THE CITY OF ROSEVILLE WELCOMES YOUR PARTICIPATION

If an agenda item is open to public comment, such public comment shall be addressed to the chair of the meeting.

Public Comment - Speakers have three minutes under Public Comment to speak on issues that are not listed on the agenda and are within the City's jurisdiction. The Brown Act does not permit any action or discussion on items not listed on the agenda.

Consent Calendar - If applicable, the Consent Calendar consists of routine items that may be approved by one motion. Any person can remove an item from the Consent Calendar to be discussed separately.

Agenda Items - Speakers have five minutes to address items that are listed on the agenda.

Americans with Disabilities Act - Notify the City Clerk or Secretary at least 72 hours in advance if special assistance is required to participate in a meeting including the need of auxiliary aids or services.

Audio/Visual Presentations - If making a presentation regarding an agenda item, audio/visual materials must be submitted to the City Clerk or Secretary at least 72 hours in advance.

Roseville City Clerk 311 Vernon Street, Roseville, CA 916-774-5200 TDD 916-774-5220

Bids / Purchases / Services

6.1. 2019 Curb Ramps, Sidewalks, Curbs, and Gutters Project – Approval of Plans and Specifications and Authorization to Call for Bids

Memo from Assistant Engineer Daniel Lierly and Acting Public Works Director Jason Shykowski recommending the City Council approve plans and specifications for the 2019 Curb Ramps, Sidewalks, Curbs, and Gutters project and authorize staff to call for bids. The scope of this project consists of minor concrete construction repairing City-owned sidewalks, driveway aprons, curb and gutter, and curb ramps. The engineer's estimate for construction is approximately $2,750,000. The project is primarily funded by State Gas Tax Funds, as well as some North Central Lighting and Landscaping District funds. No General Fund resources will be used.

6.2. Audiovisual Services (RFP 12-009) - Service Agreement Renewal

Memo from Information Technology Program Manager Scott Adrian and Chief Information Officer Hong Sae recommending the City Council adopt RESOLUTION NO. 19-89 APPROVING A SERVICE AGREEMENT RENEWAL BETWEEN CITY OF ROSEVILLE AND BETTER PRESENTATION SYSTEMS, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE (S1909066). The City has an ongoing need for audiovisual design and installation services. This item requests the renewal of a service agreement with Better Presentation Systems, Inc. for citywide audiovisual services. Projects range in size from small conference room upgrades to large facility system installations. The original contract term was three years plus two optional one (1) year renewals. This is the first of the two optional renewals. The recommended service agreement amendment does not require the appropriation of additional funding. Information Technology Department staff coordinate the services provided under this agreement on an as-needed basis

and directly charge the requesting department for the services upon identification of adequate funds in their respective budgets.

6.4. Residential New Construction Energy Efficiency Program Development - Service Agreement

Memo from Senior Energy Services Account Representative Mark Riffey and Electric Utility Director Michelle Bertolino recommending the City Council adopt RESOLUTION NO. 19-80 APPROVING A SERVICE AGREEMENT BETWEEN THE CITY OF ROSEVILLE AND TRC SOLUTIONS, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE (S1909056). This item is a service agreement with TRC Solutions, Inc. (TRC) to implement and administer Roseville Electric Utility's residential new construction energy efficiency program. The total contract value of the agreement with TRC is not to exceed $900,000.00. The term of the agreement begins in FY2018-19 and extends through FY2020-21. Funds for the first year of the agreement in the amount of $200,000.00 are available in the FY2018-19 Electric Operations budget, as part of the public benefit programs. Future funding is pending City Council approval of the FY2019-20 and FY2020-21 budgets.

6.5. Landscape Bark and Playground Engineered Wood Fiber Material and Services - Service Agreement Amendment

Memo from Parks Supervisor Patrick Daly and Parks, Recreation & Libraries Director Dion Louthan recommending the City Council adopt RESOLUTION NO. 19-70 APPROVING AMENDMENT NO. 1 TO SERVICE AGREEMENT BETWEEN CITY OF ROSEVILLE AND APPLIED LANDSCAPE

MATERIALS, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE (S1909067). This amendment will increase the amount of the agreement from $100,000.00 to $150,000.00. This agreement provides landscape bark and playground fiber within City parks and landscape districts. The annual cost of the agreement shall not exceed $150,000.00. Funding is included in the FY2018-19 Parks, Recreation & Libraries Department budget. The funding sources are a combination of General Fund, Community Facility Districts, and Lighting and Landscape Districts. There is no net impact to the General Fund.

6.10. Placer Valley Tourism - Annual Budget and Strategic Work Plan

Memo from Recreation Manager Kathy Barsotti and Parks, Recreation & Libraries Director Dion Louthan recommending the City Council adopt RESOLUTION NO. 19-91 APPROVING THE 2019 PLACER VALLEY TOURISM STRATEGIC MARKETING PLAN AND BUDGET. Staff recommends the City Council approve the 2019 Budget and 2019 Strategic Marketing Plan for Placer Valley Tourism (PVT). On November 5, 2014, the City entered into a Marketing Management Agreement with PVT which authorizes PVT to administer and implement all of the activities and improvements of the District. Expenditure of assessments received from the District are directed by the PVT Board, which is comprised of hotel, Chamber and City representatives from Roseville, Rocklin and Lincoln. The PVT strategic marketing plan and budget are required to undergo an annual review and approval by the City Council.

6.15. Roseville Road Improvement Project - Professional Services Agreement Amendment

Memo from Senior Engineer Stefanie Kemen and Acting Public Works Director Jason Shykowski recommending the City Council adopt RESOLUTION 19-83 APPROVING A FIRST AMENDMENT TO PROFESSIONAL SERVICES AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND INTERWEST CONSULTING GROUP, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE. This is an amendment to the professional services agreement with Interwest Consulting Group, Inc. for title and escrow tasks that need to be completed to close two outstanding escrows for the Roseville Road Improvement project. The cost of the additional services is $32,500.00, bringing the total contract amount to $168,300.00. The project is fully funded with Federal Highway Safety Improvement Program grant funds and Traffic Mitigation funds, and sufficient funding is available in the previously approved project budget for this amendment. No budget adjustment is needed, and no General Fund resources are allocated for this project.

6.17. Resolution of Intention to Form Sierra Vista Specific Plan Westpark-Federico Community Facilities District No. 1 (Public Facilities) and Resolution of Intention to Incur Bonded Indebtedness

Memo from Administrative Analyst Jeannine Thrash and Chief Financial Officer Dennis Kauffman recommending the City Council adopt RESOLUTION NO. 19-81 OF INTENTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE TO FORM A COMMUNITY FACILITIES DISTRICT AND FUTURE ANNEXATION AREA, AND LEVY A SPECIAL TAX IN THE CITY OF ROSEVILLE SVSP WESTPARK-FEDERICO COMMUNITY FACILITIES DISTRICT NO. 1 (PUBLIC FACILITIES) TO FINANCE PUBLIC SERVICES AND THE ACQUISITION AND CONSTRUCTION OF CERTAIN PUBLIC FACILITIES IN AND FOR SUCH COMMUNITY FACILITIES DISTRICT; and adopt RESOLUTION NO. 19-82 OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE OF INTENTION TO INCUR BONDED INDEBTEDNESS TO FINANCE THE ACQUISITION AND CONSTRUCTION OF CERTAIN PUBLIC FACILITIES IN AND FOR THE CITY OF ROSEVILLE SVSP WESTPARK-FEDERICO COMMUNITY FACILITIES DISTRICT NO. 1 (PUBLIC FACILITIES). The Westpark-Federico property is a portion of the Federico property within the Sierra Vista Specific Plan (SVSP). The overall Federico property is approximately 506 acres and is approved for 2,154 residential units (1,632 low and medium-density, and 522 high-density residential units). The Westpark-Federico portion is approximately 251 acres and is planned for 935 residential units (763 low and medium-density, and 172 high-density residential units). The property is anticipated to be developed over a number of phases. The first phase, which is also the initial Community Facilities District (CFD) boundary, includes approximately 215 low-density residential units and 110 medium-density residential units over roughly 62 acres. The CFD boundary also includes a 3.4 acre open space parcel and a 1.1 acre park parcel.

6.27. Out of State Travel Request - Fire Department

Memo from Assistant Fire Chief Greg James and Fire Chief Rick Bartee recommending the City Council approve out-of-state travel for 3 Fire Department staff members to attend the Tank Car Safety Course. This course

is held at the Association of American Railroad's Security and Emergency Response Training Center located at the Transportation and Technology Center near Pueblo, CO. The Roseville Fire Department has a Type-1 Hazardous Materials team capable of responding to various Hazardous Materials rail incidents in Roseville and the surrounding area. These classes focus on technical damage assessment and field repair of damaged hazardous materials railcars in order to rapidly and effectively mitigate emergencies. This effective response protects residents while providing a minimal amount of disruption to business and commerce. Total cost to the department is approximately $6,000.00. Funds for this training are available in the department's current fiscal year budget. Approximate costs in the amount of $10,500.00 which includes tuition, travel, and lodging will be covered by Union Pacific.

7. RESOLUTIONS

7.1. Dry Creek Greenway East Trail - EIR Certification and Project Approval

Memo from Alternative Transportation Manager Michael Dour and Acting Public Works Director Jason Shykowski recommending the City Council adopt

RESOLUTION NO. 19-68 CERTIFYING A FINAL ENVIRONMENTAL IMPACT REPORT RELATING TO THE DRY CREEK GREENWAY EAST TRAIL PROJECT, MAKING FINDINGS OF FACT, ISSUING A STATEMENT OF OVERRIDING CONSIDERATIONS, APPROVING A MITIGATION MONITORING PROGRAM AND APPROVING THE DRY CREEK GREENWAY EAST TRAIL PROJECT. This item is a request for City Council action on the Dry Creek Greenway East Trail Project. The Dry Creek Greenway East Trail Project is a proposed paved multi-use trail along Dry, Cirby, and Linda Creeks from Darling Way/Riverside Avenue to the City limits at S. Cirby Way/Old Auburn Road. The project is identified as a proposed Class I bikeway in the City of Roseville General Plan and Bicycle Master Plan. The requested actions are to certify the project Environmental Impact Report, approve the Findings of Fact and Statement of Overriding Considerations, and approve the project, including Alignment Option 1B for the Hillcrest area and Alignment Option 5A for the Sunrise Avenue area. There is no cost associated with this action, and no General Fund expenditures are anticipated with the future construction of the project.

Memo from Senior Engineer Stefanie Kemen and Acting Public Works Director Jason Shykowski recommending the City Council adopt RESOLUTION NO. 19-74 APPROVING A PROFESSIONAL SERVICES AGREEMENT, BY AND BETWEEN THE CITY OF ROSEVILLE AND INTERWEST CONSULTING GROUP, INC., AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE. This is a professional services agreement with Interwest Consulting Group, Inc. for negotiations to acquire real property in the Historic Old Town Roseville area for a planned Parking Project. The costs of the services will not exceed $34,750.00 and will be funded from General Fund contingency. No additional General Fund resources are required as there are adequate resources in the General Fund contingency to fund the recommended purchase.

7.3. Authorization to Submit Grant Application to Sacramento Area Council of Governments

Memo from Administrative Analyst Alison Winter and Acting Public Works Director Jason Shykowski recommending the City Council adopt RESOLUTION NO. 19-84 AUTHORIZING THE CITY MANAGER OR HIS DESIGNEE TO SUBMIT A SACRAMENTO AREA COUNCIL OF GOVERNMENTS DISCRETIONARY FEDERAL TRANSPORTATION ADMINISTRATION TRANSIT PROGRAMMING APPLICATION AND TO EXECUTE ALL RELATED FORMS AND AGREEMENTS. Staff requests authorization to submit an application to the Sacramento Area Council of

Governments and to execute all related forms and agreements that will allow the City to receive up to $688,556.00 from Sacramento Urbanized Area Federal Transit Administration to purchase one (1) zero-emission battery electric bus to expand commuter service.

7.4. Exclusive Right to Negotiate Agreement for Property Exchange (West Roseville Specific Plan Parcels F-55, W-60a, W-60b)

Memo from Senior Planner Lauren Hocker and Development Services Director Mike Isom recommending Council adopt RESOLUTION NO. 19-85 APPROVING AN EXCLUSIVE RIGHT TO NEGOTIATE AGREEMENT FOR PROPERTY EXCHANGE, BY AND BETWEEN THE CITY OF ROSEVILLE AND WEST ROSEVILLE, LLC, AND AUTHORIZING THE CITY MANAGER TO EXECUTE IT ON BEHALF OF THE CITY OF ROSEVILLE. This item will allow staff to negotiate exclusively with West Roseville, LLC to exchange 25.67 acres of City-owned property (Parcel F-55) for 25.67 acres of property owned by West Roseville, LLC (Parcel W-60a and a portion of Parcel W-60b) in the West Roseville Specific Plan area of the City of Roseville. Any property exchange agreement resulting from the exclusive negotiations would require future City Council approval. Aside from Development Services, City Attorney, and City Manager staff time associated with negotiations, there are no direct impacts to the General Fund as a result of this item.

8. ORDINANCES

8.1. HOUSING SUCCESSOR AGENCY/CITY COUNCIL - Homeless Prevention and Rapid Rehousing Funding Allocations and Budget Adjustment

Memo from Housing Manager Danielle Foster and Economic Development Director Laura Matteoli recommending the City Council adopt RESOLUTION NO. 19-90 APPROVING FUNDING RECOMMENDATIONS AND AUTHORIZING THE CITY MANAGER OR DESIGNEE TO EXECUTE GRANT AGREEMENTS ON BEHALF OF THE CITY OF ROSEVILLE; and adopt ORDINANCE NO. 6064 OF THE COUNCIL OF THE CITY OF ROSEVILLE AUTHORIZING CERTAIN AMENDMENTS TO THE 2018-19 BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY EFFECTIVE AS AN APPROPRIATION MEASURE. This item allocates 2019 Homeless Prevention and Rapid Rehousing grants to local non-profit partners using the budgeted $250,000.00 of affordable housing funding as the Housing Successor of the Roseville Redevelopment Agency, and another $125,000.00 of Sutter Health's *Getting to Zero* funding for grants totaling $375,000.00. A related budget adjustment is included for the Sutter Health grant funding. This item does not impact the General Fund.

11. PUBLIC HEARING

NOTICE TO THE PUBLIC

City Council, when considering the matter scheduled for hearing, will take the following actions:

1. Open the Public Hearing
2. Presentation by Staff
3. Presentation by applicant or Appellant

4. Accept Public Testimony
5. Appellant or Applicant Rebuttal Period
6. Close the Public Hearing
7. City Council Comments and Questions
8. City Council Action

In the future, if you wish to challenge in court any of the matters on this agenda for which a public hearing is to be conducted, you may be limited to raising only those issues, which you, or someone else raised orally at the Public Hearing or in written correspondence received by the City or before the hearing

Public Hearings listed for continuance will be continued as noted and posting of this agenda serves as notice of continuation.

11.1. Statewide Community Infrastructure Program Participation

Memo from Economic Development Director Laura Matteoli recommending the City Council adopt RESOLUTION NO. 19-92 OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE AUTHORIZING THE CALIFORNIA STATEWIDE COMMUNITIES DEVELOPMENT AUTHORITY TO ISSUE LOCAL OBLIGATIONS WITHIN THE JURSDICTIONAL BOUNDARIES OF THE CITY FROM TIME TO TIME FOR THE STATEWIDE COMMUNITY INFRASTRUCTURE PROGRAM AND AUTHORIZING RELATED ACTIONS. Staff recommends that the City Council authorize the City to participate in the Statewide Community Infrastructure Program (SCIP). The SCIP program financing will include a City administrative fee, per the City's master fee schedule at 100% full cost recovery, to cover staff time involved with the processing and tracking of SCIP applications.

11.2. Schedule of Maintenance Costs and Charges for Maintenance Community Facilities Districts Adoption

Memo from Administrative Analyst Jeannine Thrash and Chief Financial Officer Dennis Kauffman recommending the City Council adopt RESOLUTION NO. 19-79 ADOPTING A SCHEDULE OF MAINTENANCE COSTS AND CHARGES FOR COMMUNITY FACILITIES DISTRICTS. The proposed Schedule of Maintenance Costs and Charges for Maintenance Community Facilities Districts (CFDs) identifies costs for services provided by the City at the request of, or on behalf of, individual districts, as opposed to the public at large. This schedule of costs and charges is intended for application to all future maintenance CFD annexations as well as any new maintenance CFDs planned and formed by the City. The proposed Schedule of Maintenance Costs and Charges for Maintenance CFDs is intended to target full cost recovery in a fair and reasonable manner for all future maintenance CFDs once implemented.

Title:	2019 Curb Ramps, Sidewalks, Curbs, and Gutters Project – Approval of Plans and Specifications and Authorization to Call for Bids
Contact:	Daniel Lierly 916-746-1300 delierly@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.1.

RECOMMENDATION TO COUNCIL

Staff recommends the City Council approve the plans and specifications for the 2019 Curb Ramps, Sidewalks, Curbs, and Gutters Project and authorize staff to call for bids.

BACKGROUND

The 2019 Curb Ramps, Sidewalks, Curbs and Gutters Project is the combination of two biennial City maintenance projects; the 2019 Residential Curb Ramps Project, and the 2019 Sidewalks, Curbs and Gutters Project. We anticipate that incorporating the two projects into one will give us an improved economy of scale, and result in lower unit and bid prices.

In 2013, a joint technical assistance release was issued by the United States Department of Justice and the Federal Highway Administration requiring that roads receiving an overlay of additional material must ensure that all curb ramps adjacent to the overlay meet current ADA standards. If they do not, they must be improved. Staff has determined that 405 access ramps require improvement with the 2019 and 2020 residential resurfacing projects. The 2019 Curb Ramps, Sidewalks, Curbs and Gutters Project also includes construction of seven ramps requested by residents in areas where no ramps currently exist. In total, this project will improve or construct 412 ADA access ramps.

This project also includes 134 sidewalk, curb, and/or gutter repair locations. These locations were damaged by the roots of official city trees.

A map showing all of the project locations for the 2019 Curb Ramps, Sidewalks, Curbs and Gutters Project is provided as Exhibit A.

Construction of the project is anticipated to begin in the Spring of 2019 and be completed by the Fall of 2019.

Plans and specifications for the project have been completed and are available at the City Clerk's

Office for review.

FISCAL IMPACT

The Engineer's estimate for construction is approximately $2,750,000. The project is primarily funded by State Gas Tax Funds, as well as some North Central Lighting and Landscaping District funds. No General Fund resources will be used.

ECONOMIC DEVELOPMENT / JOBS CREATED

Federal guidelines suggest that there is one job created for every $92,000 in direct government spending. Based on that figure, this project will create approximately 29.9 jobs.

ENVIRONMENTAL REVIEW

The proposed project involves the repair and maintenance of existing facilities. This activity is categorically exempt from CEQA as a Class 1 Exemption (State CEQA Guidelines Section 15301). The Exemption has been prepared and no further CEQA action is required.

Respectfully Submitted,

Daniel Lierly, Assistant Engineer

Jason Shykowski, Acting Public Works Director

Title: Audiovisual Services (RFP 12-009) - Service Agreement Renewal
Contact: Scott Adrian 916-774-5164 sadrian@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.2.

RECOMMENDATION TO COUNCIL

Recommend Council adopt a resolution to approve the Service Agreement Renewal with Better Presentation Systems, Inc. for audiovisual services.

BACKGROUND

The City has an ongoing need for audiovisual design and installation services. These services include project design/engineering, programming, repair, equipment, and training. These services are scheduled on an as-needed basis at various locations throughout the City. Projects range in size from small conference room upgrades to large facility system installations.

The original contract term was three years plus two optional one (1) year renewals. This is the first of the two optional renewals.

FISCAL IMPACT

The recommended service agreement amendment with Better Presentations Systems, Inc. does not require the appropriation of additional funding. Information Technology Department staff coordinate the services provided under this agreement on an as-needed basis and directly charge the requesting department for the services upon identification of adequate funds in their respective budgets. In addition, staff is not recommending an increase to the total agreement award amount because there is adequate spending authority remaining under the original agreement.

ECONOMIC DEVELOPMENT / JOBS CREATED

There is no applicable economic development or job creation from this purchase order.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) doesnot apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment (CEQA Guidelines §15061(b)(3)). This project does not include the potential for a significant environmental effect, and therefore is not subject to CEQA.

Respectfully Submitted,

Scott Adrian, IT Program Manager - GIS & Analytics

Dominick Casey, City Manager
CITY OF ROSEVILLE, A MUNICIPAL CORPORATION

1. To the fullest extent allowed by law, Contractor shall defend, indemnify, and save and hold harmless City, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from or arising out of Contractor's willful misconduct or negligent act or omission while engaged in the performance of obligations or exercise of rights created by this Agreement, except those matters arising from City's sole negligence or willful misconduct. The parties intend that this provision shall be broadly construed. Contractor's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.
2. Contractor is an independent contractor, and shall not be considered an officer, agent or employee of the City.
3. Without the written consent of the City, this Agreement is not assignable by Contractor either in whole or in part.
4. Time is of the essence of this Agreement.
5. At any time during the term of this Agreement, the City has the right to terminate this Agreement, provided Contractor is given thirty (30) days' written notice. City's termination shall be without further liability to City, however Contractor shall be entitled to all costs reasonably incurred prior to the date of termination. Contractor acknowledges that City may terminate this Agreement should funds not be appropriated by its governing body to continue services under this Agreement.
6. This Agreement may only be amended or modified in writing. It is integrated and contains the complete understanding of the parties.
7. All equipment, supplies and services sold to the City of Roseville shall conform to the general safety orders of the State of California.
8. Unless notified to the contrary, in writing, the City assumes that the Contractor has accepted the work in accordance with the plans and specifications (if any) and agrees to do the work in compliance with this Agreement.
9. All fair employment practices must be adhered to. In addition, if the project referenced on this service agreement is a Public Works project, all prevailing wage laws must be complied with. For prevailing wage contracts over $25,000, copies of certified payroll must be submitted with invoices. Prevailing wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm."

10a. Unless otherwise specified, the Contractor shall maintain the policies of insurance outlined in Attachment A, incorporated herein by this reference, in full force and effect during the term of this Agreement. The City of Roseville retains sole discretion in determining the types and proper levels of insurance coverage.

10b. Form. Contractor shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

10c. Additional Insureds. Contractor shall also provide a separate endorsement or section of the policy showing City, its officers, agents, employees, and volunteers as additional insureds for each type of coverage, except for Workers' Compensation. Such insurance shall specifically cover the contractual liability of Contractor. The additional insured coverage under the Contractor's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from City's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office ("ISO") CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

10d. Cancellation/Modification. Contractor shall provide ten (10) days written notice to City prior to cancellation or modification of any insurance required by this Agreement.

10e. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of City (if agreed to in a written contract) before City's own insurance shall be called upon to protect it as a named insured.

10f. Subcontractors. Contractor agrees to include in its contracts with all subcontractors the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, Contractor shall require its subcontractors to agree to be bound to Contractor and City in the same manner and to the same extent as Contractor is bound to City under this Agreement. Additionally, Contractor shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of City's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request.

10g. Self-Insured Retentions. All self-insured retentions ("SIR") must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

10h. Waiver of Subrogation. Contractor hereby agrees to waive subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of City, its officers, agents, employees and volunteers for all worked performed by Contractor, its employees, agents and subcontractors.

10i. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve Contractor of liability in excess of such coverage, nor shall it preclude City from taking such other actions as are available to it under any other provisions of this Agreement or law.

11. Contractor shall comply with all federal, state and local laws and ordinances, including but not limited to the City's storm water regulations, as may be applicable to the performance of services under this Agreement. Failure to comply with local ordinances may result in monetary fines and cancellation of this Agreement. Refer to www.roseville.ca.us/stormwater for links to more information on the City's storm water regulations.
12. In the event that the terms of any attachment or exhibit conflict with any terms of this Service Agreement, the terms of this Service Agreement shall control.
13. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. In the event that any signature is delivered by facsimile transmission or by e-mail delivery of a ".pdf" format data file, such signature shall create a valid and binding obligation of the party executing (or on whose behalf such signature is executed) with the same force and effect as if such facsimile or ".pdf" signature page were an original thereof.
14. If either party commences any legal action against the other party arising out of this Agreement or the performance thereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorneys' fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.
15. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.
16. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.
17. If the project referenced on this service agreement is a Public Works project, then the following shall apply: No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this agreement, Contractor and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.
18. If the project referenced on this service agreement is a Public Works project, then the following shall apply: Contractor must submit all claims as defined in and in accordance with the claim resolution process set forth in Section 9204 of the Public Contract Code. Each such claim must be sent to the City by registered mail or certified mail with return receipt requested and must contain reasonable documentation to support the claim. All claims must be received prior to acceptance of the work.

City reserves the right to withhold any payments to Contractor in the event of noncompliance with insurance requirements or if required by law.

Insurance Submission Process

The City of Roseville Human Resources/Risk Management Department uses a service called EBIX to manage our insurance certificate tracking.

How It Works

- The vendor's contact information is entered into EBIX. EBIX will contact the vendor to request proof of insurance.
- The Vendor can forward the request to their Insurance Agent(s) if necessary.
- Vendor/Insurance Agent submits insurance to EBIX by email to roseville@ebix.com or by fax to (770) 325-5727. After faxing or emailing the certificate, please **DO NOT** send the certificate by mail to EBIX. Please do not mail, email or fax any certificates to the City of Roseville.
- Once submitted, EBIX reviews the insurance documentation. If there are deficiencies, EBIX will send a follow up letter or email requesting additional information.

Questions Regarding Insurance Submission: Contact EBIX at (951) 652-4239
Questions Regarding Insurance Requirements Contact Risk Management at (916) 774-5202

Asbestos-Containing Materials in City-Owned Buildings

California Health and Safety Code Section 25915 requires that all City of Roseville employees, contractors and lessees be notified annually of the presence of asbestos in City-owned buildings constructed prior to 1979. Please post this notice in an area(s) accessible to all employees, contractors and lessees. Contact Facility Maintenance & Operations at (916) 774-5740 for more information about Asbestos Containing Materials (ACMs) in specific City-owned buildings. For more information about asbestos refer to the OSHA website.

The City of Roseville is committed to maintaining a safe and healthy work environment. The City's Facility Maintenance & Operations staff conducts ongoing inspections to identify and safely manage previously installed asbestos-containing products. Renovation of City-owned buildings **MUST** be reviewed in advance by Facility Maintenance & Operations to ensure the City is in compliance with building codes, Americans with Disabilities Act and that no ACMs are disturbed without proper safeguards. Work that requires removal or repair of ACMs is restricted to trained and qualified persons only. **Facility Maintenance & Operations will need to approve the qualified contractors**.

Use the following measures to protect you and others from exposure to airborne asbestos:

- Presume all building materials contain asbestos until determined otherwise by Facility Maintenance & Operations.
- Do not install walls, closets, cabinets, ceilings.
- Do not remove, cut, drill, sand, grind or otherwise disturb any material in the buildings, including carpet and tile.
- Do not paint (this includes any walls, ceilings, floors and electrostatic painting of office furniture).
- Do not remove any items nailed or screwed to the walls (this includes pictures, cabinets, electrical, etc.).
- Do not go above ceilings, behind walls or into building spaces such as attics and crawlspaces unless these areas have been inspected and cleared by Facility Maintenance & Operations.
- Do not pull cable or wiring through above-ceiling spaces with asbestos.
- Do not install screws, pins, nails or hangers into asbestos ceiling or wall plaster.
- Be careful not to damage walls, ceilings or floors when moving furniture or equipment. It is recommended that Facility Maintenance & Operations be contacted prior to moving furniture or equipment.
- Do not brush, sweep or vacuum textured asbestos ceiling plaster or plaster debris.
- Immediately report any damage or deterioration of suspect building materials to Facility Maintenance & Operations or Risk Management.

It is important to note that the presence of asbestos does not mean you have been exposed. Exposure results when friable asbestos particles are inhaled or ingested. Asbestos becomes friable when material containing asbestos is drilled, sanded or disturbed by remodeling or demolition work or when the ACM has deteriorated. Intact, bonded, sealed or undisturbed asbestos does not pose a hazard.

Employees may review the asbestos survey reports, results of bulk sampling or air monitoring conducted in City-owned buildings. All asbestos data will be available by appointment with Facility Maintenance & Operations.

COUNCIL COMMUNICATION

CC #: 9871
File #: 0600

Title: Performance Management Software - Sole Source Service Agreement
Contact: Hedy Dehghan 916-774-5205 hdehghan@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.3.

RECOMMENDATION TO COUNCIL

Staff recommends City Council adopt a resolution authorizing the City Manager to execute a Sole Source Service Agreement for a one year agreement with Cornerstone OnDemand for performance management software.

BACKGROUND

In 2015, staff went through a competitive Request for Proposal (RFP) process to identify a software replacement for the City's performance management process. In response to the RFP, the City received four responses and Cornerstone OnDemand was chosen as the vendor. Performance management is a critical component of effective supervision in giving performance feedback to City employees. It also supports advancement of compensation from one salary step to a higher salary step within the same range based on satisfactory performance. The Cornerstone OnDemand system is currently used by about 250 managers and supervisors to review approximately 1,100 employees. Given that performance evaluations take place on a regular basis and Cornerstone maintains all current and past employee evaluations and annual goals, they are the only vendor the City can use to maintain continuity for all employees/evaluations through a Sole Source Service Agreement for a period of one year.

FISCAL IMPACT

The proposed agreement is for a one year term with a product subscription cost of $33,650.00 as budgeted in the FY2018/19 budget.

ECONOMIC DEVELOPMENT / JOBS CREATED

No new jobs will be created by this action.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical changes in the environment (CEQA Guidelines §15061(B)(3)). Entering into a service agreement for performance management software does not include the potential for a significant environmental effect, and therefore is not subject to CEQA.

Respectfully Submitted,

Hedy Dehghan, Assistant Human Resources Director

Stacey Peterson, Human Resources Director

Dominick Casey, City Manager
CITY OF ROSEVILLE, A MUNICIPAL CORPORATION

1. To the fullest extent allowed by law, Consultant agrees to indemnify, including the cost to defend City, and its officers, agents, employees and volunteers from any and all claims, demands, costs or liability that arise out of, or pertain to, or relate to the negligence, recklessness, or willful misconduct of Consultant and its agents in the performance of services under this Agreement, but this indemnity does not apply to liability for damages for death or bodily injury to persons, injury to property, or other loss, arising from the sole negligence, willful misconduct or defects in design by City or the agents, servants, or independent contractors who are directly responsible to City, or arising from the active negligence of City. Consultant's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

2. Consultant is an independent contractor, and shall not be considered an officer, agent or employee of the City.

3. Without the written consent of the City, this Agreement is not assignable by Consultant either in whole or in part.

4. Time is of the essence of this Agreement where so expressly stated.

5. This Agreement may only be amended or modified in writing. It is integrated and contains the complete understanding of the parties.

6. All equipment, supplies and services sold to the City of Roseville shall conform to the general safety orders of the State of California to which the equipment, supplies and/or Services are subject.

7. Unless notified to the contrary, in writing, the City assumes that the Consultant has accepted the work in accordance with the plans and specifications (if any) and agrees to do the work in compliance with this Agreement.

8. All prevailing wages and fair employment practices must be adhered to. For prevailing wage contracts over $25,000, copies of certified payroll must be submitted with invoices. Prevailing wage rates may be obtained from the State Department of Industrial Relations and/or the following website address: http://www.dir.ca.gov/dlsr/DPreWageDetermination.htm.

9a. Unless otherwise specified, the Consultant shall maintain the policies of insurance outlined in Attachment A, incorporated herein by this reference, in full force and effect during the term of this Agreement.

9b. Form. Upon request, Consultant shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

9c. Additional Insureds. Consultant shall also provide a separate endorsement or section of the policy showing City, its officers, agents, employees, and volunteers as additional insureds for CGL policy only. Such insurance shall specifically cover the contractual liability of Consultant. The additional insured coverage under the Consultant's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from City's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office ("ISO") CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

9d. Cancellation/Modification. Consultant shall provide ten (10) days written notice to City prior to cancellation or material, negative modification of any insurance required by this Agreement.

9e. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such

coverage shall also apply on a primary and noncontributory basis for the benefit of City (if agreed to in a written contract) before City's own insurance shall be called upon to protect it as a named insured.

9f. Subcontractors. Consultant agrees to include in its contracts with all subcontractors substantially similar requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subcontractor's work. Furthermore, Consultant shall require its subcontractors to agree to be bound to Consultant and City in the same manner and to the same extent as Consultant is bound to City under this Agreement. Additionally, Consultant shall obligate its subcontractors to comply with these same provisions with respect to any tertiary subcontractor, regardless of tier. A copy of City's indemnity and insurance provisions will be furnished to the subcontractor or tertiary subcontractor upon request.

9g. Self-Insured Retentions. All self-insured retentions ("SIR") must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

9h. Waiver of Subrogation. Consultant hereby agrees to waive subrogation which any insurer of Consultant may acquire from Consultant by virtue of the payment of any loss under a Workers Compensation, Commercial General Liability or Automobile Liability policy. All Workers Compensation, Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of City, its officers, agents, employees and volunteers for all worked performed by Consultant, its employees, agents and subcontractors.

9i. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve Consultant of liability in excess of such coverage, nor shall it preclude City from taking such other actions as are available to it under any other provisions of this Agreement or law.

10. Consultant shall comply with all federal, state, local laws and ordinances as may be applicable to the performance of services under this Agreement. Failure to comply with local ordinances may result in monetary fines and cancellation of this Agreement.

11. In the event that the terms of any attachment or exhibit conflict with any terms of this Service Agreement, the terms of this Service Agreement shall control.

12. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. In the event that any signature is delivered by facsimile transmission or by e-mail delivery of a ".pdf" format data file, such signature shall create a valid and binding obligation of the party executing (or on whose behalf such signature is executed) with the same force and effect as if such facsimile or ".pdf" signature page were an original thereof.

13. If either party commences any legal action against the other party arising out of this Agreement or the performance thereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorneys' fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.

14. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.

15. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

16. For purposes of this Agreement, the terms "Contractor" and "Consultant" are used interchangeably.

17. Consultant agrees that any and all information furnished by City, including "Client Data" as defined by Section 1(d) of the Cornerstone OnDemand- Master Agreement, shall be deemed proprietary to City and confidential. All such

information, including "Client Data" as defined by Section 1(d) of the Cornerstone OnDemand- Master Agreement, to the extent previously, presently or subsequently disclosed to Consultant and/or processed and derived by Consultant services is the property of City and such property shall be deemed and treated as "Confidential Information" of City. Consultant acknowledges that such Confidential Information may contain information provided and/or generated by third-parties. Consultant agrees that such Confidential Information shall not be disclosed to any third party without written permission from City, except as required by law. Consultant shall not use the Confidential Information except to perform Consultant's services as directed by City.

18. All facilities, devices, networks and services used to store, deliver, process, backup or purge Confidential Information will employ administrative, physical, technical, and procedural safeguards and best practices at a level sufficient to secure Confidential Information from unauthorized access, destruction, use, modification, or disclosure. Such measures will be no less protective than those used to secure Consultant's own information of a similar type, and in no event less than reasonable in view of the type and nature of the information involved. It is the City's expectation that Consultant, at its own expense, shall perform annual audits for any data centers that house Confidential Information, using an independent third-party audit that meets industry standards applicable to the services under this Agreement, and provide the audit report or certification upon request to City.

19. Consultant will retain Confidential Information until deleted by City or City-authorized third party, or for a time period in accordance with Section 6.c) of the Cornerstone OnDemand- Master Agreement.

20. Consultant shall report to City any data compromise or unauthorized access to Confidential Information within twenty-four (24) hours after Consultant discovers such data compromise or unauthorized access. Consultant will take commercially reasonable measures to address any such data compromise or unauthorized access in a timely manner. Except as otherwise required by law, Consultant will not provide notice to end users or other entities of any such data compromise or unauthorized access without written permission from City.

21. Consultant may not advertise that City is a client, list City as a reference or otherwise use City's name, logos, trademarks, or service marks without prior written permission from City.

22. Consultant acknowledges that services rendered under this Agreement (including but not limited to service levels and operational levels) shall be performed in accordance with industry standards.

23. If the project referenced on this service agreement is a Public Works project, then the following shall apply: No contractor or subcontractor may work on a public works project unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. During the performance of this agreement, Contractor and its subcontractors shall have a continuing legal obligation to maintain current registration with the Department of Industrial Relations. Contractor is hereby notified that this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

24. If the project referenced on this service agreement is a Public Works project, then the following shall apply: Contractor must submit all claims as defined in and in accordance with the claim resolution process set forth in Section 9204 of the Public Contract Code. Each such claim must be sent to the City by registered mail or certified mail with return receipt requested and must contain reasonable documentation to support the claim. All claims must be received prior to acceptance of the work.

City reserves the right to withhold any payments to Consultant in the event of noncompliance with insurance requirements or if required by law.

Cornerstone OnDemand – Master Agreement
MASTER TERMS AND CONDITIONS

These Master Terms and Conditions are made a part of and incorporated by reference into the Cornerstone OnDemand – Master Agreement by and between Client and Cornerstone OnDemand ("**Cornerstone**") (the "**Agreement**").

1. Definitions.
   a) "**Active User**" means, in a given calendar month, a user established on the Software with a designation of "active" at any time during that month. Client determines who is an Active User, subject to the maximum quantities set forth in the respective Order(s).
   b) "**Affiliate**" means a party that partially (at least 50%) or fully controls, is partially or fully controlled by, or is under partial (at least 50%) or full common control with, another party.
   c) "**Client Content**" means any and all courses, learning objects, certifications, quizzes, tests, materials, instructor-led sessions, documents, or URLs created and/or introduced by Client or its Affiliates that reside in the Software.
   d) "**Client Data**" means proprietary or personal data supplied by Client or regarding any of its users which is input and/or uploaded to the Software pursuant to this Agreement.
   e) "**Confidential Information**" means any non-public information of Cornerstone or Client disclosed by either party to the other party, either directly or indirectly, in writing, orally or by inspection of tangible objects, or to which the other party may have access, which a reasonable person would consider confidential and/or which is marked "confidential" or "proprietary" or some similar designation by the disclosing party. Confidential Information shall not, however, include the existence of the Agreement or any information which the recipient can establish: (i) was or has become generally known or available or is part of the public domain without direct or indirect fault, action, or omission of the recipient; (ii) was known by the recipient prior to the time of disclosure, according to the recipient's prior written documentation; (iii) was received by the recipient from a source other than the discloser, rightfully having possession of and the right to disclose such information; or (iv) was independently developed by the recipient, where such independent development has been documented by the recipient.
   f) "**Order**" means a purchase made by Client hereunder in a schedule, statement of work, addendum, or amendment signed by both parties.
   g) "**Service**" means any service rendered by Cornerstone specifically to Client, including, but not limited to: (i) hosting and making available the Software; (ii) hosting, delivery, and/or distribution of eLearning content; and/or (iii) provision of customer and/or technical support for the Software.
   h) "**Software**" means: (i) any and all of Cornerstone's proprietary web-based applications, including, without limitation, all updates, revisions, bug-fixes, upgrades, and enhancements thereto, as well as applications that have been modified in any way by Cornerstone at the request of a client; and (ii) application functionality and eLearning content provided by Cornerstone-contracted third parties.
   i) "**Third Party**" means any party that is not either of the parties, its Affiliates, employees, shareholders, directors, officers, contractors, customers, or Active Users.
2. Rights; Usage. In accordance with the terms and conditions of the Agreement, Cornerstone gives Client the non-transferable and non-assignable right for the duration of applicable Orders to use, and to permit its Active Users, Affiliates, and each of their Active Users to use, the Software items listed therein on a non-exclusive basis via the Internet. Cornerstone will (i) according to ISO27001 (or successor/equivalent) standards, maintain appropriate safeguards for protection of Client Data, including regular back-ups, security and incident response protocols, and application and infrastructure monitoring; and (ii) not access, modify, or disclose Client Data, except as compelled by law, to prevent or address service or technical issues, or if otherwise permitted by Client. To meet its disaster recovery commitments, Cornerstone maintains a backup copy of Client Data for approximately six (6) months following expiration or termination of the Agreement, after which time all backups are destroyed.
3. Restrictions. The Software may be used only for Client's and its Affiliates' own lawful business purposes. Client shall not: (i) use or deploy the Software in violation of applicable laws or this Agreement; (ii) resell any Software or Service except through Extended Enterprise transactions/registrations; (iii) create any derivative works based upon the Software; (iv) reverse engineer, reverse assemble, decompile or otherwise attempt to derive source code from the Software or any part thereof (except to the extent that such restriction is not permitted under applicable law); (v) make any Software or Service available to any unauthorized parties; or (vi) release the results of benchmark tests or other comparisons of any Software or Service with other software, services, or materials. Client will be responsible for Active Users' compliance with the Agreement and liable for Active Users' breach thereof. Client will ensure that it has obtained all necessary consents and approvals for Cornerstone to access Client Data for the purposes permitted under this Agreement.
4. Support. Cornerstone shall provide the level of technical support stated in the applicable Order. Only the number of administrators set forth in the applicable support package description (i.e., not all Active Users) who have completed the requisite training may contact Cornerstone for support. Client agrees to promptly provide Cornerstone with sufficient documentation, data and assistance with respect to any reported errors, and to reasonably cooperate with Cornerstone, in order for Cornerstone to comply with its support obligations hereunder. In no event shall Cornerstone be responsible or liable for any errors, bugs or other problems contained in or originating from hardware or software not provided by Cornerstone. Should unexpected or inappropriate use of the Software result in denial of service (DoS) with respect to the Software, Cornerstone may disable the implicated Client Content and/or deny access to Client's portal only if and for so long as necessary to restore service.
5. Fees and Payment. Client will be invoiced for fees according to the applicable Order. Payment of fees will be due upon receipt, except where an Order expressly prescribes other payment dates. Except where otherwise stated, all fees set forth in an Order are in U.S. dollars and must be paid in the currency set forth in the Order. Late payments hereunder will incur a late charge of 1.5% (or the highest rate allowable by law, whichever is lower) per month on the outstanding balance from the date due until the date of actual payment. In addition, following notice and a reasonable time to cure, Services are subject to suspension for failure to timely remit payment therefor.
6. Term and Termination.
   a) Term. The term of this Agreement is one (1) year from the Effective Date.
   b) Termination for Cause. Either party may immediately terminate this Agreement if the other party materially breaches the Agreement, and, where capable of remedy, such breach has not been materially cured within thirty (30) days of the breaching party's receipt of written notice describing the breach in reasonable detail.
   c) Termination for Lack of Appropriation. In the event that Client's City Council fails to appropriate funds payable under this Agreement, then Client will have the option to, upon ten (10) days' prior written notice to Cornerstone, terminate the Agreement at the end of the contract year (as set forth in the Order) in which the

budgetary decision was made. Termination shall not be effective unless Client pays Cornerstone all fees due and owing through the termination date.

d) Bankruptcy Events. A party may immediately terminate this Agreement if the other party: (i) has a receiver appointed over it or over any part of its undertakings or assets; (ii) passes a resolution for winding up (other than for a bona fide scheme of solvent amalgamation or reconstruction), or a court of competent jurisdiction makes an order to that effect and such order is not discharged or stayed within ninety (90) days; or (iii) makes a general assignment for the benefit of its creditors.

e) Effect of Termination or Expiration. Immediately following termination or expiration of this Agreement, Client shall cease using all Software and Services. Client may retrieve Client Data any time prior to, or upon, termination or expiration of the Agreement. If requested, Cornerstone will assist with such data retrieval at a scope and price to be agreed.

7. Confidentiality. Each of the parties agrees: (i) not to disclose any Confidential Information to any third parties except as mandated by law and except to those Affiliates and subcontractors of Cornerstone providing Services hereunder who agree to be bound by confidentiality obligations no less stringent than those set forth in this Agreement; (ii) not to use any Confidential Information for any purposes except carrying out such party's rights and responsibilities under this Agreement; and (iii) to keep the Confidential Information confidential using the same degree of care such party uses to protect its own confidential information; provided, however, that such party shall use at least reasonable care. These obligations shall survive termination of this Agreement. If either party breaches any of its obligations with respect to confidentiality or the unauthorized use of Confidential Information hereunder, the other party shall be entitled to seek equitable relief to protect its interest therein, including but not limited to, injunctive relief, as well as money damages. This section shall not apply to any disclosure that is required by law.

8. Intellectual Property. As between the parties, Cornerstone will and does retain all proprietary and intellectual property rights, title and interest in and to the Software and Services. Client retains all proprietary and intellectual property rights, title and interest in and to Client Data and Client Content.

9. Indemnification.

a) Indemnification by Cornerstone. Cornerstone agrees to indemnify, defend, and hold harmless Client from and against any and all Third Party claims and causes of action, as well as related losses, liabilities, judgments, awards, settlements, damages, expenses and costs (including reasonable attorney's fees and related court costs and expenses) (collectively, "Damages") incurred or suffered by Client which directly relate to or directly arise out of the violation or infringement of any third-party intellectual property rights by Client's authorized use of the Software. The foregoing provisions of this section shall not apply to the extent the Damages relate to or arise out of: (i) Client Data; (ii) Client Content; or (iii) unauthorized use and/or alteration of the Software by Client and/or its users.

b) Indemnification by Client. Client agrees to indemnify, defend, and hold harmless Cornerstone from and against any and all Damages incurred or suffered by Cornerstone which directly relate to or directly arise out of the violation or infringement of any third-party intellectual property rights by Client Data or Client Content. The foregoing provisions of this section shall not be applicable to the extent the Damages relate to or arise from Cornerstone's use of Client Data or Client Content in violation of this Agreement.

c) Indemnification Procedures. To obtain indemnification, indemnitee shall: (i) give written notice of any claim promptly to indemnitor; (ii) give indemnitor, at indemnitor's option, sole control of the defense and settlement of such claim, provided that indemnitor may not, without the prior consent of indemnitee (not to be unreasonably withheld), settle any claim unless it unconditionally releases indemnitee of all liability; (iii) provide to indemnitor all available information and assistance; and (iv) not take any action that might compromise or settle such claim.

d) Infringement Cures. Should the Software or any part thereof become, or in Cornerstone's reasonable opinion be likely to become, the subject of a claim for infringement of a third party intellectual property right, then Cornerstone may, at its sole option and expense: (i) procure for Client the right to use and access the infringing or potentially infringing item(s) of the Software free of any liability for infringement; or (ii) replace or modify the infringing or potentially infringing item(s) of the Software with a non-infringing substitute otherwise materially complying with the functionality of the replaced system.

e) Exclusive Remedies. The remedies set forth in this section shall be exclusive with respect to any infringement claim hereunder.

10. Warranties. Each party represents and warrants to the other party that, as of the date hereof: (i) it has full power and authority to execute and deliver the Agreement; (ii) the Agreement has been duly authorized and executed by an appropriate employee of such party; (iii) the Agreement is a legally valid and binding obligation of such party; and (iv) its execution, delivery and/or performance of the Agreement does not conflict with any agreement, understanding or document to which it is a party. CORNERSTONE WARRANTS THAT THE SOFTWARE WILL PERFORM SUBSTANTIALLY IN MATERIAL ACCORDANCE WITH THE AGREEMENT AND APPLICABLE DOCUMENTATION REGARDING EXISTING FUNCTIONALITY PROVIDED BY CORNERSTONE; NO NEW OR DIFFERENT FUNCTIONALITY IS PROMISED HEREUNDER. TO THE EXTENT PERMITTED BY APPLICABLE LAW, CORNERSTONE DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, STATUTORY OR OTHERWISE, INCLUDING WITHOUT LIMITATION WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND ANY WARRANTIES ARISING FROM A COURSE OF DEALING, USAGE OR TRADE PRACTICE.

11. Liability.

a) Liability Cap. EXCEPT FOR (i) A PARTY'S INTELLECTUAL PROPERTY INDEMNIFICATION OBLIGATIONS; (ii) A PARTY'S WILLFUL MISCONDUCT; OR (iii) LIABILITY WHICH CANNOT BE LIMITED BY APPLICABLE LAW, EACH PARTY'S MAXIMUM AGGREGATE LIABILITY ARISING OUT OF OR RELATING TO THIS AGREEMENT, REGARDLESS OF THE THEORY OF LIABILITY, WILL BE LIMITED TO TWO TIMES (2X) THE TOTAL FEES PAID OR PAYABLE BY CLIENT TO CORNERSTONE HEREUNDER FOR THE TWELVE-MONTH PERIOD IMMEDIATELY PRECEDING THE DATE THE CAUSE OF ACTION AROSE. THE EXISTENCE OF MORE THAN ONE CLAIM SHALL NOT EXPAND SUCH LIMIT. THE PARTIES ACKNOWLEDGE THAT THE FEES AGREED UPON BETWEEN CLIENT AND CORNERSTONE ARE BASED IN PART ON THESE LIMITATIONS, AND THAT THESE LIMITATIONS WILL APPLY NOTWITHSTANDING ANY FAILURE OF ANY ESSENTIAL PURPOSE OF ANY LIMITED REMEDY. THE FOREGOING LIMITATION SHALL NOT APPLY TO A PARTY'S PAYMENT OBLIGATIONS UNDER THE AGREEMENT.

b) Exclusion of Consequential Damages. NEITHER PARTY WILL BE LIABLE FOR LOST PROFITS, LOST REVENUE, LOST BUSINESS OPPORTUNITIES, INTERRUPTION OF BUSINESS, PROVIDING REPLACEMENT SOFTWARE (EXCEPT AS SET FORTH IN SECTION "INFRINGEMENT CURES"), OR ANY OTHER INDIRECT, SPECIAL, PUNITIVE, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF OR RELATING TO THIS AGREEMENT, REGARDLESS OF THE THEORY OF LIABILITY, EVEN IF IT HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

12. Communications. Neither party shall issue any press release using the name of the other party as a customer or provider without the other party's consent.

13. Miscellaneous Provisions.

a) Governing Law; Jurisdiction. This Agreement will be governed by and construed in accordance with the laws of the State of California and the federal laws of the United States of America, without regard to conflict of law principles. Cornerstone and Client agree that any suit, action or proceeding arising out of, or with respect to, this Agreement or any judgment entered by any court in respect thereof shall be brought exclusively in the state or federal courts of the State of California located in the County of Placer, and each of Cornerstone and Client hereby irrevocably accepts the exclusive personal jurisdiction and venue of those courts for the purpose of any suit, action or proceeding.

b) Force Majeure. Neither party will be liable for any failure or delay in its performance under this Agreement due to any cause beyond its reasonable control, including without limitation acts of war, acts of God, earthquake, flood, weather conditions, embargo, riot, epidemic, acts of terrorism, sabotage, governmental act, failure of the Internet or other acts beyond such party's reasonable control, provided that the delayed party: (i) gives the other party prompt notice of such cause; and (ii) uses reasonable commercial efforts to correct promptly such failure or delay in performance.

c) Counterparts; Facsimile. The Agreement and Orders may be executed in any number of counterparts and in facsimile or electronically, each of which shall be an original but all of which together shall constitute one and the same instrument.

d) Entire Agreement. This Agreement contains the entire understanding of the parties in respect of its subject matter and supersedes all prior agreements and understandings (oral or written) between the parties with respect to such subject matter. Orders and the schedules and exhibits hereto constitute a part hereof as though set forth in full herein. To the extent Client issues any purchase orders to Cornerstone, then, such purchase orders submitted by Client are for Client's internal administrative purposes only, and the terms and conditions contained in those purchase orders will have no force and effect. Any modification, amendment, or addendum to this Agreement must be in writing and signed by both parties.

e) Assignment. Neither party may assign this Agreement or any of its rights, obligations, or benefits hereunder, by operation of law or otherwise, without the other party's prior written consent; provided, however, either party, without the consent of the other party, may assign this Agreement to an Affiliate or to a successor (whether direct or indirect, by operation of law, and/or by way of purchase, merger, consolidation or otherwise) to all or substantially all of the business or assets of such party, where the responsibilities or obligations of the other party are not increased by such assignment and the rights and remedies available to the other party are not adversely affected by such assignment. Subject to that restriction, this Agreement will be binding on, inure to the benefit of, and be enforceable against the parties and their respective successors and permitted assigns.

f) No Third Party Beneficiaries. The representations, warranties and other terms contained herein are for the sole benefit of the parties hereto and their respective successors and permitted assigns, and shall not be construed as conferring any rights on any other persons.

g) Statistical Data. Without limiting the confidentiality rights and intellectual property rights protections set forth in this Agreement, Cornerstone has the perpetual right to use aggregated, anonymized, and statistical data ("Statistical Data") derived from the operation of the Software, and nothing herein shall be construed as prohibiting Cornerstone from utilizing the Statistical Data for business and/or operating purposes, provided that Cornerstone does not share with any third party Statistical Data which reveals the identity of Client, Client's users, or Client's Confidential Information.

h) Suggestions. Cornerstone shall have a royalty-free, worldwide, perpetual license to use or incorporate into the Software and Services any suggestions, ideas, enhancement requests, feedback, recommendations, or other information provided by Client or its users relating to the operation of the Software and Services.

i) Third-Party Applications and Service Providers.
   i) External Applications. The Software may contain features capable of interoperating with third-party applications not offered by Cornerstone ("External Applications"). To use such features, Client may be required to obtain access to such applications from a third-party provider. Cornerstone shall not be responsible for Client's access to, or operation of, External Applications.
   ii) Embedded Applications. Cornerstone may offer or sell certain third-party applications embedded within the Software, which meet security, privacy, and/or support standards that differ from those set forth in the Agreement ("Embedded Applications"). Use of Embedded Applications is optional, and Client may deactivate Embedded Applications in its Software portal at any time. A list of Embedded Applications, including information relevant thereto, is available upon request.
   iii) Service Providers. Cornerstone offers a certification program to certify third-party service providers that implement, configure, and/or administer Software ("Certified Consultants"). A list of Certified Consultants is available upon request. Client may not permit any non-Certified Consultant to implement, configure, and/or administer Software. None of the warranties or support obligations hereunder shall apply to any Software implemented, configured, or administered by any non-Certified Consultant.

j) Export Controls. Client understands that use of the Software and Services is subject to U.S. export controls and trade and economic sanctions laws and agrees to comply with all such applicable laws and regulations, including without limitation the Export Administration Regulations maintained by the U.S. Department of Commerce, and the trade and economic sanctions maintained by the Treasury Department's Office of Foreign Assets Control.

k) Rule 10b-5 Limitations. Each party acknowledges that United States securities laws prohibit any person who has material, non-public information about a publicly-traded company from purchasing or selling securities of such company, or from communicating such information to any other person under circumstances in which it is reasonably foreseeable that such person is likely to purchase or sell securities of such company.

l) Severability. If any provision of this Agreement is held by a court or arbitrator of competent jurisdiction to be contrary to law, such provision shall be changed by the court or by the arbitrator and interpreted so as to best accomplish the objectives of the original provision to the fullest extent allowed by law, and the remaining provisions of this Agreement shall remain in full force and effect.

m) Notices. Any notice or communication required or permitted to be given hereunder may be delivered by hand, deposited with an overnight courier, sent by facsimile, or mailed by registered or certified mail, return receipt requested and postage prepaid to the address for the other party first written above or at such other address as may hereafter be furnished in writing by either party hereto to the other party. Such notice will be deemed to have been given as of the date it is delivered, if by personal delivery; the next business day, if deposited with an overnight courier; upon receipt of confirmation of facsimile delivery (if followed up by such registered or certified mail); and five days after being so mailed.

n) Independent Contractors. Client and Cornerstone are independent contractors, and nothing in this Agreement shall create any partnership, joint venture, agency, franchise, sales representative or employment relationship between Client and Cornerstone. Each party understands that it does not have authority to make or accept any offers or make any representations on behalf of the other. Neither party may make any statement that would contradict anything in this section.

o) Waiver. No failure or delay on the part of either party in exercising any right, power or remedy under this Agreement shall operate as a waiver, nor shall any single or partial exercise of any such right, power or remedy preclude any other or further exercise or the exercise of any other right, power or remedy.

p) Survival. Sections of the Agreement intended by their nature and content to survive termination of the Agreement shall so survive.

Insurance Submission Process

The City of Roseville Human Resources/Risk Management Department uses a service called EBIX to manage our insurance certificate tracking.

How It Works

- The vendor's contact information is entered into EBIX. EBIX will contact the vendor to request proof of insurance.
- The Vendor can forward the request to their Insurance Agent(s) if necessary.
- Vendor/Insurance Agent submits insurance to EBIX by email to roseville@ebix.com or by fax to (770) 325-5727. After faxing or emailing the certificate, please **DO NOT** send the certificate by mail to EBIX. Please do not mail, email or fax any certificates to the City of Roseville.
- Once submitted, EBIX reviews the insurance documentation. If there are deficiencies, EBIX will send a follow up letter or email requesting additional information.

Questions Regarding Insurance Submission: Contact EBIX at (951) 652-4239

Title:	Residential New Construction Energy Efficiency Program Development - Service Agreement
Contact:	Mark A. Riffey 916-746-1667 mriffey@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.4.

RECOMMENDATION TO COUNCIL

Recommend Council adopt a resolution authorizing the City Manager to execute a service agreement with TRC Solutions, Inc. (TRC) to implement and administer Roseville Electric Utility's residential new construction energy efficiency program for new construction home builders.

BACKGROUND

Roseville Electric Utility is required under state law to administer public benefit programs to encourage energy efficiency, in excess of what is required by California's energy building code (Title 24). As part of the utility's public benefit offerings, residential home builders are offered incentives for new construction projects. Ongoing changes to Title 24 require California's residential buildings to be more energy efficient. As building standards become more stringent, it is becoming increasingly difficult to achieve additional energy efficiency savings.

Roseville Electric Utility regularly updates its residential new construction energy efficiency program to account for the new Title 24 requirements. As part of this process, Roseville Electric Utility reviewed the residential new construction programs offered by Sacramento Municipal Utility District (SMUD) and Pacific Gas and Electric Company (PG&E). Both of these neighboring utilities have historically had high volume residential new construction programs which have been successfully modified to meet new Title 24 standards. Both of these utilities use a third party, TRC, to develop and administer their residential new construction energy efficiency programs. TRC developed a common framework, a rebate calculator and the reporting structure for SMUD and PG&E's residential new construction programs. These programs serve the same set of regional builders as Roseville, and TRC is the only vendor familiar with them.

Under the scope of the proposed agreement, TRC will work with Roseville staff to design, develop, and market new construction energy efficiency programs that exceed Title 24 standards. TRC will also administer the program, process incentive requests, and verify energy and greenhouse gas savings for regulatory reporting.

In order to provide continuity across energy efficiency programs offered by the Sacramento region's electric utilities and increase overall program participation, staff recommends executing a sole source professional services agreement with TRC.

FISCAL IMPACT

The total contract value of this agreement will not exceed $900,000.00. The term of the agreement begins in FY2018-19 and extends through FY2020-21. Funds for the first year of the agreement in the amount of $200,000.00 are available in the FY2018-19 Electric public benefit budget. Future funding is pending Council approval of the FY2019-20 ($350,000.00) and FY2020-21 ($350,000.00) budgets.

ECONOMIC DEVELOPMENT / JOBS CREATED

Not applicable.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment (CEQA Guidelines §15061(b)(3)). This service agreement does not include the potential for a significant environmental effect, and therefore is not subject to CEQA.

Respectfully Submitted,

Mark A. Riffey, Sr. Energy Services Account Representative

Michelle Bertolino, Electric Utility Director

Dominick Casey, City Manager
CITY OF ROSEVILLE, A MUNICIPAL CORPORATION

1. To the fullest extent allowed by law, Consultant agrees to indemnify, including the cost to defend City, and its officers, employees and volunteers from any and all claims, demands, costs or liability that arise out of, or pertain to, or relate to the negligence, recklessness, or willful misconduct of Consultant and its agents in the performance of services under this contract, but this Consultant's indemnity obligation does not apply to liability for damages for death or bodily injury to persons, injury to property, or other loss, arising from the active negligence, willful misconduct or defects in design by City or the agents, servants, or independent contractors who are directly responsible to City, or arising from the active negligence of City. Consultant's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.
2. Consultant is an independent contractor, and shall not be considered an officer, agent or employee of the City.
3. Without the written consent of the City, this Agreement is not assignable by Consultant either in whole or in part.
4. Time is an important consideration of this Agreement.
5. At any time during the term of this Agreement, the City has the right to terminate this Agreement, provided Consultant is given thirty (30) days' written notice. City's termination shall be without further liability to City, however Consultant shall be entitled to all costs reasonably incurred prior to the date of termination. Consultant acknowledges that City may terminate this Agreement should funds not be appropriated by its governing body to continue services under this Agreement.
6. This Agreement may only be amended or modified in writing. It is integrated and contains the complete understanding of the parties.
7. All equipment, supplies and services sold to the City of Roseville shall conform to the general safety orders of the State of California.
8. Unless notified to the contrary, in writing, the City assumes that the Consultant has accepted the work in accordance with the plans and specifications (if any) and agrees to do the work in compliance with this Agreement.
9. All fair employment practices must be adhered to.

10a. Unless otherwise specified, the Consultant shall maintain the policies of insurance outlined in Attachment A, incorporated herein by this reference, in full force and effect during the term of this Agreement. The City of Roseville retains sole discretion in determining the types and proper levels of insurance coverage.

10b. Form. Consultant shall submit a certificate evidencing such coverage for the period covered by this Agreement in a form satisfactory to Risk Management and the City Attorney, prior to undertaking any work hereunder. Any insurance written on a claims made basis is subject to the approval of Risk Management and the City Attorney.

10c. Additional Insureds. Consultant shall also provide a separate endorsement or section of the policy showing City, its officers, agents, employees, and volunteers as additional insureds for each type of coverage, except for Workers' Compensation and Professional Liability. Such insurance shall specifically cover the contractual liability of Consultant. The additional insured coverage under the Consultant's policy shall be primary and noncontributory, as evidenced by a separate endorsement or section of the policy, and shall not seek contribution from City's insurance or self-insurance. In addition, the additional insured coverage shall be at least as broad as the Insurance Services Office ("ISO") CG 20 01 Endorsement. Any available insurance proceeds in excess of the specified minimum insurance coverage requirements and limits shall be available to the additional insureds. Furthermore, the requirements for coverage and limits shall be: (1) the minimum coverage and limits specified in this Agreement; or (2) the full coverage and maximum limits of any insurance proceeds available to the named insureds, whichever is greater.

10d. Cancellation/Modification. Consultant shall provide ten (10) days written notice to City prior to cancellation of any insurance required by this Agreement.

10e. Umbrella/Excess Insurance. The limits of insurance required in this Agreement may be satisfied by a combination of primary and excess insurance. Any excess insurance shall contain or be endorsed to contain a provision that such coverage shall also apply on a primary and noncontributory basis for the benefit of City (if agreed to in a written contract) before City's own insurance shall be called upon to protect it as a named insured.

10f. Subconsultants. Consultant agrees to include in its contracts with all subconsultants the same requirements and provisions of this Agreement, including the indemnity and insurance requirements, to the extent they apply to the scope of the subconsultant's work. Furthermore, Consultant shall require its subconsultants to agree to be bound to Consultant and City in the same manner and to the same extent as Consultant is bound to City under this Agreement. Additionally, Consultant shall obligate its subconsultants to comply with these same provisions with respect to any tertiary subconsultant, regardless of tier. A copy of City's indemnity and insurance provisions will be furnished to the subconsultant or tertiary subconsultant upon request.

10g. Self-Insured Retentions. All self-insured retentions ("SIR") must be disclosed to Risk Management for approval and shall not reduce the limits of liability. Policies containing any SIR provision shall provide or be endorsed to provide that the SIR may be satisfied by either the named insured or City. City reserves the right to obtain a full certified copy of any insurance policy and endorsements. The failure to exercise this right shall not constitute a waiver of such right.

10h. Waiver of Subrogation. Consultant hereby agrees to waive subrogation which any insurer of Consultant may acquire from Consultant by virtue of the payment of any loss under a Commercial General Liability or Automobile Liability policy. All Commercial General Liability and Automobile Liability policies shall be endorsed with a waiver of subrogation in favor of City, its officers, agents, employees and volunteers for all worked performed by Consultant, its employees, agents and subconsultants.

10i. Liability/Remedies. Insurance coverage in the minimum amounts set forth herein shall not be construed to relieve Consultant of liability in excess of such coverage, nor shall it preclude City from taking such other actions as are available to it under any other provisions of this Agreement or law.

11. Consultant shall comply with all federal, state and local laws and ordinances as may be applicable to the performance of services under this Agreement. Failure to comply with local ordinances may result in monetary fines and cancellation of this Agreement.
12. In the event that the terms of any attachment or exhibit conflict with any terms of this Service Agreement, the terms of this Service Agreement shall control.
13. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. In the event that any signature is delivered by facsimile transmission or by e-mail delivery of a ".pdf" format data file, such signature shall create a valid and binding obligation of the party executing (or on whose behalf such

signature is executed) with the same force and effect as if such facsimile or ".pdf" signature page were an original thereof.

14. If either party commences any legal action against the other party arising out of this Agreement or the performance thereof, the prevailing party in such action shall be entitled to recover its reasonable litigation expenses, including but not limited to, court costs, expert witness fees, discovery expenses, and attorneys' fees. Any action arising out of this Agreement shall be brought in Placer County, California, regardless of where else venue may lie. This Agreement shall be governed by and construed in accordance with the laws of the State of California.
15. This Agreement shall be binding upon the heirs, successors, executors, administrators and assigns of the respective parties hereto.
16. If any of the provisions contained in this Agreement are for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.
17. For purposes of this Agreement, the terms "Contractor" and "Consultant" are used interchangeably.
18. All tangible materials ("Material") created or delivered pursuant to this Agreement is considered a work made for hire under the Copyright Act. To the extent such Material does not qualify as a work made for hire, CONSULTANT hereby assigns to CITY all right, title, and interest, including but not limited to all copyrights, in all Material created by CONSULTANT in its performance under this Agreement. All Material furnished by CONSULTANT is, and shall remain, the property of CITY.
19. If the project referenced on this service agreement is a Public Works project, then the following shall apply: Contractor must submit all claims as defined in and in accordance with the claim resolution process set forth in Section 9204 of the Public Contract Code. Each such claim must be sent to the City by registered mail or certified mail with return receipt requested and must contain reasonable documentation to support the claim. All claims must be received prior to acceptance of the work.
20. Notwithstanding anything to the contrary in this Agreement, Consultant and City waive any and all claims against each other for incidental, consequential, special, multiple, and punitive damages arising out of or relating to this Agreement, regardless of whether such damages were foreseeable and whether or not the culpable Party was advised of the possibility of such damages. This mutual waiver includes, but is not limited to, rental expenses, loss of use, loss of production, loss of income, loss of profit (except profit arising directly from the Services), loss of financing, loss of business, and loss of reputation. This mutual waiver is applicable, without limitation, to all consequential damages due to either Party's breach or termination of the Agreement.

City reserves the right to withhold any payments to Consultant in the event of noncompliance with insurance requirements or if required by law.

Insurance Submission Process

The City of Roseville Human Resources/Risk Management Department uses a service called EBIX to manage our insurance certificate tracking.

How It Works

- The vendor's contact information is entered into EBIX. EBIX will contact the vendor to request proof of insurance.
- The Vendor can forward the request to their Insurance Agent(s) if necessary.
- Vendor/Insurance Agent submits insurance to EBIX by email to roseville@ebix.com or by fax to (770) 325-5727. After faxing or emailing the certificate, please **DO NOT** send the certificate by mail to EBIX. Please do not mail, email or fax any certificates to the City of Roseville.
- Once submitted, EBIX reviews the insurance documentation. If there are deficiencies, EBIX will send a follow up letter or email requesting additional information.

MEMORANDUM

To: Mark Riffey, Roseville Electric Utility

Cc: Sophia Hartkopf (TRC)

From: Nic Dunfee (TRC), Parul Gulati (TRC)

Re: Roseville Electric Residential New Construction Three-Year Implementation Scope

SCOPE OF WORK

TRC Solutions, Inc submits the following proposal to the Roseville Electric Utility (REU) to support REU's new construction programs for a period of three years commencing with contract execution. This scope is a continuation of TRC's implementation support provided between 2015 and 2018 for single family new construction project support.

TRC proposed to enroll 2,300 single family homes during these three years, and deliver incentives on 2,200 lots in the same time period.

Split Commodity (lots)				
	Year 1	Year 2	Year 3	*Total*
Enrollments	400	600	500	1,500
Completions	550	625	625	1,800

Figure 1. Estimated participation for split commodity single family homes

All Electric (lots)				
	Year 1	Year 2	Year 3	*Total*
Enrollments	100	350	350	800
Completions	25	75	300	400

Figure 2. Estimated participation for all-electric single family homes

TRC will continue to request incentive and process payment from REU for the remaining 828 lots previously enrolled in the split-commodity program (for incentives reserved prior to 2018).

Any lots anticipated to complete after this three year contract period are outside of the scope of this contract, however, TRC will actively monitor and report to REU on enrollments that are expected to complete after the contract period.

The figures above represent estimated program volume over the course of the program. For this reason, the total budget for this agreement may change depending on the number of lots and plans that enroll. TRC will monitor the volume of these projects and alert REU, if it appears the budget will not be met or will not suffice the tasks. TRC will update REU regularly on actual volume and will notify REU if we anticipate exceeding, or falling short of the estimated volume. New enrollments will be permitted under the 2016 or 2019 Title 24 Standards, whichever applies.

TRC proposes to support REU through the following six tasks:

1. *Project Management:* Time and materials budget for TRC to support program management tasks such as client progress meetings, ongoing reporting, data tracking, and data requests.
2. *Design Assistance and Policy Updates:* Time and materials budget for TRC to provide one-on-one technical assistance with builders and their consultants to assist qualifying single family developments with constructing energy efficient projects. TRC will also use a portion of this budget to document and communicate key program policy decisions to participants and conduct field verifications. Task will also include the all-electric and 2019 code program designs.
3. *Marketing and Recruitment:* Time and materials budget for marketing and outreach tasks. Under this task, TRC proposes development of marketing collateral, a quarterly newsletter, orientation webinar, and attendance/sponsorship at select relevant industry events such as, but not limited to, the CABEC conference, or Building Industry Association events. TRC will also use this budget for processing leads and recruiting projects.
4. *Project Review and Processing:* Fixed price payment budget to compensate TRC at enrollment (incentive reservation) and completion (incentive payment) stages of qualifying single family lots. This task includes application intake, desktop technical reviews, greenhouse gas reduction reporting, energy savings reporting and incentive request processing.

Task 1. Management

This task will support program management activities (time and materials), including:

- Reporting and invoicing to REU
- Progress and pipeline review meetings with REU
- Data tracking
- Quarterly data requests from REU
- Initial reporting set up
- Program Database Setup
- Ongoing database maintenance and quality assurance

Task 1 Budget: $172,800

Task 1 Deliverables:

- Monthly invoice with cover letter summarizing activities
- Monthly progress and pipeline reports

- Monthly teleconference call or in-person meeting with REU to discuss program progress
- Documentation to support up to one (1) data request per quarter
  - If more than one data request is requested per quarter, TRC will review budget with REU to ensure that sufficient budget remains to complete the additional data request

Task 2: Design Assistance and Policy Updates

Policy Updates

TRC will use a portion of this task budget to make minor revisions as necessary to update the program design for the split commodity program. The following are examples of policy best practices that TRC would document: approved modeling best practices for new technologies, benefits of program pre-requisites such as smart thermostats and power strips, benefits of measures such as whole house fans and balanced indoor air quality designs, to name a few.

TRC will use a part of the budget to design a new residential electrification program for REU customers and also to design a new program for the 2019 Title 24 code.

TRC will also use this budget to document and communicate these program design changes and other policy decisions to REU participants.

Design Assistance

To maximize kWh savings, TRC will work with REU's key previous builder participants, providing one-on-one targeted design assistance for up to 10 projects. This design assistance will take the form of a conversation or multiple conversations with the project team to identify and prioritize opportunities for deeper savings, such as encouraging designs that push projects towards net zero energy, designs that reduce energy use in the early evening residential peak use period, or all-electric design. This support will evaluate cost-effective strategies that reduce the development's modeled electric usage and improve their incentives. These design assistance meetings will take place via web meeting, or in-person as budget permits.

Task 2 Budget: $204,000

Task 2 Deliverables:

- Summary of design assistance activities for up to ten (10) projects, documented in monthly invoice cover letter
- Summary of policy decisions documented in monthly invoice cover letter

Task 2: Marketing and Recruitment

In collaboration with REU's marketing team, TRC proposes three outreach strategies to assist Roseville Electric in educating builders and consultants about the new program(s). First, TRC will meet with the top four energy consulting firms active in REU's service territory (DuctTesters, Energy Inspectors, Valley Duct Testing, Villara) to encourage them to market the program to their clients and to identify potential participant projects. Second, TRC will research, identify, and meet with the most active builders in Roseville. Third, TRC will develop ongoing communications with prospective participants through the development and recommendation of program

advertisement placement, the distribution of a quarterly newsletter, recording of webinars, and attendance/sponsorship at select industry events, and working with local jurisdictions to identify projects early in the planning stages, as outlined below. TRC will attempt to work with the local planning an permit departments to promote the program through their offices. TRC will also use this budget to develop and process leads through the pipeline.

Recruitment and Lead Processing

TRC shall inform REU of all committed projects in the monthly program report, and all active leads in a bi-weekly outreach pipeline report. TRC shall verify that all information associated with the program application package is reviewed, for completeness and maintain a database of all enrolled projects for program pipeline and forecasting purposes.

TRC will develop correspondence with each project to ensure that the project's California HERS registration entity is prepared for program verification purposes. TRC will interact directly with each project's HERS registration entity as needed. TRC will deliver an application acceptance package to each enrolled project team containing, at minimum, the completed and signed Program Participation Agreement, a program enrollment approval letter, a plan check verification summary sheet (which lists the enrolled plans and incentive levels), the approved lot list, Incentive Request Form (IRF) blanks, and an IRF instructions sheet.

Collateral

TRC will developed new marketing materials to ensure that the benefits of the programs, both for split commodity as well as all-electric projects are clearly communicated, including: program website, one-page program flyer, program half page advertisement for placement in industry publications, program button for placement in industry email newsletters. TRC will work with REU's marketing team to finalize and distribute this collateral through agreed upon marketing channels.

Quarterly Newsletter

To communicate key program policies and highlight participating developments, TRC will develop a one-page quarterly newsletter for distribution to TRC's database of homebuilders, multifamily developers, HERS Raters, energy consultants, architects, contractors, and other professionals active in REU's service territory. This newsletter will include a project case study, announcement of relevant upcoming industry events, and an update on key program polices (such as steps for demonstrating compliance with program pre-requisites).

Webinars

To promote the program and highlight the participation process, TRC will develop up to five (5) webinars covering topics such as: program process, program pre-requisites, design best practices, solar or other green programs. TRC will record all webinars and host recordings on a YouTube page for future viewing. TRC will also provide an attendance report to REU following each webinar training.

Marketing Events and Other Marketing Research

TRC will research relevant industry events in the Roseville region to recruit builders and other homebuilding professionals. TRC will focus this outreach to events hosted by the North State Building Industry Association (BIA),

American Institute of Architects Central Valley Chapter, and the HERS Providers (CHEERS and CalCERTS), and the California Association of Building Energy Consultants (CABEC). TRC will work with REU to identify the most appropriate attendee (REU or TRC) and has budgeted for attendance at up to three events during this contract period. TRC will also research prospective homebuilding activity through the Sacramento City and County building departments and through the Business Journal. TRC will work with Roseville's marketing team to identify other marketing opportunities such as sponsorships and advertisement placement (Note: this budget does not include expenses for marketing purchases as it is assumed that these purchases will be made by REU's marketing department).

Task 3 Budget: $202,000

Task 3. Deliverables:

- Copies of program collateral: one-page flyer, half page advertisement, and button
- Copy of newsletter document for up to four (4) newsletters annually
- Copy of webinar presentation, recordings, and attendance reports for up to five (5) webinars
- Summary of other marketing activities for up to three (3) marketing events, documented in invoice cover letter

Task 4: Project Processing

To support Roseville in reaching the program goal of working with 2,300 lots through the end of contract, TRC proposes the following fixed price, performance-based budget paid at two stages: 1: enrollment and 2: completion of each single family lot. This budget assumes a flat rate of $88.00 be paid per lot enrolled and $54.00 per lot completed. The budget allows 2,300 lots for commitment (or incentives reserved) and 2,200 lots for completion (or incentives paid) including all previously enrolled lots that have not been paid yet, for a period of three years following contract execution. The remaining committed lots should be anticipated to complete after this three-year timeframe and are outside the scope of this contract. Enrollment and completion rates are highly dependent on market conditions with minimal potential for program influence. These are only annual estimates, actual annual totals may vary and TRC will keep REU aware of the budget status. If program volume increases beyond the budget allotment, REU will work with TRC to determine if additional budget can be added, or will determine to cut off program processing operations.

Stage	Fixed Price per Lot	Number of Lots Year 1	Fixed Performance Payments Year 1	Number of Lots Year 2	Fixed Performance Payments Year 2	Number of Lots Year 3	Fixed Performance Payments Year 3	Total Number of lots	Total Fixed Performance Price
Split-Commodity Commitment	$88	400	$35,200	600	$52,800	500	$44,000	1,500	$132,000
Split-Commodity Completion	$54	550	$29,700	625	$33,750	625	$33,750	1,800	$97,200
All-Electric Commitment	$88	-	$0	350	$30,800	450	$39,600	800	$70,400
All-Electric Completion	$54	-	$0	75	$4,050	325	$17,550	400	$21,600
TOTAL PROJECT COSTS >>>		950	$64,900.00	1,650	$ 121,400	1,900	$ 134,900	4,500	$ 321,200

Figure 3. Roseville Electric Best Home Fixed Price Budget

Within each stage, TRC will complete the following tasks outlined in the sections below.

Enrollment (Stage 1) Fixed Price Tasks

Application Processing

TRC will accept, organize, and verify all necessary documents related to program application. This includes the application, lot list, site map, plan set, Title 24 models, relevant specification sheets, and proof of service. TRC will work with the builder and their project team to ensure they understand and are prepared to meet all program prerequisites. TRC will transmit these files to REU's administrator for processing and tracking.

Plan Review

TRC will complete a thorough review of each project's Title 24 models in comparison to their building plans and product specification sheets. Review will confirm that modeling is accurate and kWh savings are maximized. Additionally, TRC will verify that program prerequisites and bonuses, when applied for, are met. As part of plan review, TRC will communicate with the consultant performing the energy modeling and the builder for modeling corrections or additional specification documentation as needed. TRC will communicate the final energy savings and energy design specifications to REU for tracking.

Project Enrollment

Projects that pass the plan review process will be enrolled in the REU program, and thus incentives will be reserved. For each project, TRC will generate a project approval letter that includes anticipated energy savings and incentives at the project level. TRC will also generate an enrollment data form that includes energy savings and incentives for each approved plan at each orientation. TRC will create a database entity internally to track this information per project, and be available for quick data retrieval as needed. TRC will create an enrollment package for the builder and project team. This package will include project data, REU program rules, and the necessary forms and instructions the builder will need to complete the program and receive their incentives. This includes a project acceptance letter, approved plan list, an enrollment data form, and incentive request forms.

Completion (Stage 2) Fixed Price Tasks

HERS Coordination

For each enrolled project, TRC will upload program-approved Title 24 CF-1R reports into the HERS registry (either CHEERS or CalCERTS). TRC will coordinate with the project's HERS Rating firm to ensure that the project's HERS registry entity is organized and maintained in a manner conducive to using it as a verification tool for program purposes. TRC will also coordinate with the builder to track construction schedule for completion forecasting purposes.

Project Adjustments

TRC will maintain contact with each project during the course of construction. TRC will conduct project adjustments as needed to add plans to the project (via a plan review process), change the project's lot quantity or lot addresses, or adjust existing plans to account for significant changes to the plan's energy efficiency features. Changes that adjust a plan's CA HERS score by more than 1 point, on average across all four orientations will be deemed significant. TRC will maintain in contact with the project teams to clarify program rules and give project related information. For adjusted projects, TRC will provide approval letters, enrollment data forms, builder enrollment packages, database entries and HERS Registry coordination as applicable to that project's specific adjustments.

Completion Verification

TRC will accept incentive request forms (IRFs) that the builder will use to indicate enrolled lots have completed construction and have had all HERS tests uploaded to the HERS registry. TRC will review the IRF and the registry to confirm that the lots have completed as specified and are therefore eligible for incentives. TRC will generate a payment approval letter advising REU to pay the incentives. This letter will include energy savings claims and HERS registry summary forms. During verification, TRC will communicate with the project team regarding the status of the incentive request and advise when additional information is needed. TRC will coordinate with REU to ensure that payment data is tracked and recorded in TRC's database for use in data analysis and project level communication.

Project Closure

In alignment with the CAHP program, projects will be given 36 months from enrollment to complete all lots. Expiration warnings will be issued at 6 months, 3 months, 2 months and 1 month prior to expiration. When projects expire, or complete all enrolled lots prior to expiration, TRC will close the project by providing a project completion letter to the project team and to REU.

Task 4 Budget: $321,200

Task 4 Deliverables:

- At commitment, a zip file including the following project documents:
  - Application
  - Incentive reservation letter
  - Electronic plan set and simulation files
  - Project enrollment data form
- At completion, a zip file including the following project documents:
  - HERS documentation
  - Completion letter

BUDGET

TRC proposes the following budget to perform the aforementioned program implementation support:

Task #	Description	Labor	Expenses	Fixed Performance Price	TOTAL	Percent of Budget
1	Management	$ 169,800	$ 3,000	$ -	$ 172,800	19%
2	Design Assistance and Policy Updates	$ 201,000	$ 3,000	$ -	$ 204,000	23%
3	Builder and Consultant Outreach	$ 185,500	$ 16,500	$ -	$ 202,000	22%
4	Project Processing	$ -	$ -	$ 321,200	$ 321,200	36%
	TOTAL PROJECT COSTS >>>	$ 556,300	$ 22,500	$ 321,200	$ 900,000	

Figure 4. Roseville Single-Family Residential New Construction Programs' Implementation Budget

Tasks 1, 2, and3 are proposed on a time and materials basis (TRC will bill Roseville on an hourly basis). Task 4 will be paid to TRC on a fixed price basis at two stages: 1) as each home or development reserves incentives and 2) as each home or development completes construction and verification.

Nicholas Dunfee will provide program oversight with primary support from Parul Gulati (management), Matthew Christie and Sophia Hartkopf (oversight and policy), Allison Wittwer (marketing and outreach), Jessica Nunez (plan review) and Lori McAdams (payment processing). Julieann Summerford will serve as Office-in-Charge.

Staff by job category and rate supporting this project are outlined in the figure below. Note that individuals working under each job classification may change due to new staff joining the program or promotions.

Job Classification	Rate	TRC Personnel
Vice President	$284	Julieann Summerford, Catherine Chappell, Abhijeet Pande
Associate Vice President	$267	TBD
Senior Program Manager	$232	David Beaulieu
Program Manager	$197	Sophia Hartkopf, Matthew Christie, Elizabeth McCollum
Senior Project Manager	$173	Nicole Allen, Nic Dunfee, Mike Maroney
Project Manager	$163	Ritesh Nayyar, Beth Baxter, Melisa Buckley
Associate Project Manager	$128	Lori McAdams, Matthew Flores, Connie Malone Jones, Yamini Arab, Parul Gulati
Project Associate	$122	Nolan Stephens, Neil Perry, Julia Sinex, Allison Wittwer, Carlos Ortiz, Lorenzo Pagano, Shari Mullins
Project Assistant	$93	Yolanda DuVall, Claire Chappell, Jude Carr

Figure 2: TRC Solutions, Inc Project Personnel January 2019

TIMELINE

TRC will continue implementation through change order authorization, for a period of 3 years following contract execution. The Roseville RNC program is projected to continue past the end of these contract terms. Implementation services to complete the program-cycle will be negotiated at a later time, as requested by Roseville Electric.

COUNCIL COMMUNICATION

File #: 0203-10

Title:	Landscape Bark and Playground Engineered Wood Fiber Material and Services - Service Agreement Amendment
Contact:	Patrick Daly 916-774-5764 pdaly@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.5.

RECOMMENDATION TO COUNCIL

Recommend Council adopt a resolution authorizing the City Manager to execute Amendment No. 1 to Service Agreement between the City of Roseville and Applied Landscape Materials, Inc. to increase the amount of the agreement from $100,000.00 to $150,000.00.

BACKGROUND

The Park Operations Division currently oversees over 77 parks & facilities with play areas and over 258 acres of landscaping. Engineered wood fiber is the primary safety surfacing within 82 play areas. Maintaining this material through periodic replenishment is critical to providing a safe and enjoyable experience. Furthermore, as part of our maintenance practices we utilize landscape bark in our parks and streetscapes. Well barked landscapes are aesthetically pleasing and assist in moisture retention for plant material.
The bid was originally awarded to Applied Landscape Materials in September of 2016 through a Request for Proposal (RFP 13-040). The City has continued to renew the agreement annually. The services provided by Applied Landscape Materials have been satisfactory and in accordance with the established terms and conditions of the bid.

FISCAL IMPACT

The total cost of the amended annual service agreement will be not to exceed $150,000.00. These funds have been identified and approved in the FY2018-19 budget for landscape improvements. The funding sources are a combination of General Fund, Community Facility Districts (CFDs), and Lighting and Landscape Districts (LLDs). There is limited impact to the General Fund for facilities that are not within a CFD or LLD. This limited General Fund impact is included in the FY 2018-19 budget.

ECONOMIC DEVELOPMENT / JOBS CREATED

Not applicable.

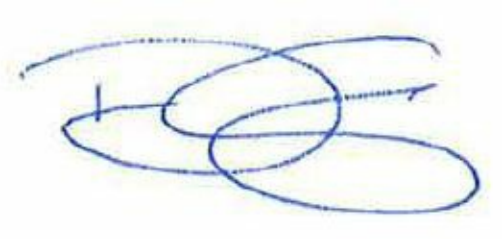
ENVIRONMENTAL REVIEW

The Landscape Bark and Engineered Wood Fiber Material and Services Agreement is not considered a “project” as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines § 15378). Consequently no CEQA action is required.

Respectfully Submitted,

Patrick Daly, Parks Supervisor

Dion Louthan, Parks, Recreation & Libraries Director



_____
Dominick Casey, City Manager

Title:	Time and Attendance Software - Service Agreement Amendment
Contact:	Kristi Corral 916-774-5316 kcorral@roseville.ca.us Dennis Kauffman 916-774-5313 dkauffman@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.6.

RECOMMENDATION TO COUNCIL

Staff recommends Council adopt a resolution to approve the first amendment to a service agreement with GroupeX Limited for reconfiguration of the Workforce Time and Attendance software.

BACKGROUND

The City requires additional reconfiguration of our current version of Workforce to intergrate with the new Oracle Fusion ERP system. The City approved a service agreement with GroupeX Limited to assist in the reconfiguration efforts in December of 2018. Since then, an assessment has been done and additional hours are needed to meet our ERP project go live date of July 1st. GroupeX offers application managed services to support configuration of time and attendance systems.

FISCAL IMPACT

The total cost of the amendment is $50,490.00 for consultant services and $8,000.00 for travel cost, bringing the total cost of the contract to $78,990.00. Funding is available in the ERP budget.

ECONOMIC DEVELOPMENT / JOBS CREATED

This agreement will not have an impact on economic development or job creation.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical changes in the environment (CEQA

Guidelines §15061(B)(3)). An amendment to a service agreement for software does not include the potential for a significant environmental effect, and therefore is not subject to CEQA.

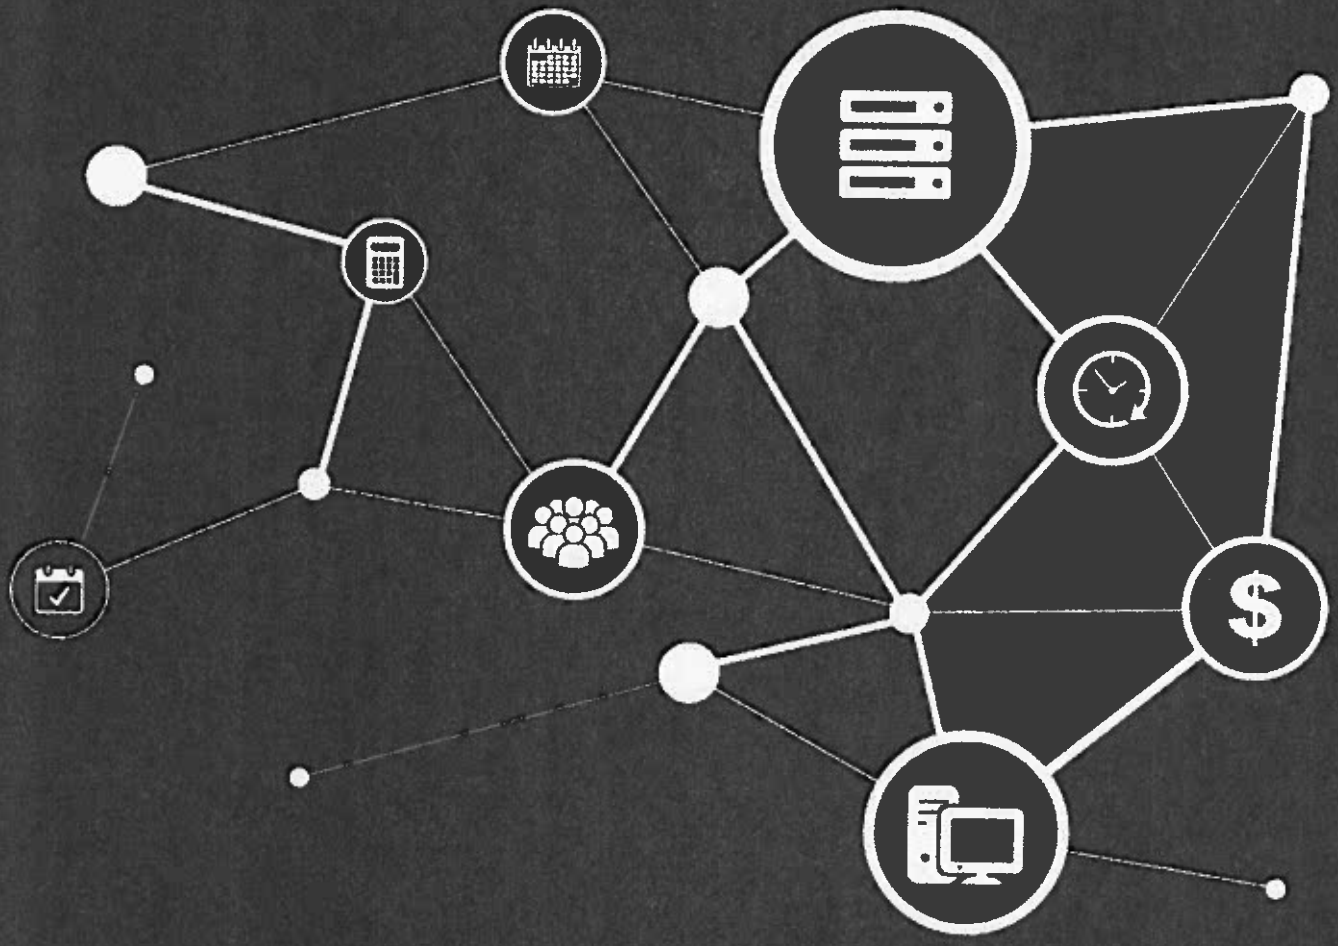
GroupeX SOLUTIONS



Services Proposal for the City of Roseville

Application Managed Services (AMS)

February 10, 2019

© GROUPEX LIMITED 2019. ALL RIGHTS RESERVED

GroupeX SOLUTIONS

OUR MISSION

To drive our clients toward simple, efficient business processes and systems through high-quality consulting services.

Table of contents

Table of contents 3
Application Managed Services for the City 1
Costs and Invoicing 3

Application Managed Services for the City

GroupeX offers Application Managed Services (AMS) to support the client-specific configuration layer of a software solution. AMS offerings include Mentorship Services, Release Management Services and Staff Augmentation Services.

The City of Roseville (the City) is re-configuring their current on-premise Workforce Software v9.5 to integrate with Oracle Fusion ERP. The City will be doing most of the re-configuration but will need help with refining the following services through a combination of onsite and remote work. GroupeX will support the following efforts until estimated hours are depleted:

- 1 LD import - tasks
- 4 generic exports
- Revisions to up to 5 premium policies
- Revisions to up to 5 transaction creation policies
- Revisions to up to 20 banks accrual policies
- Revision to/creation of up to 40 exception messages (20-40 expected)
- Assistance with disabling banks that are no longer in use
- Assistance with creating a go live procedure
- Assistance with converting up to 4 reports (3-4 expected)
- Provide Test Support
- Provide Migration Support
- Provide Go Live Support
- Other items that the City may need assistance on that do not require exceeding the number of hours in this SOW

The GroupeX AMS practice will provide **Staff Augmentation services** to bring solution expertise in-house and support the City's internal WFS team in supporting the platform. This service offering assumes that the City has a mature WFS team

GroupeX will provide a Project Manager for 1 hour per week, a Technical Consultant for up to 200 hours and a Reports Consultant for up to 80 hours of remote work.

Timeline

This engagement will begin on April 1, 2019 and continue through July 31, 2019.

Roles and Responsibilities

Below are the general role definitions for an AMS engagement. Note that a single individual may play multiple roles on an engagement and all roles may not be required depending on the scope of the iteration cycle.

GroupeX Team

Role	Responsibilities
Project Manager	The Project Manager serves as the primary project contact throughout the engagement. This individual will be responsible for release timelines and dates for the project team. The Project Manager will coordinate and manage the activities of the GroupeX project team.
Technical Consultant	The Technical Consultant works as a member of our Client Services team to ensure the successful configuration and delivery of the Workforce Suite of applications. The

	Technical Consultant will be responsible for configuring the WorkForce Suite according to the customer's documented business requirements. They will also provide test phase support and participate in other tasks during implementation.
Reports Consultant	The Reports Consultant works as a member of our Client Services team to ensure the successful configuration and delivery of reports within the WorkForce Suite of applications. The Reports Consultant will be responsible for creating new reports and/or modifying existing reports according to the customer's documented business requirements. They will also provide test phase support for reports.

Client Team

Role	Responsibilities
Project Manager / Lead	The Project Manager has the responsibility and authority to make decisions, resolve issues, and engage staff as required to ensure an implementation consistent with the scope of work. The Project Manager will keep all Sponsors aware of the decisions, commitments, and status of the project in a timely and efficient manner.
Functional Analysts and Subject Matter Experts	These people will have the primary duties of participating in requirements definition sessions and providing knowledge of current and required HR and payroll policies and procedures. They may be asked to deliver detailed information on requirements to GroupeX. They will perform in depth reviews of all interim and final outputs for all delivered solutions.

Costs and Invoicing

The table below shows the estimated cost for Staff Augmentation Services through the GroupeX AMS practice.

Role	Rate	Total Hours	Total Cost
Project Manager	$170	17	$2,890
Technical Consultant	$170	200	$34,000
Reports Consultant	$170	80	$13,600
		Total	$50,490

Notes about the Pricing

- The above fees are in US Dollars.
- The City will be billed based on a Time and Materials basis.
- GroupeX will provide weekly hours reports to the City. Any dispute should be raised within three (3) business days of the report delivery. If no concern is raised, hours will be deemed accepted by all parties and GroupeX will bill for those services at the end of the month.
- Payments are due in accordance with the payment terms of Net 30 days from date of invoice. Accounts not paid within 30 days of the date of invoice are subject to a 2% monthly finance charge.
- Travel and expenses are in addition to the fees listed. Travel will not exceed $2000 per week without prior City approval.

Title: Vehicle Purchases - Budget Adjustment
Contact: Brian Craighead 916-774-5731 bcraighead@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.7.

RECOMMENDATION TO COUNCIL

RFQ 10-3202
Staff recommends Council approve a purchase order to Winner Chevrolet, Inc. for one Chevrolet Tahoe Police Pursuit Vehicle (PPV) utilizing RFQ 10-3202 to replace 15-065. The total cost including options and sales tax is $44,264.25. Additionally, adopt an ordinance amending the budget by $67,575.00 to pay for the cost of the Chevrolet Tahoe and upfitting.

Sole Source
Staff recommends Council approve a sole source purchase order to Dilo Company, Inc. for one SF6 gas recovery system to replace 98-640 approved in the FY2018-19 Auto Replacement Budget. The total cost including options and sales tax is $134,373.70.

Sourcewell
Staff recommends Council approve a purchase order to 72 Hour LLC dba National Auto Fleet Group for one Ford Interceptor Utility Hybrid utilizing Sourcewell contract #120716-NAF to replace 16-034. The total cost of one Ford Interceptor Utility Hybrid including options and sales tax is $50,184.61. Additionally, adopt an ordinance amending the budget by $65,000.00 to pay for the cost of the Ford Interceptor and upfitting.

BACKGROUND

RFQ 10-3202
The Police Department is purchasing one Chevrolet Tahoe PPV as a replacement for 15-065 which was involved in an accident and damaged beyond repair.

A formal bid was issued with the following vendor responses:

Vendor	Unit Price (with all options)
Winner Chevrolet, Inc. Elk Grove, CA	**$47,499.98**
Folsom Chevrolet	$48,962.14

Folsom, CA

Sole Source
The Roseville Electric Operations Division is purchasing one SF6 gas recovery system as a replacement for 98-640. This equipment is used by substation technicians for recovery or filling of SF6 (sulfur hexafluoride) insulating gas during construction, maintenance or repair of Roseville Electric's 60kv distribution circuit breakers.

Dilo Company, Inc. is the sole distributor of Dilo SF6 gas recovery systems. Roseville Electric has standardized on Dilo SF6 gas recovery systems for more than 20 years. Every substation technician has been trained to operate Dilo equipment.

Sourcewell
The Police Department is purchasing one Ford Interceptor Utility Hybrid as a replacement for 16-034 due to an engine compartment fire that was damaged beyond repair. The manufacturer purchased the vehicle back, and those funds, previously deposited in the Automotive Replacement Fund, combined with the automotive replacement funds collected over time for 16-034, will be used to purchase the replacement vehicle.

Vehicle replacements are based on the Fleet Scoring System which considers factors such as age, mileage, reliability, prior maintenance and repair costs, and current condition. Below are the vehicle replacement scores. A score of 23 or more indicates the vehicle is eligible for replacement.

Vehicle ID	Replacement Score	Vehicle Condition
98-640	28	Meets City replacement criteria

FISCAL IMPACT

RFQ 10-3202
The total cost of one Chevrolet Tahoe PPV including options and sales tax is $44,264.25. Staff requests Council approve a budget adjustment in the amount of $67,575.00 from the Automotive Replacement Fund to authorize the additional expenditure from the FY2018-19 Auto Replacement Fund budget. No additional General Fund resources are required. All funds are currently in the Automotive Replacement Fund and allocated for this vehicle.

Sole Source
The total cost of one SF6 gas recovery system including options and sales tax is $134,373.70. Funding is included in the FY2018-19 Automotive Replacement Fund budget.

Sourcewell
The total cost of one Ford Interceptor Utility Hybrid including options and sales tax is $50,184.61. Staff requests Council approve a budget adjustment in the amount of $65,000.00 from the Automotive Replacement Fund to authorize the additional expenditure from the FY2018-19 Auto Replacement Fund bBudget. No additional General Fund resources are required. All funds are currently in the Automotive Replacement Fund and allocated for this vehicle.

ECONOMIC DEVELOPMENT / JOBS CREATED

Not applicable.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment (CEQA Guidelines §15061(b)(3)). The purchase of vehicles does not include the potential for a significant environmental effect, and therefore is not subject to CEQA.

Respectfully Submitted,

Brian Craighead, Fleet Manager

Jason Shykowski, Acting Public Works Director

Ordinance No. 6063

Budget Adjustment

ORDINANCE NO. 6063

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AUTHORIZING CERTAIN AMENDMENTS TO THE 2018-19 BUDGET AND DECLARING THIS ORDINANCE TO BE IMMEDIATELY EFFECTIVE AS AN APPROPRIATION MEASURE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. The City of Roseville Annual Budget, Fiscal Year 2018-19, is hereby amended by transferring appropriation to and from the activities indicated below:

Appropriate funds for vehicle purchases, per request of the Public Works Department, as listed on the attached Request for Budget Adjustment in the amount of $132,575.00.

SECTION 2. This ordinance is hereby declared to be an appropriation measure, immediately effective pursuant to the provisions of Section 5.03 of the Charter.

SECTION 3. The City Clerk is hereby authorized and directed to post a true copy of the foregoing ordinance in each of three (3) conspicuous locations in the City and she shall immediately after such posting enter in the ordinance book, under the record of the ordinance, a certificate under her hand stating the time and place of such publication by posting.

Title: Computers and Technology Equipment - Purchase Order Increase
Contact: Michael Sinor 916-774-5183 msinor@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.8.

RECOMMENDATION TO COUNCIL

Staff recommends Council approve an increase to the purchase order with CDW Technologies LLC for computers, technology equipment and software using National IPA contract #2018011-01 from $650,000 to $800,000.

BACKGROUND

The Information Technology department (IT) maintains over 1,500 computers, 350 servers, 250 terabytes of data storage and 185 network switches across the City to support important business functions. Regular and prompt replacement of aging computers and technology equipment is critical to ensure the effective and efficient operation of City business.

Staff would like to utilize the National IPA competitively bid contract to obtain the best pricing available for the City.

FISCAL IMPACT

The cost of the purchase order increase in FY2018-19 is $150,000.00, bringing the purchase order total from $650,000 to $800,000, which has been approved in the IT budget and other departmental budgets.

ECONOMIC DEVELOPMENT / JOBS CREATED

Not applicable.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment (CEQA Guidelines §15061(b)(3)). Computer and technology purchases do not include the potential for a significant environmental effect, and therefore are not subject to CEQA.

OFFICE OF THE CITY CLERK

COUNCIL MINUTES

February 5, 2018

The City Council of the City of Mesa met in a Regular Council Meeting in the Council Chambers, 57 East 1st Street, on February 5, 2018 at 5:45 p.m.

COUNCIL PRESENT	COUNCIL ABSENT	OFFICERS PRESENT
John Giles	None	Christopher Brady
David Luna		Dee Ann Mickelsen
Mark Freeman		Jim Smith
Christopher Glover		
Francisco Heredia		
Kevin Thompson		
Jeremy Whittaker		

Mayor's Welcome.

Invocation by Pastor Ben Diaz with Palabra de Vida (Word of Life).

Pledge of Allegiance was led by Councilmember Thompson.

Awards, Recognitions and Announcements.

There were no awards, recognitions or announcements.

1. Take action on all consent agenda items.

All items listed with an asterisk (*) will be considered as a group by the City Council and will be enacted with one motion. There will be no separate discussion of these items unless a Councilmember or citizen requests, in which event the item will be removed from the consent agenda and considered as a separate item. If a citizen wants an item removed from the consent agenda, a blue card must be completed and given to the City Clerk prior to the Council's vote on the consent agenda.

It was moved by Councilmember Thompson, seconded by Councilmember Glover, that the consent agenda items be approved.

Carried unanimously.

*2. Approval of minutes from previous meetings as written.

Minutes from the January 8, 11, and 22, 2018 Council meetings.

3. Take action on the following liquor license applications:

*3-a. It Ain't Chemo

This is a one-day event to be held on Saturday, February 10, 2018 from 9:00 A.M. to 9:00 P.M. at Riverview Park, 2100 West Rio Salado Parkway. **(District 1)**

*3-b. AMC Superstition East 12

A multi-screen cinema is requesting a new Series 6 Bar License for American Multi-Cinema Inc., 1935 South Signal Butte Road - Andrea Dahlman Lewkowitz, agent. There is no existing license at this location. **(District 6)**

*3-c. ATL Wings

A restaurant that serves lunch and dinner is requesting a new Series 12 Restaurant License for Stapley Wings LLC, 1455 South Stapley Drive, Suites 22-24 - Andrea Dahlman Lewkowitz, agent. The existing license held by Mark Killian, sole proprietor, will revert to the State. **(District 4)**

*3-d. Elgin Distillery

This is a one-day craft distillery festival to be held on Saturday, March 3, 2018 from 9:00 A.M. to 4:00 P.M. at Sunland Village, 4601 East Dolphin Avenue. **(District 2)**

*3-e. Village of Elgin Winery

This is a one-day wine festival event to be held on Saturday, March 3, 2018 from 9:00 A.M. to 4:00 P.M. at Sunland Village, 4601 East Dolphin Avenue. **(District 2)**

4. Take action on the following off-track betting license application:

*4-a. Turf Paradise, TP Racing LLLP

New Off-Track Betting License for Turf Paradise, TP Racing LLLP to telecast at Moose & Bear, located at 118 East McKellips Road, Suite 103, TB Concepts LLC. Applicant: Vincent Acri Francia. **(District 1)**

5. Take action on the following contracts:

*5-a. One-Year Renewal to the Term Contract for Executive Physicals for Citywide Departments as requested by the Human Resources Department. **(Citywide)**

This contract provides annual physicals for the City's executive staff as a means of maintaining optimum health. There are approximately 65-70 positions eligible to participate in this program.

The Human Resources Department and Purchasing recommend authorizing the renewal contract with Banner Occupational Health Clinics, at $88,500, based on estimated usage.

*5-b. One-Year Renewal to the Term Contract for Deceased Animal Collection Services for the Community Services Department. **(Citywide)**

This contract provides a vendor to collect and dispose of deceased animals up to 150 pounds that are reported within the City. The contractor is responsible for the proper disposal by cremation or other means in accordance with the standards and methods approved by the Maricopa County Health Department.

The Community Services Department and Purchasing recommend authorizing the renewal contract with APM/Couts Enterprises, Inc., dba Arizona Pet Mortuary, at $54,000, based on estimated usage.

*5-c. Purchase of One Replacement Fire Apparatus, an Air Light/Rehab Unit, for the Fire and Medical Department (Sole Source). **(Citywide)**

The apparatus being replaced has met established replacement criteria and will be sold by a sealed bid process or traded-in as part of the City's fire apparatus purchase agreement with Pierce Manufacturing. In addition, Fire and Medical will trade-in two units to further offset the price for the Air/Light Rehab unit.

The Fire and Medical Department and Purchasing recommend authorizing the purchase using the City’s five-year purchase agreement with Pierce Manufacturing Inc., through their designated local dealer, Hughes Fire Equipment Inc., at $502,264.75. This purchase is funded by the Capital-General Fund and authorized 2013 Public Safety Bonds.

*5-d. Three-Year Term Contract for Landscape Maintenance Services for Parks, Retention Basins and Sports Fields - Zones 1, 2, 3 and 4 for the Parks, Recreation and Community Facilities Department (PRCF). **(Citywide)**

These contracts provide landscape maintenance services for sports fields, parkways, medians, parks, retention basins or grounds adjacent to City facilities. The City has divided the landscaping into geographic areas known as Zones 1, 2, 3 and 4. PRCF has done an analysis to bring the work under this contract in-house and, at this time, contracting continues to be in the best financial interest of the City.

The evaluation committee recommends awarding the contract to the highest-scored proposal from Mariposa Landscape Arizona, Inc.; Zone 1, at $1,435,319.57 annually; Zone 2, at $959,183.45 annually; Zone 3, at $974,364.20 annually; and Zone 4, at $1,221,738.22 annually; based on estimated usage.

*5-e. Three-Year Term Contract for Plumbing Services for the Parks, Recreation and Community Facilities Department. **(Citywide)**

This contract will establish a list of pre-qualified plumbing contractors to perform plumbing services on various City facilities/projects on an as-needed basis.

The evaluation committee recommends awarding the contract to the four, highest-scored proposals from Mesa Energy Systems Inc.; RKS Plumbing and Mechanical Inc.; Sun Mechanical Inc.; and W.D. Manor Mechanical Contractors, Inc.; cumulatively not to exceed $100,000 annually, based on estimated usage.

*5-f. Purchase of Furniture for the Main Library as requested by the Library Services Department. **(Citywide)**

This purchase will provide seating and tables for two new rooms at the Main Library, Teen Room and ThinkSpot. The Library worked with several vendors utilizing cooperative contracts specifying their needs and goals with this project.

The Library Services Department and Purchasing recommend authorizing the purchase using the Northern Arizona University cooperative contract with Atmosphere Commercial Interiors, at $50,876.25.

*5-g. Five-Year Term Contract with CDW Government, LLC and SHI International Corp. for Information Technology Solutions and Services for Various Departments throughout the City. **(Citywide)**

This contract will provide the City and participating agencies a full range of information technology solution products and services to meet varying requirements of governmental agencies. The scope of products and services available under these contracts include standard business and high-end workstations; laptop and notebook computers; network equipment; computer and network products and peripherals; monitors; various cloud, consulting, and technical support services; financing; various software products; and the contractors' comprehensive product offering.

Mesa, as the lead agency, has partnered with the National Intergovernmental Purchasing Alliance Company (National IPA) to lead this contract. The contract will be available to over 45,000 public agencies nationally. While no minimum volume is guaranteed to the suppliers, the estimated annual volume of IT Solutions purchased under this master agreement is approximately $500 million per year. The City will receive rebates annually for administering and awarding this contract.

A committee representing the Police, and Information Technology Departments, City Manager's Office, Police-Information Technology, National IPA and Purchasing evaluated responses. The evaluation committee recommends awarding the contract to the highest-scored proposals from CDW Government, LLC and SHI International Corp., at $3,100,000 annually, based on estimated usage.

*5-h. One-Year Term Contract for Electrical and Lighting Supplies for the Materials and Supply Warehouse (for Citywide Departments). **(Citywide)**

Multiple departments use this Citywide contract for their miscellaneous electrical equipment and supplies.

The Business Services Department and Purchasing recommend authorizing the purchase using the State of Arizona cooperative contract with Border States Industries, Inc., at $100,000, based on estimated usage.

*5-i. Re-Award the Three-Year Term Contract for Microfilm Conversion Services for the Police Department. **(Citywide)**

This contract will provide services to convert Police Department data from microfilm to digital media. Police, Records Division use microfilm that is becoming worn and damaged. The previous vendor is unable to satisfactorily fulfill the contract requirements.

The Police Department and Purchasing recommend re-awarding the contract to the second highest scored proposal, ICM Conversions, at $400,000 annually, based on estimated usage.

*5-j. Purchase of Falcon District Brand Signage as requested by the Economic Development Department. **(Citywide)**

Continuing to build awareness and to promote the Falcon Field Economic Activity Area, this purchase for the Falcon District signage includes the installation of two branded monument signs to be located on Greenfield and Higley Roads, south of the 202. Additionally, the City will install utility and transit signal box wraps and will mount branded banners promoting aerospace, technology, and manufacturing on light poles around the airport.

The Economic Development Department and Purchasing recommend authorizing the purchase using the City of Peoria cooperative contract with YESCO Phoenix, at $146,670.49. This purchase is funded by Local Streets Sales Tax.

*5-k. Purchase of Three Replacement Rollback Trailers for the Transportation Department. **(Citywide)**

These trailers will replace three aging equipment trailers that are at the end of their service life. The trailers will meet the needs and safety requirements for transporting the large equipment required to perform street and right-of-way maintenance.

The Transportation Department and Purchasing recommend authorizing the purchase using the National Joint Powers Alliance contract with Empire Southwest (a Mesa business), at $176,764.77. This purchase is funded by Local Streets Sales Tax.

*5-l. One-Year Renewal to the Term Contract for Radio-Based Endpoint Encoders (for Water Meter Reading) for the Water Resources Department. **(Citywide)**

This contract provides Itron radio-based endpoint encoders and accessories purchased directly from Itron, Inc., the manufacturer. The endpoint stores 40 days of hourly reads to ensure data integrity and offers advanced customer side leak detection and reverse flow and tamper alarms. Water Utility installs approximately 540 radio-based endpoint encoders on new and existing meters annually.

The Water Resources Department and Purchasing recommend authorizing the renewal with Itron, Inc., at $100,000, based on estimated usage.

*5-m. Purchase of Water Treatment Plant Shop Tools and Equipment for the New Signal Butte Water Treatment Plant as requested by the Water Resources Department. **(Citywide)**

This purchase is for tools and equipment needed for the start-up and maintenance in the various shops at the new Signal Butte Water Treatment Plant.

The Water Resources Department and Purchasing recommend awarding the contract to the lowest, responsive and responsible bidders: Copper State Bolt & Nut Co. (a Mesa business); Glendale Industrial Supply, LLC, dba UNICOA Construction and Industrial Supply; Mallory Safety & Supply LLC; and W.W. Grainger, Inc.; cumulatively not to exceed $153,000, based on estimated usage.

*5-n. One-Year Renewal to the Term Contract for Fire Hydrant Water Meters for the Water Resources Department. **(Citywide)**

This contract provides 3" fire hydrant water meters to accurately measure construction water use of fire hydrants. The meters are installed by Water Utility staff to serve contractors and other customers needing to connect to City fire hydrants for temporary construction water service and dust control purposes.

The Water Resources Department and Purchasing recommend authorizing the renewal with Badger Meter Inc., dba National Meter Automation, at $35,000, based on estimated usage.

*5-o. Greenfield Water Reclamation Plant (GWRP), Phase III Expansion Guaranteed Maximum Price (GMP) No. 2. **(Citywide)**

The City of Mesa, Town of Gilbert, and Town of Queen Creek seek to provide an additional 14 million gallons per day annual average day flow of liquids and solids treatment capacity at the existing GWRP, complete with the required infrastructure, technology, and environmental features to ensure a reliable, efficient, and expanded plant to meet the current and future demands.

Staff recommends awarding the contract for the completion of this project to McCarthy Building Companies in the amount of $120,302,333 and authorize a change order allowance $6,015,117 (5%) for a total project amount of $126,317,450. This project is funded by the Greenfield Water Reclamation Plant Joint Venture Fund, with contributions coming from its members based on usage. Mesa's portion of this GMP is $72,229,521 and is funded by 2014 authorized Wastewater Bonds.

*5-p. Sewer Pipe and Manhole Rehabilitation: Mesa Drive, Millet Avenue, Horne, and 6th Avenue. **(District 4)**

The existing sanitary sewer lines covered by this project were built during the 1950's and 1960's. The age of these pipes greatly increases their risk of failure and emergency repairs. This method of construction can be completed while leaving the pipe in place and without excavation. Similarly, the sewer manholes will be cleaned, repaired, and coated in place. Only the concrete adjustment rings will be removed and replaced.

Staff recommends awarding the contract for this project to the lowest, responsible bidder, B and F Contracting, Inc, in the amount of $1,394,294.67, and authorize a change order allowance in the amount of $139,430 (10%), for a total amount of $1,533,724.67. Funding for this project is available from the 2014 Wastewater Bond Program.

*5-q. Sidewalks at Railroad Crossing on Alma School. **(Districts 3 and 4)**

To continue to meet current railroad approach and clearance standards at the Alma School Road railroad crossing, additional safety improvements will need to be made. The project improvements for roadway and sidewalk approach at this location will facilitate greater public safety and needed clearances from railroad signals along with a smoother roadway crossing of the Union Pacific Railroad track. Mesa will participate in the federally-funded Railway-Highway Grade Crossing Program, and will be responsible

for adjusting the existing concrete sidewalks around the proposed cantilevers and gates, and installing concrete medians.

This project was previously awarded by Council on July 10, 2017, however, the previously selected contractor could not comply with the federal requirements and the project was released for bid a second time.

Staff recommends awarding the contract to the lowest, responsible bidder, AJP Electric, in the amount of $149,494, plus an additional $14,949 (10%) as a change order allowance, for a total amount of $164,443. Funding is available from the Local Streets Sales Tax, of which 94.3% will be reimbursed by Arizona Department of Transportation (Federal) Grant under the Railway-Highway Grade Crossing.

6. Take action on the following resolutions:

*6-a. Approving and authorizing the City Manager to submit the Second Substantial Amendment to the Fiscal Year 2017/2018 Annual Action Plan to the U.S. Department of Housing and Urban Development related to the allocation of funding obtained under the Community Development Block Grant (CDBG) program. This Amendment will allow for reallocation of $600,000 in CDBG funds from the Senior Center Renovation Project (247 North Macdonald) to the Eagles Park Project (828 East Broadway Road). **(District 4)** – Resolution No. 11088.

*6-b. Approving and authorizing the City Manager to enter into a Grant Agreement with the Arizona Department of Public Safety to accept $1,335,284 in Victims of Crime Act (VOCA) grant funds. The finding will be used for salaries and expenses for the Mesa Prosecutors Office, Victim Services Unit for a three-year period. **(Citywide)** – Resolution No. 11089.

*6-c. Approving and authorizing the City Manager to enter into a Lease Agreement with New Cingular Wireless PCS for a cellular site on a portion of 5950 East Virginia Street, also known as Mesa Fire Station 214. **(District 5)** – Resolution No. 11090.

*6-d. Approving and authorizing the City Manager to enter into a Development Agreement for City-Share Reimbursement with PPGN-Ray, LLLP, for the reimbursement of $100,568 for regional street and street lighting improvements that are being required by the City in conjunction with a proposed residential development known as Crismon Road at PPGN, located at 5461 South Ellsworth Road. **(District 6)** – Resolution No. 11091.

*6-e. Approving and authorizing the City Manager to enter into an Intergovernmental Agreement with the Maricopa County, Department of Transportation for the pavement rehabilitation of Adobe Road from Higley Road to Recker Road. The City will contribute an estimated $54,417 for the portion of the project that is within City boundaries that will be funded from the 2013 Streets Bond Program. **(District 5)** – Resolution No. 11092.

*6-f. Approving and authorizing the City Manager to enter into First Amendments to the Development Agreement, Ground and Air Lease, and License Agreement with 3W Management, LLC, to facilitate the development of, and job creation and retention at, the City-owned property generally located at the southwest corner of Main Street and South Pomeroy and 34 South Pomeroy, which is the development commonly known as The GRID. **(District 4)** – Resolution No. 11093.

7. Introduction of the following ordinance and setting February 26, 2018 as the date of the public hearing on this ordinance:

*7-a. **ZON17-00323 (District 5)** The 8800 to 8900 blocks of East Main Street (south side). Located west of Red Mountain Freeway on the south side of Main Street (16.4± acres). Rezoning from RS-43 and GC to GC-PAD; and Site Plan Review. This request will allow for the development of an RV dealership and storage facility. Jeff Welker, Welker Development Resources, applicant; Roger D. Overson, owner.

Staff Recommendation: Approval with conditions

P&Z Board Recommendation: Approval with conditions (Vote: 6-0)

8. Discuss, receive public comment, and take action on the following ordinances:

*8-a. **ZON17-00309 (District 2)** The 5200 block of East Inverness Avenue (south side). Located east of Higley Road south of the US60 Freeway (1.9 ± acres). Rezoning from RM-3-PAD to LC; and Site Plan Review. This request will allow for the development of a commercial building. John Schoenauer, HD Management, applicant; Sevilla, LLC, owner. – Ordinance No. 5419.

Staff Recommendation: Approval with conditions

P&Z Board Recommendation: Approval with conditions (Vote: 7-0)

*8-b. **ZON17-00283 (District 6)** The 7100 to 7300 blocks of East Ray Road (north side). Located east of Power Road on the north side of Ray Road (56.0± acres). Rezone from LI-AF to LI-AF-PAD. This request will allow for the development of an industrial subdivision. Omar Cervantes, XCL Engineering, LLC, applicant; Phx-Mesa Gateway Airport 193, LLC, owner. – Ordinance No. 5420.

Staff Recommendation: Approval with conditions

P&Z Board Recommendation: Approval with conditions (Vote: 7-0)

*8-c. **ZON17-00432 (District 3)** The 800 and 900 blocks of West Southern Avenue (south side), the 1200 and 1300 blocks of South Extension Road (west side), and the 800 and 900 blocks of West Grove Avenue (north side). Located at the southwest corner of Southern Avenue and Extension Road (19.3 ± acres). PAD Amendment; Site Plan Modification. This request will allow the development of a new multiple-residence building in an existing multiple-residence complex. Reese Anderson, Pew and Lake, PLC, applicant; Edward B. Frankel, Trustee of the Frankel Family Trust, owner. – Ordinance No. 5421.

Staff Recommendation: Approval with conditions

P&Z Board Recommendation: Approval with conditions (Vote: 7-0)

9. Take action on the following subdivision plat:

*9-a. "Allred Ranch" **(District 2)** The 2900 to 3100 blocks of East Southern Avenue (north side), and the 900 to 1200 blocks of South Los Alamos (west side). Located east of

Lindsay Road on the north side of Southern Avenue. 108 RSL-4.5 PAD lots (25± acres). KB Home Phoenix, Inc., developer; Dan Auxier, EPS Group, engineer.

Items not on the Consent Agenda

10. Items from citizens present.

There were no items from citizens present.

11. Adjournment.

Without objection, the Regular Council Meeting adjourned at 5:57 p.m.

CITY OF MESA AGREEMENT PURSUANT TO SOLICITATION

This Agreement pursuant to solicitation ("Agreement") is entered into this 28th day of February, 2018, by and between the City of Mesa, Arizona, an Arizona municipal corporation ("City"), and **CDW GOVERNMENT LLC,** an Illinois limited liability company ("Contractor"). The City and Contractor are each a "Party" to the Agreement or together are "Parties" to the Agreement.

RECITALS

A. The City issued solicitation number **2018011** ("Solicitation") for **INFORMATION TECHNOLOGY SOLUTIONS & SERVICES**, to which Contractor provided a response ("Response"); and

B. The City Selected Contractor's Response as being in the best interest of the City and wishes to engage Contractor in providing the services/materials described in the Solicitation and Response.

In consideration of the reciprocal promises contained in the Agreement, and for other valuable and good consideration, which the Parties acknowledge the receipt and sufficiency of, the Parties agree to the following Terms & Conditions.

TERMS & CONDITIONS

1. **Term**. This Agreement is for a term beginning on **March 1, 2018** and ending on **February 28, 2023**. The use of the word "Term" in the Agreement includes the aforementioned period as well as any applicable extensions or renewals in accordance with this Section 1.

   1.1 **Renewals.** On the mutual written agreement of the Parties, the Term may be renewed up to a maximum of **two (2), one (1) year** periods. Any renewal(s) will be a continuation of the same terms and conditions as in effect immediately prior to the expiration of the then-current term.

   1.2 **Extension for Procurement Processes**. Upon the expiration of the Term of this Agreement, including any renewals permitted herein, at the City's sole discretion this Agreement may be extended on a month-to-month basis for a maximum of six (6) months to allow for the City's procurement processes in the selection of a Contractor to provide the services/materials provided under this Agreement. The City will notify the Contractor in writing of its intent to extend the Agreement at least thirty (30) calendar days prior to the expiration of the Term. Any extension under this Subsection 1.2 will be a continuation of the same terms and conditions as in effect immediately prior to the expiration of the then-current term.

   1.3 **Delivery.** Delivery shall be made to the location(s) contained in the Scope of Work within thirty (30) days after receipt of an order**.** Title to Products and risk of loss or damage during shipment pass from Contractor to City upon delivery to the destination specified on the applicable purchase order (F.O.B. Destination, freight prepaid and allowed). Contractor agrees to deliver all products to be delivered F.O.B. destination, freight pre-paid and allowed to various locations throughout the City. **I**n many cases within the City, the Contractor may be asked to deliver all products to the front counter within a given department. For special orders, the Parties agree to negotiate in good faith an alternative delivery date when necessary. Notwithstanding the foregoing, title to software will remain with the applicable licensor(s), and the City's rights therein are contained in the license agreement between such licensor(s) and the City.

2. **Scope of Work**. The Contractor will provide the necessary staff, services and associated resources to provide the City with the services, materials, and obligations attached to this Agreement as **Exhibit A** ("Scope of Work") Contractor will be responsible for all costs and expenses incurred by Contractor that are incident to the performance of the Scope of Work unless otherwise

stated in **Exhibit A**. Contractor will supply all equipment and instrumentalities necessary to perform the Scope of Work. If set forth in **Exhibit A**, the City will provide Contractor's personnel with adequate workspace and such other related facilities as may be required by Contractor to carry out the Scope of Work.

The Agreement is based on the Solicitation and Response which are hereby incorporated by reference into the Agreement as if written out and included herein. In addition to the requirements specifically set forth in the Scope of Work, the Parties acknowledge and agree that the Parties shall perform in accordance with all terms, conditions, specifications and other requirements set forth within the Solicitation and Response unless modified herein.

3. **Orders**. Orders must be placed with the Contractor by either a: (i) Purchase Order when for a one-time purchase; (ii) procurement card; (iii) Delivery Order or Blanket Purchase Order for a requirements contract where multiple as-needed orders will be placed with the Contractor; (iv) Executed Statement of Work (SOW); or (v) Executed Cloud Service Order (CSO) Form. The City may use the Internet to communicate with Contractor and to place orders as permitted under this Agreement. Unless explicitly stated in a separate writing executed by the Parties, the terms and conditions on any order form, quote, or similar document provided by Contractor to the City will not take precedence over the language set forth in this Agreement or any of the documents outlined in Section 4 below.

4. **Document Order of Precedence**. In the event of any inconsistency between the terms of the body of the Agreement, Exhibits, Solicitation, and Response, the language of the documents will control in the following order.

   a. Amendments to the Agreement
   b. Agreement
   c. Exhibits
      1. Mesa Standard Terms & Conditions (Exhibit C)
      2. Pricing (Exhibit B)
      3. Scope of Work (Exhibit A)
      4. Other Exhibits not listed above
   d. Solicitation including any addenda
   e. Contractor's Response

5. **Payment.** Subject to the provisions of the Agreement, the City will pay Contractor the sum(s) described in **Exhibit B** ("Pricing") in consideration of Contractor's performance of the Scope of Work during the Term.

6. **Pricing.** Contractor's pricing shall be in the format of a minimum percentage discount off a verifiable price index. Contractor may submit discounts for various manufacturers. At the time of purchase, Contractor may offer deeper discounts beyond the discounted price list, based on volume or other factors, as applicable. Minimum discounts will remain firm during the entirety of the Term of the Agreement, unless the Contractor requests to increase its discount percentage, and Pricing will include all charges that may be incurred in fulfilling requirement(s). In addition to decreasing prices for the balance of the Term due to a change in market conditions, a Contractor may conduct sales promotions involving price reductions for a specified lesser period. In the event a product is discontinued, Contractor will provide a product of the same or greater functionality, utilizing the discount structure.

   It is the Contractor's responsibility to provide the City with an up-to-date price list for the duration of the Agreement.

   6.1 **Prices.** All pricing discounts shall be firm for the Term and all extensions or renewals of the Term except where otherwise provided in this Agreement, and will include all costs of the Contractor providing the materials/service including transportation, insurance and

warranty costs. No fuel surcharges will be accepted unless allowed in this Agreement. The City shall not be invoiced at prices higher than those stated in the Agreement.

No price modifications will be accepted without proper request by the Contractor and response by the City's Purchasing Division.

6.2 **Price Adjustment**. Any requests for reasonable price adjustments must be submitted in accordance with this Section. Requests for adjustment in cost of labor and/or materials must be supported by appropriate documentation. There is no guarantee the City will accept a price adjustment; therefore, Contractor should be prepared for the Pricing to be firm over the Term of the Agreement. The City is only willing to entertain price adjustments based on an increase to Contractor's actual expenses or other reasonable adjustment in providing the services/materials under the Agreement. If the City agrees to the adjusted price terms, the City shall issue written approval of the change.

During the sixty (60) day period prior to the expiration of the then-current term date of the Agreement, the Contractor may submit a written request to the City to allow an increase to the prices in an amount not to exceed the twelve (12) month change in the ***Consumer Price Index for All Urban Consumers*** (CPI-U), US City Average, All Items, Not Seasonally Adjusted as published by the U.S. Department of Labor, Bureau of Labor Statistics (http://www.bls.gov/cpi/home.htm). The City shall review the request for adjustment and respond in writing; such response and approval shall not be unreasonably withheld.

6.3 **Renewal and Extension Pricing.** Any extension of the Agreement will be at the same pricing as the initial term. If the Agreement is renewed in accordance with Section 1, pricing may be adjusted for amounts other than inflation that represent actual costs to the Contractor based on the mutual agreement of the Parties. Contractor may submit a request for a price adjustment along with appropriate supporting documentation demonstrating the cost to the Contractor. Renewal prices shall be firm for the term of the renewal period and may be adjusted thereafter as outlined in the Subsection 6.2. There is no guarantee the City will accept a price adjustment.

6.4 **Invoices**. Payment will be made to Contractor following the City's receipt of a properly completed invoice. Any issues regarding billing or invoicing must be directed to the City Department/Division requesting the service or material from the Contractor. A properly completed invoice should contain, at a minimum, all of the following:

a. Contractor name, address, and contact information;
b. City billing information;
c. City contract number as listed on the first page of the Agreement;
d. Invoice number and date;
e. Payment terms;
f. Date of service or delivery;
g. Description of materials or services provided;
h. If materials provided, the quantity delivered and pricing of each unit;
i. Applicable taxes; and
j. Total amount due.

6.5 **Payment of Funds**. Contractor acknowledges the City may, at its option and where available use a Procurement Card/e-Payables to make payment for orders under the Agreement; otherwise, payment will be through a traditional method of a check or Electronic Funds Transfer (EFT) as available.

6.6 **Disallowed Costs, Overpayment**. If at any time the City determines that a cost for which payment was made to Contractor is a disallowed cost, such as an overpayment or a charge for materials/service not in accordance with the Agreement, the City will notify Contractor in writing of the disallowance; such notice will state the means of correction which may be, but is not limited to, adjustment of any future claim/invoice submitted by Contractor in the amount of the disallowance or to require repayment of the disallowed amount by Contractor. Contractor will be provided with the opportunity to respond to the notice.

7. **Insurance**.

7.1 Contractor must obtain and maintain at its expense throughout the Term of the Agreement, at a minimum, the types and amounts of insurance set forth in this Section 7 from insurance companies authorized to do business in the State of Arizona; the insurance must cover the materials/service to be provided by Contractor under the Agreement. For any insurance required under the Agreement, Contractor will name the City of Mesa, its agents, representatives, officials, volunteers, officers, elected officials, and employees as additional insured, as evidenced by providing either an additional insured endorsement or proper insurance policy excerpts.

7.2 Nothing in this Section 7 limits Contractor's responsibility to the City. The insurance requirements herein are minimum requirements for the Agreement and in no way limit any indemnity promise(s) contained in the Agreement.

7.3 The City does not warrant the minimum limits contained herein are sufficient to protect Contractor and subcontractor(s) from liabilities that might arise out of performance under the Agreement by Contractor, its agents, representatives, employees, or subcontractor(s). Contractor is encouraged to purchase additional insurance as Contractor determines may be necessary.

7.4 Each insurance policy required under the Agreement must be in effect at or prior to the execution of the Agreement and remain in effect for the Term of the Agreement.

7.5 Prior to the execution of the Agreement, Contractor will provide the City with a Certificate of Insurance (using an appropriate "ACORD" or equivalent certificate) signed by the issuer with applicable endorsements. The City reserves the right to request additional copies of any or all of the policies, endorsements, or notices relating thereto required under the Agreement.

7.6 When the City requires a Certificate of Insurance to be furnished, Contractor's insurance is primary of all other sources available. When the City is a certificate holder and/or an additional insured, Contractor agrees no policy will expire, be canceled, or be materially changed to affect the coverage available without advance written notice to the City.

7.7 The policies required by the Agreement must contain a waiver of transfer rights of recovery (waiver of subrogation) against the City, its agents, representatives, officials, volunteers, officers, elected officials, and employees for any claims arising out of the work of Contractor.

7.8 All insurance certificates and applicable endorsements are subject to review and approval by the City's Risk Management Division.

7.9 **Types and Amounts of Insurance**. Contractor must obtain and retain throughout the term of the Agreement, at a minimum, the following:

7.9.1 Worker's compensation insurance in accordance with the provisions of Arizona law. If Contractor operates with no employees, Contractor must provide the City

with written proof Contractor has no employees. If employees are hired during the course of this Agreement, Contractor must procure worker's compensations in accordance with Arizona law.

7.9.2 The Contractor shall maintain at all times during the term of this contract, a minimum amount of $1 million per occurrence/$2 million aggregate Commercial General Liability insurance, including Contractual Liability. For Commercial General Liability insurance, the City of Mesa, their agents, officials, volunteers, officers, elected officials or employees shall be named as additional insured, as evidenced by providing an additional insured endorsement.

7.9.3 Automobile liability, bodily injury and property damage with a limit of $1 million per occurrence including owned, hired and non-owned autos.

8. **Requirements Contract**. Contractor acknowledges and agrees the Agreement is a requirements contract; the Agreement does not guarantee any purchases will be made (minimum or maximum). Orders will only be placed when the City identifies a need and issues a purchase order or a written notice to proceed. The City reserves the right to cancel purchase orders or a notice to proceed within three (3) business days of issuance; any such cancellation will be in writing. Should a purchase order or notice to proceed be canceled, the City agrees to reimburse Contractor for any actual and documented costs incurred by Contractor. The City will not reimburse Contractor for any avoidable costs incurred after receipt of cancellation including, but not limited to, lost profits, shipment of materials, or performance of services. The City reserves the right to purchase contracted items through other sources if determined in the best interests of the City to do so.

9. **Notices.** All notices to be given pursuant to the Agreement will be delivered to the Contractor at the address listed on Page 1 of this Agreement. Notice will be delivered pursuant to the requirements set forth the Mesa Standard Terms and Conditions that are attached to the Agreement as **Exhibit C**.

10. **Representations of Contractor**. To the best of Contractor's knowledge, Contractor agrees that:

a. Contractor has no obligations, legal or otherwise, inconsistent with the terms of the Agreement or with Contractor's undertaking of the relationship with the City;

b. Performance of the services called for by the Agreement do not and will not violate any applicable law, rule, regulation, or any proprietary or other right of any third party;

c. Contractor will not use in the performance of Contractor's responsibilities under the Agreement any proprietary information or trade secret of a former employer of its employees (other than City, if applicable); and

d. Contractor has not entered into and will not enter into any agreement, whether oral or written, in conflict with the Agreement.

11. **Mesa Standard Terms and Conditions**. **Exhibit C** to the Agreement is the Mesa Standard Terms and Conditions as modified by the Parties, which are incorporated by reference into the Agreement as though fully set forth herein. In the event of any inconsistency between the terms of the Agreement and the Mesa Standard Terms and Conditions, the language of the Agreement will control. The Parties or a Party are referred to as a "party" or "parties" in the Mesa Standard Terms and Conditions. The Term is referred to as the "term" in the Mesa Standard Terms and Conditions.

12. **Counterparts and Facsimile or Electronic Signatures**. This Agreement may be executed in two (2) or more counterparts, each of which will be deemed an original and all of which, taken together, will constitute one agreement. A facsimile or other electronically delivered signature to the

Agreement will be deemed an original and binding upon the Party against whom enforcement is sought.

13. **Incorporation of Recitals and Exhibits.** All Recitals and Exhibits to the Agreement are hereby incorporated by reference into the Agreement as if written out and included herein. In the event of any inconsistency between the terms of the body of the Agreement and the Exhibits, the language of the Agreement will control.

    Exhibits to this Agreement are the following:
    (A) Scope of Work / Technical Specifications
    (B) Pricing
    (C) Mesa Standard Terms and Conditions

14. **Attorneys' Fees**. The prevailing Party in any litigation arising out of the Agreement will be entitled to the recovery of its reasonable attorney's fees, court costs, and other litigation related costs and fees from the other Party.

15. **Additional Acts**. The Parties agree to execute promptly such other documents and to perform such other acts as may be reasonably necessary to carry out the purpose and intent of the Agreement.

16. **Headings.** The headings of the Agreement are for reference only and will not limit or define the meaning of any provision of the Agreement.

By executing below, each Party acknowledges that it understands, approves, and accepts all of the terms of the Agreement and the attached exhibits.

IN WITNESS WHEREOF, the parties have executed this Agreement as of the date first above written.

EXHIBIT A
SCOPE OF WORK

1. **MINIMUM REQUIREMENTS.** Contractor must meet the following minimum qualifications:

a. A full range of information technology solution products and services to meet varying requirements of governmental agencies.
b. Have a strong national presence as a computer solutions provider.
c. Have a distribution model capable of delivering products, free of charge, in a timely manner on a nationwide basis.
d. Have a demonstrated sales presence.
e. Ability to provide a toll-free telephone and state of the art electronic facsimile and internet ordering and billing capabilities.
f. Be able to meet the minimum requirements of the cooperative purchasing program detailed herein.

2. **ORDERING.** Although the City is open to alternate ordering methods, the primary methods for customers placing orders with the Contractor is through the following:

a. Online
b. Telephone
c. Fax
d. Email

3. **SCOPE OF PRODUCTS.** Contractor will provide the ability to purchase a comprehensive, wide variety of Information Technology Solution Products including, but not limited to, the following categories:

a. Personal Computer Systems: National brand name desktop PCs, notebooks and laptops from Enterprise Tier and Middle Tier Contractors that are business related computers, manufactured by companies, such as, Apple, COMPAQ, Dell, Gateway, Hewlett Packard, IBM / Lenovo and Toshiba.

b. Standard Business Workstation: These will be used for typical tasks, which will include word processing, spreadsheet analysis, database management, business graphics, statistical analysis, internet, and other office automation activities. Product will include the operating system license, software media and documentation in the hardware shipment.

c. High End Workstation: These will be used by application developers using GIS, CASE or other high-level language development tools, Computer Aided Design and Drafting professional, Internet Application developers or other sophisticated application work. Product will include the operating system license, software media and documentation in the hardware shipment.

d. Laptop Computer or Notebook: These will be used by traveling or remote access users for typical office automation and business productivity use. With a port replicator or docking station, it may also be used as a standard desktop. Product will include the operating system license, software media and documentation in the hardware shipment.

e. Network Equipment: This includes equipment primarily used for communications over an IP network. This includes layer 2 and layer 3 switches, routers, area wireless access points, point-to-point wireless access, optics, media interfaces (i.e. serial, T1, T3, OC3) and fiber channel. Class of equipment should include home office, small and medium business, and enterprise. Contractors may include, but not limited to, Cisco Systems, Dell, Juniper Networks, HP, Extreme Networks, Enterasys Networks, D-Link, Netgear, and Brocade Communications Systems.

f. Monitors: These will include plug and play compatible monitors that are manufactured for the above systems and/or any other brand that may be specifically called for by the ordering entity and which meet the most current UL and OSHA requirements.

g. Computer and Network Products and Peripherals: Complete availability of major manufacturers Product lines on items such as, but not limited to RAM, graphic accelerator cards, network interface cards, cables, printers, scanners, keyboards, drives, memory cards, cables, batteries, etc.

h. Services:

i. Services means such as, consulting, technical support, trade-ins, repair, design, analysis, configuration, implementation, installation, training, and maintenance, etc. In addition, services which are related to the design, use or operation of the Products being purchased such as system configurations, testing, hardware/software installation, upgrades, imaging, etc. as described generally in this Agreement and as more particularly described in a Statement of Work or SOW (meaning a document in electronic or written form that is signed and delivered by each of the Parties for the performance of Services.

ii. Cloud Computing means third party cloud computing and storage services, where Contractor acts as a rebiller only and has no control over the delivery of the cloud computing and storage services. City acknowledges that the cloud service provider, and not Contractor, will be responsible for performance of the Cloud Services. Also, before Contractor can sell cloud computing and/or storage services from a third party to the City, City must execute an agreement governing said cloud computing and/or storage services with the third-party cloud services provider.

i. Comprehensive Product Offering: Contractor's catalog and Services set forth in Exhibit B shall be available. The City reserves the right to accept or reject any or all items offered.

j. Financing: Options available such as lease programs and conditional sales contracts.

4. **LICENSES.** The City may be required to sign a separate agreement, rider or End User Licensing Agreement ("EULA"), or such other terms as required by manufacturers, software publisher, or cloud service provider.

5. **DEFECTIVE PRODUCT.** All defective Products shall be replaced and exchanged by the Contractor. The cost of transportation, re-shipping or other like expenses shall be paid by the Contractor and in the case of certain, special orders, other reasonable charges may be paid by the Contractor as defined in the order or as otherwise agreed to by the Parties. All replacement Products must be received by the City within seven (7) days of initial notification, when such products are in Contractor stock; if replacement Product is not in Contractor's stock, Contractor will use commercially reasonable efforts to order the product within one (1) business day of the initial notification from the City and will ensure product is received within seven (7) days after Contractor's receipt of the product.

CDW•G will work with Manufacturers and the City or Participating Agencies, as applicable, post award to ensure they are aware of and participating in special manufacturer programs.

CDW•G Account Managers will work with the City or Participating Agencies, as applicable, post award to determine if large orders qualify to receive additional discounts. These discounts are dependent on order size, delivery schedule and will be negotiated with Manufacturers.

As Apple's largest Corporate Channel Partner in the U.S., CDW•G has negotiated to offer Apple Products to Eligible Government and Educational Entities at the discount listed above and in the pricing table in this Exhibit B.

CDW•G Professional Services Offering

Major Metro Service Areas

Washington, DC	Raleigh	Madison
New York City Metro	Houston	Wausau
Los Angeles	Tampa	Milwaukee
San Francisco	Atlanta	Appleton
San Diego	National	Grand Rapids
Boston Metro	Dallas	Indianapolis
Chicago	Cincinnati	Cleveland
Federal	Detroit	
Philadelphia	Minneapolis	
Seattle	St. Louis/KC	
	Denver	
	Nashville	
	Portland	

Services apply to both CDW•G executed professional services and services which are sub-contracted through a CDW•G authorized third party provider. Hourly or fixed rates will be negotiated based on the customer, geography, scope of the professional service engagement, and level of engineer required to perform the service. CDW•G will create a Statement of Work (SOW) detailing the exact scoping and pricing of the Services to be provided, which will be executed by CDW•G and the National IPA member prior to the start of Services. Sample SOW is included in our proposal. Expenses (T and E) may be an additional consideration depending on project specifics.

EXHIBIT C
MESA STANDARD TERMS AND CONDITIONS

1. **INDEPENDENT CONTRACTOR.** It is expressly understood that the relationship of Contractor to the City will be that of an independent contractor. Contractor and all persons employed by Contractor, either directly or indirectly, are Contractor's employees, not City employees. Accordingly, Contractor and Contractor's employees are not entitled to any benefits provided to City employees including, but not limited to, health benefits, enrollment in a retirement system, paid time off or other rights afforded City employees. Contractor employees will not be regarded as City employees or agents for any purpose, including the payment of unemployment or workers' compensation. If any Contractor employees or subcontractors assert a claim for wages or other employment benefits against the City, Contractor will defend, indemnify and hold harmless the City from all such claims.

2. **SUBCONTRACTING.** Contractor may not subcontract work under this Agreement without the express written permission of the City. If Contractor has received authorization to subcontract work, it is agreed that all subcontractors performing work under the Agreement must comply with its provisions. Further, all agreements between Contractor and its subcontractors must provide that the terms and conditions of this Agreement be incorporated therein.

3. **ASSIGNMENT.** This Agreement may not be assigned either in whole or in part without first receiving the City's written consent. Any attempted assignment, either in whole or in part, without such consent will be null and void and in such event the City will have the right at its option to terminate the Agreement. No granting of consent to any assignment will relieve Contractor from any of its obligations and liabilities under the Agreement.

4. **SUCCESSORS AND ASSIGNS, BINDING EFFECT.** This Agreement will be binding upon and inure to the benefit of the parties and their respective permitted successors and assigns.

5. **NO THIRD-PARTY BENEFICIARIES.** This Agreement is intended for the exclusive benefit of the parties. Nothing set forth in this Agreement is intended to create, or will create, any benefits, rights, or responsibilities in any third parties.

6. **NON-EXCLUSIVITY.** The City, in its sole discretion, reserves the right to request the materials or services set forth herein from other sources when deemed necessary and appropriate. No exclusive rights are encompassed through this Agreement.

7. **AMENDMENTS.** There will be no oral changes to this Agreement. This Agreement can only be modified in a writing signed by both parties. No charge for extra work or material will be allowed unless approved in writing, in advance, by the City and Contractor.

8. **TIME OF THE ESSENCE.** Time is of the essence to the performance of the parties' obligations under this Agreement.

9. **COMPLIANCE WITH APPLICABLE LAWS.**

   a. **General.** Contractor must procure all permits and licenses, and pay all charges and fees necessary and incidental to the lawful conduct of business. Contractor must stay fully informed of existing and future federal, state, and local laws, ordinances, and regulations that in any manner affect the fulfillment of this Agreement and must comply with the same at its own expense. Contractor bears full responsibility for training, safety, and providing necessary equipment for all Contractor personnel to achieve throughout the term of the Agreement. Upon request, Contractor will demonstrate to the City's satisfaction any programs, procedures, and other activities used to ensure compliance.

   b. **Drug-Free Workplace.** Contractor is hereby advised that the City has adopted a policy establishing a drug-free workplace for itself and those doing business with the City to ensure the safety and health of all persons working on City contracts and projects. Contractor will require a drug-free workplace for all Contractor personnel working under this Agreement. Specifically, all Contractor personnel who are working under this Agreement must be notified in writing by Contractor that they are prohibited from the manufacture, distribution, dispensation, possession, or unlawful use of a controlled substance in the workplace.

Contractor agrees to prohibit the use of intoxicating substances by all Contractor personnel, and will ensure that Contractor personnel do not use or possess illegal drugs while in the course of performing their duties.

c. **Federal and State Immigration Laws.** Contractor agrees to comply with the Immigration Reform and Control Act of 1986 (IRCA) in performance under this Agreement and to permit the City and its agents to inspect applicable personnel records to verify such compliance as permitted by law. Contractor will ensure and keep appropriate records to demonstrate that all Contractor personnel have a legal right to live and work in the United States.

   i. As applicable to Contractor, under the provisions of A.R.S. § 41-4401, Contractor hereby warrants to the City that Contractor and each of its subcontractors will comply with, and are contractually obligated to comply with, all federal immigration laws and regulations that relate to their employees and A.R.S. § 23-214(A) (hereinafter "Contractor Immigration Warranty").

   ii. A breach of the Contractor Immigration Warranty will constitute as a material breach of this Agreement and will subject Contractor to penalties up to and including termination of this Agreement at the sole discretion of the City.

   iii. The City retains the legal right to inspect the papers of all Contractor personnel who provide services under this Agreement to ensure that Contractor or its subcontractors are complying with the Contractor Immigration Warranty. Contractor agrees to assist the City in regard to any such inspections.

   iv. The City may, at its sole discretion, conduct random verification of the employment records of Contractor and any subcontractor to ensure compliance with the Contractor Immigration Warranty. Contractor agrees to assist the City in regard to any random verification performed.

   v. Neither Contractor nor any subcontractor will be deemed to have materially breached the Contractor Immigration Warranty if Contractor or subcontractor establishes that it has complied with the employment verification provisions prescribed by Sections 274A and 274B of the Federal Immigration and Nationality Act and the E-Verify requirements prescribed by A.R.S. § 23-214 (A).

d. **Nondiscrimination.** Contractor represents and warrants that it does not discriminate against any employee or applicant for employment or person to whom it provides services because of race, color, religion, sex, national origin, or disability, and represents and warrants that it complies with all applicable federal, state, and local laws and executive orders regarding employment. Contractor and Contractor's personnel will comply with applicable provisions of Title VII of the U.S. Civil Rights Act of 1964, as amended, Section 504 of the Federal Rehabilitation Act, the Americans with Disabilities Act (42 U.S.C. § 12101 et seq.), and applicable rules in performance under this Agreement.

e. **State Sponsors of Terrorism Prohibition.** Per A.R.S. § 35-392, Contractor must not be in violation of section 6(j) of the Federal Export Administration Act and subsequently prohibited by the State of Arizona from selling goods of services to the City.

10. **SALES/USE TAX, OTHER TAXES.**

a. Contractor is responsible for the payment of all taxes including federal, state, and local taxes related to or arising out of Contractor's services under this Agreement, including by way of illustration but not limitation, federal and state income tax, Social Security tax, unemployment insurance taxes, and any other taxes or business license fees as required. If any taxing authority should deem Contractor or Contractor employees an employee of the City, or should otherwise claim the City is liable for the payment of taxes that are Contractor's responsibility under this Agreement, Contractor will indemnify the City for any tax liability, interest, and penalties imposed upon the City.

b. The City is exempt from paying certain federal excise taxes and will furnish an exemption certificate upon request. The City is not exempt from state and local sales/use taxes.

11. **AMOUNTS DUE THE CITY.** Contractor must be current and remain current in all obligations due to the City during the performance of Services under the Agreement. Payments to Contractor may be offset by any delinquent amounts due the City or fees and charges owed to the City.

12. **PUBLIC RECORDS.** Contractor acknowledges that the City is a public entity, subject to Arizona's public records laws (A.R.S. § 39-121 et. seq.) and that any documents related to this Agreement may be subject to disclosure pursuant to state law in response to a public records request or to subpoena or other judicial process.

a. If Contractor believes document related to the Agreement contains trade secrets or other proprietary data, Contractor must notify the City and include with the notification a statement that explains and supports Contractor's claim. Contractor also must specifically identify the trade secrets or other proprietary data that Contractor believes should remain confidential.

b. In the event the City determines it is legally required to disclose pursuant to law any documents or information Contractor deems confidential trade secrets or proprietary data, the City, to the extent possible, will provide Contractor with prompt written notice by certified mail, fax, email or other method that tracks delivery status of the requirement to disclose the information so Contractor may seek a protective order from a court having jurisdiction over the matter or obtain other appropriate remedies. The notice will include a time period for Contractor to seek court ordered protection or other legal remedies as deemed appropriate by Contractor. If Contractor does not obtain such court ordered protection by the expiration of said time period, the City may release the information without further notice to Contractor.

13. **AUDITS AND RECORDS.** Contractor must preserve the records related to this Agreement for six (6) years after completion of the Agreement. The City or its authorized agent reserves the right to inspect any records related to the performance of work specified herein. In addition, the City may inspect any and all payroll, billing or other relevant records kept by Contractor in relation to the Agreement. Contractor will permit such inspections and audits during normal business hours and upon reasonable notice by the City. The audit of records may occur at Contractor's place of business or at City offices, as determined by the City. Notwithstanding the foregoing, any Agreement audits must be pursuant to a signed Confidentiality Agreement agreed to by both parties which will be subject to applicable law, including the Arizona Public Records law. Contractor is not required to keep original documents and copies of relevant documents will suffice for the purposes of this provision. The audit must be conducted during regular business hours at a mutually agreeable time and location, and upon reasonable advanced notice of records to be audited.

14. **BACKGROUND CHECK.** The City may conduct criminal, driver history, and all other requested background checks of Contractor personnel who would perform services under the Agreement or who will have access to the City's information, data, or facilities in accordance with the City's current background check policies. Any officer, employee, or agent that fails the background check must be replaced immediately for any reasonable cause not prohibited by law.

15. **SECURITY CLEARANCE AND REMOVAL OF CONTRACTOR PERSONNEL.** The City will have final authority, based on security reasons: (i) to determine when security clearance of Contractor personnel is required; (ii) to determine the nature of the security clearance, up to and including fingerprinting Contractor personnel; and (iii) to determine whether or not any individual or entity may provide services under this Agreement. If the City objects to any Contractor personnel for any reasonable cause not prohibited by law, then Contractor will, upon notice from the City, remove any such individual from performance of services under this Agreement.

16. **DEFAULT.**

a. A party will be in default if that party:

i. Is or becomes insolvent or is a party to any voluntary bankruptcy or receivership proceeding, makes an assignment for a creditor, or there is any similar action that affects Contractor's capability to perform under the Agreement;

ii. Is the subject of a petition for involuntary bankruptcy not removed within sixty (60) calendar days;

iii. Conducts business in an unethical manner as set forth in the City Procurement Rules Article 7 or in an illegal manner; or

iv. Fails to carry out any term, promise, or condition of the Agreement.

b. Contractor will be in default of this Agreement if Contractor is debarred from participating in City procurements and solicitations in accordance with Article 6 of the City's Procurement Rules.

c. **Notice and Opportunity to Cure.** In the event a party is in default then the other party may, at its option and at any time, provide written notice to the defaulting party of the default. The defaulting party will have thirty (30) days from receipt of the notice to cure the default; the thirty (30) day cure period may be extended by mutual agreement of the parties, but no cure period may exceed ninety (90) days. A default notice will be deemed to be sufficient if it is reasonably calculated to provide notice of the nature and extent of such default. Failure of the non-defaulting party to provide notice of the default does not waive any rights under the Agreement.

d. **Anticipatory Repudiation.** Whenever the City in good faith has reason to question Contractor's intent or ability to perform, the City may demand that Contractor give a written assurance of its intent and ability to perform. In the event that the demand is made and no written assurance is given within five (5) calendar days, the City may treat this failure as an anticipatory repudiation of the Agreement.

17. **REMEDIES.** The remedies set forth in this Agreement are not exclusive. Election of one remedy will not preclude the use of other remedies. In the event of default:

a. The non-defaulting party may terminate the Agreement, and the termination will be effective immediately or at such other date as specified by the terminating party.

b. The City may purchase the services required under the Agreement from the open market, complete required work itself, or have it completed at the expense of Contractor. If the cost of obtaining substitute services exceeds the contract price, the City may recover the excess cost by: (i) requiring immediate reimbursement to the City; (ii) deduction from an unpaid balance due to Contractor; (iii) collection against the proposal and/or performance security, if any; (iv) collection against liquidated damages (if applicable); or (v) a combination of the aforementioned remedies or other remedies as provided by law. Costs includes any and all, fees, and expenses incurred in obtaining substitute services and expended in obtaining reimbursement, including, but not limited to, administrative expenses, attorneys' fees, and costs.

c. The non-defaulting party will have all other rights granted under this Agreement and all rights at law or in equity that may be available to it.

d. Neither party will be liable for incidental, special, or consequential damages.

18. **CONTINUATION DURING DISPUTES.** Contractor agrees that during any dispute between the parties, Contractor will continue to perform its obligations until the dispute is settled, instructed to cease performance by the City, enjoined or prohibited by judicial action, or otherwise required or obligated to cease performance by other provisions in this Agreement.

19. **TERMINATION FOR CONVENIENCE.** The City reserves the right to terminate this Agreement in part or in whole upon thirty (30) calendar days' written notice.

20. **TERMINATION FOR CONFLICT OF INTEREST (A.R.S. § 38-511).** Pursuant to A.R.S. § 38-511, the City may cancel this Agreement within three (3) years after its execution, without penalty or

further obligation, if any person significantly involved in initiating, securing, drafting, or creating the Agreement for the City becomes an employee or agent of Contractor.

21. **TERMINATION FOR NON-APPROPRIATION AND MODIFICATION FOR BUDGETARY CONSTRAINT.** The City is a governmental agency which relies upon the appropriation of funds by its governing body to satisfy its obligations. If the City reasonably determines that it does not have funds to meet its obligations under this Agreement, the City will have the right to terminate the Agreement without penalty on the last day of the fiscal period for which funds were legally available. In the event of such termination, the City agrees to provide written notice of its intent to terminate thirty (30) calendar days prior to the stated termination date.

22. **PAYMENT TO CONTRACTOR UPON TERMINATION.** Upon termination of this Agreement, Contractor will be entitled only to payment for those services performed up to the date of termination, and any authorized expenses already incurred up to such date of termination. The City will make final payment within thirty (30) calendar days after the City has both completed its appraisal of the materials and services provided and received Contractor's properly prepared final invoice.

23. **NON-WAIVER OF RIGHTS.** There will be no waiver of any provision of this agreement unless approved in writing and signed by the waiving party. Failure or delay to exercise any rights or remedies provided herein or by law or in equity, or the acceptance of, or payment for, any services hereunder, will not release the other party of any of the warranties or other obligations of the Agreement and will not be deemed a waiver of any such rights or remedies.

24. **INDEMNIFICATION/LIABILITY.**

a. To the fullest extent permitted by law, Contractor agrees to defend, indemnify, and hold the City, its officers, agents, and employees, harmless from and against any and all liabilities, demands, claims, suits, losses, damages, causes of action, fines or judgments, including costs, attorneys', witnesses', and expert witnesses' fees, and expenses incident thereto, relating to, arising out of, or resulting from: (i) misconduct by Contractor personnel under this Agreement; (ii) any negligent acts, errors, mistakes or omissions by Contractor or Contractor personnel; and (iii) Contractor or Contractor personnel's failure to comply with this Agreement. However, notwithstanding the prior sentence, any claim shall not be an indemnified claim if such claim or damage was caused in whole by the actions of the City, its employees, agents, contractors or representatives.

b. Contractor will update the City during the course of the litigation to timely notify the City of any issues that may involve the independent negligence of the City that is not covered by this indemnification.

c. The City assumes no liability for actions of Contractor and will not indemnify or hold Contractor or any third party harmless for claims based on this Agreement or use of Contractor-provided supplies or Services.

d. IN THE EVENT OF ANY LIABILITY INCURRED BY CONTRACTOR OR ANY OF ITS AFFILIATES HEREUNDER, INCLUDING INDEMNIFICATION OF CITY BY CONTRACTOR, THE ENTIRE LIABILITY OF CONTRACTOR AND ITS AFFILIATES FOR DAMAGES FROM ANY CAUSE WHATSOEVER WILL NOT EXCEED $5,000,000.00 OVER THE ENTIRE TERM OF THE AGREEMENT.

25. **WARRANTY.** Contractor warrants that the services and materials will conform to the requirements of Exhibit A. Additionally, Contractor warrants that all services will be performed in a good, workman-like and professional manner, as stated below.

a. Manufacturer's Warranty. The City understands that the Contractor is not the manufacturer of the products purchased by the City hereunder and the only materials (product) warranties offered are those of the manufacturer, not the Contractor or its affiliates unless the manufacturer is the Contractor or its affiliates. THE CONTRACTOR AND ITS AFFILIATES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES EITHER EXPRESS OR IMPLIED,

RELATED TO PRODUCTS, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTY OF TITLE, ACCURACY, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WARRANTY OF NONINFRINGEMENT, OR ANY WARRANTY RELATING TO THIRD PARTY SERVICES. THE DISCLAIMER CONTAINED IN THIS PARAGRAPH DOES NOT AFFECT THE TERMS OF ANY MANUFACTURER'S WARRANTY.

b. Services Warranty. City's sole and exclusive remedy with respect to a warranty on the Services provided by Contractor will be, at the sole option of Contractor, to either: (a) use its reasonable commercial efforts to reperform any services not in substantial compliance with this warranty, or (b) refund amounts paid by City related to the portion of the services not in substantial compliance; provided, in each case, City notifies Contractor in writing within five (5) business days after performance of the applicable Services. City shall be solely responsible for daily back-up and other protection of its data and software against loss, damage or corruption during the performance of services and for any necessary reconstruction thereof.

c. Third Party Services Warranty. In connection with the products (materials), certain services, such as extended warranty service by manufacturers, are sold by the Contractor as a distributor or sales agent ("Third Party Services"). In the case of Third Party Services, the third party will be the party responsible for providing the services to the City and the City will look to the third party for any loss, claims or damages arising from or related to the provision of such Third-Party Services. Any amounts, including, but not limited to, taxes, associated with Third Party Services which may be collected by the Contractor will be collected solely in the capacity as an independent sales agent.

26. **THE CITY'S RIGHT TO RECOVER AGAINST THIRD PARTIES.** Contractor will do nothing to prejudice the City's right to recover against third parties for any loss, destruction, or damage to City property, and will at the City's request and expense, furnish to the City reasonable assistance and cooperation, including assistance in the prosecution or defense of suit and the execution of instruments of assignment in favor of the City in obtaining recovery.

27. **NO GUARANTEE OF WORK.** Contractor acknowledges and agrees that it is not entitled to deliver any specific amount of materials or services or any materials or services at all under this Agreement and acknowledges and agrees that the materials or services will be requested by the City on an as needed basis at the sole discretion of the City. Any document referencing quantities or performance frequencies represent the City's best estimate of current requirements, but will not bind the City to purchase, accept, or pay for materials or services which exceed its actual needs.

28. **OWNERSHIP.**

a. Except as it pertains to the Work Product in Subsection (b) below, all deliverables, services, and information provided by Contractor or the City pursuant to this Agreement (whether electronically or manually generated) including without limitation, reports, test plans, and survey results, graphics, and technical tables, originally prepared in the performance of this Agreement, are the property of the City and will not be used or released by Contractor or any other person except with prior written permission by the City.

b. City's rights to Work Product (meaning deliverables to be provided or created individually or jointly in connection with the services, not materials, provided by Contractor, including but not limited to, all inventions, discoveries, methods, processes, formulae, ideas, concepts, techniques, know-how, data, designs, models, prototypes, works of authorship, computer programs, proprietary tools, methods of analysis and other information, whether or not capable of protection by patent, copyright, trade secret, confidentiality, or other proprietary rights, or discovered in the course of performance of this Agreement that are embodied in such work or materials) will be, upon payment in full, a non-transferable, non-exclusive, royalty-free license to use such Work Product solely for City's internal use. City obtains no ownership or other property rights thereto. City agrees that Contractor may incorporate intellectual property created by third parties into the Work Product and that City's right to use such Work Product may be subject to the rights of, and limited by agreements with, such third parties

EXHIBIT C
MESA STANDARD TERMS AND CONDITIONS

29. **USE OF NAME.** Contractor will not use the name of the City of Mesa in any advertising or publicity without obtaining the prior written consent of the City.

30. **PROHIBITED ACTS.** Pursuant to A.R.S. § 38-504, a current or former public officer or employee within the last twelve (12) months shall not represent another organization before the City on any matter for which the officer or employee was directly concerned and personally participated in during their service or employment or over which they had a substantial or material administrative discretion. Further, while employed by the City and for two (2) years thereafter, public officers or employees are prohibited from disclosing or using, without appropriate authorization, any confidential information acquired by such personnel in the course of his or her official duties at the City.

31. **FOB DESTINATION FREIGHT PREPAID AND ALLOWED.** All deliveries will be FOB destination freight prepaid and allowed unless otherwise agreed.

32. **RISK OF LOSS**. Contractor agrees to bear all risks of loss, injury, or destruction of Contractor's goods or equipment incidental to providing these services and such loss, injury, or destruction will not release Contractor from any obligation hereunder.

33. **SAFEGUARDING CITY PROPERTY.** Contractor will be responsible for any damage to City real property or damage or loss of City personal property when such property is the responsibility of or in the custody of Contractor or its employees.

34. **WARRANTY OF RIGHTS.** Contractor warrants it has title to, or the right to allow the City to use, the materials and services being provided and that the City may use same without suit, trouble or hindrance from Contractor or third parties.

35. **PROPRIETARY RIGHTS INDEMNIFICATION.** Without limiting the foregoing, Contractor will at its expense defend the City against all claims asserted by any person that anything provided by Contractor infringes a patent, copyright, trade secret or other intellectual property right (collectively "Claim") and must, without limitation, pay the costs, damages and attorneys' fees awarded against the City in any Claim, or pay any settlement of such Claim. Each party agrees to notify the other promptly of any matters to which this provision may apply and to cooperate with each other in connection with such defense or settlement. If a preliminary or final judgment is obtained against the City's use or operation of the items provided by Contractor hereunder or any part thereof by reason of any alleged infringement, Contractor will, at its sole option and its expense and without limitation, either: (a) modify the item so that it becomes non-infringing; (b) procure for the City the right to continue to use the item; (c) substitute for the infringing item other item(s) having at least equivalent capability; or (d) refund to the City an amount equal to the price paid, less reasonable usage, from the time of installation acceptance through cessation of use, which amount will be calculated on a useful life not less than five (5) years based on a five (5) year straight line amortized basis. The forgoing provisions in this Section state the entire liability of Contractor and the sole and exclusive remedy of the City with respect to any Claim. Contractor shall have no liability or obligation to the City to the extent any Claim is based upon: (i) any combination of anything provided by Contractor with other software, hardware or other materials not authorized by Contractor or manufacturer; or (ii) any addition to, or modification of, anything provided by Contractor made after delivery to the City by any person other than Contractor.

36. **CONTRACT ADMINISTRATION.** The contract will be administered by the Purchasing Administrator and/or an authorized representative from the using department. All questions regarding the contract will be referred to the administrator for resolution. Supplements may be written to the contract for the addition or deletion of services. Payment will be negotiated and determined by the contract administrator(s).

37. **FORCE MAJEURE.** Failure by either party to perform its duties and obligations will be excused by unforeseeable circumstances beyond its reasonable control, including acts of nature, acts of the public enemy, riots, fire, explosion, legislation, and governmental regulation. The party whose performance is so affected will within five (5) calendar days of the unforeseeable circumstance notify the other party of all pertinent facts and identify the force majeure event. The party whose

performance is so affected must also take all reasonable steps, promptly and diligently, to prevent such causes if it is feasible to do so, or to minimize or eliminate the effect thereof. The delivery or performance date will be extended for a period equal to the time lost by reason of delay, plus such additional time as may be reasonably necessary to overcome the effect of the delay, provided however, under no circumstances will delays caused by a force majeure extend beyond one hundred-twenty (120) calendar days from the scheduled delivery or completion date of a task unless agreed upon by the parties.

38. **COOPERATIVE USE OF CONTRACT.** This contract is available through National IPA to agencies nationwide. The City has also entered into various cooperative purchasing agreements with other Arizona government agencies, including the Strategic Alliance for Volume Expenditures (SAVE) cooperative. Under the SAVE Cooperative Purchasing Agreement, any contract may be extended for use by other municipalities, school districts and government agencies through National IPA or SAVE in the State of Arizona with the approval of Contractor. Any such usage by other entities must be in accordance with the statutes, codes, ordinances, charter and/or procurement rules and regulations of the respective government agency.

A contractor, subcontractor or vendor or any employee of a contractor, subcontractor or vendor who is contracted to provide services on a regular basis at an individual school shall obtain a valid fingerprint clearance card pursuant to title 41, chapter 12, article 3.1. A school district governing board shall adopt policies to exempt a person from the requirements of this subsection if the person's normal job duties are not likely to result in independent access to or unsupervised contact with pupils. A school district, its governing board members, its school council members and its employees are exempt from civil liability for the consequences of adoption and implementation of policies and procedures pursuant to this subsection unless the school district, its governing board members, its school council members or its employees are guilty of gross negligence or intentional misconduct.

Additionally, Contractor will comply with the governing body's fingerprinting policy of each individual school district and public entity. Contractor, subcontractors, vendors and their employees will not provide services on school district properties until authorized by the school district.

Orders placed by other agencies and payment thereof will be the sole responsibility of that agency. The City is not responsible for any disputes arising out of transactions made by others. The City is not a party to any agreements between the Contractor and National IPA, National IPA and other agencies, the Contractor and other agencies, or any third-party contracts in any way related to this Agreement or the cooperative use of this Agreement.

39. **FUEL CHARGES AND PRICE INCREASES.** No fuel surcharges will be accepted. No price increases will be accepted without proper request by Contractor and response by the City's Purchasing Division.

40. **NOTICES.** All notices to be given pursuant to this Agreement must be delivered to the parties at their respective addresses. Notices may be (i) personally delivered; (ii) sent via certified or registered mail, postage prepaid; (iii) sent via overnight courier; or (iv) sent via email or facsimile. If provided by personal delivery, receipt will be deemed effective upon delivery. If sent via certified or registered mail, receipt will be deemed effective three (3) calendar days after being deposited in the United States mail. If sent via overnight courier, email or facsimile, receipt will be deemed effective two (2) calendar days after the sending thereof.

41. **GOVERNING LAW, FORUM.** This Agreement is governed by the laws of the State of Arizona. The exclusive forum selected for any proceeding or suit in law or equity arising from or incident to this Agreement will be Maricopa County, Arizona.

42. **INTEGRATION CLAUSE.** This Agreement, including all attachments and exhibits hereto, supersede all prior oral or written agreements, if any, between the parties and constitutes the entire agreement between the parties with respect to the work to be performed.

EXHIBIT C
MESA STANDARD TERMS AND CONDITIONS

43. **PROVISIONS REQUIRED BY LAW.** Any provision required by law to be in this Agreement is a part of this Agreement as if fully stated in it.

44. **SEVERABILITY.** If any provision of this Agreement is declared void or unenforceable, such provision will be severed from this Agreement, which will otherwise remain in full force and effect. The parties will negotiate diligently in good faith for such amendment(s) of this Agreement as may be necessary to achieve the original intent of this Agreement, notwithstanding such invalidity or unenforceability.

45. **SURVIVING PROVISIONS.** Notwithstanding any completion, termination, or other expiration of this Agreement, all provisions which, by the terms of reasonable interpretation thereof, set forth rights and obligations that extend beyond completion, termination, or other expiration of this Agreement, will survive and remain in full force and effect. Except as specifically provided in this Agreement, completion, termination, or other expiration of this Agreement will not release any party from any liability or obligation arising prior to the date of termination.

46. **A.R.S. SECTIONS 1-501 and 1-502.** Pursuant to Arizona Revised Statutes Sections 1-501 and 1-502, any person who applies to the City for a local public benefit (the definition of which includes a grant, contract or loan) must demonstrate his or her lawful presence in the United States. As the Agreement is deemed a local public benefit, if Contractor is an individual (natural) person or sole proprietorship, Contractor agrees to sign and submit the necessary documentation to prove compliance with the statutes as applicable.

RE: Information Technology Solutions and Services Solicitation #2018011

Dear Ms. Brause:

CDW·G is pleased to present the following proposal to the City of Mesa. As a leading provider of IT solutions to state and local entities, we are excited to present our response to your needs. Over the past decade through our relationship with National IPA, we have seen a consistent 30% annual growth of our contract. Our contract expertise, customer-focus, and commitment to diversity have enabled us to bring our customers the solutions and services that deliver outstanding value. We regularly respond to varied IT needs: Be it small rural communities to large municipalities and states, the City of Mesa can be sure that we are ready to be your partner in any IT enterprise. Below are just a few of the benefits that the members of this cooperative will enjoy:

Contract Expertise. Consistently meeting your needs is our main focus which is why we'll update your contract, adding new technologies as soon as you need them. If it is in our catalog, we can add it to your contract. Whatever your needs may be, we will work with you to make sure those needs are met. Included in your contract are pricing options that will enable the City of Mesa to compare pricing options. This benefit enables you to make more informed decisions and provides you with purchasing reports.

