needed in a discrete manner.
- Create a commercial center framed by storefronts, awnings and landscaping.
- Provide for a mix of sizes of businesses within the commercial center that creates a pedestrian friendly atmosphere.

Street Furnishings

The sidewalks are an important feature of a regional commercial environment. These areas should be furnished with enriched materials and furnishings that create a comfortable, convenient, and entertaining experience. With the exception of features created as art, the furnishings should be in a similar family of style, color, and finish to create a refined and uncluttered appearance.

- Create sidewalks that are scaled to accommodate cafe style seating and adequate landscaped areas.
- Newspaper racks should be of one cohesive design and integrated into the landscape design.
- Bollards may be placed to provide separation between auto and pedestrian crossings.

Figure B.4 Commercial Center

Architecture

The goal of the regional commercial center architecture is to create a character that is distinctive and memorable. All public facing facades of all buildings should have a level of articulation and quality of details and materials that relates to the front of the building.

- Loading and service areas should be integrated into the overall building composition and screened from the sidewalk views.
- Architectural enclosures should be designed as integral elements of the building architecture.
- Trellises, pergolas, or permanent awnings should be incorporated where appropriate to serve as shade and weather protection. Arcades, wide overhangs, deep reveals, permanent awnings, etc. should be used.
- Materials should be appropriate to the building's style and character and suited to commercial construction.
- Any changes in materials should occur at the inside corners where the building plane changes direction.
- Mirror glazing should not be used.

B.8 Signage Design Guidelines

These guidelines are intended to result in functional, attractive signage incorporating a high level of design, graphics and materials throughout Amoruso Ranch. Unless otherwise stated, all signage shall also conform to the specific requirements, spirit and intent of the City of Roseville Sign Ordinance provisions. If there are any inconsistencies between the City of Roseville regulations and these Design Guidelines, the Sign Ordinance shall take precedence. If these Design Guidelines are silent on a topic, the Sign Ordinance requirements shall apply. All signs require a sign permit and all building complexes with four or more buildings, tenants or uses require a Planned Sign Permit Program to be approved, prior to receiving individual sign permits.

The following sign types are strongly discouraged in all areas of Amoruso Ranch:

- Internally-illuminated awnings.
- Plastic-faced box or cabinet signs.
- Formed plastic or injection molded plastic letters.
- Luminous vacuum-formed plastic or acrylic letters. Signs with exposed fasteners unless they are architecturally integral to the building character and signage design.
- Signs with exposed conduit, tubing, raceways, conductors, transformers or related equipment.
- Fabricator's stickers shall not be visible to the public.

General Guidelines

- Signs shall be constructed of high quality, durable materials.
- All bolts, fasteners and clips shall consist of materials appropriate for the design of the sign and not appear as afterthoughts in the overall look of the sign.
- Separate all ferrous and non-ferrous materials with non-conductive gaskets to prevent electrolysis.

Projecting signs are another effective signage option in a pedestrian environment. These signs project horizontally from the wall that they are affixed to. This provides interest and a high level of visibility to the pedestrian and vehicles that are driving by. The following provides the general design criteria for these signs:

- Relate the design of the project signs and supports to the character of the building.
- Position projecting signs to complement the building's architectural details. Locate solid panel signs below the first floor ceiling line, or no more than fourteen (14) feet above the sidewalk, whichever is less. Provide at least eight (8) feet from the bottom of projecting signs to the ground in pedestrian areas and fourteen (14) feet in areas with vehicular traffic. Projecting signs should be attached at a ninety (90) degree angle from the face of the building. All signs which extend over the public Right of Way and or sidewalk shall be required to obtain the necessary permits from the City of Roseville.

The building architecture should be designed to accommodate signage and other graphics as an integral part of the building design so that future signs do not interrupt architectural features of the building.

- Metal signs may be made of aluminum, brass, bronze, copper, stainless or welded steel.
- Logos or trademark displays may be used on signs.
- Individual raised letters on the building face, pedestrian oriented blade signs, sculptured cantilever signs and non-internally lit signs with lighting from a secondary source are encouraged.
- Building addresses may be integrated as part of the architectural design or signage package for the building.
- Signage may be integrated with awnings and canopies.

Commercial Mixed-Use Area – Village District

In keeping with the vibrant character desired in a mixed-use area, the following additional guidelines apply in the Mixed-Use areas:

- Signs are encouraged to be unique, sculptural, one-of-a-kind accents to the building architecture.
- Sculptural elements, banners or painted murals without text may be included as part of a business identity.
- Artistic use of neon in surface mounted, blade or hanging and window signs is permitted.
- Franchise signage is strongly encouraged to be incorporated into a more unique design execution than an “off the shelf” standard sign.
- The signage program for a tenant may include banners mounted on the upper levels of the building.

Artistic execution of Franchise Sign.

Example of Projecting Blade Sign.

Handcrafted elements as signage.

Example of a Tenant specialty banner.

Example of a Tenant Identification banner.

Example of a painted mural as part of signage program.

Example of a Window Sign.

Example of artistically executed neon.

Example of a Major Tenant Building Identification Sign.

Commercial/Community
Free-standing monument signs are allowed as identification for a building or complex of buildings consistent with the City's Sign Ordinance.

- Color, materials and fonts should be integrated with the design character of the architecture and landscaping.
- Sources of ground lighting should be screened from view.
- Monument signs for individual tenants within a building are discouraged.

Home Occupations
In keeping with smart growth and sustainability principles, home occupations within the Village District are encouraged. Where these occur, the home occupation shall not disrupt the neighborhood character, but is allowed to have a small sign displayed on the residence near the entry door or in a window.

- No standard franchise signage is allowed.
- Signage shall be unique, original and executed with a high degree of craftsmanship.
- Signage shall not be "propped up" inside a window.
- Signage shall not exceed two square feet in size.

Home Occupation Signs will not be allowed within the residential zones of the ARSP.

B.9 Public Facilities and Office Uses

While there will be no industrial uses within the ARSP, there will be a range of public facilities and office uses. Public facilities include: bus stops, an elementary school, a fire station, and other support structures such as lift stations. As an integral part of the community, it is important to maintain the quality of the character established by the Village District. Therefore, both public facilities and office uses will use the Design Guidelines for Office Development as a guide. It is anticipated that individual plans will be developed for each parcel based upon the program needs for the area.

Facilities should provide a positive visual identity from the surrounding properties, and address the public streets in a direct and welcoming manner. Building entrances should be clearly articulated with distinctive architectural elements, and signed to create strong simple orientation for students, employees, visitors and deliveries. Landscape buffers should be provided to screen loading and utilitarian portions of the site, including:

- Provide for an environment where people are comfortable walking from building to building with pedestrian links to the surrounding community.
- Pedestrian paths and walks should be lined with trees and separated from direct adjacency to streets and parking areas.
- Special paving should be used at key pedestrian and vehicular intersections.
- Pedestrian routes should not traverse large areas of parking lots without designated, landscaped enhanced routes.
- Architectural enclosures should be designed as integral elements of the building architecture.
- Materials should be appropriate to the building's style and character and suited to commercial construction.
- Any changes in materials should occur at the inside corners where the building plane changes direction.
- Mirror glazing should not be used.

The nature of the ARSP is to integrate as much of the community together as possible. As a mixed-use site, walls will not be used to separate the public facilities and office uses from the rest of the community. Public facilities, however, may be separated from residential areas in cases where noise, safety and security are of a concern.

B.10 Lighting

Exterior lighting can provide safe and effective evening illumination for the pedestrian and vehicular areas of roads, sidewalks, and walkways throughout the Amoruso Ranch community. Design should reflect the concept and character of the community through illumination level, light fixture type, finish, color, and location. There can be streetlights for roads and sidewalks, pedestrian lighting for sidewalks and walkways, building illumination, and accent lighting on special architectural and landscaping features. Specialty lighting, such as seasonal tree lights, is also encouraged in the Village District. Cutoffs and shields shall be used as necessary to minimize impacts on residents.

Privately Owned and Maintained Street Lights
Streetlights and Fixtures are encouraged to be of two types:

1. On primary streets: pole mounted with twin arms that match the architectural style for the community. The roadside arm could hold an extended lamp to illuminate the road. On the sidewalk side, the arm could hold flower baskets, art, or banner arms.
2. On secondary streets: single armed on poles to reduce glare and the impact of lighting on residences. Light is also encouraged to be focused downward and shielded from the night sky.

The City of Roseville has established street lighting standards for the City. Should Amoruso Ranch wish to deviate from the standard light fixture in terms of design character, the selected fixture must be approved by the City and meet the City standards for illumination, glare prevention, etc.

Path and Stair Lights
In less traveled areas where bollards may be too large, footpath lights can be acceptable as a means to illuminate a secondary path. On stairways, inset stairway and stair step lights are encouraged to enhance pedestrian way finding. Consistent with City requirements pedestrian pathways must be illuminated a minimum of 0.5 foot-candles at the walking surface.

Building Mounted Lights
Building mounted lights can be used to light walkways, terraces, courtyards, plazas, and planting in appropriate areas. Because building lights may be turned off, building lighting cannot be depended upon exclusively for illuminating walkways and other areas where safety is a concern. Fixtures are encouraged to be selected and located to cast downward and be shielded to minimize glare. Lighting from buildings can be balanced with street lighting to ensure areas are not over lit.

Accent Lighting
Accent lighting can be used to emphasize special features such as fountains, sculptures, wall niches, signs, planters, or trees for decorative effects and can be inconspicuous and durable. Small scale accent lights such as LED based fixtures can be used for way finding or as special design elements.

Special Event Lighting
Lighting used for special events can include decorative lighting for holiday seasons or other community park event lighting. Special event lighting can be designed for use during event and non-event times. Seasonal decorative lighting during holidays and holiday events is encouraged subject to approval by the City of Roseville.

B.11 Parking

Off-Street Parking Guidelines
Off-street parking, including parking lots, can often have an undesirable effect on a community when it disconnects people from public spaces, creates visual and physical barriers, or provides unsafe conditions. The demand for off-street parking is reduced by encouraging the use of non-motorized transportation with strong trail linkages and bicycle facilities, and by having access to transit for daily needs.

Amoruso Ranch parking areas will follow the City of Roseville Zoning Ordinance standards and should:

- Use appropriate lighting to eliminate dark hiding places, clearly marking any unobstructed access ways for users from parking, and increase visibility for users and security systems to monitor activity.
- Locate parking areas close to facilities to reduce the distance and time it takes to go from parking lots to the facility.
- Provide on-street parking next to active areas.
- Provide clear visibility, unobstructed by signs, landscape, or buildings from street to parking lots.

Minimize the visual impact of parking by:

- Locating parking areas behind tree groves and out of view corridors.
- Planting parking lots with trees and shrubs to reduce the parking lot's visual impact.

Pedestrian connections are encouraged to be integrated into the parking lot layout to provide safe, clear, and unobstructed pathways. For pedestrian access points and pathways, special emphasis can be provided through distinctive materials, colors, and patterns. Parking stall dimensions, aisle widths, loading areas, and layout shall conform to these and all other standards, codes, and regulations of the City of Roseville unless otherwise approved by the City. All irrigation and landscape shall comply with the City's Water Efficient Landscape Ordinance.

B.12 Relationship to the City Community Design Guidelines

Where residential neighborhoods have an interface with an edge (i.e. adjacent to parks, paseos, or open space Class I trails), design techniques should be employed to provide neighborhood access and visibility to these features. This will enhance the level of connectivity in the ARSP. Guidelines for the various edges within the ARSP are provided below:

Guidelines for Edges along Parks, Paseos and Open Space
The following guidelines apply to the design of neighborhoods adjacent to parks and open space features:

- Where applicable, neighborhoods should provide access, for service and fire protection, adjacent to parks, natural creek corridors, pedestrian parkway corridors, and paseos. Locked gates into subdivisions are not permitted where they would preclude public access to a City park or Class I open space trail.
- Along open space parcels, frontage landscaping shall be native plants, as required by the City.
- A subdivision's internal street system shall be designed to allow residents to walk easily to nearby parks.
- Residential units should be oriented towards parks and paseos, rather than backing onto them.
- Where streets occur adjacent to the Urban Park, individual private residential driveways are not permitted to take access from these streets.
- Residential subdivisions located adjacent to open space areas shall provide visual access to the open space.
    - Residential streets should provide views into the open space areas at selected locations by providing opportunities for homes to front or side on to open space. This can be accomplished in a number of ways including single-loaded streets, loop streets, or live end cul-de-sacs.

- No more than 50% of homes, within each subdivision that are adjacent to open space shall back up to open space areas. This requirement will not apply to internal "urbanized" open space areas such as paseos, to the portion of AR-98, south of the Placer Parkway- or to parcels AR24 and AR 37 where size and configuration may overly burden development (open fencing requirement still apply to these parcels).
- Where residential lots back up or side onto open space areas, the use of open-style fencing is appropriate. However, where privacy, security, or noise attenuation is of concern (such as adjacent to public trails), solid fencing may be used between residential lots and open space (subject to Fire Department standards).
- Where residential lots back or side onto an open space area and where public access is encouraged (i.e., along Class I trails), multiple connection points shall be provided, via live-end cul-de-sacs, paseos, or other means.
- Pedestrian connection points to park and open space features should be easy to find within neighborhoods, along designated pedestrian/bicycle routes with high visibility to residents.
- As applicable, ensure subdivisions provide the proper interface with, and design for, any prescribed paseos.
- Where paseos are not adjacent to a street, they must be open to one side at all times to prevent a tunnel effect and create security concerns.
- ~~Where~~ Where homes side on to parks and open spaces fencing restrictions shall apply as per Fig. 5b. For homes siding or fronting on to AR-64 the front and side yard fencing shall be limited in height to 2'-6".

Figure B.5a: Homes Fronting onto Park

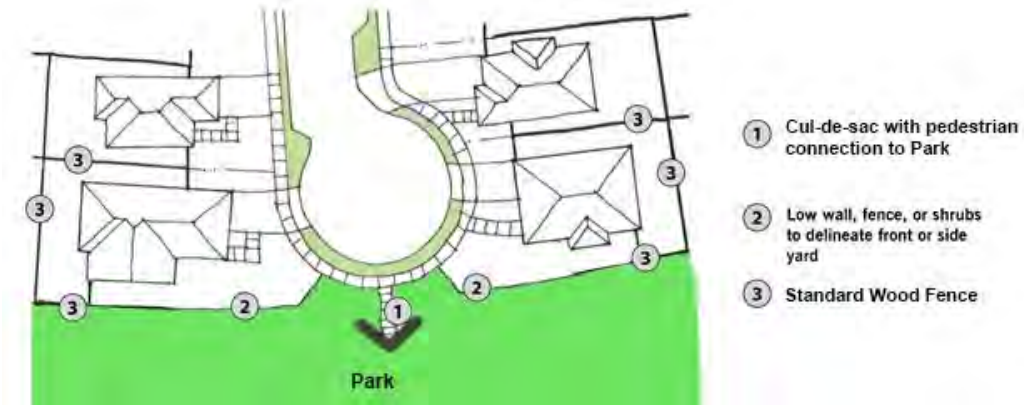

Figure B.5b: Homes Siding on to Parks (added 8/30)

Figure B.6: Homes Backing/Siding onto Open Space

Figure B.7: Homes Fronting Paseo

B.13 Community Landscape Design Guidelines

The purpose of the landscape design guidelines is to encouraged elements that support the landscape vision for the community as discussed in Chapter 3 of this Specific Plan. Elements that would distract from the intended character are noted as discouraged elements.

Landscape design should be appropriate for the local climate and soil conditions, use of water conserving plant species, utilize recycled water irrigation systems, install water efficient, low volume irrigation systems and controls and comply with the City's Water Efficient Landscape Ordinance (WELO). Landscaping should provide an appropriate transition between the formal landscaping in developed areas and the natural character of the open space areas.

This section outlines landscape themes and street planting concepts.

A. Landscape Design Goals and Objectives

To support the landscape vision for Amoruso Ranch the following concepts are established as objectives for the landscaping within the Plan Area:

- Provide high quality landscape and strong community identity.
- Utilize landscaping to enhance the sense of community established by the network of trails and pedestrian connections.
- Create a unified palette of materials and colors that supports a cohesive identity for the community, yet allow for variety and interest.
- Create open gathering spaces where the community can comfortably meet, gather, and recreate.
- Reinforce the street character where the pedestrian is the primary user and the vehicle is secondary.
- Utilize a water efficient design that meets the City's Water Efficient Landscape Ordinance (WELO)

Using the above criteria, the following guidelines were established in order to meet the goals and objectives of the landscape at Amoruso Ranch.

Streetscapes

Attractive streetscapes are an important aspect of any community and Amoruso Ranch embraces this principle. The streets sections at Amoruso Ranch were designed with an eye to the pedestrian and cyclist. Ample space in the parkways for street trees creates a buffer to insulate the pedestrian from vehicles. The landscape, particularly street tree selections, reinforces the street hierarchy to establish a sense of place and visual continuity throughout the community.

The following section addresses design guidelines for street trees and their associated landscape. For an in-depth discussion on the street hierarchy and street section geometry, refer to Circulation Chapter 7.

B. Landscape for Streets

General Guidelines

The following guidelines apply to all streetscape landscaping within ARSP.

- An automatic water efficient irrigation system shall be used in all formal landscape areas.
- The use of drought tolerant, low water use, plant species is encouraged.
- Street trees should be centered between street lights (per Roseville Electric landscape guidelines).
- Parkways and medians will be utilized for water quality features. The design of these features should complement and enhance the streetscape.
- Landscape elements such as planting, signage etc., shall be located such that the minimum sight distances for vehicles, bikes and pedestrians are maintained.
- Berms shall be no taller than thirty inches (30") in height including plantings.

Arterial Streets

The arterial streets that cross through Amoruso Ranch are Westbrook Boulevard, Road "B" and Road "D." These streets are the first layer of circulation at Amoruso Ranch and will be the first street viewed by the public as they enter the community. The following guidelines should be followed for landscape in these areas:

- Large minimum 15-gallon container, evergreen non-conifer trees should be planted in the parkways and medians.
- Street tree spacing should allow the tree canopies along each side to touch at maturity. Refer to Table B.1 Street Tree Master Plan for species and spacing.
- Root barriers and deep root irrigation shall be installed on trees planted within five feet of a curb, paved surface, sidewalk or wall.
- Parkways and medians should be planted with shrubs and groundcover using planting as a unifying theme but allow for a variety of species to ensure a healthy and long-lived plant palette.
- Turf should be avoided in these areas.
- Use of low water use, walk-on type groundcovers or grasses is encouraged.
-

West Sunset Boulevard

In addition to the guidelines above, the following standards shall be applied to the portion of West Sunset Boulevard adjacent to the northern portion of the ARSP.

- A landscape corridor will be provided. The existing Sunset right of way will be adjusted to accommodate this landscape corridor. The roadway will continue to be in Placer County's jurisdiction whereas the landscape corridor will be within the City of Roseville's jurisdiction. Depending on the road section and the travel lanes required the landscape corridor may vary between 25 feet to 15 feet in width.
- Within the landscape corridor, a 5 foot sidewalk will be provided.
- A 7 feet maximum wall height shall be provided as a buffer between the landscape corridor and the residential units backing onto West Sunset Boulevard. The setbacks from the landscape corridor shall be followed as set forth in the Amoruso Ranch Specific Plan Development Standards
- Large minimum 15-gallon container, evergreen non-conifer trees should be planted in the landscape corridor.
- Root barriers and deep root irrigation shall be installed on trees planted within five feet of a curb, paved surface, sidewalk or wall.
- Turf should be avoided in these areas.
- Use of low water use, walk-on type groundcovers or grasses is encouraged.