Local Presence, National Reach. Whether it's in small towns, rural counties, or large cities, we'll be where you are to leverage our national network of service providers, bringing you the expert/customer-centered solutions you've come to expect from us. With 30 locations nationally and coworkers located in 45 states, we are dedicated to serving our customers' needs, wherever they are. You will enjoy a dedicated team of CDW·G resources who stand ready to work with you and solve today's technology challenges. Coupled with our strong centralized support locations, we offer you a national contract with a local focus, tailored to your requirements, with a flexibility to grow with you as your needs change.

Commitment to Diversity. We work with hundreds of diverse suppliers to promote historically underutilized and local businesses. These local suppliers are part of the reason we are able to deliver exceptional products and services. As members of your local community, we work with these suppliers to better understand our customers' needs and to support locally-focused businesses. We partner with over 600 MBE/WBE businesses and achieve more than $1.5B annually in overall diversity spend.

We look forward to establishing a collaborative working relationship and are confident that our proposal will exceed your expectations. To discuss our response, please contact Proposal Specialist Cale LaSalata at calelas@cdw.com or 203-851-7211.

Sincerely,

Christina V. Rother
President, CDW Government LLC

CDW•G Return Policy

Executive Summary

The City of Mesa, through this solicitation, has partnered with the National Intergovernmental Purchasing Alliance Company ("National IPA") to enable public and non-public entities in Arizona to purchase all manner of IT solutions and services. Understanding that value and efficiency in procurement are hot-button issues for the City of Mesa, we have kept that as our guiding principles for the response contained herein. As states and municipalities work within constrained budgets, now more than ever, value and sound purchasing practices of utmost importance when choosing an IT solutions provider and partner. CDW Government LLC ("CDW•G") has been a reliable partner of National IPA for over a decade with a demonstrable track record of delivering outstanding IT solutions, with efficient delivery, and all of the benefits that come from this contract.

What sets our offer apart from what our competition will provide is that our approach to our customers is to treat them as a partner. Everything that we do as a company revolves around the main focus of our business: our customers. Because we provide solutions to a variety of entities (from public to private; small businesses and rural communities, to the federal government and large municipalities), we know that solutions aren't "one-size fits all." Tailoring our solutions to our customers requires us to get to know you and meet you where you are to gain a better understanding of what drives your business.

Evidenced by our ten year successful relationship with the team at National IPA, our approach to IT solutions reflects a belief that true value comes from delivering to our customers exactly what they want, when they want it. Efficient online purchasing, dedicated support, highly certified services providers, and contract compliance are only a few of the features of what we can deliver to the City of Mesa.

Contract Excellence

Understanding that compliance with city policy and state financial statutes is important to the City of Mesa, we have built our response to Mesa around our approach to working with government customers. We know that the City of Mesa has legal and regulatory compliance requirements to which you have to adhere. That is why our approach incorporates your regulatory compliance needs and builds your contract around those obligations. Contract participants' Account Center has a wealth of information which will enable them to make better informed purchasing decisions and provide them reports on purchases, updated pricing, and much more.

What differentiates us from our competition is our Program Management team who oversee the administration of negotiated contracts. While some of our competition may have one or two individuals tasked to ensure contract compliance, we maintain a team of highly trained professionals whose sole goal is ensure that we meet our commitments to our contract customers. Program Managers also work with our Marketing department to promote your contract and educate our sales force on the particularities of the contract. Our Program Management teams work to make sure that our sales teams are educated on the contract requirements.

Our Program Management team also compiles a variety of reports, ranging from updated pricing and product options to purchase history and analyses of the success of the contract.

Some of the features of what we will provide you are:

- Understand and Comply with all applicable statutory and contractual provisions;
- Maintain consistent, contract-compliant pricing;
- Comply with any security requirements;
- Follow proper protocols, including obtaining customer approval, prior to making any substitutions or deviations from the original contract requirements and specifications;
- Engage directly, honestly and truthfully in our discussions with agency representatives and government employees

In addition to a flexible contract, contract participants will enjoy the advantages of a dynamic pricing structure. As CDW•G employs a vendor-neutral approach to IT solutions, we leverage that method to deliver better pricing to our customers. Because of our size and reputation in the IT marketplace, we have the ability to deliver volume discounts, exclusive pricing, and special promotions unavailable with other IT solution providers.

National Services Presence

We have over 30 offices around the United States. Meeting contract participants where they are is really important to us: We want to understand our customers' needs, their environment, the particularities that make contract participants the unique customers they are. Understanding what drives purchasing decisions helps us provide more tailored solutions. We have a national network of service providers, all trained in the latest approaches, methodologies, and solutions, consistently carrying the highest level of OEM certifications. This means that when contract participants need us to come into their environments and provide guidance, they can be sure that they're receiving guidance from seasoned experts with years of experience in solution deployment.

Our Services model offers customers an unusual combination: the close relationship and easy access of a local provider who understands your IT environment inside and out, and the scale, efficiency and resources of a multinational provider. We have 30-plus local branch offices throughout the United States and Canada. So, chances are, we're within driving distance of contract participants. In addition to our local branches, we have over 1,100 services professionals and a network of trusted service and solutions partners. In fact, because of our national scale, CDW•G is able to identify areas of emerging need for our customers and then ramp up our expertise and resourcing in those areas.

Logistics

One of the many benefits of our proposed solution is how we work with you to deliver your IT purchases. From order placement to delivery, how we bring you your purchases is almost as important to us as what you buy. Making the purchasing and delivery process easier and time-efficient, we work hard to guarantee that you receive the most cost-effective purchasing options available. Your account center will enable you to:

- Connect with your dedicated account manager and team of specialists;
- Create and retrieve quotes and collaborate with your account manager;
- Promote IT standards;
- Track orders and shipments;
- Manage purchases and payments;
- Set shipping and billing preferences and manage contact information

Factor in our two strategically-located distribution centers that hold $220M of inventory, on average, you can be sure that we have what you need when you need it, and have the ability to get it to you quickly. We maintain both a 450,000-square-foot distribution center located at our headquarters in Vernon Hills, IL and a 513,000-square-foot distribution center located in North Las Vegas, NV. The combined square footage of our distribution centers is three times greater than most of our competition. These locations facilitate quick distribution of products to our growing customer base throughout the country

Breadth of Coverage

CDW•G has over 840 Account Manager and 65 Field Representatives forming account teams across five verticals: Higher Education, K12 Education, Healthcare, Federal Government, and State & Local Government. In addition, our account teams are organized geographically: North, South, East, and West which facilitates their ability to be uniquely aware of the local landscape, identifying key partnerships and common local practices for contracting. These account teams are supported by technology specialists and segment technologists who can go deep into particular solution sets with our customers. No other national provider can claim the size and depth of knowledge of our highly skilled account teams, it is a particular point of pride for CDW•G. Wherever our customers are located, CDW•G invests heavily in our sales teams' ability to meet our customers' needs.

Summary

The City of Mesa can be confident that by partnering with CDW•G for the National IPA contract, we will be able to meet your needs and deliver the best value for contract participants. Evidenced by our successful ten year relationship with the City of Tucson, Mesa can expect the same level of local attention from a national IT solution provider. We stand ready to bring you a contract that will be tailored to your requirements and considerate of what's important to you. At every stage of the lifecycle of your contract, your dedicated team of Account Managers, Program Managers, and Service providers is prepared to advise you and work with you to guarantee your total satisfaction; ensuring our commitment to you is consistently met. We are pleased to offer you the following proposal and look forward to being your trusted partner for years to come.

Tab 2

Program Description and Method of Approach

1. **Provide a response to the national program.**
   a. **Include a detailed response to Attachment D, Exhibit A, National IPA Response for National Cooperative contract. Responses should demonstrate a strong national presence, describe how offeror will educate its national sales force about the contract, describe how products and services will be distributed nationwide, include a plan for marketing the products and services nationwide, and describe how volume will be tracked and reported to National IPA.**

CDW•G Response:

A. Method of Approach

Response to National IPA Cooperative Contract

1. Provide a response to the national program.

A. Include a detailed response to Attachment B, Exhibit A, National IPA Response for National Cooperative contract. Responses should demonstrate a strong national presence, describe how offeror will educate its national sales force about the contract, describe how products and services will be distributed nationwide, include a plan for marketing the products and services nationwide, and describe how volume will be tracked and reported to National IPA.

3.1 SUPPLIER QUALIFICATIONS

Supplier must supply the following information in order for the Principal Procurement Agency to determine Supplier's qualifications to extend the resulting Master Agreement to Participating Public Agencies through National IPA.

3.2 Company

A. Brief history and description of your company.

Founded in 1984, CDW is a leading provider of technology solutions to over 250,000 customers composed of small-, medium-, and large-sized public and private entities. CDW Government LLC (CDW•G) is a wholly owned subsidiary of CDW Corporation, incorporated in 1998 to address the specific needs of our government, education, and healthcare customers. Our unique company structure provides our customers products and services only a large national reseller can provide, combined with a local presence typical of a small business. We have a large manufacturer presence in our offices across the country and blanketed in the field with our field account executives. Account Teams are further segmented by agency type, education (K12/High Ed) or government, which allows us to provide each customer with one contact who is knowledgeable of every nuance of their organization.

CDW•G is one of the largest direct marketing resellers in the U.S., currently carrying more

than 100,000 name-brand technology products from over 1,100 leading IT manufacturers.

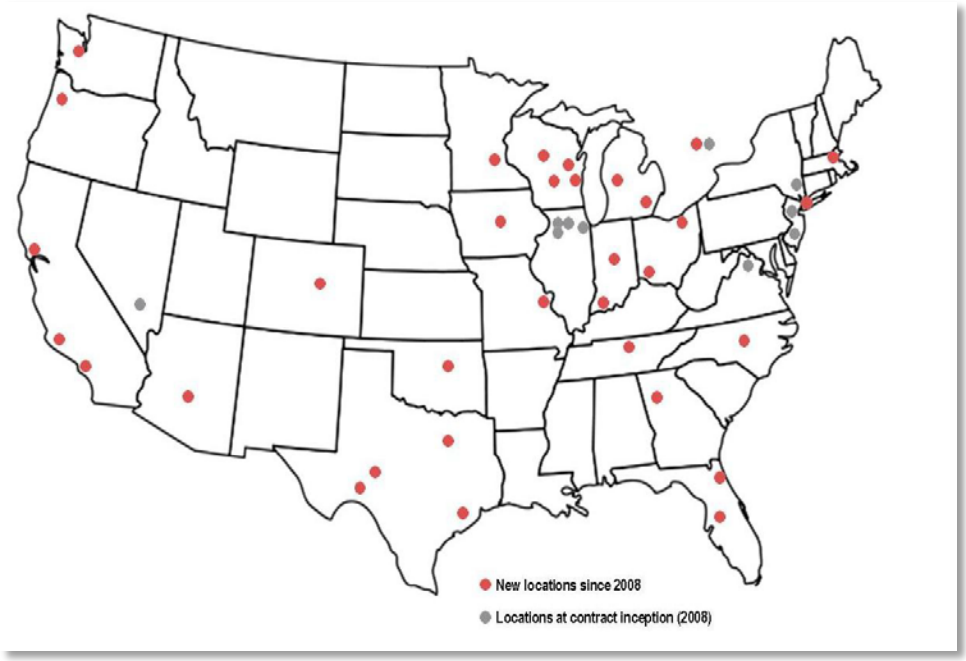
CDW•G delivers more than just product; we also deliver IT solutions. We offer a full range of technology services including: cloud computing, consulting, system configurations, implementation, and training. CDW•G designs and implements complete business solutions that address a full range of complex issues including, but not limited to: Business Continuity, Infrastructure Optimization, Networking, Security Management, and Unified Communications.

B. Total number and location of sales persons employed by your company.

CDW•G currently employs more than 1,456 coworkers, part of our larger organization of 8,800 employees nationwide and in Canada, with over 30 different locations. More than 840 of our CDW•G dedicated sales force are Account Managers, in addition to 65 Field Account Executives placed throughout communities across the nation.

C. Number and location of support centers (if applicable)

When CDW•G was awarded a similar contract with National IPA's involvement in 2008, we had offices in five states and Canada. We have drastically expanded our location portfolio across 20 additional states, and have added second/multiple offices in a number of our original five states and Canada. Currently, we have over 30 separate locations. Speaking specifically to the benefit of this contract, seven of the states with new locations are also in the ten states with the highest historical spend on the contract.



D. Annual sales for the three previous fiscal years.

Below you can see evidence of CDW Corporation's sales growth, CDW•G's growth, and our growth on the contract as well. CDW•G consistently drives compounding growth in both areas, and anticipates these upward trends to continue. The growth rates of National IPA

exceed the standard rate for CDW•G, demonstrating our results to both grow organically and promote the contract within our existing client base.

Explosive Sales Growth						
Year	Annual Revenues			YOY Growth		
	National IPA ($ Millions)	CDW•G ($ Billions)	CDW ($ Billions)	National IPA	CDW•G	CDW
2013	$113	$4.2	$10.8			
2014	$160.1	$4.9	$12.1	41.5%	16.7%	25.0%
2015	$253.7	$5.1	$13.0	58.5%	4.1%	7.4%
2016	$390	$5.6	$14.0	53.7%	9.8%	7.7%

E. Submit your FEIN and Dun & Bradstreet report.

CDW•G FEIN: 36-4230110
Dun & Bradstreet numbers:

CDW Corporation 107627952
CDW Government LLC 026157235

CDW•G cannot supply a Dun & Bradstreet report, as it violates our contract with Dun and Bradstreet. The City of Mesa can obtain a report for CDW•G from Dun & Bradstreet.

3.3 Distribution, Logistics

A. Describe how your company proposes to distribute the products/service nationwide.

We offer more than 100,000 brand-name products from over 1,100 leading manufacturers. We carry over $200 million in inventory, and ship most in-stock products the same day they are ordered. The result is that contract purchasers receive a shipment from CDW•G in just ***3-5 days,*** far surpassing our competitor's capabilities

CDW•G keeps a large breadth of products and fresh inventory on hand, in order to provide contract members with new technology as it becomes available. We constantly monitor trends within the IT industry to ensure that we offer our customers the latest technology and the most optimal solutions. Our inventory management system enables our purchasing department to excel at maintaining a one- to four-week supply of products in our distribution centers. Our inventory turns over 24-26 times per year.

The distribution centers' automated system scans bar-code labels on each product, pick list, and shipping label, resulting in increased delivery speed and accuracy. Some of smaller items require coworker assembly; "Ready Ship" products (items that ship in their original carton) move through the system even faster. Once the order shipment is ready for loading, a final scan determines the correct truck and sends it down the designated conveyor into the truck. The automated systems even help to load the trucks in ways that optimize shipment-processing speeds.

CDW•G's strategic relationships with industry leading original equipment manufacturer (OEM) technology partners, such as HP, Cisco, Lenovo, and Apple, means that we not only have access to steep product discounts, but also greater access to the products and a more efficient procurement processes.

We receive notification regarding product changes, including advance notification of product shortages, and products nearing end of life. When there is a product shortage and other vendors do not have access to these products, we can often procure them from another source. When CDW•G receives notification of an upcoming stock outage, we utilize our distribution centers' large capacity for volume purchases, keeping stock on hand for our customer's present and future needs.

B. Identify all other companies that will be involved in processing, handling or shipping the products/service to the end user.

CDW•G has positioned ourselves very closely with the major carriers, in order to provide a wide range of delivery options to meet our customers' varying needs. We ship the majority of our products via UPS and FedEx. Both companies have employees on site at our warehouses, individuals with a long history of supporting CDW•G. We can also leverage the carrier's intermodal transport options. Additionally, we have contracts with truckload (TL) and less than truckload (LTL) carriers for large orders and heavy products. If a carrier is not meeting our on-time delivery requirements, we remove the carrier from our preferred shipper list.

C. Provide the number, size and location of your company's distribution facilities, warehouses and retail network as applicable.

CDW•G's two strategically located distribution centers have a combined size of almost one million square feet. Our Central Distribution Center in Vernon Hills, IL, ships primarily to customers in the eastern half of the U.S. Our Western Distribution Center, in Northern Las Vegas, NV, ships primarily to customers in the western half of the U.S. Each distribution center serves as backup for the other. A state-of-the-art Warehouse Management System (WMS) controls both of these centers, ensuring speed and accuracy throughout the order fulfillment and distribution processes.

In addition to working with OEM partners to supplement our direct purchasing model, CDW•G has developed strong affiliations with principal distributors: Synnex, Tech Data, and Ingram Micro. Our OEM partners send us daily electronic data interchange (EDI) downloads, giving us visibility to inventory at their locations. Our top three distribution partners provide real time inventory information. Using this multi-layered procurement structure, we secure out-of-stock product(s) within as little as 24-48 hours, depending on customer requirements.

D. State any return and restocking policy and fees, if applicable, associated with returns.

CDW•G offers a 30-day return policy on most products sold. Of the returns we accept, a minimum 15% restocking fee applies for non-defective product returns. For our complete return policy, please see Tab 7, Appendix of this response. Customers may also obtain

additional information by contacting their Account Manager or CDW customer relations at 866.SVC.4CDW, returns@cdw.com.

3.4 Marketing and Sales

A. Provide a detailed ninety-day plan beginning from award date of the Master Agreement describing the strategy to immediately implement the Master Agreement as your company's primary go to market strategy for Public Agencies to your teams nationwide, to include, but not limited to:
   I. Executive leadership endorsement and sponsorship of the award as the public sector go-to- market strategy within first 10 days

Per Arizona Revised Statues § 44-405, the following information is confidential and proprietary and it might contain trade secrets therefore not subject to disclosure in case there is a request.

Part of CDW•G's commitment to our customer base is constantly seeking out opportunities to strengthen our national partner relationships. We view executive alignment as a key part of a successful contract strategy. We bring senior leaders from across our public-sector management team together with National IPA 2-3 times per year to review contract initiatives and customer feedback.

Our ongoing efforts with National IPA in seven specific target accounts highlights this unique and longstanding collaboration. We meet monthly to review the current state of business and execution of each account's growth strategy. In 2017, we have already seen success in Los Angeles World Airports and the City of Kansas City. The combined teams will continue to drive contract adoption amongst non-participating agencies.

CDW•G's leadership team is securely behind the growth and strategy of this program – both to the benefit of the City of Mesa and also across the nation. Key members of the leadership team include:

David Hutchins, CDW•G's VP of Education Sales, is an executive sponsor of the City's contract. He continues to focus sales teams on the success of the contract, and continually collaborates with manufacturer partners, allowing CDW•G to provide the latest technology solutions to help further the mission of 'the connected classroom' across the nation.

Robert F. Kirby, CDW•G's VP of Federal and State & Local Sales, is an executive sponsor for this contract. He will ensure that sales teams work towards the success of the contract and consistently works with manufacturer partners to allow CDW•G to bring contract participants further benefits through targeted solution campaigns, like our public safety initiative.

Tara Barbieri, CDW•G's Director of Capture, is also an executive sponsor for the contract. She has endorsed and sponsored this contract since the inception in 2008, and shall continue this role upon award. In her position, she is dedicated exclusively to our company's contractual sales, and leads

with the knowledge and experience in cooperative purchasing contracts. Internally, she has promoted this contract to CDW's President Tom Richards and, externally, to HPE's Meg Whitman. This is to say that for over ten years, she has worked tirelessly to champion this contract and has been integral to growing this contract into what it is today.

To facilitate our growth strategy, CDW•G holds many public agreements, some with mandatory use requirements within individual states. We cannot agree to market the City's contract as our *primary public sector go-to-market strategy*; however, we have included an appropriate marketing plan and pledge to continue focusing on the contract's success and awareness. We believe this pledge should not be viewed lightly, as with our support, this contract's volume has surpassed the $350M mark as of last year in yearly sales. We understand through competitive research that our competitors rarely take issue with similar requests for commitments; yet we can easily find evidence that they too hold plenty of public contracts.

Dell	Zones	WWT	Connection	Carahsoft
National Cooperative Purchasing Alliance (NCPA)	National Joint Powers Alliance (NJPA)	California CMAS	Texas DIR	US Communities
NASPO Value Point (NVP)	Texas DIR	State of MO PC Prime Vendor Contract	Massachusetts ITC47	National Cooperative Purchasing Alliance (NCPA)
Midwestern Higher Ed Compact (MHEC)	California CMAS	Ohio Hardware, Software & Services	National Cooperative Purchasing Alliance	PEPPM
Texas Dept of Information Resources	PEPPM	Texas DIR	TIPS/TAPS	MiCTA
Massachusetts ITC47	National Cooperative Purchasing Alliance	Massachusetts ITC47	Public Sourcing Solutions (PSS)	Massachusetts Higher Ed Consortium

CDW•G takes our partner commitments very seriously and Mesa is our partner in delivering on the accompanying National IPA Agreement. In the first ten days post-award, our CDW•G Program Management team will provide a company-wide contract award announcement, as well as develop a contract training program for all SLED Account Managers to attend. CDW•G has a successful contract launch history where we focus on five areas of the contract which are: Intake, Set-Up & Compliance, Education, Measure and Growth. By focusing on these areas specifically, we are able to launch contracts to the CDW•G teams with the most powerful and applicable details to make the new National IPA agreement more successful than the one currently in place

II. Training and education of your national sales force with participation from the executive leadership of your company, along with the National IPA team within

first 90 days

Our Public Sector Account Managers are actively marketing the current contract to their customers and are very familiar with the structure of the contract. This is an enormous benefit to the City, National IPA, and the immediate momentum of the new contract. A 'refresh' training to enhance understanding of the new National Program, it's updates and nuances with City of Mesa as lead agency will be conducted within the first 30 days post award.

Familiarizing a completely new management team and educating a new group of Account Managers to a new contract is unnecessary with CDW•G. Other vendors, even after training, are likely to experience a significant period of growing pains, acclimating their sales staff to the offering. This ramp-up time will certainly have an impact on contract sales. This is often the case with new contracts, as National IPA and the City are aware. The current contract saw success atypical of most, quickly achieving $4 million dollars in purchases within the first four months from inception. We believe this success was due in large part to CDW•G's experience in managing contracts and National IPA's commitment to sound marketing strategies. The contract is now supporting almost ***fifty-eight times*** its 2009 purchases (the first full year of the contract). We believe that CDW•G is uniquely qualified to deliver growth over $400 million in 2018.

All aspects of transitioning to the new contract will be seamless. The City and National IPA do not have to worry about member confusion or orders lost during training and setup time. Business will continue to flourish and training time will be used as a refresher, providing contract updates and focusing on strategies to increase business.

B. Provide a detailed ninety-day plan beginning from award date of the Master Agreement describing the strategy to market the Master Agreement to current Participating Public Agencies, existing Pubic Agency customers of Supplier, as well as to prospective Public Agencies nationwide immediately upon award, to include, but not limited to:
    I. Creation and distribution of a co-branded press release to trade publications within first 10 days

CDW•G's Marketing contact will work with National IPA to create and distribute this announcement at the transition of the new award.

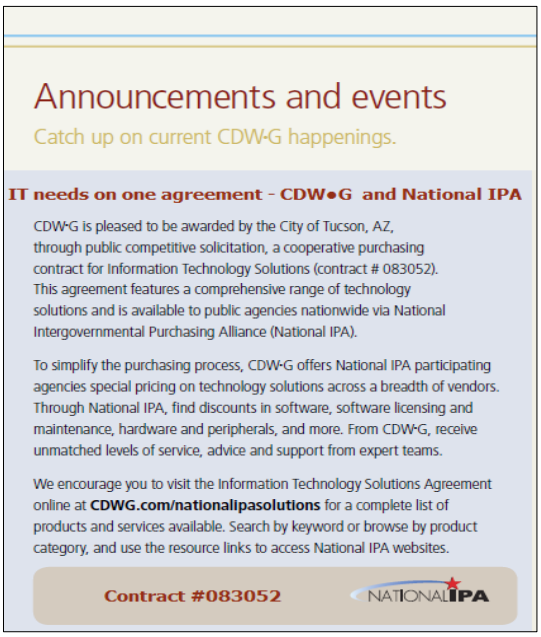
II. Announcement, contract details and contact information published on the company website within first 30 days

CDW•G can reload the new contract pricing structure within a matter of minutes and will have our website operation on the 1st day of the new contract. CDW•G will be able to seamlessly transition all agencies buying off of our current National Cooperative contract to the new contract, upon contract launch.

III. Design, publication and distribution of co-branded marketing materials within first 90 days

CDW•G already has much of this material. We are poised to perform updates to the material and shall accomplish this well within the 90-day time frame. We propose a marketing strategy meeting with National IPA to discuss a refreshed approach and specific goals/targets for the new contract. CDW•G is eager to share our current marketing processes for the contract, including our attendance at the National IPA Regional Summit, aimed at increasing contract awareness; our Sales Wiki site, giving account teams easy access to marketing strategy and materials; and our monthly email campaigns to all National IPA members.

We also look forward to talking about our ideas to gain a better contract understanding, with an increased focus in the K12 sector and our top OEM partners.



Announcements and events

Catch up on current CDW-G happenings.

IT needs on one agreement - CDW•G and National IPA

CDW-G is pleased to be awarded by the City of Tucson, AZ, through public competitive solicitation, a cooperative purchasing contract for Information Technology Solutions (contract # 083052). This agreement features a comprehensive range of technology solutions and is available to public agencies nationwide via National Intergovernmental Purchasing Alliance (National IPA).

To simplify the purchasing process, CDW-G offers National IPA participating agencies special pricing on technology solutions across a breadth of vendors. Through National IPA, find discounts in software, software licensing and maintenance, hardware and peripherals, and more. From CDW-G, receive unmatched levels of service, advice and support from expert teams.

We encourage you to visit the Information Technology Solutions Agreement online at **CDWG.com/nationalipasolutions** for a complete list of products and services available. Search by keyword or browse by product category, and use the resource links to access National IPA websites.

Contract #083052 NATIONALIPA

IV. Commitment to attendance and participation with National IPA at national (i.e. NIGP Annual Forum, NPI Conference, etc.), regional (i.e. Regional NIGP Chapter Meetings, etc.) and supplier- specific trade shows, conferences and meetings throughout the term of the Master Agreement

In 2018, CDW•G's schedule includes over 100 regional and nearly as many national events. In past years, we have attended many events in which we promoted the contract, including NIGP, NASPO, CAPPO, and FAPPO. We will continue this practice with the new agreement, as well. For 2018, we are already committed to attend NASPO, and the National IPA Partner Summit.

We are willing to continue to share our best practices with other non- competing National IPA vendors. Sales Manager Pat O'Brien has agreed to share some of these practices with other National IPA vendors at the Partner Summit, helping increase the success of all National IPA's contracts.

V. Commitment to attend, exhibit and participate at the NIGP Annual Forum in an area reserved by National IPA for partner suppliers. Booth space will be purchased and staffed by your company. In addition, you commit to provide reasonable assistance to the overall promotion and marketing efforts for the NIGP Annual Forum, as directed by National IPA.

CDW•G has enjoyed participating in the NIGP Annual Forum and will continue to do so. We believe in the theme "Building Together" and look forward to sharing our best practices with other National IPA vendors.

VI. Design and publication of national and regional advertising in trade publications throughout the term of the Master Agreement

CDW•G advertises the contract in our own highly viewed publications and our contract specific email campaign. We will continue to promote the contract via avenues such as our EdTech and StateTech publication sites, while continuing to penetrate the market with a live-touch approach.

VII. Ongoing marketing and promotion of the Master Agreement throughout its term (case studies, collateral pieces, presentations, etc.)

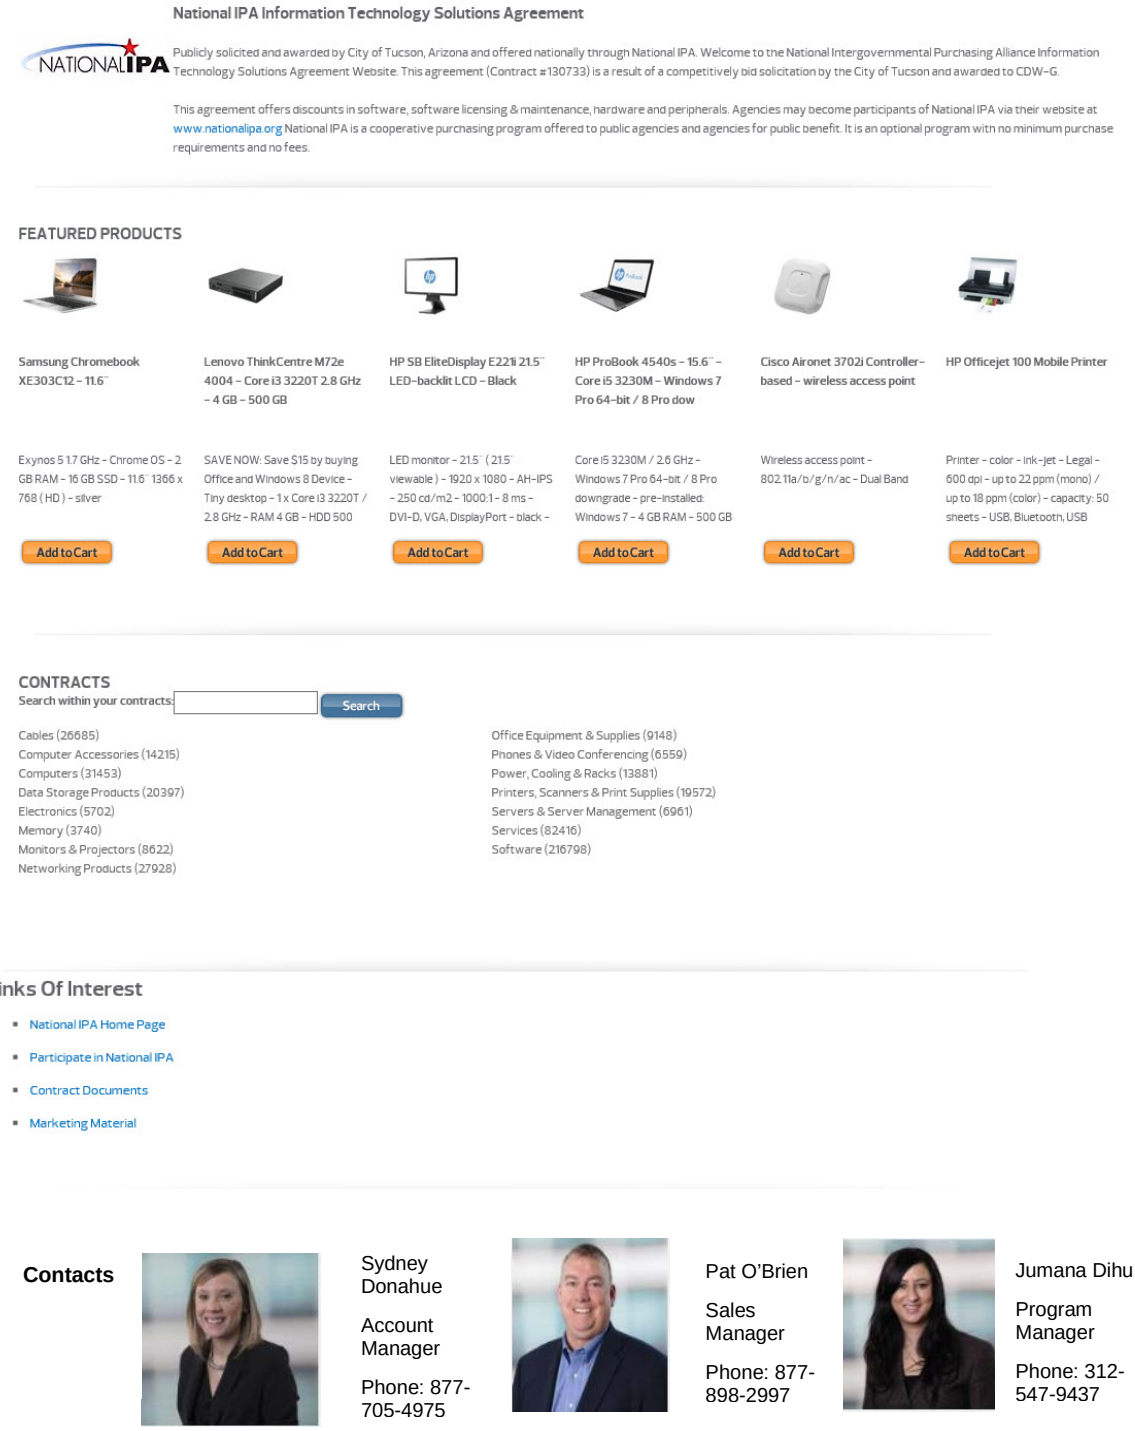
CDW•G continues to market and promote the contract, through various avenues such as announcements in our publications, email campaigns, as well as on the contract's CDW•G premium page. We look forward to working with National IPA to develop our marketing strategies even further.

VIII. Dedicated National IPA internet web-based homepage with:

- National IPA standard logo;
- Copy of original Request for Proposal;
- Copy of contract and amendments between Principal Procurement Agency and Supplier;
- Summary of Products and pricing;
- Marketing Materials
- Electronic link to National IPA's online registration page;
- A dedicated toll free number and email address for National IPA

CDW•G exceeds this requirement, as our current National IPA Premium Page, www.cdwg.com/nationalipasolutions presently includes these elements. The page includes the National IPA logo and a description of the contract, with multiple direct links to National IPA's Home Page and Registration Page. We provide members with categories that mirror the contract, easily allowing them to locate the product or service they are looking for. We include "featured products" highlighting solutions that we select for their excellent value or popularity among purchasers.

We have a toll-free number and address for National IPA members, and feature a dedicated Account Team included on the website, which highlights when they are available for customers. In conjunction with National IPA, we will continue to develop this site, increasing functionalities and promotion of the contract.



National IPA Information Technology Solutions Agreement

NATIONALIPA

Publicly solicited and awarded by City of Tucson, Arizona and offered nationally through National IPA. Welcome to the National Intergovernmental Purchasing Alliance Information Technology Solutions Agreement Website. This agreement (Contract #130733) is a result of a competitively bid solicitation by the City of Tucson and awarded to CDW-G.

This agreement offers discounts in software, software licensing & maintenance, hardware and peripherals. Agencies may become participants of National IPA via their website at www.nationalipa.org National IPA is a cooperative purchasing program offered to public agencies and agencies for public benefit. It is an optional program with no minimum purchase requirements and no fees.

C. Describe how your company will transition any existing Public Agency customers' accounts to the Master Agreement available nationally through National IPA. Include a list of current

cooperative contracts (regional and national) your company holds and describe how the Master Agreement will be positioned among the other cooperative agreements.

As the City and National IPA are both well aware, CDW•G currently holds a significant number of cooperative purchasing contracts including National Intergovernmental Purchasing Agency (National IPA), Association of Educational Purchasing Agencies (AEPA), and National Joint Powers Alliance (NJPA) . CDW•G is solutions-focused, vendor agnostic and provides consultation to assist our customers to select the contract best suited for their specific procurement needs. For all of our national contracts, we have maintained the transparency of our contract portfolio to our customer and negotiated the removal of language such as "most favored customer" and requirements such as this.

CDW•G continues to prove without a doubt that we can keep our commitment to making this contract prosperous amongst our portfolio of offerings. We have transitioned a number of customers and their solicitation opportunities to this contract, in the form of participating agreements. Some of these customers include the City of New York, City of Phoenix, City of Atlanta, University of Colorado, and DeKalb County. Moving forward, we will continue to loop new members in to the contract and sustain the growth.

D. Acknowledge that your company agrees to provide its company/corporate logo(s) to National IPA and agrees to provide permission for reproduction of such logo in marketing communications and promotions.

National IPA has several CDW•G logos at their disposal under our general guidelines for intended use, they are included here for ease of evaluation.

Logos & Guidelines

CDW welcomes customers, media and other entities to use our corporate logo, as needed. The core component of CDW's brand identity is its corporate logo; therefore, we ask that you carefully consider the following guidelines when using it.

When using the CDW logo, you agree to the following:

1. You may use the logo(s) only in the exact form provided by CDW and only to accurately and actively link from a website that is under your control to the home page of CDW.com (or another address provided by CDW) and for no other purpose.
2. You may not incorporate the logo(s) into any other logo or design.
3. You may not to use the logo(s) in a way that suggests that you or your company or products are affiliated with CDW or its products or services in any way.
4. You may not display the logo(s) on any website that disparages CDW or its products or services, infringes any CDW intellectual property or other rights, or violates any law or regulation.
5. No other logo or design element should appear within 0.5 inches of the CDW logo.
6. You may not frame or alter the CDW website in any way.
7. At CDW's direction, you will immediately remove the logo(s).
8. Your limited right to use the logo(s) does not constitute a grant of any other right or license. All other rights are reserved by CDW.
9. CDW disclaims all warranties, express and implied, regarding the logo(s), including warranties against infringement. You agree to indemnify CDW from and against any and all claims and liabilities arising out of your use of the logo(s).

E. Supplier is responsible for proactive direct sales of Supplier's goods and services to Public Agencies nationwide and the timely follow up to leads established by National IPA. All sales materials are to use the National IPA logo. At a minimum, the Supplier's sales initiatives should communicate:

I. Master Agreement was competitively solicited by a Principal Procurement Agency

II. Best government pricing

III. No cost to participate

IV. Non-exclusive contract

We are happy to update our current National IPA flyer with the new contract information. We would like to further discuss the inclusion of II and IV, and will revise our marketing pieces to include mutually agreeable message that best represents the value of the contract.

NATIONAL IPA™

EXPERIENCED ★ FOCUSED ★ TRUSTED

CDW•G is YOUR Solution for Modern-Day Classrooms!

2. **Provide a description of the product lines that can be provided by your firm.**

CDW•G Response: CDW•G is offering our entire catalogue, including our complete portfolio of product offerings which includes over 100,000+ products from more than 1,100 vendors. We also offer a full suite of professional services to users of this contract. Given the landscape of the IT industry and its rapid changes, we have defined these categories broadly to easily facilitate adding new technologies and services to the resulting Agreement over the contract period. We intend to be your go-to supplier for all of your IT solution needs; so, whatever your need may be, you can be sure we have the solution that works for you. We are the largest, direct reseller in the US for many of our OEM partners which include: Adobe, Cisco, HP, Lenovo, and Panasonic. Based on the strength of our success and our product portfolio, we are able to offer our customers the newest technologies, more robust discounts, and OEM support unavailable with our competition. Additionally, as technology is constantly evolving, we are always on the lookout for new vendors and new technologies to add to our offerings. Our product line cards, organized by product category and manufacturer, follows this page.

3. Provide a description of the services that can be provided by your firm.

CDW•G Response: Our services portfolio that we bring to our customers encompasses a wide array of both standard and specialized services. With over 1,600 highly trained and certified engineers in 30 locations nationwide, we offer the City of Mesa and National IPA contract participants the most optimal services in the IT industry. Below is a sampling of the services we provide to our customers:

Cloud Computing: We know how important cloud computing is to our customer base, and are determined to lead the industry in mastering this complex, highly customizable service. Our internal cloud campaign is educating our Account Managers on how to assist our customers in determining the best-valued cloud option for their needs, while our technicians continue training to master the solution, and working with our manufacturer partners to expand our portfolio. Our Cloud offerings do require an additional Cloud Services form, but your Account Manager will walk you through the process.

CDW•G offers a cafeteria-style set of cloud solutions. Our portfolio includes public, private, community, and hybrid deployment options. Our broad cloud offering currently includes over thirty different manufacturers, and we continue investigating other manufacturer solutions to add to this portfolio. Our cloud computing solutions; Software as a Service (SaaS), Infrastructure as a Service (IaaS), and Platform as a Service (PaaS), cater to the specific needs of the span of our entire customer makeup

Consulting and Analysis: Most of our projects begin with either an assessment or planning and design session. CDW•G technical specialists and field solution architects are experts in many areas including unified communications, networking, wireless, network and physical security and server/storage solutions. CDW•G will save contract members staff time and effort because our experts have already initiated the due diligence process. We share our knowledge of the latest technologies as well as our expertise regarding the pros and cons of each potential solution. We also offer a variety of more complex consulting/analysis solutions for those customers who need a more in-depth evaluation of their systems.

Technical Support: CDW•G's Staff Augmentation services offering includes assisting customers with onsite help desk and technical support services. This service provides skilled, temporary staffing to assist with IT challenges

Trade-Ins: CDW•G coordinates with our manufacturer partners to provide trade-in services to our customers.

Repair: In addition to offering onsite repair, we have our own repair center. CDW's Repair Center offers fast turnaround time and low cost out-of-warranty repair prices, as well as great in-warranty service. Our factory certified repair technicians complete typical repairs on an average of 7-10 business days. We are an authorized Service Center for the following Manufacturers:

- Acer
- Apple
- Fujitsu
- HP
- IBM
- Lenovo
- Service Net
- Sony
- Toshiba

Please note: due to manufacturer policies, limitations, and agreements, CDW may not be able to service all computer models or lines made by these manufacturers.

Design: Most of our projects begin with either an assessment or planning and design session. Our architects review your needs and perform an evaluation of your existing environment to develop a comprehensive solution to meet your particular project objectives.

Configuration/System Configurations: While onsite configuration services are available, CDW•G often recommends our in-house configuration services. CDW•G builds preconfigured technology solutions in our two ISO 2008-certified configuration centers, so they arrive at their correct location(s) ready to plug and play. We have a 25,000-square-foot configuration center in our North Las Vegas distribution center and a 24,000-square-foot configuration center in our Vernon Hills, IL distribution center, including an 8,000-square-foot enclosed area for enterprise configurations. To complement this space, CDW•G has more than 150 configuration technicians, providing a spectrum of customized configuration services.

CDW•G's configuration services include:

- Hardware and software installation and configuration
- Customized imaging
- Asset tagging, custom labeling, and laser etching
- Router/switch configuration
- Server rack configuration

Implementation: Our national footprint is expansive, with over 600 engineers on staff in more than 26 service offices, complimented by a national traveling team. Additionally, we have capabilities to ship 3,000+ custom-configured systems daily; we configure over 750,000 custom solutions in our two state-of-the art distribution centers annually. Our large number of engineers, paired with our configuration capabilities, allows CDW•G to handle any rollout project that contract members may have.

Training: CDW•G's project methodology ensures technicians and project managers work with the mindset of being an extension of the customer's IT staff. Throughout the project our team not only focus on designing bullet- proof solutions, but continually engaging the IT staff; sharing knowledge, and ensuring the staff knows how to navigate the solution in which the customer vested their resources. Should a customer require training outside of this transfer of knowledge, we have a blended solution of CDW•G offerings, manufacturer standard trainings, and technology training companies.

Maintenance: CDW•G recognizes that maintenance/support contracts are of great importance to many customers because uptime is vital to their success. Our strong partnerships with the industry's top technology manufacturers, paired with our own maintenance solutions, offers a variety of viable options to our customers. Our maintenance options include the following:

- Warranty extensions and upgrades
- Post-warranty support
- Accidental damage protection
- Maintenance contract agreements (coterminous, break/fix, and retainer)
- Post-sale technical support
- Product and certification
- Help desk services

Hardware and Software Installation: Our installation services encompass the following solutions. Installation services can include installing and deploying new systems; moving existing equipment; assessing systems and testing installed equipment; and advanced IT support. We also offer staging options, should a customer need to complete their installation in numerous rollouts.

- Client Computing Installation
- Data Center Installation
- Network Installation
- Security Installation
- Microsoft Configuration and Installation
- Microsoft Accelerators
- Visual Solutions Installation

System Testing: All of CDW•G's service projects incorporate testing every aspect of the final solution, ensuring all acceptance criteria is met.

Upgrades: Many products offer a variety of system upgrades. Our dedicated Account Managers work with their customers to explain the benefits of each upgrade, and help determine if these upgrades would be a wise purchase for the customer's needs. The Account Manager then collaborates with CDW•G dedicated manufacturer partner specialists to incorporate the upgrades into the final product build. Additionally, CDW•G performs a number of upgrades, such as asset tagging and laser etching, in house in our configuration center.

Imaging: In addition to our configuration services, CDW•G performs imaging services in house in our configuration centers as well. Our A+ certified imaging technicians routinely image the following products:

- Laptops
- Desktops
- Workstations
- Flash Drives
- Servers
- Hard drives
- Apple products, including iPods and iPads

Customers can provide their own image or CDW•G can create one for them. As with all services completed in our configuration centers, each piece of equipment goes through a comprehensive quality assurance check prior to shipping to ensure the unit is function properly. CDW•G also stores images on our secure server, completely isolated from other networks, and only accessible to a few authorized individuals. Many times customers choose to have us store their images as it allows CDW•G to load custom configured images quickly on their machines.

4. **Provide a detailed description of any programs available for Participating Agencies seeking to set and meet goals for historically underutilized businesses (e.g. minority, woman, veteran, disabled, etc.). Discuss how transaction is between offeror and tier one suppliers and Participating Agencies and tier one suppliers will be tracked and accounted for and any quality assurance measures that are in place to assure a high-performance standard for tier one suppliers.**

[redacted]

[redacted]

[redacted]

[redacted]

[redacted].

5. Describe how your firm proposes to distribute the products/services nationwide.

CDW•G Response: We have access to more than 100,000 top brand-name products from more than 1,000 manufacturers. We carry over $220 million in inventory, and ship most in-stock products the same day they are ordered. Because of our distribution centers are strategically located in Vernon Hills, IL and Las Vegas, NV; we have the capability to deliver a wide array of shipping options that best fit your needs.

Because of our position as one of the largest direct resellers in the U.S., we work closely with all of the major shipping companies to ensure you receive your orders on time. We work with UPS, FedEx, CEVA, UPS Freights, Dynamex, and Veterans Messenger service to get you what you need, when you need it. We offer overnight, same day, 2 day, 3 day, and ground shipping options to best meet your needs. On average, we ship up to 54,000 boxes per day and contract purchasers receive a shipment from CDW•G in just ***3-5 days,*** far surpassing our competitor's capabilities.

Our two distribution centers have a combined square footage of almost a million square feet. Every stage of our distribution process is automated, with our custom-designed sorting systems, built to optimize the shipping process. Packed boxes are sorted and weighed onto the conveyor system. Combined, our distribution centers have almost twelve miles of conveyor belts that feed the sorting system. The barcode scanner reads the shipping label and the packed box's correct loading dock is determined. Once the order shipment is ready for loading, a final scan determines the correct truck (for instance, FedEx overnight) and sends it down the designated conveyor into the truck. The automated systems even help to load the trucks in ways that optimize shipment-processing speeds. When your package reaches the correct shipping portal, the sorting system drops your package down a chute that brings your order to the door dock to be loaded onto the correct carrier's truck and then your package is on its way for delivery.

The benefits of our automated distribution systems are that the City of Mesa will receive the right products, configured to your specifications and ready to use out of the box, and delivered on time

6. Identify all subcontractors that will be involved in processing agency orders under this contract and describe their distribution/delivery processes.

CDW•G Response: CDW•G believes another important step in successful order fulfillment is utilizing shipping partners that are as focused on customer service excellence as we are. CDW•G processes all purchase orders. If our customers have customized agreement that

include a Tier 1 diversity requirement, we work with diverse supplier partners local to customers, to deliver your products and your orders on time.

Distribution Partners. Our Distribution Partner Network includes over 130 different suppliers, meaning we can provide any product National IPA members would need. Like our OEM partners, we're the largest partner for many of our Distributors. And like our manufacturer partner relationships, this results in direct benefits for CDW•G and our customers. Most send us EDI downloads or real time information on their available inventory, resulting in access to products usually in as little as a day. As another example, we are a top Ingram Micro partner and hold Elite Partner status. This partnership provides a customized and exclusive support resource to our Account Teams and customers, among other benefits. The CDW dedicated priority phone queue has an average wait time of less than two minutes.

We ship the majority of our products via UPS and FedEx, due to their extensive service capabilities, excellent record for on-time delivery and competitive pricing. In fact, both companies have employees on site at our warehouses, individuals with a long history of supporting CDW•G. We can also leverage the carrier's intermodal transport options. Additionally, we have contracts with truck load (TL) and less than truck load (LTL) carriers for large orders and heavy products. If a carrier is not meeting our on-time delivery requirements, we remove the carrier from our preferred shipper list.

Shipping Partners. We have a number of shipping partners to provide our customers their products, fast. In fact, both companies have employees on site at our warehouses. These individuals have a long history of supporting our logistics operation, ensuring efficient processing and movement of customer orders. This helps us keep our carrier goal of 99.04%, beating the industry standard of 98%. Some additional benefits of our UPS partnership includes a customized Loss Prevention Program to ensure integrity of customer packages; a collaborative tracking program with our customer relations department; and IT automation between

All contract management functions will continue to be handled by Mark Ellis and his Program Management team. When any of our partners are involved, CDW•G manages the relationship and liability involved. We do ask customers to mutually agree to and sign Statements of Work for all service engagements through CDW•G. This is to ensure we keep Members apprised of the responsibilities, timelines, and progress of the project.

In instances where customers would like to integrate their e-Pro applications with our own, CDW•G will provide the integration assistance; however, the relationship the member has

with their e-Pro application vendor is their own, any applicable vendor fees resulting from the integration will be the responsibility of the member

7. **Provide the number, size, and location of your firm's distribution facilities, warehouses, and retail network as applicable. Provide information on the productivity of your facilities and systems as follows:**
   a. **How many orders are processed daily on an average**
   b. **How many devices does your facility configure daily on an average**
   c. **What is the highest number of orders processed in a single day**
   d. **What is the highest number of devices configured in a single day from the facilities described**

CDW•G Response A: Our two distribution centers process an average of 54,000 units per day.

CDW•G Response B: Our configuration staff, which includes 200+ Technicians, Engineers, Management, and Support Staff, complete an average of 7,000 custom configurations per day.

CDW•G Response C: At peak times, our two distribution centers process a combined average of 135,000 units per day.

CDW•G Response D: During seasonal spikes, our configuration staff configures almost 12,000 devices per day.

CDW•G's two strategically located distribution centers have a combined size of almost one million square feet. Our Central Distribution Center in Vernon Hills, IL, ships primarily to customers in the eastern half of the U.S. Our Western Distribution Center, in Northern Las Vegas, NV, ships primarily to customers in the western half of the U.S. However, each distribution center serves as backup for the other. They receive inventory valued at about $21.0 million per day, or between 78 to 80 truckloads a day, processing a combined average of 135,000 units daily. A state-of-the-art Warehouse Management System (WMS) controls both of these centers, ensuring speed and accuracy throughout the order fulfillment and distribution processes.

CDW•G's Configuration Centers, also located in Vernon Hills and Las Vegas, maintain a combined square footage of over 100,000 feet.

In addition to working with OEM partners to supplement our direct purchasing model, CDW•G has developed strong affiliations with principal distributors. Like our OEM partners, they send us daily electronic data interchange (EDI) downloads, giving us visibility to inventory at their locations. Further, our top three distribution partners provide real time inventory information. Using this multi-layered procurement structure, we secure out-of-stock product(s) within as little as 24-48 hours, depending on customer requirements.

8. **State any return and restocking policy, and any fees, if applicable associated with returns.**

CDW•G Response: CDW•G offers a 30-day return policy on most products sold. Of the returns we accept, a minimum 15% restocking fee applies for non-defective product returns. Please see Tab 7 "Appendix" for our full return policy.

9. **Describe your invoicing process. Is electronic invoicing available? Is summary invoicing available? Are there other options on how an agency receives an invoice?**

CDW•G Response: CDW•G mails invoices the day after the product(s) is shipped out of one of our distribution centers or, if you prefer an electronic invoice, you can request that invoices be sent via PDF instead. We send the PDF the same day that the system generates the invoice. When a product is drop-shipped from a vendor, CDW•G invoices the customer once we receive the invoice from the vendor. As an added convenience, you can also print copies of original invoices via your CDW•G Extranet. Our standard invoices include the information listed below.

- CDW•G remit to address
- Invoice date
- Invoice number
- PO number affiliated with invoice
- Payment due date
- Order date
- Shipping method
- CDW•G part number
- Description of product
- Quantity ordered/shipped
- Unit price (based off of pricing structure agreed to in the contract)
- Extended price
- Ship to address

All of the information pertaining to the customer's specific requirements are included on the invoice as well. CDW•G supports many EDI formats and can customize invoices to reflect customers' required data fields. For more information regarding our EDI capabilities, we encourage the City to visit www.cdwg.com/edi.

10. **Describe your delivery commitment:**
    a. **What is your fill rate guarantee?**

CDW•G Response: CDW•G's same-day fill rate is between 97-99% for credit-approved orders and in-stock product, depending on the complexity of the order and this is our best effort and therefore, not a guarantee. Should an item be out of stock, it typically takes 2-10 days, after receipt of order, to receive the product (subject to availability). We receive timely notification regarding product changes, including advance notification of product shortages, and products nearing end of life. When there is a product shortage and other vendors do not have access to these products, we can often procure them from another source. Many times when CDW•G receives notification of an upcoming stock outage, we utilize our distribution center's large capacity for volume purchases, keeping stock on hand for our customer's present and future needs.

b. What are your delivery days?

CDW•G Response: CDW•G's standard delivery is M-F excluding Thanksgiving, Christmas, and New Year's Day. Arrangements can be made based on need to fulfill orders on weekends and holidays for an additional fee. Customers should provide at least a 48-hour notice in order to allow time to properly set up any weekend or holiday deliveries.

c. Do you offer next day delivery?

CDW•G Response: Yes, CDW•G can ship same day, overnight, 2nd day, 3rd day, and ground. An expedited freight charge may be added for this service.

d. How do you facilitate emergency orders?

CDW•G Response: Whenever a contract member's order requires expediting, CDW•G treats it with priority. We direct all customers to contact their dedicated Account Manager if an emergency situation arises. They focus on placing the order and arranging for expedited delivery. Due to our very large inventory at our two distribution centers, we usually have the products in stock and available for immediate shipping. Our vast distribution capabilities means that we can draw from our OEM partners to ensure that, if we do not have your item in stock, we can still procure and deliver your order.

e. Are shipping charges exempt for ALL who use this contract?

CDW•G Response: Prices include lowest ground freight for shipments/packages less than 70 pounds within the 48 contiguous United States when referencing this Agreement. All orders are subject to Seller's standard shipping policies in effect at the time of order placement. In those instances that are larger than 70 pounds or call for express or overnight delivery, shipping costs will be pre-paid by Seller and added to the customer invoice. There is no additional fee assessed for smaller orders, unlike some of our competitors.

Since inception of this contract, we have become authorized for increasingly complex technologies, including large storage arrays where freight costs must be considered in the overall quote to the customer. In separating shipping costs for heavier items, it removes the need to consider the costs in the entire category discount, and allows us to provide customers deeper discounts for all products that fall within the category

f. Describe how problems (such as a customer ordering a wrong product or a customer receiving a defective product; etc.) are resolved.

CDW•G Response: CDW•G encourages customers to contact their Account Manager to assist with any such issues. If the Account Manager evaluates the issue and if they cannot personally assist the customer, they will engage and collaborate with our Customer Relations Department to assist. Customers may also reach out to Customer Relations directly.

If a wrong product is ordered, the customer's dedicated CDW•G Account Manager will work with the customer to determine the best solution to resolve the issue. For any products returned, whether defective or incorrect item, CDW•G requires customers to provide a Return Merchandise Authorization (RMA) number before shipping back any product. This process allows us to expedite the process and helps ensure the proper action or credit,

upon processing. Customers can get the RMA request form from their Account Manager, online via their CDW•G Extranet Account, or by contacting Customer Relations.

CDW•G tracks the reason for all returns, allowing us to make appropriate changes, as necessary. For example, a high volume of returns damaged in shipment would lead us to audit the carrier and review product packaging. CDW•G also monitors how quickly and efficiently the Customer Relations staff handles RMA requests, aiming to respond to requests within 24 hours or less.

11. Describe the types of customer service available to agencies that use this contract:

CDW•G Response: Your Account Manager stands ready to assist you in any type of query you may have and is available, during business hours and beyond, to assist you and your customer service needs. Their sole goal is to ensure your complete satisfaction. If you experience any type of technical issue, your Account Manager will facilitate a timely resolution.

In the event that your Account Manager is unavailable, CDW•G's customer service team is well-equipped to help you resolve your problem. All customer support is based in the United States. All Help Desk technicians are CompTIA certified; hold at a minimum A+ and Network+ certifications, and many are accredited in various engineering and manufacturing training courses. Our customer service team assists customers to ensure the product is working as the manufacturer intended. CDW•G provides this value added support, at no charge, for up to two years or manufacturers end of life, whichever comes first.

We offer our customers Sales Support, Technical Support, and Website Support. All of our customer support options can be accessed via phone, fax, email or chat. For all of our support options and hours of operation, please visit: https://www.cdw.com/content/contact-us/support.aspx.

a. Is online support available?

CDW•G Response: Yes, CDW•G's online technical and customer support services include live chat and E-support, and remote support.

Live chat and E-support

To supplement our industry leading toll-free technical support, we provide access to online live chat, accessible through the customer's Extranet site. We staff this support by our

trained technicians from 6am to 5pm MST. This site also provides support case management.

Remote Login

Our technicians have access to LogMeIn, a remote login utility, which allows them to connect to the end users computer for more in-depth troubleshooting and quicker resolution.

b. Is phone support available?

CDW•G Response: Customers can use our toll free phone number 800.383.4239, Monday – Friday from 6 am – 6 pm MST, to reach our dedicated technical support team.

c. Can agencies request a dedicated service representative and/or a dedicated service team? If a dedicated customer service representative and/or team are assigned, what types of services does the representative/team provide? How do you help the customer manage our account?

CDW•G Response: With CDW•G every customer is automatically provided one single point of contact, their Account Manager, from the very first inquiry for service. Irrespective of the size of your order or what your needs might be, every CDW•G customer receives a dedicated Account Manager who will see to ensuring your satisfaction. Account Managers are assigned to customers based on a specific segment (State and Local government, Higher Education, K12, etc.), as well as a specific region in the country.

CDW•G Account Managers attend onboarding training, known as the "Account Manager Academy," for three months before they begin interacting with customers on their own. This training program focuses on sales consulting, product training, operational systems, and customer service. This process is much longer than industry standard practices, providing a higher level of support that our customers are quick to notice. Our Account Managers also participate in the Sales Residency Program which delivers another layer of customer-focused training to your Account Manager.

On average, our customer relationship is 11.1 years which means our Account Managers dedicate their time to getting to know our customers and what drives their purchasing decisions. This means that our customers, particularly in the public sector, choose to work with us, year after year. This is a testament to our dedication to our customers' satisfaction.

Account managers focus on learning their customers' processes, requirements, needs, and challenges. For larger, enterprise class accounts, there are multiple Account Managers assigned to those accounts. These teams work as a team to make sure you receive the highest level of customer service. This allows them to provide expertly the following services to agencies:

- Registration assistance to participate in National IPA
- Contacting customers and notifying them of the benefits of the contract
- Pre-sales consultation, including providing product and system compatibility information
- Providing industry - specific insight on technology solutions
- Acting as a quality control check by reviewing and approving all quote requests
- Keeping customers abreast of availability issues and assisting with any needed alternative sourcing options
- Coordinating any special delivery requests, including emergency orders
- Working with available CDW•G resources, and coordinating contact for any needed subject matter expert insight
- Keeping updated and available to assist in developing a service solution
- Facilitating communication between the customer and National IPA, as needed

CDW•G ensures Account Managers are supported by a network of subject matter experts. Account Managers utilize these resources to provide complete guidance to their customers. This network includes:

Sales Manager	Sales Managers lead a team of Account Managers and Account Specialists to provide comprehensive solutions and outstanding sales support. They visit customer site(s) for business planning and discussions of future projects, as needed. They also assist Account Managers with expedited orders and problem remediation.
Business Development Manager	Our public sector also has Business Development Managers who focus on aligning with our customers. Their main role is to work with customers' procurement teams to review current contracts, align with strategic initiatives that the procurement team is looking to roll out, act as project manager for B2B integrations and a main point of contact to help resolve issues.
Field Account Executive	Field Account Executives ("FAE") work in tandem with Account Managers and Account Specialists to provide comprehensive solutions and outstanding sales support. Each FAE is dedicated to a specific region and industry, and provide onsite visits to customers in communities across the country. Their site visits include business reviews and other meetings, as needed. FAEs also work with System Engineers to provide onsite road mapping, project development, and technical expertise.
Solution Architects	Customers also have dedicated Solution Architects (SA) for each of their service solution needs. Solution Architects are dedicated to specific Account Teams and are the expert in supporting our customers with the appropriate service resources and tools including deployment technicians, project management and implementation engineers. The Solution Architect works closely with CDW•G customers to accurately

	scope project requirements, making certain we provide the specific skills, proper staff and solution needed to fully service the customer. Upon agreement to move forward with the service offering, the Solution Architect hands off the service delivery to the customer's dedicated CDW•G Project Coordinator and/or Project Manager to ensure successful execution.
OEM Specific Resources	Account Managers utilize an integrated network of both internal and external sales force. Many OEMs have pre-sales engineers and channel account managers (often onsite at CDW•G) providing consultation and immediate support to Account Managers. CDW•G badged Brand Managers, Field Solution Architects, and Partner Business managers work with both Account Managers and the external teams mentioned, providing further support.
Program Manager	Program Managers launch and manage contracts once awarded. They are a valuable resource to Account Managers, training Account Managers in the contracts scope and guidelines, provide contract information and updates, and assist with Extranet/Premium page issues.

d. How are problems resolved?

CDW•G Response: CDW•G Account Managers assist their customers in resolving any issues and is the primary point of contact for problem resolution. Your Account Manager has extensive relationships with our OEM partners and have internal processes to escalate your problem to the appropriate resource with our partners. Your Account Manager, being your primary point of contact, will address or route to his support team issues regarding:

- Customer service requests
- Quote and order issues
- Billing problems

If your Account Manager is unavailable to assist you, he/she will escalate your issue to their Sales Manager. If for any reason their Sales Manager is unable to resolve the issue, they will escalate the problem to their Director or the segment Vice President, if needed.

You may contact CDW•G's Customer Relations department at either 866-782-4239 or CustomerRelations@web.cdw.com. A representative will be assigned to your case, based on their skills and expertise, who will then engage the resources necessary to resolve your issue. CDW•G tries to resolve all issues within 24 hours.

If a problem is in regards to an Account Manager, we encourage customers to contact the Account Managers Sales Manager.

e. What are the location and hours of your call centers?

CDW•G Response: We have call

centers in North Las Vegas, NV; Vernon Hills, IL; Phoenix, AZ; Shelton, CT; Tampa, FL; Reston, VA; and Eatontown, NJ. Their hours of operation are 6am-8pm MST.

We strive to make it easy for our customers to get in touch with us. From your dedicated Account Manager to our customer service team, we have multiple options available to our customers to address your needs. CDW•G provides post-sales customer support Monday – Friday from 6am – 6pm Mountain Standard Time. Our customer service team assists customers to ensure the product is working as the manufacturer intended and work with them in case of any issue. CDW•G provides this value added support, at no charge, for up to two years or manufacturers end of life, whichever comes first

f. What response time is guaranteed when a customer service request is made?

CDW•G Response: Response depends on the seriousness of the request made but typically CDW•G makes every effort to respond to all Customer Service Requests (CSRs) within 24 hours. CDW•G understands some requests are more urgent than others, and utilizes a detailed incident management process for critical systems. Severity level dictates the response time of this practice and employed for issues with our own network services, co-located systems, hosted solutions, websites, or our Internet services.

We constantly monitor our customer service process, ensuring we are continuing to meet the needs of our customers. The Customer Relations Supervisor reviews all CSRs at the end of the day to ensure that each CSR is being handled promptly. Additionally, Customer Relations Quality Analysts audit 30 cases per Customer Relations Representative per month to ensure representatives meet quality standards and that we provide proper training. We make adjustments and evaluate process changes as needed when we see high volumes for particular types of Customer Service Requests (CSRs).

g. Do you measure/track the success of your customer service program? If so, how do you do this, and what are your findings?

CDW•G Response: Yes, we focus continually on improving our ability to provide the best service and products in the industry to our customers. Most inquiries and issues are resolved by your Account Manager. We have an internal customer assistance network (ICAN) that supports your Account Manager in providing you with optimal customer service. Our internal network helps your Account Manager resolve issues with: purchasing, drop ship, new items, and distribution. This internal network strives to resolve issue in 3 hours or less. Beyond your Account Manager, we have a number of corrective processes in place which include:

- Our Purchasing Department monitors return rates on purchased products to look for quality issues.
- We aim to respond to Return Merchandise Authorization (RMA) requests within 24 hours.
- When we see high volumes for particular types of Customer Service Requests (CSRs), or RMAs we make adjustments and evaluate process changes, as needed.
- The Customer Relations Supervisor reviews all CSRs at the end of the day to ensure that we handle each CSR right away.

- Customer Relations Quality Analysts audit 30 cases per Customer Relations Representative each month to ensure our representatives are meeting quality standards and that we are providing proper training.

We offer many ways for our customers to provide us with their feedback, the primary avenue being the website (www.cdwg.com/content/about/cdw-reviews.aspx). The results have been overwhelmingly positive, with customers rating their experience with CDW•G 4.6 stars out of 5. We also survey our customers to understand how we can meet their needs better. In 2016 we added three additional surveys to better respond to our customers. We've begun to specifically survey our customers' opinions in the following additional areas:

- Sales Contact Center
- Customer Relations
- Advance Technology Services

CDW•G conducts monthly loyalty surveys to measure the customer's perception of CDW•G. We utilize these surveys to collect information for several internal departments including shipping, billing, and customer relations. We select customers on a random basis to participate in the surveys. If a customer ranks us "poor" or "fair", then the appropriate CDW•G department contacts the customer to determine the reason for their unsatisfactory response and offer additional action to rectify the problem. This fortunately is rare, as the majority of end-users express favorable survey comments. The positive comment that we receive most often is "*CDW•G is extremely customer focused".*

h. Describe in detail your company's ability to hold/warehouse customers' orders and if there are any costs associated.

CDW•G Response: We will work with you to hold and warehouse your products in our distribution center for a pre-arranged period of time, depending on your project needs. CDW•G will purchase your products from the OEM or distribution channel partners and perform any required configurations. At that point, we will hold your products at our distribution center until you are ready for them. With 48 hour notification, we will prepare your order for shipment and release your order based on your schedule.

Typically customers will pay upfront for this service: one charge for the space to hold your purchase and one charge for the labor. Space and labor fees are based on the factors such as the pallet space required, the amount of time you request to hold your products in our warehouse, and the timeline for your product shipments. These fees are negotiated prior to warehousing your purchases and your Account Manager can provide you with more information on our holding and warehousing capabilities

12. Describe how your company will assist customers in navigating OEM warranty process.

CDW•G Response: Your Account Manager will assist you in navigating the OEM warranty process. Products sold by CDW•G come with the manufacturer's standard warranty and the City of Mesa customers can contact our Technical Support Department for technical support on hardware purchased from CDW•G. We provide technical support on the products that we sell for up to two years from the date of purchase. If the Technical Support representative

determines the customer needs warranty support, they connect them to the manufacturer's warranty department.

CDW•G offers a number of product lifecycle support options in addition to manufacturer warranties. This suite includes:

- Warranty extensions and upgrades
- Post warranty support
- Accidental damage protection
- Maintenance contract agreements
- Post-sale technical support
- Product and certification training
- Help desk services

We send warranty expiration emails to our Account Managers, who then inform their customers when their hardware protection is about to expire. Account Managers assist their customers in determining the best warranty and coverage solutions to keep IT investments up and running, or finding a best-valued replacement.

13. Describe how your firm will notify customer of new products.

CDW•G Response: As technology is constantly evolving, there are always new products and services coming to market. Our customers depend on the latest technologies to make their enterprises run more efficiently and CDW•G prides ourselves on being on the forefront of technical development in the IT industry and our relationships with top manufacturers often results in advanced notification of upcoming releases of new products. Our website, www.cdwg.com, is constantly updating with new products and services that we offer to our customers. Our live catalogue is updated daily and you can browse our most current products and services.

As a contract customer, we deploy a number of ways to keep you informed. Via our website (www.cdwg.com) and your Premium Page, you will be able to view the latest technologies available to you and pricing options to help you make better-informed purchasing decisions. They are constantly up-to-date on the most current and emerging technologies. Be it your Account Manager, our website, or your Premium Page, you can be sure that we will work tirelessly to keep you informed of ways to improve how your do business and which solutions best fit your needs.

14. Describe how your company will assist and support customers when their standardized is reaching EOL (end of life).

CDW•G Response: We often receive advance notification from manufacturers when a product is nearing end of life, and we make every attempt to communicate these changes to customers who may be affected. Your Account Manager will be the first source of updates on products that are nearing end of life. Because we maintain a live catalogue on our website, you will also be able to see in real time which products that we offer are nearing end of life. Your Account Manager also has visibility into our distribution partners' warehouses through EDI feeds updated at least twice daily. As part of their value-added service, they assist customers in finding substitute products that will help customers achieve the same business results.

15. **Describe if technical support questions are handled the same way as a customer service request? If not, describe the type(s) of technical support available, the location of technical support, and the hours of technical support. Is it the intent to use employees of your company or will this be an outsourced function?**

CDW•G Response: Your Account Manager stands ready to help you navigate this process. They receive regular trainings on new products and technologies from OEMs, receiving OEM certifications as trained, certified experts which enable them to assist their customers. We encourage customers to contact their Account Manager when technical support is necessary. If the Account Manager is unable to assist, he/she determine the best next steps. They may work with the customer and dedicated manufacturer support coworker to resolve the issues, solicit assistance from their Sales Manager, or connect the customer to our help desk. CDW•G customers can also contact our technical support team directly from our website or their Extranet site, in a variety of ways including email, chat, and telephone. Our technical support team is available Monday – Friday from 6am – 6pm Mountain Standard Time. All customer support is based in the United States. All Help Desk technicians are CompTIA certified; hold at a minimum A+ and Network+ certifications, and many are accredited in various engineering and manufacturing training courses. Our customer service team assists customers to ensure the product is working as the manufacturer intended. CDW•G provides this value added support, at no charge, for up to two years or manufacturers end of life, whichever comes first.

16. **Describe what other services you offer that would be applicable to this contract (e.g. cloud, services, maintenance, implementation, design, analysis, training, repair, etc.)**

CDW•G Response:

Available Services	
Cloud	Our cloud services will enable you to grow as cloud solutions change and evolve over time. We have been at the forefront of the emerging virtualization technology and are well-positioned to advise you on the Cloud Solution that best fits your needs. We are vendor neutral and we currently work with over 40 cloud solution providers. We offer a range of Cloud Solutions and will work to make sure that you receive the most cost-

	effective solution. Some of our Cloud Solution services include: • Planning Services • Migration Services • Integration Services • Managed Services
Maintenance	CDW•G recognizes that maintenance/support contracts are of great importance to many customers because uptime is vital to their success. Our strong partnerships with the industry's top technology manufacturers, paired with our own maintenance solutions, offers a variety of viable options to our customers. Our maintenance options include the following: • Warranty extensions and upgrades • Post-warranty support • Accidental damage protection • Maintenance contract agreements (conterminous, break/fix, and retainer) • Post-sale technical support • Product and certification training • Help desk services
Implementation	Our national footprint is expansive, with over 600 engineers on staff in more than 15 service offices, complimented by a national traveling team. Additionally, we have capabilities to ship 3,000+ custom-configured systems daily; we configure over 750,000 custom solutions in our two state-of-the art distribution centers annually. Our large number of engineers, paired with our configuration capabilities, allows CDW•G to handle any rollout project that contract members may have.
Design	Most of our projects begin with either an assessment or planning and design session. Our architects review your needs and can perform an evaluation of your existing environment to develop a comprehensive solution to meet your particular project objectives.
Consulting and Analysis	Most of our projects begin with either an assessment or planning and design session. CDW•G technical specialists and field solution architects are experts in many areas including unified communications, networking, wireless, network and physical security and server/storage solutions. CDW•G will save contract members staff time and effort because our experts have already initiated the due diligence process. We share our knowledge of the latest technologies as well as our expertise regarding the pros and cons of each potential solution. We also offer a variety of more complex consulting/analysis solutions for those customers who need a more in-depth evaluation of their system.
Training	CDW•G's project methodology ensures technicians and project managers work with the mindset of being an extension of the customer's IT staff. Throughout the project our team not only focuses on designing bullet- proof

	solutions, but continually engaging the IT staff; sharing knowledge, and ensuring the staff knows how to navigate the solution in which the customer vested their resources. Should a customer require training outside of this transfer of knowledge, we have a blended solution of CDW•G offerings, manufacturer standard trainings, and technology training companies.
Repair	In addition to offering onsite repair, we have our own repair center. CDW's Repair Center offers fast turnaround time and low cost out-of-warranty repair prices, as well as great in-warranty service. Our factory certified repair technicians complete typical repairs on an average of 7-10 business days. We are an authorized Service Center for the following Manufacturers: • Acer • Apple • Fujitsu • HP • IBM • Lenovo • Service Net • Sony • Toshiba
Asset Tagging/ Configuration	We provide asset tagging and configuration services To better help our customers protect their assets and to ensure that you have an accurate accounting of your inventory. We provide multiple asset tagging options: From serial or part numbers, to location or manufacturer, your equipment can be asset tagged using our CDW•G asset tags or your own tags, customized to your specifications. We can configure your equipment in our Configuration Centers according to your needs so that your products come ready to use out-of-the-box. These services will save you time and increase productivity. Your Account Manager will help you determine which options are the best fit for you.

Please note: due to manufacturer policies, limitations, and agreements, CDW may not be able to service all computer models or lines made by these manufacturers.

17. Describe options for leasing and financing and the various payment methods accepted.

CDW•G Response: CDW•G has a department dedicated solely to assisting our customers with their leasing needs. We take a vendor agnostic approach and CDW•G's leasing team can work with the City to find the best leasing option that fits within any unique budget constraints the City may be experiencing.

Leasing allows the City to procure needed equipment now, so you do not have to wait years down the road when your budget allows a large- scale purchase. With leasing and financing,

the City also has the ability to bundle costs. Therefore, if you are also working with outdated software, you can purchase it with your products, and even services, all in one fell swoop. Budgeting for leasing is easier than purchasing outright, as your monthly payments are agreed upon upfront. With a lease, you can choose to add to your lease term; and once you choose to end the lease, you often have the option between purchasing and returning the equipment.

CDW•G's Leasing Team helps members navigate through all the available leasing providers to select the best option to fit the customer's needs. For members with a Master Lease Agreement established, we more than likely have a partnership in place with their provider, or can establish one, to extend their existing agreement to incorporate purchases from CDW•G. We are a recognized force with many of our leasing partners, such as our 2014 HP PartnerOne Financial Services Partner of the Year Award. Often, we are able to leverage our relationship with our partners with more advantageous rates or terms. For Members that have diversity requirements to meet, we can recommend our WBE certified leasing partner, Commonwealth Capital Corporation.

We'll incorporate leasing into our sales team trainings for the contract, so that sales can recognize opportunities where leasing would benefit the members and to be able to speak to the different lease options available.

We are also able to accept payment via the following methods: Credit Cards (American Express, Discover, MasterCard, Visa), Checks, EDI, EFT (Electronic Funds Transfer), and Procurement Cards.

Tab 3

Pricing Forms

1. **Provide price proposal as requested on the Pricing Document (Attachment A- "National TAB") attached herein. In addition to indicating your proposed discounts on the Price Page, you must also apply those discounts to the sample items listed in the City's Market Basket listed in Attachment A.**

CDW•G Response: The central metric in a pricing structure is the index from which that price is derived. CDW•G utilizes our Nationally Advertised Price (NAP) as the starting point in our price proposal. Contrasted with traditional MSRP (Manufacturer's Suggested Retail Pricelists) which does not reflect market conditions and therefore does not change, our NAP pricing is scaled and adjusted to remain competitive in the marketplace. Our customers can be sure that the pricing quoted is the most up-to-date and competitive available.

To provide National IPA with a complete catalog offering, CDW•G is proposing contractual pricing to be factored by applying discounts to CDW•G's product taxonomy. This approach ensures a complete catalog offering, provides the greatest breadth of product offering, as well as an easy "on-ramping" as new product and technologies are introduced. For ease of evaluation and to be compliant with the RFP requirements, CDW•G has conformed to the City of Mesa's product taxonomy in the market basket as well as the National Discount sections of the price proposal, however the resultant contract will be managed utilizing the CDW•G Category table listed below:

CDW•G Categories	Discount
Accessories	6.75%
Power, Cooling & Racks	5.00%
Desktop Computers	3.00%
PC Compatible Desktop Computer	2.10%
Data Storage / Drives	5.50%
Enterprise Storage	5.00%
Point of Sale/Data Capture	4.25%
Servers & Server Management	4.00%
Services (CDW Delivered)	0.00%
Notebook/Mobile Devices	2.50%
Notebook Computers	2.10%
Convertable PCs/Slate PCs/iPAD	2.25%
Chromebooks	0.00%
Netcomm Products	5.50%
Gigabit Switch	6.00%
Modular Switch Chassis	6.00%

Modular Switches	5.50%
Carts and Furniture	5.00%
Printing & Document Scanning	3.00%
Services (3rd Party Delivered)	0.00%
Warranties-Product Protection	3.50%
Software	4.00%
Collaboration Hardware	4.25%
Memory/System Components	13.00%
Video-Projection-Pro Audio	3.50%
Cables	15.00%
CDW Configuration Services	5.00%
Apple Products for Eligible Entities	.50%

[redacted]

2. Propose and provide details of additional discounts or rebates for volume orders, special manufacturers' offers, free goods program, the total annual spend, etc.

CDW•G Response: Under the contract, individual clients who purchase significantly larger amounts may qualify for an additional discount on individual purchases. Additionally, as a partner on the contract, CDW-G will be leveraging its influence on manufacturer partners for additional cost saving programs based on contract spend.

With our dedicated Account manager model, CDW•G Account Managers are tasked with providing exceptional customer service and excellent value to each customer who purchases from National IPA. With that goal in mind, if a customer were to forecast larger quantities, the Account manager will work with manufacturer partners on behalf of his/her customer to achieve greater than contract discounts. The discounts and effective savings will be dependent on manufacturer support as well as the size and volume of the order. Depending on the product type the discounts can be anywhere from 2- 20% additional savings.

Per the requirements of the solicitation, Attachment A- Pricing Forms is included and attached in Excel format.

Tab 4

Qualifications (Abilities, Experience, and Expertise)

1. **Provide a brief history and description of your firm. Discuss firm's national presence in the IT solutions industry.**

CDW•G Response: In 1982, 28-year-old, strapped-for-cash Michael Krasny placed a $3 classified ad in the Chicago Tribune for his IBM personal computer. After a flood of offers and a $200 profit, he had an idea. Krasny formed MPK Computers and he became a computer broker. This company later became CDW. Krasny's goal was to make CDW the most successful seller of IT products in the U.S. Some of his first tasks to solve customers' problems include establishing a computerized database of product and customer info, creating algorithms to gauge product sales and demand, and a hand-operated warehouse roller to fill backlogged orders.

Michael Krasny compiled a list of guiding principles—principles that remain at the core of every decision CDW makes today. We believe the reason the National IPA/CDW•G relationship is so successful is because our values and philosophies practically mirror the values that make up the National IPA Way.

Our values begin with the belief that "People do business with people they like." This is why we recruit top IT graduates, hire the industry's most experienced technology experts, partner with business entrepreneurs and educators, and engage military veterans with battlefield experience. It's because we want to support our customers with talented people who have not only walked a mile in their shoes but are committed to providing solutions that work.

CDW's way of business hasn't changed much since '82. We are still recognized by the hybrid business model developed by Krasny, a perfect blend of distribution and IT solutions provider in one knowledgeable force. We still practice a healthy dose of self and competitor evaluation, going from area to area looking for our weakest links and turning them into strengths. In fact, it is from this idea that CDW•G was born. We realized that neither we, nor or competitors, we're doing a great job of providing the segment-specific support to our public customers that they needed, or deserved. So in 1998, CDW•G was established, providing our government and education customers insight and expertise that fit their specific needs. In 2005, we incorporated healthcare segment into this mix.

We continue to use our innovative tools and our deep relationships with our customers and vendor partners to evolve our business as our customer needs dictate, such as our

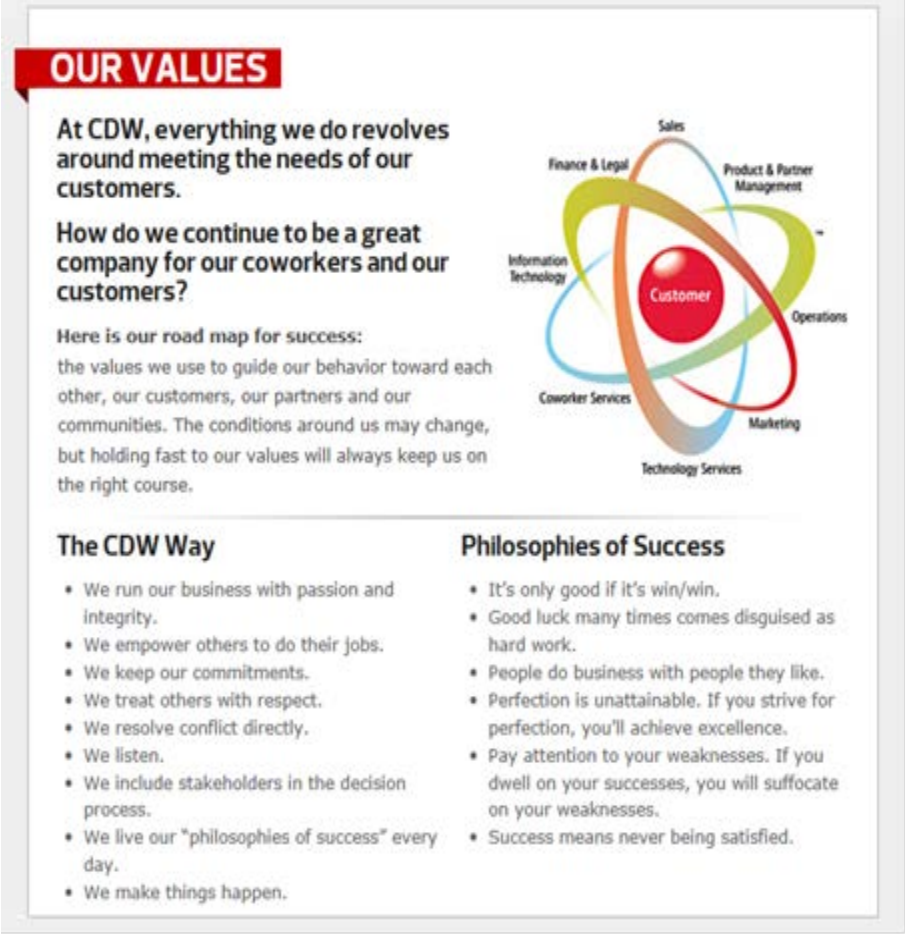

Figure 2: CDW•G and National IPA follow the same core principals to achieve success

expansive cloud portfolio. Proof this approach is working is our $13.9 billion in sales for 2016 and our growing customer base of over 350,000 valued organizations.

Many customers have remained loyal to CDW•G for decades because they know we aren't satisfied with past successes. Instead, we've been focusing on providing advanced solutions and service in areas like cloud computing, mobility, security, virtualization and networking.

2. **Provide the total number and location of sales persons employed by your firm.**

CDW•G Response: CDW•G currently employees 1456 coworkers in 43 different locations nationwide. Over 840 of our CDW•G sales force are Account Manager, with an additional 65 Field Account Executives dispersed throughout the country.

3. **Provide the number and location of support centers (if applicable).**

CDW•G Response: Currently, we have 43 separate locations. Speaking specifically to the benefit of this contract, seven of the states with new locations are also in the ten states with the highest historical spend on the contract.

4. Provide public sector sales figures for 2014, 2015, and 2016 and the percentage mix of hardware, software, and services.

CDW•G Response: Below you can see evidence of National IPA Contract sales growth. The growth rates of National IPA exceed the standard rate for CDW•G, verifying our good faith effort to promote the contract within our existing client base.

National IPA Contract Sales		
Year	**Sales In Millions**	**% of Growth**
2008	$4	N/A
2009	$21.7	442.50%
2010	$44.1	103.20%
2011	$83.3	88.90%
2012	$99.4	19.30%
2013	$113	13.68%
2014	$160.1	41.68%

2015	$253.7	58.46%
2016	$390	53.72%

5. **Please submit you FEIN and Dun & Bradstreet report.**

CDW•G Response: CDW•G FEIN: 36-4230110.

Dun & Bradstreet numbers:

CDW LLC: 10-762-7952; CDW Government LLC: 02-615-7235

CDW•G cannot supply a Dun & Bradstreet report, as it violates our contract with Dun and Bradstreet. The City of Mesa can obtain a report for CDW•G from Dun & Bradstreet.

6. **Provide a summarization of your experience in performing work similar to that outlined in this solicitation.**

CDW•G Response: CDW•G holds a number of similarly structured contracts. Since 2008, we have grown our contract with National IPA, as evidenced in the chart above, and have demonstrated success in broadening and promoting the National IPA contract. Over the past eight years, National IPA contract sales have consistently grown, year after year, most recently reaching $390M.

For our references we provide customers that can attest to our abilities of both managing this contract, and to addressing and meeting their needs as our customer. We provide contact information for these customers in a separate, confidential file.

7. **Provide a minimum of three references for which your firm has provided the same solution (please include company name, address, contact person, phone number, email address and dates of service). References from other public agencies, particularly municipal governments are preferred.**

9. **Provide information regarding if your organization ever failed to complete any work awarded.**

CDW•G Response: At the time of submission and to the best of our knowledge, CDW•G has never had a contract terminated for cause

10. **Provide information regarding if your firm, either presently or in the past, has been involved in any litigation, bankruptcy, or reorganization.**

CDW•G Response: Though CDW•G has been involved in litigation, it has not nor is it expected to impact our ability to provide products and services on this agreement. We have not filed any bankruptcies.

Tab 5

Technology

1. **Describe your website and the ease-of-use for customers to perform the following types of tasks:**
   a. **to search for products**
   b. **to find alternate products (if a certain product is not available)**
   c. **to perform side-by-side price comparison of products**
   d. **to order products**
   e. **to track order status, to include backordered items**
   f. **to determine when an item was received and who received it**
   g. **to restrict/block the ordering of certain line items and to restrict/block the ordering of groups**
   h. **to create approval paths/levels for orders, to include creating an approval path for restricted items**
   i. **to create "favorites" list or subscribed purchases other personalized list of frequently ordered items**
   j. **to create a "shared" list for an agency to use**
   k. **to obtain online customer service**
   l. **to receive online training**
   m. **to accept credit card payment (and describe the level of data offered; also describe your security measure for credit card orders)**
   n. **to track their budget for purchases**
   o. **to generate reports**

CDW•G Response: Each Agency utilizing the contract has their own customized Extranet that is available to users 24 hours per day, seven days a week. This value-added tool makes working with CDW•G easy, convenient and efficient. We have been the pioneers in tapping the power of the web – and we continue to develop enhancements based on customer feedback. Our extensive suite of extranet tools is provided to contract users at no additional cost. We have enabled more interactive information about updates to the website via http://www.cdwsiteinfo.com/.

Our web capabilities provide an extra level of convenience, customization, and efficiency for all users. Our award-winning e-Procurement tool brings customers:

Speed — Customers can research, purchase and track technology easier and faster than ever. CDW•G makes the buying process simple and more efficient. With one click, authorized purchasers can procure the best solutions at the best price from one of the industry's largest inventories of brand-name products. Consolidating purchases through our "one-stop shop" saves customers both time and money.

Information — Our extranets provide the industry's most comprehensive suite of e-Procurement tools to gather the breadth and depth of detail to help make the right purchasing decisions. The site puts customers in direct contact with their Account Manager who can personally guide with suggestions and recommendations to help make informed purchase decisions.

Reporting — As a rich source of detail on purchase history, license agreements, and asset tracking, your Extranet site lightens the burden of report generation. This customizable extranet is a productivity-enhancing tool, giving the exact detail customers require whenever they need it. As detailed in Question #10 of this section, customers can also download reports into a variety of formats, including Microsoft Excel, CSV and tab-delimited files. The value-added benefit of a customized extranet is the ability to manage data and information that will enable customers to make more cost-effective decisions. It also reduces the administrative and purchasing costs involved in procurement.

Extranet Features

We provide specific features of a customized extranet below:

Contract Pricing — View Negotiated Contracts in Real-Time, Receive Bids Quickly

Agencies can view the City's contract pricing, right from their extranet. City of Tucson contract users can view all eligible contract pricing as they shop. Their extranet automatically provides their special prequalified pricing and discounts on tens of thousands of products. Authorized users can access contract and/or special pricing in real-time, as the site is constantly updated to reflect the latest status. Buyers from any location can view approved contract pricing to ensure this pricing structure holds true throughout the entire organization.

Account Team — Access Expert Support with a Personal Touch

Your extranet page allows customers to work directly with your dedicated Account Manager and team of sales support, as well as customer service professionals and certified technicians during every step of the purchasing cycle. The page displays pictures of the customer's Account Team, view their contact information and check their availability in and out of the office.

Online Quotes — Create, Review and Place Orders in Minutes

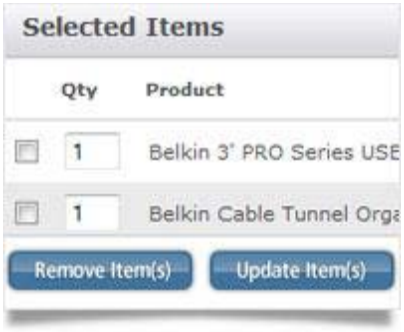
Purchasers can review quotes online just moments after their Account Manager create it. From here, users can print it, forward it to colleagues or manager for pre-authorization, or convert it to a live order. This feature also lets customers create their own quote right from their shopping cart, in addition to viewing contracts, volume and bid pricing online.

Company Solutions — Compare and Buy Single or Bundled Products with One Click

This capability enables agencies to customize their extranet home page to show the products and configurations their organization uses, and to streamline standard product orders. They can choose a variety of formats to view products individually, in bundles, by manufacturer or even in side-by-side comparisons. By grouping products into bundles, there is no guesswork when making repeat purchases on your standardized solutions. The

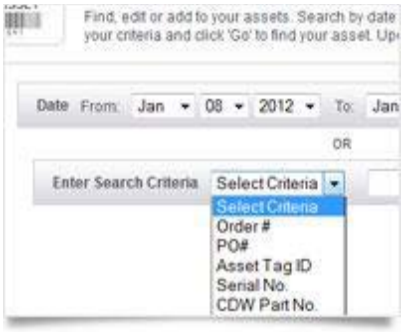
extranet page also allows customers to perform quick product searches and to “comparison shop” by viewing side-by-side, detailed product descriptions before they even place an order. This takes the hassle out of downloading data from multiple manufacturer websites.

Catalogs and Custom Catalogs – Limit Product Purchase Rights



The catalog feature allows agencies to create customized catalogs. Customized catalogs can be used to limit the purchasing ability of end-users based on: Purchase History, Corporate Solutions, Contract(s), Manufacturer Part Number, the CDW•G EDC, and through the Search function. The same engine and keywords that drive the Search Engine are also available to search for product. This allows purchasers to refine items listed before making them a part of their agency’s custom catalog for one or multiple users. These rules can be used to add product to a catalog or exclude items from one as well. Once applied to a group or PAS workflow, they can really help control the spending habits of end users and help keep IT budgets on only the standard of items approved.

Asset Management — Follow Asset-Tagged Hardware throughout Agencies



Your extranet page provides an online asset management tool to track asset tagged products. Products are searchable by serial number, order number, date of purchase, product description, warranty length, invoice number, or location. Users can even create their own custom fields and add or enter products purchased from other vendors. This extranet feature also allows customers to modify their records to reflect the transfer of equipment from one location to another, a real plus for customers with multiple locations. Asset Management then lets the user create and download a detailed report of their hardware assets.

Account Linking — View, Place and Track Orders from Multiple Addresses

Account Linking lets customers view, place and track orders, including historical purchases across multiple bill-to addresses. A single login gives authorized users a way to efficiently access their order status from across the enterprise to anywhere in the world. This eases the challenge of multiple purchases from disparate locations by centralizing the purchasing process, yet offering the flexibility to place and track orders by address and location.

My Purchases — Track Order Status and Purchasing History Instantly

This feature offers a full breadth of tools to track order status, purchasing history and financing options. Original invoices can be printed; giving a view into outstanding balances and invoices, credits, adjustments and/or payments. Agencies can download their purchasing history in preferred time increments (such as month-to date, last six months, prior year, etc.) in any number of formats. The system lets users automatically save this data in spreadsheet or database applications. Authorized users can readily search their order, get a tracking number, check shipping status, and request a Return Merchandise Authorization (RMA).

Purchasing Authorization System (PAS) — Streamline Purchasing Approvals

The extranet page also automates the approval process. PAS enables customers to restrict their employees' purchasing power and to automate required approvals before they place any order. PAS bypasses the laborious step of having a purchasing administrator personally place each order. This process allows for multiple levels of approval, as well as multiple approval systems, which can all function independently for many departments/locations within the procurement process. This system also allows for reporting that is specific to orders which have moved through the requisition process setup through PAS. All reporting is as dynamic and editable as the other tools on their extranet.

Product Finders — Easily Find the Right Accessories and Supplies

CDWG.com now offer Product Finders to make it even easier to find supplies for printers, fax machines, copiers, multi-functions, and other devices. Customers can also search for desktops and notebooks. Product Finders guides to the technology solutions that fit agencies needs and will even help find information for discontinued models. These Finders were designed to ensure

compatibility for product categories including cables, desktops, ink and toner, memory, notebooks, power protection, and cases and bags.

2. **Describe additional functionality offered by your website. Provide screenshots, a demo "CD/jump drive," demo URL, a manual, etc., or any other format that will aid the City in our evaluation of your website.**

CDW•G Response: The City can review the current contract's CDW•G Premium Page at www.cdwg.com/nationalipasolutions. When placing an order, agency members log into their own personal CDW•G Extranet to complete the procurement. This account is available twenty-four hours a day, seven days a week. On this site, agencies can compare products, quickly find compatible accessories, and select from a number of shipping options. However, this account offers more than just ordering functions. Agencies can track spend history, manage assets, and create customized reports. If they are in need of customer service assistance, they can reach their account manager, chat with or email a representative, and even place an RMA request. For an Extranet tour, visit http://www.cdwsiteinfo.com/extranet-video/.

The Extranet is not the only site we offer helpful tools to our customers, our main page, cdwg.com has a plethora as well. For a tour of this site's functionalities, visit http://www.cdwsiteinfo.com/cdw-site-tour/.

CDW•G will continue to build new e-Procurement solutions and feature enhancements based on customer feedback. We strive to regularly incorporate new features and capabilities that ease inventory headaches.

3. **Describe any national awards and/or other recognition that your website has received.**

CDW•G Response: In October 2015 CDW•G was ranked No. 8 on the list of America's 500 largest e-retailers by Internet Retailer's Top 500 Retail Web Sites Guide.

4. **Describe the hours your website is available? What are your hours of downtime, such as for system maintenance?**

CDW•G Response: CDW•G does not have any scheduled extranet down time. Our website's availability is above 99.95%. We are constantly imaging and activating revisions while the site is fully operational. CDW•G works to ensure that there is redundancy in place to minimize any risk of downtime for contract purchasers.

We typically inform our customers of scheduled extranet outages 24-48 hours in advance. When these outages must occur, which is not often, we tend to schedule them on weekends when there is the least impact on the customer. We advise our customers on any significant changes 45 days ahead of the scheduled change. Customers can let their Account team know if they would like to be added to this notification list.

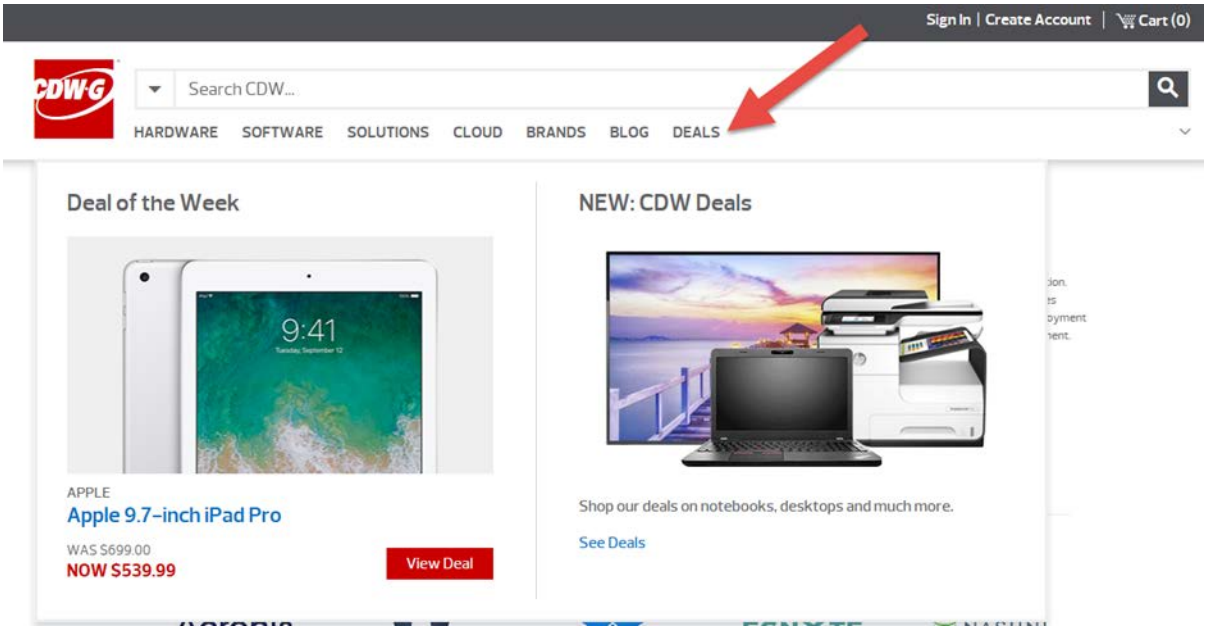
5. **Does your website offer real time product availability?**

CDW•G Response: Yes, most manufacturers send us daily Electronic Data Interchange (EDI) downloads with pricing and product availability information. Our channel distributor partners send us daily EDI downloads, which allows us visibility to inventory items and pricing broken down by local or remote facilities. Furthermore, our top three distribution partners provide real time inventory information.

Using a Just-In-Time inventory management system, our purchasing department excels at keeping a one-to-four-week supply of products in our distribution centers (depending on current sales volume trends for each product). We scan inventory as it enters the distribution center, as it moves through the fulfillment process, and before it leaves the centers. This allows us to maintain near perfect inventory accuracy. The system processes and transmits each scan in real-time, providing immediate inventory updates.

6. **How does your company leverage your website to inform customers of the additional savings that may be available?**

CDW•G Response: Our website has a dedicated tab for informing our customers of additional savings and deals that are available to them. Under the "Deals" header, as shown below, we advertise discounted products and pass this on to our customers. Deals span all product categories and manufacturers, and we inform our customers if a specific OEM is running a particular deal. We strive to pass on value and savings to our customers, and this is another way our website keeps our customers updated and apprised of our latest offerings.



7. **Describe the types of email confirmations that your website generates. What events trigger an email going to the customer?**

CDW•G Response: CDW•G's website generates a number of customer email confirmations including quote and order confirmations, notification of back orders, and shipment notifications. National IPA members can enroll in paperless billing to receive credit card invoices via email, and reminders to order frequently used products. Order status information is available 24 hours a day on our Quick Order Status tool.

8. **Describe the registration process to set up new customers for you online ordering process. Is self-registration available? If an agency does not want self-registration, are you available to assist in the registration process?**

CDW•G Response: Yes, self-registration is available. Additionally, your Account Manager will be happy to walk you through the registration process and ensure that you're properly entered into the system. Your Account Manager are trained to enroll new customers to access the National IPA contract, should our customers need immediate access. A confirmation number is generated and sent to your Account Manager who will then then provide this confirmation and the customer's CDW•G account number to your dedicated Program Manager, who immediately adds them to the system for contract access. Jumana Dihu, your Program Manager, adds new members to the contract typically within a week of receiving a new member list from National IPA.

If the agency does not already have an Extranet account, there are a few short steps for them to create an account. Once the customer creates their account, they simply log on to access the contract. Account Managers will provide any registration assistance.

9. **Describe if your website can be customized for an agency's specific needs, such as placing our logo on your website, associating an agency blanket purchase order number on all orders, creating a bulletin board or other place to display customized messages, displaying approved configurations, naming certain fields (i.e., user defined fields, ability to include budget information), etc.**

CDW•G Response: Your Extranet account can be customized to your exact specifications. We can include your favorite items, frequently purchased products, bundled items. Your site will be tailored to your needs. The site currently displays the National IPA logo, displays a customized message, highlights appropriate products, and has fields named as specified by the City. Agencies customized extranet home page will provide authorized users with quick and easy access to the following features:

Quick Cart – Enables users to add items directly to their cart by typing in the CDW part number.

Account Team – Displays the "In/Out" status of your dedicated Account Manager and provides immediate and direct access to your dedicated Account Manager via phone fax and email. Also, provides a link to your entire dedicated Account Team.

News – Provides additional information on extranet tools and enhanced features.

Promotions and Updates - Shows current promotions and updates to technology solutions.

Featured Products – Highlights specific products and solutions.

Recent Orders – Displays information for orders for the past 45 days including order status, purchase date, purchase order number, purchaser, and sub-total.

Contracts – Provides details of pricing contracts for your organization and enables you to download pricing for your contracts.

Bundles – Takes the guesswork out of repeat purchases. Administrators can create custom bundles containing their company's standardized solutions.

Individual Products – Allows administrators to highlight products for quick and easy access.

Comparison Charts – Helps users to compare the features and prices of multiple products during the shopping process and save those comparisons for future reference.

Links – Lets users maintain easy access to manufacturer websites and other helpful online destinations. There are links to additional extranet features that are only a click away. These features include:

My Purchases – Offers a full breadth of tools to track order status, purchase history, and financial information.

Security Settings – Enables administrators to restrict users' access to specific functions.

Asset Management – Enables you to create and download a detailed report of your organization's hardware assets that have been asset tagged.

Software License Tracker – Simplifies software license management and reduces the risk of noncompliance.

Quotes – Enables you to create your own quote right from your shopping cart, forward it for preauthorization, and convert it to a live order.

Purchase Authorization – Automates approval process and manages users' purchasing power.

Custom Catalogs – Displays only products approved for purchase by your organization.

Online Chat – Puts users in direct contact with customer relations, technical support, and e-support team representatives.

10. Describe the types of online reporting that are available. Is customized reporting available?

CDW•G Response: CDW•G's reporting capabilities are extremely flexible and comprehensive. CDW•G Extranet provides access to real-time information in a way that is convenient and easy to use.

The City of Mesa authorized users have access to your extranet 24 hours per day, 7 days per week. Authorized users have the ability to generate a variety of reports via their agency's extranet. Data fields include, but are not limited to:

- Product name
- Item description
- Part number
- Cost per unit
- Order quantity
- Delivery location
- Date ordered

- Purchase Order#
- Purchased by

Agencies can view standard reports, and create and save custom reports. Reports can also be generated for a variety of timeframes; differentiated by site, division, department, buyer, city, state, product, etc. Users can select from Microsoft Excel, CSV and tab-delimited files for report downloading.

11. Describe your online return process (if available).

CDW•G Response: In order to return any product to CDW•G, including damaged or defective products, contract users must request a Return Merchandise Authorization (RMA) number. The most efficient way to request an RMA number is via the customer's CDW•G Extranet. When an RMA request is entered, the system automatically checks several factors to see if the RMA can be automatically approved. If the return meets these factors, the RMA number is emailed directly to the customer. Should the auto-approval criteria not be met, the RMA will route to Customer Relations for processing. The benefit of our automated system is faster turnaround time on most RMA approvals. Once CDW•G has processed the request, the customer receives an email with the RMA number. The approved RMA number must be clearly noted on the shipping label of each box.

CDW•G carries many more highly customizable products than what we have historically carried on this contract. A uniquely customized product is not as simple to return as an off-the-shelf product. Once a product has been customized, we are unable to return it to the OEM ourselves; that activity must be handled directly between the purchaser and the OEM. Therefore, CDW•G proposes the following return policy:

- Except for certain products that are uniquely customized to City specifications, which shall be indicated at the time of Quote, all defective products shall be identified within thirty (30) days of receipt and will then be replaced and exchanged by the Contractor. The cost of transportation, unpacking, inspection, re-packing, re-shipping or other like expenses shall be paid by the Contractor. All replacement products must be received by the City within seven (7) days of initial notification.
- Uniquely customized products are typically indicated by the inclusion of the designation "CTO," "BTO" or "Customer's Name" in the product description of the item. When providing a quote for products that are uniquely customized to City specifications, Contractor shall include the following statement on the quote: "*This quote contains a custom item, this item may not be able to be returned, depending on manufacturer restrictions."*

More often than not, we are able to find a return remedy - even in the case of customized products. To ensure customer clarity around returning customized items, we will instruct our Account Managers to discuss the return policy with the customer during the building process for customized solutions, if they are not already doing so.

12. Describe any third-party integration that you have successfully implemented. For example, is your website integrated with any third-party procurement, financial, or purchasing/credit card systems? Is there a cost for these services?

CDW•G Response: CDW•G has implemented eCommerce solutions with over 72 eProcurement partners, for over five thousand customers on most of the major purchasing platforms. There is no charge for integration support, unlike some of our competitors.

CDW•G has overseen cXML and OCI Punch-Out solutions since 2001, with over 8,000 integrations to date. These integrations make up a quarter of our web business. There are three teams that span the eCommerce/IT/Sales departments that are solely dedicated to eProcurement integration projects.

We likewise provide level III/tier 3 credit card reporting and provide financial reports (invoices and histories) in different automated formats for compatibility with financial systems. While our website is compatible with third party e-commerce solutions, the CDW•G is owned and managed in-house without reliance on third party support for our key web systems. There is no additional charge for these services.

Below are examples of ecommerce methods CDW•G currently supports with our customers:

FTP (File Transfer Protocol)

CDW•G's FTP processing is flexible; we can exchange fixed length, wrapped or unwrapped files, with or without CR/LF. We can also exchange stream files – one continuous stream of data (variable length).Naming conventions for files and the number of files exchanged are flexible.

CDW•G or the customer can host the FTP site. UserID and Password are required to access our FTP site. CDW can delete files that have been retrieved. Partners will be expected to delete files after they are retrieved.

CDW•G uses PGP to encrypt data exchanged FTP. PGP (Pretty Good Privacy) is widely available and uses public-key cryptography to exchange files, with both privacy and authentication, over all kinds of networks. CDW•G can also support FTP using SSH or SSL session encryption.

EDIINT-AS1

This communication method uses the e-mail system to transfer encrypted data over the internet. The partner needs to have an AS1 compliant software package that can encrypt and decrypt EDIINT AS1 data.

EDIINT-AS2

This method uses the internet to exchange data. This communication method uses an HTTP post (language of web sites) to transfer encrypted data over the internet. The partner needs to have an AS2 compliant software package that can encrypt and decrypt EDIINT AS2 data.

HTTPS (HyperText Transmission Protocol, Secure)

This method allows CDW to send and receive data through a Web Server using HTTP/S. HTTP is traditionally used for displaying interactive Web pages, but can also be used as a communication method.

VAN (Value Added Network)

A VAN is the least desirable method due to the fees incurred for this third-party service. CDW•G will be happy to work with you in any capacity to eliminate the use of VANs as a communication method. If necessary, we can establish a secure connection to a VAN and the VAN should exchange in a secure fashion as well.

13. **Describe your strategic vision for your website – i.e., Is new functionality expected to be added? If so, describe the functionality and the timeline for implementation. How often is the web redesigned? As technology evolves (for example, new search engines are more robust), does your website evolve, too? Etc.**

CDW•G Response: The CDW•G website is the 10th largest website in the world measured by revenue volume. While we no longer release specific website sales numbers, past numbers indicate that our website is now processing over $2 billion per year in transactions. Additionally, the website is estimated to assist with another $4 billion in sales that are finalized on the phone or via purchase order.

The extreme volume and business-critical nature of the CDW•G website means we must focus on usability and uptime at all times. CDW•G employs over 200 in house IT personnel to keep the website accurate and running; their success is reflected in the less than 6 minutes of unplanned downtime last year - an uptime exceeding 99.997%.

Because the website processes such volume, new functionality is constantly in the works but never fully implemented until we have conducted rigorous testing for usability, compatibility and perceived value to our customers. We have also added a new Solutions & Services section, which contains streaming content and white papers that cover all the comprehensive categories where our software and hardware solutions pair with best in class support and advanced technology services.

As a world-leading website, the CDW•G site has the functionality to be compatible with our most advanced customer needs, including advanced security, multi-level approvals, asset tracking and others. Our staff of 200 will always be expanding these capabilities as advancements in technology and customer needs dictate.

Tab 6

Other Forms

The following forms should be completed and signed:

1. **Vendor Information Form**
2. **Exceptions & Confidential Information Form**
3. **General Questionnaire Form**
4. **Lawful Presence Affidavit**
5. **Respondent Certification Form (Offer and Acceptance)**
6. **Respondent Questionnaire**
7. **W-9 Form. All responses should include a fully completed, current W-9 form. Failure to include the W-9 will not disqualify your response, however the W-9 must be submitted to the City prior to the execution of any contract pursuant to this Solicitation.**

CDW•G Response: CDW•G's response to these forms follow this page.

Supplier is responsible for proactive direct sales of Supplier's goods and services to Public Agencies nationwide and the timely follow up to leads established by National IPA. All sales materials are to use the National IPA logo. At a minimum, the Supplier's sales initiatives should communicate: i. Master Agreement was competitively solicited and publicly awarded by a Principal Procurement Agency ii. Best government pricing iii. No cost to participate iv. Non-exclusive contract	CDW•G seeks the following alternate language: Supplier is responsible for proactive direct sales of Supplier's goods and services to Public Agencies nationwide and the timely follow up to leads established by National IPA. All sales materials are to use the National IPA logo. At a minimum, the Supplier's sales initiatives should communicate: i. Master Agreement was competitively solicited and publicly awarded by a Principal Procurement Agency ii. No cost to participate iii. Non-exclusive contract	
7 / Attachment D, National IPA Requirements for Cooperative Contract, Exhibit B, page 10	WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, NATIONAL IPA EXPRESSLY DISCLAIMS ALL EXPRESS OR IMPLIED REPRESENTATIONS AND WARRANTIES REGARDING NATIONAL IPA'S PERFORMANCE AS A CONTRACT ADMINISTRATOR OF THE MASTER AGREEMENT. NATIONAL IPA SHALL NOT BE LIABLE IN ANY WAY FOR ANY SPECIAL, INCIDENTAL, INDIRECT, CONSEQUENTIAL, EXEMPLARY, PUNITIVE, OR RELIANCE DAMAGES, EVEN IF NATIONAL IPA IS ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.	CDW•G Seeks the following alternative language to replace existing language: Each Party ("Indemnifying Party") shall defend the other party and the other party's officers, directors and employees (each, an "Indemnified Party") from and against any claims, demands, actions, lawsuits, and proceedings asserted or made against the Indemnified Party (each, a "Claim") and shall indemnify and hold harmless the Indemnified Party from and against any loss, damage, cost, and expense (including reasonable attorneys' fees) finally awarded by a court of competent jurisdiction or included as part of a final settlement to the extent that the Claim is proximately caused by the gross negligence or willful misconduct of the Indemnifying Party during the performance of the Services and that the Claim arises either from an action brought by an unaffiliated third party for death or personal physical injury, or from damage to tangible personal property suffered or incurred by the Indemnified Party. Claims do not include any damages or liability that are otherwise excluded from this Agreement or that arise from the good(s) or software or from the data processed thereby. The obligation of the Indemnifying Party under this Section is	

Exceptions			
Section/Page	**Term, Condition, or Specification**	**Exception/Deviation**	**City Accepts**
		contingent upon the Indemnified Party providing the Indemnifying Party with: (i) sole authority in any Claim's defense or settlement; (ii) all reasonable assistance, at the Indemnifying Party's expense, in any such defense; and (iii) prompt written notice of and description of each Claim; provided, however, that the Indemnified Party's failure to provide prompt notice will relieve the Indemnifying Party of its obligations only if and to the extent that the Indemnifying Party is materially prejudiced by such delay. In no event shall the Indemnifying Party settle any Claim that involves a remedy other than the payment of money without the prior consent of the Indemnified Party. NEITHER CONTRACTOR, ITS AFFILIATES OR ITS OR THEIR SUPPLIERS, SUBCONTRACTORS OR AGENTS SHALL BE LIABLE FOR ANY INCIDENTAL, INDIRECT, SPECIAL, PUNITIVE OR CONSEQUENTIAL DAMAGES. IN THE EVENT OF ANY LIABILITY INCURRED BY CONTRACTOR OR ANY OF ITS AFFILIATES HEREUNDER, THE ENTIRE LIABILITY OF CONTRACTOR AND ITS AFFILIATES FOR DAMAGES FROM ANY CAUSE WHATSOEVER WILL NOT EXCEED THE LESSER OF: (A) THE DOLLAR AMOUNT PAID BY CITY FOR EITHER THE SPECIFIC PURCHASED ITEM(S) GIVING RISE TO THE CLAIM; OR (B) $1,000,000.00 OVER THE ENTIRE TERM OF THE AGREEMENT.	
12/ Attachment D, National IPA Requirements for Cooperative Contract, Exhibit B, page 11	An "Administrative Fee" shall be defined and due to National IPA from Supplier in the amount of __ percent (__%) ("Administrative Fee Percentage") multiplied by the total purchase amount paid to Supplier, less refunds, credits on returns, rebates and discounts, for the sale of products and/or services to Principal Procurement Agency and Participating Public Agencies pursuant to the Master Agreement (as amended from time to time and including any renewal thereof) ("Contract Sales"). From time to time the parties may mutually agree in writing to a lower Administrative Fee Percentage for a specifically identified Participating Public	CDW•G Seeks the following alternative language to replace existing language: All sales shall be subject to a~~A~~n "Administrative Fee" ~~shall be~~as defined and due to National IPA from Supplier in the amount of two~~—~~ percent ~~(__%)~~ (2%), except Software and Chromebook product categories which will incur no fee ("Administrative Fee Percentage")~~,~~., multiplied by the total purchase amount paid to Supplier, less refunds, credits on returns, rebates and discounts, for the sale of products and/or services to Principal Procurement Agency and Participating Public Agencies pursuant to the Master Agreement (as amended from time to time and including any renewal thereof) ("Contract Sales"). 	Contractor in relation to the Agreement. Contractor will permit such inspections and audits during normal business hours and upon reasonable notice by the City. The audit of records may occur at Contractor's place of business or at City offices, as determined by the City		
24/ Exhibit 1, Draft Agreement, Exhibit C, Mesa Terms & Conditions, page 36	INDEMNIFICATION/LIABILITY. a. To the fullest extent permitted by law, Contractor agrees to defend, indemnify, and hold the City, its officers, agents, and employees, harmless from and against any and all third party liabilities, demands, claims, suits, losses, damages, causes of action, fines or judgments, including costs, attorneys', witnesses', and expert witnesses' fees, and expenses incident thereto, relating to, arising out of, or resulting from: (i) the services provided by Contractor personnel under this Agreement; (ii) any negligent acts, errors, mistakes or omissions by Contractor or Contractor personnel; and (iii) Contractor or Contractor personnel's failure to comply with or fulfill the obligations established by this Agreement. b. Contractor will update the City during the course of the litigation to timely notify the City of any issues that may involve the independent negligence of the City that is not covered by this indemnification. c. The City assumes no liability for actions of Contractor and will not indemnify or hold Contractor or any third party harmless for claims based on this Agreement or use of Contractor-provided supplies or services.	Notwithstanding what is stated in this section, CDWG proposes that the terms and conditions proposed above in Section 7 / Attachment D, National IPA Requirements for Cooperative Contract, Exhibit B, page 10.	
25/ Exhibit 1, Draft Agreement, Exhibit C, Mesa Terms & Conditions, page 36	WARRANTY. Contractor warrants that the services and materials will conform to the requirements of the Agreement. Additionally, Contractor warrants that all services will be performed in a good, workman-like and	CDW•G Seeks the following alternative language to replace existing language: The City understands that the Contractor is not the manufacturer of the products purchased by the City hereunder and the only warranties offered are those of the manufacturer, not the Contractor	

Exceptions			
Section/Page	**Term, Condition, or Specification**	**Exception/Deviation**	**City Accepts**
	professional manner. The City's acceptance of service or materials provided by Contractor will not relieve Contractor from its obligations under this warranty. If any materials or services are of a substandard or unsatisfactory manner as determined by the City, Contractor, at no additional charge to the City, will provide materials or redo such services until in accordance with this Agreement and to the City's reasonable satisfaction. Unless otherwise agreed, Contractor warrants that materials will be new, unused, of most current manufacture and not discontinued, will be free of defects in materials and workmanship, will be provided in accordance with manufacturer's standard warranty for at least one (1) year unless otherwise specified, and will perform in accordance with manufacturer's published specifications.	or its affiliates. In purchasing the products, the City is relying on the manufacturer's specifications only and is not relying on any statements, specifications, photographs or other illustrations representing the products that may be provided by the Contractor or its affiliates. THE CONTRACTOR AND ITS AFFILIATES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES EITHER EXPRESS OR IMPLIED, RELATED TO PRODUCTS, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTY OF TITLE, ACCURACY, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WARRANTY OF NONINFRINGEMENT, OR ANY WARRANTY RELATING TO THIRD PARTY SERVICES. THE DISCLAIMER CONTAINED IN THIS PARAGRAPH DOES NOT AFFECT THE TERMS OF ANY MANUFACTURER'S WARRANTY. The City expressly waives any claim that it may have against the Contractor or its affiliates based on any product liability or infringement or alleged infringement of any patent, copyright, trade secret or other intellectual property rights (each a "Claim") with respect to any product and also waives any right to indemnification from the Contractor or its affiliates against any such Claim made against the City by a third party. The City acknowledges that no employee of the Contractor or its affiliates is authorized to make any representation or warranty on behalf of the Contractor or any of its affiliates that is not in this Contract. In connection with the products, certain services, such as extended warranty service by manufacturers, are sold by the Contractor as a distributor or sales agent ("Third Party Services"). In the case of Third Party Services, the third party will be the party responsible for providing the services to the City and the City will look solely to the third party for any loss, claims or damages arising from or related to the provision of such Third Party Services. The City hereby releases the Contractor and its affiliates from any and all claims arising from or relating to the purchase or provision of any such Third Party Services. Any amounts, including, but not limited to, taxes, associated with Third Party Services which may be collected by the Contractor will be collected	

Exceptions

		solely in the capacity as an independent sales agent. If in connection with the provision of products, the City desires to have the Contractor provide installation of custom software images, the City will be required to execute an Installation Indemnity Agreement, a form of which is provided at http://www.cdw.com/forms/indemnity/app.asp.	
32/ Exhibit 1, Draft Agreement, Exhibit C, Mesa Terms & Conditions, page 37	RISK OF LOSS. Contractor agrees to bear all risks of loss, injury, or destruction of goods or equipment incidental to providing these services and such loss, injury, or destruction will not release Contractor from any obligation hereunder.	CDW•G seeks the following alternate language for this section: Title to Products and risk of loss or damage during shipment pass from Contractor to City upon delivery to the destination specified on the applicable purchase order (F.O.B. Destination, freight prepaid and added).	

Exceptions			
Section/Page	**Term, Condition, or Specification**	**Exception/Deviation**	**City Accepts**
35/Exhibit 1, Draft Agreement, Exhibit C, Mesa Terms & Conditions, page 37	PROPRIETARY RIGHTS INDEMNIFICATION. Without limiting the foregoing, Contractor will without limitation, at its expense defend the City against all claims asserted by any person that anything provided by Contractor infringes a patent, copyright, trade secret or other intellectual property right and must, without limitation, pay the costs, damages and attorneys' fees awarded against the City in any such action, or pay any settlement of such action or claim. Each party agrees to notify the other promptly of any matters to which this provision may apply and to cooperate with each other in connection with such defense or settlement. If a preliminary or final judgment is obtained against the City's use or operation of the items provided by Contractor hereunder or any part thereof by reason of any alleged infringement, Contractor will, at its expense and without limitation, either: (a) modify the item so that it becomes non-infringing; (b) procure for the City the right to continue to use the item; (c) substitute for the infringing item other item(s) having at least equivalent capability; or (d) refund to the City an amount equal to the price paid, less reasonable usage, from the time of installation acceptance through cessation of use, which amount will be calculated on a useful life not less than five (5) years, plus any additional costs the City may incur to acquire substitute supplies or services.	The City's sole rights to the work product, materials and other deliverables to be provided or created (individually or jointly) in connection with the services, including but not limited to, all inventions, discoveries, methods, processes, formulae, ideas, concepts, techniques, know-how, data, designs, models, prototypes, works of authorship, computer programs, proprietary tools, methods of analysis and other information (whether or not capable of protection by patent, copyright, trade secret, confidentiality, or other proprietary rights) or discovered in the course of performance of this Contract that are embodied in such work or materials ('Work Product") will be, upon payment in full, a non-transferable, non-exclusive, royalty-free license to use such Work Product solely for the City's internal use. The City will have no ownership or other property rights thereto, and the City shall have no right to use any such Work Product for any other purpose whatsoever. The City acknowledges that the Contractor may incorporate intellectual property created by third parties into the Work Product ("Third Party Intellectual Property"). The City agrees that its right to use Work Product containing Third Party Intellectual Property may be subject to the rights of third parties and limited by agreements with such third parties.	

Confidential Information

The following parts of our response are exempt from public disclosure. Subject to applicable state law, we request that the information detailed below be treated as confidential.

RESPONDENT CERTIFICATION

By submitting the Response and signing this Certification, the Respondent understands and certifies to all of the following:

a) The information provided in Respondent's Response it true and accurate to the best of Respondent's knowledge.
b) Respondent is under no legal prohibition that would prevent Respondent from contracting with the City of Mesa.
c) Respondent has read and understands the Solicitation packet as a whole (including attachments, exhibits, and referenced documents) and: (i) can attest that Respondent is in compliance with the requirements of the Solicitation packet; and (ii) is capable of fully carrying out the requirements of the Solicitation as set forth in Respondent's Response.
d) To Respondent's knowledge, Respondent and Respondent's employees have no known, undisclosed conflicts of interest as defined by applicable law or City of Mesa Procurement Rules. If Respondent or Respondent employees have a known conflict of interest, Respondent has disclosed the conflict in its Response.
e) Respondent did not engage in any anti-competitive practices related to its Response or the Solicitation. The prices offered by Respondent were independently developed without consultation or collusion with any other Respondents or potential Respondents.
f) No gifts, payments or other consideration were made to any City employee, officer, elected official, agent, or consultant who has or may have a role in the procurement process for the services/materials covered by the Solicitation.
g) Respondent grants the City of Mesa permission to copy all parts of its Response including, without limitation, any documents and materials copyrighted by Respondent: (i) for the City's use in evaluating the Response; and (ii) to be disclosed in response to a public records request under Arizona's public records law (A.R.S. § 39-121 et. seq.) or other applicable law, subpoena, or other judicial process provided such disclosure is in accordance with City of Mesa Procurement Rule 6.13.
h) If a contract is awarded to Respondent as a result of the Response submitted to the Solicitation Respondent will:
    i. Provide the materials or services specified in the Response in compliance with all applicable federal, state, and local statutes, rules and policies;
    ii. Honor all elements of the Response submitted by Respondent to the City including, but not limited to, the price and the materials/services to be provided; and
    iii. Enter into an agreement with the City based on the terms and conditions of the Solicitation and the Response, subject to any negotiated exceptions and terms.
i) Respondent is current in all obligations due to the City including any amounts owed the City and any licenses/permits required for the general lawful conduct of business. Respondent shall acquire all licenses/permits necessary to lawfully conduct business specific to the Solicitation prior to the execution of a contract with the City pertaining to the Solicitation.
j) The signatory of this Certification is an officer or duly authorized agent of Respondent with full power and authority to submit binding offers for the goods/services specified herein. Respondent intends by the submission of this Certification to be bound by the terms of the Certification, Solicitation, and Response, subject to any negotiated terms/exceptions.

To CDW Government LLC Customers:

CDW Government LLC is your supplier/vendor. CDW Government LLC's FEIN is 36-4230110. This is the number displayed on our invoices.

CDW Government LLC is treated as a disregarded entity for federal income tax purposes. The Internal Revenue Service requires the W-9 to be completed by an entity that is not a disregarded entity for federal tax purposes. For CDW Government LLC, that entity is the parent corporation, CDW LLC, FEIN 36-3310735. Consequently, CDW Government LLC's W-9 lists CDW LLC as the "Name (as shown on the income tax return)" and the "Business name" as CDW Government LLC.

The address on our W-9, (230 N. Milwaukee Ave. Vernon Hills, IL 60061), is our mailing address registered with the IRS. CDW Government LLC requests your payments to be mailed to another address, (75 Remittance Dr, Suite 1515, Chicago, IL 60675). This is merely for payment processing and is not a CDW Government LLC physical location.

We apologize for any confusion our organizational structure may cause you; however, we have completed the W-9 as required by the Internal Revenue Service.

Please feel free to contact us at taxteam@cdw.com should you have any questions or require additional documentation.

Thank you,

CDW Tax Department

Field Sales Manager, Government **2014-Present**

- Responsible for customer relationships, territory strategy, partner alignment, and Coworker Development for all State and Local Field Sellers in Eastern US.
- Assist in developing short- and long-term performance goals, strategic direction, and business initiatives of our East State and Local Sales Team.

Regional Sales Manager, Government **2007-2014**

- Driving force in successful awards to CDW•G of several state contracts including Ohio, Florida, and California.
- Manage a team of State and Local account managers in the Pacific region
- Responsible for Government sales across all technologies in the region
- Work with account managers to ensure customers are being properly serviced

Strategic Accounts Sales Manager, Healthcare **2006-2007**

- Founding member of CDW Healthcare Division
- Lead Subject Matter Expert for contract proposal resulting in then largest contract in company history
- Responsible for developing, coaching, and supervising National Field and Inside Sales Staff

Sales Manager, Education **2004-2006**

- Driving force in regionalization of Education sales team.
- Consistently managed highest percent of goal sales team in the division.

Account Manager, Government & Education **2001-2004**

- Assisted in the development of new Account Managers
- Focused on helping customers with their technology purchases
- Focused on building relationships with customers to ensure they met their technology goals
- Developed new relationships within existing customers to bring them the value and benefits of CDW

CDW PRODUCT RETURN POLICY

Seller offers a 30-day return policy on most products sold. Manufacturer restrictions apply to certain merchandise, as detailed below and as updated from time to time. Customer may obtain additional details and any applicable updates from the dedicated Seller account manager and may obtain manufacturer contact information by contacting CDW Customer Relations, which may be reached by calling 866.SVC.4CDW or by emailing returns@cdw.com.

1. Return Restrictions.

- Defective Product Returns. Customer may return most *defective* Products directly to Seller within fifteen (15) days of invoice date and receive, at Seller's option, credit, replacement, exchange, or repair. After fifteen (15) days, only the manufacturer warranty applies.

- Non-Defective Product Returns. Customer may return most *non-defective* Products directly to Seller within thirty (30) days of invoice date and receive, at Customer's option, credit or exchange, except that an automatic Seller restocking charge will reduce the value of any such credit or exchange by a minimum of fifteen percent (15%).

- Restricted, Repair-Only Returns. Certain Products can only be returned for repair—not for exchange, replacement or credit—based on current manufacturer requirements. Such Products should be returned to Seller, shipped directly to the manufacturer, or taken to an authorized service center in Customer's vicinity. More information may be provided by the dedicated Seller account manager or by CDW Customer Relations.

- Restricted, Manufacturer-Only Assistance. Certain Products cannot be returned to Seller for any reason—without exception—and Customer must contact the manufacturer directly for any needed assistance. More information may be provided by the dedicated Seller account manager or by CDW Customer Relations.

- Special Orders. Products that are specially ordered may be non-returnable or may have unique return restrictions provided at the time of sale. More information may be provided by the dedicated Seller account manager or by CDW Customer Relations.

- Return of Software or DVDs. Seller offers refunds only for unopened, undamaged software and DVD movies that are returned within 30 days of invoice date. Seller offers *only replacement* for software products and DVD movies that either: (i) are defective but are returned *within* thirty (30) days of invoice date; or (ii) are unopened and undamaged, but are returned *more than* 30 days after invoice date; such replaceable merchandise may be exchanged only for the same software or DVD movie title. Multiple software licenses may be returned for refund or exchange *only* (i) if specifically authorized in advance by the manufacturer; *and* (ii) if returned *within* thirty (30) days of invoice date.

2. Customer Shipment of Returned Merchandise.

- Return Merchandise Authorization (RMA) Number. No returns of any type will be accepted by Seller unless accompanied by a unique RMA number, which Customer may obtain by providing the following information to CDW Customer Relations: customer name, applicable invoice number, product serial number, and details of Customer's issue with the product. Customer has five (5) days to return a Product after the applicable RMA is issued. CDW reserves the right to refuse any UNAUTHORIZED returns: those that occur after the five (5) day period or those involving Products that are unaccompanied by valid RMA's.

- Returned Products Must Be Complete. All Products *MUST BE* returned one hundred percent (100%) complete, including all original boxes, packing materials, manuals, blank warranty cards, and other accessories provided by the manufacturer. CDW reserves the right to refuse the return of incomplete Products. In addition, CDW will charge a minimum fifteen percent (15%) restocking fee for returns that are accepted.

- Responsibility for Shipping Costs. Customer is responsible for the cost of shipping returned items; Seller is responsible for the cost of shipping replacements or exchanges of returned items and will match Customer's shipping method.

- Customer Shipping Insurance. Customer is strongly advised to purchase full insurance to cover loss and damage in transit for shipments of returned items and to use a carrier and shipping method that provide proof of delivery. Seller is not responsible for loss during such shipment.

3. Merchandise Damaged in Transit.

- Refusal/Receipt of Damaged Products. If a package containing items purchased from Seller arrives at Customer's address *DAMAGED*, Customer should *REFUSE* to accept delivery from the carrier. If Customer *does* accept delivery of such a package, Customer must: (i) note the damage on the carrier's delivery record so that Seller may file a claim; (ii) save, as is, the merchandise *AND* the original box and packaging it arrived in; and (iii) promptly notify Seller either by calling CDW Customer Relations or by contacting the Seller account manager to arrange for carrier's inspection and pickup of the damaged merchandise. If Customer does not so note the damage and save the received merchandise and does not so notify Seller within fifteen (15) days of delivery acceptance, Customer will be deemed to have accepted the merchandise as if it had arrived undamaged, and Seller's regular return policy, as described in sections 1 and 2 above, and all current manufacturer warranties and restrictions will apply.

4. Credits

Any credit issued by Seller to Customer under this return policy must be used within two (2) years from the date that the credit was issued and may only be used for future purchases of Product and/or Services. Any credit or portion thereof not used within the two (2) year period will automatically expire.

COUNCIL COMMUNICATION

CC #: 9860
File #: 0500

Title: Mediation Disclosure Notification and Acknowledgment
Contact: M. Sheidenberger 916-774-5325 msheidenberger@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.9.

RECOMMENDATION TO COUNCIL

The City Attorney recommends that the City Council adopt a resolution to authorize the Mayor to execute a Mediation Disclosure Notification and Acknowledgment form on behalf of the City Council.

BACKGROUND

Under existing law, all communications, negotiations and settlement discussions during mediation are confidential. SB 954, which went into effect January 1, 2019, requires an attorney representing a client participating in a mediation to provide the client with a written disclosure containing the mediation confidentiality restrictions provided in the California Evidence Code. The form of the disclosure notice is provided in the statute. The attorney is required to obtain a printed acknowledgment signed by the client before every mediation stating that the client has read and understands the confidentiality restrictions.
It was unclear initially whether this new law applied to cities with in-house city attorneys. A lobbyist for a city requested the author provide additional information on how the bill would apply to city attorneys. The response was that city attorneys should obtain the disclosure. However, instead of obtaining a signed disclosure every time there is a potential mediation, it was advised that it is sufficient to tailor the disclosure to coincide with the City Council membership so that the City Council only signs the disclosure when its membership changes. Since the City Council recently appointed a new Councilmember and Mayor, the City Attorney requests that the City Council authorize Mayor John B. Allard II to execute the attached Mediation Disclosure Notification and Acknowledgment form on behalf of the City Council.

FISCAL IMPACT

There is no fiscal impact associated with this particular request.

ECONOMIC DEVELOPMENT / JOBS CREATED

No jobs will be created as a result of this action.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment (CEQA Guidelines §15061(b)(3)). Execution of the required mediation disclosure form does not include the potential for a significant environmental effect, and therefore is not subject to CEQA.

Respectfully Submitted,

Michelle Sheidenberger, Assistant City Attorney

Robert R. Schmitt, City Attorney

Mediation Disclosure Form

RESOLUTION NO. 19-87

AUTHORIZING THE MAYOR TO SIGN A MEDIATION DISCLOSURE NOTIFICATION AND ACKNOWLEDGEMENT FORM

WHEREAS, SB 954 requires an attorney representing a client participating in a mediation to provide the client with a written disclosure containing the mediation confidentiality restrictions provided in the California Evidence Code; and

WHEREAS, instead of signing a disclosure every time there is potential mediation, the City Attorney requests that the City Council authorize Mayor John B. Allard II to execute a Mediation Disclosure notification and Acknowledgement form on behalf of the existing City Council; and

WHEREAS, the Mediation Disclosure Notification and Acknowledgement form has been reviewed by City Council; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that the Mayor is hereby authorized to sign the Mediation Disclosure Notification and Acknowledgement form.

PASSED AND ADOPTED by the Council of the City of Roseville this ___ day of _____, 20__, by the following vote on roll call:

CITY OF ROSEVILLE CALIFORNIA

City Attorney
311 Vernon Street
Roseville, California 95678-2649

MEDIATION DISCLOSURE NOTIFICATION AND ACKNOWLEDGEMENT

To promote communication in mediation, California law generally makes mediation a confidential process. California's mediation confidentiality laws are laid out in Sections 703.5 and 1115 to 1129, inclusive, of the Evidence Code. Those laws establish the confidentiality of mediation and limit the disclosure, admissibility, and a court's consideration of communications, writings, and conduct in connection with a mediation. In general, those laws mean the following:

- All communications, negotiations, or settlement offers in the course of a mediation must remain confidential.
- Statements made and writings prepared in connection with a mediation are not admissible or subject to discovery or compelled disclosure of noncriminal proceedings.
- A mediator's report, opinion, recommendation, or finding about what occurred in a mediation may not be submitted to or considered by a court or another adjudicative body.
- A mediator cannot testify in any subsequent civil proceeding about any communication or conduct occurring at, or in connection with, a mediation.

This means that all communications between the Roseville City Council and the City Attorney made in preparation for a mediation, or during a mediation, are confidential and cannot be disclosed or used (except in extremely limited circumstances), even if the City of Roseville later decides to sue the City Attorney for malpractice because of something that happens during the mediation.

I, John B. Allard II, Mayor of the City of Roseville, acting on behalf of the Roseville City Council, convey the Roseville City Council's understanding that, unless all participants agree otherwise, no oral or written communication made during a mediation, or in preparation for a mediation, including communications between any Roseville City Council Member and the City Attorney, can be used as evidence in any subsequent noncriminal legal action including an action against the City Attorney for malpractice or an ethical violation.

NOTE: This disclosure and signed acknowledgement does not limit the City Attorney's potential liability to the City of Roseville for professional malpractice, or prevent the City of Roseville from (1) reporting any professional misconduct by its attorney to the State Bar of California or (2) cooperating with any disciplinary investigation or criminal prosecution of its attorney.

Title: Placer Valley Tourism - Annual Budget and Strategic Work Plan
Contact: Kathy M. Barsotti 916-774-5955 kbarsotti@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.10.

RECOMMENDATION TO COUNCIL

Recommend Council adopt a resolution to approve the 2019 Budget and 2019 Strategic Marketing Plan for Placer Valley Tourism (PVT).

BACKGROUND

The South Placer County Tourism Corporation, dba Placer Valley Tourism (PVT), exists to create a revenue source that specifically promotes and supports tourism efforts that generate overnight stays within the region. Revenue is generated by assessments on hotel room nights for all hotels in the cities of Lincoln, Rocklin and Roseville. This assessment was voted on and approved by all hotel owners in 2014.

On November 5, 2014, the City entered into a Marketing Management Agreement with PVT which authorizes PVT to administer and implement all of the activities and improvements of the District. Expenditure of assessments received from the District are directed by the PVT Board, which is comprised of hotel, Chamber and City representatives from Roseville, Rocklin and Lincoln. Pursuant to the Marketing Management Agreement, and as required by state law, the PVT strategic marketing plan and budget shall undergo annual review and approval by the City Council. The City Council has the discretion to approve the strategic marketing plan and budget as submitted or may modify any particular matter contained within these documents.

The attached strategic marketing plan was approved by the PVT Board of Directors on October 25, 2018. The budget was approved by PVT Board of Directors on November 15, 2018. Revenues are in line with expenses, and a conservative revenue budget was assumed. Some of the highlights of the 2019 Strategic Marketing Plan include:

1. Keep the Event Center (@the Grounds) on track for opening first quarter of 2020.
2. Focus all available capital resources on the Event Center for the next two years.
3. Work to secure sponsorships and naming rights for @the Grounds and Event Center.
4. Focus on the sports tourism side of the Event Center securing key events for 2020 and 2021.
5. Market the Event Center to Faith Groups.
6. Work to minimize the loss of a year without a major California Capital Aquatics (CCA) event.

7. Successful implementation of a new website platform.

The attached Placer Valley Tourism 2019 Strategic Marketing Plan provides further detailed information. Staff has reviewed and recommends approval of PVT's 2019 Strategic Marketing Plan and 2019 Budget.

FISCAL IMPACT

There is no direct fiscal impact associated with this recommendation. Funding for these PVT activities is derived from room night assessments for all hotels in the cities of Lincoln, Rocklin and Roseville. These assessments were voted on and approved by a majority of affected hotel owners in 2014. This assessment is separate and distinct from the 6% transient occupancy tax (TOT) collected by the City of Roseville from all Roseville hotels.

ECONOMIC DEVELOPMENT / JOBS CREATED

While the creation of the PVT Marketing Plan itself has a limited economic impact, the goals and objectives have a significant economic impact in the area of tourism, cultural arts, and entertainment within the City of Roseville and greater Placer County. Tourism is an economic engine and is vitally important to our economic industry: generating revenue, creating jobs, and developing stronger communities.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment (CEQA Guidelines §15061(b)(3)). Approval of the 2019 Strategic Marketing Plan and 2019 Budget for Placer Valley Tourism does not include the potential for a significant environmental effect, and therefore is not subject to CEQA.

1	Revenue to PVT is lower due to increased debt service. See note 10.
2	Interest is up due to investment in money market and CDs.
3	Rollover for Roseville dugout project.
4	Marketing is up due to increased attendance at trade shows, Event Center support and Superlative naming rights contract.
5	Event Support is reduced due to loss of major swimming event.
6	Opportunity Fund deleted due to reserves.
7	ATG shortfall is based upon feasibility study for Event Center.
8	Money available to go into reserves or assist with Event Center.
9	Assessments are slightly above 2018 budget and slightly below 2018 actuals softening in market is offset by new hotel capacity.
10	Bond payments increase as we draw down more of the proceeds. Stable annual debt service is around 2,050,000

PLACER VALLEY
Tourism Enriching Communities

A Year of Exhilarating Challenges

2019 Strategic Marketing Plan

Make no mistake about it, 2019 is going to be a very challenging year for Placer Valley Tourism (PVT).

The monumental task of revitalizing and rebranding the fairgrounds to @the Grounds while simultaneously planning, developing and scheduling the pending construction of the new Event Center, will continue to take a toll on our very small staff and financial resources. Nonetheless, while 2019 demands another year of hard work we look forward to reaping our harvest in 2020.

Over the past several years PVT has established very strong programs that continue to drive incremental hotel room sales and improve Average Daily Rate (ADR). This year's goal will try to maintain all of these successes while preparing for the next quantum change in the market. Most of Placer Valley Tourism's key strategies for 2019 are building blocks for 2020 and beyond.

2019 Key Strategies

1) Keep the Event Center on track for opening first quarter 2020
2) Focus all available capital resources on the Event Center for the next two years
3) Work to secure sponsorships and naming rights for @the Grounds and Event Center
4) Focus on the sports tourism side of the Event Center securing key events for 2020 and 2021
5) Market the Event Center to Faith Groups
6) Work to minimize the loss of a year without a major California Capital Aquatics (CCA) event
7) Successful implementation of a new website platform

Hotel Room Nights Available vs. Sold 2006 - 2018

	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018 - 3rd QTR

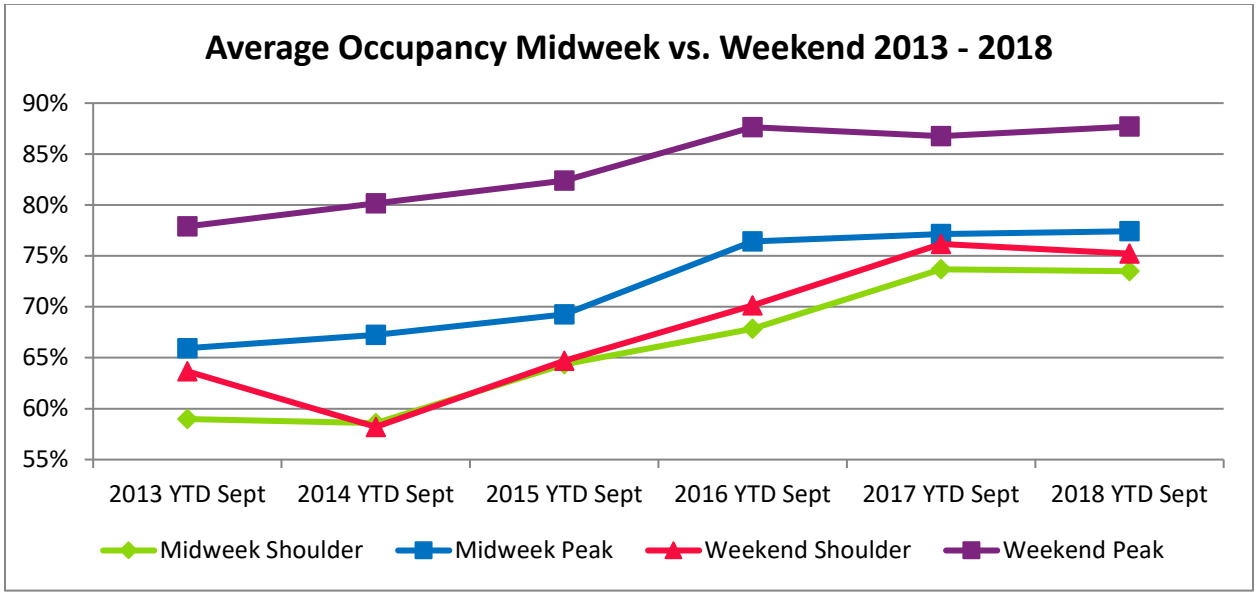
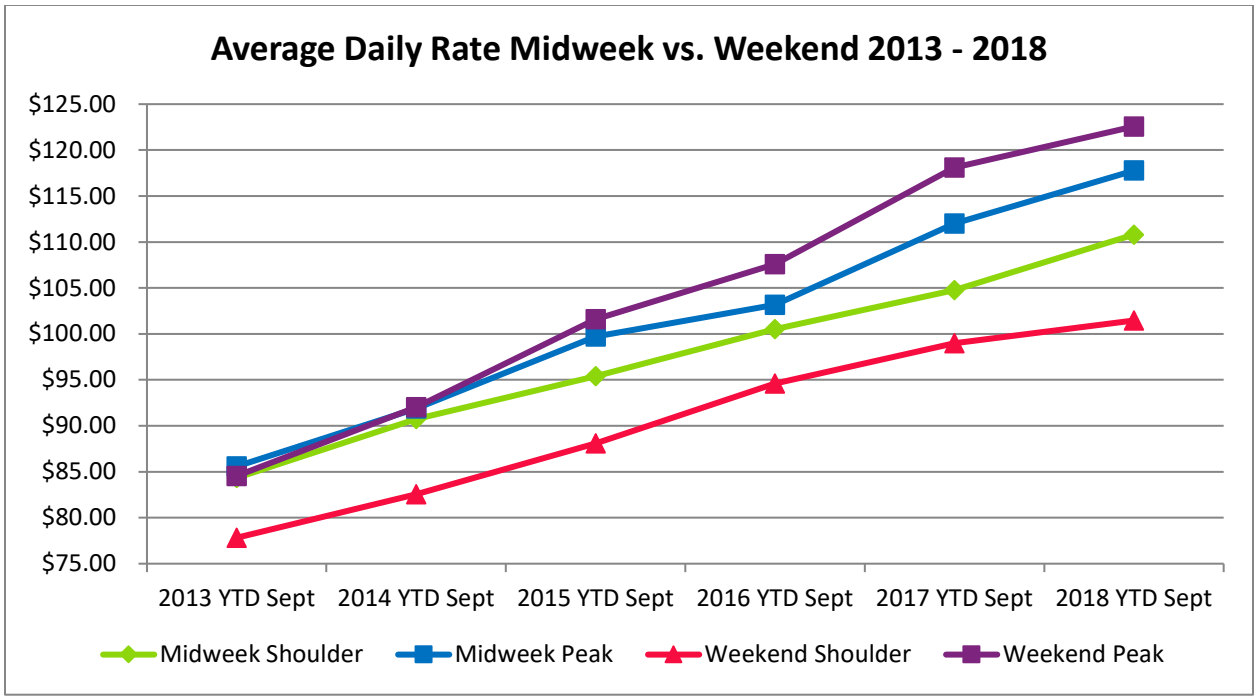
2018 data above shows continued improvement as demonstrated in the charts below with one cautionary note; during the last few months, there has been a slight slowdown in hotel demand for the entire Sacramento market. Downtown Sacramento has increased gross demand due to new product while occupancy has declined. End of year projections illustrate the market saw mild growth in the first half of 2018 and are losing steam heading towards flat demand on an annualized basis.

While very good occupancy is being maintained in Placer Valley, we continue our focus on ADR which is a critical factor to the health of the hotel industry and our cities' Transient Occupancy Tax (TOT) collection.

The following two charts show our occupancy by time periods: Weekend Peak and Weekday Peak (May - October) and Midweek and Weekend Shoulder (November - April). With the exception of Weekend Peak occupancies, the other three segments are relatively close, within four points of each other, while Weekend Peak is ten points ahead due in large part to our successful event strategy. However, the following ADR chart shows how far behind Weekend Shoulder rates lag more than $20.00. The Event Center will allow us to host major events in the Shoulder season, replicating our successful strategy that is driving Weekend Peak. Moving this ADR segment will be immensely impactful for our hotels and cities.





Event Center Construction Schedule & Resources

Approval of the Event Center is expected in late 2018 with construction to commence soon after. To accelerate a timely start, PVT has implemented a design-build method for which completed plans are nearly in place. Unfortunately, the CEQA/EIR process took six months longer than expected which has delayed construction to start in the winter season. This delay has already witnessed an impact on costs as a result of escalating tariffs due to an uncertain steel market as well as a general demand on the construction industry as a whole.

Adding to this, PVT made the decision to change the initial phase of the building from 130,000 square feet with 10 basketball courts to 160,000 square feet and 12 basketball courts while remaining column free even at full build out. This option will allow for the subsequent construction phase of the building to be less intrusive to operations and less expensive when it is embarked. While this decision is a very positive strategy for building operations, it does shift more financial burden to the present budget as opposed to the future. Because of these decisions and the importance of the Event Center to our mission, *to improve the health of the hotel industry*, PVT's capital financial investments for the next several years will remain focused on delivering the best Event Center possible, filled with room night producing events.

Event Center Auxiliary Revenues – Sponsorship/Naming Rights

Anticipating the completion of the Event Center, PVT has hired a national company, The Superlative Group, to assist in securing sponsors and naming rights opportunities. These components are an important integral part to the self-sustaining model for @the Grounds. We recognize that space rental and additional revenue streams alone cannot make an enterprise of this scale competitive and self-sufficient. It is only through sponsorship and other auxiliary revenues that we ensure ongoing quality site maintenance while providing a pricing structure that allows for community usage. The earlier these promotional partners can be identified the better for all. It allows more exposure for the partner while defining ways to fully incorporate brands and better implementation for daily operations.

Filling the Event Center with Sports Tourism

PVT and @the Grounds will work closely together to fill the Event Center with the most impactful events for our community. In supporting this strategy, PVT will take the lead on sports tourism events and the faith market while @the Grounds will lead the efforts focused on government and association meeting markets along with other types of events like industry trade shows, fundraisers and community events. Groundwork to uncover impactful events for the new Event Center is well underway! Emphasis on booking within the shoulder months of November through February continue to be a focus even though the highly anticipated event center will increase occupancies year-round.

Diversifying our market mix will allow us to strategically select business that will best accomplish the goal of generating incremental hotel room nights. We are actively pursuing the five sport-types depicted in the Hunden Feasibility Study as having the greatest impact:

- Basketball
- Volleyball
- Gymnastics
- Wrestling
- Cheer

Basketball:

Basketball organizations are very prevalent in the West so deciding which will have the greatest impact is priority. While we have strong existing relationships with AAU and Extreme Hoops, research and qualifying efforts have uncovered additional opportunities worthy of consideration and development:

- West Coast Take Over (WCTO)
- Best of the West (BOTW)
- National Middle School Basketball Association (NMSBA)

Westcoast Takeover is a local organization hosting annual tournaments for young athletes ages 8-18. Our first experience with WCTO will take place this December at Hardwood Palace. By 2020, WCTO events will be primed and ready for the new Event Center. Each tournament is expected to generate between 300-700 room nights and is currently being considered for hosting at the Event Center during the months of March – April – May – September – December; *actual weekend to be determined.*

Best of the West is a basketball and volleyball tournament hosted by Regency Baptist Academy at Hardwood Palace. BOTW takes place mid-week in early November attracting teams from California, Oregon and Washington. Fostering a relationship opens a new niche for PVT; Independent Christian Schools. The potential for creating new events and developing existing events is foreseeable.

The National Middle School Basketball Association State Championship takes place annually during the designated college recruiting timeframe in March. This tournament has a strong following capable of generating over 1,000 room nights. This particular event can only be awarded through a bid process.

Volleyball:

Similar to basketball, volleyball tournaments flourish in winter and spring while attracting travel teams from all over California and beyond.

At this time, the following volleyball organizations have been identified as potential partners to host large scale tournaments:

- Synergy Force/Junior Volleyball Association (JVA)
- USA Volleyball (USAV)/Northern California Volleyball Association (NCVA)

Synergy Force Volleyball is a local premier Junior Club that PVT has successfully cemented a relationship with. Synergy's reputation and affiliation to JVA will be the catalyst to creating and securing at least one signature JVA tournament annually.

JVA is the only national association that is 100% focused on junior volleyball and the needs of junior clubs. Hosting a JVA tournament will attract out of town teams to generate an estimated 1,000-3,000 room nights per major event.

At this time, the following weekends are being held on a tentative basis pending the confirmation of a venue opening date:

- January 18-20, 2020 - MLK weekend (may need to shift to 2021)
- March 7-8, 2020 (may need to shift to 2021)

USA Volleyball (USAV) is a non-profit organization which is recognized as the national governing body of volleyball in the United States.

NCVA operates under USAV in a regional capacity to host events in northern California. NCVA hosts one- and two-day events that don't necessarily generate many room nights, however, this is a good contact to have when we need to fill an open weekend. At this time, the following date is being considered:

- May 2-3, 2020 – Western Qualifier
- NCVA league tournaments can be booked short term, ideal for last minute filler business

Gymnastics:

PVT and Byers Gymnastics Roseville, a local gymnastics club, have developed a reciprocal relationship which has led to the successful hosting of smaller meets including Xcel competitions and invitationals.

Networking opportunities with USA Gymnastics (USAG) representatives at industry conferences like National Association of Sports Commissions (NASC) and US Sports Congress have allowed USAG to build an invaluable confidence of who we are and what we do.

As a result, the addition of the Event Center is opening opportunities to host large scale USAG national championships. National competitions attract gymnasts from across the U.S. generating an estimated 500+ room nights. A bid has been submitted to host the 2020 - USAG Level 9 Championship, May 8-10 at the Event Center.

Wrestling:

PVT has the potential of becoming the main hub for "all things wrestling"!

With the local partnership of Sacramento Area Wrestling Association (SAWA), PVT has already taken steps to successfully create an all-female high school and college tournament called the Women's West Coast Tournament of Champions (WWCTOC).

The development and progression of the WWCTOC will transition perfectly into the Event Center in December 2020 allowing for more wrestling mats and spectators. Room night production is also estimated to grow exponentially as efforts to increase participation through grass roots marketing and promotions at premier wrestling tournaments continue. While the WWCTOC helps cement PVT's reputation as a premier wrestling destination, other wrestling organizations are being sought-after:

- USA Wrestling (USAW) – National Governing Body for wrestling
- CIF – California Interscholastic Federation, sanctioned by USAW
- Tyrant Wrestling – For-Profit Organization sanctioned by USAW /no current presence in the West

Relationships already exist with all three organizations listed above as a result of local one-on-one meetings, networking opportunities and appointments at industry conferences and events. Each organization operates differently in terms of awarding events.

In order to secure a USAW championship tournament, PVT will collaborate with California USAW and SAWA to submit bids. At this time, the following tournaments are being considered:

- March 2020- USAW Girls Folkstyle Nationals & U23 Championship (Approx. 1,500 room nights)
- June 2020 - USAW Cadet Duals (Approx. 1,500 room nights)
- June 2020 — USA Wrestling (Approx. 1,200 room nights)

CIF Masters and Boy's Championship are hosted annually in late February – early March. Both events attract wrestlers from all over California. Continuing a rapport and discussions with the CIF Commissioner is strategic to moving these events from Bakersfield and Stockton.

- February/March 2020 (2021) – CIF Masters (Approx. 400-500 room nights)

Tyrant Wrestling has a large following in the Pennsylvania/Tennessee area. PVT is eager to be the catalyst to bring Tyrant Wrestling to the West. More conversation will be required to determine the viability of such a venture. The benefit to PVT would be hotel stays and having the influence to select a date where hotel occupancies need a boost. Dialogs will continue until all parties are ready to move forward.

Cheer:

Cheer is a sport that has evaded us since day one due to a lack of suitable venues in Placer Valley. Cheer events require a performance area of 54' wide X 42' deep, warm up space, changing area, 25'minimum ceiling height, and seating for 1,500-4,000 spectators. Venue size is dependent on the competition type which can range from 50,000 – 100,000+ sq. ft.

One-on-one appointments at industry conferences have led to interests from renowned cheer organizations such as Varsity Spirit and JAMZ. In fact, both organizations have proposed competition dates pending the opening of the Event Center:

- January 2020 -JAMZ Adrenaline (postponed to 2021)
- February 2020- NorCal Open Championship hosted by Varsity Spirit/National Cheer Association & National Dance Association (might be postponed until 2021)
- November 2020 – JAMZ Capitol City Battle

Opportunities to host cheer camps and clinics during busy summer months will also be explored and qualified. These events tend to attract more local teams; there won't be a high demand for hotel rooms when occupancies are already at their peak. Rather, facility rental fees will be the primary motivation for booking these events in addition to exposure.

Faith Market for Event Center

Faith events have thus far been a great contributor of room nights for Placer Valley hotels. With our largest local church only able to accommodate fewer than 3,000 attendees, some conferences such as NCN Youth Conference and Sweet Life have since outgrown and relocated to venues outside our footprint.

NCN Youth Conference takes place in November and Sweet Life is hosted in March. Both have generated as much as 300 room nights for Placer Valley hotels.

While continuing relationships with the organizers of lost conferences will certainly aide in their return pending space and date availability, the opportunities to seek additional events are vast and already being explored.

Plans to attend Connect Faith in November 2018 are currently underway. The goal is to uncover and qualify new faith–based events that can be hosted at existing venues and the new Event Center.

Minimizing Loss and Maintain Room Nights

Early projections for 2019 demonstrate a loss of 3,000 room nights highlighting the gap of not having a USA Swimming National Championship hosted by California Capital Aquatics (CCA) because of location rotational requirements. PVT is researching events to see what can be shifted to the market as well as working with @the Grounds to maximize events with room night potential.

Attendance at industry conferences has proven to be quite effective as indicated below; not only to secure future Event Center bookings, but to also fill the loss by capturing business that will actualize in late 2018 and 2019. PVT will continue to work with and find "champions" of various event types to ensure consistency of annual and major events. Examples of events uncovered at industry conferences that will help to minimize the gap left by USA Swimming are as follows:

Football:

Emphasis to replace Football University (FBU) Western Regional Championship following its relocation to Washington has been a priority. Two sports conferences later and a number of calls in-between has confirmed the annual 2018 World Youth Football Team Championship - Bay Area Regional, to be hosted at Rocklin and Whitney High Schools November 30- December 2. In this first year, 200+ room nights are estimated to be generated with an expectation to grow year over year.

Let's make a deal…

Conference and meeting bookings have been restricted by the lack of venues in the area. Existing venues include small hotel meeting rooms, city facilities, colleges, venues of worship and golf country clubs. The addition of a large flexible event center situated next-door to existing venues will aid in the growth of this deficient market segment.

So how can PVT help cultivate a market segment that's practically non-existent? **Incent!**

Here are a few incentive considerations to support our effort to attract conference and meeting business to Placer Valley:

- Increase existing PVT room night incentive during need periods

Incentives and concessions for bookings specifically hosted @the Grounds:

- Discount facility rental fees
- Waive Parking Fee
- Offer complimentary or discounted coffee/break service
- Offer complimentary or discounted AV equipment
- Offer complimentary VIP social
- Provide transportation to and from hotels**

**The solution to overcome the challenge of not having hotel accommodations attached to or within close walking distance of the new Event Center is to provide shuttle service. The discussion of shuttling guests to and from hotels needs further discussion but here is a brief overview of the steps:

- Define and categorize hotel pods
- Identify and secure transportation company
- Negotiate transportation pricing
- Assess the value of transportation in order to secure bookings, i.e.:
    - Waive transportation costs
    - Collect transportation costs
    - Reduce transportation costs
    - Share transportation costs

Lacrosse:

Similar to football tournaments, lacrosse tournaments can also generate substantial room nights over a single weekend. Adrenaline Lacrosse manages premier lacrosse events throughout the U.S. but has overlooked Placer Valley for years. Fostering a relationship with various Adrenaline representatives one conference at a time combined with consistent follow-up has finally resulted in an annual booking. Nor Cal Prospect Day and Western Kick-off will be hosted October 19-21, 2018 at Cherry Island and Foskett Regional Park.

Santa Hustle:

With festive music, outrageous holiday decorations, and thousands of runners dressed like Santa, this is a "can't miss" event for the entire family! After meeting the organizers while attending NASC, it was decided internally to pursue the event. Event owners were invited to Placer Valley to partake in a site tour of possible hosting sites. Downtown Roseville/Vernon Square was identified and we are in the process of securing Santa Hustle for December 2019. Approximately 200+ hotel room nights are estimated in the first year.

Website

With the launch of the new website at the end of 2018 came an expansion of tools available to both PVT staff and hoteliers. The integration of the new platform that hosts placertourism.com and manages the

hotel portal will take some time to fully implement. PVT staff will work side by side with hoteliers to make sure training, requests for proposals and room night reporting is transitioned smoothly to the new platform. Additionally, PVT staff will continue to work with each hotel, management group, flag, etc. to determine best practices for their property and how to best utilize the system.

COUNCIL COMMUNICATION

CC #: 9847
File #: 0109-02

Title:	Street Closure Request - Wizard Fun Run 5K - May 5, 2019
Contact:	Kristi LaRoche 916-774-5962 klaroche@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.11.

RECOMMENDATION TO COUNCIL

Recommend Council adopt a resolution authorizing the City Manager or his designee to approve street closures on Sunday, May 5, 2019 for the Inaugural Wizard Fun Run 5K between 5:00 a.m. - 11:00 a.m. Exhibit A: List of streets to be closed & times Exhibit B: 5K route map

BACKGROUND

The Parks, Recreation & Libraries Department will be hosting the Inaugural Wizard Fun Run 5K on Sunday, May 5, 2019. The fun run begins at 9:00 a.m. and will start and finish at the Vernon Street Town Square. The event will feature a "fun zone" at the Vernon Street Town Square which will include vendors, activities, photo opportunities and wizard items on display.
Proceeds from this event will benefit the City of Roseville's At Risk Youth Programs.
Parks, Recreation & Libraries staff have collaborated closely with Public Works, Police and Fire Department representatives to ensure this route will achieve the goal of providing a safe, friendly and exceptional experience for all participants and spectators.
City staff will be sending out informational letters to all the residents and businesses that may be impacted by closing streets and creating detours for this event. Although staff is requesting streets to be closed until 11:00 a.m., staff will monitor the flow of the event and open up streets earlier when possible.
Business and property owners will continue to be notified of street closures in the downtown Roseville area through the monthly Traffic Alert e-newsletter. Staff has also submitted a Downtown Street Closure Notification letter to designated representatives of the Downtown Roseville Merchants, the Downtown Roseville Partnership and the Roseville Community Development Corporation for feedback.
In addition, street closure information will be posted on the City of Roseville website.

FISCAL IMPACT

Funding for this event is included in the approved Parks, Recreation & Libraries FY2018-19 budget. Expenses are budgeted at $22,525.00.

ECONOMIC DEVELOPMENT / JOBS CREATED

Exposure could potentially have a positive impact to the business in the downtown area and supports the Council goal of having a vibrant downtown.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment (CEQA Guidelines §15061(b)(3)). Because the request for approval of the Temporary Street Closure Agreement does not include the potential for a significant environmental effect, it is not subject to CEQA and no further action is required.

RESOLUTION NO. 19-76

RESOLUTION OF THE COUNCIL OF THE CITY OF ROSEVILLE
APPROVING THE CLOSING OF CERTAIN STREETS
FOR WIZARD FUN RUN 5K

WHEREAS, City staff is requesting the closure of certain streets for Wizard Fun Run 5K; and

WHEREAS, the Council desires to formally approve said request, with certain conditions; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that the request to hold Wizard Fun Run 5K ("the event") on Sunday, May 5, 2019, is hereby approved subject to the following terms and conditions:

1. The following streets may be closed for traffic between 5:00 a.m. and 11:00 a.m.:

   a. Vernon Street between 6th Street & Taylor Road;
   b. Atlantic Street between Yosemite Street & Vernon Street;
   c. Vernon Street between Taylor Road & Folsom Road;
   d. Folsom Road between Yosemite Road & Maciel Avenue;
   e. 6th Street between Vernon Street & Mayfair Drive;
   f. 5th Street between Vernon Street & D Street;
   g. E Street between Vernon Street& 6th Street;
   h. Taylor Street between Atlantic Street & Vernon Street;
   i. S. Grant Street between Atlantic Street & Oak Street;
   j. Atlantic Street between Taylor Street & Yosemite Street;
   k. Linda Drive between Lincoln Street & Folsom Road;
   l. E. Washington Boulevard between Atlantic Street & Vernon Street;
   m. Lincoln Street between Atlantic Street & Oak Street;
   n. Jefferson Street between Atlantic Street & Vernon Street.

2. Adequate barriers and warning signs, as requested by the City Manager, shall be placed at all street entrances and alleys leading into the closed area. No markings of any kind will be permitted on the street.

3. All debris, booths, exhibits, or other materials resulting from the event shall be completely removed and the streets shall be reopened to traffic by 11:00 a.m. on the date of the event.

4. The City of Roseville shall notify in writing all businesses located on the streets to be closed of the event and the planned street closures not later than five (5) days in advance of the event.

COUNCIL COMMUNICATION

CC #: 9846
File #: 0109-02

Title:	Street Closure Request - Woof, Wine & Dine Event - May 17, 2019
Contact:	Jeff Nereson 916-774-5974 jnereson@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.12.

RECOMMENDATION TO COUNCIL

Recommend Council adopt a resolution approving an Agreement for Special Event and Temporary Street Closure with the Placer County Society for the Prevention of Cruelty to Animals (SPCA) on Friday May 17, 2019.
Staff requests City Council approval for the closure of South Grant Street, between Vernon and Oak Streets between 4:00 p.m.– 6:00 p.m. and 9:30 p.m.–11:00 p.m. on Friday, May 17, 2019 for the Placer SPCA Woof, Wine & Dine event. The street closure will ensure the event is a safe, traffic-free environment for vendors and bands to set up and take down their equipment. South Grant Street will be open during the hours of the event from 6:00 p.m. – 9:30 p.m.

BACKGROUND

The Placer County SPCA will be hosting their annual Woof, Wine and Dine event in the Vernon Street Town Square. This event will feature food sampling, wine and beer tasting, and live music. Special areas are being designated for dogs to drink, as well as a place for waste disposal. Security guards will be present to monitor the event.
This will mark the fifth year this event has been held at the Vernon Street Town Square. The Parks, Recreation & Libraries Director, Dion Louthan, has given permission to allow dogs in the park on leashes under strict monitoring by their owners and event coordinators.

FISCAL IMPACT

There will be no fiscal impact to the City budget for this event. All costs associated with this event for City services will be reimbursed by Placer SPCA.

ECONOMIC DEVELOPMENT / JOBS CREATED

Exposure could potentially have a positive impact to the business in the downtown area, and supports the Council goal of having a vibrant downtown.

ENVIRONMENTAL REVIEW

The proposed Street Closure Agreement outlines applicant and City responsibilities for proposed temporary street closures required to safely accommodate the event. The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment (CEQA Guidelines §15061(b)(3). Because the request for approval of the Temporary Street Closure Agreement does not include the potential for a significant environmental effect, it is not subject to CEQA and no further action is required.

Respectfully Submitted,

Jeff Nereson, Recreation Superintendent

Dion Louthan, Park, Recreation & Libraries Director

AGREEMENT FOR SPECIAL EVENT AND

TEMPORARY STREET CLOSURE

Event: Woof, Wine & Dine

THIS AGREEMENT is made and entered into this ___ day of _____, 20__, by and between the City of Roseville, a municipal corporation ("CITY"), and The Placer County Society for the Prevention of Cruelty to Animals, a California non-profit corporation ("PROMOTER"), and

W I T N E S S E T H:

WHEREAS, PROMOTER has requested the closure of certain public streets for Woof, Wine & Dine ("Event") to be held on Friday, May 17, 2019; and

WHEREAS, CITY approves said request subject to the following terms and conditions.

NOW, THEREFORE, the parties agree as follows:

1. PROMOTER shall comply with all applicable provisions of the Roseville Municipal Code.

2. The following streets may be closed to traffic between 4:00 p.m. to 6:00 p.m. and 9:30 p.m. to 11:00 p.m. on Friday, May 17, 2019.

a. S. Grant Street, between Vernon and Oak Streets.

3. Adequate barriers and warning signs, as requested by the Public Works Director/City Engineer, shall be placed by City personnel at all street entrances and alleys

leading into the closed area. No markings of any kind will be permitted on the street, street lights, or electrical poles.

4. All debris, booths, exhibits, or other materials resulting from the Event shall be completely removed and all streets and alleyways shall be reopened to traffic by 11:00 p.m. on the date of the Event.

5. PROMOTER shall notify in writing all businesses, located on the streets to be closed, of the Event and planned street closure not later than five (5) days in advance of the Event.

6. To the fullest extent allowed by law, PROMOTER shall defend, indemnify, and save and hold harmless CITY, its officers, agents, employees and volunteers from any claims, suits or actions of every name, kind and description brought forth, or on account of, injuries to or death of any person (including but not limited to workers and the public), or damage to property, resulting from, arising out of or in connection with the Event or the attendant street and/or garage closures, except those matters arising from CITY's sole negligence or willful misconduct. The parties intend that this provision shall be broadly construed.

PROMOTER's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

7. The PROMOTER shall obtain insurance covering the Event in accordance with the attached insurance requirements, which are incorporated herein by this reference.

8. CITY reserves the right to cancel this Agreement if PROMOTER has knowingly made a false statement of material fact or has knowingly omitted to state a material fact to CITY.

9. PROMOTER shall reimburse CITY for all staff costs incurred relating to the Event including, but not limited to, street closure costs.

10. PROMOTER shall obtain security services for the Event as required by the Roseville Police Department. In the event PROMOTER desires to retain Roseville Police Officers (instead of a private security provider) for provision of security for the Event, PROMOTER shall, prior to the Event, enter into a Supplemental Law Enforcement Services Agreement with CITY.

11. Either party may terminate this Agreement by giving the other party ten (10) days advance written notice.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ___ day of _____, 20__, and PROMOTER has caused this Agreement to be executed.

COUNCIL COMMUNICATION

CC #: 9840
File #: 0109-02

Title:	Street Closure Request - John Adams Academy Revolution Fun Run - March 23, 2019
Contact:	Jeff Nereson 916-774-5974 jnereson@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.13.

RECOMMENDATION TO COUNCIL

Recommend Council adopt a resolution approving an Agreement for Special Event and Temporary Street Closure with John Adams Academies, Inc. for the Revolution Fun Run on Saturday March 23, 2019.

BACKGROUND

Staff from John Adams Academy have submitted a special event permit application to host their 4th annual Revolution Run on Saturday March 23, 2019. This year's event is running the same course as it did in 2018, starting at John Adams Academy, running north on the number two lane on Harding Boulevard and continuing on to the Miners Ravine bike trail.
City staff require the applicant to drop off a flier to all businesses within the complex that this event may impact. Although staff is requesting the lane closure until 12:00 p.m., Public Works staff will monitor the flow of the event and will reopen the lane earlier, if possible.

Street closure information will be posted on the City of Roseville website.

FISCAL IMPACT

There will be no fiscal impact to the City budget for this event. All costs associated with this event for City services will be reimbursed by John Adams Academy.

ECONOMIC DEVELOPMENT / JOBS CREATED

Not applicable.

ENVIRONMENTAL REVIEW

The proposed Street Closure Agreement outlines applicant and City responsibilities for proposed temporary street closures required to safely accommodate the event. The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment (CEQA Guidelines §15061(b)(3)). Because the request for approval of the Temporary Street Closure Agreement does not include the potential for a significant environmental effect, it is not subject to CEQA and no further action is required.

Respectfully Submitted,

Jeff Nereson, Recreation Superintendent

Dion Louthan, Parks, Recreation & Libraries Director

AGREEMENT FOR SPECIAL EVENT AND

TEMPORARY STREET CLOSURE

Event: Revolution Run

THIS AGREEMENT is made and entered into this 1st day of February, 2019 by and between the City of Roseville, a municipal corporation ("CITY"), and John Adams Academies, Inc., a California corporation ("PROMOTER"); and

W I T N E S S E T H:

WHEREAS, PROMOTER has requested the closure of certain public streets for the Revolution Run ("Event") to be held on Saturday, March 23, 2019; and

WHEREAS, CITY approves said request subject to the following terms and conditions.

NOW, THEREFORE, the parties agree as follows:

1. PROMOTER shall comply with all applicable provisions of the Roseville Municipal Code.

2. The following streets may be closed to traffic between 7:30 a.m.; and 12:00 p.m. on Saturday, March 23, 2019:

a. Northbound lane number two of Harding Boulevard, between Lead Hill Boulevard and Wills Road.

3. Adequate barriers and warning signs, as requested by the Public Works Director/City Engineer, shall be placed by City personnel at all street entrances and alleys

leading into the closed area. No markings of any kind will be permitted on the street, street lights, or electrical poles.

4. All debris, booths, exhibits, or other materials resulting from the Event shall be completely removed and all streets and alleyways shall be reopened to traffic by 12:00 p.m. on the date of the Event.

5. PROMOTER shall notify in writing all businesses, located on the streets to be closed, of the Event and planned street closure not later than five (5) days in advance of the Event.

6. The parties intend that this provision shall be broadly construed.

PROMOTER's responsibility for such defense and indemnity obligations shall survive the termination or completion of this Agreement for the full period of time allowed by law. The defense and indemnity obligations of this Agreement are undertaken in addition to, and shall not in any way be limited by, the insurance obligations contained in this Agreement.

7. The PROMOTER shall obtain insurance covering the Event in accordance with the attached insurance requirements, which are incorporated herein by this reference.

8. CITY reserves the right to cancel this Agreement if PROMOTER has knowingly made a false statement of material fact or has knowingly omitted to state a material fact to CITY.

9. No alcoholic beverages shall be sold on City streets or property.

10. PROMOTER shall reimburse CITY for all staff costs incurred relating to the Event including, but not limited to, street closure costs.

11. Either party may terminate this Agreement by giving the other party ten (10) days advance written notice.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ___ day of _____, 20__, and PROMOTER has caused this Agreement to be executed.

COUNCIL COMMUNICATION

CC #: 9835
File #: 0704-01

Title: F-97 Pocket Park - Master Plan and Park Development Agreement Approval
Contact: Tara Gee 916-774-5253 tgee@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.14.

RECOMMENDATION TO COUNCIL

Approve the master plan and adopt a resolution to approve the Park Development Agreement between the City of Roseville and Signature Homes/ATC Reality One, LLC for the construction of the F-97 pocket park.

BACKGROUND

A master plan was presented to the Parks & Recreation Commission at the February 4, 2019 meeting. The master plan proposes a design that offers a central open turf area as a focal point of the park. Flanking the center area is a children's play and swing area, covered seating/picnicking and a half court for basketball with benches. A perimeter walkway is included. The Parks & Recreation Commission approved the master plan.
Consistent with the approved 2004 Development Agreement for West Roseville/Fiddyment Ranch, pocket parks within the West Roseville Specific Plan are to be constructed by the Developer concurrent with the construction of the adjacent villages. F-97 is the pocket park located within Fiddyment Ranch Phase 2 Villages 11A.1 and 12, as shown on Exhibit A. The entitlements for these villages have been approved and construction is underway.
The Park Development Agreement outlines the design and construction process for the pocket park which, when complete, will be deeded over to the City for operations.
It is anticipated that construction of the park will begin in late 2019.

FISCAL IMPACT

The construction of the pocket parks within the West Roseville Specific Plan area is the sole responsibility of the Developer. No park fee credits are applied to the project. Maintenance of the pocket parks are included in the West Roseville Community Facilities District for Services. There is no General Fund impact with this request.

ECONOMIC DEVELOPMENT / JOBS CREATED

Not Applicable

ENVIRONMENTAL REVIEW

Development of WRSP Pocket Park F-97 was originally evaluated in the West Roseville Specific Plan and EIR (January 2004) (SCH # 2002082057) and then later in the Fiddyment Ranch Specific Plan Amendment (SPA) Subsequent Environmental Impact Report (April 2014) (SCH#2010082075). Construction of Pocket Park F-97 is found to be within the scope of the project covered by the Fiddyment Ranch SPA Subsequent final EIR. This EIR provides project level analysis for the Fiddyment Ranch portion of the WRSP community infrastructure and facilities, including parks. Because the Pocket Park F-97 project is consistent with the Fiddyment Ranch SPA Subsequent final EIR, no new effects would be expected to occur and all applicable mitigation measures from the applicable prior EIR's will be implemented during the design and construction of the proposed project. As such, no additional environmental documentation is required.

PARK DEVELOPMENT AGREEMENT FOR
F97 POCKET PARK SITE AND
PARK IMPROVEMENTS

THIS AGREEMENT is made and entered into this _____ day of _____, 20__ by and between the City of Roseville, a municipal corporation ("CITY") and ATC REALTY ONE, LLC, a Delaware limited liability company, ("LANDOWNER"), and

W I T N E S S E T H:

WHEREAS, LANDOWNER is the owner and developer of subdivision known as Fiddyment Ranch Phase 2 Villages 11A1 and 12 ("Subdivision") located in the West Roseville Specific Plan; and

WHEREAS, the Subdivision has been approved for single family residential development pursuant to the Development Agreement by and between the CITY OF ROSEVILLE and LANDOWNER's predecessor-in-interest, Roseville Fiddyment Land Venture, approved and adopted pursuant to Ordinance No. 4048, as amended, ("Development Agreement"); and

WHEREAS, LANDOWNER desires to develop one hundred forty-four (144) lots as single family residential units on the Subdivision; and

WHEREAS, the Development Agreement provides that the owner of the Subdivision shall construct park improvements on Lot F-97 ("Park Improvements") on a "turn-key" basis; and

WHEREAS, LANDOWNER and CITY desire to develop the Park Improvements on a turn-key basis provided that the costs of the Park Improvements actually incurred are financed solely by the LANDOWNER; and

NOW, THEREFORE, CITY and LANDOWNER agree as follows:

1. Master Plan. LANDOWNER shall cause the preparation of a master plan upon execution of this Park Development Agreement. The master plan shall meet established criteria set forth by the Parks, Recreation & Libraries Department ("Department") specific to pocket park development and as outlined in CITY's Parks Construction Standards, Design Standards, and Construction Standards. The master plan shall be approved by the Parks & Recreation Commission and City Council, including environmental review, within three (3) months from the date of this Agreement. The approved master plan shall be utilized for all marketing and sales promotions as disclosure to potential home buyers.

2. Schedule. Upon approval of the master plan, LANDOWNER shall provide the Department with a schedule for completion of the project within fifteen (15) days. The schedule shall include key milestones such as 75% of construction documents, 99% completion of construction documents, date when the project will be bid, start date for construction and completion date of construction. The completion date shall include the ninety (90) calendar day establishment period and shall be complete at such time as 75% of the homes in the subdivision are occupied ("75% absorption"), consistent with CITY standards.

3. Construction Documents. LANDOWNER shall cause the preparation of construction plans and specifications for the Park Improvements (collectively the "Construction Documents"). The Construction Documents shall be consistent with the master plan as approved by the City Council, and with City Park Construction Standards, latest edition. The Construction

Documents shall be subject to review and approval by the Department and other applicable City departments prior to bidding the project and at LANDOWNER's sole expense.

4. Bid Documents. LANDOWNER shall prepare the bid documents for the Park Improvements. The Department shall provide a list of pre-qualified contractors and bid documents prior to the issuance of a notice to bid by LANDOWNER. Bids shall be lump sum with an itemized unit summary to be used for additions and deletions only. The Department shall be notified of and approve LANDOWNER's selection of the contractor prior to the award of contract. In the event LANDOWNER concludes that the bids are unacceptably high and not to budget, LANDOWNER must notify Department of required modifications to the Park Improvements or the need to solicit additional bids. LANDOWNER shall provide the Department an opportunity to review and comment on any proposal by LANDOWNER to modify the Park Improvements and shall give such comments fair consideration.

Effective March 1, 2015, no contractor or subcontractor may be listed on a bid proposal for the Park Improvements unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. Effective April 1, 2015, no contractor or subcontractor may work on the Park Improvements unless registered with the Department of Industrial Relations pursuant to Labor Code section 1725.5. LANDOWNER shall be responsible for ensuring that these contractor registration requirements are adhered to since this project is subject to compliance monitoring and enforcement by the Department of Industrial Relations.

Furthermore, as required by SB 854, LANDOWNER shall notify the Department of Industrial Relations of the project within five (5) days of the award of a contract to a contractor for the Park Improvements.

5. Prevailing Wages. LANDOWNER shall comply with all applicable prevailing wage laws for services performed under this Agreement. Additionally, LANDOWNER shall require its subcontractors, if any, to comply with all applicable prevailing wage laws for services performed under this Agreement. In accordance with Section 1775 of the California Labor Code the LANDOWNER shall forfeit as a penalty to the CITY fifty dollars ($50.00), and/or such other penalty amounts required by stature, for each calendar day or portion thereof, for each worker paid less than the prevailing wage rates for such work or craft in which such worker is employed for any work done under this Agreement by the LANDOWNER or by any subcontractor under the LANDOWNER in violation of the provisions of the California Labor Code and in particular, Labor Code sections 1770 to 1780, inclusive. In addition to said penalty and pursuant to said Section 1775, the difference between such stipulated prevailing wage rates and the amount paid to each worker for each calendar day or portion thereof for which each worker was paid less than the stipulated prevailing wage shall be paid to each worker by LANDOWNER. Moreover, CITY shall the right to withhold payment in such amounts as directed by the Department of Industrial Relation or Labor Commissioner.

Prevailing wage rates may be obtained from the State Department of Industrial Relations and/or the follow website: http://dir.ca.gov/DLSR/PWD/Northern.html.

6. Commencement of Improvements. LANDOWNER shall commence construction of the Park Improvements in accordance with the approved Construction Documents within sixty (60) calendar days after CITY's approval of the Construction Documents unless this timeframe falls between October 15 and April 15, in which case construction shall commence on April 16, weather pending.

The Department as well as other applicable City departments shall routinely participate in on-site observation and inspection during construction. LANDOWNER shall diligently proceed with such construction and use its best efforts to complete the construction within one hundred (100) days of the date of commencement of such Park Improvements.

In the event that LANDOWNER fails to complete construction of the Park Improvements by the time 75% absorption occurs, CITY shall withhold any further Certificates of Occupancy until construction is complete. Notice of satisfaction of LANDOWNER's construction obligations shall be evidenced by a written acceptance of the Park Improvements by CITY.

7. Change Orders. LANDOWNER shall submit a written request for approval of any change orders to the CITY at least fifteen (15) days prior to proceeding with any change order. LANDOWNER shall not issue any change orders on such construction contract without first obtaining CITY's written consent. Any change in design in the Park Improvements must have CITY's pre-approval.

8. Other Costs. CITY and LANDOWNER acknowledge that various costs are incurred during park development beyond construction document preparation and improvement construction. Such costs include but are not limited to consultant construction assistance (environmental, inspection, engineering), storm water pollution prevention measures, utility bills (electric, water), City inspections, permits and fees, design/drafting fees, fencing, maintenance and miscellaneous costs such as photocopying and printing. LANDOWNER is solely responsible to pay for such other costs without reimbursement or credit from CITY.

9. Payments. LANDOWNER shall be responsible for all payments associated with the Park Improvements. This includes but is not limited to contractor's work, electric and water

bills, storm water pollution prevention measures, consultant construction assistance, CITY inspections, permits, and fees.

10. Warranty. LANDOWNER shall provide CITY a warranty for the Park Improvements for a period of one year from the date of above acceptance by CITY. Any warranty repairs performed shall be the responsibility of LANDOWNER and shall not be subject to reimbursement.

11. Cost of Park Improvements. The cost of constructing the Park Improvements in accordance with the Construction Document is the sole responsibility of the LANDOWNER.

12. Obligations Arising from Agreement. Neither the General Fund, nor any other fund or monies of CITY, including the Neighborhood Park Fee Fund or similar park improvements funds or accounts, shall be utilized for payment of any obligations arising from this Agreement. Neither the Neighborhood Park Fund credit nor the taxing power of CITY is pledged for the payment of any obligations arising from this Agreement. LANDOWNER's obligations arising from this Agreement are not a debt of CITY, or a legal or equitable pledge, charge, lien or encumbrance upon any of its property, or upon any of its income, receipts or revenues.

13. Maintenance Obligations. Upon completion of the Park Improvements and written acceptance by CITY, LANDOWNER shall deed the Park Improvements to CITY. LANDOWNER shall pay CITY the cost to maintain the Park Improvements for a period of one year, if absorption is less than 75%. In no event shall CITY be responsible for the costs of maintaining the Park Improvements prior to completion of one (1) year starting on the date of project acceptance.

14. Attorney's Fees and Venue. In any action to enforce the provisions of this Agreement, the prevailing party shall be entitled to its reasonable attorney's fees. Any action arising out of this Agreement shall be brought in Placer County, California regardless of where else venue may lie.

15. Modification. This Agreement and each provision contained herein may be waived, amended, supplemented or eliminated only by mutual written agreement of the parties.

16. Severability. In case any one or more of the provisions contained in this Agreement is for any reason held invalid or unenforceable, such holding shall not affect the remaining provisions or the validity and enforceability of the Agreement as a whole.

17. Integrated Agreement. This is an integrated agreement and contains all of the terms, considerations, understanding and promises of the parties. It shall be read as a whole.

IN WITNESS WHEREOF, the CITY OF ROSEVILLE, a municipal corporation, has caused this Agreement to be executed in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ____ day of _____, 20__, and LANDOWNER has caused this Agreement to be executed.

Basis for Plancheck Fees				**$780,443.00**
Design Contingency 10%				$72,263.00
Construction Contingency 10%				$72,263.00
Bidding Contingency 5%				$36,132.00
Total Estimated Project Construction Costs:				**$961,101.00**

Notes:

1) Design Contingency is for further development of design and compensates for unknown elements. We will eliminate as we move to Bid Documents.
2) Assumes project is bid competitively utilizing public bidding requirements and prevailing wage rates. Concrete prices reflect developer's quotes on streetscape concrete adjacent to site. May be higher at time of bid.
3) Construction Contingency is provided to cover for site conditions and additional work not anticipated for upgrades. Owner has covered this contingency out of another account and is not part of this budget.
4) In Providing opinions of probable construction cost, the Client understands that the Landscape Architect has no control over costs or the price of labor equipment or materials, or over the Contractor's method of pricing, and that the opinions of probable construction costs provided herein are to be made on the basis of the Landscape Architect's qualifications and experience. The Landscape Architect makes no warranty, expressed or implied, as to the accuracy of such opinions as compared to bid or actual costs.
5) Construction costs are based on current market prices.
6) Current raw material costs are in fluctuation due to global trade variables and may affect unit price at time of bidding.

COUNCIL COMMUNICATION

CC #: 9856

Title:	Roseville Road Improvement Project - Professional Services Agreement Amendment
Contact:	Stefanie A. Kemen 916-746-1300 skemen@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.15.

RECOMMENDATION TO COUNCIL

Staff recommends the City Council adopt a resolution approving the first amendment to professional services agreement between the City of Roseville and Interwest Consulting Group, Inc. for property acquisition services.

BACKGROUND

The Roseville Road Improvement Project required extensive property acquisition work originally performed by Interwest Consulting Group, Inc. per a professional services agreement approved at the City Council's March 19, 2014 meeting. In September 2015, all property acquisitions required to construct the project were believed to be completed and in escrow, and the budget for the original scope of work expended.

The project was constructed and the Notice of Completion was approved at the October 4, 2017 City Council Meeting.

However, the escrow for two of the transactions remain open due to unresolved title issues for one of the property owners who is deceased. Interwest Consulting Group, Inc, and staff have identified the additional title and escrow tasks that need to be completed so that the two outstanding escrows can close.

Interwest Consulting Group, Inc. requires an additional $32,500.00 to complete the additional title and escrow tasks, as outlined in Exhibit A of the attached first amendment. This amendment brings the total not to exceed fee of the contract to $168,300.00.

FISCAL IMPACT

This project was funded with Federal Highway Safety Improvement Program (HSIP) grant funds and Traffic Mitigation funds. There are sufficient funds in the Council approved project budget to

fund this amendment. No General Fund resources are allocated for this project.

ECONOMIC DEVELOPMENT / JOBS CREATED

Federal guidelines suggest that there is one job created for every $92,000 in direct government spending. Based on that figure, this amendment will create 0.35 jobs.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment (CEQU Guidelines §15061(b)(3)). An amendment to a professional services agreement for property acquisition services does not include the potential for a significant environmental effect, and therefore is not subject to CEQA.

Respectfully Submitted,

Stefanie Kemen, Senior Civil Engineer

Jason Shykowski, Acting Public Works Director

FIRST AMENDMENT TO

PROFESSIONAL SERVICES AGREEMENT

Project: Roseville Road Re-Alignment

THIS FIRST AMENDMENT TO AGREEMENT is made and entered into this ___ day of _____, 20__, by and between the City of Roseville, a municipal corporation ("CITY"), and Interwest Consulting Group, Inc., a Colorado corporation ("CONSULTANT"); and

W I T N E S S E T H:

WHEREAS, CITY and CONSULTANT previously entered into a Professional Services Agreement dated March 19, 2014, ("Agreement") regarding real estate acquisition services for the Roseville Road Re-Alignment project ("Project"); and

WHEREAS, CITY desires to amend the Agreement to include additional services as described in CONSULTANT's letter/proposal dated January 29, 2019, which is attached hereto as Exhibit "A" and incorporated herein by reference; and

WHEREAS, CONSULTANT is willing and able to provide such additional services.

NOW, THEREFORE, the parties agree as follows:

1. CONSULTANT shall provide additional services as described in Exhibit "A" of this First Amendment to Agreement.

2. Paragraph 2 of the Agreement is amended by adding an additional paragraph to read as follows:

"CITY shall pay thirty-two thousand, five hundred dollars ($32,500.00), in consideration of the additional services as set forth in Exhibit "A" to the first Amendment to Agreement. This brings the total not to exceed contract amount to one hundred sixty-eight thousand, three hundred dollars ($168,300.00)."

3. All other provisions of the Agreement shall remain unchanged and in full force and effect.

IN WITNESS WHEREOF, the City of Roseville, a municipal corporation, has authorized the execution of this First Amendment to Agreement in duplicate by its City Manager and attested to by its City Clerk under the authority of Resolution No. _____, adopted by the Council of the City of Roseville on the ___ day of _____, 20__, and CONSULTANT has caused this First Amendment to Agreement to be executed.

OFFICER'S CERTIFICATE

I, Terry J. Rodrigue, hereby certify that:

1. I am a duly elected, qualified and acting President and Corporate Secretary of Interwest Consulting Group, Inc., a duly organized and existing Colorado corporation; and

2. Interwest Consulting Group, Inc. policy sets forth the delegation of authority to the company's officers and employees to create financial, contractual, and other obligations on behalf of Interwest in the course of performing their employment. This policy permits delegation of signature authority to authorized Contract Representatives. Michael Kashiwagi, Ron Beehler, James G. Ross, and Debra Thorson are such authorized Contract Representatives as long as they are employed by Interwest, and therefore by this delegation each has signature authority to sign proposals and bind Interwest Consulting Group, Inc. in contractual commitments.

IN WITNESS WHEREOF, I have executed this Officer's Certificate and affixed the corporate seal of Interwest Consulting Group, Inc. this 2nd day of January, 2019.

Re: Roseville Road Improvements Project - Contract Amendment No. 1 Request

Dear Stefanie:

As you are aware, the acquisitions needed to construct the Roseville Road Improvements Project (Project) were completed in September 2015 (see Acquisition Summary on Page 2). Escrow for the Moody (Escrow No. FSSE-0101400383–PA) and Nikkel (Escrow No. 10-5010336-PA) transactions have remained open due to unresolved title issues for one of the property owners, Louis Mendez (deceased).

As per discussions with Mike Christensen, Deputy City Attorney, the City intends to proceed with recording four Deeds to transfer fee interests for the parcels owned by Nikkel et al (excluding the Mendez interest), as summarized in the Acquisition Summary table (see Page 2). There are eight conveyance Deeds which involve easement interests that cannot be recorded until Angie Mendez' (Louis' widow) interest is resolved.

A contract amendment is needed for the additional title and escrow tasks required. This contract amendment request includes real estate staff support to assist with the following tasks required to complete Contract Task #6 | Title & Escrow Closing Services. Please note that the tasks, as outlined below, assume the original interest holders for the two transactions remain the same and have not changed ownership.

- **Task A | Document Preparation** - Coordinate with Fidelity National Title (Fidelity) to prepare revised escrow documents, escrow instructions, and four Grant Deeds (with revised Legal/Plat to be provided by City) for the Nikkel Escrow. Coordinate the review of all documents with City's contract attorney prior to signing and recording.
- **Task B | Contact with Property Owners** – Contact owners to explain approach, revised documents, coordinate obtaining signatures, and notarizing documents needed on four Grant Deeds and four Easement Deeds. If requested, meet with owners to facilitate the document signing process.
- **Task C | Title & Escrow Coordination (Partial Fee Interests)** – Coordinate with Fidelity to record documents and close portion of Nikkel et al escrow for partial fee interests (excluding Mendez interest).
- **City Attorney's Office Support (If needed)** – Provide City Attorney's office with support, if needed, to resolve the outstanding title issues.
- **Task D | Final Escrow Coordination/Close Out (Easement/Mendez Interests)** – Discuss resolution of Mendez interests with City's contract attorney and coordinate to prepare four Easement Deeds (with revised Legal/Plat to be provided by City) to transfer the easement interests and close Moody and Nikkel escrows. Coordinate with Fidelity to close remaining interests for both Moody and Nikkel escrows, record eight Easement Deeds, obtain copies of final documents, and prepare acquisition files for close out.

The additional services described above result in a total not-to-exceed contract amendment of $32,500.

The table below summarizes the real property interests that were acquired from the Moody and Nikkel owners and the additional actions required for each conveyance.

Acquisition Summary

Deed/Conveyance	***Action***
(A) **Moody et al Escrow**: 1) Drainage & Slope Easement	Hold – Pending Mendez Quit Claim Action
(B) **Nikkel et al Escrow**:	
(1) Deed (Fee/Drainage & Slope Easement)	(1) City to provide new Legals/Plats; (2) Prepare Grant Deed; and (3) Prepare Drainage/Slope Easement Deed.
(2) Deed (Fee/Drainage & Slope/Culvert Drainage Easement)	(1) City to provide new Legals/Plats; (2) Prepare Grant Deed; and (3) Prepare Drainage/Slope and Culvert Drainage Easement Deed.
(3) Deed (Fee/Drainage & Slope Easement)	(1) City to provide new Legals/Plats; (2) Prepare Grant Deed; and (3) Prepare Drainage/Slope Easement Deed.
(4) Deed (Fee/Drainage & Slope Easement)	(1) City to provide new Legals/Plats; (2) Prepare Grant Deed; and (3) Prepare Drainage/Slope Easement Deed.
(5) Culvert Drainage Easement	Hold – Pending Mendez Quit Claim Action
(6) Easement Deed (Drainage & Slope/Culvert Drainage)	Hold – Pending Mendez Quit Claim Action
(7) Drainage & Slope Easement	Hold – Pending Mendez Quit Claim Action

Please review enclosed Contract Amendment No. 1 for a breakdown of the estimated costs to complete the remaining tasks. Please contact me at (916) 203-6740 if you have any questions.

Sincerely,

Julie A Cline

Title:	International Swaps and Derivatives Association Master Agreement with Gas & Power Annexes
Contact:	Petra Wallace 916-774-5510 pwallace@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.16.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt a resolution authorizing the City Manager to execute the International Swaps and Derivatives Association, Inc. ("ISDA") Master Agreement with Gas and Power Annexes with NextEra Energy Marketing, LLC ("NextEra").

BACKGROUND

Council approved updated Electric Utility Risk Management Policies in February 2016. As part of those policies, Roseville Electric is required to limit the cost exposure of providing electricity over a three-year period by purchasing specific amounts of fixed price energy as either electricity or natural gas.

Roseville Electric has historically used financial swaps to hedge natural gas and electricity market price risk. ISDA agreements provide an industry standard contractual framework for executing financial transactions for electricity and natural gas, and provide significant credit and other protections to the City. The NextEra ISDA agreement includes a Gas Annex and a Power Annex, facilitating physical gas and physical electricity contracts, and consolidates credit support for those transactions under the terms of the ISDA agreement. Roseville Electric has ISDA agreements in place with a number of counterparties. NextEra is a new counterparty and is expected to offer competitive prices in physical and financial gas and electricity.

FISCAL IMPACT

There is no fiscal impact associated with the execution of the ISDA agreement with Gas Annex and Power Annex as it is only an enabling agreement. There are no transactions currently pending under the proposed ISDA agreement. Transactions facilitated by the attached agreement will conform to the Roseville Energy Risk Management Policies.

ECONOMIC DEVELOPMENT / JOBS CREATED

Not applicable.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical changes in the environment (CEQA Guidelines §15061(B)(3)). Approval of an International Swaps and Derivatives Association Master Agreement does not include the potential for a significant environmental effect, and therefore is not subject to CEQA.

Respectfully Submitted,

Petra Wallace, Electric Risk and Compliance Supervisor

Michelle Bertolino, Electric Utility Director

MASTER AGREEMENT

dated as of January 29, 2019

City of Roseville, CA and NextEra Energy Marketing, LLC have entered and/or anticipate entering into one or more transactions (each a "Transaction") that are or will be governed by this Master Agreement, which includes the schedule (the "Schedule"), and the documents and other confirming evidence (each a "Confirmation") exchanged between the parties confirming those Transactions.

Accordingly, the parties agree as follows:—

1. Interpretation

(a) ***Definitions.*** The terms defined in Section 14 and in the Schedule will have the meanings therein specified for the purpose of this Master Agreement.

(b) ***Inconsistency.*** In the event of any inconsistency between the provisions of the Schedule and the other provisions of this Master Agreement, the Schedule will prevail. In the event of any inconsistency between the provisions of any Confirmation and this Master Agreement (including the Schedule), such Confirmation will prevail for the purpose of the relevant Transaction.

(c) ***Single Agreement.*** All Transactions are entered into in reliance on the fact that this Master Agreement and all Confirmations form a single agreement between the parties (collectively referred to as this "Agreement"), and the parties would not otherwise enter into any Transactions.

2. Obligations

(a) ***General Conditions.***

(i) Each party will make each payment or delivery specified in each Confirmation to be made by it, subject to the other provisions of this Agreement.

(ii) Payments under this Agreement will be made on the due date for value on that date in the place of the account specified in the relevant Confirmation or otherwise pursuant to this Agreement, in freely transferable funds and in the manner customary for payments in the required currency. Where settlement is by delivery (that is, other than by payment), such delivery will be made for receipt on the due date in the manner customary for the relevant obligation unless otherwise specified in the relevant Confirmation or elsewhere in this Agreement.

(iii) Each obligation of each party under Section 2(a)(i) is subject to (1) the condition precedent that no Event of Default or Potential Event of Default with respect to the other party has occurred and is continuing, (2) the condition precedent that no Early Termination Date in respect of the relevant Transaction has occurred or been effectively designated and (3) each other applicable condition precedent specified in this Agreement.

Copyright © 1992 by International Swap Dealers Association, Inc.

(b) ***Change of Account.*** Either party may change its account for receiving a payment or delivery by giving notice to the other party at least five Local Business Days prior to the scheduled date for the payment or delivery to which such change applies unless such other party gives timely notice of a reasonable objection to such change.

(c) ***Netting.*** If on any date amounts would otherwise be payable:—

(i) in the same currency; and

(ii) in respect of the same Transaction,

by each party to the other, then, on such date, each party's obligation to make payment of any such amount will be automatically satisfied and discharged and, if the aggregate amount that would otherwise have been payable by one party exceeds the aggregate amount that would otherwise have been payable by the other party, replaced by an obligation upon the party by whom the larger aggregate amount would have been payable to pay to the other party the excess of the larger aggregate amount over the smaller aggregate amount.

The parties may elect in respect of two or more Transactions that a net amount will be determined in respect of all amounts payable on the same date in the same currency in respect of such Transactions, regardless of whether such amounts are payable in respect of the same Transaction. The election may be made in the Schedule or a Confirmation by specifying that subparagraph (ii) above will not apply to the Transactions identified as being subject to the election, together with the starting date (in which case subparagraph (ii) above will not, or will cease to, apply to such Transactions from such date). This election may be made separately for different groups of Transactions and will apply separately to each pairing of Offices through which the parties make and receive payments or deliveries.

(d) ***Deduction or Withholding for Tax.***

(i) ***Gross-Up.*** All payments under this Agreement will be made without any deduction or withholding for or on account of any Tax unless such deduction or withholding is required by any applicable law, as modified by the practice of any relevant governmental revenue authority, then in effect. If a party is so required to deduct or withhold, then that party ("X") will:—

(1) promptly notify the other party ("Y") of such requirement;

(2) pay to the relevant authorities the full amount required to be deducted or withheld (including the full amount required to be deducted or withheld from any additional amount paid by X to Y under this Section 2(d)) promptly upon the earlier of determining that such deduction or withholding is required or receiving notice that such amount has been assessed against Y;

(3) promptly forward to Y an official receipt (or a certified copy), or other documentation reasonably acceptable to Y, evidencing such payment to such authorities; and

(4) if such Tax is an Indemnifiable Tax, pay to Y, in addition to the payment to which Y is otherwise entitled under this Agreement, such additional amount as is necessary to ensure that the net amount actually received by Y (free and clear of Indemnifiable Taxes, whether assessed against X or Y) will equal the full amount Y would have received had no such deduction or withholding been required. However, X will not be required to pay any additional amount to Y to the extent that it would not be required to be paid but for:—

(A) the failure by Y to comply with or perform any agreement contained in Section 4(a)(i), 4(a)(iii) or 4(d); or

(B) the failure of a representation made by Y pursuant to Section 3(f) to be accurate and true unless such failure would not have occurred but for (I) any action taken by a taxing authority, or brought in a court of competent jurisdiction, on or after the date on which a Transaction is entered into (regardless of whether such action is taken or brought with respect to a party to this Agreement) or (II) a Change in Tax Law.

(ii) ***Liability.*** If:—

(1) X is required by any applicable law, as modified by the practice of any relevant governmental revenue authority, to make any deduction or withholding in respect of which X would not be required to pay an additional amount to Y under Section 2(d)(i)(4);

(2) X does not so deduct or withhold; and

(3) a liability resulting from such Tax is assessed directly against X,

then, except to the extent Y has satisfied or then satisfies the liability resulting from such Tax, Y will promptly pay to X the amount of such liability (including any related liability for interest, but including any related liability for penalties only if Y has failed to comply with or perform any agreement contained in Section 4(a)(i), 4(a)(iii) or 4(d)).

(e) ***Default Interest; Other Amounts.*** Prior to the occurrence or effective designation of an Early Termination Date in respect of the relevant Transaction, a party that defaults in the performance of any payment obligation will, to the extent permitted by law and subject to Section 6(c), be required to pay interest (before as well as after judgment) on the overdue amount to the other party on demand in the same currency as such overdue amount, for the period from (and including) the original due date for payment to (but excluding) the date of actual payment, at the Default Rate. Such interest will be calculated on the basis of daily compounding and the actual number of days elapsed. If, prior to the occurrence or effective designation of an Early Termination Date in respect of the relevant Transaction, a party defaults in the performance of any obligation required to be settled by delivery, it will compensate the other party on demand if and to the extent provided for in the relevant Confirmation or elsewhere in this Agreement.

3. Representations

Each party represents to the other party (which representations will be deemed to be repeated by each party on each date on which a Transaction is entered into and, in the case of the representations in Section 3(f), at all times until the termination of this Agreement) that:—

(a) ***Basic Representations.***

(i) ***Status.*** It is duly organized and validly existing under the laws of the jurisdiction of its organization or incorporation and, if relevant under such laws, in good standing;

(ii) ***Powers.*** It has the power to execute this Agreement and any other documentation relating to this Agreement to which it is a party, to deliver this Agreement and any other documentation relating to this Agreement that it is required by this Agreement to deliver and to perform its obligations under this Agreement and any obligations it has under any Credit Support Document to which it is a party and has taken all necessary action to authorize such execution, delivery and performance;

(iii) ***No Violation or Conflict.*** Such execution, delivery and performance do not violate or conflict with any law applicable to it, any provision of its constitutional documents, any order or judgment of any court or other agency of government applicable to it or any of its assets or any contractual restriction binding on or affecting it or any of its assets;

(iv) ***Consents.*** All governmental and other consents that are required to have been obtained by it with respect to this Agreement or any Credit Support Document to which it is a party have been obtained and are in full force and effect and all conditions of any such consents have been complied with; and

(v) ***Obligations Binding.*** Its obligations under this Agreement and any Credit Support Document to which it is a party constitute its legal, valid and binding obligations, enforceable in accordance with their respective terms (subject to applicable bankruptcy, reorganization, insolvency, moratorium or similar laws affecting creditors' rights generally and subject, as to enforceability, to equitable principles of general application (regardless of whether enforcement is sought in a proceeding in equity or at law)).

(b) ***Absence of Certain Events.*** No Event of Default or Potential Event of Default or, to its knowledge, Termination Event with respect to it has occurred and is continuing and no such event or circumstance would occur as a result of its entering into or performing its obligations under this Agreement or any Credit Support Document to which it is a party.

(c) ***Absence of Litigation.*** There is not pending or, to its knowledge, threatened against it or any of its Affiliates any action, suit or proceeding at law or in equity or before any court, tribunal, governmental body, agency or official or any arbitrator that is likely to affect the legality, validity or enforceability against it of this Agreement or any Credit Support Document to which it is a party or its ability to perform its obligations under this Agreement or such Credit Support Document.

(d) ***Accuracy of Specified Information.*** All applicable information that is furnished in writing by or on behalf of it to the other party and is identified for the purpose of this Section 3(d) in the Schedule is, as of the date of the information, true, accurate and complete in every material respect.

(e) ***Payer Tax Representation.*** Each representation specified in the Schedule as being made by it for the purpose of this Section 3(e) is accurate and true.

(f) ***Payee Tax Representations.*** Each representation specified in the Schedule as being made by it for the purpose of this Section 3(f) is accurate and true.

4. Agreements

Each party agrees with the other that, so long as either party has or may have any obligation under this Agreement or under any Credit Support Document to which it is a party:—

(a) ***Furnish Specified Information.*** It will deliver to the other party or, in certain cases under subparagraph (iii) below, to such government or taxing authority as the other party reasonably directs:—

(i) any forms, documents or certificates relating to taxation specified in the Schedule or any Confirmation;

(ii) any other documents specified in the Schedule or any Confirmation; and

(iii) upon reasonable demand by such other party, any form or document that may be required or reasonably requested in writing in order to allow such other party or its Credit Support Provider to make a payment under this Agreement or any applicable Credit Support Document without any deduction or withholding for or on account of any Tax or with such deduction or withholding at a reduced rate (so long as the completion, execution or submission of such form or document would not materially prejudice the legal or commercial position of the party in receipt of such demand), with any such form or document to be accurate and completed in a manner reasonably satisfactory to such other party and to be executed and to be delivered with any reasonably required certification,

in each case by the date specified in the Schedule or such Confirmation or, if none is specified, as soon as reasonably practicable.

(b) ***Maintain Authorizations.*** It will use all reasonable efforts to maintain in full force and effect all consents of any governmental or other authority that are required to be obtained by it with respect to this Agreement or any Credit Support Document to which it is a party and will use all reasonable efforts to obtain any that may become necessary in the future.

(c) ***Comply with Laws.*** It will comply in all material respects with all applicable laws and orders to which it may be subject if failure so to comply would materially impair its ability to perform its obligations under this Agreement or any Credit Support Document to which it is a party.

(d) ***Tax Agreement.*** It will give notice of any failure of a representation made by it under Section 3(f) to be accurate and true promptly upon learning of such failure.

(e) ***Payment of Stamp Tax.*** Subject to Section 11, it will pay any Stamp Tax levied or imposed upon it or in respect of its execution or performance of this Agreement by a jurisdiction in which it is incorporated,

organized, managed and controlled, or considered to have its seat, or in which a branch or office through which it is acting for the purpose of this Agreement is located ("Stamp Tax Jurisdiction") and will indemnify the other party against any Stamp Tax levied or imposed upon the other party or in respect of the other party's execution or performance of this Agreement by any such Stamp Tax Jurisdiction which is not also a Stamp Tax Jurisdiction with respect to the other party.

5. Events of Default and Termination Events

(a) ***Events of Default.*** The occurrence at any time with respect to a party or, if applicable, any Credit Support Provider of such party or any Specified Entity of such party of any of the following events constitutes an event of default (an "Event of Default") with respect to such party:—

(i) ***Failure to Pay or Deliver.*** Failure by the party to make, when due, any payment under this Agreement or delivery under Section 2(a)(i) or 2(e) required to be made by it if such failure is not remedied on or before the third Local Business Day after notice of such failure is given to the party;

(ii) ***Breach of Agreement.*** Failure by the party to comply with or perform any agreement or obligation (other than an obligation to make any payment under this Agreement or delivery under Section 2(a)(i) or 2(e) or to give notice of a Termination Event or any agreement or obligation under Section 4(a)(i), 4(a)(iii) or 4(d)) to be complied with or performed by the party in accordance with this Agreement if such failure is not remedied on or before the thirtieth day after notice of such failure is given to the party;

(iii) ***Credit Support Default.***

(1) Failure by the party or any Credit Support Provider of such party to comply with or perform any agreement or obligation to be complied with or performed by it in accordance with any Credit Support Document if such failure is continuing after any applicable grace period has elapsed;

(2) the expiration or termination of such Credit Support Document or the failing or ceasing of such Credit Support Document to be in full force and effect for the purpose of this Agreement (in either case other than in accordance with its terms) prior to the satisfaction of all obligations of such party under each Transaction to which such Credit Support Document relates without the written consent of the other party; or

(3) the party or such Credit Support Provider disaffirms, disclaims, repudiates or rejects, in whole or in part, or challenges the validity of, such Credit Support Document;

(iv) ***Misrepresentation.*** A representation (other than a representation under Section 3(e) or (f)) made or repeated or deemed to have been made or repeated by the party or any Credit Support Provider of such party in this Agreement or any Credit Support Document proves to have been incorrect or misleading in any material respect when made or repeated or deemed to have been made or repeated;

(v) ***Default under Specified Transaction.*** The party, any Credit Support Provider of such party or any applicable Specified Entity of such party (1) defaults under a Specified Transaction and, after giving effect to any applicable notice requirement or grace period, there occurs a liquidation of, an acceleration of obligations under, or an early termination of, that Specified Transaction, (2) defaults, after giving effect to any applicable notice requirement or grace period, in making any payment or delivery due on the last payment, delivery or exchange date of, or any payment on early termination of, a Specified Transaction (or such default continues for at least three Local Business Days if there is no applicable notice requirement or grace period) or (3) disaffirms, disclaims, repudiates or rejects, in whole or in part, a Specified Transaction (or such action is taken by any person or entity appointed or empowered to operate it or act on its behalf);

(vi) ***Cross Default.*** If "Cross Default" is specified in the Schedule as applying to the party, the occurrence or existence of (1) a default, event of default or other similar condition or event (however

described) in respect of such party, any Credit Support Provider of such party or any applicable Specified Entity of such party under one or more agreements or instruments relating to Specified Indebtedness of any of them (individually or collectively) in an aggregate amount of not less than the applicable Threshold Amount (as specified in the Schedule) which has resulted in such Specified Indebtedness becoming, or becoming capable at such time of being declared, due and payable under such agreements or instruments, before it would otherwise have been due and payable or (2) a default by such party, such Credit Support Provider or such Specified Entity (individually or collectively) in making one or more payments on the due date thereof in an aggregate amount of not less than the applicable Threshold Amount under such agreements or instruments (after giving effect to any applicable notice requirement or grace period);

(vii) ***Bankruptcy.*** The party, any Credit Support Provider of such party or any applicable Specified Entity of such party:—

(1) is dissolved (other than pursuant to a consolidation, amalgamation or merger); (2) becomes insolvent or is unable to pay its debts or fails or admits in writing its inability generally to pay its debts as they become due; (3) makes a general assignment, arrangement or composition with or for the benefit of its creditors; (4) institutes or has instituted against it a proceeding seeking a judgment of insolvency or bankruptcy or any other relief under any bankruptcy or insolvency law or other similar law affecting creditors' rights, or a petition is presented for its winding-up or liquidation, and, in the case of any such proceeding or petition instituted or presented against it, such proceeding or petition (A) results in a judgment of insolvency or bankruptcy or the entry of an order for relief or the making of an order for its winding-up or liquidation or (B) is not dismissed, discharged, stayed or restrained in each case within 30 days of the institution or presentation thereof; (5) has a resolution passed for its winding-up, official management or liquidation (other than pursuant to a consolidation, amalgamation or merger); (6) seeks or becomes subject to the appointment of an administrator, provisional liquidator, conservator, receiver, trustee, custodian or other similar official for it or for all or substantially all its assets; (7) has a secured party take possession of all or substantially all its assets or has a distress, execution, attachment, sequestration or other legal process levied, enforced or sued on or against all or substantially all its assets and such secured party maintains possession, or any such process is not dismissed, discharged, stayed or restrained, in each case within 30 days thereafter; (8) causes or is subject to any event with respect to it which, under the applicable laws of any jurisdiction, has an analogous effect to any of the events specified in clauses (1) to (7) (inclusive); or (9) takes any action in furtherance of, or indicating its consent to, approval of, or acquiescence in, any of the foregoing acts; or

(viii) ***Merger Without Assumption.*** The party or any Credit Support Provider of such party consolidates or amalgamates with, or merges with or into, or transfers all or substantially all its assets to, another entity and, at the time of such consolidation, amalgamation, merger or transfer:—

(1) the resulting, surviving or transferee entity fails to assume all the obligations of such party or such Credit Support Provider under this Agreement or any Credit Support Document to which it or its predecessor was a party by operation of law or pursuant to an agreement reasonably satisfactory to the other party to this Agreement; or

(2) the benefits of any Credit Support Document fail to extend (without the consent of the other party) to the performance by such resulting, surviving or transferee entity of its obligations under this Agreement.

(b) Termination Events. The occurrence at any time with respect to a party or, if applicable, any Credit Support Provider of such party or any Specified Entity of such party of any event specified below constitutes an Illegality if the event is specified in (i) below, a Tax Event if the event is specified in (ii) below or a Tax Event Upon Merger if the event is specified in (iii) below, and, if specified to be applicable, a Credit Event

Upon Merger if the event is specified pursuant to (iv) below or an Additional Termination Event if the event is specified pursuant to (v) below:—

(i) ***Illegality.*** Due to the adoption of, or any change in, any applicable law after the date on which a Transaction is entered into, or due to the promulgation of, or any change in, the interpretation by any court, tribunal or regulatory authority with competent jurisdiction of any applicable law after such date, it becomes unlawful (other than as a result of a breach by the party of Section 4(b)) for such party (which will be the Affected Party):—

(1) to perform any absolute or contingent obligation to make a payment or delivery or to receive a payment or delivery in respect of such Transaction or to comply with any other material provision of this Agreement relating to such Transaction; or

(2) to perform, or for any Credit Support Provider of such party to perform, any contingent or other obligation which the party (or such Credit Support Provider) has under any Credit Support Document relating to such Transaction;

(ii) ***Tax Event.*** Due to (x) any action taken by a taxing authority, or brought in a court of competent jurisdiction, on or after the date on which a Transaction is entered into (regardless of whether such action is taken or brought with respect to a party to this Agreement) or (y) a Change in Tax Law, the party (which will be the Affected Party) will, or there is a substantial likelihood that it will, on the next succeeding Scheduled Payment Date (1) be required to pay to the other party an additional amount in respect of an Indemnifiable Tax under Section 2(d)(i)(4) (except in respect of interest under Section 2(e), 6(d)(ii) or 6(e)) or (2) receive a payment from which an amount is required to be deducted or withheld for or on account of a Tax (except in respect of interest under Section 2(e), 6(d)(ii) or 6(e)) and no additional amount is required to be paid in respect of such Tax under Section 2(d)(i)(4) (other than by reason of Section 2(d)(i)(4)(A) or (B));

(iii) ***Tax Event Upon Merger.*** The party (the "Burdened Party") on the next succeeding Scheduled Payment Date will either (1) be required to pay an additional amount in respect of an Indemnifiable Tax under Section 2(d)(i)(4) (except in respect of interest under Section 2(e), 6(d)(ii) or 6(e)) or (2) receive a payment from which an amount has been deducted or withheld for or on account of any Indemnifiable Tax in respect of which the other party is not required to pay an additional amount (other than by reason of Section 2(d)(i)(4)(A) or (B)), in either case as a result of a party consolidating or amalgamating with, or merging with or into, or transferring all or substantially all its assets to, another entity (which will be the Affected Party) where such action does not constitute an event described in Section 5(a)(viii);

(iv) ***Credit Event Upon Merger.*** If "Credit Event Upon Merger" is specified in the Schedule as applying to the party, such party ("X"), any Credit Support Provider of X or any applicable Specified Entity of X consolidates or amalgamates with, or merges with or into, or transfers all or substantially all its assets to, another entity and such action does not constitute an event described in Section 5(a)(viii) but the creditworthiness of the resulting, surviving or transferee entity is materially weaker than that of X, such Credit Support Provider or such Specified Entity, as the case may be, immediately prior to such action (and, in such event, X or its successor or transferee, as appropriate, will be the Affected Party); or

(v) ***Additional Termination Event.*** If any "Additional Termination Event" is specified in the Schedule or any Confirmation as applying, the occurrence of such event (and, in such event, the Affected Party or Affected Parties shall be as specified for such Additional Termination Event in the Schedule or such Confirmation).

(c) ***Event of Default and Illegality.*** If an event or circumstance which would otherwise constitute or give rise to an Event of Default also constitutes an Illegality, it will be treated as an Illegality and will not constitute an Event of Default.

6. Early Termination

(a) ***Right to Terminate Following Event of Default.*** If at any time an Event of Default with respect to a party (the "Defaulting Party") has occurred and is then continuing, the other party (the "Non-defaulting Party") may, by not more than 20 days notice to the Defaulting Party specifying the relevant Event of Default, designate a day not earlier than the day such notice is effective as an Early Termination Date in respect of all outstanding Transactions. If, however, "Automatic Early Termination" is specified in the Schedule as applying to a party, then an Early Termination Date in respect of all outstanding Transactions will occur immediately upon the occurrence with respect to such party of an Event of Default specified in Section 5(a)(vii)(l), (3), (5), (6) or, to the extent analogous thereto, (8), and as of the time immediately preceding the institution of the relevant proceeding or the presentation of the relevant petition upon the occurrence with respect to such party of an Event of Default specified in Section 5(a)(vii)(4) or, to the extent analogous thereto, (8).

(b) ***Right to Terminate Following Termination Event.***

(i) ***Notice.*** If a Termination Event occurs, an Affected Party will, promptly upon becoming aware of it, notify the other party, specifying the nature of that Termination Event and each Affected Transaction and will also give such other information about that Termination Event as the other party may reasonably require.

(ii) ***Transfer to Avoid Termination Event.*** If either an Illegality under Section 5(b)(i)(l) or a Tax Event occurs and there is only one Affected Party, or if a Tax Event Upon Merger occurs and the Burdened Party is the Affected Party, the Affected Party will, as a condition to its right to designate an Early Termination Date under Section 6(b)(iv), use all reasonable efforts (which will not require such party to incur a loss, excluding immaterial, incidental expenses) to transfer within 20 days after it gives notice under Section 6(b)(i) all its rights and obligations under this Agreement in respect of the Affected Transactions to another of its Offices or Affiliates so that such Termination Event ceases to exist.

If the Affected Party is not able to make such a transfer it will give notice to the other party to that effect within such 20 day period, whereupon the other party may effect such a transfer within 30 days after the notice is given under Section 6(b)(i).

Any such transfer by a party under this Section 6(b)(ii) will be subject to and conditional upon the prior written consent of the other party, which consent will not be withheld if such other party's policies in effect at such time would permit it to enter into transactions with the transferee on the terms proposed.

(iii) ***Two Affected Parties.*** If an Illegality under Section 5(b)(i)(1) or a Tax Event occurs and there are two Affected Parties, each party will use all reasonable efforts to reach agreement within 30 days after notice thereof is given under Section 6(b)(i) on action to avoid that Termination Event.

(iv) ***Right to Terminate.*** If:—

(1) a transfer under Section 6(b)(ii) or an agreement under Section 6(b)(iii), as the case may be, has not been effected with respect to all Affected Transactions within 30 days after an Affected Party gives notice under Section 6(b)(i); or

(2) an Illegality under Section 5(b)(i)(2), a Credit Event Upon Merger or an Additional Termination Event occurs, or a Tax Event Upon Merger occurs and the Burdened Party is not the Affected Party,

either party in the case of an Illegality, the Burdened Party in the case of a Tax Event Upon Merger, any Affected Party in the case of a Tax Event or an Additional Termination Event if there is more than one Affected Party, or the party which is not the Affected Party in the case of a Credit Event Upon Merger or an Additional Termination Event if there is only one Affected Party may, by not more than 20 days notice to the other party and provided that the relevant Termination Event is then

continuing, designate a day not earlier than the day such notice is effective as an Early Termination Date in respect of all Affected Transactions.

(c) ***Effect of Designation.***

(i) If notice designating an Early Termination Date is given under Section 6(a) or (b), the Early Termination Date will occur on the date so designated, whether or not the relevant Event of Default or Termination Event is then continuing.

(ii) Upon the occurrence or effective designation of an Early Termination Date, no further payments or deliveries under Section 2(a)(i) or 2(e) in respect of the Terminated Transactions will be required to be made, but without prejudice to the other provisions of this Agreement. The amount, if any, payable in respect of an Early Termination Date shall be determined pursuant to Section 6(e).

(d) ***Calculations.***

(i) ***Statement.*** On or as soon as reasonably practicable following the occurrence of an Early Termination Date, each party will make the calculations on its part, if any, contemplated by Section 6(e) and will provide to the other party a statement (1) showing, in reasonable detail, such calculations (including all relevant quotations and specifying any amount payable under Section 6(e)) and (2) giving details of the relevant account to which any amount payable to it is to be paid. In the absence of written confirmation from the source of a quotation obtained in determining a Market Quotation, the records of the party obtaining such quotation will be conclusive evidence of the existence and accuracy of such quotation.

(ii) ***Payment Date.*** An amount calculated as being due in respect of any Early Termination Date under Section 6(e) will be payable on the day that notice of the amount payable is effective (in the case of an Early Termination Date which is designated or occurs as a result of an Event of Default) and on the day which is two Local Business Days after the day on which notice of the amount payable is effective (in the case of an Early Termination Date which is designated as a result of a Termination Event). Such amount will be paid together with (to the extent permitted under applicable law) interest thereon (before as well as after judgment) in the Termination Currency, from (and including) the relevant Early Termination Date to (but excluding) the date such amount is paid, at the Applicable Rate. Such interest will be calculated on the basis of daily compounding and the actual number of days elapsed.

(e) ***Payments on Early Termination.*** If an Early Termination Date occurs, the following provisions shall apply based on the parties' election in the Schedule of a payment measure, either "Market Quotation" or "Loss", and a payment method, either the "First Method" or the "Second Method". If the parties fail to designate a payment measure or payment method in the Schedule, it will be deemed that "Market Quotation" or the "Second Method", as the case may be, shall apply. The amount, if any, payable in respect of an Early Termination Date and determined pursuant to this Section will be subject to any Set-off.

(i) ***Events of Default.*** If the Early Termination Date results from an Event of Default:—

(1) *First Method and Market Quotation.* If the First Method and Market Quotation apply, the Defaulting Party will pay to the Non-defaulting Party the excess, if a positive number, of (A) the sum of the Settlement Amount (determined by the Non-defaulting Party) in respect of the Terminated Transactions and the Termination Currency Equivalent of the Unpaid Amounts owing to the Non-defaulting Party over (B) the Termination Currency Equivalent of the Unpaid Amounts owing to the Defaulting Party.

(2) *First Method and Loss.* If the First Method and Loss apply, the Defaulting Party will pay to the Non-defaulting Party, if a positive number, the Non-defaulting Party's Loss in respect of this Agreement.

(3) *Second Method and Market Quotation.* If the Second Method and Market Quotation apply, an amount will be payable equal to (A) the sum of the Settlement Amount (determined by the

Non-defaulting Party) in respect of the Terminated Transactions and the Termination Currency Equivalent of the Unpaid Amounts owing to the Non-defaulting Party less (B) the Termination Currency Equivalent of the Unpaid Amounts owing to the Defaulting Party. If that amount is a positive number, the Defaulting Party will pay it to the Non-defaulting Party; if it is a negative number, the Non-defaulting Party will pay the absolute value of that amount to the Defaulting Party.

(4) *Second Method and Loss.* If the Second Method and Loss apply, an amount will be payable equal to the Non-defaulting Party's Loss in respect of this Agreement. If that amount is a positive number, the Defaulting Party will pay it to the Non-defaulting Party; if it is a negative number, the Non-defaulting Party will pay the absolute value of that amount to the Defaulting Party.

(ii) ***Termination Events.*** If the Early Termination Date results from a Termination Event:—

(1) *One Affected Party.* If there is one Affected Party, the amount payable will be determined in accordance with Section 6(e)(i)(3), if Market Quotation applies, or Section 6(e)(i)(4), if Loss applies, except that, in either case, references to the Defaulting Party and to the Non-defaulting Party will be deemed to be references to the Affected Party and the party which is not the Affected Party, respectively, and, if Loss applies and fewer than all the Transactions are being terminated, Loss shall be calculated in respect of all Terminated Transactions.

(2) *Two Affected Parties.* If there are two Affected Parties:—

(A) if Market Quotation applies, each party will determine a Settlement Amount in respect of the Terminated Transactions, and an amount will be payable equal to (I) the sum of (a) one-half of the difference between the Settlement Amount of the party with the higher Settlement Amount ("X") and the Settlement Amount of the party with the lower Settlement Amount ("Y") and (b) the Termination Currency Equivalent of the Unpaid Amounts owing to X less (II) the Termination Currency Equivalent of the Unpaid Amounts owing to Y; and

(B) if Loss applies, each party will determine its Loss in respect of this Agreement (or, if fewer than all the Transactions are being terminated, in respect of all Terminated Transactions) and an amount will be payable equal to one-half of the difference between the Loss of the party with the higher Loss ("X") and the Loss of the party with the lower Loss ("Y").

If the amount payable is a positive number, Y will pay it to X; if it is a negative number, X will pay the absolute value of that amount to Y.

(iii) ***Adjustment for Bankruptcy.*** In circumstances where an Early Termination Date occurs because "Automatic Early Termination" applies in respect of a party, the amount determined under this Section 6(e) will be subject to such adjustments as are appropriate and permitted by law to reflect any payments or deliveries made by one party to the other under this Agreement (and retained by such other party) during the period from the relevant Early Termination Date to the date for payment determined under Section 6(d)(ii).

(iv) ***Pre-Estimate.*** The parties agree that if Market Quotation applies an amount recoverable under this Section 6(e) is a reasonable pre-estimate of loss and not a penalty. Such amount is payable for the loss of bargain and the loss of protection against future risks and except as otherwise provided in this Agreement neither party will be entitled to recover any additional damages as a consequence of such losses.

7. Transfer

Subject to Section 6(b)(ii), neither this Agreement nor any interest or obligation in or under this Agreement may be transferred (whether by way of security or otherwise) by either party without the prior written consent of the other party, except that: —

(a) a party may make such a transfer of this Agreement pursuant to a consolidation or amalgamation with, or merger with or into, or transfer of all or substantially all its assets to, another entity (but without prejudice to any other right or remedy under this Agreement); and

(b) a party may make such a transfer of all or any part of its interest in any amount payable to it from a Defaulting Party under Section 6(e).

Any purported transfer that is not in compliance with this Section will be void.

8. Contractual Currency

(a) ***Payment in the Contractual Currency.*** Each payment under this Agreement will be made in the relevant currency specified in this Agreement for that payment (the "Contractual Currency"). To the extent permitted by applicable law, any obligation to make payments under this Agreement in the Contractual Currency will not be discharged or satisfied by any tender in any currency other than the Contractual Currency, except to the extent such tender results in the actual receipt by the party to which payment is owed, acting in a reasonable manner and in good faith in converting the currency so tendered into the Contractual Currency, of the full amount in the Contractual Currency of all amounts payable in respect of this Agreement. If for any reason the amount in the Contractual Currency so received falls short of the amount in the Contractual Currency payable in respect of this Agreement, the party required to make the payment will, to the extent permitted by applicable law, immediately pay such additional amount in the Contractual Currency as may be necessary to compensate for the shortfall. If for any reason the amount in the Contractual Currency so received exceeds the amount in the Contractual Currency payable in respect of this Agreement, the party receiving the payment will refund promptly the amount of such excess.

(b) ***Judgments.*** To the extent permitted by applicable law, if any judgment or order expressed in a currency other than the Contractual Currency is rendered (i) for the payment of any amount owing in respect of this Agreement, (ii) for the payment of any amount relating to any early termination in respect of this Agreement or (iii) in respect of a judgment or order of another court for the payment of any amount described in (i) or (ii) above, the party seeking recovery, after recovery in full of the aggregate amount to which such party is entitled pursuant to the judgment or order, will be entitled to receive immediately from the other party the amount of any shortfall of the Contractual Currency received by such party as a consequence of sums paid in such other currency and will refund promptly to the other party any excess of the Contractual Currency received by such party as a consequence of sums paid in such other currency if such shortfall or such excess arises or results from any variation between the rate of exchange at which the Contractual Currency is converted into the currency of the judgment or order for the purposes of such judgment or order and the rate of exchange at which such party is able, acting in a reasonable manner and in good faith in converting the currency received into the Contractual Currency, to purchase the Contractual Currency with the amount of the currency of the judgment or order actually received by such party. The term "rate of exchange" includes, without limitation, any premiums and costs of exchange payable in connection with the purchase of or conversion into the Contractual Currency.

(c) ***Separate Indemnities.*** To the extent permitted by applicable law, these indemnities constitute separate and independent obligations from the other obligations in this Agreement, will be enforceable as separate and independent causes of action, will apply notwithstanding any indulgence granted by the party to which any payment is owed and will not be affected by judgment being obtained or claim or proof being made for any other sums payable in respect of this Agreement.

(d) ***Evidence of Loss.*** For the purpose of this Section 8, it will be sufficient for a party to demonstrate that it would have suffered a loss had an actual exchange or purchase been made.

9. Miscellaneous

(a) ***Entire Agreement***. This Agreement constitutes the entire agreement and understanding of the parties with respect to its subject matter and supersedes all oral communication and prior writings with respect thereto.

(b) ***Amendments***. No amendment, modification or waiver in respect of this Agreement will be effective unless in writing (including a writing evidenced by a facsimile transmission) and executed by each of the parties or confirmed by an exchange of telexes or electronic messages on an electronic messaging system.

(c) ***Survival of Obligations.*** Without prejudice to Sections 2(a)(iii) and 6(c)(ii), the obligations of the parties under this Agreement will survive the termination of any Transaction.

(d) ***Remedies Cumulative.*** Except as provided in this Agreement, the rights, powers, remedies and privileges provided in this Agreement are cumulative and not exclusive of any rights, powers, remedies and privileges provided by law.

(e) ***Counterparts and Confirmations***.

(i) This Agreement (and each amendment, modification and waiver in respect of it) may be executed and delivered in counterparts (including by facsimile transmission), each of which will be deemed an original.

(ii) The parties intend that they are legally bound by the terms of each Transaction from the moment they agree to those terms (whether orally or otherwise). A Confirmation shall be entered into as soon as practicable and may be executed and delivered in counterparts (including by facsimile transmission) or be created by an exchange of telexes or by an exchange of electronic messages on an electronic messaging system, which in each case will be sufficient for all purposes to evidence a binding supplement to this Agreement. The parties will specify therein or through another effective means that any such counterpart, telex or electronic message constitutes a Confirmation.

(f) ***No Waiver of Rights***. A failure or delay in exercising any right, power or privilege in respect of this Agreement will not be presumed to operate as a waiver, and a single or partial exercise of any right, power or privilege will not be presumed to preclude any subsequent or further exercise, of that right, power or privilege or the exercise of any other right, power or privilege.

(g) ***Headings***. The headings used in this Agreement are for convenience of reference only and are not to affect the construction of or to be taken into consideration in interpreting this Agreement.

10. Offices; Multibranch Parties

(a) If Section 10(a) is specified in the Schedule as applying, each party that enters into a Transaction through an Office other than its head or home office represents to the other party that, notwithstanding the place of booking office or jurisdiction of incorporation or organization of such party, the obligations of such party are the same as if it had entered into the Transaction through its head or home office. This representation will be deemed to be repeated by such party on each date on which a Transaction is entered into.

(b) Neither party may change the Office through which it makes and receives payments or deliveries for the purpose of a Transaction without the prior written consent of the other party.

(c) If a party is specified as a Multibranch Party in the Schedule, such Multibranch Party may make and receive payments or deliveries under any Transaction through any Office listed in the Schedule, and the Office through which it makes and receives payments or deliveries with respect to a Transaction will be specified in the relevant Confirmation.

11. Expenses

A Defaulting Party will, on demand, indemnify and hold harmless the other party for and against all reasonable out-of-pocket expenses, including legal fees and Stamp Tax, incurred by such other party by reason of the enforcement and protection of its rights under this Agreement or any Credit Support Document

to which the Defaulting Party is a party or by reason of the early termination of any Transaction, including, but not limited to, costs of collection.

12. Notices

(a) ***Effectiveness.*** Any notice or other communication in respect of this Agreement may be given in any manner set forth below (except that a notice or other communication under Section 5 or 6 may not be given by facsimile transmission or electronic messaging system) to the address or number or in accordance with the electronic messaging system details provided (see the Schedule) and will be deemed effective as indicated:—

(i) if in writing and delivered in person or by courier, on the date it is delivered;

(ii) if sent by telex, on the date the recipient's answerback is received;

(iii) if sent by facsimile transmission, on the date that transmission is received by a responsible employee of the recipient in legible form (it being agreed that the burden of proving receipt will be on the sender and will not be met by a transmission report generated by the sender's facsimile machine);

(iv) if sent by certified or registered mail (airmail, if overseas) or the equivalent (return receipt requested), on the date that mail is delivered or its delivery is attempted; or

(v) if sent by electronic messaging system, on the date that electronic message is received,

unless the date of that delivery (or attempted delivery) or that receipt, as applicable, is not a Local Business Day or that communication is delivered (or attempted) or received, as applicable, after the close of business on a Local Business Day, in which case that communication shall be deemed given and effective on the first following day that is a Local Business Day.

(b) ***Change of Addresses.*** Either party may by notice to the other change the address, telex or facsimile number or electronic messaging system details at which notices or other communications are to be given to it.

13. Governing Law and Jurisdiction

(a) ***Governing Law.*** This Agreement will be governed by and construed in accordance with the law specified in the Schedule.

(b) ***Jurisdiction.*** With respect to any suit, action or proceedings relating to this Agreement ("Proceedings"), each party irrevocably:—

(i) submits to the jurisdiction of the English courts, if this Agreement is expressed to be governed by English law, or to the non-exclusive jurisdiction of the courts of the State of New York and the United States District Court located in the Borough of Manhattan in New York City, if this Agreement is expressed to be governed by the laws of the State of New York; and

(ii) waives any objection which it may have at any time to the laying of venue of any Proceedings brought in any such court, waives any claim that such Proceedings have been brought in an inconvenient forum and further waives the right to object, with respect to such Proceedings, that such court does not have any jurisdiction over such party.

Nothing in this Agreement precludes either party from bringing Proceedings in any other jurisdiction (outside, if this Agreement is expressed to be governed by English law, the Contracting States, as defined in Section 1(3) of the Civil Jurisdiction and Judgments Act 1982 or any modification, extension or reenactment thereof for the time being in force) nor will the bringing of Proceedings in any one or more jurisdictions preclude the bringing of Proceedings in any other jurisdiction.

(c) ***Service of Process.*** Each party irrevocably appoints the Process Agent (if any) specified opposite its name in the Schedule to receive, for it and on its behalf, service of process in any Proceedings. If for any

reason any party's Process Agent is unable to act as such, such party will promptly notify the other party and within 30 days appoint a substitute process agent acceptable to the other party. The parties irrevocably consent to service of process given in the manner provided for notices in Section 12. Nothing in this Agreement will affect the right of either party to serve process in any other manner permitted by law.

(d) ***Waiver of Immunities.*** Each party irrevocably waives, to the fullest extent permitted by applicable law, with respect to itself and its revenues and assets (irrespective of their use or intended use), all immunity on the grounds of sovereignty or other similar grounds from (i) suit, (ii) jurisdiction of any court, (iii) relief by way of injunction, order for specific performance or for recovery of property, (iv) attachment of its assets (whether before or after judgment) and (v) execution or enforcement of any judgment to which it or its revenues or assets might otherwise be entitled in any Proceedings in the courts of any jurisdiction and irrevocably agrees, to the extent permitted by applicable law, that it will not claim any such immunity in any Proceedings.

14. Definitions

As used in this Agreement:—

"Additional Termination Event" has the meaning specified in Section 5(b).

"Affected Party" has the meaning specified in Section 5(b).

"Affected Transactions" means (a) with respect to any Termination Event consisting of an Illegality, Tax Event or Tax Event Upon Merger, all Transactions affected by the occurrence of such Termination Event and (b) with respect to any other Termination Event, all Transactions.

"Affiliate" means, subject to the Schedule, in relation to any person, any entity controlled, directly or indirectly, by the person, any entity that controls, directly or indirectly, the person or any entity directly or indirectly under common control with the person. For this purpose, "control" of any entity or person means ownership of a majority of the voting power of the entity or person.

"Applicable Rate" means:—

(a) in respect of obligations payable or deliverable (or which would have been but for Section 2(a)(iii)) by a Defaulting Party, the Default Rate;

(b) in respect of an obligation to pay an amount under Section 6(e) of either party from and after the date (determined in accordance with Section 6(d)(ii)) on which that amount is payable, the Default Rate;

(c) in respect of all other obligations payable or deliverable (or which would have been but for Section 2(a)(iii)) by a Non-defaulting Party, the Non-default Rate; and

(d) in all other cases, the Termination Rate.

"Burdened Party" has the meaning specified in Section 5(b).

"Change in Tax Law" means the enactment, promulgation, execution or ratification of, or any change in or amendment to, any law (or in the application or official interpretation of any law) that occurs on or after the date on which the relevant Transaction is entered into.

"consent" includes a consent, approval, action, authorization, exemption, notice, filing, registration or exchange control consent.

"Credit Event Upon Merger" has the meaning specified in Section 5(b).

"Credit Support Document" means any agreement or instrument that is specified as such in this Agreement.

"Credit Support Provider" has the meaning specified in the Schedule.

"Default Rate" means a rate per annum equal to the cost (without proof or evidence of any actual cost) to the relevant payee (as certified by it) if it were to fund or of funding the relevant amount plus 1% per annum.

"Defaulting Party" has the meaning specified in Section 6(a).

"Early Termination Date" means the date determined in accordance with Section 6(a) or 6(b)(iv).

"Event of Default" has the meaning specified in Section 5(a) and, if applicable, in the Schedule.

"Illegality" has the meaning specified in Section 5(b).

***"Indemnifiable* Tax"** means any Tax other than a Tax that would not be imposed in respect of a payment under this Agreement but for a present or former connection between the jurisdiction of the government or taxation authority imposing such Tax and the recipient of such payment or a person related to such recipient (including, without limitation, a connection arising from such recipient or related person being or having been a citizen or resident of such jurisdiction, or being or having been organized, present or engaged in a trade or business in such jurisdiction, or having or having had a permanent establishment or fixed place of business in such jurisdiction, but excluding a connection arising solely from such recipient or related person having executed, delivered, performed its obligations or received a payment under, or enforced, this Agreement or a Credit Support Document).

"law" includes any treaty, law, rule or regulation (as modified, in the case of tax matters, by the practice of any relevant governmental revenue authority) and ***"lawful"*** and ***"unlawful"*** will be construed accordingly.

"Local Business Day" means, subject to the Schedule, a day on which commercial banks are open for business (including dealings in foreign exchange and foreign currency deposits) (a) in relation to any obligation under Section 2(a)(i), in the place(s) specified in the relevant Confirmation or, if not so specified, as otherwise agreed by the parties in writing or determined pursuant to provisions contained, or incorporated by reference, in this Agreement, (b) in relation to any other payment, in the place where the relevant account is located and, if different, in the principal financial centre, if any, of the currency of such payment, (c) in relation to any notice or other communication, including notice contemplated under Section 5(a)(i), in the city specified in the address for notice provided by the recipient and, in the case of a notice contemplated by Section 2(b), in the place where the relevant new account is to be located and (d) in relation to Section 5(a)(v)(2), in the relevant locations for performance with respect to such Specified Transaction.

"Loss" means, with respect to this Agreement or one or more Terminated Transactions, as the case may be, and a party, the Termination Currency Equivalent of an amount that party reasonably determines in good faith to be its total losses and costs (or gain, in which case expressed as a negative number) in connection with this Agreement or that Terminated Transaction or group of Terminated Transactions, as the case may be, including any loss of bargain, cost of funding or, at the election of such party but without duplication, loss or cost incurred as a result of its terminating, liquidating, obtaining or reestablishing any hedge or related trading position (or any gain resulting from any of them). Loss includes losses and costs (or gains) in respect of any payment or delivery required to have been made (assuming satisfaction of each applicable condition precedent) on or before the relevant Early Termination Date and not made, except, so as to avoid duplication, if Section 6(e)(i)(1) or (3) or 6(e)(ii)(2)(A) applies. Loss does not include a party's legal fees and out-of-pocket expenses referred to under Section 11. A party will determine its Loss as of the relevant Early Termination Date, or, if that is not reasonably practicable, as of the earliest date thereafter as is reasonably practicable. A party may (but need not) determine its Loss by reference to quotations of relevant rates or prices from one or more leading dealers in the relevant markets.

"Market Quotation" means, with respect to one or more Terminated Transactions and a party making the determination, an amount determined on the basis of quotations from Reference Market-makers. Each quotation will be for an amount, if any, that would be paid to such party (expressed as a negative number) or by such party (expressed as a positive number) in consideration of an agreement between such party (taking into account any existing Credit Support Document with respect to the obligations of such party) and the quoting Reference Market-maker to enter into a transaction (the "Replacement Transaction") that would have the effect of preserving for such party the economic equivalent of any payment or delivery (whether the underlying obligation was absolute or contingent and assuming the satisfaction of each applicable condition precedent) by the parties under Section 2(a)(i) in respect of such Terminated Transaction or group of Terminated Transactions that would, but for the occurrence of the relevant Early Termination Date, have

been required after that date. For this purpose, Unpaid Amounts in respect of the Terminated Transaction or group of Terminated Transactions are to be excluded but, without limitation, any payment or delivery that would, but for the relevant Early Termination Date, have been required (assuming satisfaction of each applicable condition precedent) after that Early Termination Date is to be included. The Replacement Transaction would be subject to such documentation as such party and the Reference Market-maker may, in good faith, agree. The party making the determination (or its agent) will request each Reference Market maker to provide its quotation to the extent reasonably practicable as of the same day and time (without regard to different time zones) on or as soon as reasonably practicable after the relevant Early Termination Date. The day and time as of which those quotations are to be obtained will be selected in good faith by the party obliged to make a determination under Section 6(e), and, if each party is so obliged, after consultation with the other. If more than three quotations are provided, the Market Quotation will be the arithmetic mean of the quotations, without regard to the quotations having the highest and lowest values. If exactly three such quotations are provided, the Market Quotation will be the quotation remaining after disregarding the highest and lowest quotations. For this purpose, if more than one quotation has the same highest value or lowest value, then one of such quotations shall be disregarded. If fewer than three quotations are provided, it will be deemed that the Market Quotation in respect of such Terminated Transaction or group of Terminated Transactions cannot be determined.

"Non-default Rate" means a rate per annum equal to the cost (without proof or evidence of any actual cost) to the Non-defaulting Party (as certified by it) if it were to fund the relevant amount.

"Non-defaulting Party" has the meaning specified in Section 6(a).

"Office" means a branch or office of a party, which may be such party's head or home office.

"Potential Event of Default" means any event which, with the giving of notice or the lapse of time or both, would constitute an Event of Default.

"Reference Market-makers" means four leading dealers in the relevant market selected by the party determining a Market Quotation in good faith (a) from among dealers of the highest credit standing which satisfy all the criteria that such party applies generally at the time in deciding whether to offer or to make an extension of credit and (b) to the extent practicable, from among such dealers having an office in the same city.

"Relevant Jurisdiction" means, with respect to a party, the jurisdictions (a) in which the party is incorporated, organized, managed and controlled or considered to have its seat, (b) where an Office through which the party is acting for purposes of this Agreement is located, (c) in which the party executes this Agreement and (d) in relation to any payment, from or through which such payment is made.

"Scheduled Payment Date" means a date on which a payment or delivery is to be made under Section 2(a)(i) with respect to a Transaction.

"Set-off" means set-off, offset, combination of accounts, right of retention or withholding or similar right or requirement to which the payer of an amount under Section 6 is entitled or subject (whether arising under this Agreement, another contract, applicable law or otherwise) that is exercised by, or imposed on, such payer.

"Settlement Amount" means, with respect to a party and any Early Termination Date, the sum of:—

(a) the Termination Currency Equivalent of the Market Quotations (whether positive or negative) for each Terminated Transaction or group of Terminated Transactions for which a Market Quotation is determined; and

(b) such party's Loss (whether positive or negative and without reference to any Unpaid Amounts) for each Terminated Transaction or group of Terminated Transactions for which a Market Quotation cannot be determined or would not (in the reasonable belief of the party making the determination) produce a commercially reasonable result.

"Specified Entity" has the meaning specified in the Schedule.

"Specified Indebtedness" means, subject to the Schedule, any obligation (whether present or future, contingent or otherwise, as principal or surety or otherwise) in respect of borrowed money.

"Specified Transaction" means, subject to the Schedule, (a) any transaction (including an agreement with respect thereto) now existing or hereafter entered into between one party to this Agreement (or any Credit Support Provider of such party or any applicable Specified Entity of such party) and the other party to this Agreement (or any Credit Support Provider of such other party or any applicable Specified Entity of such other party) which is a rate swap transaction, basis swap, forward rate transaction, commodity swap, commodity option, equity or equity index swap, equity or equity index option, bond option, interest rate option, foreign exchange transaction, cap transaction, floor transaction, collar transaction, currency swap transaction, cross-currency rate swap transaction, currency option or any other similar transaction (including any option with respect to any of these transactions), (b) any combination of these transactions and (c) any other transaction identified as a Specified Transaction in this Agreement or the relevant confirmation.

"Stamp Tax" means any stamp, registration, documentation or similar tax.

"Tax" means any present or future tax, levy, impost, duty, charge, assessment or fee of any nature (including interest, penalties and additions thereto) that is imposed by any government or other taxing authority in respect of any payment under this Agreement other than a stamp, registration, documentation or similar tax.

"Tax Event" has the meaning specified in Section 5(b).

"Tax Event Upon Merger" has the meaning specified in Section 5(b).

"Terminated Transactions" means with respect to any Early Termination Date (a) if resulting from a Termination Event, all Affected Transactions and (b) if resulting from an Event of Default, all Transactions (in either case) in effect immediately before the effectiveness of the notice designating that Early Termination Date (or, if "Automatic Early Termination" applies, immediately before that Early Termination Date).

"Termination Currency" has the meaning specified in the Schedule.

"Termination Currency Equivalent" means, in respect of any amount denominated in the Termination Currency, such Termination Currency amount and, in respect of any amount denominated in a currency other than the Termination Currency (the "Other Currency"), the amount in the Termination Currency determined by the party making the relevant determination as being required to purchase such amount of such Other Currency as at the relevant Early Termination Date, or, if the relevant Market Quotation or Loss (as the case may be), is determined as of a later date, that later date, with the Termination Currency at the rate equal to the spot exchange rate of the foreign exchange agent (selected as provided below) for the purchase of such Other Currency with the Termination Currency at or about 11:00 a.m. (in the city in which such foreign exchange agent is located) on such date as would be customary for the determination of such a rate for the purchase of such Other Currency for value on the relevant Early Termination Date or that later date. The foreign exchange agent will, if only one party is obliged to make a determination under Section 6(e), be selected in good faith by that party and otherwise will be agreed by the parties.

"Termination Event" means an Illegality, a Tax Event or a Tax Event Upon Merger or, if specified to be applicable, a Credit Event Upon Merger or an Additional Termination Event.

"Termination Rate" means a rate per annum equal to the arithmetic mean of the cost (without proof or evidence of any actual cost) to each party (as certified by such party) if it were to fund or of funding such amounts.

"Unpaid Amounts" owing to any party means, with respect to an Early Termination Date, the aggregate of (a) in respect of all Terminated Transactions, the amounts that became payable (or that would have become payable but for Section 2(a)(iii)) to such party under Section 2(a)(i) on or prior to such Early Termination Date and which remain unpaid as at such Early Termination Date and (b) in respect of each Terminated Transaction, for each obligation under Section 2(a)(i) which was (or would have been but for Section 2(a) (iii)) required to be settled by delivery to such party on or prior to such Early Termination Date and which has not been so settled as at such Early Termination Date, an amount equal to the fair market

value of that which was (or would have been) required to be delivered as of the originally scheduled date for delivery, in each case together with (to the extent permitted under applicable law) interest, in the currency of such amounts, from (and including) the date such amounts or obligations were or would have been required to have been paid or performed to (but excluding) such Early Termination Date, at the Applicable Rate. Such amounts of interest will be calculated on the basis of daily compounding and the actual number of days elapsed. The fair market value of any obligation referred to in clause (b) above shall be reasonably determined by the party obliged to make the determination under Section 6(e) or, if each party is so obliged, it shall be the average of the Termination Currency Equivalents of the fair market values reasonably determined by both parties.

IN WITNESS WHEREOF the parties have executed this document on the respective dates specified below with effect from the date specified on the first page of this document.

SCHEDULE
to the
MASTER AGREEMENT
(Multicurrency--Cross Border)

dated
January 29, 2019
between

CITY OF ROSEVILLE, a California municipality
("Party A")

and

NextEra Energy Marketing, LLC
a limited liability company organized under the laws of the State of Delaware
("Party B")

Part 1. Default and Termination Provisions.

(a) *"**Specified Entity**"* means in relation to Party A and Party B for the purpose of:

Section 5(a)(v) (Default under Specified Indebtedness), not applicable;
Section 5(a)(vi) (Cross Default), not applicable;
Section 5(a)(vii) (Bankruptcy), not applicable; and
Section 5(b)(iv) (Credit Event Upon Merger), not applicable.

(b) *"**Specified Transaction**"* will have the meaning set forth below:

"Specified Transaction" means (a) any transaction (including an agreement with respect to any such transaction) now existing or hereafter entered into between one party to this Agreement (or any Credit Support Provider of such party or any applicable Specified Entity of such party) and the other party to this Agreement (or any Credit Support Provider of such other party or any applicable Specified Entity of such other party) which is not a Transaction under this Agreement but (i) which is a rate swap transaction, swap option, basis swap, forward rate transaction, Commodity swap, Commodity option, equity or equity index swap, equity or equity index option, bond option, interest rate option, foreign exchange transaction, cap transaction, floor transaction, collar transaction, currency swap transaction, cross-currency rate swap transaction, currency option, credit protection transaction, credit swap, credit default swap, credit default option, total return swap, credit spread transaction, repurchase transaction, reverse purchase transaction, buy/sell-back transaction, securities lending transaction, weather index transaction or forward or spot purchase or sale or transfer of a security, Commodity or other financial instrument or interest (including any option with respect to any of these transactions) (ii) which is a type of transaction that is similar to any transaction referred to in clause (i) above that is currently, or in the future becomes, recurrently entered into in the financial markets (including terms and conditions incorporated by reference in such agreement) and which is a forward, swap, future, option or other derivative on one or more rates, currencies, Commodities, equity securities or other equity instruments, debt securities or other debt instruments, economic indices or measures of economic risk or value, or other benchmarks against which payments or deliveries are to be made, or (iii) which is a transaction involving the purchase or sale of energy products, (b) any combination of these transactions and (c) any other transaction identified as a Specified Transaction in this Agreement or the relevant confirmation.

"Commodity" shall mean any tangible or intangible commodity of any type or description (including, without limitation, electric power, electric power capacity, physical transmission of electric energy or transportation of gas, financial transmission rights, petroleum, natural gas, and byproducts thereof, as well as renewable energy credits, emission allowances, and any other similar types of products).

(c) ***Cross Default.*** The provisions of Section 5(a)(vi) will apply to both Party A and Party B as modified by adding, immediately prior to the semicolon at the end thereof, the following:

"provided, however, that it shall not constitute an Event of Default under either Section 5(a)(vi)(1) or (2) if (a) the event or condition referred to in Section 5(a)(vi)(1) or the failure to pay referred to in Section 5(a)(vi)(2) arises in the ordinary course of business by mistake, oversight, or transfer difficulties and (b) such event of default or failure to pay is remedied on or before the third Business Day after the occurrence or existence of such event of default or failure to pay."

In addition, Section 5(a)(vi) is hereby amended by the deletion of the words ", or becoming capable at such time of being declared," from clause (1) of such provision.

(d) ***"Specified Indebtedness"***, referred to in Section 5(a)(vi), will have the meaning specified in Section 14 of this Agreement.

(e) ***"Threshold Amount"***, referred to in Section 5(a)(vi) means:

(1) With respect to Party A: $20 MM; and
(2) With respect to Party B: $100 MM.

(f) The ***"Credit Event Upon Merger"*** provisions of Section 5(b)(iv) will apply to Party A and its Credit Support Provider and will apply to Party B and its Credit Support Provider; provided however, that the phrase "materially weaker" means (i) the unsecured, senior, long-term indebtedness of the resulting, surviving or transferee entity is rated less than, or equal to, BBB- by Standard & Poor's Rating Group or less than, or equal to, Baa3 by Moody's Investor Service, Inc.,

(g) ***Merger Without Assumption.*** Section 5(a)(viii) of this Agreement is hereby amended to read in its entirety as follows:

"(viii) ***Merger Without Assumption.*** The party or any Credit Support Provider of such party consolidates or amalgamates with, or merges with or into, or transfers all or substantially all its assets to, or reorganizes, incorporates, reincorporates, or reconstitutes into or as, another entity (or, without limiting the foregoing, if such party is a Government Entity, an entity such as an organization, board, commission, authority, agency or body succeeds to the principal functions of, or powers and duties granted to, such party or any Credit Support Provider of such party) and, at the time of such consolidation, amalgamation, merger, transfer, reorganization, incorporation, reincorporation, or reconstitution or succession:

(1) the resulting, reorganized, reincorporated, reconstituted, surviving, transferee or successor entity (the "Resulting Entity") fails to assume all the obligations of such party or such Credit Support Provider under this Agreement or any Credit Support Document to which it or its predecessor was a party by operation of law or pursuant to an agreement reasonably satisfactory to the other party to this Agreement; or

(2) the benefits of any Credit Support Document fail to extend (without the consent of the other party) to the performance by such Resulting Entity of its obligations under this Agreement."

(h) ***Bankruptcy.*** Section 5(a)(vii) is hereby amended as follows:

by deleting Clause (6) thereof and amending it to read in its entirety as follows:

"(6)(A) seeks or becomes subject to the appointment of an administrator, provisional liquidator, conservator, receiver, trustee, custodian or other similar official for it or for all or substantially all its assets or (B) in the case of a Government Entity, any Credit Support Provider of such Government Entity or any applicable Specified Entity of such Government Entity, (I) there shall be appointed or designated with respect to it, an entity such as an

organization, board, commission, authority, agency or body to monitor, review, oversee, recommend or declare a financial emergency or similar state of financial distress with respect to it or (II) there shall be declared or introduced or proposed for consideration by it or by any legislative or regulatory body with competent jurisdiction over it, the existence of a state of financial emergency or similar state of financial distress in respect of it;"

(i) The ***"Additional Termination Event"*** provision of Section 5(b) (v) will apply with respect to both parties and is defined as follows:

"If (i) it or its Credit Support Provider, if any, (1) fails to maintain a Credit Rating of at least Baa3 by Moody's; or (2) fails to maintain a Credit Rating of at least BBB- by S&P; or (3) ceases to be rated by either Moody's or S&P and (ii) such Party fails to provide such Eligible Credit Support acceptable to the other Party within two (2) Business Days of receipt of notice. For the purpose of the foregoing Termination Event, such downgraded party shall be the Affected Party. "Credit Rating" means, with respect to any entity on any date of determination, the respective rating then assigned to its unsecured senior long-term debt or deposit obligations (not supported by third party credit enhancement), by S&P, Moody's or such other rating agency or agencies as are specified; and if no rating is assigned to such entity's unsecured, senior long-term debt or deposit obligations by such rating agency, the general corporate credit rating or long-term issuer rating, as applicable, assigned by such rating agency to such entity. The standing guaranty of NextEra Energy Capital Holdings, Inc. in favor of Party B's Guarantor shall not be considered to constitute "third party credit enhancement" for purposes of this definition."

(j) The *"**Automatic Early Termination**"* provision of Section 6(a) will not apply to Party A and will not apply to Party B.

(k) ***"Additional Event of Default"*** shall apply with respect to both Party A and Party B and is defined as the following:

(1) ***"Adequate Assurance Default"*** Failure by Y to transfer Adequate Assurance pursuant to Part 1(i)(2) of this Agreement shall be an Event of Default under Section 5 of this Agreement.

(2) When a party ("X") has commercially reasonable grounds for insecurity regarding payment or performance by the other party ("Y") under this Agreement, X may demand from time to time Adequate Assurance from Y. Y shall transfer such Adequate Assurance by 5:00 p.m. on the third (3rd) Local Business Day following the date of receipt by Y of the demand by X. If the demand for Adequate Assurance is received by Y after 2:00 p.m. on a Local Business Day, receipt of such demand shall be deemed to have occurred on the next following Local Business Day.

(a) ***"Adequate Assurance"*** means cash or a Letter of Credit, for an amount and term reasonably acceptable to X.

(b) Adequate Assurance shall be deemed to be Posted Collateral and be subject to the provisions contained in the Credit Support Annex; however, such Adequate Assurance shall not be included in the calculation of Delivery Amount or Return Amount as defined in Paragraph 3.

(3) Once X has determined in a commercially reasonable manner that Y no longer presents an insecurity regarding payment or performance or if Y has no further obligations under this Agreement, X shall (at the request of Y in the event there are no further obligations) return such Adequate Assurance by 5:00 p.m. on the third (3rd) Local Business Day following such determination or request, as applicable.

(l) ***Early Termination Period.*** Notwithstanding anything to the contrary in Section 6(a), (b), or (c) the parties agree that, except with respect to Transactions (if any) that are subject to Automatic Early Termination, the Non-defaulting Party is not required to liquidate the Transactions on a single day, but rather may liquidate the Transactions over a commercially reasonable period of time (not to exceed 20 [twenty] days) (the "Early Termination Period"). The last day of the Early Termination Period shall be the Early Termination Date for purposes of Section 6; provided, however, that interest shall accrue on the Transactions liquidated during the Early Termination Period (i.e. from the date of liquidation) prior to the Early Termination Date at the Default Rate.

(m) ***Close-out Amount.***

(i) The terms of Section 6(d)(i) of the Agreement are amended in their entirety as follows:

"(d) Calculations; Payment Date.

(i) ***Statement.*** On or as soon as reasonably practicable following the occurrence of an Early Termination Date, each party will make the calculations on its part, if any, contemplated by Section 6(e) and will provide to the other party a statement (l) showing, in reasonable detail, such calculations (including any quotations, market data or information from internal sources used in making such calculations), (2) specifying (except where there are two Affected Parties) any Early Termination Amount payable and (3) giving details of the relevant account to which any amount payable to it is to be paid. In the absence of written confirmation from the source of a quotation or market data obtained in determining a Close-out Amount, the records of the party obtaining such quotation or market data will be conclusive evidence of the existence and accuracy of such quotation or market data."

(ii) The terms of Section 6(e) of the Agreement are amended in their entirety as follows:

"(e) ***Payments on Early Termination.*** If an Early Termination Date occurs, the amount, if any, payable in respect of that Early Termination Date (the "Early Termination Amount") will be determined pursuant to this Section 6(e) and will be subject to any Set-off.

(i) ***Events of Default.*** If the Early Termination Date results from an Event of Default, the Early Termination Amount will be an amount equal to (1) the sum of (A) the Termination Currency Equivalent of the Close-out Amount or Close-out Amounts (whether positive or negative) determined by the Nondefaulting Party for each Terminated Transaction or group of Terminated Transactions, as the case may be, and (B) the Termination Currency Equivalent of the Unpaid Amounts owing to the Non-defaulting Party less (2) the Termination Currency Equivalent of the Unpaid Amounts owing to the Defaulting Party. If the Early Termination Amount is a positive number, the Defaulting Party will pay it to the Non-defaulting Party; if it is a negative number, the Non-defaulting Party will pay the absolute value of the Early Termination Amount to the Defaulting Party.

(ii) ***Termination Events.*** If the Early Termination Date results from a Termination Event:

(1) One Affected Party. Subject to clause (3) below, if there is one Affected Party, the Early Termination Amount will be determined in accordance with Section 6(e)(i), except that references to the Defaulting Party and to the Non-defaulting Party will be deemed to be references to the Affected Party and to the Non-affected Party, respectively.

(2) Two Affected Parties. Subject to clause (3) below, if there are two Affected Parties, each party will determine an amount equal to the Termination Currency Equivalent of the sum of the Close-out Amount or Close-out Amounts (whether positive or negative) for each Terminated Transaction or group of Terminated Transactions, as the case may be, and the Early Termination Amount will be an amount equal to (A) the sum of (I) one-half of the difference between the higher amount so determined (by party "X") and the lower amount so determined (by party "Y") and (II) the Termination Currency Equivalent of the Unpaid Amounts owing to X less (B) the Termination Currency Equivalent of the Unpaid Amounts owing to Y. If the Early Termination Amount is a positive number, Y will pay it to X; if it is a negative number, X will pay the absolute value of the Early Termination Amount to Y.

(iii) ***Adjustment for Bankruptcy.*** In circumstances where an Early Termination Date occurs because "Automatic Early Termination" applies in respect of a party, the Early Termination Amount will be subject to such adjustments as are appropriate and permitted by applicable law to reflect any payments or deliveries made by one party to the other under this Agreement (and retained by such other party) during the period from the relevant Early Termination Date to the date for payment determined under Section 6(d)(ii).

(iv) ***Pre-Estimate.*** The parties agree that an amount recoverable under this Section 6(e) is a reasonable pre-estimate of loss and not a penalty. Such amount is payable for the loss of bargain and the loss of protection against future risks and except as otherwise provided in this Agreement neither party will be

entitled to recover any additional damages as a consequence of the termination of the Terminated Transactions."

(ii) The term "Termination Currency Equivalent" in Section 14 of the Agreement is hereby amended by replacing "Market Quotation or Loss (as the case may be)" with "Close-out Amount".

(iii) The following terms are added to Section 14 of the Agreement in the appropriate alphabetical position:

""Close-out Amount" means, with respect to each Terminated Transaction or each group of Terminated Transactions and a Determining Party, the amount of the losses or costs of the Determining Party that are or would be incurred under then prevailing circumstances (expressed as a positive number) or gains of the Determining Party that are or would be realized under then prevailing circumstances (expressed as a negative number) in replacing, or in providing for the Determining Party the economic equivalent of, (a) the material terms of that Terminated Transaction or group of Terminated Transactions, including the payments and deliveries by the parties under Section 2(a)(i) in respect of that Terminated Transaction or group of Terminated Transactions that would, but for the occurrence of the relevant Early Termination Date, have been required after that date (assuming satisfaction of the conditions precedent in Section 2(a)(iii)) and (b) the option rights of the parties in respect of that Terminated Transaction or group of Terminated Transactions.

Any Close-out Amount will be determined by the Determining Party (or its agent), which will act in good faith and use commercially reasonable procedures in order to produce a commercially reasonable result. The Determining Party may determine a Close-out Amount for any group of Terminated Transactions or any individual Terminated Transaction but, in the aggregate, for not less than all Terminated Transactions. Each Close-out Amount will be determined as of the Early Termination Date or, if that would not be commercially reasonable, as of the date or dates following the Early Termination Date as would be commercially reasonable.

Unpaid Amounts in respect of a Terminated Transaction or group of Terminated Transactions and legal fees and out-of-pocket expenses referred to in Section 11 are to be excluded in all determinations of Close-out Amounts.

In determining a Close-out Amount, the Determining Party may consider any relevant information, including, without limitation, one or more of the following types of information:

(i) quotations (either firm or indicative) for replacement transactions supplied by one or more third parties that may take into account the creditworthiness of the Determining Party at the time the quotation is provided and the terms of any relevant documentation, including credit support documentation, between the Determining Party and the third party providing the quotation;

(ii) information consisting of relevant market data in the relevant market supplied by one or more third parties including, without limitation, relevant rates, prices, yields, yield curves, volatilities, spreads, correlations or other relevant market data in the relevant market; or

(iii) information of the types described in clause (i) or (ii) above from internal sources (including any of the Determining Party's Affiliates) if that information is of the same type used by the Determining Party in the regular course of its business for the valuation of similar transactions.

The Determining Party will consider, taking into account the standards and procedures described in this definition, quotations pursuant to clause (i) above or relevant market data pursuant to clause (ii) above unless the Determining Party reasonably believes in good faith that such quotations or relevant market data are not readily available or would produce a result that would not satisfy those standards. When considering information described in clause (i), (ii) or (iii) above, the Determining Party may include costs of funding, to the extent costs of funding are not and would not be a component of the other information being utilised. Third parties supplying quotations pursuant to clause (i) above or market data pursuant to clause (ii) above may include, without limitation, dealers in the relevant markets, end-users of the relevant product, information vendors, brokers and other sources of market information.

Without duplication of amounts calculated based on information described in clause (i), (ii) or (iii) above, or other relevant information, and when it is commercially reasonable to do so, the Determining

Party may in addition consider in calculating a Close-out Amount any loss or cost incurred in connection with its terminating, liquidating or re-establishing any hedge related to a Terminated Transaction or group of Terminated Transactions (or any gain resulting from any of them).

Commercially reasonable procedures used in determining a Close-out Amount may include the following:

(1) application to relevant market data from third parties pursuant to clause (ii) above or information from internal sources pursuant to clause (iii) above of pricing or other valuation models that are, at the time of the determination of the Close-out Amount, used by the Determining Party in the regular course of its business in pricing or valuing transactions between the Determining Party and unrelated third parties that are similar to the Terminated Transaction or group of Terminated Transactions; and

(2) application of different valuation methods to Terminated Transactions or groups of Terminated Transactions depending on the type, complexity, size or number of the Terminated Transactions or group of Terminated Transactions.

"Determining Party" means the party determining a Close-out Amount.

"Early Termination Amount" has the meaning specified in Section 6(e).

"Non-affected Party" means, so long as there is only one Affected Party, the other party."

(iv) The following terms in Section 14 of the Agreement are deleted in their entirety: "Loss", "Market Quotation", "Reference Market-makers" and "Settlement Amount".

(n) ***Setoff.*** Section 6 is amended by adding a new Section 6(f) as follows:

"(f) Any amount (the "Early Termination Amount") payable to one party (the "Payee") by the other party (the "Payer") under Section 6(e), in circumstances where there is a Defaulting Party or one Affected Party in the case where a Termination Event under Section 5(b)(iv) has occurred, will, at the option of the party ("X") other than the Defaulting Party or the Affected Party (and without prior notice to the Defaulting Party or the Affected Party), be reduced by its set-off against any amount(s) (the "Other Agreement Amount") payable (whether at such time or in the future or upon the occurrence of a contingency) by the Payee to the Payer (irrespective of the currency, place of payment or booking office of the obligation) under any other agreement(s) between the Payee and the Payer or instrument(s) or undertaking(s) issued or executed by one party to, or in favor of, the other party (and the Other Agreement Amount will be discharged promptly and in all respects to the extent it is so set-off). X will give notice to the other party of any set-off affected under this Section 6(f).

For this purpose, either the Early Termination Amount or the Other Agreement Amount (or the relevant portion of such amounts) may be converted by X into the currency in which the other is denominated at the rate of exchange at which such party would be able, acting in a reasonable manner and in good faith, to purchase the relevant amount of such currency.

If an obligation is unascertained, X may in good faith estimate that obligation and set-off in respect of the estimate, subject to the relevant party accounting to the other when the obligation is ascertained.

Nothing in this Section 6(f) shall be effective to create a charge or other security interest. This Section 6(f) shall be without prejudice and in addition to any right of set-off, combination of accounts, lien or other right to which any party is at any time otherwise entitled (whether by operation of law, contract or otherwise)."

(o) "***Termination Currency***" means United States Dollars.

(p) ***Amendments.*** The parties agree to the following changes to this Agreement

(i) ***Credit Event Upon Merger.*** If "Credit Event Upon Merger" is specified in the Schedule as applying to the party, such party ("X"), any Credit Support Provider of X or any applicable Specified Entity of X consolidates or amalgamates with, or merges with or into, or transfers all or substantially all its assets to, another entity (or, without limiting the foregoing, if X is Party A, an entity such as an organization, board, commission, authority, agency or body succeeds to the principal functions of, or powers and duties granted to, X, any Credit Support Provider of X or any Specified Entity of X) and such action does not constitute an event described in Section 5(a)(viii) but the creditworthiness of the resulting, surviving, transferee or successor entity is materially weaker than that of X, such Credit Support Provider or such Specified Entity, as the case may be, immediately prior to such action (and, in such event, X or its successor or transferee, as appropriate, will be the Affected Party); or".

(ii) ***No Immunity.*** Each party represents that it is not entitled to claim immunity on the grounds of sovereignty or other similar grounds with respect to itself or its revenues or assets (irrespective of their use or intended use) from (i) suit, (ii) jurisdiction of any court, (iii) relief by way of injunction, order for specific performance or for recovery of property, (iv) attachment of its assets (whether before or after judgment) or (v) execution or enforcement of any judgment to which it or its revenues or assets might otherwise be made subject to any Proceedings (as defined in Section 13(b)) in the courts of any jurisdiction and no such immunity (whether or not claimed) may be attributed to such party or its revenues or assets."

(iii) ***Notice of Incipient Illegality***. If an Incipient Illegality occurs, Party A will, promptly upon becoming aware of it, notify Party B, specifying the nature of that Incipient Illegality and will also give such other information about that Incipient Illegality as the other party may reasonably require."

(iv) ***Incipient Illegality***" means (a) the enactment by any legislative body with competent jurisdiction over Party A of legislation which, if adopted as law, would render unlawful (i) the performance by Party A of any absolute or contingent obligation to make a payment or delivery or to receive a payment or delivery in respect of a Transaction or the compliance by Party A with any other material provision of this Agreement relating to such Transaction or (ii) the performance by Party A or a Credit Support Provider of Party A, if any, of any contingent or other obligation which Party A (or such Credit Support Provider) has under any Credit Support Document relating to such Transaction, (b) any assertion in any proceeding, forum or action by Party A, in respect of Party A or in respect of any entity located or organized under the laws of the state in which Party A is located to the effect that performance under this Agreement or similar agreements is unlawful or (c) the occurrence with respect to Party A or any Credit Support Provider of Party A of any event that constitutes an Illegality."

Part 2. Tax Representations.

(a) ***Payer Representations***. For the purpose of Section 3(e) of this Agreement, Party A and Party B each make the following representation:

It is not required by any applicable law, as modified by the practice of any relevant governmental revenue authority, of any Relevant Jurisdiction to make any deduction or withholding for or on account of any Tax from any payment (other than interest under Section 2(e), 6(d)(ii) or 6(e) of this Agreement) to be made by it to the other party under this Agreement. In making this representation, it may rely on (i) the accuracy of any representations made by the other party pursuant to Section 3(f) of this Agreement, (ii) the satisfaction of the agreement contained in Section 4(a)(i) or 4(a)(iii) of this Agreement and the accuracy and effectiveness of any document provided by the other party pursuant to Section 4(a)(i) or 4(a)(iii) of this Agreement and (iii) the satisfaction of the agreement of the other party contained in Section 4(d) of this Agreement, provided that it shall not be a breach of this representation where reliance is placed on clause (ii) and the other party does not deliver a form or document under Section 4(a)(iii) by reason of material prejudice to its legal or commercial position.

(b) ***Payee Representations.*** For the purpose of Section 3(f) of this Agreement, Party A and Party B make the representations specified below, if any:

Party A: Party A is a municipal corporation organized under the laws of the State of California and is a resident of the United States of America and its U.S. taxpayer identification number is 94-6000409.

Party B: Party B is a limited liability company organized under the laws of the State of Delaware and is a resident of the United States of America and its U.S. taxpayer identification number is 65-0851428. It is a disregarded entity for federal income tax purposes. The entity that is treated as the owner of NextEra Energy Marketing, LLC's assets for federal income tax purposes is a United States person within the meaning of Section 7701(a)(30) of the Internal Revenue Code of 1986, as amended.

Part 3. Agreement to Deliver Documents.

For the purpose of Sections 4(a)(i) and (ii) of this Agreement, each party agrees to deliver the following documents, as applicable:

Documents to be delivered are:

Party required to deliver document	**Form/Document/ Certificate**	**Date by which to be delivered**	**Covered by Section 3(d) Representation**
Party A and Party B	A secretary's certificate certifying that the party is authorized to execute and deliver this Agreement and any Confirmation hereunder and to perform its obligations under this Agreement.	On the signing of this Agreement.	Yes
Party A and Party B	The most recent copy of the Annual Report and audited, and publicly available, consolidated financial statements for such Party, and in the case of Party B the financial statements for NextEra Energy, Inc., which contain the financials for the Credit Support Provider, NextEra Energy Capital Holdings, certified by independent public accountants and prepared in accordance with generally accepted accounting principles.	As soon as practicable after request.	Yes
Party A and Party B	A duly executed copy of the Credit Support Annex referred to in Part 4 of this Schedule	At execution of this Master Agreement	Yes
Party A and Party B	A duly executed copy of the Guaranty, if any, to be provided by a Credit Support Provider, if one is designated.	At execution of this Master Agreement	Yes
Party A and Party B	Such other documents as the other Party may reasonably request.	Upon request.	No

Part 4. Miscellaneous.

(a) ***Additional Definitions.*** This Agreement and each Transaction are subject to the 2006 ISDA Definitions as modified and updated (the "2006 Definitions"), and the 2005 ISDA Commodity Derivatives Definitions as modified, supplemented, replaced or amended from time to time (the "2005 Definitions"), "", each as amended, supplemented, updated, and restated from time to time, each as published by the International Swaps and Derivatives Association, Inc. ("ISDA")(collectively, the "Definitions"), and will be governed in all respects by the Definitions. For purposes of the Agreement, all references in the Definitions to "Swap Transactions" shall be deemed references to "Transactions". The Definitions are incorporated by reference in, and made part of, this Agreement and each relevant Confirmation as if set forth in full in this Agreement and such Confirmation.

(b) ***Inconsistency***. Section 1 (b) (***"Inconsistency"***) is modified to provide that in the event of any inconsistency between the 2006 Definitions and the 2005 Definitions, the 2005 Definitions will govern. In the event of any inconsistency between the provisions of this Agreement and the Definitions, this Agreement will prevail. In the event of any inconsistency between the provisions of any Confirmation and this Agreement or the Definitions, such Confirmation will prevail for the purpose of the relevant Transaction.

(c) ***Single Agreement.*** The phrase "(evidencing Transactions heretofore or hereafter entered into between Party A and Party B)" is hereby added after the word "Confirmations" in Section 1(c).

(d) ***Obligations***. Section 2 shall be amended as follows:

(i) Section 2(a)(iii) of this Agreement is hereby amended to read in its entirety as follows: -

"(iii) Each obligation of each party under Section 2(a)(i) is subject to (1) the condition precedent that no Event of Default, Potential Event of Default or Incipient Illegality with respect to the other party has occurred and is continuing, (2) the condition precedent that no Early Termination Date in respect of the relevant Transaction has occurred or been effectively designated and (3) each other applicable condition precedent specified in this Agreement

(e) ***Change of Account.*** Section 2(b) of the Agreement is hereby amended by adding the following provision at the end thereof: "provided that, such new account shall be in the same legal and tax jurisdiction as the account prior to any such change."

(f) ***Netting of Payments.*** Sub-paragraph (ii) of Section 2(c) of this Agreement will not apply and therefore the netting specified in Section 2(c) of this Agreement will apply across all Transactions with effect from the effective date of this Agreement. For avoidance of doubt, the parties hereby acknowledge and agree that the provisions of Section 2(c) shall not apply to any transaction or agreement not covered by this Agreement. The Calculation Agent shall notify the parties of the amounts of such netted payments (which notice may be made by telephone). Notwithstanding the foregoing and the netting of payments pursuant hereto, each party will provide the other party with separate invoices and documentation covering each Transaction sufficient to permit the other party to comply with its internal accounting and record keeping procedures concerning individual Transactions.

(g) ***Calculation Agent.*** The Calculation Agent is Party B unless otherwise specified in a Confirmation in relation to the relevant Transaction; provided, however, if Party B is the Defaulting Party, the Calculation Agent shall be Party A (or any designated third party mutually agreed to by the parties) until such time as Party B is no longer a Defaulting Party. All calculations made by the Calculation Agent may be independently confirmed by the other Party at its sole discretion. In the event that the Parties' initial calculations are inconsistent and the amount owed disputed, the undisputed amount will be used to determine payment obligations and, if then due, paid by the relevant party. The parties shall endeavor to resolve any such dispute in good faith. If the parties are unable to resolve such dispute within a commercially reasonable time, the parties shall mutually select a dealer in the applicable commodity to act as Calculation Agent with respect to the issue in dispute.

(h) ***Representations***. The introductory clause of Section 3 is amended by replacing the words "Section 3 (f)" with the words "Sections 3(a), 3(f), and 3(h)."

(i) ***Additional Representations.*** Section 3 is amended by adding the following paragraphs 3 (g), (h), (i), (j), (k) and (l):

"(g) **Line of Business.** It has entered into this Agreement (including each Transaction evidenced hereby) in conjunction with its line of business (including financial intermediation services) or the financing of its business.

(h) **Eligible Contract Participant.** It is an "eligible contract participant" as defined in the U.S. Commodity Exchange Act, and with respect to Party A it constitutes a "Utility Special Entity" as that term is defined in 17 C.F.R. 1.3(ggg)(4)(i)(B)(2).

(i) **Standardization, Creditworthiness, and Transferability.** The economic terms of this Agreement, any Credit Support Document and each Transaction have been individually tailored and negotiated by each party. Each party has received and reviewed financial information concerning the other party and has had a reasonable opportunity to ask questions of and receive answers and information from the other party concerning such other party, this Agreement, such Credit Support Document, and such Transaction. The creditworthiness of the other party was a material consideration to each Party in entering into or determining the terms of this Agreement, such Credit Support Document and such Transaction. The transferability of this Agreement, such Credit Support Document, and such Transaction is restricted as provided herein and therein.

(j) **No Reliance.** In connection with the negotiation of, the entering into, and the confirming of the execution of this Agreement, any Credit Support Document to which it is a party, and each Transaction: (i) it is acting as principal (and not as agent or in any other capacity, fiduciary or otherwise); (ii) the other party is not acting as a fiduciary or financial or investment advisor for it: (iii) it is not relying upon any representations (whether written or oral) of the other party other than the representations expressly set forth in this Agreement and in such Credit Support Document; (iv) the other party has not given to it (directly or indirectly through any other person) any advice, counsel, assurance; guarantee, or representation whatsoever as to the expected or projected success, profitability, return, performance, result, effect, consequence, or benefit (either legal, regulatory, tax, financial, accounting, or otherwise) of this Agreement, such Credit Support Document, or such Transaction; (v) it has consulted with its own legal, regulatory, tax, business, investment, financial, and accounting advisors to the extent it has deemed necessary, and it has made its own investment, hedging, and trading decisions based upon its own judgment and upon any advice from such advisors as it has deemed necessary, and not upon any view expressed by the other party; (vi) all trading decisions have been the result of arm's length negotiations between the parties; and (vii) it is entering into this Agreement, such Credit Support Document, and such Transaction with a full understanding of all of the risks hereof and thereof (economic and otherwise)1 and it is capable of assuming and willing to assume (financially and otherwise) those risks.

(k) ***Commercial User.*** Solely with respect to Options, it is a producer, processor, or commercial user of, or a merchant handling, the commodity which is the subject of the Transaction, or the products or byproducts thereof, and it is entering into such Transaction solely for purposes related to its business as such.

(l) Without limiting the applicability of any other provision of the U.S. Bankruptcy Code as amended (the "Bankruptcy Code") (including without limitation Sections 362, 546, 556, and 560 thereof and the applicable definitions in Section 101 thereof), the parties acknowledge and agree that all Transactions entered into hereunder will constitute "forward contracts" or "swap agreements" as defined in Section 101 of the Bankruptcy Code, that the rights of the parties under Section 6 of this Agreement will constitute contractual rights to liquidate Transactions, that any margin or collateral provided under any margin, collateral, security, or similar agreement related hereto will constitute a "margin payment" as defined in Section 101 of the Bankruptcy Code, and that the parties are entitled to the rights under, and protections afforded by, Sections 362, 546, 556, and 560 of the Bankruptcy Code.

Each party further agrees that, for purposes of this Agreement, the other party is not a 'utility' as such term is used in 11 U.S.C. Section 366, and each party waives and agrees not to assert the applicability of the provisions of 11 U.S.C. Section 366 in any bankruptcy proceeding wherein such party is a debtor. In any such proceeding, each party further waives the right to assert that the other party is a provider of last resort to the extent such term relates to 11 U.S.C. Section 366 or another provision of 11 U.S.C. Section 101-1532."

(j) ***Section 3*** of this Agreement is hereby amended to add the following:

(i) **"Governmental Entity or Public Power System"** means a municipality, county, governmental board, public power authority, public utility district, joint action agency, or other similar political subdivision or public entity of the United States, one or more States or territories or any combination thereof.

(ii) **No Immunity Claim.** Governmental Entity or Public Power System warrants and covenants that with respect to its contractual obligations hereunder and performance thereof, it will not claim immunity on the grounds of sovereignty or similar grounds with respect to itself or its revenues or assets from (a) suit, (b) jurisdiction of court (including a court located outside the jurisdiction of its organization), (c) relief by way of injunction, order for specific performance or recovery of property, (d) attachment of assets, or (e) execution or enforcement of any judgment.

(iii) **Governmental Entity or Public Power System Security.** With respect to each Transaction, Governmental Entity or Public Power System shall either (i) have created and set aside a Special Fund or (ii) upon execution of this Agreement and prior to the commencement of each subsequent fiscal year of Governmental Entity or Public Power System during any Delivery Period, have obtained all necessary budgetary approvals and certifications for payment of all of its obligations under this Agreement for such fiscal year; any breach of this provision shall be deemed to have arisen during a fiscal period of Governmental Entity or Public Power System for which budgetary approval or certification of its obligations under this Agreement is in effect and, notwithstanding anything to the contrary in Article Four, an Early Termination Date shall automatically and without further notice occur hereunder as of such date wherein Governmental Entity or Public Power System shall be treated as the Defaulting Party. Governmental Entity or Public Power System shall have allocated to the Special Fund or its general funds a revenue base that is adequate to cover Public Power System's payment obligations hereunder throughout the entire Delivery Period.

(iv) ***Confidentiality.*** Each Party agrees that this Agreement and all other documents relating to this Agreement and any information provided to it or its Credit Support Provider, if any, in connection therewith will be used only for purposes related to its relationship with the other party and will be kept confidential, subject to the following exceptions:

(i) as to affiliates, directors, employees, regulators, counsel, auditors, agents or other advisors of a party to whom it is necessary to show the information for purposes related to its relationship with the other party, each of whom will be required to keep the information that is disclosed in confidence;

(ii) in any statement or testimony pursuant to a subpoena, summons or order by any court, government body, agency or regulatory authority, or otherwise required by law, order, regulation, ruling or in connection with applicable litigation, provided that the disclosing party notifies, to the extent permissible, the other party of such requirement prior to disclosure and that the disclosing party requests confidential treatment of such confidential information;

(iii) upon the request or demand of any regulatory authority;

(iv) as to potential or actual assignees, participants and/or other transfers of an interest in extensions of credit related to any contemplated transaction, but only in connection with assignments or transfers permitted under the terms of Section 7 of this Agreement (such entities will be subject to the same confidentiality provisions as those of the parties hereto);

(v) as to information about one of the parties that (a) is or becomes generally available to the public other than as a result of a disclosure by the other party or its representatives; (b) becomes available to the other party on a non-confidential basis from a source other than that party or one of its agents or (c) was known to the other party on a non-confidential basis or independently developed by the other party prior to its disclosure to the other party by that party or one of its agents;

(vi) to a rating agency in connection with such party's credit rating,

(vii) as required of Party A, as a governmental entity, information to be maintained as a matter of public record;

(viii) Notwithstanding any other provision of this agreement, upon receipt of a public records or information request pursuant to the California Public Records Act, or any similar act, Party A may, at its sole discretion, disclose confidential information, which does not fall within a statutory exemption (e.g., trade secret information) from disclosure.

A party may disclose any one or more of the commercial terms of a Transaction (other than the name of the other party unless otherwise agreed to in writing by the parties) to any industry price source for the purpose of aggregating and reporting such information in the form of a published energy price index.

(k) ***Absence of Litigation.*** Section 3(c) of this Agreement is hereby amended by: (i) adding in the second line thereof after the word "governmental" the words "or regulatory" and (ii) adding the words "in any material respect" immediately prior to the end of the section, and (iii) adding after the words "any of its Affiliates" the words "or its Credit Support Provider, if applicable."

(l) ***Accuracy of Specified Information.*** Section 3(d) of this Agreement is hereby amended by adding in the third line thereof after the word "respect" and before the period the words "or, in the case of audited or unaudited financial statements, a presentation of the financial condition of the relevant party in accordance with generally accepted accounting principles, consistently applied."

(m) ***Credit Event Upon Merger.*** If "Credit Event Upon Merger" is specified in the Schedule as applying to the party, such party ("X"), any Credit Support Provider of X or any applicable Specified Entity of X consolidates or amalgamates with, or merges with or into, or transfers all or substantially all its assets to, another entity *(or, without limiting the foregoing, if X is Party A, an entity such as an organization, board, commission, authority, agency or body succeeds to the principal functions of, or powers and duties granted to, X, any Credit Support Provider of X or any Specified Entity of X)* and such action does not constitute an event described in Section 5(a)(viii) but the creditworthiness of the resulting, surviving, transferee *or successor* entity is materially weaker than that of X, such Credit Support Provider or such Specified Entity, as the case may be, immediately prior to such action (and, in such event, X or its successor or transferee, as appropriate, will be the Affected Party); or".

(n) ***Transfer.*** The consent referred to in Section 7 shall not (after consideration of any tax or other consequences to a party of consenting to such assignment) be unreasonably withheld.

(o) **Procedures for Entering into Transactions.**

(i) On or promptly following the date on which the parties reach agreement on the terms of a Transaction, as contemplated by the first sentence of Section 9(e)(ii), each Party will send the other a Confirmation. The receiving Party will promptly thereafter confirm the accuracy of (in the manner required by Section 9(e)(ii)), or request the correction of, such Confirmation. If any dispute shall arise as to whether an error exists in a Confirmation, the parties shall in good faith make reasonable efforts to resolve the dispute. If a Party fails to accept or dispute the Confirmation in the manner set forth above within three Local Business Days after it was effectively sent, the Confirmation shall be deemed to correctly reflect the parties' agreement on the terms of the Transaction referred to therein, absent manifest error. The requirement of this Section and elsewhere in this Agreement that the parties exchange Confirmations shall for all purposes be deemed satisfied by a Confirmation sent and an acknowledgement deemed given as provided herein."

(ii) The parties hereby amend Section 9(e)(ii) by adding the phrase "or by an exchange of e-mails" immediately after the phrase "electronic messaging system" in the fifth line.

(p) ***Consent to Recording.*** The parties agree to amend Section 9 by adding a new Section 9(h) as follows:

"(h) **Consent to Recording.** The parties agree that each may electronically record all telephone conversations between them regarding any Transaction and the terms thereof, with or without the use of a warning tone, and that any such recordings may be submitted in evidence to any court or in any Proceeding for the purpose of establishing the formation or existence of any Transaction and the terms thereof. Each party hereby consents to such recording and agrees to obtain any necessary consent to, and provide notice of such recording to, its personnel."

(q) ***Offices.*** The provisions of Section 10(a) will apply to this Agreement.

(r) ***Multibranch Party.*** For the purpose of Section 10(c) of this Agreement:

Party A is not a Multibranch Party.

Party B is not a Multibranch Party.

(s) ***Addresses for Notices.*** For the purpose of Section 12(a) of this Agreement:

Address for general notices or communications to **Party A**:

Address: City of Roseville
2090 Hilltop Circle
Roseville, CA 95747
Attention: Utility Director
Telephone No.: 916-774-5602
Facsimile No: 916-774-5583

Address for general notices or communications to **Party B**:

Address: NextEra Energy Marketing, LLC
700 Universe Blvd
Juno Beach, FL 33408

Attention: General Counsel
Facsimile No: 561-625-7504
Phone No.: 561-304-5839

(t) ***Governing Law.*** In regard to Section 13(a), the Parties agree that this Agreement will be governed by and construed in accordance with New York law (without reference to choice of law doctrine).

(u) **Jurisdiction.** Section 13(b) of this Agreement is hereby deleted in its entirety and replaced with the following:

"(b) **Jurisdiction.**

(i) With respect to any suit, action or proceedings relating to this Agreement ('Proceedings'), each party irrevocably:

(a) submits, to the fullest extent permitted by applicable law, to the non-exclusive jurisdiction of each of the courts of the State of New York, the United States District Court located in the Borough of Manhattan in New York City, the courts of the state in which the Government Entity or the other party's principal executive offices are located and the United States District Court with jurisdiction over the location of the Government Entity or the other party's principal executive offices; and

(b) waives, to the fullest extent permitted by applicable law, (1) any objection which it may have at any time to the laying of venue of any Proceedings brought in any such court, (2) any claim that such Proceedings have been brought in an inconvenient forum and (3) the right to object, with respect so such Proceedings, that such court does not have any jurisdiction over such party.

(ii) Nothing in this Agreement precludes either party from bringing Proceedings in any other jurisdiction nor will the bringing of Proceedings in any one or more jurisdictions preclude the bringing of Proceedings in any other jurisdiction."

(v) ***Process Agent.*** For the purpose of Section 13(c) of this Agreement, neither Party A nor Party B appoints a process agent.

(w) ***Waiver of Jury Trial.*** Section 13 of this Agreement is hereby amended by adding the following new Section 13 (e):

"(e) EACH PARTY WAIVES, TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, ANY RIGHT IT MAY HAVE TO A TRIAL BY JURY IN RESPECT OF ANY SUIT, ACTION OR PROCEEDING RELATING TO THIS AGREEMENT OR ANY CREDIT SUPPORT DOCUMENT. EACH PARTY (I) CERTIFIES THAT NO REPRESENTATIVE, AGENT OR ATTORNEY OF THE OTHER PARTY OR ANY CREDIT SUPPORT PROVIDER HAS REPRESENTED, EXPRESSLY OR OTHERWISE, THAT SUCH OTHER PARTY WOULD NOT, IN THE EVENT OF SUCH A SUIT, ACTION OR PROCEEDING, SEEK TO ENFORCE THE FOREGOING WAIVER AND (II) ACKNOWLEDGES THAT IT AND THE OTHER PARTY HAVE BEEN INDUCED TO ENTER INTO THIS AGREEMENT AND PROVIDE FOR ANY CREDIT SUPPORT DOCUMENT, AS APPLICABLE, BY, AMONG OTHER THINGS, THE MUTUAL WAIVERS AND CERTIFICATIONS IN THIS SECTION."

(x) ***Limitation of liability***. Section 13 of this Agreement is hereby amended by adding the following new Section 13(f):

"(f) WITH RESPECT TO CLAIMS UNDER THIS AGREEMENT, NO PARTY SHALL BE REQUIRED TO PAY OR BE LIABLE FOR EXEMPLARY, PUNITIVE, INCIDENTAL, CONSEQUENTIAL, OR INDIRECT DAMAGES (WHETHER OR NOT ARISING FROM ITS NEGLIGENCE) TO ANY OTHER PARTY EXCEPT TO THE EXTENT THAT THE PAYMENTS REQUIRED TO BE MADE PURSUANT TO THIS AGREEMENT ARE DEEMED TO BE SUCH DAMAGES. IF AND TO THE EXTENT ANY PAYMENT REQUIRED TO BE MADE PURSUANT TO THIS AGREEMENT IS DEEMED TO CONSTITUTE LIQUIDATED DAMAGES, THE PARTIES ACKNOWLEDGE AND AGREE THAT SUCH DAMAGES ARE DIFFICULT OR IMPOSSIBLE TO DETERMINE AND THAT SUCH PAYMENT IS INTENDED TO BE A REASONABLE APPROXIMATION OF THE AMOUNT OF SUCH DAMAGES AND NOT A PENALTY."

(y) ***Affiliate.*** "Affiliate" will have the meaning specified in Section 14 of this Agreement.

(z) ***Credit Support Document.*** With reference to Section 14 (Definitions), "Credit Support Document" means any credit support annex, and schedule thereto, any confirmation and any other document, which by its terms, secures, guarantees or otherwise supports a party's obligations under this Agreement.

(aa) ***Credit Support Providers.*** With reference to Section 14 (Definitions), "Credit Support Provider" means not applicable in relation to Party A, and NextEra Energy Capital Holdings, Inc. in relation to Party B.

(bb) ***Default Rate.*** With reference to Section 14 (Definitions), "Default Rate" shall be simple interest equal to the U.S. Prime Rate as quoted in the Money Rates section of The Wall Street Journal plus 2% per annum.

(cc) ***Reference Market-makers.*** The definition of "**Reference Market-makers**" in Section 14 is hereby amended by deleting clause (b) thereof.

Part 5. Provisions for Commodity Derivative Transactions.

(a) The *"**Market Disruption Events**"* specified in Section 7.4(d)(i) of the 1993 Commodity Derivatives Definitions shall apply, except as otherwise specifically provided in the Confirmation.

(b) *"**Additional Market Disruption Events**"* shall apply if so specified in the Confirmation.

(c) The following *"**Disruption Fallbacks**"* specified in Section 7.5 (c) of the 1993 Commodity Derivatives Definitions shall apply, in the following order, except as otherwise specifically provided in the Confirmation:

(i) *"**Fallback Reference Price**"*;

(ii) *"**Negotiated Fallback**"*;

(iii) *"Postponement"*; provided that the "Maximum Days of Disruption" shall be three (3);

(iv) *"Average Daily Price Disruption"*; and

(v) *"Calculation Agent Determination"*.

(d) Index Transactions. If the Contract Price for a Power Transaction or Gas Transaction is determined by reference to a third-party information source, then Sections 7.4(d) and 7.5(d) of the Commodity Definitions, as modified above, shall be applicable to such Power Transaction or Gas Transaction with the following clarifications to the referenced definitions:

(i) "Floating Price", and "Relevant Price" shall mean, in respect of a Power Transaction or Gas Transaction, the Contract Price specified in a Power Transaction or Gas Transaction confirmation that is based upon a Price Source.

(ii) "Price Source" means, in respect of a Power Transaction or Gas Transaction, the publication (or such other origin of reference, including an Exchange) containing (or reporting) the Specified Price (or prices from which the specified price is calculated) specified in the relevant Power Transaction or Gas Transaction.

Part 6. Concluding Provisions.

(a) ***Accounts.*** If a Confirmation does not state the account to which, or the currency in which, payments are to be made, they shall be made in United States Dollars to the following accounts:

Party A

Payment to:	U.S. Bank
For the Account of:	City of Roseville
Account No/CHIPS UID:	153499281092
Fed. ABA No.:	121122676

Party B

Payment to: Bank of America, N.A.
For the Account of: NextEra Energy Marketing, LLC
Account No.: 3751227650
Fed. ABA No.: 0260-0959-3

(b) ***Termination Based on Notice.*** If no Transactions (or any present or future payment obligations, contingent or otherwise, thereunder) are outstanding under this Agreement, either party may terminate this Agreement upon written notice to the other party.

(c) ***Severability.*** In the event any one or more of the provisions contained in this Agreement should be held invalid, illegal, or unenforceable in any respect, the validity, legality, and enforceability of the remaining provisions contained herein shall not in any way be affected or impaired thereby. The parties shall endeavor, in good faith negotiations, to replace the invalid, illegal, or unenforceable provisions with valid provisions the economic effect of which comes as close as possible to that of the invalid, illegal, or unenforceable provisions. The parties failing resolution in good faith negotiations shall, upon notice, submit to mediation. If at the conclusion of mediation the issue remains unresolved, either party may, upon thirty days prior written notice, terminate this Agreement.

Part 7
Physically Settled Power Transactions

Incorporation of ISDA Power Annex. The North American Power Annex to the ISDA Master Agreement published by ISDA on August 7, 2003 and attached hereto as Appendix A, as amended, supplemented, replaced or modified from time to time (the "ISDA Power Annex") is incorporated by reference in this Agreement and in the relevant Confirmations with respect to "Transactions," as defined by the Commodity Definitions, in physically settled power, except as otherwise specifically provided in the relevant

Confirmation. All terms used in this Part 7 that are not otherwise defined shall have the meanings given to them in the Power Annex. For the purposes of this Agreement, all physically settled Power Transactions shall be deemed to be Specified Transactions.

(a) Other **Modifications to the ISDA Power Annex**. The following modifications to the ISDA Power Annex are applicable:

(i) References to Part 6. The Power Annex is amended by replacing all references to "Part 6" or "Part 6 of the Schedule" with references to the "Power Annex" or "Power Annex to the Schedule", as applicable.

(ii) FERC Standard of Review; Certain Covenants and Waivers. Clause (h)(iii)(D) of the Power Annex is amended and restated in its entirety to read as follows:

"(D) The Parties agree that in the event that any portion of clause (h)(iii) is determined to be invalid, illegal or unenforceable for any reason, the provisions of clause (h)(iii)(A) shall be unaffected and unimpaired thereby, and shall remain in full force and effect, to the fullest extent permitted by applicable law."

(iii) Events of Default. Clause (i)(ii)(B) of the Power Annex is amended to delete the words "Section 5(a)(ii)(1)" and replace them with the words "Section 5(a)(ii)".

(iv) Definitions. Clause (i)(iv) of the Power Annex is amended as follows:

(a) The definition of "**Replacement Price**" in clause (i)(iv) is amended to (i) add the phrase "for delivery" immediately before the phrase "at the Delivery Point" in the second line and (ii) delete the phrase "at Buyer's option" from the fifth line and replace it with the following: "absent a purchase".

(b) The definition of "**Sales Price**" in clause (i)(iv) is amended to (i) delete the phrase "at the Delivery Point" form the second line, and (ii) delete the phrase "at Seller's option" from the fifth line and replace it with the following: "absent a sale".

(c) The following new definition is added to clause (i)(iv) of the ISDA Power Annex:

"**Claims**" means all third party claims or actions, threatened or filed and, whether groundless, false, fraudulent or otherwise, that directly or indirectly relate to the subject matter of an indemnity, and the resulting losses, damages, expenses, attorneys' fees and court costs, whether incurred by settlement or otherwise, and whether such claims or actions are threatened or filed prior to or after the termination of this Agreement.

Transmission, Scheduling and Imbalance Charges. Clause (b)(ii) of the ISDA Power Annex is hereby amended by adding the following text to the end of the Section: "Product deliveries shall be scheduled in accordance with the then-current applicable tariffs, protocols, operating procedures and scheduling practices for the relevant region."

(v) **Other Documentation.** The following provision is added as:

"Upon request, each Party shall deliver to the other Party documentation reasonably requested to evidence the authority and power of such Party and/or its Guarantor, as the case may be, to enter into this Agreement or any guaranty, as the case may be, which may include, without limitation, certified resolutions and a certification of the signature and authority of the individual(s) executing this Agreement or such guaranty, as the case may be and to the extent applicable and requested certificates, documents or other evidence sufficient to confirm the sales tax exempt status of such Party for each jurisdiction in which the purchase, sale and/or delivery of any physical commodity takes place under this Agreement, such that the other party will bear no obligation in relation to such purchase, sale and/or delivery for charging, collecting or remitting sales, use or other excise taxes to any local, municipal, state or federal taxing authority or agency."

(vi) **Schedule P**. The following shall be added at the end of Schedule P:
"If the Parties agree to a service level/product defined by reference to a different agreement, tariff, set of rules or protocols (herein, "agreement") (e.g., the PJM Operating Agreement, the ERCOT Protocols, the WSPP Agreement, the MAPP Restated Agreement) for a particular Transaction, then, unless the Parties expressly state and agree that all the terms and conditions of such other agreement will apply, such reference to a service level/product shall be as defined by such other agreement, including if applicable, the regional reliability requirements and guidelines as well as the specific excuses for performance, Force Majeure, Uncontrollable Forces, or other such excuses applicable to such other agreement, to the extent inconsistent with the terms of this Agreement, but all other terms and conditions of this Agreement remain applicable; provided, however, that with respect to Transactions subject to the WSPP Agreement, the methodology for calculating the payments for failure to deliver or receive shall be in accordance with Section 21.3 of the WSPP Agreement; provided, further that the "Accelerated Payment of Damages" addressed in this Agreement shall continue to apply."

"CAISO Energy" means with respect to a Transaction, a Product under which the Seller shall sell and the Buyer shall purchase a quantity of energy equal to the hourly quantity without Ancillary Services (as defined in the Tariff) that is or will be scheduled as a schedule coordinator to schedule coordinator transaction pursuant to the applicable tariff and protocol provisions of the California Independent System Operator ("CAISO") (as amended from time to time, the "Tariff") for which the only excuse for failure to deliver or receive is an "Uncontrollable Force" (as defined in the Tariff).

"West Firm", or "WSPP Schedule C" or "Schedule C" or "WSPPC-Firm" or any similar description means with respect to a Transaction, a Product that is or will be scheduled as firm energy consistent with the most recent rules adopted by the WECC for which the only excuses for failure to deliver or receive are if an interruption is (i) due to an Uncontrollable Force as provided in Section 10 of the WSPP Agreement; or (ii) where applicable, to meet Seller's public utility or statutory obligations to its customers; provided, however, this clause (ii) shall not be used to allow interruptions for reasons other than reliability of service to native load. Notwithstanding any other provision in this Agreement, if Seller exercises its right to interrupt to meet its public utility or statutory obligations pursuant to clause (ii) above, Seller shall be responsible for payment of damages for failure to deliver firm energy as provided in [Part 7(c) of this Agreement][the ISDA Power Annex].

"WECC" means the Western Electricity Coordinating Council.

"WSPP Agreement" means the WSPP Agreement as amended from time to time.

(b) **Elective Provisions**. Clause (j) of the Power Annex is amended and restated in its entirety to read as follows:

"(j) Elective Provisions.

1. (a)(ii) ✓ Applicability of the Power Annex to Outstanding Power Transactions. If not checked, not applicable.

2. (a)(iii) ✓ Applicability of Outstanding Credit Support held by a party in connection with Outstanding Power Transactions. If not checked, not applicable.

3. (c)(i) and (c)(ii) ✓ Accelerated Payment Damages. If not checked, not applicable.

4. (d)(ii) Timeliness of Payment
   _ Option A
   ✓Option B
   If neither is checked, Option B shall be deemed to apply.

5. (h)(i) Wholesale Power Tariffs

   N/A Party A Electric Tariff. Tariff/Date/Docket
   ✓ Party B Electric Tariff. FERC Market-Based Rate Tariff, Volume No. 1, 2.0.0 Dated: January 9, 2017 Docket Number: ER17-838-000 Tariff/Date/Docket

6. (h)(ii) ✓ Applicability of Severability provision. If not checked, not applicable.

7. (h)(iii) ✓ Applicability of FERC Standard of Review and Certain Covenants and Waivers. If not checked, not applicable."

Part 8
Physically Settled Gas Transactions

The **ISDA Gas Annex** attached hereto as Appendix B is hereby added and deemed to be part of, and incorporated into, the Master Agreement as a new Part 8 to the Master Agreement; provided, however, that the following elections set forth in "(l) Elective Provisions" below shall be applicable to such Part 7.

(l) Elective Provisions

1. **(a)(ii) – Outstanding Gas Transactions.** This Gas Annex shall apply to the following pre-existing Gas Transactions pursuant to clause (a)(ii):

√ Option A: All Gas Transactions outstanding between the parties as of the date this Gas Annex becomes effective.

___ Option B: The Gas Transactions listed in Schedule 1 to this Gas Annex.

___ Option C: None of the Gas Transactions between the parties that were executed prior to the date this Gas Annex becomes effective.

If none of the above options is selected, Option A shall apply.

2. **(a)(iii) – Outstanding Gas Credit Support**

√ Outstanding Gas Credit Support held by a party in connection with Outstanding Gas Transactions shall be deemed to have been delivered under and in connection with this Agreement pursuant to clause (a)(iii).

If not checked, not applicable.

3. **(b)(ii) – Performance Obligation** (remedy for breach of Firm obligation)

√ Option A: Cover Standard

___ Option B: Spot Price Standard

If neither option is selected, Option A shall apply.

4. (e) – Taxes

√ Option A: Buyer Pays At and After Delivery Point

___ Option B: Seller Pays Before and At Deliver Point

If neither option is selected, Option A shall apply.

5. (f)(ii) – Payment Date

√ Option A: the later of the 25th Day of Month following Month of delivery or 10 Days after receipt of the invoice by Buyer (provided that if the Payment Date is not a Local Business Day, payment is due on the next Local Business Day following that date).

____ Option B: the later of the ___ Day of Month following Month of delivery or 10 Days after receipt of the invoice by Buyer (provided that if the Payment Date is not a Local Business Day, payment is due on the next Local Business Day following that date).

____ Option C: Notwithstanding anything to the contrary in the Schedule, payments with respect to both Gas Transactions and Power Transactions (as defined separately in the Schedule) will be netted and payable on or before the later of the 20th Day of Month following Month of delivery or 10 Days after receipt of the invoice by Buyer (provided that if the Payment Date is not a Local Business Day, payment is due on the next Local Business Day following that date).

____ Option D: Notwithstanding anything to the contrary in the Schedule, payments with respect to both Gas Transactions and Power Transactions (as defined separately in the Schedule) will be netted and payable on or before the later of the 25th Day of Month following Month of delivery or 10 Days after receipt of the invoice by Buyer (provided that if the Payment Date is not a Local Business Day, payment is due on the next Local Business Day following that date).

If none of the above options is selected, Option A shall apply.

6. (k)(xxii) – Alternative to Spot Price Index. The parties have selected the following alternative index as the Spot Price Index: _____. If no index is specified, the Spot Price Index specified in clause (l)(xxi) applies.

(n) Other Provisions/Modifications to this Gas Annex.

(i) Amendments to Clause (b): Performance Obligation

(a) Clause (iii) is deleted in its entirety.

(ii) Amendments to Clause (f): Billing, Payment and Audit

(a) Section (f) is amended by adding the following new subsection at the end thereof:

"(vi) **Mobile-Sierra Standard.**

(1) To the extent, if any, that a Gas Transaction does not qualify as a "first sale" as defined by the Natural Gas Act and §§ 2 and 601 of the Natural Gas Policy Act, each party irrevocably waives its rights, including its rights under §§ 4-5 of the Natural Gas Act, unilaterally to seek or support a change in the rate(s), charges, classifications, terms or conditions of this Gas Annex, any Gas Transaction hereunder or any other agreements entered into in connection with this Agreement (collectively, the "Covered Agreements"). By this provision, each party expressly waives its right to seek or support: (i) an order from the U.S. Federal Energy Regulatory Commission ("FERC") finding that the market-based rate(s), charges, classifications, terms or conditions agreed to by the parties under the Covered Agreements are unjust and unreasonable; or (ii) any refund with respect thereto. Each party agrees not to make or support such a filing or request, and that these covenants and waivers shall be binding notwithstanding any regulatory or market changes that may occur hereafter. Absent the agreement of all parties to the proposed change, the standard of review for changes to any section of the Covered Agreements proposed by a party (to the extent that any waiver as set forth in this Section (f)(vii) is unenforceable or ineffective as to such party), a non-party or FERC acting sua sponte, shall be the "public interest" standard of review set forth in United Gas

Pipe Line Co. v. Mobile Gas Service Corp., 350 U.S. 332 (1956) and Federal Power Commission v. Sierra Pacific Power Co., 350 U.S. 348 (1956) (the "Mobile-Sierra" doctrine).

(2) In addition, and notwithstanding the foregoing subsection (1), to the fullest extent permitted by applicable law, each party, for itself and its successors and assigns, hereby expressly and irrevocably waives any rights it can or may have, now or in the future, whether under Sections 4 and 5 of the Natural Gas Act or otherwise, to seek to obtain from FERC by any means, directly or indirectly (through complaint, investigation or otherwise), and each hereby covenants and agrees not at any time to seek to so obtain, an order from FERC changing any section of this Agreement specifying the rate, charge, classification, or other term or condition agreed to by the parties, it being the express intent of the parties that, to the fullest extent permitted by applicable law, neither party shall unilaterally seek to obtain from FERC any relief changing the rate, charge, classification, or other term or condition of this Agreement, notwithstanding any subsequent changes in applicable law or market conditions that may occur. In the event it were to be determined that applicable law precludes the parties from waiving their rights to seek changes from FERC to their gas sales contracts (including entering into covenants not to do so) then this subsection (b) shall not apply, provided that, consistent with the foregoing subsection (a), neither party shall seek any such changes except solely under the "public interest" application of the "just and reasonable" standard of review and otherwise as set forth in the foregoing section (1)."

(iii) Amendments to Clause (g): Title, Warranty and Indemnity

(a) Clause (g) of the Gas Annex is amended by adding the following new section (v) to the end thereof:

"(v) Importer of Record. The parties agree that the delivery of and the transfer of title to all Gas under this Agreement shall take place within the Customs Territory of the United States (as defined in general note 2 of the Harmonized Tariff Schedule of the United States 19 U.S.C. §1202, General Notes, page 3); provided, however, that in the event Seller took title to the Gas outside the Customs Territory of the United States, Seller represents and warrants that it is the importer of record for all Gas entered and delivered into the United States, and shall be responsible for entry and entry summary filings as well as the payment of duties, taxes and fees, if any, and all applicable record keeping requirements.

(iv) Amendments to Clause (h): Force Majeure

(a) Clause (h)(ii) of the Gas Annex is amended by inserting the following before the word "sabotage" on the seventh line: "terrorism,".

(b) Clause (vi) is deleted in its entirety.

(v) Amendments to Clause (j): Certain Amendments to this Agreement for Gas Transactions

(a) Clause (j) is amended by adding the following at the end thereof:

(iv) *Section 6(c)(i)*. Section 6(c)(i) of this Agreement is hereby amended by adding the following phrase at the end:

"(it being understood, that to the extent in the reasonable opinion of the Non-defaulting Party or the Non-Affected Party, as the case may be, any of the Terminated Transactions that are Gas Transactions may not be liquidated and terminated under applicable law on the Early Termination Date, then such Terminated Transactions shall be liquidated and terminated as soon as thereafter as is reasonably practicable)".

"Imaged Agreement. Any original executed Agreement, Confirmation or other related document may be photocopied and stored on computer tapes and disks (the "Imaged Agreement"). The Imaged Agreement, if introduced as evidence on paper, the Confirmation, if introduced as evidence in automated facsimile form, the Recording, if introduced as evidence in its original form and as transcribed onto paper, and all computer records of the foregoing, if introduced as evidence in printed format, in any judicial, arbitration, mediation or administrative proceedings, will be admissible as between the Parties to the same extent and under the same conditions as other business records originated and maintained in documentary form. Neither party shall object to the admissibility of the Recording, the

Confirmation or the Imaged Agreement (or photocopies of the transcription of the Recording, the Confirmation or the Imaged Agreement) on the basis that such were not originated or maintained in documentary form under either the hearsay rule, the best evidence rule or other rule of evidence."

Other Documentation. The following provision is added as:

"Upon request, each Party shall deliver to the other Party documentation reasonably requested to evidence the authority and power of such Party and/or its Guarantor, as the case may be, to enter into this Agreement or any guaranty, as the case may be, which may include, without limitation, certified resolutions and a certification of the signature and authority of the individual(s) executing this Agreement or such guaranty, as the case may be and to the extent applicable and requested certificates, documents or other evidence sufficient to confirm the sales tax exempt status of such Party for each jurisdiction in which the purchase, sale and/or delivery of any physical commodity takes place under this Agreement, such that the other party will bear no obligation in relation to such purchase, sale and/or delivery for charging, collecting or remitting sales, use or other excise taxes to any local, municipal, state or federal taxing authority or agency."

IN WITNESS WHEREOF the parties have executed this document as set forth below with effect from the date specified on the first page of this document.

GUARANTY

THIS GUARANTY (this "Guaranty"), dated as of _____ __, 20__ (the "Effective Date"), is made by NEXTERA ENERGY CAPITAL HOLDINGS, INC. ("Guarantor"), in favor of City of Roseville ("Counterparty").

RECITALS:

A. WHEREAS, Counterparty and Guarantor's indirect, wholly-owned subsidiary NEXTERA ENERGY MARKETING, LLC ("Obligor") have entered into, or concurrently herewith are entering into, that certain ISDA Master Agreement dated as of January 29, 2019 (the "Underlying Agreement"); and

B. WHEREAS, Counterparty and Obligor may from time to time enter into one or more transactions pursuant and subject to the terms of the Underlying Agreement (the "Transactions"), which Transactions would be evidenced by one or more confirmations entered into by Obligor and Counterparty in accordance with the Underlying Agreement (which documentation shall, together with the Underlying Agreement, collectively be referred to hereinafter as the "Agreement"); and

C. WHEREAS, Guarantor will directly or indirectly benefit from the Transactions to be entered into between Obligor and Counterparty pursuant to the Agreement.

NOW THEREFORE, in consideration of the foregoing premises and as an inducement for Counterparty's execution, delivery and performance of the Agreement, and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Guarantor hereby agrees for the benefit of Counterparty as follows:

1. GUARANTY. Subject to the terms and provisions hereof, Guarantor hereby absolutely and irrevocably guarantees the timely payment when due of all obligations owing by Obligor to Counterparty arising pursuant to the Agreement on or after the Effective Date (the "Obligations"). This Guaranty shall constitute a guarantee of payment and not of collection. The liability of Guarantor under this Guaranty shall be subject to the following limitations:

(a) Notwithstanding anything herein or in the Agreement to the contrary, the maximum aggregate obligation and liability of Guarantor under this Guaranty, and the maximum recovery from Guarantor under this Guaranty, shall in no event exceed _____ U.S. Dollars (U.S. $_____) (the "Maximum Recovery Amount").

(b) The obligation and liability of Guarantor under this Guaranty is specifically limited to payments expressly required to be made under the Agreement, as well as costs of collection and enforcement of this Guaranty (including attorney's fees) to the extent reasonably and actually incurred by the Counterparty (subject in all instances, to the limitations imposed by the Maximum Recovery Amount as specified in Section 1(a) above). In no event, however, shall Guarantor be liable for or obligated to pay any consequential, indirect, incidental, lost profit, special, exemplary, punitive, equitable or tort damages.

2. DEMANDS AND PAYMENT.

(a) If Obligor fails to pay any Obligation to Counterparty when such Obligation is due and owing under the Agreement (an "Overdue Obligation"), Counterparty may present a written demand to Guarantor calling for Guarantor's payment of such Overdue Obligation pursuant to this Guaranty (a "Payment Demand").

(b) Guarantor's obligation hereunder to pay any particular Overdue Obligation(s) to Counterparty is conditioned upon Guarantor's receipt of a Payment Demand from Counterparty satisfying the following requirements: (i) such Payment Demand must identify the specific Overdue Obligation(s) covered by such demand, the specific date(s) upon which such Overdue Obligation(s) became due and owing under the Agreement, and the specific provision(s) of the Agreement pursuant to which such Overdue Obligation(s) became due and owing; (ii) such Payment Demand must be delivered to Guarantor in accordance with Section 9 below; and (iii) the specific Overdue Obligation(s) addressed by such Payment Demand must remain due and unpaid at the time of such delivery to Guarantor.

(c) After issuing a Payment Demand in accordance with the requirements specified in Section 2(b) above, Counterparty shall not be required to issue any further notices or make any further demands with respect to the Overdue Obligation(s) specified in that Payment Demand, and Guarantor shall be required to make payment with respect to the Overdue Obligation(s) specified in that Payment Demand within five (5) Business Days after Guarantor receives such demand. As used herein, the term "Business Day" shall mean all weekdays (i.e., Monday through Friday) other than any weekdays during which commercial banks or financial institutions are authorized to be closed to the public in the State of Florida or the State of New York.

3. REPRESENTATIONS AND WARRANTIES. Guarantor represents and warrants that:

(a) it is a corporation duly organized and validly existing under the laws of the State of Florida and has the corporate power and authority to execute, deliver and carry out the terms and provisions of the Guaranty;

(b) no authorization, approval, consent or order of, or registration or filing with, any court or other governmental body having jurisdiction over Guarantor is required on the part of Guarantor for the execution and delivery of this Guaranty; and

(c) this Guaranty constitutes a valid and legally binding agreement of Guarantor, enforceable against Guarantor in accordance with the terms hereof, except as the enforceability thereof may be limited by the effect of any applicable bankruptcy, insolvency, reorganization, moratorium or similar laws affecting creditors' rights generally and by general principles of equity.

4. RESERVATION OF CERTAIN DEFENSES. Without limiting Guarantor's own defenses and rights hereunder, Guarantor reserves to itself all rights, setoffs, counterclaims and other defenses to which Obligor is or may be entitled arising from or out of the Agreement, except for defenses (if any) based upon the bankruptcy, insolvency, dissolution or liquidation of Obligor or any lack of power or authority of Obligor to enter into and/or perform the Agreement.

5. AMENDMENT OF GUARANTY. No term or provision of this Guaranty shall be amended, modified, altered, waived or supplemented except in a writing signed by Guarantor and Counterparty.

6. WAIVERS AND CONSENTS. Subject to and in accordance with the terms and provisions of this Guaranty:

(a) Except as required in Section 2 above, Guarantor hereby waives (i) notice of acceptance of this Guaranty; (ii) presentment and demand concerning the liabilities of Guarantor; and (iii) any right to require that any action or proceeding be brought against Obligor or any other person, or to require that Counterparty seek enforcement of any performance against Obligor or any other person, prior to any action against Guarantor under the terms hereof.

(b) No delay by Counterparty in the exercise of (or failure by Counterparty to exercise) any rights hereunder shall operate as a waiver of such rights, a waiver of any other rights or a release of Guarantor from its obligations hereunder (with the understanding, however, that the foregoing shall not be deemed to constitute a waiver by Guarantor of any rights or defenses which Guarantor may at any time have pursuant to or in connection with any applicable statutes of limitation).

(c) Without notice to or the consent of Guarantor, and without impairing or releasing Guarantor's obligations under this Guaranty, Counterparty may: (i) change the manner, place or terms for payment of all or any of the Obligations (including renewals, extensions or other alterations of the Obligations); (ii) release any person (other than Obligor or Guarantor) from liability for payment of all or any of the Obligations; or (iii) receive, substitute, surrender, exchange or release any collateral or other security for any or all of the Obligations.

7. REINSTATEMENT. Guarantor agrees that this Guaranty shall continue to be effective or shall be reinstated, as the case may be, if all or any part of any payment made hereunder is at any time avoided or rescinded or must otherwise be restored or repaid by Counterparty as a result of the bankruptcy or insolvency of Obligor, all as though such payments had not been made.

8. TERMINATION. Guarantor may terminate this Guaranty by providing a written termination notice to Counterparty specifying the date upon which such termination will take effect (provided that no such termination shall take effect prior to 5:00 p.m. (Eastern Prevailing Time) on the fifteenth (15th) Business Day after the termination notice has been delivered to Counterparty in accordance with Section 9 hereof). Upon the effectiveness of such termination, Guarantor shall have no further liability hereunder, except as may pertain pursuant to the last sentence of this paragraph. No such termination shall

affect Guarantor's liability with respect to any Obligations arising under any Transactions entered into prior to the time such termination is effective, which Obligations shall remain subject to this Guaranty.
Unless terminated earlier, this Guaranty and the Guarantor's obligations hereunder will terminate automatically and immediately at 11:59:59 p.m. Eastern Prevailing Time on [_____, 20__]; provided, however, that no such termination shall affect Guarantor's liability with respect to any Obligations arising under any Transactions entered into prior to the time the termination is effective, which Obligations shall remain subject to this Guaranty.

9. NOTICE. Any Payment Demand, notice, request, instruction, correspondence or other document to be given hereunder (herein collectively called "Notice") by Counterparty to Guarantor, or by Guarantor to Counterparty, as applicable, shall be in writing and may be delivered either by (i) U.S. certified mail with postage prepaid and return receipt requested, or (ii) recognized nationwide courier service with delivery receipt requested, in either case to be delivered to the following address (or to such other U.S. address as may be specified via Notice provided by Guarantor or Counterparty, as applicable, to the other in accordance with the requirements of this Section 9):

TO GUARANTOR: *	TO COUNTERPARTY:
NextEra Energy Capital Holdings, Inc. 700 Universe Blvd. Juno Beach, Florida 33408 Attn: Treasurer	City of Roseville 2090 Hilltop Circle Roseville, CA 95747 Attn: Settlements
[Tel: (561) 694-6204 -- for use in connection with courier deliveries]	*[Tel: (916) 774-5632 -- for use in connection with courier deliveries]*

* (NOTE: Copies of any Notices to Guarantor under this Guaranty shall also be sent via facsimile to ATTN: Contracts Group, Legal, Fax No. (561) 625-7504 and ATTN: Credit Department, Fax No. (561) 625-7642. However, such facsimile transmissions shall not be deemed effective for delivery purposes under this Guaranty.)

Any Notice given in accordance with this Section 9 will (i) if delivered during the recipient's normal business hours on any given Business Day, be deemed received by the designated recipient on such date, and (ii) if not delivered during the recipient's normal business hours on any given Business Day, be deemed received by the designated recipient at the start of the recipient's normal business hours on the next Business Day after such delivery.

10. MISCELLANEOUS.

(a) This Guaranty shall in all respects be governed by, and construed in accordance with, the law of the State of New York, without regard to principles of conflicts of laws thereunder (other than Sections 5-1401 and 5-1402 of the New York General Obligations Law).

(b) This Guaranty shall be binding upon Guarantor and its successors and permitted assigns and inure to the benefit of and be enforceable by Counterparty and its successors and permitted assigns. Guarantor may not assign this Guaranty in part or in whole without the prior written consent of Counterparty. Counterparty may not assign its rights or benefits under this Guaranty in part or in whole without the prior written consent of Guarantor.

(c) This Guaranty embodies the entire agreement and understanding between Guarantor and Counterparty and supersedes all prior agreements and understandings relating to the subject matter hereof.

(d) The headings in this Guaranty are for purposes of reference only, and shall not affect the meaning hereof. Words importing the singular number hereunder shall include the plural number and vice versa, and any pronouns used herein shall be deemed to cover all genders. The term "person" as used herein means any individual, corporation, partnership, joint venture, limited liability company, association, joint-stock company, trust, unincorporated association, or government (or any agency or political subdivision thereof).

(e) Wherever possible, any provision in this Guaranty which is prohibited or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective only to the extent of such prohibition or unenforceability without invalidating the remaining provisions hereof, and any such prohibition or unenforceability in any one jurisdiction shall not invalidate or render unenforceable such provision in any other jurisdiction.

(f) Counterparty (by its acceptance of this Guaranty) and Guarantor each hereby irrevocably: (i) consents and submits to the exclusive jurisdiction of the United States District Court for the Southern District of New York, or if that court does not have subject matter jurisdiction, to the exclusive jurisdiction of the Supreme Court of the State of New York, New York County (without prejudice to the right of any party to remove to the United States District Court for the Southern District of New York) for the purposes of any suit, action or other proceeding arising out of this Guaranty or the subject matter hereof or any of the transactions contemplated hereby brought by Counterparty, Guarantor or their respective successors or assigns; and (ii) waives (to the fullest extent permitted by applicable law) and agrees not to assert any claim that it is not personally subject to the jurisdiction of the above-named courts, that the suit, action or proceeding is brought in an inconvenient forum, that the venue of the suit, action or proceeding is improper or that this Guaranty or the subject matter hereof may not be enforced in or by such court.

(g) COUNTERPARTY (BY ITS ACCEPTANCE OF THIS GUARANTY) AND GUARANTOR EACH HEREBY IRREVOCABLY, INTENTIONALLY AND VOLUNTARILY WAIVES THE RIGHT TO TRIAL BY JURY WITH RESPECT TO ANY LEGAL PROCEEDING BASED ON, OR ARISING OUT OF, UNDER OR IN CONNECTION WITH, THIS GUARANTY OR THE AGREEMENT, OR ANY COURSE OF CONDUCT, COURSE OF DEALING, STATEMENTS (WHETHER VERBAL OR WRITTEN) OR ACTIONS OF ANY PERSON RELATING HERETO OR THERETO. THIS PROVISION IS A MATERIAL INDUCEMENT TO GUARANTOR'S EXECUTION AND DELIVERY OF THIS GUARANTY.

(h) Delivery of an executed signature page of this Guaranty, and any subsequent amendment(s), by facsimile transmission or other electronic transmission (e.g. "pdf" or "tif") shall be effective as delivery of a manually executed signature page hereof.

IN WITNESS WHEREOF, the Guarantor has executed this Guaranty on _____ __, 20__, but it is effective as of the Effective Date

NEXTERA ENERGY CAPITAL HOLDINGS, INC.

By:_____

International Swaps and Derivatives Association, Inc.

SCHEDULE
to the
CREDIT SUPPORT ANNEX

dated January 29, 2019
between

CITY OF ROSEVILLE
("Party A")
and
NEXTERA ENERGY MARKETING, LLC
("Party B")

Paragraph 13. Elections and Variables

(a) ***Security Interest for "Obligations".*** The term ***"Obligations"*** as used in this Annex includes the following additional obligations:

With respect to Party A: None

With respect to Party B: None

(b) ***Credit Support Obligations.***

(i) ***Delivery Amount, Return Amount and Credit Support Amount***:

(A) ***"Delivery Amount"*** has the meaning specified in Paragraph 3(a).

(B) ***"Return Amount"*** has the meaning specified in Paragraph 3(b).

(C) ***"Credit Support Amount"*** has the meaning specified in Paragraph 3.

(ii) ***Eligible Collateral.*** The following items will qualify as ***"Eligible Collateral"*** for the party specified:

		Party A	Party B	Valuation Percentage
(A)	Cash	[X]	[X]	100%
(B)	Other	[X]	[X]	See note below.

(iii) ***Other Eligible Support.*** The following item will qualify as ***"Other Eligible Support"*** for Party A and for Party B: a "Letter of Credit" (as defined in Paragraph 13 (j) (v) "Additional Definitions"). See Paragraph 13(j) for further provisions regarding letters of credit. The Valuation Percentage shall be 100% of the Value of the Other Eligible Support unless (i) a Letter of Credit Default shall apply with respect to such Letter of Credit, or (ii) twenty (20) or fewer Local Business Days remain prior to the expiration of such Letter of Credit, in either of which case the Valuation Percentage shall be zero (0).

(iv) The "***Independent Amount***" is zero with respect to both Party A and Party B.

Thresholds. *"Threshold"* means, with respect to Party A, the amount (the "Threshold Amount") set forth below under the heading "Party A Collateral Threshold" opposite the Credit Rating for Party A, and if the Credit Ratings of Party A shall not be equivalent, the lower Credit Rating shall govern; provided, however, that if (i) Party A has no Credit Ratings or (ii) an Event of Default or Specified Condition has occurred and is continuing with respect to Party A, Party A's Threshold shall be zero.

Party A Collateral Threshold	S&P Credit Rating	Moody's Credit Rating
$ 20,000,000	A- or higher	A3 or higher
$ 15,000,000	BBB+	Baa1
$ 10,000,000	BBB	Baa2
$ 2,500,000	BBB-	Baa3
$ 0	Below BBB-	Below Baa3

With respect to Party B, the lesser of (a) the amount (the "Threshold Amount") set forth below under the heading "Party B Collateral Threshold" opposite the Credit Rating for Party B's Credit Support Provider, and if the Credit Ratings of Party B's Credit Support Provider shall not be equivalent, the lower Credit Rating shall govern, or (b) the amount of the Guarantee; provided, however, that if (i) Party B's Credit Support Provider has no Credit Ratings or (ii) an Event of Default or Specified Condition has occurred and is continuing with respect to Party B, Party B's Threshold shall be zero.

Party B Collateral Threshold	S&P Credit Rating	Moody's Credit Rating
$ 20,000,000	A- or higher	A3 or higher
$ 15,000,000	BBB+	Baa1
$ 10,000,000	BBB	Baa2
$ 2,500,000	BBB-	Baa3
$ 0	Below BBB-	Below Baa3

(vi) "***Minimum Transfer Amount***". The Minimum Transfer Amount shall be $1.00 for both Party A and Party B.

(vii) ***Rounding***. The Delivery Amount and the Return Amount will be rounded up and down to the nearest integral multiple of $100,000, respectively.

(c) Valuation and Timing.

(i) "Valuation Agent" means, for purposes of Paragraphs 3 and 5, the party making the demand under Paragraph 3, and for the purposes of Paragraph 6(d), the Secured Party receiving or deemed to receive the Distributions or the Interest Amount, as applicable, provided, however, that in all cases, if an Event of Default, Potential Event of Default or a Specified Condition, has occurred and is continuing with respect to the party designated as the Valuation Agent, then in such case, and for so long as the Event of Default, Potential Event of Default or a Specified Condition continues, the other party will be the Valuation Agent.

(ii) "Valuation Date" means at the request of either party, any Local Business Day which, if treated as a Valuation Date, would result in a Delivery Amount or Return Amount.

(iii) "Valuation Time" means the close of business on the Local Business Day before the Valuation Date or date of calculation, as applicable, or any time on the Valuation Date or date of calculation, as applicable; provided that the calculations of Value and Exposure will be made as of approximately the same time on the same date.

(iv) "Notification Time" means:

(a) With respect to the Valuation Agent's calculations, the Notification Time will be 11:00 a.m., New York time, on a Local Business Day.

(b) With respect to the demands for the transfer of Eligible Credit Support or Equivalent Credit Support, the Notification Time will be 1:00 p.m. New York time, on a Local Business Day.

(iv) "Transfer Timing" shall be amended to read as follows:

"Subject to Paragraphs 4(a) and 5 and unless otherwise specified, if a demand for the Transfer of Eligible Credit Support or Posted Credit Support is made by the Notification Time, then the relevant Transfer will be made not later than (a) the close of business on the next Local Business Day for Cash and (b) the close of business on the second Local Business Day for Letters of Credit; if a demand is made after the Notification Time, then the relevant Transfer will be made not later than (a) the close of business on the second Local Business Day for Cash and (b) the close of business on the third Local Business Day for Letters of Credit. Notwithstanding the foregoing, the Pledgor will notify the Secured Party no later than the close of business on the Local Business Day in which Cash is due of the Pledgor's intent to transfer a Letter of Credit."

(d) ***Conditions Precedent and Secured Party's Rights and Remedies.*** The following Termination Event(s) will be a ***"Specified Condition"*** for the party specified (that party being the Affected Party if the Termination Event occurs with respect to that party):

	Party A	**Party B**
Illegality	[X]	[X]
Tax Event	[X]	[X]
Tax Event Upon Merger	[X]	[X]
Credit Event Upon Merger	[X]	[X]
Additional Termination Event(s):	[X]	[X]

(e) ***Substitution.***

(i) ***"Substitution Date"*** has the meaning specified in Paragraph 4(d)(ii).

(ii) ***Consent.*** The Pledgor need not obtain the Secured Party's consent for any substitution pursuant to Paragraph 4(d).

(f) ***Dispute Resolution.***

(i) ***"Resolution Time"*** means 5:00 p.m., New York time, on the second Local Business Day following the date on which the notice is given that gives rise to a dispute under Paragraph 5.

(ii) ***Value.*** For the purpose of Paragraphs 5(i)(C) and 5(ii), the Value of Posted Credit Support or of any Transfer of Eligible Credit Support or Posted Credit Support, as the case may be, will be calculated by the

Valuation Agent in accordance with standard market practice using third party sources (such as, by way of example only, Bloomberg or Reuters) where available.

(iii) ***Alternative.*** The provisions of Paragraph 5 will apply.

(g) ***Holding and Using Posted Collateral.***

(i) ***Eligibility to Hold Posted Collateral; Custodians.*** Party A and its Custodian will be entitled to hold Posted Collateral pursuant to Paragraph 6(b) *provided* that the following conditions applicable to it are satisfied:

(1) Party A is not a Defaulting Party;

(2) The Credit Rating of Party A or Party A's Credit Support Provider is at least BBB- (in the case of S&P) and Baa3 (in the case of Moody's).

(3) The Custodian is a Qualified Institution.

(4) Posted Collateral may be held only in the United States of America.

Initially, Party A has not selected a Custodian.

Party B and its Custodian will be entitled to hold Posted Collateral pursuant to Paragraph 6(b) *provided* that the following conditions applicable to it are satisfied:

(1) Party B is not a Defaulting Party;

(2) The Credit Rating of Party B or Party B's Credit Support Provider is at least BBB- (in the case of S&P) and Baa3 (in the case of Moody's).

(3) The Custodian is a Qualified Institution.

(4) Posted Collateral may be held only in the United States of America.

Initially, Party B has not selected a Custodian.

Notwithstanding the foregoing, each party hereby covenants and agrees that it will cause all Posted Collateral received from the other party to be entered in one or more accounts (each, a "Collateral Account") with a domestic office of a commercial bank or trust company (which is not an Affiliate of such party) organized under the laws of the United States (or any state or a political subdivision thereof) having a long term debt rating or deposit rating of at least (i) A3 from Moody's Investors Services, Inc. and (ii) A- from Standard and Poor's Corporation (a "Qualified Institution"), each of which accounts may include property of other parties but will bear a title indicating the Pledgor's interest in said account and the Posted Collateral in such account. In addition, the Secured Party may direct the Pledgor to transfer or deliver Eligible Collateral directly into the Secured Party's Collateral Account(s). The Secured Party may move the Collateral Accounts from one Qualified Institution to another upon reasonable notice to the Pledgor. The Secured Party shall cause statements concerning the Posted Collateral transferred or delivered by the Pledgor to be sent to the Pledgor on request, which may not be made more frequently than once in each calendar month.

(ii) ***Use of Posted Collateral.*** The provisions of Paragraph 6(c) will apply to the parties; provided, however, that if a party or its Custodian is not eligible to hold Posted Collateral pursuant to Paragraph 13(h)(i), then:

(A) the Secured Party will not be entitled to use the Posted Collateral as provided in Paragraph 6(c) for so long as either the Secured Party or its Custodian, if any, remain an Ineligible Party or an Ineligible Custodian, respectively; and

(B) the Ineligible Party shall be required to deliver (or cause the Ineligible Custodian to deliver, as applicable) not later than the close of business on the second Local Business Day following such Ineligibility Event all Posted Collateral in its possession or held on its behalf to a Qualified Institution, to a segregated, safekeeping or custody account ("Collateral Account") within such Qualified Institution with the title of the Collateral Account indicating that the property contained therein is being held as Posted Collateral for the ownership of the Pledgor, subject to the security interest of the Secured Party. The Qualified Institution shall serve as Custodian with respect to the Posted Collateral in the Collateral Account, and the Secured Party shall cause it to hold such Posted Collateral in accordance with the terms of this Annex. With respect to an Ineligible Custodian that is acting as Custodian for a Secured Party that is not itself an Ineligible Party, such Secured Party may cause such Ineligible Custodian to transfer all Posted Collateral held by such Ineligible Custodian to the Secured Party, to be held in accordance with the terms of this Annex.

(iii) For the purposes of Section 5(a)(iii) of this Agreement, failure by a party or its Custodian to comply with any of the obligations under this Paragraph 13(h) will constitute an Event of Default with respect to such party if the failure continues for two (2) Local Business Days after notice of failure is given to that party.

(h) ***Distributions and Interest Amount.***

(i) ***Interest Rate.*** The "Interest Rate" will be a per annum rate of interest equal to the Federal Funds Rate. "Federal Funds Rate" means, for any day, an interest rate per annum equal to either (A) the rate published as the Federal Funds Effective Rate that appears on the Telerate Page 118 for such day (or, if such day is not a Local Business Day, for the preceding Local Business Day) or (B) if such rate is not so published for any day which is a Local Business Day, the Federal Funds Rate as published by the Federal Reserve Bank in the H.15 Release.

(ii) ***Transfer of Interest Amount.*** The Transfer of the Interest Amount will be made on the third Local Business Day of each calendar month and on any Local Business Day that Posted Collateral in the form of Cash is transferred to the Pledgor pursuant to Paragraph 3(b).

(iii) ***Alternative to Interest Amount.*** The provisions of Paragraph 6(d)(ii) will apply.

(i) Additional Representation(s). In respect of Other Eligible Support consisting of a Letter of Credit, the Pledgor (a) represents and warrants that, on the date on which the Pledgor causes its issuance, such Letter of Credit will be the legal, valid and binding obligation of the issuer thereof, enforceable in accordance with its terms and (b) covenants and agrees to cause such Letter of Credit to be issued and maintained in accordance with the terms and provisions of Paragraph 13(l) below.

(j) Other Eligible Support and Other Posted Support.

(i) "Value" with respect to Other Eligible Support and Other Posted Support means the amount of any Letter of Credit, which has not been drawn, maintained by the Pledgor (or its Credit Support Provider) for the benefit of the Secured Party.

(ii) "Transfer" with respect to Other Eligible Support and Other Posted Support means:

(1) For purposes of Paragraph 3(a), delivery of the Letter of Credit by the Pledgor or issuer of the Letter of Credit to the Secured Party at the address of the Secured Party specified in the Notices Section of this Agreement, or delivery of an executed amendment to such Letter of Credit (extending the term or increasing the amount available to the Secured Party thereunder) by the Pledgor or the issuer of the Letter of Credit to the Secured Party at the address of the Secured Party specified in the Notices Section of this Agreement; and

(2) For purposes of Paragraph 3(b), by the return of an outstanding Letter of Credit by the Secured Party to the Pledgor, at the address of the Pledgor specified in the Notices Section of this Agreement, or delivery of an executed amendment to the Letter of Credit in form and substance satisfactory to the Secured Party, (reducing the amount available to the Secured Party thereunder) by the Pledgor or the issuer of the Letter of Credit to the Secured Party at the Secured Party's address specified in the Notices Section of this Agreement. If a Transfer is to be effected by a reduction in the amount of an outstanding Letter of Credit previously issued for the benefit of the Secured Party, the Secured Party shall not unreasonably withhold its consent to a commensurate reduction in the amount of such Letter of Credit and shall take such action as is reasonably necessary to effectuate such reduction.

(3) Letters of Credit. Posted Credit Support provided by one party ("X") for the benefit of the other ("Y") in the form of a Letter of Credit shall be subject to the following provisions.

(i) Any Letter of Credit shall be delivered to Y to such address as Y shall specify and shall be maintained for the benefit of Y or its designee. X or the issuer of the Letter of Credit shall (a) renew or cause the renewal of each outstanding Letter of Credit on a timely basis as provided in the relevant Letter of Credit, (b) if the bank that issued an outstanding Letter of Credit has indicated its intent not to renew such Letter of Credit, provide either a substitute Letter of Credit or other Eligible Credit Support, in each case at least twenty (20) Local Business Days prior to the expiration of the outstanding Letter of Credit, and (c) if a bank issuing a Letter of Credit shall fail to honor Y's properly documented request to draw on an outstanding Letter of Credit, provide for the benefit of Y either a substitute Letter of Credit that is issued by a bank acceptable to Y or other Eligible Credit Support, in each case within two (2) Local Business Days after such refusal.

(ii) Upon the occurrence of a Letter of Credit Default, X agrees to deliver to Y either a substitute Letter of Credit or other Eligible Credit Support, in each case on or before the second Local Business Day after the occurrence thereof (or on or before the fifth Local Business Day after the occurrence thereof if only clause (a) under the definition of Letter of Credit Default applies).

(iii) As one method of providing additional Posted Credit Support, X may increase the amount of an outstanding Letter of Credit or establish one or more Letters of Credit.

(iv) (a) A Letter of Credit shall provide that Y may draw upon the Letter of Credit in an amount that is equal to all amounts that are due and owing from X but have not been paid to Y within the time allowed for such payments under this Agreement. A Letter of Credit shall provide that a drawing may be made on the Letter of Credit upon submission to the bank issuing the Letter of Credit of one or more certificates of Y in accordance with the specific requirements of the Letter of Credit.