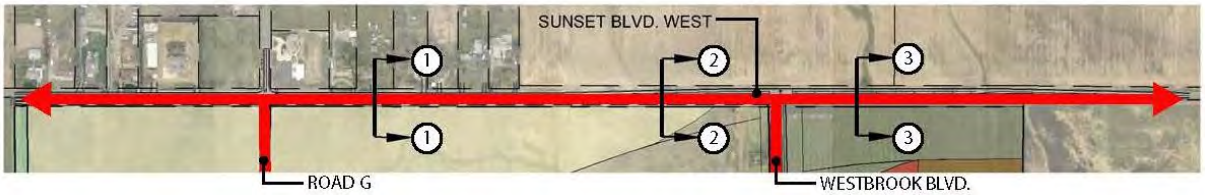

Figure B.8a: West Sunset Boulevard Street Section – Key Map

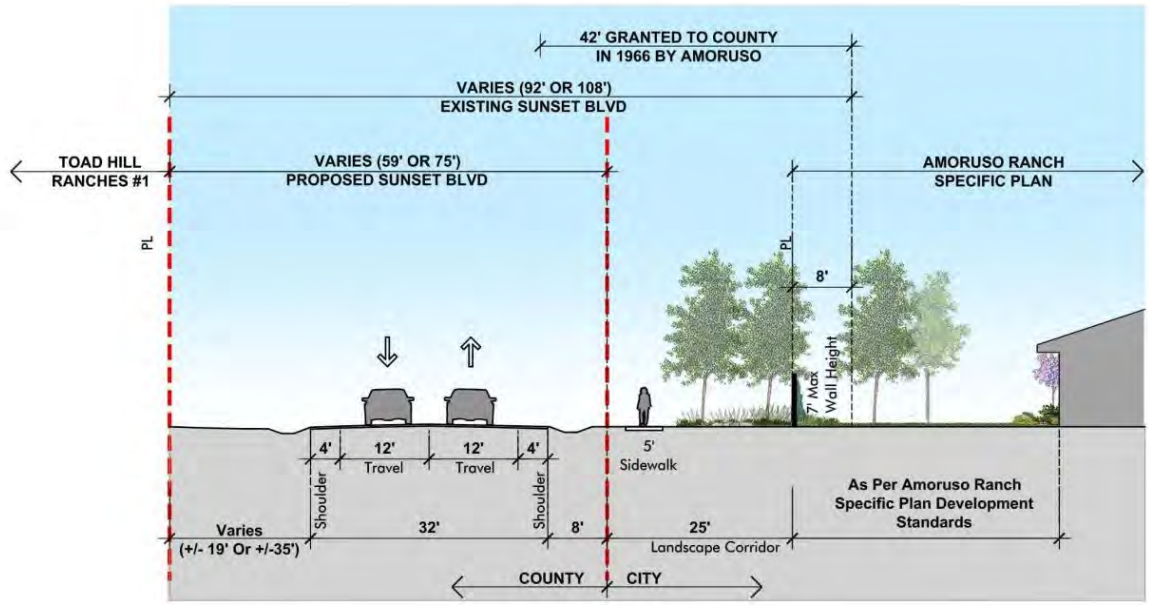

Figure B.8b: West Sunset Boulevard Street Section 1-1

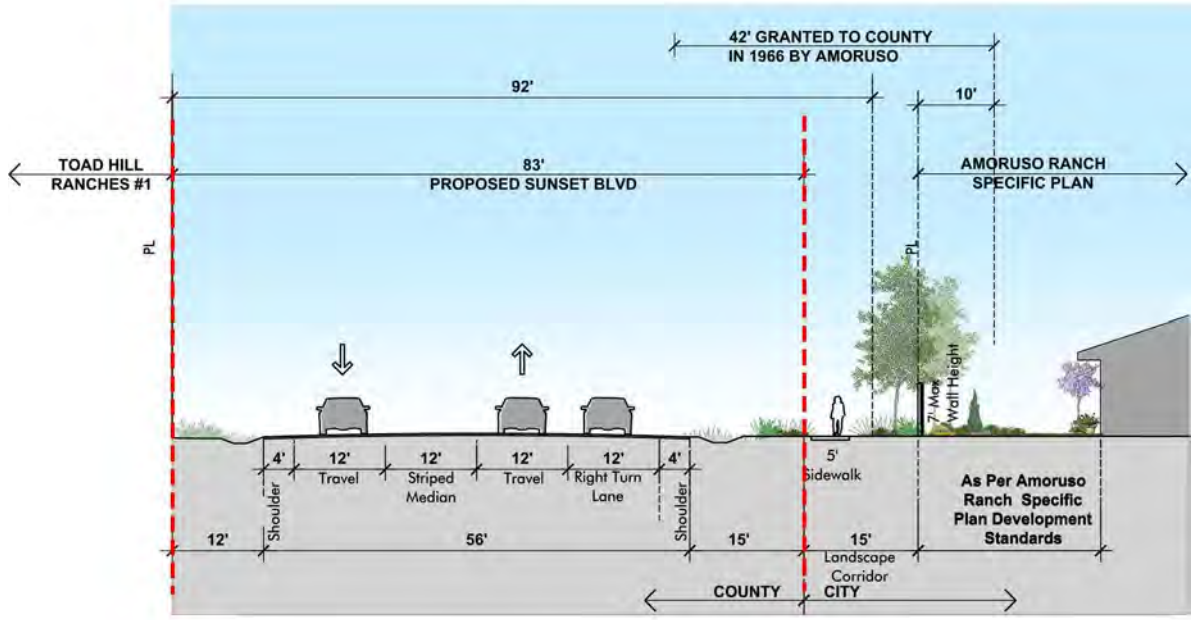

Figure B.8c: West Sunset Boulevard with Right Turn Lane Section 2-2

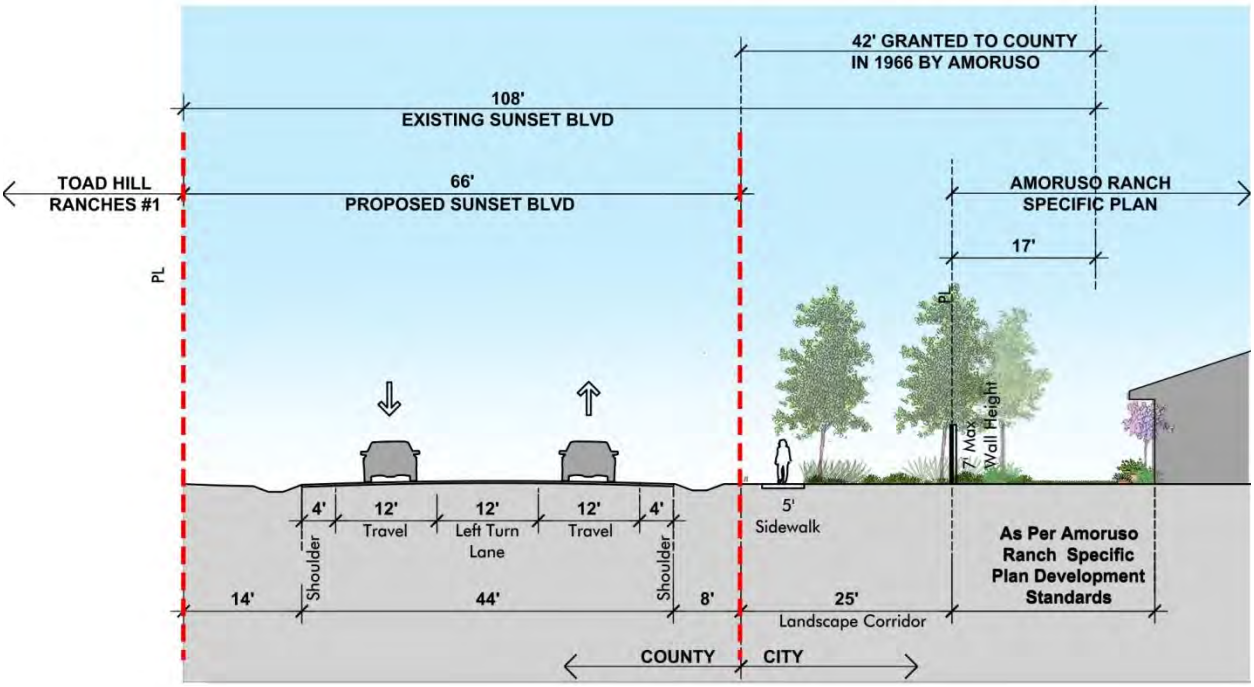

Figure B.8d: West Sunset Boulevard with Left Turn Lane Section 3-3

Median Breaks

Median breaks on arterial streets are limited to those shown on Figure 7.3 in Chapter 7, *Circulation*. The purpose of controlling the number and location of these breaks, in addition to controlling traffic movements, is to ensure a strong, continuous street tree and landscaping treatment along the streetscape. On a limited basis, additional median breaks may be considered on a case by case basis.

- Additional median breaks will be considered when a demonstrated benefit is shown to increase the level of service of an otherwise already degraded signalized intersection adjacent to the location of the desired breaks.
- Median breaks along arterial streets should be spaced to allow for standard turn pocket and taper lengths.
- Breaks should be spaced to provide a sufficient area for median landscaping and to prevent small islands which cannot be landscaped due to size constraints.
- Median design should avoid creating conditions where hardscape must be installed in lieu of landscaping due to site distance requirements.
- A minimum of five (5) trees, spaced at maximum intervals of thirty feet (30') on-center, shall be provided in any one section of median.
- Special cases deviating from these standards may be considered at the discretion of the Development Services Director, on a case by case basis.

- Use of low water groundcovers or grasses is encouraged except where utilities, street lights or LID basins interrupt the street tree pattern.

Figure B.9: Westbrook Boulevard – North of Road A (as edge conditions vary along the length of the street, diagrams only illustrate landscape treatments up to the edge of the walk)
(P = Parkway; W = Walk)

Figure B.10: Westbrook Boulevard – South of Road A (as edge conditions vary along the length of the street, diagrams only illustrate landscape treatments up to the edge of the walk)
(P = Parkway; W = Walk)

Figure B.11: Minor Arterial "B" (as edge conditions vary along the length of the street, diagrams only illustrate landscape treatments up to the edge of the walk)
(P = Parkway; W = Walk)

Modified Collector Street

Road "A", east of Westbrook is the only Modified Collector Street within Amoruso Ranch. It provides a secondary connection between Westbrook Boulevard and Road "B". The following guidelines should be followed for landscape along this street:

- Large evergreen non-conifer trees should be planted in the parkways and medians.
- Street tree spacing should allow the tree canopies along each side to touch at maturity. Refer to Table B.1 Street Tree Master Plan for species and spacing.
- Parkways and medians should be planted with shrubs and groundcover using planting as a unifying theme but allow for a variety of species to ensure a healthy and long-lived plant palette.
- Turf should be avoided in these areas.
- Use of low water use groundcover or grasses is encouraged.

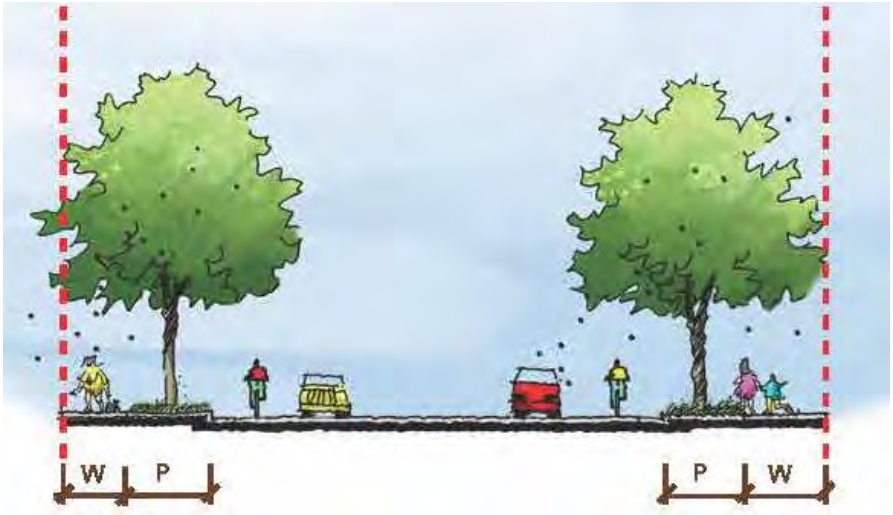

Figure B.12: Modified Collector (as edge conditions vary along the length of the street, diagrams only illustrate landscape treatments up to the edge of the walk) (P = Parkway; W = Walk)

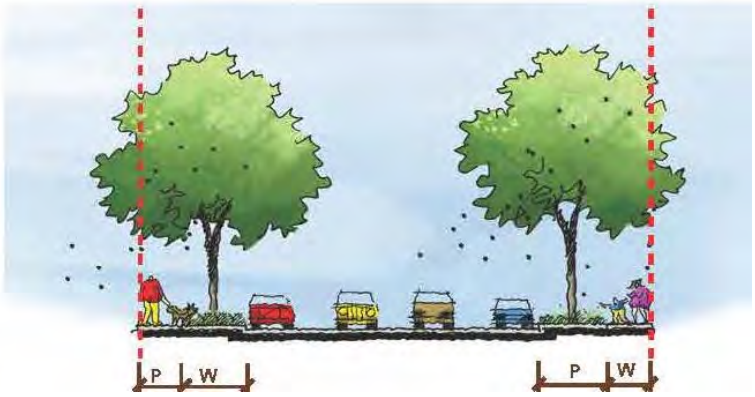

Figure B.13: Modified Primary Residential Street, (P = Parkway; W = Walk)

Modified Primary Residential Street with Street-side Paseo

This is an asymmetrical street section with detached sidewalks that consists of a sidewalk with a parkway on one side of the street and a wider sidewalk set within a landscape zone on the alternate side. This unique, wider landscape zone and wider walkway gives the street a park-like ambiance and forms a strong pedestrian and bike corridor within the community. Large deciduous trees should be aligned so that they canopy over the street. On the wider parkway side, a second row of more columnar deciduous trees establishes a unique streetscape. Shrubs and groundcover should be used within the parkways between the walks and the curb. The following guidelines should be followed for landscape along this street:

- Large deciduous canopy trees should be planted in the parkway. Refer to Table B.1 Street Tree Master Plan for specific tree species. Species should be selected to create rich fall color to highlight these streets within the community.
- Street tree spacing should allow the tree canopies along each side to touch at maturity. Refer to Table B.1 Street Tree Master Plan for species and spacing. In the area behind the walk within the landscape zone, a tall columnar deciduous tree species should be used. Spacing should correspond to the parkway street tree.
- Parkways should be planted with shrubs or groundcover or grasses and groundcover for layered plantings. The progression of scale and use of color is particularly important in the wide parkway area.
- In the area behind the walkway in the 35 foot wide landscape zone, a more ornamental plant palette may be considered as a transition to private front yards.
- Turf should be avoided in these areas.
- Pedestrian level lighting is encouraged along the ten foot wide walk section.

Roundabouts

Roundabouts are utilized to calm traffic and slow it as it enters the residential neighborhoods. Roundabouts should be planted in a similar style to the streetscapes. Tall shrubs and trees should be kept out of the sight lines in these areas. The following guidelines should be followed for landscape at roundabouts:

- Large deciduous or non-conifer canopy trees should be planted in the roundabouts to establish a vertical focal point.
- Roundabouts should be mounded 18 inches - 24 inches above the curb and landscaped to give more definition to the space.
- Layered planting is encouraged in this area to give more variety and definition to the landscape.
- Roundabouts may be used for water quality facilities if their design compliments and enhances the overall streetscape.
- Turf should be avoided in these areas.
- Utility layout through the roundabouts should consider specimen tree plantings when planning infrastructure.

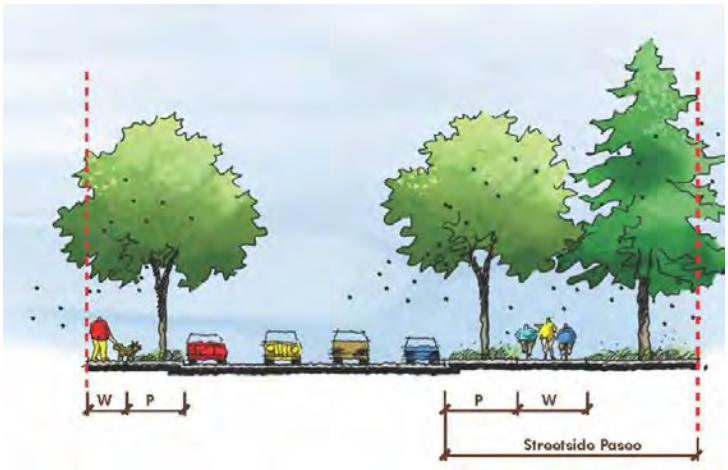

Figure B.14: Modified Primary Residential Street with Streetside Paseo, (P = Parkway; W = Walk)

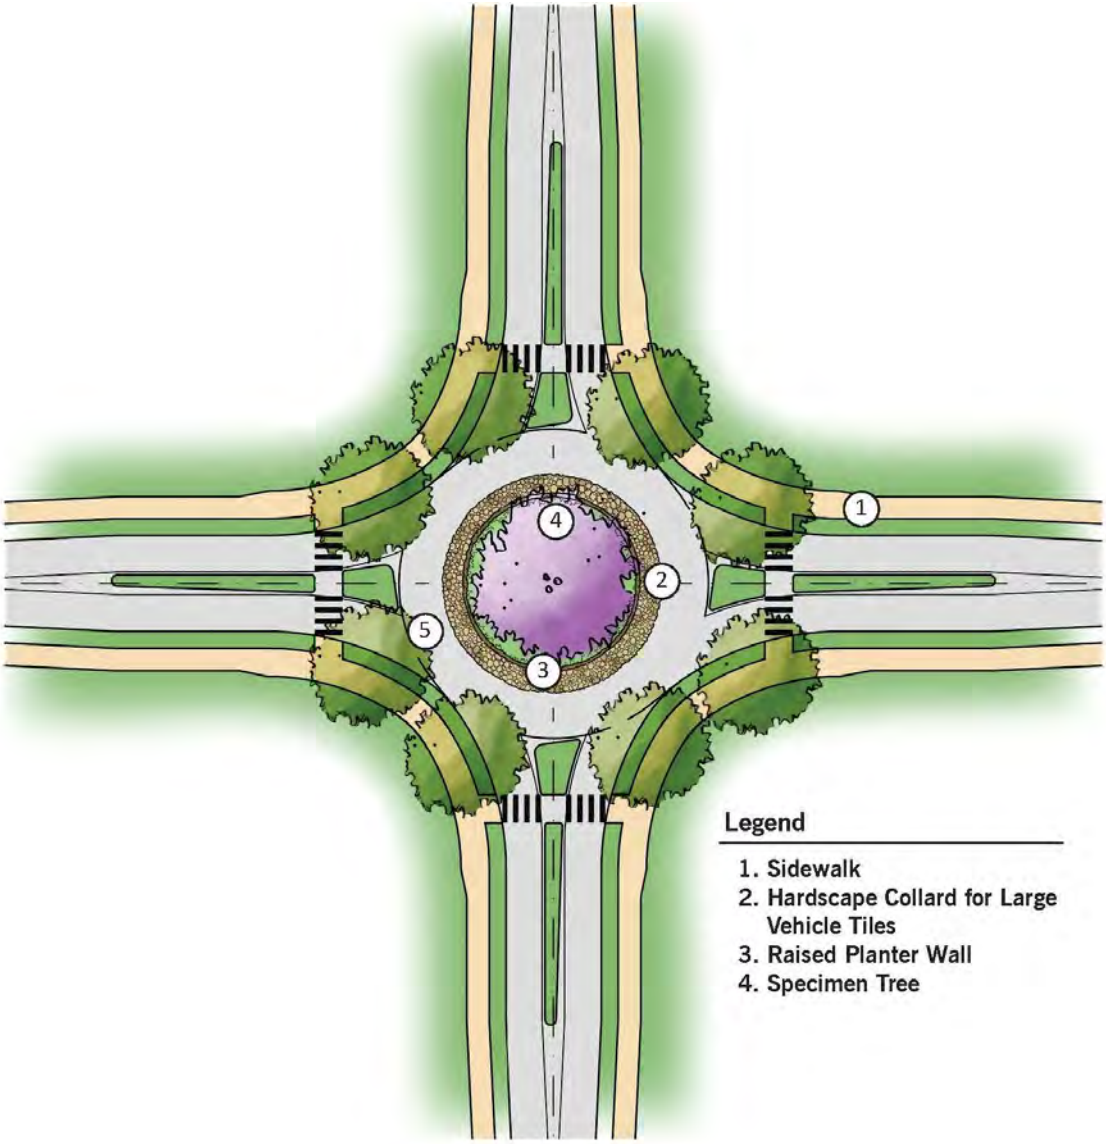

Figure B.15: Roundabouts Plan View

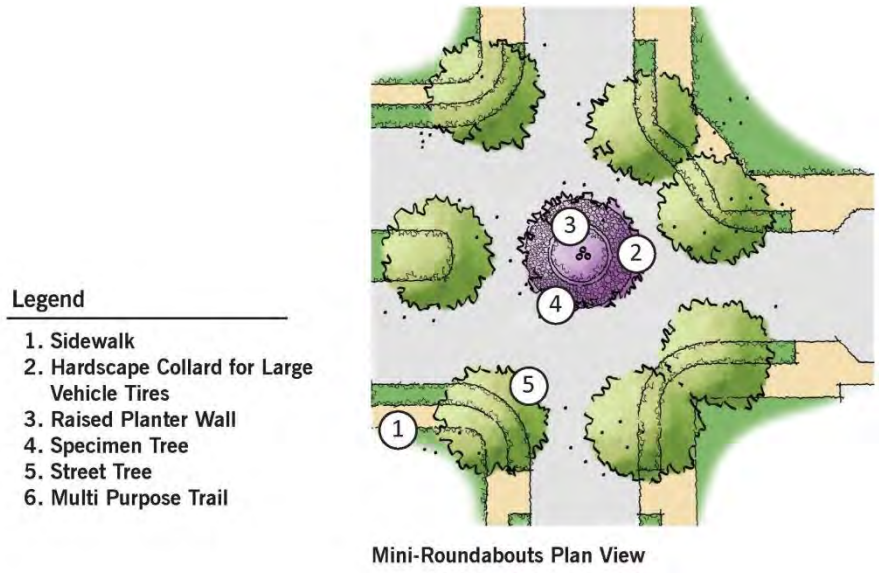

Figure B.16: Mini-Roundabouts Plan View

Modified Minor Residential Streets

Neighborhood streets have a five foot wide parkway and a five foot wide sidewalk on both sides of the street. The character of the landscaping along the streets should reflect that of the architectural character of each neighborhood. Trees should be sized appropriately for the width of the parkway and regularly spaced within a planted parkway. Tree species can vary from street to street and neighborhood to neighborhood, but should remain consistent within each block. The following guidelines should be followed for landscape along this street:

- Non-conifer evergreen canopy trees should be planted in the parkway. Refer to Table B.1 Street Tree Master Plan for specific tree species.
- Street tree spacing should allow the tree canopies along each side to touch at maturity. Refer to Table B.1 Street Tree Master Plan for species and spacing.
- Use of parkways for water quality swales is allowable.

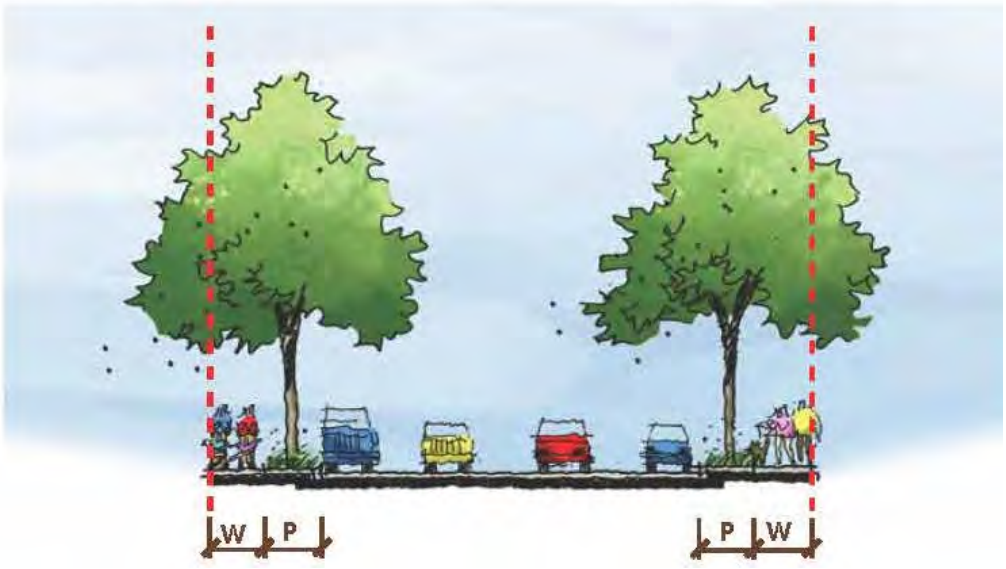

Figure B.17: Modified Minor Residential Street, (P = Parkway; W = Walk)

Alleys

Alleys may be used to provide access to the garage areas of the homes. Given the close proximity of the architecture to the alley, landscape here will be important to soften the edges of the homes. The following guidelines should be followed when designing the alley landscape.

- Alley landscape plans should be coordinated with utility plans to ensure adequate landscaping can be provided in the available space.
- Trees should be placed between each unit unless it is not feasible due to lack of space or other physical constraint.
- Trees and shrubs selected for planting pockets should be of an appropriate scale for the available space.
- Plantings should accommodate access to the private yards as appropriate.
- Privacy fencing in alleys should be located to allow for adequate landscaping between the fence and the alley driving surface.
- Alleys should have accent trees on both sides where they meet the streets.
- Landscaping within each alley should reflect the vernacular of the architecture.