(b) Upon or at any time after the occurrence of an Event of Default with respect to X, Y may draw on the entire, undrawn portion of any outstanding Letter of Credit upon submission to the bank issuing such Letter of Credit of one or more certificates in accordance with the specific requirements of the Letter of Credit. Cash proceeds received from drawing upon the Letter of Credit shall be deemed Posted Collateral and shall either be (y) applied against all amounts that are due and owing from X but have not been paid to Y within the time allowed for such payments under this Agreement or (z) maintained in accordance with this Annex.

Notwithstanding Y's receipt of Cash under the Letter of Credit, X shall remain liable to Y for any failure to Transfer sufficient Eligible Credit Support to Y in accordance with the terms of this Annex. In addition, X shall remain liable for any amounts owing to Y and remaining unpaid after the application of the amounts so drawn by Y.

(v) Upon or at any time after the occurrence or deemed occurrence of an Early Termination Date as a result of a Termination Event and the failure of X to make all payments due and owing to Y in accordance with the terms of this Agreement, Y may draw on any outstanding Letter of Credit in an amount equal to such amounts owing to it. X shall remain liable for any amounts owing to Y and remaining unpaid after the application of the amounts so drawn by Y.

(iii) *"Certain Rights and Remedies"*.

(1) *Secured Party's Rights and Remedies*. For purposes of paragraph 8(a)(ii), the Secured Party may draw on any outstanding Letter of Credit (Other Posted Support) in an amount equal to any payments payable by the Pledgor with respect to any Obligations.

(2) *Pledgor's Rights and Remedies*. For purposes of Paragraph 8(b)(ii), (i) the Secured Party will be obligated immediately to Transfer any Letter of Credit (Other Posted Support) to the Pledgor and (ii) the Pledgor may do any one or more of the following: (x) to the extent that the Letter of Credit (Other Posted Support) is not Transferred to the Pledgor as required pursuant to (i) above, Set-off any amounts payable by the Pledgor with respect to any Obligations against any such Letter of Credit (Other Posted Support) held by the Secured Party and to the extent its rights to Set-off are not exercised, withhold payment of any remaining amounts payable by the Pledgor with respect to any Obligations, up to the Value of any remaining Posted Collateral and the Value of any Letter of Credit (Other Posted Support) held by the Secured Party, until any such Posted Collateral and such Letter of Credit (Other Posted Support) is Transferred to the Pledgor; and (y) exercise rights and remedies available to the Pledgor under the terms of the Letter of Credit.

(iv) *"Additional Definitions"*. As used in this Annex:

"Agency Notes" means U.S. Dollar-dominated fixed rate, non-amortising, non-mortgage-backed, senior debt securities of fixed maturity, rated Aaa by Moody's and AAA by S&P and issued by any of the Federal Home Loan Banks (including their consolidated obligations issued through the Office of Finance of the Federal Home Loan Bank System), the Federal National Mortgage Association, the Federal Home Loan Mortgage Corporation or the Federal Farm Credit Bank.

"Credit Rating" shall mean, on any date of determination, (x) with respect to Party A, the lower of its utility revenue bonds rating (not supported by third party enhancement) or its issuer rating by the specified entity, (y) with respect to Party B, the lower of its long-term senior unsecured debt rating (not supported by third party credit enhancement) or its issuer rating by the specified entity, and (z) with respect to a financial institution, its long-term senior unsecured debt rating or its deposit rating by Moody's, S&P, or the specified rating agency.

"Letter of Credit" means an irrevocable standby letter of credit, issued by a Qualified Institution. The Letter of Credit must be substantially in a form acceptable to the Party in whose favor the letter of credit is issued, with such changes to the terms in that form as the issuing bank may require and as may be acceptable to the beneficiary thereof.

"Letter of Credit Default" shall mean with respect to an outstanding Letter of Credit, the occurrence of any of the following events: (i) the issuer of such Letter of Credit shall fail to be a Qualified Institution, (ii) the issuer of the Letter of Credit shall fail to comply with or perform its obligations under such Letter of Credit if such failure shall be continuing after the lapse of any applicable grace period; (iii) the issuer of such letter of

Credit shall disaffirm, disclaim, repudiate or reject, in whole or in part, or challenge the validity of, such Letter of Credit; (iv) such Letter of Credit shall expire or terminate, or shall fail to cease to be in full force and effect at any time during the term of the Contract: or (v) any event analogous to an event specified in Section 5(a)(vii) of this Agreement shall occur with respect to the issuer of such Letter of Credit provided, however, that no Letter of Credit shall occur in any event with respect to a Letter of Credit after the time such Letter of Credit is required to be canceled or returned to the Pledgor in accordance with the terms of this Annex.

"Moody's" shall mean Moody's Investor Services, Inc., or its successor.

"*Qualified Institution*" means a commercial bank or trust company or financial institution, which not affiliated with either party, organized under the laws of the United States or a political subdivision thereof, with (i) a Credit Rating of at least (a) "A-" by S&P and "A3" by Moody's, if such entity is rated by both S&P and Moody's or (b) "A-" by S&P or "A3" by Moody's, if such entity is rated by either S&P or Moody's but not both, and (ii) having assets of at least $10,000,000,000.

"S&P" shall mean the Standard & Poor's Financial Services LLC, a subsidiary of The McGraw-Hill Companies, Inc. or its successor.

"Treasury Securities" means U.S. Dollar-denominated senior debt securities of the United States of America issued by the U.S. Treasury Department and backed by the full faith and credit of the United States of America.

(k) *Demand and Notices.* All demands, specifications and notices under this Annex will be made pursuant to the Notices Section of this Agreement, unless otherwise specified here:

City of Roseville and NextEra Energy Marketing, LLC

("Party A") ("Party B")

This Annex supplements, forms part of, and is subject to, the above-referenced Agreement, is part of its Schedule and is a Credit Support Document under this Agreement with respect to each party.

Accordingly, the parties agree as follows:—

Paragraph 1. Interpretation

(a) ***Definitions and Inconsistency.*** Capitalized terms not otherwise defined herein or elsewhere in this Agreement have the meanings specified pursuant to Paragraph 12, and all references in this Annex to Paragraphs are to Paragraphs of this Annex. In the event of any inconsistency between this Annex and the other provisions of this Schedule, this Annex will prevail, and in the event of any inconsistency between Paragraph 13 and the other provisions of this Annex, Paragraph 13 will prevail.

(b) ***Secured Party and Pledgor.*** All references in this Annex to the "Secured Party" will be to either party when acting in that capacity and all corresponding references to the "Pledgor" will be to the other party when acting in that capacity; *provided, however*, that if Other Posted Support is held by a party to this Annex, all references herein to that party as the Secured Party with respect to that Other Posted Support will be to that party as the beneficiary thereof and will not subject that support or that party as the beneficiary thereof to provisions of law generally relating to security interests and secured parties.

Paragraph 2. Security Interest

Each party, as the Pledgor, hereby pledges to the other party, as the Secured Party, as security for its Obligations, and grants to the Secured Party a first priority continuing security interest in, lien on and right of Set-off against all Posted Collateral Transferred to or received by the Secured Party hereunder. Upon the Transfer by the Secured Party to the Pledgor of Posted Collateral, the security interest and lien granted hereunder on that Posted Collateral will be released immediately and, to the extent possible, without any further action by either party.

Paragraph 3. Credit Support Obligations

(a) ***Delivery Amount.*** Subject to Paragraphs 4 and 5, upon a demand made by the Secured Party on or promptly following a Valuation Date, if the Delivery Amount for that Valuation Date equals or exceeds the Pledgor's Minimum Transfer Amount, then the Pledgor will Transfer to the Secured Party Eligible Credit Support having a Value as of the date of Transfer at least equal to the applicable Delivery Amount (rounded pursuant to Paragraph 13). Unless otherwise specified in Paragraph 13, the ***"Delivery Amount"*** applicable to the Pledgor for any Valuation Date will equal the amount by which:

(i) the Credit Support Amount

exceeds

(ii) the Value as of that Valuation Date of all Posted Credit Support held by the Secured Party.

(b) ***Return Amount.*** Subject to Paragraphs 4 and 5, upon a demand made by the Pledgor on or promptly following a Valuation Date, if the Return Amount for that Valuation Date equals or exceeds the Secured Party's Minimum Transfer Amount, then the Secured Party will Transfer to the Pledgor Posted Credit Support specified by the Pledgor in that demand having a Value as of the date of Transfer as close as practicable to the applicable Return Amount (rounded pursuant to Paragraph 13). Unless otherwise specified in Paragraph 13, the ***"Return Amount"*** applicable to the Secured Party for any Valuation Date will equal the amount by which:

(i) the Value as of that Valuation Date of all Posted Credit Support held by the Secured Party

exceeds

(ii) the Credit Support Amount.

"Credit Support Amount" means, unless otherwise specified in Paragraph 13, for any Valuation Date (i) the Secured Party's Exposure for that Valuation Date plus (ii) the aggregate of all Independent Amounts applicable to the Pledgor, if any, minus (iii) all Independent Amounts applicable to the Secured Party, if any, minus (iv) the Pledgor's Threshold; *provided, however*, that the Credit Support Amount will be deemed to be zero whenever the calculation of Credit Support Amount yields a number less than zero.

Paragraph 4. Conditions Precedent, Transfer Timing, Calculations and Substitutions

(a) ***Conditions Precedent.*** Each Transfer obligation of the Pledgor under Paragraphs 3 and 5 and of the Secured Party under Paragraphs 3, 4(d)(ii), 5 and 6(d) is subject to the conditions precedent that:

(i) no Event of Default, Potential Event of Default or Specified Condition has occurred and is continuing with respect to the other party; and

(ii) no Early Termination Date for which any unsatisfied payment obligations exist has occurred or been designated as the result of an Event of Default or Specified Condition with respect to the other party.

(b) ***Transfer Timing.*** Subject to Paragraphs 4(a) and 5 and unless otherwise specified, if a demand for the Transfer of Eligible Credit Support or Posted Credit Support is made by the Notification Time, then the relevant Transfer will be made not later than the close of business on the next Local Business Day; if a demand is made after the Notification Time, then the relevant Transfer will be made not later than the close of business on the second Local Business Day thereafter.

(c) ***Calculations.*** All calculations of Value and Exposure for purposes of Paragraphs 3 and 6(d) will be made by the Valuation Agent as of the Valuation Time. The Valuation Agent will notify each party (or the other party, if the Valuation Agent is a party) of its calculations not later than the Notification Time on the Local Business Day following the applicable Valuation Date (or in the case of Paragraph 6(d), following the date of calculation).

(d) ***Substitutions.***

(i) Unless otherwise specified in Paragraph 13, upon notice to the Secured Party specifying the items of Posted Credit Support to be exchanged, the Pledgor may, on any Local Business Day, Transfer to the Secured Party substitute Eligible Credit Support (the "Substitute Credit Support"); and

(ii) subject to Paragraph 4(a), the Secured Party will Transfer to the Pledgor the items of Posted Credit Support specified by the Pledgor in its notice not later than the Local Business Day following the date on which the Secured Party receives the Substitute Credit Support, unless otherwise specified in Paragraph 13 (the "Substitution Date"); *provided* that the Secured Party will only be obligated to Transfer Posted Credit Support with a Value as of the date of Transfer of that Posted Credit Support equal to the Value as of that date of the Substitute Credit Support.

Paragraph 5. Dispute Resolution

If a party (a "Disputing Party") disputes (I) the Valuation Agent's calculation of a Delivery Amount or a Return Amount or (II) the Value of any Transfer of Eligible Credit Support or Posted Credit Support, then (1) the Disputing Party will notify the other party and the Valuation Agent (if the Valuation Agent is not the other party) not later than the close of business on the Local Business Day following (X) the date that the demand is made under Paragraph 3 in the case of (I) above or (Y) the date of Transfer in the case of (II) above, (2) subject to Paragraph 4(a), the appropriate party will Transfer the undisputed amount to the other party not later than the close of business on the Local Business Day following (X) the date that the demand is made under Paragraph 3 in the case of (I) above or (Y) the date of Transfer in the case of (II) above, (3) the parties will consult with each other in an attempt to resolve the dispute and (4) if they fail to resolve the dispute by the Resolution Time, then:

(i) In the case of a dispute involving a Delivery Amount or Return Amount, unless otherwise specified in Paragraph 13, the Valuation Agent will recalculate the Exposure and the Value as of the Recalculation Date by:

(A) utilizing any calculations of Exposure for the Transactions (or Swap Transactions) that the parties have agreed are not in dispute;

(B) calculating the Exposure for the Transactions (or Swap Transactions) in dispute by seeking four actual quotations at mid-market from Reference Market-makers for purposes of calculating Market Quotation, and taking the arithmetic average of those obtained; *provided* that if four quotations are not available for a particular Transaction (or Swap Transaction), then fewer than four quotations may be used for that Transaction (or Swap Transaction); and if no quotations are available for a particular Transaction (or Swap Transaction), then the Valuation Agent's original calculations will be used for that Transaction (or Swap Transaction); and

(C) utilizing the procedures specified in Paragraph 13 for calculating the Value, if disputed, of Posted Credit Support.

(ii) In the case of a dispute involving the Value of any Transfer of Eligible Credit Support or Posted Credit Support, the Valuation Agent will recalculate the Value as of the date of Transfer pursuant to Paragraph 13.

Following a recalculation pursuant to this Paragraph, the Valuation Agent will notify each party (or the other party, if the Valuation Agent is a party) not later than the Notification Time on the Local Business Day following the Resolution Time. The appropriate party will, upon demand following that notice by the Valuation Agent or a resolution pursuant to (3) above and subject to Paragraphs 4(a) and 4(b), make the appropriate Transfer.

Paragraph 6. Holding and Using Posted Collateral

(a) ***Care of Posted Collateral.*** Without limiting the Secured Party's rights under Paragraph 6(c), the Secured Party will exercise reasonable care to assure the safe custody of all Posted Collateral to the extent required by applicable law, and in any event the Secured Party will be deemed to have exercised reasonable care if it exercises at least the same degree of care as it would exercise with respect to its own property. Except as specified in the preceding sentence, the Secured Party will have no duty with respect to Posted Collateral, including, without limitation, any duty to collect any Distributions, or enforce or preserve any rights pertaining thereto.

(b) ***Eligibility to Hold Posted Collateral; Custodians.***

(i) ***General.*** Subject to the satisfaction of any conditions specified in Paragraph 13 for holding Posted Collateral, the Secured Party will be entitled to hold Posted Collateral or to appoint an agent (a "Custodian") to hold Posted Collateral for the Secured Party. Upon notice by the Secured Party to the Pledgor of the appointment of a Custodian, the Pledgor's obligations to make any Transfer will be discharged by making the Transfer to that Custodian. The holding of Posted Collateral by a Custodian will be deemed to be the holding of that Posted Collateral by the Secured Party for which the Custodian is acting.

(ii) ***Failure to Satisfy Conditions.*** If the Secured Party or its Custodian fails to satisfy any conditions for holding Posted Collateral, then upon a demand made by the Pledgor, the Secured Party will, not later than five Local Business Days after the demand, Transfer or cause its Custodian to Transfer all Posted Collateral held by it to a Custodian that satisfies those conditions or to the Secured Party if it satisfies those conditions.

(iii) ***Liability.*** The Secured Party will be liable for the acts or omissions of its Custodian to the same extent that the Secured Party would be liable hereunder for its own acts or omissions.

(c) ***Use of Posted Collateral.*** Unless otherwise specified in Paragraph 13 and without limiting the rights and obligations of the parties under Paragraphs 3, 4(d)(ii), 5, 6(d) and 8, if the Secured Party is not a Defaulting Party or an Affected Party with respect to a Specified Condition and no Early Termination Date has occurred or been designated as the result of an Event of Default or Specified Condition with respect to the Secured Party, then the Secured Party will, notwithstanding Section 9-207 of the New York Uniform Commercial Code, have the right to:

(i) sell, pledge, rehypothecate, assign, invest, use, commingle or otherwise dispose of, or otherwise use in its business any Posted Collateral it holds, free from any claim or right of any nature whatsoever of the Pledgor, including any equity or right of redemption by the Pledgor; and

(ii) register any Posted Collateral in the name of the Secured Party, its Custodian or a nominee for either.

For purposes of the obligation to Transfer Eligible Credit Support or Posted Credit Support pursuant to Paragraphs 3 and 5 and any rights or remedies authorized under this Agreement, the Secured Party will be deemed to continue to hold all Posted Collateral and to receive Distributions made thereon, regardless of whether the Secured Party has exercised any rights with respect to any Posted Collateral pursuant to (i) or (ii) above.

(d) ***Distributions and Interest Amount.***

(i) ***Distributions.*** Subject to Paragraph 4(a), if the Secured Party receives or is deemed to receive Distributions on a Local Business Day, it will Transfer to the Pledgor not later than the following Local Business Day any Distributions it receives or is deemed to receive to the extent that a Delivery Amount would not be created or increased by that Transfer, as calculated by the Valuation Agent (and the date of calculation will be deemed to be a Valuation Date for this purpose).

(ii) ***Interest Amount.*** Unless otherwise specified in Paragraph 13 and subject to Paragraph 4(a), in lieu of any interest, dividends or other amounts paid or deemed to have been paid with respect to Posted Collateral in the form of Cash (all of which may be retained by the Secured Party), the Secured Party will Transfer to the Pledgor at the times specified in Paragraph 13 the Interest Amount to the extent that a Delivery Amount would not be created or increased by that Transfer, as calculated by the Valuation Agent (and the date of calculation will be deemed to be a Valuation Date for this purpose). The Interest Amount or portion thereof not Transferred pursuant to this Paragraph will constitute Posted Collateral in the form of Cash and will be subject to the security interest granted under Paragraph 2.

Paragraph 7. Events of Default

For purposes of Section 5(a)(iii)(1) of this Agreement, an Event of Default will exist with respect to a party if:

(i) that party fails (or fails to cause its Custodian) to make, when due, any Transfer of Eligible Collateral, Posted Collateral or the Interest Amount, as applicable, required to be made by it and that failure continues for two Local Business Days after notice of that failure is given to that party;

(ii) that party fails to comply with any restriction or prohibition specified in this Annex with respect to any of the rights specified in Paragraph 6(c) and that failure continues for five Local Business Days after notice of that failure is given to that party; or

(iii) that party fails to comply with or perform any agreement or obligation other than those specified in Paragraphs 7(i) and 7(ii) and that failure continues for 30 days after notice of that failure is given to that party.

Paragraph 8. Certain Rights and Remedies

(a) ***Secured Party's Rights and Remedies.*** If at any time (1) an Event of Default or Specified Condition with respect to the Pledgor has occurred and is continuing or (2) an Early Termination Date has occurred or been designated as the result of an Event of Default or Specified Condition with respect to the Pledgor, then, unless the Pledgor has paid in full all of its Obligations that are then due, the Secured Party may exercise one or more of the following rights and remedies:

(i) all rights and remedies available to a secured party under applicable law with respect to Posted Collateral held by the Secured Party;

(ii) any other rights and remedies available to the Secured Party under the terms of Other Posted Support, if any;

(iii) the right to Set-off any amounts payable by the Pledgor with respect to any Obligations against any Posted Collateral or the Cash equivalent of any Posted Collateral held by the Secured Party (or any obligation of the Secured Party to Transfer that Posted Collateral); and

(iv) the right to liquidate any Posted Collateral held by the Secured Party through one or more public or private sales or other dispositions with such notice, if any, as may be required under applicable law, free from any claim or right of any nature whatsoever of the Pledgor, including any equity or right of redemption by the Pledgor (with the Secured Party having the right to purchase any or all of the Posted Collateral to be sold) and to apply the proceeds (or the Cash equivalent thereof) from the liquidation of the Posted Collateral to any amounts payable by the Pledgor with respect to any Obligations in that order as the Secured Party may elect.

Each party acknowledges and agrees that Posted Collateral in the form of securities may decline speedily in value and is of a type customarily sold on a recognized market, and, accordingly, the Pledgor is not entitled to prior notice of any sale of that Posted Collateral by the Secured Party, except any notice that is required under applicable law and cannot be waived.

(b) ***Pledgor's Rights and Remedies.*** If at any time an Early Termination Date has occurred or been designated as the result of an Event of Default or Specified Condition with respect to the Secured Party, then (except in the case of an Early Termination Date relating to less than all Transactions (or Swap Transactions) where the Secured Party has paid in full all of its obligations that are then due under Section 6(e) of this Agreement):

(i) the Pledgor may exercise all rights and remedies available to a pledgor under applicable law with respect to Posted Collateral held by the Secured Party;

(ii) the Pledgor may exercise any other rights and remedies available to the Pledgor under the terms of Other Posted Support, if any;

(iii) the Secured Party will be obligated immediately to Transfer all Posted Collateral and the Interest Amount to the Pledgor; and

(iv) to the extent that Posted Collateral or the Interest Amount is not so Transferred pursuant to (iii) above, the Pledgor may:

(A) Set-off any amounts payable by the Pledgor with respect to any Obligations against any Posted Collateral or the Cash equivalent of any Posted Collateral held by the Secured Party (or any obligation of the Secured Party to Transfer that Posted Collateral); and

(B) to the extent that the Pledgor does not Set-off under (iv)(A) above, withhold payment of any remaining amounts payable by the Pledgor with respect to any Obligations, up to the Value of any remaining Posted Collateral held by the Secured Party, until that Posted Collateral is Transferred to the Pledgor.

(c) ***Deficiencies and Excess Proceeds.*** The Secured Party will Transfer to the Pledgor any proceeds and Posted Credit Support remaining after liquidation, Set-off and/or application under Paragraphs 8(a) and 8(b) after satisfaction in full of all amounts payable by the Pledgor with respect to any Obligations; the Pledgor in all events will remain liable for any amounts remaining unpaid after any liquidation, Set-off and/or application under Paragraphs 8(a) and 8(b).

(d) ***Final Returns.*** When no amounts are or thereafter may become payable by the Pledgor with respect to any Obligations (except for any potential liability under Section 2(d) of this Agreement), the Secured Party will Transfer to the Pledgor all Posted Credit Support and the Interest Amount, if any.

Paragraph 9. Representations

Each party represents to the other party (which representations will be deemed to be repeated as of each date on which it, as the Pledgor, Transfers Eligible Collateral) that:

(i) it has the power to grant a security interest in and lien on any Eligible Collateral it Transfers as the Pledgor and has taken all necessary actions to authorize the granting of that security interest and lien;

(ii) it is the sole owner of or otherwise has the right to Transfer all Eligible Collateral it Transfers to the Secured Party hereunder, free and clear of any security interest, lien, encumbrance or other restrictions other than the security interest and lien granted under Paragraph 2;

(iii) upon the Transfer of any Eligible Collateral to the Secured Party under the terms of this Annex, the Secured Party will have a valid and perfected first priority security interest therein (assuming that any central clearing corporation or any third-party financial intermediary or other entity not within the control of the Pledgor involved in the Transfer of that Eligible Collateral gives the notices and takes the action required of it under applicable law for perfection of that interest); and

(iv) the performance by it of its obligations under this Annex will not result in the creation of any security interest, lien or other encumbrance on any Posted Collateral other than the security interest and lien granted under Paragraph 2.

Paragraph 10. Expenses

(a) ***General.*** Except as otherwise provided in Paragraphs 10(b) and 10(c), each party will pay its own costs and expenses in connection with performing its obligations under this Annex and neither party will be liable for any costs and expenses incurred by the other party in connection herewith.

(b) ***Posted Credit Support.*** The Pledgor will promptly pay when due all taxes, assessments or charges of any nature that are imposed with respect to Posted Credit Support held by the Secured Party upon becoming aware of the same, regardless of whether any portion of that Posted Credit Support is subsequently disposed of under Paragraph 6(c), except for those taxes, assessments and charges that result from the exercise of the Secured Party's rights under Paragraph 6(c).

(c) ***Liquidation/Application of Posted Credit Support.*** All reasonable costs and expenses incurred by or on behalf of the Secured Party or the Pledgor in connection with the liquidation and/or application of any Posted Credit Support under Paragraph 8 will be payable, on demand and pursuant to the Expenses Section of this Agreement, by the Defaulting Party or, if there is no Defaulting Party, equally by the parties.

Paragraph 11. Miscellaneous

(a) ***Default Interest.*** A Secured Party that fails to make, when due, any Transfer of Posted Collateral or the Interest Amount will be obligated to pay the Pledgor (to the extent permitted under applicable law) an amount equal to interest at the Default Rate multiplied by the Value of the items of property that were required to be Transferred, from (and including) the date that Posted Collateral or Interest Amount was required to be Transferred to (but excluding) the date of Transfer of that Posted Collateral or Interest Amount. This interest will be calculated on the basis of daily compounding and the actual number of days elapsed.

(b) ***Further Assurances.*** Promptly following a demand made by a party, the other party will execute, deliver, file and record any financing statement, specific assignment or other document and take any other action that may be necessary or desirable and reasonably requested by that party to create, preserve, perfect or validate any security interest or lien granted under Paragraph 2, to enable that party to exercise or enforce its rights under this Annex with respect to Posted Credit Support or an Interest Amount or to effect or document a release of a security interest on Posted Collateral or an Interest Amount.

(c) ***Further Protection.*** The Pledgor will promptly give notice to the Secured Party of, and defend against, any suit, action, proceeding or lien that involves Posted Credit Support Transferred by the Pledgor or that could adversely affect the security interest and lien granted by it under Paragraph 2, unless that suit, action, proceeding or lien results from the exercise of the Secured Party's rights under Paragraph 6(c).

(d) ***Good Faith and Commercially Reasonable Manner.*** Performance of all obligations under this Annex, including, but not limited to, all calculations, valuations and determinations made by either party, will be made in good faith and in a commercially reasonable manner.

(e) ***Demands and Notices.*** All demands and notices made by a party under this Annex will be made as specified in the Notices Section of this Agreement, except as otherwise provided in Paragraph 13.

(f) ***Specifications of Certain Matters.*** Anything referred to in this Annex as being specified in Paragraph 13 also may be specified in one or more Confirmations or other documents and this Annex will be construed accordingly.

Paragraph 12. Definitions
As used in this Annex:—

"Cash" means the lawful currency of the United States of America.

"***Credit Support Amount"*** has the meaning specified in Paragraph 3.

"Custodian" has the meaning specified in Paragraphs 6(b)(i) and 13.

"Delivery Amount" has the meaning specified in Paragraph 3(a).

"Disputing Party" has the meaning specified in Paragraph 5.

"Distributions" means with respect to Posted Collateral other than Cash, all principal, interest and other payments and distributions of cash or other property with respect thereto, regardless of whether the Secured Party has disposed of that Posted Collateral under Paragraph 6(c). Distributions will not include any item of property acquired by the Secured Party upon any disposition or liquidation of Posted Collateral or, with respect to any Posted Collateral in the form of Cash, any distributions on that collateral, unless otherwise specified herein.

"Eligible Collateral" means, with respect to a party, the items, if any, specified as such for that party in Paragraph 13.

"Eligible Credit Support" means Eligible Collateral and Other Eligible Support.

"Exposure" means for any Valuation Date or other date for which Exposure is calculated and subject to Paragraph 5 in the case of a dispute, the amount, if any, that would be payable to a party that is the Secured Party by the other party (expressed as a positive number) or by a party that is the Secured Party to the other party (expressed as a negative number) pursuant to Section 6(e)(ii)(2)(A) of this Agreement as if all Transactions (or Swap Transactions) were being terminated as of the relevant Valuation Time; *provided* that Market Quotation will be determined by the Valuation Agent using its estimates at mid-market of the amounts that would be paid for Replacement Transactions (as that term is defined in the definition of "Market Quotation").

"Independent Amount" means, with respect to a party, the amount specified as such for that party in Paragraph 13; if no amount is specified, zero.

"Interest Amount" means, with respect to an Interest Period, the aggregate sum of the amounts of interest calculated for each day in that Interest Period on the principal amount of Posted Collateral in the form of Cash held by the Secured Party on that day, determined by the Secured Party for each such day as follows:

(x) the amount of that Cash on that day; multiplied by

(y) the Interest Rate in effect for that day; divided by

(z) 360.

"Interest Period" means the period from (and including) the last Local Business Day on which an Interest Amount was Transferred (or, if no Interest Amount has yet been Transferred, the Local Business Day on which Posted Collateral in the form of Cash was Transferred to or received by the Secured Party) to (but excluding) the Local Business Day on which the current Interest Amount is to be Transferred.

"Interest Rate" means the rate specified in Paragraph 13.

"Local Business Day", unless otherwise specified in Paragraph 13, has the meaning specified in the Definitions Section of this Agreement, except that references to a payment in clause (b) thereof will be deemed to include a Transfer under this Annex.

"Minimum Transfer Amount" means, with respect to a party, the amount specified as such for that party in Paragraph 13; if no amount is specified, zero.

"Notification Time" has the meaning specified in Paragraph 13.

"Obligations" means, with respect to a party, all present and future obligations of that party under this Agreement and any additional obligations specified for that party in Paragraph 13.

"Other Eligible Support" means, with respect to a party, the items, if any, specified as such for that party in Paragraph 13.

"Other Posted Support" means all Other Eligible Support Transferred to the Secured Party that remains in effect for the benefit of that Secured Party.

"Pledgor" means either party, when that party (i) receives a demand for or is required to Transfer Eligible Credit Support under Paragraph 3(a) or (ii) has Transferred Eligible Credit Support under Paragraph 3(a).

"Posted Collateral" means all Eligible Collateral, other property, Distributions, and all proceeds thereof that have been Transferred to or received by the Secured Party under this Annex and not Transferred to the Pledgor pursuant to Paragraph 3(b), 4(d)(ii) or 6(d)(i) or released by the Secured Party under Paragraph 8. Any Interest Amount or portion thereof not Transferred pursuant to Paragraph 6(d)(ii) will constitute Posted Collateral in the form of Cash.

"Posted Credit Support" means Posted Collateral and Other Posted Support.

"Recalculation Date" means the Valuation Date that gives rise to the dispute under Paragraph 5; *provided, however*, that if a subsequent Valuation Date occurs under Paragraph 3 prior to the resolution of the dispute, then the "Recalculation Date" means the most recent Valuation Date under Paragraph 3.

"Resolution Time" has the meaning specified in Paragraph 13.

"Return Amount" has the meaning specified in Paragraph 3(b).

"Secured Party" means either party, when that party (i) makes a demand for or is entitled to receive Eligible Credit Support under Paragraph 3(a) or (ii) holds or is deemed to hold Posted Credit Support.

"Specified Condition" means, with respect to a party, any event specified as such for that party in Paragraph 13.

"Substitute Credit Support" has the meaning specified in Paragraph 4(d)(i).

"Substitution Date" has the meaning specified in Paragraph 4(d)(ii).

"Threshold" means, with respect to a party, the amount specified as such for that party in Paragraph 13; if no amount is specified, zero.

"Transfer" means, with respect to any Eligible Credit Support, Posted Credit Support or Interest Amount, and in accordance with the instructions of the Secured Party, Pledgor or Custodian, as applicable:

(i) in the case of Cash, payment or delivery by wire transfer into one or more bank accounts specified by the recipient;

(ii) in the case of certificated securities that cannot be paid or delivered by book-entry, payment or delivery in appropriate physical form to the recipient or its account accompanied by any duly executed instruments of transfer, assignments in blank, transfer tax stamps and any other documents necessary to constitute a legally valid transfer to the recipient;

(iii) in the case of securities that can be paid or delivered by book-entry, the giving of written instructions to the relevant depository institution or other entity specified by the recipient, together with a written copy thereof to the recipient, sufficient if complied with to result in a legally effective transfer of the relevant interest to the recipient; and

(iv) in the case of Other Eligible Support or Other Posted Support, as specified in Paragraph 13.

"Valuation Agent" has the meaning specified in Paragraph 13.

"Valuation Date" means each date specified in or otherwise determined pursuant to Paragraph 13.

"Valuation Percentage" means, for any item of Eligible Collateral, the percentage specified in Paragraph 13.

"Valuation Time" has the meaning specified in Paragraph 13.

"Value" means for any Valuation Date or other date for which Value is calculated and subject to Paragraph 5 in the case of a dispute, with respect to:

(i) Eligible Collateral or Posted Collateral that is:

(A) Cash, the amount thereof; and

(B) a security, the bid price obtained by the Valuation Agent multiplied by the applicable Valuation Percentage, if any;

(ii) Posted Collateral that consists of items that are not specified as Eligible Collateral, zero; and

(iii) Other Eligible Support and Other Posted Support, as specified in Paragraph 13.

COUNCIL COMMUNICATION

CC #: 9855
File #: 0206-03-01

Title:	Resolution of Intention to Form Sierra Vista Specific Plan Westpark-Federico Community Facilities District No. 1 (Public Facilities) and Resolution of Intention to Incur Bonded Indebtedness
Contact:	Jeannine Thrash 916-774-5473 jthrash@roseville.ca.us Dennis Kauffman 916-774-5313 dkauffman@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.17.

RECOMMENDATION TO COUNCIL

It is recommended that the City Council adopt the following resolutions and set a meeting date of May 1, 2019, at 7:00 p.m., in the Roseville Civic Center, Council Chambers at 311 Vernon Street, Roseville, California, as the time and place to conduct a public hearing;

- A Resolution of Intention of the City Council of the City of Roseville to Form a Community Facilities District and Future Annexation Area, and Levy a Special Tax in the City of Roseville SVSP Westpark-Federico Community Facilities District No. 1 (Public Facilities) to Finance the Acquisition and Construction of Certain Public Facilities in and for such Community Facilities District.
- A Resolution of the City Council of the City of Roseville of Intention to Incur Bonded Indebtedness to Finance the Acquisition and Construction of Certain Public Facilities in and for SVSP Westpark-Federico Community Facilities District No. 1 (Public Facilities).

BACKGROUND

The Westpark-Federico property is a portion of the Federico property within the Sierra Vista Specific Plan (SVSP). The overall Federico property is approximately 506 acres and is approved for 2,154 residential units (1,632 low and medium-density, and 522 high-density residential units). The Westpark-Federico portion is approximately 251 acres and is planned for 935 residential units (763 low and medium-density, and 172 high-density residential units). The property is anticipated to be developed over a number of phases. The first phase, which is also the initial Community Facilities District (CFD) boundary, includes approximately 215 low-density residential units and 110 medium-density residential units over roughly 62 acres. The CFD boundary also includes a 3.4 acre open space parcel and a 1.1 acre park parcel.

While not required to annex into the SVSP Westpark-Federico CFD No. 1, the remainder of the Westpark-Federico development will be considered future annexation areas at the time of the District's formation. Spanning the remainder, expected land uses for the annexation area include

an additional 350 low-density residential units, 89 medium-density residential units, 172 high-density units, and 7.6 acres of commercial development as well as approximately 88 acres of tax exempt park, public/quasi-public, and open space land uses.

FISCAL IMPACT

The CFD will generate special taxes that will be paid by the property owners sufficient to pay the costs for the debt service, CFD administration, any authorized pay-as-you-go facilities, and future maintenance/replacement of constructed facilities. The formation and administration of the CFD will not impact the City's General Fund.

ECONOMIC DEVELOPMENT / JOBS CREATED

The approval of the resolutions will not have any economic impact. The public infrastructure CFD will ultimately help the local economy in the construction industry by creating new jobs for infrastructure and home construction.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment (CEQA Guidelines §15061 (b)(3)). The formation of these CFDs does not include the potential for a significant environmental effect, and therefore is not subject to CEQA.

Respectfully Submitted,

Jeannine Thrash, Administrative Analyst

Dennis Kauffman, Chief Financial Officer

RESOLUTION NO. 19-81

A RESOLUTION OF INTENTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE TO FORM A COMMUNITY FACILITIES DISTRICT AND FUTURE ANNEXATION AREA, AND LEVY A SPECIAL TAX IN THE CITY OF ROSEVILLE SVSP WESTPARK-FEDERICO COMMUNITY FACILITIES DISTRICT NO. 1 (PUBLIC FACILITIES) TO FINANCE PUBLIC SERVICES AND THE ACQUISITION AND CONSTRUCTION OF CERTAIN PUBLIC FACILITIES IN AND FOR SUCH COMMUNITY FACILITIES DISTRICT

WHEREAS, under the Mello-Roos Community Facilities Act of 1982, as amended, Chapter 2.5 of Part 1 of Division 2 of Title 5, commencing at Section 53311, of the California Government Code (the "Act"), the City Council of the City of Roseville (the "City Council") is authorized to establish a community facilities district and future annexation area, and to act as the legislative body for such community facilities district; and

WHEREAS, the City Council, having received indications of interest on behalf of the prospective developer of the land proposed to be included in a proposed community facilities district, desires to proceed with the establishment of the community facilities district and future annexation area.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF ROSEVILLE RESOLVES AS FOLLOWS:

1. It is proposed to establish a community facilities district and future annexation area within the City of Roseville under the terms of the Act to finance costs of public infrastructure and services necessary or incidental to new development in the City, which may include the payment of fees related thereto related to new development.

2. The name proposed for the community facilities district is the City of Roseville SVSP Westpark-Federico Community Facilities District No. 1 (Public Facilities) (the "CFD"). The name proposed for the future annexation area is the City of Roseville SVSP Westpark-Federico Community Facilities District No. 1 (Public Facilities) (Future Annexation Area) (the "Future Annexation Area").

3. The proposed boundaries of the CFD and the Future Annexation Area are shown on the Map of Proposed Boundary of a proposed community facilities district to be known as City of Roseville SVSP Westpark-Federico Community Facilities District No. 1 (Public Facilities), City of Roseville, Placer County, California, on file with the City Clerk, the City Council approves as the map describing the extent of the territory included in the proposed CFD and Future Annexation Area. The City Council directs the City Clerk to certify the adoption of this resolution on the face of the map, and to file a copy of the map in the office of the City Clerk in accordance with Section 3111 of the California Streets and Highways Code and within 15 days of the date of adoption of this resolution but in no event later than 15 days prior to the public hearing provided for herein, transmit the map to the County Recorder for recording in the Book of Maps of Assessment and Community Facilities Districts in the office of the County Recorder of the County of Placer.

Parcels within the Future Annexation Area shall be annexed to the CFD only with the unanimous approval (each, a "Unanimous Approval") of the owner or owners of each parcel or

parcels at the time that parcel or those parcels are annexed, without any requirement for further public hearings or additional proceedings.

All or any portions of territory that annexes into the CFD from the Future Annexation Area or otherwise may be annexed into a separate improvement area (each, a "Future Improvement Area") then in existence or to be formed at the time of such annexation and no additional hearings or procedures are required. After the designation of a parcel or parcels as an improvement area, all proceedings for approval of an appropriations limit, the rate and method of apportionment and manner of collection of special taxes, and the authorization to incur bonded indebtedness may differ from other areas of the CFD as set forth in the Unanimous Approval and shall apply only to the parcel or parcels within such improvement area.

4. Except to the extent that funds are otherwise available to the CFD to pay for the Facilities and/or Services (each as defined below), and/or the principal and interest as it becomes due on bonds issued by the City for the CFD to construct and/or acquire the Facilities, a special tax (the respective "Facilities Special Tax" and "Maintenance Special Tax" and together, the "Special Tax") sufficient to pay the costs thereof, secured by recordation of a continuing lien against all non-exempt real property in the CFD, will be levied annually within the CFD, and collected in the same manner as ordinary *ad valorem* property taxes, or in such other manner as the City Council or its designee shall determine, including direct billing of the affected property owners. The proposed rate and method of apportionment of the Special Tax among the parcels of real property within the CFD, in sufficient detail to allow each landowner within the proposed CFD to estimate the maximum amount such owner will have to pay, are described in the Rate, Method of Apportionment and Manner of Collection of Special Tax attached hereto as Exhibit A and hereby incorporated herein (the "Rate and Method").

For Future Improvement Areas, a different rate and method may be established to the extent set forth in the Unanimous Approval for such annexation, except that if the annexation is to an area which is subject to a special tax to pay existing bonds, the special tax in the annexed area shall be the same as the tax levied in the existing area to the extent that the annexed area special tax is levied to pay for public facilities financed with bonds, except that a higher special tax within the annexed area may be levied for that purpose to compensate for the interest and principal previously paid by the existing area, less any depreciation allocable to the public facility.

A Facilities Special Tax shall not be levied in the CFD or in one or more Future Improvement Areas after the fiscal year identified in the rate and method for the CFD or Future Improvement Area, as applicable, except that a Facilities Special Tax that was lawfully levied in or before the final tax year and that remains delinquent may be collected in subsequent years. Under no circumstances shall the Facilities Special Tax levied against any parcel in the CFD or Future Improvement Area, as applicable, for private residential purposes be increased as a consequence of delinquency or default by the owner of any other parcel or parcels within the CFD or Future Improvement Area, as applicable, in contravention of the Act, including Section 53321(d) of the Act.

The special tax proposed to pay for Services to be supplied within the territory annexed in the future shall be equal to any Maintenance Special Tax levied to pay for the same Services in the CFD or Improvement Area, as applicable, except that a higher or lower tax may be levied within the territory to be annexed in the future to the extent that the actual cost of providing the Services in that territory is higher or lower than the cost of providing those Services in the existing CFD or Improvement Area, as applicable. The foregoing shall not be construed to limit the levy

of the Special Tax within the territory to be annexed in the future to provide new or additional Services beyond those supplied within the existing territory of the CFD or applicable Improvement Area, or to pay for new or additional Facilities, with or without bond financing.

The City Council hereby finds that the provisions of Sections 53313.6, 53313.7 and 53313.9 of the Act (relating to adjustments to *ad valorem* property taxes and schools financed by a community facilities district) are inapplicable to the proposed CFD.

For Future Improvement Areas, a different rate and method may be adopted if the annexed territory is designated as a separate improvement area. No supplements to the rate and method for any of the Future Improvement Areas and no new rate and method will cause the maximum tax rate in the then-existing territory of the CFD (including the then-existing improvement areas) to increase. The designation as an improvement area of any territory annexing to the CFD, the maximum amount of bonded indebtedness and other debt for such improvement area, the rate and method of apportionment of special tax for such improvement area and the appropriations limit for such improvement area shall be identified and approved in the Unanimous Approval executed by the applicable property owner(s) in connection with each annexation to the CFD from the Future Annexation Area. The annexation and related matters described in the Unanimous Approval shall be implemented and completed without the need for City Council approval or any further public hearings or proceedings, as long as the following conditions are met:

(i) The rate and method of apportionment of special tax for the new improvement area is prepared by a special tax consultant retained by the City and may be paid for by the applicable property owner(s) submitting the Unanimous Approval.

(ii) The rate and method of apportionment of special tax for the new improvement area does not establish a maximum special tax amount for the initial fiscal year in which the special tax may be levied for any category of special tax that is greater than 120% of the maximum amount of the same or closest category of special tax for the same fiscal year under the Rate and Method for the initial CFD.

(iii) The rate and method of apportionment of special tax for the new improvement area does not introduce a special tax that was not included in the Rate and Method for the initial CFD (e.g., a special tax that is levied and must be paid in a single fiscal year).

(iv) The rate and method of apportionment of special tax for the new improvement area is not inconsistent with the terms of any development agreement applicable to the parcels in the new improvement area.

5. The type of public facilities proposed to be financed by the CFD and pursuant to the Act shall consist of those items listed as facilities on Exhibit B hereto (the "Facilities") and the type of public services proposed to be financed by the CFD and pursuant to the Act shall consist of those items listed as services on Exhibit B hereto (the "Services"). The financing of the costs of Facilities may include, without limitation, the payment of principal of and interest on bonds together with all direct, indirect periodic, and/or other related costs (including, without limitation, costs of administering the CFD, levying the Special Tax and administering the bonds, and establishing and replenishing reserve funds). The City Council hereby finds and determines that the public interest will not be served by allowing the property owners in the CFD to enter into a contract in accordance with Section 53329.5(a) of the Act. Notwithstanding the foregoing, the City Council, on behalf of the CFD, may enter into one or more contracts directly with any of the property owners with respect to the construction and/or acquisition of any portion of the Facilities.

The Council hereby determines that the Services are necessary to meet increased demands for such services placed upon the City as the result of development occurring within the area of the CFD. The Services are in addition to those provided in the territory of the CFD as of the date hereof and will not supplant services already available within the territory of the CFD as of the date hereof.

6. Except as may otherwise be provided by law or by the applicable rate and method of apportionment, all lands owned by any public entity, including the United States, the State of California and the City, or any departments or political subdivisions thereof, shall be omitted from the levy of the Special Tax. In the event that a portion of the property within the CFD shall become for any reason exempt, wholly or in part, from the levy of the Special Tax, the City Council will, on behalf of the CFD, increase the levy to the extent necessary upon the remaining property within the CFD which is not exempt in order to yield the required debt service payments and other annual expenses of the CFD, if any, subject to the provisions of the applicable rate and method of apportionment. It is anticipated that the Special Tax will be billed as a separate line item on the regular property tax bill. However, the City Council reserves the right, under Section 53340 of the Act, to utilize any method of collecting the Special Tax which it shall, from time to time, determine to be in the best interests of the City, including, but not limited to, direct billing by the City to the property owners and supplemental billing.

7. The levy of the Special Tax within the initial boundaries of the CFD shall be subject to the approval of the qualified electors of the CFD at a special election. The proposed voting procedure shall be by mailed or hand-delivered ballot among the landowners in the proposed CFD, with each owner having one vote for each acre or portion of an acre such owner owns in the CFD. The City Council hereby determines that the Services and the Facilities are necessary to meet increased demands placed upon local agencies as the result of development occurring within the CFD.

A special tax shall be levied on parcels annexing into the CFD from the Future Annexation Area only with the Unanimous Approval(s) of the owner or owners of each parcel or parcels at the time that parcel or those parcels are annexed to the CFD, without any requirement for further public hearings or additional proceedings.

8. It is the intention of the City Council, acting as the legislative body for the CFD, to cause bonds of the City in one or more series to be issued for the CFD pursuant to the Act to finance in whole or in part the construction and/or acquisition of the Facilities. The bonds issued in these proceedings shall be callable in accordance with the provisions of the Act, and shall be issued in such series and bear interest payable semi-annually or in such other manner as the City Council shall determine, at a rate not to exceed the maximum rate of interest as may be authorized by applicable law at the time of sale of such bonds, shall mature not to exceed 40 years from the date of the issuance thereof and shall be as more specifically set forth in any resolution authorizing the issuance of such bonds.

9. The Chief Financial Officer of the City, as the officer having charge and control of the Facilities and Services in and for the CFD, or the designee of such official, is hereby directed to cause and direct a study of said proposed CFD and the Facilities and Services, and to cause to be prepared for filing at the public hearing the report required by Section 53321.5 of the Act (the “CFD Report”) presenting at least the following:

(a) A brief description of the Facilities and Services by type which will be required to adequately meet the needs of the CFD.

(b) An estimate of the fair and reasonable cost of the Facilities and Services, including the cost of acquisition of lands, rights-of-way and easements, any physical facilities required in conjunction therewith and incidental expenses in connection therewith, including the costs of the proposed bond financing and all other related costs as provided in Section 53345.3 of the Act.

The CFD Report shall be made a part of the record of the public hearing specified below.

10. The City Council hereby sets May 1, 2019, at 7:00 p.m., at the City of Roseville Civic Center Council Chambers located at 311 Vernon Street, Roseville, California 95678, as the time and place when and where the City Council, as legislative body for the CFD, will conduct a public hearing on the establishment of the CFD and the Future Annexation Area, and consider and finally determine whether the public interest, convenience and necessity require the formation of the CFD and the Future Annexation Area, and the levy of the Special Tax. At the hearing, testimony concerning the CFD, the extent of the CFD and the Future Annexation Area, or the furnishing of the particular types of public facilities and public services will be heard and protests will be considered from registered voters residing within the CFD and persons owning real property within the CFD. Written protests by the owners of a majority of the land which would be subject to special taxation within the proposed CFD will require the suspension of proceedings for at least one year. Written protests must be filed with the City Clerk at or before the time fixed for the hearing. If such protests are directed only against certain elements of the proposed improvements or proposed special tax, and if such protests constitute a majority protest, only those elements shall be deleted from the proceedings.

11. The City Clerk is hereby directed to cause notice of the public hearing, attached hereto as Exhibit C, to be given by one-time publication in a newspaper published in the area of the CFD and the Future Annexation Area. The publication shall be completed at least 7 days before the date of the public hearing referenced above. The notice shall be substantially in the form specified in Section 53322 of the Act and attached hereto, with the form summarizing the provisions hereof hereby specifically approved.

12. This Resolution shall take effect from and after its adoption.

* * * * * *

I hereby certify that the foregoing Resolution was duly adopted by the City Council of the City of Roseville, California, at a regularly scheduled meeting thereof, held on the ___ day of _____, 2019, by the following vote of the City Council:

AYES:	COUNCILMEMBERS
NOES:	COUNCILMEMBERS
ABSENT:	COUNCILMEMBERS
ABSTAIN:	COUNCILMEMBERS

Mayor

ATTEST:

City Clerk of the City of Roseville

EXHIBIT A

City of Roseville
SVSP Westpark-Federico Community Facilities District No. 1
(Public Facilities)
Placer County, California

RATE, METHOD OF APPORTIONMENT, AND MANNER OF COLLECTION OF SPECIAL TAX

---

1. Basis of Special Tax Levy

A Special Tax authorized under the Mello-Roos Community Facilities Act of 1982 (Act) applicable to the land in SVSP Westpark- Federico Community Facilities District No. 1 (Public Facilities) (CFD) of the City of Roseville (City) shall be levied and collected according to the tax liability determined by the City through the application of the appropriate amount or rate, as described below.

2. Definitions

"**Acre**" or "**Acreage**" means the land area of an Assessor's Parcel as shown on an Assessor's Parcel Map, or if the land area is not shown on an Assessor's Parcel Map, the land area shown on the applicable final map or other Development Plan.

"**Act**" means the Mello-Roos Community Facilities Act of 1982, as amended, Sections 53311 and following of the California Government Code.

"**Administrative Expenses**" means the actual or reasonably estimated costs related to the administration of the CFD, including, but not limited to, these:

a. Costs of computing Special Taxes and preparing annual Special Tax collection schedules (whether by the City or any designee thereof or both).

b. Costs of collecting the Special Taxes (whether by the County, the City, or otherwise).

c. Costs of remitting the Special Taxes to the Trustee.

d. Costs of the Trustee (including its legal counsel) in the discharge of the duties required of it under the Bond Indenture.

e. Costs to the City, CFD, or any designee thereof of complying with arbitrage rebate requirements.

f. Costs to the City, CFD, or any designee thereof of complying with City, CFD, or obligated persons disclosure requirements.

g. Costs associated with preparing Special Tax disclosure statements.

h. Costs incurred in responding to public inquiries regarding the Special Taxes.

i. Costs to the City, CFD, or designee thereof related to any appeal of the Special Taxes.

j. Costs associated with the release of funds from an escrow account, if any.

k. Costs to the City for the issuance of Bonds authorized by the CFD that are not recovered through the Bond sale proceeds.

l. Amounts estimated to be advanced or already advanced by the City for any other administrative purposes, including attorney's fees and other costs related to collection of the Special Taxes and commencing and pursuing to completion any foreclosure of delinquent Special Taxes.

"**Administrator**" means a City official in the Finance Department, or their designee responsible for determining or overseeing the levy and collection of the Special Taxes.

"**Affordable Housing Director**" means, at any point in time, the person in the City who serves as head of the department that is in charge of the City's affordable housing program.

"**Affordable Unit**" means a Unit built on a Residential Use Parcel for which an Affordable Unit agreement has been entered into for the property designating the Unit as affordable. A Multifamily Parcel may have only a portion of the Units assigned as Affordable Units. The City Manager, or his or her designee, shall determine which Units are designated as Affordable Units and maintain an Affordable Unit listing, which shall contain all designated buildable parcels by tract and lot number, and in the case of Large Lot Parcels remaining before May 1 of the preceding Fiscal Year, the number of designated Affordable Units for each such Large Lot Parcel; all entries shall indicate the effective date of designation. The Affordable Unit listing also shall be updated to reflect those Units no longer qualifying as Affordable Units, also known as Market-Rate Units. The Affordable Unit listing, which shall contain all qualifying Affordable Units as of April 30, shall be made available to the Administrator by July 1 of each year for purposes of determining the Maximum Annual Special Tax for Parcels pursuant to **Section 4**.

"**Annexation Parcels**" means a Parcel or Parcels annexed to the CFD after formation. The Maximum Annual Special Tax will be assigned to such Parcels using the provisions of **Section 4**. Annexation Parcels may be assigned a different Maximum Annual Special Tax Rate or Maximum Annual Special Tax per Parcel using a methodology different from the other Parcels in the CFD and may be placed in an area designated as a separate zone or improvement area of the CFD, all of which shall be set forth in revised attachments hereto as needed, without further CFD proceedings.

"**Annual Facilities Costs**" means, for any Fiscal Year, the total of these:

a. Debt Service to be paid from Facilities Special Taxes.

b. The amount needed to replenish the reserve fund for the Bonds to the level required under the Bond Indenture, to the extent not included in a computation of Annual Facilities Costs in a previous Fiscal Year.

c. Administrative Expenses for such Fiscal Year.

d. The amount needed to (1) cure any delinquencies in the payment of principal or interest on Bonds, which have occurred in the prior Fiscal Year, to the extent not otherwise included in a computation of Annual Facilities Costs in the current or any previous Fiscal Year, and (2) to fund any foreseeable deficiency of the amount to be available for the payment of principal or interest on Bonds, which are expected to occur in such Fiscal Year, to the extent not included in a computation of Annual Facilities Costs in the current or any previous Fiscal Year.

e. The amount needed to (1) cure any delinquencies in the payment of the Facilities Special Tax in the prior Fiscal Year, to the extent not otherwise included in a computation of Annual Facilities Costs in the current or any previous Fiscal Year, and (2) to fund any foreseeable deficiency in the payment of the Facilities Special Tax for that Fiscal Year which is expected to occur in such Fiscal Year, to the extent not included in a computation of Annual Facilities Costs in the current or any previous Fiscal Year.

f. Authorized Pay-As-You-Go Costs.

g. During the Deferral Bonding Period, the amount needed to pay Development Impact Fee Deferrals not financed by Bonds.

h. *Less* any available earnings on any reserve fund or Facilities Special Tax funds, available capitalized interest or any other available revenues of the CFD or the City that may be used to fund Annual Facilities Costs.

"**Annual Maintenance Costs**" means, for any Fiscal Year, the total of these:

a. Authorized Services costs to be paid from Maintenance Special Taxes.

b. Administrative Expenses for such Fiscal Year.

c. The amount needed to (1) cure any delinquencies in the payment of the Maintenance Special Tax in the prior Fiscal Year, to the extent not otherwise included in a computation of Annual Maintenance Costs in the current or any previous Fiscal Year, and (2) to fund any foreseeable deficiency in the payment of the Maintenance Special Tax for that Fiscal Year which is expected to occur in such Fiscal Year, to the extent not included in a computation of Annual Maintenance Costs in the current or any previous Fiscal Year.

d. Less any available earnings on any reserve fund, Maintenance Special Tax funds or any other available revenues of the CFD or the City that may be used to fund Annual Maintenance Costs.

"**Assessor's Parcel**" means a lot or Parcel with an assigned Assessor's Parcel Number in the maps used by the County Assessor in preparing the tax roll.

"**Assessor's Parcel Map**" means an official map of the County Assessor designating Parcels by Assessor's Parcel Number.

"**Assessor's Parcel Number**" means the Parcel and Parcel Number as assigned by the County Assessor on the equalized tax roll.

"**Assigned Maximum Annual Special Tax**" means the maximum Facilities Special Tax or Maintenance Special Tax assigned to each Large Lot Parcel that is an Original Parcel based on the Expected Land Uses at CFD formation, or at annexation, as shown in **Attachment 1**.

"**Authorized Facilities**" means those facilities and fees to be financed, as identified in the resolution forming the CFD.

"**Authorized Services**" means those services authorized to be funded, as defined in the resolution forming the CFD.

"**Base Year**" means the Fiscal Year beginning July 1, 2019, and ending June 30, 2020.

"**Bond(s)**" means any bond(s) issued by the City for the CFD under the Act and any other debt, as defined in the Act, the City incurs to further the CFD's purposes.

"**Bond Indenture(s)**" means the indenture(s), resolution(s), fiscal agent agreement(s), or other financing document(s) pursuant to which any Bonds are issued.

"**Building Permit**" means a permit issued by the City for the construction of a Residential Use or Nonresidential Use structure.

"**Business Professional**" means a Parcel or Parcels zoned to provide for office uses and other uses that are related to and supportive of office uses.

"**CFD**" means SVSP Westpark-Federico Community Facilities District No. 1 (Public Facilities) of the City of Roseville, Placer County, California.

"**Chief Financial Officer**" or "**CFO**" means the Chief Financial Officer of the City, or his/her designee.

"**City**" means the City of Roseville in Placer County, California.

"**Community Commercial**" means a Parcel or Parcels zoned to serve the principal retail shopping needs of the entire community by providing areas for shopping centers, and other retail and service uses.

"**Council**" means the City Council of the City acting for the CFD under the Act.

"**County**" means the County of Placer, California.

"**Debt Service**" means the total annual amount of Bond principal, interest, and the scheduled sinking fund payments of the Bonds in a calendar year.

"**Deferral Bonding Period**" means the period after the Initial Bonding Period has ended and during which the City finances the Development Impact Fee Deferral.

"**Developed Parcel**" means, in any Fiscal Year:

a. For Single-Family Parcels: All Parcels for which a Final Small Lot Subdivision Map was recorded before May 1 of the preceding Fiscal Year.

b. For Multifamily Parcels: All Parcels for which a Building Permit for new construction of a Residential Use structure was issued before May 1 of the preceding Fiscal Year.

c. For all Nonresidential Use Parcels: All Parcels for which a Building Permit for new construction of a Nonresidential Use structure was issued before May 1 of the preceding Fiscal Year.

Once a Parcel is defined as a Developed Parcel it shall remain as a Developed Parcel.

"**Development Agreement**" means the Development Agreement By and Between the City of Roseville and Westpark Federico LLC, Mourier Investment LLC, and Federico-Tyler Family Limited Partnership relative to the Sierra Vista Specific Plan dated April 28, 2010.

"**Development Impact Fee Deferral**" means the deferred payment of development impact fees due to the City or the South Placer Regional Transportation Authority (SPRTA) for Developed Parcels, using the approach and amounts identified in the Development Agreement, which may be amended from time to time.

"**Development Plan**" means a condominium plan, apartment plan, site plan, or other development plan that identifies such information as the type of structure, acreage, square footage, or number of Units that are approved to be developed on Single-Family Parcels, Multifamily Parcels, and Nonresidential Parcels.

"**Expected Land Use(s)**" means the total number of Units or Acres of each land use type by Tax Category expected in each Large Lot Parcel and Original Parcel at CFD formation as identified in **Attachment 3** of this RMA.

"**Facilities Special Tax**" means the Special Tax authorized to fund Annual Facilities Cost. Facilities Special Taxes are shown in **Attachments 2** and **3.**

"**Final Use Small Lot Parcel**" means a Parcel designated for development as a single-family residence, which is part of a Final Small Lot Subdivision Map.

"**Final Small Lot Subdivision Map**" means a recorded map designating the final Parcel subdivision for individual Single-Family Parcels.

"**Fiscal Year**" means the period starting July 1 and ending the following June 30.

"**Full Prepayment**" means the complete fulfillment of a Parcel's Facilities Special Tax obligation, as determined by following the procedures in **Section 8**.

"**High Density Residential**" means, per the Sierra Vista Specific Plan, a land use designation that primarily accommodates attached housing, but depending on the unit type, could also include detached housing, within the density range of 13.0 or greater dwelling units per gross developable acre. Typical housing product types include, but shall not be limited to, detached townhomes, courtyard townhomes/condominiums, garden-style apartments, and podium design apartments/condominiums.

"**Initial Bonding Period**" means the period in which Bonds are outstanding which financed Authorized Facilities costs or refunded prior Bonds other than the Development Impact Fee Deferral.

"**Large Lot Parcel**" means a Parcel created by a Large Lot Subdivision Map.

"**Large Lot Subdivision Map**" means a recorded subdivision map creating Parcels by land use. However, the Large Lot Subdivision Map does not delineate Final Use Small Lot Parcels. A Final Small Lot Subdivision Map will create individual Single-Family Parcels.

"**Low Density Residential**" means, per the Sierra Vista Specific Plan, a land use designation that supports single-family detached homes on conventional lots within the density range of up to 6.9 dwelling units per gross developable acre. Typical housing product types include, but shall not be limited to, standard, alley-loaded, or clustered, single-family detached units.

"**Maintenance Special Tax**" means the Special Tax authorized to fund Annual Maintenance Costs. The Maintenance Special Tax will be levied and collected beginning with the Transition Year. Maintenance Special Taxes are shown in **Attachment 4**.

"**Market-Rate Unit**" means a Unit that is not an Affordable Unit.

"**Maximum Annual Special Tax**" means the greatest amount of Facilities Special Tax or Maintenance Special Tax that can be levied against a Parcel in a given Fiscal Year, as shown in **Attachments 2, 3,** and **4**.

"**Maximum Annual Facilities Special Tax**" means the greatest amount of Facilities Special Tax that can be levied against a Parcel in a given Fiscal Year, as shown in **Attachments 2, 3,** or **4**.

"**Maximum Annual Maintenance Special Tax**" means the greatest amount of Maintenance Special Tax that can be levied against a Parcel in a given Fiscal Year, as shown in **Attachments 2, 3,** or **4**.

"**Maximum Annual Special Tax Rate**" means the rate of Facilities Special Tax or Maintenance Special Tax charged per Unit or per Taxable Acre, as shown in **Attachments 2, 3,** and **4**.

"**Maximum Annual Facilities Special Tax Revenue**" means the greatest amount of Facilities Special Tax revenue that can be collected in total from a group of Parcels (such as Developed Parcels) by levying the Maximum Annual Facilities Special Tax.

"**Maximum Annual Maintenance Special Tax Revenue**" means the greatest amount of Maintenance Special Tax revenue that can be collected in total from a group of Parcels (such as Developed Parcels) by levying the Maximum Annual Maintenance Special Tax.

"**Maximum Annual CFD Special Tax Revenue**" means the sum of the Maximum Annual Special Tax levied on all Taxable Parcels in the CFD in a Fiscal Year.

"**Medium Density Residential**" means, per the Sierra Vista Specific Plan, a land use designation that accommodates both single-family detached homes and attached homes within the density range of 7.0 to 12.9 dwelling units per gross developable acre. Typical housing product types include, but shall not be limited to, standard or alley-loaded lots, courtyard lots, green court lots, auto courts, alley clusters, zero-lot lines, or z-shaped lots. In addition, duet/half-plex homes, townhomes, or condominiums may be accommodated in Medium Density Residential areas.

"**Mixed Use Parcel**" means a Parcel or Parcels designated for a combination of Residential Uses and Nonresidential Uses.

"**Multifamily For-Rent**" or "**Multifamily For-Rent Parcel**" means any Parcel designated or developed for more than one residential dwelling Unit per Parcel and where such units are initially offered for rent to the general public and cannot be purchased by individual homeowners. Such uses may consist of apartments or structures such as duplexes or triplexes, including land uses defined as High Density Residential. Each residential dwelling Unit within Multifamily For-Rent or Multifamily For-Rent Parcels is not expected to have its own distinct Assessor's Parcel Number.

"**Multifamily For-Sale**" or "**Multifamily For-Sale Parcel**" means any Parcel designated or developed for more than one residential dwelling Unit within a single building or structure and that may share at least one common wall where such units are not initially offered for rent to the general public and initially may be offered for sale to individual homeowners. Such uses may consist of condominiums or buildings such as half-plexes or time-share units, including land uses defined as High Density Residential. Multifamily For-Sale Parcels are anticipated to have their own distinct Assessor's Parcel Number as is the case in residential condominium projects. Once designated as Multifamily For-Sale or Multifamily For-Sale Parcel, the Parcel shall remain so designated unless the original structures are demolished.

"**Nonresidential Use**" means a Taxable Parcel zoned for land uses other than Residential Uses which may include Business Professional, Community Commercial and Mixed Use.

"**Original Parcel**" means a Taxable Parcel identified in **Attachment 1** at formation of the CFD.

"**Parcel**" means any Assessor's Parcel in the CFD based on the equalized tax rolls of the County as of January 1 of each Fiscal Year.

"**Partial Prepayment**" means the partial fulfillment of a Parcel's Facilities Special Tax obligation, as determined by following the procedures in **Section 8**.

"**Pay-As-You-Go Costs**" means that portion of costs of acquisition, construction, and improvement of Authorized Facilities not financed by Bonds that are eligible for funding from excess Special Tax.

"**Prepayment**" means the full or partial fulfillment of a Parcel's Facilities Special Tax obligation, as determined by following the procedures in **Section 8**.

"**Proportionately**" means that the ratio of the actual Special Tax levy to the Maximum Annual Special Tax is equal for all Developed Parcels. For Small Lot Tentative Map Parcels, Proportionately means that the ratio of the actual Special Tax levy to the Maximum Annual Special Tax is equal for all Small Lot Tentative Map Parcels. For Large Lot Parcels, Proportionately means that the ratio of the actual Special Tax levy to the Maximum Annual Special Tax is equal for all Large Lot Parcels. For Undeveloped Parcels, Proportionately means that the ratio of the actual Special Tax levy to the Maximum Annual Special Tax is equal for all Undeveloped Parcels.

"**Public Parcel**" means any Parcel that is or is intended to be publicly owned, as designated in any final map, that is normally exempt from the levy of general ad valorem property taxes under California law, including, but not limited to, public streets, schools, parks, and public drainageways, landscaping, wetlands, greenbelts, and open space.

"**Remainder Parcel**" means a portion of a unit of land that is created as a result of the recording of a Large Lot Parcel Map or Final Small Lot Subdivision Map, which results in a designated remainder as defined in Government Code Section 66424.6(a) (Remainder Parcel). Such a Remainder Parcel may contain taxable and tax-exempt uses, such as Residential Uses, and Public Parcels, such as park sites. Once designated as a Remainder Parcel, such Parcel will be considered a Large Lot Parcel for the purposes of future Subdivisions and for the provisions of **Sections 4** through **6**.

"**Residential Use**" means a Parcel designated for residential use, such as single-family residential Units, residential condominiums, townhouses, or apartments that would be included in the definitions of Low-Density Residential, Medium Density Residential or High Density Residential.

"**RMA**" means this Rate and Method of Apportionment, and Manner of Collection of Special Tax, as it may be amended from time to time in connection with Annexation Parcels or otherwise.

"**Single-Family Parcel**" means, in any Fiscal Year, all Parcels in the CFD for which a building permit was issued or may be issued for construction of a Unit that is a single-family residential, residential condominium, or townhouse Unit.

"**Small Lot Tentative Map**" means a map that is approved by the City for the purpose of showing the design of a proposed Subdivision, including the individual buildable lots expected in the Subdivision, as well as the conditions pertaining thereto. The Small Lot Tentative Map designation for this RMA is in reference only to the areas shown on the map on which Low-Density Residential and Medium-Density Residential uses would be permitted. A Small Lot Tentative Map is not based on a detailed survey of the property in the map and is not recorded at the County Recorder's Office to create legal lots.

"**Small Lot Tentative Map Parcel**" means, in any Fiscal Year, all Parcels included in a Small Lot Tentative Map that was approved before May 1 of the prior Fiscal Year that are planned for Low-Density Residential and Medium-Density Residential and which have not yet become a Developed Parcel.

"**Special Tax(es)**" mean(s) any tax levy under the Act in the CFD.

"**Subdivision**" or "**Subdivided**" means a division of a Parcel into two or more Parcels through Parcel reconfiguration, lot-line adjustments, or the Subdivision Map Act process. A Subdivision also may include the merging of two or more Parcels to create new Parcels.

"**Successor Parcel**" means a Parcel created by the Subdivision of an Original Parcel or a Successor Parcel.

"**Tax Category**" means the categories of taxable land uses shown in **Attachments 2, 3,** and **4**.

"**Tax Collection Schedule**" means the document prepared by the Administrator for the County Auditor-Controller to use in levying and collecting the Special Taxes each Fiscal Year.

"**Tax Escalation Factor**" means a factor of 2 percent by which the Maximum Annual Facilities Special Tax, Maximum Annual Maintenance Special Tax and related Maximum Annual Special Tax Rates shall be increased annually until the Transition Event. After the Transition Event, the Maximum Annual Maintenance Special Tax may be increased up to 2 percent annually at the

City's discretion. The Administrator should refer to Section 4a for application of the Tax Escalation Factor.

"**Taxable Acreage**" means that area of a Parcel determined by the Administrator to become a Taxable Parcel or Parcels upon further Subdivision. An example might be that a Large Lot Parcel Map creates a Remainder Parcel that, according to **Attachment 1**, contains both taxable uses and tax-exempt uses.

"**Taxable Parcel**" means any Parcel that is not a Tax-Exempt Parcel.

"**Tax-Exempt Parcel**" means a Parcel not subject to the Annual Special Tax. Tax-Exempt Parcels include (a) Public Parcels, and (b) Parcels owned by the City, school districts, special districts, or the state or federal government. A Taxable Parcel that is acquired by a public agency shall remain a Taxable Parcel as per the provisions of **Section 4.h**.

Certain privately-owned Parcels also may be exempt from the levy of Annual Special Taxes, including common areas owned by homeowner's associations or property owner associations, wetlands, detention basins, water quality ponds, and open space, as determined by the Administrator.

"**Transition Event**" means the earlier of (a) after the Initial Bonding period, the Fiscal Year in which the Administrator determines the Development Impact Fee Deferral, and any eligible Pay-As-You-Go Costs have been repaid in full to the City and City determines funding is no longer needed for Annual Facilities Costs, or (b) Fiscal Year 2084-85.

"**Transition Year**" means the first Fiscal Year following the Fiscal Year in which the Transition Event occurred.

"**Trustee**" means a national banking association organized and existing under the laws of the United States acting as a trustee or fiscal agent for Bonds.

"**Undeveloped Parcel**" means a Taxable Parcel that is not a Developed Parcel, Small Lot Tentative Map Parcel, or a Large Lot Parcel.

"**Unit**" means, for a Single-Family Parcel, the individual residential unit on such Parcel, or for a Multifamily For-Rent Parcel or Multifamily For-Sale Parcel, an individual residential unit in a multifamily building.

3. Duration of the Special Tax

The Facilities Special Tax will be levied and collected until the earlier of (i) the Transition Year or (ii) Fiscal Year 2084-85. The Maintenance Special Tax will be levied and collected beginning in the Transition Year. The Maintenance Special Tax will be collected in perpetuity.

4. Administrative Tasks for the Facilities Special Tax

Tasks required of the Administrator are discussed below:

a. Annual Special Tax Escalation. Until the Transition Event, the Administrator shall increase the Maximum Annual Facilities Special Tax, the Maximum Annual Maintenance Special Tax

and Maximum Annual Special Tax Rates by the Tax Escalation Factor in all Fiscal Years following the Base Year. After the Transition Event, the City, in its sole discretion, may determine whether to apply the Tax Escalation Factor to the Maximum Annual Maintenance Special Tax in any Fiscal Year.

b. Assignment of the Maximum Annual Facilities Special Tax to Original Parcels. **Attachment 3** identifies the Assigned Maximum Annual Facilities Special Tax for each Original Parcel at CFD formation, which is determined for each Large Lot Parcel based on the Expected Land Uses in each Large Lot Parcel at CFD Formation. The Assigned Maximum Annual Facilities Special Tax shall continue to apply to the geographic area to which it was assigned. If, before further Subdivision, the Administrator determines there are multiple Assessor's Parcels in a Large Lot Parcel, the Administrator shall assign the Maximum Annual Facilities Special Tax to each Assessor's Parcel on a pro rata basis to all Assessor's Parcels in that Large Lot Parcel based on the percentage share of Taxable Acreage identified for each Assessor's Parcel. Similarly, if the Administrator determines there are multiple Large Lot Parcels in an Assessor's Parcel, the Maximum Annual Facilities Special Tax shall equal the sum of the Assigned Maximum Annual Facilities Special Tax for all Large Lot Parcels in that Assessor's Parcel.

c. Assignment of the Maximum Annual Facilities Special Tax to Annexation Parcels. If Parcels are annexed to the CFD after formation, the Maximum Annual Facilities Special Tax shall be assigned to these Annexation Parcels using the definitions in **Section 2** and the Maximum Annual Facilities Special Tax per Unit or Acre shown in **Attachment 2** as adjusted by the Tax Escalation Factor applied by the Administrator, unless the Annexation Parcels are annexed with a new set of Maximum Annual Facilities Special Taxes. **Attachment 1** or **2** shall be amended, or a new attachment created, to include the Annexation Parcels and, if necessary, the applicable tax rates. If new Maximum Annual Facilities Special Taxes are created, **Attachments 1, 2,** and **3** should be amended to reflect the Maximum Annual Facilities Special Taxes for the Annexation Parcels. Once annexed, these annexed Parcels shall be considered Original and Successor Parcels and will be subject to the same procedures for assignment of the Maximum Annual Facilities Special Tax to Successor Parcels described in **Section 4.d**. The owner of the Annexation Parcels shall be responsible for paying all costs associated with annexing the Annexation Parcels to the CFD, but otherwise shall not be required to pay any other charge, fee or catch-up special tax in connection with or as a condition of such annexation unless otherwise agreed to by the owner of the Annexation Parcel in connection with the annexation.

d. Assignment of the Maximum Annual Facilities Special Tax to Successor Parcels. As Original Parcels and Successor Parcels are Subdivided through creation of Final Small Lot Subdivision Maps, lot line adjustments or other Parcel amendments through the Subdivision Map Act process, the Administrator shall use the following steps to assign the Maximum Annual Facilities Special Tax to new Successor Parcels. As a result of each assignment of the Maximum Annual Facilities Special Tax upon Subdivision of an Original Parcel or Successor Parcel, the sum of the Maximum Annual Facilities Special Taxes assigned to the newly created Taxable Parcels shall never be less, but may be greater, than the Assigned Maximum Annual Facilities Special Tax for that Original Parcel or Successor Parcel.

1. If an Original Parcel or Successor Parcel is Fully Subdivided into Single-Family Parcels with No Remainder Parcel(s). There shall be no net loss of Maximum CFD Special Tax Revenue as a result of the assignment of the Maximum Annual Facilities Special Tax to Single-Family Parcels. The Administrator shall use the following procedures to assign the Maximum Annual Facilities Special Tax to Single-Family Parcels. All references to Maximum Annual Facilities Special Taxes in the attachments are subject to application by the Tax Escalation Factor by the Administrator:

   A. Multiply the Maximum Annual Facilities Special Tax per Unit by Tax Category from **Attachment 2** by the number of Units for each Single-Family Parcel created by the Subdivision. Sum the Maximum Annual Facilities Special Taxes for all Single-Family Parcels created by the Subdivision.

   B. If the sum of Maximum Annual Facilities Special Taxes calculated in Step 4.d.1.A above is equal to or greater than the Assigned Maximum Annual Facilities Special Tax for the Original or Successor Parcel that was Subdivided, assign the Maximum Annual Facilities Special Tax per Unit by Tax Category as calculated in Step 4.1.d.A above to each Single-Family Parcel created by the Subdivision.

   C. If the sum of Maximum Annual Facilities Special Taxes calculated in Step 4.d.1.A above is less than the Assigned Maximum Annual Facilities Special Tax for the Original or Successor Parcel that was Subdivided, unless 100 percent of the Units are designated Affordable Units, (i) assign the Maximum Annual Facilities Special Tax for Affordable Units shown in **Attachment 2** to each Affordable Unit (if any) and, (ii) Proportionately increase the Maximum Annual Facilities Special Tax per Unit for all Units that are not Affordable Units until the sum of resulting Maximum Annual Facilities Special Taxes from all Units (including Affordable Units) equals the Assigned Maximum Annual Facilities Special Tax for the Original or Successor Parcel that was Subdivided. Assign the Maximum Annual Facilities Special Tax calculated in this step to each new Single-Family Parcel created by the Subdivision.

   D. If the sum of Maximum Annual Facilities Special Taxes calculated in Step 4.d.1.A above is less than the Assigned Maximum Annual Facilities Special Tax for the Original or Successor Parcel that was Subdivided **and** if 100 percent of the Single-Family Parcels created by Subdivision are designated as Affordable Units, increase Proportionately the Maximum Annual Facilities Special Tax per Unit for each Affordable Unit until the sum of Maximum Annual Facilities Special Taxes from all Affordable Units on the new Single-Family Parcels created by the Subdivision equal the Assigned Maximum Annual Facilities Special Tax for the Original or Successor Parcel that was Subdivided. Assign the Maximum Annual Facilities Special Tax calculated in this step to each new Single-Family Parcel created by the Subdivision.

2. If Original or Successor Parcel Is Subdivided into Single-Family Parcels and One or More Remainder Parcels. When an Original or Successor Parcel is Subdivided into Single-Family Parcels and one or more Large Lot Parcels (or Remainder Parcels), the Assigned Maximum Annual Facilities Special Tax is apportioned to the Single-Family Parcels and Large Lot Parcels created by the Subdivision in the following manner:

A. Apportion the Assigned Maximum Annual Facilities Special Tax to the area(s) that is/are being Subdivided into Single-Family Parcels and to the area(s) that will be Remainder Parcel(s) on a pro rata basis, based on the percentage share of Taxable Acreage represented by each such area as compared to the total area of the Original or Successor Parcel.

B. For each area Subdivided into Single-Family Parcels, multiply the Maximum Annual Facilities Special Tax per Unit by Tax Category from **Attachment 2** by the number of Units for each Single-Family Parcel created by the Subdivision. Sum the Maximum Annual Facilities Special Taxes for all Single-Family Parcels created by the Subdivision.

C. For each area Subdivided into Single-Family Parcels, if the sum of Maximum Annual Facilities Special Taxes calculated in Step 4.d.2.B above is equal to or greater than the Assigned Maximum Annual Facilities Special Tax apportioned to that area of the Original or Successor Parcel that was Subdivided into Single-Family Parcels, assign the Maximum Annual Facilities Special Tax per Unit by Tax Category as calculated in Step 4.d.2.B above to each Single-Family Parcel created by the Subdivision.

D. For each area Subdivided into Single-Family Parcels, if the sum of Maximum Annual Facilities Special Taxes calculated in Step 4.d.2.B above is less than the Assigned Maximum Annual Facilities Special Tax apportioned to that area of the Original or Successor Parcel that was Subdivided into Single-Family Parcels, unless 100 percent of the Units are designated Affordable Units, (i) assign the Maximum Annual Facilities Special Tax for Affordable Units shown in **Attachment 2** to each Affordable Unit (if any) and, (ii) Proportionately increase the Maximum Annual Facilities Special Tax per Unit for all Units that are not Affordable Units until the sum of resulting Maximum Annual Facilities Special Taxes from all Units (including Affordable Units) equals the Assigned Maximum Annual Facilities Special Tax apportioned to that area of the Original or Successor Parcel that was Subdivided into Single-Family Parcels. Assign the Maximum Annual Facilities Special Tax calculated in this step to each new Single-Family Parcel created by the Subdivision.

E. For each area Subdivided into Single-Family Parcels, if the sum of Maximum Annual Facilities Special Taxes calculated in Step 4.d.2.B above is less than the Assigned Maximum Annual Facilities Special Tax apportioned to that area of the Original or Successor Parcel that was Subdivided into Single-Family Parcels **and** if 100 percent of the Single-Family Parcels created by Subdivision are designated as Affordable Units, increase Proportionately the Maximum Annual Facilities Special Tax per Unit for each Affordable Unit until the sum of Maximum Annual Facilities Special Taxes from all Affordable Units on the new Single-Family Parcels created by the Subdivision equal the Assigned Maximum Annual Facilities Special Tax apportioned to that area of the Original or Successor Parcel that was Subdivided into Single-Family Parcels. Assign the Maximum Annual Facilities Special Tax calculated in this step to each new Single-Family Parcel created by the Subdivision.

F. For the Remainder Parcel or Parcels, identify the Maximum Annual Facilities Special Tax for the entire Original or Successor Parcel that has been Subdivided. Sum the Maximum Annual Facilities Special Tax for all Single-Family Parcels created by the

Subdivision, including Single-Family Parcels with Affordable Units. Subtract the sum of the Maximum Annual Facilities Special Tax for all Single-Family Parcels from the Assigned Maximum Annual Facilities Special Tax for the Original or Successor Parcel being subdivided and compare it to the Maximum Annual Facilities Special Tax assigned to the Remainder Parcel or Parcels in Step 4.d.2.A. Assign to each Remainder Parcel, the lesser of the calculations in this step or in Step 4.d.2.A, but in no event less than the difference between the previously Assigned Maximum Annual Facilities Special Tax for the Original Parcel or Successor Parcel being Subdivided and the total of the Maximum Annual Facilities Special Tax for all Single-Family Parcels created by such Subdivision.

Once designated as a Remainder Parcel, such Parcel will be considered a Large Lot Parcel for the purposes of future Subdivisions and for the provisions of **Sections 4** through **6**.

3. <u>If an Original or Successor Parcel is Subdivided creating multiple land uses and Tax Categories or for any rezones of land uses on Original or Successor Parcels</u>:

   A. Identify the Assigned Maximum Annual Facilities Special Tax for the Original Parcel or Successor Parcel that is being Subdivided or rezoned.

   B. For each Taxable Parcel subject to rezone or created by Subdivision multiply the Maximum Annual Facilities Special Tax per Unit or per Acre by the number of Units or by the number of Acres by the appropriate Tax Category. For each Taxable Parcel created by Subdivision that includes Affordable Units, multiply the number of Affordable Units by the Tax per Unit for such Affordable Units.

   C. Sum the Maximum Annual Facilities Special Tax for each Taxable Parcel and compare it to the Assigned Maximum Annual Facilities Special Tax of the Original or Successor Parcel that is subject to rezone or is being Subdivided. If the sum of Maximum Annual Facilities Special Tax for each Taxable Parcel is greater than the Assigned Maximum Annual Facilities Special Tax for the Original Parcel, the Administrator shall apply the Maximum Annual Facilities Special Tax calculated above for each Taxable Parcel.

   D. If the Assigned Maximum Annual Facilities Special Tax for the Original Parcel or Successor Parcel subject to rezone or that is being subdivided is greater than the sum of Maximum Annual Facilities Special Tax for each Successor Parcel being created, increase Proportionately the Maximum Annual Facilities Special Tax per Unit or per Acre for all Tax Categories on each Taxable Parcel such that the sum of Maximum Annual Facilities Special Tax for all Taxable Parcels equals the Assigned Maximum Annual Facilities Special Tax for the Original Parcel.

e. <u>Affordable Units that Become Market-Rate Units</u>. If, in any Fiscal Year, the City Manager, or his or her designee, determines that a Unit that previously had been designated as an Affordable Unit no longer qualifies as such, the Affordable Housing Director shall update the Affordable Unit listing by denoting the change in status of the Unit, together with the effective date thereof. For all Affordable Units that are converted to Market-Rate Units, such Units shall be assigned the Maximum Annual Facilities Special Tax per Unit based on their

Tax Category as shown in **Attachment 2**, as adjusted by the Tax Escalation Factor so long as the Special Tax does not decrease on such a Unit.

f. Transfer of the Assigned Maximum Annual Facilities Special Tax from One Large Lot Parcel to Another. The Maximum Annual Facilities Special Taxes shown in **Attachment 3** were determined based on the Expected Land Uses for each Large Lot Parcel shown in **Attachment 1**. If the number of planned residential Units or Nonresidential Acreage is transferred from one Large Lot Parcel to another before recording of a Final Small Lot Subdivision Map in any portion of the Large Lot Parcel, the City may, in its sole discretion, allow for a transfer of the Maximum Annual Facilities Special Tax from one Large Lot Parcel to another. Such a transfer shall be allowed only if (1) all adjustments are agreed to in writing by the affected property owners and the CFO, and (2) there is no reduction in the Maximum Annual CFD Special Tax Revenues as a result of the transfer. Should a transfer result in an amendment to **Attachment 1, 2, or 3** of the Notice of Special Tax Lien, the requesting property owner shall bear the costs to effect the transfer in the CFD records and prepare the required amendments to the Notice of Special Tax Lien and **Attachments 1, 2,** or **3**. Before the transfer, the City may require a deposit from the requesting property owner for such costs.

g. Conversion of a Tax-Exempt Parcel to a Taxable Parcel. If a Tax-Exempt Parcel is not needed for public use and is converted to a taxable use or transferred to a private owner, it shall become subject to the Facilities Special Tax. The Maximum Annual Facilities Special Tax for the newly Taxable Parcel will be determined using the provisions of **Sections 4** and **5** of the RMA.

h. Taxable Parcels Acquired by a Public Agency. A Taxable Parcel that is acquired by a public agency after the CFD is formed will remain subject to the applicable Special Tax unless the Special Tax obligation is satisfied pursuant to Section 53317.5 of the Government Code. An exception to this may be made if a Public Parcel, such as a park site, is relocated to a Taxable Parcel, in which case the previously Tax-Exempt Parcel of comparable acreage becomes a Taxable Parcel and the Maximum Annual Facilities Special Tax from the previously Taxable Parcel is transferred to the new Taxable Parcel. This trading of a Parcel from a Taxable Parcel to a Public Parcel will be permitted to the extent there is no net loss in Maximum Annual CFD Special Tax Revenue and the transfer is agreed to by the owners of the Parcels involved in the transfer and the CFO.

5. Administrative Tasks for the Maintenance Special Tax

This section discusses the administrative tasks for the Maintenance Special Tax, which shall be applicable after the Transition Event.

Tasks required of the Administrator are discussed below:

a. Assignment of the Maximum Annual Maintenance Special Tax to Developed Parcels. After the Transition Event, the Administrator shall assign the Maximum Annual Maintenance Special Tax to all Developed Parcels using the Maximum Annual Special Tax Rates for the Maintenance Special Tax by Tax Category shown in **Attachment 4**, as adjusted by the Tax Escalation Factor.

b. Assignment of the Maximum Annual Maintenance Special Tax to Successor Parcels. After the Transition Event, if Original Parcels and Successor Parcels are Subdivided through creation of Final Small Lot Subdivision Maps, lot line adjustments or other Parcel amendments through the Subdivision Map Act process, the Administrator shall use the steps in **Section 4.d** to assign the Maximum Annual Maintenance Special Tax to new Successor Parcels. ***When applying Section 4.d after the Transition Event, the Administrator shall substitute Maintenance Special Tax for Facilities Special Tax and shall substitute Maximum Annual Maintenance Special Tax for Maximum Annual Facilities Special Tax.***

c. Assignment of the Maximum Annual Maintenance Special Tax to Annexation Parcels. If Parcels are annexed to the CFD after formation, the Maximum Annual Maintenance Special Tax shall be assigned to these Annexation Parcels using the definitions in Section 2 and the Maximum Annual Maintenance Special Tax per Unit or Acre shown in **Attachment 4** as adjusted by the Tax Escalation Factor applied by the Administrator, unless the Annexation Parcels are annexed with a new set of Maximum Annual Maintenance Special Taxes. **Attachment 1** may be amended, or a new attachment created, to include the Annexation Parcels and, if necessary, the applicable tax rates. If new Maximum Annual Maintenance Special Taxes are created, **Attachment 4** should be amended to reflect the Maximum Annual Maintenance Special Taxes for the Annexation Parcels. Once annexed, these annexed Parcels shall be considered Original and Successor Parcels and will be subject to the same procedures for assignment of the Maximum Annual Maintenance Special Tax to Successor Parcels described in this section. The owner of the Annexation Parcels shall be responsible for paying all costs associated with annexing the Annexation Parcels to the CFD, but otherwise shall not be required to pay any other charge, fee or catch-up special tax in connection with or as a condition of such annexation unless otherwise agreed to by the owner of the Annexation Parcel in connection with the annexation.

d. Affordable Units that Become Market-Rate Units. If, in any Fiscal Year, the City Manager, or his or her designee, determines that a Unit that previously had been designated as an Affordable Unit no longer qualifies as such, the Affordable Housing Director shall update the Affordable Unit listing by denoting the change in status of the Unit, together with the effective date thereof. For all Affordable Units that are converted to Market-Rate Units, such Units shall be assigned the Maximum Annual Maintenance Special Tax per Unit based on their Tax Category as shown in **Attachment 4**, as adjusted by the Tax Escalation Factor.

e. Conversion of a Tax-Exempt Parcel to a Taxable Parcel. If a Tax-Exempt Parcel is not needed for public use and is converted to a taxable use or transferred to a private owner, it shall become subject to the Maintenance Special Tax. The Maximum Annual Maintenance Special Tax for the newly Taxable Parcel will be determined using the provisions of **Sections 5** and **6** of the RMA.

f. Taxable Parcels Acquired by a Public Agency. A Taxable Parcel that is acquired by a public agency after the CFD is formed will remain subject to the applicable Special Tax unless the Special Tax obligation is satisfied pursuant to Section 53317.5 of the Government Code. An exception to this may be made if a Public Parcel, such as a park site, is relocated to a Taxable Parcel, in which case the previously Tax-Exempt Parcel of comparable acreage becomes a Taxable Parcel and the Maximum Annual Maintenance Special Tax from the previously Taxable Parcel is transferred to the new Taxable Parcel. This trading of a Parcel

from a Taxable Parcel to a Public Parcel will be permitted to the extent there is no net loss in Maximum Annual CFD Special Tax Revenue and the transfer is agreed to by the owners of the Parcels involved in the transfer and the CFO.

6. Assignment of the Maximum Annual Special Tax

a. Classification of Parcels. For purposes of the next Fiscal Year tax levy, by June 30 of each Fiscal Year, using the Definitions in **Section 2**, the Parcel records of the Assessor's secured tax roll as of January 1, and other City development approval records, the Administrator shall cause:

   1. Each Parcel to be classified as a Taxable Parcel or Tax-Exempt Parcel.

   2. Each Parcel to be classified as a Developed Parcel, a Small Lot Tentative Map Parcel, a Large Lot Parcel (including Remainder Parcels), or an Undeveloped Parcel.

b. Assignment of the Maximum Annual Facilities Special Tax to Taxable Parcels. The Maximum Annual Facilities Special Tax will be assigned to each Taxable Parcel each Fiscal Year using the procedures (not all steps may be applicable for each such Parcel) in **Section 4**.

c. Assignment of the Maximum Annual Maintenance Special Tax to Taxable Parcels. Following the Transition Even, the Maximum Annual Maintenance Special Tax will be assigned to each Taxable Parcel each Fiscal Year using the procedures (not all steps may be applicable for each such Parcel) in **Sections 4** and **5**.

7. Calculating Annual Special Taxes

This section discusses the levy of the Facilities Special Tax and the Maintenance Special Tax. Collectively, these Special Taxes are included in the discussion of the assignment of the Maximum Annual Special Taxes. For the period following CFD formation until the Transition Event, the Maximum Annual Special Tax shall refer to the Facilities Special Tax. Beginning with the Transition Year, the Maximum Annual Special Tax shall refer to the Maintenance Special Tax.

The Administrator will compute the Annual Facilities Costs or Annual Maintenance Costs and determine the annual Special Tax levy for each Taxable Parcel based on the assignment of the Special Tax in **Sections 4, 5,** and **6**. The Administrator then will determine the tax levy for each Taxable Parcel using the following process:

Facilities Special Tax Levy

a. Compute the Annual Facilities Costs using the definition of Annual Facilities Costs in **Section 2**.

b. For all Taxable Parcels, calculate the Facilities Special Tax levy for each using the following steps:

   Step 7.b.1. The Facilities Special Tax shall be levied proportionately on all Developed Parcels up to the amount of Annual Facilities Cost or up to 100 percent of the Maximum Annual Facilities Special Tax Revenue for all Developed Parcels, whichever is less.

Step 7.b.2. If additional revenue is needed after *Step 7.b.1.*, the Facilities Special Tax shall be levied proportionately on each Small Lot Tentative Map Parcel until the revenue from the Facilities Special Tax levy in this step, when added to the levy amount computed in *Step 7.b.1.*, equals the Annual Facilities Costs, or up to 100 percent of the Maximum Annual Facilities Special Tax Revenue for all Small Lot Tentative Map Parcels. As necessary, the Facilities Special Tax shall be levied on Small Lot Tentative Map Parcels for the entire portion of Annual Facilities Costs, excluding Pay-As-You-Go Costs.

Step 7.b.3. If additional revenue is needed after *Step 7.b.2.*, the Facilities Special Tax shall be levied proportionately on each Large Lot Parcel until the revenue from the Facilities Special Tax levy in this step, when added to the levy amount computed through *Step 7.b.2.*, equals the Annual Facilities Costs, or up to 100 percent of the Maximum Annual Facilities Special Tax Revenue for all Large Lot Parcels. As necessary, the Facilities Special Tax shall be levied on Large Lot Parcels for the entire portion of Annual Facilities Costs, excluding Pay-As-You-Go Costs.

Step 7.b.4. If additional revenue is needed after *Step 7.b.3*., the Facilities Special Tax shall be levied on each Undeveloped Parcel until the revenue from the Facilities Special Tax levy in this step, when added to the levy amounts computed through *Step 7.b.3.*, equals the Annual Facilities Costs, or up to 100 percent of the Maximum Annual Facilities Special Tax Revenue for all Undeveloped Parcels. As necessary, the Facilities Special Tax shall be levied on Undeveloped Parcels for the entire portion of Annual Facilities Costs, excluding Pay-As-You-Go Costs.

Maintenance Special Tax Levy

c. Beginning in the Transition Year, compute the Annual Maintenance Cost using the definition of Annual Maintenance Costs in **Section 2**.

d. For all Taxable Parcels, calculate the Maintenance Special Tax levy for each using the following steps:

Step 7.d.1. The Maintenance Special Tax shall be levied proportionately on all Developed Parcels up to the amount of Annual Maintenance Cost or up to 100 percent of the Maximum Annual Maintenance Special Tax Revenue for all Developed Parcels, whichever is less.

Step 7.d.2. If additional revenue is needed after *Step 7.d.1.*, the Maintenance Special Tax shall be levied proportionately on each Small Lot Tentative Map Parcel until the revenue from the Maintenance Special Tax levy in this step, when added to the levy amount computed in *Step 7.d.1.*, equals the Annual Maintenance Costs, or up to 100 percent of the Maximum Annual Maintenance Special Tax Revenue for all Small Lot Tentative Map Parcels.

Step 7.d.3. If additional revenue is needed after *Step 7.d.2.*, the Maintenance Special Tax shall be levied proportionately on each Large Lot Parcel until the revenue from the Maintenance Special Tax levy in this step, when added to the levy amount computed through *Step 7.d.2.*, equals the Annual Maintenance Costs, or up to

100 percent of the Maximum Annual Maintenance Special Tax Revenue for all Large Lot Parcels.

Step 7.d.4. If additional revenue is needed after *Step 7.d.3*., the Maintenance Special Tax shall be levied on each Undeveloped Parcel until the revenue from the Maintenance Special Tax levy in this step, when added to the levy amounts computed through *Step 7.d.3*., equals the Annual Maintenance Costs, or up to 100 percent of the Maximum Annual Maintenance Special Tax Revenue for all Undeveloped Parcels.

e. Levy on each Taxable Parcel the amount calculated above.

f. Prepare the Tax Collection Schedule and, unless an alternative method of collection has been selected pursuant to **Section 9**, send it to the County Auditor requesting that it be placed on the general, secured property tax roll for the Fiscal Year. The Tax Collection Schedule will be sent no later than the date required by the County Auditor for such inclusion.

The Administrator will make every effort to calculate the Special Tax correctly for each Parcel. It will be the burden of the taxpayer to identify any errors in determining which Parcels are subject to the tax and their Special Tax assignments.

8. Prepayment of the Facilities Special Tax Obligation

A property owner may at any time prepay 50 percent, but not more or less than 50 percent of the Maximum Annual Facilities Special Tax. For Nonresidential Use Parcels, Full Prepayment is permissible at any time. Full Prepayment is not allowable for Residential Use Parcels.

In addition to the conditions above, the City may allow a Full or Partial Prepayment if the City determines that the Prepayment will not jeopardize its ability to make timely payments of Debt Service and maintain a 110-percent annual Debt Service coverage based on Maximum Annual Special Tax Revenues in all years where there will be Outstanding Bonds. Prepayments must be made by May 1 to have the Prepayment reflected in the following Fiscal Year's Special Tax levy. Prepayment is permitted only under the following conditions:

- The landowner prepaying the Facilities Special Tax on a Parcel has paid any delinquent Facilities Special Tax and penalties on that Parcel before Prepayment.
- Following Prepayment, amounts in the reserve fund are equal to or greater than the reserve fund requirement.
- The City determines that the Prepayment will not jeopardize its ability to make timely payments of Debt Service and maintain a 110-percent annual Debt Service coverage based on Maximum Annual Special Tax Revenues in all years in which issued Bonds will be outstanding.
- The portion of the Prepayment for the Development Impact Fee Deferral shall only be used to pay for the Development Impact Fee Deferral whether it was or is to be funded through annual special tax payments or through bonded indebtedness.

When permitted, the Administrator shall calculate Prepayments using the following steps:

a. The Full Prepayment amount shall be established by following the steps below:

Step 8.a.1: Determine the Facilities Special Tax for the Taxable Parcel for which the Facilities Special Tax is to be prepaid using the provisions of **Sections 4, 5,** and **6**. If the Parcel is not designated as a Developed Parcel, determine the applicable Facilities Special Tax for the Parcel assuming it is a Developed Parcel.

Step 8.a.2: Increase the Facilities Special Tax by 2 percent per annum for the longer of (i) 30 years from the year in which the Parcel was first subject to the Facilities Special Tax as a Developed Parcel, or (ii) the end of the then-remaining Initial Bonding Period.

Step 8.a.3: Using a discounted rate equal to the most current yield for the 30-Year Treasury Constant Maturity, calculate the net present value of the revenue stream determined *Step 8.a.2*. If this yield is no longer available, the Administrator will select a yield rate from the most comparable type of security.

Step 8.a.4: Add to the amount calculated in *Step 8.a.3* interest on the Bonds being redeemed to the next redemption date.

Step 8.a.5: Add to the amount calculated in *Step 8.a.4* a redemption premium on the Bonds being redeemed (if any) as identified in the Bond Indenture(s).

Step 8.a.6: Add to the amount calculated in *Step 8.a.5* the Development Impact Fee Deferral amount applicable to the Parcel, as adjusted for inflation. If Bonds have been issued to finance the Development Impact Fee Deferral, follow *Step 8.a.2* and *8.a.3*, using for *Step 8.a.2* the longer of (i) 30 years from the year in which the Parcel was first subject to the Facilities Special Tax during the Deferral Bonding Period, or (ii) the end of the then-remaining Deferral Bonding Period.

Step 8.a.7: Add the administrative cost of processing the Prepayment to the amount calculated in *Step 8.a.6*.

Step 8.a.8: The amount in *Step 8.a.7* is the amount of the Full Prepayment of the Maximum Annual Special Tax for the Taxable Parcel.

b. Partial Prepayments will be calculated as described below:

The amount of any Partial Prepayment is limited to 50 percent of the Full Prepayment amount determined in *Step 8.a.8*. A Partial Prepayment may only be made in an amount equal 50 percent of the Full Prepayment desired by the party making a Partial Prepayment, except that the full amount of Administrative fees and expenses determined in *Step 8.a.7* shall be included in the Partial Prepayment. The Facilities Special Tax that can be levied on a Parcel after a Partial Prepayment is made is equal to one-half of the Facilities Special Tax that could have been levied before the Partial Prepayment.

9. Interpretation, Application, and Appeal of Special Tax Formula and Procedures

Any taxpayer who feels the amount of the Special Tax assigned to a Parcel is in error may file a notice with the CFO appealing the levy of the Special Tax. The CFO then will promptly review the appeal and, if necessary, will meet with the applicant. If the CFO verifies that the tax should be modified or changed, the Special Tax levy will be corrected and, if applicable in any case, a credit or refund will be granted.

Interpretations may be made by the City, without Resolution or Ordinance of the Council, for purposes of clarifying any vagueness or ambiguity as it relates to the Special Tax rate, the method of apportionment, the classification of properties, or any definition applicable to the CFD.

Without Council approval, the CFO may make minor, non-substantive administrative and technical changes to the provisions of this RMA that do not materially affect the rate, method of apportionment, or manner of collection of the Special Tax for purposes of administrative efficiency or convenience or to comply with new applicable federal, state, or local law.

The City, upon request of an owner of land in the CFD that is not a Developed Parcel, also may amend this RMA in any manner acceptable to the City, without Resolution or Ordinance of the Council, upon the affirmative vote of such owner and without the vote of owners of any other land in the CFD, provided such amendment is only applicable to such owner's land and does not reduce the total Maximum Annual CFD Special Tax Revenue.

10. Manner of Collection

The Special Tax will be collected in the same manner and at the same time as ad valorem property taxes, provided, however, the Administrator or its designee may directly bill the Special Tax and may collect the Special Tax at a different time, such as on a monthly or other periodic basis, or in a different manner, if necessary, to meet the City's financial obligations.

EXHIBIT B

City of Roseville
SVSP Westpark-Federico Community Facilities District No. 1
(Public Facilities)

LIST OF AUTHORIZED FACILITIES AND SERVICES

Transportation Improvements

Public roadway improvements designed to meet the needs of the project, including those improvements identified in the project Development Agreement (DA) Sections 3.5.17 and 3.5.18, including but not limited to;

- Westbrook Boulevard.
- Santucci Boulevard.
- Summerfaire Drive.
- Federico Drive.
- Silver Spruce Drive.
- Sierra Glen Drive.
- Vista Park Drive.
- Market Street.

Eligible roadway improvements include the following items: acquisition of land and easements; roadway design; project management; geotechnical engineering, testing and observations; bridge crossings and culverts; clearing, grubbing, and demolition; grading, soil import/export, paving (including slurry seal), and decorative/enhanced pavement concrete or pavers; power pole relocations; joint trenches, underground utilities, and undergrounding of existing utilities; dry utilities and appurtenances; curbs, gutters, sidewalks, bike trails (including on- and off-site), park and ride facilities, bus rapid transit improvements, including transfer stations and regional public transit improvements; retaining walls, sound walls, enhanced fencing, and access ramps; street lights, signalization, and traffic signal control systems; bus turnouts; signs and striping; erosion control; median and parkway landscaping and irrigation; entry monumentation; bus shelters; masonry walls; traffic control and agency fees; and other improvements related thereto. Eligible improvements for the roads listed above also include any and all necessary underground potable and non-potable water, sanitary sewer, and storm drainage system improvements.

Potable and Non-Potable Water System Improvements

Authorized facilities include any and all on- and off-site backbone water facilities designed to meet the needs of development of the project. These facilities include potable and non-potable mains, valves, services, and appurtenances; wells; and water treatment and storage facilities, and related improvements, including but not limited to: site clearing, grading, and paving; curbs and gutters; recycled water storage tanks, booster pump stations, and all appurtenances thereto; wells; water treatment; stand-by generator; site lighting, drainage, sanitary sewer, and water service; landscaping and irrigation; access gates and fencing; striping and signage; and the following:

- Water lines in/associated with authorized facility roads.
- Recycled water lines in/associated with authorized facility roads.
- Well construction or financial contributions thereto on, but not limited to, FD-63 or JM-60.
- Water Tank Site Improvements (DA Section 3.8.2).
- Recycled Water Storage Tank Facility
- Reimbursement obligation for the Baseline Road 24" water line (DA Section 3.8.3).
- CFD obligations for RW tank(s) required by DA Section 3.9.

Drainage System Improvements

Authorized facilities include any and all on- and off-site backbone drainage and storm drainage improvements designed to meet the needs of development of the project. These facilities include mains, pipelines and appurtenances, outfalls and water quality measures, temporary drainage facilities, detention/retention basins, and drainage pretreatment facilities; drainage ways/channels, pump stations, landscaping, and irrigation; access roads, gates, and fencing; striping and signage; and the following:

- All storm drain lines and facilities in/associated with authorized facility roadways.
- Retention, detention, hydro-modification, and other drainage facilities.

Wastewater System Improvements

Authorized facilities include any and all on- and off-site backbone wastewater facilities designed to meet the needs of development of the project. These facilities include pipelines and all appurtenances thereto; manholes; tie-in to existing main line; force mains; lift stations; odor-control facilities; sewer treatment plant improvements and permitting related thereto; and related sewer system improvements, including but not limited to:

- All wastewater facilities in/associated with authorized facility roadways.

Solid Waste Improvements

Authorized facilities include any and all backbone solid waste improvements designed to meet the needs of development of the project. Eligible improvements also include the project's pro-

rata contribution, as described in the project DA, to the Sierra Vista Specific Plan (SVSP) Solid Waste Recycling Center (DA Section 3.26(iii)).

Park, Landscape Corridor and Paseo Improvements

Authorized facilities include any and all improvements to parks, landscape corridors and paseos located in the project, including but not limited to:

- Construction of Park Sites FD-50, FD-51.
- Construction of Paseos FD-70, FD-71, FD-72, FD-73, FD-74, FD-75 and FD-76.

Open Space Improvements

Authorized facilities include any and all open space improvements designed to meet the needs of development of the project, including bike trails, bike/pedestrian bridges, storm drain crossings, storm drain detention/retention, wetland mitigation, tree mitigation, on-and off-site hawk/raptor mitigation, agricultural mitigation or wetland mitigation, property acquisition, endowment payments for open space management, landscaping and irrigation, access gates and fencing, and related open space improvements, including but not limited to:

- Improvements related to FD-83, FD-84, and FD-85.
- Wetland creation mitigation, fencing, etc.

Utilities

Authorized facilities include any and all on- and off-site utility improvements designed to meet the needs of development of the project. All utility improvements, easement payments, and land acquisition not located under or alongside transportation improvements are considered authorized facilities. Authorized facilities also shall include costs related to the acquisition of the off-site electric substation site; site clearing; grading; street frontage improvements, including curbs, gutters, and paving; and construction of an all-weather access road to the site from the nearest public street or extension of temporary 12kV overhead lines as described in the project DA, including but not limited to:

- SVSP Electric Substation site acquisition, and improvements required by DA Section 3.11.3.
- Temporary overhead 12kV lines to loop SVSP substation to line in WRSP Phase 3 and 4.

Other Public Facilities

Authorized facilities includes any and all public facilities or infrastructure, including the project's pro-rata contribution to the land acquisition of the off-site fire station site, site clearing, grading, and street frontage improvements including curbs, gutters, and paving, including but not limited to:

- Fire Station site reimbursement obligations in DA Section 3.23

Development Impact Fees

Authorized facilities include development impact fees paid and not otherwise reimbursed, whether standard City or County fees levied at the time of the issuance of a building permit or required as part of the DA for the property. Fees include, but are not limited to, the South Placer Regional Transportation Authority Tier II Traffic Fee, City of Roseville City Wide Park Fee, City of Roseville Public Facilities Fee, and Public Benefit Fee (as defined in Section 3.14.3 of the DA for the property).

Authorized Services

The authorized services to be funded from the levy and collection of annual maintenance special taxes are the provision of public services, maintenance and operation related to any facilities authorized to be funded by the CFD with a useful life of five or more years, including but not limited to performance by employees of functions and repair activities. Maintenance as used herein includes replacement and the creation and funding of a reserve fund to pay for a replacement of such facilities. The maintenance special taxes shall only fund authorized services to the extent that they are in addition to those provided to land within the CFD prior to the creation of the CFD. In addition, costs eligible to be financed by the CFD shall include all costs associated with the ongoing administration of the CFD, determination of the amount of taxes and collection of taxes, and other costs related to the authorized services provided by the City as permitted by the Act, payment of taxes; and any other costs incurred to carry out the authorized purposes of the CFD.

Formation, Administrative, and Incidental Expenses

In addition to the above facilities, other expenses incidental to the above and authorized by the Mello-Roos Community Facilities Act of 1982, including but not limited to: the cost of planning, permitting, and designing the facilities (including the cost of environmental evaluation, orthophotography, environmental remediation/mitigation, and preparation of an overarching Operation and Maintenance Plan for the City of Roseville Open Space Preserves); land acquisition and easement payments for the facilities; project management; construction staking; engineering studies and reports; utility relocation and demolition costs incidental to construction of the facilities, wetland/Species mitigation purchase; reimbursements to other areas for infrastructure facilities or planning serving development in the CFD; Sierra Vista Specific Plan planning, legal, engineering, technical studies costs related to the facilities and any other expenses incidental to the construction, completion, and inspection of the facilities.

In addition, costs eligible to be financed by the CFD shall include all costs associated with the formation and ongoing administration of the CFD and issuance of bonds; determination of the amount of taxes and collection of taxes; inspection, plan check and other costs related to acceptance of the facilities by the City, payment of taxes; and any other costs incurred to carry out the authorized purposes of the CFD.

EXHIBIT C

FORM OF

NOTICE OF PUBLIC HEARING ON PROPOSED CITY OF ROSEVILLE SVSP WESTPARK-FEDERICO COMMUNITY FACILITIES DISTRICT NO. 1 (PUBLIC FACILITIES) AND FUTURE ANNEXATION AREA CITY OF ROSEVILLE, PLACER COUNTY, CALIFORNIA

The City of Roseville is considering the formation of a community facilities district (the "CFD") and a future annexation area for the CFD (the "Future Annexation Area") under the authority of the Mello-Roos Community Facilities Act of 1982, as amended, to fund certain public facilities related to new development within the City of Roseville, and to incur bonded indebtedness of the CFD.

This Notice contains a brief summary of the proposal, but you are referred to the City Council's Resolution of Intention of the City Council of the City of Roseville to Form a Community Facilities District and Future Annexation Area, and Levy a Special Tax in the City of Roseville SVSP Westpark-Federico Community Facilities District No. 1 (Public Facilities) to Finance Public Services and the Acquisition and Construction of Certain Public Facilities in and for Such Community Facilities District (No. 19-_____, adopted _____, 2019) and its Resolution of The City Council of the City of Roseville of Intention to Incur Bonded Indebtedness to Finance the Acquisition and Construction of Certain Public Facilities in and for the City of Roseville SVSP Westpark-Federico Community Facilities District No. 1 (Public Facilities) (No. 19-_____, adopted _____, 2019) for details of the proposals.

The proposal is to subject the property within the CFD to a special tax which will be used to pay for authorized services and facilities within the CFD, including paying principal and interest on bonds used to build facilities. The proceeds of the bonds will be used to pay for the facilities and other expenses set forth in the resolutions referred to in the preceding paragraph. A map showing the land proposed to be included in the CFD and the Future Annexation Area is on file with the City Clerk.

Property within the Future Annexation Area will be annexed to the CFD, and a special tax will be levied on such property, only with the unanimous approval of the owner or owners of each parcel or parcels at the time that parcel or those parcels are annexed to the CFD, without additional hearings or proceedings.

As set forth below, the City Council will hold a public hearing on the establishment of the CFD and the Future Annexation Area, the services and the facilities to be financed by the CFD, and the levy of the special tax within the CFD.

The proposal also includes authority to issue up to $90,000,000 in bonds (excluding certain refunding bonds) to be repaid by the facilities portion of the special tax. Neither the City

of Roseville nor any person outside the CFD has any liability for the special tax or the bonds. The security for the bonds is limited to the property subject to the special tax within the CFD.

In order to confer the authority upon the City Council of the City of Roseville to levy the special tax and to issue the bonds, a public hearing must be held on the proposal, then the City Council will decide whether to form the CFD, and finally the qualified electors within the CFD must approve the proposal by a two-thirds vote. Where the CFD is uninhabited (as is the case here) the qualified electors are, pursuant to law, the owners of property within the CFD.

This is the notice of the public hearing. The public hearing will be held during the City Council meeting on May 1, 2019 at 7:00 p.m., in the Roseville Civic Center Council Chambers located at 311 Vernon Street, Roseville, California 95678.

At the hearing, the testimony of all interested persons or potential special taxpayers for or against the formation of the CFD and the Future Annexation Area, the authorization to levy the special tax, and the authorization to issue the bonds will be heard.

If written protests against the proposed CFD are delivered to the City Clerk at or before the time set for the hearing by either registered voters residing within, or the owners of property within, the proposed CFD, they will be counted toward a possible majority protest. Such protests by a majority of the registered voters residing within the CFD or by the owners of a majority of the land area within CFD which is or will be subject to the special tax, if not withdrawn prior to the close of the hearing so as to reduce the value of the protests to less than a majority, will require the proposed CFD to be eliminated from immediate consideration, and prevent its being included in a subsequent proceedings for at least one year.

If written protests against the establishment of the proposed Future Annexation Area are delivered to the City Clerk at or before the time set for the hearing by either registered voters residing within, or the owners of property within, the proposed Future Annexation Area, they will be counted toward a possible majority protest. Such protests by a majority of the registered voters residing within the proposed Future Annexation Area or by the owners of a majority of the land area within the proposed Future Annexation Area which is or will be subject to the special tax when annexed to the CFD, if not withdrawn prior to the close of the hearing so as to reduce the value of the protests to less than a majority, the City Council shall take no further action to create the Future Annexation Area for a period of one year from the date of decision of the City Council.

If the City Council, after the public hearing, determines that a majority protest under Section 53324 of the California Government Code was not made at the hearing, the City Council may conduct an election by mailed ballot to levy a special tax within the CFD.

Questions should be directed to the undersigned, telephone (916) 774-5263.

Dated: _____, 2019

/s/ Sonia Orozco
Sonia Orozco, City Clerk
City of Roseville

CITY COUNCIL OF THE CITY OF ROSEVILLE

RESOLUTION NO. 19-82

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF ROSEVILLE OF INTENTION TO INCUR BONDED INDEBTEDNESS TO FINANCE THE ACQUISITION AND CONSTRUCTION OF CERTAIN PUBLIC FACILITIES IN AND FOR THE CITY OF ROSEVILLE SVSP WESTPARK-FEDERICO COMMUNITY FACILITIES DISTRICT NO. 1 (PUBLIC FACILITIES)

WHEREAS, the City Council of the City of Roseville (the "City Council") has this date adopted its Resolution of Intention of the City Council of the City of Roseville to Form a Community Facilities District and Future Annexation Area, and Levy a Special Tax in the City of Roseville SVSP Westpark-Federico Community Facilities District No. 1 (Public Facilities) to Finance Public Services and the Acquisition and Construction of Certain Public Facilities in and for Such Community Facilities District (the "Resolution of Intention"), stating its intention to form the City of Roseville SVSP Westpark-Federico Community Facilities District No. 1 (Public Facilities) (the "CFD") and a future annexation area for the CFD pursuant to the Mello-Roos Community Facilities Act of 1982, as amended, Chapter 2.5 of Part 1 of Division 2 of Title 5, commencing at Section 53311, of the California Government Code (the "Act"), for the purpose of financing certain public improvements (the "Facilities") and public services, as further provided in that Resolution of Intention; and

WHEREAS, the City Council estimates the amount required for the financing of the costs of the Facilities for the initial boundaries of the CFD to be the sum of not to exceed $90,000,000 and in order to finance the costs of the Facilities it is necessary to incur bonded indebtedness on behalf of the initial CFD in not to exceed such amount.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF ROSEVILLE RESOLVES AS FOLLOWS:

1. The City Council declares and finds that in order to finance the acquisition and construction of public facilities described in the City Council's Resolution of Intention, captioned "A Resolution of Intention of the City Council of the City of Roseville to Form a Community Facilities District and Future Annexation Area, and Levy a Special Tax in the City of Roseville SVSP Westpark-Federico Community Facilities District No. 1 (Public Facilities) to Finance Public Services and the Acquisition and Construction of Certain Public Facilities in and for Such Community Facilities District" it is necessary to incur a bonded indebtedness.

2. The purpose for which the proposed debt is to be incurred is to provide the funds necessary to pay for the cost of said Facilities.

3. The maximum amount of proposed debt for the initial CFD is $90,000,000. Indebtedness subject to this limit shall only include indebtedness evidenced by bonds or notes secured by the special tax levied in the initial boundaries of the CFD, and shall not include bonds described in Section 53364.2(e) of the Act. Such maximum amount shall not include any amount established for a future improvement area created from the Future Annexation Area.

In connection with annexation from the Future Annexation Area established for the CFD, the City may designate a parcel or parcels as an improvement area within the CFD without additional hearings or procedures, and thereafter all proceedings for approval of the

appropriations limit, the rate and method of apportionment and manner of collection of special taxes, and the authorization to incur bonded indebtedness for the improvement area, to the extent such limitations differ from the CFD or any other improvement area, shall apply only to the improvement area.

4. It is the intention of the City Council that any such bonds issued may be issued in multiple series and shall be made callable in accordance with the terms of the Act and as more specifically to be set forth in any resolution authorizing issuance of the bonds, and shall be issued in such series and bear interest payable semi-annually or in such other manner as the City Council shall determine, at a rate not to exceed the maximum rate of interest as may be authorized by applicable law at the time of sale of such bonds, and shall mature not to exceed 40 years from the date of the issuance thereof.

5. In the event any series of bonds issued under the authorization is refunded to produce savings meeting the requirement of Section 53362.5 of the Act, all or a portion of the savings achieved through the issuance of refunding bonds may be used to finance Facilities insofar as the savings component provides capacity for bonded indebtedness in excess of that being refunded, and such additional bonded indebtedness shall not reduce and may exceed the amount of bonded indebtedness authorized herein.

6. The City Council hereby sets May 1, 2019, at 7:00 p.m., at the City of Roseville Civic Center Council Chambers located at 311 Vernon Street, Roseville, California 95678, as the time and place for a hearing by the City Council on the proposed bond issue. At that time and place any persons interested, including any persons owning property in the CFD, will be heard.

7. The City Clerk is hereby directed to cause notice of said public hearing to be given by one-time publication in a newspaper of general circulation circulated within the CFD and the future annexation area. The publication of said notice shall be completed at least 7 days before the date herein set for said public hearing. Such notice shall be substantially in the form specified in Section 53346 of the Act, with the form summarizing the provisions hereof hereby specifically approved.

8. This Resolution shall take effect from and after its adoption.

* * * * * *

I hereby certify that the foregoing resolution was duly and regularly adopted by the City Council of the City of Roseville, California, at a regularly scheduled meeting thereof, held on the _____ day of _____, 2019 by the following vote of the City Council:

Item #: 6.18.

RECOMMENDATION TO COUNCIL

Staff recommends City Council adopt a resolution approving the changes to the City of Roseville Goals and Policies Concerning the Use of Mello-Roos Community Facilities Act of 1982 effective March 20, 2019.

BACKGROUND

The City Council approved Resolution No. 17-85 which adopted the City of Roseville Goals and Policies Concerning the Use of Mello-Roos Community Facilities Act of 1982 as a stand alone policy. Prior to that, it was included as an appendix as part of the debt management policy.

Staff is recommending City Council approve The Goals and Policies Concerning the Use of Mello-Roos Community Facilities Act of 1982 with revisions to the language in the document to help clarify the meaning of the policy.

The policy is also being revised to reference the newly established Schedule of Maintenance Costs and Charges that is applicable to all annexations and newly formed maintenance CFDs. This schedule will provide for a uniform set of City costs associated with the ongoing operations, maintenance, and administration of services provided within a new development area that can be financed by the levy of Special Taxes in maintenance/services Districts.

Also included in the revised policy is the addition of a newly approved program, Bond Opportunities for Land Development (BOLD), in which the City permits the formation of Community Facilities Districts on land in the City on its behalf by a joint powers authority of which the City is a member.

FISCAL IMPACT

The Goals and Policies Concerning the Use of Mello-Roos Community Facilities Act of 1982 will

not have any impact of the City's General Fund.

ECONOMIC DEVELOPMENT / JOBS CREATED

Approval of the policy will not have any impact on economic development or job creation.

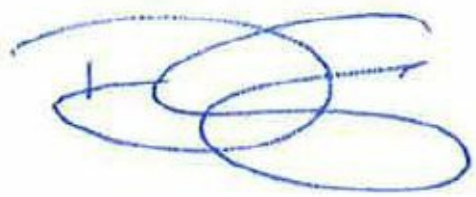
ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment (CEQA Guidelines §15061(b)(3)). The adoption of amended policies and procedures does not include the potential for a significant environmental effect, and therefore is not subject to CEQA.

Respectfully Submitted,

Jeannine Thrash, Administrative Analyst

Dennis Kauffman, Chief Financial Officer



_____
Dominick Casey, City Manager

Description

Resolution No. 19-78

Goals and Policies Concerning Use of Mello-Roos Facilities Act of 1982

Redline Goals and Policies

RESOLUTION NO. 19-78

ADOPTING THE AMENDED GOALS AND POLICIES CONCERNING THE USE OF MELLO-ROOS COMMUNITY FACILITIES ACT OF 1982

WHEREAS, in 2017, the City Council adopted the Goals and Policies Concerning Use of Mello-Roos Community Facilities Act of 1982; and

WHEREAS, the policy is being revised to help clarify the meaning of the policy as well as to reference newly established Schedule of Maintenance Costs and Charges that is applicable to all annexations and newly formed maintenance Community Facility Districts (CFDs); and

WHEREAS, the revisions also include the addition of a newly approved program, Bond Opportunities for Land Development (BOLD); and

WHEREAS, the amended Goals and Policies Concerning Use of Mello-Roos Community Facilities Act of 1982 have been reviewed by the City Council;

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Roseville that said amended Goals and Policies Concerning Use of Mello-Roos Community Facilities Act of 1982 are hereby adopted.

PASSED AND ADOPTED by the Council of the City of Roseville this ___ day of _____, 20__, by the following vote on roll call:

	Mello-Roos Community Facilities District Formation Process	12

INTRODUCTION

The purpose of these Goals and Policies is to establish for the City of Roseville (the "City") a set of guidelines for the formation and administration of Community Facilities Districts (also referred to as "CFDs" or "Districts"). The underlying principles behind the proposed policies are public interest and benefit, fairness to current and future property owners and homeowners, avoidance of future failure of the project and/or property owner protest, protection of the City's financial position, and reimbursement to the City of its incurred expenses.

Community Facilities District laws are found in the Mello-Roos Community Facilities Act of 1982 in the California Government Code, beginning at Section 53311 (the "Mello-Roos Act"). These Goals and Policies are adopted by the City in compliance with Section 53312.7 of the Mello-Roos Act.

1. GOALS & POLICIES

The City has developed the following Goals and Policies on financing facilities and/or services through the formation of Community Facilities Districts, including financing public facilities through the issuance of debt to be repaid from proceeds of special taxes levied within the districts. It is the City's goal to support projects which address a public need and provide a public benefit. Proposed projects requesting Community Facility District debt financing will be evaluated to determine if such financing is financially viable and in the best interest of the City and current and future City and project residents.

The City may consider facilities or services District formation on its own initiative and also will consider developer or property owner initiated applications requesting the formation of Community Facilities Districts and the issuance of bonds to finance eligible public facilities necessary to serve newly developing commercial, industrial and residential projects in the following instances:

(1) When tax-exempt financing of project public facilities will result in a significant public benefit; and/or

(2) When the City has negotiated and executed a Development Agreement addressing project implementation; and/or

(3) When City-based needs and circumstances warrant financing Public Services or Public Facilities through a Special Tax to provide significant public benefit.

Generally, community serving public facilities will be eligible for this tax-exempt financing program. Facilities will be financed and Districts formed in accordance with the then current provisions of the Mello-Roos Act, or any other methodology legally available to the City to finance such improvements.

Each time public facilities are to be built or accepted by the City, or a Community Facilities District is formed for the benefit of a development project, and if maintenance requirements will exceed normal City standards and/or if City services will need to be expanded to facilitate the project, the City will require the creation of a maintenance/services District or Home/Property Owners Association suitable to provide such needs. The City may also annex projects into existing maintenance/services Districts. The maintenance or services District may be established pursuant to the provisions of the Mello-Roos Act, or any other methodology legally available to the City to finance such maintenance. The purpose of the services/maintenance District is to fund the ongoing costs of parks and open space, public landscaping, police and fire protection services and library services and maintenance not funded by other sources; and/or to pay for any unfunded ongoing City maintenance or service costs associated with a development project in the City, all in accordance with the Mello-Roos Act and the formation documents for each particular District.

Existing neighborhoods may petition the City for the use of financing to fund local or neighborhood serving Public Services and/or Public Facilities in accordance with the Mello-Roos Act.

The City shall make the determination as to whether a proposed District shall proceed under the provisions of the Mello-Roos Act, or any other methodology legally available to the City to finance improvements, services or maintenance. The City may confer with consultants and the Applicant to learn of any unique District requirements such as facilities or services serving the regional area or long-term development phasing prior to making any final determination.

All City and consultant costs incurred in the evaluation of new development, District applications, and the establishment of Districts will be paid by the Applicant(s)/petitioner(s) by advance deposit increments. The City shall not incur any non-reimbursable expense for processing Community Facilities Districts. Expenses not chargeable to the District shall be borne by the Applicant(s)/petitioner(s).

The City has established a Schedule of Maintenance Costs and Charges applicable to new development projects in the City, which provides a uniform set of City costs associated with the ongoing operations, maintenance, and administration of services provided within new development areas that can be financed by the levy of Special Taxes in maintenance/services Districts. The City will update this Schedule by Resolution from time to time to ensure new development projects continue to self-fund the prevailing costs incurred to provide annual and ongoing services in these new areas, as well as pay for the ongoing administration of Districts formed in such areas.

In addition to forming and administering its own Districts, the City may also permit the formation of Community Facilities Districts on land in the City and on its behalf by joint powers authorities of which the City is a member, such as through the California Municipal Finance Authority's Bond Opportunities for Land Development (BOLD) program.

2. DEFINITIONS

Unless the context otherwise requires, the terms employed in these Goals and Policies shall have the meanings specified below:

"Applicant" means a developer or other person requesting formation of a District.

"City" means the City of Roseville.

"Community Facilities District" or "District" means a Community Facilities District formed under the Mello-Roos Act.

"Pay-As-You-Go Basis" means the use of annual and/or one-time special tax revenues to directly fund the acquisition, construction, or improvement of Public Facilities, or to fund other authorized costs of a District.

"Public Facilities" means improvements authorized to be constructed or acquired under the Mello-Roos Act including, but not limited to, costs for specified capital facilities imposed by public agencies as a condition to approval of the development encompassed by the District or as a condition to service the District, which may include, but is not limited to, infrastructure improvements such as major streets and arterials; highway improvements and freeways; freeway interchanges; right of way acquisitions; bridges, water, sewer and drainage improvements; landscape irrigation and drainage facilities; environmental mitigation and remediation; bicycle and pedestrian facilities; parks; wetlands; electrical conduits; transit improvements; and other improvements as which are defined as authorized improvements under the Community Facilities District(s) selected by the City or any ordinance adopted by the City.

"Public Services" means services eligible for District financing provided for in the Mello-Roos Act, and for new development will particularly include those which benefit properties within a proposed development or area of the City subject to the special tax or the City at large and may include reserves for replacement of equipment facilitating maintenance and operation of the included City services, all as further specified in the Mello-Roos Act.

"Special Tax" means tax(es) authorized to be levied by the City on behalf of a District on property within the boundary of the District.

"Value" or "Fair Market Value" means the amount of cash or its equivalent which a property would bring if exposed for sale in the open market under conditions in which neither buyer nor seller could take advantage of a difficulty of the other, both having knowledge of all of the uses and purposes to which the property is adapted, and for which it is capable of being used and of the enforceable restrictions upon its uses and purposes.

3. ELIGIBLE PUBLIC FACILITIES AND SERVICES

Public Facilities eligible for District financing are those improvements which benefit properties within a proposed development, and/or will mitigate impacts of that development upon areas of the City outside the proposed development and/or are otherwise determined by the City to be authorized improvements for a District, and which will be owned, operated and maintained by the City or another public agency as approved by the City.

The City has final determination as to any facility's eligibility for financing as well as the prioritization of facilities to be included within a financing District. Generally, "in-tract" (i.e., local streets) improvements will not be considered eligible.

If a school is financed, the school district's goals and policies, if any, including its priority access policy will be coordinated with the formation of a District.

Public Services eligible for District financing are those types of services and maintenance activities which benefit properties within a proposed development or area of the City subject to the Special Tax as determined by the City, subject to the limitations and other requirements specified in the Mello-Roos Act.

4. VALUE-TO-LIEN RATIO

The City may sell bonds for the District only if it determines that the value of the real property that would be subject to the special tax to pay debt service will be at least three (3) times the principal amount of the bonds to be sold and the principal amount of all other bonds outstanding that are secured by a special tax or bonded special assessment. Such determination will be based upon the full cash value as shown on the ad valorem assessment roll or upon an appraisal of the subject property made in a manner consistent with policies of the City. Requirements of a higher value to lien ratio may be imposed by the City and will be determined by City staff with recommendations from bond counsel, financial advisor, and the underwriter, with consideration of the facts pertaining to each particular project, including diversification of land ownership. Each project will be considered on its own merits. Additionally, the aggregate value to lien ratio of no more than five percent (5%) of the parcels expected to be subject to special taxes to pay debt service shall be below 3:1 or such higher ratio as determined by the City. The City may allow exceptions to its value to lien ratio requirements in accordance with the Mello Roos Act if it finds and determines that the proposed bonds do not present any unusual credit risk due to the availability of credit enhancements or for other reasons determined by the City.

The appraisal shall be coordinated by, under the direction of, and addressed to the City. All costs associated with the preparation of the appraisal report shall be paid by the Applicant through the advance deposit mechanism. The appraisal shall be conducted in accordance with criteria, standards and assumptions established by the City, based upon the recommendations for each specific project received from the underwriter and financial advisor designated by the City. In every case, the appraisal shall reflect recognized appraisal standards for land-secured bond

financing. The City prefers that the appraisal be prepared in accordance with the recommendations of the California Debt and Investment Advisory Commission as contained in the Appraisal Standards for Land-Based Secured Financings, and deviations therefrom will only be considered upon recommendation from bond counsel, financial advisor, the underwriter and/or the appraiser, with consideration of the facts pertaining to each particular project. The appraised land value should include the value attributable to the Public Facilities to be financed by the bonds being issued for the District assuming they have been completed.

5. MARKET ABSORPTION STUDY

The City may require a market absorption study, and may retain a consultant to prepare a report to verify market absorption assumptions and projected sales prices of the properties subject to the special taxes in the District. The study, if required, shall include an estimate of the total number of units, land uses and rate of absorption, and will be used as a basis for verification that sufficient revenues can be generated, and to determine if the financing of the infrastructure and public facilities is appropriate given the projected level and pace of development. All City and consultant costs incurred for this study will be paid by the Applicant by advance deposit or out of special taxes or bond proceeds.

The study will also be provided to the appraiser for use in the appraisal process. The market absorption study should be completed prior to completion of the appraisal, and the appraisal shall take into consideration and reasonably reconcile to the conclusions of the market absorption study or include reasons for significant alternate conclusions.

6. SECURITY

For new development, the Applicant or property owner must demonstrate its financial plan and ability to pay all special taxes before full build-out has taken place to the satisfaction of the City. Additional security such as credit enhancement may be required by the City in its sole discretion in certain instances.

If the City requires letters of credit or other credit enhancement, the credit enhancement shall be issued by an institution in a form and upon terms and conditions satisfactory to the City. All fees payable on the letter of credit or other security shall be the sole responsibility of the District Applicant or developer, not the City or District. Any security required to be provided by the Applicant shall be discharged by the City upon the opinion of a qualified appraiser retained by the City that the value-to-lien ratio has reached an acceptable level as determined by the City or upon meeting other credit criteria established by the City.

As an alternative to providing security, depending on circumstances:

A. A portion of the bond proceeds may be placed in escrow with a corporate agent in an amount sufficient to assure an acceptable value-to-lien ratio is reached on the

escrowed proceeds. The escrowed proceeds shall be released at such times and in such amounts as will assure an acceptable value-to-lien ratio with regard to the aggregate outstanding bonds and other covenants; or

B. The bonds may be issued in series with each series in an amount sufficient to assure an acceptable value-to-lien ratio with regard to the aggregate outstanding bonds and other covenants.

7. SPECIAL TAX FORMULA

The special tax formula for each District shall adhere to the following requirements:

A. The maximum special tax shall include the annual costs incurred by the City to administer the District, including debt service, City and County administrative expenses, and delinquency coverage in an amount determined appropriate by City staff.

B. The special tax formula shall establish tax rates which correspond to the expected land use designation of each parcel.

C. The special tax formula shall be structured to ensure sufficient funds to pay for annual debt service and administrative expenses of the District.

D. A backup special tax or other mechanism to protect against changes in densities resulting in insufficient annual special tax revenues to pay annual debt service and administrative expenses shall be required.

E. The City may, at its sole discretion, provide for an annual escalation factor, not to exceed two percent (2%) of the Maximum Special Tax for Facilities Districts with residential parcels (bonded) in effect for the prior fiscal year. For Services Districts (non-bonded) or non-residential Districts, the City may provide for an annual escalation factor, not to exceed four percent (4%) of the Maximum Special Tax in effect for the prior fiscal year.

The maximum annual special tax submitted to the qualified electors of the CFD, when added together with all the annual payment requirements of overlapping debt and bonded assessments, and ad-valorem property taxes, shall not exceed one and three-fourths percent (1.75%) of the anticipated (as developed) Fair Market Value of the subject properties, based on projected home prices at time of bond sale, however City staff may allow for a limit of more than one and three-fourths percent (1.75%) at the Chief Financial Officer's (CFO) discretion.

The City shall retain a special tax consultant to prepare a report which:

A. Recommends a special tax formula for the proposed CFD.

B. Evaluates the special tax proposed to determine its ability to adequately fund identified public facilities, City administrative costs, services (if applicable) and other related expenditures. Such analysis shall also address the resulting aggregate tax burden of all proposed special taxes plus existing special taxes, ad valorem taxes, and assessments on the properties within the CFD. The rates and method of apportionment of special taxes shall be designed to ensure sufficient revenues are produced in case of final development at lower densities than anticipated.

C. Consultants of the City for the District shall comply with the existing policies of the Fair Political Practices Commission and the California Government Code.

For bonded Districts the City may retain a Financial Advisor who will review the special tax formula and other financial documents to determine that the documents have been prepared in a manner that does not adversely impact the City's financial position, District bonding capacity or credit rating. The Financial Advisor will confirm the findings of the Special Tax Consultant that the proposed Special Taxes are sufficient to fund all the future costs of the District. Costs incurred for these consultants will be paid by the Applicant(s) by advance deposit increments and may be reimbursed from bond proceeds or Special Tax collections.

8. TERMS AND CONDITIONS OF BONDS

All terms and conditions of the bonds shall be established by the City, and included in the Fiscal Agent Agreement. The City or a designated fiscal agent will control, manage and invest all District-issued bond proceeds designated for use on improvements. Each bond issue shall be structured to adequately protect bond owners and to not adversely impact the bonding capacity or credit rating of the City through the special taxes or assessments, credit enhancements, foreclosure covenant and reserve fund. Unless otherwise authorized by the City, the following shall serve as bond requirements:

A. If required, a reserve fund amount equal to the lesser of ten percent (10%) of the initial bond principal, or maximum annual debt service on the bonds, or one hundred twenty-five percent (125%) of average annual debt service, or as otherwise provided by Federal tax law. If agreed by the City and the Underwriter, a Surety may be purchased in lieu of a funded reserve.

B. The Special Taxes shall be levied for the first fiscal year following the sale of the bonds or at the end of capitalized interest period. Interest may be funded (capitalized) during a period not to exceed twenty-four (24) months, as determined by the CFO.

C. The repayment of principal shall begin on the earliest principal payment date for which sufficient special tax revenues can be made available after the end of the capitalized interest period, or otherwise as determined by the CFO to be appropriate.

D. The City may consider an increasing annual debt service by two percent (2%) per year for the term of the bonds. Determination of this shall be made by the CFO.

E. The maximum Special Tax shall be established to ensure that the annual revenue produced by levy of the maximum special tax shall be equal to at least one hundred ten percent (110%) of the corresponding annual debt service.

F. Prior to the issuance of the bonds, the City may authorize its bond counsel to commence and process to final judgment an action establishing the validity of the proceedings, Special Tax and issuance of bonds, as determined appropriate by the City and such bond counsel.

G. In instances where multiple series of bonds are to be issued, the first series shall include Public Facilities of highest priority as determined by the City to be appropriate for initial development.

H. All statements and materials related to the sale of bonds shall emphasize and state that neither the good faith, nor the taxing power of the City, is pledged to security or repayment of the bonds. The sole source of revenues to secure bonds are Special Taxes.

9. DISTRICT COSTS, DEPOSITS AND REIMBURSEMENTS

All City and consultant costs incurred in the formation, evaluation and administration of District applications and the establishment of Districts will be paid by the Applicant by advance deposit increments. The City shall not incur any non-reimbursable expenses for processing and administering Districts. Expenses not chargeable to the District shall be directly borne by the Applicant.

Funds to reimburse costs and expenses incurred by the City shall be billed to the Applicant and the Applicant shall pay each invoice within sixty (60) calendar days of receipt of such notice. If the Applicant fails to make any payment of funds for the proceedings, the City may suspend all proceedings until receipt of such additional deposit.

For Districts financing facilities, except as otherwise provided herein, the Applicant shall be entitled to reimbursement for reasonable costs and expenses incident to the construction of the Public Facilities as provided under the Mello-Roos Act, provided that all such costs and expenses are determined by the City to be necessary and reasonable.
The Applicant or property owner shall not be entitled to reimbursement from bond proceeds for any of the expenses specified as follows:

A. In-house administrative and overhead expenses incurred by the Applicant not authorized by the City;

B. Interest expenses incurred by the Applicant on moneys advanced or expended during the proceedings and construction of Public Facilities; and

C. Any other costs and expenses incurred by the Applicant which are not otherwise authorized for reimbursement under the Mello-Roos Act.

Neither the City nor the District shall be required to reimburse the Applicant or property owner from any funds other than the proceeds of bonds issued by the City for a District and pay-as-you-go Special Taxes. The use and terms of any pay-as-you-go reimbursement shall be at the discretion of the City's CFO or such other person or persons as may be designated.

10. AGREEMENTS

Agreements will be prepared incidental to District formation proceedings in a form satisfactory to the City and consistent with these policies. These agreements may include, but not be limited to:

A. Funding, Construction and Acquisition and Shortfall Agreement;

B. Joint Community Facilities Agreements with any other public agency entitled to receive any portion of the bond proceeds or entitled to own and operate any of the public facilities financed by bond proceeds; and

C. Deposit and Reimbursement Agreement.

As a condition to the issuance and sale of bonds, all of the agreements specified shall be duly approved and executed by the parties thereto. Prior to execution of any agreements, such agreements shall be reviewed and approved by bond counsel and the City Attorney, who shall determine if each agreement shall also be approved by the City Council. Agreement approval by the City Attorney shall be indicated thereon when appropriate.

11. USE OF CONSULTANTS

The City shall have the sole discretion as to selection of consultants and determination of fees and expenses of all consultants necessary for the formation of the District and the issuance of bonds, including the underwriter(s), bond counsel, financial advisor, appraiser, trustee, paying agent, market absorption study consultant, and the special tax consultant after reasonable consultation with the Applicant. Prior consent of the Applicant shall not be required in the determination by the City of the consulting and financing team. The City shall also be responsible for determining the structure of the bonds to be issued, including the method of sale (negotiated or competitive), the need for bond ratings, investment of bond proceeds, and all other

terms and conditions incidental to structuring and closing a bond issuance and distribution of proceeds, including pay-as-you-go funding, if any, in the form of reimbursement to developer from excess (after debt service and District administration) special tax collections, or otherwise as determined by the CFO or such other person or persons as may be designated.

12. ACQUISITION PROVISIONS

The City, at its sole discretion, will determine the facilities to be acquired and the method of determining reasonable acquisition costs, which shall be set forth in the Funding, Construction and Acquisition and Shortfall Agreement. Applicable bidding and prevailing wage requirements are extensive and will be addressed during the preparation of the Funding, Construction and Acquisition Agreement.

13. DISCLOSURE TO PURCHASERS

The Applicant or property owner will be required to demonstrate to the satisfaction of the City that, to the best of their abilities, there will be full disclosure of the Special Taxes to prospective purchasers of property including interim purchasers and sales to merchant builders. In addition to all requirements of law, the City may require the Applicant to provide additional disclosure of such information as the City deems appropriate to the purchasers of property within the District, with respect to the existence of the District, maximum and/or backup special taxes to be levied within the District, facilities to be constructed, the foreclosure process and the terms and conditions of bonds issued on behalf of the District. Such disclosure shall include home buyer notifications requiring signature prior to home purchases, as well as methods to notify subsequent home purchasers.

Upon request, the Finance Department will provide a "Notice of Special Tax" to sellers of real property subject to the levy of special taxes as required by Government Code Section 53340.2.

14. PROPERTY OWNER SUPPORT

In the instance of multiple property owners, the Applicant shall be required to produce letters evidencing other property owners' support for the scope and establishment of the District as an attachment to the application. The Applicant must have concurrence of 2/3 vote of the property owners to be included in a Community Facilities District, unless the City accepts moving forward based on special circumstances.

15. LAND USE APPROVALS

Properties proposed for inclusion in a District must possess a land use determination such that proposed development land use and specific facility requirements can support the proposed

special tax. The City will accept applications for Mello-Roos Act financing for residential properties primarily when they are included in an approved specific plan or City planning area.

16. APPLICATION PROCESS

Early communication with the City is encouraged to assist Applicants in evaluating the feasibility of available financing programs and to discuss program procedures.

1. PREAPPLICATION CONFERENCE: Applicant meets with City to discuss the proposed project and application procedures.

2. PROJECT REVIEW: Applicant and City staff meet to discuss initial application, including any issues raised and further information that might be required. If necessary, Applicant submits revised application.

3. PROJECT INITIATION: Applicant, staff and consultants meet to determine preliminary project schedule and begin work necessary to initiate District formation.
4. PROJECT IMPLEMENTATION: The resolution of intention is approved by Council action in order to move forward to the formation hearing. Once the District is formed, bonds can be issued (if forming a District for Public Facilities).

17. APPLICATION OF GOALS AND POLICIES

The City may find that a waiver of any of the above stated policies is reasonable given identified City benefits to be derived from such waiver. Such waivers may be granted with or without action of the City Council, as determined appropriate by the CFO. Approval by the City Council of formation of a District and/or issuance of bonds for a District constitutes a determination that a District conforms to the provisions of these Goals and Policies and, if applicable, that a waiver of any provision hereof is appropriate, and shall be conclusive evidence of such conformity.

These Goals and Policies may be reviewed and may be amended from time to time, as determined by the City to be appropriate in the light of changing conditions affecting the City and its real estate market and changes in practices among other communities in the region.

ATTACHMENT 1

GOVERNING LAW: California Government Code, beginning at Section 53311, Mello-Roos Community Facilities District Act of 1982, available online.

INFORMATIONAL SUMMARY OF MELLO-ROOS COMMUNITY FACILITIES DISTRICT FORMATION PROCESS

A Community Facilities District (CFD) is a legally constituted governmental entity created for the purpose of financing public facilities and services. It is similar in effect to an Assessment District except that the resulting security for debt in an Assessment District is a fixed lien assessment, while under a CFD it is an annual special tax. A CFD may finance a broad range of facilities and/or services, including facilities and/or services which benefit an area in a general way, whereas assessment district financing is more limited in scope and requires a benefit analysis to match the fixed assessment amount to the benefit received. Recent legal cases have challenged benefit determinations. Given those flexibility features of a CFD, it has emerged as the preferred special district financing methodology for most municipalities.

The formation proceedings are subject to, and contingent upon satisfaction of all environmental, zoning and land use regulations. All documents of formation are to be prepared by the Applicant or designated party.

1. **Initiation of Proceedings**. Proceedings can be initiated by the City on its own initiative, or must be considered within ninety (90) days from the time a request is made by a petition signed by ten percent (10%) of the registered voters (or ten percent (10%) of the landowners by area if less than twelve (12) registered voters) within the proposed CFD. The petition shall be accompanied by payment of a fee determined by the Finance Department to be sufficient to pay for costs incurred in conducting the proceedings.

2. **Resolution of Intention**. Adoption of a Resolution of Intention to establish a CFD begins the formation process, stating the name of the proposed CFD, the types of facilities and/or services to be financed and that, a special tax to pay for such facilities and/or services will be annually levied. The Resolution of Intention shall also fix a time and place for a public hearing between thirty (30) and sixty (60) days after the adoption of the Resolution of Intention, describe the method of levy and apportionment of the special tax and describe the proposed voting procedure. In addition, the resolution may specify conditions under which the obligation to pay the special tax may be prepaid and permanently satisfied. The City Council directs its responsible officers to study the proposed District and to file a report at or before the public hearing describing the proposed Public Facilities and Public Services and an estimate of costs.

3. **Public Hearing**. Protests against the establishment of the CFD, the extent of the CFD or the furnishing of specified types of Public Facilities and Public Services may be made

orally or in writing by interested persons or taxpayers. If fifty percent (50%) or more of the registered voters, or six (6) registered voters, whichever is more, residing within the proposed CFD or the owners of one-half (1/2) or more of the area of land in the proposed CFD file written protests against the establishment of the CFD, the proceedings are abandoned. If the protests are directed toward certain types of facilities or services, or against a specified special tax, those specific items may be eliminated from the resolution forming the CFD. The hearing may be continued for up to thirty (30) days without special findings and up to six (6) months if the City Council makes specified findings.

4. **Resolution of Formation**. If the City Council decides to establish the CFD, it will adopt a Resolution of Formation containing similar information as contained in the Resolution of Intention.

5. **Election**. If the City Council determines to form the CFD, it submits the question of whether special taxes should be levied to an election of the voters (or land owners if less than twelve (12) registered voters) of the proposed CFD. Combined with the tax proposition, there may be a proposition on the question of incurring bonded indebtedness. The tax, in order to be levied, must be approved by two-thirds (2/3) of the votes cast and thereafter levied by adoption of an ordinance of the City Council. The Mello-Roos Act provides that the election shall be at the next general election or at a special election to be held between ninety (90) and one hundred and eighty (180) days following the close of the protest hearing. The election time limits may be shortened by the unanimous consent of the qualified electors within the proposed District and the concurrence of the election official conducting the election.

6. **Special Tax Bonds**. A CFD may be created solely to provide the services permitted by statute. However, most CFD's have been created specifically for the purpose of levying special taxes to service bonded indebtedness incurred by the CFD in order to finance the construction of Public Facilities. The proceedings to authorize and incur bonded indebtedness usually parallel the proceedings for formation of the CFD and the authorization to levy the special tax, although the bond proceedings could be conducted separately and at a later date. The proceeding to authorize bonded indebtedness involves a Resolution of Intention, public hearing and election, all conducted in a manner very similar to proceedings to form the CFD and levy the tax. Government Code Sections 53341 and 53359 establish a limited period of time in which special taxes levied under the Mello-Roos Act may be challenged by a third party. For this reason, the City may choose to wait (60) days (a 'validation period') after the authorization to incur bonded indebtedness is approved before CFD bonds are sold. CFD bonds may be sold competitively or through negotiated sale and may bear fixed or variable interest rates. In some cases, specified facilities may be provided by a CFD for only a portion of the land within the CFD. In that event, the Mello-Roos Act provides for the formation of improvement areas for which separate elections are conducted and to which a specified special tax applies.

ATTACHMENT 1	Mello-Roos Community Facilities District Formation Process	12

INTRODUCTION

The purpose of these Goals and Policies is to establish for the City of Roseville (the "City") a ~~format to establish the public benefit and guidelines for the financial aspects~~set of guidelines for the formation and administration of Community Facilities Districts (also referred to as "CFDs" or "Districts"). The underlying principles behind the proposed policies are public interest and benefit, fairness to current and future property owners and homeowners, avoidance of future failure of the project and/~~-~~or property owner protest, protection of the City's financial position, and reimbursement to the City of its incurred expenses.

Community Facilities District laws are found in the Mello-Roos Community Facilities Act of 1982 in the California Government Code, beginning at Section 5331~~2~~1. These Goals and ~~Procedures~~ Policies are adopted by the City in compliance with Section 53312.7 of the Government Code.

1. ~~POLICY &~~ GOALS & POLICIES

The City has developed the following Goals and Policies on financing facilities and/or services through the formation of Community Facilities Districts, including financing public facilities through the issuance of debt to be repaid from proceeds of s~~S~~pecial t~~T~~axes levied within the districts. It is the City's goal to support projects which address a public need and provide a public benefit. Proposed projects requesting Community Facility District debt financing will be evaluated to determine if such financing is financially viable and in the best interest of the City and current and future City and project residents.

The City may consider facilities or services D~~d~~istrict formation on its own initiative and also will consider developer or property owner initiated applications requesting the formation of ~~c~~Community ~~f~~Facilities ~~d~~Districts and the issuance of bonds to finance eligible public facilities necessary to serve newly developing commercial, industrial and residential projects in the following instances:

(1) When tax-exempt financing of project public facilities will result in a significant public benefit; and/or

(2) When the City has negotiated and executed a Development Agreement addressing project implementation; and/or

(3) When City~~-~~ ~~-~~based needs and circumstances warrant financing public services or facilities through a special tax to provide significant public benefit.

Generally, community serving public facilities will be eligible for this tax-exempt financing program. Facilities will be financed and D~~d~~istricts formed in accordance with the then current

provisions of the Mello-Roos Community Facilities Act of 1982, as amended, or any other methodology legally available to the City to finance such improvements.

Each time public facilities are to be built or accepted by the City, or a C~~c~~ommunity ~~f~~Facilities District ~~-~~is formed for the benefit of a development project, and if maintenance requirements will exceed normal City standards and/or~~,~~ if City services will need to be expanded to facilitate the project, ~~–~~the City will require the creation of a maintenance D~~d~~istrict, services ~~d~~District or Home/Property Owners Association suitable to provide such needs. The maintenance or services district may be established pursuant to the provisions of the Mello-Roos Community Facilities Act of 1982, or any other methodology legally available to the City to finance such maintenance. The purpose of the services/maintenance district is to fund ~~all or a portion of~~ the ongoing costs of parks and open space, public landscaping, police and fire protection services and library services and maintenance not funded by other sources; and~~/or~~ to pay for any unfunded ongoing City maintenance or service costs associated with the development project.

Existing neighborhoods may petition the City for the use of financing to fund local or neighborhood serving services and/or facilities in accordance with the Mello-Roos Community Facilities Act of 1982.

The City shall make the determination as to whether a proposed D~~d~~istrict shall proceed under the provisions of the Mello-Roos Community Facilities Act of 1982, or any other methodology legally available to the City to finance improvements, services or maintenance. The City may confer with consultants and the ~~applicant~~Applicant to learn of any unique D~~d~~istrict requirements such as facilities or services serving the regional area or long-term development phasing prior to making any final determination.

All City and consultant costs incurred in the evaluation of new development D~~d~~istrict applications and the establishment of ~~d~~Districts will be paid by the ~~applicant~~Applicant(s)/petitioner(s) by advance deposit increments. The City shall not incur any non-reimbursable expense for processing C~~c~~ommunity F~~f~~acilities ~~d~~Districts. Expenses not chargeable to the D~~d~~istrict shall be borne by the ~~applicant~~Applicant(s)/petitioner(s).

The City has established a Schedule of Maintenance Costs and Charges applicable to new development projects in the City, which provides a uniform set of City costs associated with the ongoing operations, maintenance, and administration of services provided within new development areas that can be financed by the levy of Special Taxes in maintenance/services Districts. The City will update this Schedule by Resolution from time to time to ensure new development projects continue to self-fund the prevailing costs incurred to provide annual and ongoing services in these new areas, as well as pay for the ongoing administration of Districts formed in such areas.

In addition to forming and administering its own Districts, the City may also permit the formation of Community Facilities Districts on land in the City and on its behalf by joint powers authorities of which the City is a member, such as through the California Municipal Finance Authority's Bond Opportunities for Land Development (BOLD) program.

2. DEFINITIONS

Unless the context otherwise requires, the terms employed in the following policies shall have the meanings specified below:

"Bonds" means bonds authorized and issued under the Mello-Roos Community Facilities Act of 1982.

"City" means the City of Roseville.

"District" means a Community Facilities District formed under the Mello-Roos Community Facilities Act of 1982.

"Pay-As-You-Go Basis" means the use of annual and/or one-time s~~S~~pecial t~~T~~ax revenues to directly fund the acquisition, construction, or improvement of Public Facilities, or to fund other authorized costs of the District.

"Public Facilities" means improvements authorized to be constructed or acquired under the Mello-Roos Community Facilities Act including, but not limited to, costs for specified capital facilities imposed by public agencies as a condition to approval of the development encompassed by the ~~district~~ District or as a condition to service the ~~d~~District, which may include, but is not limited to, infrastructure improvements such as major streets and arterials; highway improvements and freeways; freeway interchanges; right of way acquisitions; bridges, water, sewer and drainage improvements; landscape irrigation and drainage facilities; environmental mitigation and remediation; bicycle and pedestrian facilities; parks; wetlands; electrical conduits; transit improvements; and other improvements as which are defined as authorized improvements under the Community Facilities District ~~-~~(s) selected by the City or any ordinance ~~under~~ adopted by the City.

"Public Services" means services eligible for District financing ~~are those public services~~ provided for in the Mello-Roos Act, and for new development will particularly include those which benefit properties within a proposed development or area of the City subject to the special tax or the City at large and may include reserves for replacement of equipment facilitating maintenance and operation of the included City services, all as further specified in the Mello-Roos Act.

"Special Tax" means tax(es) authorized to be levied by the City on behalf of a District on property within the boundary of the District.

"Value" or "Fair Market Value" means the amount of cash or its equivalent which a property would bring if exposed for sale in the open market under conditions in which neither buyer nor seller could take advantage of a difficulty of the other, both having knowledge of all of the uses and purposes to which the property is adapted, and for which it is capable of being used and of the enforceable restrictions upon its uses and purposes.

3. ELIGIBLE PUBLIC FACILITIES AND SERVICES

Infrastructure and public facilities eligible for ~~district~~ District financing are those improvements which benefit properties within a proposed development, and/or will mitigate impacts of that development upon areas of the City outside the proposed development, and which will be owned, operated and maintained by the City or another public agency as approved by the City.

The City has final determination as to any facility's eligibility for financing as well as the prioritization of facilities to be included within a financing ~~d~~District. Generally, "in-tract" (i.e., local streets) improvements will not be considered eligible.

If a school is financed, the ~~s~~School ~~d~~District's goals and policies, if any, including its priority access policy will be coordinated with the formation of a ~~d~~District.

Public services eligible for ~~d~~District financing are those public services which benefit properties within a proposed development or area of the City subject to the special tax, subject to the limitation that a ~~c~~Community F~~f~~acilities ~~d~~District tax approved by vote of the landowners of the D~~d~~istrict may only finance services to the extent that they are in addition to those provided in the territory of the ~~d~~District before the D~~d~~istrict was created.

4. VALUE-TO-LIEN RATIO

The City may sell bonds for the District only if it determines that the value of the real property that would be subject to the special tax to pay debt service will be at least three (3) times the principal amount of the bonds to be sold and the principal amount of all other bonds outstanding that are secured by a special tax or bonded special assessment. Such determination will be based upon the full cash value as shown on the ad valorem assessment roll or upon an appraisal of the subject property made in a manner consistent with policies of the City. Requirements of a higher value to lien ratio may be imposed by the City and will be determined by City staff with recommendations from bond counsel, financial advisor, and the underwriter, with consideration of the facts pertaining to each particular project, including diversification of land ownership. Each project will be considered on its own merits. Additionally, the aggregate value to lien ratio of no more than five percent (5%) of the parcels expected to be subject to special taxes to pay debt service shall be below 3:1 or such higher ratio as determined by the City. The City may allow exceptions to its value to lien ratio requirements in accordance with the Mello Roos Act if it finds and determines that the proposed bonds do not present any unusual credit risk due to the availability of credit enhancements or for other reasons determined by the City.

The appraisal shall be coordinated by, under the direction of, and addressed to the City. All costs associated with the preparation of the appraisal report shall be paid by the ~~applicant~~Applicant through the advance deposit mechanism. The appraisal shall be conducted in accordance with

criteria, standards and assumptions established by the City, based upon the recommendations for each specific project received from the underwriter and financial advisor designated by the City. In every case, the appraisal shall reflect recognized appraisal standards for land-secured bond financing. The City prefers that the appraisal be prepared in accordance with the recommendations of the California Debt and Investment Advisory Commission as contained in the Appraisal Standards for Land-Based Secured Financings, and deviations therefrom will only be considered upon recommendation from bond counsel, financial advisor, the underwriter and/or the appraiser, with consideration of the facts pertaining to each particular project. ~~In the case of a phased development,~~ The land value appraisal should include the value ~~attributable~~attributable to ~~developed land value~~ ~~assuming the infrastructure~~ Public Facilities to be ~~included in the current~~ financed~~ing~~ by the bond being issued for the District assuming they have been~~is~~ completed. ~~However, land values for remaining future phases of the development should not assume future infrastructure is completed.~~

5. MARKET ABSORPTION STUDY

The City may require a market absorption study, and may retain a consultant to prepare a report to verify market absorption assumptions and projected sales prices of the properties subject to the special taxes in the D~~d~~istrict. The study, if required, shall include an estimate of the total number of units, land uses and rate of absorption, and will be used as a basis for verification that sufficient revenues can be generated, and to determine if the financing of the infrastructure and public facilities is appropriate given the projected level and pace of development. All City and consultant costs incurred for this study will be paid by the ~~applicant~~Applicant by advance deposit or out of special taxes or bond proceeds.

The study will also be provided to the appraiser for use in the appraisal process. The market absorption study should be completed prior to completion of the appraisal, and the appraisal shall take into consideration and reasonably reconcile to the conclusions of the market absorption study or include reasons for significant alternate conclusions.

6. SECURITY

For new development, the ~~applicant~~Applicant or property owner must demonstrate its financial plan and ability to pay all special taxes before full build-out has taken place to the satisfaction of the City. Additional security such as credit enhancement may be required by the City in its sole discretion in certain instances.

If the City requires letters of credit or other credit enhancement, the credit enhancement shall be issued by an institution in a form and upon terms and conditions satisfactory to the City. All fees payable on the letter of credit or other security shall be the sole responsibility of the D~~d~~istrict ~~applicant~~Applicant or developer, not the City or D~~d~~istrict. Any security required to be provided by the ~~applicant~~Applicant shall be discharged by the City upon the opinion of a qualified

appraiser retained by the City that the value-to-lien ratio has reached an acceptable level as determined by the City or upon meeting other credit criteria established by the City.

As an alternative to providing security, depending on circumstances:

A. A portion of the bond proceeds may be placed in escrow with a corporate agent in an amount sufficient to assure an acceptable value-to-lien ratio is reached on the escrowed proceeds. The escrowed proceeds shall be released at such times and in such amounts as will assure an acceptable value-to-lien ratio with regard to the aggregate outstanding bonds and other covenants; or

B. The bonds may be issued in series with each series in an amount sufficient to assure an acceptable value-to-lien ratio with regard to the aggregate outstanding bonds and other covenants.

7. SPECIAL TAX FORMULA

The special tax formula for each District shall adhere to the following requirements:

A. The maximum special tax shall include the annual costs incurred by the City to administer the D~~d~~istrict, including debt service, City and~~,~~ County administrative expenses, and delinquency coverage in an amount determined appropriate by City staff.

B. The special tax formula shall establish tax rates which correspond to the expected land use designation of each parcel.

C. The special tax formula shall be structured to ensure sufficient funds to pay for annual debt service and administrative expenses of the District.

D. A backup special tax or other mechanism to protect against changes in densities resulting in insufficient annual special tax revenues to pay annual debt service and administrative expenses shall be required.

E. The City may, at its sole discretion, provide for an annual escalation factor, not to exceed two percent (2%) of the Maximum Special Tax for Facilities Districts with residential parcels (bonded) in effect for the prior fiscal year. For Services Districts (non-bonded) or non-residential Districts, the City may provide for an annual escalation factor, not to exceed four percent (4%) of the Maximum Special Tax in effect for the prior fiscal year.

The maximum annual special tax submitted to the qualified electors of the CFD, when added together with all the annual payment requirements of overlapping debt and bonded assessments, and ad-valorem property taxes, shall not exceed one and three-fourths percent (1.75%) of the anticipated (as developed) Fair Market Value of the subject properties, based on projected home

prices at time of bond sale, however City staff may allow for a limit of more than one and three-fourths percent (1.75%) at the ~~Finance Director~~ Chief Financial Officer's (CFO) discretion.

The City shall retain a special tax consultant to prepare a report which:

A. Recommends a special tax formula for the proposed CFD.

B. Evaluates the special tax proposed to determine its ability to adequately fund identified public facilities, City administrative costs, services (if applicable) and other related expenditures. Such analysis shall also address the resulting aggregate tax burden of all proposed special taxes plus existing special taxes, ad valorem taxes, and assessments on the properties within the CFD. The rates and method of apportionment of special taxes shall be designed to ensure sufficient revenues are produced in case of final development at lower densities than anticipated.

C. Consultants of the City for the District shall comply with the existing policies of the Fair Political Practices Commission and ~~of~~ the California Government Code.

For bonded D~~d~~istricts the City may retain a Financial Advisor who will review the special t~~T~~ax f~~F~~ormula and other financial documents to determine that the documents have been prepared in a manner that does not adversely impact the City's financial position, District bonding capacity or credit rating. The Financial Advisor will confirm the findings of the Special Tax Consultant that the proposed Special Taxes are sufficient to fund all the future costs of the District. Costs incurred for these consultants will be paid by the ~~applicant~~Applicant(s) by advance deposit increments and may be reimbursed from bond proceeds or s~~S~~pecial t~~T~~ax collections.

8. TERMS AND CONDITIONS OF BONDS

All terms and conditions of the bonds shall be established by the City, and included in the Fiscal Agent Agreement. The City or a designated fiscal agent will control, manage and invest all D~~d~~istrict ~~-~~issued bond proceeds designated for use on improvements. Each bond issue shall be structured to adequately protect bond owners and to not adversely impact the bonding capacity or credit rating of the City through the special taxes or assessments, credit enhancements, foreclosure covenant and reserve fund. Unless otherwise authorized by the City, the following shall serve as bond requirements:

A. If required, a reserve fund ~~equal to an~~ amount equal to the lesser of ten percent (10%) of the initial bond principal, or maximum annual debt service on the Bonds, or one hundred twenty-five percent~~125%~~ (125%) of average annual debt service, or as otherwise provided by Federal tax law. If agreed by the City and the Underwriter, a Surety may be purchased in lieu of a funded reserve.

B. The ~~special~~ Special ~~taxes~~ Taxes shall be levied for the first ~~-~~fiscal year following the sale of the bonds ~~for which they may be levied~~ or at the end of capitalized interest period. ~~-~~Interest may be funded (capitalized) during a period not to exceed twenty-four (24) months, as determined by the ~~Finance Director~~CFO.

C. The repayment of principal shall begin on the earliest principal payment date for which sufficient special tax revenues can be made available after the end of the capitalized interest period, or otherwise as determined by the ~~Finance Director~~CFO to be appropriate.

D. The City may consider an increasing annual debt service by two percent (2%) per year for the term of the bonds. Determination of this shall be made by the ~~Finance Director~~CFO.

E. The maximum ~~special~~ Special T~~t~~ax shall be established to ~~assure~~ ensure that the annual revenue produced by levy of the maximum special tax shall be equal to at least ~~110%~~one hundred ~~-~~ten percent (110%) ~~–~~of the ~~maximum~~ corresponding annual debt service.

F. Prior to the issuance of the bonds, the City may authorize its bond counsel to commence and process to final judgment an action establishing the validity of the proceedings, ~~special~~ Special T~~t~~ax and issuance of ~~bonds~~Bonds, as determined appropriate by the City and such bond counsel.

G. In instances where multiple series of ~~bonds~~ Bonds are to be issued, the first series shall include public facilities of highest priority as determined by the City to be appropriate for initial development.

H. All statements and materials related to the sale of~~or~~ C~~c~~ommunity ~~f~~Facilities ~~d~~District ~~bonds~~ Bonds shall emphasize and state that neither the good faith, nor the taxing power of the City, is pledged to security or repayment of the bonds. The sole source of revenues to secure bonds are ~~special~~ Special T~~t~~axes.

9. DISTRICT COSTS, DEPOSITS AND REIMBURSEMENTS

All City and consultant costs incurred in the formation, evaluation and administration of ~~district~~ District applications and the establishment of ~~d~~Districts will be paid by the ~~applicant~~Applicant by advance deposit increments. The City shall not incur any non-reimbursable expenses for processing and administering Districts. Expenses not chargeable to the District shall be directly borne by the ~~applicant~~Applicant.

Funds to reimburse costs and expenses incurred by the City shall be billed to the ~~applicant~~Applicant and the ~~applicant~~Applicant shall pay each invoice within sixty (60) calendar

days of receipt of such notice. If the ~~applicant~~Applicant fails to make any payment of funds for the proceedings, the City may suspend all proceedings until receipt of such additional deposit.

For Districts financing facilities, except as otherwise provided herein, the ~~applicant~~Applicant shall be entitled to reimbursement for reasonable costs and expenses incident to the construction of the public facilities as provided under the Mello-Roos Community Facilities Act of 1982, provided that all such costs and expenses are determined by the City to be necessary and reasonable.

The ~~applicant~~Applicant or property owner shall not be entitled to reimbursement from bond proceeds for any of the expenses specified as follows:

A. In-house administrative and overhead expenses incurred by the ~~applicant~~Applicant;

B. Interest expenses incurred by the ~~applicant~~Applicant on moneys advanced or expended during the proceedings and construction of public facilities; and

C. Any other costs and expenses incurred by the ~~applicant~~Applicant which are not otherwise authorized for reimbursement under the Mello-Roos Act.

Neither the City nor the District shall be required to reimburse the ~~applicant~~Applicant or property owner from any funds other than the proceeds of bonds issued by the District and pay-as-you-go special taxes. The use and terms of any pay-as-you-go reimbursement shall be at the discretion of the City's CFO or such other person or persons as may be designated.

10. AGREEMENTS

Agreements will be prepared incidental to District formation proceedings in a form satisfactory to the City and consistent with these policies. These agreements may include, but not be limited to:

A. Funding, Construction and Acquisition and Shortfall Agreement;

B. Joint Community Facilities Agreements with any other public agency entitled to receive any portion of the bond proceeds or entitled to own and operate any of the public facilities financed by bond proceeds; and

C. Deposit and Reimbursement ~~a~~Agreement.

As a condition to the issuance and sale of bonds, all of the agreements specified shall be duly approved and executed by the parties thereto. Prior to execution of any agreements, such agreements shall be reviewed and approved by bond counsel and the City Attorney, who shall

determine if each agreement shall also be approved by the City Council. Agreement approval by the City Attorney shall be indicated thereon when appropriate.

11. USE OF CONSULTANTS

The City shall have the sole discretion as to selection of consultants and determination of fees and expenses of all consultants necessary for the formation of the District and the issuance of bonds, including the underwriter(s), bond counsel, financial advisor, appraiser, trustee, paying agent, market absorption study consultant, and the special tax consultant after reasonable consultation with the ~~applicant~~Applicant. Prior consent of the ~~applicant~~Applicant shall not be required in the determination by the City of the consulting and financing team.

The City shall also be responsible for determining the structure of the bonds to be issued, including the method of sale (negotiated or competitive), the need for bond ratings, investment of bond proceeds, and all other terms and conditions incidental to structuring and closing a bond issuance and distribution of proceeds, including pay-as-you-go funding, if any, in the form of ~~and/or~~ reimbursement to developer from excess (after debt service and District administration) special tax collections, or otherwise as determined by the CFO or such other person or persons as may be designated.~~.~~

12. ACQUISITION PROVISIONS

The City, at its sole discretion, will determine the facilities to be acquired and the method of determining reasonable acquisition costs, which shall be set forth in the Funding, Construction and Acquisition and Shortfall Agreement. Applicable bidding and prevailing wage requirements are extensive and will be addressed during the preparation of the Funding, Construction and Acquisition Agreement.

13. DISCLOSURE TO PURCHASERS

The ~~applicant~~Applicant or property owner will be required to demonstrate to the satisfaction of the City that, to the best of their abilities, there will be full disclosure of the Mello-Roos special taxes to prospective purchasers of property including interim purchasers and sales to merchant builders. In addition to all requirements of law, the City ~~shall~~ may require the ~~applicant~~Applicant to provide additional disclosure of such information as the City deems appropriate to the purchasers of property within the District, with respect to the existence of the District, maximum and/or backup special taxes to be levied within the District, facilities to be constructed, the foreclosure process and the terms and conditions of bonds issued on behalf of the District. Such

disclosure shall include home buyer notifications requiring signature prior to home purchases, as well as methods to notify subsequent home purchasers.

Upon request, the Finance Department will provide a "Notice of Special Tax" to sellers of real property subject to the levy of special taxes as required by Government Code ~~s~~Section 53340.2.

14. PROPERTY OWNER SUPPORT

In the instance of multiple property owners, the ~~applicant~~Applicant shall be required to produce letters evidencing other property owners' support for the scope and establishment of the District as an attachment to the application. The ~~applicant~~Applicant must have concurrence of 2/3 vote of the property owners to be included in a Community Facilities District, unless the City accepts moving forward based on special circumstances.

15. LAND USE APPROVALS

Properties proposed for inclusion in a District must possess a land use determination such that proposed development land use and specific facility requirements can support the proposed special tax. The City will accept applications for Mello-Roos financing for residential properties primarily when they are included in an approved specific plan or City planning area.

16. APPLICATION PROCESS

Early communication with the City is encouraged to assist ~~applicant~~Applicants in evaluating the feasibility of available financing programs and to discuss program procedures.

1. PREAPPLICATION CONFERENCE: ~~Applicant~~Applicant meets with City to discuss the proposed project and application procedures.

2. PROJECT REVIEW: ~~Applicant~~Applicant and City staff meet to discuss initial application, including any issues raised and further information that might be required. If necessary, ~~applicant~~Applicant submits revised application.