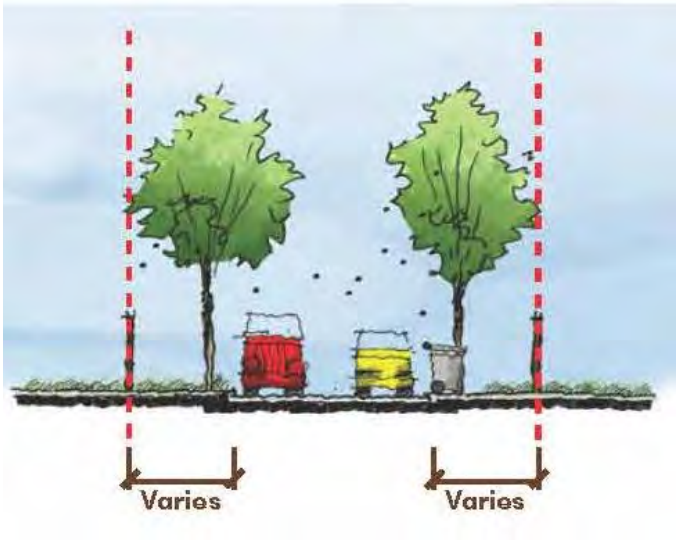

Figure B.18: Alley

Village District Streets

The Village District streets are unique to the community and it is important that their landscaping reflect this urban character. There are two types of streets with the Village District: Main Street and the Modified Primary Residential Street-Village Street. Below are guidelines for the landscape for each of the Village District streetscapes. A more in-depth discussion of the landscape for the Village District occurs later in this chapter.

Main Street

Main Street is the backbone of the Village District and is the most urban streetscape, using tree grates, specialty paving, landscape furniture and art to define the landscape.

- Deciduous canopy trees should be planted along the street in tree grates. Refer to Table B.1 for specific tree species.
- Tree spacing should allow tree canopies to touch and should establish a unique streetscape identity within the community.
- Tree species should be selected to allow visibility to merchant signage by having open canopies that allow you to see through the canopy or quickly grow to a height that allows signage to be seen under the canopy.
- Accent planting should reinforce the overall urban nature of the street.
- Turf should be avoided.

An active Main Street.

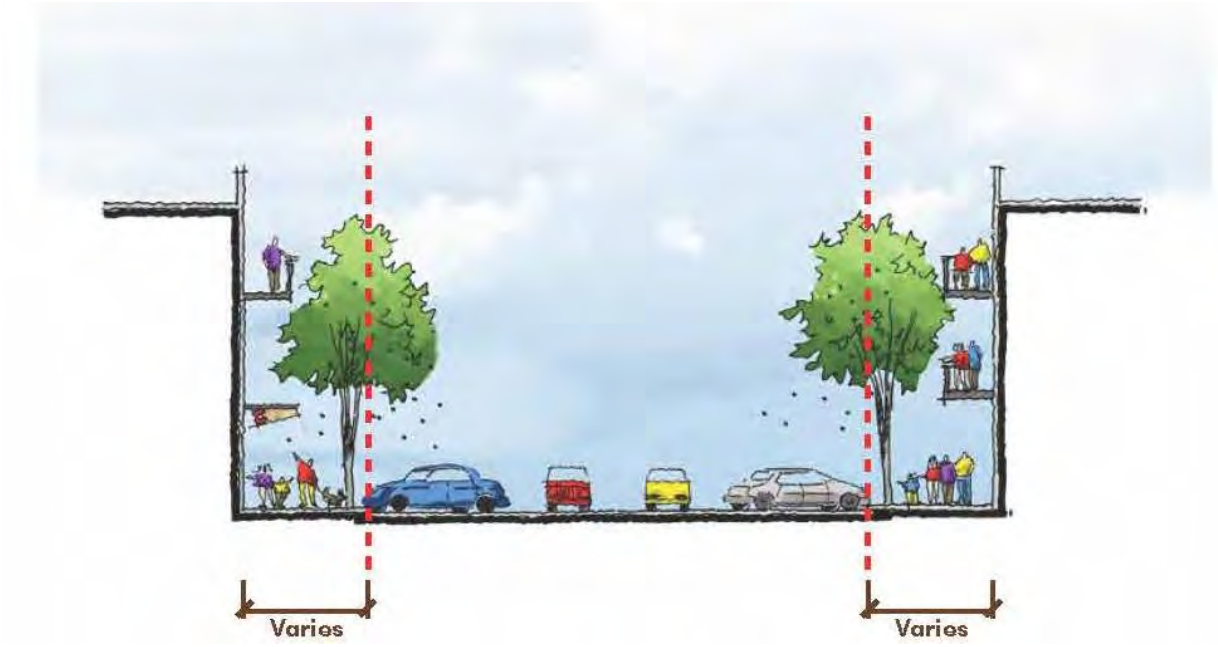

Figure B.19: Main Street

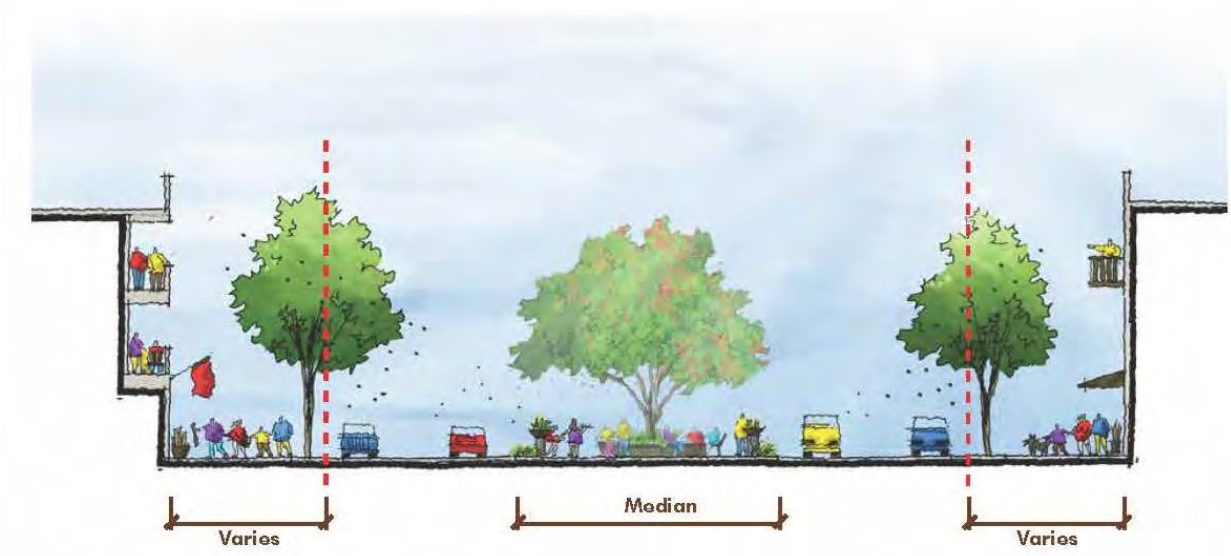

Figure B.20: Main Street Promenade

Village Streets

The Village Streets provide alternate access to the Village District, and are slightly wider than the neighborhood streets to accommodate some commercial traffic, including occasional cube delivery trucks. The landscaping along these streets should reflect their adjacent uses but should have an urban character.

- Deciduous canopy trees should be planted along the street. Where adjacent to commercial uses, they should be located in widened sidewalks with tree grates. Where adjacent to residential uses, they may either be located in five foot planted parkways or widened sidewalks and with tree grates, whichever is more appropriate to the density of housing. Refer to Street Tree Master Plan for specific tree species.
- Street tree spacing should allow the tree canopies to touch at maturity, approximately 30 feet on center.
- Understory planting can be ornamental and can consist of clipped hedges and flowering shrubs and groundcovers.
- Turf should be avoided in these areas.

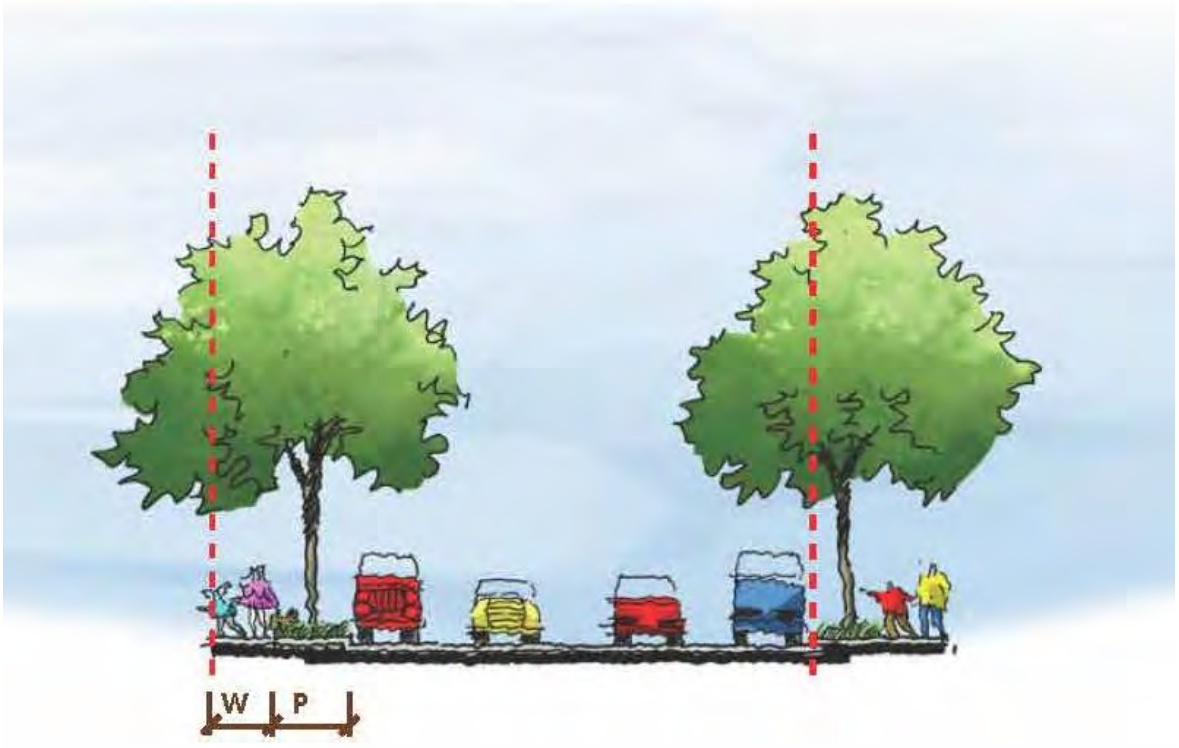

Figure B.21: Village Street, (P = Parkway; W = Walk)

Table B.1 Street Tree Master Plan			
Roadway Type/ Name	***Botanical Name***	***Common Name***	***Average Spacing***
Arterial Roadways			
Westbrook Boulevard	**Evergreen**

	Carpinus betulus 'Fatigiata'	Eurpean Hornbeam	20'-0"
	Carpinus caroliniana	American Hornbeam	20'-0"
	Cercis canadensis	Eastern Redbud	20'-0"
	Cornus florida	Eastern Dogwood	20'-0"
	Crataegus phaenopyrum	Washington Hawthorn	25'-0"
	Koelreuteria bipinnata	Golden Flame Tree	25'-0"
	Koelreuteria paniculata	Goldenrain Tree	25'-0"
	Laburnum anagyroides	Goldenrain Tree	25'-0"
	Lagerstroemia hybrids	Crape Myrtle	20'-0"
	Magnolia kobus	Kobus Magnolia	20'-0"
	Pyrus calleryana 'Capital'	Ornamental Pear 'Capital'	20'-0"
	Pyrus calleryana 'Redspire'	Ornamental Pear 'Redspire'	20'-0"
	Styrax japonicus	Japanese Snowdrop	20'-0"
	Styrax obassia	Fragrant Snowbell	20'-0"

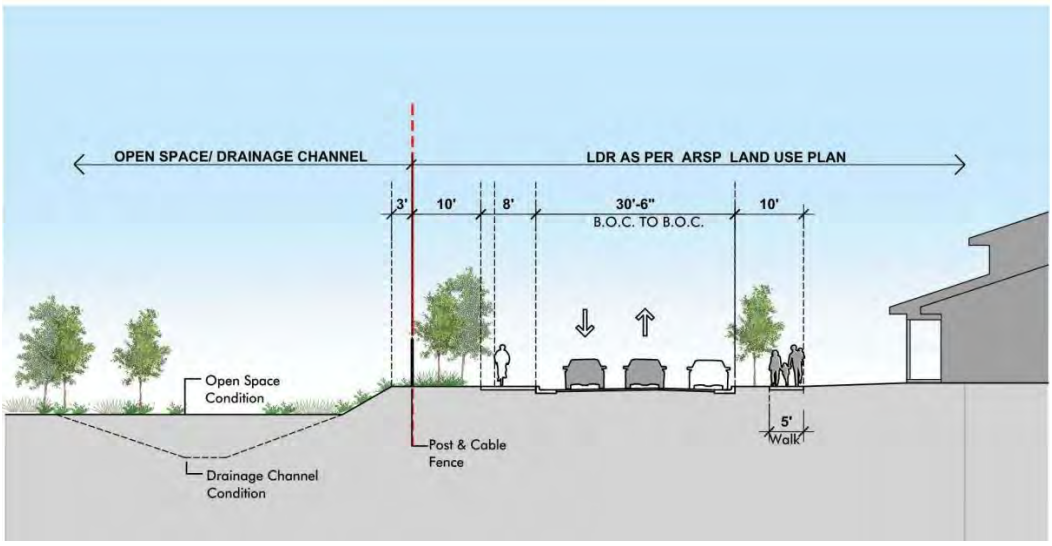
Landscape Edge Conditions

Given the location of Amoruso Ranch, there are a variety of edge conditions that occur around the site. Various landscape and edge treatments should be employed for residential neighborhoods along the edges of the Plan Area. A variety of design techniques will be employed to provide access, visibility, or even to buffer and separate the proposed residential development from the surrounding uses. Guidelines for the various edges within the ARSP are provided below. The following illustrations are merely suggestions, but are not limited to these designs as long as the intent of the ARSP is met.

Guidelines for Development along Open Space:

The following guidelines should be followed where development land is adjacent to parks and open spaces.

- Where applicable, neighborhoods should provide access, for service and fire protection, to adjacent parks, natural creek corridors, pedestrian parkway corridors, or paseos. Locked gates into subdivisions are not permitted where they would preclude public access to a City park or open space areas.
- Along open space parcels, frontage landscaping shall be non-invasive, native plants, as approved by the City.



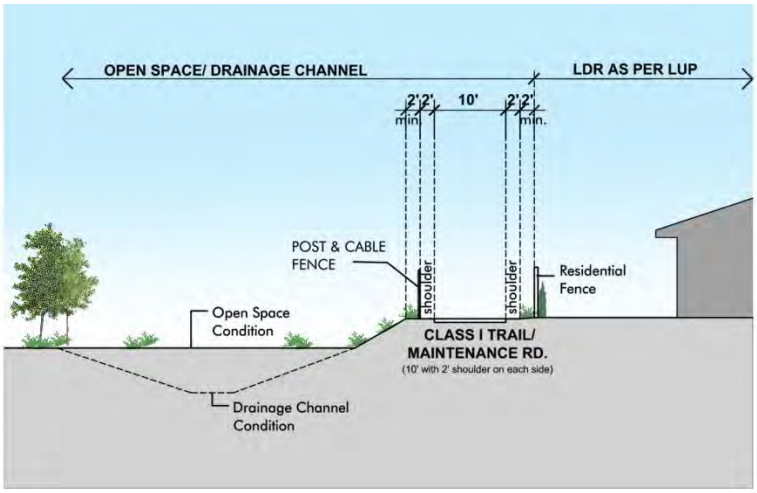


Figure B.22: Potential Edge Conditions Along Open Space/Drainage Channel (updated 8/30)

- Along open space parcels, frontage landscaping shall include post and cable fencing between the frontage landscaping and open space area.
- A subdivision's internal street system shall be designed to allow residents to walk easily to nearby parks.
- Residential units should be oriented toward (facing) parks and paseos, rather than backing up to them.

- Residential subdivisions located adjacent to open space area shall provide visual and physical access (for service and fire protection) to the open space. Pedestrian and bicycle access to open space shall only be provided where Class I trails are proposed.
  - No more than 50% of homes, within each subdivision that are adjacent to open space shall back up to open space areas. This requirement will not apply to internal "urbanized" open space areas such as paseos, to the portion of AR-98, south of the Placer Parkway or to parcels AR24 and AR 37 where size and configuration may overly burden development (open fencing requirement still apply to these parcels).
  - Residential streets should provide views into open space areas at selected locations by providing opportunities for home to front or side on to open space. This can be accomplished in a number of ways including single-loaded streets, loop streets, or live end cul-de-sacs.
  - Where residential lots back or side onto an open space area, multiple connection points (for service and fire protection) shall be provided, via live-end cul-de-sacs, paseos, or other means. Pedestrian and bicycle access to open space shall only be provided where Class I trails are proposed.
  - Where residential lots back up or side onto open space areas, the use of open-style fencing is appropriate,
  - Pedestrian connection points to park and open space features should be easy to find within neighborhoods, along designated pedestrian/bicycle routes with high visibility to residents.
  - As applicable, ensure that subdivisions provide the proper interface and design when adjacent to open space.

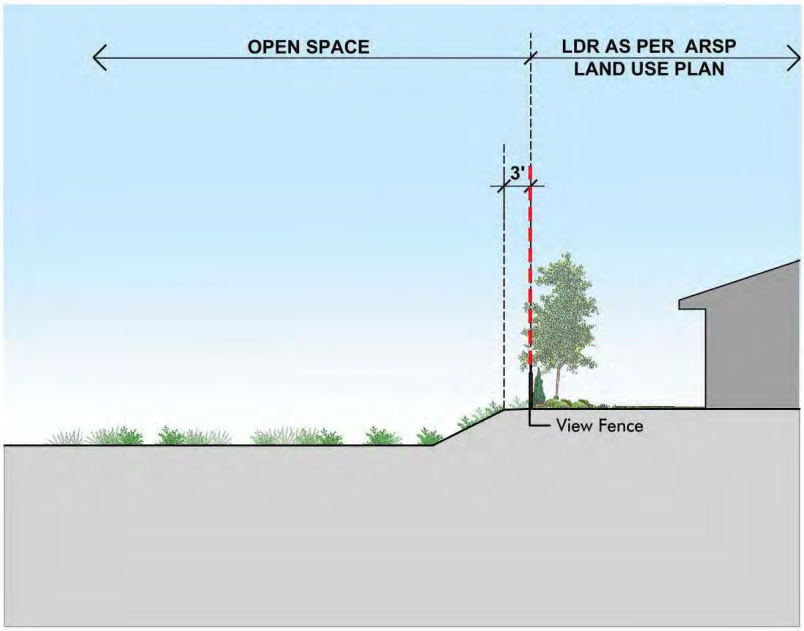

Figure B.23a: Edge Conditions Along Open Space Transition Zones

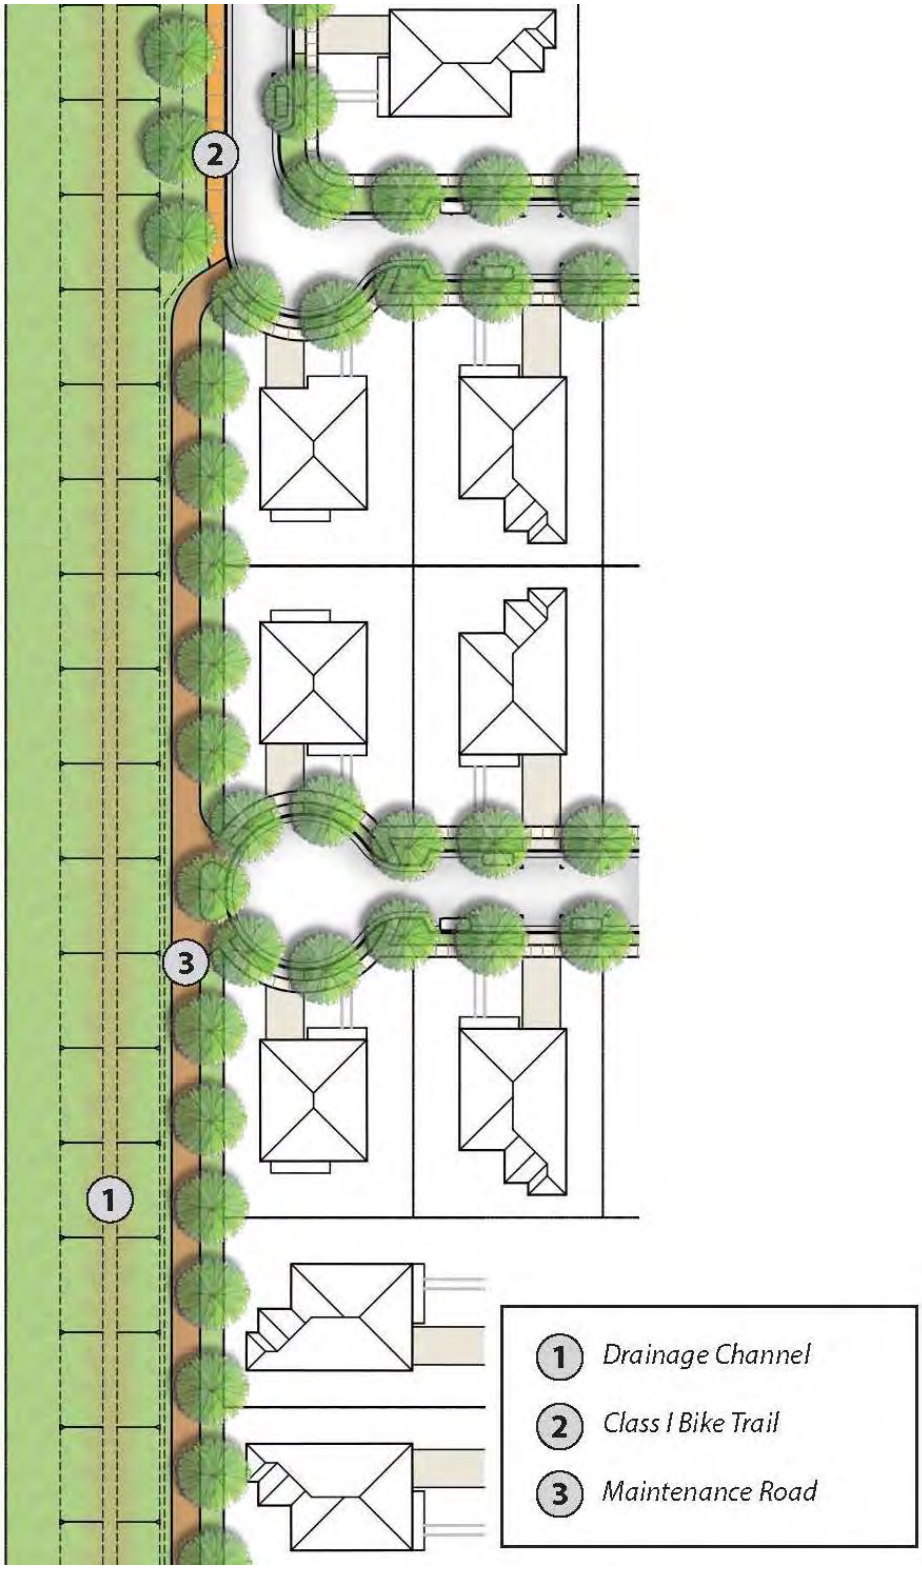

Figure B.23b: Edge Conditions Along Drainage Channel - Plan View

Guidelines for development along the Western Property Line North of Placer Parkway (Gleason Property):

In keeping with the City's General Plan policy there shall be adequate separation between the proposed residential development in ARSP and the adjoining agricultural uses to the west of the project area.

- Fencing and adequate landscaping shall be provided to minimize the interaction of the two uses.
- Adequate landscaping screening shall be provided along the residential edge to minimize visual impacts both to and from the development.
- Along open space parcels, landscaping shall be native plants, as required by the City.
- Pedestrian/bike access may be provided on the maintenance road along the drainage channel. Where homes front on to the drainage channel, the maintenance road may be replaced by a single loaded road.
- Where homes back on to the drainage channel, sufficient landscape shall be provided between the maintenance trail and the fences. Fences could be low solid wall solid or open fences with tubular steel.

The following sections illustrate potential design solutions for buffering along the Gleason Property:

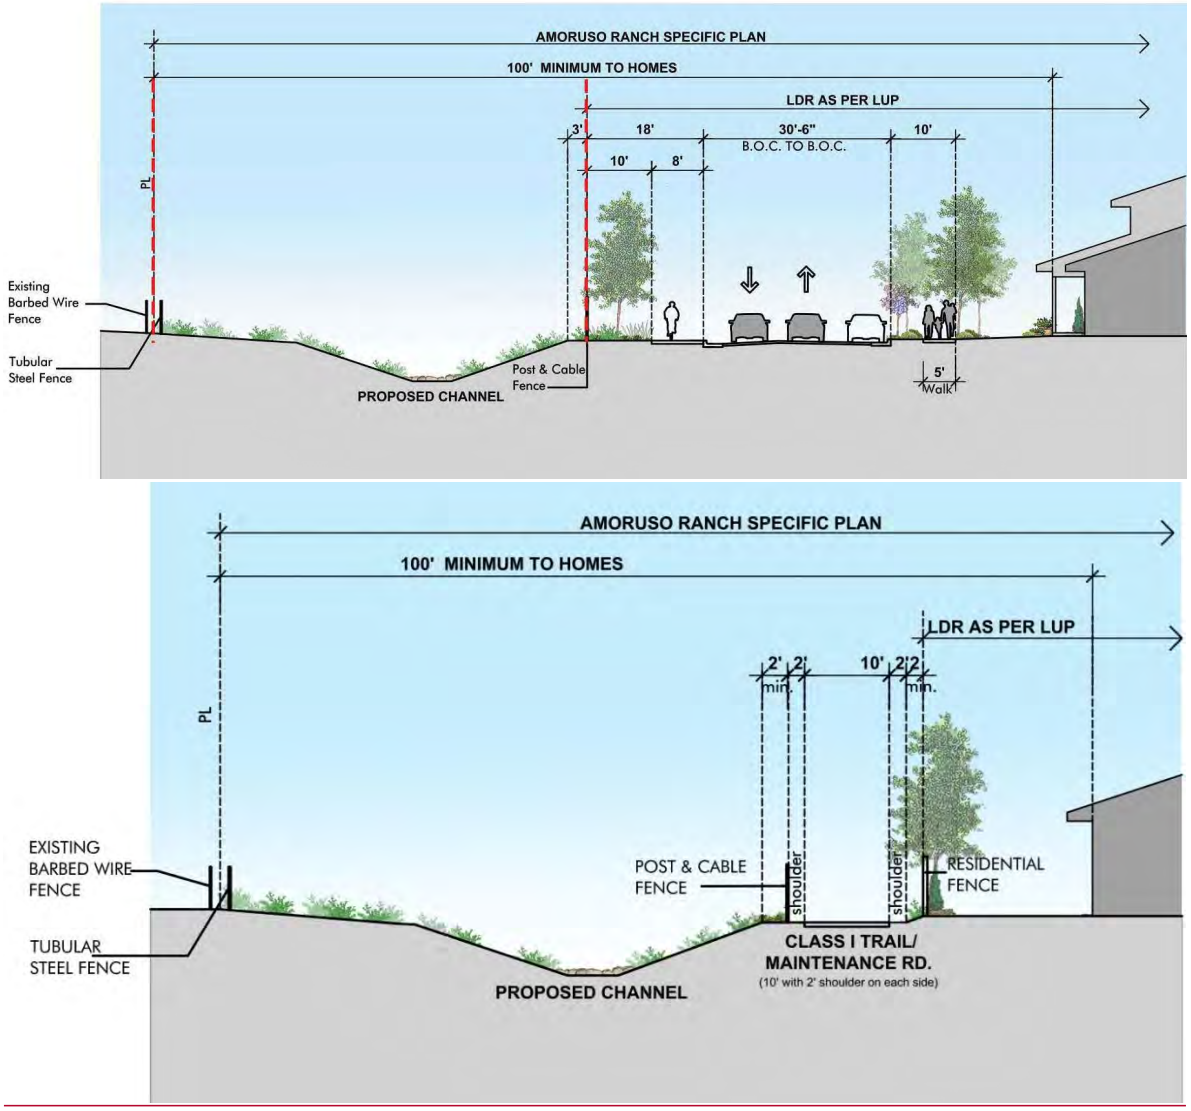

Figure B.24: Potential Edge Conditions Along Western Property Line North of Placer Parkway (Gleason

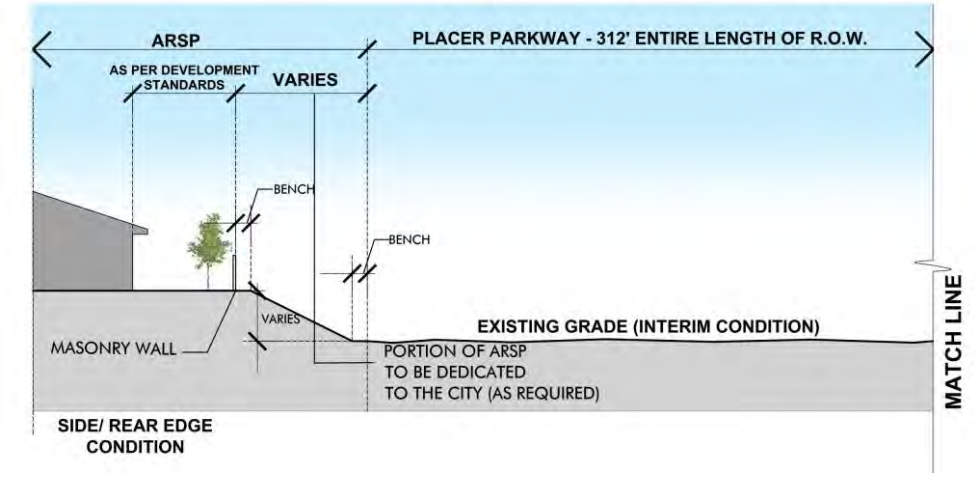
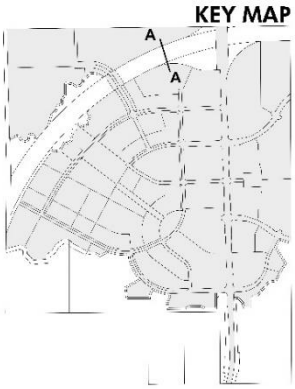
Property) (updated 8/30)

Guidelines for development along Placer Parkway:

Placer Parkway is a planned regional future six-lane expressway that runs through the ARSP area. During the Tentative Map stage for homes immediately adjacent to Placer Parkway (Parcels AR-2, AR-3, AR-4, AR-5, AR-6, AR-7, AR-8, AR-9 and AR-10), the following measures should be considered to maintain compatibility in the adjacent neighborhood. In addition portions of Placer Parkway maybe elevated above adjacent neighborhoods, so care should be taken while designing neighborhoods and individual lots.

- Development may back side or front on to the proposed Placer Parkway ROW. Where homes back or side on to the right-of-way, a masonry wall will be provided. Where homes front on Placer Parkway, a single loaded road may provide the separation, as illustrated in the conceptual cross section below.
- Care should be taken to locate and orient homes to address livability concerns. It is assumed the lotting pattern and home orientations may vary within the development parcels.
- Planting materials should be used between residences and Placer Parkway, where possible, as a screen or buffer. Plant material such as Sycamore, Oaks or London Plane trees or other similar planting material that has a broad canopy should be considered.





The following sections illustrate potential design solutions for buffering along Placer Parkway. Design of Placer Parkway is conceptual and actual design will be completed by others:

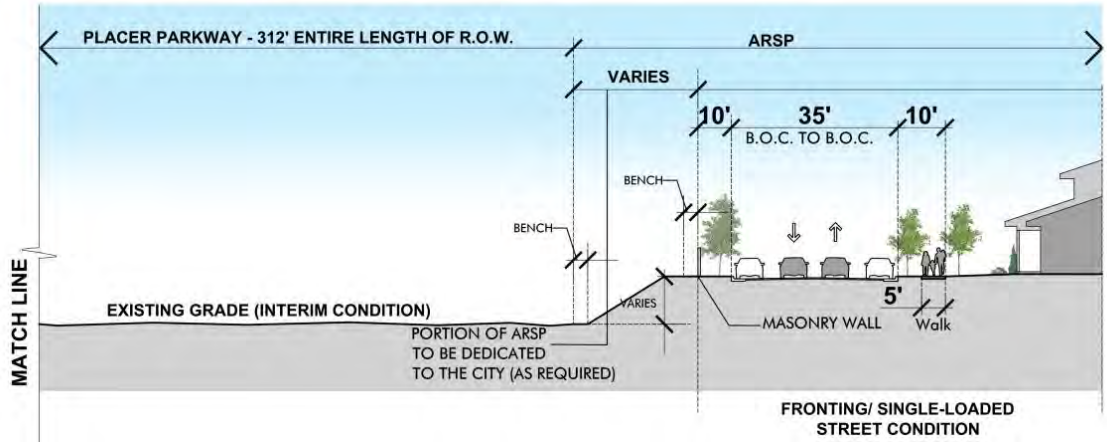


Figure B.25a: Conceptual P.P. Section and Edge Conditions (Interim Condition A-A)

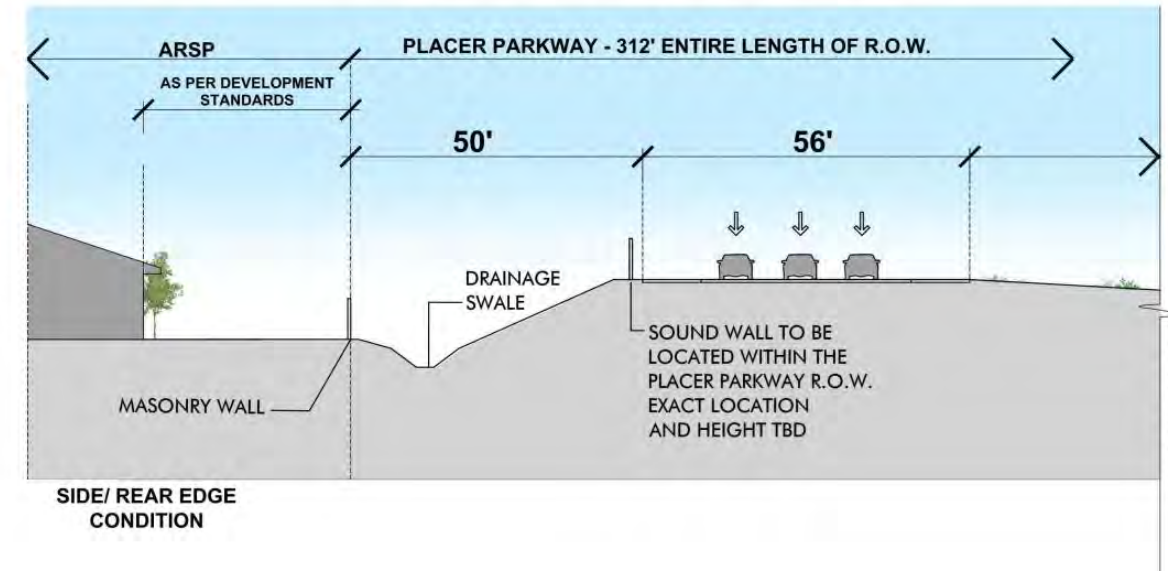

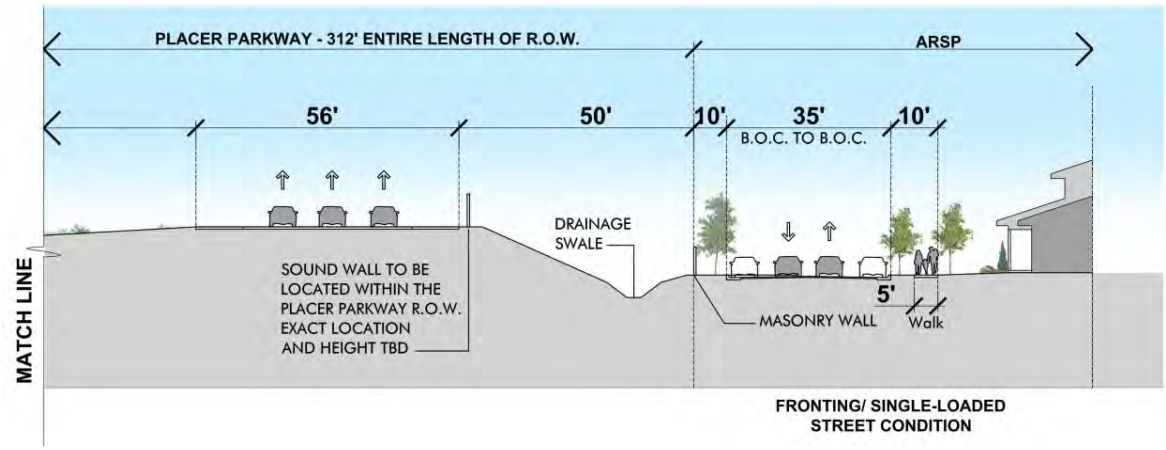

Figure B.25b: Conceptual P.P. Section and Edge Conditions (Ultimate Elevated Condition A-A)

C. Parks

The ARSP has an extensive network of both parks and trails. The description, general layout, and amenity schedule for the public parks has been addressed in Chapter 8.

In general, the park landscape should respond to the context in which it is located as well as the focus or "big idea" for the activities within each unique park. Where parks are adjacent to natural open space, the landscape with the parks should reflect and respond to the adjacent natural setting.

Privately owned urban relief areas (also referred to as "pocket parks") may occur throughout Amoruso Ranch and their design will be specific to each neighborhood. Where odd shaped "left over" parcels occur within a neighborhood, the merchant builder is encouraged to plan it as urban relief that is maintained by a Home Owner's Association or other private ownership entity.

In general, the following guidelines should be used when designing the parks. The design and materials shall be consistent with the City of Roseville Public Works and Parks Design and Construction Standards, the City's Water Efficient Landscape Ordinance and the project's Water Conservation Plan.

- Turf areas should be limited to active recreation areas.
- Shrubs and ground cover palettes should be simple and layered to give definition and variation to spaces and yet maintain a unified ground plain.

- Shrub and tree species in parks should be hardy, long lived, and easily maintainable.
- Use of low water use plants in appropriate areas is encouraged.
- All plant material should be chosen from the approved plant palette and consistent with the Parks Construction Standards as listed by the City's Urban Forester. Walks and hardscape within the parks are encouraged to use special finishes or score patterns to reinforce their identity.
- Site furnishings should be made of durable, long-lasting material, consistent with the Parks Construction Standards.

D. Village District Landscape and Hardscape

The Village District is a mix of retail, office, and residential uses with the goal of creating an urban gathering and activity hub for the residents of the community and surrounding area. The landscape within this area should have a sophisticated urban vibe. Outdoor dining, informal seating in open, shaded plazas, and large scale community events may all occur in the Village District.

In addition to the landscape character of Main Street previously discussed in this Appendix, there are opportunities for small urban plazas where buildings break along Main Street. These areas should be planned for accent paving with seating and should include a focal feature such as a large shade tree, art piece or water feature.

Where streets intersect with Main Street, the vehicle should feel secondary to the pedestrian. Enhanced paving should be used at the intersections and cross walks, as well as zero edge curbs at the corners.

At the Main Street Promenade, this entire block is intended to function as one large plaza with the center of the street being the main activity area. Within this plaza, accent paving or pavers should dominate the ground plane. It should include shaded and open moveable seating, and may include variety of other activities including a small structure. It is important to include art as a major component of this plaza space. The entire block can be cordoned off to host farmers markets, art shows, car shows, etc.

Memory points in parks.

The following are basic guidelines that should be followed when designing the hardscape of the Village District.

- All trees along the streets within the Village District should meet the street landscape guidelines discussed earlier in this Appendix.
- Paving along Main Street and within the adjacent plazas should be enhanced. Colored concrete, pavers, or brick are encouraged. Enhanced concrete scoring patterns are also encouraged.
- Pavers or scored concrete is encouraged to be used within intersections in crosswalks or within the entire intersection.
- Outdoor seating as part of the streetscape as well as areas for outdoor dining is encouraged.
- Within the parking areas in the Village District, trees should be placed to minimize the heat island effect and design of the parking lot shall meet City of Roseville standards, including standards for shading.

E. Landscape Planting Guidelines

The landscape within Amoruso Ranch is a major design element for reinforcing the character of the community. Plantings define street edges and add scale, visual interest, and seasonal change to spaces. In general, layout and plant selection for the community should complement their surroundings and mesh seamlessly with the architecture of the community.

There is a wide variety of deciduous and non-conifer evergreen trees that can be used in the Amoruso Ranch plan area. These trees can be planted in areas to reinforce pedestrian connections, define edges and views, provide shade for seating areas, and add visual interest. Trees can also be used to anchor corners and intersections throughout the community and demarcate gateways and amenity areas. All trees should be selected from the ARSP Tree Palette (Table B.1) for climactic hardiness, longevity, visual appeal and desired design intent. If a tree species is found to be susceptible to disease, structurally unsound or causes high maintenance challenges long term, it shall be replaced with an alternate species.

Understory planting is just as important as the tree selection. Shrubs, groundcover, grasses and perennials can be used to define spaces and create outdoor rooms in amenity areas. They are also important in helping to establish the character of the different neighborhoods. Shrub selection in general should reflect the architectural character of the community and should relate with the architectural theme of each neighborhood. These understory plants are encouraged to be selected for their form, texture, color, hardiness and longevity. Plantings are encouraged to be multi-layered and diverse to provide year-round interest, color and form.

Water efficient landscape shall be utilized in the Amoruso Ranch plan area and planting and irrigation design shall meet the City's Water Efficient Landscape Ordinance and Water Conservation Plan. Plant selection will be crucial in balancing the mandated state guidelines and the aesthetics of the community.

Pedestrian connectivity across street.

Specialty building or kiosk.

The following table lists the plants most suited for use at Amoruso Ranch. This table reflects the name of the plant material and water use (VL=Very Low; L=Low; M=Medium; H=High). This is not intended to be a comprehensive list. Additional varieties of plant material may be considered with the developer's consent.

Front yard landscaping in residential areas (including planter strips between curb and sidewalk, where present) are subject to the provisions of the City's WELO and the ARSP Water Conservation Plan. In instances where the WELO applies, landscaping and irrigation systems along residential streetscapes should comply with the following guidelines:

- When separated sidewalks are used within residential subdivisions, low maintenance landscaping should be encouraged in planter strips between the sidewalk and the curb, provided the irrigation system complies with the City's WELO.
- LID and other walk-on groundcovers may be used as specified in the plant palette above.
- Front yard landscaping should be consistent with the guidelines for plan-wide water conservation.

Water Efficient Plants

Planting Strips

Low Maintenance Landscaping

	Tecomaria capensis	Cape Honeysuckle	M/L
	Wisteria sinensis	Chinese Wisteria	M

B.14 Community & Neighborhood Entry Features

There is a hierarchy of entry features at Amoruso Ranch that is split into three categories: City gateways announcing entry into the City of Roseville, Community monuments that demark the Plan Area and Neighborhood entry features

City Gateways are the most significant in the hierarchy of entrance features in the Plan. Located along the northern boundary of the Plan Area where Sunset Road intersects a major arterial (Westbrook Boulevard and/or Future Placer Parkway), these features give a pronounced entrance statement into the City.

Community monuments are the gateway features that announce entrance into the Plan Area along Westbrook Boulevard. Sited at key locations, these features should have a unified application of hardscape elements, project icons, landscaping and accent materials to define ARSP's visual character. Functionally, they serve as the signage for Amoruso Ranch and reinforce the community identity. The initial impression of a community is often formed by the quality and character of these monuments. The design of these monuments should reflect the architectural vernacular of the community. Materials with a feeling of quality and permanence such as stone, brick, tile or steel should be used for all monuments and they may incorporate art pieces to make them even more unique landmarks. By utilizing a consistent material palette and design philosophy for each unique monument within Amoruso Ranch, they become community threads that tie the community together.

Signage should utilize high quality materials which will endure outdoor seasonal conditions and resist vandalism. Signs and sign lettering are encouraged to be monolithic or panels/plaques, versus individual letters, such as those listed below. All signs are subject to review and approval by the Planning and Building Divisions as well as the Parks and Recreation Department and are subject to provisions in the Roseville Sign Ordinance.

Entry feature signage should feature the following types of characteristics:

- Flush mount channel letters
- Flush mount masonry cast concrete signage

All sign elements on pilasters or walls shall use mounting hardware securely embedded into the surface onto which it is affixed. Salvageable materials (metals) shall be avoided. No epoxy-mounted elements are permitted.

Neighborhood monument features are smaller and are related to the Community Monuments in terms of design character and material palette. They are strategically located at key vehicular and pedestrian intersections to reinforce the perception of Amoruso Ranch as a unique district within the City of Roseville.

The following graphic illustrates intended monumentation location and types.