3. ~~APPLICATION PROCESSING: Upon City determination that application is complete, staff prepares a staff report which forwards the request for district formation and possible bonding, and staff recommendation to the City Council.~~

~~4~~3. PROJECT INITIATION: Applicant, staff and consultants meet to determine preliminary project schedule and begin work necessary to initiate District

formation.~~Staff submits consultant contracts, reimbursement agreements and other similar items for City Council consideration.~~

~~5~~4. PROJECT IMPLEMENTATION: ~~Applicant~~Applicant~~, staff and consultants meet to determine preliminary project schedule and begin work necessary to initiate district formation~~. The resolution of intention is approved by Council action in order to move forward to the formation hearing. Once the District is formed, bonds can be issued (if forming a Facilities District)

17. APPLICATION OF GOALS AND POLICIES

The City may find that a waiver of any of the above stated policies is reasonable given identified City benefits to be derived from such waiver. Such waivers may be granted with or without action of the City Council, as determined appropriate by ~~City staff~~the CFO. Approval by the City Council of formation of a District and/or issuance of bonds for a District constitutes a determination that a District conforms to the provisions of these Goals and Policies and, if applicable, that a waiver of any provision hereof is appropriate, and shall be conclusive evidence of such conformity.

These Goals and Policies may be reviewed and may be amended from time to time, as determined by the City to be appropriate in the light of changing conditions affecting the City and its real estate market and changes in practices among other communities in the region.

ATTACHMENT 1

GOVERNING LAW: California Government Code, beginning at Section 5331~~2~~1, Mello-Roos Community Facilities District Act of 1982, available online.

INFORMATIONAL SUMMARY OF MELLO-ROOS COMMUNITY FACILITIES DISTRICT FORMATION PROCESS

A Community Facilities District (CFD) is a legally constituted governmental entity created for the purpose of financing public facilities and services. It is similar in effect to an ~~a~~Assessment D~~d~~istrict except that the resulting security for debt in an ~~a~~Assessment ~~d~~District is a fixed lien assessment, while under a CFD it is a special tax. A CFD may finance a broad range of facilities and/or services, including facilities and/or services which benefit an area in a general way as opposed to benefiting specifically identified properties as required in an A~~a~~ssessment D~~d~~istrict.

The formation proceedings are subject to, and contingent upon satisfaction of all environmental, zoning and land use regulations. All documents of formation are to be prepared by the ~~applicant~~Applicant or designated party.

1. **Initiation of Proceedings**. Proceedings can be initiated by the City on its own initiative, or must be ~~must be~~ considered within ninety (90) days from the time a request is made by a petition signed by ten percent (10%) of the registered voters (or ten percent (10%) of the landowners by area if less than twelve (12) registered voters) within the proposed CFD. The petition shall be accompanied by payment of a fee determined by the Finance Department to be sufficient to pay for costs incurred in conducting the proceedings.

2. **Resolution of Intention**. Adoption of a Resolution of Intention to establish a CFD begins the formation process, stating the name of the proposed CFD, the types of facilities and/or services to be financed and that, a special tax to pay for such facilities and/or services will be annually levied. The Resolution of Intention shall also fix a time and place for a public hearing between thirty (30) and sixty (60) days after the adoption of the Resolution of Intention, describe the method of levy and apportionment of the special tax and describe the proposed voting procedure. In addition, the resolution may specify conditions under which the obligation to pay the special tax may be prepaid and permanently satisfied. The City Council directs its responsible officers to study the proposed D~~d~~istrict and to file a report at or before the public hearing describing the proposed public facilities and services and an estimate of costs.

3. **Public Hearing**. Protests against the establishment of the CFD, the extent of the CFD or the furnishing of specified types of public facilities or services may be made orally or in writing by interested persons or taxpayers. If fifty percent (50%) or more of the registered voters, or six (6) registered voters, whichever is more, residing within the proposed CFD or the owners of one-half (1/2) or more of the area of land in the proposed CFD file written protests against the establishment of the CFD, the proceedings are abandoned. If the protests are directed toward certain types of facilities or services, or against a specified special tax, those specific items may be eliminated from the resolution forming the CFD. The hearing may be continued for up to thirty (30) days without special findings and up to six (6) months if the City Council makes specified findings.

4. **Resolution of Formation**. If the City Council decides to establish the CFD, it will adopt a Resolution of Formation containing similar information as contained in the Resolution of Intention.

5. **Election**. If the City Council determines to form the CFD, it submits the question of whether special taxes should be levied to an election of the voters (or land owners if less than twelve (12) registered voters) of the proposed CFD. Combined with the tax proposition, there may be a proposition on the question of incurring bonded indebtedness. The tax, in order to be levied, must be approved by two-thirds (2/3) of the votes cast and thereafter levied by adoption of an ordinance of the City Council. The Mello-Roos Act provides that the election shall be at the next general election or at a special election to be held between ninety (90) and one hundred and eighty (180) days following the close of the protest hearing. The election time limits may be shortened by the unanimous consent of the qualified electors within the proposed D~~d~~istrict and the concurrence of the election official conducting the election.

6. **Special Tax Bonds**. A CFD may be created solely to provide the services permitted by statute. However, most CFD's have been created specifically for the purpose of levying special taxes to service bonded indebtedness incurred by the CFD in order to finance the construction of facilities. The proceedings to authorize and incur bonded indebtedness usually parallel the proceedings for formation of the CFD and the authorization to levy the special tax, although the bond proceedings could be conducted separately and at a later date. The proceeding to authorize bonded indebtedness involves a Resolution of Intention, public hearing and election, all conducted in a manner very similar to proceedings to form the CFD and levy the tax. Government Code Sections 53341 and 53359 establish a limited period of time in which special taxes levied under the Mello-Roos Act may be challenged by a third party. For this reason, the City may choose to wait (60) days (a 'validation period') after the authorization to incur bonded indebtedness is approved before CFD bonds are sold. CFD bonds may be sold competitively or through negotiated sale and may bear fixed or variable interest rates. In some cases, specified facilities may be provided by a CFD for only a portion of the land within the CFD. In that event, the Act provides for the formation of improvement areas for which separate elections are conducted and to which a specified special tax applies.

COUNCIL COMMUNICATION

CC #: 9861
File #: 0201-02

Title:	Audit Services - Professional Services Agreement Amendment
Contact:	Nick Rosas 916-774-5314 nrosas@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.19.

RECOMMENDATION TO COUNCIL

Staff recommends that the City Council adopt the attached resolution authorizing the City Manager to execute the second amendment to the professional services agreement with Vavrinek, Trine, Day & Company for the purposes of providing additional financial audit services.

BACKGROUND

As stated in Article VII, Section 7.19 of the Roseville City Charter, the Council shall provide for a running audit of all accounts and books of the City by a firm of certified public accountants who are in no other way connected with the City government.

In June 2015, Vavrinek, Trine, Day & Co., LLP was selected to perform audit services through a competitive bid process, and the agreement for audit services was approved with Council Resolution 15-280.

FISCAL IMPACT

The cost of the financial audit services is $181,900.00 per year, for a total of $363,800.00 over the two-year period, part of which will be paid for by the General Fund. The cost of the first year of the audit services has been budgeted for in the FY 2018-19 budget. The cost of the second year of the audit services will be included in the FY 2019-20 budget, pending City Council approval.

ECONOMIC DEVELOPMENT / JOBS CREATED

Not applicable.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environmental (CEQA

Guidelines §15061(b)(3)). The approval of the second amendment to the professional services agreement for audit services does not include the potential for a significant environmental effect and therefore is not subject to CEQA.

VALUE THE *difference*

August 24, 2018

Ms. Jacquelyn Flickinger, CPA
Controller
City of Roseville, California

Dear Ms. Flickinger:

We appreciate the opportunity to serve the City of Roseville (City) as the independent auditor. This letter is intended to set-forth the understanding that, at the request of the City we will continue to provide the City with independent auditing services for the fiscal years ending June 30, 2019 and 2020. The description of the auditing services we will provide the City is contained in our agreement for audit services dated July 1, 2015. This proposal demonstrates our capability and commitment to serve.

At the request of the City, we have prepared a fee quotation for auditing services for the fiscal years ending June 30, 2019 and 2020. Vavrinek, Trine, Day & Co., LLP is strongly committed to our governmental clients and we value serving as the City's independent auditors. In accordance with our Proposal for Audit Services, dated May 22, 2015, the FY 2019 and FY 2020 audit fee will be consistent with the FY 2018 fee. Our proposed fee is outlined as follows:

Description of Services	Proposed Audit Fees Not to Exceed Amounts 2018-19	2019-20
1. City of Roseville CAFR	$ 84,800	$ 84,800
2. GANN Limit	850	850
3. Single Audit (4 major programs)	19,000	19,000
4. South Placer Wastewater Authority	18,000	18,000
5. Bizz Johnson Interchange JPA	3,100	3,100
6. Roseville School Age Child Care	5,300	5,300
7. Roseville Natural Gas Financing Authority	5,500	5,500
8. Roseville Community Development Corporation	10,000	10,000
9. State Controller's Office Report	15,900	15,900
10. Electric Fund Statements (FERC)	5,300	5,300
11. Environmental Utilities Fund Statements	5,300	5,300
12. Roseville Housing Authority AUP (REAC)	850	850
13. OPEB Trust	8,000	8,000
Total for Fiscal Year (not-to-exceed)	$ 181,900	$ 181,900

QUOTED HOURLY RATES OF THE FIRM'S PROFESSIONALS:	2018-19	2019-20
Partner	$ 255	$ 255
Manager	200	200
Supervisor	170	170
Senior	125	125

We feel that Vavrinek, Trine, Day & Co., LLP is the best selection for the City. There are numerous changes affecting governmental agencies including new accounting standards issued by the Governmental Accounting Standards Board (GASB), and new federal uniform grant guidance requirements for Federal Awards. As one of the leading firms in governmental auditing in California, we have invested significant time and resources to proactively address these changes and provide efficient and timely audits.

Our investment of time and resources includes:

- Providing several training sessions to industry groups and clients regarding new GASB pronouncements and Single Audit reporting requirements including GASB 74 and GASB 75.
- Providing in excess of 80 hours per year of governmental continuing professional education (CPE) to our staff working on governmental audits.
- Attendance at national training sessions so that we can address implementation issues with key representatives of the Office of Management and Budget (OMB), U.S. Government Accountability Office (GAO), American Institute of Certified Public Accountants (AICPA) and the various Offices of the Inspector General's (OIG) relating to all areas of governmental auditing.
- Investing a significant amount of time in developing our understanding of new Single Audit requirements, including the new uniform grant guidance of 2 CFR 200. We regularly present to industry groups on new reporting and compliance requirements.
- Researching new professional pronouncements so that we are at the leading edge in preparing our clients to respond to all new requirements.
- Devoting resources to a strict quality control program including the funding of a quality control department.

As a result of our efforts Vavrinek, Trine, Day & Co., LLP places within the top three California based CPA firms and is a top 100 CPA firm nationally, and provides governmental auditing services to over 300 governmental agencies.

We value serving as the City of Roseville's independent auditors. Should you have any questions, please feel free to call me at (916) 570-1880.

Sincerely,

Phillip M. White, Partner
Vavrinek, Trine, Day & Co., LLP

COUNCIL COMMUNICATION

Title: Housing Element Annual Progress Report for Calendar Year 2018
Contact: Trisha Isom 916-746-1239 tisom@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.20.

RECOMMENDATION TO COUNCIL

Staff recommends that City Council adopt the attached resolution approving the Housing Element Annual Progress Report for Calendar Year 2018 and its submittal to the state, in accordance with Section 65400(b) of California Government Code and the Housing Successor's Annual Report of the Low and Moderate Income Housing Asset Fund for fiscal year 2017-18.

BACKGROUND

After each jurisdiction's General Plan Housing Element has been adopted, Section 65400(b) of the California Government Code requires the jurisdiction to provide an annual report to their legislative body, the State Office of Planning and Research (OPR) and the State Department of Housing and Community Development (HCD) on the status of the plan and progress in its implementation. The report must detail progress in meeting the City's share of regional housing needs, determined pursuant to California Government Code Section 65584, and local efforts to remove governmental constraints to the maintenance, improvement, and development of housing pursuant to California Government Code 65583(c)(3).

On June 19, 2013, the City Council adopted the 2013-2021 Housing Element. HCD subsequently confirmed the updated Housing Element was in compliance with State Housing Element Law on August 22, 2013. The 2018 Housing Element progress report covers review of the City's housing policies, goals and objectives for this last year within the 9-year reporting period of 2013 through 2021. With the submission of the 2018 Housing Element Annual Progress Report to the HCD by April 1, 2019, the City of Roseville maintains its eligibility to receive State-administered grant funds, such as the Housing-Related Parks Program, the State's HOME Program and the CalHome Program. Additional interest at the state level in Housing Element compliance makes this reporting even more important this year, as it could also link to eligibility for transportation and other non-housing funds.

In the planning process leading up to the current Housing Element period, the Sacramento Area Council of Governments (SACOG) determined the Regional Housing Needs Allocation (RHNA) for the six county region, including the City of Roseville, in accordance with State law. The RHNA allocates to each local jurisdiction its fair share requirement for meeting the area's housing needs

in all income categories for the years 2013 through 2021 during this plan period. The City's fair share housing need, as determined by SACOG, is 8,478 dwelling units, comprised of the following income groups: 2,268 units for very low income families, 1,590 units for low income families, 1,577 units for moderate income families, and 3,043 units for above moderate income families over the designated planning period. To meet this need, the City is required to identify land that is able to accommodate these quantities and income levels of development and then tracks development throughout the planning period.

The City of Roseville has provided for the future production of affordable housing units through its local policy requiring ten percent of new housing specific plans to be affordable. Since its inception in 1989, this local policy has resulted in the production of 2,935 affordable units, with an average of 101 units per year. Beyond the ten percent requirement, the City has also incentivized affordable housing development through the provision of land and subsidized loans for this purpose. In addition to the 57 extremely low, very low, and low income rental units provided in Downtown Roseville this year under these efforts, the City is currently working to approve two additional rental projects in Old Town Roseville and several purchase units throughout the infill area that will net approximately 150 affordable units by 2020. Other projects, like the Campus Oaks Master Plan, have been able to exceed local affordable housing requirements using state bond financing options, which have led to greater affordability like the 42 very low income rental units to be provided in early 2019.

The attached Housing Element Annual Progress Report identifies housing activity and progress in meeting Roseville's portion of the RHNA during the 2018 calendar year. In addition to units referenced above, there were a total of 3 low income Accessory Dwelling Units (ADUs) produced in calendar year 2018, and there were 633 moderate income units and 472 above-moderate income units produced during the year. The 2018 report is the 6th year in the 9-year reporting period. The City of Roseville has met its obligations in providing the land inventory necessary to meet its RHNA requirements and continues to meet program and policy goals of local incentives and reductions in government barriers. Construction of sites can be challenging in the private market right now due to an insufficient labor supply for residential construction, particularly amidst the rebuilding efforts of Santa Rosa and Paradise.

Included with the Housing Element Annual Progress Report, the City is also required to submit the Housing Successor's Annual Report of the Low and Moderate Income Housing Asset Fund for each fiscal year. The City, acting as the Housing Successor, assumed the Low and Moderate Income fund of the former Redevelopment Agency of the City of Roseville. This report for fiscal year 2017-18 details the City's action in carrying out housing activities and affordable housing development.

As noted in the report, these funds are primarily used to provide homeless prevention grant funding, to assist in the development of affordable housing (Lohse Apartments by Mercy Housing at 623 Vernon Street completed and Main Street Plaza and Junction Station are pending), and the monitoring of existing affordable housing units in Roseville.

Most of the fund balance will be spent on the upcoming Main Street Plaza Apartments (65 units at Washington Boulevard and Main Street) and Junction Station Apartments (80 units at Pacific Street and Church Street), both starting construction during 2019. Because the law allows for the Housing Successor to address homelessness prevention, the City has been committed to using the allowable $250,000 annually towards Homeless Prevention and Rapid Rehousing grants to local non-profit partners working to address homelessness in Roseville. These grants have been very successful in preventing and reducing homelessness for local at-risk families.

Once the Housing Element Annual Progress Report with the accompanying Housing Successor Agency Annual Report are acted upon by the City Council, staff will submit these documents in compliance with state requirements.

FISCAL IMPACT

The staff cost of developing the 2018 Housing Element Annual Progress Report was included in the Fiscal Year 2018-2019 adopted budget.

ECONOMIC DEVELOPMENT / JOBS CREATED

The Housing Element Annual Progress Report does not promote or create jobs, but it does provide an important service by reporting on the development of housing for all income levels in our community, including affordable housing. This range of housing is an essential component to the foundation of our community's economic stability. The City also provides opportunities for housing development through its land inventory within the Housing Element, thereby creating the opportunity for additional construction jobs locally.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment (CEQA Guidelines §15061(b)(3)). The Housing Element Annual Progress Report does not include the potential for a significant environmental effect, and therefore is not subject to CEQA. Individual housing projects would be reviewed separately under CEQA.

Respectfully Submitted,

Trisha Isom, Housing Analyst

Laura Matteoli, Economic Development Director

Resolution No. 19-73

2018 Housing Successor Agency Annual Report

RESOLUTION NO. 19-73

APPROVING THE HOUSING ELEMENT ANNUAL PROGRESS REPORT AND THE HOUSING SUCCESSOR'S ANNUAL REPORT OF THE LOW AND MODERATE INCOME HOUSING ASSET FUND

WHEREAS, on June 19, 2013, the City Council approved the General Plan's Housing Element update, which was an eight-year document (2013-2021); and

WHEREAS, Section 65400 of the Government Code of the State of California requires an annual report to the City Council, the State Offices of Planning and Research and the State Department of Housing and Community Development; and

WHEREAS, the City Council has reviewed the Housing Element Annual Progress Report (Calendar Year 2018);

WHEREAS, the City Council has also reviewed the Housing Successor's Annual Report of the Low and Moderate Income Housing Asset Fund for fiscal year 2017-18; and

NOW, THEREFORE, BE IT RESOLVED that the City Council of the City of Roseville hereby approves the Housing Element Annual Progress Report (Calendar Year 2018) and directs staff to submit it to State Offices of Planning and Research and the State Department of Housing and Community Development.

BE IT FURTHER RESOLVED that the Housing Successor's Annual Report of the Low and Moderate Income Housing Asset Fund for fiscal year 2017-18 is hereby approved

PASSED AND ADOPTED by the Council of the City of Roseville this ___ day of _____, 20__, by the following vote on roll call:

Report of Required Information per Health and Safety Code 34176.1 (f)
City of Roseville Housing Successor
Fiscal Year 2017-18

1. Any amounts deposited into the Fund, with segregation of amounts deposited from payments pursuant to a Recognized Obligation Payment Schedule ("ROPS") from other sources.

Amount	*Source*	*Purpose*
$1,000.00	Interest on Investments Earned	Fund Balance-Reserved
$5,306	Principal & Int on Notes/Loans	Fund Balance-Reserved
$30,515	Other Revenue	Fund Balance-Reserved
$243,293	20% Deposit from City Loan Payoff	Fund Balance-Reserved
$153,286	Loan Payoffs-Program Income	Fund Balance-Reserved
$433,400	**Total Deposits**	

2. The balance in the Fund at the fiscal year end, with segregation of amounts held to meet obligations on a ROPS from other amounts.

Amount	*Description*
975,225	Ending Cash
$0	Interest Receivable
$0.00	Reserved for ROPS
$975,225	**Fund Balance 6/30/18**

3. A description of expenditures from the Fund by category for:

a. Monitoring and preserving the long-term affordability of units subject to affordability restrictions or covenants entered into by the redevelopment agency or the housing successor and administering permitted affordable housing activities. ***The amount that can be spent on monitoring and administration is capped at 2% of the value of the assets in the Fund or $200,000 whichever is greater.***

b. Homeless prevention and rapid rehousing services. ***This amount is limited to $250,000 annually.***

c. Development of housing affordable to households at or below 80% of area median income ("AMI").

Amount	*Description*
$65,788	a. Staff charges for Monitoring
$4,182	b. Misc Office Charges
$248,750	c. Homeless Prevention
$318,720	**Total Expenditures**

ATTACHMENT A

Report of Required Information per Health and Safety Code 34176.1 (f)
City of Roseville Housing Successor
Fiscal Year 2017-18

4. The statutory value of real property owned by the housing successor, the value of loans and grants receivable, and the sum of these two amounts.
"Statutory value of real property" means the value of properties formerly held by the former redevelopment agency as listed on the housing asset transfer form approved by the Department of Finance ("DOF") and the purchase price of properties purchased by the housing successor.

Amount	*Description*
$861,245	304 Washington Blvd
$5,760,000	Mercy Housing - Deferred Receivables-
$4,436,880	FTHB/commercial Deferred Receivables
$916,121	Deferred Interest-Receivable
$11,974,246	**Total Value of Land & A/R**

5. A description of any inter-jurisdictional transfers of monies from the Fund in the previous fiscal year as well as any transfer from prior fiscal years if the funds are still unencumbered and a description of and status update on any project for which transferred funds have been or will be expended if that project has not yet been placed in service.

none

6. A description of any project for which the housing successor receives or holds real property tax revenue pursuant to the ROPS and the status of that project.

none

7. For interests in real property acquired by the former redevelopment agency prior to February 1, 2012, a status update on compliance with the development of the property within five (5) years after the DOF approved the property as a housing asset, which would typically be the date of approval of the housing asset transfer list. For interests in real property acquired on or after February 1, 2012, a status update on the project.

Mercy Housing has secured a loan from the Housing Successor in the amount of $5,760,000 for the development of a 58-unit mixed-use affordable housing development at 623 Vernon Street, Roseville. The loan was approved by the City Council, acting as the Housing Successor, on November 16, 2016. The funds - the remainder of the 2006 housing bonds - were wired to the developer's escrow account in November 2016. The project is planned to be completed by Fall 2018.

In 2016, the Housing Successor committed $600,000 of funding from the low/moderate affordable housing funds towards the Junction Crossing affordable rental housing development at 120 Pacific Street. This project will include 80 affordable units available for low and very low income households. St. Anton, the developer of this project, anticipates construction starting in Fall 2018, at which point the Housing Successor will assist Junction Crossing with these funds in the form of a low-interest loan.

ATTACHMENT A

Report of Required Information per Health and Safety Code 34176.1 (f)
City of Roseville Housing Successor
Fiscal Year 2017-18

8. A description of any outstanding replacement housing and housing production obligations that transferred to the housing successor on February 1, 2012, the housing successor's progress in meeting those obligations, and the housing successor's plans to meet the unmet obligations.	The Agency will continue to work with 2-3 affordable housing developers. Going forward the Agency is hopeful that loan portfolio payoffs and 20% set-aside deposits from City loan payments will provide additional assistance for affordable housing developments.
9. Reporting on income targeting requirements does not need to be included until December 31, 2019 for the period from January 1, 2014 through the end of the fiscal year covered by the report (June 30, 2019 for most housing successors), and every five years thereafter. However, it may be useful for housing successors to track this information on an annual basis to ensure the requirement is met every five years. *The required income targeting expenditures are that, over a five year period, the funds remaining after expenditures for monitoring and administration and rapid rehousing services, if any, must be expended for the development of housing affordable to and occupied by households earning 80% or less of the AMI, with at least 30% of the funds expended on the development of housing affordable to and occupied by households earning 30% or less of the AMI and not more than 20% of the funds expended on the development of housing affordable to and occupied by households earning between 60% and 80% of the AMI.*	Not Required until 2019
10. The percentage of units of deed-restricted rental housing restricted to seniors and assisted individually or jointly by the housing successor, its former redevelopment agency, and its host jurisdiction within the previous 10 years in relation to the total number of units of deed-restricted rental housing assisted individually or jointly by the housing successor, its former redevelopment agency, and its host jurisdiction within the same time period. *If the percentage of assisted senior rental housing is more than 50 percent of the total of all assisted rental housing, no additional senior rental housing can be assisted until the percentage falls to 50 percent or less.*	

# of Units	*Description*
287	Senior Restricted Rental Housing Units
558	Non-Senior Restricted Rental Housing Units
845	**Total Units**
34%	% of Senior Restricted Rental Housing Units

In last 10 years:

# of Units	*Description*
49	Senior Restricted Rental Housing Units
58	Non-Senior Restricted Rental Housing Units
107	**Total Units**
46%	% of Senior Restricted Rental Housing Units

11. The amount of any excess surplus, the amount of time that the successor agency has had the excess surplus, and the housing successor's plan for eliminating the excess surplus. *The definition of excess surplus has been modified so that an "excess surplus" exists to the extent a housing successor holds unencumbered funds in its Fund in an amount that exceeds the greater of $1,000,000 or the total amount of deposits into the Fund for the preceding four fiscal years. The housing successor is required to spend the excess*	$0.00

ATTACHMENT A

surplus amount or transfer that amount to another jurisdiction as provided in Health and Safety Code Section 34176.1(c)(2) within three fiscal years. If not, the excess surplus amount must be transferred to HCD to use pursuant to the Multifamily Housing Program or the Joe Serna, Jr. Farmworker Housing Grant Program.

Units Rehabilitated, Preserved and Acquired for Alternative Adequate Sites pursuant to Government Code section 65583.1(c)(2)

This table is optional. Jurisdictions may list (for informational purposes only) units that do not count toward RHNA, but were substantially rehabilitated, acquired or preserved. To enter units in this table as progress toward RHNA, please contact HCD at APR@hcd.ca.gov. HCD will provide a password to unlock the grey fields. Units may only be credited to the table below when a jurisdiction has included a program in its housing element to rehabilitate, preserve or acquire units to accommodate a portion of its RHNA which meet the specific criteria as outlined in Government Code section 65583.1(c)(2).

Activity Type	Units that Do Not Count Towards RHNA+ Listed for Informational Purposes Only				Units that Count Towards RHNA + Note - Because the statutory requirements severly limit what can be counted, please contact HCD to receive the password that will enable you to populate these fields. COUNCIL COMMUNICATION

CC #: 9867
File #: 0600-01

Title: Staffing Allocation and Salary Schedule Changes
Contact: Stacey Peterson 916-774-5374 slpeterson@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.21.

RECOMMENDATION TO COUNCIL

As part of an ongoing assessment of the appropriate staffing structure to provide a high level of service to the community, staff is recommending the following changes to the City's staffing allocation schedule and salary schedule to meet business needs. It is recommended that City Council take the following actions:

1. Adopt an ordinance to approve the attached Management A & B salary schedules (Appendix B) reflecting the addition of Information Technology Client Services Supervisor (9542, B966) effective March 30, 2019; and
2. Motion to approve the attached citywide allocation schedule effective March 30, 2019.

BACKGROUND

As part of the Municipal Code, the Human Resources Department is charged with maintaining the City's classification plan. The Human Resources staff is continually evaluating staffing levels necessary to provide high service levels to the community. Staff reviews department workload and the allocation's impact on meeting the city's goals. As a result of a recent study, staff is requesting a new classification to recognize the scope and breadth of work assigned to the Senior Information Technology Analyst position responsible for procurement and supervising the technical staff who provide client services in the Information Technology (IT) Department. The Senior Information Technology Analyst supervises 5.0 full-time equivalent and 2.0 part-time IT Technicians who troubleshoot computer issues, replace devices, grant/remove system access, track inventory, manage incidents and procure/deploy/train on new applications/software. The breadth of responsibility over broad client services that support the entire City staff, in 70+ locations and a variety of automated software and systems warrants reclassification to a new Information Technology Client Services Supervisor classification.

From	To	Current Salary & Benefits	Proposed Salary & Benefits	Annual Impact

Senior Information Technology Analyst	IT Client Services Supervisor	$154,297	$ 162,012	$7,715

The fiscal impact, based on the remaining 8 pay periods in FY18/19, is $2,374.

FISCAL IMPACT

The total annual cost of the reclassification is $7,715. The total FY18/19 cost is $2,374 and there are sufficient funds in the FY18/19 Information Technology Department budget to cover the additional personnel expense. The additional cost of the reclassification will be incorporated into the rates charged to City departments in FY19/20, with approximately 58% (or $4,475) allocated to the General Fund.

ECONOMIC DEVELOPMENT / JOBS CREATED

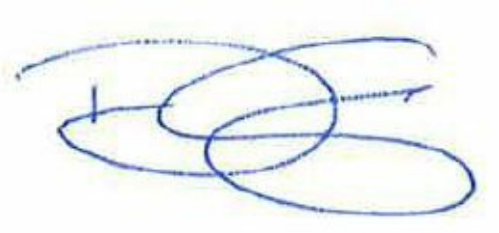
No new jobs are created by this action.

ENVIRONMENTAL REVIEW

Staffing changes are not considered a “project” as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines 15378). Consequently no CEQA action is required.

Respectfully Submitted,

Stacey Peterson, Human Resources Director



Dominick Casey, City Manager

Description

Ordinance No. 6065

Mgt Salary Schedule A

Mgt Salary Schedule B

Allocation Schedule 3/20/19

ORDINANCE NO. 6065

ORDINANCE OF THE COUNCIL OF THE CITY OF ROSEVILLE AMENDING ORDINANCE NO. 6057, THE SALARY ORDINANCE FOR MANAGEMENT EMPLOYEES, AS AMENDED BY APPENDIX "B" TO BE EFFECTIVE MARCH 30, 2019, AS AN URGENCY MEASURE

THE CITY OF ROSEVILLE ORDAINS:

SECTION 1. Title and Purpose.

Ordinance No. 6057, the Salary Ordinance for Management Employees, is hereby amended as shown on Appendix "B" for salary schedules A and B attached hereto:

ADDITION OF CLASSIFICATION

Classification No.	Position Title	Salary Range
9542, B966	Information Technology Client Services Supervisor	5196

SECTION 2. Salary Plan Effective Date.

This Ordinance shall be effective March 30, 2019 as an urgency measure.

SECTION 3. Urgency Ordinance.

This ordinance is hereby declared to be an urgency measure, immediately necessary for the public peace, health and safety and shall take effect March 30, 2019. A statement of urgency is as follows:

It is necessary to amend the Salary Ordinance to comply with recently approved changes for the orderly and necessary continuance of operations of the City.

SECTION 4. Posting.

The City Clerk is hereby authorized and directed to post a true copy of the foregoing ordinance in each of three (3) conspicuous locations in the City and she shall immediately after such posting enter in the Ordinance Book under the record of the ordinance a certificate under her hand stating the time and place of said publication by posting.

PASSED AND ADOPTED by the Council of the City of Roseville this ____ day of _____, 2019, by the following vote on roll call:

Title: Out of State Travel Request - Police Memorial Week
Contact: Troy Bergstrom 916-774-5058 tbergstrom@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.24.

RECOMMENDATION TO COUNCIL

Staff recommends the City Council authorize out-of-state travel for the Police Department Honor Guard Team to attend the National Police Week Memorial in Washington DC from May 12-17, 2019.

BACKGROUND

National Police Memorial Week is held every year during May in Washington DC to honor fallen police officers. Departments from across the country send representatives to honor those officers lost during the year as well as to honor their own department members who are remembered at the National Memorial.

The Roseville Police Department Honor Guard has not attended Memorial Week in several years after attending for many years prior. This year, we are looking to attend and honor fallen officers, but more importantly to honor our own fallen, Officer Mark White, whose line of duty death is approaching its twenty-five year anniversary. Officer White's widow will be in attendance this year and part of the reason in attending is to provide an escort to her during memorial events.

This request is for seven department members to attend National Police Memorial Week from May 12 through May 17, 2019 to include one Police Captain, one Police Lieutenant, one Police Sergeant, and four Police Officers.

FISCAL IMPACT

Travel costs, except lodging, are being covered through a combination of private donations, donation from the Roseville Police Officer's Association, and attendee self-funding. Hotel expenses of approximately $3,960.00 are being covered by Police Department training funds already included in the department budget.

ECONOMIC DEVELOPMENT / JOBS CREATED

Not applicable to this out of state travel request.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment (CEQA Guidelines §15061(b)(3)). This request for out-of-state travel does not include the potential for a significant environmental effect, and therefore is not subject to CEQA.

Respectfully Submitted,

Troy Bergstrom, Police Captain

James Maccoun, Police Chief

Title: John L Sullivan Park (WB-51) - Master Plan Approval
Contact: Tara Gee 916-774-5253 tgee@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.25.

RECOMMENDATION TO COUNCIL

Approve the master plan for the WB-51 neighborhood park site in the Westbrook area of the Sierra Vista Specific Plan.

BACKGROUND

Location and Size

This 4.5 acre park site is located in the Westbrook area off of Summerfaire and Solaire Drives.

Public Outreach

Consistent with the standard public outreach program, two face to face neighborhood workshops were conducted on September 27 and October 29, 2018. At these workshops, the park planning process was explained, feedback on priorities regarding desired amenities was collected and a concept sketch was presented for comment. Meeting minutes can be found online.

A two week write in period began on December 7, 2018, and ended on December 21, 2018. An updated and colored design rendering was posted online and residents were invited to make comments. Eleven emails were received. Overall comments received were supportive of the design proposal. Comments included questions about the adjacent well site, which were fielded to the Environmental Utilities Department, water play, adding more basketball courts, adding a rose garden, and adding an off-leash dog park.

Design Considerations

Neighborhood parks are designed for a one-hour “stay and play” value and are located within a walk or bike ride from home. The type of recreation associated with neighborhood parks are generally informal and seek to balance neighborhood needs and city recreation needs. When building adjacent to homes, we seek to provide value while being “good neighbors”.

Budgets are also considered in the design process. Budgets are established during the specific plan phase through a park financing plan.

Master Plan Proposal

The master plan proposes a design that offers a “game theme” with a concrete foosball table, concrete corn hole game area, picnic tables with game table surfacing such as checkers and chess, a practice Frisbee golf goal, a shade structure over the tables, a half court for basketball, multi-use turf, and water-efficient landscaping. A perimeter walkway with three exercise pods is included. This park design meets the allocated budget of $950,000, which includes hard costs (construction) and soft costs (design, engineering, permits, project management, and inspection).

Schedule
Anticipated start of construction is Spring 2020.

FISCAL IMPACT

Park development fees have been collected through the Westbrook Neighborhood Park Fund. The funding source for maintenance is provided through the Westbrook Community Facilities District for Service. There will be no General Fund impact.

ECONOMIC DEVELOPMENT / JOBS CREATED

Based on Federal guidelines, there is one job created for every $92,000 in direct government spending. Based on that figure, 10 new jobs were created as a result of this project.

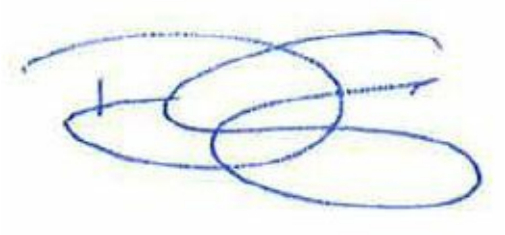
ENVIRONMENTAL REVIEW

Development of John L. Sullivan Park (WB-51) was originally evaluated in the Sierra Vista Specific Plan and EIR (May 2010) (SCH # 200832115) and then later in the Westbrook Amendment to the Sierra Vista Specific Plan (SPA) Mitigated Negative Declaration (June 2012) (SCH#200832115). Construction of Neighborhood Park WB-51 is found to be within the scope of the project covered by the Westbrook Amendment to the Sierra Vista Specific Plan. Because the Neighborhood Park WB-51 project was evaluated in the project level analysis of the Sierra Vista Specific Plan EIR and the Westbrook Amendment to the Sierra Vista Specific Plan (SPA) Mitigated Negative Declaration, no new effects would be expected to occur and all applicable mitigation measures from the applicable prior EIR and Mitigated Negative Declaration will be implemented during the design and construction of the proposed project. As such, no additional environmental documentation is required.

Respectfully Submitted,

Tara L. Gee, Park Planning & Development Superintendent

Dion Louthan, Parks, Recreation & Libraries Director



Dominick Casey, City Manager

Title: Out of State Travel Request - Fire Department
Contact: Jason Rizzi 916-774-5802 jrizzi@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.26.

RECOMMENDATION TO COUNCIL

Staff recommends Council approval for out of state travel for one Fire Department staff member to attend the Government Social Media conference in Nashville, TN, in April 2019.

BACKGROUND

The Government Social Media Conference (GSMCON) is the only major social media conference for U.S. city, county and state governments. This conference is specifically designed to educate cities, counties, states and federal agencies on social media best practices, not only for day-to-day social media use but also best practices for emergency management social media use.

FISCAL IMPACT

Funding for travel, lodging, per diem and conference registration is estimated to be $2,500 and is included in the Fire Department's current fiscal year budget.

ECONOMIC DEVELOPMENT / JOBS CREATED

Not applicable.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical changes in the environment (CEQA Guidelines §15061(B)(3)). Approval of out of state travel does not include the potential for a significant environmental effect, and therefore is not subject to CEQA.

Meeting Date: 3/20/2019
Item #: 6.27.

RECOMMENDATION TO COUNCIL

Staff recommends Council approve out-of-state travel for a total of 3 Fire Department staff members to attend Union Pacific Railroad's Tank Car Safety and Emergency Response courses (April 15-19, 2019). The course is being at held at the Association of American Railroad's Security and Emergency Response Training Center (SERTC) near Pueblo, CO. This is an intensive manipulative course focused on emergency response to railroad incidents. Total cost to the department is approximately $6,000, which includes backfill costs and per diem. Funds for this training are available in the department's current fiscal year budget.

BACKGROUND

The Roseville Fire Department has a Type-1 Hazardous Materials team capable of responding to various Hazardous Materials rail incidents in Roseville and the surrounding area. Type 1 Hazardous Materials teams have the highest level of equipment and training, and are tasked with mitigating the most technical hazardous materials emergencies.

The City of Roseville is home to the largest rail switchyard west of the Mississippi. Large quantities of hazardous materials move safely through the heart of Roseville on a daily basis. Occasionally, there is an event that requires Roseville Fire's Hazmat team to respond and work collaboratively with Union Pacific to rapidly mitigate the emergency. The goal is to protect the citizens and businesses of the City of Roseville, and minimize disruption to business and commerce. Frequently, the most effective way of accomplishing these objectives is to perform a "field repair," stopping the emergency, and allowing the affected railcar to be offloaded or moved out of Roseville to a certified repair shop for complete repair and recertification. This class covers these advanced field repair techniques on full scale, state of the art props and damaged railcars. This is the Association of American Railroad's national training center, known as the Transportation Technology Center (TTCI), near Pueblo, Colorado. Information gained in this class will be brought back and shared with Roseville's Hazmat Team to improve our response to railroad hazardous material emergencies.

FISCAL IMPACT

The total cost to the department is approximately $6,000, which includes backfill costs for three fire department staff and per diem. Funds for this training are available in the department's current fiscal year budget. Union Pacific Railroad is paying for the tuition, travel, and lodging for City staff to attend, estimated at $10,500.

Title: Fiscal Year 2018-19 Second Quarter Report
Contact: Scott Pettingell 916-746-1306 spettingell@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.28.

RECOMMENDATION TO COUNCIL

This is an informational item and requires no Council action.

BACKGROUND

This report summarizes the City's financial position through the Second Quarter of FY2018-19 for (1) the General Fund, (2) the enterprise operating funds, and (3) revenues in other selected funds.

FISCAL IMPACT

This item is a financial update only and has no fiscal impact.

ECONOMIC DEVELOPMENT / JOBS CREATED

This item is not connected to any new job creation.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical changes in the environment (CEQA Guidelines §15061(B)(3)). A fiscal report presentation does not include the potential for a significant environmental effect, and therefore is not subject to CEQA.

Description

Second Quarter Report

Second Quarter Report
Fiscal Year 2018-19

CITY OF ROSEVILLE
CALIFORNIA

Second Quarter Report
Fiscal Year 2018-19

Introduction

This financial report provides an overview of the City's financial position through the second quarter of fiscal year (FY) 2018-19 (July 1, 2018, through December 31, 2018) for (1) the General Fund, (2) the major enterprise operating funds, and (3) revenues in other selected funds. Notable cumulative second quarter to second quarter and budget to actual comparisons are included in this report.

The following factors should be taken into considerations when analyzing second quarter data:

- Property tax revenue has not yet been received (expected in mid-January and mid-May).
- Some significant costs are incurred up front (for example, CalPERS payments and some contracts) with variances smoothing out over the fiscal year.

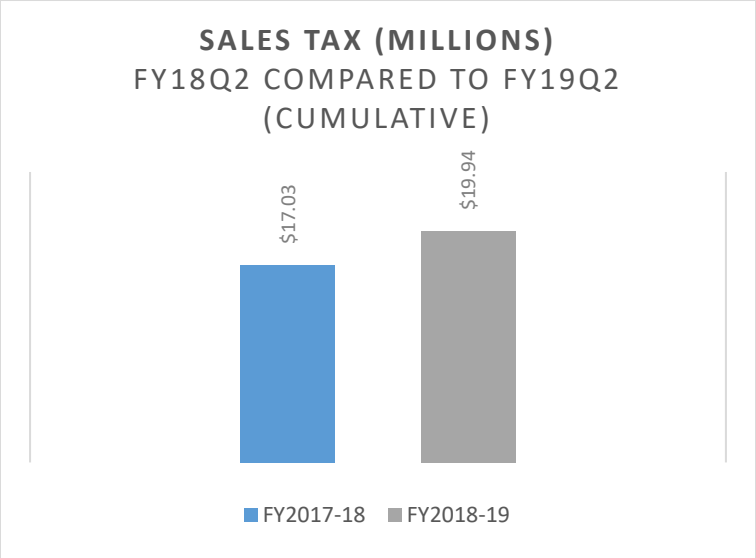
General Fund: Operating Revenues

The following table includes cumulative revenue comparisons through the first two quarters of FY2017-18 and FY2018-19 and a revenue budget to actual comparison for FY2018-19.

	Cumulative second quarter actual comparison (July 1 – December 31)				Budget to actual comparison	
	FY2017-18	FY2018-19	$ Variance	% Variance	FY2018-19 Amended Budget	% of budget
Sales Tax	$17,025,916	$19,940,804	$2,914,888	17.1%	$56,947,700	35.02%
Property Tax	708,515	765,112	$56,597	8.0%	44,725,920	1.71%
Parks, Recreation & Libraries Programs	1,984,893	2,071,015	$86,122	4.3%	4,053,321	51.09%
Building Permits	1,294,342	1,079,789	($214,553)	-16.6%	2,216,300	48.72%
Plan Check Fees	1,130,160	938,386	($191,774)	-17.0%	2,006,822	46.76%
Engineering Inspection Fees	83,173	32,551	($50,622)	-60.9%	171,880	18.94%
Grants	69,067	35,105	($33,962)	-49.2%	265,112	13.24%
Other Revenue	6,368,867	7,343,974	$975,107	15.3%	17,404,677	42.20%
Total:	**$28,664,933**	**$32,206,736**	**$3,541,803**	**12.4%**	**$127,791,732**	**25.20%**

General Fund operating revenues through the second quarter are $3.5 million, or 12 percent above the same period in FY2017-18. Although revenues are only at 25 percent of the budget through the second quarter of the current year, this is primarily due to the timing associated with receiving some of the larger revenues sources. For instance, property tax is the second largest General Fund revenue source, but the majority of this funding is received in the third and fourth quarters of the fiscal year. The following is an explanation of the notable variances:

- Sales tax revenues exceeded last year's cumulative second quarter by 17 percent or $2.9 million. Approximately $0.8 million of this increase is due to a delay in processing state-wide tax remittances caused by the implementation of a new software system at the California Department of Tax Fee Administration. These one-time revenues were not included in the FY2018-19 budget because the City was not made aware of the delay until after budget adoption. The remaining balance of $2.1 million is attributed to growth in sales tax revenues as compared to the prior year.



Based on the latest sales tax forecast and accounting for the $0.8 million in prior year revenues, sales tax is trending to end year approximately $600,000 below the FY2018-19 budget estimates at $56.4 million. Without the $0.8 million in prior year revenues, sales tax revenues would come in $1.4 million under budget. Staff is continuing to monitor this revenue stream and will provide the City Council an update in the Third Quarter Report.

- Building permit revenues, plan check fees, and engineering inspection fees all decreased due to slower development activity as compared to the same period of FY2017-18.

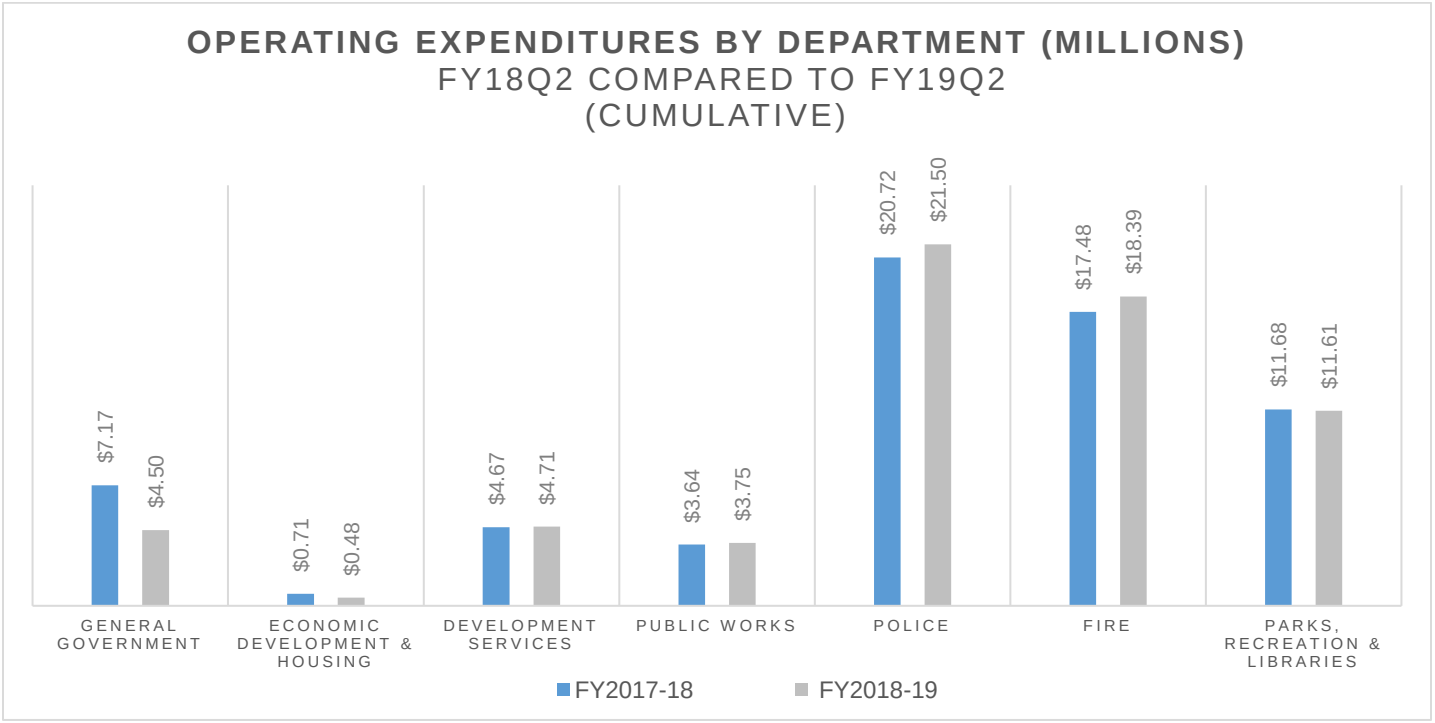
- Other revenues increased by 15 percent or $975,000. The major factors contributing to this variance include increased hotel/motel room tax revenues, reimbursements from the State for fire strike team, and development reimbursement activity.

General Fund: Department Operating Expenditures

The following table includes cumulative second quarter actual expenditure comparisons for FY2017-18 and FY2018-19 and an expenditure budget to actual comparison for FY2018-19.

	Cumulative second quarter actual comparison (July 1 – December 31)				Budget to actual comparison	
	FY2017-18	FY2018-19	$ Variance	% Variance	FY2018-19 Amended Budget	% of budget
General Government	$7,165,450	$4,503,366	($2,662,084)	-37.2%	$9,432,288	47.7%
Economic Development & Housing	712,931	478,332	($234,599)	-32.9%	814,076	58.8%
Development Services	4,672,171	4,709,615	$37,444	0.8%	9,764,757	48.2%
Public Works	3,636,463	3,745,626	$109,163	3.0%	6,962,700	53.8%
Police	20,717,907	21,496,271	$778,364	3.8%	41,730,678	51.5%
Fire	17,478,979	18,385,742	$906,763	5.2%	32,183,349	57.1%
Parks, Recreation & Libraries	11,677,042	11,605,402	($71,640)	-0.6%	23,119,776	50.2%
Total:	**$66,060,943**	**$64,924,354**	**($1,136,589)**	**-1.7%**	**$124,007,624**	**52.4%**

Overall, cumulative second quarter General Fund expenditures are within 2 percent of the previous year. General Government (which includes Human Resources, Finance, City Clerk, etc.) and Economic Development & Housing saw significant decreases in expenditures because reimbursements associated with the citywide cost allocation plan were recorded as a transfer in the prior year. Spending in all of the remaining General Fund Departments was similar to the prior year quarter.



Through the first six months, as compared to budget, General Fund expenditures are tracking as expected at 52 percent of the budget. The slightly higher rate of spending (52 percent versus 50 percent of the year elapsed) is primarily due to upfront contributions to CalPERS. The following is an explanation of the department specific variances through the second quarter as compared to the prior year.

- Economic Development & Housing expenditures are tracking higher than average at 59 percent primarily due to the upfront payment of CalPERS and annual membership contributions to economic development organizations. Another contributing factor is the ongoing re-alignment of the housing rehabilitation budget from the miscellaneous revenue fund (299) to the General Fund. Once the budget re-alignment is completed, the Department anticipates having adequate appropriations available to finish the year on budget.

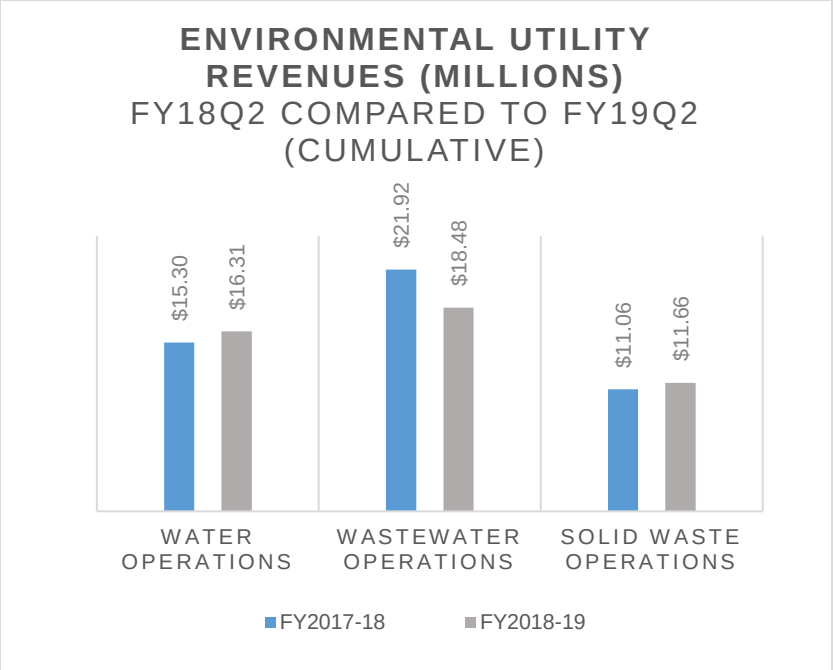
- Fire Department expenditures are tracking at 57 percent of the budget, due to the upfront payment of CalPERS, maintenance of the four firefighter response standard despite reducing the standard to three firefighters in the budget and a large turnout (fire protection suite) order. The Department anticipates offsetting a portion of this cost with salary savings through the remainder of the year. Staff will continue to monitor this budget and will utilize General Fund contingency funds to cover any overages.

Enterprise Funds: Operating Revenue

The table below includes cumulative second quarter actual revenue comparisons for FY2017-18 and FY2018-19 and a revenue budget to actual comparison for FY2018-19 for the Enterprise Funds.

	Cumulative second quarter actual comparison (July 1 – December 31)				Budget to actual comparison	
	FY2017-18	FY2018-19	$ Variance	% Variance	FY2018-19 Amended Budget	% of budget
Electric Operations	$84,499,137	$82,565,477	($1,933,660)	-2.3%	$164,273,925	50.3%
Water Operations	15,300,370	16,312,691	$1,012,321	6.6%	30,440,666	53.6%
Wastewater Operations	21,923,365	18,478,193	($3,445,172)	-15.7%	38,394,809	48.1%
Solid Waste Operations	11,057,739	11,655,266	$597,527	5.4%	23,270,158	50.1%
Transit	553,963	483,850	($70,113)	-12.7%	10,918,918	4.4%
Transportation	32,033	2,112	($29,921)	-93.4%	2,089,055	0.1%
Youth Development	3,511,346	3,542,130	$30,784	0.9%	6,780,998	52.2%

The $1.9 million or 2.3 percent reduction in Electric revenues through the second quarter is primarily due to the milder summer temperatures, reducing customer energy usage.



Water and Solid Waste revenues increased compared to the second quarter of last year due to rate increases of 7 percent and 2 percent respectively as well as increased utility sales. Wastewater revenues decreased by $3.4 million or 16 percent due to timing associated with receiving wastewater reimbursements from the South Placer Municipal Utility District and County of Placer. The Department anticipates that these reimbursements will be received during the third and fourth quarters.

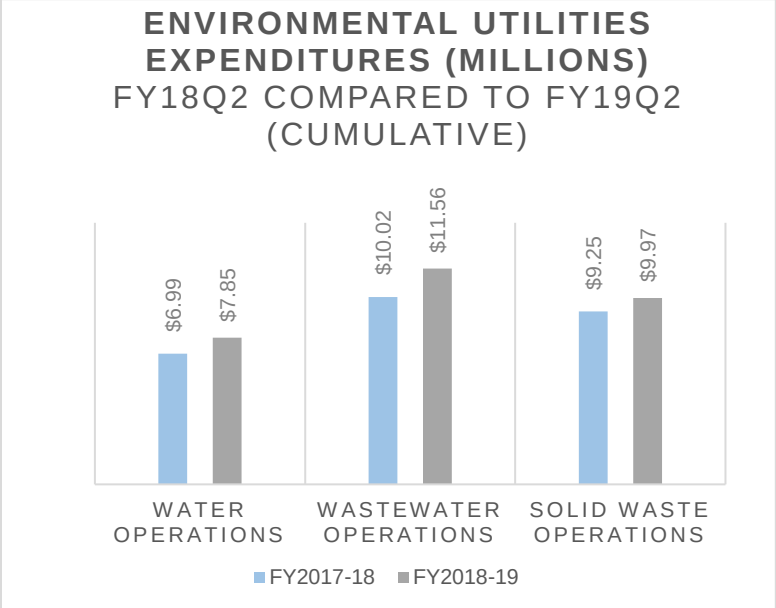
Overall, Enterprise Fund revenues as compared to the budget are on target. Larger budget to actual variances in the Transit and Transportation enterprise funds are due to the timing associated with their primary revenue streams as a majority of their funding is realized in the last two quarters of the fiscal year.

Enterprise Funds: Operating Expenditures

The following table includes cumulative second quarter actual expenditure comparisons for FY2017-18 and FY2018-19 and an expenditure budget to actual comparison for FY2018-19.

	Cumulative second quarter actual comparison (July 1 – December 31)				Budget to actual comparison	
	FY2017-18	FY2018-19	$ Variance	% Variance	FY2018-19 Amended Budget	% of budget
Electric Operations	$51,823,041	$48,773,864	($3,049,177)	-5.9%	$120,811,075	40.4%
Water Operations	6,988,295	7,850,685	$862,390	12.3%	23,590,695	33.3%
Wastewater Operations	10,018,572	11,558,088	$1,539,516	15.4%	29,630,897	39.0%
Solid Waste Operations	9,250,687	9,974,235	$723,548	7.8%	24,961,391	40.0%
Transit	2,458,091	2,578,730	$120,639	4.9%	6,738,106	38.3%
Transportation	432,292	494,105	$61,813	14.3%	1,428,071	34.6%
Youth Development	3,056,512	3,167,752	$111,240	3.6%	6,537,217	48.5%

All of the enterprise funds experienced increased expenditures through the second quarter because charges associated with the cost allocation plan were recorded as a transfer in the prior year. In the Electric Fund, this increase was offset by lower purchased power market prices and reduced customer energy usage resulting in a 6 percent decrease in expenditures as compared to the prior year.



In addition to the cost allocation plan change, Water, Wastewater and Solid Waste expenses increased because budgeted transfers for the Utility Exploration Center, Environmental Utilities administration and outreach, and utility billing are being changed to reimbursed expenditures.

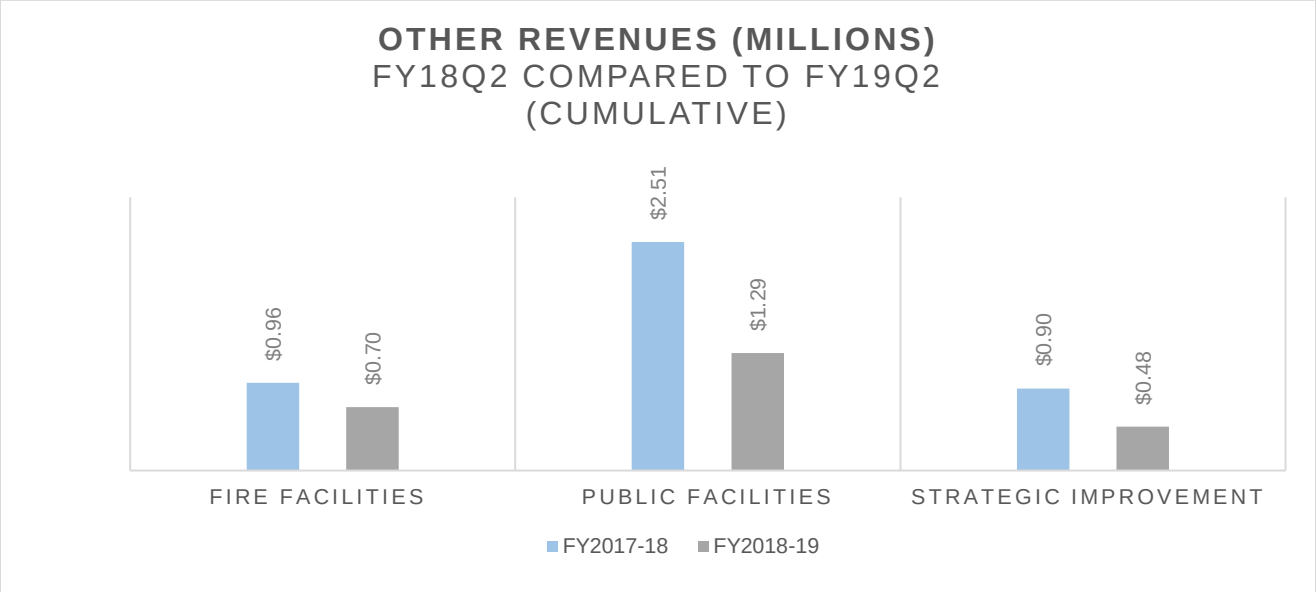
Overall, all of the Enterprise Funds are tracking to end the year on or under budget.

Other Revenue

The table below shows revenues in the Fire Facilities Fund, Public Facilities Fund, and Strategic Improvement Fund through the first six months of FY2018-19. The second quarter improved over the first quarter (First quarter actual comparison: Fire Facilities: -28.3 percent; Public Facilities: -63.3 percent; and Strategic Improvement: -58.8 percent) but continued to trend lower than FY2017-18. Staff attributes these reductions to less development activity as compared to the same period of the previous fiscal year.

Overall, the Fire Facilities and Strategic Improvement funds are tracking to come in on budget. The Public Facilities Fund is trending to come in under budget by approximately 4%. All three of these funds are following relatively close to budget, despite less revenue as compared to the previous year quarter, because the City has historically taken a conservative approach when budgeting these revenues because of the volatile nature of development.

	Cumulative second quarter actual comparison (July 1 – December 31)				Budget to actual comparison	
	FY2017-18	FY2018-19	$ Variance	% Variance	FY2018-19 Amended Budget	% of budget
Fire Facilities	$963,261	$696,513	($266,748)	-27.7%	$1,388,251	50.2%
Public Facilities	2,510,156	1,288,652	($1,221,504)	-48.7%	2,828,181	45.6%
Strategic Improvement	901,798	481,105	($420,693)	-46.7%	962,784	50.0%



Conclusion

Except for identified variances, expenditures and revenues are tracking as expected. Staff will continue to monitor these variances and come back to City Council later in the spring with the FY2018-19 Third Quarter Report.

COUNCIL COMMUNICATION

CC #: 9842
File #: 0103-32-02

Title: State and Federal Legislative Platform 2019
Contact: Mark Wolinski 916-774-5179 mwolinski@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 6.29.

RECOMMENDATION TO COUNCIL

Adopt the attached Legislative Platform, which includes a set of priorities, legislative principles and platforms to guide the City's State and Federal legislative and judicial advocacy programs through 2019. (Attachment A)

BACKGROUND

The City's Legislative Platform is the result of the City Council's articulation of its goals and priorities during legislative updates and the City Council's Legislative Platform Workshop held February 20, 2019. The Legislative Platform conveys the Council's positions on issues that are currently, or are anticipated to be, the focus of future legislation and regulation at the state and federal levels.

Council's adoption of this platform authorizes the City's active participation to influence State and Federal decision-making on legislative, administrative, regulatory and funding issues and to support judicial advocacy consistent with the City's priorities. Using this document as a guide, the City will adopt positions on specific legislation, regulations and budget proposals, and respond to requests for amicus curiae support when the outcome of a pending lawsuit is likely to significantly affect a priority concern of the City. The Mayor will sign letters based on the City's identified interests; the Mayor and other Council Members will advance City interests through individual and regional advocacy efforts; and the Mayor will act on requests from the City Attorney to join in friend-of-the-court briefs.

Staff recommends that the Legislative Platform be updated annually to be responsive to changes to the state and federal legislative and regulatory environments and to reflect the interests unique to Roseville and the region, and the interests that Roseville may have in common with cities throughout the State.

Effective Platform Implementation
An assortment of internal and external resources is used to effectively administer the City's

legislative platform, they include:
• The City Council Law and Regulation Committee. This is a standing, advisory committee of the City Council with review and recommendation authority. The Committee provides a forum to introduce, discuss and more thoroughly analyze selected proposed State and Federal legislation, policies and regulations that have the potential to impact City departments, the community and the region.
• Staff works collaboratively with our lobbyists to understand and develop strategies for influencing legislation. The City's federal lobbyist helps identify funding resources for departmental projects and will review grant applications before they are submitted.
• Staff interacts and participates with industry and regional organizations such as the League of California Cities, Sacramento Area Council of Governments, North State Water Alliance, Northern California Power Agency, California Municipal Utilities Association and the Roseville Chamber of Commerce.
• Staff works with staff from each department on legislation, regulations, and project funding opportunities that are important to their departments. During the course of the legislative year staff monitors introduced legislation, develops priority lists of legislation for each department and makes recommendations on letters of support/opposition as the bills progress through the legislative process.
• Government relations staff works closely with the staff of the City's State and Federal representatives to ensure the City's position on legislation is clearly understood by Roseville's representatives. The development of this relationship and exchange of information with the City's representatives is an effort that continues throughout the entire year.

Working collaboratively with the Council's Law and Regulation Committee and the City's internal and external partners ensures that the City's advocacy strategy has the greatest ability to influence legislation and policies that are crucial to the City. The City has successfully demonstrated the ability to work with this process and to develop coalitions that take positions on legislation in a manner that is beneficial and supportive of the adopted platform.

Platform Modifications

Modifications were made throughout the 2019 platform to ensure the City is well positioned to effectively advocate for or against legislation, policies and regulations introduced during the 2019 legislative and congressional sessions. These modifications were reviewed and discussed with the City Council during the Council's February Legislative Platform workshop. All additions/edits that were provided for Council's review at the Legislative Platform workshop have been incorporated into the 2019 Legislative and Regulatory Platform for State and Federal Advocacy.

FISCAL IMPACT

The costs to implement the legislative advocacy program are included in the City's approved budget. The Legislative Platform has no direct fiscal impact to the City's budget; the platform provides policy direction only.

ECONOMIC DEVELOPMENT / JOBS CREATED

The activities detained in this report will not result in job development or creation.

ENVIRONMENTAL REVIEW

The California Environmental Quality Act (CEQA) does not apply to activities that will not result in a direct or reasonably foreseeable indirect physical change in the environment (CEQA Guidelines §15061(b)(3)). The action of reviewing proposed CEQA legislation does not include the potential for a significant environmental effect, therefore is not subject to CEQA.

Respectfully Submitted,

Mark Wolinski, Government Relations Administrator

Megan MacPherson, Public Affairs and Communications Director

Critical Concerns for the Upcoming Legislative/Congressional Session 18

Background

The positions defined within this legislative and regulatory platform reflect the City Council's goals and priorities as well as its position on issues that are currently, or are anticipated to be, the focus of future legislation and regulation at the state and federal levels. Council's adoption of this platform authorizes the City's active participation to influence state and federal decision-making on legislative, administrative, regulatory and funding issues and to support judicial advocacy consistent with the City's priorities.

Using this document as a guide, the City will adopt positions on specific legislation, regulations and budget proposals, and respond to requests for amicus curiae support when the outcome of a pending lawsuit is likely to significantly affect a City priority. The Mayor will sign letters of support or opposition based on the City's identified interests, the Mayor and other Council Members will advance City interests through individual and regional advocacy efforts, and the Mayor will act on requests from the City Attorney to join in friend-of-the-court briefs.

Staff recommends that the Legislative and Regulatory Platform be updated annually to be responsive to changes to the state and federal legislative and regulatory environments and to reflect the interests unique to Roseville and interests that may also be common to cities throughout the state.

Strategies for Effective Platform Implementation

- City staff works collaboratively with our federal and state lobbyists to understand and develop strategies to influence legislation. The City's federal lobbyist also works closely with staff to help identify funding resources for projects and reviews grant applications before they are submitted. Staff will scrutinize grant requirements for matching funds, environmental review, or for new requirements required to ensure they have a reasonable correlation to the value of the funding and the benefit being derived from the grant.
- City staff participates in organizations such as The League of California Cities, Sacramento Area Council of Governments (SACOG), Sacramento Metropolitan Chamber of Commerce, North State Water Alliance, Northern California Power Agency (NCPA), California Municipal Utilities Association (CMUA), Municipal Information Systems Association of California (MISAC), California Association of Sanitation Agencies (CASA), National Association of Clean Water Agencies (NACWA), Association of California Water Agencies (ACWA) and the Roseville Area Chamber of Commerce to advocate on issues that are important to the City. This allows the City to have a stronger voice and a greater potential to influence key policy and legislative matters.
- Government relations staff works with staff from each department to develop awareness of and understanding of legislation, regulations, and project funding opportunities. During the course of the legislative year, staff monitors legislation, develops priority lists of legislation for each department, and makes recommendations on letters of support or opposition as bills progress through the legislative process.
- Government relations staff strategizes and coordinates with other jurisdictions, special districts and organizations on key issues of common interest to ensure a stronger voice on legislation, regulatory and policy matters.
- City advocacy letters are signed by the Mayor. In the event the Mayor is not available to sign an advocacy letter, the responsibility will reside with the Vice-Mayor.
- Government relations staff works closely with state and federal legislative staff to ensure the City's position on legislation and critical concerns is clearly understood by Roseville's elected representatives. The development of this relationship and exchange of information with the City's representatives continues throughout the year.
- Proposed City advocacy positions on bills that would result in the issuance of or a vote for a new state bond will be brought to the full Council for its consideration and direction.

Working collaboratively with the Council's Law and Regulation Committee and the City's internal and external partners ensures that the City has the greatest ability to influence legislation and policies that are important to the City. The City has successfully used this process of proactive advocacy and coalition development to take positions on legislation to effectively advance the legislative platform.

Funding Opportunities

To develop outside state and federal funding opportunities for Roseville projects and programs.

We take the following approach to accomplish this:

1. Develop relationships and funding opportunities by actively promoting Roseville projects that provide a mutual benefit for our funding partners.

Federal Funding Requests

Projects (not in order of priority):

1. Emerging energy- and water-use efficiency technologies
2. Recycled water system
3. Water supply reliability improvements such as increased conjunctive use capacity, diversification of water supplies as it pertains to implementation of the Roseville Groundwater Strategic Plan, and recommended in other long-range resource planning documents
4. Expansion of wastewater digestion capacity to handle organics recycling and generate renewable energy
5. Washington Andora widening project
6. Cybersecurity technology and IT infrastructure improvements needed to comply with federal mandated regulations and laws

Initiatives: Promoting economic stimulus and infrastructure investment

a. Projects that provide jobs especially in the areas of energy, water, transportation, public safety and community development.

b. Assistance for business expansion and formation.

Priorities For 2019

Citywide Legislative Principles

1. The City of Roseville believes in local control and the ability of the City Council to make decisions that address the needs of residents and businesses within its jurisdiction. In general, the City of Roseville will oppose legislation that erodes local control and will support legislation that increases local control.
2. The City of Roseville also believes in fiscal responsibility and requires financial flexibility to carry out its mission and objectives for the community. The City will oppose legislation that hinders financial flexibility and will support legislation that encourages financial flexibility.
3. Oppose legislation that requires the City to provide a service or benefit without appropriate and full funding.
4. Oppose legislation that would negatively impact City revenues including but not limited to sales tax, property tax, other General Fund revenues and enterprise fund revenues.
5. Support legislation that protects and maintains City sales tax revenue and oppose legislation that erodes this revenue. Any advocacy on sales tax legislation beyond these guidelines will be brought to the full Council for consideration and direction.
6. Support sponsoring or co-sponsoring legislation that effectively meets the objectives of the City's legislative principles and platform.
7. Support legislation and provide leadership in crafting a regional vision and agenda that seizes on regional assets and reinforces the value and versatility of regionalism to address complex regional issues including transportation, economic development, education, land use policy, environmental concerns, and intraregional inequities in housing and education.

City's Federal and State Legislative Platform

1. Oppose state and federal actions that produce incompatible consequences and/or have an adverse impact on the City's ability to comply with state and federal regulations and/or legislation. The City will inform the community when these situations occur.
2. Support legislation that would further the stated missions of the City's departments and oppose legislation that would impede the ability of each department to effectively meet its operational objectives.
3. Support legislation and regulations that protect City investments in infrastructure and other projects and enhances financial sustainability of City assets.
4. Support legislation and policies that protect our residents and businesses from inconsistent, unnecessary and costly regulations and guidance, mitigation requirements, and permitting mandates
5. Oppose legislation and regulations that would adversely affect or divert City revenues to the state or any other entity.
6. Support legislation that would require the state or federal governments to pay for mandates that are unfunded.
7. Oppose legislation that would impose significant compliance costs to the City and where a public benefit has not been identified to justify the costs.

8. Oppose legislation that would eliminate or curtail local control over City owned property, physical assets and infrastructure.

Administrative Services Goal:

To protect the ability of the City to make decisions unencumbered by onerous policies and regulations that are costly and/or restrictive in how they must be implemented regarding areas of finance, human resources, city clerk, information technology and purchasing; to ensure the City's positions regarding pension reform are clearly articulated by providing input and expertise in response to future legislative efforts.

We take the following approaches to accomplish this:

Administrative Services Platform

1. Support legislation and measures that protect the City's rights in the collective bargaining process.
2. Support legislation, policies and regulations that simplify the administration of public records, election code and Brown Act provisions.
3. Oppose legislation that diminishes enacted workers' compensation reforms and cost controls.
4. Support efforts that engage and include local government in future pension reform discussions and legislation.
5. Oppose legislation and regulations that place new environmental requirements on local agencies that would inhibit the City's ability to fulfill its mission and are not accompanied by funding necessary for implementation.
6. Support legislation, policies and regulations that simplify public procurement and contracting.
7. Oppose legislation that restricts or diminishes the City's ability to procure goods and services efficiently and effectively.
8. Oppose legislation that alters the tax treatment of municipal bonds such as proposals that would cap or eliminate the current tax-exempt status.
9. Support reasonable and common-sense legislation and regulations that clarify conflict-of-interest rules.
10. Support legislation and policies that encourage streamlining of business processes for responding to open records requests and that provide funding for these activities.
11. Support legislation that includes operational expenses as an acceptable use of public, educational, government access (PEG) funds collected from cable-franchise agreements per the Federal Communications Commission for government-access stations.

Information Technology Platform

1. Support legislation and regulations that ensure emergency communication capabilities and interoperability for information technology and public safety departments and agencies.
2. Support legislation that promotes and provides funding for increased ability to manage technology, assistance in adhering to regulatory compliance requirements and reducing the risk of cyber-attacks.

3. Oppose legislation that would require public agencies to share information in public settings that could be used by groups or individuals with malicious intent to compromise the systems, services or private information of public employees or citizens.
4. Support legislation for cost-effective environmental technology initiatives.
5. Oppose legislation that would restrict procurement practices or impact vendor interaction.

Community Development Goal

To act on legislation that would affect our ability to amend and implement our General Plan policies and/or restrict local control over development or impose new regulations that will increase development costs and place greater demands on the City's General Fund. The intent of our General Plan policies is to create an attractive, vibrant, well-planned city, demonstrated by balanced land uses with desirable neighborhoods, prosperous businesses, excellent schools, convenient public services and open space and recreation amenities all linked by superior transportation systems that include well-maintained streets, sidewalks, bike paths and transit in a cost- effective and financially sustainable manner.

We take the following approaches to accomplish this:

Public Works Platform

1. Support continued reauthorization of the nation's highway and transit funding bills.
2. Oppose legislation that reduces or eliminates transportation revenues for transportation purposes or creates new unfunded state and federal mandates on transportation projects.
3. Support legislation that provides additional funding for local roadway maintenance, transportation and infrastructure.
4. Oppose legislation that would increase traffic congestion and/or reduce roadway vehicle capacity as a means of reducing Vehicle Miles Traveled and/or greenhouse gases (GHG).
5. Support legislation that allows local governments to determine local roadway Level of Service (LOS) policy.
6. Support measures that ensure reasonable and fiscally responsible accessibility of all public and private transportation services.
7. Oppose legislation that reduces the ability to use high-occupancy vehicle (HOV) lanes by transit, paratransit and other high-occupancy use vehicles.
8. Support legislation, policies and regulations that allow the use of Medi-Cal funds for transportation purposes and support Medi-Cal policies that promote the use of transit/ paratransit as Medicaid providers.
9. Support legislation that provides tax incentives for people who use public transit and other alternatives to driving a single-occupant personal vehicle.
10. Support legislation that provides funding for cities to comply with state and federal mandates regarding flood-protection levels.
11. Support state legislation that would allow Placer County to create boundaries for a new transportation sales tax district in southern Placer County.

Development Services Platform

1. Support legislation that strengthens local control in the areas of transportation and land-use policies and assists local governments in integrating new growth.
2. Support legislation, policies and regulations that ensure local governments maintain local land-use control and maintain the ability to address local constituents' concerns.
3. Support legislation that ensures local control and flexibility in determining reduction measures for greenhouse gas requirements.
4. Support legislation and regulations that streamline state and federal permitting processes and require agencies to consider the economic impacts and equities of mitigation measures regarding permits for water supply, flood control, air quality, water quality and sustainability. (This list is representative and not intended to be exhaustive).
5. Oppose legislation for new wetlands regulations that duplicates similar requirements at the federal level.
6. Support legislation for California Environmental Quality Act (CEQA) reform that streamlines the environmental review process and reduces opportunities for "green mail" lawsuits.
7. Support legislation that would purge laws and regulations that are redundant and/or no longer applicable or necessary.
8. Advocate for appropriate federal resource agency staffing levels to ensure Endangered Species Act Section 7 Consultations are completed within statutory timeframes (in particular, for the National Marine Fisheries Service).
9. Support legislation that ensures the rules governing representation of a city on a Board, Committee, or Commission with regional authority allow for meaningful and continual participation by the most populous cities on that Board, Committee, or Commission.
10. Support legislation that more narrowly defines the California Department of Fish and Wildlife jurisdiction under California Department of Fish and Wildlife Code Section 1600 (Streambed Alteration Agreement).

Parks, Recreation & Libraries Platform

1. Support legislation and measures that fund recreation, fitness, and wellness, and prevention programs for youth and adults.
2. Support legislation that protects funding for the State Library Fund.
3. Support legislation and new measures for park, recreation, and library programs, services, and special events.
4. Support new initiatives that provide funding for park and public facilities development, rehabilitation, and operations.
5. Support full funding of state parks, recreation, bike trails, open space, and library grants; including, but not limited to, the Land and Water Conservation Fund.
6. Support legislation and budgets that fund development of capital park and open space improvements or rehabilitation.
7. Support legislation that funds ongoing operational values for recreation and library programming, including fitness, wellness, enrichment, maintenance, and books/technology for youth and adults.

8. Support legislation that would further fair and appropriate access to park and library resources for all persons; including, but not limited to, homeless persons.
9. Support legislation that defines appropriate penalties for incidents of vandalism and property theft.
10. Support legislation that assists local agencies including parks departments with funding and/or resources for addressing clean-up and hauling of items from homeless encampments.
11. Support legislation that provides increased funding to the California Arts Council for the benefits it would provide to the residents, schools, and nonprofits regarding arts and culture.

Building Inspection Platform

1. Promote public health and safety in building construction through responsible legislation that adopts building codes through the regulatory process and allows for local control of enforcement.
2. Support legislation that enhances code enforcement through a uniform approach at the state level with input from the local authority by going through the regulatory process.
3. Oppose legislation that mandates specific enforcement requirements through the legislative process.
4. Protect the ability to adopt local amendments to fire and building codes.
5. Oppose legislation that places additional burdens of enforcement on local officials but is not directly related to issues of health and safety.

Public Safety Goal

To act on legislation that hinders our ability to protect and enhance the safety and quality of life for our residents, businesses, customers and partners by providing effective responses to all service requests; to promote programs that minimize risk and maximize the safety for our entire community; and to deliver community risk-reduction programs and exceptional solutions as a cohesive team and in a collaborative manner.

We take the following approaches to accomplish this:

1. Oppose legislation that would decrease state and federal funding for programs and services including Homeland Security.
2. Support legislation that ensures flexibility for and local control of all grant resources and funding for public safety technology and mandatory reporting systems.
3. Protect the ability to adopt local amendments to fire and building codes.
4. Oppose legislation that would reduce or eliminate funding for disaster mitigation.
5. Oppose reductions to the levels of state and federal funding opportunities for public safety programs and/or services.
6. Oppose legislation and regulatory policies that negatively affect the funding and operations of the police or fire departments.
7. Oppose legislation that reduces or eliminates local law enforcement flexibility or otherwise enacts broad sentencing reforms that reduce sentences for non-violent crimes in a general fashion.

8. Support legislation that provides municipalities with local control to provide para-transport, community para-medicine services and illness-prevention practices and programs.
9. Support legislation that provides adequate funding to cities for realignment services and oppose legislation that reduces or eliminates funding for those services.
10. Support legislation that results in regionalization of public safety functions and local control of regionalization of fire services.
11. Support legislation that requires the state to pay for unfunded mandates related to new public safety training requirements.
12. Support legislation that provides new and/or increased funding for mental health programs and services.

Economic Development Goal

To act on legislation that affects the City of Roseville's ability to create a vibrant business and community environment that enhances the quality of life for our residents and provides outstanding potential for our businesses and partners to flourish. To provide exceptional facilities, programs, services, and affordable housing opportunities in a safe environment by maintaining neighborhoods and commercial districts. To create a vibrant economic development environment by forming effective partnerships for the purposes of acting on legislation that encourages and assists with the development of businesses and manufacturing and to maximize social and economic opportunities.

We take the following approaches to accomplish this:

Housing and Community Investment Platform

1. Support legislation and appropriations that fully fund assistance for affordable housing, prevention and solutions to homelessness, and community investment funding, including the federal Housing Choice Voucher (HCV)/Section 8, Home Investment Partnerships (HOME) and Community Development Block Grant (CDBG) programs.
2. Support legislation and measures that create new state incentives for affordable housing and infill development.
3. Support legislation that increases flexibility in the state housing element process and streamlines environmental statutes.
4. Support streamlining of the requirements for the types of projects that can be funded with state and federal funding.
5. Support legislation and advocacy efforts to protect existing housing and community investment funding that will support goals for the City's core area and provide support for community assets.
6. Support legislation that provides funding, accountability, and program resources that address the primary causes of homelessness and address the needs of the homeless population.
7. Oppose legislation that revamps the current Regional Housing Needs Assessment (RHNA) process by giving greater authority to the Department of Housing and Community Development (HCD) to oversee and enforce regional housing goals and in determining a methodology for allocating housing needs to regions and local jurisdictions; and, that links housing element certification to non-housing grant sources.

Economic Development Platform

1. Oppose legislation and measures that create competitive disadvantages for businesses at local and state levels.
2. Support legislation and measures that allow the City to grow the current economic base by providing the tools and resource needed for businesses to expand and flourish.
3. Support legislation, funding and policies that promote Regional Occupation Programs, trade schools, investment in research and development technology, and tax incentives for manufacturing.
4. Support legislation, policies, and regulations that require economic analysis and/or scientific validation of changes to state policies or regulations before modifications can be enacted.
5. Support legislation that promotes the state as an economically viable and strong destination for businesses to locate.
6. Oppose legislation that negatively impacts the City as it relates to the dissolution and wind-down of the Redevelopment Agency.
7. Support legislation that enhances and provides incentives for business retention and expansion, while ensuring California's business environment remains competitive with national and international markets.
8. Support legislation that supports the development and expansion of higher education institutions including new private institutions and satellite campuses of national universities as an important segment of growth, workforce and economic development throughout the state.
9. Support legislation that creates a new tax increment program that will assist cities and counties with revitalizing their communities through the elimination of physical and economic blight and by providing assistance to building owners, tenants and businesses in their efforts to be successful.
10. Oppose legislation that restricts the City's ability to dispose of real property.

Electric and Environmental Utilities Goals

To protect local control over how utilities provide services to our customers; to protect our customers from state and federal legislation, policies, and regulations that have no clear benefit relative to cost; and to oppose legislation, policies, and regulations that create unfunded mandates and compliance requirements that negatively impact the utilities' ability to provide their services and products in the most safe, reliable and cost-effective manner.

Electric Utility Platform

Roseville Electric Utility's mission is to improve the quality of life in our community and to provide customers with safe, reliable electricity at competitive prices and with exceptional service. As technological advancements in the electric utility industry evolve, as well as increased legislative and regulatory mandates, the electric utility will continue to transform its business model to best serve its customers in the most efficient, reliable and cost-effective way.

We take the following approaches to accomplish this:

1. Support legislative efforts that retain local decision-making authority over programs, services, resources and rates.
2. Support legislation that maintains flexibility to comply with regulations in the way that best reflects community priorities.
3. Support legislation that enables meeting the state's energy and environmental policies in a cost-effective manner.
4. Support legislation that preserves public tax-exempt financing.
5. Support legislation that requires a comprehensive cost-benefit analysis for new environmental regulations.
6. Support future transmission system improvements and requirements which ensure that cost allocation is born by the parties that impact and/or stand to benefit from those improvements.
7. Support legislation that provides greater flexibility to meet the Renewable Portfolio Standards (RPS) program.
8. Support legislation and regulations that streamline permitting of new generating facilities.
9. Oppose legislation that mandates power purchases from specific projects and/or specific resources, if other cost-effective opportunities are available.
10. Oppose legislation that would reduce funding for existing energy programs and mandates.
11. Oppose legislation that will increase utility operating costs without commensurate funding.
12. Collaborate with neighboring utilities on legislative issues that impact the electric utility industry as a whole.

As part of the legislative and regulatory platform Roseville Electric Utility also takes advocacy positions to promote the City's position before the applicable regulatory agencies.

Environmental Utilities Platform

Roseville's Environmental Utilities (EU) Department provides solid waste, water, wastewater, and recycled water utility services; and manages the City's stormwater program for the benefit of Roseville's residents and businesses. There are many external factors that influence how EU operates, how much services cost, and the quality of service EU provides to its customers.

We take the following approaches to accomplish this:

Resiliency, Greenhouse Gas and Sustainability Platform:

1. Support efforts that reduce greenhouse gas emissions where the benefits of the GHG-reduction measures are balanced with cost.
2. Support efforts that allow local governments to develop practical, local solutions to reduce and manage locally generated GHG emissions.
3. Assure statewide or federal greenhouse gas emission estimating, monitoring, and reporting mandates provide demonstrated benefits to the environment and rate payers
4. Advocate for policies that provide assistance to address utility resiliency needs, including planning, deployment of technologies, facility relocation and other actions.

Regulations and Permit Platform:

1. Support legislative reform efforts that require a cost/benefit analysis for new regulations.
2. Support legislative reform efforts that require a cost/benefit analysis be completed as part of any permit writing process.
3. Support modernization of permitting processes, including extended permit terms up to ten years to address lifecycle of technologies and construction schedules.

Solid Waste Management (not in order of priority):

1. Advocate recycling market development by the state and federal government for recyclables, green waste, food waste, biosolids and other organics. Oppose mandated material-disposal bans or restrictions in circumstances where there is an insufficient capacity or available technology within the private recycling market to handle these materials in a more beneficial way besides landfilling.
2. Support efforts to reuse waste in a beneficial way if cost-effective relative to benefits.
3. Support efforts to enact a comprehensive statewide Extended Producer Responsibility (EPR) law that allocates end-of-life disposal costs with the producer of the product consistent with Council direction as outlined in Council Resolution 10-278.
4. Support product-by-product EPR laws as a second alternative to a statewide comprehensive EPR law consistent with Council direction as outlined in Council Resolution 10-278.
5. Oppose efforts to increase recycling diversion rates if determined not to be cost-effective relative to the benefits that could be achieved.
6. Support continued availability of all biosolids management options.
7. Support efforts to streamline the permitting, construction, and funding of facilities that allow the City to transform usable waste into energy/beneficial byproducts; and efforts to provide state and federal funding for any potential City waste-to- energy projects.
8. Support efforts that protect solid waste worker safety.
9. Oppose efforts to increase statewide tipping fees where there is no clear benefit to Environmental Utilities ratepayers.

Water Supply and Delivery:

1. Safeguard Roseville's water supply contracts from outside interests.
2. Support and advocate for efforts to develop, diversify, and fund the city and region's water supply portfolio and achieve a regional water supply that is reliable for generations to come.
3. Advocate the finalization and execution of long-term Central Valley Projects (CVP) water service contracts to ensure a secure, long-term and reliable CVP water source from Folsom Reservoir.
4. Support efforts that allocate the costs for Delta and statewide water infrastructure improvements to the parties that either impact the Delta and/or stand to benefit from those improvements, known as the "Beneficiary Pays Principle".
5. Support Delta and statewide solutions that are based upon sound science.
6. Oppose efforts that impose arbitrary flow requirements on the American River that are inconsistent and incompatible with responsible water-supply management and undermine the locally developed flow-management principles under the Water Forum Agreement.

7. Advocate efforts to implement a locally developed Modified Flow Management Standard on the lower American River that supports the Water Forum effort and provides for appropriate carryover storage at Folsom Reservoir.
8. Support proactive and participatory approaches to developing Delta and statewide solutions.
9. Support efforts that help local governments maintain water-efficiency programs that meet state objectives, are cost-effective, and make sense for the local conditions.
10. Identify funding opportunities to support the assessment, protection and increased resilience of Roseville's drinking water and wastewater utilities from climate related events.
11. Support state and federal efforts to increase water-efficiency ratings for common consumer products that use water, including tax credits similar to those provided to energy technology.
12. Advocate for environmental mandates that streamline compliance.
13. Protect primacy of Roseville's (and the region's) ability to manage its groundwater resources.
14. Protect the City's land-use authority and its right to make land-use decisions with respect to water supply.
15. Oppose efforts to impose a state water tax or fees where revenue is collected from local ratepayers or agencies and are allocated for statewide projects that have no direct benefit to Roseville's ratepayers.
16. Oppose efforts by the State of California to impose unrealistic water efficiency targets as "the new normal" for urban water use.
17. Advocate for long-term water efficiency targets that consider climate, land-use, and other region-specific attributes, provide a reasonable standard for our customer base (both residential and commercial) to achieve, and oppose proposed standards that do not recognize previous water-supply reliability and water efficiency investments by the region and local community.
18. Support water efficiency policy that enhances key City investments such as undeveloped and developed park lands, the City's wastewater treatment and conveyance systems and the City's urban forest and oppose policy that would diminish or impair investments.
19. Oppose efforts to standardize water-supply contingency actions.
20. Support efforts that allow local agencies to develop and implement practical and locally controlled water-use efficiency programs and solutions.

Water Quality:

1. Oppose efforts to impose additional state-mandated stormwater program requirements without commensurate funding for those programs.
2. Identify funding opportunities to support stormwater infrastructure (including green infrastructure) investments that protect Roseville's public health and safety, water quality, and economic development.
3. Advocate policy to reduce cost of compliance for dischargers.
4. Support legislative efforts to reduce potential of third-party lawsuits pertaining to water quality issues.

5. Support legislation that revises the state Constitution to allow for stormwater programs to establish a funding mechanism that is similar to that of the utilities under the Proposition 218 reforms.
6. Support efforts to require pesticide manufacturers to produce products that are less harmful to the environment.
7. Support efforts to implement statewide Extended Producer Responsibility (EPR) principles so that manufacturers design their products in a way that has less of an environmental impact upon local waterways (example: car brake pads).
8. Oppose efforts to increase whole effluent toxicity testing for recycled water, stormwater and wastewater when it is not cost-effective, has no clear benefit and/or is not based on sound science.
9. Ensure efforts to add contaminants of emerging concern identified for testing or regulation for recycled water, stormwater, and wastewater are cost-effective, have a demonstrated health benefit and/or is based on peer reviewed, sound science.
10. Actively track, comment, and advocate for proposed changes in NPDES Permits and Waste Discharge Requirements (WDRs) from the State Water Board and Regional Water Boards.
11. Participate in the Basin Plan Amendments to address proposed changes in the requirements.
12. Monitor and advocate for laboratory standards that are reasonable, cost-effective, and achieve a higher level of performance for the City's water quality lab which supports the core mission of protecting human health and safety.
13. Support legislative and regulatory efforts that deliver increased development and use of recycled water supply; and creates a policy environment that supports the development of other emerging advanced treatment technologies.

Critical Concerns for the Upcoming Legislative/Congressional Session

- **Tax or Fees** – The City has increased concerns regarding the Governor's and the state legislature's interest to impose a fee on drinking water that would be collected from local ratepayers and allocate the money for statewide projects and programs that have no direct benefit to Roseville's ratepayers.
- **Implementation of Water Loss and Water Conservation Legislation** – Over the past few years, new laws were passed to set water loss and conservation targets for local water purveyors. State regulatory agencies are in the process of developing these targets. It is incumbent upon the City to assure these bodies adhere to the intent of the legislation while developing the regulatory framework and consider climate, land-use, and other region-specific attributes; and recognize previous water-supply reliability and conservation investments by the region and local community.
- **Cost-Effective Utilities** – The ability to provide reliable and cost-effective utilities to the residents and businesses of Roseville continues to be a central concern for the City as new state and federal mandates are proposed that would increase the utilities operational costs.
- **Federal and State Funding for Infrastructure and Transportation Projects** – Maintaining or increasing funding for these types of projects and improvements is critical for the City's ability to upgrade and maintain roadways and meet future infrastructure and transportation demands.
- **Cybersecurity** – Future state and federal laws regarding cybersecurity will continue to affect the City and the community. Implementing new cybersecurity requirements will add significant expense to the operation of the City's information technology systems.
- **Changes to Tax-Exempt Status of Municipal Bonds** – Any proposals that would cap or eliminate the tax exemption on municipal bonds would significantly reduce the City's ability to finance major projects. This would negatively and severely impact the City's budget, increase rates for utility customers, and have a damaging effect on the community at large.
- **Modifications to Government-Operated Mortgage Programs** – The City will remain active in understanding the changes being considered at the federal level to modify government-operated mortgage programs, tax deductions, and to write new banking regulations regarding mortgage-related lending programs. These all have the potential to impact the fragile housing recovery throughout the region and the state.
- **Challenges with State and Federal Permitting Processes** – The City has concerns with various permitting processes at both the state and federal level that hamper the ability of development projects to gain approval within a reasonable amount of time. Of current critical concern is time required to complete federal Endangered Species Act Section 7 consultations with the National Marine Fisheries Service (NMFS). By statute, these consultations are to be completed within 135 days. However, the City is currently experiencing processing times exceeding well over a year.
- **Changing Economy** – The City is interested in discussions regarding local tax systems, tax-revenue leakage from internet sales, the fundamental shift from purchasing taxable commodities to purchasing non-taxable services, and how these affect the City's ability to fund basic services.

- **Sales Tax** – The City is concerned with the uncertainty over potential changes to the sales tax allocation structure that would result in a loss of revenue to the City. The City will actively monitor the ever-changing discussions and will remain engaged to ensure the City's best interests are represented regarding any future changes to the sales tax structure.
- **Housing and Homelessness** – The City will remain active in addressing the needs of the City's homeless population with a primary focus on preventing and reducing the population of chronically homeless individuals by providing solutions that address the fundamental causes of homelessness and by supporting solutions that provide permanent housing options and required supportive services.
- **Municipal-Based District Elections** – The City has concerns regarding the possibility of legislation that would require all cities to change to a district-based election system and would remove the ability to determine the election system that works best for a specific city from the local community and their elected officials.
- **CalPERS Investment Policy** – The City has concerns with actions taken or proposed by the CalPERS Board and the State Legislature to divest from certain companies or industries to be "socially responsible". These policy decisions come at the price of reduced market rates of return on pension plan investments. The pension funding requirement not covered by investment returns will be borne by the state and local governments, and ultimately California taxpayers.
- **Federal and State Funding for Parks and Library Projects** – The City is interested in efforts to maintain or increase funding for these types of projects and improvements. The funding is critical for the City's ability to upgrade and ensure access to the City's parks, recreation, and library facilities.
- **Substance and Opioid Abuse Funding** – The City is concerned with funding levels for substance and opioid abuse programs and services will prevent those who are addicted or abusing substances from overcoming their addiction. The addiction/abuse cycle has negative implications for our community and use of public safety resources.
- **Existing Investments in Natural Gas-Fired Generation** – The City is concerned with proposed policies related to the phasing out of natural gas power plants. These plants are integral to supporting a reliable and affordable electric grid for our customers.
- **Wildfire Prevention and Preparedness** – The City has been proactive in developing a fire preparedness plan to ensure a safe and reliable electric grid. In response to the growing concern over wildfires statewide, the City is concerned of over-regulation and a one-size-fits-all approach to electric utilities like Roseville which are not located in a high fire risk area.
- **Pole Attachments/Communications Equipment** – The City is interested in supporting legislation that would overturn a recent Federal Communications Commission (FCC) Order that authorizes attachments on publicly-owned infrastructure. This Order sets a new precedent that diminishes local control and is in conflict with exemptions granted to public providers under the Communications Act. In addition, the Order may have negative impacts on revenue recovery, aesthetics and most importantly, safety.

COUNCIL COMMUNICATION

CC #: 9864
File #: 0721-05 & 0400-06-03

Title:	Dry Creek Greenway East Trail - EIR Certification and Project Approval
Contact:	Michael Dour 916-746-1304 mdour@roseville.ca.us

Meeting Date: 3/20/2019
Item #: 7.1.

RECOMMENDATION TO COUNCIL

The Transportation Commission recommends that the City Council:

1. Adopt a resolution to Certify the Environmental Impact Report (EIR), approve the Findings of Fact and Statement of Overriding Considerations, and approve the Mitigation Monitoring Plan; and
2. Approve the Dry Creek Greenway Trail Project including Alignment Option 1B for the Hillcrest area and Alignment Option 5A for the Sunrise Avenue area.

BACKGROUND

The Dry Creek Greenway East Trail Project is a proposed paved multi-use trail along Dry, Cirby, and Linda Creeks from Darling Way/Riverside Avenue to the City limits at S. Cirby Way/Old Auburn Road. The project is identified as a proposed Class I bikeway in the City of Roseville General Plan. The project is also identified as a priority project in the Bicycle Master Plan (adopted in 1994 and most recently updated in 2008) because: 1) it would provide a safe, comfortable, convenient and highly connected bike route in an area of the City that is otherwise underserved by bicycle facilities; 2) it would connect schools and businesses to residential neighborhoods, and; 3) it provides regional connections as part of a planned loop trail around the greater South Placer/ Sacramento area.

Planning Study and Public Participation: Planning and feasibility analysis for the project began in 2008 and concluded in 2013. The planning and feasibility analysis included a robust public participation program with multiple neighborhood, stakeholder and community meetings. Preparation of the environmental and engineering technical reports began in 2014, and writing of the EIR began in 2017 and concluded in early 2018. During this time, there were continued public outreach efforts, including neighborhood meetings and a scoping meeting. A detailed description of the public outreach efforts is described in the May 21, 2018 Transportation Commission report (Attachment 1).

Draft EIR: The Draft EIR including appendices (Exhibit A) was released for a 45-day public review period from April 13-May 29, 2018. Notice of the availability of the Draft EIR and the

opportunity to comment at the May 21, 2018 Transportation Commission meeting was provided to the public in the following ways:

- Direct mailing to the approximately 1,900 property owners within 300 feet of the trail
- Legal notification in the Roseville Press-Tribune
- Email notification to the project list of interested persons
- City of Roseville Trail Alerts Email List
- City of Roseville Website
- City of Roseville Social Media (Facebook, Twitter, NextDoor)
- Copies of the Draft EIR were made available at the Permit Center, the Maidu Library and the Downtown Library

During the 45-day public review period for the Draft EIR, we received 22 written and 6 verbal comments.

Final EIR: Pursuant to CEQA, a Final EIR (Exhibit B) was prepared to document and respond to all comments received during the public comment period. The 28 commenters provided comments on a range of topics. The topics included parking and traffic, flooding and erosion, biological resources (including oak trees), visual quality, and noise. The Final EIR responses clarify, amplify, and/or correct information presented in the Draft EIR, as appropriate. These responses are summarized in the December 18, 2018 Transportation Commission staff report (Attachment 2). The comments and responses to comments did not alter any of the environmental impact or significance conclusions of the Draft EIR.

Summary of Project Impacts: A full summary of project environmental impacts and recommended mitigation measures is contained in Table 4-1 of the Final EIR (Exhibit B). With one exception, all potential project impacts can be mitigated to a less than significant level. The EIR includes a mitigation measure to reduce short-term construction noise impacts to the extent feasible, but even with that mitigation measure the EIR concludes that the project would result in a significant and unavoidable short-term construction noise impact. The EIR also notes that Option 5A may also expose residents of nearby homes on Meadow Gate Drive to significant ground vibration associated with the construction of bridge #14, whereas other alignment options would not expose residents to levels of significant ground vibration.

Transportation Commission Recommendation: The Final EIR was presented to the Transportation Commission December 18, 2018. At that meeting, the Transportation Commission was tasked with making a recommendation to the City Council on the EIR. The Transportation Commission was also tasked with making a recommendation on the project, including alignment alternatives for the Segment 1 (Riverside/Hillcrest) and Segment 5 (Sunrise) areas.

As noted in the staff report to the Transportation Commission (Attachment 2), in 2010 the City Council selected a preferred trail alignment for most of the 4-mile Dry Creek Greenway East trail project. However, the City Council did not select a preferred alignment for the Hillcrest (Riverside Avenue) and Sunrise Avenue areas at that time. As a result, the EIR included project-level CEQA analysis for multiple alignment options in those areas as follows:

- Segment 1 (Hillcrest) area alignment options: 1A, 1B, and 1C.
- Segment 5 (Sunrise) area alignment options: 5A and 5B.

The Transportation Commission staff report (Attachment 2) included a detailed analysis of the pros and cons for each alignment option, and a staff recommendation for selection of Alignment

Option 1B for the Hillcrest area and Alignment Option 5A for the Sunrise Avenue area. The key factors in this analysis are provided below:

Analysis of Segment 1 Alignment Options (Hillcrest/Riverside Area) - The following key considerations inform the staff recommendation for the Segment 1 Hillcrest Area:

- Limited space, existing property line fences, steep banks along the creek, and the location of sewer main and manholes present significant challenges to Option 1C.
- Options 1A & 1B require two bridge crossings (Bridge #2 across Dry Creek and Bridge #4 across Cirby Creek), while Option 1C requires one bridge crossing (Bridge #3 across Dry Creek).
- Option 1C requires challenging construction including the installation of a large retaining walls along the south side of Dry and Cirby Creeks(walls 35, 36 and 37 as shown on Exhibit 3-13 of the Draft EIR), resulting in overall greater cost.
- Option 1A reduces access options for the Hillcrest neighborhood since access to Hernandez/Machado is not provided. However this connection can be provided under the proposed trail alignment and Option 1C.

Analysis of Segment 5 Alignment Options (Sunrise Avenue Area) - The following key considerations inform the staff recommendation for the Segment 5 Sunrise Area:

- Option 5A and 5B both result in significant and unavoidable short-term temporary construction noise impacts. However, Option 5A may also expose residents of nearby homes on Meadow Gate Drive to significant ground vibration associated with the construction of bridge #14.
- Option 5A provides direct and convenient access to the west and east sides of Sunrise Avenue.
- Option 5A requires less right-of-way acquisition, but requires additional structural features including Bridge #14 that results in a cost differential of $1,100,000 (compared to Option 5B).
- Option 5B does not provide access to the east side of Sunrise Avenue, and access to the west side of Sunrise Avenue is not convenient as it begins over 500' from Sunrise Avenue. The limited access to Sunrise Avenue is a concern because there are no safe and convenient options for bicyclists and pedestrians to cross Sunrise Avenue.
- Bridge 13 of Option 5B is proposed as a low-flow bridge across Linda Creek (similar to the bridges on Miners Ravine) because the regulatory floodway is very wide at the confluence of Cirby and Linda Creeks. This is expected to result in permitting challenges with the Central Valley Flood Protection Board since a variance would be required.

Public comment: At the December 18, 2018 Transportation Commission meeting nine (9) members of the public provided verbal comments related to the following:

- Effect on floodplain
- Safety and homeless issues
- Desire for further public review during final design
- Tree removal and effect on creek water temperature
- Effect on private property
- Support for project

At the request of the Transportation Commission, City staff, including a Police Department representative, spoke to the above comments. After discussion, the Transportation Commission

recommended that the City Council certify the EIR and approve the project with Alignment Option 1B for the Hillcrest area and Alignment Option 5A for the Sunrise Avenue area.

FISCAL IMPACT

The Transportation Commission staff report (Attachment 2) includes a detailed breakdown of the costs for design and construction of the project in 3 phases. The cost for design, permitting and right-of-way are estimates based upon our experience with similar projects. The construction cost estimates are based upon recent bid openings for other similar projects. Recent projects have been expensive due to the current high demand for contractors and high materials costs, and this is factored into the cost estimates. We anticipate that the project costs will be paid for using a variety of federal and state grants, and local transportation funds. In fact, staff has already identified $5,000,000 in federal Active Transportation grant funding for Phase 1 construction. General Fund resources, including the recently-approved Measure B funds, will not be used for this project.

Phase 1: Riverside/Darling to Rocky Ridge – Phase 1 is approximately 2 miles long and includes the following improvements:

- Connection to existing Saugstad Park Trail at Darling Way
- Widening and undercrossing of Darling Way
- One bridge crossing of Dry Creek and potentially 1 bridge crossing of Cirby Creek (depending on selected alignment option)
- Undercrossing of I-80
- Connection to Eastwood Park
- Undercrossing of and connection to Sunrise Avenue
- 1 bridge crossing of Linda Creek (location dependent on selected alignment option)
- At-grade crossing of Oakridge Drive to connection with existing Sierra Gardens Trail
- At-grade connection to west side of Rocky Ridge Drive

The estimated cost for Phase 1 is $15,900,000. As noted above, staff has already identified $5,000,000 in federal grant funding for Phase 1 construction. In order to take advantage of this funding, construction of Phase 1 would need to begin in 2021. If the EIR is certified and the project is approved, staff will seek additional grant funding opportunities for the balance of the construction costs.

Phase 2: Rocky Ridge to Old Auburn Way- Phase 2 is approximately 1.5 miles long and includes the following improvements:

- Undercrossing of and connection to existing path along Rocky Ridge Drive
- 1 Bridge crossing of Linda Creek
- Replacement or retrofit of the existing bridge over Strap Ravine
- Undercrossing of Old Auburn Road
- Trail connection to the west and east sides of Old Auburn Road

The estimated cost for Phase 2 is $5,000,000. Staff has not yet identified funding for Phase 2, but expects that it would compete well for state and federal air quality and active transportation grants.

Phase 3: Old Auburn Way to City Limits - This phase is approximately 0.5 miles long and includes the following improvements:

- Trail improvements along north side of Linda Creek adjacent to the Spahn Ranch subdivision
- Up to 2 bridge crossings of Linda Creek

The estimated cost for Phase 3 is $2,000,000. Staff has not yet identified funding for Phase 3, but also expects this phase to be eligible for grant funding. As noted in the Transportation Commission staff report, staff recommends that design and construction of Phase 3 not proceed until Placer County further develops its plans for the trail alignment east of Old Auburn Road, including the segments leading from the Spahn Ranch area.

Maintenance Costs: Staff anticipates that the maintenance costs for the 4-mile trail will be approximately $55,000 per year. This estimate includes day-to-day maintenance efforts such as vegetation control, sweeping, sign repair, and trash removal. This estimate also includes an annualized cost for periodic trail resurfacing and stream bank stabilization efforts. The trail will be designed to minimize the potential erosive effects of nearby streams per the City's design and construction standards. This includes the use of concrete paving (instead of asphalt) and erosion control materials in higher risk areas as described in the EIR. Even so, we still expect periodic erosion to occur and that is why we are including in the above estimate an annualized cost of $15,000 per year for stream bank stabilization. Staff proposes the use of the Local Transportation Fund's Transportation Development Act (TDA) resources to pay for maintenance. General Fund resources would not be used for project construction or maintenance.

ECONOMIC DEVELOPMENT / JOBS CREATED

Certification of the EIR and approval of the project does not create any jobs. However, if the project is approved, jobs would be created when future contracts for design and construction are awarded.

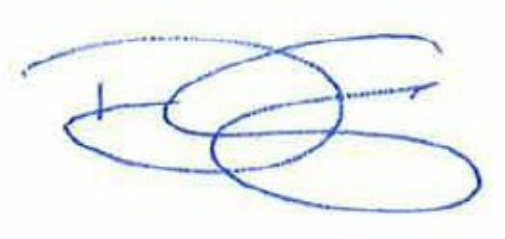
ENVIRONMENTAL REVIEW

The proposed action would certify the EIR for the project pursuant to the CEQA Guidelines.

Respectfully Submitted,

Michael Dour, Alternative Transportation Manager

Jason Shykowski, Acting Public Works Director



Dominick Casey, City Manager

RESOLUTION 19-68

CERTIFYING A FINAL ENVIRONMENTAL IMPACT REPORT RELATING TO THE DRY CREEK GREENWAY EAST TRAIL PROJECT, MAKING FINDINGS OF FACT, ISSUING A STATEMENT OF OVERRIDING CONSIDERATIONS, APPROVING A MITIGATION MONITORING PROGRAM AND APPROVING THE DRY CREEK GREENWAY EAST TRAIL PROJECT

WHEREAS, the City of Roseville (City) has proposed the Dry Creek Greenway East Trail Project (the "Project"); and

WHEREAS, the City determined that an environmental impact report (EIR) should be prepared for the Project pursuant to the California Environmental Quality Act (CEQA; Public Resources Code 21000 et seq.); and

WHEREAS, on April 13, 2018, the Draft EIR was distributed to the public for review and comment and the review and comment period for the Draft EIR closed May 29, 2018; and

WHEREAS, on May 21, 2018, the proposed Project and Draft EIR were reviewed by the Transportation Commission, which recommended that the City Council certify the Final EIR and approve the Project; and

WHEREAS, written and oral comments to the Draft EIR were received, and responses to those comments have been prepared and are presented in the Final EIR; and

WHEREAS, the Final EIR consists of the Draft EIR, a list of persons and agencies commenting on the Draft EIR, comments received on the Draft EIR, and responses to the significant environmental issues raised in those comments; and

WHEREAS, the Final EIR was presented to the City Council and City Council has reviewed and considered the information in the Final EIR,

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Roseville as follows:

1. It is hereby certified that the Final EIR was presented to the City Council, a copy on file with the City Clerk.

2. It is hereby certified that the City Council has reviewed the Final EIR prepared for the Dry Creek Greenway East Trail Project, all staff reports pertaining to the Project, and all other pertinent documents relating to the preparation of the Final EIR, including the Draft EIR and all comments received thereon, and that the Final EIR is adequate, complete and has been prepared in compliance with CEQA.

3. It is hereby certified that the Final EIR reflects the independent judgment and analysis of the City Council of the City of Roseville and that the City Council reviewed and considered the information contained in the Final EIR prior to approving the Project.

4. The City Council hereby adopts the Findings of Fact and Statement of Overriding Considerations for the Dry Creek Greenway East Trail Project, on file with the City Clerk, pursuant to Public Resources Code section 21081.

5. The City Council hereby adopts and incorporates into the Project all of the mitigation measures for the Project that are within the responsibility and jurisdiction of the City that are identified in the Findings.

6. The City Council hereby adopts the Mitigation Monitoring Plan for the Dry Creek Greenway East Trail Project, on file with the City Clerk.

7. The Project is hereby approved.

8. The City Clerk shall be the custodian of the record of the proceedings, and the documents and other materials constituting the record of proceedings shall be located at the office of the City Clerk.

9. The City Clerk is directed to file a Notice of Determination in the Office of the County Clerk of Placer County for posting in the County Clerk's Office in accordance with Public Resources Code section 21152, within five working days after approval of the resolution.

PASSED AND ADOPTED by the Council of the City of Roseville this ____ day of _____, 2019 by the following on roll call:

Special Presentations/Reports

Item 5.1: **Dry Creek Greenway East Trail Project - Draft Environmental Impact Report (EIR)**

Staff Michael Dour, Alternative Transportation Manager

Recommendation
Staff recommends that the Transportation Commission:
1. Accept the Staff Report on the Dry Creek Greenway East Trail Project Draft EIR;
2. Accept Public Comment on the Dry Creek Greenway East Trail Project Draft EIR; and
3. Provide comments on the Dry Creek Greenway East Trail Project Draft EIR.

Staff Report Contents

- Meeting Purpose and Role of the Transportation Commission (p.1)
- Project Background and Public Participation (p. 1)
- Environmental Impact Report (p. 4)
- Next Steps (p. 6)

Meeting Purpose and Role of the Transportation Commission
Prior to taking action to approve a project, the City of Roseville is required as lead agency under the California Environmental Quality Act (CEQA) to prepare, review and certify or adopt an environmental document. For the Dry Creek Greenway East Trail Project, a Draft Environmental Impact Report (EIR) has been prepared pursuant to CEQA. That document is now available for public review and comment. The public review period for the Draft EIR closes on Tuesday May 29, 2018 at 5:00 p.m.

Pursuant to the CEQA Guidelines, a public meeting may be held to solicit public comments on the Draft EIR. As the advisory body to the City Council on transportation projects, the Transportation Commission is tasked with accepting and considering public comments on the Draft EIR. The Transportation Commission may also make its own comments on the Draft EIR. Comments received at the Transportation Commission meeting or received in writing during the 45-day review period of the Draft EIR shall be included in a Final EIR (FEIR).

As the advisory body to the City Council on transportation projects, the Transportation Commission is also tasked with making a project recommendation to the City Council. Upon completion of the Final EIR, a second Transportation Commission meeting will be scheduled to forward a project recommendation to the City Council. Staff will provide the Transportation Commission with a recommendation on the project and the merits of the alignment options (discussed later in this report) at this second meeting (see page 7 of this report for information about the scheduling of this future meeting).

Project Background and Public Participation
The Dry Creek Greenway East Trail Project is a proposed paved trail along Dry, Cirby & Linda Creeks from Darling Way/Riverside Avenue to the City limits at S. Cirby Way/Old Auburn Road (see Figure 1).

Figure 1 – Study Area Map

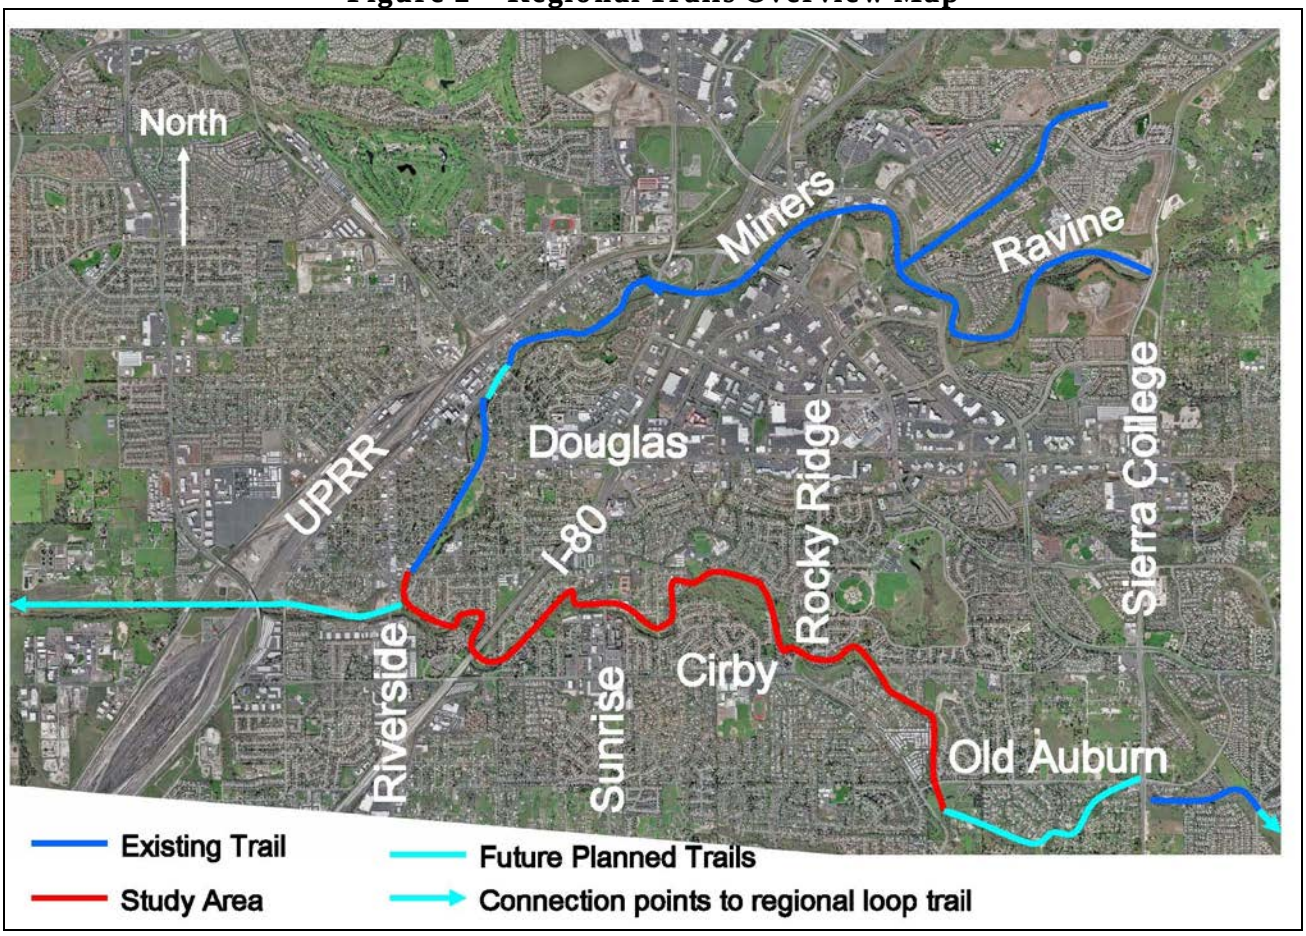
The Dry Creek Greenway East Trail is identified as a proposed Class I bikeway in the City of Roseville General Plan. The project is also identified as a priority project in the Bicycle Master Plan (adopted in 1994 and most recently updated in 2008) because: 1) It would provide a safe, comfortable, convenient and highly connected bike route in an area of the City that is otherwise underserved by bicycle facilities; 2) it would connect schools and businesses to residential neighborhoods, and; 3) it provides regional connections as part of a planned loop trail around the greater South Placer/ Sacramento area. The study area's relation to other trails is shown in Figure 2.

Planning and Feasibility Study (Phase 1) – In 2008, the City initiated the Dry Creek Greenway Trail Planning & Feasibility Study for the segment of trail from Darling/Riverside to Old Auburn/S. Cirby Way. The purpose of the study was to document the existing conditions, opportunities and constraints, evaluate design and alignment options, identify a locally preferred alternative for trail routing, and obtain initial cost estimates.

The City used a community based planning approach with an emphasis on public outreach. The public outreach efforts included:

- Mass mailing to over 900 property owners along the open space corridor
- An online public opinion survey

Figure 2 – Regional Trails Overview Map



- Two public open houses
- Six Stakeholder Representatives Group meetings
- Field walks with interested groups and persons, including the Stakeholder Representatives Group and neighborhood associations
- Attendance at neighborhood meetings
- Transportation Commission and Parks and Recreation Commission meetings

The study identified a preferred alignment for the majority of the 4.25-mile long study area. The two areas where a preferred alignment was not identified were:

- Segment 1 – Hillcrest Area - Darling Way to Riverside Avenue then ¼-mile west along Cirby Creek
- Segment 5 – Sunrise Area – West and east of Sunrise Avenue.

In 2010 the City Council accepted the DCG Planning & Feasibility Study and directed staff to initiate a second phase of feasibility analysis and environmental review for the project.

Planning and Feasibility Study (Phase 2) – In 2012, the City initiated a second phase of feasibility analysis for the project. The purpose of updating the feasibility analysis was to further evaluate the

optional trail alignments for the Segment 1 Hillcrest and Segment 5 Sunrise Areas, and to conduct initial technical studies including a preliminary hydraulic model to confirm feasibility of the full length of the trail. The City continued the community based planning approach with outreach efforts that included:

- 4 additional Stakeholder Representative Group Meetings
- Attendance at neighborhood association meetings
- An additional public open house

The hydraulic analysis and other technical studies confirmed that the proposed project is feasible, including each of the proposed options in the Hillcrest and Sunrise areas. The Updated Feasibility Study provided some important insights into the tradeoffs for each of the Hillcrest and Sunrise options. However, a decision on which option to use in each of these area was not reached. As a result, the Draft Environmental Impact Report (EIR) fully evaluates each of the Segment 1 Hillcrest and Segment 5 Sunrise Area options, with the intention that the City Council may choose either option within these areas. See the Project Description discussion below for further information on the process for selection of an alignment through the Segment 1 Hillcrest and Segment 5 Sunrise areas.

Environmental Review

In accordance with the California Environmental Quality Act (CEQA), a Draft Environmental Impact Report (EIR) has been prepared for the Dry Creek Greenway East Trail Project. The purpose of the Draft EIR is to:

- Evaluate the physical environmental effects of the proposed project
- Identify feasible mitigation for significant impacts
- Evaluate a reasonable range of alternatives, including a No-Project Alternative
- Assess cumulative and growth-inducing impacts
- Provide for public and agency participation in the decision-making process

Notice of the availability of the Draft EIR has been provided to the public in the following ways:

- Direct mailing to all property owners within 300 feet of the trail
- Legal notification in the Roseville Press-Tribune
- Email notification to the project list of interested persons
- City of Roseville Trail Alerts Email List
- City of Roseville Website
- City of Roseville Social Media (Facebook, Twitter, NextDoor)
- Copies of the Draft EIR were made available at the Permit Center, the Maidu Library and the Downtown Library

Project Description – Chapter 3 of the Draft EIR contains a detailed description of the project. This chapter includes

- Section 3.1 - Introduction and Project Description (including a detailed description of and exhibits for the proposed trail alignment and design elements)
- Section 3.2 – Alignment Options
- Section 3.3 – Required City Actions
- Section 3.4 – Other Permits and Approvals

It should be noted that the “Proposed Trail Alignment” identified within Section 3.1 includes an alignment for the Segment 1 Hillcrest and Segment 5 Sunrise Areas. However, as noted above, the

City Council has not made a decision on which option to use in each of these areas. As a result, Section 3.2 identifies "Alignment Options" for Segments 1 and 5, including a detailed description of and exhibits for each alignment option. The Draft EIR presents project-level CEQA analysis of both the proposed trail alignment and the alignment options.

City staff has not yet prepared a recommendation for the Segment 1 Hillcrest and Segment 5 Sunrise alignment. Upon preparation of the Final EIR, City staff will present an alignment recommendation for each of these segments to the Transportation Commission at a follow-up meeting. The Transportation Commission would review the staff analysis, the Final EIR and any public comments presented at the meeting and then forward a recommendation on the alignments for Segments 1 and 5 to the City Council. The City Council would have the decision-making authority to select a final alignment for Segments 1 and 5. See page 7 of this report for information about the scheduling of these future meetings.

Notice of Preparation (NOP) - The City initiated the EIR process for the project by releasing a NOP for a 30-day review period from November 18 – December 19, 2013. The review period included a public scoping meeting on December 3, 2013 at the Maidu Community Center. The City received 15 comment letters during the NOP review period as identified in section 1.2.1 of the Draft EIR.

Draft EIR Technical Topics - In consideration of the NOP comments, the Draft EIR analyzes project-related impacts to the following resource areas:

- Aesthetics
- Air Quality
- Biological Resources
- Cultural Resources
- Geology and Soils
- Greenhouse Gas Emissions and Climate Change
- Hazards and Hazardous Materials
- Hydrology and Water Quality
- Land Use and Planning
- Noise
- Public Services
- Recreation
- Transportation and Circulation
- Utilities

Draft EIR Analysis and Findings –Section 4 of the Draft EIR includes a detailed analysis of the above-noted resource topics. The analysis was prepared by resource area experts at Ascent Environmental and is supported by technical studies related to air quality and greenhouse gas emissions modeling, biological and cultural resource record searches, and fluvial (hydrologic) modeling.

For the proposed project and the Segment 1 and Segment 5 options, the Draft EIR analysis finds that there are ***no impact*** or ***less-than-significant impacts*** to the following resources areas:

- Aesthetics
- Geology and Soils
- Greenhouse Gas Emissions and Climate Change
- Hydrology and Water Quality
- Land Use and Planning
- Public Services
- Recreation
- Utilities

For the proposed project and the Segment 1 and Segment 5 options, the Draft EIR analysis also finds that there is a potentially significant impact to the following resource areas, but that the impacts for these resource areas would be reduced to a ***less-than-significant level with mitigation:***

- Air Quality
- Biological Resources
- Cultural Resources
- Hazards and Hazardous Materials
- Transportation and Circulation

Table 2-1 includes a list of all of the proposed mitigation measures.

For the proposed project and the Segment 1 and Segment 5 options, the Draft EIR also finds that, even with implementation of the feasible mitigation measures, there would be a significant unavoidable short-term construction-related noise impact for the proposed project and all of the alignment options. For the Segment 5 options, the Draft EIR finds that, even with implementation of the feasible mitigation measures, there would be a significant unavoidable short-term construction-generated ground vibration impact for Alignment Option 5A.

Although all of the impact findings are the same between the proposed project and alignment options for Segments 1 and Segment 5, there are variations between the levels of impact that are discussed in each issue area and these variations are summarized in Table 6-1.

Other Considerations - The State CEQA Guidelines (Section 15130) requires that an EIR discuss cumulative impacts of a project and determine whether the project's incremental effect is "cumulatively considerable. ***Potential Cumulative Impacts*** are analyzed in Chapter 5, Section 5.1. Table 5.1 lists the technical areas discussed and Section 5.1.2 includes the impact analysis. With one exception, the analysis concludes that cumulative impacts would be less than significant for the proposed project and Options 1A, 1C, and 5A. The only exception is for cumulative short-term construction related noise which was found to be significant and unavoidable at both "project level" and "cumulative conditions." Chapter 5 also includes an analysis of potential Growth-inducing Impacts (Section 5.2), which were found to be less than significant, and provides a summary of the project's Significant Environmental Impacts (Section 5.3).

Alternatives Analysis – CEQA requires EIRs to describe "… a range of reasonable alternatives to the project, or to the location of the project, which would feasibly attain most of the basic objectives of the project but would avoid or substantially lessen any of the significant effects of the project, and evaluate the comparative merits of the alternatives." For this project, the Segment 1 Options 1A and 1C and Segment 5 Option 5A are analyzed at an equal level in each technical chapter and are also discussed in Chapter 6, Alternatives. In addition, Chapter 6 includes a discussion of the No Project Alternative.

Next Steps

The public review period for the Draft EIR closes on Tuesday May 29 at 5:00 p.m. The public may provide oral testimony to the Transportation Commission at tonight's meeting. The public is also encouraged to provide written comments on the EIR by 5:00 p.m. on May 29, 2018. Comments may be submitted to:

City of Roseville
Attn: Mark Morse
311 Vernon Street
Roseville, CA 95678
Email: mmorse@roseville.ca.us

Submittal information is available online at www.Roseville.ca.us/DryCreek.

Upon close of the public review period, the project team will compile all of the public and Transportation Commission comments and forward them to Ascent Environmental. Ascent and City staff will prepare responses to all comments addressing the adequacy of the draft EIR. The responses to comments and any needed changes to the Draft EIR will be incorporated into a Final EIR.

The Final EIR will be forwarded to the Transportation Commission and considered as they make a recommendation on the project to the City Council, including a recommendation for the alignment options for Segments 1 and 5.

The Transportation Commission recommendation and the Final EIR will be forwarded to the City Council for their consideration as they consider certifying the Final EIR and making a final decision on the project.

The City is also required to prepare findings of fact indicating whether feasible mitigation measures or alternatives exist that can avoid or reduce significant effects identified in the EIR, and a "Statement of Overriding Considerations" for approval by the City Council for impacts identified as significant and unavoidable. The City may approve the project if it determines that specific economic, legal, social, technological, or other benefits outweigh the unavoidable adverse environmental effects. Ascent Environmental and City staff will prepare a "Statement of Overriding Considerations" for review and approval by the City Council that discusses the specific reasons for approving the project, based on information in the EIR and other information in the record

Dates have not yet been set for the future Transportation Commission and City Council meetings. Persons interested in receiving notification of the follow-up meetings should submit their contact information to the Alternative Transportation offices at transportation@roseville.ca.us.

If the City Council accepts the project and directs staff to move forward, the next steps would include:

- Final Design
- Environmental Permitting
- Right-of-way Acquisition
- Obtain Grant Funding
- Phased Trail Construction

If the project is approved by the City Council, at the earliest, phased trail construction would begin in 2021.

Special Presentations/Reports

Item 6.1: **Dry Creek Greenway East Trail Project – Final Environmental Impact Report (EIR) and Project Approval**

Staff Michael Dour, Alternative Transportation Manager

Summary Recommendation

Staff recommends that the Transportation Commission:

1. Recommend that the City Council certify the Dry Creek Greenway East Trail EIR;
2. Recommend that the City Council approve the Dry Creek Greenway East Trail Project with the use of Alignment Options 1B for the Hillcrest area and 5A for the Sunrise Avenue area.

Staff Report Contents

- Meeting Purpose and Role of the Transportation Commission (p.1)
- Project Overview (p. 2)
- Proposed Project and Alignment
- Summary of Draft EIR (p. 3)
- Summary of Final EIR (p. 3)
- Analysis of Alignment Options (p. 7)
- Project Phasing and Cost Estimates (p. 9)
- Recommendation (p.11)

Please see the staff report from May 21, 2018 Transportation Commission meeting (Attachment 1) for a detailed overview of the extensive public participation opportunities provided for the project, including for the Draft EIR direct mailing to all property owners within 300' of the project. For this Transportation Commission meeting, we notified the public in the following ways:

- Dry Creek Greenway East Project Updates email and text message to subscribers
- Trail Alert email and text message to subscribers
- Website
- Social media

Meeting Purpose and Role of the Transportation Commission

The City of Roseville is required as lead agency under the California Environmental Quality Act (CEQA) to prepare, review and certify or adopt an environmental document for capital improvement projects. For the Dry Creek Greenway East, the City has taken the following actions for CEQA compliance:

- Prepared a Notice of Preparation (NOP) and held a public scoping meeting to determine the content and scope of the environmental document;
- Prepared and distributed a Draft EIR for a 45-day public review period that ended Tuesday May 29, 2018 at 5:00 p.m.
- On May 21, 2018, the Transportation Commission held a noticed public meeting to accept public comments on the Draft EIR.

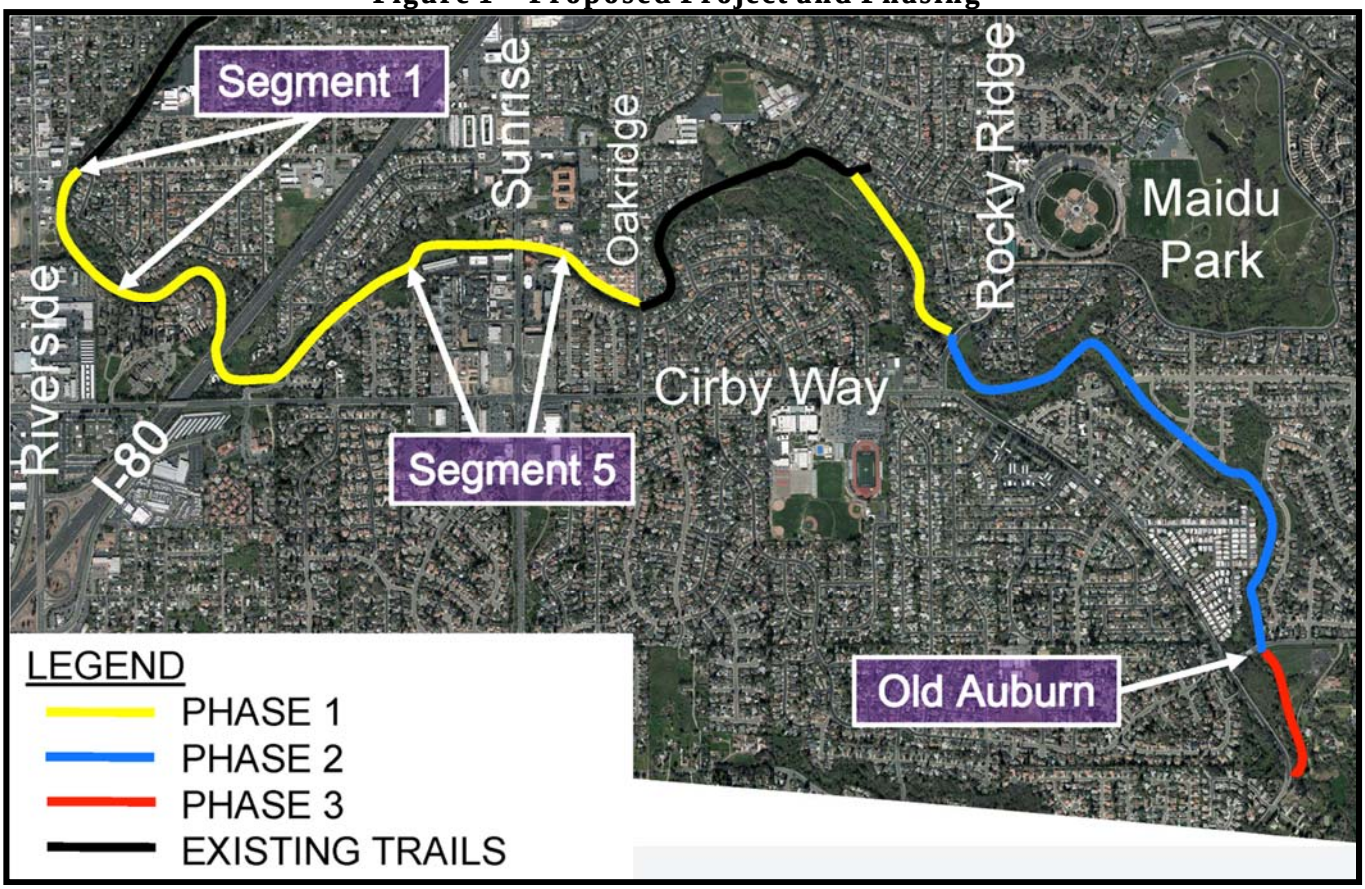
Ascent Environmental, in consultation with city staff, has now prepared a Final EIR for the Dry Creek Greenway Project. This document includes written responses to each written and verbal comment received on the Draft EIR. The responses clarify, amplify, and/or correct information presented in the Draft EIR, as appropriate. These changes do not alter the environmental impact or significance conclusions of the Draft EIR.

As the advisory body to the City Council on transportation projects, the Transportation Commission is now tasked with considering the information provided in the Draft and Final EIRs and making a recommendation on the Final EIR and the Proposed Project to the City Council. This recommendation will be forwarded to the City Council for their consideration when taking an action on certification of the EIR and project approval.

Project Overview

The Dry Creek Greenway East Trail Project is a proposed paved trail along Dry, Cirby & Linda Creeks from Darling Way/Riverside Avenue to the City limits at S. Cirby Way/Old Auburn Road (see Figure 1). The project is identified as a proposed Class I bikeway in the City of Roseville General Plan. The project is also identified as a priority project in the Bicycle Master Plan (adopted in 1994 and most recently updated in 2008) because: 1) It would provide a safe, comfortable, convenient and highly connected bike route in an area of the City that is otherwise underserved by bicycle facilities; 2) it would connect schools and businesses to residential neighborhoods, and; 3) it provides regional connections as part of a planned loop trail around the greater South Placer/ Sacramento area. Figure 1 also shows proposed phasing for the project. The phasing plan was developed in consideration of available funding and connectivity to existing and future bikeway projects. Additional phasing information is provided on pages 9-11.

Figure 1 – Proposed Project and Phasing



Project Description including Alignment Options: Chapter 3 of the Draft EIR includes a detailed description and maps of the proposed project and alignment options for Segments 1 and Segment 5.

For Segment 1 (Hillcrest area near Riverside Avenue), the alignment options are identified as options 1A, 1B, & 1C. For Segment 5 (Sunrise Avenue Area), the alignment options are identified as option 5A & 5B.

The Draft EIR includes a project-level CEQA analysis for all of the alignment options. This approach was used because a preferred alignment for Segments 1 and 5 was not selected by the City Council during review of the prior feasibility study. Providing a project-level review of the Segment 1 and 5 options is intended to allow the City Council to choose from among the options.

It should be noted that the EIR identifies a proposed project that includes Alignment Options 1B & 5B. Identifying options 1B & 5B as part of the "proposed project" was done in order to provide a stable project description for analysis, in compliance with CEQA regulations, but was not intended to preclude the City from choosing from among the alignment options. The alignment option recommendations contained later in this report are based upon the EIR Analysis summarized in Table 6-1 of the Draft EIR, and the detailed analysis of the physical, social and economic considerations of each of the alignment options provided on pages 7-8 of this report.

Summary of Draft EIR

Section 4 of the Draft EIR includes a detailed analysis of the above-noted resource topics. The analysis was prepared by resource area experts at Ascent Environmental and is supported by technical studies related to air quality and greenhouse gas emissions modeling, biological and cultural resource record searches, field studies and fluvial (hydrologic) modeling. For the proposed project and the Segment 1 and Segment 5 options, the Draft EIR analysis finds that there are ***no impacts*** or ***less-than-significant impacts*** to the following resources areas:

- Aesthetics
- Geology and Soils
- Greenhouse Gas Emissions and Climate Change
- Hydrology and Water Quality
- Land Use and Planning
- Public Services
- Recreation
- Utilities

For the proposed project and the Segment 1 and Segment 5 options, the Draft EIR analysis also finds that there is a potentially significant impact to the following resource areas, but that the impacts for these resource areas would be reduced to a ***less-than-significant level with mitigation:***

- Air Quality
- Biological Resources
- Cultural Resources
- Hazards and Hazardous Materials
- Transportation and Circulation

Table 2-1 includes a list of all of the proposed mitigation measures. The Draft EIR finds that, even with implementation of the feasible mitigation measures, there would be a ***significant unavoidable short-term construction-related noise impact*** for the proposed project under all of the alignment options. For the Segment 5 options, the Draft EIR finds that, even with implementation of the feasible mitigation measures, there would be a significant unavoidable short-term construction-generated ground vibration impact for Alignment Option 5A.

Summary of Final EIR

The City received 22 written comments and 6 verbal comments during the 45-day review period for the Draft EIR. The Final EIR is prepared pursuant to CEQA to document and respond to all comments received during the public comment period. The contents of the Final EIR include:

Chapter 1 - Introduction and List of Commenters
Chapter 2 - Comments and Responses
Chapter 3 – Revisions to the Draft EIR
Chapter 4 – Mitigation Monitoring Plan
Chapter 5 – References

The 28 commenters provided comments on a range of topics. The topics included parking and traffic, flooding and erosion, biological resources (including oak trees), visual quality, and noise. The Final EIR responses clarify, amplify, and/or correct information presented in the Draft EIR, as appropriate. However, the comments and responses to comments did not alter any of the environmental impact or significance conclusions of the Draft EIR.

Taken together, the Final EIR, the Draft EIR, and the Appendices constitute the full EIR for the proposed project. The full EIR is to be considered by the Transportation Commission and City Council during project review, including the selection of the alignment options.

Some of the 28 commenters also provided comments on topics that are outside the scope of CEQA review since they address social or economic considerations instead of potential physical changes to the environment. Although these are not addressed through the CEQA process, this staff report provides information on these issues as follows:

Safety & Security – Master Response 1 on page 2-1 of the Final EIR addresses this topic. Fire Department representatives further note that the City of Roseville is not located in a Cal Fire-designated high hazard area. Even so, there is a risk of human-caused fires in open space areas whether or not a trail is present, since all open space areas in Roseville experience some level of human activity. The City has a proactive weed abatement program that reduces the risks associated with fires in our open space. Trails increase human presence in open space areas, but the presence of trail users may actually discourage some illegal activities in the open space and also allows citizens to report suspicious behavior. The Fire Department has not identified a trend for fires in open space areas that have trails. The Fire Department also notes that the presence of paved trails in the open space is an important tool that allows first responders to better respond to calls for emergency service, including fires. Where there are not trails in the open space, responding to wildland fire calls is extremely challenging.

The Roseville Police Department is responsible for public safety in the open space and along Roseville's trails. The Police Department's Social Services Unit has an officer designated for patrolling the City's parks, open space and trails. The trails are patrolled on an as needed basis.

Roseville is a relatively safe and secure community. The Police Department indicates that there is not a trend in crime along our trails. With that said, crime can and does occasionally happen along our trails, just as crime occurs elsewhere in our community. This is consistent with findings in other communities where crime along trails is reflective of the general safety and security of the area through which they travel.

The Police Department has observed that transients are currently active in the open space areas along the length of the project area, even without the presence of a trail. Currently, when the Police Department receives a call for service in the open space along the project area, they have limited options for accessing the open space, and they must often leave their car and walk the open space on foot. This increases the time it takes to respond to a citizen request and reduces the ability to address open space use issues. The Police Department believes that installation of this trail will increase human activity in the

open space, but the vast majority of the new users will be law abiding citizens. As with fire safety, the presence of trail users may actually discourage some illegal activities in the open space and also allows citizens to report suspicious behavior. The trail will also allow the Police Department to better patrol the open space and respond to calls for service.

Potential for Trail User Conflicts – Comment 19-1 and 22-1 (pp. 2-143 and 2-166 of the Final EIR) state concerns with trail width and the potential for injuries resulting from collisions between pedestrians and fast-moving bicyclists between Oakridge Drive and Rocky Ridge Road. Comment 19-1 indicates that the existing paved and dirt trails in the Sierra Gardens area near Eich Middle School are used by families with young children as well as older and physically challenged residents in the area. The concern is that lengthening the trail could result in additional bicyclist use of the paved trail, and this could result in higher potential for conflicts with pedestrians resulting in injuries. The commenter also requests that the project include informational trail signs to identify historic uses of the area (such as Native American activities in the area, or cattle drives.) Comment 22-1 requests that pedestrian paths be provided separate from the paved bike path.

The trail user conflict concern was posed during preliminary planning for the trail. The City responded (prior to preparation of the Draft EIR) by: 1) adjusting the trail alignment between Oakridge Drive and Rocky Ridge Road to avoid paving one existing dirt path and, 2) by proposing where feasible a modified trail design that incorporates a wider decomposed granite shoulder on one side of the pavement to provide more room for pedestrians. Due to limitations in available right-of-way along the length of the trail, we are not able to modify the trail design in most other areas.

Adjacency of trail near Spahn Ranch Subdivision – The Spahn Ranch Subdivision is a new subdivision that is located east of Old Auburn Road and north of Dry Creek. The subdivision was proposed and designed after the City Council accepted the 2010 Dry Creek Greenway Trail Planning and Feasibility Study. During the subdivision design process, the City worked with the subdivision design engineer to ensure that adequate open space was maintained to accommodate the future trail. Although the plans for the trail were made known to the home builder, the Draft EIR was the first time some of the new Spahn Ranch homeowners heard about the trail, and we received quite a few comments with concerns about this segment of trail (Phase 3).

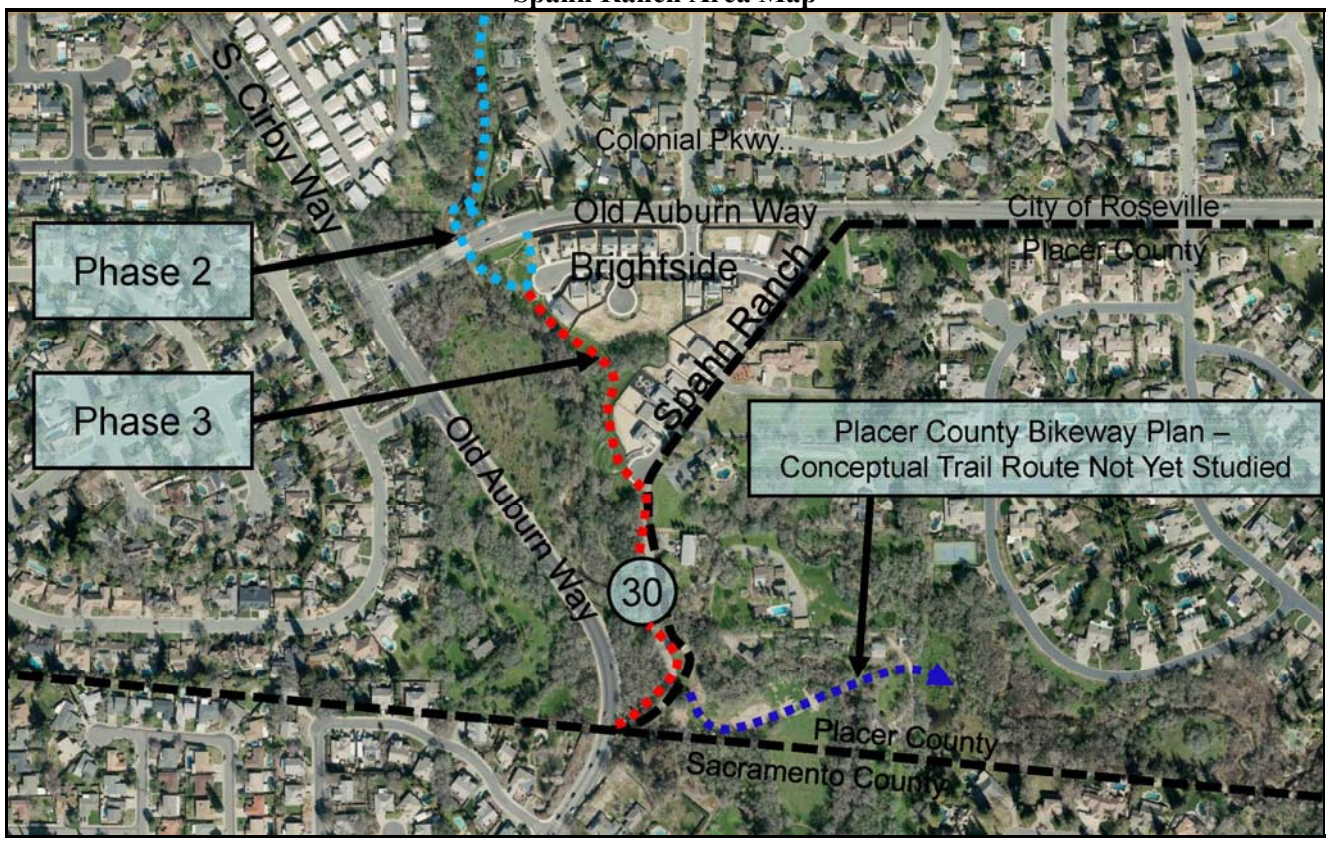
As identified in the project phasing section of this report, Phase 2 of the trail would include an undercrossing of Old Auburn Road to allow for a connection to the east (northbound) side of Old Auburn Road. Phase 2 also includes a connection to Brightside Lane of the Spahn Ranch Subdivision. Phase 3 of the trail would extend the trail from Brightside Lane along the south edge of the Spahn Ranch Subdivision and north bank of Linda Creek to the city limits.

The 2010 Dry Creek Greenway Trail Planning and Feasibility Study proposes that, south of Old Auburn Road, the trail be located on the east side of Linda Creek. The two primary reasons for this are: 1) There are physical constraints to locating the trail on the west side of Linda Creek, including a location about 900 feet east of the South Cirby Way/Old Auburn Road intersection where Old Auburn Road directly abuts Linda Creek and there is no room for trail construction; and 2) as the trail reaches the City limits and enters unincorporated Placer County, the County's Bikeway Master Plan shows the trail heading east toward Sierra College Boulevard along Linda Creek.

Placer County is currently updating its Parks and Trails Master Plan. The current draft shows two alternatives for the extension of the trail: 1) Along Linda Creek per the Placer County Bikeway Master Plan; and 2) from Linda Creek and then along Old Auburn Road directly to Sierra College Boulevard. The City's understanding is that the County will have to conduct additional feasibility analysis to select a

trail alignment for the segment of trail within unincorporated Placer County. As a result, there is a possibility that the County may choose an alternate alignment. For that reason, City staff recommends that design and construction of Phase 3 not proceed until Placer County further develops its plans for the trail alignment.

Spahn Ranch Area Map



Potential for Decreased Property Values – Comment 20-3 (Final EIR p. 2-153) raised a concern about effect on homeowner property values in the Spahn Ranch area. Several studies have been conducted to evaluate the effect of trails on property values. The studies suggest that trails are likely to increase property values within a neighborhood, and that some trails may act as a catalyst for neighborhood revitalization. For example, a 1994 study by the Maryland Greenways Commission titled *Analysis of the Economic Impacts of the Northern Central Rail Trail* asked residents near the trail corridor whether they thought value would be added to homes within walking distance of the trail. Sixty-two percent (62%) believed that a trail would add value, 7% believed that a trail would decrease home value, and 31% believed it would have no effect.

The study of Seattle's Burke-Gilman trail also attempted to evaluate the effect of the trail on property values. That study did not conclusively determine if the trail had any affect, negatively or positively, on property values. However, that study did turn up some anecdotal information:

- Trails are often considered amenities when selling real estate
- Homes are regularly advertised as being near or on the trail
- Residents who bought their homes after the trail was opened are most likely to view the trail as a positive factor that increases the value of their home

- Long-time residents who bought their homes prior to the opening of the trail are generally less likely to view the trail as an economic asset

These views are supported by a 2013 study by the National Association of Realtors and National Association of Home Builders. That study found that walking and jogging trails were identified by 60% of recent homebuyers as the most desirable community feature that would seriously influence the decision to purchase a home.

The studies are less conclusive about the effect of trails on the property value of homes that directly abut the trail corridor. Some studies suggest that the presence of a trail may result in a loss of property value, while others suggest that an adjoining trail would increase in property value. Factors that may influence a particular result include good trail design in context with the neighborhood surroundings. As noted above, the Spahn Ranch subdivision was designed in consideration of the proposed trail, but a final alignment for the trail has not yet been selected.

Other communities and organizations have studied the community-wide economic impact of trails. These studies find that many trails result in economic benefits from increased tourism. The Dry Creek Greenway Trail is part of a future 70 to 80 mile loop trail around the South Placer/Sacramento region that will be a trail of regional and potentially national significance, with corresponding potential for economic benefits.

Analysis of Alignment Options

In 2010, the City Council selected a preferred trail alignment for a majority of the Dry Creek Greenway East trail project. However, the City Council did not select a preferred alignment for the Hillcrest (Riverside Avenue) and Sunrise Avenue areas. As noted above, the EIR includes project-level CEQA analysis for multiple alignment options as follows:

- Segment 1 (Hillcrest) area alignment options: 1A, 1B, and 1C.
- Segment 5 (Sunrise) area alignment options: 5A and 5B.

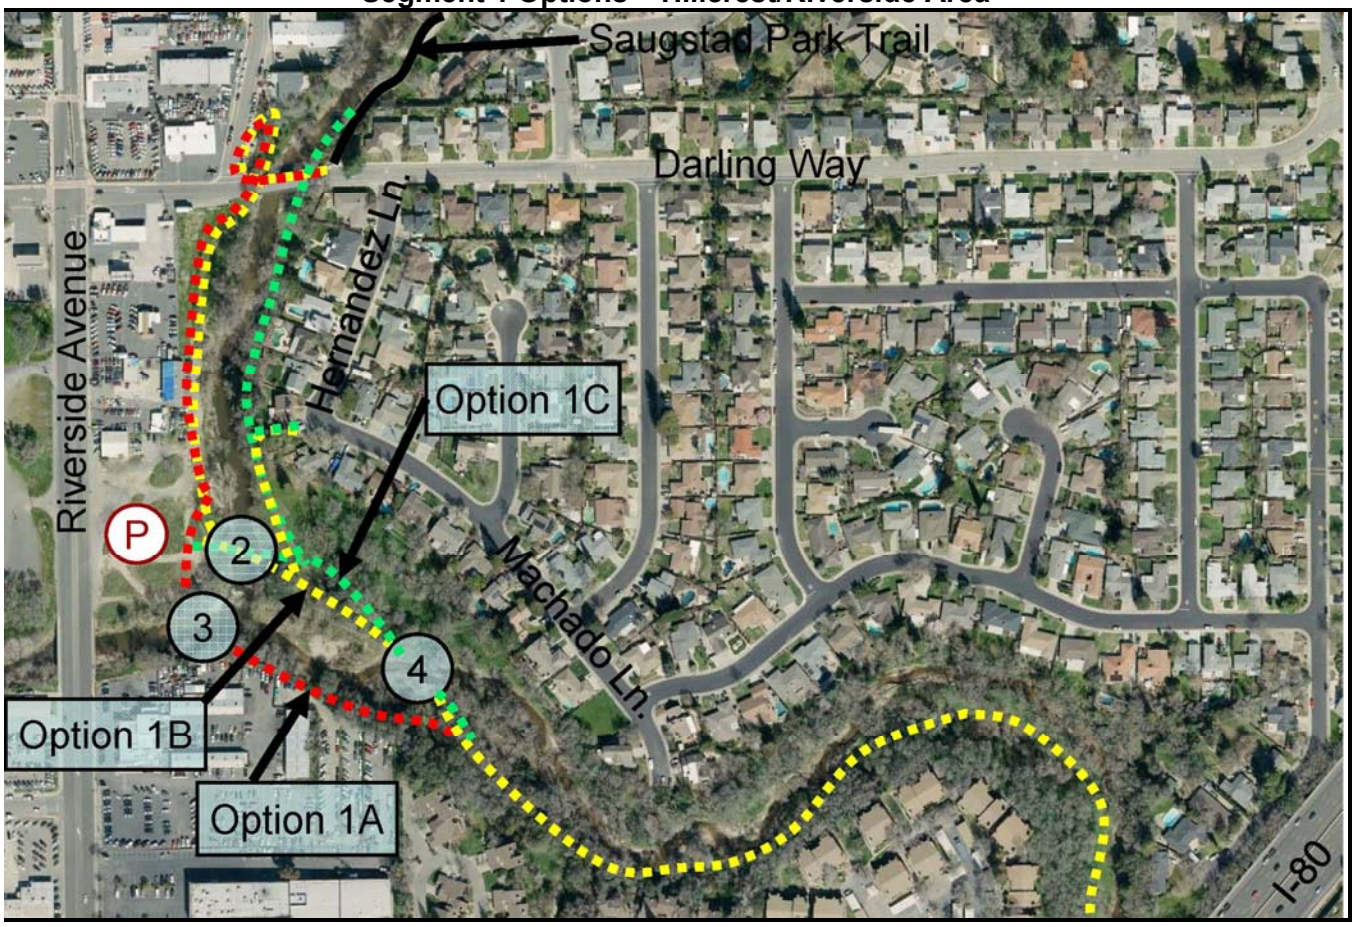
Draft EIR Table 6-1 shows that the environmental impacts of all alignment options are generally the same. There are some minor variations in the level of impact as identified through use of the terms greater than, less than or equal to in Table 6-1. However, since the impacts are generally the same for each alignment option, the staff recommendation provided below focuses primarily on the other physical, social and economic considerations for each alignment option.

Analysis of Segment 1 Alignment Options (Hillcrest/Riverside Area) - The following key considerations inform the staff recommendation for the Segment 1 Hillcrest Area:

- Limited space, existing property line fences, steep banks along the creek, and the location of sewer main and manholes present significant challenges to Option 1C.
- Options 1A & 1B require two bridge crossings (Bridge #2 across Dry Creek and Bridge #4 across Cirby Creek), while Option 1C requires one bridge crossing (Bridge #3 across Dry Creek).
- Option 1C requires challenging construction including the installation of a large retaining walls along the south side of Dry and Cirby Creeks(walls 35, 36 and 37 as shown on Exhibit 3-13 of the Draft EIR), resulting in overall greater cost.
- Options 1A reduces access options for the Hillcrest neighborhood since access to Hernandez/Machado is not provided. However this connection can be provided under the proposed trail alignment and Option 1C.

In consideration of the above, **staff recommends that the City select Option 1B as the recommended trail alignment** in the Hillcrest Area. This is primarily due to the improved constructability of Option 1B combined with the access that it provides.

Segment 1 Options – Hillcrest/Riverside Area

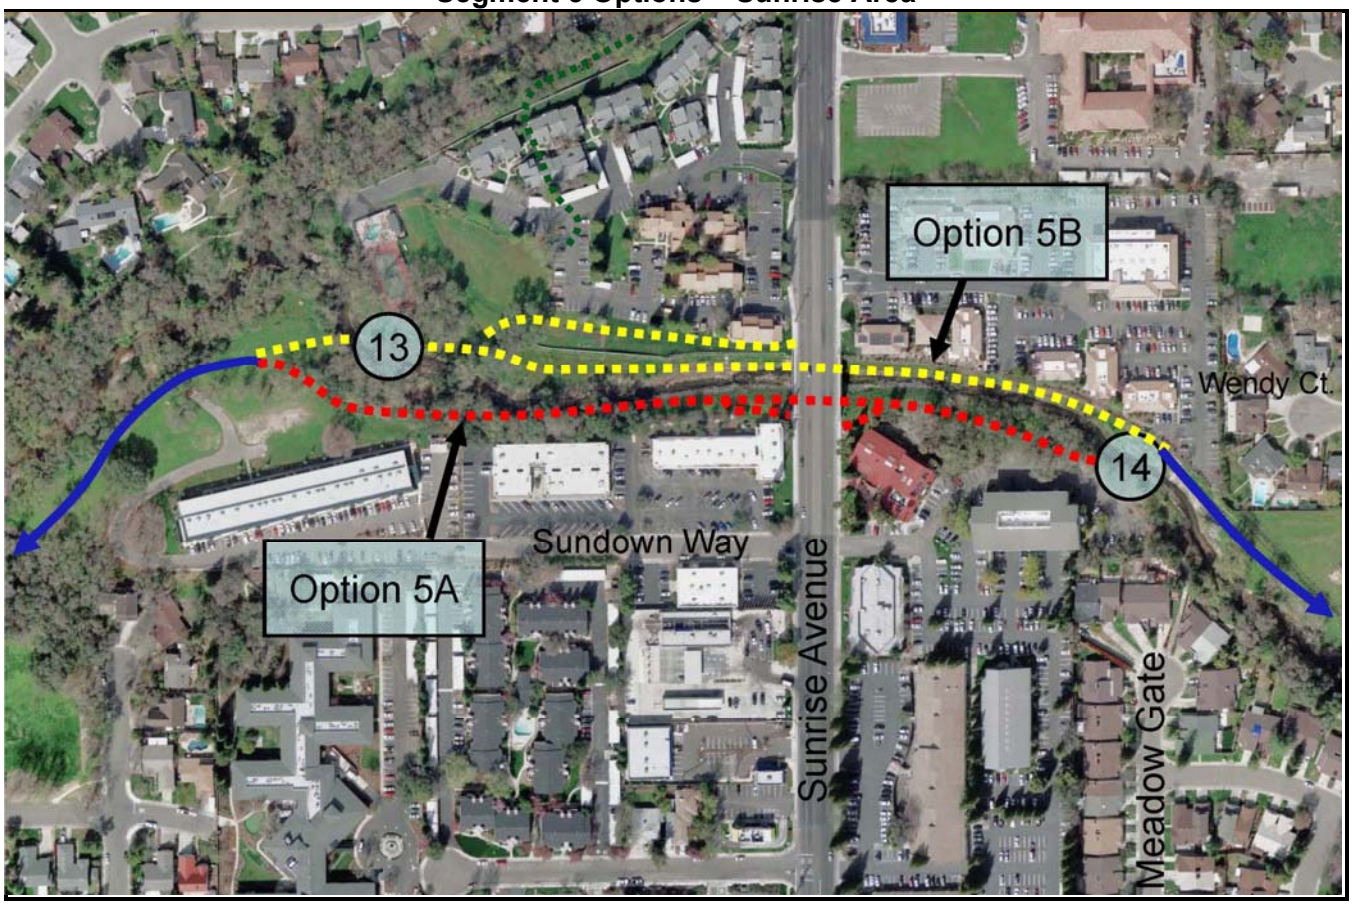


Analysis of Segment 5 Alignment Options (Sunrise Avenue Area) - The following key considerations inform the staff recommendation for the Segment 5 Sunrise Area:

- Option 5A and 5B both result in significant and unavoidable short-term temporary construction noise impacts. However, Option 5A may also expose residents of nearby homes on Meadow Gate Drive to significant ground vibration associated with the construction of bridge #14.
- Option 5A provides direct and convenient access to the west and east sides of Sunrise Avenue.
- Option 5A requires less right-of-way acquisition, but requires additional structural features including Bridge #14 that results in a cost differential of $1,100,000 (compared to Option 5B).
- Option 5B does not provide access to the east side of Sunrise Avenue, and access to the west side of Sunrise Avenue is not convenient as it begins over 500’ from Sunrise Avenue. The limited access to Sunrise Avenue is a concern because there are no safe and convenient options for bicyclists and pedestrians to cross Sunrise Avenue.
- Bridge 13 of Option 5B is proposed as a low-flow bridge across Linda Creek (similar to the bridges on Miners Ravine) because the regulatory floodway is very wide at the confluence of

Cirby and Linda Creeks. This is expected to result in permitting challenges with the Central Valley Flood Protection Board since a variance would be required.

Segment 5 Options – Sunrise Area



In consideration of the above, **staff recommends that the City select Option 5A as the recommended trail alignment** in the Sunrise Area. This is primarily due to the enhanced trail access and the relative balancing of other considerations, and because we anticipate that we will be able to obtain sufficient grant funds for the project.

Proposed Phasing and Cost Estimates

Staff currently proposes construction of the project in 3 phases as described below. We have developed cost estimates for each phase. The cost estimates for design, permitting and right-of-way are estimates based upon our experience with similar projects. The construction cost estimates are based upon recent bid openings for other similar projects. Recent projects have been expensive due to the current high demand for contractors and high materials costs, and this is factored into the cost estimates. We anticipate that the project costs will be paid for using a variety of federal and state grants, and local transportation funds. General fund money, including the recently-approved Measure B funds, will not be used for this project.

Phase 1: Riverside/Darling to Rocky Ridge - This phase is approximately 2 miles long and includes the following improvements:

- Connection to existing Saugstad Park Trail at Darling Way
- Widening and undercrossing of Darling Way
- One bridge crossing of Dry Creek and potentially 1 bridge crossing of Cirby Creek (depending on selected alignment option)
- Undercrossing of I-80
- Connection to Eastwood Park
- Undercrossing of and connection to Sunrise Avenue
- 1 bridge crossing of Linda Creek (location dependent on selected alignment option)
- At-grade crossing of Oakridge Drive to connection with existing Sierra Gardens Trail
- At-grade connection to west side of Rocky Ridge Drive

The estimated cost for Phase 1 is $15,900,000 as follows:

• Final Design	$1,000,000
• Environmental Permits	$700,000
• Right-of-way Acquisition	$1,200,000
• Construction	$11,500,000
• Construction Engineering & Management	$1,500,000

Staff has identified local funds for design, permitting and right-of-way acquisition. Staff has also identified $5,000,000 in federal grant funding for Phase 1 construction. If the project is approved, staff will explore additional options for funding the balance of the construction costs.

The above cost estimate is based upon the recommended alignment. As noted above, the project includes several alignment options within Phase 1 that have varying costs as follows:

- Option 1A would increase the cost of construction by $200,000.
- Option 1C would decrease the cost of construction by $100,000
- Option 5B would decrease the cost of construction by $1,100,000

Phase 2: Rocky Ridge to Old Auburn Way- This phase is approximately 1.5 miles long and includes the following improvements:

- Undercrossing of and connection to existing path along Rocky Ridge Drive
- 1 Bridge crossing of Linda Creek
- Replacement or retrofit of the existing bridge over Strap Ravine
- Undercrossing of Old Auburn Road
- Trail connection to the west and east sides of Old Auburn Road

The estimated cost for Phase 2 is $5,000,000 as follows:

• Final Design	$400,000
• Environmental Permits	$200,000
• Right-of-way Acquisition	$300,000
• Construction	$3,600,000
• Construction Engineering & Management	$500,000

Staff has not yet identified funding for Phase 2, but expects that it would be eligible for transportation-related grants such as the California Active Transportation Program.

Phase 3: Old Auburn Way to City Limits - This phase is approximately 0.5 miles long and includes the following improvements:

- Trail improvements along north side of Linda Creek adjacent to the Spahn Ranch subdivision
- Up to 2 bridge crossings of Linda Creek

The estimated cost for Phase 2 is $2,000,000 as follows:

• Final Design	$200,000
• Environmental Permits	$100,000
• Right-of-way Acquisition	N/A
• Construction	$1,500,000
• Construction Engineering & Management	$200,000

Staff has not yet identified funding for Phase 3, but also expects this phase to be eligible for grant funding. As noted above, staff recommends that design and construction of Phase 3 not proceed until Placer County further develops its plans for the trail alignment.

Recommendation

Staff recommends that the Transportation Commission:

1. Accept the staff report
2. Ask clarifying questions
3. Accept public comment
4. Discuss the project
5. Recommend that the City Council certify the Dry Creek Greenway East Trail Final EIR;
6. Recommend that the City Council approve the Dry Creek Greenway East Trail Project with the use of Alignment Option 1B for the Hillcrest area and Alignment Option 5A for the Sunrise Avenue area.

The Transportation Commission recommendations will be forwarded to the City Council for their review and action. A date has not yet been set for the future City Council meeting. Persons interested in receiving notification of the follow-up meetings should submit their contact information to the Alternative Transportation offices at transportation@roseville.ca.us.

If the City Council accepts the project and directs staff to move forward, the next steps would include:

- Final Design
- Environmental Permitting
- Right-of-way Acquisition
- Obtain Grant Funding
- Phased Trail Construction

If the project is approved by the City Council, phased trail construction could begin as early as 2021.

1 INTRODUCTION

This document is a draft environmental impact report (Draft EIR) on the proposed Dry Creek Greenway East Trail Project (proposed project), a multi-use trail along Dry, Cirby, and Linda Creeks from Riverside Avenue to Old Auburn Road in the City of Roseville. It has been prepared by the City of Roseville (City) as lead agency, in accordance with the California Environmental Quality Act (CEQA) (Public Resources Code [PRC] Sections 21000-21177) and the State CEQA Guidelines (California Code of Regulations [CCR], Title 14, Division 6, Chapter 3, Sections 15000-15387). The proposed project would be a shared-use trail for pedestrians, bicyclists, and other non-motorized vehicle users that would connect neighborhoods, parks, schools, businesses, natural areas, and the on-street bikeway system across the south side of the City.

1.1 PURPOSE AND INTENDED USES OF THIS DRAFT ENVIRONMENTAL IMPACT REPORT

1.1.1 Type and Purpose of the Draft EIR

This Draft EIR has been prepared pursuant to CEQA (PRC Section 21000, et seq.) and the State CEQA Guidelines (California Code of Regulation, Title 14, Chapter 3, Section 1500, et seq.) to evaluate the physical environmental effects of the proposed Dry Creek Greenway East Trail. CEQA requires that public agencies consider the potentially significant adverse environmental effects of projects over which they have discretionary approval authority before taking action on those projects (PRC Section 21000 et seq.). CEQA also requires that each public agency avoid or mitigate to less-than-significant levels, wherever feasible, the significant adverse environmental effects of projects it approves or implements. If a project would result in significant and unavoidable environmental impacts (i.e., significant effects that cannot be feasibly mitigated to less-than-significant levels), the project can still be approved, but the lead agency's decision makers, in this case the City of Roseville City Council, must prepare findings and issue a "statement of overriding considerations" explaining in writing the specific economic, social, or other considerations that they believe, based on substantial evidence, make those significant effects acceptable (PRC Section 21002; State CEQA Guidelines Section 15093).

According to the State CEQA Guidelines (Section 15064[f][1]), preparation of an EIR is required whenever a project may result in a significant adverse environmental impact. An EIR is an informational document used to inform public agency decision makers and the general public of the significant environmental effects of a project, identify feasible ways to mitigate or avoid those effects, and describe a range of reasonable alternatives to the project that could feasibly attain most of the basic objectives of the project while substantially lessening or avoiding any of the significant environmental impacts. Public agencies are required to consider the information presented in the EIR when determining whether to approve a project. The City of Roseville is the lead agency for the project and is responsible for preparation of the EIR; other public agencies with jurisdiction over the project are described below in Subsection 1.3.3, Responsible, Trustee, and Other Interested Agencies.

In accordance with Section 15161 of the State CEQA Guidelines, this document is a project EIR that examines the environmental impacts of a specific proposed project. A project EIR is an informational document designed to provide the basis for the local planning and decision-making process that would lead to project implementation without the need for further environmental review. This type of EIR focuses on the changes in the environment that would result from the proposed project. In accordance with the State CEQA Guidelines, a project EIR must examine the environmental effects of all phases of

the project, including construction and operation. A detailed description of the proposed project is included in Chapter 3, "Project Description," of this Draft EIR.

1.2 SCOPE AND ORGANIZATION OF THIS DRAFT EIR

1.2.1 Scope of the Draft EIR

In accordance with PRC Section 21092 and CCR Section 15082, the City issued a Notice of Preparation (NOP) on November 18, 2013 to inform agencies and the general public that an EIR was being prepared and to invite comments on the scope and content of the document (Appendix A). The NOP was submitted to the State Clearinghouse, posted on the City of Roseville website (http://www.roseville.ca.us/transportation/bikeways/dc_study.asp), made available at the City clerk's office and the City of Roseville Permit Center, and distributed directly to potential responsible and trustee agencies. The NOP was circulated for 30 days, through December 19, 2013. In accordance with PRC Section 21083.9 and CCR Section 15082(c), a noticed scoping meeting for the EIR occurred on December 3, 2013 at 6:00 p.m. at the Maidu Community Center, 1550 Maidu Drive, Roseville, California, 95661.

Recognizing the NOP release precedes the effective date of Assembly Bill 52 (AB 52), statutes of 2014, the procedural elements of AB 52 do not apply to the project (see Regulatory Setting, in Section 4.4, "Cultural Resources," for additional information on AB 52). Nonetheless, the EIR includes consideration of the potential for the presence of tribal cultural resources as part of the environmental analysis in Section 4.4, Cultural Resources. In addition, Native American consultation was conducted throughout preparation of the technical studies prepared for the EIR (see "Native American Consultation and Other Interested Parties" in Section 4.4).

A summary of the comments received on the NOP is included in each technical section. Appendix A contains a copy of the NOP, while scoping comments and comment letters received on the NOP are included in Appendix B. Table 1-1 below lists the NOP comments received and the location of the response in this EIR, as applicable.