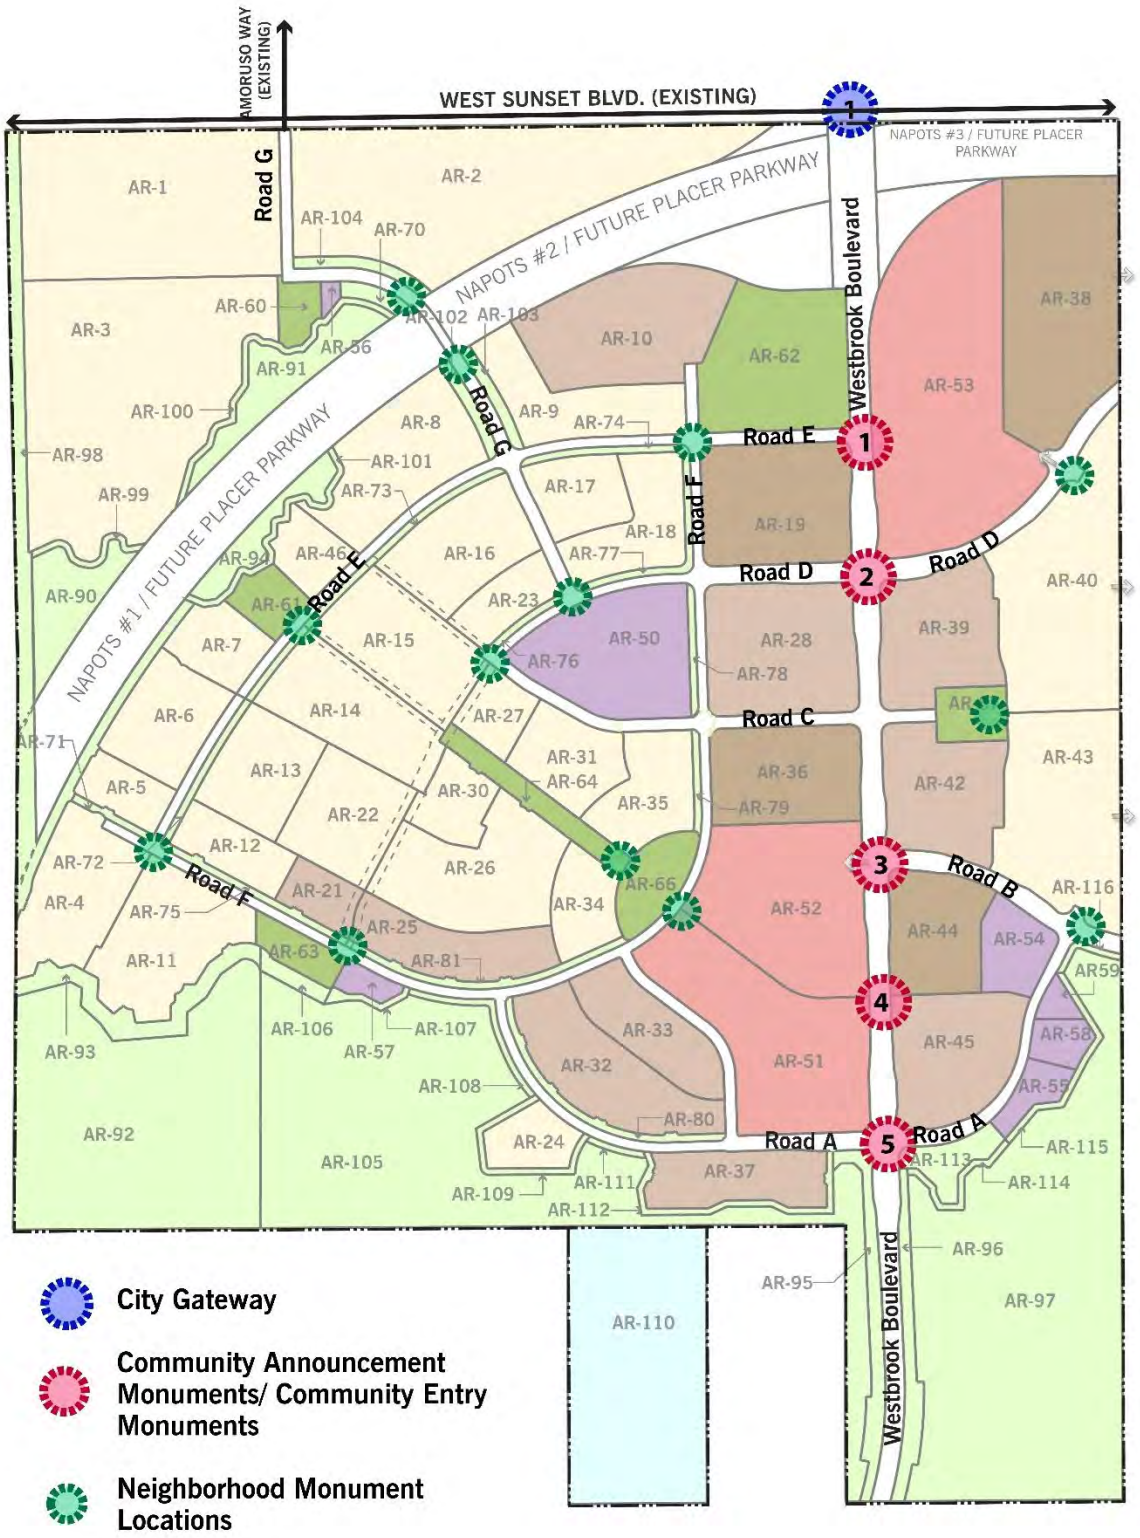

Figure B.26: Monument Sign Locations (updated May 2021)

City Gateways

Gateways are characterized by hardscape and landscape elements that have a visually pronounced stature along the streetscape, with a thematic application of landscaping, materials, finishes, and signage that are from a common palette created for ARSP. The following guidelines should be used to help direct the design of these features:

- Gateways should utilize landscape corridors at intersections where a corner clip creates a physical space for these features.
- Hardscape features should include iconic elements, such as monuments, walls, pilasters, raised planters, plazas, and/or other architectural elements, that are derived from a common palette of materials, colors and exterior finishes.
- Landscape materials should utilize water-conserving species and incorporate accent trees, shrubs, and groundcovers that harmonize with the overall landscape theme of ARSP, but in a manner that visually punctuates Gateways as significant elements of the public realm.
- Signage and indirect lighting should be incorporated into the design of monuments and walls in a subtle manner that is secondary to the hardscape features.
- Signage should be incorporated into gateways to identify the City of Roseville. This signage may also identify ARSP, provided it is complimentary to City signage

Community Announcement Monuments (Monuments 1 and 5)

The Community Announcement Monuments occur at either end and flank both sides of Westbrook Boulevard upon entering into the developed portions of Amoruso Ranch. They will require adequate space around them to create an appropriate scale to their setting. They will consist of a tall, vertical structure with the Amoruso Ranch logo or name plate set within the monument. The monument should be lit from below, such lighting equipment shall be approved by the City. Any low planters or walls should be constructed of the same material as the main monument. Within the setting there should be a bosque of sculptural deciduous trees, punctuated by a large specimen tree. The understory of this planting is a plain of groundcover or grasses, while foreground shrub planting should consist of an evergreen groundcover or low shrub. A backdrop for the monument should be established utilizing landscape features such as a row of columnar evergreen trees set in a shrub massing of medium height evergreen planting. Signage should be incorporated into gateways to identify the City of Roseville. This signage may also identify Amoruso Ranch Specific Plan, provided it is complimentary to City signage.

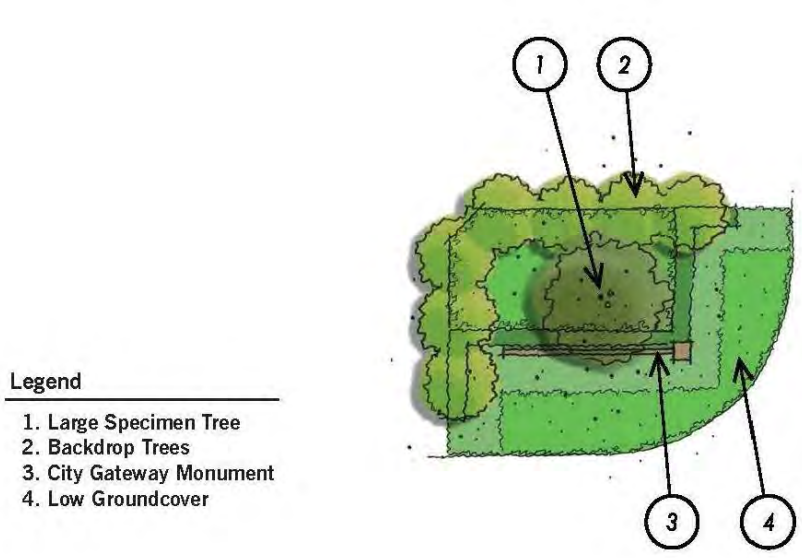

Figure B.27 City Gateway

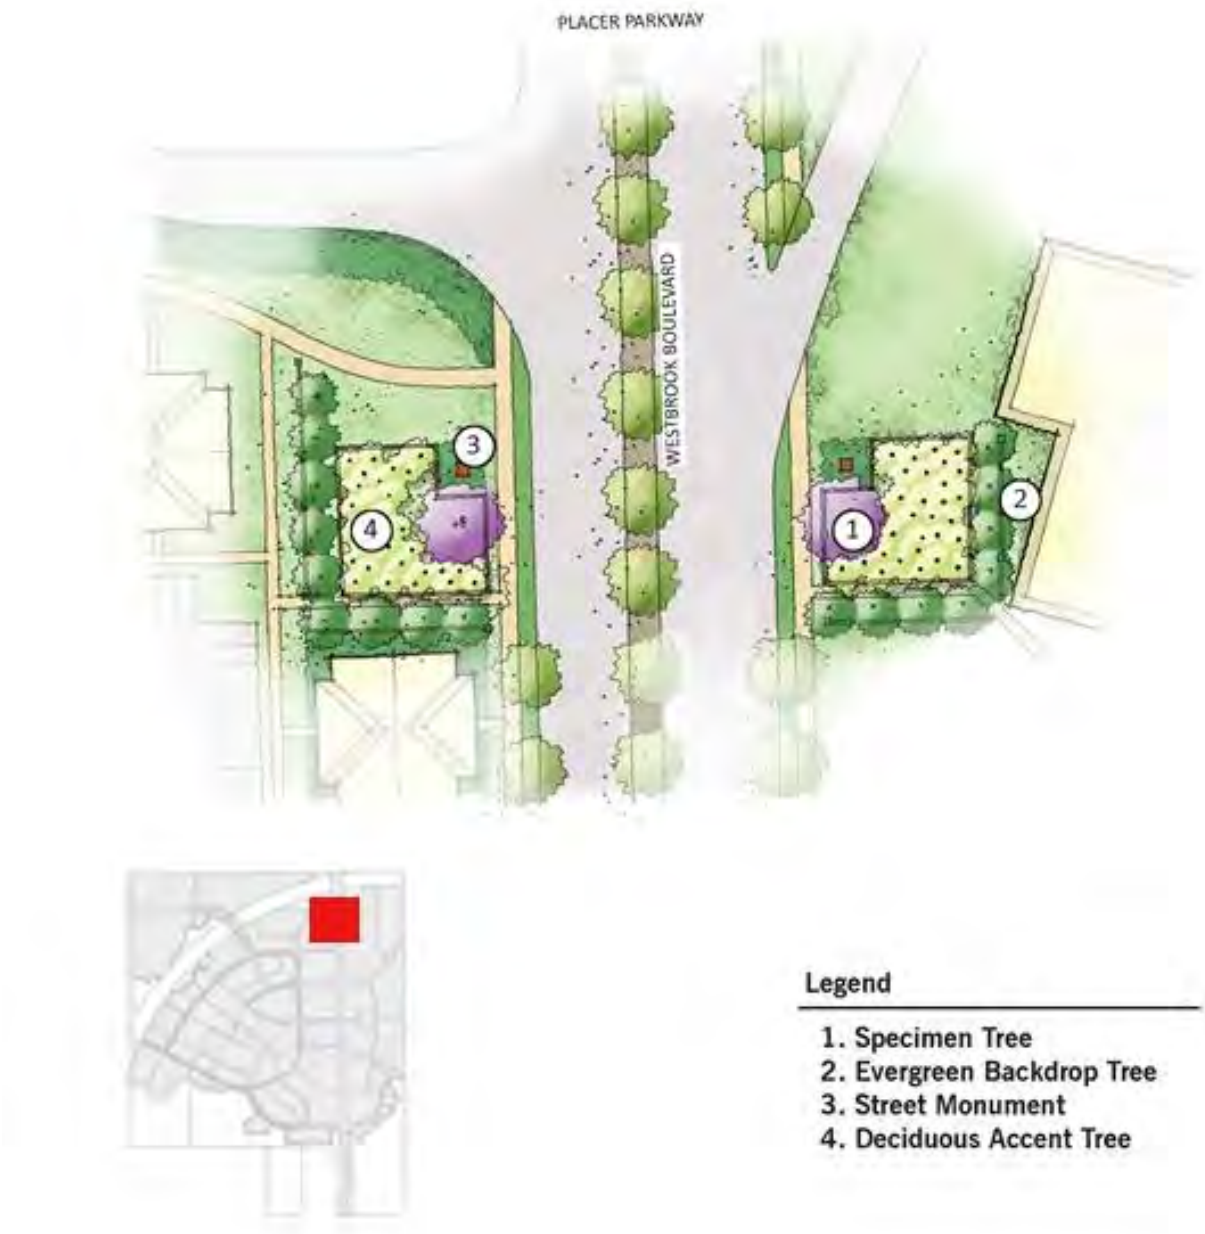

Figure B.28: Monument 1

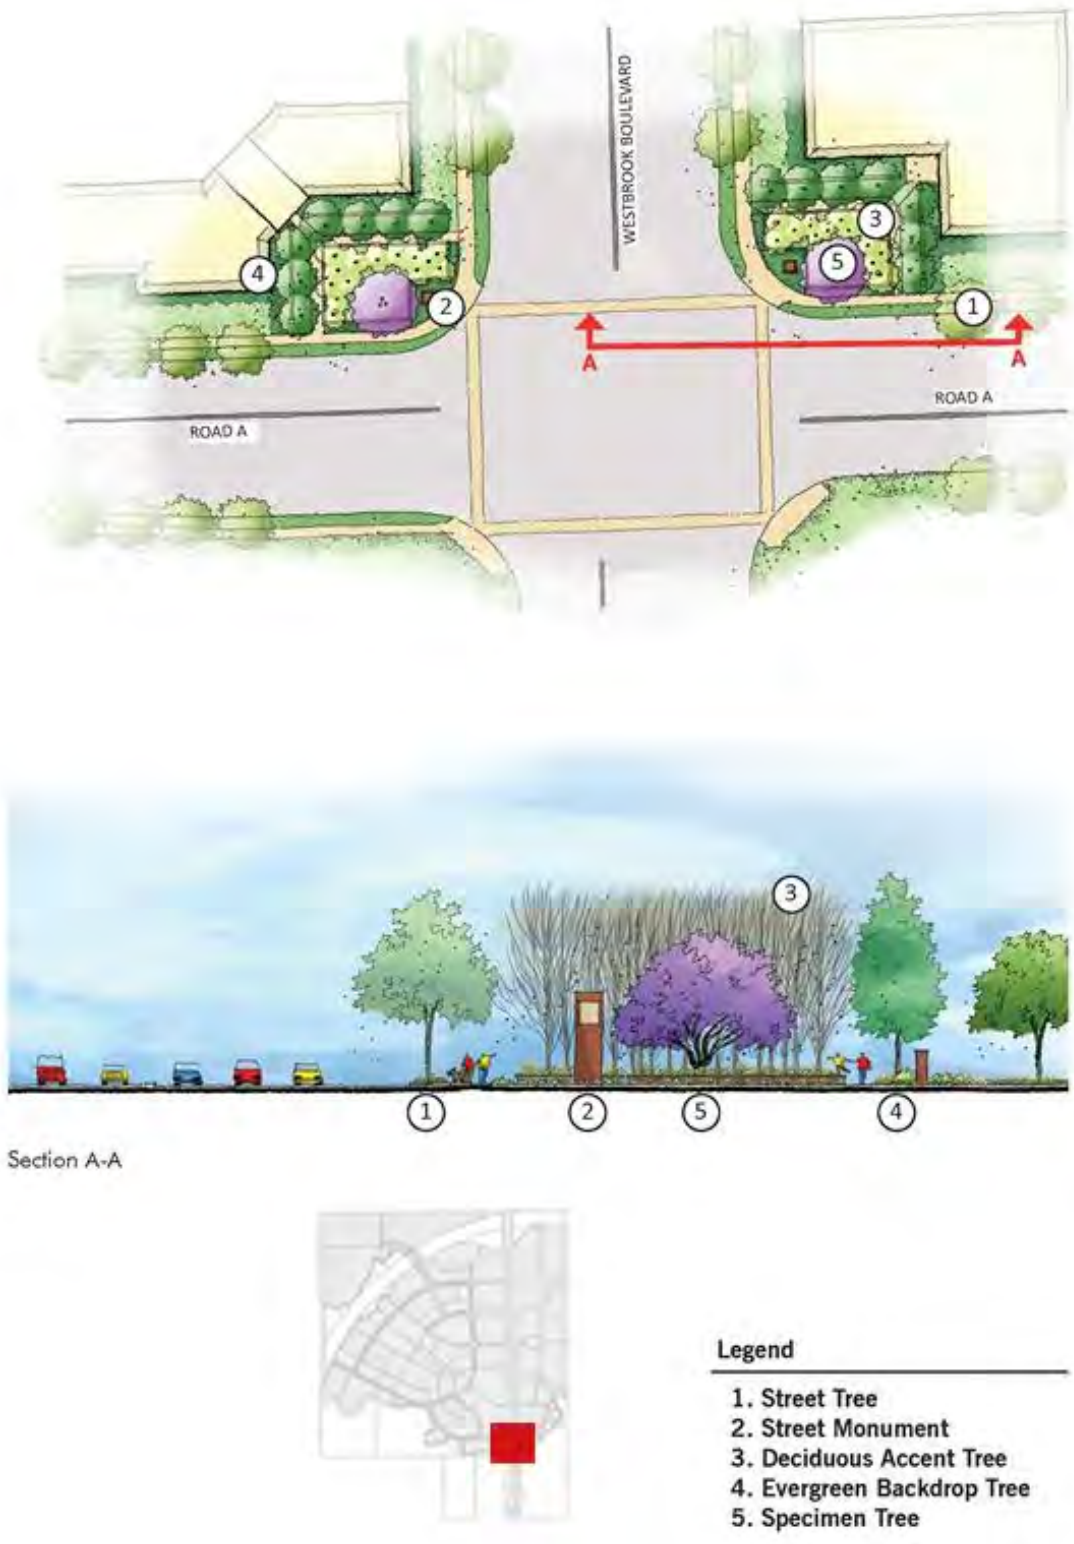

Figure B.29: Monument 5

Community Entry Monuments (Monuments 2, 3 and 4)
The Community Entry Monuments occur along Westbrook Boulevard at the three main entries to Amoruso Ranch: Road “B”, Road “D”, and Main Street.

Road “B” and Road “D”
At the signalized intersections of Road “B” and Road “D”, the entry monumentation will occur on all four corners. The entry monuments at these locations will consist of a vertical monument pilaster and may include wing walls and raised planters. Within this area will be a bosque of deciduous canopy trees set in a field of groundcover or grasses. A backdrop for the monument should be established utilizing landscape features such as a row of evergreen trees. Planting in the foreground and the background should consist of an evergreen groundcover or low shrub.

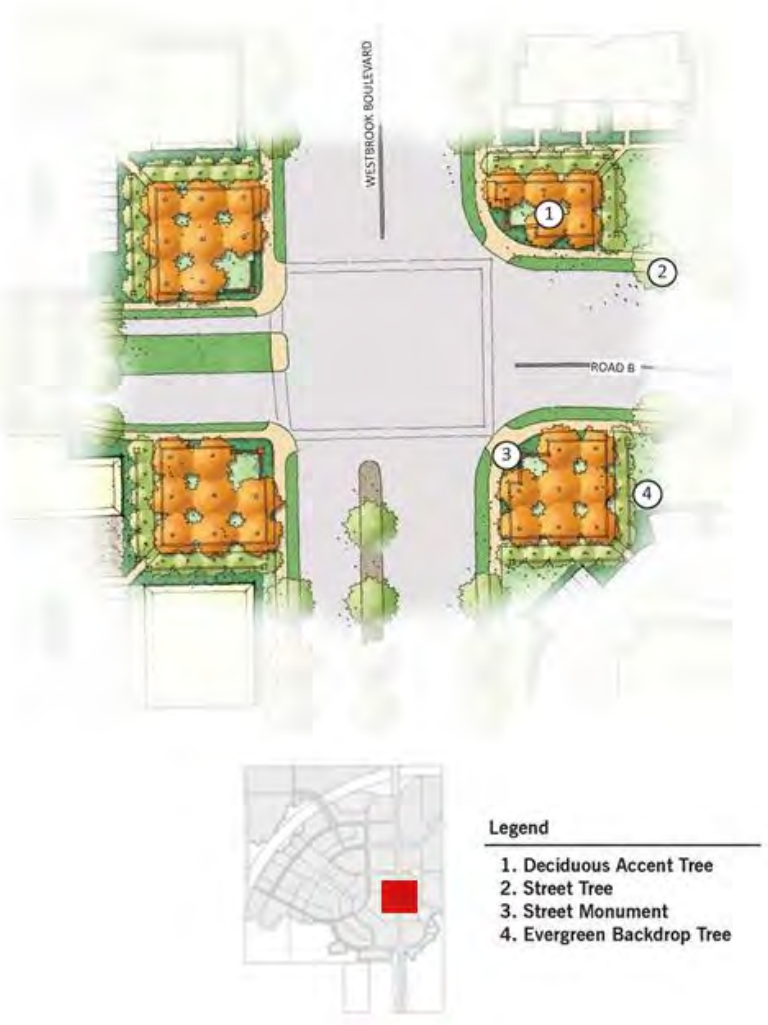

Figure B.30: Monument 3

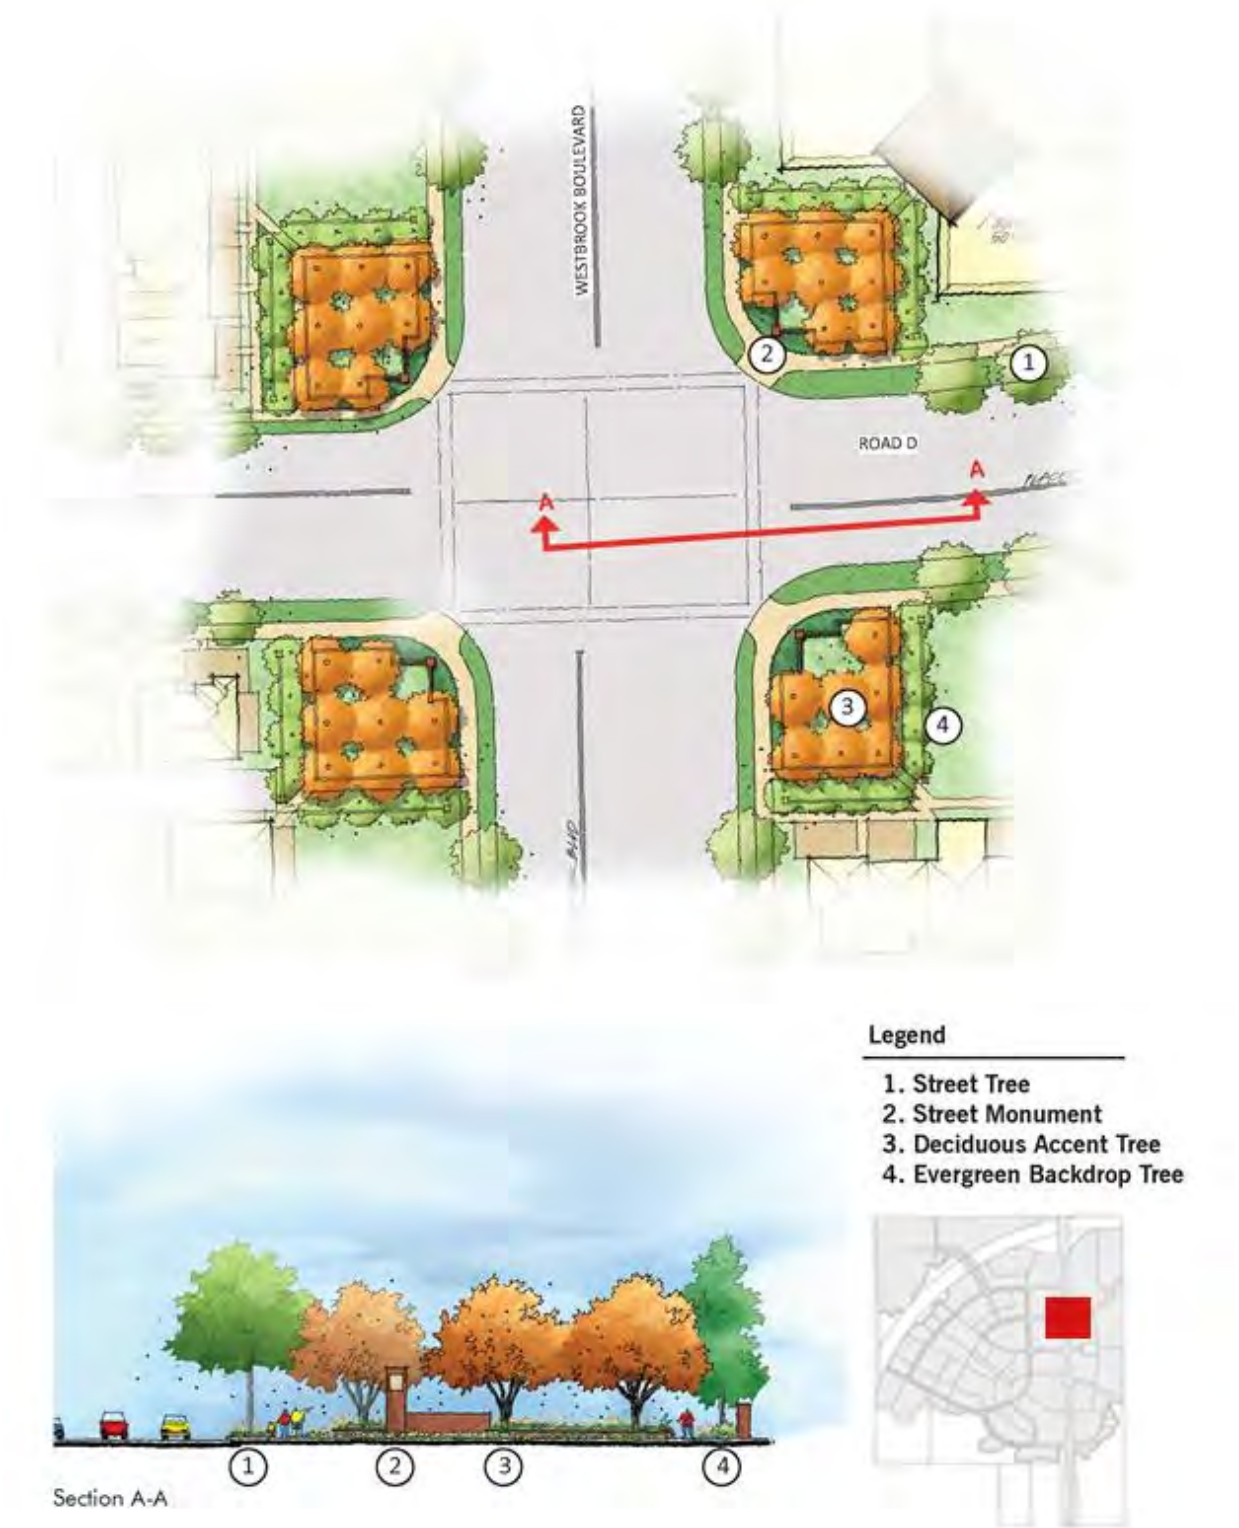

Figure B.31: Monument 2

Main Street - Monument 4

The intersection of Main Street and Westbrook Boulevard is important as it marks the entry into the Village District. This monument will occur on all four corners. On the east side of Westbrook Boulevard, the main portion of the monument will be the same size and scale as the other two community entry monuments. On the west side of Westbrook Boulevard, the monument may include a feature that spans across Main Street. This should be a contemporary interpretation of a classic main street element seen in many historic downtowns. In addition, a tall pilaster will be located in the median on Westbrook Boulevard, subject to the City's vehicle sight distance requirements. Planting at the Main Street entry should include flowering accent trees located within a field of groundcover or grasses.

Figure B.33: Section A-A

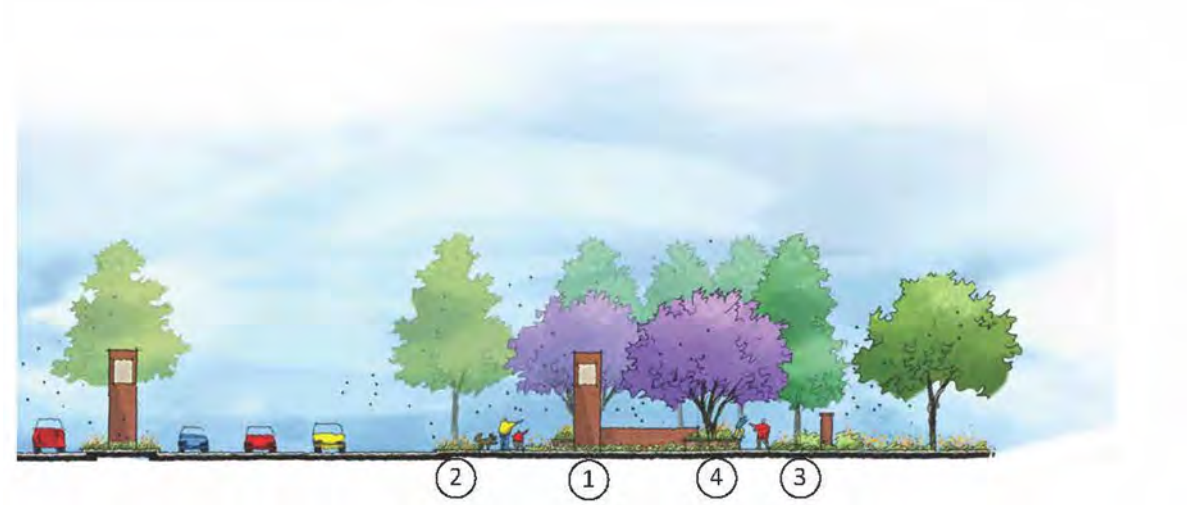

Figure B.34: Section B-B

Village Monument Example

Legend

1. Street Monument
2. Street Tree
3. Evergreen Backdrop Tree
4. Deciduous Accent Tree
5. Entry Sign

Neighborhood Monuments

Neighborhood monumentation may be located throughout Amoruso Ranch to mark the entries of different neighborhoods, particularly along the Modified Primary Residential Street with Street-side Paseo as it loops through the community. They should be located within the parkway and consist of a small pilaster. These monuments may also include unique artwork and can be used as way-finding throughout the community.

B.15 Walls and Fences

Walls and fences throughout the ARSP are intended to provide screening to land uses, create a transition between developed areas and open space, secure off-site edges from public access and provide privacy and security for private property. Design and material for walls and fencing varies throughout the Plan Area depending on the specific purpose. The following graphic identifies the wall types and their prospective locations.

A. Wall Guidelines

Amoruso Ranch is intended to be a fully integrated community to the extent feasible, by minimizing walls separating neighbor from neighbor or between land uses. Walls over 36 inches high may only be used in specific locations, as required mitigation for sound attenuation and must be integrated into the overall aesthetic of the community. The following are basic guidelines for the aesthetics of the walls if they are needed:

- Design of all walls should complement the architectural vernacular of the neighborhood in which they are found. Designs that conflict with this character are not permitted.
- Mitigation measures that utilize other techniques rather than sound walls are preferable. Those techniques may include building construction techniques, siting of structures to shield private outdoor space, etc.
- The height for any sound wall should be the minimum of six-feet or as otherwise required by the EIR, or site specific noise analysis, as a mitigation measure.
- The maximum height for front yard walls (within the front yard setback) should be 36 inches.
- Raising the pads of the homes at Amoruso Ranch is encouraged; low retaining walls (36 inches maximum) are permitted in the front yard zone.
- Tops of all walls should be level wherever feasible.
- Sound walls along arterial roadways shall be placed within the ROW and maintained with proceeds from the CFD. All other walls and fences shall be placed on the private property side of the property line and maintained by the private property owner.
- All walls should be constructed and engineered per local codes and regulations.
- Where sound attenuation walls are required, they must be constructed of high quality materials such as colored, split-faced block and include design appropriate cap and column details

Typical Neighborhood Monumentation

Masonry Walls

Masonry walls are intended to provide security, screening, privacy, and/or sound attenuation where appropriate. The typical application of masonry walls is on arterial roadways, along the back edge of the landscape corridor where needed for sound attenuation.

At a minimum masonry walls are required along the project boundary on West Sunset Boulevard, and the eastern edge of property boundary adjacent to the potential Placer Ranch Specific Plan Area. They must be constructed of high quality materials such as colored, split-faced block and include adequate cap and column details. Long, unbroken expanses of the same finish, color or texture are not permitted.

The guidelines below outline the key design requirements and common applications for masonry walls in the Plan Area:

- Masonry walls along public streets should be placed to avoid blocking views to the open space corridors and should not obstruct underground or above ground electric, telephone, cable, water or sewer services or equipment.
- Walls should be a minimum of six-feet high along arterial roads, or higher if necessary to meet the requirements of site specific noise analyses. For walls higher than six feet in height, designs should be encouraged for walls to be constructed atop low earthen berms.
- Opportunities for wall openings between land uses should be included where appropriate to encourage and facilitate pedestrian connection/access between land uses (i.e., between residential and commercial sites and between residential neighborhoods) to provide connectivity throughout the plan.
- Pilasters shall be used at each side of neighborhood vehicular and pedestrian entrances to define openings, and at each angle point or change in direction to enhance wall aesthetics.
- Continuity in materials shall be incorporated among walls including design, color, block style, trim style and cap style.
- Landscaping in front of the wall shall include shrubs close to the wall to break up any stretches of wall not interrupted by columns.
- Multiple pilasters at neighborhood entries are encouraged.
- Pilasters should provide sufficient bulk and dimensions to appear in proportion to the height and mass of the wall Pilasters and columns may not be less than 18 inches in any dimension at the base, and may be circular or square.
- Where adjacent to LDR and MDR neighborhoods, the maintenance obligation of the wall is the responsibility of the Community Facilities District (CFD).

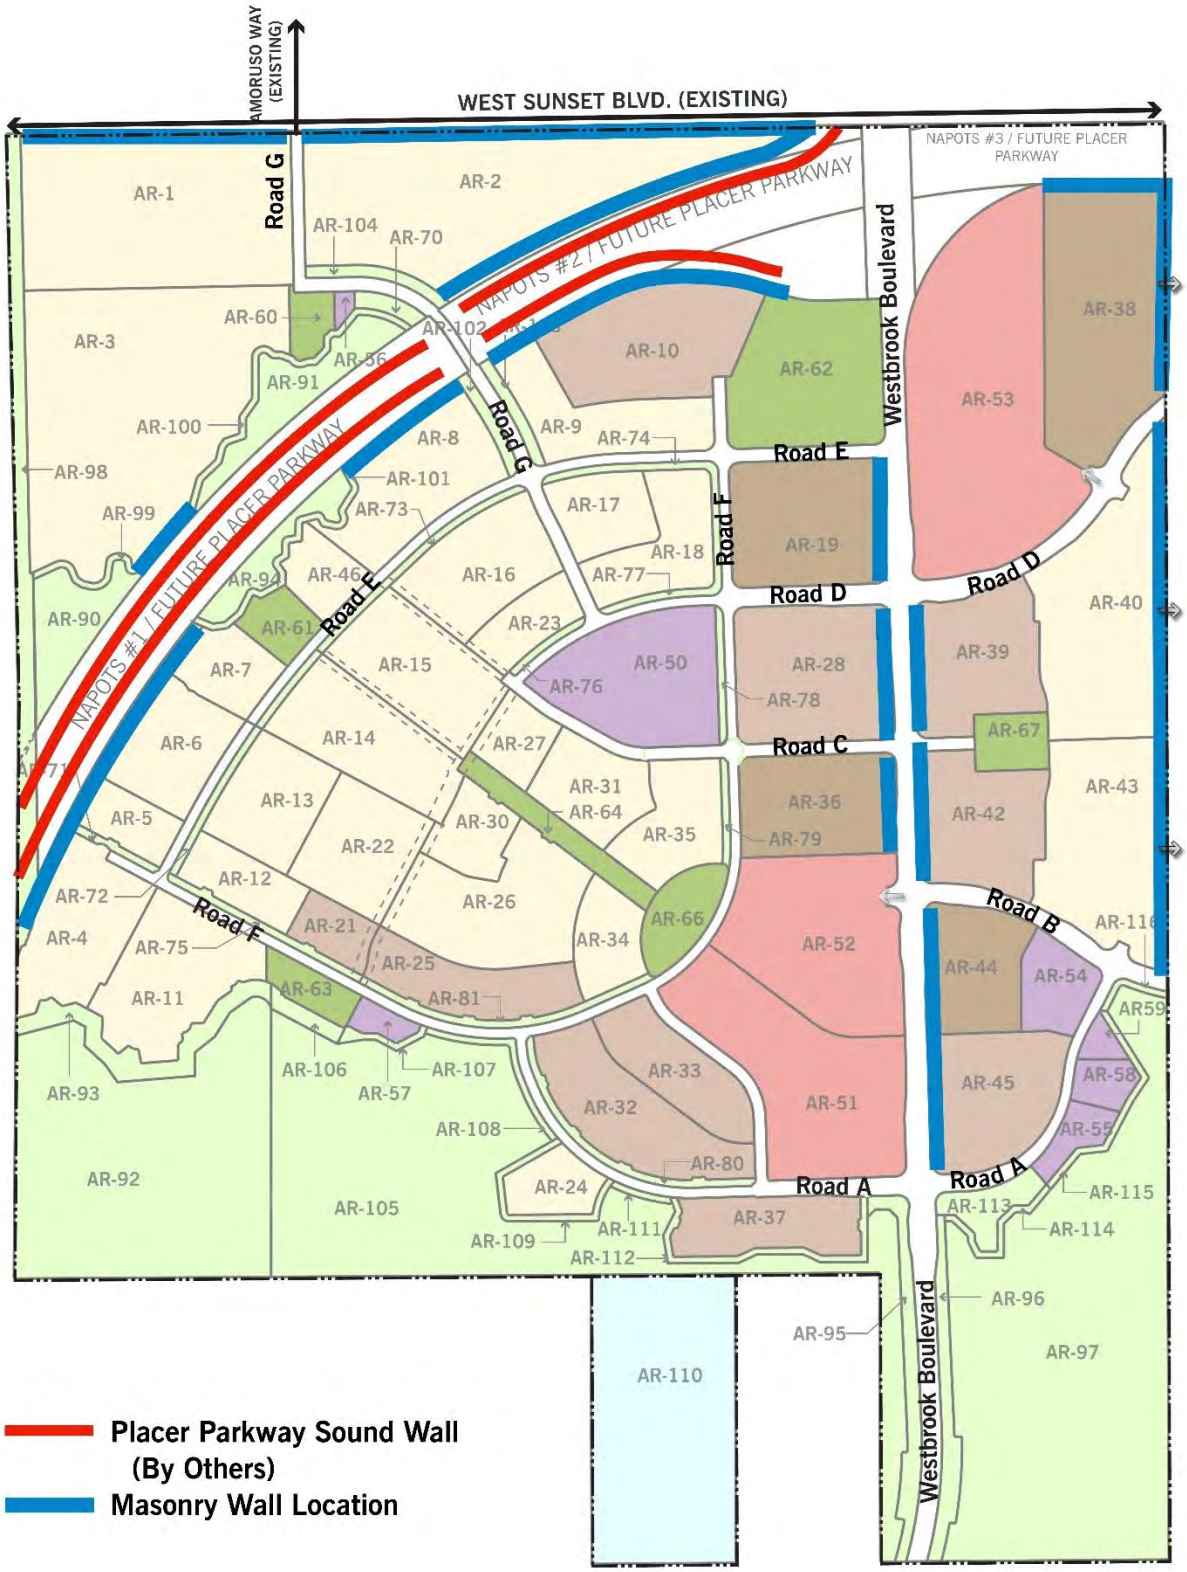

Figure B.35: Wall Locations (updated May 2021)

B. Fence Guidelines

The fences of Amoruso Ranch will play an important part in unifying the overall project. The following section will establish basic guidelines for the aesthetics of the walls and fences; followed by descriptions of each type of wall and fence found at Amoruso Ranch.

General Guidelines

Neighborhood fences should complement the architectural vernacular of the neighborhood in which they are found.

- The average maximum height for all fences should be seven feet.
- The maximum height for front yard walls and fences should be 36 inches.
- Materials not acceptable for fences include aluminum or sheet metal, woven wire, chain link or vinyl chain link, plastic or fiberglass sheets, and any kind of plastic mesh.
- Tops of all fencing should be level wherever feasible.

Fence Types

Amoruso Ranch has a variety of conditions that will require fencing. Below is a description of each type of fence within Amoruso Ranch.

Open Fencing

Open Space Fencing along Developed Edges

Open fences are intended to provide a visually transparent barrier at developed edges adjacent to open space parcels and include materials such as wrought iron and tubular steel. Where the open space interfaces with rear yards, an open view fence will be used. Where the natural open space interfaces in non-development areas, for instance against a park or a street, a split rail wood fence will be used.

Wall and Wall Cap Types

Fencing Types at Open Space

Fencing between Residential and Open Space

- Open fencing between residential and open space should be four to six feet in height and constructed of tubular steel or wrought iron and black or dark green in color
- Brick or other masonry pilasters or columns may be used as an optional detail with tubular steel or wrought iron fences.
- Both sides of fencing are to be addressed aesthetically if they are visible from streets.
- Where residential lots back up to open space, open fencing should be used. Open fencing at open space edges may incorporate masonry cheek walls.

Other Fencing Conditions at Open Space

- Concrete rail or post-and-cable fencing should be used along the street edge adjacent to open space preserves to define the landscape edge and discourage access of dirt bikes and motorized vehicles.

Front Yard Walls and Fencing
Any fences within the front yards of the residences should reflect the vernacular of the architecture of that neighborhood. The maximum height of fences in these areas should be 36 inches.

Good Neighbor Fence
The "Good Neighbor" fence is located along the yard perimeter of the residences and is a shared fence between neighbors. It should be of high quality wood construction and of a character that is compatible with the architectural style of the homes. It typically does not incorporate decorative top rails. It is intended to provide privacy and security between residential units.

Standard Wood Fence
Standard wood fences have a consistent architectural design appearance on each side and incorporate decorative top rails. This fence type is typically located adjacent to parks and paseos or on lots which back or side to a residential street where a masonry wall is not required.

Guidelines for standard wood fences:

- Minimum height of solid wood fence along all residential streets within neighborhoods is 7 feet.
- Fence sections may be 8 to 10 feet in length supported by 4-by-4 posts.
- Fences are to be of redwood construction and painted or stained in an earth tone color.
- Minimum six-feet high standard wood fence should be constructed where residential lots back up to schools or parks.
- Gates create focal points within a fence. Their design is encouraged to be differentiated from the fence and create an area of emphasis and demarcation.

Residential Wall and Fence Types

Residential Fence Types

B.16 Site Furnishings

Exterior furnishings at Amoruso Ranch should complement the overall character of the community yet the furnishing style of each neighborhood should be appropriate for its context. For instance, within the Village District, furniture should be durable and long lasting since it will see heavy use and therefore stylized metal or custom “art” benches are appropriate here. Below are some basic guidelines to follow when selecting site furniture for Amoruso Ranch.

- All site furniture should be made of high quality, durable material. Recycled plastic furniture is not acceptable.
- Painted finishes when used on metal furniture should be powder coated.
- Color and style of all furniture should complement the architecture of the surrounding neighborhood.
- Site furniture should be permanently mounted and located appropriately to take advantage of areas of high use and activity.
- Moveable furniture is encouraged where flexibility enhances the user’s experience such as in the Village District in the Urban Park and along the Main Street Promenade.
- Furniture should not obstruct access to buildings or impede handicap accessibility
- All site furniture should be consistent with the overall landscape design principles and community character of the project.

A. Furnishings

Exterior furnishings provide public amenities that establish a high quality and consistent urban design in the streetscape, reflecting the context of the area and helping to establish the unique qualities of places within the Amoruso Ranch community. These elements are encouraged to be integrated into the overall site design where appropriate. The amount of exterior furnishings should be appropriate to the level of use rather than creating too much clutter.

Bollards

Bollards can be used to protect pedestrians from vehicles in areas where pedestrians access walkways, paseos, and public plazas. Bollards can be permanent but placed to provide emergency vehicles access. Permanent bollards define edges and entrances to pedestrian areas and control vehicular access. They integrate illumination in pedestrian areas. Bollards are encouraged to be limited to locations that do not interfere with parking, deliveries, and other functions. It is recognized that bollards can also be an obstruction and hazard to bicyclists; therefore, their use should be minimized in areas where bicyclists are expected.

Bicycle Amenities

Bike racks are encouraged to be placed in areas where bicyclists need to park when visiting open space, recreational facilities, shopping and employment areas. Bike racks are to be double-poled and wide enough for resting the entire bike against the rack. Although they are primarily utilitarian, the chosen style

is encouraged to relate to the aesthetic of the neighborhood. Bike parking may also be provided at Bus Rapid Transit (BRT) stops.