Table 1-1 Comment Letters and Discussion Location in Draft EIR

NOP Comment Letter	Comment/Topic	Addressed in Draft EIR Chapter/Section
Letter 1 Central Valley Flood Protection Board	Hydrology and Water Quality 1. Addresses requirements for a board permit for the placement, construction, reconstruction, removal, or abandonment of any landscaping, culvert, bridge, conduit, fence, projection, fill, embankment, building, structure, obstruction, encroachment, excavation, the planting, or removal of vegetation, and any repair or maintenance that involves cutting into the levee. 2. Requests mitigation measures to avoid decreasing floodway channel capacity. 3. Requests mitigation measures for channel and levee improvements and maintenance to prevent and/or reduce hydraulic impacts.	Subsection 1.3.3 Responsible, Trustee and Other Interested Agencies; Section 4.8, Hydrology and Water Quality
Letter 2 Placer County Air Pollution Control District	Air Quality/Greenhouse Gas Emissions and Climate Change 1. The District recommends using the CEQA Air Quality Handbook (Handbook) to assist with recommended	Section 4.2, Air Quality Section 4.6, Greenhouse Gas Emissions and Climate Change

Table 1-1 Comment Letters and Discussion Location in Draft EIR

NOP Comment Letter	Comment/Topic	Addressed in Draft EIR Chapter/Section
	analytical approaches and feasible mitigation measures when preparing air quality analyses for land use projects.	
Letter 3 UAIC	Cultural Resources 1. Expresses interest in holding conservation easements for culturally significant prehistoric sites. 2. Requests the opportunity to provide Tribal representatives to monitor project excavation. 3. Requests receipt of cultural materials from prehistoric sites where excavation and data recovery has been performed. 4. Requests copies of environmental notices and documents for the project and requests a meeting to discuss cultural resources of importance to the UAIC.	Section 4.4, Cultural Resources
Letter 4 Friends of Linda Creek (1)	Project Description 1. Supports a setback of at least 20' from the creek or use of an alternate route if setbacks are not included along Mallard, Condor, Blue Jay and along the Eich school area. 2. Expresses the opinion that the route will meet the City's goal of a Regional Bike Trail Connecting the Parks and Open Space.	Chapter 3, Project Description Section 4.5, Geology ad Soils Section 4.8, Hydrology and Water Quality
Letter 5 Friends of Linda Creek (2)	Project Description, Biological Resources 1. Requests that the total distance from the creek be a minimum of 20 to 30 feet from the top of the creek bank. 2. Expresses concern for the creek related to the removal of trees. 3. Expresses support for natural creek restoration. 4. Addresses the potential to acquire a small amount of additional property.	Chapter 3, Project Description Section 4.5, Geology ad Soils Section 4.8, Hydrology and Water Quality Section 4.9, Land Use and Planning
Letter 6 Friends of Linda Creek (3)	Project Description, Biological Resources 1. Requests the use of bio-engineering and native rock bank restoration rather than the use of concrete.	Chapter 3, Project Description Section 4.3, Biological Resources
Letter 7 Bobbi Knapp	Project Description 1. Requests elements such as underpasses at the crossings at Oak Ridge and Rocky Ridge. 2. Addresses the junction at Meadowlark.	Chapter 3, Project Description
Letter 8 Jim Williams	Project Description 1. Requests renovation of Oak Ridge bridge to allow trail to go under Oak Ridge. 2. Requests that the alignment from Sierra Gardens (Eich) soccer fields to Rocky Ridge be flat and requests an underpass at Rocky Ridge.	Chapter 3, Project Description
Letter 9 David Allen	Project Description, Land Use and Planning 1. Requests an assessment in the EIR of the degree to which the proposed alignment supports the goal of a highly connected trail. 2. Expresses an opinion that the intersection at Sunrise is not the best route for providing connectivity to/from northbound and southbound Sunrise.	Chapter 3, Project Description Section 4.9, Land Use and Planning

Table 1-1 Comment Letters and Discussion Location in Draft EIR

NOP Comment Letter	Comment/Topic	Addressed in Draft EIR Chapter/Section
Letter 10 Andrea Walker	Biological Resources; Hazardous Waste 1. Requests an assessment in the EIR of the impact to potential salmon run. 2. Requests an assessment in the EIR of the environmental impact to the creek of littered dog waste and proposed measures to encourage proper disposal (if it is deemed to adversely impact the water quality of the creek).	Section 4.3, Biological Resources Section 4.8, Hydrology and Water Quality
Letter 11 Rosalyn Clement	Hydrology and Water Quality; Biological Resources 1. Expresses concern regarding downstream effects due to the underpass at Rocky Ridge or any creek bank work. 2. Expresses concern regarding habitat for river otters, western pond turtle, red-winged hawks, and pheasants. 3. Expresses concern for the 30-year old native oaks on Meadow Oaks along the creek trail.	Section 4.3, Biological Resources Section 4.8, Hydrology and Water Quality
Letter 12 Jim Holland	Hydrology and Water Quality; Biological Resources 1. Addresses the natural drainage path of rainwater run-off for Quail Circle and Swallow Way. 2. Addresses the maintenance of dense growth oak trees behind properties on Meadow Lark Way in open space.	Section 4.3, Biological Resources Section 4.8, Hydrology and Water Quality
Letter 13 David Schmidt	Land Use and Planning 1. Addresses property values and limiting future development.	Not a CEQA/EIR-related comment.
Letter 14 Jim Williams	Project Description 1. Requests keeping the trail flat and level. 2. Addresses the existing uphill grade from the creek up to Meadow Lark Drive; 3. Addresses existing skateboarders and young cyclists who use the existing downhill grade that may jeopardize pedestrians at the blind curve.	Chapter 3, Project Description Section 4.9, Land Use and Planning
Letter 15 Shirley Brown	Project Description; Biological Resources 1. Expresses support for leaving this area in its natural state without pavement. 2. Addresses existing wildlife, including ducks, mink, otter, and Western Pond turtle.	Section 4.3, Biological Resources

The City has considered the relevant NOP comments in preparation of this Draft EIR and has determined that the project may result in environmental effects in the following resource areas. Pursuant to CCR Section 15063 (a), of the CEQA Guidelines, an Initial Study has not been prepared for the proposed project. Rather, this EIR analyzes project-related impacts to the following resource areas:

- Aesthetics
- Air Quality
- Biological Resources
- Cultural Resources
- Geology and Soils
- Greenhouse Gas Emissions and Climate Change
- Hazards and Hazardous Materials
- Hydrology and Water Quality
- Land Use and Planning
- Noise
- Public Services
- Recreation
- Transportation and Circulation
- Utilities

Resource areas that would not be affected by the proposed project are addressed in Chapter 2, "Summary."

1.2.2 Draft Environmental Impact Report Organization

This Draft EIR is organized into chapters as briefly described below.

Chapter 1, Introduction: This chapter provides a description of the lead and responsible agencies, the legal authority and purpose of the EIR, the public review process, and organization of the EIR.

Chapter 2, Summary: This chapter summarizes the Dry Creek Greenway East Trail Project and the environmental review process. A description of effects found not to be significant and key environmental issues is provided. Finally, this chapter includes a summary table of the project's significant environmental impacts and associated mitigation measures to reduce significant impacts to less-than-significant levels.

Chapter 3, Project Description: This chapter describes the project location, background, and purpose and need. The Dry Creek Greenway East Trail Project elements and anticipated phasing are described in detail.

Chapter 4, Environmental Setting, Impacts, and Mitigation Measures: The resource sections in this chapter (Sections 4.1 through 4.14) evaluate the environmental effects anticipated from implementation of the proposed Dry Creek Greenway East Trail and Alignment Options 1A, 1C, and 5A. Within each section of Chapter 4, the regulatory background, environmental setting, significance criteria, and analysis methodology and assumptions are described. Environmental impacts are identified and evaluated for each resource. For each significant or potentially significant impact that would result from project or alignment option implementation, mitigation measures are recommended, and the level of significance after mitigation disclosed. Environmental impacts are numbered sequentially throughout the sections of Chapter 4 (e.g. Impact 4.2-1, Impact 4.2-2, etc.). Any required mitigation measures are numbered to correspond to the impact numbering; therefore, the first mitigation measure for Impact 4.2-1 would be Mitigation Measure 4.2-1.

Chapter 5, Other CEQA Considerations: This chapter assesses the potential cumulative impacts that would result from implementation of the Dry Creek Greenway East Trail Project together with other past, present, and probable future projects; and identifies and assesses potential direct and indirect growth inducing impacts, significant and unavoidable impacts, and significant and irreversible commitment of resources.

Chapter 6, Alternatives: This chapter provides a discussion of alternatives to the proposed Dry Creek Greenway East Trail Project, including the No Project Alternative, alternatives considered but eliminated from further consideration, and the environmentally superior alternative.

Chapter 7, References: This chapter identifies the organizations and persons consulted during preparation of this Draft EIR and the documents used as sources for the analyses.

Chapter 8, Report Preparation: This chapter identifies the lead and responsible agency contacts as well as the preparers of this Draft EIR.

Chapter 9, Acronyms and Abbreviations: This chapter identifies the acronyms and abbreviations used in this Draft EIR.

Appendices: This section contains various technical data or reports and official publications (such as the NOP) which were summarized or otherwise used for preparation of the Draft EIR.

1.2.3 Standard Terminology

This Draft EIR uses the following standard terminology:

No Impact means no change from existing conditions (no mitigation is required).

Less-than-Significant Impact means no substantial adverse change in the physical environment (no mitigation is required).

Potentially Significant Impact or **Significant Impact** means an impact that might or would cause a substantial adverse change in the physical environment (all feasible mitigation must be adopted).

Significant and Unavoidable Impact means an impact that would cause a substantial adverse change in the physical environment and that cannot be avoided, even with the implementation of all feasible mitigation.

Significance Criteria means criteria or criterion used to define what level of impact would be considered significant. Standards are defined by a lead agency based on examples found in CEQA or the State CEQA Guidelines, scientific and factual data, views of the public in affected areas, the policy/regulatory environment of affected jurisdictions, and other factors.

1.3 CEQA PROCESS

1.3.1 Public Review of the Draft EIR

This Draft EIR is being circulated for public review and comment for a period of at least 45 days, from April 13, 2018 to May 29, 2018. During this period, comments from the general public, organizations, and agencies on the Draft EIR may be submitted to the City. The Notice of Availability and the Draft EIR are being posted on the City's website:

http://www.roseville.ca.us/EnvironmentalDocs

Additional project information can be obtained from the project website:

http://www.roseville.ca.us/DryCreek

Copies of this Draft EIR are also available for review at the following locations:

City of Roseville Permit Center
311 Vernon Street
Roseville, CA 95678
(Open to the public Monday – Friday from 8:00 am to 5:00 pm)

Maidu Library
1530 Maidu Drive
Roseville, CA 95661(Open to the public: Monday ‑ Wednesday 10:00 am - 7:00 pm; Thursday / Saturday 10:00 am - 5:00 pm)

Written comments on the Draft EIR should be submitted by May 29, 2018 at 5:00 p.m. to:

City of Roseville City Manager's Office
Mark Morse, Environmental Coordinator
311 Vernon Street
Roseville, CA 95678
Phone: (916) 774-5499
Email: mmorse@roseville.ca.us

In addition, a public hearing will be held to receive public and agency comments on the Draft EIR during the public comment period. The meeting date, time, and location and will be noticed via the Notice of Availability of the Draft EIR and posted on the City's website.

Upon completion of the public review period, a Final EIR will be prepared that will include written comments on the Draft EIR received during the public review period and the City's responses to those comments. The Final EIR will also include the Mitigation Monitoring Program. The Final EIR will address any revisions to the Draft EIR made in response to public comments or at the direction of the lead agency. The Draft EIR and Final EIR together will comprise the EIR for the proposed project.

Before the City of Roseville can approve the project, it must first certify that the EIR was completed in compliance with CEQA, that the City Council reviewed and considered the information in the EIR, and that the EIR reflects the independent judgment of the City. If significant environmental effects are identified, the lead agency must adopt "Findings" indicating whether feasible mitigation measures or alternatives exist that can avoid or reduce those significant effects. If the impacts are identified as significant and unavoidable because there are no feasible mitigation measures or alternatives that render such impacts less than significant, the lead agency may still approve the project if it determines that specific economic, legal, social, technological, or other benefits outweigh the unavoidable adverse environmental effects. On this basis, the lead agency would then be required to prepare a "Statement of Overriding Considerations" for review and approval by the decision makers that discusses the specific reasons for approving the project, based on information in the EIR and other information in the record.

1.3.2 Lead Agency

The City of Roseville is the lead agency for this EIR under CEQA, as defined in CCR Section 15367. As such, the City has the principal responsibility for conducting the environmental review process, including scoping, preparing appropriate environmental documentation, and obtaining required permits and other regulatory approvals. After the EIR public review process is complete and the Final EIR is prepared, the City is responsible for certifying the EIR and rendering a decision to approve or deny the Dry Creek Greenway East Trail Project.

1.3.3 Responsible, Trustee, and other Interested Agencies

A responsible agency is a non-federal public agency other than the lead agency that has legal responsibility for reviewing, carrying out, or approving elements of a project (CCR Section 15381). A trustee agency is a state agency that has jurisdiction by law over resources affected by a project which are held in trust for the people of the State of California (CCR Section 15386). The California Department of Fish and Wildlife is a trustee agency with jurisdiction over fish and wildlife and their habitats that may be affected by the Dry Creek Greenway East Trail Project. Responsible and trustee agencies are consulted by the lead agency to ensure the opportunity for input during the environmental review process.

Responsible agencies should participate in the lead agency's CEQA process, review the lead agency's CEQA document, and use the document for decision making on project elements over which they have discretionary approval. The following state agencies may have responsibility for, or jurisdiction over, implementation of portions of the Dry Creek Greenway East Trail Project.

- California Department of Transportation,
- Central Valley Regional Water Quality Control Board,
- Central Valley Flood Protection Board, and
- California Department of Fish and Wildlife

In addition, the following federal agencies may provide funding for project implementation or have responsibility for, or jurisdiction over, permits required prior to implementation of portions of the Dry Creek Greenway East Trail Project.

- Federal Highway Administration (see below),
- U.S. Army Corps of Engineers,
- U.S. Fish and Wildlife Service, and
- National Oceanic and Atmospheric Administration Fisheries

The Federal Highway Administration (FHWA) is serving as the National Environmental Policy Act (NEPA) lead agency as a result of the expectation that Federal Department of Transportation funding would help construct the project. FHWA has an agreement with the State of California that allows delegation of NEPA compliance to Caltrans. Through this NEPA Assignment Memorandum of Understanding, Caltrans is serving FHWA's role as NEPA lead agency. At this time, it is anticipated that NEPA compliance will be satisfied with a Categorical Exclusion based on technical studies.

2 SUMMARY

2.1 INTRODUCTION

As required by the State CEQA Guidelines, California Code of Regulations (CCR) Section 15123(a), this chapter includes: 1) a summary description of the proposed project; 2) a synopsis of environmental impacts and recommended mitigation measures; 3) identification of the alternatives evaluated and of the environmentally superior alternative; and 4) a discussion of potential areas of controversy associated with the project.

2.2 SUMMARY DESCRIPTION OF THE PROPOSED PROJECT

2.2.1 Background

The Dry Creek Greenway East Trail (a multi-use trail along Dry, Cirby, and Linda Creeks from Riverside Avenue to Old Auburn Road) (proposed project) is a proposed 4.25-mile paved multi-use trail in the City of Roseville (City). The proposed project would be a shared-use trail for pedestrians, bicyclists, and other non-motorized vehicle users that would connect neighborhoods, parks, schools, businesses, natural areas, and the on-street bikeway system across the south side of the City.

The City's 2008 Bicycle Master Plan (BMP) includes a plan for development of over 28 miles of Class I trails in Roseville, including the Dry Creek Greenway East Trail. The proposed project is identified as a priority project in the BMP because of its potential to provide a safe, comfortable, and convenient bicycle route in an area of the City with limited existing options for bicyclists.

The City prepared the Dry Creek Greenway Planning and Feasibility Study in 2009. The study outlined the existing conditions, opportunities and constraints, alignment options, evaluation criteria, and a recommended alignment for a paved path from Riverside Avenue and Darling Way to the City limits just south of Old Auburn Road. The study also included design treatment options, cost estimates, and a phasing plan. The City Council accepted the study in 2010. The study was updated in 2013 to provide further information regarding alternative trail alignments.

During preparation of the original and updated feasibility study, the City used a community-based planning approach with an emphasis on public outreach. The public outreach efforts included establishment of a Stakeholder Representative Group (SRG) that represented a broad array of community interests. The SRG met 10 times between 2008 and 2013. The public outreach efforts also included three community meetings, an online survey and numerous neighborhood meetings. The community input received during this process informed the proposed project's design and alignment, and the community input was also considered during the formulation of the optional alignments and project alternatives presented in this EIR.

2.2.2 Summary Description of the Proposed Project

The proposed 4.25-mile multi-use trail would extend from the existing Saugstad/Royer Park trail near the intersection of Riverside Avenue and Darling Way eastward to the City limits, just past the Old Auburn Road/South Cirby Way intersection. The trail would follow creek corridors along portions of Dry, Cirby, and Linda Creeks. These corridors currently contain segments of existing unimproved natural surface paths and paved multi-use paths, some of which do not meet current City design standards.

Much of the corridor has been used historically for recreation and for access and transportation of infrastructure maintenance vehicles and equipment. The corridor continues to be used for these purposes along both improved and unimproved segments.

The proposed project would be a paved, multi-use trail would that would conform to the City of Roseville Design Standards (Section 13 Bikeways) and other provisions of the City of Roseville Construction Standards. A typical cross-section for the proposed trail would consist of a 10-foot wide paved trail with two-foot shoulders on each side (one composed of decomposed granite and one of aggregate base), for a total width of 14 feet. The trail may also include drainage swales on one or both shoulders, as needed. The proposed trail may be narrowed to an eight-foot wide paved section with one- or two-foot wide shoulders for access spurs and in "pinch-point" locations that have severe physical or environmental constraints. The narrower cross section would still support safe, two-way travel but would limit physical disturbance where design constraints prevent construction of the standard cross-section. The proposed trail may also be widened in areas where additional shoulder or trail width is desired to enhance user comfort and safety. In these instances, the shoulder width may be increased to between 5 and 10 feet on one side of the trail. As a result of existing topography, retaining walls would be required at several locations along the proposed alignment. The proposed walls would include gravity walls (reinforced concrete) and anchored walls. The proposed project would include undercrossings to pass beneath existing roadways, including Darling Way, Interstate 80, Sunrise Avenue, Rocky Ridge Drive, and Old Auburn Road. The project would also include the construction or modification of up to eight bridges to provide creek crossings throughout the alignment. Finally, the project could include elements such as benches, lighting on lengthy portions of the undercrossings, utility relocations, and regulatory and wayfinding signs (see Chapter 3, "Project Description.")

The proposed trail would, to the extent feasible, be designed to provide maintenance and emergency access for the City Environmental Utilities Department, open space and storm water maintenance crews, and the Roseville Fire Department. It would provide a safe route for walkers, joggers, cyclists, wheelchair users, and others traveling on non-motorized vehicles to access parks and other trails.

2.2.3 Project Objectives

The proposed project objectives for the Dry Creek Greenway East Trail are developed in consideration of the California Environmental Quality Act (CEQA), the City of Roseville General Plan, 2008 Bicycle Master Plan, and the 2009 Dry Creek Greenway Planning and Feasibility Study. The project objectives are as follows:

- Develop a safe and continuous trail alignment that maximizes opportunities for bicycle and pedestrian travel separate from roadway vehicle traffic by connecting neighborhoods, shopping and employment, schools, parks, transit, and other existing and planned trails, bikeways and walkways.
- Enhance access to the Dry Creek, Cirby Creek, and Linda Creek open space areas for public recreational and educational opportunities, utility maintenance, open space maintenance, and emergency response.
- Protect the natural habitat and special-status wildlife species of the Dry Creek, Cirby Creek, and Linda Creek open space areas, minimize the potential for loss of life and property due to flooding, enhance compatibility with private properties, and reduce the need for right-of-way acquisition.
- Seek the most effective and efficient balance of capital cost, operational and maintenance costs, environmental and community impacts, and public benefits.
- Direct consideration of cost is not required under CEQA. However, efforts to attain this objective are part of the design process employed by the City in meeting its health, welfare and economic obligations to the citizens of Roseville.

2.3 ENVIRONMENTAL IMPACTS AND RECOMMENDED MITIGATION MEASURES

The Draft EIR addresses the following technical issue areas:

- Aesthetics
- Air Quality
- Biological Resources
- Cultural Resources
- Geology and Soils
- Greenhouse Gas Emissions and Climate Change
- Hazards and Hazardous Materials
- Hydrology and Water Quality
- Land Use and Planning
- Noise
- Public Services
- Recreation
- Transportation and Circulation
- Utilities

The specific topics evaluated are described in each of the technical sections presented in Chapter 4. Table 2-1 at the end of this chapter, provides a summary of the environmental impacts of the proposed project, the level of significance of the impact before mitigation, recommended mitigation measures, and the level of significance of the impact after the implementation of the mitigation measures.

2.3.1 Effects Eliminated from Detailed Evaluation

Under CEQA and the State CEQA Guidelines, a lead agency may limit an EIR's discussion of environmental effects when they are not significant (Public Resources Code [PRC] Section 21002.1(e); State CEQA Guidelines CCR Sections 15128 and 15143). Based on a review of the potential effects of the proposed project, the City determined that agricultural and forestry resources, mineral resources, and population and housing would not require detailed evaluation in the Draft EIR.

AGRICULTURAL AND FORESTRY RESOURCES

No agricultural uses exist on or near the proposed project site, and the site is designated by the Farmland Mapping and Monitoring Program (FMMP) as "Urban and Built-up" (California Department of Conservation 2016). The designation for much of the adjacent lands surrounding the project site is Urban and Built Up; the eastern end of the proposed trail (at Old Auburn and South Cirby Way is designated "Other Land"). The proposed project site is not on, or near, any land with the FMMP designation of Prime or Unique Farmland or Farmland of Statewide Importance, nor is it on or near any land with a Williamson Act contract. Thus, development of the proposed project would not convert any prime farmland, unique farmland, or farmland of statewide importance; would not conflict with existing zoning for agricultural use of a Williamson Act contract; and would not involve any changes in the existing environment that could result in conversion of farmland to nonagricultural use. While the project alignment contains some area of riparian woodland, it is not zoned as forest land or Timberland Production, and development of the site would not result in conversion of forest land to non-forest use. Recognizing the absence of adverse impacts related to agriculture or forest resources, these issues are not discussed further in this EIR.

MINERAL RESOURCES

Under the State Mining and Reclamation Act, areas containing economically significant mineral deposits are classified and mapped. These mineral resource zones (MRZs) are used in land use planning to show the likelihood of the occurrence of mineral resources in a particular area. Areas classified as MRZ-2 are considered to have the likelihood of significant mineral deposits that could be economically beneficial to society. Areas classified as MRZ-1 or MRZ-3 are not considered to contain significant mineral deposits.

The project area is classified as MRZ-4, areas of unknown mineral resource significance (California Department of Conservation 1995). As stated in the *City of Roseville General Plan* (City of Roseville 2010), mineral resources, consisting of sand and gravel, are limited and no mineral extraction operations currently occur or are anticipated to occur in the City within the timeframe of the General Plan's analysis. The City of Roseville has not designated the site as a locally important mineral resource area. The project area is not located within or near an area of significant mineral deposits; therefore, no loss of availability of a known mineral resource would occur, and this issue is not discussed further in this EIR.

POPULATION AND HOUSING

The proposed project would not result in new housing or additional population in the City of Roseville. The project would involve the construction of a paved trail alignment along portions of Dry, Cirby, and Linda Creek corridors. The proposed project would be aligned within the creek corridors of developed neighborhoods and business districts in the City of Roseville. With the exception of a few scattered parcels, the properties surrounding the creek corridors are fully developed. While most of the project corridor is on public property, use of some privately-owned parcels is necessary, and this issue is discussed in Chapter 4.9, "Land Use and Planning."

The Proposed Project would not directly induce population growth, because it would not include employment-generating uses. Project development would not indirectly induce population growth, because it would not extend roads or infrastructure into previously undeveloped areas (see the growth-inducing discussion in Chapter 5, "Other CEQA Considerations"). The proposed project does not include residential development, would not displace any existing homes or people, and would not necessitate the construction of replacement housing elsewhere. Recognizing the absence of adverse impacts related to population and housing, these issues are not discussed further in this EIR.

2.3.2 Effects Found to be Less Than Significant

A number of project impacts identified in the Draft EIR were evaluated in detail and found to be less than significant, requiring no mitigation. These impacts can be found in sections 4.1, "Aesthetics"; 4.2, "Air Quality"; 4.5, "Geology and Soils"; 4.6, "Greenhouse Gas Emissions and Climate Change"; 4.8, "Hydrology and Water Quality"; 4.9, "Land Use and Planning"; 4.11, "Public Services"; 4.12, "Recreation"; 4.13, "Transportation and Circulation," and 4.14, "Utilities."

2.3.3 Environmental Impacts and Mitigation

Under CEQA, a significant effect on the environment is defined as a substantial or potentially substantial adverse change in any of the physical conditions within the area affected by the project, including air, water, minerals, flora, fauna, ambient noise, and objects of historic or aesthetic significance (CCR Section 15382). Implementation of the proposed project would result in significant impacts to some of these resources, which are analyzed in Sections 4.1 through 4.14 of this document and summarized in Table 2-1 at the end of this chapter.

CCR Section 15126.4 requires that an EIR describe feasible mitigation measures that could minimize significant adverse impacts. Implementation of mitigation measures would either reduce the impact to a less-than-significant level or leave the impact as significant and unavoidable. In the course of drafting the EIR for this project, impacts were identified that could be reduced to a less-than-significant level with implementation of proposed mitigation measures (see also Chapter 5, "Other CEQA Considerations"). These impacts can be found in sections 4.2, "Air Quality"; 4.3, "Biological Resources"; 4.4, "Cultural Resources"; and 4.7, "Hazards and Hazardous Materials"; 4.10, "Noise"; and 4.13, "Transportation and Circulation."

An impact that remains significant after mitigation is considered an unavoidable adverse impact of the proposed project. One significant and unavoidable impact has been identified in Section 4.10, “Noise,” related to short-term construction noise.

2.4 SUMMARY OF ALTERNATIVES

The following summary describes the alternatives to the proposed project that are evaluated in this EIR. For a complete discussion of project alternatives, see Chapter 6, “Alternatives.”

2.4.1 Alternatives Considered but Eliminated from Further Consideration

This Draft EIR includes a discussion of four alternatives to the project that attempt to reduce the environmental impacts of the proposed project. In addition to the alternatives listed below, several alternatives were considered, but dismissed. These include the following:

- Alternative 1D: This alignment option would begin just before the existing terminus of the Saugstad/Royer trail, travel under the bridge on the east side of Dry Creek and continue south for approximately 700 feet. The trail alignment would continue along the east side of Dry Creek and Cirby Creek for approximately 500 feet before crossing Cirby Creek via Bridge #4 to the southern bank of Cirby Creek, and continue within the floodplain along the south side of Cirby Creek toward the I-80 underpass. Access to the proposed trailhead parking would be via Riverside Avenue. Ultimately, access to the trailhead parking and future trail extension to lower Vernon Street would be provided via Bridge #2.
- Alternative 5C: This alignment option would begin just south of the confluence of Cirby Creek and Linda Creek and cross Linda Creek via Bridge #13 and follow the northern bank of Linda Creek within City owned property. The trail would tie into the existing maintenance path in front of the floodwalls on the north side of Linda Creek and travel eastward under Sunrise Boulevard overcrossing. No direct access would be provided to Sunrise Boulevard.
- Additional On-street Portions of the Path: This alternative would include more on-street bikeways. This alternative would create areas within paved streets identified by striping and signs for preferential (semi-exclusive) bicycle use (Class II bike lanes).

2.4.2 Alternatives Evaluated

This Draft EIR analyzes the following alternatives to the proposed project:

- No Project Alternative: The proposed trail and associated structures, including bridges and retaining walls, would not be constructed.
- Option 1A Alternative Alignment: This Alternative Alignment (shown in Exhibit 3-13) would begin at the existing terminus of the Saugstad/Royer trail, travel across Darling Way bridge (potentially requiring widening of the bridge) and loop under the bridge on the west side of Dry Creek. The alternative would continue south, crossing Dry Creek via Bridge #3 to the southern bank of Cirby Creek, from where it would traverse the existing steep slope down to the existing bench, and continue within the floodplain along the south side of Cirby Creek toward the I-80 undercrossing. Access would be provided to the proposed trail-head parking area at Riverside Avenue and to the future trail extension to Vernon Street. Option 1A Alternative Alignment would require Bridge #3, but would eliminate the need for Bridge #2 and Bridge #4. The remainder of the trail would be the same as the proposed project.

- Option 1C Alternative Alignment: This Alternative (shown in Exhibit 3-14) would begin just before the existing terminus of the Saugstad/Royer trail, travel under the bridge on the east side of Dry Creek and continue south for approximately 700 feet. A spur to the west would provide access to the proposed trail head parking and future trail extension toward Vernon Street, via Bridge # 2 over Dry Creek. This alternative would continue along the east side of Dry Creek and Cirby Creek before crossing Cirby Creek via Bridge #4 to the southern bank of Cirby Creek, from where it would continue along the south side of Cirby Creek toward the I-80 undercrossing. The remainder of the trail would be the same as the proposed project.
- Option 5A Alternative Alignment: This Alternative (shown in Exhibit 3-15) would begin just south of the confluence of Cirby Creek and Linda Creek and remain on the south side, following the southern bank of Linda Creek within City-owned property. The trail would travel eastward and pass beneath Sunrise Avenue. Connecting ramps would provide access to both sides of Sunrise Avenue. This alternative would continue to just east of the existing drainage outfall structure at which point it would cross to the north side of Linda Creek via Bridge #14. It would eliminate the need for Bridge #13. The remainder of the trial would be same as the proposed project.

These alignment Options are evaluated at a project level in Chapter 4 and, therefore, may be selected by the City Council for implementation in association with the proposed project. The relative effects of the alternatives are identified by impact area in Chapter 6, “Alternatives.”

2.5 AREAS OF CONTROVERSY AND ISSUES TO BE RESOLVED

The City issued a Notice of Preparation (NOP) on November 18, 2013 to inform agencies and the general public that an EIR was being prepared and to invite comments on the scope and content of the document. The NOP was circulated for 30 days, through December 19, 2013, and a noticed scoping meeting for the EIR occurred on December 3, 2013. A summary of the comments received on the NOP during the public scoping period is included in each technical chapter and in Chapter 1, “Introduction.” Appendix A contains a copy of the NOP, while scoping comments and comment letters received on the NOP are included in Appendix B.

A total of 15 NOP comment letters were received that addressed the following issues of concern: potential hydrology impacts associated with the accumulation and establishment of woody vegetation that is not managed and including mitigation measures for channel and levee improvements and maintenance to prevent and/or reduce hydraulic impacts; potential impacts to native trees including allowing the destruction of one area by planting young trees miles away; habitat protection for river otters, western pond turtle, red-winged hawks, pheasants, and salmon; design crossings such that Oak Ridge and Rocky Ridge are underpasses; water quality concerns including rainwater run-off; design concerns that the uphill grade from the creek up to Meadow Lark Drive will discourage many who would otherwise continue walking further; include an assessment of the degree to which the proposed alignment supports the goal of a highly connected trail; and diminishing property values and limiting future development. Please see Table 1-1 in Chapter 1, “Introduction,” for a table summarizing the NOP comments and the location of the appropriate Draft EIR chapter in which each comment is addressed. The City has considered the relevant NOP comments in preparation of this Draft EIR. Issues to be resolved related to hydraulics, the loss of trees and natural habitats, water quality, and trail connectivity are addressed in the appropriate technical sections of this EIR.

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
4.1 Aesthetics			
Impact 4.1-1: Substantially degrade the visual character or quality of the site and its surroundings.	Proposed Project = LTS Alignment Option 1A = LTS Alignment Option 1C = LTS Alignment Option 5A = LTS	None required	Proposed Project = LTS Alignment Option 1A = LTS Alignment Option 1C = LTS Alignment Option 5A = LTS
Impact 4.1-2: Create a new source of substantial light or glare that would adversely affect day or nighttime views of the area. 4.3 Biological Resources			
Impact 4.3-1: Disturbance and loss of waters of the United States, waters of the state and riparian habitat.	Proposed Project = S Alignment Option 1A = S Alignment Option 1C = S Alignment Option 5A = S	**Mitigation Measure 4.3-1: Wetlands, Waters of the United States, and Water of the State.** This mitigation would apply for the Proposed Trail Alignment, Alignments Options 1A, 1C, and 5A. The City shall implement the following measures to compensate for the loss of wetlands, waters of the United States, waters of the State, and riparian habitat: a. The City shall submit a wetland delineation report to USACE and request a preliminary jurisdictional determination. Based on the jurisdictional determination, the City shall determine the exact acreage of waters of the United States and waters of the state that would be filled as a result of project implementation. b. The City shall replace on a "no net loss" basis (minimum 1:1 ratio) (in accordance with USACE, CDFW, and/or RWQCB) the acreage and function of all wetlands and other waters that would be removed, lost, or degraded as a result of project implementation. Wetland habitat shall be replaced at an acreage and location agreeable	Proposed Project = LTS Alignment Option 1A = LTS Alignment Option 1C = LTS Alignment Option 5A = LTS

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		to USACE, CDFW, and the Central Valley RWQCB and as determined during the Section 401, Section 404 and Section 1602 permitting processes. The ratio of stream habitat restoration/replacement shall consider value for Central Valley steelhead and Chinook salmon (as discussed under Mitigation Measure 4.3-2). Habitat shall either be restored on the affected stream and within City property, or at an approved mitigation bank. In either instance, compensatory mitigation will be approved by USACE, CDFW, and RWQCB. c. The City shall obtain a USACE Section 404 Individual Permit, RWQCB Section 401 certification, and a Section 1602 streambed alteration agreement from CDFW before any groundbreaking activity within 50 feet of any wetland or water of the United States. The City shall implement all permit conditions, which may include contributions to an approved wetland mitigation bank or through the development and implementation of a Compensatory Wetland, Stream and Riparian Mitigation and Monitoring Plan for creating or restoring in-kind habitat in the surrounding area. If mitigation credits are not available, stream and riparian habitat compensation shall include establishment of riparian vegetation on currently unvegetated bank portions of streams affected by the project and enhancement of existing riparian habitat through removal of nonnative species, where appropriate, and planting additional native riparian plants to increase cover, continuity, and width of the existing riparian corridor along streams in the project site and surrounding areas. The ratio of riparian restoration/replacement shall consider value for Central Valley steelhead and Chinook salmon (as discussed under Mitigation Measure 4.3-2) as well as City Protected trees and Oak Woodland Habitat (as discussed under Mitigation Measure 4.3-8).	

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		Construction activities and compensatory mitigation shall be conducted in accordance with the terms of a streambed alteration agreement as required under Section 1602 of the Fish and Game Code. d. The Compensatory Wetland, Stream and Riparian Restoration and Mitigation and Monitoring Plan shall include the following: 1. identification of compensatory mitigation sites and criteria for selecting these mitigation sites; 2. in kind reference habitats for comparison with compensatory wetland, stream, and riparian habitats (using performance and success criteria) to document success; 3. monitoring protocol, including schedule and annual report requirements (Compensatory habitat shall be monitored for a minimum of three (3) years from completion of mitigation, or human intervention (including recontouring and grading), or until the success criteria identified in the approved mitigation plan have been met, whichever is longer.); 4. ecological performance standards, based on the best available science and including specifications for native riparian plant densities, species composition, amount of dead woody vegetation gaps and bare ground, and survivorship (based on characteristics of the existing impacted habitat); at a minimum, compensatory mitigation planting sites must achieve 80 percent survival of planted riparian trees and shrubs by the end of the three-year maintenance and monitoring period or dead and dying trees shall be replaced and monitoring continued until 80 percent survivorship is achieved; 5. corrective measures if performance standards are not met;	

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		6. responsible parties for monitoring and preparing reports; and 7. responsible parties for receiving and reviewing reports and for verifying success or prescribing implementation or corrective actions.	
Impact 4.3-2: Interfere substantially with the movement of Central Valley steelhead and Central Valley fall-run Chinook salmon.	Proposed Project = S Alignment Option 1A = S Alignment Option 1C = S Alignment Option 5A = S	**Mitigation Measure 4.3-2: Central Valley Steelhead and Central Valley fall-run Chinook Salmon** This mitigation would apply for the Proposed Trail Alignment, Alignment Options 1A, 1C, and 5A. The City shall implement the following measures, developed based on past consultations with NMFS, to avoid, minimize and/or mitigate potential effects on Central Valley steelhead and Central Valley fall-run Chinook salmon. a. Prior to the onset of work, the qualified biologist shall conduct a mandatory worker environmental awareness training. The training shall educate workers about the importance of avoiding impacts to Central Valley steelhead and Central Valley fall-run Chinook salmon and their habitat. The training shall also cover the relevant permit conditions and avoidance and minimization measures that protect sensitive species and habitats, as well as the penalties for non-compliance with state and federal laws, regulations, and permit requirements. The training shall include information about the life history and habitat requirements of Central Valley steelhead and Central Valley fall-run Chinook salmon and their potential to occur in the project site, as well as the terms and conditions of the Project's Biological Opinions or other authorizing documents (i.e. letter of concurrence). b. Construction activities occurring within creek banks and channel beds shall be limited to the low-flow period	Proposed Project = LTS Alignment Option 1A = LTS Alignment Option 1C = LTS Alignment Option 5A = LTS

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		(typically June 15 - October 15), unless earlier or later dates are approved by CDFW and NMFS during consultation. By limiting in-water construction activities to this time period, the Project shall limit construction activities to periods when low flow depths and velocities within the project streams are less likely to support Central Valley steelhead or Central Valley fall-run Chinook salmon life stages including adult migration, spawning, and egg incubation periods. c. Fish screens or temporary stream diversion structures shall be installed to exclude Central Valley steelhead and Central Valley fall-run Chinook salmon from areas where in-water and near-water construction activities would be conducted. Installation of fish screens or temporary diversion structures shall prevent access to affected areas in the unlikely event that Central Valley steelhead or Central Valley fall-run Chinook salmon are present in the project streams during the low-flow period (June 15 - October 15). d. The City shall retain a qualified biologist to monitor the installation of fish screens or temporary stream diversion structures, as well as any other near or in-water construction activities (e.g., installation of RSP along creek banks or below the OHWM, installation and removal of low water crossings, placement of new abutments, rock walls, gabions, and water diversions). Prior to the installation of fish screens or temporary stream diversion structures the biologist shall visually survey the in-water work area for Central Valley steelhead and Central Valley fall-run Chinook salmon. e. Once the biologist confirms that no Central Valley steelhead or Central Valley fall-run Chinook salmon are present in the in-water work area, fish screens or temporary diversion devices shall be installed in a downstream direction, installing the upstream fish	

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		screen or temporary diversion device. The biologist shall conduct a second visual survey before the downstream portion of the fish screen or temporary stream diversion is installed. If fish are present within the diversion area, the fish shall be guided out of the in-water work area with nets by the qualified biologist. The need for fish salvage is not anticipated because Central Valley steelhead or Central Valley fall-run Chinook salmon are not likely to be present in the project streams during the low-flow period (June 15 - October 15) – primarily because of excessive summer water temperatures that occur during this period in the Project area. However, fish salvage (or relocation outside of the in-water work areas) shall be conducted as needed should fish be present. f. Before the onset of construction activities, high visibility orange construction fencing shall be installed along the perimeter of Environmentally Sensitive Areas under the supervision of the qualified biologist. Fencing shall be installed along the limits of construction in riparian habitat, minimizing the disturbance of or encroachment on sensitive aquatic and riparian habitats. The contractor shall maintain the project's Environmentally Sensitive Area fencing for the duration of the project and remove it when the project is complete. g. Erosion control BMPs shall be implemented during construction to minimize the potential for erosion, and the mobilization of sediments to project waterways and be consistent with the Open Space Preserve Overarching Management Plan (and related USFWS Biological Opinion (81420-2008-F-1958-3). The following erosion and sediment control measures shall be implemented to prevent sedimentation and turbidity, as well as any identified in the SWPPP, 401, 404, or 1602 permits.	

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		1. Soil exposure shall be minimized by limiting the area of construction and disturbance and through the use of temporary BMPs, groundcover, and stabilization measures. These measures may include mulches, soil binders and erosion control blankets, silt fencing, fiber rolls, temporary berms, sediment de-silting basins, sediment traps, and check dams. 2. Pursuant to Section 13-4.03C(3) of the Caltrans Standard Specifications, water pollution control practices shall be implemented within 72 hours of stockpiling material or before a forecasted storm event, whichever occurs first. If stockpiles are being used, soil, sediment, or other debris shall not be allowed to enter storm drains, open drainages, and watercourses. Active and inactive soil stockpiles must be covered with soil stabilization. 3. Plastic mono-filament netting (erosion control matting) or similar material that could trap wildlife shall not be used. Acceptable substitutes include, but are not limited to, jute, coconut coir matting, or tackified hydroseeding compounds. 4. Energy dissipaters and erosion control pads shall be provided at the bottom of slope drains as needed. Other flow conveyance control mechanisms may include earth dikes, swales, or ditches. Stream bank stabilization measures shall also be implemented. 5. Existing vegetation shall be protected, to the extent feasible, to reduce erosion and sedimentation. Vegetation shall be preserved by installing temporary fencing, or other protection devices, around areas to be protected. Where complete removal is not necessary, vegetation shall be cut to ground level with the root systems left intact to	

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		prevent erosion and facilitate the recovery of riparian vegetation after project activities are complete. 6. Exposed soils shall be covered by loose bulk materials or other materials to reduce erosion and runoff during rainfall events. 7. Exposed soils shall be stabilized, through watering or other measures, to prevent the movement of dust at the project site caused by wind and construction activities such as traffic and grading activities. 8. All construction roadway areas shall be properly protected to prevent excess erosion, sedimentation, and water pollution. 9. The contractor shall conduct periodic maintenance of erosion and sediment control measures. All erosion and storm water control measures shall be properly maintained for the duration of the project. h. A Spill Prevention and Control Plan shall be developed and implemented by the City, or its contractor, for the duration of the project. Pollution prevention and control BMPs shall be implemented during construction to minimize the risk of hazardous materials being released into waters in the project site. The following pollution and contamination prevention measures shall be implemented to prevent the release of hazardous materials during construction: 1. All equipment and materials shall be stored at least 50 feet from wetlands or waters in the project site unless the equipment is on established paved areas. If storage of equipment or materials within 50 feet of wetlands or waters in the project site is necessary, secondary containment shall be utilized to contain the equipment and materials and prevent discharge of any harmful substances into the soil or aquatic resources. Staging and storage areas for equipment,	

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		materials, fuels, lubricants, and solvents shall be located outside of the channel and banks of Dry Creek, Cirby Creek, Linda Creek, and Strap Ravine. 2. Secondary containment shall be provided for stationary equipment such as motors, pumps, generators, and compressors located within or adjacent to the Dry Creek, Cirby Creek, Linda Creek, and Strap Ravine. Any equipment or vehicles driven or operated within or adjacent to these creeks shall be checked and maintained daily to ensure proper working conditions to avoid potential impacts such as leaks. 3. No fueling, cleaning or maintenance of vehicles or equipment, or placement of construction debris, spoils or trash should occur within 50 feet of wetlands or waters in the project site unless it occurs in designated refueling/staging areas on existing paved surfaces with secondary containment in place. Refueling of equipment should occur at approved fuel locations. Contractor shall inspect all equipment/vehicles for leaks prior to use and should inspected regularly during Project inspection. 4. For work that is to occur on existing structures over open flowing portions of Dry Creek, Cirby Creek, Linda Creek, or Strap Ravine, a method of containment such as netting, tarps or similar catchments shall be utilized to catch debris or other potential construction materials and prevent such material from falling into the waters. i. Lighting design shall include measures to limit the amount of light "spill" on water surfaces at night that could lead to predation of juvenile salmonids. To minimize the effects of lighting on salmonids, the City shall prevent lighting that directly shines on the water	

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		surfaces of Dry Creek, Cirby Creek, and Linda Creek by minimizing the amount of lighting necessary to safely and effectively illuminate pedestrian areas on bridges and trails, and by shielding and focusing lights on the bridge and trail surfaces and away from water surfaces. j. The project shall avoid impacts to riparian vegetation where feasible, and shall incorporate restoration and enhancement of the riparian corridor into the final design plans and construction specifications and shall develop a riparian and restoration plan (RRP), as part of the Compensatory Wetland, Stream and Riparian Mitigation and Monitoring Plan discussed in Impact 4.3-1, Disturbance and loss of waters of the United States, and Mitigation Measure 4.3-1 that involves onsite enhancements and purchase of mitigation bank credits to compensate for permanent and temporal loss of riparian and SRA cover. The RRP shall include on-site measures such as enhancing riparian vegetation by the planting of native shrub, tree, and understory species to create a more diverse vegetation structure and thus a higher quality habitat for wildlife. The onsite measures in the RRP may also include the planting of willows and other fast-growing native riparian species, which can quickly compensate for the loss of riparian and SRA cover, and will be planted where erosion control (RSP, slope pavement etc.) is installed along stream banks. Permanent impacts to riparian vegetation can also be mitigated with the purchase of credits (1:1 for riparian and 1.7:1 for SRA cover), and 0.5:1 for temporal loss of riparian vegetation and SRA cover. Restoration and enhancement of the riparian vegetation in the project site (combined with mitigation bank credits) shall result in no net loss of riparian habitat acreage or function and shall increase the quality of habitat for Central Valley steelhead (including Critical Habitat), Central Valley fall-	

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		run Chinook salmon (including EFH), and shall be accomplished through development and implementation of the RRP. Permanent impacts to riparian, including SRA, and waters of the United States shall be further analyzed and determined based on final design for each construction phase during Section 7 consultation as part of USACE Section 404 and CDFW Section 1602 permitting. k. Construction techniques shall be implemented to isolate near shore work from waterbodies in the project site. It is anticipated that clear water diversion using a cofferdam or gravel bag berm with impermeable layer would be used. Isolating in-water construction areas behind cofferdams would minimize the potential for turbidity and suspended sediments from reaching levels that could harm Central Valley steelhead, degrade existing Critical Habitat, harm Central Valley fall-run Chinook salmon, or degrade existing EFH. The extent of cofferdam footprints and dewatering shall be kept to the minimum necessary to support construction activities, and creek flow shall not be interrupted or reduced as a result of construction activities. Any fill material used in association with the cofferdams, such as sandbag fill, shall be composed of washed, rounded, spawning-sized gravel between 0.4 and 4 inches in diameter. If authorized by applicable state and federal permits, any of this gravel in contact with flowing water shall be left in place, and distributed manually with hand tools to allow passage for all life stages of fish. Installation and removal of cofferdams and/or gravel bag berms would be restricted to the summer low-flow period.	

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
Impact 4.3-3: Disturbance or loss of valley elderberry longhorn beetle or its habitat.	Proposed Project = S Alignment Option 1A = S Alignment Option 1C = S Alignment Option 5A = S	**Mitigation Measure 4.3-3a: Avoidance and Minimization Measures** The following measures shall be implemented to avoid or minimize effects to VELB and/or its habitat during construction of the proposed project. a. A worker awareness training program for construction personnel shall be conducted by a qualified biologist prior to beginning construction activities. The program shall inform all construction personnel about the life history and status of the beetle, requirements to avoid damaging the elderberry plants, and the possible penalties for not complying with these requirements. Written documentation of the training shall be submitted to the USFWS within 30 days of its completion. b. If elderberry shrubs can be retained within the project footprint, the City shall avoid indirect impacts by implementing the following measures, to the extent feasible, or equivalent measures agreed to in consultation with USFWS. Minimization measures include: 1. Avoidance Area. An avoidance area shall be established at least 20 feet from the drip-line of an elderberry shrub for any activities that may damage or kill the elderberry shrub (e.g., trenching, paving, etc.). 2. Fencing. All areas to be avoided during construction activities shall be fenced and/or flagged as close to construction limits as feasible. 3. Signage. Signage shall be posted every 50 feet along the buffer area with the following information, "This area is habitat of the valley elderberry longhorn beetle, a threatened species, and must not be disturbed. This species is protected by the Endangered Species Act of 1973, as amended.	Proposed Project = LTS Alignment Option 1A = LTS Alignment Option 1C = LTS Alignment Option 5A = LTS

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		Violators are subject to prosecution, fines, and imprisonment." The signs shall be clearly readable from a distance of 20 feet, and must be maintained for the duration of construction. 4. Timing. To the extent feasible, all activities that could occur within 165 feet of an elderberry shrub, shall be conducted outside of the VELB flight season (March - July). 5. Erosion Control and Revegetation. Erosion control measures will be implemented to restore areas disturbed within 165 feet of elderberry shrubs and the affected area will be re-vegetated with appropriate native plants. 6. Chemical Usage. Herbicides will not be used within the drip-line of the shrub. Insecticides will not be used within 100 feet of an elderberry shrub. All chemicals will be applied using a backpack sprayer or similar direct application method. 7. Mowing. Mechanical weed removal within the drip-line of the shrub shall be limited to the season when adults are not active (August - February) and shall avoid damaging the elderberry. 8. Pre-construction and post-construction surveys. Pre-construction surveys shall document compliance with mitigation measures. The post-construction survey shall confirm that there was no additional damage to any of the elderberry shrubs than as described in this document. 9. Construction monitoring. A qualified biologist shall monitor the work area at project-appropriate intervals to assure that all avoidance and minimization measures are implemented. The amount and duration of monitoring will depend on the project	

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		specifics and shall be discussed with a USFWS biologist. 10. Elderberry Shrub Protection and Management Plan. The City will develop as part of the Section 7 consultation process with USFWS for the Dry Creek Greenway Multi-Use Trail project an elderberry shrub protection and management plan that will include how the buffer areas are to be protected, restored, and maintained after construction is completed and the City will ensure that ground-disturbing activities on the project site do not alter the hydrology for shrubs to be protected or otherwise affect the likelihood of vigor or survival of elderberry shrubs. The Elderberry Shrub Protection and Management Plan shall be consistent with the City's Open Space Preserve Overarching Management Plan. **Mitigation Measure 4.3-3b: Removing/Transplanting Individual Elderberry Shrubs** a. Elderberry shrubs that are in the path of construction activities and cannot be avoided shall be removed and if feasible, transplanted, according to Table 4.3-5. A Biological Opinion from USFWS will be obtained prior to removal or transplanting of elderberry shrubs. Removal of a shrub may either include the roots or just the removal of the above-ground portion of the plant. If feasible, the entire root ball shall be removed, and the shrub transplanted. b. Elderberry shrubs requiring removal shall be transplanted as close as feasible to its original location within City-owned property or as approved by USFWS. Elderberry shrubs may be relocated adjacent to the project footprint if: 1) the planting location is suitable for elderberry growth and reproduction; and 2) the City is	

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		able to provide long-term protection to the shrub and ensure that the shrub becomes reestablished. c. If these criteria cannot be met, the shrub may be transplanted to an appropriate USFWS-approved mitigation site. d. Any elderberry shrub that is unlikely to survive transplanting because of poor condition or location, or a shrub that would be extremely difficult to move because of access problems, may not be appropriate for transplanting. The following transplanting guidelines shall be used to guide removal and transplanting of elderberry shrubs on the project site: 1. A qualified biologist shall be on-site for the duration of transplanting activities to assure compliance with avoidance and minimization measures and other conservation measures. 2. Exit-hole surveys shall be completed immediately before transplanting. The number of exit holes found, GPS location of the plant to be relocated, and the GPS location of where the plant is transplanted shall be reported to the USFWS and to the California Natural Diversity Database (CNDDB). 3. Elderberry shrubs shall be transplanted when the shrubs are dormant (November through the first two weeks in February) and after they have lost their leaves. Transplanting during the non-growing season will reduce shock to the shrub and increase transplantation success. 4. Transplanting shall follow the most current version of the ANSI A300 (Part 6) guidelines for transplanting (http://www.tcia.org/).

Mitigation Measure 4.3-3c: Compensatory Mitigation for Loss of Riparian Habitat
a. The following compensatory mitigation addresses impacts to VELB habitat through compensating for the permanent loss of riparian habitat within 165 feet of elderberry shrubs. Table 4.3-6 lists the total riparian habitat that is anticipated to be lost, according to the preliminary project design, and the corresponding credits that shall be purchased to replace habitat lost at a 3:1 ratio, as outlined in the VELB framework (USFWS 2017b). The exact amount of compensation shall be as agreed to by USFWS, per Section 7 consultation under the Federal Endangered Species Act.

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		b. If the City chooses not to purchase credits at a USFWS-approved bank, they shall follow USFWS requirements for providing a permanent conservation area that meets USFWS criteria and approval, as described in the VELB Framework (USFWS 2017b). **Mitigation Measure 4.3-3d: Consultation with USFWS** Caltrans, as the federal designated agency, will consult with USFWS under Section 7 of ESA for approval of transplanting and compensatory measures outlined in Mitigation Measures 4.3-3b and 4.3-3c prior to project construction.	
Impact 4.3-4: Disturbance or loss of Swainson's hawk, white-tailed kite, and other nesting raptors.	Proposed Project = PS Alignment Option 1A = PS Alignment Option 1C = PS Alignment Option 5A = PS	**Mitigation Measure 4.3-4: Nesting Raptors** This mitigation would apply for the Proposed Trail Alignment, Alternative Alignments 1A, 1C, and 5A. The following measures shall be implemented to avoid, minimize and fully mitigate impacts to Swainson's hawk, white-tailed kite, as well as other raptors. a. For project activities, including tree removal, that begin between February 15 and September 15, a qualified biologist shall conduct preconstruction surveys for nesting raptors and to identify active nests on and within 0.25 mile of the project site with direct line of sight from public access areas with the use of binoculars and spotting scopes to the proposed work areas. The surveys shall be conducted before the beginning of any construction activities between February 15 and September 15. b. The City shall attempt to initiate upland construction activities before the nest initiation phase (i.e., before February 15). If breeding raptors establish an active nest site, as evidenced by nest building, egg laying, incubation, or other nesting behavior, near the	Proposed Project = LTS Alignment Option 1A = LTS Alignment Option 1C = LTS Alignment Option 5A = LTS

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		construction area, they shall not be harassed or deterred from continuing with their normal breeding activities. c. Impacts to nesting raptors shall be avoided by establishing appropriate buffers around active nest sites identified during preconstruction raptor surveys. No project activity shall commence within the buffer areas until a qualified biologist has determined the young have fledged, the nest is no longer active, or reducing the buffer, in coordination with CDFW, would not likely result in nest abandonment. CDFW guidelines recommend implementation of 500 feet for raptors, but the size of the buffer may be adjusted if a qualified biologist and the City, in consultation with CDFW, determine that such an adjustment would not likely adversely affect the nest. Monitoring of the nest by a qualified biologist during construction activities shall be required if the activity has potential to adversely affect the nest. d. Trees shall not be removed during the breeding season for nesting raptors unless a survey by a qualified biologist verifies that there are not active nests within the trees or within 500 feet of the trees proposed to be removed. Loss of trees that provide potential nesting habitat shall be compensated by planting replacement trees according to Mitigation Measure 4.3-1 (wetlands/riparian trees) and Mitigation Measure 4.3-8 (protected oak trees).	
Impact 4.3-5: Disturbances to special-status song birds.	Proposed Project = S Alignment Option 1A = S Alignment Option 1C = S Alignment Option 5A = S	**Mitigation Measure 4.3-5: Special-status birds** This mitigation would apply for the Proposed Trail Alignment, Alignment Option 1A, 1C, and 5A. The following measures shall be implemented and are intended to avoid, minimize, and fully mitigate impacts to nesting special-status birds.	Proposed Project = LTS Alignment Option 1A = LTS Alignment Option 1C = LTS Alignment Option 5A = LTS

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		a. The City shall ensure that before any ground-disturbing project activities begin for a given proposed trail segment, a qualified biologist shall identify potential habitat for nesting special-status bird species in areas that could be affected during the breeding season by construction. b. If vegetation removal or other disturbance related to construction of the trail segment is required during the nesting season, focused surveys for active nests of special-status birds shall be conducted before and within 5 days of initiating construction by a qualified biologist. The appropriate area to be surveyed and timing of the survey may vary depending on the activity and species that could be affected. If no active nests are found during focused surveys, no further action under this measure shall be required. c. If an active special-status bird nest is located during the preconstruction surveys, the biologist shall notify the City and the City shall notify CDFW. Construction shall be prohibited within a minimum of 25 feet of the nest to avoid disturbance until the nest is no longer active. d. If construction stops for more than 5 days during the nesting season, a follow up survey shall be conducted to make sure that no birds moved into the area and started nesting.	
Impact 4.3-6: Disturbance or loss of Western pond turtle.	Proposed Project = S Alignment Option 1A = S Alignment Option 1C = S Alignment Option 5A = S	**Mitigation Measure 4.3-6: Western Pond Turtle.** This mitigation would apply for the Proposed Trail Alignment, Alignment Options 1A, 1C, and 5A. a. Implement Mitigation Measure 4.3-1. b. Before ground disturbance, all onsite construction personnel shall be instructed by a qualified biologist regarding the potential presence of western pond turtle, the importance of avoiding impacts on this species and	Proposed Project = LTS Alignment Option 1A = LTS Alignment Option 1C = LTS Alignment Option 5A = LTS

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		its habitat, and recognition of western pond turtle and its habitat(s). c. Within 24 hours before beginning construction activities within 200 feet of suitable aquatic habitat for western pond turtle, a qualified biologist shall inspect areas of anticipated disturbance for the presence of western pond turtle nests and individuals. If nests are found, a 100-foot no disturbance buffer shall be erected and maintained until the turtles have hatched and no obstructions between the nest and aquatic habitat shall be created. No vegetation clearing will be allowed within the buffer to shelter the turtles from the elements and potential predators. d. If adult and juvenile turtles are found during preconstruction, dewatering, or fish rescue operations, the biologist shall relocate the western pond turtle to the nearest suitable habitat outside of the area of disturbance. The construction area shall be re-inspected whenever a lapse in construction activity of two weeks or more has occurred. The biologist shall be available thereafter; if a turtle is encountered during construction activities, the biologist shall relocate the western pond turtle to the nearest suitable aquatic habitat outside the area of disturbance. As suitable habitat is located throughout the area, it is not anticipated that turtles would be relocated far from construction areas and that they would recolonize following construction. e. After completion of project-related construction activities, any temporary fill and construction debris shall be removed, and temporarily disturbed areas shall be restored to pre-project conditions. Restoration of grassland and riparian habitat shall be conducted as applicable under Mitigation Measure 4.3-1 (for riparian vegetation) and Mitigation Measure 4.3-4 (for grassland habitat) in proximity to the stream corridors.	

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
Impact 4.3-7: Disturbance or loss of special-status bats – pallid bat and silver-haired bat.	Proposed Project = S Alignment Option 1A = S Alignment Option 1C = S Alignment Option 5A = S	**Mitigation Measure 4.3-7: Special-status bats** This mitigation would apply for the Proposed Trail Alignment, Alternative Alignments 1A, 1C, and 5A. a. Bat surveys shall be conducted by a qualified wildlife biologist within 5 days before removal of trees that have suitable roosting habitat for bats. Specific survey methodologies shall be determined in coordination with CDFW, and may include visual surveys of bats (e.g., observation of bats during foraging period), inspection for suitable habitat, bat sign (e.g., guano), or use of ultrasonic detectors (e.g., Petterson, Anabat, Wildlife Acoustics). Removal of any significant roost sites located shall be avoided to the extent feasible with a non-disturbance buffer of 250-feet. If it is determined that an active roost site cannot be avoided and will be affected, bats shall be excluded from the roost site before the site is removed. The City shall first notify and consult with CDFW on appropriate bat exclusion methods and roost removal procedures. Exclusion methods may include use of one-way doors at roost entrances (bats may leave, but not reenter), or sealing roost entrances when the site can be confirmed to contain no bats. Once it is confirmed that all bats have left the roost, crews shall be allowed to continue work in the area. The City may have to provide temporary suitable bat roosting habitat (i.e. bat boxes), prior, during, and after exclusion to provide bat roosting habitat. b. Exclusion efforts shall be restricted during periods of sensitive activity (e.g., during winter hibernation or while females in maternity colonies are nursing young [generally, April 15 through August 15]). If a hibernation or maternity roosting site is discovered, the project biologist and the City shall consult with CDFW to	Proposed Project = LTS Alignment Option 1A = LTS Alignment Option 1C = LTS Alignment Option 5A = LTS

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		establish appropriate exclusionary buffers until all young are determined to be able to fly by the project biologist. Once it is determined that all young are able to fly, passive exclusion devices shall be installed and all bats will be allowed to leave voluntarily. Once it is determined by a qualified biologist that all bats have left the roost, crews shall be allowed to work within the buffer zone.	
Impact 4.3-8: Disturbance or loss of City protected trees, Valley Oak Woodland, and other Sensitive Vegetation Alliances and Associations.	Proposed Project = S Alignment Option 1A = S Alignment Option 1C = S Alignment Option 5A = S	**Mitigation Measure 4.3-8: Avoid impacts or mitigate for impacts to Valley Oak Woodland, and other Sensitive Vegetation Alliances and Associations (previously known as Sensitive Natural Communities)** This mitigation would apply for the Proposed Trail Alignment, Alignment Option 1A, 1C, and 5A. a. To the maximum extent feasible, oak and riparian trees shall be avoided where possible and protection measures shall be implemented to protect oak woodlands, riparian areas and associated native trees from project-related impacts. The following measures shall be implemented for oak and riparian trees that would be impacted by project activities to avoid and minimize potential impacts to individual oak and riparian trees: 1. Temporary protective fencing shall be installed at least one foot outside the dripline of the native oak tree before initiating construction to avoid damage to the tree canopy and root system. A circle with a radius measurement from the trunk of the tree to the tip of its longest limb will constitute the dripline protection area for each tree. Limbs must not be cut back to change the dripline. The area beneath the dripline is a critical portion of the root zone and defines the minimum protected area of each tree. Removing limbs that make up the dripline does not change the protected area.	Proposed Project = LTS Alignment Option 1A = LTS Alignment Option 1C = LTS Alignment Option 5A = LTS

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		2. No vehicles, construction equipment, mobile home/office, supplies, materials or facilities shall be driven, parked, stockpiled or located within the dripline of the native oak trees. 3. No grading shall be allowed within the dripline of the native oak tree. 4. No trenching shall be allowed within the dripline of the native oak tree. If it is necessary to install underground utilities within the dripline of the native oak tree, the utility line shall be jacked and bored under the supervision of a certified arborist. 5. Drainage patterns onsite shall not be modified so that water collects or stands within, or is diverted across, the dripline of any native oak tree. 6. If ground disturbance must occur within the protected zone of a native oak tree, all work shall occur consistent with the City's Tree Preservation Ordinance requirements. b. For those trees that cannot be avoided, the City shall comply with any riparian habitat conditions to comply with the Compensatory Wetland, Stream and Riparian Mitigation and Monitoring Plan that will be developed during the Section 404, Section 401, and Section 1602 permitting process as described in Mitigation Measure 4.3-1. Additionally, the City shall implement the following: 1. An arborist report shall be conducted to identify the species and quantities of trees that will be removed to implement the project. 2. If native oak trees are removed, they shall be replaced as outlined in the City's Tree Preservation Ordinance 19.66.070. A Tree Planting and Maintenance Plan showing species, size, spacing	

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		and location of plantings, and the location and species of established vegetation shall be prepared. A monitoring program shall also be established to ensure compliance with any prescribed mitigation measures established by the project and to monitor the oak woodland restoration area. 3. Fully implement Mitigation Measure 4.3-1, which requires the City to secure and comply with a CDFW Streambed Alteration Agreement that would include a riparian restoration component.	
Impact 4.3-9: Disturbance or loss of special-status plants – Sanford's arrowhead.	Proposed Project = S Alignment Option 1A = S Alignment Option 1C = S Alignment Option 5A = S	**Mitigation Measure 4.3-9: Special-status plants – Sanford's arrowhead.** This mitigation would apply for the Proposed Trail Alignment, Alternative Alignments 1A, 1C, and 5A. The City shall implement the following measures to reduce potential impacts on Sanford's arrowhead: a. Prior to project construction and during the blooming period for Sanford's arrowhead (May – November), a qualified botanist shall conduct floristic-level surveys for Sanford's arrowhead in areas where potentially suitable habitat would be removed or disturbed by project activities. The normal blooming period for Sanford's arrowhead generally indicates the optimal survey period when the species is most identifiable. b. If no Sanford's arrowhead plants are found, the botanist shall document the findings in a letter report to the City of Roseville and CDFW and no further mitigation shall be required. c. If Sanford's arrowhead plants are found that cannot be avoided during construction, the City shall consult with CDFW to determine the appropriate mitigation measures for direct and indirect impacts that could occur as a result of project construction and shall implement	Proposed Project = LTS Alignment Option 1A = LTS Alignment Option 1C = LTS Alignment Option 5A = LTS

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		the agreed-upon mitigation measures to achieve no net loss of occupied habitat or individuals. Mitigation measures may include preserving and enhancing existing populations, creation of offsite (but within the stream reach) populations on project mitigation sites through seed collection or transplantation, and/or restoring or creating suitable habitat in sufficient quantities to achieve no net loss of occupied habitat and/or individuals. Potential mitigation sites could include suitable locations along the stream but outside of the construction areas. A mitigation and monitoring plan shall be developed describing how unavoidable losses of special-status plants will be compensated. d. If relocation efforts are part of the mitigation plan, the plan shall include details on the methods to be used, including collection, storage, propagation, receptor site preparation, installation, long-term protection and management, monitoring and reporting requirements, success criteria, and remedial action responsibilities should the initial effort fail to meet long-term monitoring requirements. e. Success criteria for preserved and compensatory populations shall include: 1. The extent of occupied area and plant density (number of plants per unit area) in compensatory populations shall be equal to or greater than the affected occupied habitat. 2. Compensatory and preserved populations shall be self-producing. Populations shall be considered self-producing when: I. plants reestablish annually for a minimum of five years with no human intervention such as supplemental seeding;	

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Table 2-1 Summary of Impacts and Mitigation Measures

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		II. reestablished and preserved habitats contain an occupied area and flower density comparable to existing occupied habitat areas in similar habitat types in the project vicinity. 3. If off-site mitigation includes dedication of conservation easements, purchase of mitigation credits, or other off-site conservation measures, the details of these measures shall be included in the mitigation plan, including information on responsible parties for long-term management, conservation easement holders, long-term management requirements, success criteria such as those listed above and other details, as appropriate to target the preservation of long term viable populations.	
Impact 4.3-10: Impacts on movement of native resident or migratory fish or wildlife species or migratory wildlife corridors or impede the use of native wildlife nursery sites.	Proposed Project = S Alignment Option 1A = S Alignment Option 1C = S Alignment Option 5A = S	**Mitigation Measure 4.3-10: Movement of native resident or migratory fish or wildlife species or migratory wildlife corridors or impede the use of native wildlife nursery sites.** This mitigation would apply for the Proposed Trail Alignment, Alternative Alignments 1A, 1C, and 5A. Implementation of Mitigation Measure 4.3-1 and Mitigation Measure 4.3-2 would ensure that impacted habitats are mitigated for or restored, and work windows would prevent impact to migratory fish species. The work windows would allow the fish to freely use the stream corridors during migration to and from the streams. Impacted habitats (i.e., aquatic, riparian and SRA) would be restored or mitigated for and although affected their long-term function as breeding or nursery site would not be impacted. a. Implement Mitigation Measure 4.3-1 Wetlands, Waters of the United States, waters of the state and riparian habitat. b. Implement Mitigation Measure 4.3-2 Central Valley Steelhead and Central Valley Fall-run Chinook Salmon.	Proposed Project = LTS Alignment Option 1A = LTS Alignment Option 1C = LTS Alignment Option 5A = LTS

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
4.4 Cultural Resources			
Impact 4.4-1: Disturb archaeological resources, including tribal cultural resources.	Proposed Project = PS Alignment Option 1A = PS Alignment Option 1C = PS Alignment Option 5A = PS	**Mitigation Measure 4.4-1: Proper Handling of Archaeological Resources.** This mitigation would apply for the Proposed Trail Alignment, Alignment Options 1A, 1C, and 5A. A minimum of seven days prior to beginning earthwork or other soil disturbance activities, the City shall notify UAIC of the proposed earthwork start-date. As part of this notification, a UAIC tribal representative shall be invited to inspect the project site, including any soil piles, trenches, or other disturbed areas, within the first five days of groundbreaking activity. During this inspection, a site meeting of construction personnel shall also be held to afford the tribal representative the opportunity to provide cultural resources awareness information. If any cultural resources, such as structural features, unusual amounts of bone or shell, artifacts, human remains, or architectural remains are encountered during this initial inspection or during any subsequent construction activities, work shall be suspended within 100 feet of the find, and the City's Project Manager shall immediately notify the City of Roseville Development Services Director. The City's Project Manager, in consultation with the City's Environmental Coordinator, shall coordinate any necessary investigation of the site with a qualified archaeologist approved by the City, and as part of the site investigation and resource assessment the archeologist shall consult with the UAIC and provide proper management recommendations should potential impacts to the resources be found by the City to be significant. A written report detailing the site assessment, coordination activities, and management recommendations shall be provided to the City by the qualified archaeologist. Possible management recommendations for unique archaeological resources	Proposed Project = LTS Alignment Option 1A = LTS Alignment Option 1C = LTS Alignment Option 5A = LTS

NI = No impact, LTS = Less than significant, PS = Potentially significant, S = Significant

Impacts	Significance before Mitigation (by Alignment Option)	Mitigation Measures	Significance after Mitigation (by Alignment Option)
		could include resource avoidance or, where avoidance is infeasible in light of project design or layout or is unnecessary to avoid significant effects, preservation in place or other measures. The contractor shall implement any measures deemed by City staff to be necessary and feasible to avoid or minimize significant effects to the cultural resources.	
Impact 4.4-2: Accidental discovery of human remains.	Proposed Project = PS Alignment Option 1A = PS Alignment Option 1C = PS Alignment Option 5A = PS	**Mitigation Measure 4.4-2: Stop work if human remains are discovered.** This mitigation would apply for the Proposed Trail Alignment, Alignment Options 1A, 1C, and 5A. If human remains are discovered during any construction activities, potentially damaging ground-disturbing activities in the area of the remains shall be halted immediately, and the project applicant shall notify the Placer County coroner and the NAHC immediately, according to Section 5097.98 of the State Public Resources Code and Section 7050.5 of California's Health and Safety Code. If the remains are determined by the NAHC to be Native American, the guidelines of the NAHC shall be adhered to in the treatment and disposition of the remains. The City shall also retain a professional archaeologist with Native American burial experience to conduct a field investigation of the specific site and consult with the MLD, if any, identified by the NAHC. Following the coroner's and NAHC's findings, the archaeologist, and the NAHC-designated MLD shall determine the ultimate treatment and disposition of the remains and take appropriate steps to ensure that additional human interments are not disturbed. The responsibilities for acting upon notification of a discovery of Native American human remains are identified in California Public Resources Code Section 5097.94. Impact 4.10-1: Short-term construction-related noise.	Proposed Project = PS Alignment Option 1A = PS Alignment Option 1C = PS Alignment Option 5A = PS	**Mitigation Measure 4.10-1: Employ Noise-Reducing Construction Practices** This mitigation will apply to the Proposed Trail Alignment and Alignment Options 1A, 1C, and 5A. Feasible measures that can be used to limit construction noise include the following: ◢ Locate stationary noise generating construction equipment as far as feasible from noise-sensitive uses. ◢ Do not idle inactive construction equipment for prolonged periods (i.e., more than 5 minutes). ◢ Prohibit unmuffled engine exhaust systems. All construction equipment powered by gasoline or diesel engines shall have factory-installed sound control devices, or sound control devices that are at least as effective as those originally provided by the manufacturer, and all equipment shall be operated and maintained in good working order to minimize noise generation pursuant to Section 9.24.030 of the Noise Ordinance. ◢ The contractor shall provide advance written notification to owners and renters of buildings located within 50 feet of construction activities. The notice shall explain when construction is expected. The notice shall include contact information for the project manager. ◢ When construction occurs outside of the typical daytime and early evening hours (7:00 a.m. – 7:00 p.m. Monday-Friday and 8:00 a.m. – 8:00 p.m. Saturday and Sunday) or within 50 feet of noise	Proposed Project = SU Alignment Option 1A = SU Alignment Option 1C = SU Alignment Option 5A = SU

		sensitive commercial or office buildings, the use of noise-generating construction equipment will be avoided to the extent feasible. When not feasible, construction contractors will specify proposed noise-reducing construction practices or alternative schedules that will be employed to reduce construction noise. Measures specified by the contractors will be reviewed and approved by the City prior to construction activities. In these situations, feasible noise reduction measures include the following: ◤ Alternative construction schedule to minimize disturbance to normal office operations; and/or ◤ Use temporary noise-reducing barriers positioned between noise-generating equipment (including hand operated jack hammers) and the sensitive receptor building. Such barriers may include commercially manufactured noise-insulating blankets/quilts or as equal materials with similar noise reduction performance as approved by the resident engineer. When temporary barrier units are joined together, the mating surfaces shall be flush with each other with no gaps.

		Construction documents shall specify construction practices that reduce the adverse effects of ground vibration associated with project construction activities. Measures specified by the design engineer will be reviewed and approved by the City prior to approval of the plans and specifications and may include, but are not limited to, the measures listed below. ◢ Implement Mitigation Measure 4.10-1. ◢ All construction equipment on construction sites shall be operated as far away from vibration- and noise-sensitive sites as reasonably feasible. ◢ Earthmoving, dozing, and ground-impacting operations shall be phased so as not to occur simultaneously in areas close to offsite sensitive receptors, to the extent feasible. The total vibration level produced could be significantly less when each vibration source is operated at separate times. ◢ As part of final design, project engineers shall identify areas on the project plans where work may be constrained due to proximity of structures. The designs shall specify requirements that during project construction on the trail alignment, no heavy vibratory equipment (i.e., the types of equipment listed in Table 4.10-5), shall be operated within 13 feet of off-site building structures unless otherwise approved in writing by the City Engineer. Non-vibratory equipment, such as hand tools, and handheld vibratory compactors and rollers may be used. Use of different material types including slurry cement and concrete paving approved by the Engineer, may be used to reduce or eliminate the need for vibratory equipment. Those portions of the

3 PROJECT DESCRIPTION

3.1 INTRODUCTION AND PROPOSED PROJECT

The Dry Creek Greenway East Trail (a multi-use trail along Dry, Cirby, and Linda Creeks from Riverside Avenue to Old Auburn Road) (proposed project) is a proposed 4.25-mile, paved, multi-use trail in the City of Roseville (City) (see Exhibit 3-1, Project Vicinity). The proposed project would be a multi-use trail for pedestrians, bicyclists, and other non-motorized vehicle users that would connect neighborhoods, parks, schools, businesses, natural areas, and the on-street bikeway system across the south side of the City.

3.1.1 Project Location and Setting

The proposed 4.25-mile, multi-use trail would extend from the existing Saugstad/Royer Park trail near the intersection of Riverside Avenue and Darling Way eastward to the City limits, just past the Old Auburn Road/South Cirby Way intersection (see Exhibit 3-2, Project Location). The trail would follow creek corridors along portions of Dry, Cirby, and Linda Creeks. These corridors currently contain segments of existing unimproved, natural-surface paths and paved multi-use paths, some of which do not meet current City design standards. Much of the corridor has been used historically for recreation, infrastructure maintenance access, and transportation. It continues to be used for these purposes along both improved and unimproved segments.

EXISTING CONDITIONS

Land Use and Zoning

The proposed trail project would be located primarily within City-owned property zoned as Open Space with Floodway or Floodway Fringe Overlays. Small segments of the trail would also be located on property zoned for residential, commercial, and parks and recreation use with the Floodway or Floodway Fringe Overlays. While most of the project corridor is on public property, use of some privately-owned parcels is necessary. Trail development is a permitted use in all of these zone districts.

The proposed project would be aligned within the creek corridors of developed neighborhoods and business districts in the City of Roseville. With the exception of a few scattered parcels, the properties surrounding the creek corridors are fully developed. The properties adjacent to the proposed trail corridor include a mix of residential, commercial, parks, open space and public/quasi-public uses. Flood control improvements, including floodwalls, berms, bypass channel, bypass culverts, and a detention basin are located along the length of the proposed project from Interstate 80 (I-80), easterly to Old Auburn Road. A flood control bypass channel and detention basin are located along the south side of Linda Creek east of Rocky Ridge Drive and north of Cirby Way. Commercially zoned properties are concentrated along Sunrise Avenue to the north and south of the project site along Linda Creek. Commercial areas are also found near the western part of the proposed trail along Riverside Avenue between Darling and Cirby Ways.

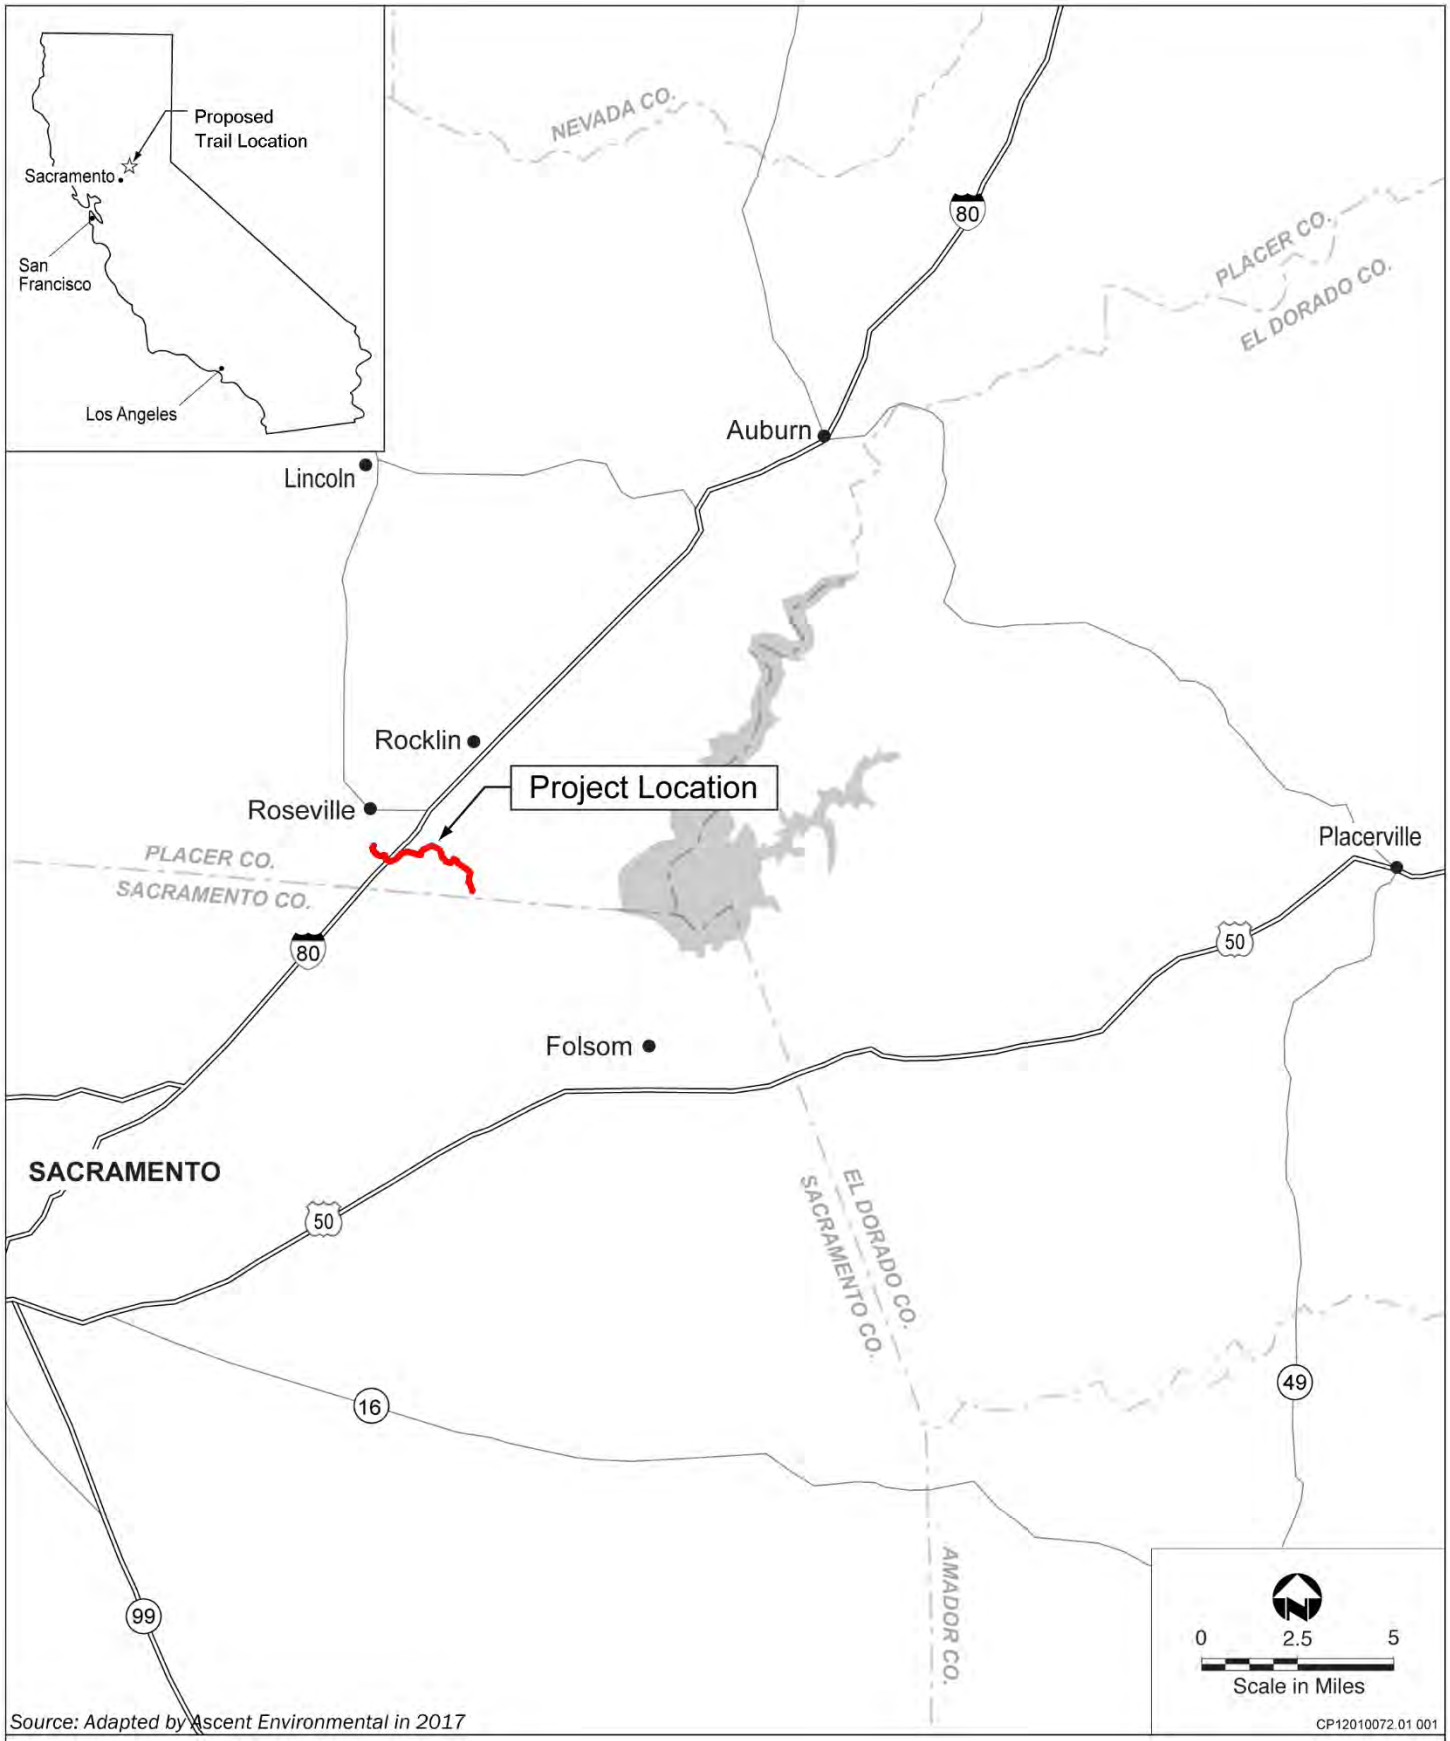

Exhibit 3-1

Project Vicinity

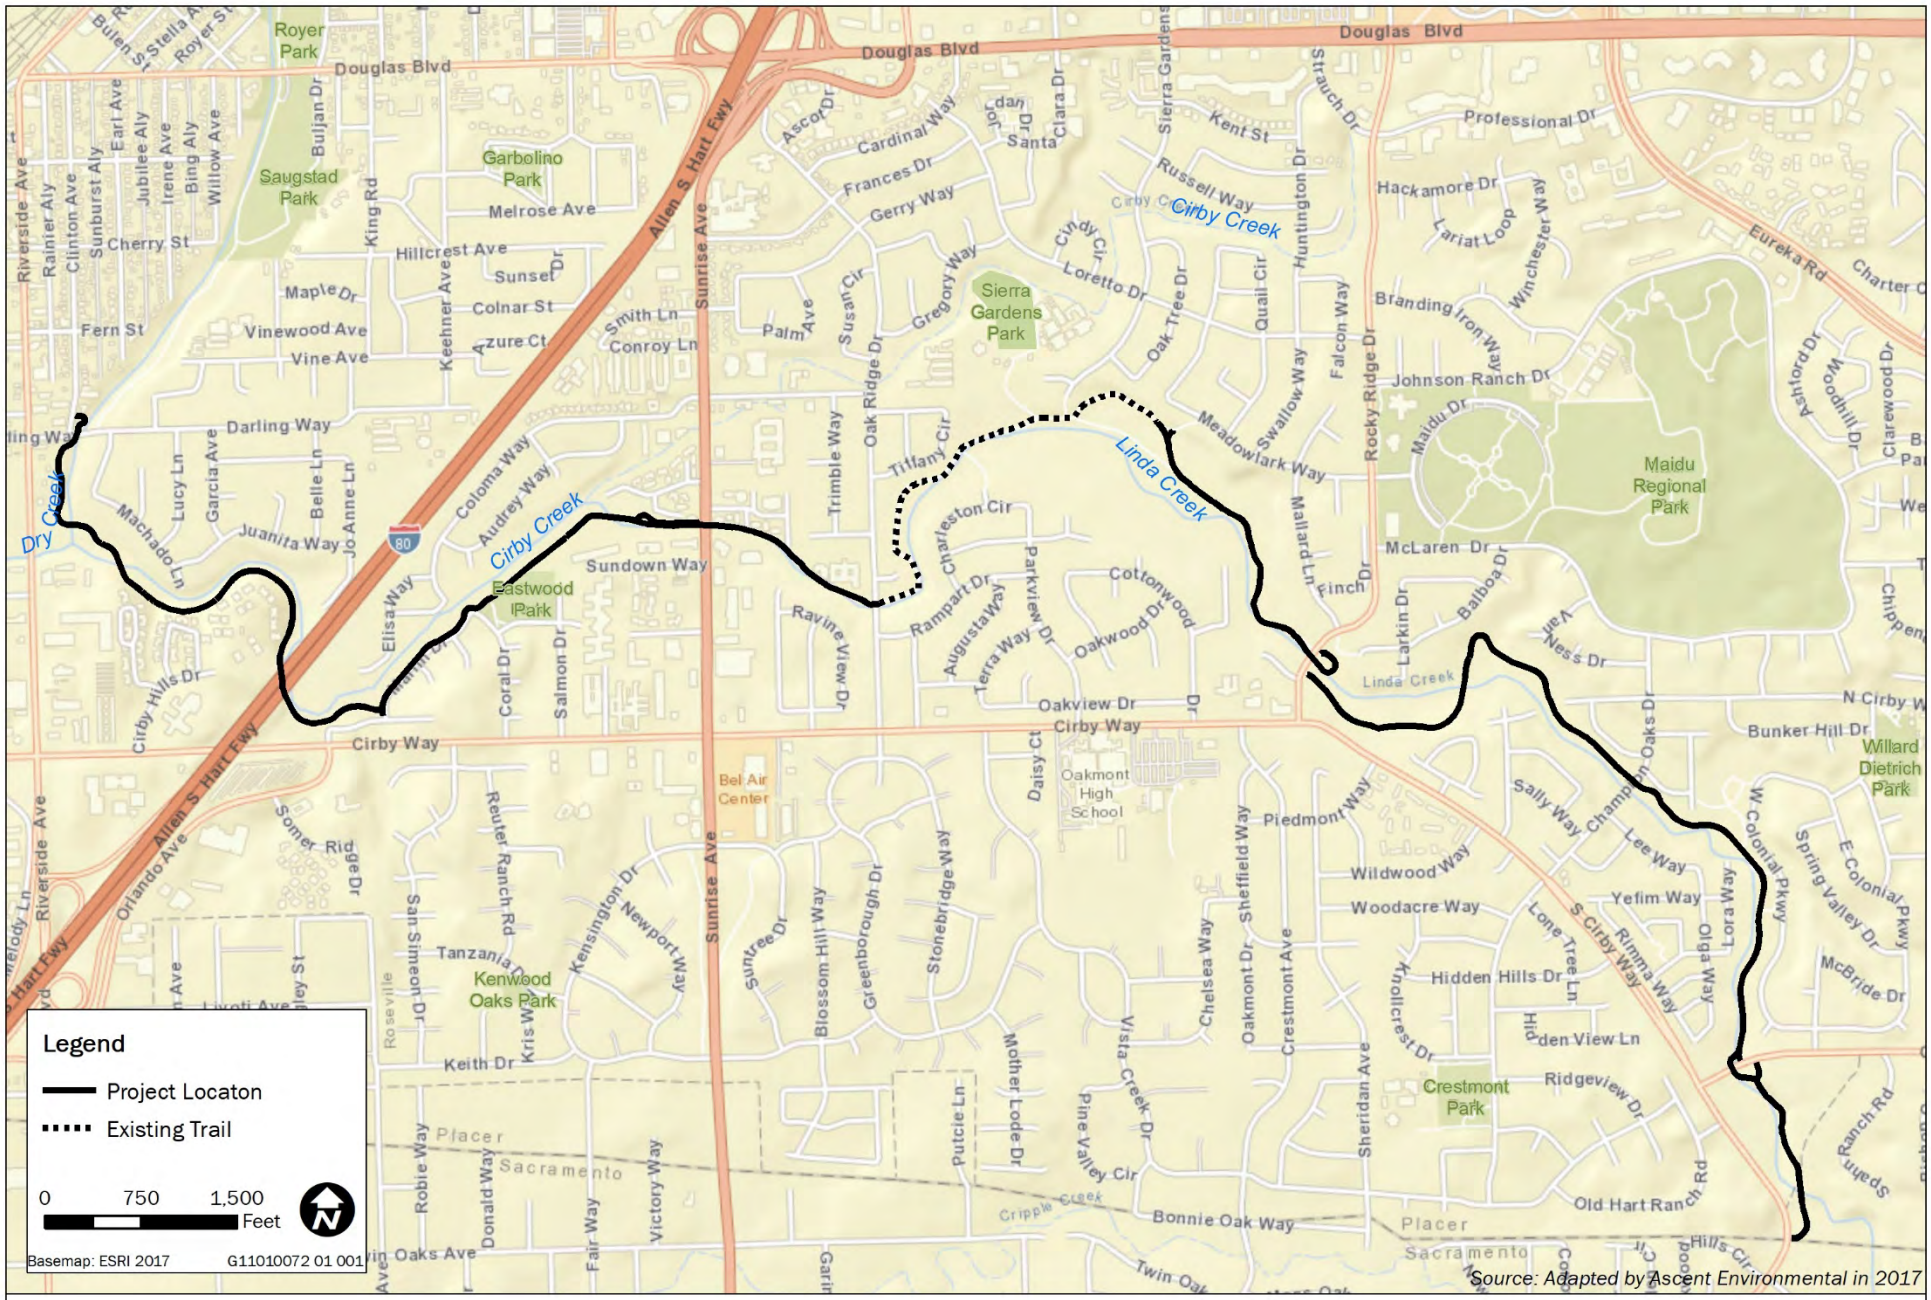

Exhibit 3-2

Project Location

ASCENT ENVIRONMENTAL

Habitat

Within the trail corridor, fish and wildlife habitat quality ranges from disturbed, low-quality land to high-quality undisturbed habitat. Although the habitat value of the urban creek corridor may be diminished because of adjacent and surrounding development, the creek corridor still provides year-round and seasonal migratory habitat for a variety of fish and wildlife species. Annual grassland occurs in open, cleared, or disturbed areas along the proposed trail and forms the understory of mixed riparian and valley oak woodland communities. The vegetation along the stream banks, bottoms, and adjacent floodplains varies throughout the trail corridor and depends on local hydrologic and soil conditions. Central Valley fall-run Chinook salmon have been previously documented in all three creeks; regionally, the creeks provide migration and spawning habitat for adult and rearing habitat for juvenile Chinook salmon. In addition to its natural qualities, the habitat offers passive recreation and interpretive opportunities.

Parks

The proposed trail would be located in close proximity to several parks, including Maidu Regional Park, Saugstad Park, Eastwood Park, and Willard Dietrich Park as shown on Exhibit 3-2. An existing multi-use path along the east side of Rocky Ridge Drive as well as on-street bike lanes on Rocky Ridge Drive currently provide connections from the proposed trail to Maidu Regional Park. Much of the corridor passes through pastoral settings of oak woodland, grassland, and riparian settings, offering opportunities for a variety of recreational pursuits.

Neighborhoods

The City of Roseville is organized into neighborhoods that are served by associations. The purpose of the neighborhood associations is to improve the social, physical, and economic health in the Roseville community by sharing information, facilitating training and education, providing resources, and encouraging communication and participation among neighbors, neighborhoods, government, businesses and other participants. There are currently 39 neighborhood association areas. The proposed Dry Creek Greenway East Trail would be aligned through, or adjacent to the Cherry Glen, Cirby Side, Cresthaven, Hillcrest, Maidu, Meadow Oaks, Sierra Gardens, and South Cirby neighborhoods.

Bikeway and Transit Connections

Enhancing connectivity is an integral part of planning a successful multi-use trail system. Connections to other multi-use trails, on-street bikeways, neighborhoods, business districts and transit increase trail access and promote trail use. The proposed project has a number of opportunities for connections to the community and existing and proposed transportation facilities. Table 3-1 is a list of potential trail connections.

Table 3-1 Potential Bicycle Trail, Path, and Route System Connections

Point of Connection	Facility Type	Sheet number*	Purpose
Darling Way	Class III (e)	1	Connection to Riverside Avenue business district, Roseville Transit routes A & B, Cirby Elementary School, and Hillcrest, Cherry Glen and Los Cerritos neighborhoods
Saugstad/Royer/ Miners Ravine Trails	Class I (e)	1	Connection to Miners Ravine Trail and Downtown Roseville, including Downtown transit stations, offering transportation and looped recreation opportunities
Riverside Avenue	Class I (p) & Class II (p)	1	Future trail connection to Atkinson Street, Morgan Creek, Dry Creek Parkway Ueda Parkway and Sacramento Northern Trails (part of regional looped trail system) Roseville Transit routes A & B

Table 3-1 Potential Bicycle Trail, Path, and Route System Connections

Point of Connection	Facility Type	Sheet number*	Purpose
Hernandez/Machado Way	Class I (e)	1	Neighborhood connection to Hillcrest area
Cirby Hills Townhomes	Class I (p)	1	Neighborhood connection to residential community
Windscape Apartments	Class I (p)	1	Neighborhood connection to residential community
Marlin Drive	Class I/II (e)	2	Connection to Eastwood Park, Cirby Side neighborhood and Class II bike lane on Orlando Avenue, which connects to the Louis/Orlando transit station
Tina Way	Footbridge (e)	2	Connection to residential areas along Coloma Way
Sunrise Avenue	Class I (p)	3	Potential connection to Sunrise Avenue business district and Roseville Transit routes A, B, C, & F
Meadow Gate Drive	Class I/III (p)	3	Potential connection to residential neighborhood
Oakridge	Class III (e)	4	Connection to Meadow Oaks, Sierra Gardens and Cirby Ranch areas
Woodlake Lane	Class I (e)	4	Connections to Eich Middle School and Meadow Oaks area
Eich/Sierra Gardens Drive	Class I (e)	5	Connection to middle school and Sierra Gardens neighborhood
Meadowlark Lane	Class I (e)	5	Connection to Maidu Park and Sierra Gardens neighborhood
Rocky Ridge Drive	Class I/II	6	On-street and off-street connection to Maidu Park, including park-n-ride lot, Roseville Transit Routes C & F, and Maidu/South Cirby neighborhoods
Champion Oaks/N. Cirby	Class III (e)	7	On-street connection to Maidu Park and Maidu/South Cirby areas
W. Colonial Parkway	Class III (p)	7 & 8	On-street connection to Maidu/South Cirby areas
Old Auburn Way	Class I/II (p)	8	Class III connection to Citrus Heights & future Class I regional connection to American River Parkway at Beals Point (part of regional looped trail system)

Note: * See Exhibit 3-4 for an overview of the map sheet locations.

(p) = proposed; (e) = existing

Class I = Off-Street Bike Paths, located in a separate right of way, for the exclusive use of bicycles and pedestrians, with minimal cross flow by motor vehicles.

Class II = On-Street Bike Lanes, areas within paved streets that are identified by striping and signs for preferential (semi-exclusive) bicycle use.

Class III = On-Street Bike Route, on-street routes where bikes share the road with cars.

Source: City of Roseville's 2008 Bicycle Master Plan - compiled by Psomas Engineering 2013.

Access to the trail for all users would be a key element of its community value. Accessibility guidelines for trails (as defined in the Design Standards and the Americans with Disabilities Act [ADA] standards of the Advanced Notice of Proposed Rulemaking for Shared Use Paths) would be met, where feasible. Neighborhood access would be achieved from local streets crossing the trail. Each street crossing would be identified and directional signs would be placed at street intersections identifying destinations and distances along the trail and within the surrounding community.

Trailheads (i.e., parking areas with a formal trail entrance) would serve all trail users. They would provide information about the trail (e.g., maps) and may have trail user facilities like trash receptacles, information kiosks, and benches. The proposed project would include one new trailhead with accompanying parking lot at the western end of the project with driveway access from Riverside Avenue. The parking lot would include approximately 35 parking spaces.

3.1.2 Project Background

The City's 2008 Bicycle Master Plan (BMP) includes a plan for development of over 28 miles of Class I trails in Roseville, including the Dry Creek Greenway East Trail. The proposed project is identified as a priority project in the BMP, because of its potential to provide a safe, comfortable, and convenient bicycle route in an area of the City with limited existing options for bicyclists.

The City prepared the Dry Creek Greenway Planning and Feasibility Study in 2009. The study outlined the existing conditions, opportunities and constraints, alignment options, evaluation criteria, and a recommended alignment for a paved path from Riverside Avenue and Darling Way to the City limits just south of Old Auburn Road. The study also included design treatment options, cost estimates, and a phasing plan. The City Council accepted the study in 2010. The study was updated in 2013 to provide further information regarding alternative trail alignments.

During preparation of the original and updated feasibility study, the City used a community-based planning approach with an emphasis on public outreach. The public outreach efforts included establishment of a Stakeholder Representative Group (SRG) that represented a broad array of community interests. The SRG met 10 times between 2008 and 2013. The public outreach efforts also included three community meetings, an online survey and numerous neighborhood meetings. The community input received during this process informed the proposed project's design and alignment, and the community input was also considered during the formulation of the optional alignments and project alternatives presented in this EIR.

The City also identified a need for a fluvial audit to assess the potential risk to the trail because of the future trajectory of the creek and existing bank erosion. The analysis employed a processed-based geomorphic assessment which coupled desk-based analysis of historical aerials, LiDAR data, and specific stream power with a field-based fluvial audit. The fluvial audit characterized various indicators of geomorphic process (e.g., channel reach type, bank erosion, depositional sedimentary bars) as well as factors influencing channel and floodplain morphology (e.g., bank protection, sediment input, large woody debris, etc). The analysis concluded there are some areas where there could be future risks of erosion to the trail. As a result, some bank stabilization elements were added in certain areas of the proposed project (described under Exhibit 3-5, Sheet 1 Segment, Exhibit 3-10, Sheet 6 Segment, and Exhibit 3-12, Sheet 8 Segment).

3.1.3 Purpose and Need

The proposed project is identified in the City of Roseville General Plan and the BMP as an alternative for pedestrian and bicyclists to using busy City streets, as well as an important recreational amenity for residents. It also would ultimately provide an important regional connection for the greater South Placer/Sacramento area as the broader network of trails is built. Because there are currently limited options in the project vicinity for safe, comfortable, and convenient bicycle travel, the City has identified the need for development of additional separated bicycle paths. The BMP identifies Class I off-street bike paths as preferred by Roseville residents because of their alignments through areas with scenic beauty and their limited motorist interaction and crossing vehicle traffic flows. They are most often used for recreational purposes, but they are also important for commuters where they allow bicyclists to avoid high traffic volume areas, such as highway interchanges or major arterial streets.

The proposed trail would also serve as a paved, all-weather access for City maintenance crews. This would provide access to the City's sewer, water, and drainage outfalls that follow the creeks. In addition, the trail and its access points would provide creek maintenance crews with access to remove blockages within the stream channel and maintain conveyance of stormwater. The trail would also provide access for emergency service responders.

During development of the 2009 Dry Creek Greenway Planning and Feasibility Study, the following Purpose and Need Statement was drafted by the SRG and accepted by the City Council:

> "The Dry Creek Greenway East trail is envisioned as a paved, off-street trail along Dry, Cirby, and Linda Creeks that will provide residents a place for bicycling, walking, running, and dog-walking, for fun, education, recreation, health, and transportation.
>
> The Dry Creek Greenway trail is a vital component of the City of Roseville Bikeway and Trail system because it will provide a safe, comfortable, convenient, and highly connected bike route as an alternative to using City streets in an area of the City that is underserved by bicycle facilities. The Dry Creek Greenway trail will connect schools and businesses to residential neighborhoods. The trail will also provide important regional connections as it is part of a series of existing and planned paths that will form a loop around the greater South Placer/Sacramento area."

3.1.4 Project Objectives

The proposed project objectives for the Dry Creek Greenway East Trail are developed in consideration of the California Environmental Quality Act (CEQA), the City of Roseville General Plan, 2008 Bicycle Master Plan, and the 2009 Dry Creek Greenway Planning and Feasibility Study. The project objectives are as follows:

- Develop a safe and continuous trail alignment that maximizes opportunities for bicycle and pedestrian travel separate from roadway vehicle traffic by connecting neighborhoods, shopping and employment, schools, parks, transit, and other existing and planned trails, bikeways and walkways.
- Enhance access to the Dry Creek, Cirby Creek, and Linda Creek open space areas for public recreational and educational opportunities, utility maintenance, open space maintenance, and emergency response.
- Protect the natural habitat and special-status wildlife species of the Dry Creek, Cirby Creek, and Linda Creek open space areas, minimize the potential for loss of life and property because of flooding, enhance compatibility with private properties, and reduce the need for right-of-way acquisition.
- Seek the most effective and efficient balance of capital cost, operational and maintenance costs, environmental and community impacts, and public benefits.

Direct consideration of cost is not required under CEQA. However, efforts to attain this objective are part of the design process employed by the City in meeting its health, welfare and economic obligations to the citizens of Roseville.

3.1.5 Project Design Elements

The proposed multi-use trail would conform to all federal and State standards for design. These would include the American Association of State Highway and Transportation Organizations Bikeway Guide, Caltrans Highway Design Manual, Manual on Uniform Traffic Control Devices, and the Notice of Proposed Rulemaking for Design of Shared Use Paths.

TRAIL CROSS SECTION

The proposed paved, multi-use trail would conform to the City of Roseville Design Standards (Section 13 Bikeways) and other provisions of the City of Roseville Construction Standards. A typical cross-section for the proposed trail would consist of a 10-foot-wide Roller Compacted Concrete or asphalt

paved trail with two-foot shoulders on each side (one consisting of decomposed granite and one of aggregate base), for a total width of 14 feet (see Exhibit 3-3, Typical Trail Cross Section). The shoulder base would be between 4 and 8 inches. The trail may also include drainage swales on one or both shoulders, as needed. The proposed trail may be narrowed to an eight-foot wide paved section with 1- or 2-foot wide shoulders for access spurs and in "pinch-point" locations that have severe physical or environmental constraints. The narrower cross section would still support safe, two-way travel, but would limit physical disturbance where design constraints prevent implementation of the standard cross-section. The proposed trail may also be widened in areas where additional shoulder or trail width is desired to enhance user comfort and safety. In these instances, the shoulder width may be increased to between 5 and 10 feet on one side of the trail.

The profile of the trail would be set to minimize impacts to the floodplain/floodway and minimize impacts to private property and the environment. The profile would closely follow the existing topography, where feasible, to reduce the trail footprint. The profile would conform to the City of Roseville Design Standards (Section 13 Bikeways). The maximum grades would be generally five percent; in some locations where physical constraints exist, on approaches to bridges and at undercrossing locations, the grades would be increased to eight percent. Per the Design/Construction standards, the desired vertical clearance at undercrossings would be 12 feet to allow for passage of fire vehicle access. In constrained areas or where fire vehicle access is not needed, the minimum vertical clearance at undercrossings would be 9 feet.

The proposed trail would, to the extent feasible, be designed to provide maintenance and emergency access for the City Environmental Utilities Department, open space and storm water maintenance crews, and the Roseville Fire Department. It would provide a safe route for walkers, joggers, cyclists, wheelchair users, and others traveling on non-motorized vehicles to access parks and other paths.

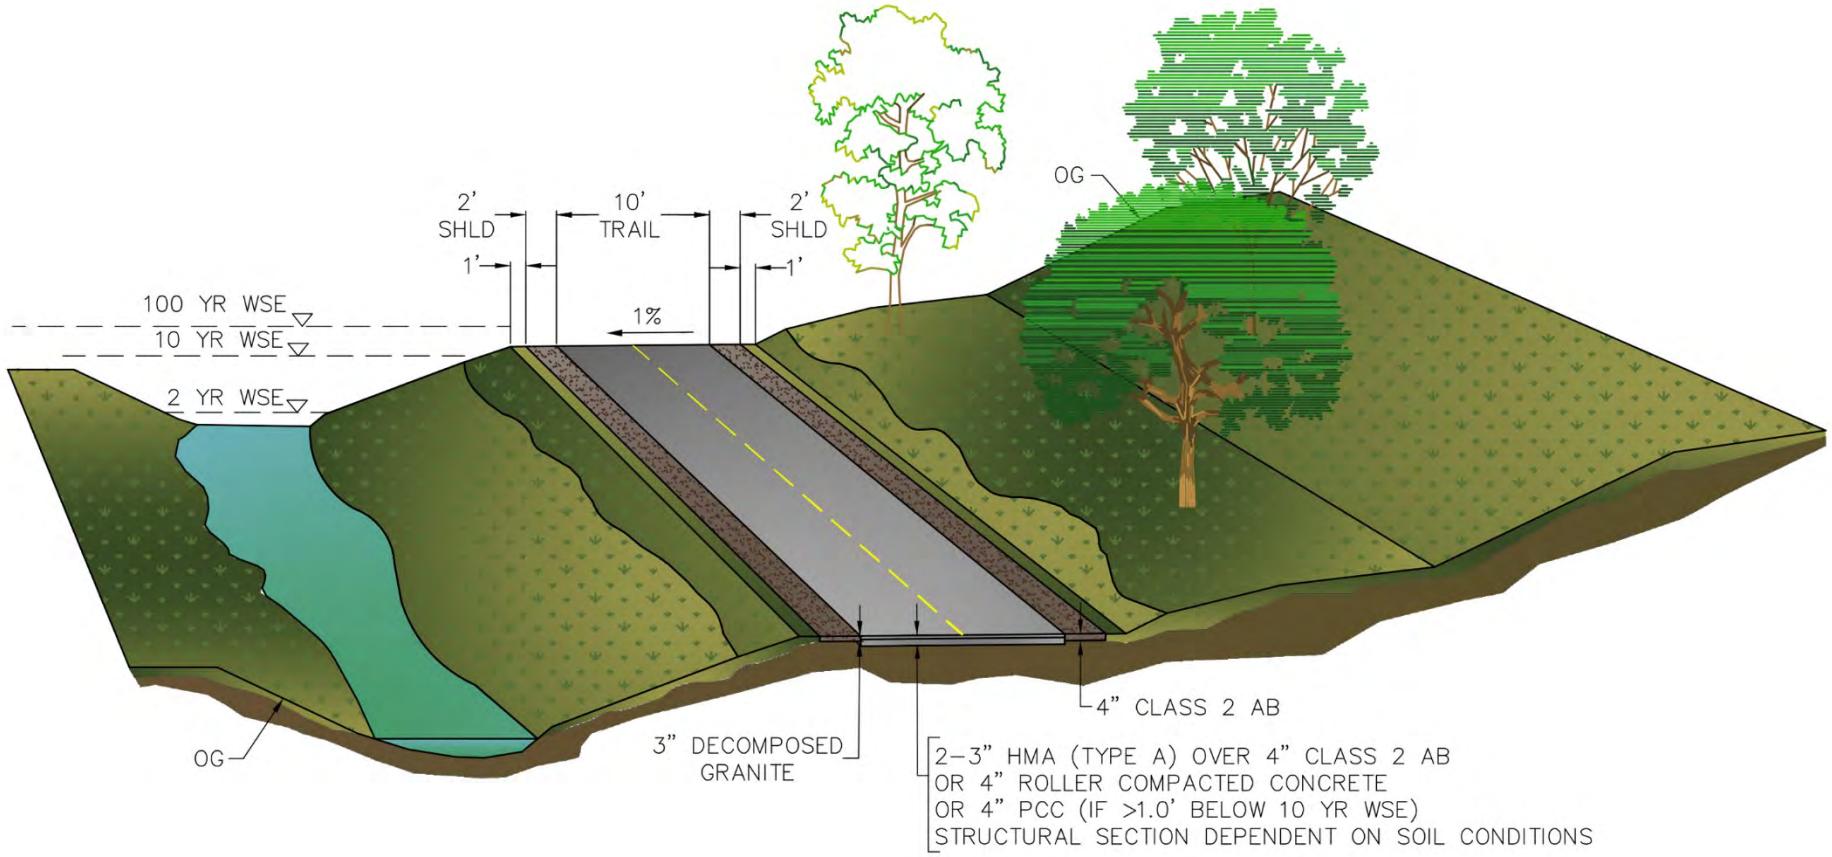
TRAIL ALIGNMENT

The proposed trail would follow the alignment described below and shown on the following exhibits. In certain locations, optional alignments are evaluated at an equal level of detail to that of the proposed project to provide an informed choice, recognizing potential impacts to the environment. These optional alignments are discussed below in subsection 3.2. The proposed alignment has been organized into 8 plan sheets numbered from west to east (see Exhibit 3-4). All existing and proposed bridges across creeks have also been numbered for ease of reference. The common design elements of the project are discussed below. Following these discussions, the trail alignment is described in greater detail by plan sheet number and name.

DESIGN TREATMENT

Several portions of the trail may be located more than 1 foot below the 10-year storm event water surface elevation, such as where the alignment passes beneath an existing bridge structure. In these places, the trail would conform to Section 13-5, Bike Paths in Floodplains, of the City's Design/Construction Standards to prevent the trail from being undermined during flood events and would include a Portland cement concrete surface. In addition, cut-off walls and retaining walls are proposed to protect the integrity of the trail.

As outlined in the City of Roseville Design Standards (City of Roseville 2013), a minimum of 2 feet of graded shoulders on each side of the trail is required. One shoulder would consist of Class 2 Aggregate Base material, and the other of decomposed granite. Where grades are four percent or greater, the decomposed granite may be stabilized with lime/fly ash or cement treatment; otherwise, Class 2 Aggregate Base material may be used for the shoulders.



Source: PSOMAS 2017

X11010072 01 002

Exhibit 3-3

Typical Trail Cross-Section

ASCENT ENVIRONMENTAL

Consistent with Section 13 of the City's Design Standards, bike paths constructed within cut-slopes would include a drainage ditch of suitable dimensions along the uphill side to intercept the hillside runoff. Bike paths constructed on top of fill slopes would include a drainage ditch of suitable dimensions along the downhill side to intercept runoff from the trail (City of Roseville 2013:5).

ROADWAY UNDERCROSSINGS

The proposed project would include undercrossings of the following roadways:

- Darling Way, east of Riverside Avenue,
- I-80, north of Cirby Way
- Sunrise Avenue, south of Coloma Way
- Rocky Ridge Drive, north of Cirby Way
- Old Auburn Road, north of South Cirby Way

With one exception, all of the roadway undercrossings would be under bridge structures where the roads cross over creeks. The exception would be Rocky Ridge Drive, which currently uses a series of box culverts to allow passage of Linda Creek flows. The trail undercrossing at Rocky Ridge Drive would either use one of the existing box culverts, or construct a new box culvert north of the existing structures, with culvert improvements designed to accommodate both trail use and high stream flows, when needed.

BRIDGE CROSSINGS

Implementation of the proposed project would include the construction or modification of up to eight bridges to provide creek crossings throughout the alignment (see Table 3-2 for bridge numbering). With the exception of Bridge #13 and Bridge #20, all new bridges are proposed to be pre-fabricated steel truss bridges supported on abutments located outside the floodway. The pre-fabricated steel bridge structures are proposed to be a weathered steel finish to blend into the natural environment. The first segment would travel across the Darling Way Bridge, which may include widening the existing street bridge by 8 feet on the north side to accommodate a 10-foot-wide, multi-use trail and full vehicle lane across the bridge. Potential widening of the Darling Way Bridge may require the addition of a row of concrete piles within the creek channel. It is anticipated that piles would also be used as foundation support for the abutments for all the new bridges located within the floodplain. With the exception of the Darling Way Bridge, all of the proposed bridges would span the creeks and no piles would be constructed within the existing creek channel. Pile driving would not be required. Piles underpinning all bridge abutments and the added row of piles in the creek channel at the Darling Street Bridge would be cast in drilled-hole piles. See Table 3-2 below for information regarding the proposed bridge work.

Proposed Bridge #2 – Dry Creek (North) (see Sheet 1 (Exhibits 3-5 and 3-14))[3] (Proposed project and Alignment Option 1C)	16 feet	110 feet	Truss height - 8'-0" includes deck thickness Hand railing – 54" high	2'-0"	Prefabricated Steel Bridge supported on abutments on piles
Proposed Bridge #3 – Dry Creek (West) (see Exhibit 3-13) (Alignment Option 1A only)	16 feet	160 feet	Truss height - 14'-0" includes deck thickness Hand railing – 54" high	2'-0"	Prefabricated Steel Bridge supported on abutments on piles
Proposed Bridge #4 – Cirby Creek (see Sheet 1 (Exhibits 3-5 and 3-14))[3] (Proposed project and Alignment Option 1C)	16 feet	160 feet	Truss height - 14'-0" includes deck thickness Hand railing – 54" high	2'-0"	Prefabricated Steel Bridge supported on abutments on piles
Proposed Bridge Rehabilitation of existing bridge connection from Marlin Drive to Tina Way (see Sheet 2 (Exhibit 3-6))[3]	5 feet (existing)	Four span bridge 129'-6" long (existing)	Railing - 4' existing chain link fence	TBD	Timber bridge on two concrete seat type abutments, two 11" diameter timber drilled-pile extensions at each bent.
Proposed Bridge #13 – Linda Creek (see Sheet 3 (Exhibit 3-7))[3]	16 feet	80 feet	Truss height – N/A 54" collapsible railing	2'-9"	Flat Slab Reinforced Concrete Bridge supported on abutments on piles
Proposed Bridge #14 – Linda Creek (see Exhibit 3-15) (Alignment Option 5A only)	16 feet	100 feet	Truss height - 8'-0" includes deck thickness Hand railing – 54" high	2'-0"	Prefabricated Steel Bridge supported on abutments on piles
Proposed Bridge #20 – Linda Creek (see Sheet 6) (Exhibit 3-10)[3]	16 feet	100 feet	Hand railing – 54" high	2'-0"	Pre-Cast I-girder/ reinforced concrete deck bridge supported on abutments on piles
Existing Bridge #21 – Strap Ravine (see Sheet 6) (Exhibit 3-10)[3]	Existing 9.5 feet Proposed 12 feet	60 feet	Existing Railcar Structure – upgrade bridge Hand railing – 54" high; or, replace with new prefabricated steel bridge	2'-0"	Increase existing bridge width to 12 feet using wood deck and install two new glulam beams with wood picket rail fence; or, new prefabricated steel bridge
Proposed Bridge #30 – Linda Creek (see Sheet 8) (Exhibit 3-12)[3]	16 feet	80 feet	Truss height – 7'-0" includes deck thickness Hand railing – 54" high	2'-0"	Prefabricated Steel Bridge supported on abutments on piles

Notes:

[1] The numbering for the proposed bridges was generated during the long planning process and originally included various bridges that have since been dismissed from further evaluation. Therefore, the bridge numbering may not be sequential.

[2] New bridges may include a cantilevered pop-out, such as for a viewing area that would increase bridge width for a short distance.

[3] New bridges construction or existing bridge rehabilitation included under the proposed project.

Source: Compiled by Psomas Engineering 2013

RETAINING WALLS

In general, the proposed trail alignment would be located within the floodplain and would be designed to minimize earthwork and impacts to the water surface elevation. As a result of existing topography, retaining walls would be required at several locations along the proposed alignment where required by existing topography and other constraints. Retaining walls are depicted in the preliminary layout drawings and are described in the alignment summaries below.

The proposed wall types would include gravity walls (reinforced concrete) and anchored walls (soil nail and tie back walls). The type and approximate extent of the currently proposed retaining walls are shown in Table 3-3. Additional walls may be required after geotechnical reports are completed and additional topographical data is available during the detailed engineering design phase of the project.

Table 3-3 Retaining Walls

Sheet #	Retaining Wall Type			
	Reinforced Concrete Area (ft^2)[1]	Tie-Back Retaining Wall (ft^2)[1]	Soil Nail Wall (ft^2)[1]	Concrete Cut-Off Wall (ft^2)
Sheet 1	2,796	833	3,259	3,054
Sheet 2	0	2,450	835	1,434
Sheet 3	268	0	0	5,832
Sheet 4	0	0	0	0
Sheet 5	0	0	0	0
Sheet 6	810	0	1,316	1,842
Sheet 7	0	0	0	0
Sheet 8	208	880	0	1,224

Note: [1] Includes architectural treatments for visually interesting surface appearance.

Source: Compiled by Psomas Engineering 2013

Where the alignment passes under existing bridge structures, tie-back retaining walls would be constructed. This would avoid impacts to the existing bridge abutments and maintain the integrity of the existing structure. Concrete cut-off walls would be proposed on steep cross slopes and where the trail alignment is adjacent to the creek to avoid the potential for undermining of the trail. Depending on the type of wall and location of these walls, an architectural facing may be applied to the walls to improve the aesthetic quality of the walls and allow them to blend more naturally into the surrounding environment.

Benches

Benches may be placed at key areas and viewpoints to provide rest areas. Benches could be simple (e.g., wood slates) or more ornate (e.g., stone, wrought iron, concrete), depending on the needs in each bench location. The benches within the 100-year floodplain would be anchored to avoid movement during high-water events.

OTHER DESIGN FEATURES

The proposed trail would generally meet current standards for a 20-mph design speed. Per state and local standards, safety railings or barriers would be constructed where walls or steep drop offs occur adjacent to the trail.

Lighting would be installed in locations where a lengthy portion of trail passes under roadways, such as the I-80 and Rocky Ridge Drive undercrossings; lighting would be considered at shorter undercrossings, such as Sunrise Avenue. Lighting could also be installed on the bridges. Lighting would be low-level, downward-facing lamps that prevent excessive nighttime light, in accordance with City standards. All lighting would be directed away from the creek to the extent possible.

During high-water events, portable signs would be used to prohibit trail user access to the trails. Bollards or other design features would be used at each access point to prohibit the unauthorized entry of motor vehicles. Per the Municipal Code, the trail would be closed from one hour after sunset until sunrise. Several access points would be provided to all the trail segments to provide alternative route options to users.

PROJECT EASEMENTS AND RIGHT-OF-WAY ACQUISITIONS

The majority of the proposed trail alignment would be located within City of Roseville-owned property. There are some locations where the proposed trail alignment would pass through private property and would require the acquisition of right-of-way or permanent easements. Residential and commercial right-of-way requirements are discussed in Section 4.9, “Land Use and Planning.”

UTILITY RELOCATION OR MODIFICATION

There are several utilities along the corridor that would require relocation or modifications during construction of the proposed trail. An existing sewer trunk line runs along the creek corridor. Where the proposed trail alignment crosses or parallels the sewer line, adjustments to the grade of the trail or manholes may be needed, or the trail alignment would be shifted slightly to avoid the manholes. Other facilities including water, telecommunications, and gas lines may also require relocation and/or adjustments of valves and manholes.

Existing gas and water lines at the Darling Way Bridge and Sunrise Avenue Bridge would also need to be relocated. If the Darling Way Bridge is widened, the existing 6-inch gas line attached to the north side of the bridge would be relocated onto the north side of the widened bridge, and the existing 12-inch water line supported on the south side of the bridge would be raised to provide better clearance for the trail users.

LANDSCAPING

The project would include landscaping, where needed or desired, to create a physical and visual separation between the trail and adjacent properties and provide scenic improvements along the trail. Vegetative buffers would be multi-purpose, creating a natural privacy screen, providing habitat for some of the wildlife that live in the creek corridor (e.g., birds, small mammals), and stabilizing the creek bank.

SIGNS

Signs for the Dry Creek Greenway East Trail would include both regulatory and wayfinding signs. Trail etiquette and other information would be available at trailheads. Interpretive signs may be located at selected locations throughout the trail corridor.

PROPOSED ALIGNMENT DESCRIPTION

Sheet 1 Segment

The proposed trail would begin at the existing Saugstad/Royer Park trail near the intersection of Riverside Avenue and Darling Way, extend to the confluence of Dry and Cirby Creeks (see Exhibit 3-5),

continue along the north side of Cirby Creek parallel to Machado Lane to a bridge crossing to the south side of Cirby Creek, and continue towards I-80. Key proposed features of the trail shown on the Sheet 1 Segment include:

- an undercrossing of Darling Way;
- potential widening of the Darling Way Bridge;
- a bridge crossing of Dry Creek (Bridge #2);
- a temporary construction staging area south of Dry Creek in vacant commercial/floodway property;
- a connection to Riverside Avenue;
- a proposed trailhead and approximately 35 parking spaces;
- bank stabilization using gabion basket wall, secondary channel excavation and implementation of erosion control measures;
- retaining walls at Darling Way Bridge undercrossing and in constrained areas adjacent to the trail;
- a bridge crossing of Cirby Creek (Bridge #4) and related retaining walls; and
- a connection to Hernandez Lane.

This segment of trail would require acquisition of right-of-way of commercial/floodway properties along Riverside Avenue, a rear portion of a residential/floodway property on the south side of Cirby Creek, and open space property on the south side of Cirby Creek. Residential and commercial right-of-way requirements are discussed and shown in Section 4.9, “Land Use and Planning.”

Sheet 2 Segment

The Sheet 2 Segment would, as shown on Exhibit 3-6, extend from the undercrossing of I-80 to Marlin Drive, turn northeast to travel along Marlin Drive, continue along the south side of Cirby Creek from Marlin Drive near Coral Drive, and then along the north side of Eastwood Park. Key proposed features of the trail segment include:

- an undercrossing of I-80;
- extension of an existing culverted drainage;
- a temporary construction staging area on City-owned property south of Marlin Drive;
- retaining walls on either side of the trail, east of the I-80 bridge undercrossing;
- widening of the existing, substandard side path along the north side of Marlin Drive to construct a separated, two-way path;
- rehabilitation of existing timber bridge that links Marlin Drive to Tina Way. Work includes RSP to protect abutments and replacement of timber running boards and Hot Mix Asphalt surfacing;
- a connection to Eastwood Park as the trail parallels the northwest boundary of Eastwood Park; and
- a culvert crossing of a drainage on the east side of Eastwood Park.

The City owns a trail easement through this area, but additional right-of-way acquisition from the undeveloped portion of a residential/floodway property may be required. On-street parking is available at Eastwood Park, making this a suitable access point for the trail.

Exhibit 3-6
Proposed Trail Alignment and Project Features - Sheet 2 Segment

Sheet 3 Segment

The Sheet 3 Segment of the proposed trail, as shown on Exhibit 3-7, would continue northeast from Eastwood Park and then turn southeast to follow the north side of Linda Creek towards Sunrise Avenue, and then extend from Sunrise Avenue to the Alta Manor senior residence on Oak Ridge Drive. Key features of the segment would include:

- a low flow bridge crossing (Bridge #13) of Linda Creek just east of the Cirby/Linda Creek confluence,
- a connector trail segment leading to the west side of Sunrise Avenue,
- access to the west side of Sunrise Avenue, and
- use of the existing bench area previously created with the City flood control project.

This segment of trail would require acquisition of right-of-way of residential and commercial property on the north side of Linda Creek and a temporary construction easement mid-way down Sundown Way. Residential and commercial right-of-way requirements and easements are discussed and shown in Section 4.9, “Land Use and Planning.”

Sheet 4 Segment

As shown on Exhibit 3-8, the Sheet 4 Segment would continue the trail from the Alta Manor senior residence to an at-grade road crossing of Oak Ridge Drive which connects the project to the existing paved paths that begin at Oak Ridge Drive. The existing path continues on City-owned property to the Woodlake Lane pedestrian bridge, then enters property owned by the Roseville City School District (with paved connections to Eich Middle School), and then re-enters City-owned open space near Sierra Gardens Drive. Key proposed features of this trail segment include:

- placement of the trail on an existing unpaved berm on the north side of Linda Creek,
- access to the Meadow Oaks and Sierra Gardens neighborhoods at Oak Ridge Drive,
- at-grade crossing of Oak Ridge Drive,
- connection to the Meadow Oaks neighborhood at Woodlake Lane via an existing footbridge, and
- connection to Eich Middle School via existing paths on property owned by the Roseville City School District.

This segment of trail would not require acquisition of right-of-way.

Sheet 5 Segment

The Sheet 5 Segment would continue from the existing path that connects Sierra Gardens Drive to Meadowlark Way. From there, it continues along the existing maintenance path behind homes along Meadowlark Way and Mallard Lane (see Exhibit 3-9). Key features would include:

- new intersection treatment where the trail leading to Sierra Gardens Drive merges with the connection to Meadowlark Way;
- drainage improvements to eliminate standing water on the existing trail during rain events;
- prior to Meadowlark Way, the proposed trail would turn south to connect to the existing unpaved maintenance path;
- enhanced shoulder width where the proposed paved path would adjoin the existing maintenance path;
- bank stabilization just downstream of the existing sewer line crossing, through use of a gabion basket wall and a rock (or log) vane to re-direct channel flow away from the bank; and
- re-construction of an unpaved access road for the purposes of maintaining an existing easement that provides access to the backyards of residential properties along Meadowlark Way and Mallard Lane.

This segment of trail would require acquisition of right-of-way from the rear yards of homes along Mallard Lane.

Sheet 6 Segment

The Sheet 6 Segment continues along the existing maintenance path behind Mallard Lane homes to an undercrossing of Rocky Ridge Drive. From there, the trail would loop around to connect to an existing 12-foot wide paved path on the east side of Rocky Ridge Drive. The trail would then cross to the south side of Linda Creek using the existing paved path and continue east on the south side of Linda Creek, south of the existing flood by-pass channel. The trail would continue on the south side of Linda Creek along an existing utility corridor and wetland preserve north of Nighthawk Circle, cross to the north side of Linda Creek at proposed bridge #20, and then cross Strap Ravine at existing bridge #21 west of Jo Court (see Exhibit 3-10). Key features would include:

- re-construction of an unpaved access road for the purposes of maintaining an existing easement that provides access to the backyards of residential properties along Mallard Lane. As the access road approaches Rocky Ridge Drive, it would also be used for trail user access to the west side of Rocky Ridge Drive;
- improvements to an existing box culvert, or installation of a new box culvert, under Rocky Ridge Drive to accommodate the trail and continue to allow for high stream flows;
- access to Maidu Park along the paved side path on Rocky Ridge Drive;
- retaining walls adjacent to the trail as it passes under Rocky Ridge Drive;
- a temporary construction staging area in the open area on the east side of Rocky Ridge Drive;
- a new bridge over Linda Creek (#20);
- improvements to the existing bridge over Strap Ravine, or replacement with a new pre-fabricated steel bridge (#21), to facilitate bicycle and pedestrian use;
- an at-grade crossing at the dead end of North Cirby Way, providing a connection to the Maidu neighborhood; and
- a temporary construction staging area at the end of North Cirby Way and in the adjacent open space west of North Cirby.

This segment of trail would require acquisition of right-of-way from the rear yards of homes along Mallard Lane as shown in Section 4.9, “Land Use and Planning.”

Proposed Trail Alignment and Project Features - Sheet 4 Segment

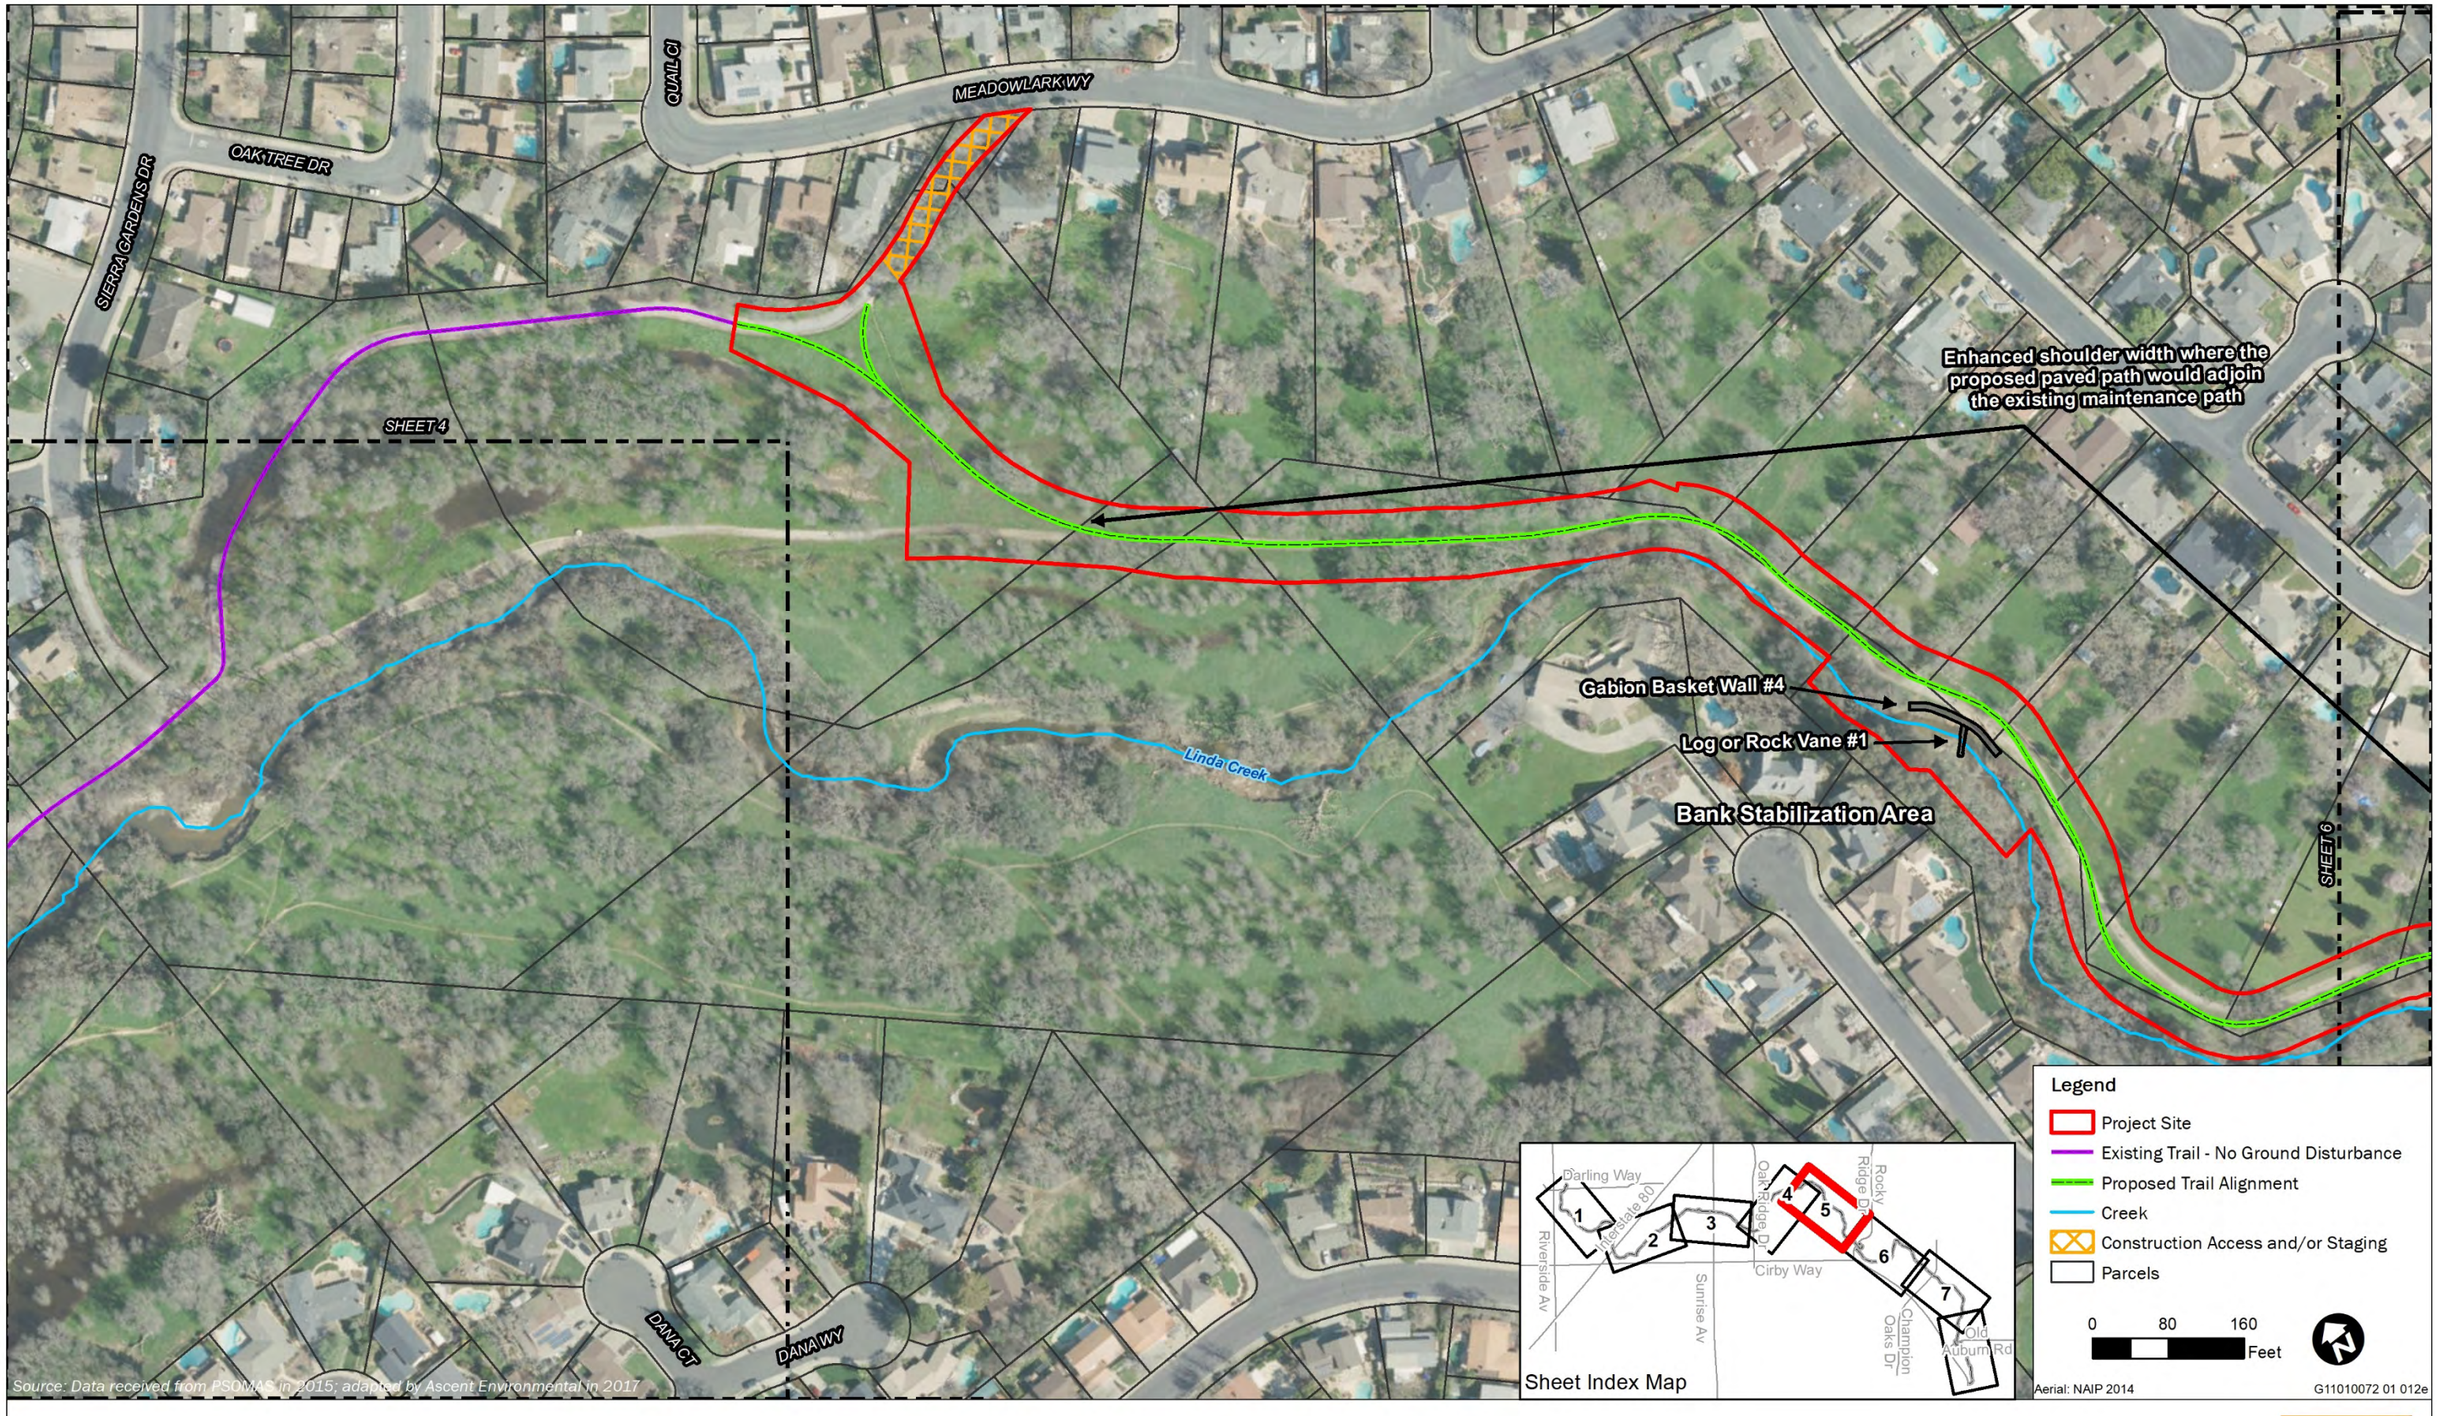

Exhibit 3-9

Proposed Trail Alignment and Project Features - Sheet 5 Segment

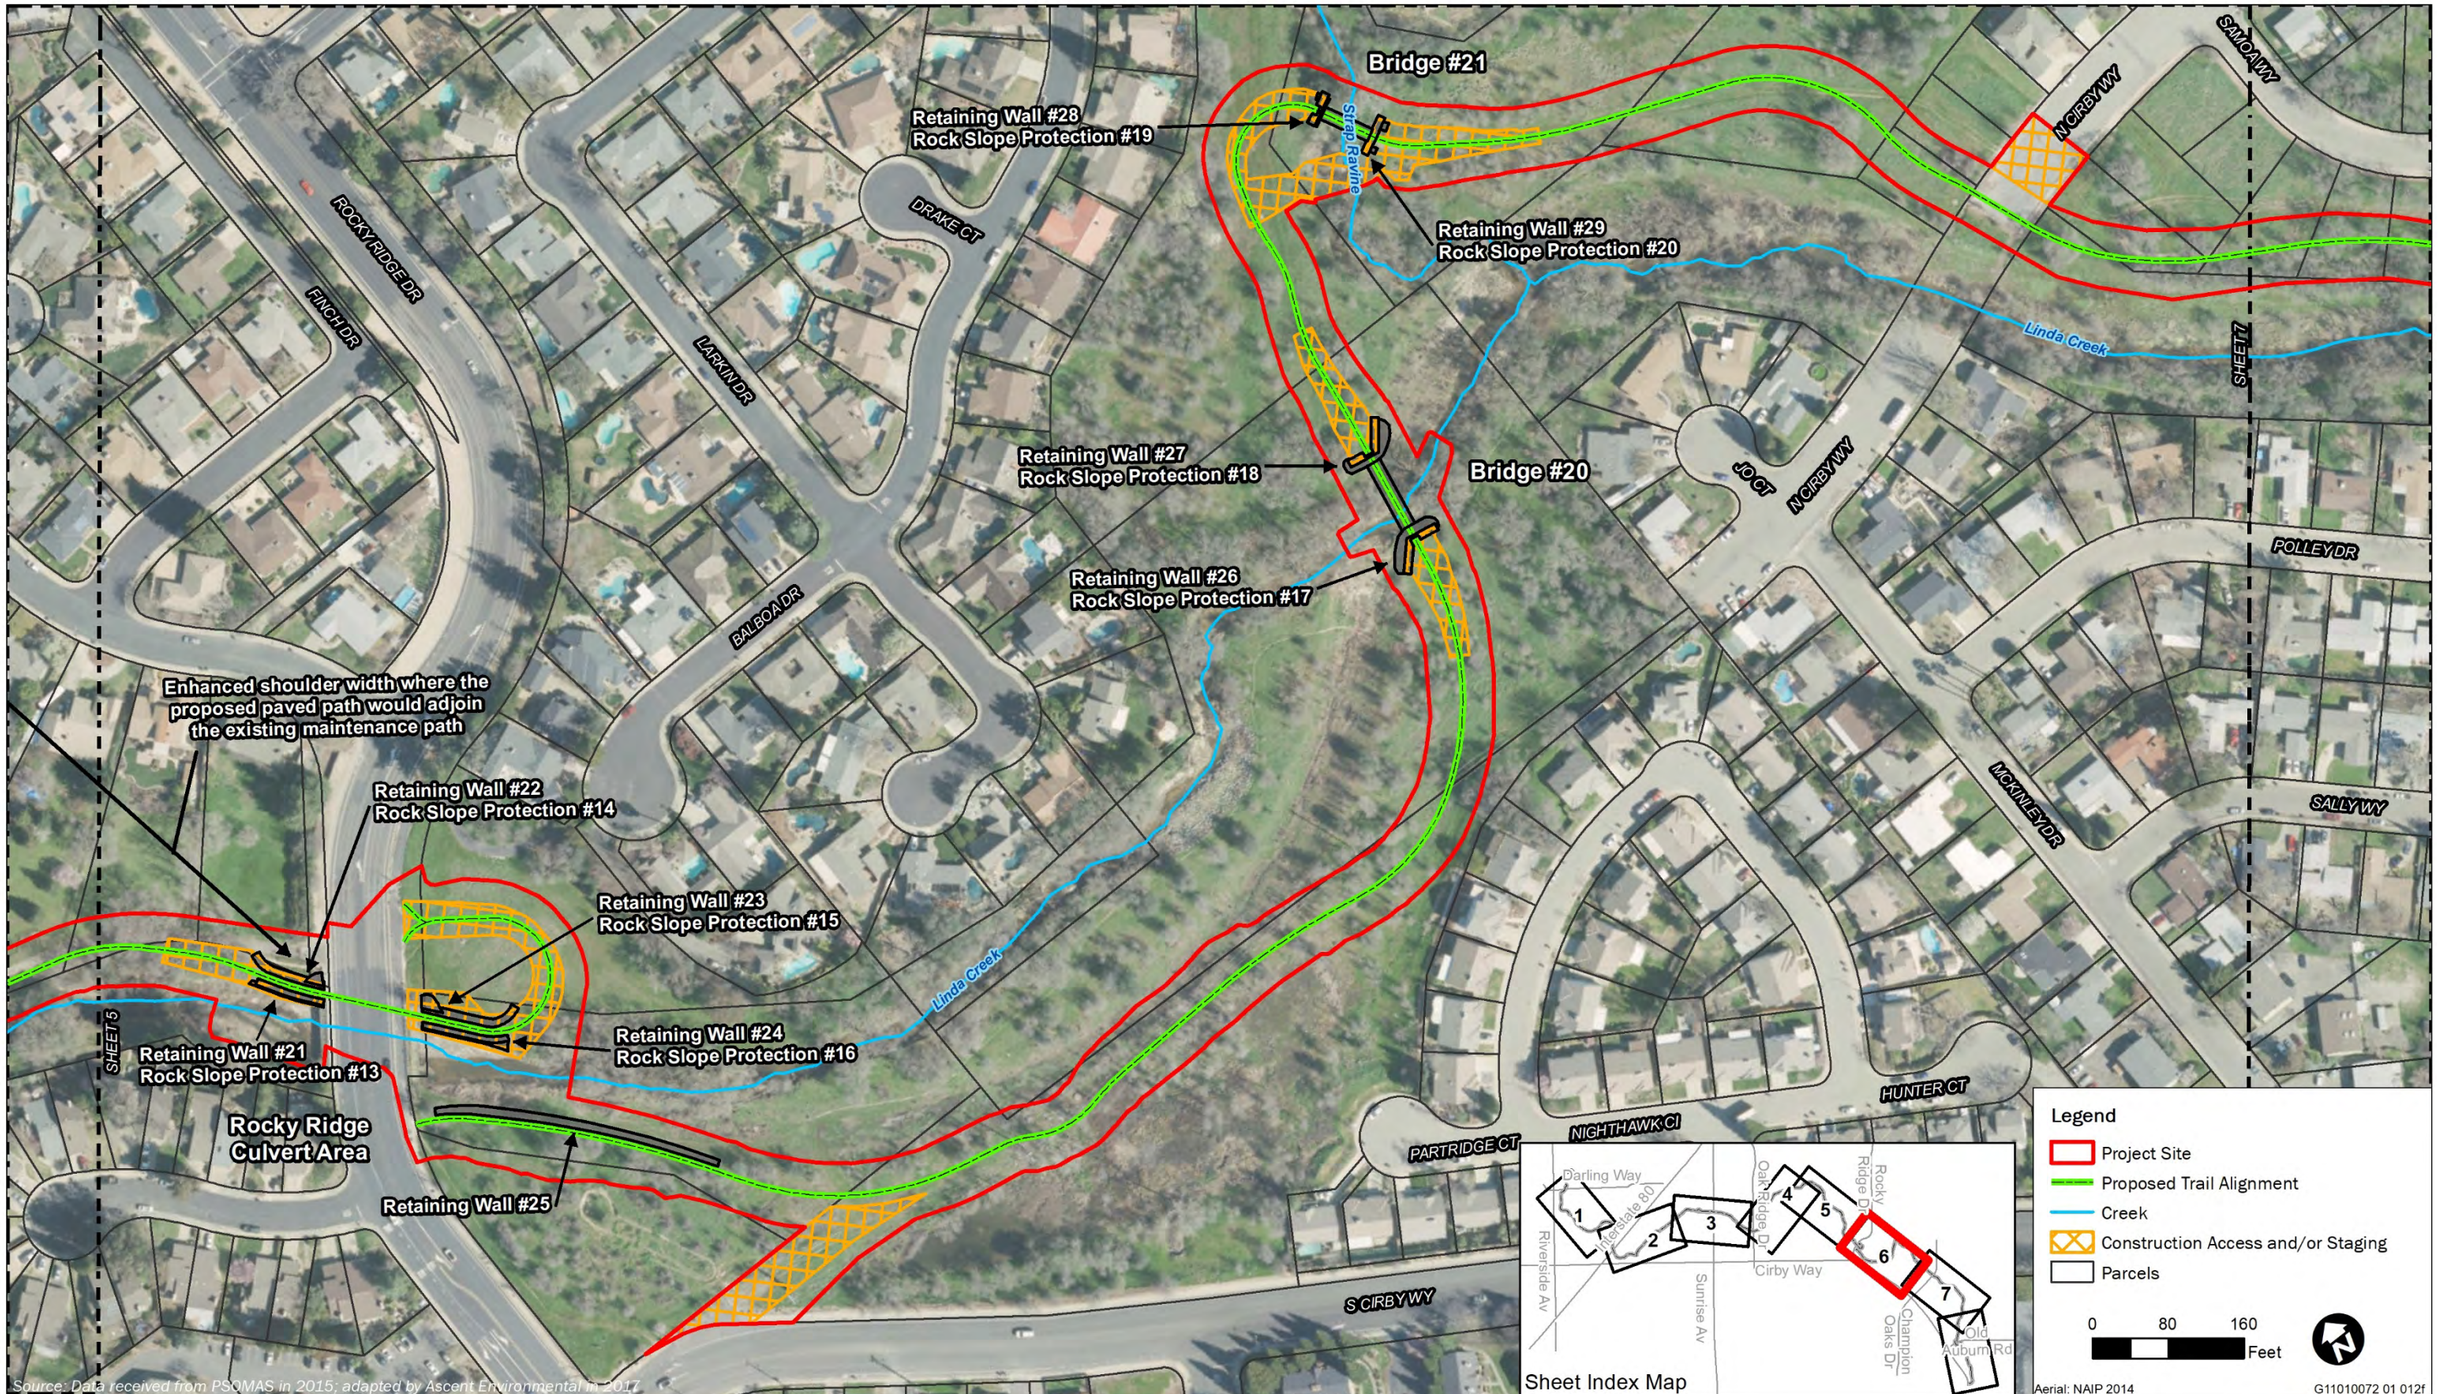

Exhibit 3-10

Proposed Trail Alignment and Project Features - Sheet 6 Segment

ASCENT ENVIRONMENTAL

Sheet 7 Segment

As shown on Exhibit 3-11, the Sheet 7 Segment continues on the north side of Linda Creek to Champion Oaks Drive and then toward West Colonial Parkway. Key proposed features include:

- a temporary construction staging area on City-owned property at the corner of Samoa Way and Champion Oaks Drive;
- an at-grade crossing of Champion Oaks Drive, providing a connection to the Maidu neighborhood;
- placement of the trail on a bank above the Linda Creek overbank/low flow channel;
- culvert crossing of a drainage parallel to Meadow Lane;
- connection to a sewer maintenance path that would also facilitate a paved connection to West Colonial Parkway;
- a temporary construction staging area on City-owned open space west of West Colonial Parkway; and
- integration with existing decomposed granite trails in the open space along West Colonial Parkway. In this area the cross-section of the paved trail may be widened to maintain a decomposed granite path.

This segment of trail would require acquisition of right-of-way from several vacant residential/floodway parcels along Samoa Way and from two vacant residential/floodway parcels along Hurst Way. The City Flood Control Project of 1999 required a permit from the US Army Corps of Engineers (USACE). The USACE permit included a number of measures, including dedication of conservation easements on certain parcels in the Hurst Way/West Colonial Parkway area that are proposed for use by the proposed project, and mitigation plantings that may be affected by the proposed project. The conservation easements have not yet been recorded because property purchases pursuant to the Flood Control Project permit are still underway. Upon completion of the property purchases, under this separate project the City will work with USACE to dedicate a conservation easement or alternative restrictions for use of these parcels. It is anticipated that the proposed project would be a permitted use, consistent with City zoning and land use regulations for other open space areas. If the multi-use trail construction is anticipated to impact any previously planted Flood Control Project mitigation plantings, then the City would need to obtain prior approval from USACE through a USACE permit process.

Sheet 8 Segment

The Sheet 8 Segment continues on the north side of Linda Creek from West Colonial Parkway toward Old Auburn Road to a connection with Spahn Ranch Road at the Roseville City limits as shown on Exhibit 3-12. It then continues along the southwest side of Spahn Ranch Road to a connection with Old Auburn Road. Key features would include:

- trail alignment on the unpaved graded area adjacent to the flood wall and behind the residential properties on West Colonial Parkway,
- an undercrossing of Old Auburn Road,
- connections to the west and east sides of Old Auburn Road,
- bank stabilization through use of a gabion basket wall,
- a temporary construction staging area on City-owned property east of Old Auburn Road,
- a bridge crossing of Linda Creek (Bridge #30), and
- a connection to Old Auburn Road at the south City limits.

This segment of trail would not require acquisition of right-of-way.

DEVELOPING TRAIL THEMES

A design theme is important for any trail system. A theme can create a unique and enriching experience for the trail user, and help strengthen the community's identity around the Dry Creek area.

The Dry Creek Greenway East Trail would be designed around a theme that blends with the existing cultural and geologic history present in the area. Key elements of this theme could include:

- interpretation of the role of Dry Creek corridor in supporting Native American residents and the early historic development of the area,
- interpretation of the values and importance of Dry Creek corridor fisheries and natural resources,
- references to cultural/historical/Native American themes, and
- references to the local geological features as a design element on the trail in the form of retaining walls and bollards.

CONSTRUCTION STAGING AREAS

As noted in the alignment descriptions and shown on the 8 plan sheets, the proposed project would include construction staging areas where equipment would be temporarily stored during project construction. The construction staging areas would occur within the City's existing right-of-way or on property acquired by the City for the permanent trail alignment or temporary construction use. Residential and commercial right-of-way and easement requirements are discussed in Section 4.9, "Land Use and Planning."

As described above, construction of the proposed multi-use trail would require removal of vegetation and existing features, grading, placement of aggregate base material, construction of five roadway undercrossings, construction or modification of up to eight bridges, and approximately 27,000 square feet of retaining walls.

CONSTRUCTION EQUIPMENT AND METHODS

Construction equipment would include graders, loaders/backhoes, excavators, vibratory rollers/compactors, pickup trucks, drill rigs, a truck mounted crane, concrete delivery trucks, water trucks, hydro-seeding trucks and various generators, and hand equipment. Required materials would include concrete, asphalt, aggregate base, decomposed granitic base, and prefabricated metal bridges. Equipment and construction material would be brought to the construction site and staged in staging areas. Topsoil would be excavated and stored during construction operations and respread over disturbed soil areas after construction activities in that area are complete. Disturbed soil areas would be revegetated through planting of native grasses, shrubs, and trees.

Temporary stream diversions (clear water diversions) would be installed for the construction of the Darling Way bridge widening, the Rocky Ridge and Old Auburn Road undercrossings, and for the three stream bank stabilization components. Clear water diversions are used in waterways to enclose a construction area and reduce sediment pollution from construction work taking place in or adjacent to water. The diversions would consist of a temporary dam constructed just upstream of the existing bridge and temporary pipes of sufficient number and size to carry stream flow from the temporary dam, through the construction site, to a point downstream. In addition to a piped diversion, the Cirby Creek bank stabilization area would also include the excavation of a secondary low-flow channel in a sand bar on the opposite side of the stream bed. This secondary channel would be vegetated with native grasses and would remain after completion of the project. After the completion of in-channel construction, the diversion dams would be removed and the stream bed restored. In-channel construction would be limited to periods of seasonal low-flow conditions. See Section 4.8, "Hydrology and Water Quality," in this Draft EIR for additional details regarding this work.

Proposed Trail Alignment and Project Features - Sheet 8 Segment

ASCENT ENVIRONMENTAL

PROJECT PHASING

A phasing plan would be developed for this project to provide a logical sequence of implementation for each identified phase. The phasing would consider aspects such as right-of-way requirements, environmental impacts, estimated capital costs and funding opportunities, and connectivity to key nodes such as schools, parks, trailheads and neighborhoods. It is estimated that the project would be constructed in up to four phases over 4 years, commencing in 2021. Phase 1 would involve construction from Darling way to Eastwood Park, Phase 2 from Eastwood Park to Oak Ridge Drive, Phase 3 from near Eich School to Rocky Ridge Drive, and Phase 4 from Rocky Ridge Drive to Spahn Ranch Road. The City was recently awarded grant funding, which may allow Phases 1 to 3 to proceed as a single project beginning in approximately 2021 or 2022.

3.2 ALIGNMENT OPTIONS

As described previously in subsection 3.1.2, "Project Background," the City prepared the Dry Creek Greenway Planning and Feasibility Study in 2009. The study outlined the existing conditions, opportunities and constraints, alignment options, evaluation criteria, and a recommended alignment for a paved multi-use trail from Riverside Avenue and Darling Way to the City limits just south of Old Auburn Road.

During the 2009 Dry Creek Greenway Planning and Feasibility Study process, two segments of the trail contained alternative alignment options that were retained for further consideration. These were referred to as Segment 1 – Hillcrest and Segment 5 – Sunrise Avenue in the feasibility study. Segment 1 is the first portion of the proposed trail between the end of the Saugstad/Royer Trail at Darling Way to the area south of Machado Lane, west of the I-80 underpass. Segment 5 is located in the Cirby Side neighborhood to the east and west of Sunrise Avenue. Segment 5 begins near the Cirby Creek/Linda Creek confluence west of Sunrise Avenue to just east of the Sunrise Avenue bridge near the Meadow Gate connection.

The feasibility study was updated in 2013 to provide further information regarding alternative trail alignment options. Each of the alignment options were evaluated using criteria developed during the 2009 Feasibility Study Phase of this project, in conjunction with the SRG, and based on the ability of each option to meet the project goals and objectives, as well as the feasibility criteria. A matrix was used to compare benefits, constraints, advantages and disadvantages of each option. It was ultimately decided to provide information that would allow the City Council to select between the proposed alignment and the feasibility study alternatives. Therefore, this EIR presents project-level CEQA analysis of both the proposed alignment and the feasibility study alternatives, referred to as alignment options in this EIR. The alignment options are further described below.

3.2.1 Alignment Option Segment 1 – Hillcrest

Two alignment options (1A and 1C), in addition to the proposed alignment, are being considered for the Hillcrest area of the proposed project. These alignment options are depicted on Exhibits 3-13 and 3-14, which show the same project area as Sheet 1, Exhibit 3-5.

ALIGNMENT OPTION 1A

Option 1A would begin at the existing terminus of the Saugstad/Royer trail, travel across Darling Way Bridge (potentially requiring widening of the bridge) and loop under the bridge on the west side of Dry Creek. The alignment would continue south for approximately 900 feet, crossing Dry Creek via Bridge

#3 to the southern bank of Cirby Creek, from where it would traverse the existing steep slope down to the existing bench located above the 2-year water surface elevation, and continue within the floodplain along the south side of Cirby Creek toward the I-80 undercrossing. This option would require a retaining wall on the south side of Cirby Creek, east of the confluence with Dry Creek. Prior to Bridge #3 (on the north side of Dry Creek), access would be provided to the proposed trail-head parking area at Riverside Avenue and to the future trail extension to Vernon Street. Alignment Option 1A would require Bridge #3, but would eliminate the need for Bridge #2 and Bridge #4.

ALIGNMENT OPTION 1C

Option 1C would begin just before the existing terminus of the Saugstad/Royer trail, travel under the bridge on the east side of Dry Creek and continue south for approximately 700 feet. A spur to the west would provide access to the proposed trail head parking and future trail extension toward Vernon Street, via Bridge # 2 over Dry Creek. The alignment option would continue along the east side of Dry Creek and Cirby Creek for approximately 400 feet before crossing Cirby Creek via Bridge #4 to the southern bank of Cirby Creek, from where it would continue within the floodplain along the south side of Cirby Creek toward the I-80 undercrossing. Alignment Option 1C would not require the widening of the Darling Way Bridge. A retaining wall on the east side of Dry Creek would be required. Similar to the proposed alignment, Alignment Option 1C would include the construction of two bridges (#2 and #4).

3.2.2 Alignment Option Segment 5 – Sunrise Avenue

One alignment option (5A), in addition to the proposed trail alignment, is being considered for the Sunrise Avenue area of the proposed project. This option is depicted on Exhibit 3-15, which shows the same project area as Sheet 3, Exhibit 3-7.

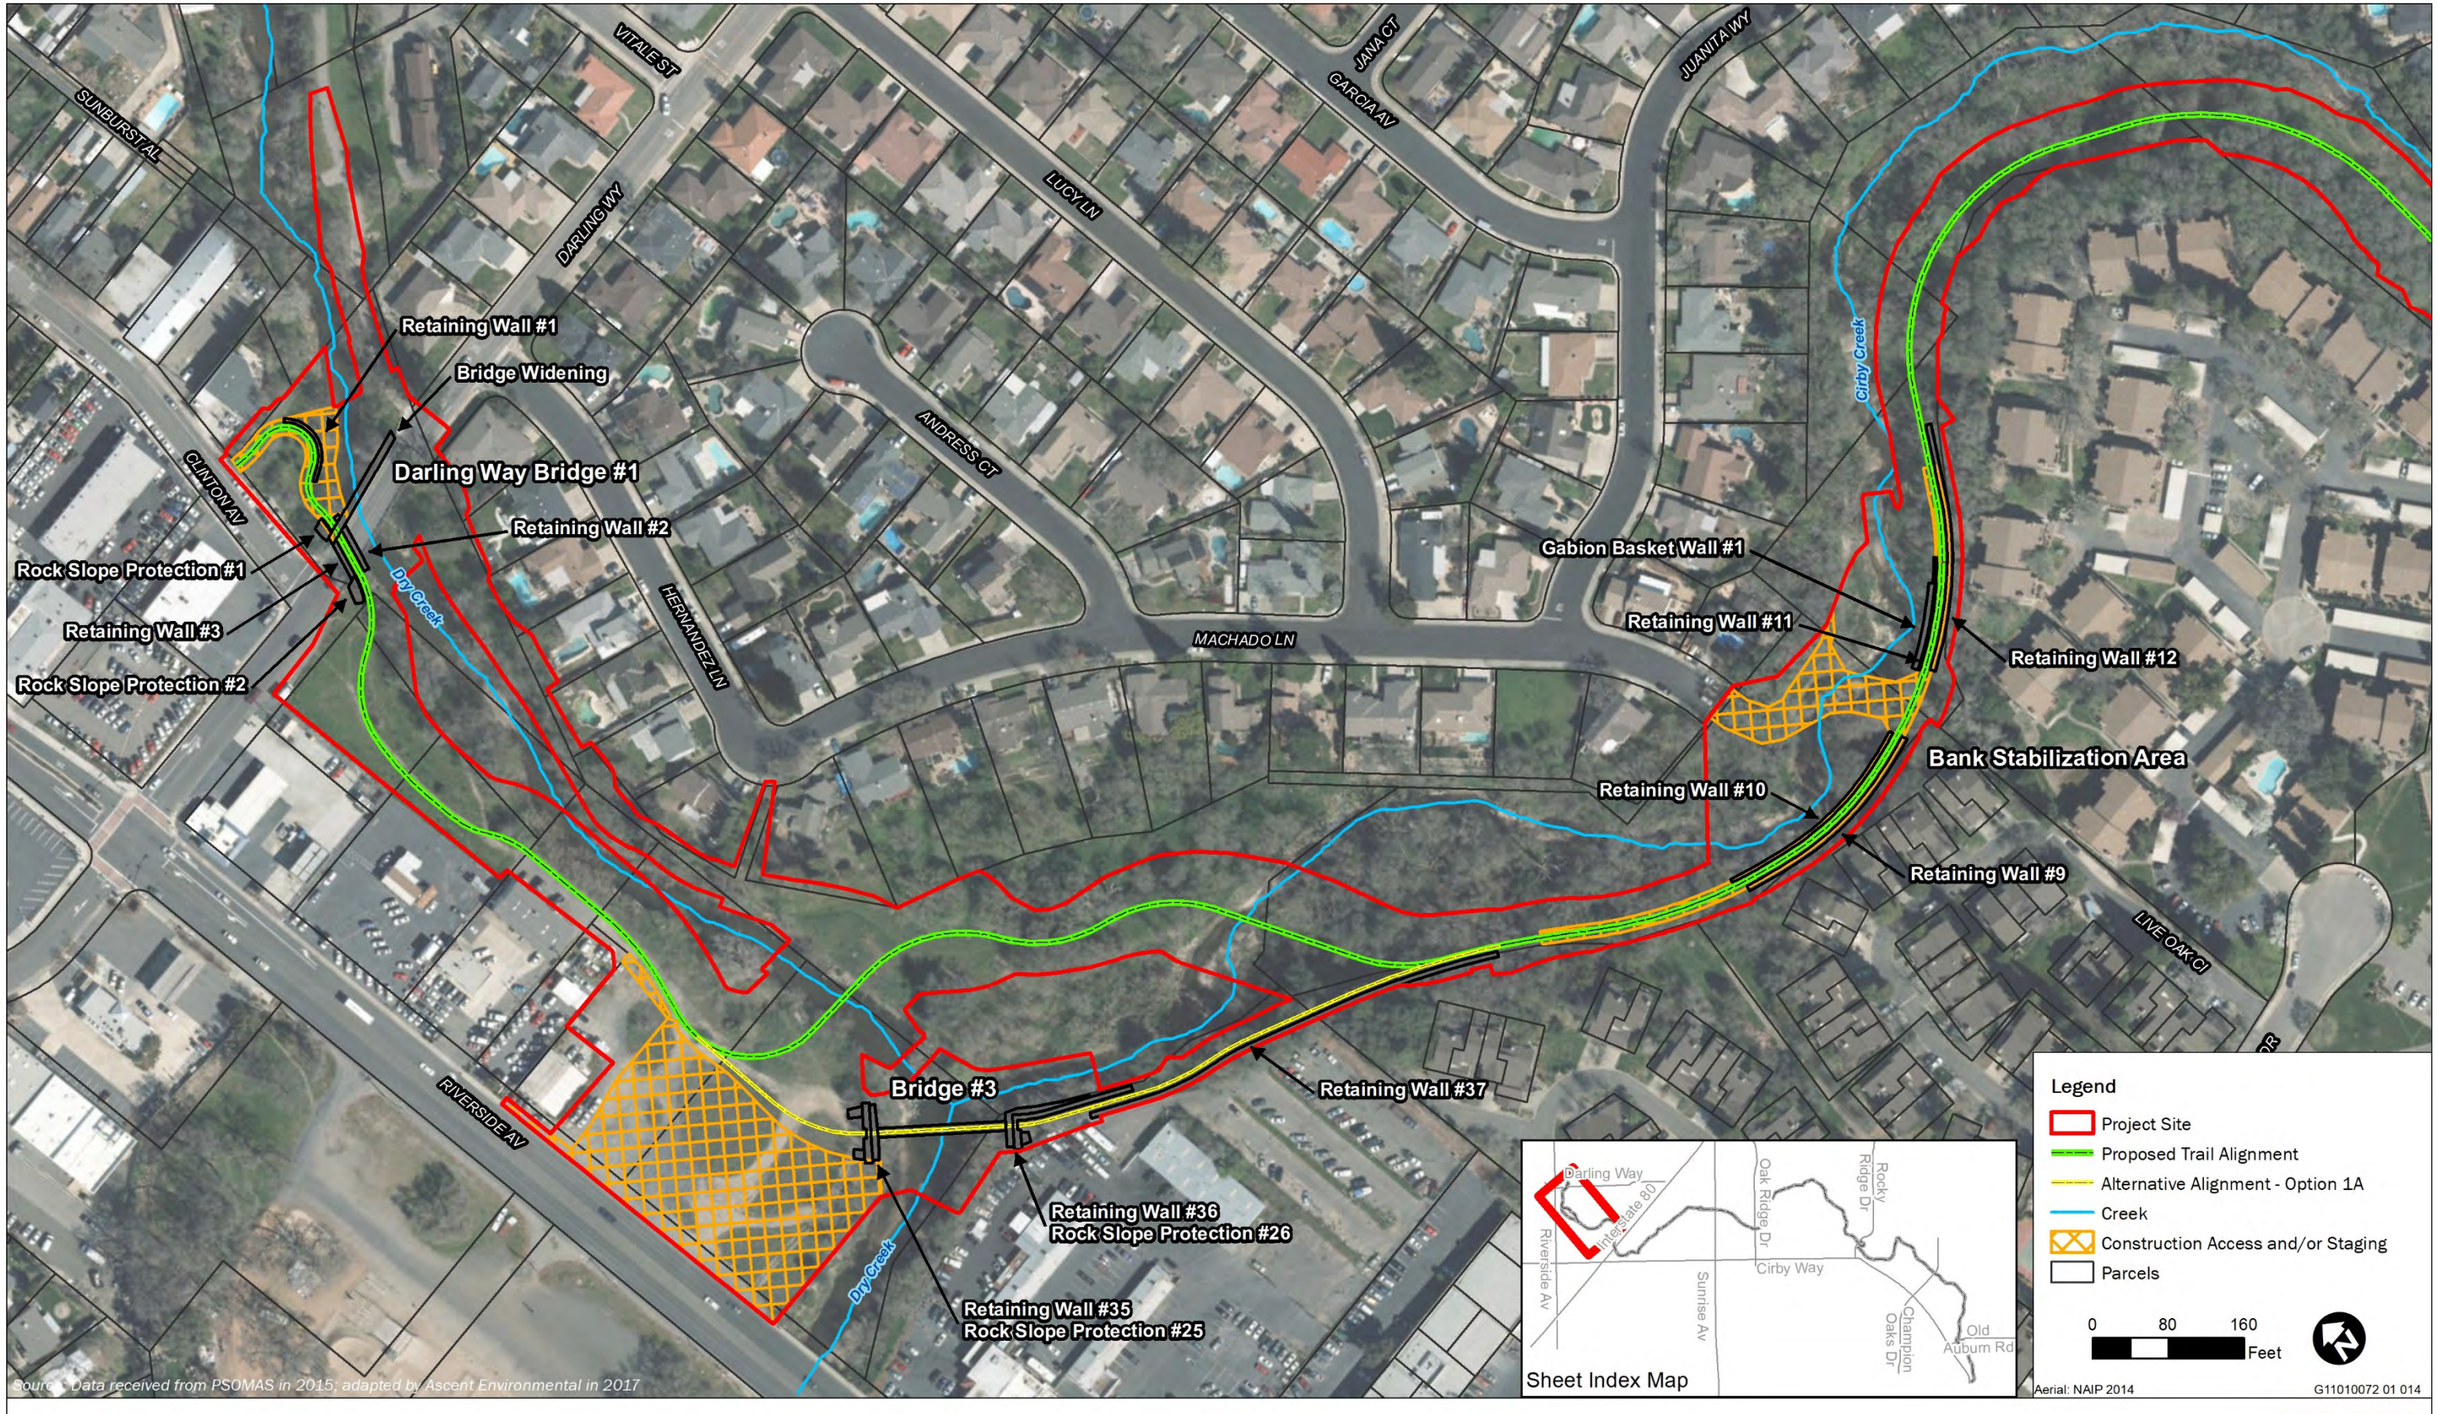
ALIGNMENT OPTION 5A

Option 5A would begin just south of the confluence of Cirby Creek and Linda Creek and remain on the south side, following the southern bank of Linda Creek within City-owned property. The trail would travel eastward and pass beneath Sunrise Avenue. Connecting ramps would provide access to both sides of Sunrise Avenue. The alignment would continue to just east of the existing drainage outfall structure at which point it would cross to the north side of Linda Creek via Bridge #14, before continuing further east toward Oak Ridge Drive. Alignment Option 5A would eliminate the need for Bridge #13.