Tree Grates
Tree grates are encouraged to be used for all street trees placed along sidewalks that are not part of a planting strip area. ADA compliance is recommended as is a minimum size of four feet by four feet. Tree guards protect trees in active areas that are vulnerable to damage from vehicle bumpers or door swings.

Planters, Pots, and Boxes
Planters are encouraged in plazas and other public spaces and can be raised 12 inches to 24 inches with seat walls at the edges to protect plants from pedestrian "short cut" paths and trampling. Pots and planter boxes can be used at public building entries where building maintenance personnel can care for them. Pots and planter boxes will be more effective if they are at least 18 inches deep and have a minimum of an 18 inch diameter.

B. Residential Subdivision Design

Residential subdivisions are subject to design requirements of the City's Subdivision Ordinance. To ensure neighborhoods provide cross connectivity for automobiles, bicyclists, and pedestrians, subdivision design should be guided by the design goals in this sub-section. The intent is to design individual subdivisions that appear seamless and are well-connected.
While connectivity is desired, some neighborhoods may be gated provided they do not limit access to open space, trails, paseos, parks or schools.

Neighborhood Connectivity

The compact design, and the different modes of paths of vehicular and non-vehicular connections creates highly connected residential neighborhoods. Connectivity is a main tenant of the Specific Plan. It is a design challenge to create connectivity across hard edges such as arterial roadways, the planned Placer Parkway, open space preserves and other site features. Where large lot parcel edges are between subdivisions and the types of hard edges described above do not exist, providing connectivity between subdivisions is encouraged.
The exact locations of street connections will be determined through small lot subdivision design. If subdivisions for adjacent large lot parcels are processed at separate times, the first subdivision to be processed by the City will establish the location for cross connection points.

Guidelines to enhance the connectivity of neighborhood units are outline below:

- To minimize barriers between neighborhoods and to enhance connectivity, street patterns should be encouraged to allow connection points between neighboring subdivisions.
- Paseo access should be used as a means to integrate multiple subdivisions consistent with the Paseo Plan in Figure B.36.

B.17 Gated Subdivisions

Residential subdivisions may be planned as gated subdivisions during small lot subdivision design.

Residential parcels may be determined appropriate for a gated subdivision if it can be demonstrated the gates will not preclude adequate through-access for pedestrians, cyclists, or automobiles consistent with the circulation plan. Large lot parcels adjacent to parks, open space or paseos are not eligible for gating as to maintain public access to these amenities. Gating of subdivisions may be considered on a case-by-case basis, subject to approval by the Development Services Department, Planning, and Engineering Divisions.

B. 18 Paseos

Paseos are a key element which provide pedestrian and bikeway linkages throughout the Central portion of the ARSP. Paseos are intended to be active, useable areas which encourage pedestrian activity, interaction among residents and connectivity between neighborhoods.

The following design criteria apply to ensure paseos are adequately connected with adjacent neighborhoods:

- Residential street paseos are located internal to residential neighborhoods, generally between or on the edge of large lot parcels.
- Residential street paseos feature a 10 feet wide sidewalk and a landscape strip along one street edge.

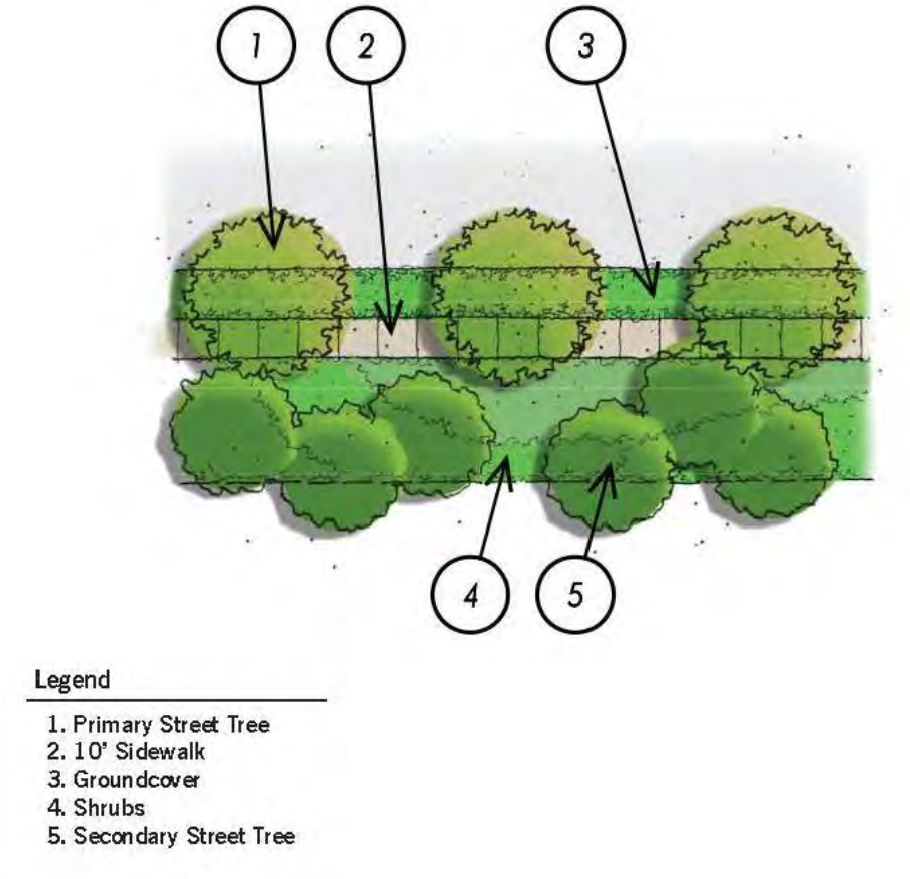

Figure B.36: Paseos

B. 19 Utility Sites Concept Plans

Six parcels are designated P/QP for the construction of utility infrastructure facilities to serve the ARSP. These include:

- Fire Station (AR-54)
- North Pump Station (AR-56)
- Sewer Lift Station (AR-57)
- Recycling Center (AR-59)
- Water Facilities (AR-58)
- Community Facility (use to be determined) (AR-55)

Concept plans for each of these are provided in Figures B.37-B.40. The concept plans should be used as a guide in the final design of each facility as backbone infrastructure improvement plans are prepared. They are preliminary concept plans and may be changed during the design of the land use plan for parcels AR-56, AR-57, AR-58 and AR-59. Conceptual plans for AR-55 has not been included as the proposed use of the parcel has not been determined. The final design and location of public facilities on these parcels are subject to review and approval of the City of Roseville.
The utility infrastructure facilities shall be designed to avoid conflict with pedestrian and vehicle circulation. The facilities shall be screened from public right-of-ways through the use of walls, fences, planting or a combination of the above.

The fire station (Parcel AR-54) shall be designed to accommodate future buildout with a maximum of three apparatus bays similar to several of the City's other fire stations, although during the initial construction, all three bays may not be built. The concept site plan shall include but not limited to driveways, gate access, landscaping, guest parking and other ancillary structures normally provided at a fire station. Turning movements to and from the fire station shall be included to ensure vehicle accessibility from the public streets. A turning radii of 30 and 50, interior and exterior respectively, shall be used as the template.

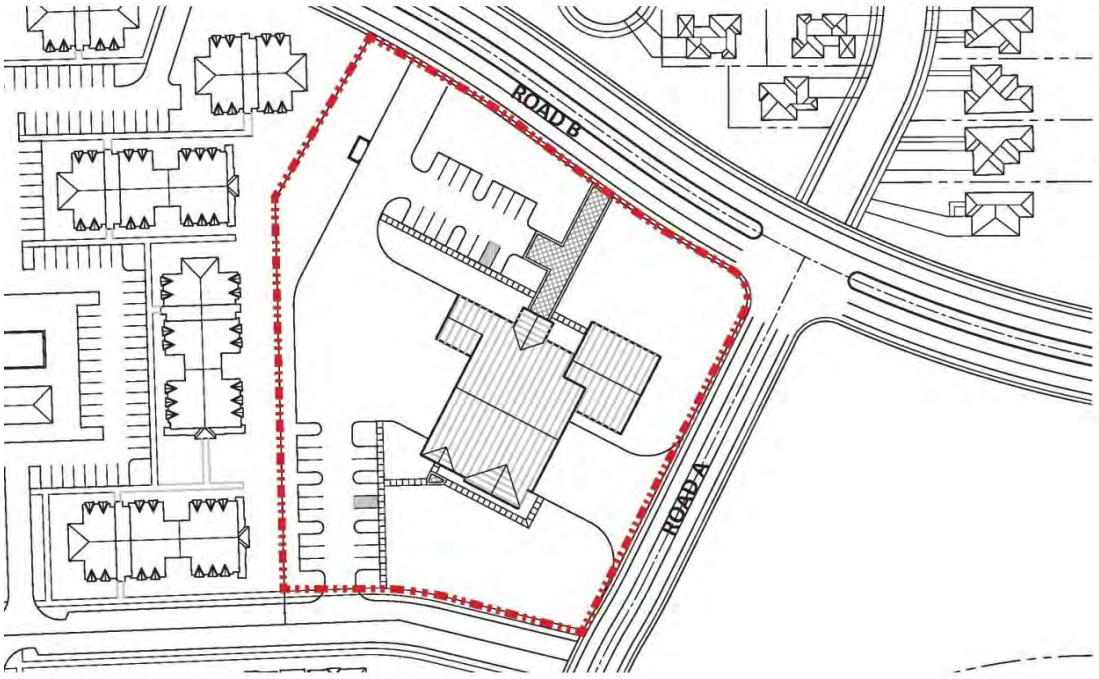

Figure B.37 Fire Station (AR-54)

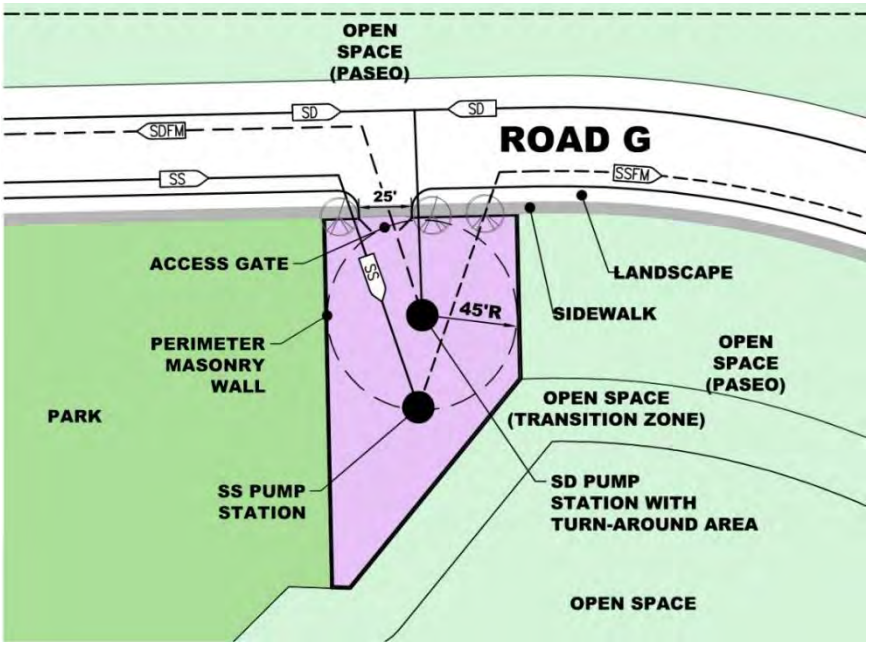

Figure B.38 North Pump Station (AR-56)

COUNCIL COMMUNICATION

CC #: 2038
File #: 0400-04-17-2 & 0400-02

Title:	649 Riverside Avenue – Infill Parcel 179 - General Plan Amendment and Rezone
Contact:	Sean Morales 916-774-5282 smorales@roseville.ca.us

Meeting Date: 4/20/2022
Item #: 10.4.

RECOMMENDATION TO COUNCIL

At the February 10, 2022 Planning Commission meeting, the Planning Commission recommended the City Council take the following actions on the project:

A. Consider the Addendum to the Dry Creek Greenway East Trail Project EIR; and
B. Adopt a resolution approving land use map amendments to the General Plan; and,
C. Adopt the two (2) findings of fact and introduce for first reading an ordinance approving the Rezone.

BACKGROUND

The project site is located at 645 and 649 Riverside Avenue and is identified as Parcel 179 in the City's Infill area. The site is approximately 3.93 acres in size. The site has a zoning designation of Floodway (FW) and a General Plan land use designation of Community Commercial/Floodplain (CC/FP). The site is bordered on the south and east by Dry Creek and is adjacent to the confluence of Dry Creek and Cirby Creek. The site was once developed with commercial buildings fronting Riverside Avenue on both parcels and had a commercial zoning designation. However, after flooding in the area in the 1980s, the buildings were razed and the site was given the Floodway zoning designation to discourage future development of structures on the parcels. One structure remained on the 645 Riverside parcel until the City received grant funding to demolish it in 2019. The site is entirely within the City's regulatory floodplain, is undeveloped, and consists generally of loose dirt, gravel, and wild grasses. A portion of each parcel includes Dry Creek and the riparian woodland along the banks of the creek. The site is surrounded by Floodway zoning to the north, east, and west and a Community Commercial zone across Dry Creek to the south. After approximately 10 years of community outreach and planning, the Dry Creek East Greenway Trail Project alignment was approved by City Council in 2019. The westernmost portion of the project will include a trailhead on 645 and 649 Riverside Avenue.

The City of Roseville obtained a Federal Emergency Management Agency (FEMA) Pre-Disaster Mitigation Grant Program (PDM) grant to reduce the flood risk of 645 Riverside Avenue, and the surrounding area by buying the property with the grant funds, demolishing the commercial building, and returning the parcel to open space. The property owner was able to use the PDM grant funds

to purchase a commercial property outside of the regulatory floodplain. A condition of the federal hazard mitigation grant funds required that the City provide assurances that the land would be "restricted in perpetuity to open-space uses." To ensure that the City follow through on the assurances they gave to FEMA, the parcel at 645 Riverside Avenue is proposed to be converted to an Open Space zone designation. This would enable the City to comply with a deed restriction that was placed on the parcel on January 18, 2018, which was also a condition to receive the grant funds. The grant required deed restriction term and condition indicates "The Property shall be dedicated and maintained in perpetuity as open space for the conservation of natural floodplain functions."

Current Project

The current project is a request for a General Plan Amendment to modify the Land Use designation from Community Commercial/ Floodplain (CC/FP) to Open Space/Floodplain (OS/FP) and a request to Rezone the site to modify the zoning from Floodway (FW) to Open Space/Floodway (OS/FW) in order to comply with the above-described grant funding requirements that will facilitate development of the trailhead for the future Dry Creek Greenway East Trail. A full evaluation of the project is included in the Planning Commission staff report (see Attachment 1).

Summary Evaluation

As detailed in pages 3-5 of the attached Planning Commission staff report, the proposed General Plan Amendment and Rezone were found to be consistent with the General Plan land use policies and will not adversely affect the public interest, safety, or welfare.

General Plan Amendment

The Dry Creek Greenway East Trail project was approved in 2019. Therefore, the below evaluation does not consider whether the trail is appropriate in the existing land use and zoning designations, but rather whether the proposed land use and zoning modifications are appropriate and compatible with the approved trail project. The project site is within the City's Infill planning area, which is characterized by pre-1980's urban development. As discussed in the background, the site once consisted of commercial development but after flooding in the area was cleared of structures. The project site is made up of two parcels with a General Plan Land Use designation of Community Commercial/Floodplain (CC/FP). Floodplain is a combining land use designation, and is only applied in combination with another land use to modify the uses and development guidelines of that designation. The project site consists of two of the ten lots that make up Infill Parcel 179, the entirety of which has the CC/FP land use designation. The CC/FP combination is appropriate for some of the other lots within Infill Parcel 179 such as 641 and 643 Riverside Avenue, which continue to operate non-conforming commercial uses. The commercial designation is no longer appropriate for 645 and 649 Riverside Avenue. The Dry Creek Greenway East Trail project, approved in 2019, includes development of the project site into a trailhead. Primary uses of the Open Space land use designation include walking and bike trails. The City therefore proposes to modify the land use to OS/FP to bring the land use designation into consistency with the future use of the site, while maintaining the Floodplain combining designation to acknowledge its location within the City's regulatory floodplain.

Rezone

Because the proposed OS/FP land use designation is found to be appropriate, staff analyzed the consistency of the requested OS/FW zoning with General Plan policies and the proposed OS/FP land use. The City of Roseville General Plan provides a list of compatible "Implementing Zones" for each land use designation (General Plan Table II-10), which establishes what zoning designations are considered compatible with the applicable General Plan land use designation. The proposed land use designation for the project site is OS/FP. Open Space (OS) is an implementing zone in the OS land use designation. Furthermore, the proposed OS/FW zoning is compatible with the already approved trail use. Trails are considered a Resource Related Recreation use type, which is principally permitted within the OS zone. Biking and hiking trails are

also principally permitted uses within the Floodway zone district.
The proposed rezone is consistent with the public interest, health, safety, or welfare of the City as it brings the zoning into consistency with the approved Dry Creek Greenway East Trail project and grant funding that will be used to facilitate the development of the trail. The trail project went through a lengthy public outreach process and was ultimately approved by City Council in 2019. As evaluated and discussed in the Planning Commission staff report and Addendum, there are no significant impacts expected from the proposed General Plan Amendment and Rezone.

Public Outreach

The proposed project was distributed to the various agencies and departments which have requested notice of City applications, and all comments were considered and incorporated into the project as appropriate. Notice of the application was also distributed to the Roseville Coalition of Neighborhood Associations. A public notice of the Planning Commission hearing was published on January 28, 2022, and was distributed to all property owners and residents within 300 feet of the project site. Consistent with SB-18, staff consulted local Native American tribes for comment on the project.

Summary of Planning Commission Meeting

The project was heard by the City's Planning Commission on February 10, 2022. Planning staff, acting as representatives of the City, addressed the Commission and requested the Commission make a recommendation of approval to City Council. No public testimony was received at the hearing.

The Planning Commission deliberated on the item and ultimately voted to consider the Addendum to the Dry Creek Greenway East Trail Project and recommended the City Council approve the General Plan Amendment and Rezone with a vote of 5 aye, 0 nay, 2 absent.

FISCAL IMPACT

The Rezone and General Plan Land Use Amendment of the site will not result in negative impacts to the City’s General Fund. The project is a requirement of grant funding that was already received.

ENVIRONMENTAL REVIEW

Consistent with CEQA Guidelines Section 15164, regarding previously certified and adopted Environmental Impact Reports (EIR), an Addendum to the Dry Creek Greenway East Trail Project EIR (SCH #2014032087, certified March 20, 2019) has been prepared to cover the minor technical changes and additions necessary to describe the impacts of the proposed project. The Addendum to the Dry Creek Greenway East Trail Project EIR is included as Exhibit A of this Council Communication.

ITEM 6.2: General Plan Amendment and Rezone – 649 Riverside Ave. – INFILL PCL 179 – Dry Creek Greenway Trailhead Rezone – File # PL21-0273

REQUEST

The City requests a Rezone to modify the zoning from Floodway (FW) to Open Space/Floodway (OS/FW) and a General Plan Amendment to modify the Land Use designation from Community Commercial/ Floodplain (CC/FP) to Open Space/Floodplain (OS/FP) in order to comply with grant funding requirements that will facilitate development of a trailhead for the future Dry Creek Greenway East Trail.

Applicant/Owner – Stefanie Kemen, City of Roseville

SUMMARY RECOMMENDATION

The Planning Division recommends that the Planning Commission take the following actions:

A. Consider the Addendum to the *Dry Creek Greenway East Trail Project EIR*;
B. Recommend the City Council approve the General Plan Amendment; and,
C. Recommend the City Council adopt the two (2) findings of fact and approve the Rezone.

SUMMARY OF OUTSTANDING ISSUES

There are no outstanding issues associated with this request.

BACKGROUND

The project site is located at 645 and 649 Riverside Avenue and is identified as Parcel 179 in the City's Infill area (Figure 1). The site is approximately 3.93 acres in size. The site has a zoning designation of Floodway (FW) and a General Plan land use designation of Community Commercial/Floodplain (CC/FP) (Figure 2). The site is bordered on the south and east by Dry Creek and is adjacent to the confluence of Dry Creek and Cirby Creek. The site was once developed with commercial buildings fronting Riverside Avenue on both parcels and had a commercial zoning designation. However, after flooding in the area in the 1980s, the buildings were razed and the site was given the Floodway zoning designation to discourage future development of structures on the parcels. One structure remained on the 645 Riverside parcel until the City received grant funding to demolish it in 2019. The site is entirely within the City's regulatory floodplain, is undeveloped, and consists generally of loose dirt, gravel, and wild grasses. A portion of each parcel includes Dry Creek and the riparian woodland along the banks of the creek. The site is surrounded by Floodway zoning to the north, east, and west and a Community Commercial zone across Dry Creek to the south. After approximately 10 years of community outreach and planning, the Dry Creek East Greenway Trail Project alignment was approved by City Council in 2019. The westernmost portion of the project will include a trailhead on 645 and 649 Riverside Avenue.