3.3 REQUIRED CITY ACTIONS

The City of Roseville requires the following CEQA compliance and discretionary action for project approval:

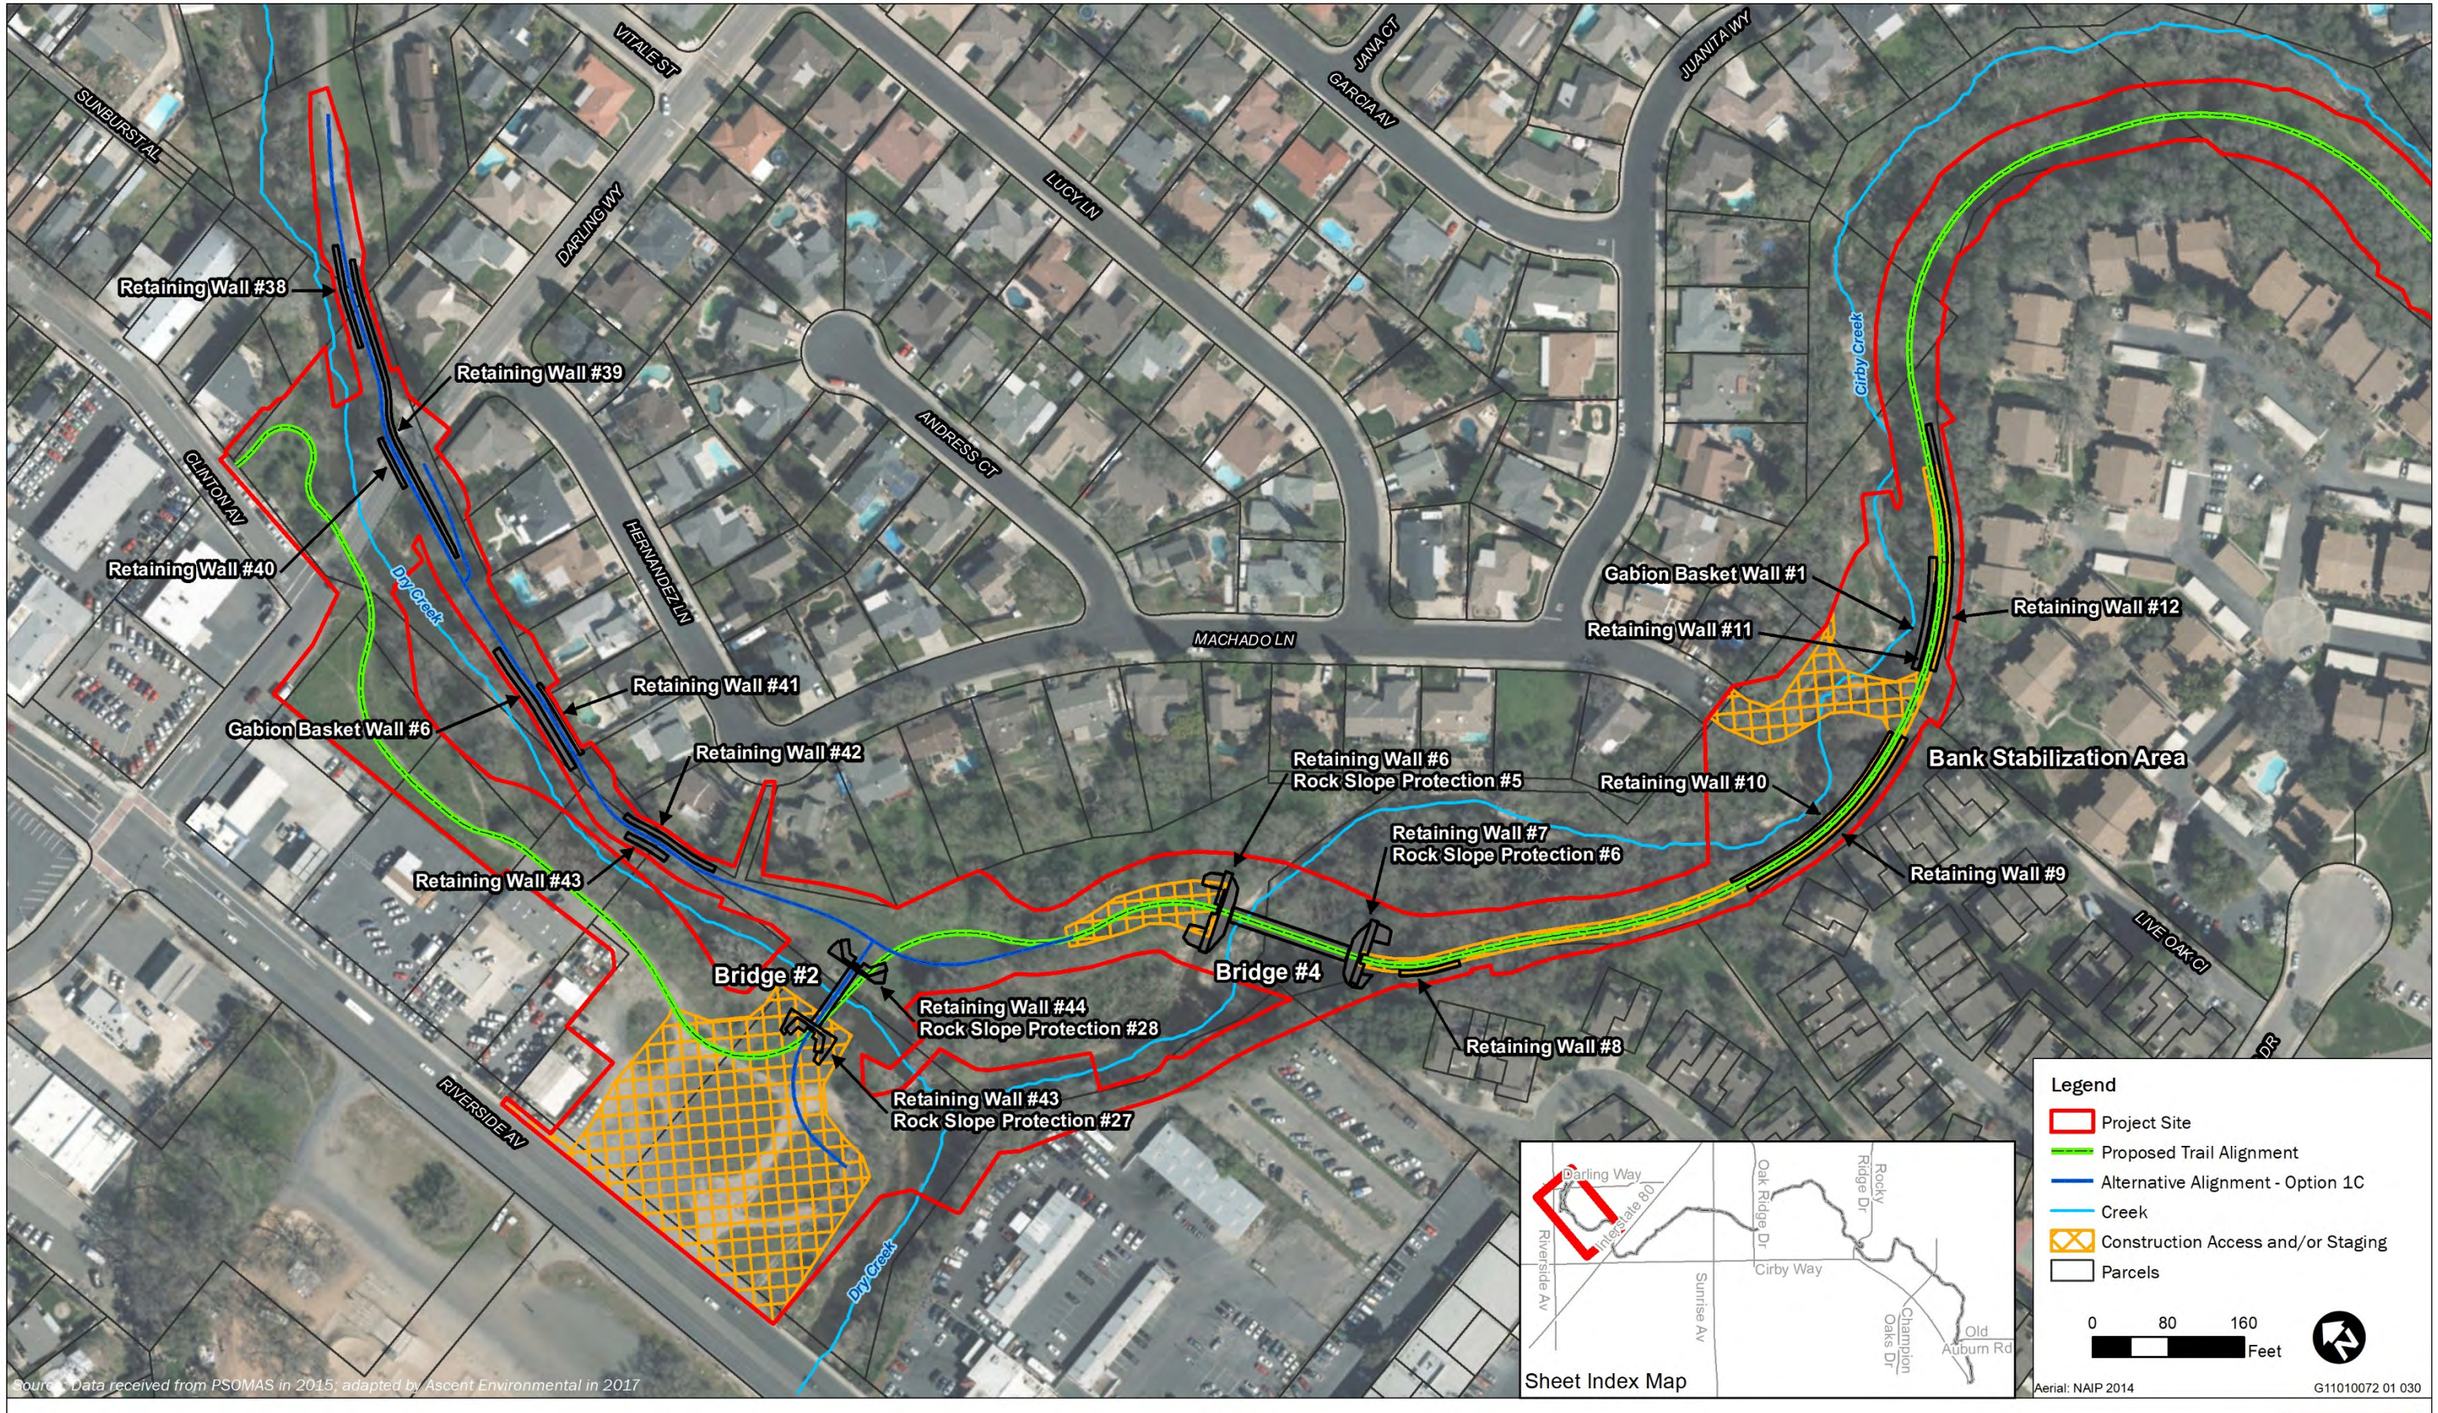
- **EIR Certification.** Before the City can approve the proposed project, the City Council must certify that the EIR was completed in compliance with the requirements of the CEQA, that the decision-making body has reviewed and considered the information in the EIR, and that the EIR reflects the independent judgment of the City of Roseville. Approval of the project also requires adoption of a Mitigation Monitoring Plan, which specifies the methods for monitoring mitigation measures required to eliminate or reduce the project's significant effects on the environment. The City would also adopt CEQA Findings of Fact regarding any significant effects on the environment and, for any effects determined to be significant and unavoidable, a Statement of Overriding Considerations, as part of project approval. Action by the City Council would follow a recommendation from the City of Roseville Transportation Commission.



Source: Data received from PSOMAS in 2015; adapted by Ascent Environmental in 2017

Exhibit 3-13

Alignment Option 1A



Source: Data received from PSOMAS in 2015; adapted by Ascent Environmental in 2017

Exhibit 3-14

Alignment Option 1C

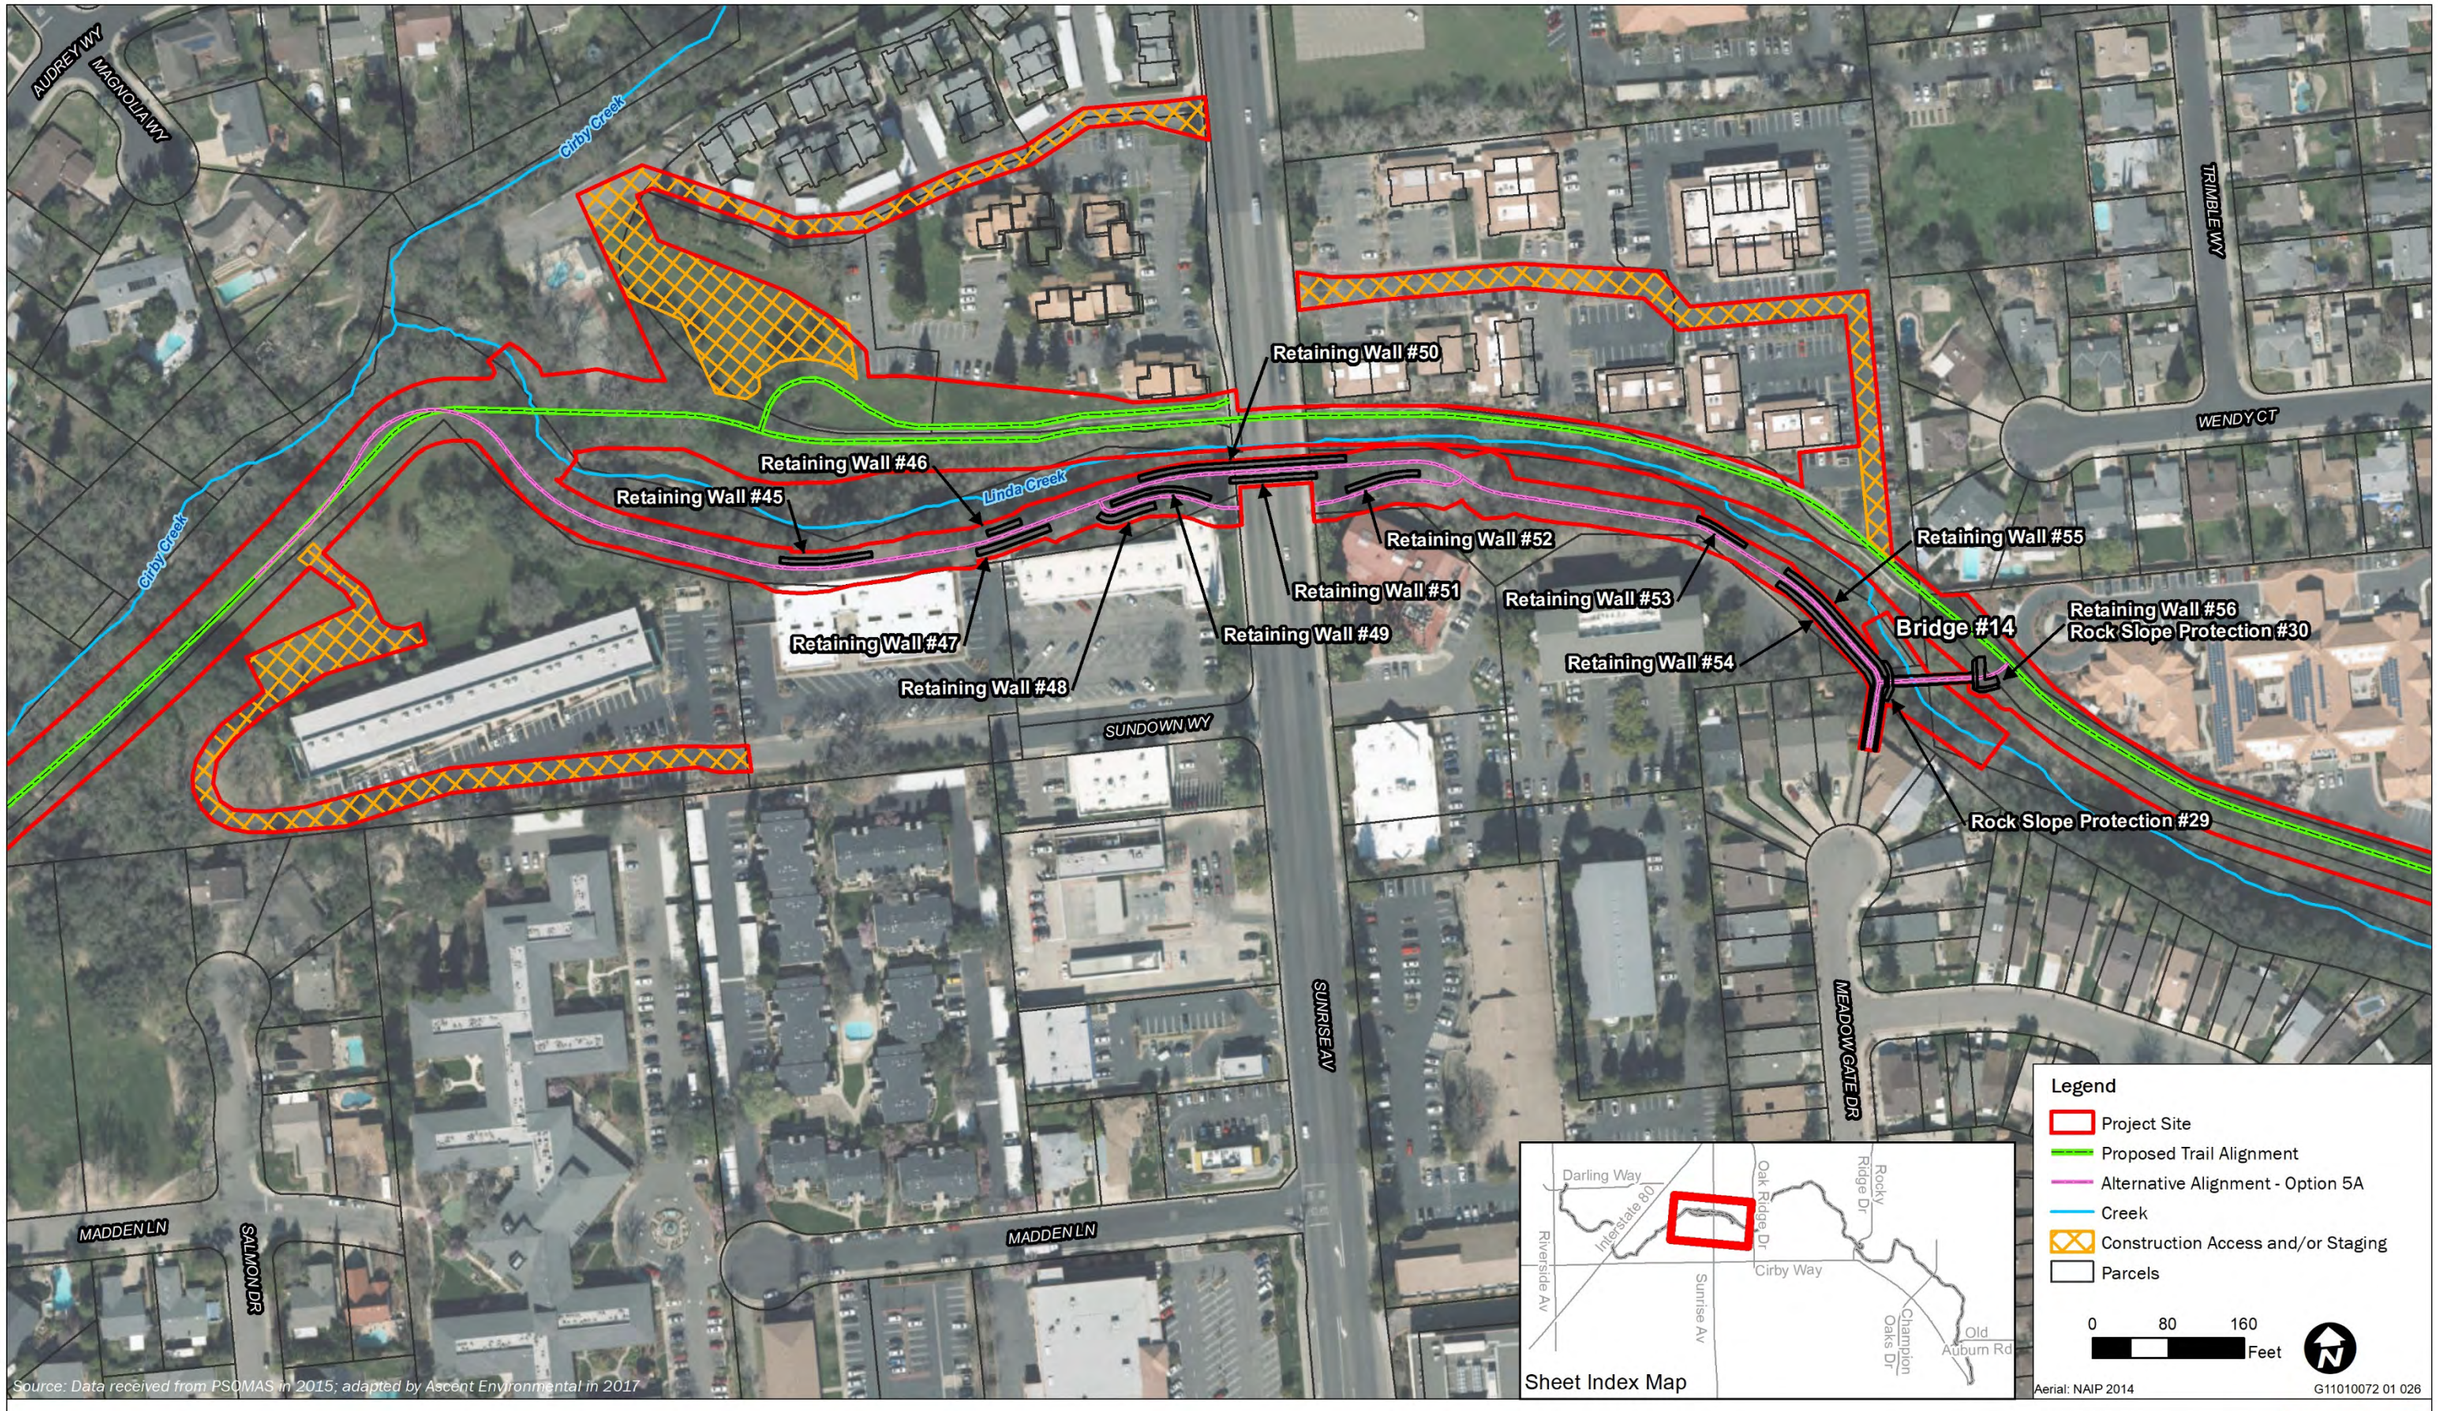


Exhibit 3-15

Alignment Option 5A

- **Trail Project Approval.** After certification of the EIR, the City will consider approval of a trail alignment from the choices between the proposed alignment and its options. If the City approves a trail alignment, the City will also authorize staff to pursue final design, permitting, right-of-way acquisition, and construction funding for phased construction. Also, if the City approves a project, it would file a Notice of Determination with the County Clerk and State Clearinghouse to conclude the CEQA process.

3.4 OTHER PERMITS AND APPROVALS

3.4.1 Responsible Agencies and Federal Agencies

Several agencies would be involved in the consideration and approval of proposed project elements. Federal, state, and regional agency approvals and permits that would be considered for the proposed project would include wetlands verification, encroachment, water quality, and streambed alteration permits. State and regional responsible agencies and federal agencies with approval authority would include:

- Regional and State Responsible Agencies:
  - California Department of Fish and Wildlife
  - Central Valley Regional Water Quality Control Board

4 ENVIRONMENTAL SETTING, IMPACTS, AND MITIGATION MEASURES

INTRODUCTION TO THE ANALYSIS

Scope of the EIR

In accordance with the State CEQA Guidelines (Section 15126.2), this Draft EIR identifies and focuses on the significant direct and indirect environmental effects of the proposed multi-use trail project, giving due consideration to both its short-term and its long-term effects. Short-term effects are generally those associated with construction, and long-term effects are generally those associated with use of the trail project. Resource topics that would not be affected by the proposed project are addressed in Chapter 2, "Summary," of this Draft EIR, including agriculture and forest resources, mineral resources, and population and housing.

This chapter addresses the following resource topics:

4.1 Aesthetics
4.2 Air Quality
4.3 Biological Resources
4.4 Cultural Resources (which includes tribal cultural resources)
4.5 Geology and Soils
4.6 Greenhouse Gas Emissions and Climate Change
4.7 Hazards and Hazardous Materials
4.8 Hydrology and Water Quality
4.9 Land Use and Planning
4.10 Noise
4.11 Public Services
4.12 Recreation
4.13 Transportation and Circulation
4.14 Utilities

Terminology Used In the EIR

This Draft EIR uses the following terminology to describe environmental effects of the project:

Less-than-Significant Impact: A project impact is considered less than significant if it would not exceed the threshold of significance and therefore would not cause a substantial adverse change in the environment. No mitigation is required for a less-than-significant impact.

Potentially Significant Impact: A potentially significant impact is an environmental effect that may cause a substantial adverse change in the environment; however, additional information is needed regarding the extent of the impact. For CEQA purposes, a potentially significant impact is treated as if it were a significant impact.

Significant Impact: A project impact is considered significant if it results in a substantial adverse change in the physical conditions of the environment. Significant impacts are identified by the evaluation of project effects in the context of specified thresholds of significance. Mitigation measures and/or project alternatives are identified to reduce these effects to the environment, where feasible.

Significant and Unavoidable Impact: A project impact is considered significant and unavoidable if it would result in a substantial adverse change in the environment that cannot be feasibly avoided or mitigated to a less-than-significant level if the project is implemented. If a lead agency proposes to approve a project with significant unavoidable impacts, it must adopt a statement of overriding considerations to explain its actions (State CEQA Guidelines Section 15093[b]).

Cumulative Impacts: According to CEQA, "cumulative impacts refer to two or more individual effects which, when considered together, are considerable or which compound or increase other environmental impacts" (State CEQA Guidelines Section 15355). CEQA requires that cumulative impacts be discussed when the "project's incremental effect is cumulatively considerable… [or] … provide a basis for concluding that the incremental effect is not cumulatively considerable (State CEQA Guidelines Section 15130 [a])."

Mitigation Measures: Mitigation measures are identified, where feasible, to avoid, minimize, rectify, reduce, or compensate for significant or potentially significant impacts of the project, in accordance with the State CEQA Guidelines (Section 15126.4).

Format of the Environmental Analysis

Each section in Chapter 4 begins with a description of the project environmental setting and regulatory setting as it pertains to the particular resource topic. The environmental setting serves as the baseline, which provides a point of reference for assessing the environmental impacts of the proposed project and alternatives and determining the significance of those impacts. The setting description in each section is followed by an impacts and mitigation discussion. The impact and mitigation portion of each section includes impact statements, which are prefaced by a number in bold-faced type. An explanation of each impact and an analysis of its significance follow each impact statement. All mitigation measures pertinent to each individual impact follow after the impact statement and discussion. The degree to which the identified mitigation measure(s) would reduce the impact is also described.

Environmental Setting: This subsection describes the existing environmental conditions on the proposed project site and surrounding area, in accordance with State CEQA Guidelines Section 15125. The discussions of the environmental setting focus on information relevant to the resource topic under evaluation. The extent of the environmental setting area (the project study area) may differ among resources, depending on the nature of the impacts. For example, air quality impacts are assessed for the air basin, whereas cultural resource impacts are assessed for the project site only.

Regulatory Setting: This subsection presents information on the laws, regulations, plans, and policies that relate to the resource topic. Regulations originating from the local, state, and federal levels are each discussed as appropriate.

Impacts: This subsection identifies the thresholds of significance used to determine the level of significance of the environmental impacts for each resource topic, describes environmental impacts, where significant or potentially significant impacts would occur, and presents feasible mitigation measures. Key methods and assumptions used to frame and conduct the impact analysis, as well as issues or potential impacts not discussed further (such issues for which the project would have no impact), are also described.

Project impacts are organized numerically in each subsection (e.g., Impact 4.4-1, Impact 4.4-2, Impact 4.4-3, etc.). Impacts are summarized with bold-font impact title, a list of applicable policies and regulations, and the impact's level of significance. When a significant impact is identified, the levels of significance both before and after mitigation measures precede the discussion of each impact. An example of the format is shown below.

During preparation of feasibility studies beginning in 2009, alignment options were identified for two segments of the trail. In addition to the proposed project alignment, these optional alignments, identified as 1A, 1C, and 5A, are described in Chapter 3, "Project Description" and are analyzed in the Impacts portion of each resource section in Chapter 4.

Impact 4.4-X	Impact title.
Applicable Policies and Regulations	List of applicable policy names
Significance with Policies and Regulations	Proposed Project: Potentially significant Alignment Option 1A: Potentially significant Alignment Option 1C: Potentially significant Alignment Option 5A: Potentially significant
Mitigation Measures	Mitigation Measure 4.4-X (Proposed Project, Option 1A, Option 1C, Option 5A)
Significance after Mitigation	Less than significant (Proposed Project, Option 1A, Option 1C, Option 5A)

The discussion that follows the impact summary includes the substantial evidence supporting the impact analysis and significance conclusion. If necessary, mitigation measures are then recommended to reduce potentially significant or significant impacts to less-than-significant levels, as feasible, and the significance of the impact after implementation of mitigation is described. Mitigation measures are organized numerically to correspond to the impact they address. For example, Impact 4.4-1 would be mitigated with Mitigation Measure 4.4-1.

Proposed Trail Alignment
The most detailed impact discussion is presented first for the proposed alignment for each impact in Chapter 4. Then, the alignment options are explained in as much detail as needed to understand impacts. Each impact includes a discussion of the substantial evidence supporting the significance conclusion.

Alignment Option 1A
Discussion of substantial evidence supporting the impact significance conclusion for alignment option 1A.

Alignment Option 1C
Discussion of substantial evidence supporting the impact significance conclusion for alignment option 1C.

Alignment Option 5A
Discussion of substantial evidence supporting the impact significance conclusion for alignment option 5A.

4.1 AESTHETICS

4.1.1 Introduction

This section evaluates the potential changes to the existing visual characteristics of the project site and vicinity that could result from implementation of the proposed project. This analysis focuses on the change in the visual character, effects on views, visual compatibility with surrounding uses, and the potential for sensitive receptors to be disturbed by light and glare generated by the project.

No comments related to aesthetics were received during public review of the Notice of Preparation.

4.1.2 Environmental Setting

REGIONAL SETTING

The City of Roseville is in a transitional zone between the flat, open terrain of the Central Valley and the foothills of the Sierra Nevada. The gently rolling topography of the region and the distant foothills provide a backdrop and context for other elements of the visual setting.

Historically, the area had a rural character associated with regional ranching and agricultural operations. Grassland covered the hillsides and valleys, which were dotted with oak woodlands and accentuated by riparian vegetation associated with creeks and other drainage ways. Although undeveloped areas of the region are still characterized by these open grasslands, development (consisting of a variety of residential, commercial, and industrial land uses) has become a prominent component of the landscape in the City of Roseville. Where development has not completely replaced the natural setting, it has segmented natural areas, thereby increasing the aesthetic value of the remaining contiguous open spaces.

LOCAL SETTING

The trail would follow creek corridors along portions of Dry, Cirby, and Linda Creeks. The properties adjacent to the proposed alignment include a mix of residential, commercial, parks, open space and public/quasi-public uses. Flood control improvements, including floodwalls, berms, bypass channels, and bypass culverts are located along the length of the project site. Commercially-zoned properties are concentrated along Sunrise Avenue to the north and south of the project site along Linda Creek. Commercial areas are also found near the western part of the proposed alignment along Riverside Avenue between Darling Way and Cirby Way. Exhibit 4.1-1 and Exhibits 4.1-2 through 4.1-8 (Photos 1 through 7) provide representative views of the proposed trail alignment.

Natural vegetation and watercourses are distinctive features within the otherwise urban environment. The nature of the area is typified by Photo 1, although the quality of the habitat (and thereby, the general richness of the views) varies, and there are areas of the trail corridor where the built environment is more prominent and the views appear more disturbed. (See Section 4.3, “Biological Resources,” for a discussion of habitat quality.) Annual grassland occurs in open, cleared, or disturbed areas and forms the understory of mixed riparian and valley oak woodland communities. There are two groups of trees on the project site that are particularly distinctive in their scenic resource qualities: a group of oak trees located along an existing trail in the Sierra Gardens neighborhood and a group of trees along Linda Creek near Rocky Ridge Drive (see Photo 4). The trees and creek channel enhance the existing visual setting of the urban community by providing an open space corridor, natural landscape appearance, and scenes of moving water, all of which create elements of visual interest.

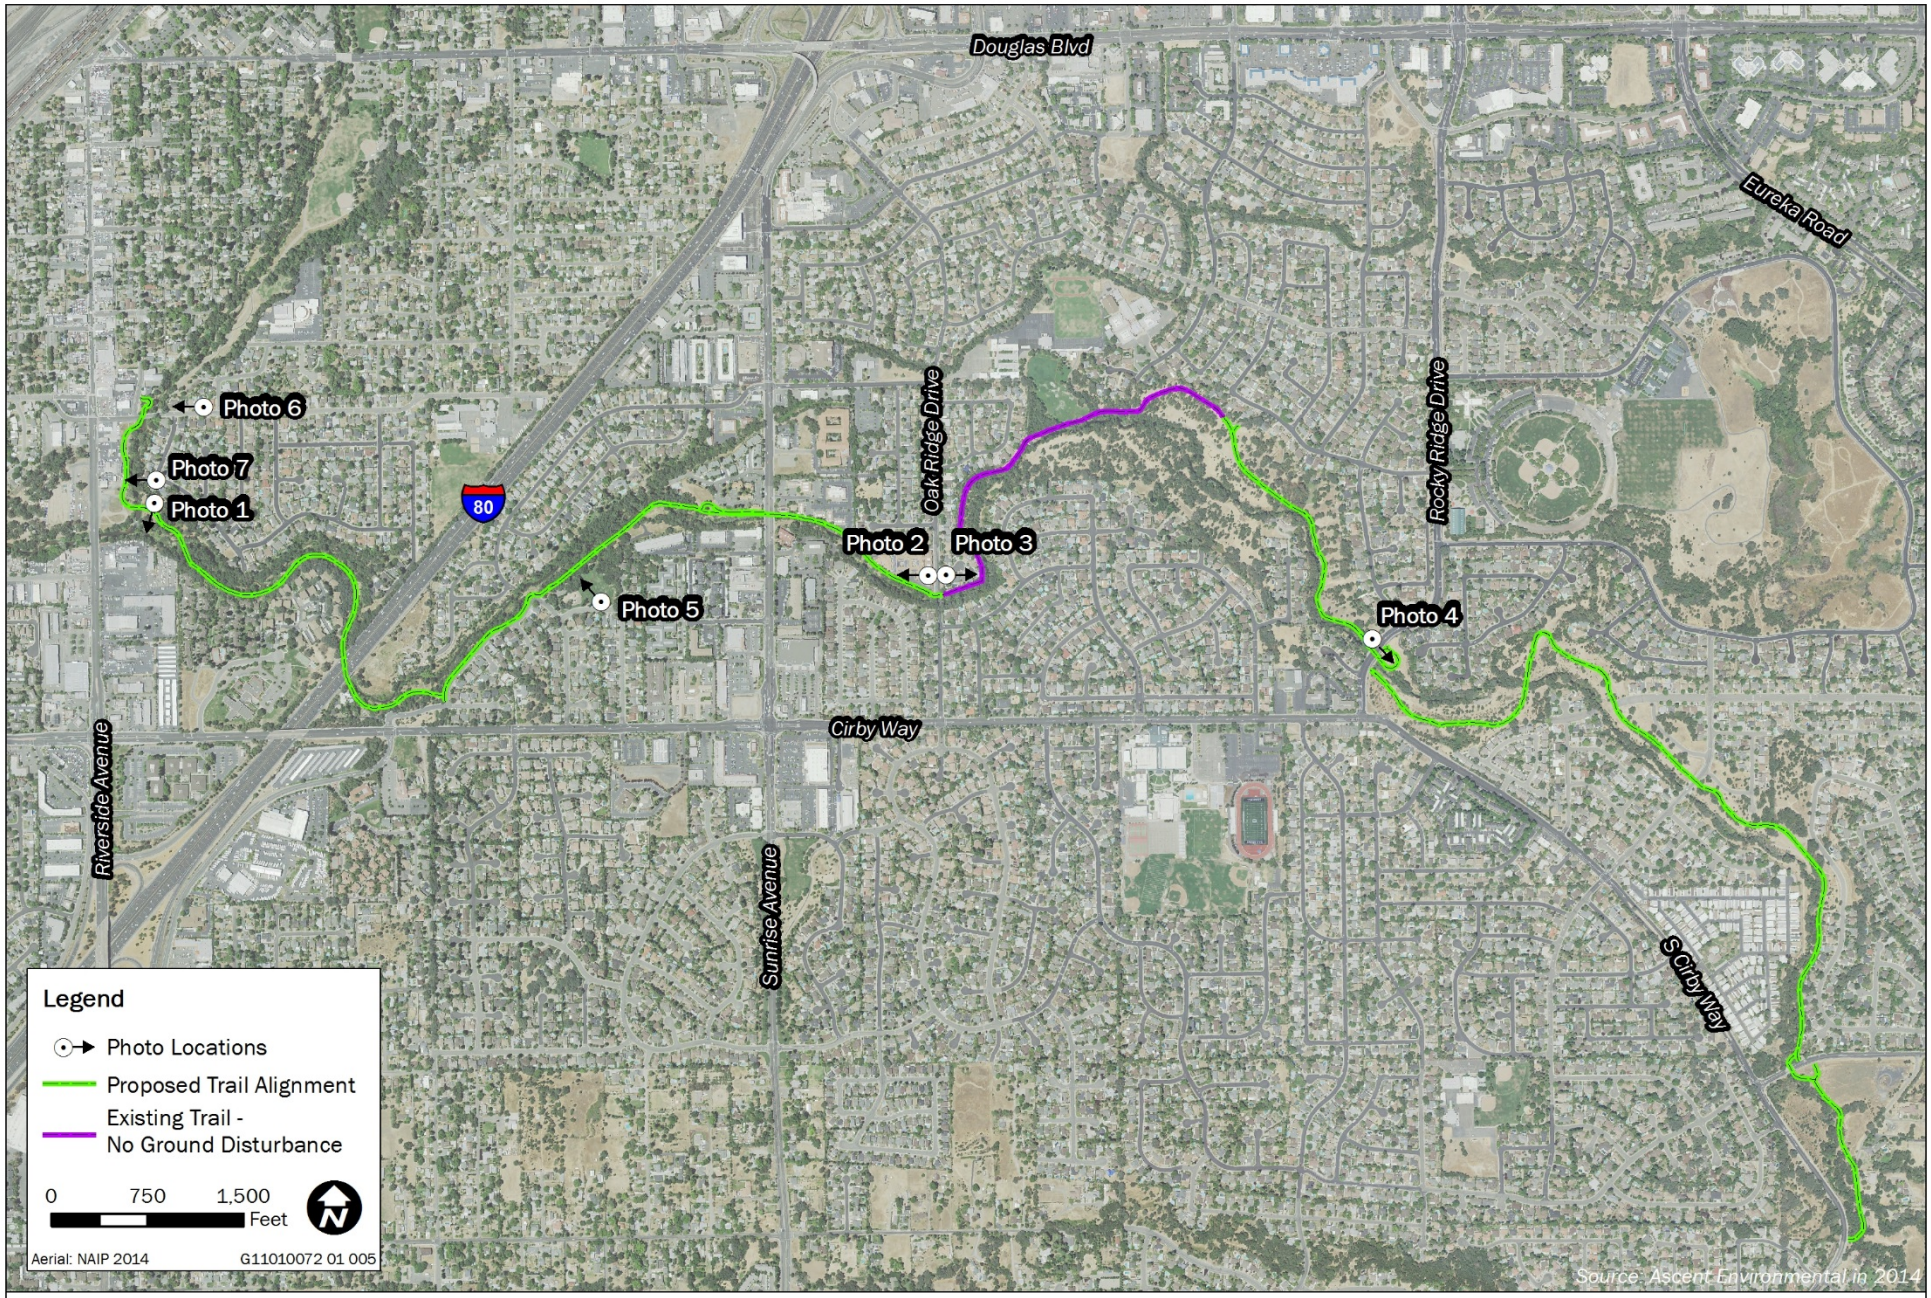

Exhibit 4.1-1

Photo Locations

ASCENT ENVIRONMENTAL

Exhibit 4.1-2 Photo 1: Dry Creek, East of Proposed Riverside Trailhead

The creek corridors currently contain segments of existing, unimproved natural surface paths and paved multi-use paths (see Photos 2, 3, and 4). Much of the corridor is used for recreation, infrastructure maintenance access, and transportation. Other notable features along the project site include the I-80 overpass, existing bridges north of Marlin Way and west of York Court, and retaining walls along the creek corridor at Sunrise Avenue. There are no scenic roads or highways, designated visual landmarks, or long-range vistas of regional importance along the project site.

Views of the Site from the Surrounding Area

The project area includes well-traveled roadways, including Interstate (I-80), Sunrise Avenue, Rocky Ridge Drive, and Old Auburn Road. Short-range views onto the project site from adjacent uses are generally dominated by oak trees and riparian vegetation. In most locations, the steep creek bank limits views of the waterway.

Public facilities, including parks, are located adjacent to the proposed alignment. Eastwood Park, located at 950 Madden Lane, is a 4-acre neighborhood park featuring a school-aged play area, covered picnic area, baseball/softball field, multi-use field, and a basketball court. Cirby Creek is generally not visible from the amenities at Eastwood Park because of a small grove of oak trees at the northern boundary of the park. Photo 5 looks across the basketball courts at Eastwood Park towards an unimproved trail, which is blocked by vegetation. Photo 6 provides a representative view of the project site from an area roadway.

Exhibit 4.1-8 Photo 7: View of Existing Trail Looking West from the Corner, of Hernandez Lane and Machado Lane

ASCENT ENVIRONMENTAL

Views from the Project Site

Views from the project site toward adjacent lands consist of riparian vegetation, houses and backyard structures (e.g., decks, sheds), and the occasional roadway undercrossing. Where the existing trail is nearer to established uses, the urban environment is more apparent (see Photo 2); while in other parts of the corridor views from the project site are more restricted by the existing vegetation. In general, individuals recreating on the project site experience views with a natural aesthetic (see Photo 7). Photo 4 depicts the view from the existing trail near the intersection with Rocky Ridge Drive. The foreground and background are dominated by vegetation, including native oak trees, that draws attention from the boulevard in the middleground.

Light and Glare Conditions

There are few sources of light and glare in the project area. There are existing street lights where the proposed trail crosses roadways, and there is some light trespass associated with interior and exterior lighting at existing residences and commercial buildings. These existing structures may also contribute some glare because of reflective surfaces, such as windows.

4.1.3 Regulatory Setting

Applicable local policies designed to protect the aesthetic resources are summarized below.

FEDERAL

There are no federal laws that pertain to aesthetic resources that are applicable to the proposed project.

STATE

There are no state laws that pertain to aesthetic resources that are applicable to the proposed project.

LOCAL

City of Roseville General Plan

The City of Roseville General Plan does not identify any scenic roadways or corridors requiring special consideration. Further, the General Plan does not have policies or elements that specifically address protection of aesthetic or visual resources. The General Plan, through the “Community Design” section of the Land Use Element, promotes high-quality design, distinctive development or community character, public artistic expression, and incorporation or preservation of natural features. Pursuant to the general plan, the City has adopted Community Design Guidelines that set development standards for site design, architecture, lighting, signs, and artwork.

City of Roseville Tree Preservation Ordinance

Chapter 19.66 of the zoning ordinance (the Tree Preservation Ordinance) establishes requirements for the preservation of native oak trees. The natural scenic beauty of oak trees is cited as one of the reasons for the ordinance. The ordinance regulates activities that may affect native oak trees in an effort to preserve them. The ordinance recommends avoiding impacts and removal of native oaks where feasible. In instances where native oaks are impacted or removed, the ordinance provides standards for mitigating the impact. City projects, including bikeway projects, are not required to obtain a Tree Permit but are otherwise required to implement the ordinance.

City of Roseville Design Standards

Section 13, Bikeways, of the City of Roseville Design Standards provides criteria intended to provide safe use of bikeways. The standards do not require illumination of bike trails, but indicate that lighting may be required, at the City's discretion, through underpasses, tunnels, roadway intersections, mid-block crossings, and whenever security could be an issue. Per the bikeway standards, all lighting must be designed with appropriate shielding to prevent unnecessary glare and be resistant to vandalism.

4.1.4 Impacts

METHODS OF ANALYSIS

Potential impacts on aesthetic resources that could result from project implementation were determined through a professionally-accepted practice that considers three primary factors: (a) the existing scenic quality of an area; (b) the level of viewer exposure and concern regarding visual change; and (c) the level of actual visual change caused by the project as seen by a given viewer group. The sensitivity of the viewer, or viewer concern, is based on such factors as: the visibility of resources in the landscape, proximity of the viewers to the visual resource, elevation of the viewers in relation to the visual resource, frequency and duration of views, numbers of viewers, and types and expectations of individuals and viewer groups. Viewer groups are differentiated by physical factors that modify perception. For trail projects, a distinction can be made between three basic groups, passers-by (motorists and passengers in cars or buses), recreationists (walkers/users of the creek corridors and adjacent recreation sites), and residents (those home occupants who view the trail from nearby areas). These groups are further differentiated by the activities they are engaged in. Activities such as commuting or working can distract the observer from the visual environment. On the other hand, activities such as walking, biking, or relaxing can heighten awareness of scenic surroundings. Once overall visual sensitivity is established (based on existing visual quality, viewer exposure, and viewer concern), these factors are then considered together with the level of expected change in basic visual attributes such as form, line, color, and texture as a result of the proposed project. Thus, a substantial adverse effect can occur when viewers with high levels of overall visual sensitivity (i.e., high viewer concern and visual exposure, in settings of high existing visual quality) encounter high levels of visual change or scenic view obstruction as a result of a project.

This analysis takes into consideration the following features that are included in the project:

- All new bridges are proposed to be pre-fabricated steel truss bridges that would have a weathered steel finish to blend into the natural environment and not cause glare.
- To the maximum extent feasible, native oak trees would be avoided. Where avoidance is not feasible, the following protection measures would be implemented to protect oak woodlands and associated native trees from project related impacts:
  - Temporary protective fencing would be installed at least 1 foot outside the dripline of the native oak tree before initiating construction to avoid damage to the tree canopy and root system. A circle with a radius measurement from the trunk of the tree to the tip of its longest limb plus one foot would constitute the dripline radius protection area for each tree. Limbs must not be cut back to change the dripline. The area beneath the dripline is a critical portion of the root zone and defines the minimum protected area of each tree. Removing limbs that make up the dripline does not change the protected area.
  - No vehicles, construction equipment, mobile home/office, supplies, materials or facilities would be driven, parked, stockpiled or located within the dripline of the native oak trees.
  - No grading would be allowed within the dripline of the protected native oak.
  - No trenching would be allowed within the dripline of the native oak tree. If it is necessary to install underground utilities within the dripline of the native oak tree, the utility line would be

bored and jacked under the supervision of a certified arborist (or by other methods such as hand tools as specified in the ordinance).

- Drainage patterns onsite would not be modified so that water collects or stands within, or is diverted across, the dripline of any native oak tree.
- If ground disturbance must occur within the protected zone of a native oak tree, the work would occur consistent with provisions of the ordinance (City of Roseville Zoning Ordinance – Tree Preservation [Chapter 19.66]).

- Where feasible, depending on detailed engineering analysis, retaining walls would take the form of gabion baskets with timber facing and root wads or willow stalks to provide additional stabilization and to provide a more natural finish.
- Lighting would only be placed in locations where the trail passes under roadways and on bridges, as a safety feature. Lighting may be installed at the trailhead parking lot and at-grade roadway crossings. In adherence with adopted City standards, all proposed lighting would be limited to the amount required to safely illuminate these undercrossings. Lights would be designed such that they do not create light that would be cast onto oncoming traffic, into the surrounding community or into surface waters. Lighting would be installed at the lowest allowable height and would be screened and directed away from sensitive uses.
- In addition, where appropriate, consideration would be given to screening the trail from existing residential and urban development, such as at the intersection of Sunrise Avenue south of Coloma Way, Oak Ridge Drive north of Rampart Drive, Rocky Ridge Drive north of Cirby Way, and Old Auburn Road north of South Cirby Way.

THRESHOLDS OF SIGNIFICANCE

Based on Appendix G of the CEQA Guidelines, the proposed project would result in a significant impact to aesthetic resources if it would:

- have a substantial adverse effect on a scenic vista;
- substantially damage scenic resources, including but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway;
- substantially degrade the visual character or quality of the site and its surroundings; or
- create a new source of substantial light or glare which would adversely affect day or nighttime views of the area.

ISSUES OR POTENTIAL IMPACTS NOT DISCUSSED FURTHER

There are no designated scenic vistas within the City of Roseville, and the construction of the proposed trail would not obstruct existing view corridors. Therefore, potential effects on scenic vistas are not discussed further.

There are no designated scenic highways within the City of Roseville. Therefore, impacts related to the damage of scenic resources within a scenic highway are not evaluated further.

IMPACT ANALYSIS

Impact 4.1-1	Substantially degrade the visual character or quality of the site and its surroundings.
Applicable Policies and Regulations	City of Roseville General Plan Land Use Element, City of Roseville Tree Preservation Ordinance
Significance with Policies and Regulations	Proposed Project: Less than significant Alignment Option 1A: Less than significant Alignment Option 1C: Less than significant Alignment Option 5A: Less than significant
Mitigation Measures	None required (Proposed Project, Option 1A, Option 1C, Option 5A)
Significance after Mitigation	Less than significant (Proposed Project, Option 1A, Option 1C, Option 5A)

Proposed Trail Alignment

Implementation of the Dry Creek Greenway East Trail would involve the installation of signs, bridges, undercrossings, and other structures as well as the paved trail. The trail would traverse open space and parks, and would be located in proximity to residences and businesses. It would result in paving segments of currently unimproved natural surface paths and the construction of up to eight bridges to provide creek crossings. The project would also include the rehabilitation and widening of two existing bridges. These improvements would be similar to the physical characteristics of the existing environment (see Exhibits 4.1-2 through 4.1-8), but may introduce pavement, structures, and recreational users into areas that are currently undeveloped, which has the potential to change the character of the private viewsheds of nearby residents and businesses.

The existing trail and open space areas on the project site provide, on the whole, moderate quality scenic resources. While the natural aesthetic is of particular value to recreationalists on the trail, the urban and industrial uses that surround the project site dominate views from most other points of public access (i.e., area roadways) and the creeks are obscured by vegetation. Viewer exposure and concern, likewise, is high for residents and recreationalists and low to moderate for passersby. Residents and recreationalists have extended, proximate exposure to the riparian areas and creeks on the project site and expect the site to have a natural character. Passersby, including motorists on roads that cross the project site, have low to moderate sensitivity to changes in the character of the site.

Construction Impacts

Trail

The proposed trail is visible from existing recreation sites, residences, businesses, and area roadways. During construction, heavy equipment would be used that is incongruent with the expectation of a natural creek resource. However, the intrusion would be temporary (typically no more than one construction season).

Staging Areas

The proposed project would include construction staging areas where equipment and material would be temporarily stored. These staging areas are proposed on land owned by the City of Roseville and are described in Table 4.1-1, below. Most staging areas are either currently disturbed and have a low scenic quality or are in areas where there is limited viewer exposure. While equipment would be visible during construction, these staging areas would be temporary and would not result in a permanent change in visual character.

Table 4.1-1 Scenic Quality and Viewer Exposure to Proposed Staging Areas

Staging Area	Scenic Quality	Viewer Exposure
East of Riverside Avenue and north of Dry Creek	Low; Across from a BMX dirt bike park in an area dominated by used car lots and auto repair businesses. Site is partially disturbed/graveled.	High; Riverside Avenue is relatively heavily traveled and the site includes approximately 120 feet of frontage.
South of Marlin Drive and north of Cirby Way	Low; Undeveloped lot at the entry to a residential development.	Moderate to high; Off of a main road and near residences. No homes look directly on to the property.
Oak Ridge Drive north of Vinmar Court	Low; Grassy, undeveloped lot with a low wooden fence and palm trees partially blocking view from the street.	Moderate; Adjacent to residences and across Oak Ridge Drive from Alta Manor assisted living facility.
Riparian area south of Meadowlark Way and north of Linda Creek	High; Open, grassy area off of an existing, unpaved maintenance road.	Low; Set back approximately 175 feet from the existing paved trail south of the residences.
East of Rocky Ridge Drive and north of Linda Creek	Moderate; Undeveloped lot with a grassy, natural appearance. The trail would be constructed on three sides.	Moderate to high; Adjacent to a main road and near residences. No homes look directly onto site.
At the terminus of North Cirby Way on the north side of Linda Creek	Low; Asphalt-paved street between white fences marking the end of the street and the end of the pavement.	Low; There is no through traffic. In a residential neighborhood, but no homes look directly onto site.
Southwest corner of the Samoa Way/Champion Oaks Drive intersection	Moderate; Undeveloped grassy lot.	Low to moderate; Streets are residential and not heavily traveled.
Between the terminus of Meadow Lane and West Colonial Parkway on the north side of Linda Creek	High; Trail access developed from West Colonial Parkway.	Low; Residential roads are not heavily traveled and trees obstruct viewing. No homes look directly onto site.
West Colonial Parkway east of Linda Creek	Moderate to High; Grassy area with native tree plantings, developed with an unpaved trail	Moderate to Low; Frontage to residential road, which is not heavily traveled and adjacent to homes.

Use-related Impacts

Trail

Implementation of the proposed project would include some tree removal, which would result in a visual change to the landscape. Design of the Proposed Trail Alignment would, to the extent possible, avoid the larger trees along the creek corridor, especially the native oak trees, to minimize impacts to habitat and aesthetic values consistent with requirements of the City's Tree Preservation Ordinance. Also, the alignment travels through a dense riparian corridor, and views would not be substantially changed despite the removal of some trees because the prominent visibility of the riparian woodland would remain.

The two groups of oak trees that possess scenic importance, along the Sierra Gardens neighborhood and near Rocky Ridge Drive, would not be negatively affected by the project. The trail has been designed to avoid the approximately 30-year old trees in the Sierra Gardens neighborhood and no bridges or retaining walls would be constructed in that area. No bridges would be constructed in the vicinity of the older (approximately 200-year-old) trees near Rocky Ridge Drive. In fact, as described in Chapter 3, "Project Description," bank stabilization elements would be constructed in this vicinity because the bank of the creek adjacent to these trees is currently eroding. Therefore, the project could have a beneficial effect on the scenic value of these trees because the gabion baskets could serve to protect the trees in the future.

The proposed retaining walls would not have a negative effect on views of the area. The combination of steep banks and dense vegetation would shield most of the views from roadways. Architectural elements designed to improve the aesthetic quality and allow the walls to blend more naturally into the surrounding environment would be used where feasible. The project may also include landscaping to create a physical and visual separation between the trail and adjacent properties, as well as to restore graded areas outside of the trail profile or compensate for habitat removed by construction. Simple wood slate or more ornate benches may be placed at key areas and viewpoints to provide rest areas.

Once complete, the amount of visual change because of project implementation would be relatively low. The trail has been designed in consideration of visual resources, including: setbacks from native oaks, riparian areas, and wetlands; topography; setbacks from residences; and compliance with adopted design standards. Where there is an existing trail, the type of use on the project site would remain the same, although the pathway may appear more prominent. The project may benefit the community by cleaning and maintaining the existing trails, and providing more viewing opportunities.

Trailhead

The staging area on the eastern side of Riverside Avenue would be developed as a trailhead with a parking area. This portion of Riverside Avenue is characterized by used car lots and automotive repair shops. The proposed trailhead would not impair the visual quality of the area.

Bridges

One existing roadway bridge, the Darling Way Bridge, may be widened by 8 feet on the north side to accommodate a 10-foot multi-use trail and full lane widths across the bridge. The widening of this bridge would not alter the visual relationship of the existing bridge and roadway to the surrounding landscape and would not substantially change its visible mass.

The project also proposes installation of up to six new pedestrian bridges across Dry, Linda, and Cirby Creeks and the rehabilitation or widening of two bridges. The proposed new bridges would be pre-fabricated steel truss bridges that would have a weathered steel finish to blend into the natural environment and not cause glare. Examples of proposed bridge designs are shown in Exhibit 4.1-9 for the crossing of Dry Creek near Hernandez Lane and Exhibit 4.1-10 for the crossing of Cirby Creek near Machado Lane. The truss height of Bridge #2 across Dry Creek would be up to 8 feet, with a width of 16 feet, and an overall span of 110 feet. The truss height of Bridge #4 across Cirby Creek would be up to 14 feet with a width of 16 feet and an overall span length of 160 feet. Mid- to long-range views of these project elements from surrounding land uses would be mostly obscured by existing vegetation. Short-range views of the bridge elements, including the bridge structure and bridge approaches would be available for bicyclists and pedestrians using the trail for the time they are in sufficiently close proximity to bridges. Where some residents may have a clearer view of the bridges, including the locations shown in Exhibits 4.1-9 and 4.1-10, the bridges would not be inconsistent with other elements of the viewshed, such as the commercial and automotive repair uses across the creek. Adding bridges would not significantly change the scenic character of the project site because there are existing bridges across roads and existing commercial and industrial uses within the existing viewshed across the creeks. Views for recreational users would be temporary and would be similar to other existing bridge elements, such as the Darling Way Bridge.

Conclusion

During construction, there would be a temporary change in the visual character of the project site from vacant creek corridors to a construction site containing construction equipment and workers. The general community would have limited exposure to this visual change, because there are few existing public viewpoints from the outside that provide a view of the project site, because of topography and intervening vegetation. Recreation use of the portion of the trail under construction would not occur during construction. Area residents would be able to see any changes that occur within the viewshed of their homes. Staging areas may be more apparent to the public than trail construction. However, as described

Exhibit 4.1-9 Proposed Bridge Rendering – Dry Creek near Hernandez Lane

Exhibit 4.1-10 Proposed Bridge Rendering –Cirby Creek near Machado Lane

ASCENT ENVIRONMENTAL

in Table 4.1-1, none of the proposed staging areas are located in areas of high scenic quality where viewer exposure is also high. The temporary use of these locations is not anticipated to substantially degrade the visual character of the area.

The scenic character of the site is valued by viewer groups that are exposed to the site for extended durations of time. Although the visual quality of the site would be temporarily degraded during active construction, once completed, there would be minimal changes to the scenic character of the project site. Prominent parts of the construction would be bridges at creek crossings and a few taller retaining walls. These features also would improve trails and public access to stream corridor views, which may be perceived as a benefit by some viewer groups.

Therefore, although the visual quality of the site would be temporarily degraded during construction, implementation of the Dry Creek Gateway East Trail would have a **less-than-significant** impact on the visual character or quality of the site and its surroundings.

Alignment Option 1A

Construction activities under Option 1A would be of the same type and magnitude as the Proposed Trail Alignment. This option would cross under Darling Way as described for the Proposed Trail Alignment, but would remain on the south side of the creek, closer to the commercial uses on Riverside Avenue and further from the residences that front Machado Lane. Option 1A would also cross Dry Creek with one bridge (Bridge #3) rather than the two bridges (Bridges #2 and #4) required for the Proposed Trail Alignment. The retaining wall for this option would be located on the south side of Dry Creek, closer to the commercial uses. For these reasons, the trail may be less visible to existing residents under Option 1A than with the Proposed Trail Alignment. This could result in less potential for the perceived visual character or quality of the project area to be effected by construction or use of the trail.

As discussed above for the Proposed Trail Alignment, the actual visual change because of implementation of Option 1A would be relatively low. Although the visual quality of the site would be temporarily degraded during active construction, the proposed physical changes to the project area would be consistent with the area's character and may improve upon the existing quality of views. Therefore, for the same reasons discussed above for the Proposed Trail Alignment, implementation of Option 1A would have a **less-than-significant** impact on the visual character or quality of the site and its surroundings.

Alignment Option 1C

Option 1C would require the same bridges and a similar undercrossing as the Proposed Trail Alignment, but would be located closer to the residences that front Hernandez and Machado Lanes. Because Option 1C would result in constructing elements of the trail closer to residences than the Proposed Trail Alignment, there could be more potential for the perceived visual character or quality of the project area to be effected by construction or use of the trail because it would be more visible to area residents. However, as discussed above for the Proposed Trail Alignment, the actual visual change because of implementation of Option 1C would be relatively low. Although the visual quality of the site would be temporarily degraded during active construction, the proposed physical changes to the project area would be consistent with the area's character and may improve upon the existing quality of views. Therefore, as discussed above for the Proposed Trail Alignment, implementation of Option 1C would have a **less-than-significant** impact on the visual character or quality of the site and its surroundings.

Alignment Option 5A

Option 5A would cross under Sunrise Avenue on the south side of Linda Creek, rather than the north side as described for the Proposed Trail Alignment. Surrounding land uses are commercial, and this option is generally anticipated to result in the same effects as the Proposed Trail Alignment. With Option 5A, the bridge over Linda Creek (Bridge #14) would be constructed on the eastern side of Sunrise Avenue, immediately adjacent to residences on either side of the creek. This bridge may be visible from nearby residences, while the corresponding bridge for the Proposed Trail Alignment (Bridge

#13) would be less visible or not visible, because the residences located to the north of Bridge #13 are screened by at least 200 feet of dense vegetation. Option 5A also includes a connection to the residences on Meadow Gate Drive, which would increase the visibility of the project. As discussed above for the Proposed Trail Alignment, the actual visual change because of implementation of Option 5A would be relatively low. Although the visual quality of the site would be temporarily degraded during active construction, the proposed physical changes to the project area would be consistent with the area's character and may improve upon the existing quality of views. Therefore, as discussed above for the Proposed Trail Alignment, implementation of Option 5A would have a **less-than-significant** impact on the visual character or quality of the site and its surroundings.

Mitigation Measures

None required.

Impact 4.1-2	Create a new source of substantial light or glare that would adversely affect day or nighttime views of the area.
Applicable Policies and Regulations	City of Roseville General Plan Land Use Element, City of Roseville Community Design Guidelines
Significance with Policies and Regulations	Proposed Project: Less than significant Alignment Option 1A: Less than significant Alignment Option 1C: Less than significant Alignment Option 5A: Less than significant
Mitigation Measures	None required (Proposed Project, Option 1A, Option 1C, Option 5A)
Significance after Mitigation	Less than significant (Proposed Project, Option 1A, Option 1C, Option 5A)

Proposed Trail Alignment

Construction Impacts

Construction activities would not result in substantial light or glare. All construction activities would occur during the daytime; no lighting would be required and no impact would occur.

Use-related Impacts

The Dry Creek Greenway East Trail would not be intended for nighttime use. Therefore, lighting of the complete trail alignment is not proposed. However, to enhance public safety, the project may include lit undercrossings in locations where the trail passes under roadways, including Darling Way east of Riverside Avenue, I-80 north of Cirby Way, Sunrise Avenue south of Coloma Way, Rocky Ridge Drive north of Cirby Way, and Old Auburn Road north of South Cirby Way. Bridges may also be illuminated and would have a weathered steel finish to blend into the natural environment and not cause glare. Lighting may also be installed at the trailhead parking lot and at-grade roadway crossings to enhance visibility of bicyclists and pedestrians to motorists. The project would not include the installation or construction of elements with reflective surfaces and, therefore, would not result in glare that causes public hazards or annoyance for a sustained period of time.

In adherence with adopted City standards, all proposed lighting would be limited to the amount required to safely illuminate roadways and sidewalks. Streetlights would be designed such that they do not create light that would be cast onto oncoming traffic or directly into the aquatic environment. Lighting would be installed at the lowest feasible height and would be screened and directed away from sensitive uses.

Conclusion

The Proposed Trail Alignment would not result in substantial increases in light or glare that would affect any light sensitive uses on or near the site. The project would have a **less-than-significant** impact on views of the area because of light or glare.

Alignment Option 1A

Option 1A would cross under Darling Way as described for the Proposed Trail Alignment, but would remain on the south side of the creek, closer to the commercial uses on Riverside Avenue and further from the residences that front Machado Lane. As discussed above for the Proposed Trail Alignment, there would not be light and glare impacts associated with the construction of Option 1A. Because there would be one less bridge with associated lighting, and the bridge would be further from residences, which have more potential to be light sensitive than commercial land uses, there would be less potential for Option 1A to have adverse effects related to light and glare. However, as discussed for the Proposed Trail Alignment, compliance with adopted City standards would effectively reduce the impact on views of the area because of light or glare to a **less-than-significant** level.

Alignment Option 1C

As discussed above for the Proposed Trail Alignment, there would not be light and glare impacts associated with the construction of Option 1C. This option would require the same bridges and a similar undercrossing as the Proposed Trail Alignment. The Darling Way undercrossing would be on the side of the creek closer to residences, but is unlikely to affect these receptors because any lighting would be below street level. As discussed above, the main portion of the trail would not be lit. Further, as discussed for the Proposed Trail Alignment, compliance with adopted City standards would effectively reduce the impact on views of the area because of light or glare to a **less-than-significant** level.

Alignment Option 5A

Construction of Option 5A would not result in substantial light or glare for the same reasons discussed above for the Proposed Trail Alignment. Option 5A would cross under Sunrise Avenue on the south side of Linda Creek, rather than the north side as described for the Proposed Trail Alignment. In this commercial area, which already has ample street and business lighting, this change would not substantially affect views of the project area. Installation of Bridge #14 instead of Bridge #13 would result in a bridge with associated illumination in closer proximity to residences than the Proposed Trail Alignment. However, as discussed for the Proposed Trail Alignment, compliance with adopted City standards would effectively reduce the impact on views of the area because of light or glare to a **less-than-significant** level.

Mitigation Measures

None required.

4.2 AIR QUALITY

4.2.1 Introduction

This section includes a discussion of existing air quality conditions in the project area, a summary of applicable regulations, and an analysis of potential short-term and long-term air quality impacts caused by the proposed project.

The Placer County Air Pollution Control District (PCAPCD) submitted a comment letter in response to the Notice of Preparation with respect to usage of the PCAPCD CEQA Air Quality Handbook (Handbook) to assist with recommended analytical approaches and feasible mitigation measures when preparing air quality analyses for land use projects. This letter was dated December 19, 2013. In October 2016, PCAPCD adopted updated significance thresholds; and, in June 72017, PCAPCD released a draft 2017 update of the District's Handbook which was subsequently approved by the PCAPCD Board in August 2017. The method of analysis contained in this section for short-term construction, long-term regional (operational, or in this case, use of the trail), local mobile-source, and toxic air emissions is consistent with PCAPCD recommendations in the updated August 2017 Handbook.

4.2.2 Environmental Setting

The project site is located in the City of Roseville (City) within western Placer County, California, which is located within the Sacramento Valley Air Basin (SVAB). The SVAB also includes all of Butte, Colusa, Glenn, Sacramento, Shasta, Sutter, Tehama, Yolo, and Yuba counties and the eastern portion of Solano County.

The ambient concentrations of air pollutant emissions are determined by the amount of emissions released by the sources of air pollutants and the atmosphere's ability to transport and dilute such emissions. Natural factors that affect transport and dilution include terrain, wind, atmospheric stability, and sunlight. Therefore, existing air quality conditions in the area are determined by such natural factors as topography, meteorology, and climate, in addition to the amount of emissions released by existing air pollutant sources, as discussed separately below. The nearest sensitive receptors in the vicinity of the project site are residences in the residential neighborhoods located adjacent to the site. Several parks are also located near the project site along with Eich Middle School (see Chapter 3, "Project Description").

TOPOGRAPHY, METEOROLOGY, AND CLIMATE

The SVAB is a relatively flat area bordered by the north Coast Ranges to the west and the northern Sierra Nevada to the east. Air flows into the SVAB through the Carquinez Strait, the only breach in the western mountain barrier, and moves across the Sacramento–San Joaquin Delta (Delta) from the San Francisco Bay area.

The Mediterranean climate type of the SVAB is characterized by hot, dry summers and cool, rainy winters. During the summer, daily temperatures range from 50 degrees Fahrenheit (°F) to more than 100°F. The inland location and surrounding mountains shelter the area from much of the ocean breezes that keep the coastal regions moderate in temperature. Most precipitation in the area results from air masses that move in from the Pacific Ocean, usually from the west or northwest, during the winter months. More than half the total annual precipitation falls during the winter rainy season (November through February); the average winter temperature is a moderate 49°F. Also characteristic

of SVAB winters are periods of dense and persistent low-level fog, which are most prevalent between storms. The prevailing winds are moderate in speed and vary from moisture-laden breezes from the south to dry land flows from the north.

The mountains surrounding the SVAB create a barrier to airflow leading to the entrapment of air pollutants when meteorological conditions are unfavorable for transport and dilution. Poor air movement is most frequent in the fall and winter when high-pressure cells are present over the SVAB. The lack of surface wind during these periods, combined with the reduced vertical flow caused by a decline in surface heating, reduces the influx of air and leads to the concentration of air pollutants under stable metrological conditions. Surface concentrations of air pollutant emissions are highest when these conditions occur in combination with agricultural burning activities or with temperature inversions, which hamper dispersion by creating a ceiling over the area and trapping air pollutants near the ground.

May through October is ozone season in the SVAB. This period is characterized by poor air movement in the mornings with the arrival of the Delta sea breeze from the southwest in the afternoons. In addition, longer daylight hours provide a plentiful amount of sunlight to fuel photochemical reactions between reactive organic gases (ROG) and oxides of nitrogen (NO_X), which result in ozone formation. Typically, the Delta breeze transports air pollutants northward out of the SVAB; however, a phenomenon known as the Schultz Eddy prevents this from occurring during approximately half of the time from July to September. The Schultz Eddy phenomenon causes the wind to shift southward and blow air pollutants back into the SVAB. This phenomenon exacerbates the concentration of air pollutant emissions in the area and contributes to the area violating the ambient-air quality standards.

The local meteorology of the project site and surrounding area is represented by measurements recorded at the Sacramento International Airport. The normal annual precipitation is approximately 17 inches. The predominant wind direction and speed is from the south at 8 miles per hour (WRCC 2013a, 2013b).

EXISTING AIR QUALITY

Criteria air pollutants

Concentrations of several air pollutants—ozone, CO, NO_2, SO_2, PM_{10}, $PM_{2.5}$, and lead—indicate the quality of ambient air and are, therefore, the premise of air quality regulations. Because these pollutants are the most prevalent air pollutants known to be harmful to human health, they are commonly referred to as “criteria air pollutants.” Their effects on human health have been studied in depth and their criteria for affecting health have been documented. Concentrations of emissions from criteria air pollutants are used to indicate the quality of the ambient air. A brief description of key criteria air pollutants in the SVAB is provided below. Monitoring data applicable to the project site is provided in Table 4.2-1.

Table 4.2-1 Summary of Annual Data on Local Ambient Air Quality (2012-2016)[1]

	2012	2013	2014	2015	2016
OZONE					
Maximum concentration (1-hr/8-hr avg, ppm)	0.108/0.093	0.111/0.084	0.097/0.087	0.098/0.085	0.115/0.093
Number of days state standard exceeded (1-hr/8-hr)	9/28	2/8	4/21	1/6	5/21
Number of days national standard exceeded (8-hr)[2]	27	6	19	6	20
FINE PARTICULATE MATTER ($PM_{2.5}$)					
Maximum concentration ($\mu g/m^3$)	28.0	57.0	30.7	44.1	24.4
Number of days national standard exceeded[2] (calculated[3])	0.0	0.0	0.0	0.0	0.0

Table 4.2-1 Summary of Annual Data on Local Ambient Air Quality (2012-2016)[1]

	2012	2013	2014	2015	2016
RESPIRABLE PARTICULATE MATTER (PM_{10})					
Maximum concentration ($\mu g/m^3$)	44.8	54.1	31.8	59.1	39.1
Number of days state standard exceeded (calculated[3])	0.0	*	0.0	*	0
Number of days national standard exceeded (calculated[3])	0.0	0.0	0.0	*	0

Notes: $\mu g/m^3$ = micrograms per cubic meter; ppm = parts per million

[1] Measurements from the Roseville-N Sunrise Blvd monitoring station.

[2] Based on 2015 National standard.

[3] Measured days are those days that an actual measurement was greater than the level of the state daily standard or the national daily standard. Measurements are typically collected every 6 days. Calculated days are the estimated number of days that a measurement would have been greater than the level of the standard had measurements been collected every day. The number of days above the standard is not necessarily the number of violations of the standard for the year.

* There was insufficient (or no) data available to determine the value.

Source: CARB 2017, data compiled by Ascent in 2017

Ozone

Ozone is a photochemical oxidant (a substance whose oxygen combines chemically with another substance in the presence of sunlight) and the primary component of smog. Ozone is not directly emitted into the air but is formed through complex chemical reactions between precursor emissions of ROG and NO_X in the presence of sunlight. ROG are volatile organic compounds that are photochemically reactive. ROG emissions result primarily from incomplete combustion and the evaporation of chemical solvents and fuels. NO_X are a group of gaseous compounds of nitrogen and oxygen that result from the combustion of fuels. Emissions of the ozone precursors ROG and NO_X have decreased over the past several years because of more stringent motor vehicle standards and cleaner burning fuels. Emissions of ROG and NO_X decreased from 2000 to 2010 and are projected to continue decreasing from 2010 to 2035 (CARB 2013a: Table 3-1).

Acute health effects of ozone exposure include increased respiratory and pulmonary resistance, cough, pain, shortness of breath, and lung inflammation. Long-term health effects include chronic bronchitis and chronic obstructive pulmonary disease (EPA 2017a).

Emissions of the ozone precursors ROG and NO_X have decreased over the past several years because of more stringent motor vehicle standards and cleaner burning fuels. Between 2000 and 2015, the annual average daily emissions of ROG and NO_X decreased by 56 percent. However, the ozone problem in the Sacramento Metropolitan Area, which includes western Placer County, still ranks among the most severe in the state. (CARB 2013a:4-45,2-16.)

Nitrogen Oxide

NO_2 is a brownish, highly reactive gas that is most present in urban environments. The major human-made sources of NO_2 are combustion devices, such as boilers, gas turbines, and mobile and stationary reciprocating internal combustion engines. Combustion devices emit primarily nitric oxide (NO), which reacts through oxidation in the atmosphere to form NO_2. The combined emissions of NO and NO_2 are referred to as NO_X and are reported as equivalent NO_2. Because NO_2 is formed and depleted by reactions associated with photochemical smog (ozone), the NO_2 concentration in a particular geographical area may not be representative of the local sources of NO_X emissions (EPA 2016, 2017b).

Particulate Matter

Respirable particulate matter with an aerodynamic diameter of 10 micrometers or less is referred to as PM_{10}. PM_{10} consists of particulate matter emitted directly into the air, such as fugitive dust, soot, and

smoke from mobile and stationary sources, construction operations, fires and natural windblown dust, and particulate matter formed in the atmosphere by reaction of gaseous precursors (CARB 2013a:1-20). Fine particulate matter ($PM_{2.5}$) includes a subgroup of smaller particles that have an aerodynamic diameter of 2.5 micrometers or less. PM_{10} emissions in the SVAB are dominated by emissions from area sources, primarily fugitive dust from vehicle travel on unpaved and paved roads, farming operations, construction and demolition, and particles from residential fuel combustion. Direct emissions of PM_{10} are projected to remain relatively constant through 2035. Direct emissions of $PM_{2.5}$ have steadily declined in the SVAB between 2000 and 2010 and then are projected to increase very slightly through 2035. Emissions of $PM_{2.5}$ in the SVAB are dominated by the same sources as emissions of PM_{10} (CARB 2013a:4-47).

Acute health effects of PM_{10} exposure include breathing and respiratory symptoms, aggravation of existing respiratory and cardiovascular diseases, and premature death. Chronic health effects include reduced lung function and chronic bronchitis (EPA 2003).

Monitoring Station Data and Attainment Area Designations

Criteria air pollutant concentrations are measured at several monitoring stations in the SVAB. The Roseville-North Sunrise Boulevard station is located approximately 0.75 mile north of the middle sections of the proposed trail alignment and is the closest monitoring station to the project site with recent data for ozone, PM_{10}, and $PM_{2.5}$. In general, the local ambient air quality measurements from this station are representative of the air quality near the project given its similar meteorological conditions and urban surroundings. Table 4.2-2 summarizes the air quality data for the four most recent calendar years for which data is available (2012–2016).

Both CARB and EPA use this type of monitoring data to designate areas according to their attainment status in accordance with ambient air quality standards for criteria air pollutants. The purpose of these designations is to identify those areas with air quality problems and thereby initiate planning efforts for improvement. The three basic designation categories are “nonattainment,” “attainment,” and “unclassified.” “Nonattainment” means that an area does not attain State or federal ambient air quality standards for a given pollutant, while “attainment” means that an area either attains or exceeds State or federal ambient air quality standards. “Unclassified” is used in an area that cannot be classified on the basis of available information as meeting or not meeting the standards. In addition, the California designations include a subcategory of the nonattainment designation, called “nonattainment-transitional.” The nonattainment-transitional designation is given to nonattainment areas that are progressing and nearing attainment. Attainment designations for the western, or SVAB portion, of Placer County are shown in Table 4.2-2 for each criteria air pollutant. Key pollutants for which Western Placer County is in nonattainment include ozone (California and National), PM_{10} (California), and $PM_{2.5}$ (National).

Table 4.2-2 Ambient Air Quality Standards and Designations for Western Placer County

Pollutant	Averaging Time	California		National Standards [1]	
		Standards [2, 3]	Attainment Status [4]	Primary [3]	Attainment Status [6]
Ozone	1-hour	0.09 ppm (180 µg/m^3)	N	–	N (Severe)
	8-hour	0.070 ppm (137 µg/m^3)		0.075 ppm (147 µg/m^3)	
Carbon Monoxide (CO)	1-hour	20 ppm (23 mg/m^3)	A	35 ppm (40 mg/m^3)	U/A
	8-hour	9 ppm (10 mg/m^3)		9 ppm (10 mg/m^3)	
	8-hour (Lake Tahoe)	6 ppm (7 mg/m^3)		–	
Nitrogen Dioxide (NO_2)	Annual Arithmetic Mean	0.030 ppm (57 µg/m^3)	A	0.053 ppm (100 µg/m^3)	U/A
	1-hour	0.18 ppm (339 µg/m^3)		0.100 ppm	

Table 4.2-2 Ambient Air Quality Standards and Designations for Western Placer County

Pollutant	Averaging Time	California		National Standards [1]	
		Standards [2, 3]	Attainment Status [4]	Primary [3]	Attainment Status [6]
Sulfur Dioxide (SO_2)	Annual Arithmetic Mean	–	A	0.030 ppm (80 µg/m^3)	U
	24-hour	0.04 ppm (105 µg/m^3)		0.14 ppm (365 µg/m^3)	
	3-hour	–		0.5 ppm (1300 µg/m^3)[5]	
	1-hour	0.25 ppm (655 µg/m^3)		0.075 ppm	
Respirable Particulate Matter (PM_{10})	Annual Arithmetic Mean	20 µg/m^3	N	–	U
	24-hour	50 µg/m^3		150 µg/m^3	
Fine Particulate Matter ($PM_{2.5}$)	Annual Arithmetic Mean	12 µg/m^3	A	12 µg/m^3	A
	24-hour	–		35 µg/m^3	N (Moderate)
Lead [7]	30-day Average	1.5 µg/m^3	A	–	–
	Calendar Quarter	–		1.5 µg/m^3	U/A
	Rolling 3-Month Avg	–		0.15 µg/m^3	U/A
Sulfates	24-hour	25 µg/m^3	A	No National Standards	
Hydrogen Sulfide	1-hour	0.03 ppm (42 µg/m^3)	U		
Vinyl Chloride [7]	24-hour	0.01 ppm (26 µg/m^3)	U		
Visibility-Reducing Particle Matter	8-hour	Extinction coefficient of 0.23 per kilometer —visibility of 10 mi or more	U		

Notes: µg/m^3 = micrograms per cubic meter; ppm = parts per million

[1] National standards (other than ozone, PM, and those based on annual averages or annual arithmetic means) are not to be exceeded more than once a year. The ozone standard is attained when the fourth highest 8-hour concentration in a year, averaged over 3 years, is equal to or less than the standard. The PM_{10} 24-hour standard is attained when the expected number of days per calendar year with a 24-hour average concentration above 150 µg/m^3 is equal to or less than one. The $PM_{2.5}$ 24-hour standard is attained when 98 percent of the daily concentrations, averaged over 3 years, are equal to or less than the standard. Contact EPA for further clarification and current federal policies.

[2] California standards for ozone, CO (except 8-hour Lake Tahoe), SO_2 (1- and 24-hour), NO_2, PM, and visibility-reducing particles are values that are not to be exceeded. All others are not to be equaled or exceeded. California Ambient Air Quality Standards (CAAQS) are listed in the Table of Standards in Section 70200 of Title 17 of the California Code of Regulations.

[3] Concentration expressed first in units in which it was promulgated [i.e., ppm or micrograms per cubic meter (µg/m^3)]. Equivalent units given in parentheses are based upon a reference temperature of 25°C and a reference pressure of 760 torr. Most measurements of air quality are to be corrected to a reference temperature of 25°C and a reference pressure of 760 torr; ppm in this table refers to ppm by volume, or micromoles of pollutant per mole of gas. Secondary national standards are also available from EPA.

[4] Unclassified (U): a pollutant is designated unclassified if the data are incomplete and do not support a designation of attainment or nonattainment.

Attainment (A): a pollutant is designated attainment if the state standard for that pollutant was not violated at any site in the area during a 3-year period.

Nonattainment (N): a pollutant is designated nonattainment if there was a least one violation of a state standard for that pollutant in the area. Nonattainment designations for ozone are classified as marginal, serious, severe, or extreme depending on the magnitude of the highest 8-hour ozone design value at a monitoring site in a nonattainment area.

Nonattainment/Transitional (NT): is a subcategory of the nonattainment designation. An area is designated nonattainment/transitional to signify that the area is close to attaining the standard for that pollutant.

[5] Secondary Standard

[6] Nonattainment (N): any area that does not meet (or that contributes to ambient air quality in a nearby area that does not meet) the national primary or secondary ambient air quality standard for the pollutant.

Attainment (A): any area that meets the national primary or secondary ambient air quality standard for the pollutant.

Unclassifiable (U): any area that cannot be classified on the basis of available information as meeting or not meeting the national primary or secondary ambient air quality standard for the pollutant.

Maintenance (M): any area previously designated nonattainment pursuant to the CAAA of 1990 and subsequently redesignated to attainment subject to the requirement to develop a maintenance plan under Section 175A of the CAA, as amended.

[7] CARB has identified lead and vinyl chloride as toxic air contaminants with no threshold of exposure for adverse health effects determined. These actions allow for the implementation of control measures at levels below the ambient concentrations specified for these pollutants.

Source: CARB 2015a, 2016; EPA 2017c; data compiled by Ascent in 2017.

Emissions Inventory

Exhibit 4.2-1 summarizes an estimated emissions inventory of criteria air pollutants within western Placer County (the portion of the county located within the SVAB) for various source categories in 2012. According to the emissions inventory, mobile sources are the largest contributor to the estimated annual average for levels of ROG and NO_X, accounting for approximately 47 percent and 73 percent respectively, of the total emissions. Area-wide sources (i.e., sources that occur over a large area rather than at a stationary source [e.g., smoke stack] or mobile-source [e.g., tailpipe]) account for approximately 76 percent and 58 percent of the western portion of the county's PM_{10} and $PM_{2.5}$ emissions, respectively (CARB 2013b). This is the current emissions inventory available for the western Placer County area.

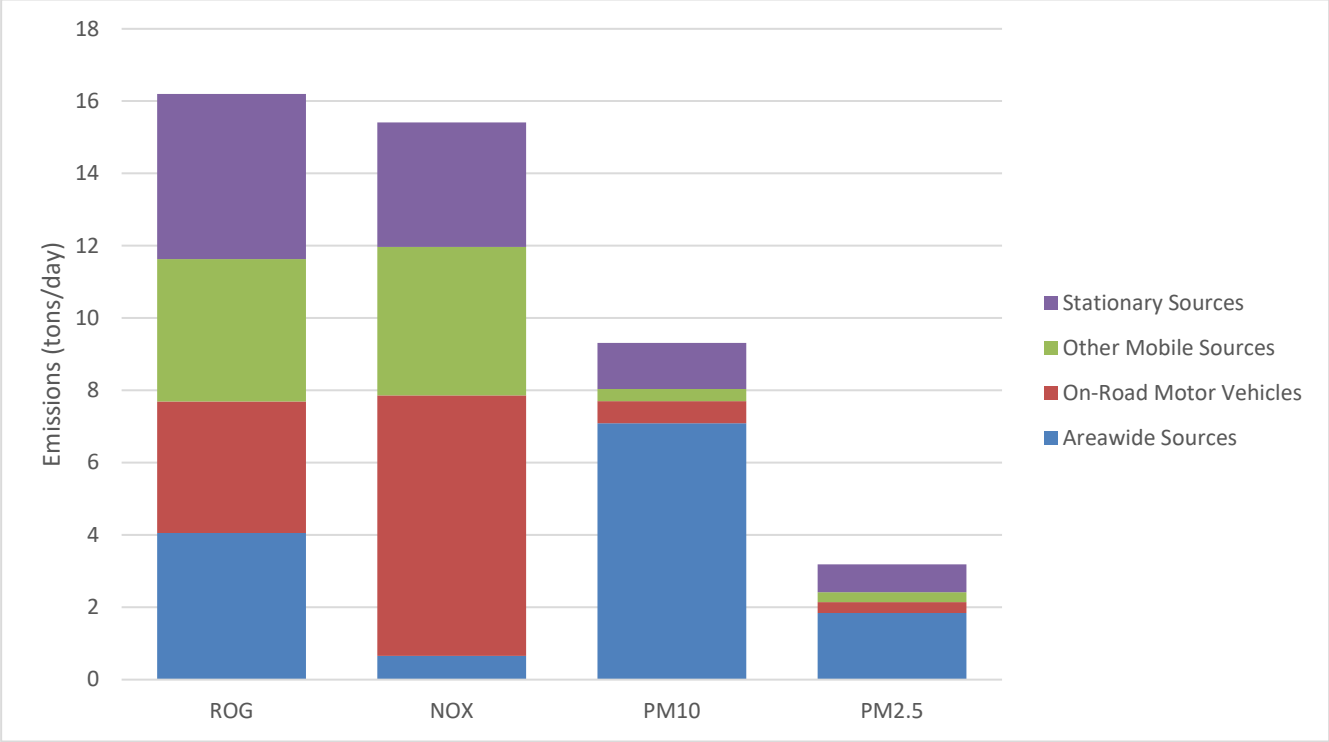

Exhibit 4.2-1 Western Placer County 2012 Emissions Inventory

Toxic Air Contaminants

Concentrations of toxic air contaminants (TACs) are also used to indicate the quality of ambient air. A TAC is defined as an air pollutant that may cause or contribute to an increase in mortality or in serious illness, or that may pose a hazard to human health. TACs are usually present in minute quantities in the ambient air; however, their high toxicity or health risk may pose a threat to public health even at low concentrations.

According to the California Almanac of Emissions and Air Quality (CARB 2013a), the majority of the estimated health risks from TACs can be attributed to relatively few compounds, the most important being particulate matter from diesel exhaust (diesel PM). Diesel PM differs from other TACs in that it is not a single substance, but rather a complex mixture of hundreds of substances. Although diesel PM is emitted by diesel-fueled internal combustion engines, the composition of the emissions varies depending on engine type, operating conditions, fuel composition, lubricating oil, and whether an emissions control system is being used. Unlike the other TACs, no ambient monitoring data are available for diesel PM because no routine measurement method currently exists. However, CARB has made preliminary concentration estimates based on a PM exposure method. This method uses the

CARB emissions inventory's PM_{10} database, ambient PM_{10} monitoring data, and the results from several studies to estimate concentrations of diesel PM.

In addition to diesel PM, the TACs that pose the greatest ambient risk in California, for which data are available, are benzene, 1,3-butadiene, acetaldehyde, carbon tetrachloride, hexavalent chromium, para-dichlorobenzene, formaldehyde, methylene chloride, and perchloroethylene. Sources of these TACs vary considerably and include (but are not limited to) consumer products, gasoline dispensing stations, auto repair and auto body coating shops, dry cleaning establishments, chrome plating and anodizing shops, welding operations, and other stationary sources.

Diesel PM poses the greatest health risk among the 10 TACs mentioned. Based on receptor modeling techniques, CARB estimated the health risk from diesel PM to be 360 excess cancer cases per million people in the SVAB in the year 2000. Since 1990, the health risk associated with diesel PM has been reduced by 52 percent. Overall, levels of most TACs, except para-dichlorobenzene and formaldehyde, have decreased since 1990 (CARB 2009).

According to the CARB Air Toxics "Hot Spots" Program (see Regulatory Setting below), stationary facilities that emit toxic substances above a specified level are required to prepare an inventory of toxic emissions, prepare a risk assessment if emissions are significant, notify the public of significant risk levels, and prepare and implement risk reduction measures. There are approximately 117 existing facilities that meet the reporting criteria located in the same Roseville zip codes (95661 and 95678) as the proposed project, including hospital facilities, auto dealerships, schools, large retail and service businesses or shopping centers (e.g., grocery stores, department stores), hotels, and other commercial and industrial uses (CARB 2015b). Minor stationary sources of TACs may also be located in the project area and could include, but are not limited to: gasoline dispensing stations, dry cleaning establishments, printing operations, and auto body coating operations.

Major highways and roadways are also considered sources of TAC emissions, associated with the presence of diesel PM emissions from vehicle exhaust. Interstate 80 (I-80) passes over the western portion of the proposed trail alignment just north of Cirby Way between Riverside Avenue and Sunrise Avenue. The annual average daily traffic volume on this segment of I-80 in the project area is approximately 175,000 vehicles per day (Caltrans 2014).

Naturally Occurring Asbestos

Asbestos is the common name for a group of naturally occurring fibrous silicate minerals that can separate into thin but strong and durable fibers. Naturally occurring asbestos, which was identified as a TAC by CARB in 1986, is located in many parts of California and is commonly associated with serpentine soils and rocks. According to two reports by the California Department of Conservation, Division of Mines and Geology, the proposed project site is not likely to contain naturally occurring asbestos (Higgins and Clinkenbeard 2006:54, Churchill and Hill 2000).

Odors

Odors are generally regarded as an annoyance rather than a health hazard. However, manifestations of a person's reaction to foul odors can range from psychological (e.g., irritation, anger, or anxiety) to physiological (e.g., circulatory and respiratory effects, nausea, vomiting, and headache).

With respect to odors, the human nose is the sole sensing device. The ability to detect odors varies considerably among the population and is subjective. Some individuals have the ability to smell very minute quantities of specific substances; others may not have the same sensitivity but may have sensitivities to odors of other substances. In addition, people may have different reactions to the same odor; an odor that is offensive to one person may be acceptable to another (e.g., fast food restaurant). It is important to also note that an unfamiliar odor is more easily detected and is more likely to cause complaints than a familiar one. This is because of the phenomenon known as odor fatigue, in which a

person can become desensitized to almost any odor and recognition only occurs with an alteration in the intensity.

Quality and intensity are two properties present in any odor. The quality of an odor indicates the nature of the smell experience. For instance, if a person describes an odor as flowery or sweet, then the person is describing the quality of the odor. Intensity refers to the strength of the odor. For example, a person may use the word strong to describe the intensity of an odor. Odor intensity depends on the odorant concentration in the air. When an odorous sample is progressively diluted, the odorant concentration decreases. As this occurs, the odor intensity weakens and eventually becomes so low that the detection or recognition of the odor is quite difficult. At some point during dilution, the concentration of the odorant reaches a detection threshold. An odorant concentration below the detection threshold means that the concentration in the air is not detectable by the average human.

Land uses that are major sources of odor typically include wastewater treatment and pumping facilities, sanitary landfills, transfer stations, recycling and composting facilities, and various industrial uses such as chemical manufacturing and food processing. There are no major sources of odor located adjacent to or in the immediate vicinity of the proposed project.

Sensitive Land Uses

Sensitive land uses generally include uses where prolonged exposure to pollutants could result in health-related risks to individuals. Residential dwellings and places where people recreate or congregate for extended periods of time such as parks or schools are of primary concern, because of the potential for increased and prolonged exposure of individuals to pollutants.

A number of sensitive land uses are located adjacent to or in close proximity to the proposed trail alignment, including single-family and multi-family residential dwellings, parks, and schools.

4.2.3 Regulatory Setting

As stated previously, the proposed trail alignment is located in the SVAB. Air quality in the vicinity of the proposed project is regulated by the EPA, CARB, PCAPCD, and the City. Each of these agencies develops rules, regulations, policies, and/or goals to comply with applicable legislation. Although EPA regulations may not be superseded, both state and local regulations may be more stringent.

As discussed above under “Environmental Setting,” acceptable levels of exposure to criteria air pollutants have been determined and ambient standards have been established for them (see Table 4.2-2).

Air quality regulations also focus on TACs (also known as hazardous air pollutants [HAPs] in federal regulations). In general, for those TACs that may cause cancer, all concentrations present some risk. In other words, there is no threshold level below which adverse health impacts may not be expected to occur. EPA and CARB regulate HAPs and TACs, respectively, through statutes and regulations that generally require the use of the maximum or best available control technology for toxics (MACT and BACT) to limit emissions. These statutes and regulations, in conjunction with additional rules set forth by PCAPCD, establish the regulatory framework for TACs.

Applicable regulations associated with criteria air pollutants, TACs, and odors are described below.

FEDERAL

At the federal level, EPA implements the national air quality programs. EPA’s air quality mandates are drawn primarily from the Federal Clean Air Act (CAA), enacted in 1970. The most recent major amendments were made by Congress in 1990.

Criteria Air Pollutants

The CAA requires EPA to establish National Ambient Air Quality Standards (NAAQS). As shown in Table 4.2-2, EPA has established primary and secondary NAAQS for the following criteria air pollutants: ozone, CO, NO_2, SO_2, PM_{10}, $PM_{2.5}$, and lead (CARB 2016). The primary standards protect public health and the secondary standards protect public welfare. The CAA also required each state to prepare an air quality control plan referred to as a State Implementation Plan (SIP). The Federal Clean Air Act Amendments of 1990 (CAAA) added requirements for states with nonattainment areas to revise their SIPs to incorporate additional control measures to reduce air pollution. The SIP is modified periodically to reflect the latest emissions inventories, planning documents, and rules and regulations of the air basins as reported by their jurisdictional agencies. EPA is responsible for reviewing all SIPs to determine whether they conform to the mandates of the CAA and its amendments, and whether implementation will achieve air quality goals. If EPA determines a SIP to be inadequate, a federal implementation plan that imposes additional control measures may be prepared for the nonattainment area. If an approvable SIP is not submitted or implemented within the mandated time frame, sanctions may be applied to transportation funding and stationary air pollution sources in the air basin.

Hazardous Air Pollutants and Toxic Air Contaminants

Toxic air contaminants (TACs), or in federal parlance, hazardous air pollutants (HAPs) are a defined set of airborne pollutants that may pose a present or potential hazard to human health. A TAC is defined as an air pollutant that may cause or contribute to an increase in mortality or in serious illness, or that may pose a hazard to human health. TACs are usually present in minute quantities in the ambient air; however, their high toxicity or health risk may pose a threat to public health even at low concentrations.

A wide range of sources, from industrial plants to motor vehicles, emit TACs. The health effects associated with TACs are quite diverse and generally are assessed locally, rather than regionally. TACs can cause long-term health effects such as cancer, birth defects, neurological damage, asthma, bronchitis, or genetic damage; or short-term acute affects such as eye watering, respiratory irritation (a cough), running nose, throat pain, and headaches.

For evaluation purposes, TACs are separated into carcinogens and non-carcinogens based on the nature of the physiological effects associated with exposure to the pollutant. Carcinogens are assumed to have no safe threshold below which health impacts would not occur. This contrasts with criteria air pollutants for which acceptable levels of exposure can be determined and for which the ambient standards have been established (Table 4.2-2). Cancer risk from TACs is expressed as excess cancer cases per one million exposed individuals, typically over a lifetime of exposure.

EPA and, in California, CARB regulate HAPs and TACs, respectively, through statutes and regulations that generally require the use of the maximum available control technology or best available control technology for toxics to limit emissions.

STATE

The California Air Resources Board (CARB) is the agency responsible for coordination and oversight of state and local air pollution control programs in California and for implementing the California Clean Air Act (CCAA). California law authorizes CARB to set ambient (outdoor) air pollution standards (California Health and Safety Code Section 39606) in consideration of public health, safety, and welfare (California Ambient Air Quality Standards [CAAQS] (Table 4.2-2).

Criteria Air Pollutants

CARB has established CAAQS for sulfates, hydrogen sulfide, vinyl chloride, visibility-reducing particulate matter, and the above-mentioned criteria air pollutants. In most cases the CAAQS are more stringent than the NAAQS. Differences in the standards are generally explained by the health effects

studies considered during the standard-setting process and the interpretation of the studies. In addition, the CAAQS incorporate a margin of safety to protect sensitive individuals.

The CCAA requires that all local air districts in the state endeavor to achieve and maintain the CAAQS by the earliest date practical. The act specifies that local air districts should focus particular attention on reducing the emissions from transportation and areawide emission sources, and provides districts with the authority to regulate indirect sources.

Among CARB's other responsibilities are overseeing local air district compliance with Federal and State laws, approving local air quality plans, submitting SIPs to EPA, monitoring air quality, determining and updating area designations and maps, and setting emissions standards for new mobile sources, consumer products, small utility engines, off-road vehicles, and fuels.

Toxic Air Contaminants

TACs in California are regulated primarily through the Tanner Air Toxics Act (Assembly Bill [AB] 1807, Chapter 1047, Statutes of 1983) and the Air Toxics Hot Spots Information and Assessment Act of 1987 (AB 2588, Chapter 1252, Statutes of 1987). AB 1807 sets forth a formal procedure for CARB to designate substances as TACs. Research, public participation, and scientific peer review are required before CARB can designate a substance as a TAC. To date, CARB has identified more than 21 TACs, including diesel PM, and adopted EPA's list of HAPs as TACs.

Once a TAC is identified, CARB then adopts an airborne toxics control measure for sources that emit that particular TAC. If a safe threshold exists for a substance at which there is no toxic effect, the control measure must reduce exposure below that threshold. If no safe threshold exists, the measure must incorporate best available control technology for toxics to minimize emissions.

CARB has adopted diesel exhaust control measures and more stringent emission standards for various on-road mobile sources of emissions, including transit buses, and off-road diesel equipment (e.g., tractors, generators). Recent milestones included the low-sulfur diesel fuel requirement and tighter emissions standards for heavy-duty diesel trucks (effective in 2007 and subsequent model years) and off-road diesel equipment (2011). Over time, replacing older vehicles will result in a vehicle fleet that produces substantially lower levels of TACs than under current conditions. Mobile-source emissions of TACs (e.g., benzene, 1-3-butadiene, diesel PM) in California have been reduced substantially over the last decade; such emissions will be reduced further through a progression of regulatory measures (e.g., low emission vehicle/clean fuels and Phase II reformulated-gasoline regulations) and control technologies.

CARB's *Air Quality and Land Use Handbook: A Community Health Perspective* (CARB 2005) provides guidance concerning land use compatibility with TAC sources. While not a law or adopted policy, the handbook offers advisory recommendations for the siting of sensitive receptors near uses associated with TACs, such as freeways and high-traffic roads, commercial distribution centers, rail yards, ports, refineries, dry cleaners, gasoline stations, and industrial facilities, to help keep children and other sensitive populations out of harm's way.

LOCAL

Placer County Air Pollution Control District

<u>Criteria Air Pollutants</u>

PCAPCD attains and maintains air quality conditions in Placer County through a comprehensive program of planning, regulation, enforcement, technical innovation, and promotion of the understanding of air quality issues. The clean air strategy of PCAPCD includes preparing plans for the attainment of ambient air quality standards, adopting and enforcing rules and regulations concerning sources of air pollution,

and issuing permits for stationary sources of air pollution. PCAPCD also inspects stationary sources of air pollution and responds to citizen complaints, monitors ambient air quality and meteorological conditions, and implements programs and regulations required by the CAA, CAAA, and CCAA.

All projects in Placer County are subject to PCAPCD's adopted rules and regulations. Specific rules applicable to the construction under the action alternatives may include but are not limited to the following:

- PCAPCD Rule 217—Cutback and Emulsified Asphalt Paving Materials. Prohibits the use of the following asphalt materials for road paving: rapid cure cutback asphalt; slow cure cutback asphalt; medium cure cutback asphalt; or emulsified asphalt.
- PCAPCD Rule 218—Application of Architectural Coatings. This rule limits the quantity of volatile organic compounds (VOCs) in architectural coatings used in PCAPCD's jurisdiction. Subsection 301 lists VOC content limits for a variety of architectural coatings.
- PCAPCD Rule 228—Fugitive Dust. To regulate fugitive dust emissions, this rule prescribes limits and best management practices to be applied during construction and operation activities. See Appendix H-2 for a detailed list of these guidelines.
- PCAPCD Rule 501— General Permit Requirements. Any person operating an article, machine, equipment, or other contrivance, the use of which may cause, eliminate, reduce, or control the issuance of air contaminants, shall first obtain a written permit from the Air Pollution Control Officer. Stationary sources subject to the requirements of Rule 507, Federal Operating Permit Program, must also obtain a Title V permit pursuant to the requirements and procedures of that rule.

Toxic Air Contaminants

At the local level, PCAPCD may adopt and enforce CARB's airborne toxic control measures. Under PCAPCD Rule 501 ("Permit Requirements"), PCAPCD Rule 502 ("New Source Review"), PCAPCD Rule 507 ("Federal Operating Permit"), all sources that possess the potential to emit TACs are required to obtain permits from PCAPCD. PCAPCD may grant permits to these operations if they are constructed and operated in accordance with applicable regulations, including new source review standards and air toxics control measures. PCAPCD limits emissions and public exposure to TACs through a number of programs.

Sources that require a permit are analyzed by PCAPCD (e.g., health risk assessment) based on their potential to emit TACs that would expose receptors to substantial health risk. If it is determined that a source would emit TACs in excess of PCAPCD's standard of significance for TACs (identified below), then the source would have to implement the best available control technology (BACT) for TACs to reduce emissions. If a source cannot reduce the risk below the standard of significance even after the BACT has been implemented, PCAPCD will deny issuing a permit to the source. This helps to prevent new problems and reduces emissions from existing older sources by requiring them to apply new TAC-reduction technology when being retrofitted.

City of Roseville General Plan

The Air Quality and Climate Change Element of the City of Roseville's General Plan 2035 contains numerous goals and policies that pertain to criteria air pollutant emissions, TACs, and odors (City of Roseville 2016). Key policies that are applicable to the proposed project include the following:

Air Quality Goals

GOAL 1: Improve Roseville's air quality by:

a) Achieving and maintaining ambient air quality standards established by the U.S. Environmental Protection Agency and CARB; and

b) Minimizing public exposure to toxic or hazardous air pollutants and air pollutants that create a public nuisance through irritation to the senses (such as unpleasant odors).

GOAL 2: Integrate air quality planning with the land use and transportation planning process.

GOAL 4: Increase the capacity of the transportation system, including the roadway system and alternate modes of transportation.

GOAL 5: Provide adequate pedestrian and bikeway facilities for present and future transportation needs.

GOAL 7: While recognizing that the automobile is the primary form of transportation, the City of Roseville should make a commitment to shift from the automobile to other modes of transportation.

Air Quality Policies

- **Policy 2:** Work with the Placer County Air Pollution Control District to monitor air pollutants of concern on a continuous basis
- **Policy 3:** Develop consistent and accurate procedures for evaluating the air quality impacts of new projects.
- **Policy 5:** Develop transportation systems that minimize vehicle delay and air pollution.
- **Policy 6:** Develop consistent and accurate procedures for mitigating transportation emissions from new and existing projects.
- **Policy 7:** Encourage alternative modes of transportation including pedestrian, bicycle, and transit usage.
- **Policy 9:** Encourage land use policies that maintain and improve air quality.

Air Quality Implementation Measures

Interagency Coordination

- Coordinate with other local and regional jurisdictions, including the PCAPCD and CARB, in the development of regional and county clean air plans and incorporate the relevant provisions of those plans into City planning and project review procedures. Also cooperate with the PCAPCD and CARB in:
  - enforcing the provisions of the California and Federal Clean Air Acts, state and regional policies, and established standards for air quality
  - establishing a monitoring station to accurately determine the status of carbon monoxide, ozone, nitrogen dioxide, and hydrocarbon concentrations;
  - developing and implementing clean fuel regulations for vehicle fleets; and
  - developing consistent procedures for evaluating project-specific and cumulative air quality impacts of projects.
- Submit development proposals to the PCAPCD for review and comment in compliance with CEQA prior to consideration by the appropriate decision-making body.
- Cooperate with Placer County in the identification of hazardous material users (both large and small-scale users) and the development of an inspection process and hazardous materials management plan. (Policies 1, 2, 3, 9 and 11)

Development Review Process

- Notify and solicit comments from local and regional agencies of proposed projects that may affect regional air quality. The comments of the responding agencies will be considered during the review of the projects. The City will encourage project applicants to consult early in the planning process with Planning Department staff regarding the applicability of county-wide indirect and area wide

source permit program and TCM programs. Project review should also address energy efficient building and site designs, as well as the proper storage, use, and disposal of hazardous materials.

- Include identification of potential air quality impact and designation of design and other appropriate mitigation measures or offset fees to reduce impacts in the environmental review of a project. The City will dedicate staff to work with project proponents and other agencies in identifying, ensuring the implementation of, and monitoring the success of mitigation measures. (Policies 1, 3, 10, and 11)

Mitigation Strategies – Motor Vehicle Alternatives

- Encourage transportation alternatives to motor vehicles by developing infrastructure amenable to such alternatives by doing the following:
  - implementing the Bicycle Master Plan and Long-Range Transit Plan as specified in the Circulation Element;
  - considering right-of-way requirements for bike usage in the planning of new arterial and collector streets and in street improvement projects;
  - requiring that new development be designed to promote pedestrian and bicycle access and circulation;
  - providing safe and secure bicycle parking facilities at major activity centers, such as public facilities, employment sites, and shopping and office centers;
  - providing convenient and safe pedestrian and bike movement through the large parking areas that surround large retail and office centers;
  - providing safe pathways that link residential areas to schools, parks, services, and employment areas and transit facilities;
  - promoting project design that encourages pedestrian and cyclist use, including grade separated crossing at major arterials, clear and safe connections between projects and uses; and
  - installing sidewalks in residential and commercial developments with protective curbing and adequate lighting and pedestrian amenities.

4.2.4 Impacts

METHODS OF ANALYSIS

PCAPCD has issued guidance on the analysis of criteria air pollutants and toxic air contaminants the PCAPCD's 2017 Handbook (PCAPCD August, 2017). The Handbook outlines expectations and methodologies for the analysis of emissions generated by a proposed project, and guidance on determining the significance of impacts and appropriate mitigation.

Temporary construction-related and permanent use-related air quality (regional and local) impacts, as well as impacts from TACs, were assessed in accordance with PCAPCD-recommended methods consistent with the 2017 Handbook (PCAPCD August, 2017).

Construction

Temporary emissions of criteria air pollutants (e.g., PM_{10} and $PM_{2.5}$) and ozone precursors (e.g., ROG and NO_X) generated by project construction were assessed in accordance with PCAPCD-recommended methods. Where quantification was required, these emissions were modeled using the California Emissions Estimator Model (CalEEMod) Version 2016.3.1 computer program as summarized in Table 4.2-3. CalEEMod is designed to model both construction and use-related emissions and allows for the input of project-specific information. Project-specific data, such as construction equipment types, along with PCAPCD-recommended and default model settings were used to estimate reasonable worst-case conditions.

Use of the Proposed Project

The proposed project is a multi-use trail and would include a trailhead with accompanying parking lot at the western end of the trail, off Riverside Avenue just south of Darling Way. The parking lot would include approximately 35 parking spaces. This would be the only parking associated with the project. While it cannot be known with certainty how many motor vehicle trips or vehicle miles traveled (VMT) could be reduced by increased use of the proposed trail by bicyclists and pedestrians (in lieu of vehicle trips), over the long term it is expected that trail use would contribute to decreased motor vehicle travel. Similarly, no new stationary sources would be included in the use of the proposed project. Thus, the proposed project would not result in a net increase in permanent emissions of criteria air pollutants, precursors, or TACs associated with mobile or stationary sources.

THRESHOLDS OF SIGNIFICANCE

Based on Appendix G of the CEQA Guidelines and the August 2017 PCAPCD CEQA Air Quality Handbook thresholds of significance, the proposed project was determined to result in a significant impact to air quality if it would:

- conflict with or obstruct implementation of an applicable air quality plan;
- result in short-term (construction) or long-term (operational/use) emissions of 1) ROG and NO_X that exceed PCAPCD's CEQA threshold (e.g., level that attains/maintains concentrations in the County in regards to the California Clean Air Act) of 82 lb/day (construction phase) and 55 lb/day (operational phase) or 2) PM_{10} that exceed PCAPCD's CEQA threshold of 82 lb/day for both construction and operational phases (PCAPCD August, 2017);
- violate any air quality standard or contribute substantially to an existing or projected air quality violation;
- result in the exposure of sensitive receptors to substantial pollutant concentrations; or
- result in cumulative annual emissions of 1) ROG and NO_x that could exceed the federal *de minimis* level of 25 tons/year or 2) $PM_{2.5}$ that could exceed the federal *de minimus* level of 100 tons/year, based on Western Placer County's attainment status for ozone and $PM_{2.5}$ NAAQS (EPA 2017d).

ISSUES OR POTENTIAL IMPACTS NOT DISCUSSED FURTHER

There are no major sources of odor at or near the project site. Additionally, the proposed construction and use of a multi-use trail would not include activities that typically generate excessive odors. Therefore, potential impacts related to odor are not discussed further.

IMPACT ANALYSIS

Impact 4.2-1	Short-term construction-generated emissions of ROG, NO_X, $PM_{10,}$ and $PM_{2.5}$.
Applicable Policies and Regulations	NAAQS CAAQS PCAPCD Rules City of Roseville General Plan Air Quality and Climate Change Element
Significance with Policies and Regulations	Proposed Project: Potentially significant Alignment Option 1A: Potentially significant Alignment Option 1C: Potentially significant Alignment Option 5A: Potentially Significant
Mitigation Measures	Mitigation Measure 4.2-1 (Proposed Project, Option 1A, Option 1C, Option 5A)
Significance after Mitigation	Less than significant (Proposed Project, Option 1A, Option 1C, Option 5A)

Proposed Trail Alignment

Construction emissions are described as "short term" or temporary in duration. Construction-related activities would result in project-generated emissions of ROG, NO_X, PM_{10} and $PM_{2.5}$ (a subset of PM_{10}) from site preparation (e.g., excavation, grading, and vegetation clearing), heavy off-road equipment, material delivery, worker commute vehicle travel to and from the site, trenching and asphalt paving, bridge construction, and other related activities. Fugitive dust emissions are associated primarily with site preparation and vary as a function of soil silt content, soil moisture, wind speed, acreage of disturbance, VMT both on- and off-site, and other factors. Ozone precursor emissions of ROG and NO_X are associated primarily with construction equipment exhaust and the application of architectural coatings.

For the purposes of this analysis, construction was assumed to take place over 4 years (2021–2024), commencing in 2021. The maximum daily disturbed acreage for the proposed project would be less than 1 acre. Because the proposed project would be constructed in up to four segments, construction emissions were modeled for each segment and phase separately, according to construction phasing and equipment anticipated for each segment. For phases that are anticipated to overlap, maximum daily emissions were aggregated and presented as such in Table 4.2-3.

Appendix C contains model input and output parameters, detailed assumptions, and daily construction emissions estimates. Construction emissions are summarized in Table 4.2-3. Based on the modeling, construction of the proposed project would result in maximum daily emissions of approximately 10 lb/day of ROG, 106 lb/day of NO_X, 13 lb/day of PM_{10} and 8 lb/day of $PM_{2.5}$.

Table 4.2-3 Summary of Modeled Temporary Construction-Generated Emissions for the Proposed Project

	ROG (lb/day)	NO_X (lb/day)	PM_{10} (lb/day)	$PM_{2.5}$ (lb/day)
Segment A: Darling Way – Eastwood Park				
2021 Maximum Daily Emissions	5	56	5	3
2022 Maximum Daily Emissions	5	51	4	3
Segment B: Eastwood Park – Oak Ridge Dr				
2021 Maximum Daily Emissions	3	33	2	1
2022 Maximum Daily Emissions	2	17	1	1
Segment C: Eich School – Rocky Ridge Dr				
2021 Maximum Daily Emissions	1	11	1	1
2022 Maximum Daily Emissions	4	40	9	5
Segment A, B, and C: Overlapping Phases				
2021 Maximum Daily Emissions	8	89	6	4
2022 Maximum Daily Emissions	10	106	13	8
Segment D: Rocky Ridge Dr – Spahn Ranch Rd				
2023 Maximum Daily Emissions	6	56	5	3
2024 Maximum Daily Emissions	3	29	5	3
Maximum daily emissions across all years, unmitigated	10	106	13	8
PCAPCD CEQA significance criteria Project-level threshold of significance	82	82	82	N/A

Notes: Totals may not sum due to rounding. lb/day = pounds per day; NO_X = oxides of nitrogen; $PM_{2.5}$ = fine particulate matter with an aerodynamic diameter of 2.5 micrometers or less; PM_{10} = respirable particulate matter with an aerodynamic diameter of 10 micrometers or less; ROG = reactive organic gases; PCAPCD = Placer County Air Pollution Control District.

Source: Ascent Environmental, 2017. See Appendix C for detailed CalEEMod modeling results.

It is important to note that the project would be required to comply with PCAPCD Rules 228, Fugitive Dust Emissions; Rule 202, Visible Emissions; Rule 217, Cutback and Emulsified Asphalt Paving Materials; and Rule 218, Architectural Coatings.

When separately considered, construction emissions from any single phase would be below PCAPCD's recommended CEQA project-level significance thresholds of 82 lb/day of ROG, 82 lb/day of NO_X, lb and 82 lb/day of PM_{10}. However, construction of segments A, B and C occurring within a single day would result in construction emissions that would exceed PCAPCD's recommended CEQA project-level significance threshold of 82 lb/day of NO_x.

Conclusion

Depending on the number of segments being constructed within a single day, construction emissions associated with construction of the proposed project could exceed applicable thresholds for NO_X and thus, contribute to the existing nonattainment status of the SVAB with respect to the CAAQS and NAAQS. This would be a **potentially significant** impact.

Alignment Option 1A

Construction-related activities for Option 1A would be the same type and general magnitude of activities that would occur under the Proposed Trail Alignment. The total number of bridges constructed under Option 1A would be less than the number of bridges constructed under the Proposed Trail Alignment, which would result in fewer emissions associated with bridge construction activities. Option 1A would require an additional 765 linear feet of retaining walls or streambank stabilization when compared to the Proposed Trail Alignment. Overall, construction emissions would be less than under the Proposed Trail Alignment because emissions from the lighter type of equipment needed to construct these elements would be less than emissions for the heavy construction equipment needed for bridge construction. However, depending on the number of segments being constructed within a single day, Option 1A could still potentially exceed PCAPCD's recommended CEQA-level project significance threshold of 82 lb/day of NO_X during construction. Therefore, project construction under this option could substantially contribute to air pollutant concentrations that exceed the NAAQS or CAAQS. This impact would be **potentially significant**.

Alignment Option 1C

Construction-related activities for Option 1C would be the same type and general magnitude of activities that would occur under the Proposed Trail Alignment. Option 1C would not require the widening of the Darling Way Bridge, which would result in fewer emissions associated with bridge construction activities. Thus, construction activities under Option 1C would result in less emissions than estimated for the Proposed Trail Alignment. However, depending on the number of segments being constructed within a single day, Option 1C could still potentially exceed PCAPCD's recommended CEQA-level project significance threshold of 82 lb/day of NO_x during construction. Therefore, project construction under this option could substantially contribute to air pollutant concentrations that exceed the NAAQS or CAAQS. This impact would be **potentially significant**.

Alignment Option 5A

Construction-related activities for Option 5A would be the same type and general magnitude of activities that would occur under the Proposed Trail Alignment. Implementing Option 5A would change the location of one bridge (#14 rather than #13), but would not change the number of bridges proposed, which would result in approximately the same emissions associated with bridge construction activities. Thus, estimated emissions for construction activities under Option 5A would be the same as the Proposed Trail Alignment and would not exceed PCAPCD's recommended CEQA-level project significance thresholds for trail use. However, depending on the number of segments being constructed within a single day, Option 5A could still potentially exceed PCAPCD's recommended CEQA-level project significance threshold of 82 lb/day of NO_x during construction. Therefore, project construction under this option could substantially contribute to air pollutant concentrations that exceed the NAAQS or CAAQS. This impact would be **potentially significant**.

Mitigation Measures

Mitigation Measure 4.2-1: Reduce construction-related NO_X emissions.

Before approval of grading permits, the construction contractor shall submit for PCAPCD approval, a written calculation demonstrating that the fleet of heavy-duty (> 50 horsepower) off-road equipment used during the project's construction, including owned, leased, and subcontractor vehicles, will achieve the necessary percent reduction in NO_X emissions during all construction phases, and for any periods during which multiple phases would overlap, as to not exceed 82 lb/day. Acceptable options for reducing emissions may include reduction in the number of segments constructed in a single day, use of late model-year engines, low-emission renewable diesel fuel, engine retrofit technologies, and/or other effective options as recommended by PCAPCD at the time (see Appendix C of the PCAPCD 2017 CEQA Handbook [PCAPCD 2017:75] for additional options). The calculation shall be provided using PCAPCD's Construction Mitigation Calculator.

Significance after Mitigation

Tier 4 engines are readily available in California for off-road equipment, and therefore, the use of off-road construction equipment with higher tiered engines would be able to achieve NO_X reductions sufficient (i.e., 24 lb/day) to ensure construction-generated levels of NO_X would be less than PCAPCD's threshold of 82 lb/day, presumably with some combination of Tier 3 and Tier 4 engines. Additionally, use of renewable diesel fuel could result in further NO_x reductions of 14 percent (SMAQMD 2015).

Thus, given that the reduction of construction-related NO_x emissions to below 82 lb/day is achievable, Mitigation Measure 4.2-1 would reduce construction-generated emissions of NO_x to less than the PCAPCD's recommended significance threshold of 82 lb/day for all construction phases. This impact would be reduced to a **less-than-significant** level.

Impact 4.2-2	Long-term use-related emissions of ROG, NO_X, $PM_{10,}$ and $PM_{2.5}$.
Applicable Policies and Regulations	NAAQS CAAQS PCAPCD Rules City of Roseville General Plan Air Quality and Climate Change Element
Significance with Policies and Regulations	Proposed Project: Less than significant Alignment Option 1A: Less than significant Alignment Option 1C: Less than significant Alignment Option 5A: Less than significant
Mitigation Measures	None required (Proposed Project, Option 1A, Option 1C, Option 5A)
Significance after Mitigation	Less than significant (Proposed Project, Option 1A, Option 1C, Option 5A)

Proposed Trail Alignment

The proposed project would be a 4.25-mile multi-use trail intended for use by bicyclists and pedestrians with accompanying parking lot at the western end of the trail, off Riverside Avenue just south of Darling Way. The parking lot would include approximately 35 parking spaces. This would be the only parking associated with the project. The trail would also need occasional maintenance as a standard part of its use. The proposed project was envisioned as a component of the City's 2008 Bicycle Master Plan. While it cannot be known with certainty how many motor vehicle trips or VMT could be reduced by increased use of the proposed trail by bicyclists and pedestrians (in lieu of vehicle trips), over the long term it is expected that trail use would contribute to decreased motor vehicle travel.

Therefore, emissions generated by trail use would be below PCAPCD's project-level significance thresholds, and the project would not substantially contribute to air pollutant concentrations that exceed the NAAQS or CAAQS. It is reasonably foreseeable that a net air quality benefit could accrue over the long term to the extent that bicycle or pedestrian travel occurs on the proposed trail in lieu of motor vehicle trips. Such a benefit would be consistent with the mobility enhancement goal of the proposed project. It is not feasible to precisely quantify the number of motor vehicle trips avoided, so a beneficial impact conclusion would not be a certainty.

Conclusion

Over the long term, the proposed multi-use trail with accompanying parking lot is expected to decrease motor vehicle travel. Emissions generated by trail use would be below PCAPCD's project-level significance thresholds, and the project would not substantially contribute to air pollutant concentrations that exceed the NAAQS or CAAQS. Consequently, this impact would be **less than significant**.

Alignment Option 1A

Use-related activities for Option 1A would be the same type and general magnitude of activities that would occur under the Proposed Trail Alignment. Thus, use-related activities under Option 1A would be the same as the estimated emissions for the Proposed Trail Alignment. This impact would be **less than significant**.

Alignment Option 1C

Use-related activities for Option 1C would be the same type and general magnitude of activities that would occur under the Proposed Trail Alignment. Thus, use-related activities under Option 1C would result in similar emissions as estimated for the Proposed Trail Alignment, and Option 1 C would not exceed PCAPCD's recommended CEQA-level project significance thresholds for trail use. This impact would be **less than significant**.

Alignment Option 5A

Use-related activities for Option 5A would be the same type and general magnitude of activities that would occur under the Proposed Trail Alignment. Thus, estimated emissions for use-related activities under Option 5A would be the same as the Proposed Trail Alignment and would not exceed PCAPCD's recommended CEQA-level project significance thresholds for trail use. This impact would be **less than significant**.

Mitigation Measures

None required.

Impact 4.2-3	Generation of local mobile-source CO emissions.
Applicable Policies and Regulations	NAAQS CAAQS PCAPCD Rules City of Roseville General Plan Air Quality and Climate Change Element

Significance after Mitigation	Less than significant (Proposed Project, Option 1A, Option 1C, Option 5A)

Proposed Trail Alignment

Construction Impacts

CO concentration is a direct function of vehicle idling time and, thus, traffic flow conditions. Under specific meteorological conditions, CO concentrations near congested roadways and/or intersections may reach unhealthy levels with respect to local sensitive land-uses such as residential areas, schools, and hospitals. Notably, the City of Roseville is in attainment for CO and has not experienced a violation of ambient air quality standards for CO in 20 years (CARB 2012). The project would not result in a net increase in VMT on the local roadway network, and would have no or negligible traffic impacts during construction and would not result in traffic congestion because construction equipment would be staged adjacent to or near each phase of construction, and closure of traffic lanes during construction would be temporary and would implement traffic control measures.

Thus, implementation of the proposed project would not result in, or contribute to, local CO concentrations that exceed the California 1-hour or 8-hour ambient-air quality standards of 20 ppm or 9 ppm, respectively, as a result of project-related construction activities. This impact would be **less than significant**.

Use-related Impacts

The proposed project is a 4.25-mile multi-use trail intended for bicyclists and pedestrians. The proposed project would include a trailhead with accompanying parking lot at the western end of the trail, off Riverside Avenue just south of Darling Way. The parking lot would include approximately 35 parking spaces. This would be the only parking associated with the project. While it cannot be known with certainty how many motor vehicle trips or VMT could be reduced by increased use of the proposed trail by bicyclists and pedestrians (in lieu of vehicle trips), over the long term it is expected that trail use would contribute to decreased motor vehicle travel. Use of the trail and parking lot would have negligible traffic impacts and would not result in traffic congestion (see Section 4.13, “Transportation and Circulation”). Therefore, as discussed above, implementation of the proposed project would not result in, or contribute to, local CO concentrations that exceed the California 1-hour or 8-hour ambient-air quality standards of 20 ppm or 9 ppm, respectively. This impact would be **less than significant**.

Alignment Option 1A

Both construction and use-related activities for Option 1A would be the same type and magnitude of activities that would occur under the Proposed Trail Alignment. Implementation of Option 1A would not result in, or contribute to, local CO concentrations that exceed the California 1-hour or 8-hour ambient-air quality standards of 20 ppm or 9 ppm, respectively, as a result of project-related construction or use-related activities as described above for the proposed trail alignment. This impact would be **less than significant**.

Alignment Option 1C

Both construction and use-related activities for Option 1C would be the same type and magnitude of activities that would occur under the Proposed Trail Alignment. Implementation of Option 1C would not result in, or contribute to, local CO concentrations that exceed the California 1-hour or 8-hour ambient-air quality standards of 20 ppm or 9 ppm, respectively, as a result of project-related construction or use-related activities. This impact would be **less than significant**.

Alignment Option 5A

Both construction and use-related activities for Option 5A would be the same type and magnitude of activities that would occur under the Proposed Trail Alignment. For the reasons above for the proposed trail alignment, implementation of Option 5A would not result in, or contribute to, local CO concentrations that exceed the California 1-hour or 8-hour ambient-air quality standards of 20 ppm or 9 ppm, respectively, as a result of project-related construction or use-related activities. This impact would be **less than significant**.

Mitigation Measures

None required.

Impact 4.2-4	Exposure of sensitive receptors to toxic air contaminant (TAC) emissions.
Applicable Policies and Regulations	NAAQS CAAQS PCAPCD Rules City of Roseville General Plan Air Quality and Climate Change Element
Significance with Policies and Regulations	Proposed Project: Less than significant Alignment Option 1A: Less than significant Alignment Option 1C: Less than significant Alignment Option 5A: Less than significant
Mitigation Measures	None required (Proposed Project, Option 1A, Option 1C, Option 5A)
Significance after Mitigation	Less than significant (Proposed Project, Option 1A, Option 1C, Option 5A)

Proposed Trail Alignment

The exposure of sensitive receptors (e.g., existing offsite residents) to TAC emissions during construction is discussed below. As stated earlier, the project is exempt from Conformity Requirements under the Clean Air Act pursuant to 40 CFR 93.126, and is, by definition, a type of project considered to have no meaningful potential mobile source air toxics (MSAT) effects (FWHA 2012). The nearest sensitive receptors to the proposed trail alignment are adjacent residences, schools, and parks. The predominant wind direction in the project area is from the south/southwest.

Construction Impacts

Construction of the proposed project would result in temporary diesel exhaust emissions from onsite heavy-duty equipment required for site preparation, paving, and other construction activities. Particulate-exhaust emissions from diesel-fueled engines (diesel PM) were identified as a TAC by CARB in 1998. PCAPCD has not established a quantitative threshold of significance for construction-related TAC emissions. In this case, lead agencies may address this issue on a case-by-case basis, taking into consideration the specific construction-related characteristics of each project and its proximity to offsite receptors.

The nearest sensitive receptors to the project site are single-family residences located on properties adjacent to the project boundary along the length of the proposed multi-use trail, with the distance to the homes, themselves, ranging from less than 50 feet to several hundred feet. The dose to which the receptors are exposed (a function of concentration and duration of exposure) is the primary factor used to determine health risk. According to the Office of Environmental Health Hazard Assessment, health risk assessments, which determine the exposure of sensitive receptors to TAC emissions, should be based on a 70-year exposure period; however, for construction, use of mobilized equipment would be temporary (i.e., only constituting 3 percent of the total health-risk exposure period).

The primary construction activities in which TAC emissions (including diesel PM) from heavy equipment would be generated include site preparation and paving. The proposed project would involve relatively small construction crews and would result in daily ground disturbances of less than 1 acre per day. Project construction activities would not exceed PM_{10} or $PM_{2.5}$ thresholds of significance for mass emissions as shown in Table 4.2-3. In addition, there would be no net increases in mobile source emissions as a result of project use.

These factors, in combination with the dispersive properties of diesel PM (Zhu et al. 2002), would not result in the exposure of sensitive receptors to TAC levels that would result in a health hazard or exceed applicable standards during construction of the proposed project. Thus, the exposure of sensitive receptors to TACs would be **less than significant**.

Use-related Impacts

The proposed project is a 4.25-mile multi-use trail intended for bicyclists and pedestrians, and other non-motorized vehicles. Use of the trail would not be a substantial source of TAC emissions. However, a portion of the proposed trail improvements would be located near or directly adjacent to the I-80 freeway, which could result in the exposure of trail users to mobile source TAC emissions.

While the project would result in new trail users within close proximity to the freeway, the exposure period would be relatively short and temporary in nature. Most trail users would travel along the segment trail near the freeway for relatively short periods of time (i.e., minutes within a given hour), rather than for longer-duration or sustained periods of time (i.e., many hours per day over a 70-year period, such as in the case of a single-family residence; see OEHHA health risk assessment criteria in construction impacts discussion above). Thus, users of the trail would not be considered sensitive receptors for the purposes of TAC emissions exposure, and use-related impacts would be **less than significant**.

Alignment Option 1A

Both construction and use-related activities for Option 1A would be the same type and magnitude of activities that would occur under the Proposed Trail Alignment. Both existing sensitive receptors in adjacent land uses and users of the trail would not be exposed to TAC levels that would result in a health hazard or exceed applicable standards during construction or use of the proposed project under Option 1A. This impact would be **less than significant**.

Alignment Option 1C

Both construction and use-related activities for Option 1C would be the same type and magnitude of activities that would occur under the Proposed Trail Alignment. Both existing sensitive receptors in adjacent land uses and users of the trail would not be exposed to TAC levels that would result in a health hazard or exceed applicable standards during construction or use of the proposed project under Option 1C. This impact would be **less than significant**.

Alignment Option 5A

Both construction and use-related activities for Option 5A would be the same type and magnitude of activities that would occur under the Proposed Trail Alignment. Both existing sensitive receptors in adjacent land uses and users of the trail would not be exposed to TAC levels that would result in a health hazard or exceed applicable standards during construction or use of the proposed project under Option 5A. This impact would be **less than significant**.

Mitigation Measures

None required.

This page intentionally left blank.

4.3 BIOLOGICAL RESOURCES

4.3.1 Introduction

This section describes the environmental setting for biological resources and discusses the potential for occurrence of sensitive or important natural resources within the project site. The project site encompasses approximately 60 acres. It is defined as the area where direct, project-related construction would occur or permanent features would be developed, as well as adjacent areas that may be indirectly affected by project activities.

Information on sensitive biological resources previously recorded in the project site was collected through review of U.S. Fish and Wildlife Service (USFWS) species lists, a search of the California Natural Diversity Database (CNDDB), and other existing documentation pertaining to biological resources in the region. Appendix D of this Draft EIR contains the results of select biological records searches. Resources and data reviewed include the following:

- CNDDB record search for the Roseville, Rocklin, Citrus Heights, and Folsom 7.5-minute quadrangles (California Department of Fish and Wildlife [CDFW] 2017).
- USFWS Information for Planning and Conservation Report for the Roseville, Rocklin, Citrus Heights, and Folsom 7.5-minute quadrangles (USFWS 2017a).
- USFWS National Wetlands Inventory (http://www.fws.gov/wetlands/index.html). GIS Layer Data (USFWS 2016).
- California Native Plant Society (CNPS) Inventory of Rare and Endangered Plants (online edition, v8-03) (CNPS 2017).
- Historical aerial photographs of the project site.
- *Biological Resources Study Report for the Dry Creek Greenway Multi-Use Trail Planning and Feasibility Study* (ICF Jones & Stokes 2009).

A habitat reconnaissance survey was performed to identify the vegetation and habitats present within the project site, known or potentially present special-status species, and areas that may qualify as waters of the United States or waters of the state. Following the reconnaissance survey, it was determined that focused surveys for valley elderberry longhorn beetle (*Desmocerus californicus dimorphus*) (VELB), a wetland delineation, an aquatic habitat assessment for anadromous fish habitat, and a western pond turtle survey were necessary.

Biological resource technical reports were prepared to address potential impacts of the proposed project on federally listed Central Valley steelhead (ECORP 2016) and VELB (ECORP 2017) and are summarized in this section.

A delineation of waters of the United States within the project site was conducted according to methods described in the USACE Wetlands Delineation Manual (Environmental Laboratory 1987) and Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Arid West Region (USACE 2008).

Comments received on the Notice of Preparation for the EIR addressed the removal of trees and subsequent effects on the creeks, concern for the 30-year old native oaks in Meadow Oaks neighborhood along the trail, and habitat for existing wildlife.

4.3.2 Environmental Setting

The project site is located within the City of Roseville (City) in Placer County. The project site spans the Citrus Heights U.S. Geological Survey (USGS) 7.5-minute quadrangle Section 11 and 12, Township 10 North, and Range 6 East and the Folsom USGS 7.5-minuie quadrangle, Sections 7, 17, and 18, Township 10 North, and Range 7 East.

The project site is within the Sacramento Valley geographic subdivision of the Great Central Valley in the California Floristic Province (Sawyer et al. 2009), and in the U.S. Department of Agriculture (Natural Resources Conservation Service [NRCS] 2006) Land Resource Region Mediterranean California Subregion. The climate is characterized by hot, dry summers and cool, moist winters. Based on weather data from the nearby Folsom Dam weather station, the mean annual precipitation is 23.92 inches, and the mean annual air temperature is 62ºF (Western Regional Climate Center 2016).

The proposed trail would follow creek corridors along portions of Dry, Cirby, and Linda Creeks (see Exhibit 3-2 in Chapter 3, “Project Description”). These corridors currently contain segments of existing unimproved natural surface paths and paved multi-use paths, some of which do not meet current City design standards. Much of the corridor has been used historically for recreation, infrastructure maintenance access, and transportation, and today it continues to be used for these purposes along both improved and unimproved segments. A number of habitat restoration and mitigation projects have been conducted in the vicinity of the project over the years for both flood control and habitat improvement. The City Flood Control Project of 1999 required a permit from USACE. The USACE permit included a number of mitigation measures, including dedication of conservation easements on certain parcels in the Hurst Way/W. Colonial Parkway area that are proposed for use by the proposed project, and mitigation plantings that may be affected by the proposed project. The conservation easements have not yet been recorded because property purchases pursuant to the Flood Control Project permit are still underway. Upon completion of the property purchases, the City will work with USACE to dedicate a conservation easement or alternative restrictions for use of these parcels. It is anticipated that the proposed project will be a permitted use, consistent with City zoning and land use regulations for other open space areas. If the bike trail construction is anticipated to impact any previously planted Flood Control Project mitigation plantings, then the City will obtain approval of from USACE through a USACE permit process prior to project construction.

PHYSICAL CONDITIONS

The project site is located within a semi-urbanized portion of Roseville (Exhibit 4.3-1). The City has retained over 4,000 acres of designated open space, including riparian corridors along city creeks (City of Roseville 2015). These open space areas support terrestrial and aquatic species and sensitive natural communities. Within more urbanized parts of the City, including the project site, designated open space is generally limited to creek corridors. Habitat quality ranges from disturbed, low-quality to high-quality habitat. The habitat value of the urban creek corridor that comprises the project site is diminished because of adjacent and surrounding development; however, the project site provides year-round and seasonal migratory habitat for a variety of fish and wildlife species. The creek corridor provides important local habitat value (foraging, nesting, and cover) for a variety of species that can tolerate human and domestic animal presence.

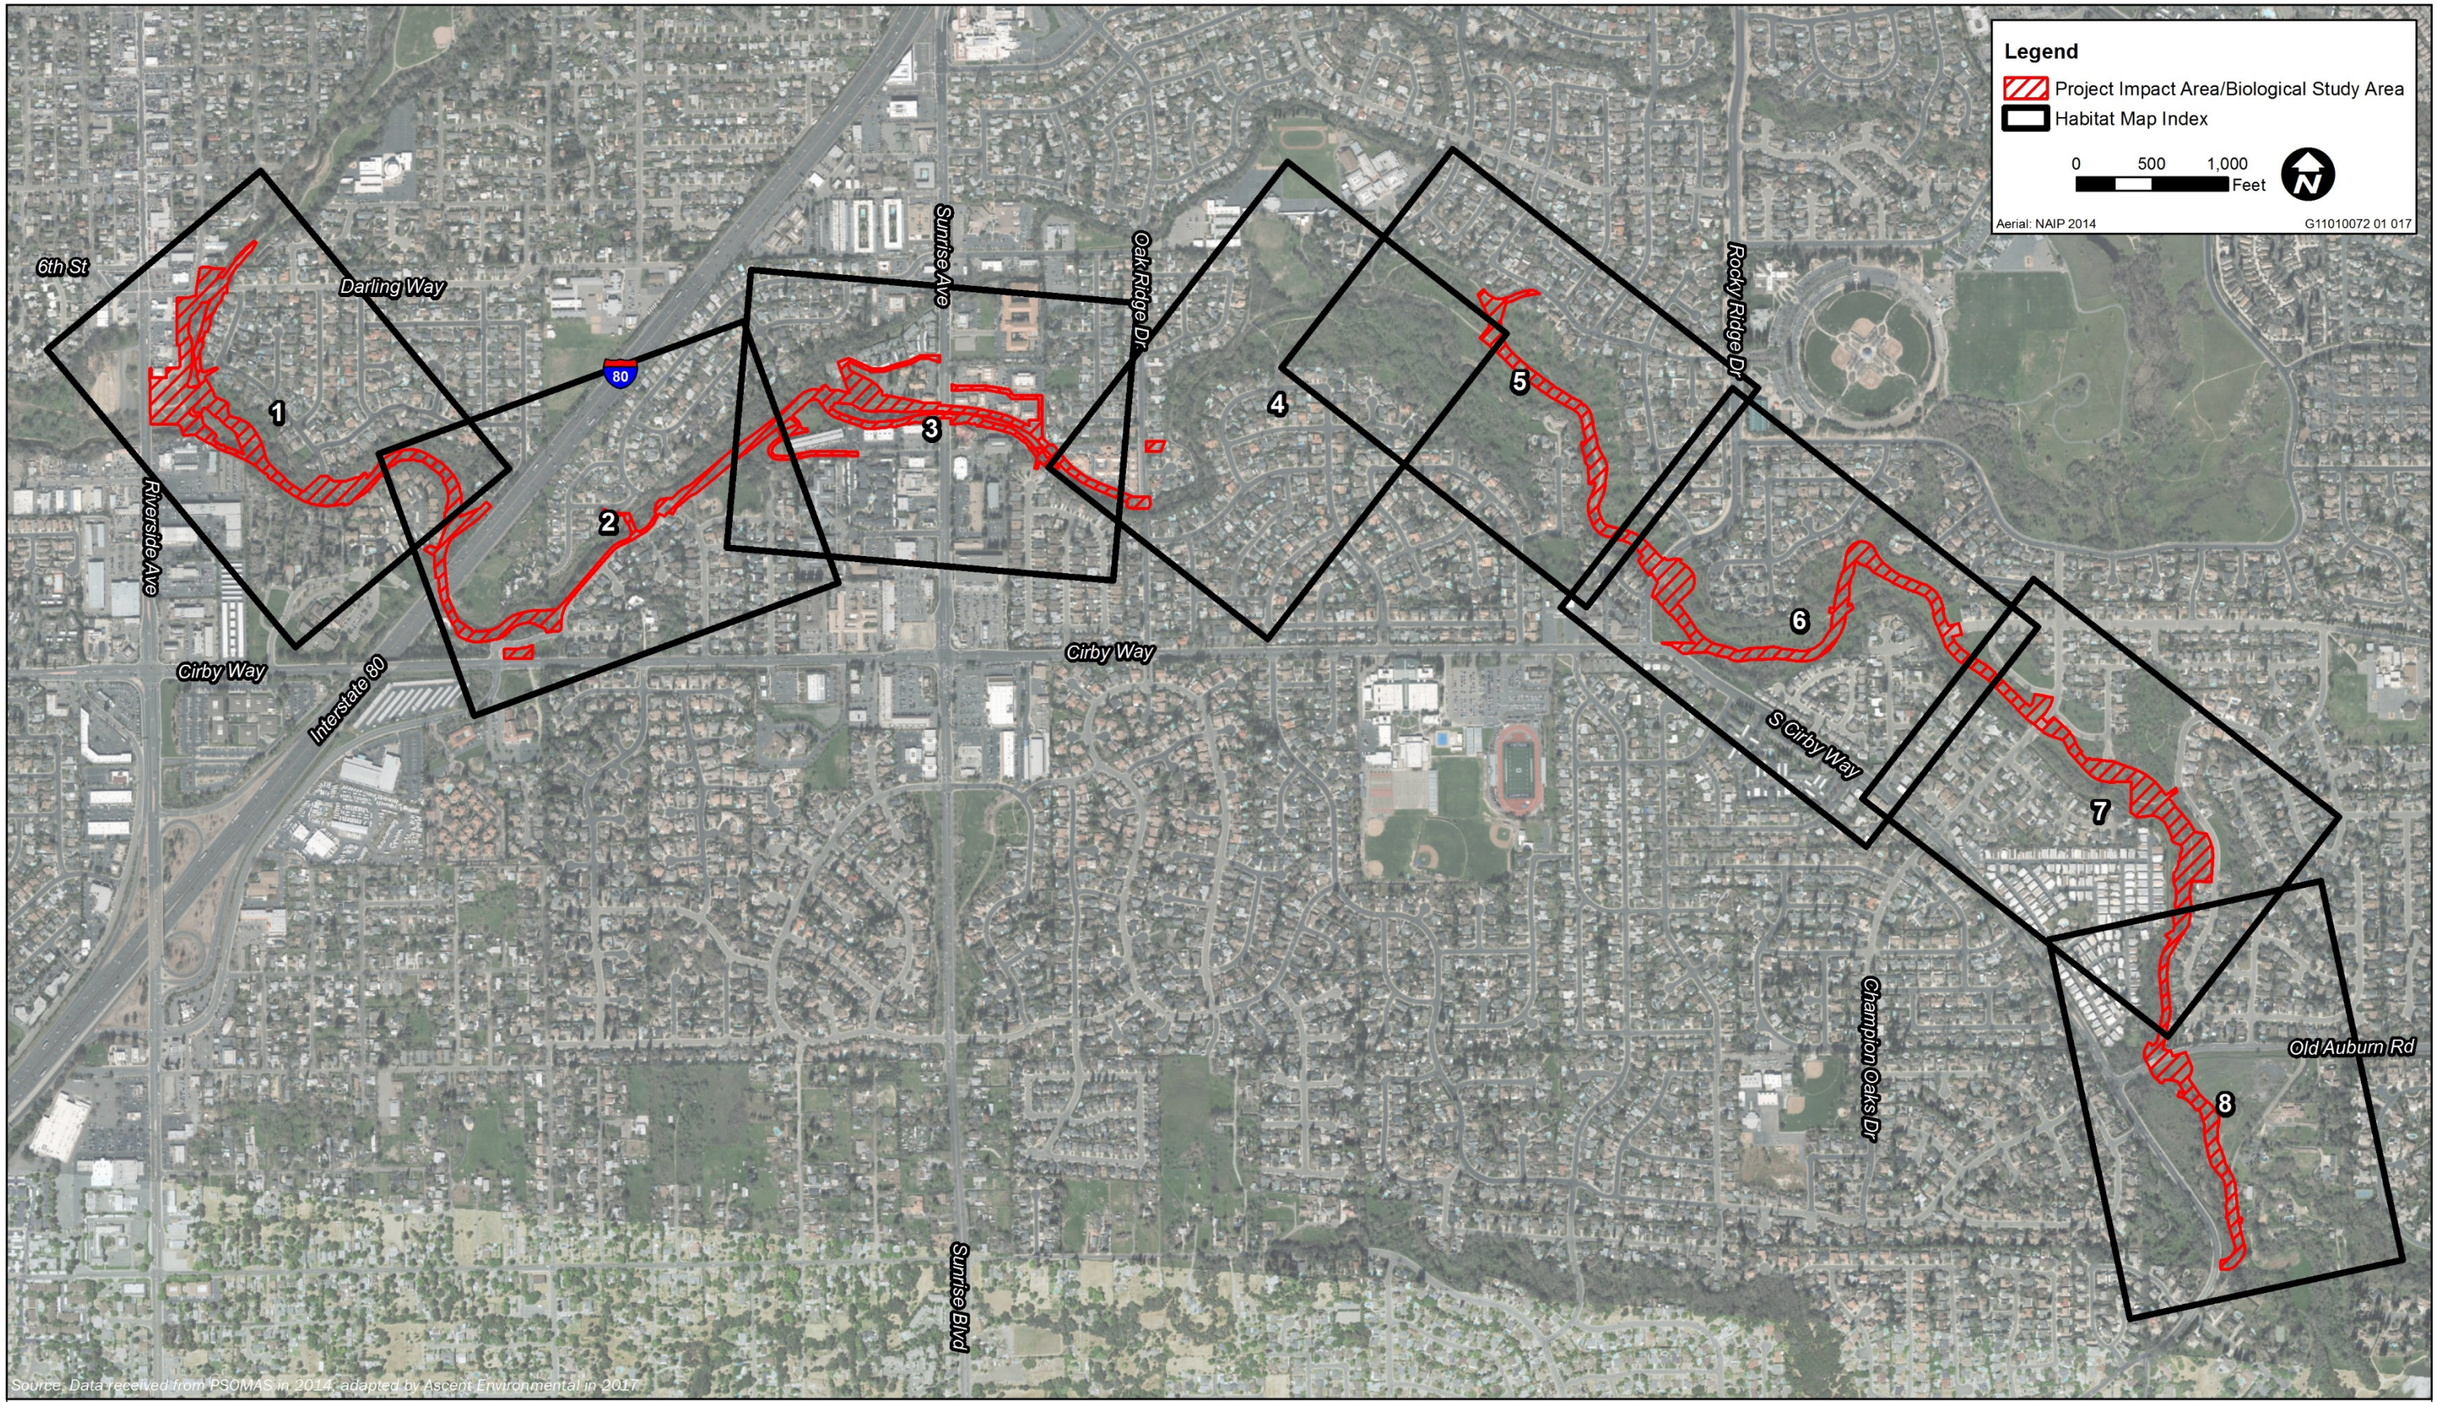

Exhibit 4.3-1

Project Site

ASCENT ENVIRONMENTAL

The project site is composed of leveled terrain and is situated at an elevation range of approximately 130 to 155 feet above mean sea level. The topography is characterized as gently sloping hills and seasonal streams. The project site is located in the Lower American hydrologic unit (HUC 18020111) (USGS 2017) within the Dry Creek watershed and encompasses portions of Strap Ravine, Linda Creek, Cirby Creek, and Dry Creek. Linda Creek and Cirby Creek are both major tributaries to Dry Creek. Dry Creek drains southwest to Steelhead Creek (i.e., Natomas East Main Drainage Canal), which flows to the Sacramento River. The majority of the project site is within the floodplain and mapped as NRCS soil type Xerofluvents, frequently flooded. Xerofluvents are poorly drained alluvial soils found in drainageways and on slopes, and flood frequently. Other minor soil units include the following: (141) Cometa-Fiddyment complex, 1 to 5 percent slopes; (142) Cometa-Ramona sandy loams, 1 to 5 percent slopes; (146) Fiddyment loam, 1 to 8 percent slopes; (175) Ramona sandy loam, 2 to 9 percent slopes; (193) Xerofluvents, occasionally flooded; (194) Xerofluvents, frequently flooded; (196) Xerothents, cut and fill areas; (229 sa) Urban land- Xerarents-Fiddyment complex, 0 to 8 percent slopes; and (242) Xerofluvents, 0 to 2 percent slopes, flooded.

BIOLOGICAL CONDITIONS

The following sections describe the habitats and wildlife present within the project site.

Aquatic Habitats

Aquatic habitats found within the project site include wetlands (seasonal wetland and freshwater pond), and other waters of the United States (perennial and intermittent streams). A total of 0.20 acre of wetlands and 4.12 acres (5,383 linear feet) of other waters have been mapped within the project site (Table 4.3-1). These include portions of Linda Creek, Dry Creek, Cirby Creek, and Strap Ravine; two unnamed perennial streams; an ephemeral drainage; an intermittent drainage; a wetland; and a freshwater pond. The potentially jurisdictional limits are based on professional judgment and best available data at the time of mapping. Mapped limits are subject to modification during final project design and USACE verification process.

Table 4.3-1 Aquatic Habitats within the Project Site

Aquatic Habitats	Acres	Linear Feet
Total Other Waters	4.12	5,383
Total Wetlands	0.20	NA
Total Wetlands and Other Waters	**4.33**	**5,383**

Notes:
* Wetlands previously verified by the USACE for the Old Auburn Ranch Property
** National Wetlands Inventory mapped wetland.
Source: Compiled by Ascent Environmental 2016

Wetlands

Seasonal wetlands are ephemerally wet because of accumulation of surface runoff and rainwater within low-lying areas. Inundation periods are generally shorter, and they are commonly dominated by low growing, annual hydrophytic herbs. Seasonal wetlands typically occur in swale or concave topography. This type of wetland is generally dominated by annual facultative wetland species (species that grow in wetland conditions 67 to 99 percent of the time) that often form a closed to open canopy and grow in depressional areas that are seasonally flooded by rainwater. In the project site, 0.01 acre of seasonal wetland habitats occur within the Old Auburn Road parcel. Additionally, seasonal wetland habitat exists below the ordinary high-water mark (OHWM) of the perennial streams and is included in the perennial stream habitat discussed below. Seasonal wetlands are dominated by a mix of herbs and forbes, including curly dock (*Rumex crispus*), Italian ryegrass (*Festuca perennis*), Baltic rush (*Juncus balticus*),

ladies thumb (*Polygonum persicaria)*, western vervain (*Verbena lasiostachys*), Bermuda grass (*Cynodon dactylon*), and Johnsongrass (*Sorghum halepense*).

Wetlands provide foraging and breeding habitat for a variety of wildlife species. Wetland ponds provide habitat for amphibians, including western toad (*Anaxyrus boreas*) and Sierran treefrog. (*Pseudacris sierra*). They also provide a valuable food source for amphibians as well as the many birds that overwinter in or migrate through the region. Birds such as killdeer and mallard use wetlands for nesting and foraging in both winter and spring. A freshwater pond was created between 1993 and 1998 as part of the development of adjacent residential properties, and 0.20 acre of the pond falls within the project site. This pond is currently exhibiting functions more typical of a seasonal wetland and is dominated by cattails, (*Typha latifolia)*, dock, dallisgrass (*Paspalum dilatatum*), and ladies thumb.

Other Waters of the United States

Other waters of the United States within the project site include perennial portions of Strap Ravine, Linda Creek, Cirby Creek, and Dry Creek, as well as non-relatively permanent tributaries to these streams. Field indicators of an OHWM included water lines, drift deposits, shelving, sediment sorting, and exposed roots. A total of 4.12 acres of other waters were identified within the project site.

The non-relatively permanent tributaries include an ephemeral drainage with a poorly defined OHWM located north of Cirby Creek and a deeply incised intermittent stream that transmits stormwater flows from neighborhoods south of Cirby Creek into the creek. The ephemeral drainage is minimally vegetated with adjacent areas being dominated by mugwort (*Artemisia douglasiana*)*,* Santa Barbara sedge (*Carex barbarae*), and bedstraw (*Galium aparine*). The intermittent stream is fed by two large culverts. Banks are steep and sparsely vegetated and the adjacent area is dominated by riparian vegetation including willows (*Salix* sp.), common buttonbush (*Cephalanthus occidentalis*), and walnut (*Juglans* sp.).

Linda Creek is a single channel with perennial flow in a southeast to northwestern direction. The channel bottom varies from gravel and sand, to rock amour and rubble, and is primarily unvegetated with patches of emergent wetland vegetation along the banks. Banks are steep and well defined in most locations. Overhanging riparian vegetation is abundant and includes sandbar willow (*Salix exigua*), common buttonbush, boxelder (*Acer negundo*), walnut, Himalayan blackberry (*Rubus armeniacus*), and Fremont cottonwood (*Populus fremontii*). Affected by urbanization, Linda Creek displays a large variety of channel width and structure. At the southeastern end of the project site an old road crossing at Spahn Ranch Road collapsed into Linda Creek. Concrete footings are in place along the bank in this area, and pieces of asphalt road are within the creek. In the northern portion of the creek, a variety of bank stabilization measures have been used, including concrete blocks and bags and gunnite. Exposed banks are typically sparsely vegetated and exhibit active erosion, with overhanging riparian trees and shrubs rooted in the upper bank.

Strap Ravine flows into Linda Creek north of North Cirby Way and McKinley Drive. Goat grazing has recently occurred in this area. The banks and bed of Strap Ravine are unvegetated fine sediments and cobbles. The riparian vegetation consists of heavily browsed willows. The area of Strap Ravine that crosses the project site has an existing paved bridge crossing.

Linda Creek flows into Cirby Creek west of Sunrise Avenue. Cirby Creek is a single thread channel with perennial flow in a southeast to northwestern direction before discharging into Dry Creek just east of Riverside Drive. The channel bottom varies from gravel and sand to boulders and is unvegetated with interspersed pools and riffles. Below the OHWM of the creek, emergent wetland vegetation was observed along benches, including cattails (*Typha latifolia*), California bulrush (*Schoenoplectus californicus*), Baltic rush, tall flatsedge (*Cyperus eragrostis*), dock (*Rumex* sp.), sedges, and cocklebur (*Xanthium strumarium*). The creek displays both emergent wetland and perennial stream characteristics.

Cirby Creek discharges into Dry Creek at the northernmost boundary of the project site, north of Darling Way. Dry Creek flows in a southwestern direction. The channel bottom is primarily sediment, sand, and gravel with steep banks that are sparsely vegetated with scattered boulder outcropping. Multiple side channels and associated riparian plantings were installed west of Dry Creek, south of Darling Way, as part of a flood control and riparian restoration project.

Perennial emergent wetlands habitat occurs within the perennial streams (Strap Ravine, Linda Creek, Cirby Creek, and Dry Creek). This wetland habitat is mapped as part of the other waters of the United States. This type of habitat is generally dominated by perennial emergent wetland species (species that grow in wetland conditions more than 99 percent of the time), which often form a closed canopy and grow in areas that are permanently or seasonally flooded by slow-moving or stagnant fresh water. Emergent wetlands derive water from association with perennial or near perennial surface water sources, such as overland flow from creeks or other surface water sources; ponded seasonal precipitation; and shallow groundwater tables. These wetlands may be entirely vegetated or partially vegetated with an open water component, or may be dry in summer. Emergent wetlands are typically dominated by hydrophytic grasses and grass-like species. Dominant herbaceous hydrophytic vegetation includes bulrush, cattail, curly dock, Baltic rush, smartweed, Bermuda grass, and irrigated pasture grasses. Some emergent wetlands in the project site also contain willows. These wetlands provide food, cover, and water for a variety of species of birds, and numerous mammals, reptiles, and amphibians occupying the open water and adjacent grassland habitats. Vegetation growing along the edges of water bodies also provides nesting habitat for several bird species. Aquatic species known to occur within the vicinity include Sierran treefrog, western toad, muskrat (*Ondatra zibethicus*), red swamp crayfish (*Procambarus clarkii*), American bullfrog (*Lithobates catesbeianus*), beaver (*Castor canadensis*), and river otter (*Lontra canadensis*). Fish species in the project site include bluegill (*Lepomis macrochirus*), green sunfish (*Lepomis cyanellus*), largemouth bass (*Micropterus salmoides*), rainbow trout (*Oncorhynchus mykiss irideus*), mosquitofish (*Gambusia affinis*), Central Valley fall-run Chinook salmon (*Oncorhynchus tshawytscha*), and Central Valley steelhead (*Oncorhynchus mykiss*).

Habitat Types

The project site supports both sensitive and common habitat types. Sensitive natural communities are habitats considered sensitive because of high species diversity, high productivity, unusual characteristics, limited distribution, declining status, or a combination of these attributes. Local, state, and federal agencies consider such habitats important. The USACE and the Environmental Protection Agency (EPA) consider wetland habitats important for water quality and wildlife. The habitat types in the project site that meet the criteria for sensitive natural communities are valley oak riparian woodland, riparian, and the previously described wetlands and other waters of the United States.

Habitat types on the project site are shown in Exhibits 4.3-2a through 4.3-2h. Table 4.3-2 summarizes the acreage of upland (non-aquatic) habitat types in the project site. These upland communities are described in the following sections.

Table 4.3-2 Upland Habitat types within the Project Site

Upland Habitat Types	Area (acres)
Valley Oak Riparian Woodland	17.33
Riparian	3.57
Non-Native Annual Grassland	17.66
Developed/Ruderal	4.92
Total	**43.48**

Source: Compiled by Ascent Environmental 2017

Valley Oak Riparian Woodland

Valley oak riparian woodland dominates upslope vegetation throughout the floodplain and totals 17.33 acres. This community can be broad in places, including at the southeastern terminus of the project site and in the vicinity of Sierra Gardens. Valley oak (*Quercus lobata*), interior live oak (Q. *wislizeni*), and blue oak (Q. *douglasii*) dominate the upland canopy. Other species in the upland canopy include walnut, Western sycamore (*Platanus racemose*), and box elder (*Acer negundo*). Poison oak (*Toxicodendron diversilobum*), privet (*Ligustrum* sp.), coyote bush (*Baccharis pilularis*), sapling oaks, and escaped horticultural species provide an understory. Ground cover under the valley oak riparian woodland includes naturalized grasses and forbs and other species, including mustards (*Brassicacea*e spp.), miner's lettuce (*Claytonia perfoliata*), Bermuda grass, dogtail grass (*Cynosurus echinatus*), mallows (*Malva* spp.), milkweed (*Asclepias californicum*), nightshade (*Solanum marginatum*), horsebane (*Erigeron canadensis*), and poison hemlock (*Conium maculatum*). Reptiles associated with oak woodland include western fence lizard (*Sceloporus occidentalis*), southern alligator lizard (*Elgaria multicarinata*), and gopher snake (*Pituophis catenifer*). Birds documented include white-breasted nuthatch (*Sitta carolinensis*), western scrub-jay (*Aphelocoma californica*), Nuttall's woodpecker (*Picoides nuttallii*), acorn woodpecker (*Melanerpes formicivorus*), and red-shouldered hawk (*Buteo lineatus*). Mammals found in the oak woodland include opossum (*Didelphis virginiana*), brush deermouse (*Peromyscus boylii*), western gray squirrel (*Sciurus griseus*), eastern fox squirrel (*Sciurus niger*), and coyote (*Canis latrans*).

Valley oak riparian woodland is considered a sensitive natural community by CDFW because it provides food and cover for many species of wildlife. Oaks are considered important to some birds and mammals as food resource (i.e. acorns and browse).

Non-Native Annual Grassland

There is a total of 17.66 acres of non-native annual grassland within the project site. Annual grassland within the project site characterized as non-native grassland is a dense to sparse cover of annual grasses. This community is often associated with numerous species of showy-flowered, native annual forbs ("wildflowers"), especially in years of favorable rainfall. Germination occurs with the onset of the late fall rains; growth, flowering, and seed-set occur from winter through spring. With a few exceptions, the plants are dead through the summer-fall dry season, persisting as seeds. Dominant plant species includes yellow star thistle (*Centaurea solstitialis*), mustard, fennel (*Foeniculum vulgare*), Himalayan blackberry, and bromus (*Bromus* spp.). Non-native annual grassland is a common natural community.

Wildlife species commonly associated with non-native annual grasslands in the project site include western kingbird (*Tyrannus verticalis*), deer mouse (*Peromyscus maniculatus*), western harvest mouse (*Reithrodontomys megalotis*), California ground squirrel (*Otospermophilus beecheyi*), Botta's pocket gopher (*Thomomys bottae*), black-tailed jackrabbit (*Lepus californicus*), western fence lizard (*Sceloporus occidentalis*), California kingsnake (*Lampropeltis getula californiae*), and Pacific gopher snake (*Pituophis catenifer catenifer*). In addition, annual grassland provides foraging habitat for predatory birds that nest in the adjacent woodlands such as red-tailed hawk (*Buteo jamaicensis*), red-shouldered hawk (*Buteo lineatus*), white-tailed kite (*Elanus leucurus*), and American kestrel (*Falco sparverius*).

Riparian

There is a total of 3.57 acres of riparian habitat within the project site. Riparian habitat occurs along the upper creek banks and extends into the floodplain and is composed of a mix of native trees and shrubs (valley oak, alder, sycamore, willows) and horticultural and invasive species (catalpa, privet, oleander, Himalayan blackberry, and periwinkle). The understory varies depending on the location of the riparian habitat (creek bank or floodplain). Along the creek banks, the understory is a mix of Himalayan blackberry, sedges, grasses, and wetland forbs, including cattail, umbrella sedge, willow herb, Italian ryegrass, and scattered willow seedlings. In floodplain areas, the forest understory is dominated by annual grassland and horticultural and native shrub and tree species. Birds such as heron (*Ardea* spp.)

and belted kingfisher (*Megaceryle alcyon*) forage in the creek, primarily along the water's edge. Many species of insectivorous birds, such as white-throated swift (*Aeronautes saxatalis*), barn swallow (*Hirundo rustica*), cliff swallow (*Petrochelidon pyrrhonota*), and black phoebe (*Sayornis nigrican*s) catch their prey over open water.

The riparian community is considered a sensitive natural community by CDFW. Riparian vegetation filters pollutants in runoff; supports bank stability; and provides shade, cover, and food sources for aquatic organisms; and habitat and food for non-aquatic species.

Developed/Ruderal

There is a total of 4.92 acres of developed/ruderal habitat within the project site. Developed or ruderal (weedy) areas include dirt roads, paved roadbeds, and commercial and residential development and associated landscaping. Dominant vegetation, where present, is ruderal including yellow star thistle, prickly lettuce (*Lactuca serriola*), and non-native grasses. The developed areas within the project site have been disturbed by humans and have no potential to support special-status species.

Habitat Connectivity

Corridors between habitat concentrations serve important ecological functions related to connectivity, such as species dispersal, genetic exchange, and resilience to habitat effects of climate change. The California Department of Transportation (Caltrans) and CDFW commissioned the California Essential Habitat Connectivity Project which mapped Essential Connectivity Areas throughout California. Although the project site has not been identified as an Essential Connectivity Area, the project site is an urbanized creek corridor bounded by development. The project site functions as a local biological corridor, providing potential for local species migration and dispersal through developed portions of the City to larger open space areas to the west; because of extensive development in the eastern portion there is no connection to other habitat areas to the east. Additionally, the Dry Creek corridor provides migration, spawning, and rearing habitat for federally threatened Central Valley steelhead. Central Valley fall-run Chinook salmon is also known to occur in Dry Creek; however, spawning and summer rearing habitat likely only occurs in Antelope Creek, Miner's Ravine, and Secret Ravine because of excessively high temperatures in Cirby Creek and Linda Creek (ECORP 2016).

SPECIAL-STATUS SPECIES

Special-status species include plants and animals that are legally protected or otherwise considered sensitive by federal, state, or local resource agencies and conservation organizations. Special-status species often have relatively limited distributions and generally require specialized habitat conditions. Special-status species are defined as plants and animals in the following categories:

- listed or proposed for listing as threatened or endangered under the federal Endangered Species Act (ESA) or candidates for possible future listing;
- identified as a Bird Species of Conservation Concern by USFWS;
- listed or candidates for listing by the State of California as threatened or endangered under the California Endangered Species Act (CESA);
- listed as rare under the California Native Plant Protection Act;
- listed as Fully Protected under the California Fish and Game Code;
- identified by the CDFW as species of special concern;
- considered by CDFW to be "rare, threatened or endangered in California" (California Rare Plant Ranks (CRPR) (Lists 1A, 1B, and 2) as described below;

- considered a locally significant species, that is, a species that is not rare from a statewide perspective but is rare or uncommon in a local context such as within a county or region (CEQA §15125 (c)) or is so designated in local or regional plans, policies, or ordinances (CEQA Guidelines, Appendix G); or
- otherwise meets the definition of rare or endangered under CEQA §15380(b) and (d).

CDFW ranks species according to rarity and endangerment and categorizes plant species of concern. The CRPR is summarized as follows:

- CRPR 1A - Plants presumed to be extinct in California;
- CRPR 1B - Plants that are rare, threatened, or endangered in California and elsewhere;
- CRPR 2 - Plants that are rare, threatened, or endangered in California but more common elsewhere;
- CRPR 3 - Plants about which more information is needed (a review list); and
- CRPR 4 - Plants of limited distribution (a watch list).

All plants with a CRPR are considered “special plants” by CDFW. The term “special plants” is a broad term used by CDFW to refer to all of the plant taxa inventoried in CDFW’s CNDDB, regardless of their legal or protection status. Plants ranked as CRPR 1A, 1B, and 2 may qualify as endangered, rare, or threatened species within the definition of State CEQA Guidelines CCR Section 15380. CDFW recommends, and local governments may require, that CRPR 1A, 1B, and 2 species be addressed in an EIR. In general, CRPR 3 and 4 species do not meet the definition of endangered, rare, or threatened pursuant to CEQA Section 15380; however, these species may be evaluated by the lead agency on a case-by-case basis to determine significance criteria under CEQA.

Queries of the USFWS Birds of Conservation Concern List and CNDDB returned 28 special-status birds and two birds tracked by the CNDDB with no status. Of those 30 birds, eight are known to occur at the project site, and 10 have a low to moderate likelihood of occurring at the project site. The project site lacks suitable habitat for the other 12 birds; they have no potential of occurring at the project site, and are not discussed further.

Table 4.3-3a lists the special-status plant and wildlife species identified in the database searches (CNDDB and USFWS Information for Planning and Consultation Report) along with their habitat requirements, status, and potential to occur in the project site. Table 4.3-3b lists the sensitive natural habitats and/or sensitive vegetation alliances identified in the database searches along with their potential to occur in the project site.

Table 4.3-3a Special-Status Species Potentially Occurring or Known to Occur in the Project Site

Common Name	Scientific Name	Legal Status [1]	General Habitat Description	Habitat	Potential to occur	Rationale
Plants						
California balsamroot	*Balsamorhiza macrolepis* var. *macrolepis*	CRPR 1B.2	Cismontane woodland, valley and foothill grasslands, typically found within serpentine soils, blooms March-June	Absent	None	No serpentine soils present within the project site.
Hispid bird's-beak	*Chloropyron (=Cordylanthus) mollis* ssp. *hispidus*	CRPR 1B.1	Alkaline or saline flats in alkali meadows, iodine bush scrub, and alkali grasslands. Blooms June-Sept.	Absent	None	No suitable alkaline habitat present within the project site.
Brandegee's clarkia	*Clarkia biloba* ssp. *brandegeeae*	CRPR 4.2	Foothill woodland, chaparral, cismontane woodland, lower montane coniferous forest, often in roadcuts. Blooms May-July.	Absent	None	No suitable habitat present within the project site.
Dwarf downingia	*Downingia pusilla*	CRPR 2B.2	Vernal pools and swales, valley and foothill grasslands (mesic). Blooms March-May.	Absent	None	No suitable habitat present within the project site.
Stinkbells	*Fritillaria agrestis*	CRPR 4.2	Chaparral, cismontane woodland, pinyon and juniper woodland, valley and foothill grassland with clay substrate, sometimes serpentine. Blooms March-June.	Absent	None	No suitable habitat present within the project site.
Boggs Lake hedge-hyssop	*Gratiola heterosepala*	CRPR 1B.2	Vernal pools, marshes and swamps (lake margins) with clay substrate. Blooms April-August.	Absent	None	No suitable habitat present within the project site.
Red Bluff dwarf rush	*Juncus leiospermus* var *leiospermus*	CRPR 1B.1	Typically found in vernally mesic habitats including chaparral, cismontane woodland, meadows and seeps, valley and foothill grassland, and vernal pools. Blooms March-June.	Absent	None	No suitable vernally mesic habitat present within the project site.
Legenere	*Legenere limosa*	CRPR 1B.1	Vernal pools. Blooms April-June	Absent	None	No suitable habitat present within the project site.
Pincushion navarretia	*Navarretia myersii ssp. myersii*	CRPR 1B.1	Edges of vernal pools, often acidic. Blooms April-May.	Absent	None	No suitable habitat present within the project site.
Adobe navarretia	*Navarretia nigelliformis* ssp. *Nigelliformis*	CRPR 4.2	Typically found in clay and sometimes in serpentine soils within valley and foothill grassland (vernally mesic) and vernal pools.	Absent	None	No suitable habitat present within the project site.
Slender Orcutt Grass	*Orcuttia tenuis*	FT, SE CRPR 1B.1	Typically found in vernal pools. Blooms May-September, sometimes till October.	Absent	None	No suitable habitat present within the project site.
Sacramento Orcutt grass	*Orcuttia viscida*	FE, SE CRPR 1B.1	Northern Hardpan and Northern Volcanic Mudflow vernal pools. Blooms April-July, sometimes till September.	Absent	None	No suitable habitat present within the project site.
Sanford's arrowhead	*Sagittaria sanfordii*	CRPR 1B.2	Sloughs and slow-moving streams with silty or muddy substrate, associated with emergent marsh vegetation. Blooms May-Nov.	Present	Medium	Habitat at margins of perennial streams and in pond. Not observed during field surveys.