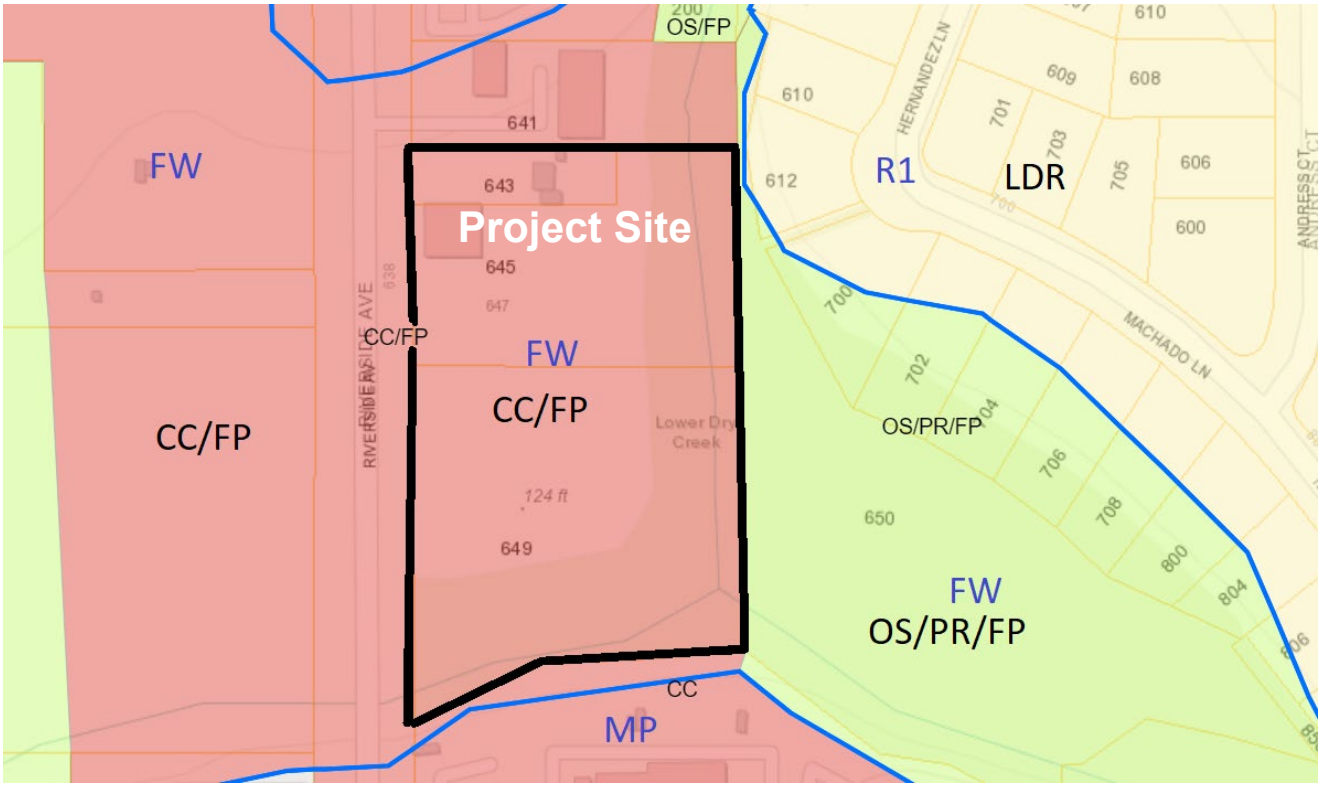
The City of Roseville obtained a Federal Emergency Management Agency (FEMA) Pre-Disaster Mitigation Grant Program (PDM) grant to reduce the flood risk of 645 Riverside Avenue, and the surrounding area by buying the property with the grant funds, demolishing the commercial building, and returning the parcel to open space. The property owner was able to use the PDM grant funds to purchase a commercial property outside of the regulatory floodplain. A condition of the federal hazard mitigation grant funds required that the City provide assurances that the land would be "restricted in perpetuity to open-space uses." To ensure that the City follow through on the assurances they gave to FEMA, the parcel at 645 Riverside Avenue is proposed to be converted to an Open Space zone designation. This would enable the City to comply with a deed restriction that was placed on the parcel on January 18,

2018, which was also a condition to receive the grant funds. One deed restriction term and condition indicates "The Property shall be dedicated and maintained in perpetuity as open space for the conservation of natural floodplain functions."

The current project is a request to Rezone the site to modify the zoning from Floodway (FW) to Open Space/Floodway (OS/FW) and a General Plan Amendment to modify the Land Use designation from Community Commercial/ Floodplain (CC/FP) to Open Space/Floodplain (OS/FP) in order to comply with the above-described grant funding requirements that will facilitate development of the trailhead for the future Dry Creek Greenway East Trail.

Figure 1 – Project Location

Figure 2. Existing Zoning and Land Use Designations (Zoning = Blue, Land Use = Black)



SITE INFORMATION

Location: 645 and 649 Riverside Avenue

Total Size: 3.93 acres

Topography and Setting: The project site is an infill property located in an urbanized setting. The site includes frontage on Riverside Avenue, which is a four-lane roadway. The site is currently undeveloped and does not include a sidewalk. The eastern and southern portions of the site include the banks and riparian woodland along Dry Creek.

EVALUATION: GENERAL PLAN AMEDNMENT AND REZONE

Proposed amendments to the General Plan are analyzed for consistency with the goals and policies of the General Plan. The policies for land use amendments relate to promoting land use patterns that enhance quality of life and minimize conflicts between land uses. Land use modifications are also evaluated for impacts to noise, air quality, traffic, and utilities. These same potential impacts were considered in the Addendum prepared for the project, included as Exhibit A. For the proposed rezone, Zoning Ordinance Section 19.86.050 specifies that recommendations for approval or denial of a rezone shall include consideration of the proposed amendment's consistency with:

1. ***The public interest, health, safety, or welfare of the City, and***

2. ***The General Plan and any applicable Specific Plan.***

General Plan Amendment

The Dry Creek Greenway East Trail project was approved in 2019. Therefore, the below evaluation does not consider whether the trail is appropriate in the existing land use and zoning designations, but rather whether the proposed land use and zoning modifications are appropriate and compatible with the approved trail project. The project site is within the City's Infill planning area, which is characterized by pre-1980's urban development. As discussed in the background, the site once consisted of commercial development but after flooding in the area was cleared of structures. The project site is made up of two parcels with a General Plan Land Use designation of Community Commercial/Floodplain (CC/FP). Floodplain is a combining land use designation, and is only applied in combination with another land use to modify the uses and development guidelines of that designation. The project site consists of two of the ten lots that make up Infill Parcel 179, the entirety of which has the CC/FP land use designation. The CC/FP combination is appropriate for some of the other lots within Parcel 179 such as 641 and 643 Riverside Avenue, which continue to operate non-conforming commercial uses. The commercial designation is no longer appropriate for 645 and 649 Riverside Avenue. The Dry Creek Greenway East Trail project, approved in 2019, will include development of the project site into a trailhead. Primary uses of the Open Space land use designation include walking and bike trails. The City therefore proposes to modify the land use to OS/FP to bring the land use designation into consistency with the future use of the site, while maintaining the Floodplain combining designation to acknowledge its location within the City's regulatory floodplain.

Rezone

Because the proposed OS/FP land use designation is found to be appropriate, staff analyzed the consistency of the requested OS/FW zoning with General Plan policies and the proposed OS/FP land use. The City of Roseville General Plan provides a list of compatible "Implementing Zones" for each land use designation (General Plan Table II-10), which establishes what zoning designations are considered compatible with the applicable General Plan land use designation. The proposed General Plan land use designation for the project site is OS/FP. Open Space (OS) is an implementing zone in the OS land use designation. Furthermore, the proposed OS/FW zoning is compatible with the approved trail use. Trails are considered a Resource Related Recreation use type, which is principally permitted within the OS zone. Biking and hiking trails are also principally permitted uses within the Floodway zone district.

The proposed rezone is consistent with the public interest, health, safety, or welfare of the City as it brings the zoning into consistency with the approved Dry Creek Greenway East Trail project and grant funding that will be used to facilitate the development of the trail. The trail project went through a lengthy public outreach process and was ultimately approved by City Council in 2019.

PUBLIC OUTREACH

The proposed project was distributed to the various agencies and departments which have requested notice of City applications, and all comments were considered and incorporated into the project as appropriate. Notice of the application was also distributed to the Roseville Coalition of Neighborhood Associations. A public notice of the Planning Commission hearing was published on January 28, 2022, and was distributed to all property owners and residents within 300 feet of the project site. Consistent with SB-18, staff consulted local Native American tribes for comment on the project.

CONCLUSION

As demonstrated by the analyses in the foregoing sections, the proposed project is consistent with the objectives and overall intent of the General Plan and the Rezone will not adversely affect the public interest, safety, or welfare. The required findings can be made for each requested entitlement, and staff requests that the Planning Commission take the actions listed in the Recommendation section of this report.

ENVIRONMENTAL DETERMINATION

Consistent with CEQA Guidelines Section 15164, regarding previously certified and adopted Environmental Impact Reports (EIR), an Addendum to the Dry Creek Greenway East Trail Project EIR (SCH #2014032087, certified March 20, 2019) has been prepared to cover the minor technical changes and additions necessary to describe the impacts of the proposed project. Staff recommends that the Planning Commission consider the Addendum to the Dry Creek Greenway East Trail Project EIR, included as Exhibit A of this report.

RECOMMENDATION

The Planning Division recommends the Planning Commission take the following actions:

A. Consider the **ADDENDUM TO THE DRY CREEK GREENWAY EAST TRAIL PROJECT EIR;**

B. Recommend the City Council approve the **GENERAL PLAN AMENDMENT – 649 RIVERSIDE AVE. – INFILL PCL 179 – DRY CREEK GREENWAY TRAILHEAD REZONE – FILE # PL21-0273;**

C. Recommend the City Council adopt the two (2) findings of fact as stated in the staff report and approve the **REZONE – 649 RIVERSIDE AVE. – INFILL PCL 179 – DRY CREEK GREENWAY TRAILHEAD REZONE – FILE # PL21-0273;**

Exhibits

A. Addendum to the Dry Creek Greenway East Trail Project EIR
B. General Plan Amendment Exhibit
C. Rezone Exhibit

Note to Applicant and/or Developer: Please contact the Planning Division staff at (916) 774-5276 prior to the Commission meeting if you have any questions on any of the recommended conditions for your project. If you challenge the decision of the Commission in court, you may be limited to raising only those issues which you or someone else raised at the public hearing held for this project, or in written correspondence delivered to the Planning Manager at, or prior to, the public hearing.

1st ADDENDUM TO THE DRY CREEK GREENWAY EAST TRAIL PROJECT ENVIRONMENTAL IMPACT REPORT (SCH #2014032087, ADOPTED ON March 20, 2019)

Project Title/File Number:	INFILL PCL 179 – Dry Creek Greenway Trailhead Rezone, File# PL21-0273
Project Location:	649 Riverside Ave., Roseville, Placer County, CA
Project Description:	The City requests a Rezone to modify the zoning from Floodway (FW) to Open Space/Floodway (OS/FW) and a General Plan Amendment to modify the Land Use designation from Community Commercial/Floodplain (CC/FP) to Open Space/Floodplain (OS/FP) in order to comply with grant funding requirements that will facilitate development of a trailhead for the future Dry Creek Greenway East Trail.
Project Applicant:	Stefanie Kemen, City of Roseville
Property Owner:	City of Roseville
Lead Agency Contact:	Sean Morales, Associate Planner; Phone (916) 774-5282

An Addendum to a previously certified environmental impact report (EIR) may be prepared for a project if only minor technical changes or additions are necessary or none of the conditions calling for the preparation of a subsequent EIR or negative declaration have occurred (California Environmental Quality Act Guidelines [CEQA] Section 15164). Consistent with CEQA Guidelines Section 15164, the below analysis has been prepared in order to demonstrate that none of the conditions described in Section 15162 of the CEQA Guidelines calling for preparation of a subsequent EIR have occurred and that only minor technical changes or additions are necessary in order to deem the adopted EIR adequate to describe the impacts of the proposed project. CEQA Guidelines Section 15164 also states that an addendum need not be circulated for public review, but can be included in or attached to the final EIR for consideration by the hearing body. This Addendum focuses only on those aspects of the project or its impacts which require additional discussion.

CC Exhibit A

PROJECT DESCRIPTION

Project Location

The project site is located at 645 and 649 Riverside Avenue on Parcel 179 within the Infill area (see Figure 1).

Figure 1: Project Location (parcels bordered in red)

BACKGROUND

The Dry Creek Greenway East Trail (a multi-use trail along Dry, Cirby, and Linda Creeks from Riverside Avenue to Old Auburn Road) is an approved 4.25-mile paved multi-use trail in the City of Roseville (City). The future trail will be a shared-use trail for pedestrians, bicyclists, and other non-motorized vehicle users, and connect neighborhoods, parks, schools, businesses, natural areas, and the on-street bikeway system across the south side of the City. The project includes one new trailhead with accompanying parking lot at the western end of the project with driveway access from Riverside Avenue. The parking lot would include approximately 35 parking spaces. The proposed zoning and land use modifications apply to the two parcels that comprise the trailhead area.

The City of Roseville has received grant funding that would help facilitate the construction of the bike trail, including the trailhead on Riverside Avenue. One of the conditions of the grant is to modify the zoning and land use designation of the two parcels that make-up the trailhead site to include Open Space designations.

Approval of the zoning and land use modifications by the Roseville City Council is a discretionary action that requires compliance with the California Environmental Quality Act (CEQA). To satisfy CEQA requirements, this EIR Addendum has been prepared.

PROJECT DESCRIPTION

The proposed project is a proposal by the City of Roseville for a Rezone to modify the zoning from Floodway (FW) to Open Space/Floodway (OS/FW) and a General Plan Amendment to modify the Land Use designation

from Community Commercial/Floodplain (CC/FP) to Open Space/Floodplain (OS/FP) of two parcels (APNs: 472-200-030-000 and 472-200-031-000) (Attachment 1). The proposed zoning and land use modifications are conditions of grant funding that will facilitate development of the future Dry Creek Greenway East Trail Project. No direct or indirect physical changes to the environment, beyond what was evaluated in the previously certified EIR, are proposed concurrent with the zoning and land use modifications.

PURPOSE AND SCOPE OF ADDENDUM

INTRODUCTION

The Project Sponsor, the City of Roseville, proposes to modify the zoning of two parcels within the 4.25-mile Dry Creek Greenway East Trail Project from Floodway (FW) to Open Space/Floodway (OS/FW) and modify the General Plan Land Use designation from Community Commercial/Floodplain (CC/FP) to Open Space/Floodplain (OS/FP). The proposed zoning and land use modifications are required in order to comply with federal grant funding requirements that would facilitate development of the parcels as a trailhead area for the future Dry Creek Greenway East Trail. The environmental effects of the construction and use of the trailhead are examined in the previously certified *Dry Creek Greenway East Trail Project EIR* (SCH #2014032087, certified March 20, 2019) and in this Addendum. In preparing this Addendum, all of the potential impacts identified on the CEQA "Environmental Checklist Form" were considered. For all impact areas, a preliminary review indicated that the Zoning and Land Use amendments would have no impact not already identified in the EIR.

STATUTORY BACKGROUND

Under the California Environmental Quality Act (CEQA), an Addendum to a certified Environmental Impact Report (EIR) is needed if minor technical changes or modifications to the proposed project occur (CEQA Guidelines § 15164). An addendum is appropriate only if these minor technical changes or modifications do not result in any new significant impacts or a substantial increase in the severity of previously identified significant impacts. The Addendum need not be circulated for public review (CEQA Guidelines § 15164[c]); however, an addendum is to be considered along with the final EIR by the decision making body prior to making a decision on the project (CEQA Guidelines § 15164[d]).

This EIR Addendum demonstrates that the environmental analysis, impacts, and mitigation requirements identified in the *Dry Creek Greenway East Trail Project EIR* remain substantively unchanged by the situation described herein, and supports the finding that the proposed project does not raise any new issues and does not exceed the level of impacts identified in the previous EIR.

APPLICABLE REPORTS IN CIRCULATION

This addendum is written as an addition to the previously certified *Dry Creek Greenway East Trail Project EIR* (SCH #2014032087). Copies of the certified EIR are available for review at the Roseville Development Services Department, 311 Vernon Street, Roseville CA 95678.

EVALUATION

PROJECT ELEMENTS ANALYZED IN THE ORIGINAL EIR

The environmental impacts of constructing the Dry Creek Greenway East Trail, including the trailhead along Riverside Avenue, were evaluated in the *Dry Creek Greenway East Trail Project EIR*). Under CEQA, a significant effect on the environment is defined as a substantial or potentially substantial adverse change in any of the physical conditions within the area affected by the project, including air, water, minerals, flora, fauna, ambient noise, and objects of historic or aesthetic significance (CCR Section 15382). The EIR found that

implementation of the proposed project would result in significant impacts to some of these resources, which were analyzed in Sections 4.1 through 4.14 of the document and summarized in Table 2-1.
CCR Section 15126.4 requires that an EIR describe feasible mitigation measures that could minimize significant adverse impacts. Implementation of mitigation measures would either reduce the impact to a less-than-significant level or leave the impact as significant and unavoidable. In the course of drafting the EIR, impacts were identified that could be reduced to a less-than-significant level with implementation of proposed mitigation measures (see also Chapter 5, "Other CEQA Considerations"). These impacts can be found in sections 4.2, "Air Quality"; 4.3, "Biological Resources"; 4.4, "Cultural Resources"; and 4.7, "Hazards and Hazardous Materials"; 4.10, "Noise"; and 4.13, "Transportation and Circulation." (Ascent Environmental, 2 Summary, City of Roseville Dry Creek Greenway East Trail Project Draft EIR 2-5).
An impact that remains significant after mitigation is considered an unavoidable adverse impact of the proposed project. Two significant and unavoidable impacts were identified in the Final EIR, and Findings of Fact and Statement of Overriding Considerations: Impact 4.10-1: Short-term construction-related noise, and Impact 4.10-3: Exposure to construction-related ground-borne vibrations.

MODIFIED PROJECT AS PROPOSED UNDER THE ZONING AND LAND USE MODIFICATIONS

The proposed Rezone and General Plan Amendments would not modify the physical elements of the Dry Creek Greenway East Trail project. Rather, the modifications are a condition of grant funding that was awarded to the City and will facilitate construction of that already approved project. Any modification to the environmental impact by the Rezone and General Plan Amendment would reduce the potential for impacts overall by removing the possibility of future commercial development on the site, and ensuring the site remains open space, and part of the proposed trail system.

IMPACT ANALYSIS

The *Dry Creek Greenway East Trail Project EIR* assessed impacts of construction and operation of the trail project to Air Quality, Biological Resources, Cultural Resources, Hazards and Hazardous Materials, Noise; and Transportation and Circulation. The proposed Rezone and General Plan Amendment do not amend the anticipated construction or operational impacts, therefore there are no new anticipated environmental impacts.

SUMMARY AND FINDINGS

In summary, the analysis concludes that none of the conditions described in Section 15162 of the CEQA Guidelines calling for preparation of a subsequent EIR have occurred, and thus an Addendum to the *Dry Creek Greenway East Trail Project EIR* is appropriate to satisfy CEQA requirements for the proposed Rezone and General Plan Amendment.

The following findings are provided in accordance with CEQA Section 15164 (e) concerning the decision not to prepare a subsequent EIR pursuant to Section 15162.

(1) None of the following conditions calling for preparation of a subsequent EIR have occurred:
   (a) Subsequent changes are proposed in a project which will require major revisions of the previous EIR…due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified effects;
   (b) Substantial changes occur with respect to the circumstances under which the project is undertaken…which will require important revisions in the previous EIR due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified effects; or,

(c) New information of substantial importance to the project becomes available and (a) the information was not known and could not have been known at the time the previous EIR was certified as complete…and (b) the new information shows any of the following:

- The project will have one or more significant effects not discussed previously in the EIR;
- Significant effects previously examined will be substantially more severe than shown in the EIR;
- Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce on or more significant effects of the project; or
- Mitigation measures or alternatives which were not previously considered in the EIR would substantially lessen one or more significant effects on the environment.

(2) Only minor technical changes or additions are necessary to make the EIR under consideration adequate under CEQA; and,

(3) The changes to the EIR made by the addendum do not raise important new issues about the significant effects on the environment.

This addendum to the *Final Dry Creek Greenway East Trail Project EIR* (SCH #2014032087 - certified March 20, 2019) finds that the proposed Rezone and General Plan Amendments to two parcels within the trail system (as identified in this addendum) will not result in any new significant environmental effects or result in the substantial increase of any previously identified impacts in the final EIR.

CC Exhibit A

ENVIRONMENTAL DETERMINATION:

In reviewing the site specific information provided for this project and acting as Lead Agency, the City of Roseville, Development Services Department, Planning Division has analyzed the potential environmental impacts created by this project and determined that the findings of CEQA Section 15162 concerning the decision not to prepare a subsequent EIR or negative declaration and the findings of CEQA Section 15164 concerning the decision to prepare an Addendum can be made. As supported by substantial evidence within the Addendum to the Dry Creek Greenway East Trail Project EIR (SCH #2014032087 - certified March 20, 2019)*, the Lead Agency makes the following findings:*

[**X**] No substantial changes are proposed in the project which would require major revisions of the previous EIR.

[**X**] No substantial changes have occurred with respect to the circumstances under which the project is undertaken.

[**X**] There is no new information of substantial importance which was not known and could not have been known with the exercise of due diligence at the time the previous EIR was certified as complete.

[**X**] Only minor technical changes or additions are necessary in order to deem the adopted environmental document adequate.

RESOLUTION NO. 22-136

AMENDING THE GENERAL PLAN TO CHANGE THE LAND USE DESIGNATIONS ON CERTAIN REAL PROPERTY IN THE CITY OF ROSEVILLE

WHEREAS, a proposal has been submitted to amend the General Plan 2035 – Land Use Map of the City of Roseville for that portion of certain real property within the City of Roseville known as Parcel 179 of the Infill area from Community Commercial/Floodplain (CC/FP) to Open Space/Floodplain (OS/FP), as shown in Exhibit B, attached and incorporated herein by reference; and

WHEREAS, the Planning Commission held a public hearing on the proposed amendments to the General Plan on February 10, 2022; and

WHEREAS, on February 10, 2022, the Planning Commission considered the Addendum to the Dry Creek Greenway East Trail Project EIR; and

WHEREAS, on March 16, 2022, the City Council held a public hearing at which time the proposed amendments were considered; and

WHEREAS, on March 16, 2022, the City Council considered the Addendum to the Dry Creek Greenway East Trail Project EIR; and

WHEREAS, the Council of the City of Roseville desires to approve said amendment to the Roseville General Plan as conducive to public interest, health, safety and welfare, and consistent with the land use practices of the City.

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Roseville that the amendment changing the Land Use Map (attached as Exhibit B) is hereby adopted.

BE IT FURTHER RESOLVED, that the Development Services Director is hereby directed to retain said General Plan Amendments on permanent public display in the Development Services Department of the City of Roseville.

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE
AMENDING ZONING ORDINANCE NO. 5428 OF THE CITY OF ROSEVILLE
CHANGING THE ZONING OF CERTAIN REAL PROPERTY LOCATED
WITHIN THE CITY OF ROSEVILLE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. The Council of the City of Roseville has reviewed the findings of the Planning Commission recommending approval of the rezone specified herein, and makes the following findings pursuant to Section 19.86.050 of the Zoning Ordinance:

1. The rezone is in conformance with the public interest, health, safety, or welfare of the City; and

2. The rezone is consistent with the objectives, policies, programs, and land use designations of the City of Roseville General Plan.

SECTION 2. That Section 19.06.020 of the Zoning Ordinance of the City of Roseville, Ordinance No. 5428, is amended to change the zoning of that portion of certain real property located on Parcel 179 of the Infill area of the City of Roseville, as shown and so designated in Exhibit C, attached and incorporated herein by reference, is hereby rezoned from Floodway (FW) to Open Space/Floodway (OS/FW).

SECTION 3. This ordinance shall be effective at the expiration of thirty (30) days from the date of adoption.

SECTION 4. The City Clerk is hereby directed to cause this ordinance to be published in full at least once within fourteen (14) days after it is adopted in a newspaper of general circulation in the City, or shall within fourteen (14) days after its adoption cause this ordinance to be posted in full in at least three (3) public places in the City and enter in the Ordinance Book a certificate stating the time and place of said publication by posting.