Table 4.3-3a Special-Status Species Potentially Occurring or Known to Occur in the Project Site

Common Name	Scientific Name	Legal Status [1]	General Habitat Description	Habitat	Potential to occur	Rationale
Animals						
An andrenid bee	*Andrena subapasta*	--	A vernal pool and grassland bee. Collects pollen primarily from California sandwort (*Eremogone =Arenaria californica*) but also butter and eggs (*Orchocarpus erianthus*) and goldfields (*Lastenia* spp.)	Present	None	California sandwort occurs in sagebrush scrub, lodgepole forest, and northern juniper woodland; therefore, it is not expected to occur within the project site. Goldfield flowers could occur at the project site but none were observed during the surveys. Despite that butter and eggs plant was observed during the surveys, this uncommon bee species occurrence dates back to 1932. No new bee occurrences reported within 5-miles of the project site
Conservancy fairy shrimp	*Branchinecta conservatio*	FE	Typically found in vernal pools that are relatively large and turbid.	Absent	None	No suitable vernal pool habitat present within the project site.
Vernal pool fairy shrimp	*Branchinecta lynchi*	FT	Vernal pools; also sandstone rock outcrop pools	Absent	None	No suitable vernal pool or rock outcrop habitat present within the project site.
Venal pool tadpole shrimp	*Lepidurus packardi*	FE	Vernal pools and ephemeral stock ponds	Absent	None	No suitable vernal pool or ephemeral stock pond habitat present within the project site.
California linderiella	*Linderiella occidentalis*	--	Seasonal pools in unplowed grasslands with old alluvial soils underlain by hardpan or in sandstone depressions. Water in the pools typically has low alkalinity, conductivity and total dissolved solids.	Absent	None	No suitable habitat present within the project site.
Valley elderberry longhorn beetle	*Desmocerus californicus dimorphus*	FT	Riparian and oak savanna habitats with elderberry shrubs; elderberries are host plant	Present	High	Suitable elderberry shrubs present in several locations within the project site and within the 165-foot buffer around the project site,
California tiger salamander	*Ambystoma californiense*	FT, ST	Typically found in natural ephemeral pools or ponds that mimic them (stock ponds that are allowed to go dry).	Absent	None	No suitable habitat present within the project site.
California red-legged frog	*Rana aurora draytoni*	FT, SSC	Permanent and semipermanent aquatic habitats, such as creeks and coldwater ponds, with emergent and subemergent vegetation and riparian species along the edges; may estivate in rodent burrows or cracks during dry periods	Absent	None	Potential dispersal habitat is present in the study area but no occurrences have been documented in the region. No suitable breeding habitat present within the project site. Presence of predatory fish, crayfish, feral cats likely preclude the presence of this species.
Western spadefoot	*Scaphiopus hammondii*	SSC	Shallow streams with riffles and seasonal wetlands, such as vernal pools in annual grasslands and oak woodlands	Absent	None	No suitable habitat present within the project site.

Table 4.3-3a Special-Status Species Potentially Occurring or Known to Occur in the Project Site

Common Name	Scientific Name	Legal Status [1]	General Habitat Description	Habitat	Potential to occur	Rationale
Giant garter snake	*Thamnophis gigas*	FT, ST	The giant garter snake has specific habitat needs that include summer aquatic habitat for foraging, bankside basking areas with nearby emergent vegetation for cover and thermal regulation, and upland refugia for extended periods of inactivity. Perennial wetlands provide the highest quality habitat for the giant garter snake, and rice lands, with interconnected water conveyance structures, serve as an alternative habitat in the absence of higher quality wetlands.	Absent	None	Suitable habitat is absent and no occurrences have been documented in the region.
Western pond turtle	*Actinemys marmorata*	SSC	Woodlands, grasslands, and open forests; occupies ponds, marshes, rivers, streams, and irrigation canals with muddy or rocky bottoms and with watercress, cattails, water lilies, or other aquatic vegetation	Present	Present	Observed in the project site, suitable aquatic habitat is present throughout the project site creeks, with suitable adjacent upland habitat in several locations.
Cooper's hawk	*Accipiter cooperi*	CDFW-WL	Typically found in woodland, chiefly of open, interrupted or marginal type. Nest sites mainly in riparian growths of deciduous trees, as in canyon bottoms on river flood-plains; also, in live oaks.	Present	Present	Observed in the project site, suitable nesting habitat present.
Western grebe	*Aechmophorus occidentalis*	BCC-W	Western Grebes breed on freshwater lakes and marshes with extensive open water bordered by emergent vegetation. During winter they move to saltwater or brackish bays, estuaries, or sheltered sea coasts and are less frequently found on freshwater lakes or rivers.	Absent	None	The project site does not support suitable habitat for this species.
Tricolored blackbird	*Agelaius tricolor*	BCC-YR, SC	Nests in patches of thorny vegetation, including blackberry and thistles, which are protected from predators, and within approximately 1 mile of suitable foraging habitat, including open water with abundant insect populations, crop land, or dairies.	Absent	None	Although this species could migrate through the project site, the project site does not support suitable foraging habitat and nesting is unlikely.
Grasshopper sparrow	*Ammodramus savannarum*	SSC	Typically found in dense grasslands on rolling hills, lowland plains, in valleys and on hillsides on lower mountain slopes. Favors native grasslands with mix grasses, forbs and scattered shrubs. Loosely colonial when nesting.	Absent	None	No suitable habitat present in the project site.
Great egret	*Ardea alba*	--	Colonial nester. Rookery sites located near marshes, tide-flats, irrigated pastures, and margins of rivers and lakes.	Present	Present	No rockery sites have been observed during field surveys. Species has been observed foraging within the project site.

Table 4.3-3a Special-Status Species Potentially Occurring or Known to Occur in the Project Site

Common Name	Scientific Name	Legal Status [1]	General Habitat Description	Habitat	Potential to occur	Rationale
Great blue heron	*Ardea herodias*	--	Colonial nester in tall trees, cliffsides, and sequestered spots on marshes. Rookery sites in close proximity to foraging areas: marshes, lake margins, tide-flats, rivers, streams, and wet meadows.	Present	Present	No rookery sites have been observed during field surveys. Species has been observed foraging within the project site.
Short-eared owl	*Asio flammeus*	BCC-W	Large areas of open grassland. Nests on ground in prairies, hayfields or stubble fields. In winter, open habitats, such as open grasslands, marshes, landfills and fallow fields, that support large number of small mammals are used.	Absent	None	The project site does not support suitable habitat for this species.
Burrowing owl	*Athene cunicularia*	BCC-YR, SSC	Typically found on open, dry annual or perennial grasslands, deserts and scrublands characterized by low growing vegetation. Subterranean nester, dependent upon burrowing mammals, most notably the California ground squirrel.	Absent	None	The project site does not support suitable habitat for this species. Presence of feral and domestic cats likely preclude the presence of this species.
Oak titmouse	*Baeolophus inornatus*	BCC-YR	Warm, open, dry oak or oak-pine woodlands. Will use scrub oaks or other brush as long as woodlands are nearby.	Present	Present	Species was heard during field surveys of the project site and oak woodland in project site provide suitable breeding habitat.
Swainson's hawk	*Buteo swainsoni*	BCC-B, ST	Nests in oaks, cottonwoods, and other native and nonnative trees in riparian habitats, roadside trees, and lone trees; forages in grasslands, irrigated pastures, and grain fields	Present	Moderate	Eight active nest sites were detected by CDFW in western Placer County in 2001; suitable nesting (woodlands) and low quality foraging habitat (grasslands) occur in the project site, but there are no known nest sites within or near the project site.
Snowy plover	*Charadrius alexandrines*	BCC-B	Breeds in coastal areas.	Absent	None	The project site does not provide suitable breeding habitat for this species.
Mountain plover	*Charadrius montanus*	BCC-W	Open, flat areas with low, sparse vegetation. Often fallow, grazed, or burned fields. Winters in California and breeds elsewhere.	Absent	None	The project site does not provide suitable habitat for this species.
Northern harrier	*Circus cyaneus*	SSC	Grasslands, meadows, marshes, and seasonal and agricultural wetlands providing tall cover	Present	Low	Grasslands provide low quality suitable nesting or foraging habitat in the project site, however, feral and domestic cats likely preclude nesting in the project site.
Western yellow-billed cuckoo	*Coccyzus americanus occidentalis*	FT, SE, BCC-YR	Typically found in riparian habitat, along broad, lower flood-bottoms of large river systems. Nests in riparian jungles of willow, often mixed with cottonwoods, with lower story of blackberry, nettle, or wild grape.	Absent	None	This species is typically associated with vast riparian habitat such as those in the Sacramento River. Riparian habitat does not provide suitable habitat for this species.

Table 4.3-3a Special-Status Species Potentially Occurring or Known to Occur in the Project Site

Common Name	Scientific Name	Legal Status [1]	General Habitat Description	Habitat	Potential to occur	Rationale
Olive-sided flycatcher	*Contopus cooperi*	BCC-B	Breeds in montane and northern coniferous forests, at forest edges and openings, such as meadows and ponds. Winters at forest edges and clearings where tall trees or snags are present.	Absent	Low during migration and unlikely to nest	No breeding records occur within the valley floor. May be observed occasionally during migration.
California yellow warbler	*Dendroica petechia brewsteri*	SSC	Nests in riparian areas dominated by willows, cottonwoods, sycamores, or alders or in mature chaparral; may also use oaks, conifers, and urban areas near stream courses	Present	Present during migration but unlikely to nest	This species has been observed and could migrate through the project site. Uncommon nester in Placer County (Shuford and Girdali 2008).
White-tailed kite	*Elanus leucurus*	SFP	Low foothills or valley areas with valley or live oaks, riparian areas, and marshes near open grasslands for foraging	Present	High	Suitable nesting (riparian woodlands) and foraging habitat (non-native annual grassland) occurs in the project site. One occurrence has been documented southeast of the project site.
Merlin	*Falco columbarius*	CDFW-WL	Typically found in seacoast, tidal estuaries, open woodlands, savannahs, edges of grasslands, and deserts, farms and ranches. Clumps of trees or windbreaks are required for roosting in open country.	Present	Low	Species is a winter migrant in the area. Does not breed in California.
Peregrine falcon	*Falco peregrinus*	BCC-W	They winter in the northern limits of their range, including portions of Canada, and are very widespread during migration. Winter in areas with large concentrations of waterfowl.	Present	Low, may be observed flying through the project site.	May occur during migration, but site does not provide suitable wintering foraging habitat because of a lack of large population of waterfowl.
Bald eagle	*Haliaeetus leucocephalus*	BCC-YR	Bald Eagles typically breed and winter in forested areas adjacent to large bodies of water. Throughout its range, selects large, super-canopy roost trees that are open and accessible. The Bald Eagle is an opportunistic forager; food habits highly varied across range and site-specific, based on prey species available. Bald Eagles use carrion of fish, birds, and mammals extensively wherever encountered at sites that provide disturbance-free access from the ground.	Absent	None	The project site does not provide suitable habitat for this species.
Yellow-breasted chat	*Icteria virens*	SSC	Nests in dense riparian habitats dominated by willows, alders, Oregon ash, tall weeds, blackberry vines, and grapevines	Present	Low	This species could migrate through the project site. The riparian community in the study area provides low quality nesting habitat for this species.

Table 4.3-3a Special-Status Species Potentially Occurring or Known to Occur in the Project Site

Common Name	Scientific Name	Legal Status [1]	General Habitat Description	Habitat	Potential to occur	Rationale
Loggerhead shrike	*Lanius ludovicianus*	BCC-YR	Inhabits open country with short vegetation and well-spaced shrubs or low trees, particularly those with spines and thorns. They frequent agricultural fields, pastures, old orchards, riparian areas, desert, scrublands, savannas, prairies, golf course and cemeteries.	Present	Moderate	The project site provides suitable breeding and foraging habitat for this species and has been observed in Maidu Park.
California black rail	*Laterallus jamaicensis coturniculus*	BCC-B, ST, FP,	Inhabits freshwater marshes, wet meadows and shallow margins of saltwater marshes bordering larger bays. Needs water depths of about one inch that do not fluctuate during the year and dense vegetation for nesting habitat	Absent	None	The project site does not provide suitable habitat for this species.
Lewi's Woodpecker	*Melanerpes lewis*	BCC-W	Open ponderosa pine forest, open riparian woodland dominated by cottonwood, and logged or burned pine forest. Their breeding distribution is widely associated with ponderosa pine distribution in western North America. Commonly reuse existing nest holes or natural cavities in trees, as they do not use newly excavated ones.	Present	Present during winter, but not expected to breed on site.	Species has been observed in the project site during winter months, but unlikely to breed there.
Long-billed curlew	*Numenius americanus*	BCC-W	Short-grass or mixed prairie habitat with flat to rolling topography while breeding; tidal estuaries, wet pasture habitats and sandy beaches while wintering; wide range of habitats used during migration. Nests are a shallow depression in the ground, with scraping initiated by male.	Absent	None	The project site does not support suitable wintering habitat for this species.
Osprey	*Pandion haliaetus*	CDFW-WL	Typically found in ocean shore, bays, freshwater lakes, and larger streams. Large nests built in tree-tops within 15 miles of a good fish-producing body of water.	Absent	None	The project site does not provide suitable habitat for this species.
Fox sparrow	*Passerella iliaca*	BCC-YR	Breed in coniferous forest and dense mountain scrub. They spend winters in scrubby habitat and forest.	Absent	Low, may be observed during migration but not expected to breed on site	The project site does not provide suitable nesting habitat for this species. This species may migrate through the project site.
Double-crested cormorant	*Phalacrocorax auritus*	CDFW-WL	Colonial nester on coastal cliffs, offshore islands and along lake margins. Nests along coast on sequestered islets, usually on grounds with slopping surface, or in tall trees along lake margins.	Absent	None	The project site does not provide suitable habitat for this species.

Table 4.3-3a Special-Status Species Potentially Occurring or Known to Occur in the Project Site

Common Name	Scientific Name	Legal Status [1]	General Habitat Description	Habitat	Potential to occur	Rationale
Yellow-billed magpie	*Pica nuttallii*	BCC-YR	Typically resides in oak savanna, open areas with large trees, and along streams. This species forages in grassland, pasture, fields, and orchards.	Present	Present	This species was observed during field surveys and the riparian and oak woodland provides suitable nesting and foraging habitat.
Nuttall's woodpecker	*Picoides nuttallii*	BCC-YR	Found primarily in oak woodlands, but also found in riparian woodlands. Tree nest cavity excavated by males with little assistance from females; male may roost in cavity as it nears completion.	Present	Present	Species was observed during field surveys. Oak woodland and riparian area provide suitable breeding and foraging habitat.
Purple martin	*Progne subis*	SSC	Inhabits woodlands, low elevation coniferous forest of Douglas fir, Ponderosa pine and Monterrey pine. Nests in old woodpecker cavities mostly, also in human-made structures.	Present	Low	Species in the Sacramento area is known to use weep holes under bridges and underpasses. May forage and migrate through the project site. Unlikely to nest in the project site.
Bank swallow	*Riparia riparia*	ST	Colonial nester, nests primarily in riparian and other lowland habitats west of the desert. Requires vertical banks/cliffs with fine-textured/sandy soils near streams, rivers, lakes, ocean to dig nesting hole.	Absent	None	The project site does not provide suitable habitat for this species.
Williamson's Sapsucker	*Sphyrapicus thyroideus*	BCC-YR	Inhabits open coniferous and mixed coniferous-deciduous forests. They depend on quaking aspen (*Populus tremuloides*).	Absent	None	The project is outside of the current known range of the species and the project site does not provide suitable habitat for this species.
Pallid bat	*Antrozous pallidus*	SSC	Occurs in a variety of habitats from desert to coniferous forest. Most closely associated with oak, yellow pine, redwood, and giant sequoia habitats in northern California and oak woodland, grassland, and desert scrub in southern California. Relies heavily on trees for roosts when caves, crevices, and mines are not accessible.	Present	Medium	Suitable tree roosting and foraging habitat occurs in project site.
Silver-haired bat	*Lasionycteris noctivagans*	-	Primarily a coastal and montane forest dweller feeding over streams, pond and open brushy areas. Roosts in hollow trees, beneath exfoliating bark, abandoned woodpecker holes and rarely under rocks; needs access to drinking water.	Present	Medium	Suitable tree roosting and foraging habitat occurs in project site.
American badger	*Taxidea taxus*	SSC	Inhabits open stages of most shrub, forest, and herbaceous habitats with friable soils. Needs sufficient food (burrowing small mammals), friable soils, and open, uncultivated ground.	Absent	None	Project site does not provide suitable habitat for this species.
Delta smelt	*Hypomesus transpacificus*	FT, SE	Occurs in the Delta in areas that do not surpass 1-12 parts per thousand salinity (about one-third seawater).	Absent	None	Project site is outside of the current known range of the species.

Table 4.3-3a Special-Status Species Potentially Occurring or Known to Occur in the Project Site

Common Name	Scientific Name	Legal Status [1]	General Habitat Description	Habitat	Potential to occur	Rationale
Central Valley steelhead	*Oncorhynchus mykiss*	FT	Nonspawning habitat: mainly oceanic. Most spawning occurs in gravel riffles in main streams where the female forms a nest, in the gravel. Streams with temperatures near the upper tolerance level (77°F) during spawning migrations may be able to provide habitat for if a patchwork of thermal refugia is present.	Present	High	Central Valley steelhead have been documented in Dry Creek (approx. 3.5mile upriver from the project site (CNDDB). Adults and juveniles use Dry Creek for migration to upstream spawning and rearing habitat; adults may use Dry Creek for spawning. In addition, recent observations in Antelope Creek suggest that Central Valley steelhead may also rear in Antelope Creek (The confluence of Antelope and Dry Creek is located approximately 2 miles upriver of the Darling Street Bridge). Although there are no documented occurrences of steelhead in Cirby Creek, adults and downstream juveniles may use Cirby Creek for migration and adults may spawn in Linda Creek if flow conditions allow for passage.
Central Valley Chinook Salmon	*Oncorhynchus tshawytscha*	SC, SSC	Rear and spawn in freshwater in the Sacramento and San Joaquin Rivers and tributaries.	Present	High	Adults and juveniles use Dry Creek for migration, spawning, and rearing. Adults have been observed in Cirby Creek but are not likely to successfully spawn in Cirby or Linda creeks due to passage constraints and high summer water temperatures.

California Rare Plant Rank
1B = List 1B species: rare, threatened, or endangered in California and elsewhere.
2 = List 2 species: rare, threatened, or endangered in California but more common elsewhere.
3 = List 3 species: plants about which more information is needed to determine their status.
4 = List 4 species: plants of limited distribution.
.1 = seriously endangered in California
.2 = fairly endangered in California
.3 = not very endangered in California
– = no listing.
? = population status within that County uncertain.
* = known populations believed extirpated from that County
CNDDB Listed as a Sensitive Natural Community in the CNDDB
CDFW Vegetation alliance considered sensitive by CDFW

Sources: CNDDB 2017; ICF J & S 2009, USFWS 2017; CNPS 2017 data compiled by Ascent in 2017

Table 4.3-3b Sensitive Vegetation Alliances Potentially Occurring or Known to Occur in the Project Site

Common Name	Scientific Name	Legal Status [1]	General Habitat Description	Habitat	Potential to occur	Rationale
Sensitive Vegetation Alliances (=Sensitive Natural Communities)						
Alkali Meadow	Alkali Meadow	CNDDB	Alkali meadows are found on moist alkaline soils and are typically characterized by perennial grasses, sedges and forbs.	Absent	None	CNDDB occurrence is from 0.5 mile east of Pleasant Grove Creek, approx. 2.5 miles north of Rocklin.
Alkali Seep	Alkali Seep	CNDDB	Alkali seeps are found in seeps within alkaline soils and are typically characterized by perennial grasses, sedges and forbs.	Absent	None	CNDDB occurrence is from 0.5 mile east of Pleasant Grove Creek, approx. 2.5 miles north of Rocklin.
Northern Hardpan Vernal Pool	Northern Hardpan Vernal Pool	CNDDB	Northern Hardpan Vernal Pools are formed on alluvial terraces with silicate-cement soil layers. These pool types are on acidic soils and exhibit well-developed mima mound topography found on the eastern margins of the Central Valley.	Absent	None	The project site does not support vernal pool habitat.
Northern Volcanic Mud Flow Vernal Pool	Northern Volcanic Mud Flow Vernal Pool	CNDDB	Northern Volcanic Mud Flow Vernal Pool are formed by an impervious bedrock layer of volcanic origin. These pool types are found on the eastern and coastal portions of the Central Valley, and tend to be small and restricted in distribution.	Absent	None	The project site does not support vernal pool habitat.
Valley Needless Grassland	Valley Needless Grassland	CNDDB	Usually on fine-textured (often clay) soils, moist or even waterlogged during winter, but very dry in summer. Often interdigitates with Oak Woodlands on moister, better drained sites.	Present	Absent	The grassland observed in the project site is characteristic of non-native grassland.
Valley Oak Woodland Alliance	*Quercus lobata* Woodland Alliance	CDFW	On deep, well-drained alluvial soils, usually in valley bottoms, apparently with more moisture in summer than in Blue Oak Woodland	Present	Present	Valley Oak riparian woodland is present on the project site and provides food and cover for many species of wildlife.

Note: CNDDB = California Natural Diversity Database; USFWS = U.S. Fish and Wildlife Service, NMFS = National Marine Fisheries Service,
1 Legal Status Definitions
CNDDB Listed as a Sensitive Natural Community in the CNDDB
CDFW Vegetation alliance considered sensitive by CDFW
Sources: CNDDB 2017; ICF J & S 2009, USFWS 2017a; CNPS 2017 data compiled by Ascent in 2017

The project site contains known occurrences or potential habitat for the following special-status species:

- Potential habitat for VELB, a species listed as threatened under the ESA, occurs in several elderberry shrubs in locations throughout the project site.
- Central Valley steelhead, which is listed as threatened under the ESA have been documented in Dry Creek, approximately 3.5 mile upstream of the project site. Adults and juveniles use Dry Creek for migration to upstream spawning and rearing habitat; adults may use Dry Creek for spawning. In addition, recent observations in Antelope Creek suggest that Central Valley steelhead may also rear in Antelope Creek (The confluence of Antelope Creek and Dry Creek is located approximately 2 miles upriver of the Darling Street Bridge.). Although there are no documented occurrences of steelhead in Cirby Creek, adults and downstream juveniles may use Cirby Creek for migration and adults may spawn in Linda Creek if flow conditions allow for passage. Dry Creek has been designated as critical habitat for steelhead.
- All three creeks potentially provide suitable habitat for fall-run Chinook salmon belonging to the Central Valley fall/late fall–run Chinook salmon evolutionarily significant unit. This anadromous fish is a federal (NMFS) and California species of concern and a commercially valuable species.
- Potentially suitable nesting habitat for Swainson's hawk (listed as threatened under CESA), and nesting and foraging habitat for white-tailed kite (designated as fully protected under the California Fish and Game Code) and other special-status migratory birds and raptors (e.g., Cooper's hawk, great egret, great blue heron, oak titmouse, northern harrier, olive-sided flycatcher, California yellow warbler, Merlin, peregrine falcon, yellow-breasted chat, loggerhead shrike, Lewi's woodpecker, fox sparrow, yellow-billed magpie, Nuttall's woodpecker, and purple martin).
- Some mature trees may provide potential roosting habitat for bats. In the project area, silver-haired bat could use mature oak, cottonwood, sycamore, or other deciduous trees that provide suitable thermal conditions for roosting. Pallid bat, also a species of special concern, roost in trees very rarely, but may forage for insects near the creeks.
- Suitable aquatic and upland habitat along the creek corridors for western pond turtle, a CDFW species of special concern.
- Suitable habitat for Sanford's arrowhead, a CRPR 1B.2 ranked plant species, occurs within Linda, Dry, and Cirby Creeks.
- Riparian, wetlands, valley oak riparian woodland alliances are considered sensitive natural communities or sensitive vegetation alliances by CDFW and occur in the project site.

SENSITIVE HABITATS

Sensitive habitats include: a) areas of special concern to resource agencies; b) areas protected under CEQA; c) areas designated as sensitive natural communities or vegetation alliances by CDFW; d) areas outlined in Section 1600 of the Fish and Game Code; e) areas regulated under Section 404 of the federal CWA; f) areas protected under Section 401 of the CWA; and g) areas protected under local regulations and policies.

Sensitive natural communities occurring in the project site include riparian, valley oak riparian woodland, and wetlands and other potential waters of the United States.

CRITICAL HABITAT

Critical habitat is designated by USFWS or NMFS as a specific geographic area that contains features essential for the conservation of a federally listed species. Federal agencies are required to consult with USFWS or NMFS to ensure their actions will not destroy or adversely modify critical habitat. Mapped boundaries of critical habitat are generally large.

Dry Creek is designated Critical Habitat for Central Valley steelhead. NMFS determined that Dry Creek contains critical habitat for steelhead based on the presence of physical and biological factors that are essential to the conservation of that species (70 FR 52521). Potential critical habitat designations in the vicinity of the project site were identified using the USFWS Critical Habitat Portal (see Appendix D of this Draft EIR) and the National Oceanic and Atmospheric Administration (NOAA) Fisheries ESA Critical Habitat shapefiles. Additionally, the Dry Creek watershed is subject to the Magnuson-Stevens Fishery Conservation and Management Act and regulation by the Pacific Coast Salmon Fisheries Management Plan.

4.3.3 Regulatory Setting

Biological resources are protected and/or regulated by a variety of federal, state, and local laws and policies. Key regulatory and conservation planning issues applicable to the proposed project are discussed below.

FEDERAL

Federal Endangered Species Act

USFWS and NMFS enforce the provisions stipulated within ESA (16 USC Section 1531 et seq.). Threatened and endangered species on the federal list (50 Code of Federal Regulations [CFR] Section 17.11, and 17.12) are protected from take, defined as direct or indirect harm, unless a Section 10 permit is granted to an entity other than a federal agency or a Biological Opinion with incidental take provisions is rendered to a federal lead agency via a Section 7 consultation. Pursuant to the requirements of ESA, a federal action agency reviewing a proposed project within its jurisdiction must determine whether any federally listed species may be present in the project site and determine whether the proposed project may affect such species and if so, consultation with USFWS and NMFS is required. Under ESA, habitat loss that results in harm may be considered take of the species. USFWS and/or NMFS are required to determine whether the project is likely to jeopardize the continued existence of any species that is proposed for listing under ESA or to result in the destruction or adverse modification of critical habitat proposed or designated for such species (16 USC 1536[3], [4]).

Magnuson-Stevens Fishery Conservation and Management Act

In response to growing concern about the status of United States fisheries, Congress passed the Sustainable Fisheries Act of 1996 (Public Law [PL] 104-297) to amend the Magnuson-Stevens Fishery Conservation and Management Act (PL 94-265), the primary law governing marine fisheries management in the Federal waters of the United States. The Magnuson-Stevens Conservation and Management Act, as amended (U.S.C. 180 et seq.), requires that Essential Fish Habitat (EFH) be identified and described in federal fishery management plans. Federal action agencies must consult with NOAA Fisheries on any activity which they fund, permit, or carry out, that may adversely affect EFH. NOAA Fisheries is required to provide EFH conservation and enhancement recommendations to the Federal action agencies. EFH is defined as those waters and substrates necessary to fish for spawning, breeding, feeding or growth to maturity.

Executive Order 11990: Protection of Wetlands

Executive Order 11990, signed May 24, 1997, directs federal agencies to refrain from assisting in or giving financial support to projects that encroach on publicly or privately owned wetlands. It further requires that federal agencies support a policy to minimize the destruction, loss, or degradation of wetlands. A project that encroaches on wetlands may not be undertaken unless the agency has determined that (1) there are no practicable alternatives to construction, (2) the project includes all practicable measures to minimize harm to wetlands affected, and (3) the impact will be minor.

Section 404 of the Clean Water Act

Section 404 of the Federal CWA requires a project applicant to obtain a permit before engaging in any activity that involves any discharge of dredged or fill material into waters of the United States, including wetlands. Fill material is material placed in waters of the United States where the material has the effect of replacing any portion of a water of the United States with dry land, or changing the bottom elevation of any portion of a water of the United States. Waters of the United States include navigable waters of the United States; interstate waters; all other waters where the use, degradation, or destruction of the waters could affect interstate or foreign commerce; relatively permanent tributaries to any of these waters, and wetlands adjacent to these waters. Wetlands are defined as those areas that are inundated or saturated by surface water or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Potentially jurisdictional wetlands must meet three wetland delineation criteria: hydrophytic vegetation, hydric soil types, and wetland hydrology. Wetlands that meet the delineation criteria may be jurisdictional under Section 404 of CWA pending USACE verification.

Section 401 Water Quality Certification

Under Section 401 of the CWA, an applicant for a Section 404 permit must obtain a certificate from the appropriate state agency stating that the intended dredging or filling activity is consistent with the state's water quality standards and criteria. In California, authority to grant water quality certification is delegated by the State Water Resources Control Board to the nine regional water quality control boards (RWQCBs).

Migratory Bird Treaty Act

The Migratory Bird Treaty Act (MBTA), first enacted in 1918, provides for protection of international migratory birds and authorizes the Secretary of the Interior to regulate the taking of migratory birds. The MBTA provides that it shall be unlawful, except as permitted by regulations, to pursue, take, or kill any migratory bird, or any part, nest, or egg of any such bird. The current list of species protected by the MBTA can be found in Title 50 of the CFR, Section 10.13 (50 CFR 10.13). The list includes nearly all migratory birds native to the United States.

STATE

California Endangered Species Act

Pursuant to the CESA, a permit from CDFW is required for projects that could result in the "take" of a plant or animal species that is listed by the state as threatened or endangered. Under CESA, "take" is defined as an activity that would directly or indirectly kill an individual of a species, but the CESA definition of take does not include "harm" or "harass," like the ESA definition does. As a result, the threshold for take is higher under CESA than under ESA.

Pursuant to the requirements of CESA, a state or local agency reviewing a proposed project within its jurisdiction must determine whether any state-listed species may be present in the project site and determine whether the proposed project will have a potentially significant impact upon such species. Project-related impacts to species on the CESA list would be considered significant and would require mitigation. Impacts to species of concern and fully protected species would be considered significant under certain circumstances. Authorization for take of state-listed species can be obtained through a California Fish and Game Code Section 2081 incidental take permit.

Porter-Cologne Water Quality Control Act

The Porter-Cologne Water Quality Control Act requires that each of the nine RWQCBs prepare and periodically update basin plans for water quality control. Each basin plan sets forth water quality standards for surface water and groundwater and actions to control nonpoint and point sources of pollution to achieve and maintain these standards. Basin plans offer an opportunity to protect wetlands through the establishment of water quality objectives. RWQCB jurisdiction includes waters of the United

States as well as areas that meet the definition of "waters of the state." Waters of the state is defined as any surface water or groundwater, including saline waters, within the boundaries of the state. The RWQCB has the discretion to take jurisdiction over areas not federally protected under Clean Water Act Section 404 provided they meet the definition of waters of the state. Mitigation requiring no net loss of wetlands functions and values of waters of the state is typically required by the RWQCB.

California Fish and Game Code

Section 1602 of the California Fish and Game Code

All diversions, obstructions, or changes to the natural flow or bed, channel, or bank of any river, stream, or lake in California that supports wildlife resources are subject to regulation by CDFW under Sections 1600 et seq. of the California Fish and Game Code. Under Section 1602, it is unlawful for any person to substantially divert or obstruct the natural flow or substantially change the bed, channel, or bank of any river, stream, or lake designated by CDFW, or use any material from the streambeds, without first notifying CDFW of such activity and obtaining a final agreement authorizing such activity. "Stream" is defined as a body of water that flows at least periodically or intermittently through a bed or channel having banks and that supports fish or other aquatic life. CDFW's regulatory authority within altered or artificial waterways is based on the value of those waterways to fish and wildlife.

Fully Protected Species

Protection of fully protected species is described in Sections 3511 (birds), 4700 (mammals), 5050 (amphibians and reptiles), and 5515 (fish) of the California Fish and Game Code. These statutes prohibit take or possession of fully protected species and do not provide for authorization of incidental take. CDFW has informed nonfederal agencies and private parties that their actions must avoid take of any fully protected species.

Protection for Bird Nests and Raptors

Section 3503 of the California Fish and Game Code states that it is unlawful to take, possess, or needlessly destroy the nest or eggs of any bird. Section 3503.5 specifically states that it is unlawful to take, possess, or destroy any raptors (e.g., hawks, owls, eagles, and falcons), including their nests or eggs. Section 3513 of the California Fish and Game Code codifies the federal Migratory Bird Treaty Act.

LOCAL

City of Roseville Zoning Ordinance – Tree Preservation (Chapter 19.66)

City of Roseville's Section 19.66.050, Arborist Report Chapter 19.66, Article IV, Tree Preservation Code provides protection and preservation for native oak trees with a goal of reforesting urban areas. The ordinance protects native oak trees 6 inches or more in diameter at breast height and specific landmark trees. The ordinance requires a permit for any activity that would harm, destroy, kill, or remove any protected tree. In addition to removal, grading (cut or fill) and trenching within the dripline are subject to permit approval.

As a component of the permit process, protected trees must be replaced or relocated on-site or through payments to an approved in-lieu fund used to purchase, plant, irrigate, and maintain trees within Roseville.

The ordinance states:

> **Section 19.66.030 Tree Permits:** Permit required. No person shall conduct any regulated activities within the protected zone of any protected tree; or harm, destroy, kill or remove any protected tree unless authorized by a tree permit.

B. Type of Permit.

1. Administrative Tree Permit. An administrative tree permit is required for any regulated activity affecting one or more protected trees, when the regulated activity is not associated with a discretionary project, does not include the removal of a protected tree, and the requested encroachment does not exceed 20 percent of the projected zone of any individual protected tree.

2. Tree Permit. A tree permit is required for any regulated activity within the protected zone of a protected tree where the encroachment exceeds 20 percent of the protected zone, or where the regulated activity is related to a discretionary project. In addition, a tree permit is required for the removal of any protected tree, unless otherwise exempted by this chapter. Tree permits may be conditioned to include replacement of trees in kind. The replacement requirement shall be calculated based upon an inch for an inch replacement of the removed trees (an inch being equivalent to a 15-gallon tree). The total of replacement trees shall equal the combined diameter of the trees removed. A minimum of 50 percent of replacement trees shall be native. The preferred replacement alternative is on site.

It should be noted that City projects, programs, and activities do not require issuance of a formal Tree Permit but otherwise comply with all ordinance requirements, including mitigation requirements.

City of Roseville General Plan

The City of Roseville General Plan 2035 establishes goals and policies for the preservation of the value of biological resources in the community (City of Roseville 2016). These policies are specific to vegetation and wildlife. However, other policies intended to preserve water quality, air quality, and other features also benefit and protect biological resources. Those goals and policies applicable to the proposed project are listed below.

GOAL 1: Preserve, protect and enhance a significant system of interconnected natural habitat areas, including creek and riparian corridors, oak woodlands, wetlands, and adjacent grassland areas.

GOAL 2: Maintain healthy and well-managed habitat areas in conjunction with one another, maximizing the potential for compatible open space, recreation, and visual experiences.

GOAL 3: Protect special status species and other species that are sensitive to human activities.

- **Policy 1:** Incorporate existing trees into development projects, and where preservation is not feasible, continue to require mitigation for the loss of removed trees. Particular emphasis shall be placed on avoiding the removal of groupings or groves of trees.
- **Policy 2:** Preserve and rehabilitate continuous riparian corridors and adjacent habitat along the City's creeks and waterways.
- **Policy 4:** Require preservation of contiguous areas in excess of the 100-year flood plain as merited by special resources or circumstances. Special circumstances may include but are not limited to, sensitive wildlife or vegetation, wetland habitat, oak woodland areas, grassland connections in association with other habitat areas, slope or topographical considerations, recreation opportunities, and maintenance access requirements.
- **Policy 5:** Limit recreation activities within the City's Regulatory Floodplain, as defined in the Safety Element, and require appropriate setback areas for trails and other public recreation uses so that natural resource areas are not adversely impacted.
- **Policy 6:** Provide for protection and enhancement of native fishery resources, including continue coordination with the California Department of Fish and Wildlife to release water into Linda Creek.

Placer County Conservation Plan

The Placer County Conservation Plan (PCCP) is currently in preparation. Placer County, CDFW, and USFWS finalized an HCP/NCCP planning agreement in December 2001. The PCCP would encompass western Placer County. The goal of the PCCP is to provide an effective framework to protect, enhance, and restore the natural resources in specific areas of western Placer County, while streamlining the permitting of a range of land development, infrastructure improvements, and habitat restoration actions known as "covered activities." The PCCP would include the Western Placer County Habitat Conservation Plan and Natural Community Conservation Plan and the Western Placer County Aquatic Resources Program, referred to as the CARP. The CARP will protect streams, wetlands, and other water resources and fulfill the requirements of the Federal Clean Water Act (Section 401 and 404) and analogous State laws and regulations. Together, the permits issued under these plans and programs represent all of the major wetland and endangered species act permits that are required for land development activity that may occur on public and private property in Western Placer County (Placer County 2018:4-1 and 4-2).

4.3.4 Impacts and Mitigation Measures

SIGNIFICANCE CRITERIA

Based on Appendix G of the CEQA Guidelines, the proposed project was determined to result in a significant impact to biological resources if it would:

- have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the CDFW or USFWS;
- have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by CDFW or USFWS;
- have a substantial adverse effect on federally-protected wetlands, as defined by Section 404 of the Clean Water Act, through direct removal, filling, hydrological interruption, or other means;
- interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites; or
- conflict with the provisions of an adopted Habitat Conservation Plan, Natural Conservation Community Plan, or other approved local, regional, or state conservation plan.

METHODS AND ASSUMPTIONS

Potential impacts on biological resources resulting from project construction were determined by evaluating the project plans in relation to the habitat characteristics of the project site, quantifying potential loss of common and sensitive habitats, and evaluating potential effects to common and special-status species that could result from this habitat loss. An arborist survey was not conducted to exactly identify the trees within the project site, nor have preliminary engineering plans precisely identified trees or the quantity that would be removed for project construction.

On July 9 and 30, 2014, an elderberry shrub survey was conducted by ECORP biologists according to the USFWS Conservation Guidelines for Valley Elderberry Longhorn Beetle (USFWS 1999). Information collected during the elderberry survey included a visual inspection of all elderberry shrubs documented on the project site and within 100-foot buffer of the project site, a count of each elderberry stem over one-inch in diameter, and observations of exit holes.

In May 2017, USFWS issued the *Framework for Assessing Impacts to the Valley Elderberry Longhorn Beetle* (VELB framework), which includes an updated protocol for evaluating the potential effects of proposed projects on VELB or its habitat, and updated avoidance, conservation, and compensatory mitigation measures. On October 3 and 4, 2017, the project site was re-evaluated for elderberry shrubs, according to the updated survey methods outlined in the VELB framework (USFWS 2017b). For the 2017 survey, the survey buffer was increased from 100 feet to 165 feet, as per the updated protocol. The locations of elderberry shrubs recorded in 2014 were confirmed and the location of all new elderberry shrubs not previously documented were digitally recorded, using a global positioning system (GPS) data logger (Trimble Geo 7 Series). According to the updated survey methods, only the location of elderberry shrubs located within riparian habitat was recorded as opposed to presence or absence of exit holes because elderberry shrubs located within riparian habitat are automatically assumed to be occupied by VELB. Also, a tally of stems greater than one inch in diameter is not required by the updated survey methods; therefore, data on stem count was not recorded. Areas on the project site or within the buffer that were on steep slopes and inaccessible by foot were visually surveyed from the bottom and top of the slope. Fully developed urban areas and private property on the project site or within the 165-foot buffer were not surveyed.

Shaded riverine aquatic (SRA) habitat within the project site was estimated using existing habitat mapping data. For purposes of the SRA analysis, the SRA was mapped at in-water work locations where adjacent wooded habitats (i.e., riparian and oak riparian woodland) were located adjacent to existing aquatic habitats (e.g., Dry Creek, Cirby Creek, Linda Creek, and Strap Ravine). SRA acreage calculations at these locations included the area from the centerline of a given aquatic feature (e.g., creek centerline) outward to an area of 5 feet up the bank from the features OHWM and along both banks. This method assumes this “footprint” supports overhead vegetation that provides 100 percent shading of the adjacent aquatic feature and, therefore, may overestimate the amount of existing shaded aquatic habitat. It also may overestimate the amount of vegetation removal that contributes to SRA habitat because at some locations SRA habitat is the result of large oak or riparian trees set back more than 5 feet from the creek bank that would not be removed and therefore would continue to provide SRA function. Similarly, this method does not account for SRA impacts that may occur from trail construction. However, trail construction areas, for the most part are further away from creek areas and thus the impacted vegetation, which is typically ruderal grassland or shrubbery, does not contribute to SRA habitat.

ISSUES OR POTENTIAL IMPACTS NOT DISCUSSED FURTHER

Subsection 4.3-2, “Environmental Setting,” discusses all special-status plant, animal species, and sensitive habitats evaluated in this analysis, and Tables 4.3-3a and 4.3-3b summarize the potential for each of these species and habitats to occur on the project site. Those sensitive habitats, and plant and animal species not expected to occur, or with a low probability to occur (because of a lack of suitable habitat, or lack of other occurrence records) are not addressed further in this analysis. Additionally, some wildlife species that could occur on the project site or on the project site occasionally are not expected to be affected by construction and use of the project. Although a comprehensive list of special-status species was considered and evaluated for potential effects, the following impact analysis focuses on resources expected to be affected by project implementation.

The project site is outside the proposed PCCP area and the City of Roseville is not a participating City. Because the project is outside of the plan area of the PCCP, an analysis of the project’s consistency with the PCCP is not needed.

IMPACT ANALYSIS

Impact 4.3-1	Disturbance and loss of waters of the United States, waters of the state and riparian habitat.
Applicable Policies and Regulations	Executive Order 11990 Protection of Wetlands Section 404 of the Clean Water Act Section 401 Water Quality Certification Porter-Cologne Water Quality Control Act California Fish and Game Code Section 1602 City of Roseville General Plan Open Space and Conservation Element
Significance with Policies and Regulations	Proposed Project: Significant Alignment Option 1A: Significant Alignment Option 1C: Significant Alignment Option 5A: Significant
Mitigation Measures	Mitigation Measure 4.3-1 (Proposed Project, Option 1A, Option 1C, Option 5A)
Significance after Mitigation	Less than significant (Proposed Project, Option 1A, Option 1C, Option 5A)

Proposed Trail Alignment

Construction Impacts

Construction of the Proposed Trail Alignment would require removal of wetland and riparian vegetation, grading, placement of aggregate base material, and construction of five roadway undercrossings, construction or modification of up to eight bridges (refer to Table 3-2 in Chapter 3, “Project Description”), and approximately 27,000 square feet of retaining walls (refer to Table 3-3 in Chapter 3, “Project Description”). In addition, a maximum of eight temporary stream crossings or stream diversions would be required during construction. These activities would create ground disturbance in the adjacent upland area, along the stream banks, and within the stream channel of Dry, Linda, and Cirby Creeks and other wetlands.

The proposed project has been designed to include the smallest feasible footprint to minimize temporary, indirect, and permanent impacts to wetlands and other waters of the United States, and waters of the state and riparian habitat. Work within waters of the United States and waters of the state is necessary to install bridges and to install stream bank stabilization measures in areas where existing perennial streams are eroding towards homes and private property and could undermine the planned trail. Other waters of the United States and waters of the state temporarily affected by the project activities would be restored and enhanced as a component of stream bank stabilization and bridge installation. Riparian vegetation removal is necessary for the construction of the Proposed Trail Alignment and also for the trail approach to the bridges and to install stream bank stabilization measures.

Implementation of the Proposed Trail Alignment would result in an anticipated permanent fill of 0.26 acre and temporary fill estimated to be 0.58-acre, total wetlands and waters. Implementation of the Proposed Trail Alignment would result in an anticipated removal of up to 0.70 acre of riparian habitat and temporary effects on riparian habitat of up to 0.70 acre. Riparian habitat in the valley and foothill area can be found in association with oak woodland. Implementation of the Proposed Trail Alignment would result in permanent removal of up to 4.30 acres of valley oak riparian woodland habitat and the temporary disturbance of up to 4.90 acres of valley oak riparian woodland habitat.

Wetland acreages are based on the draft Dry Creek Greenway Multi-Use Trail Project Wetland Delineation and Other Waters (Ascent Environmental 2016) and existing habitat mapping data.

Riparian and valley oak riparian woodland habitat acreages are based on the draft Dry Creek Greenway Multi-Use Project Biological Assessment.

As discussed above, the proposed project would require temporary and permanent disturbance below the ordinary high-water mark of Dry, Cirby, and Linda Creeks for the installation of bridges, roadway undercrossings, and stabilization of stream banks. With the exception of the Darling Way Bridge, all proposed bridges would fully span the low flow channel of the stream. Each abutment, at six of the bridges, would be supported by up to four 24-inch diameter piles drilled into the stream bank. The Darling Way bridge would require one pile to be installed within the low flow channel of the stream.

The construction area for all in-water work areas would be isolated from the flow of the creek through the temporary use of a water tight coffer dam. The coffer dam would isolate the construction area, minimize the temporary increase in turbidity within the stream, prevent scour and maintain soil- and water-free footings to allow for in-water work. After in-water work construction, the coffer dam would be removed and the remaining portion of the bridge would be constructed. Additional best management practices (BMPs) such as barriers and silt fencing would be implemented to avoid or minimize fill into waters.

The amount of in-stream disturbance resulting from construction of undercrossings would be minimized through the use of existing structures. Four of the undercrossings would be beneath existing bridges and would require excavation for the installation retaining walls, excavation and removal of soil, and installation of concrete and rock slope protection. The fifth undercrossing (at Rocky Ridge Drive) would add a sixth box culvert to the series of culverts that comprise the stream crossing. This would require excavation for construction of retaining walls and wing walls, and installation of cutoff walls that isolate the work site from groundwater and minimize the need for dewatering.

Streambank stabilization using gabion baskets would be constructed in up to four locations (refer to gabion basket wall #1 on Exhibit 3-5, #2 and #3 on Exhibit 3-6, #4 on Exhibit 3-9, and gabion basket wall #5 on Exhibit 3-12 in Chapter 3, “Project Description”), would result in the permanent loss of 1,236 square feet of stream bed. Installation of the gabions would involve excavation of areas within the stream bed and bank, stream diversions in two locations on Linda Creek and excavation of a sand bar in Cirby Creek to create a secondary low flow channel. Exhibit 4.8-3 (see Section 4.8, “Hydrology and Water Quality”) provides an example of potential streambank stabilization work within Cirby Creek.

It is anticipated that bridge piles would be used for the abutments for all the new pedestrian bridges located within the floodplain. With the exception of the Darling Way Bridge, all of the proposed bridges would span the creeks and no piles would be constructed within the existing creek channel. Pile driving would not be required and piles at Darling Street Bridge will be cast in drilled hole piles. The wet soil (except the bottom 10 feet of soil) and water would then be pumped out of the steel casing of the pile and into a collection system. Water pumped from excavation activities in the stream channel or in areas of high groundwater would contain suspended sediments and other solids and could negatively affect water quality if discharged directly to the adjacent stream, wetlands or municipal storm drains.

The potential effects of dewatering discharge would be minimized through compliance with existing Central Valley Regional Water Quality Control Board regulations such as the General Dewatering Permit (Order No. R5-2013-0073-01, National Pollutant Discharge Elimination System (NPDES) No. CAG995002) as described in Section 4.8, “Hydrology and Water Quality.”

Temporary stream diversions (clear water diversions) would be installed for the construction of the Rocky Ridge and Old Auburn Road undercrossing and for the stream bank stabilization areas. Clear water diversions are used in waterways to enclose a construction area and reduce sediment pollution from construction work taking place in or adjacent to water. The diversions would consist of a temporary dam constructed just upstream of the existing bridge and temporary pipes of sufficient number and size to carry stream flow from the temporary dam, through the construction site, to a point downstream. In addition to a piped diversion, the Cirby Creek bank stabilization area, near Machado

Lane, would also include the excavation of a secondary low flow channel in a sand bar on the opposite side of the stream bed (see gabion basket wall #1 on Exhibit 3-5). This secondary channel would be vegetated with native grasses and would remain after completion of the project. After the completion of in-channel construction, the diversion dams would be removed and the streambed restored.

Use-related Impacts

The long-term maintenance and repair of the multi-use path and bridge structures would require the use of various tools and equipment that have the potential to introduce fill or other materials into Dry, Linda, and Cirby Creeks. In addition, the creation of impervious surfaces associated with the Proposed Trail Alignment could result in indirect impacts to Dry, Linda, and Cirby Creeks and other downstream waters as a consequence of runoff. The City of Roseville Parks Maintenance Division is required to have a fleet and equipment in working order and leak free. Maintenance vehicles would be required to stay within paved portions of the trail or within existing dirt access roads where feasible. Maintenance crews follow BMPs and receive training prior to working in City Preserves or open habitat. Maintenance and monitoring is conducted in accordance with the Roseville Open Space Preserve Overarching Management Plan (and related USFWS Biological Opinion (81420-2008-F-1958-3)) and the California Department of Fish and Wildlife Streambed Alteration Agreement for Routine Maintenance. These indirect impacts would be further minimized through compliance with protective City and state regulations as described in Section 4.8, “Hydrology and Water Quality.” The project would be required to install and maintain permanent post construction water quality BMPs such as revegetation and stabilization of disturbed areas and contouring to mimic natural drainage patterns (as required by the storm water pollution prevention plan [SWPPP]) (see Impact 4.8-2 in Section 4.8).

Conclusion

Project implementation would result in overall permanent loss of 0.26 acre of wetlands and other waters of the United States and waters of the state and associated riparian habitat. Implementation of each phase of the Proposed Trail Alignment would require that the City submit the wetland delineation report to the USACE in advance of a permit application for that phase, and request a preliminary jurisdictional determination. Based on the preliminary jurisdictional determination, the City would determine the exact acreage of waters of the United States and waters of the state that would be filled as a result of each phase of project implementation. Impact acreages could be further refined following final design plans and construction specifications prior to final permitting. The City would require a 404 permit from the USACE. A 401 certification from RWQCB would be required as well. A Section1602 Streambed Alteration Agreement from CDFW would also be required for work in the bed, bank, or channel of the perennial streams. Loss of wetlands and waters of the United States and waters of the state would be a **significant** impact.

Alignment Option 1A

Option 1A (refer to Exhibit 3-13 in Chapter 3, “Project Description”) is the same as the proposed trail alignment until the approach to the Dry Creek/Cirby Creek confluence and the first bridge. Where the Proposed Trail Alignment would cross Dry Creek via Bridge #2 and continue on the northern bank of Cirby Creek, Option 1A would cross Dry Creek via Bridge #3. By remaining on the south bank of Cirby Creek, Option 1A would not require the construction of Bridge #2 or Bridge #4. The streambank of Cirby Creek is moderately erosive in the Option 1A area, and the proximity of private property would require the path to be located near the top of the bank. For this reason, Option 1A would require an additional 765 linear feet of retaining walls or streambank stabilization when compared to the Proposed Trail Alignment (see retaining wall #35, #36, and #37 and rock slope protection #25 and #26 on Exhibit 3-13). However, because this option does not require the construction of Bridge #2 or Bridge #4, the total permanent impacts to wetlands and/or waters is 0.01 acre less than the Proposed Trail Alignment. Similarly, temporary impacts to wetlands and/or waters is 0.03 acre less than the Proposed Trail Alignment. Alignment Option 1A would permanently affect up to 0.75 acre of riparian (0.05 acre more than the Proposed Trail Alignment) and temporarily disturb up to 0.70 acre of riparian. Alignment Option 1A would permanently affect up to 4.10 acres of valley oak riparian woodland (0.2 acre less than the Proposed Trail Alignment) and temporarily disturb up to 4.80 acres of valley oak riparian woodland

(0.10 acre less than the Proposed Trail Alignment). Although Alignment Option 1A would affect less acreage of valley oak riparian woodland than the Proposed Trail Alignment, it would result in permanent loss and temporary disturbance of wetlands and other waters of the United States, waters of the state, and associated riparian habitat. This would be a **significant** impact.

Alignment Option 1C

Option 1C (refer to Exhibit 3-14 in Chapter 3, "Project Description") is the same as the Proposed Trail Alignment and would have the same bridges and undercrossings described above in regards to the Proposed Trail Alignment with the exception that the first portion of the trail near Darling Way would be located on the northeastern side of Dry Creek. The northeastern bank of Dry Creek is steep and erosive with little distance between the top of the bank and the adjacent private property (CBEC 2014). Because of this, implementation of Option 1C would require an additional 1,080 linear feet of streambank stabilization (see retaining walls #38 through #43 and gabion basket wall #6 on Exhibit 3-14). Under Option 1C permanent impacts to wetlands and/or waters would be 0.01 acre less than the Proposed Trail Alignment, and Option 1C temporary impacts would be 0.05 acre less than the Proposed Trail Alignment. Alignment Option 1C would permanently affect up to 1.25 acres of riparian (0.55 acre more than the Proposed Trail Alignment) and temporarily disturb up to 0.90 acre of riparian (0.20 acre more than the Proposed Trail Alignment). Project implementation with Alignment Option 1C would permanently affect up to 4.25 acres of valley oak riparian woodland (0.05 acre less than the Proposed Trail Alignment) and temporarily disturb up to 4.85 acres of valley oak riparian woodland (0.05 acre less than the Proposed Trail Alignment). Although project implementation with Alignment Option 1C would result in less permanent loss and less temporary disturbance of wetlands and other waters of the United States, waters of the state, and associated riparian habitat, than the proposed project, this would be a **significant** impact.

Alignment Option 5A

Implementation of Alignment Option 5A (refer to Exhibit 3-15 in Chapter 3, "Project Description") would require the same permitting and certification procedures as described above under the Proposed Trail Alignment. Option 5A would affect an additional 635 linear feet of stream habitat when compared to the Proposed Trail Alignment because of additional retaining wall construction. The permanent impacts to wetlands and/or waters under Option 5A would be 0.0005 acre more than the Proposed Trail Alignment, and the temporary impacts to wetlands and/or waters would be 0.001 acre less than the Proposed Trail Alignment. Alignment Option 5A would have the same permanent and temporary riparian impact as the Proposed Trail Alignment. However, Alignment Option 5A would permanently affect 4.60 acres of valley oak riparian woodland (0.30 acre more than the Proposed Trail Alignment) and temporarily disturb 5.10 acres of valley oak riparian woodland (0.20 acre more than the Proposed Trail Alignment). Implementation of Option 5A would result in permanent loss and temporary disturbance of wetlands and other waters of the United States, waters of the state, and associated riparian habitat. This would be a **significant** impact.

Mitigation Measures

Mitigation Measure 4.3-1: Wetlands, waters of the United States, and water of the state.

This mitigation would apply for the Proposed Trail Alignment, Alignments Options 1A, 1C, and 5A.

The City shall implement the following measures to compensate for the loss of wetlands, waters of the United States, waters of the state, and riparian habitat:

a. The City shall submit a wetland delineation report to USACE and request a preliminary jurisdictional determination. Based on the jurisdictional determination, the City shall determine the exact acreage of waters of the United States and waters of the state that would be filled as a result of project implementation.

b. The City shall replace on a "no net loss" basis (minimum 1:1 ratio) (in accordance with USACE, CDFW, and/or RWQCB) the acreage and function of all wetlands and other waters that would be removed, lost, or degraded as a result of project implementation. Wetland habitat shall be replaced at an acreage and location agreeable to USACE, CDFW, and the Central Valley RWQCB and as determined during the Section 401, Section 404, and Section 1602 permitting processes. The ratio of stream habitat restoration/replacement shall consider value for Central Valley steelhead and Chinook salmon (as discussed under Mitigation Measure 4.3-2). Habitat shall either be restored on the affected stream and within City property, or at an approved mitigation bank. In either instance, compensatory mitigation will be approved by USACE, CDFW, and RWQCB.

c. The City shall obtain a USACE Section 404 Individual Permit, RWQCB Section 401 certification, and a Section 1602 streambed alteration agreement from CDFW before any groundbreaking activity within 50 feet of any wetland or water of the United States. The City shall implement all permit conditions, which may include contributions to an approved wetland mitigation bank or through the development and implementation of a Compensatory Wetland, Stream and Riparian Mitigation and Monitoring Plan for creating or restoring in-kind habitat in the surrounding area. If mitigation credits are not available, stream and riparian habitat compensation shall include establishment of riparian vegetation on currently unvegetated bank portions of streams affected by the project and enhancement of existing riparian habitat through removal of nonnative species, where appropriate, and planting additional native riparian plants to increase cover, continuity, and width of the existing riparian corridor along streams in the project site and surrounding areas. The ratio of riparian restoration/replacement shall consider value for Central Valley steelhead and Chinook salmon (as discussed under Mitigation Measure 4.3-2) as well as City Protected trees and Oak Woodland Habitat (as discussed under Mitigation Measure 4.3-8). Construction activities and compensatory mitigation shall be conducted in accordance with the terms of a streambed alteration agreement as required under Section 1602 of the Fish and Game Code.

d. The Compensatory Wetland, Stream and Riparian Restoration and Mitigation and Monitoring Plan shall include the following:

    1. identification of compensatory mitigation sites and criteria for selecting these mitigation sites;

    2. in kind reference habitats for comparison with compensatory wetland, stream, and riparian habitats (using performance and success criteria) to document success;

    3. monitoring protocol, including schedule and annual report requirements (Compensatory habitat shall be monitored for a minimum of three (3) years from completion of mitigation, or human intervention (including recontouring and grading), or until the success criteria identified in the approved mitigation plan have been met, whichever is longer.);

    4. ecological performance standards, based on the best available science and including specifications for native riparian plant densities, species composition, amount of dead woody vegetation gaps and bare ground, and survivorship (based on characteristics of the existing impacted habitat); at a minimum, compensatory mitigation planting sites must achieve 80 percent survival of planted riparian trees and shrubs by the end of the three-year maintenance and monitoring period or dead and dying trees shall be replaced and monitoring continued until 80 percent survivorship is achieved;

    5. corrective measures if performance standards are not met;

    6. responsible parties for monitoring and preparing reports; and

    7. responsible parties for receiving and reviewing reports and for verifying success or prescribing implementation or corrective actions.

Significance after Mitigation
Implementation of Mitigation Measure 4.3-1 would reduce significant impacts on wetlands, waters of the United States, waters of the state to a **less-than-significant** level because it would require that wetlands and waters be avoided to the extent feasible and that wetlands and waters that cannot be avoided are restored following construction, or if the habitat cannot be restored, that the City compensates for unavoidable losses in a manner that results in no net loss of wetlands and waters.

Impact 4.3-2	Interfere substantially with the movement of Central Valley steelhead and Central Valley fall-run Chinook salmon.
Applicable Policies and Regulations	FESA Magnuson-Stevens Fishery Conservation and Management Act CEQA City of Roseville General Plan Open Space and Conservation Element
Significance with Policies and Regulations	Proposed Project: Significant Alignment Option 1A: Significant Alignment Option 1C: Significant Alignment Option 5A: Significant
Mitigation Measures	Mitigation Measure 4.3-2 (Proposed Project, Option 1A, Option 1C, Option 5A)
Significance after Mitigation	Less than significant (Proposed Project, Option 1A, Option 1C, Option 5A)

The proposed in-water work would occur within critical habitat for Central Valley steelhead and EFH for Central Valley fall/late fall-run Chinook salmon. The following impact discussion focuses on Central Valley steelhead and fall-run Chinook salmon only because late fall–run Chinook salmon are not known to occur in the Dry Creek watershed (ECORP 2017).

Proposed Trail Alignment

Construction Impacts
Construction of the proposed trail alignment would require removal of wetland and riparian vegetation, grading, placement of aggregate base material, and construction of five roadway undercrossings, construction or modification of up to eight bridges (refer to Table 3-2 in Chapter 3, “Project Description”), approximately 27,000 square feet of retaining walls, and streambank stabilization elements (refer to Table 3-3, Exhibit 3-5, Exhibit 3-9, and Exhibit 3-12 in Chapter 3, “Project Description”). In addition, a maximum of eight temporary stream crossings or stream diversions would be require in-water work within the stream channel of Dry, Linda, and Cirby Creeks.

Implementation of the proposed project could result in both permanent and temporary effects to Central Valley steelhead, Central Valley steelhead critical habitat for this species, Central Valley fall-run Chinook salmon, and Central Valley fall-run Chinook salmon EFH. Permanent direct effects would result from the placement of piles/fill in Central Valley steelhead and Central Valley fall-run Chinook salmon aquatic habitat, including Critical Habitat and EFH, and permanent indirect effects could include night lighting adjacent to waterways from bridges and roadway undercrossings, and the loss of riparian vegetation and SRA cover. Lights have the potential to shine onto waters in the project site during night time hours and may facilitate increased predation of juvenile salmonids by visual predators like smallmouth bass, piscivorous birds, and mammals (ECORP 2017a), thereby potentially affecting Central Valley steelhead or Central Valley fall-run Chinook salmon that may occur in the project site. Loss of riparian vegetation and SRA may lead to higher water temperatures that are detrimental to fish. Temporary indirect effects could include sedimentation and turbidity, temporary removal of vegetation, as well as pollution/contamination of project waterways.

Construction-related activities near the channel or banks of Dry Creek, Cirby Creek, Linda Creek, and Strap Ravine include construction, installation, and implementation of: new bridges, bridge widening abutments, placement of aggregate base at low-water crossings, gabion walls, pavement, retaining walls, rock vanes, rock slope protection (RSP), clearing and grubbing, stream diversion structures (cofferdams and/or gravel bag berms), temporary construction access/entrance points, culverts, spoil areas, fiber rolls, fish screens, gabion walls, ingress area, piles, plantings, sidewalk, staging areas, plantings, post and cable fence, and cut/fill of the trail.

Direct disturbance, injury, or mortality is most likely to occur during in-water construction. With the exception of the Darling Way Bridge, all of the proposed bridges would span the creeks and no piles would be constructed within the existing creek channel. The piles at Darling Street Bridge would be cast in drilled hole piles. Construction that involves in-water work (e.g., pile drilling, installation of RSP, and placing dewatering structures) could result in disturbance, injury, or mortality of Central Valley steelhead and/or Central Valley fall-run Chinook salmon that come in contact with equipment or construction materials during their installation. Adult and juvenile steelhead or chinook salmon, however, would be expected to move upstream or downstream of the immediate project site in response to disturbances.

Additional direct effects could result from the proposed construction, installation, and implementation activities (e.g., bridge widening, abutments, aggregate base at low-water crossings, gabion walls, pavement, retaining walls, rock vanes, RSP, stream diversion structures) that cause construction noise, vibrations, and other associated disturbances that have the potential to harass, disrupt normal behavior, or cause injury or mortality to Central Valley steelhead and/or Central Valley fall-run Chinook salmon.

Construction activities/elements within the project site (e.g., clearing and grubbing along stream banks, earthwork, the placement of RSP below the OHWM, construction of temporary low-water creek crossings, construction of staging areas, access roads, and uncovered stockpiles) have the potential to cause mobilization of sediments that could cause turbidity and erosion effects in the project site and the project's waterways (i.e., Dry Creek, Cirby Creek, Linda Creek, and Strap Ravine), resulting in adverse conditions for Central Valley steelhead, Central Valley steelhead critical habitat, Central Valley fall-run Chinook salmon, and and/or Central Valley fall-run Chinook salmon EFH. Turbidity and erosion have the potential to degrade habitat and cause negative physiological and behavioral effects on Central Valley steelhead and Central Valley fall-run Chinook salmon. These effects vary in severity depending on the duration of the effect, the sensitivity of the affected life stage, and the concentration of suspended sediments in the water. Younger life stages are particularly vulnerable to these effects and are documented to avoid chronically turbid streams or move downstream to avoid affected areas (Caltrans 2015a). Increased sedimentation can also degrade foraging habitat by causing mortality (Caltrans 2015a).

Potential pollutants/contaminants commonly used during construction activities and associated with heavy equipment include gasoline, diesel, hydraulic fluid, lubricants, concrete, asphalt, and others. There is potential for accidental discharge of these materials into adjacent waters during construction, which would adversely impact Central Valley steelhead, Central Valley steelhead critical habitat, Central Valley fall-run Chinook salmon, and Central Valley fall-run Chinook salmon EFH. Potential impacts range from a degradation in the quality of habitat (rearing, foraging, shelter) to mortality depending on the substance released, the distance from the water feature and length of exposure.

Loss of Riparian, SRA, and Aquatic Vegetation

The removal of riparian, SRA, and aquatic vegetation as a result of necessary clearing and grubbing activities, slope paving, as well as in-water work such as the placement of RSP, has the potential to directly impact Central Valley steelhead (including Critical Habitat) and Central Valley fall-run Chinook salmon (including EFH). Riparian vegetation that overhangs and shades streams provides areas where

these species can hide from predators and is an important factor in maintaining appropriate water temperature in riverine habitats. Loss of riparian habitat is discussed in Impact 4.3-1.

SRA habitat within the project site was estimated using existing habitat mapping data. For purposes of the SRA analysis, the SRA was mapped at in-water work locations where adjacent wooded habitats (i.e., riparian and oak woodland) were located adjacent to existing aquatic habitats (e.g., Dry Creek, Cirby, Creek, Linda Creek, and Strap Ravine). SRA acreage calculations at these locations included the area from the centerline of a given aquatic feature (e.g., creek centerline) outward to an area of 5 feet up the bank from the features OHWM and along both banks. As explained, above under Methods and Assumptions, this method assumes this "footprint" supports overhead vegetation that provides 100 percent shading of the adjacent aquatic feature and, therefore, may overestimate the amount of existing shaded aquatic habitat. It also may overestimate the amount of vegetation removal that contributes to SRA habitat because at some locations SRA habitat is the result of large oak or riparian trees set back much more than 5 feet from the creek bank which would not be removed and therefore would continue to provide SRA function. Consequently, the estimated SRA impact acreage overlaps with riparian and oak woodland habitats and differs from the acreages reported in the wetland delineation. Based on this methodology, implementation of the Proposed Trail Alignment would result in an anticipated removal of up to 0.35 acre of SRA and temporary effects on SRA of 2.55 acres (ECORP 2016). A more accurate SRA impact calculation will be performed during the permitting phase of the project, and is expected to be less than evaluated in this document.

Central Valley Steelhead Critical Habitat
Designated Critical Habitat for Central Valley steelhead is present within a small portion of the project site that includes Dry Creek (ECORP 2016 - Exhibit 4). Critical Habitat includes the stream channels in the designated stream reaches and the lateral extent as defined by the ordinary high-water line. In areas where the OHWM has not been defined, the lateral extent is defined by the bankfull elevation (defined as the level at which water begins to leave the channel and move into the floodplain; it is reached at a discharge that generally has a recurrence interval of one to two years on the annual flood series).

Critical Habitat for Central Valley steelhead is defined as specific areas that contain the primary constituent elements and physical habitat elements essential to the conservation of the species. The specific primary constituent elements of steelhead Critical Habitat applicable to the project site include freshwater spawning sites, potential freshwater rearing sites, and freshwater migration corridors.

The proposed project would permanently affect 0.00014 acres of Central Valley steelhead Critical Habitat where five (5) 15-inch diameter concrete piles located within the OHWM (aquatic habitat) of Dry Creek would be placed at the proposed Darling Way Bridge widening location (ECORP 2016).

Fall-Run Chinook Salmon Essential Fish Habitat
In accordance with the Magnuson-Stevens Fishery Conservation and Management Act, as amended by the Sustainable Fisheries Act of 1996 (Public Law 104-267), federal agencies are required to consult with the NOAA/NMFS for activities that may adversely affect EFH. EFH are the waters and substrate necessary for fish spawning, breeding, feeding, or growth to maturity, and include several important components: adequate substrate; water quality; water quantity, depth, and velocity; channel gradient and stability; food; cover and habitat complexity; space; access and passage; and habitat connectivity (Pacific Fishery Management Council 1999). EFH for Chinook salmon could be affected by the proposed project.

Project effects on EFH would be similar to the Central Valley steelhead Critical Habitat and SRA/riparian effects discussed above. With the exception of the minor impacts to Central Valley steelhead Critical Habitat, effects to Central Valley fall-run Chinook salmon EFH would be temporary and minor, resulting from increased turbidity and sedimentation and temporary losses of aquatic

habitat, natural substrates, and overhead SRA cover vegetation. It should be noted that because the Central Valley fall-run Chinook salmon is not a FESA listed species, there is no designated critical habitat for the species.

Use-related Impacts

Potential effects could result from the proposed nighttime lighting on bridges and at trail undercrossings of roadways. Lights have the potential to shine onto waters in the project site during night time hours and may facilitate increased predation of juvenile salmonids by visual predators like smallmouth bass, piscivorous birds, and mammals (ECORP 2017), thereby potentially affecting Central Valley steelhead or Central Valley fall-run Chinook salmon that may occur in the project site.

The long-term maintenance and repair of the multi-use path and bridge structures would require the use of various tool and equipment that have the potential to introduce fill or other materials into Dry, Linda, and Cirby Creeks that could affect Central Valley steelhead and Central Valley fall-run Chinook salmon and their habitat. In addition, the creation of impervious surfaces associated with the Proposed Trail Alignment could result in indirect impacts to Dry, Linda, and Cirby Creeks and other downstream waters as a consequence of runoff that could affect Central Valley steelhead and Central Valley fall-run Chinook salmon. These indirect impacts would be minimized through compliance with protective city and state regulations as described in Section 4.8, “Hydrology and Water Quality,” and Impact 4.3-1, Disturbance and loss of waters of the United States. Both the City of Roseville Grading Permit and the State Water Resources Control Board NPDES permit (which is required for all projects that disturb over one acre of soil), require the preparation of a SWPPP that would help prevent or minimize use-related impacts. Furthermore, the City of Roseville Parks Maintenance Division is required to have fleet and work equipment leak free and in working order. Maintenance vehicles would be required to stay within paved portions of the trail or existing dirt trails and maintenance crews follow industry BMPs, and Park Maintenance crews receive training prior to working on City Preserves or open habitat areas. Maintenance and monitoring is conducted as per the Open Space Preserve Overarching Management Plan (and related USFWS Biological Opinion (81420-2008-F-1958-3)) and the California Department of Fish and Wildlife Streambed Alteration Agreement for Routine Maintenance. Although long term maintenance of the multi-use trail may not result in impacts to Central Valley steelhead, and/or Central Valley fall-run Chinook salmon, potential adverse effects could result from the proposed permanent nighttime lighting on bridges and at trail undercrossings of roads.

Conclusion

Implementation of the proposed project would create construction noise, vibrations, lighting, temporary diversion structures, and temporary creek crossings at Darling Way Bridge, the Cirby Creek Bank Stabilization area near Machado Lane, and Bridge #21 at Strap Ravine.

As discussed under Impact 4.10-1, the City would be required to obtain a USACE Section 404 Individual Permit, RWQCB Section 401 certification, and a Section 1602 streambed alteration agreement from CDFW before any groundbreaking activity within 50 feet of any wetland or water of the United States. The City would implement all permit conditions, which may include contributions to an approved wetland mitigation bank or through the development and implementation of a Compensatory Wetland, Stream and Riparian Mitigation and Monitoring Plan for creating or restoring in-kind habitat in the surrounding area. If mitigation credits are not available, stream and riparian habitat compensation could include establishment of riparian vegetation on currently unvegetated bank portions of streams affected by the project and enhancement of existing riparian habitat through removal of nonnative species, where appropriate, and planting additional native riparian plants to increase cover, continuity, and width of the existing riparian corridor along streams in the project site and surrounding areas. The ratio of riparian restoration/replacement shall consider value for Central Valley steelhead and Chinook salmon. Construction activities and compensatory mitigation shall be conducted in accordance with the terms of a streambed alteration agreement as required under Section 1602 of the Fish and Game Code. Construction activities such as clearing and grubbing along stream banks, earthwork, the placement of RSP below the OHWM, and the construction of temporary creek crossings have the

potential to result in temporary sedimentation and turbidity effects, accidental spills of hazardous materials, potential noise-related disturbances, and temporary loss of SRA. The proposed project would also include the installation of RSP and rock and log vanes, a limited amount of permanent pile placement (limited to the Darling Way Bridge Widening location), and permanent loss of SRA, which can affect Central Valley steelhead (including critical habitat) and/or Central Valley fall-run Chinook salmon (including EFH). This would be a **significant** impact.

Alignment Option 1A
Alignment Option 1A is the same as the Proposed Trail Alignment until the approach to the Dry Creek/Cirby Creek confluence and the first bridge; therefore, similar impacts to Central Valley steelhead and Central Valley fall-run Chinook salmon would be expected. The Proposed Trail Alignment would cross Dry Creek via Bridge #2 and continue on the northern bank of Cirby Creek, while Option 1A would cross Dry Creek via Bridge #3 and remain on the south bank of Cirby Creek. By remaining on the south bank of Cirby Creek, Option 1A would not require the construction of Bridge #2 or Bridge #4. Option 1A would require an additional 765 linear feet of retaining walls or streambank stabilization when compared to the Proposed Trail Alignment. However, because this option does not require the construction of Bridge #2 or Bridge #4, the total permanent impacts to salmonid aquatic habitat (i.e., aquatic habitat) is 0.01 acres less than the Proposed Trail Alignment (or 0.25 acres). Similarly, temporary impacts to aquatic habitat is 0.03 acres less than the Proposed Trail Alignment (or 0.55 acres). Option 1A would permanently impact 0.023 acre of SRA habitat (or 0.017 acre less than the Proposed Trail Alignment) and would temporarily impact 0.034 acre SRA habitat (or 0.109 acre more than the Proposed Trail Alignment).

Because Option 1A would have temporary and permanent impacts to aquatic, riparian, and SRA habitat that could affect Central Valley steelhead (including critical habitat) and/or Central Valley fall-run Chinook salmon (including EFH); this is considered a **significant** impact.

Alignment Option 1C
Option 1C is similar to the Proposed Trail Alignment and would have almost the same bridges and undercrossings described above in regards to the Proposed Trail Alignment; therefore, similar impacts to Central Valley steelhead and Central Valley fall-run Chinook salmon would be expected. As shown in Sheet 1 Segment (Exhibit 3-14), the trail would be located on the northeastern side of Dry Creek under Alignment Option 1C. In Sheet 1 Segment, the northeastern bank of Dry Creek is steep and erosive with little distance between the top of the bank and the adjacent private property (CBEC 2014). Because of this, implementation of Option 1C would require an additional 1,080 linear feet of streambank stabilization. Under Option 1C permanent impacts to salmonid habitat (i.e., aquatic habitat) would be 0.01 acres less than the Proposed Trail Alignment (or 0.25 acres), and Option 1C temporary impacts would be 0.05 acres less than the Proposed Trail Alignment. Implementation of the Alignment Option 1C would result in an anticipated removal of 0.032 acre of SRA (or 0.019 acre more than the Proposed Trail Alignment) and temporary effects on SRA to be 0.25 acre (or 0.072 acre more than the Proposed Trail Alignment).

Because Option 1C would have temporary and permanent impacts on aquatic, SRA, and riparian habitat that could affect Central Valley steelhead (including critical habitat) and/or Central Valley fall-run Chinook salmon (including EFH); this is considered a **significant** impact.

Alignment Option 5A
Option 5A deviates from the Proposed Trail Alignment just west of Bridge #13. Option 5A would remain on the south bank of Cirby Creek until crossing to the north bank via Bridge #14. Option 5A would include both an undercrossing of Sunrise Avenue and connecting paths to both sides of Sunrise Avenue. Both the Proposed Trail Alignment and Option 5A would make extensive use of retaining walls through this section of the path; however, Option 5A would require an additional 635 linear feet of stream habitat because of installation of retaining walls when compared to the Proposed Trail Alignment. The permanent impacts to salmonid habitat under Option 5A would be 0.0005 acre more

than the Proposed Trail Alignment, and the temporary impacts to wetlands and/or waters would be 0.001 acres less than the Proposed Trail Alignment. No riparian impacts are expected from implementation of Option 5A. However, based on the analysis for SRA, implementation of the Alignment Option 5A would result in an anticipated removal of 0.022 acre of SRA (or 0.009 acre more than the Proposed Trail Alignment) and temporary effects on SRA to be 0.16 acre (or 0.059 acre more than the Proposed Trail Alignment).

Because Option 5A would have temporary and permanent impacts on aquatic and riparian habitat that could affect Central Valley steelhead (including critical habitat) and/or Central Valley fall-run Chinook salmon (including EFH); this is considered a **significant** impact.

Mitigation Measures

Mitigation Measure 4.3-2: Central Valley steelhead and Central Valley fall-run Chinook salmon.
This mitigation would apply for the Proposed Trail Alignment, Alignment Options 1A, 1C, and 5A.

The City shall implement the following measures, developed based on past consultations with NMFS, to avoid, minimize and/or mitigate potential effects on Central Valley steelhead and Central Valley fall-run Chinook salmon.

a. Prior to the onset of work, the qualified biologist shall conduct a mandatory worker environmental awareness training. The training shall educate workers about the importance of avoiding impacts to Central Valley steelhead and Central Valley fall-run Chinook salmon and their habitat. The training shall also cover the relevant permit conditions and avoidance and minimization measures that protect sensitive species and habitats, as well as the penalties for non-compliance with state and federal laws, regulations, and permit requirements. The training shall include information about the life history and habitat requirements of Central Valley steelhead and Central Valley fall-run Chinook salmon and their potential to occur in the project site, as well as the terms and conditions of the Project's Biological Opinions or other authorizing documents (i.e. letter of concurrence).

b. Construction activities occurring within creek banks and channel beds shall be limited to the low-flow period (typically June 15 - October 15), unless earlier or later dates are approved by CDFW and NMFS during consultation. By limiting in-water construction activities to this time period, the Project shall limit construction activities to periods when low flow depths and velocities within the project streams are less likely to support Central Valley steelhead or Central Valley fall-run Chinook salmon life stages including adult migration, spawning, and egg incubation periods.

c. Fish screens or temporary stream diversion structures shall be installed to exclude Central Valley steelhead and Central Valley fall-run Chinook salmon from areas where in-water and near-water construction activities would be conducted. Installation of fish screens or temporary diversion structures shall prevent access to affected areas in the unlikely event that Central Valley steelhead or Central Valley fall-run Chinook salmon are present in the project streams during the low-flow period (June 15 - October 15).

d. The City shall retain a qualified biologist to monitor the installation of fish screens or temporary stream diversion structures, as well as any other near or in-water construction activities (e.g., installation of RSP along creek banks or below the OHWM, installation and removal of low water crossings, placement of new abutments, rock walls, gabions, and water diversions). Prior to the installation of fish screens or temporary stream diversion structures the biologist shall visually survey the in-water work area for Central Valley steelhead and Central Valley fall-run Chinook salmon.

e. Once the biologist confirms that no Central Valley steelhead or Central Valley fall-run Chinook salmon are present in the in-water work area, fish screens or temporary diversion devices shall be installed in a downstream direction, installing the upstream fish screen or temporary diversion device. The

biologist shall conduct a second visual survey before the downstream portion of the fish screen or temporary stream diversion is installed. If fish are present within the diversion area, the fish shall be guided out of the in-water work area with nets by the qualified biologist. The need for fish salvage is not anticipated because Central Valley steelhead or Central Valley fall-run Chinook salmon are not likely to be present in the project streams during the low-flow period (June 15 - October 15) – primarily because of excessive summer water temperatures that occur during this period in the Project area. However, fish salvage (or relocation outside of the in-water work areas) shall be conducted as needed should fish be present.

f. Before the onset of construction activities, high visibility orange construction fencing shall be installed along the perimeter of Environmentally Sensitive Areas under the supervision of the qualified biologist. Fencing shall be installed along the limits of construction in riparian habitat, minimizing the disturbance of or encroachment on sensitive aquatic and riparian habitats. The contractor shall maintain the project's Environmentally Sensitive Area fencing for the duration of the project and remove it when the project is complete.

g. Erosion control BMPs shall be implemented during construction to minimize the potential for erosion, and the mobilization of sediments to project waterways and be consistent with the Open Space Preserve Overarching Management Plan (and related USFWS Biological Opinion (81420-2008-F-1958-3). The following erosion and sediment control measures shall be implemented to prevent sedimentation and turbidity, as well as any identified in the SWPPP, 401, 404, or 1602 permits.

    1. Soil exposure shall be minimized by limiting the area of construction and disturbance and through the use of temporary BMPs, groundcover, and stabilization measures. These measures may include mulches, soil binders and erosion control blankets, silt fencing, fiber rolls, temporary berms, sediment de-silting basins, sediment traps, and check dams.

    2. Pursuant to Section 13-4.03C(3) of the Caltrans Standard Specifications, water pollution control practices shall be implemented within 72 hours of stockpiling material or before a forecasted storm event, whichever occurs first. If stockpiles are being used, soil, sediment, or other debris shall not be allowed to enter storm drains, open drainages, and watercourses. Active and inactive soil stockpiles must be covered with soil stabilization.

    3. Plastic mono-filament netting (erosion control matting) or similar material that could trap wildlife shall not be used. Acceptable substitutes include, but are not limited to, jute, coconut coir matting, or tackified hydroseeding compounds.

    4. Energy dissipaters and erosion control pads shall be provided at the bottom of slope drains as needed. Other flow conveyance control mechanisms may include earth dikes, swales, or ditches. Stream bank stabilization measures shall also be implemented.

    5. Existing vegetation shall be protected, to the extent feasible, to reduce erosion and sedimentation. Vegetation shall be preserved by installing temporary fencing, or other protection devices, around areas to be protected. Where complete removal is not necessary, vegetation shall be cut to ground level with the root systems left intact to prevent erosion and facilitate the recovery of riparian vegetation after project activities are complete.

    6. Exposed soils shall be covered by loose bulk materials or other materials to reduce erosion and runoff during rainfall events.

    7. Exposed soils shall be stabilized, through watering or other measures, to prevent the movement of dust at the project site caused by wind and construction activities such as traffic and grading activities.

8. All construction roadway areas shall be properly protected to prevent excess erosion, sedimentation, and water pollution.

9. The contractor shall conduct periodic maintenance of erosion and sediment control measures. All erosion and storm water control measures shall be properly maintained for the duration of the project.

h. A Spill Prevention and Control Plan shall be developed and implemented by the City, or its contractor, for the duration of the project. Pollution prevention and control BMPs shall be implemented during construction to minimize the risk of hazardous materials being released into waters in the project site. The following pollution and contamination prevention measures shall be implemented to prevent the release of hazardous materials during construction:

1. All equipment and materials shall be stored at least 50 feet from wetlands or waters in the project site unless the equipment is on established paved areas. If storage of equipment or materials within 50 feet of wetlands or waters in the project site is necessary, secondary containment shall be utilized to contain the equipment and materials and prevent discharge of any harmful substances into the soil or aquatic resources. Staging and storage areas for equipment, materials, fuels, lubricants, and solvents shall be located outside of the channel and banks of Dry Creek, Cirby Creek, Linda Creek, and Strap Ravine.

2. Secondary containment shall be provided for stationary equipment such as motors, pumps, generators, and compressors located within or adjacent to the Dry Creek, Cirby Creek, Linda Creek, and Strap Ravine. Any equipment or vehicles driven or operated within or adjacent to these creeks shall be checked and maintained daily to ensure proper working conditions to avoid potential impacts such as leaks.

3. No fueling, cleaning or maintenance of vehicles or equipment, or placement of construction debris, spoils or trash should occur within 50 feet of wetlands or waters in the project site unless it occurs in designated refueling/staging areas on existing paved surfaces with secondary containment in place. Refueling of equipment should occur at approved fuel locations. Contractor shall inspect all equipment/vehicles for leaks prior to use and should inspected regularly during Project inspection.

4. For work that is to occur on existing structures over open flowing portions of Dry Creek, Cirby Creek, Linda Creek, or Strap Ravine, a method of containment such as netting, tarps or similar catchments shall be utilized to catch debris or other potential construction materials and prevent such material from falling into the waters.

i. Lighting design shall include measures to limit the amount of light “spill” on water surfaces at night that could lead to predation of juvenile salmonids. To minimize the effects of lighting on salmonids, the City shall prevent lighting that directly shines on the water surfaces of Dry Creek, Cirby Creek, and Linda Creek by minimizing the amount of lighting necessary to safely and effectively illuminate pedestrian areas on bridges and trails, and by shielding and focusing lights on the bridge and trail surfaces and away from water surfaces.

j. The project shall avoid impacts to riparian vegetation and aquatic habitat where feasible, and shall incorporate restoration and enhancement of the riparian corridor into the final design plans and construction specifications and shall develop a riparian and restoration plan (RRP), as part of the Compensatory Wetland, Stream and Riparian Mitigation and Monitoring Plan discussed in Impact 4.3-1, Disturbance and loss of waters of the United States, and Mitigation Measure 4.3-1 that involves onsite enhancements and purchase of mitigation bank credits to compensate for permanent and temporal loss of riparian and SRA cover and Central Valley steelhead aquatic habitat loss. Compensatory mitigation for loss of Central Valley steelhead habitat will be provided by purchase

conservation credits at a conservation bank, as approved by NMFS during the Section 7 consultation. The RRP shall include on-site measures such as enhancing riparian vegetation by the planting of native shrub, tree, and understory species to create a more diverse vegetation structure and thus a higher quality habitat for wildlife. The onsite measures in the RRP may also include the planting of willows and other fast-growing native riparian species, which can quickly compensate for the loss of riparian and SRA cover, and will be planted where erosion control (RSP, slope pavement etc.) is installed along stream banks. Permanent impacts to riparian vegetation can also be mitigated with the purchase of credits (1:1 for riparian and 1.7:1 for SRA cover), and 0.5:1 for temporal loss of riparian vegetation and SRA cover. Restoration and enhancement of the riparian vegetation in the project site (combined with mitigation bank credits) shall result in no net loss of riparian habitat acreage or function and shall increase the quality of habitat for Central Valley steelhead (including Critical Habitat), Central Valley fall-run Chinook salmon (including EFH), and shall be accomplished through development and implementation of the RRP. Permanent impacts to riparian, including SRA, and Central Valley steelhead shall be further analyzed and determined based on final design for each construction phase during Section 7 consultation with NMFS and during CDFW Section 1602 permitting. Consultation with NMFS will also include EFH for Central Valley fall-run Chinook salmon.

k. Construction techniques shall be implemented to isolate near shore work from waterbodies in the project site. It is anticipated that clear water diversion using a cofferdam or gravel bag berm with impermeable layer would be used. Isolating in-water construction areas behind cofferdams would minimize the potential for turbidity and suspended sediments from reaching levels that could harm Central Valley steelhead, degrade existing Critical Habitat, harm Central Valley fall-run Chinook salmon, or degrade existing EFH. The extent of cofferdam footprints and dewatering shall be kept to the minimum necessary to support construction activities, and creek flow shall not be interrupted or reduced as a result of construction activities. Any fill material used in association with the cofferdams, such as sandbag fill, shall be composed of washed, rounded, spawning-sized gravel between 0.4 and 4 inches in diameter. If authorized by applicable state and federal permits, any of this gravel in contact with flowing water shall be left in place, and distributed manually with hand tools to allow passage for all life stages of fish. Installation and removal of cofferdams and/or gravel bag berms would be restricted to the summer low-flow period.

Significance after Mitigation

Implementing Mitigation Measures 4.3-2 would avoid or minimize adverse effects on Central Valley steelhead and Central Valley fall-run Chinook salmon. The mitigation measure limits construction to summer periods (June 15 and October 15) when low flow depths and velocities within the project site are less likely to support Central Valley steelhead and Central Valley fall-run Chinook salmon life stages, including adult migration, spawning, and egg incubation periods. In addition, the mitigation measure would exclude fish from the in-water work areas, in the unlikely event they were present, by installing temporary fish screens or diversion structures. The mitigation measure requires that a qualified biologist be present during the installation of fish screens/temporary diversions to survey and ensure that no special-status fish species are present. Isolating in-water construction areas behind cofferdams and limiting installation and removal of cofferdams and/or gravel bag berms would be restricted to the summer low-flow period would further reduce the potential for turbidity and suspended sediment levels from reaching levels that could harm Central Valley steelhead, Central Valley fall-run Chinook salmon or degrade existing Central Valley steelhead Critical Habitat or Central Valley fall-run Chinook salmon EFH. Mitigation Measure 4.3-2 also requires the project to incorporate night lighting design that does not directly shine light on water surfaces at night that could lead to predation of juvenile Central Valley steelhead and Central Valley fall-run Chinook salmon and their juveniles. This measure limits lighting from directly radiating on the water surfaces of Dry, Cirby, and Linda Creeks by minimizing the amount of lighting necessary to safely and effectively illuminate pedestrian areas on bridges and trail undercrossings, and by shielding and focusing lights on the bridge and trail surfaces and away from water surfaces. With the implementation of the lighting design plan that incorporates these measures, impacts on Central Valley steelhead and Central Valley fall-run Chinook salmon from night lighting on bridges would be avoided. Incorporation of restoration and enhancement of the riparian

corridor into the final design plans and construction specifications and development of a riparian and restoration plan would involve onsite enhancements and purchase of conservation bank credits to compensate for permanent and temporal loss of riparian, SRA cover, and aquatic habitat for steelhead. Restoration and enhancement of the riparian vegetation in the project site (combined with conservation bank credits) would result in no net loss of riparian habitat acreage or function and would increase the quality of habitat for Central Valley steelhead (including Critical Habitat) and Central Valley fall-run Chinook salmon. Therefore, implementation of Mitigation Measures 4.3-2 would reduce significant on Central Valley steelhead and Central Valley fall-run Chinook salmon to a **less-than-significant** level.

Impact 4.3-3	Disturbance or loss of valley elderberry longhorn beetle or its habitat.
Applicable Policies and Regulations	FESA
Significance with Policies and Regulations	Proposed Project: Significant Alignment Option 1A: Significant Alignment Option 1C: Significant Alignment Option 5A: Significant
Mitigation Measures	Mitigation Measures 4.3-3a,4.3-3b, and 4.3-3c (Proposed Project, Option 1A, Option 1C, Option 5A)
Significance after Mitigation	Less than significant (Proposed Project, Option 1A, Option 1C, Option 5A)

A total of 42 elderberry shrubs occur on the project site, including the Proposed Trail Alignment, Alignment Option 1A, Alignment Option 1C and Alignment Option 5A, and a 165-foot buffer around the project site. The Biological Assessment for Valley Elderberry Longhorn Beetle (ECORP 2017) addresses potential impacts of the proposed project on federally-listed valley elderberry longhorn beetle. The proposed project site is not located within critical habitat for VELB, and therefore, impacts to VELB critical habitat would not occur.

As explained above, elderberry surveys were conducted in 2014 and 2017.

Construction (such as trenching and paving) within 20 feet of the dripline of an elderberry shrub could potentially kill the shrub; therefore, project-related construction occurring within 20 feet of the dripline of elderberry shrubs on the project site could potentially result in direct impacts to VELB habitat or VELB if it is present. Table 4.3-4 lists the individual shrubs recorded and the distance of each shrub to proposed project construction limits (also see Exhibits 4.3-2a through 4.3-2d). Removal of elderberry shrubs, ground work within the drip-line of elderberry shrubs, and removal of riparian habitat within 165 feet of other elderberry shrubs could result in direct and indirect adverse impacts to VELB. The approximate acres of habitat that would be removed for each trail option is described below.

Proposed Trail Alignment

Construction Impacts

A total of 42 elderberry shrubs with at least one stem equal to or greater than one inch in diameter at ground level were observed along the Proposed Trail Alignment and within the 165-foot buffer around the construction limit for the Proposed Trail Alignment. Based on the preliminary project design, five elderberry shrubs (ES24, ES25, ES26, ES36, ES37,) occur directly within the construction footprint for the paved path; one elderberry shrub, ES33, occurs within approximately 8.5 feet of the proposed Bridge #2; seven elderberry shrubs (ES34, ES35, ES38-ES42) occur within the cut/fill construction boundary for the paved path, approximately eight feet or less from the edge of pavement (Exhibits 4.3-2a and 4.3-2b); and two elderberry shrubs (ES31 and ES32) occur within 16 feet and 2.7 feet, respectively, of cut/fill for temporary construction. These elderberry shrubs could therefore be adversely directly affected by project construction activities, either by direct removal of the elderberry shrubs or by ground disturbance within the dripline of the shrub (e.g. cut/fill and installation of pavement) that could result in the loss of the elderberry shrubs.

Removal of riparian habitat within 165 feet of potentially occupied elderberry shrubs could result in direct or indirect impacts to VELB. Approximately 0.33 acre of riparian and 0.89 acre of valley oak riparian woodland, for a total of 1.22 acres of suitable VELB habitat, would be removed within 165 feet of elderberry shrubs on the project site.

The remaining 27 elderberry shrubs recorded in the survey area for the proposed trail alignment are located between 20 feet and 165 feet of the limit of project construction and therefore could result in indirect effects on VELB habitat including: the removal of protective riparian plants, dust accumulation from equipment during construction that could affect the ability of VELB to forage and deposit eggs; and an increase of water from dust control activities during grading and construction that may attract argentine ants that prey on VELB.

Use-related Impacts

Maintenance and ongoing public use of the project site within 165-feet of elderberry shrubs could potentially directly and indirectly impact VELB habitat. The long-term maintenance and repair of the multi-use path would require the use of various tools and equipment for vegetation maintenance which could include accidental removal, trimming, or spraying of herbicides in proximity to the elderberry shrubs. However, the City of Roseville Park Maintenance Department crews attend training for working within City Preserves (such as elderberry and wetland preserves) and open space habitat and maintenance crews implement industry BMPs. Furthermore, all trail maintenance activities would be conducted consistent with the City's Open Space Preserve Overarching Management Plan and related USFWS Biological Opinion that allows trimming of up to 100 shrubs for the lifetime of the Biological Opinion with a maximum of 10 shrubs in any one year. All trail maintenance activities, including those that may affect elderberry, would be conducted consistent with the City's CDFW Streambed Alteration Agreement for Routine Maintenance. Although the elderberry shrubs in the project site are part of a natural riparian corridor, they are surrounded by urban development and are subject to disturbance from the surrounding development, such as collecting of elderberries by the public, placement of feral cat feeding stations, and/or inadvertent trimming of elderberry branches.

Conclusion

Under the Proposed Trail Alignment, direct and indirect adverse impacts to VELB habitat could occur as a result of construction and ongoing maintenance and public use. Under the Proposed Trail Alignment, a total of 15 elderberry shrubs could be adversely impacted through direct removal of elderberry shrubs, ground-disturbing construction (cut/fill) within the root zone of the shrubs, or permanent removal of riparian habitat within 165 feet of elderberry shrubs. It is anticipated that implementation of the project would result in the removal of a total of 1.22 acres of suitable riparian habitat within 165 feet of elderberry shrubs. Direct and indirect impacts to VELB habitat (individual shrubs and/or riparian habitat) would be considered a **significant** impact.

Alignment Option 1A

Option 1A is the same as the Proposed Trail Alignment until the approach to the Dry Creek/Cirby Creek confluence (Exhibit 4.3-2a). Under Alignment Option 1A, a total of 35 elderberry shrubs are located along the entire trail alignment, of which five elderberry shrubs (ES36, ES37, ES24, ES25, ES26) occur directly within the construction footprint for the paved path and seven elderberry shrubs (ES34, ES35, ES38-ES42) occur within the cut/fill construction boundary for the paved path, approximately eight feet or less from the edge of pavement (Exhibit 4.3-2a). These elderberry shrubs could therefore be adversely directly affected by project construction activities, either by direct removal of the elderberry shrubs or by ground disturbance within the dripline of the shrub (e.g. cut/fill and installation of pavement) that could result in the loss of the elderberry shrubs.

Under Alignment Option 1A, a total of 23 elderberry shrubs are present between 20 feet and 165 feet of the limit of construction for the entire alignment and therefore could be indirectly impacted by project-related construction and ongoing maintenance and public use, described under the proposed trail alignment.

Removal of riparian and valley oak riparian woodland within 165 feet of potentially occupied elderberry shrubs, could result in indirect impacts to VELB because it causes habitat fragmentation and could potentially interrupt the movement and distribution pattern of local populations. Approximately 0.20 acre of riparian and 0.69 acre of valley oak riparian woodland, for a total of 0.89 acres of suitable VELB

habitat, would be removed within 165 feet of elderberry shrubs on the project site as part of the project design.

Under Alignment Option 1A, a total of 12 elderberry shrubs (as compared to 15 elderberry shrubs under the Proposed Trail Alignment) could be adversely impacted through direct removal of elderberry shrubs, ground-disturbing construction (cut/fill) within the root zone of the shrubs, or permanent removal of riparian habitat within 165 feet of elderberry shrubs. It is anticipated that implementation of the project would result in the removal of a total of 0.89 acre (as compared to 1.22 acres under the Proposed Trail Alignment) of suitable riparian habitat within 165 feet of elderberry shrubs. Direct and indirect impacts to VELB habitat (individual shrubs and/or riparian habitat) would be considered a **significant** impact.

Alignment Option 1C

Option 1C is the same as the Proposed Trail Alignment for most of the length of the trail, with the exception of a portion of the trail that would be located on the northeastern side of Dry Creek (see Exhibit 4.3-2a). Under Option 1C, a total of 41 elderberry shrubs are located within the entire project site and 165-foot buffer. Six elderberry shrubs (E33, ES36, ES37, ES24, ES25, ES26) occur directly within the construction footprint for the proposed Bridge #2 and paved path; seven elderberry shrubs (ES34, ES35, ES38-ES42) occur within the cut/fill construction boundary for the paved path, approximately eight feet or less from the edge of pavement (Exhibit 4.3-2a); and one elderberry shrub (ES31) occurs within 6 feet of cut/fill for temporary construction. These elderberry shrubs could therefore be adversely directly affected by project construction activities, either by direct removal of the elderberry shrubs or by ground disturbance within the dripline of the shrub (e.g. cut/fill and installation of pavement) that could result in the loss of the elderberry shrubs.

For the entire trail under Alignment Option 1C, 27 elderberry shrubs are present between 20 feet and 165 feet of the limit of construction and therefore could be indirectly impacted by project-related construction and ongoing maintenance and public use, described under the proposed trail alignment.

Removal of riparian and valley oak riparian woodland within 165 feet of potentially occupied elderberry shrubs, could result in indirect impacts to VELB because it causes habitat fragmentation and could potentially interrupt the movement and distribution pattern of local populations. Approximately 0.54 acre of riparian and 0.87 acre of valley oak riparian woodland, for a total of 1.41 acres of suitable VELB habitat, would be removed within 165 feet of elderberry shrubs on the project site as part of the project design.

Under Alignment Option 1C, a total of 14 elderberry shrubs (as compared to 15 elderberry shrubs under the Proposed Trail Alignment) could be adversely impacted through direct removal of elderberry shrubs, ground-disturbing construction (cut/fill) within the root zone of the shrubs, or permanent removal of riparian habitat within 165 feet of elderberry shrubs. It is anticipated that implementation of the project would result in the removal of a total of 0.87 acre (as compared to 1.22 acres under the Proposed Trail Alignment) of suitable riparian habitat. Direct and indirect impacts to VELB habitat (individual shrubs and/or riparian habitat) would be considered a **significant** impact.

Alignment Option 5A

Alignment Option 5A is the same as the Proposed Trail Alignment for most of the length of the trail, except a portion that crosses over to the southern side of Linda Creek (Exhibit 4.3-2c). There are no elderberry shrubs within a 165-foot buffer along this portion of the alignment; therefore potential direct and indirect impacts to elderberry shrubs under Alignment Option 5A would be identical to potential direct and indirect impacts under the Proposed Trail Alignment.

Removal of riparian and valley oak riparian woodland within 165 feet of potentially occupied elderberry shrubs, could result in indirect impacts to VELB because it causes habitat fragmentation and could potentially interrupt the movement and distribution pattern of local populations. Approximately 0.33 acre

of riparian and 0.89 acre of valley oak riparian woodland, for a total of 1.22 acres of suitable VELB habitat, would be removed for the entire trail alignment as part of the project design.

Adverse impacts to VELB habitat would be the same under Alignment Option 5A as compared to the Preferred Trail Alignment. Under Alignment Option 5A, total of 15 elderberry shrubs could be adversely impacted through direct removal of elderberry shrubs, ground-disturbing construction (cut/fill) within the root zone of the shrubs, or permanent removal of riparian habitat within 165 feet of elderberry shrubs. It is anticipated that implementation of the project would result in the removal of a total of 1.22 acres of suitable riparian habitat. Direct and indirect impacts to VELB habitat (individual shrubs and/or riparian habitat) would be considered a **significant** impact.

Mitigation Measures

Mitigation Measure 4.3-3a: Avoidance and minimization measures.

The following measures shall be implemented to avoid or minimize effects to VELB and/or its habitat during construction of the proposed project.

a. A worker awareness training program for construction personnel shall be conducted by a qualified biologist prior to beginning construction activities. The program shall inform all construction personnel about the life history and status of the beetle, requirements to avoid damaging the elderberry plants, and the possible penalties for not complying with these requirements. Written documentation of the training shall be submitted to the USFWS within 30 days of its completion.

b. If elderberry shrubs can be retained within the project footprint, the City shall avoid indirect impacts by implementing the following measures, to the extent feasible, or equivalent measures agreed to in consultation with USFWS. Minimization measures include:

    1. **Avoidance Area**. An avoidance area shall be established at least 20 feet from the drip-line of an elderberry shrub for any activities that may damage or kill the elderberry shrub (e.g., trenching, paving, etc.).

    2. **Fencing**. All areas to be avoided during construction activities shall be fenced and/or flagged as close to construction limits as feasible.

    3. **Signage**. Signage shall be posted every 50 feet along the buffer area with the following information, “This area is habitat of the valley elderberry longhorn beetle, a threatened species, and must not be disturbed. This species is protected by the Endangered Species Act of 1973, as amended. Violators are subject to prosecution, fines, and imprisonment.” The signs shall be clearly readable from a distance of 20 feet, and must be maintained for the duration of construction.

    4. **Timing.** To the extent feasible, all activities that could occur within 165 feet of an elderberry shrub, shall be conducted outside of the VELB flight season (March - July).

    5. **Erosion Control and Revegetation.** Erosion control measures will be implemented to restore areas disturbed within 165 feet of elderberry shrubs and the affected area will be re-vegetated with appropriate native plants.

    6. **Chemical Usage.** Herbicides will not be used within the drip-line of the shrub. Insecticides will not be used within 100 feet of an elderberry shrub. All chemicals will be applied using a backpack sprayer or similar direct application method.

    7. **Mowing**. Mechanical weed removal within the drip-line of the shrub shall be limited to the season when adults are not active (August - February) and shall avoid damaging the elderberry.

8. **Pre-construction and post-construction surveys**. Pre-construction surveys shall document compliance with mitigation measures. The post-construction survey shall confirm that there was no additional damage to any of the elderberry shrubs than as described in this document.

9. **Construction monitoring**. A qualified biologist shall monitor the work area at project-appropriate intervals to assure that all avoidance and minimization measures are implemented. The amount and duration of monitoring will depend on the project specifics and shall be discussed with a USFWS biologist.

10. **Elderberry Shrub Protection and Management Plan.** The City will develop as part of the Section 7 consultation process with USFWS for the Dry Creek Greenway East Trail project an elderberry shrub protection and management plan that will include how the buffer areas are to be protected, restored, and maintained after construction is completed and the City will ensure that ground-disturbing activities on the project site do not alter the hydrology for shrubs to be protected or otherwise affect the likelihood of vigor or survival of elderberry shrubs. The Elderberry Shrub Protection and Management Plan shall be consistent with the City's Open Space Preserve Overarching Management Plan.

Mitigation Measure 4.3-3b: Removing/transplanting individual elderberry shrubs.

a. Elderberry shrubs that are in the path of construction activities and cannot be avoided shall be removed and if feasible, transplanted, according to Table 4.3-5. A Biological Opinion from USFWS will be obtained prior to removal or transplanting of elderberry shrubs. Removal of a shrub may either include the roots or just the removal of the above-ground portion of the plant. If feasible, the entire root ball shall be removed, and the shrub transplanted.

b. Elderberry shrubs requiring removal shall be transplanted as close as feasible to its original location within City-owned property or as approved by USFWS. Elderberry shrubs may be relocated adjacent to the project footprint if: 1) the planting location is suitable for elderberry growth and reproduction; and 2) the City is able to provide long-term protection to the shrub and ensure that the shrub becomes reestablished.

c. If these criteria cannot be met, the shrub may be transplanted to an appropriate USFWS-approved mitigation site.

d. Any elderberry shrub that is unlikely to survive transplanting because of poor condition or location, or a shrub that would be extremely difficult to move because of access problems, may not be appropriate for transplanting. The following transplanting guidelines shall be used to guide removal and transplanting of elderberry shrubs on the project site:

    1. A qualified biologist shall be on-site for the duration of transplanting activities to assure compliance with avoidance and minimization measures and other conservation measures.

    2. Exit-hole surveys shall be completed immediately before transplanting. The number of exit holes found, GPS location of the plant to be relocated, and the GPS location of where the plant is transplanted shall be reported to the USFWS and to the CNDDB.

    3. Elderberry shrubs shall be transplanted when the shrubs are dormant (November through the first two weeks in February) and after they have lost their leaves. Transplanting during the non-growing season will reduce shock to the shrub and increase transplantation success.

    4. Transplanting shall follow the most current version of the ANSI A300 (Part 6) guidelines for transplanting (http://www.tcia.org/).

Mitigation Measure 4.3-3c: Compensatory mitigation for loss of riparian habitat

a. The following compensatory mitigation addresses impacts to VELB habitat through compensating for the permanent loss of riparian habitat within 165 feet of elderberry shrubs. Table 4.3-6 lists the total riparian habitat that is anticipated to be lost, according to the preliminary project design, and the corresponding credits that shall be purchased to replace habitat lost at a 3:1 ratio, as outlined in the VELB framework (USFWS 2017b). The exact amount of compensation shall be as agreed to by USFWS, per Section 7 consultation under the ESA.

Table 4.3-6 Potential Valley Elderberry Longhorn Beetle Habitat-Level Compensation

Project Alternative Options	Compensation Ratio	Loss of Riparian Habitat (acres)	Acres of Credit[1]	Total Credit Purchase[2]
Proposed Trail Alignment	3:1	1.22	3.66	89
Alignment Option 1A	3:1	0.89	2.67	65
Alignment Option 1C	3:1	1.41	4.23	103
Alignment Option 5A	3:1	1.22	3.66	89

[1] Acre(s) of credit = Compensation Ratio X Total Acres of Riparian Habitat Permanently Lost within 165 Feet of Elderberry Shrubs

[2] Formula for Credit Purchase: 1 credit = 0.041 acres

b. If the City chooses not to purchase credits at a USFWS-approved bank, they shall follow USFWS requirements for providing a permanent conservation area that meets USFWS criteria and approval, as described in the VELB Framework (USFWS 2017b).

Mitigation Measure 4.3-3d: Consultation with USFWS.
Caltrans, as the federal designated agency, will consult with USFWS under Section 7 of ESA for approval of transplanting and compensatory measures outlined in Mitigation Measures 4.3-3b and 4.3-3c prior to project construction.

Significance after Mitigation
Implementation of Mitigation Measure 4.3-3a would require that those elderberry shrubs that would not need to be removed would be protected by: installing minimum setbacks; controlling dust and erosion; restoring temporarily disturbed areas within 165 feet of elderberry shrubs; prohibiting use of insecticides, herbicides, fertilizers, or other chemicals within 100 feet of elderberry shrubs during construction; and requiring that after final design plans and construction specifications, new permanent impacts are assessed, minimized, or mitigated for in accordance with conservation and avoidance and minimization measures outlined in the VELB framework (USFWS 2017b).

Through implementation of Mitigation Measure 4.3-3b through 4.3-3c, and in consultation with and under approval of the USFWS, the loss of elderberry shrubs, and potential take of VELB would be mitigated by transplanting elderberry shrubs to a USFWS-approved location within the project site or to a USFWS-approved conservation bank and the purchasing of credits, according to Table 4.3-5 and Table 4.3-6.

Therefore, potential effects on VELB as a result of implementation of the proposed project would either be avoided or compensated for, and the disturbance or loss of elderberry shrubs or VELB would be reduced to a **less-than-significant** level.

Impact 4.3-4	Disturbance or loss of Swainson's hawk, white-tailed kite, and other nesting raptors.
Applicable Policies and Regulations	CESA MBTA, CEQA, CDFG Code Section 3503, 3503.5, 3511, and 3513
Significance with Policies and Regulations	Proposed Project: Potentially significant Alignment Option 1A: Potentially significant Alignment Option 1C: Potentially significant Alignment Option 5A: Potentially significant
Mitigation Measures	Mitigation Measure 4.3-4 (Proposed Project, Option 1A, Option 1C, Option 5A)
Significance after Mitigation	Less than significant (Proposed Project, Option 1A, Option 1C, Option 5A)

Although no Swainson's hawk or white-tailed kite CNDDB records occur within the project site and no observation of nesting Swainson's hawks or white-tailed kites were found during surveys of the project site, trees within the project site provide suitable nesting habitat for these raptors, and it is possible that these hawks or other nesting raptors (i.e., red-tailed hawk, American kestrel, Cooper's hawk, red-shouldered hawk, northern harrier, great-horned owl, barn owl) could move into the project site prior to project implementation. The northern harrier is a ground nesting raptor, and the degraded non-native annual grassland and the presence of feral cats, pedestrian traffic, joggers and dogs likely preclude the presence of this species.

Within five-miles of the project site, the nearest historic CNDDB record of Swainson's hawk is approximately 4 miles northwest of the project site and dates back to 2001. The CNDDB reports the record as possible extirpated. The other record is 5.2 miles southeast in Folsom and dates back to 1962. A 1992 CNDDB record of white-tailed kite is approximately 1,500 feet southeast of the southern terminus of the proposed project within Lake Park in Woodbridge Ranch. A white-tailed kite nesting

occurrence within the Hewlett Packard complex from 1999 is approximately 4 miles to the northwest. Another white-tailed kite nesting occurrence is approximately 4 miles southeast of the site within Norma Hamlin Park. No records of Swainson's hawks were reported on eBird within the project site, but there were some winter (2009–2010) observations of white-tailed kite in the southeastern terminus of the proposed project.

Proposed Trail Alignment

Construction Impacts

No direct impacts to nesting Swainson's hawk habitat or loss of individuals are anticipated to occur as a result of the project because the project site is highly disturbed and degraded in terms of habitat value for Swainson's hawk. While the project site does provide some habitat characteristics as described in the species description (i.e., oak woodlands, riparian habitat for nesting, ruderal grassland for foraging), the potential for Swainson's hawk to use this habitat and actually be present is low. The area around the project site is disturbed and largely developed, and there are little of the large open areas and wooded riparian areas that this species prefers for hunting or nesting.

Similarly, although the white-tailed kite could occur in the project site, the foraging habitat value for this species is also low because of its highly disturbed and degraded nature; therefore, no direct impacts to nesting white-tailed kite habitat or loss of individuals are anticipated to occur because the project site is highly disturbed and degraded.

For most of the Proposed Trail Alignment, non-native annual grassland dominates the grassland habitat, and the height of the grasses is not conducive for hawk foraging. Although some areas of the alignment appear to receive maintenance, this is not the norm for the whole alignment.

Additionally, known nest locations for the Swainson's hawk are located at the fringe of development both in Folsom and Lincoln and have access to vast open agricultural fields. It would be unlikely that these hawks would fly back into the urban core to forage within the Proposed Trail Alignment.

The Proposed Trail Alignment would permanently remove up to 4.30 acres of valley oak riparian woodland and temporarily affect up to 4.90 acres of valley oak riparian woodland. Similarly, 4.69 acres of annual grassland would be permanently affected, and 8.94 acres would be temporarily affected.

Mature trees within the project site provide potential nesting habitat for common raptor species, protected by the Migratory Bird Treaty Act and California Fish and Game Code, that use the project area for roosting, nesting, and foraging year-round. Raptors that could nest within oak woodland habitat within the project site include great-horned owl, barn owl, American kestrel, red-tailed hawk, red-shouldered hawk, and Cooper's hawk. In the Sacramento Valley, most of these raptors have an approximate breeding and nesting season from February 15 to September 15. Tree nesting raptors may nest in the large trees and in riparian habitats within and adjacent to the project site. Although the non-native grassland may provide low quality nesting habitat for ground nesting raptors, it is unlikely that ground nesting raptors would occur because of the presence of feral cat colonies, dogs, and disturbance from pedestrians using the project area.

Use-related Impacts

Future recreational use of the multi-use path could expose nesting raptors to potential disturbances. However, hawks with potential to nests in the area are hawks that are or have been acclimated to the urban environment and thus are likely to become used to pedestrians, joggers, and cyclists. The long-term maintenance and repair of the multi-use path would require the use of various tools and equipment for vegetation maintenance which could include working in close proximity to a nest tree, or accidental removal or trimming of branches that could support a raptor nest. The City of Roseville Parks Maintenance Department provides training to crews that work in City preserves or open habitat, and maintenance and monitoring is performed as per the City of Roseville Open Space Preserve

Overarching Management Plan. All trail maintenance activities would be conducted consistent with the City's Open Space Preserve Overarching Management Plan and related USFWS Biological Opinion and the City's California Department of Fish and Wildlife Streambed Alteration Agreement for Routine Maintenance. The Overarching Plan and Routine Maintenance Agreement include requirements for worker training and pre-maintenance nesting surveys as well as monitoring and reporting when nests are found.

Conclusion

No direct impact to nesting Swainson's hawk or white-tailed kite is expected, because these hawks are unlikely to nest within the project site because of low quality foraging habitat and thus the impact to Swainson's hawk and white-tailed hawk nesting and foraging habitat would be less than significant. The oak woodland habitat provides suitable nesting habitat for other common raptor species protected under the MBTA, and CDFG Code. Construction activities occurring within oak woodland, and riparian habitat would result in removal of trees, leading to the potential direct removal or disturbance of active raptor nests. Although identification of specific trees that would be removed has not occurred, it is anticipated that some trees would be removed as part of project implementation. The loss or disturbance of active common raptor nests would be a **significant** impact.

Alignment Option 1A

No direct impact to nesting Swainson's hawk or white-tailed kite is expected because these hawks are unlikely to nest within Alignment Option 1A because of low quality foraging habitat and thus the impact to Swainson's hawk and white-tailed hawk nesting and foraging habitat is considered less than significant. Since Alignment Option 1A would be a small part of the Proposed Trail Alignment, if selected, similar impacts to nesting raptors could occur as with the Proposed Trail Alignment. However, Alignment Option 1A would permanently remove 0.20 acre less of valley oak riparian woodland, and temporarily affect 0.10 acre less of valley oak riparian woodland than the Proposed Trail Alignment. The loss or disturbance of active common raptor nests would be a **significant** impact.

Alignment Option 1C

No direct impact to nesting Swainson's hawk or white-tailed kite is expected because these hawks are unlikely to nest within Alignment Option 1C because of low quality foraging habitat and thus the impact to Swainson's hawk and white-tailed hawk nesting and foraging habitat is considered less than significant. Alignment Option 1C would be a small part of the Proposed Trail Alignment, if selected, similar impacts to nesting raptors would occur as with the Proposed Trail Alignment. However, Alignment Option 1C would permanently remove 0.05 acre less of valley oak riparian woodland, and temporarily affect 0.05 acre less of valley oak riparian woodland than the Proposed Trail Alignment. The loss or disturbance of active common raptor nests would be a **significant** impact.

Alignment Option 5A

No direct impact to nesting Swainson's hawk or white-tailed kite is expected because these hawks are unlikely to nest within Alignment Option 5A because of low quality foraging habitat and thus the impact to Swainson's hawk and white-tailed hawk nesting and foraging habitat is considered less than significant. Alignment Option 5A would have the same impacts to nesting raptors as the Proposed Trail Alignment. However, Alignment Option 5A would permanently remove 0.30 acre more of valley oak riparian woodland and temporarily affect 0.20 acre more of valley oak riparian woodland than the Proposed Trail Alignment. The loss or disturbance of active common raptor nests would be a **significant** impact.

Mitigation Measures

Mitigation Measure 4.3-4: Nesting raptors.

This mitigation would apply for the Proposed Trail Alignment, Alternative Alignments 1A, 1C, and 5A.

The following measures shall be implemented to avoid, minimize and fully mitigate impacts to Swainson's hawk, white-tailed kite, as well as other raptors.

a. For project activities, including tree removal, that begin between February 15 and September 15, a qualified biologist shall conduct preconstruction surveys for nesting raptors and to identify active nests on and within 0.25 mile of the project site with direct line of sight from public access areas with the use of binoculars and spotting scopes to the proposed work areas. The surveys shall be conducted before the beginning of any construction activities between February 15 and September 15.

b. The City shall attempt to initiate upland construction activities before the nest initiation phase (i.e., before February 15). If breeding raptors establish an active nest site, as evidenced by nest building, egg laying, incubation, or other nesting behavior, near the construction area, they shall not be harassed or deterred from continuing with their normal breeding activities.

c. Impacts to nesting raptors shall be avoided by establishing appropriate buffers around active nest sites identified during preconstruction raptor surveys. No project activity shall commence within the buffer areas until a qualified biologist has determined the young have fledged, the nest is no longer active, or reducing the buffer, in coordination with CDFW, would not likely result in nest abandonment. CDFW guidelines recommend implementation of 500 feet for raptors, but the size of the buffer may be adjusted if a qualified biologist and the City, in consultation with CDFW, determine that such an adjustment would not likely adversely affect the nest. Monitoring of the nest by a qualified biologist during construction activities shall be required if the activity has potential to adversely affect the nest.

d. Trees shall not be removed during the breeding season for nesting raptors unless a survey by a qualified biologist verifies that there are not active nests within the trees or within 500 feet of the trees proposed to be removed. Loss of trees that provide potential nesting habitat shall be compensated by planting replacement trees according to Mitigation Measure 4.3-1 (wetlands/riparian trees) and Mitigation Measure 4.3-8 (protected oak trees).

Significance after Mitigation

With implementation of Mitigation Measure 4.3-4, the potential loss of nesting raptors species as a result of project construction would be avoided by identifying nests, removing vegetation and trees outside of the nesting season, conducting pre-construction surveys if construction activities are to occur during the nesting season, and mitigating for the loss of oaks and riparian trees. Therefore, this impact would be reduced to a **less-than-significant** level.

Impact 4.3-5	Disturbances to special-status song birds.
Applicable Policies and Regulations	Fish and Wildlife Conservation Act FESA MBTA CDFG Code Sections 3503 and 3513 CEQA City of Roseville General Plan Open Space and Conservation Element
Significance with Policies and Regulations	Proposed Project: Significant Alignment Option 1A: Significant Alignment Option 1C: Significant Alignment Option 5A: Significant
Mitigation Measures	Mitigation Measure 4.3-5 (Proposed Project, Option 1A, Option 1C, Option 5A)
Significance after Mitigation	Less than significant (Proposed Project, Option 1A, Option 1C, Option 5A)

Special-status bird species with a likelihood of occurring on the project site include: great egret (CNDDB), great blue heron (CNDDB), oak titmouse (BCC-YR), olive-sided flycatcher (BCC-B), California yellow warbler (SCC), Merlin (WL), peregrine falcon (BCC-W), yellow-billed magpie (BCC-YR), Nuttall's woodpecker (BCC-YR), Lewis' woodpecker (BCC-W), yellow-breasted chat (SCC), loggerhead shrike (BCC-YR) and purple martin (SCC). The great egret and great blue heron belong to the Heron family and although have no proper legal status, they are being tracked by the CNDDB and thus are included in this impact discussion. The USFWS maintains a list of Birds of Conservation Concern that, without additional conservation management actions, are likely to become candidates for listing under the ESA. The BCC list includes seasons as to when these birds receive additional management actions and those include Year Around (YR), Breeding (B), and Wintering (W). CDFW also maintains a list of bird Species of Special Concern (SCC) and Watch List (WL).

Proposed Trail Alignment

Construction Impacts

Construction of the Proposed Trail Alignment could disturb nesting special-status birds (great egret, great blue heron, oak titmouse, California yellow-warbler, yellow-billed magpie, Nuttall's woodpecker, yellow-breasted chat, loggerhead shrike, and purple martin) if construction would occur during the nesting season (typically February 15 – September 15). Project construction would involve grading of ground vegetation, grading for drainage, shrub and tree removal, removal of riparian vegetation for installation of bridge footings, retaining walls, and rock slope protecting and removal of oak woodland for construction of the proposed trail alignment. In addition to potential damage or direct removal of active nests, construction activities (i.e., trail and bridge construction) could result in noise, dust, and other disturbances to nesting birds, resulting in potential nest abandonment and mortality to eggs and chicks. Although project construction would result in the permanent and temporary loss of grassland foraging habitat, riparian habitat, and oak woodland habitat, suitable and more contiguous habitat is available adjacent to the project elements that would not be disturbed by project activities.

Wintering species (Lewis' woodpecker) that may use the project site during migration are not expected to use the site during the proposed window of construction. If project activities were initiated in areas being used by these migrating species, these species would move offsite unharmed. Although loss of foraging and resting habitat for these species would occur, suitable and more contiguous habitat is available adjacent to the project elements that would not be disturbed by project activities. Therefore, the loss of winter habitat within the proposed trail alignment is not expected to affect the local wintering population or viability of these species, and would not be considered substantial.

Use-related Impacts

Future recreational use of the project area is expected to increase because the multi-use path would provide access to more people that otherwise would not venture into the undeveloped open habitat area. This in turn would expose nesting special-status birds to potential disturbances. However, special-status bird species with potential to occur or nest in the area are species that are or have been acclimated to the urban environment and thus are likely to become used to pedestrians, joggers and cyclists. The long-term maintenance and repair of the multi-use path would require the use of various tools and equipment for vegetation maintenance which could include working in close proximity to a nest tree or accidental removal, trimming of branches of that could support a special-status bird nest. The City of Roseville Parks Maintenance Department provides training to crews that work in City preserves or open habitat and maintenance and monitoring is performed as per the City of Roseville Open Space Preserve Overarching Management Plan. All trail maintenance activities would be conducted consistent with the City's Open Space Preserve Overarching Management Plan and related USFWS Biological Opinion and the City's California Department of Fish and Wildlife Streambed Alteration Agreement for Routine Maintenance. The Overarching Plan and Routine Maintenance Agreement include requirements for worker training and pre-maintenance nesting surveys as well as monitoring and reporting when nests are found.

Conclusion

Vegetation clearing and other construction activities for the proposed project could result in the loss of individuals or nests, or disruptions to nesting attempts, special-status bird species if they nest in the project area in the future. The potential disturbance or loss of special-status bird nests would be **significant**. Wintering species, such as Lewis' woodpecker, that may use the project site or during migration are not expected to use the site during the proposed window of construction, as explained above.

Alignment Option 1A

Alignment Option 1A would result in similar impacts to nesting special-status birds as the Proposed Trail Alignment as described above under construction impacts. For the reasons explained above, the potential disturbance or loss of special-status bird nests would be **significant**.

Alignment Option 1C

Alignment Option 1C would result in similar impacts to nesting special-status birds as the Proposed Trail Alignment. Construction of the Alignment Option 1C could disturb nesting special-status birds, as described above for the proposed trail alignment. For the reasons explained above, potential disturbance or loss of special-status bird nests would be **significant**.

Alignment Option 5A

Alignment Option 5A would result in similar impacts to nesting special-status birds as the Proposed Trail Alignment. However, Alignment Option 5A has a slight increase in permanent and temporary impacts to oak woodland habitat as described in Impact 4.3-4. Under Alignment Option 5A, similar impacts to nesting special-status birds would occur as with the Proposed Trail Alignment. Construction of the Alignment Option 5A could disturb nesting special-status birds, as described above for the Proposed Trail Alignment. Therefore, the potential disturbance or loss of special-status bird nests would be **significant**.

Mitigation Measures

Mitigation Measure 4.3-5: Special-status birds.

This mitigation would apply for the Proposed Trail Alignment, Alignment Option 1A, 1C, and 5A.

The following measures shall be implemented and are intended to avoid, minimize, and fully mitigate impacts to nesting special-status birds.

a. The City shall ensure that before any ground-disturbing project activities begin for a given proposed trail segment, a qualified biologist shall identify potential habitat for nesting special-status bird species in areas that could be affected during the breeding season by construction.

b. If vegetation removal or other disturbance related to construction of the trail segment is required during the nesting season, focused surveys for active nests of special-status birds shall be conducted before and within 5 days of initiating construction by a qualified biologist. The appropriate area to be surveyed and timing of the survey may vary depending on the activity and species that could be affected. If no active nests are found during focused surveys, no further action under this measure shall be required.

c. If an active special-status bird nest is located during the preconstruction surveys, the biologist shall notify the City and the City shall notify CDFW. Construction shall be prohibited within a minimum of 25 feet of the nest to avoid disturbance until the nest is no longer active.

d. If construction stops for more than 5 days during the nesting season, a follow up survey shall be conducted to make sure that no birds moved into the area and started nesting.

Significance after Mitigation

With implementation of Mitigation Measure 4.3-5, the potential loss of individuals or nests of special-status bird species as a result of project construction would be avoided. Therefore, this impact would be reduced to a **less-than-significant** level.

Impact 4.3-6	Disturbance or loss of Western pond turtle.
Applicable Policies and Regulations	CEQA City of Roseville General Plan Open Space and Conservation Element
Significance with Policies and Regulations	Proposed Project: Significant Alignment Option 1A: Significant Alignment Option 1C: Significant Alignment Option 5A: Significant
Mitigation Measures	Mitigation Measure 4.3-6 (Proposed Project, Option 1A, Option 1C, Option 5A)
Significance after Mitigation	Less than significant (Proposed Project, Option 1A, Option 1C, Option 5A)

Western pond turtle is designated as a species of special concern by CDFW. This species is found in a wide range of aquatic habitats with emergent structure for basking and feeding. Western pond turtles also use adjacent upland sites for nesting, often travelling great distances over land to potential nesting sites.

Aquatic habitat is present within the streams of the project site and one western pond turtle was documented during project surveys (ECORP 2014). An additional credible sighting and photograph of an adult male western pond turtle was made in February 2010. While exact counts are not available, western pond turtles probably occur in low numbers throughout much of Linda, Dry, and Cirby Creeks. During surveys, eight non-native red-eared slider (*Trachemys scripta elegans*) turtles were also observed and documented.

Nesting and upland overwintering habitat for western pond turtle is present in many areas along the creek corridor. Particularly suitable areas are in the broad floodplain near Sierra Gardens and between Rocky Ridge Drive and Champion Oaks Drive in the Maidu neighborhood. Generally, the western bank and terrace is more tightly constrained by housing, fences, roads, and other infrastructure throughout the project site, and the amount of floodplain and associated upland nesting/overwintering/dispersal habitat is greater on the northern and eastern banks of the creeks.

Proposed Trail Alignment

Construction Impacts

Project construction could result in limited short-term impacts on western pond turtle. Potential adverse impacts on western pond turtle would include: stress, injury, or mortality to individuals or their nests resulting from: site access by project vehicles and equipment, heavy equipment operation, installation of bridge abutments and stream bank stabilization, and excavation activities; temporary loss of habitat and movement corridors during installation of the trail; sedimentation and turbidity resulting from earthwork near the wetlands and perennial streams; and inadvertent fuel and oil spills into wetlands and perennial streams.

Use-related Impacts

Following project construction, increased pedestrian and bicycle use may startle western pond turtles and cause them to move away from basking areas, thus potentially disrupting thermoregulation. Currently, there are limited basking areas available for turtles on the project site and those available have been used by non-native red-eared slider turtles. Restoration work that would take place as part of the construction of the Proposed Trail Alignment may increase basking habitat for western pond turtle. Additionally, the long-term maintenance and repair of the multi-use path would require the use of various tools and equipment for vegetation maintenance that could include working in close proximity to grassland and aquatic habitat where the turtle may be nesting or basking. The City of Roseville Parks Maintenance Department provides training to crews that work in City preserves or open habitat and maintenance and monitoring is performed as per the City of Roseville Open Space Preserve Overarching Management Plan. All trail maintenance activities would be conducted consistent with the City's Open Space Preserve Overarching Management Plan and related USFWS Biological Opinion and the City's California Department of Fish and Wildlife Streambed Alteration Agreement for Routine Maintenance. The Overarching Plan and Routine Maintenance Agreement include requirements for worker training and pre-maintenance nesting surveys as well as monitoring and reporting when nests are found.

Conclusion

Vegetation-clearing and other construction activities could result in the loss of individuals or nests, or disruptions to nesting attempts, of western pond turtle if they nest in the project area in the future. The potential disturbance or loss of western pond turtle and their nests would be **significant**.

Alignment Option 1A

Alignment Option 1A would result in similar impacts to western pond turtle as would occur with the Proposed Trail Alignment. Vegetation clearing and other construction activities for Alignment Option 1A could result in the loss of individuals or nests, or disruptions to nesting attempts, of western pond turtle if they nest in the project site in the future. The potential disturbance or loss of western pond turtle and their nests would be **significant**.

Alignment Option 1C

Alignment Option 1C would result in similar impacts to western pond turtle as would occur with the Proposed Trail Alignment. Vegetation clearing and other construction activities for Alignment Option 1C could result in the loss of individuals or nests, or disruptions to nesting attempts, of western pond turtle if they nest in the project site in the future. The potential disturbance or loss of western pond turtle and their nests would be **significant**.

Alignment Option 5A

Because Alignment Option 5A would result in similar impacts to western pond turtle as the Proposed Trail Alignment. Vegetation clearing and other construction activities for Alignment Option 5A could result in the loss of individuals or nests, or disruptions to nesting attempts, of western pond turtle if they nest in the project site in the future. The potential disturbance or loss of western pond turtle and their nests would be **significant**.

Mitigation Measures

Mitigation Measure 4.3-6: Western pond turtle.
This mitigation would apply for the Proposed Trail Alignment, Alignment Options 1A, 1C, and 5A.

a. Implement Mitigation Measure 4.3-1.

b. Before ground disturbance, all onsite construction personnel shall be instructed by a qualified biologist regarding the potential presence of western pond turtle, the importance of avoiding impacts on this species and its habitat, and recognition of western pond turtle and its habitat(s).

c. Within 24 hours before beginning construction activities within 200 feet of suitable aquatic habitat for western pond turtle, a qualified biologist shall inspect areas of anticipated disturbance for the presence of western pond turtle nests and individuals. If nests are found, a 100-foot no disturbance buffer shall be erected and maintained until the turtles have hatched and no obstructions between the nest and aquatic habitat shall be created. No vegetation clearing will be allowed within the buffer to shelter the turtles from the elements and potential predators.

d. If adult and juvenile turtles are found during preconstruction, dewatering, or fish rescue operations, the biologist shall relocate the western pond turtle to the nearest suitable habitat outside of the area of disturbance. The construction area shall be re-inspected whenever a lapse in construction activity of two weeks or more has occurred. The biologist shall be available thereafter; if a turtle is encountered during construction activities, the biologist shall relocate the western pond turtle to the nearest suitable aquatic habitat outside the area of disturbance. As suitable habitat is located throughout the area, it is not anticipated that turtles would be relocated far from construction areas and that they would recolonize following construction.

e. After completion of project-related construction activities, any temporary fill and construction debris shall be removed, and temporarily disturbed areas shall be restored to pre-project conditions. Restoration of grassland and riparian habitat shall be conducted as applicable under Mitigation Measure 4.3-1 (for riparian vegetation) and Mitigation Measure 4.3-4 (for grassland habitat) in proximity to the stream corridors.

Significance after Mitigation
Implementing Mitigation Measure 4.3-6 would reduce significant impacts on western pond turtle to a **less-than-significant** level because it would require the City to identify and avoid western pond turtle nest sites or temporarily relocate individuals outside of the construction area; because suitable habitat is located throughout the area, it is not anticipated that turtles would be relocated far from construction areas and that they would recolonize following construction.

Impact 4.3-7	Disturbance or loss of special-status bats – pallid bat and silver-haired bat.
Applicable Policies and Regulations	CEQA City of Roseville General Plan Open Space and Conservation Element
Significance with Policies and Regulations	Proposed Project: Significant Alignment Option 1A: Significant Alignment Option 1C: Significant Alignment Option 5A: Significant
Mitigation Measures	Mitigation Measure 4.3-7 (Proposed Project, Option 1A, Option 1C, Option 5A)
Significance after Mitigation	Less than significant (Proposed Project, Option 1A, Option 1C, Option 5A)

Pallid bat is designated as a Species of Special Concern by CDFW and High Priority species by the Western Bat Working Group. Throughout California, pallid bats are usually found in arid climates below 6,000 feet elevation. Pallid bats use a variety of habitats including grasslands, shrublands, woodlands, and coniferous forests. Pallid bats are most common in open, dry habitats that contain rocky areas for roosting. Day roosts may vary but are commonly found in rock crevices, tree hollows, mines, caves, and a variety of human-made structures. Night roosts are usually more open sites and may include unsecured buildings, porches, mines, caves, and under bridges. Tree roosting has been documented in large conifer snags, inside basal hollows of redwoods and giant sequoias, and bole cavities in oaks (Sherwin 1998). They are year-long residents in most of their range and hibernate in winter near their summer roost (Zeiner et al. 1990). This species is highly sensitive to disturbance and highly intolerant of urban development. Though no documented occurrences of pallid bat exist for the project site, the oak woodland and riparian area on the project site and vicinity may provide suitable foraging habitat, as well as roosting habitat in large oak trees and snags and in more open areas.

The silver-haired bat is a Medium Priority species designated by the Western Bat Working Group, and it is being tracked by the CNDDB with no formal status. The silver-haired bat is common but erratic in abundance. During spring and fall migrations, the silver-haired bat may be found anywhere in California. Summer habitats include coastal and montane coniferous forest, valley foothill woodlands, pinyon-juniper woodlands, and valley foothill and montane riparian habitats. Roosts in hollow trees, snags, buildings, rock crevices, caves, and under bark. Females may form nursery colonies or occur as solitary individuals in dense foliage or hollow trees. This species needs access to drinking water.

Proposed Trail Alignment

Construction Impacts

Removal of valley oak riparian woodland as part of the Proposed Trail Alignment would involve the removal of old oak trees that may contain basal hollows that could be used as bat roosting sites. Some of these hollows may provide suitable conditions to serve as maternity sites for the aforementioned bat species. Construction activities (i.e., ground clearing, including tree and shrub removal, and grading) within 250-feet of these roosting sites could temporarily disturb pallid and silver-haired bats that may be roosting, such that breeding could be disrupted or nest abandonment could occur. Project activities within suitable habitat that removes or disturb trees or other structures used for roosting could remove or cause abandonment of these features. Additionally, the removal of trees occupied by bats during removal activities could injure or kill bats. Loss of active roost sites could affect distribution of individuals over time if other suitable roost sites are not available; however, potential roost sites are not limited to the project disturbance footprint; other woodland and riparian habitat with potential roost structures may be present throughout the project site and the surrounding area. Because construction would occur during the day when bats are typically not active, disturbances to foraging behavior and prey would be avoided.

Use-related Impacts

The long-term maintenance and repair of the multi-use path would require the use of various tools and equipment for vegetation maintenance which could include working in close proximity to a roost tree or accidental removal, trimming of branches of that could support a bat roost. The City of Roseville Parks Maintenance Department provides training to crews that work in City preserves or open habitat and maintenance and monitoring is performed as per the City of Roseville Open Space Preserve Overarching Management Plan. All trail maintenance activities would be conducted consistent with the City's Open Space Preserve Overarching Management Plan and related USFWS Biological Opinion and the City's California Department of Fish and Wildlife Streambed Alteration Agreement for Routine Maintenance. The Overarching Plan and Routine Maintenance Agreement include requirements for worker training and pre-maintenance nesting surveys as well as monitoring and reporting when nests are found.

Conclusion

Vegetation clearing and other construction activities for the proposed project could result in the loss of individuals or bat roosts, or disruptions to maternity roosts, of silver-haired bat and pallid bat. The potential disturbance or loss of silver-haired bat and pallid bat individuals or roost sites would be **significant**.

Alignment Option 1A

Since Alignment Option 1A would result in similar impacts to roosting special-status bats as the Proposed Trail Alignment. Vegetation clearing and other construction activities for Alignment Option 1A could result in the loss of individuals or bat roosts, or disruptions to maternity roosts (if present), of silver-haired bat and pallid bat. The potential disturbance or loss of silver-haired bat and pallid bat individuals, roost or maternity sites would be **significant**.

Alignment Option 1C

Alignment Option 1C would result in similar impacts to nesting special-status bats as the Proposed Trail Alignment. Vegetation clearing and other construction activities for Alignment Option 1C could result in the loss of individuals or bat roosts, or disruptions to maternity roosts (if present), of silver-haired bat and pallid bat. The potential disturbance or loss of silver-haired bat and pallid bat individuals, roost or maternity sites would be **significant**.

Alignment Option 5A

Alignment Option 5A would result in similar impacts to nesting special-status bats as the Proposed Trail Alignment. However, Alignment Option 5A has a slight increase in permanent and temporary impacts to oak woodland habitat as described in Impact 4.3-4. Vegetation clearing and other construction activities for Alignment Option 5A could result in the loss of individuals or bat roosts, or disruptions to maternity roosts (if present), of silver-haired bat and pallid bat. The potential disturbance or loss of silver-haired bat and pallid bat individuals, roost or maternity sites would be **significant**.

Mitigation Measures

Mitigation Measure 4.3-7: Special-status bats.

This mitigation would apply for the Proposed Trail Alignment, Alternative Alignments 1A, 1C, and 5A.

a. Bat surveys shall be conducted by a qualified wildlife biologist within 5 days before removal of trees that have suitable roosting habitat for bats. Specific survey methodologies shall be determined in coordination with CDFW, and may include visual surveys of bats (e.g., observation of bats during foraging period), inspection for suitable habitat, bat sign (e.g., guano), or use of ultrasonic detectors (e.g., Petterson, Anabat, Wildlife Acoustics). Removal of any significant roost sites located shall be avoided to the extent feasible with a non-disturbance buffer of 250-feet. If it is determined that an active roost site cannot be avoided and will be affected, bats shall be excluded from the roost site before the site is removed. The City shall first notify and consult with CDFW on appropriate bat exclusion methods and roost removal procedures. Exclusion methods may include use of one-way doors at roost entrances (bats may leave, but not reenter), or sealing roost entrances when the site can be confirmed to contain no bats. Once it is confirmed that all bats have left the roost, crews shall be allowed to continue work in the area. The City may have to provide temporary suitable bat roosting habitat (i.e. bat boxes), prior, during, and after exclusion to provide bat roosting habitat.

b. Exclusion efforts shall be restricted during periods of sensitive activity (e.g., during winter hibernation or while females in maternity colonies are nursing young [generally, April 15 through August 15]). If a hibernation or maternity roosting site is discovered, the project biologist and the City shall consult with CDFW to establish appropriate exclusionary buffers until all young are determined to be able to fly by the project biologist. Once it is determined that all young are able to fly, passive exclusion devices

shall be installed and all bats will be allowed to leave voluntarily. Once it is determined by a qualified biologist that all bats have left the roost, crews shall be allowed to work within the buffer zone.

Significance after Mitigation

Implementation of Mitigation Measures 4.3-7 would avoid the loss of individuals, occupied roosts, or other active breeding sites of pallid bat, and silver-haired bat. With implementation of these measures, the project would not substantially affect the distribution, breeding productivity, viability, or the regional population of these special-status bat species. Therefore, potential impacts to Pallid bat and silver-haired bat would be reduced to a **less-than-significant** level.

Impact 4.3-8	Disturbance or loss of City protected trees, Valley Oak Woodland, and other Sensitive Vegetation Alliances and Associations.
Applicable Policies and Regulations	CEQA California Fish and Game Code City of Roseville General Plan Open Space and Conservation Element City of Roseville Municipal Code Chapter 19.66-Tree Preservation Ordinance
Significance with Policies and Regulations	Proposed Project: Significant Alignment Option 1A: Significant Alignment Option 1C: Significant Alignment Option 5A: Significant
Mitigation Measures	Mitigation Measure 4.3-8 (Proposed Project, Option 1A, Option 1C, Option 5A)
Significance after Mitigation	Less than significant (Proposed Project, Option 1A, Option 1C, Option 5A)

The proposed project alignment crosses oak woodland and riparian areas with abundant native oaks. Valley Oak Woodland (inclusive of valley oak riparian woodland) is listed as Sensitive Vegetation Alliances and Associations (previously known as Sensitive Natural Communities) by CDFW. Native trees stabilize creek banks, provide wildlife habitat, and improve aquatic habitat by shading and contributing vegetative matter to support aquatic macroinvertebrate species adjacent to streams. Additionally, native trees and oak woodlands provide unique habitat for native insect and wildlife species and preserve other native plants that grow in association with the trees by influencing sunlight, soil moisture, ground temperature, exposure to rain and cold, and soil nutrients.

The City of Roseville Municipal Code Ordinance Section 19.66.070, Oak Tree Planting and Replacement Program regulates removal of oak trees within the City. The ordinance protects native oak trees or the area within the protected zone of a native oak (i.e. any tree of the genus *Quercus* such as valley oak (*Quercus lobata*), blue oak (*Q. douglasii*), and interior live oak (*Q. wislizenii*) measuring equal to or greater than six inches in diameter at breast height measured as a total of a single trunk or multiple trunks).

Proposed Trail Alignment

Construction Impacts

Project construction would involve grading and removal of non-native annual grassland, grading for drainage, shrub and oak tree removal, removal of riparian vegetation for installation of bridge footings, retaining walls, and rock slope protection, and removal of oak woodland for construction of the proposed trail alignment. In addition to potential damage or direct removal of riparian vegetation and oak trees, construction activities (i.e., trail and bridge construction), could result in dust, root damage, branch trimming of trees, and other disturbances to sensitive habitats, resulting in habitat degradation. Preliminary analysis based on initial design of the trail indicates that the Proposed Trail Alignment would permanently impact up to 4.30 acres of valley oak riparian woodland and temporarily affect up to 4.9

acres of valley oak riparian woodland. Valley Oak Woodland (inclusive of valley oak riparian woodland) is listed as an S3* sensitive alliance. Alliances with State ranks of S1-S3 are considered to be highly imperiled. Associations currently designated as being of S3 or rarer are indicated with an asterisk (*), which is the case for the valley oak riparian woodland. This is likely because of reduction of habitat statewide most likely due to habitat conversion because of urbanization. Although the acreage impacted is small in comparison to the estimated total statewide, the ecological service that these oaks provide to birds and local wildlife is important because these oaks provide shelter and food and, if the trees are adjacent to streams, they can also help to shade the streams and help maintain suitable water temperatures for salmonids.

Use-related Impacts

The long-term maintenance and repair of the multi-use path would require the use of various tool and equipment for vegetation maintenance which could include working within sensitive riparian and oak woodland habitat and annual grassland, resulting in vegetation removal or accidental removal, trimming of riparian or oak branches that could lead to habitat degradation. The City of Roseville Parks Maintenance Department provides training to crews that work in City preserves or open habitat and maintenance and monitoring is performed as per the City of Roseville Open Space Preserve Overarching Management Plan. All trail maintenance activities would be conducted consistent with the City's Open Space Preserve Overarching Management Plan and related USFWS Biological Opinion and the City's California Department of Fish and Wildlife Streambed Alteration Agreement for Routine Maintenance. The Overarching Plan and Routine Maintenance Agreement include requirements for worker training and pre-maintenance nesting surveys as well as monitoring and reporting when nests are found.

Conclusion

Vegetation clearing and other construction activities for the proposed project could result in the loss of sensitive vegetation alliances, such as valley oak riparian woodlands and riparian habitat. These sensitive vegetation alliances are in decline and are protected under CEQA and CDFG Code. The potential disturbance or loss of sensitive vegetation alliances, such as oak woodlands, and riparian habitat would be **significant**.

Alignment Option 1A

Under Alignment Option 1A would result in similar impacts to sensitive habitats as the Proposed Trail Alignment. Preliminary analysis indicates that Alignment Option 1A would permanently impact 0.20 acre less of valley oak riparian woodland, and temporarily affect 0.10 acre less of valley oak riparian woodland than the Proposed Trail Alignment. This would be a **significant** impact.

Alignment Option 1C

Alignment Option 1C would result in similar impacts to sensitive habitats as the Proposed Trail Alignment. Preliminary analysis indicates that Alignment Option 1C would permanently impact 0.05 acre less of valley oak riparian woodland, and temporarily affect 0.05 acre less of valley oak riparian woodland than the Proposed Trail Alignment. This would be a **significant** impact.

Alignment Option 5A

Alignment Option 5A would result in similar impacts to sensitive habitat as the Proposed Trail Alignment. Preliminary analysis indicates that Alignment Option 5A has a slight increase in permanent and temporary impacts to oak woodland habitat because Alignment Option 5A would permanently impact 0.30 more acres of valley oak riparian woodland, and temporarily affect 0.20 more acres of valley oak riparian woodland. This would be a **significant** impact.

Mitigation Measures

Mitigation Measure 4.3-8: Avoid impacts or mitigate for impacts to Valley Oak Woodland, and other Sensitive Vegetation Alliances and Associations (previously known as Sensitive Natural Communities).

This mitigation would apply for the Proposed Trail Alignment, Alignment Option 1A, 1C, and 5A.

a. To the maximum extent feasible, oak and riparian trees shall be avoided where possible and protection measures shall be implemented to protect oak woodlands, riparian areas and associated native trees from project-related impacts. The following measures shall be implemented for oak and riparian trees that would be impacted by project activities to avoid and minimize potential impacts to individual oak and riparian trees:

    1. Temporary protective fencing shall be installed at least one foot outside the dripline of the native oak tree before initiating construction to avoid damage to the tree canopy and root system. A circle with a radius measurement from the trunk of the tree to the tip of its longest limb will constitute the dripline protection area for each tree. Limbs must not be cut back to change the dripline. The area beneath the dripline is a critical portion of the root zone and defines the minimum protected area of each tree. Removing limbs that make up the dripline does not change the protected area.

    2. No vehicles, construction equipment, mobile home/office, supplies, materials or facilities shall be driven, parked, stockpiled or located within the dripline of the native oak trees.

    3. No grading shall be allowed within the dripline of the native oak tree.

    4. No trenching shall be allowed within the dripline of the native oak tree. If it is necessary to install underground utilities within the dripline of the native oak tree, the utility line shall be jacked and bored under the supervision of a certified arborist.

    5. Drainage patterns onsite shall not be modified so that water collects or stands within, or is diverted across, the dripline of any native oak tree.

    6. If ground disturbance must occur within the protected zone of a native oak tree, all work shall occur consistent with the City's Tree Preservation Ordinance requirements.

b. For those trees that cannot be avoided, the City shall comply with any riparian habitat conditions to comply with the Compensatory Wetland, Stream and Riparian Mitigation and Monitoring Plan that will be developed during the Section 404, Section 401, and Section 1602 permitting process as described in Mitigation Measure 4.3-1. Additionally, the City shall implement the following:

    1. An arborist report shall be conducted to identify the species and quantities of trees that will be removed to implement the project.

    2. If native oak trees are removed, they shall be replaced as outlined in the City's Tree Preservation Ordinance 19.66.070. A Tree Planting and Maintenance Plan showing species, size, spacing and location of plantings, and the location and species of established vegetation shall be prepared. A monitoring program shall also be established to ensure compliance with any prescribed mitigation measures established by the project and to monitor the oak woodland restoration area.

    3. Fully implement Mitigation Measure 4.3-1, which requires the City to secure and comply with a CDFW Streambed Alteration Agreement that would include a riparian restoration component.

Significance after Mitigation

Implementing Mitigation Measure 4.3-8 would reduce significant impacts on oak woodlands, riparian habitat and other Sensitive Vegetation Alliances because it would require the City to identify and avoid oaks, oak woodlands and riparian habitat or provide compensation for loss of oaks, riparian trees, oak woodland and riparian habitat through enhancement of existing habitats, creation and management of oak woodland and riparian habitat, conservation easements, or other appropriate measures. Therefore, potential impacts to oak woodlands, riparian habitat or other Sensitive Vegetation Alliances would be reduced to a **less-than-significant** level.

Impact 4.3-9	Disturbance or loss of special-status plants – Sanford's arrowhead.
Applicable Policies and Regulations	CEQA California Native Plant Protection Act City of Roseville General Plan Open Space and Conservation Element
Significance with Policies and Regulations	Proposed Project: Significant Alignment Option 1A: Significant Alignment Option 1C: Significant Alignment Option 5A: Significant
Mitigation Measures	Mitigation Measure 4.3-9 (Proposed Project, Option 1A, Option 1C, Option 5A)
Significance after Mitigation	Less than significant (Proposed Project, Option 1A, Option 1C, Option 5A)

Proposed Trail Alignment

In-Stream Construction Activities Impacts

The project is a 4.25-mile multi-use trail that would follow creek corridors along portions of Dry, Cirby, and Linda Creeks. The multi-use trail would generally consist of a 10-foot wide paved trail with two-foot wide shoulders. Construction of the proposed multi-use trail would require removal of vegetation and existing features, grading, placement of aggregate base material, and construction of five roadway undercrossings, construction or modification of up to eight bridges (refer to Table 3-2 in Chapter 3, "Project Description"), and approximately 27,000 square feet of retaining walls (refer to Table 3-3 in Chapter 3, "Project Description"). In addition, a maximum of eight temporary stream crossings or stream diversions would be required. These activities would create ground disturbance in the adjacent upland area, along the stream banks, and within the stream channel of Dry, Linda, and Cirby Creeks.

No special-status plants have been documented in the project site. Only one special-status plant species, Sanford's arrowhead, was identified as having a moderate potential to occur on the project site because of presence of suitable habitat particularly along the margins of the perennial streams and pond. No protocol-level surveys for special-status plant species have been conducted to confirm presence or absence of Sanford's arrowhead on the project site. Therefore, project implementation could affect Sanford's arrowhead, if present.

Placement of bridge abutments and streambank stabilization work for the proposed project could result in permanent impacts to 0.26 acre of Sanford's arrowhead potential habitat (i.e., wetlands, pond, and stream habitat) and temporary impacts to 0.58 acre of potential Sanford's arrowhead habitat. In addition to direct removal of potential habitat and individual plants, vegetation removal, grading for drainage, or other construction-related disturbances (i.e., dewatering, stream diversions), plants could suffer other direct physical damage, including breaking, crushing, desiccation, and burying. Damaged plants may experience altered growth and development, or reduced or eliminated seed-set and reproduction, and mortality of individuals or populations can eventually result.

Use-related Impacts

The long-term maintenance and repair of the multi-use path would require the use of various tool and equipment for vegetation maintenance which could include direct removal or spraying of herbicides in Dry, Linda, and Cirby Creeks. Additionally, potential users of the trail may inadvertently or purposely collect or remove Sanford's arrowhead. Over time, these activities could adversely affect Sanford's arrowhead. The City of Roseville Parks Maintenance Department provides training to crews that work in City preserves or open habitat and maintenance and monitoring is performed as per the City of Roseville Open Space Preserve Overarching Management Plan. The Overarching Plan and related USFWS Biological Opinion (81420-2008-F-1958-3) includes conditions that address use of herbicides near vernal pools and riparian areas. All trail maintenance activities would be conducted consistent with the City's Open Space Preserve Overarching Management Plan and related USFWS Biological Opinion and the City's California Department of Fish and Wildlife Streambed Alteration Agreement for Routine Maintenance. The Overarching Plan and Routine Maintenance Agreement include requirements for worker training and pre-maintenance nesting surveys as well as monitoring and reporting when nests are found. Additionally, the City of Roseville has developed a brochure entitled "Doing Your Part to Care for Our Open Space," which encourages residents to leave no trace and to not collect plants or cut down trees.

Conclusion

Vegetation clearing and other in-water construction activities for the proposed project could result in the loss of Sanford's arrowhead. The potential disturbance or loss of Sanford's arrowhead would be a **significant** impact.

Alignment Option 1A

Option 1A is the same as the Proposed Trail Alignment until the approach to the Dry Creek/Cirby Creek confluence and the first bridge. Where the Proposed Trail Alignment would cross Dry Creek via Bridge #2 and continue on the northern bank of Cirby Creek, Option 1A would cross Dry Creek via Bridge #3. By remaining on the south bank of Cirby Creek, Option 1A would not require the construction of Bridge #2 or Bridge #4. Option 1A would require an additional 765 linear feet of retaining walls or streambank stabilization when compared to the Proposed Trail Alignment. However, because this option does not require the construction of Bridge #2 or Bridge #4 the total permanent impacts to Sanford's arrowhead habitat is 0.01 acre less than the Proposed Trail Alignment (or 0.25 acre). Similarly, temporary impacts to Sanford's arrowhead habitat is 0.03 acres less than the Proposed Trail Alignment (or 0.55 acres). Vegetation clearing and other in-water construction activities for Alignment Option 1A could result in the loss of Sanford's arrowhead. The potential disturbance or loss of Sanford's arrowhead would be a **significant** impact.

Alignment Option 1C

Option 1C is the same as the Proposed Trail Alignment and would have the same bridges and undercrossings described above for the Proposed Trail Alignment with the exception that in Sheet 1 Segment, the multi–use trail would be located on the northeastern side of Dry Creek. Implementation of Option 1C would require an additional 1,080 linear feet of streambank stabilization. Under Option 1C permanent impacts to Sandford's arrowhead potential habitat would be 0.01 acre less than the Proposed Trail Alignment (or 0.25 acre), and Option 1C temporary impacts would be 0.05 acres less than the Proposed Trail Alignment. Vegetation clearing and other in water construction activities for the Alignment Option 1C could result in the loss of Sanford's arrowhead. The potential disturbance or loss of Sanford's arrowhead would be a **significant** impact.

Alignment Option 5A

Option 5A deviates from the Proposed Trail Alignment just west of Bridge #13. Option 5A would remain on the south bank of Cirby Creek until crossing to the north bank via Bridge #14. Option 5A would include both an undercrossing of Sunrise Avenue and connecting paths to both sides of Sunrise Avenue. Both the Proposed Trail Alignment and Option 5A would make extensive use of retaining walls through this section of the path, however Option 5A would require an additional 635 linear feet when

compared to the Proposed Trail Alignment. The permanent impacts to Sandford's arrowhead potential habitat under Option 5A would be 0.0005 acre more than the Proposed Trail Alignment, and the temporary impacts to Sandford's arrowhead potential habitat would be 0.001 acre less than the Proposed Trail Alignment. Vegetation clearing and other in water construction activities for the Alignment Option 5A could result in the loss of Sanford's arrowhead. The potential disturbance or loss of Sanford's arrowhead would be a **significant** impact.

Mitigation Measures

Mitigation Measure 4.3-9: Special-status plants – Sanford's arrowhead.

This mitigation would apply for the Proposed Trail Alignment, Alternative Alignments 1A, 1C, and 5A.

The City shall implement the following measures to reduce potential impacts on Sanford's arrowhead:

a. Prior to project construction and during the blooming period for Sanford's arrowhead (May – November), a qualified botanist shall conduct floristic-level surveys for Sanford's arrowhead in areas where potentially suitable habitat would be removed or disturbed by project activities. The normal blooming period for Sanford's arrowhead generally indicates the optimal survey period when the species is most identifiable.

b. If no Sanford's arrowhead plants are found, the botanist shall document the findings in a letter report to the City of Roseville and CDFW and no further mitigation shall be required.

c. If Sanford's arrowhead plants are found that cannot be avoided during construction, the City shall consult with CDFW to determine the appropriate mitigation measures for direct and indirect impacts that could occur as a result of project construction and shall implement the agreed-upon mitigation measures to achieve no net loss of occupied habitat or individuals. Mitigation measures may include preserving and enhancing existing populations, creation of offsite (but within the stream reach) populations on project mitigation sites through seed collection or transplantation, and/or restoring or creating suitable habitat in sufficient quantities to achieve no net loss of occupied habitat and/or individuals. Potential mitigation sites could include suitable locations along the stream but outside of the construction areas. A mitigation and monitoring plan shall be developed describing how unavoidable losses of special-status plants will be compensated.

d. If relocation efforts are part of the mitigation plan, the plan shall include details on the methods to be used, including collection, storage, propagation, receptor site preparation, installation, long-term protection and management, monitoring and reporting requirements, success criteria, and remedial action responsibilities should the initial effort fail to meet long-term monitoring requirements.

e. Success criteria for preserved and compensatory populations shall include:

    1. The extent of occupied area and plant density (number of plants per unit area) in compensatory populations shall be equal to or greater than the affected occupied habitat.

    2. Compensatory and preserved populations shall be self-producing. Populations shall be considered self-producing when:

        I. plants reestablish annually for a minimum of five years with no human intervention such as supplemental seeding;

        II. reestablished and preserved habitats contain an occupied area and flower density comparable to existing occupied habitat areas in similar habitat types in the project vicinity.

3. If off-site mitigation includes dedication of conservation easements, purchase of mitigation credits, or other off-site conservation measures, the details of these measures shall be included in the mitigation plan, including information on responsible parties for long-term management, conservation easement holders, long-term management requirements, success criteria such as those listed above and other details, as appropriate to target the preservation of long term viable populations.

Significance after Mitigation

Implementing Mitigation Measure 4.3-9 would reduce significant impacts on Sanford's arrowhead to a **less-than-significant** level because it would require the City to identify and avoid Sanford's arrowhead plants or provide compensation for loss of Sanford's arrowhead plants through enhancement of existing populations, creation and management of offsite populations, conservation easements, or other appropriate measures.

Impact 4.3-10	Impacts on movement of native resident or migratory fish or wildlife species or migratory wildlife corridors or impede the use of native wildlife nursery sites.
Applicable Policies and Regulations	CEQA City of Roseville General Plan Open Space and Conservation Element
Significance with Policies and Regulations	Proposed Project: Significant Alignment Option 1A: Significant Alignment Option 1C: Significant Alignment Option 5A: Significant
Mitigation Measures	Mitigation Measure 4.3-10 (Proposed Project, Option 1A, Option 1C, Option 5A)
Significance after Mitigation	Less than significant (Proposed Project, Option 1A, Option 1C, Option 5A)

Proposed Trail Alignment

Construction Impacts

The project site is an urbanized creek corridor bounded by residential and commercial development. The project site functions as a regional biological corridor, providing potential for local and common terrestrial species adapted to living in an urban environment, and migration and dispersal though developed portions of the City to larger open space areas to the west of the project site. The eastern portion is more developed, and there is no direct connectivity to open space areas to the east of the project site. Thus, the creek corridor acts as a funnel in the eastern area, exposing terrestrial species to urban road hazards. Because not all of the available habitat would be affected by construction activities and because the constructed trail would affect a small portion of the available habitat, temporary movement of common terrestrial species would not result in substantial effects on terrestrial wildlife movement because there would be adjacent habitat that wildlife could use for local movement. Additionally, areas that would be affected by construction in the project site are not known to contain native wildlife nursery sites, such as bird rookeries or bat roosts. Furthermore, implementation of the project would require the undercrossings of five roads (see Chapter 3, "Project Description"). Terrestrial wildlife would be able to continue to use these undercrossings to cross busy roads that include Sunrise Avenue, Rocky Ridge Road, and Old Auburn Road.

However, the creek corridor also provides migration, spawning, and rearing habitat for federally threatened Central Valley steelhead. Central Valley fall-run Chinook salmon is also known to occur in Dry Creek; however, spawning and summer rearing habitat likely only occurs in Antelope Creek, Miner's, and Secret Ravine because of excessively high temperatures in Cirby and Linda Creeks (ECORP 2016).

As discussed in Impact 4.3-2, construction of the Proposed Trail Alignment would impact aquatic and riparian habitat for Central Valley steelhead and Central Valley fall-run Chinook Salmon that help these

migratory fish species reach their breeding and nursery grounds. Permanent direct effects would result from the placement of piles/fill in Central Valley steelhead and Central Valley fall-run Chinook salmon aquatic habitat, and permanent indirect effects could include night lighting "spill" on waterways from bridges, and the loss of riparian vegetation and SRA cover. Temporary indirect effects could include sedimentation and turbidity, temporary removal of vegetation, as well as pollution/contamination of project waterways. Construction of the project would include the temporary use of a water tight coffer dam as discussed under Impact 4.3-1 and 4.3-2.

Use-related Impacts

The long-term maintenance and repair of the multi-use path and bridge structures would require the use of various tool and equipment that have the potential to introduce fill or other materials into Dry, Linda, and Cirby Creeks that could affect Central Valley steelhead and Central Valley fall-run Chinook salmon and their habitat and thus affect their migratory corridor and nursery sites. All trail maintenance activities would be conducted consistent with the City's Open Space Preserve Overarching Management Plan and related USFWS Biological Opinion and the City's California Department of Fish and Wildlife Streambed Alteration Agreement for Routine Maintenance. The Overarching Plan and Routine Maintenance Agreement include requirements for worker training and pre-maintenance nesting surveys as well as monitoring and reporting when nests are found. In addition, the creation of impervious surfaces associated with the Proposed Trail Alignment could result in indirect impacts to Dry, Linda, and Cirby Creeks and other downstream waters as a consequence of runoff that could affect Central Valley steelhead and Central Valley fall-run Chinook salmon. These indirect impacts would be minimized through compliance with protective City and state regulations as described in Section 4.8, "Hydrology and Water Quality," Impact 4.3-1, and Impact 4.3-2. Both the City of Roseville Grading Permit and the State Water Resources Control Board NPDES permit (which is required for all projects which disturb over one acre of soil), require the preparation of a SWPPP that would help prevent or minimize use-related impacts.

Conclusion

As described above, impacts on terrestrial wildlife movement corridors and/or terrestrial wildlife nursery sites would be less than significant, and no mitigation for terrestrial species would be required.

Implementation of the proposed project would create construction noise, vibrations, lighting issues, temporary diversion structures, temporary creek crossings, installation of RSP and rock and log vanes, limited amount of pile placement (limited to the Darling Way Bridge Widening location), and other associated disturbances that have the potential to harass and disrupt migratory behavior of Central Valley steelhead and/or Central Valley fall-run Chinook salmon. Implementation of the proposed project could impact migratory fish and their breeding and nursery sites; however, because the project would have to secure permits from federal and state agencies (i.e. Sections 401, 404, and 1602 permits) that would restrict work windows to those when these species are not expected to be within the stream corridor and would require the City to mitigate for the loss of aquatic and riparian habitat, it would not result in substantial effects migratory fish movement or to their breeding or nursery sites.

Construction activities such as clearing and grubbing along stream banks, earthwork, the placement of RSP below the OHWM, and the construction of temporary creek crossings have the potential to result in temporary sedimentation and turbidity effects, accidental spills of hazardous materials, potential noise-related disturbances, and permanent and temporary loss of SRA, which can affect Central Valley steelhead and/or Central Valley fall-run Chinook salmon spawning sites. This would be a **significant** impact.

Alignment Option 1A

Option 1A would have the similar impacts on migratory fish as the Proposed Trail Alignment because in-water construction could result in impacts to migrating fish if present; and Alignment Option 1A also affects aquatic, riparian, and SRA habitat which in turn could block upstream/downstream passage,

result in siltation that affects spawning grounds, and removal of SRA could lead to an increase in stream temperatures that are unsuitable for salmonids. This would be a **significant** impact.

Alignment Option 1C
Option 1C would have the similar impacts on migratory fish as the Proposed Trail Alignment because in-water construction could result in impacts to migrating fish if present; and Alignment Option 1C also affects aquatic, riparian, and SRA habitat which in turn could block upstream/downstream passage, result in siltation that affects spawning grounds, and removal of SRA could lead to an increase in stream temperatures that are unsuitable for salmonids. This would be a **significant** impact.

Alignment Option 5A
Option 5A would have the similar impacts on migratory fish as the Proposed Trail Alignment, because in-water construction could result in impacts to migrating fish if present; and Alignment Option 5A also affects aquatic, riparian, and SRA habitat which in turn could block upstream/downstream passage, result in siltation that affects spawning grounds, and removal of SRA could lead to an increase in stream temperatures that are unsuitable for salmonids. This would be a **significant** impact.

Mitigation Measures

Mitigation Measure 4.3-10: Movement of native resident or migratory fish or wildlife species or migratory wildlife corridors or impede the use of native wildlife nursery sites.
This mitigation would apply for the Proposed Trail Alignment, Alternative Alignments 1A, 1C, and 5A.

Implementation of Mitigation Measure 4.3-1 and Mitigation Measure 4.3-2 would ensure that impacted habitats are mitigated for or restored, and work windows would prevent impact to migratory fish species. The work windows would allow the fish to freely use the stream corridors during migration to and from the streams. Impacted habitats (i.e., aquatic, riparian and SRA) would be restored or mitigated for and although affected their long-term function as breeding or nursery site would not be impacted.

a. Implement Mitigation Measure 4.3-1 Wetlands, waters of the United States, waters of the state and riparian habitat.

b. Implement Mitigation Measure 4.3-2 Central Valley Steelhead and Central Valley Fall-run Chinook Salmon.

Significance after Mitigation
Implementing Mitigation Measure 4.3-10 would reduce significant impacts on migratory fish, their breeding and nursery habitat to **less-than-significant** level because the City would have to secure permits from Federal and State Agencies (i.e. Sections 401, 404, and 1602 permits) that would restrict work windows to those when these species are not expected to be within the stream corridor, would require the City to mitigate for the loss of aquatic and riparian, and although the aquatic and riparian habitat would be temporarily affected, it would not result in substantial effects migratory fish movement or to their breeding or nursery sites. Implementation of Mitigation Measure 4.3-1 and Mitigation Measure 4.3-2 would ensure that impacted habitats are mitigated for or restored, and work windows would prevent impact to migratory fish species. The work windows would allow the fish to freely use the stream corridors during migration to and from the streams. Impacted habitats (i.e., aquatic, riparian and SRA) would be restored or mitigated for and although affected their long-term function as breeding or nursery site would not be impacted.

4.4 CULTURAL RESOURCES

4.4.1 Introduction

This section analyzes and evaluates the impacts of the proposed project on currently known and potential but unknown cultural resources. Cultural resources include districts, sites, buildings, structures, or objects generally older than 50 years and considered to be important to a culture, subculture, or community for scientific, traditional, religious, or other reasons.

Archaeological resources are locations where human activity has measurably altered the earth or left deposits of prehistoric or historic-era physical remains (e.g., stone tools, bottles, former roads, house foundations). Historical (or architectural) resources include standing buildings (e.g., houses, barns, outbuildings, cabins) and intact structures (e.g., dams, bridges).

The primary source of information for this section is the *Archeological Survey Report for the Dry Creek Greenway Multi-Use Trail Project*, prepared by ECORP Consulting, Inc. (2014).

One comment letter pertaining to cultural resources was received in response the Notice of Preparation (NOP). Gene Whitehouse, the Tribal Chairman of the United Auburn Indian Community (UAIC) of the Auburn Rancheria, expressed concern about development within ancestral territory and requested the opportunity to provide Tribal representatives to monitor projects if excavation and data recovery are required for prehistoric cultural sites or in cases where ground disturbance is proposed at or near sensitive cultural resources. This issue is discussed under “Native American Consultation and Other Interested Parties” and evaluated as part of Impact 4.4-1, below. As discussed below, technical reports prepared for the project related to cultural resources have been forwarded to the UAIC.

Recognizing the NOP release precedes the effective date of Assembly Bill (AB) 52, statutes of 2014, the procedural elements of AB 52 do not apply to the project (see Regulatory Setting, below). Nonetheless, this section includes consideration of the potential for the presence of tribal cultural resources as part of the environmental analysis.

4.4.2 Environmental Setting

REGIONAL PREHISTORY

Although the Sacramento Valley may have been inhabited by humans as early as 10,000 years ago, the evidence for early human use likely is buried by deep alluvial sediments that accumulated rapidly during the late Holocene epoch (less than 10,000 years ago). Although rare, archaeological remains of this early period have been identified in and around the Central Valley. Archaeologists working at Camanche Reservoir (east of Galt and Lodi) found a number of lithic cores and a flake that are associated with Pleistocene gravels. These archaeological remains have been grouped into what is called the Farmington Complex, which is characterized by core tools and large, reworked percussion flakes. The economy of this early period generally is thought to be based on exploitation of large game. Later periods are better understood because of more abundant representation in the archaeological record.

The taxonomic framework of the Sacramento Valley has been described in terms of archaeological patterns. A pattern is a general mode of life characterized archaeologically by technology, particular artifacts, economic systems, trade, burial practices, and other aspects of culture. Three general patterns of resource use for the period between 4500 before present (B.P.) and 200 B.P. have been identified: the Windmiller, Berkeley, and Augustine Patterns.

Windmiller Pattern (4500 B.P.–3000 B.P.)

The Windmiller Pattern shows evidence of a mixed economy of game procurement and use of wild plant foods. The archaeological record contains numerous projectile points with a wide range of faunal remains. Hunting was not limited to terrestrial animals, as is evidenced by fishing hooks and spears that have been found in association with the remains of sturgeon, salmon, and other fish. Plants also were used, as indicated by ground stone artifacts and clay balls that were used for boiling acorn mush. Settlement strategies during the Windmiller period reflect seasonal adaptations: habitation sites in the valley were occupied during the winter months, but populations moved into the foothills during the summer.

Berkeley Pattern (3500 B.P.–2500 B.P.)

The Windmiller Pattern ultimately changed to a more specialized adaptation labeled the Berkeley Pattern. A reduction in the number of manos and metates (grinding and mealing stones) and an increase in mortars and pestles indicate a greater dependence on acorns. Although gathered resources gained importance during this period, the continued presence of projectile points and atlatls (spear-throwers) in the archaeological record indicates that hunting was still an important activity.

Augustine Pattern (1500 B.P.–200 B.P.)

The Berkeley Pattern was superseded by the Augustine Pattern. The Augustine Pattern reflects a change in subsistence and land use patterns to those of the ethnographically known people (Nisenan) of the historic era. This pattern exhibits a great elaboration of ceremonial and social organization, including the development of social stratification. Exchange became well developed, and an even more intensive emphasis was placed on the use of the acorn, as evidenced by the presence in the archaeological record of shaped mortars and pestles and numerous hopper mortars. Other notable elements of the artifact assemblage associated with the Augustine Pattern are flanged tubular smoking pipes, harpoons, clam shell disc beads, and an especially elaborate baked clay industry, which included figurines and pottery vessels (Cosumnes Brownware). The presence of small projectile point types, referred to as the Gunther Barbed series, suggests the use of the bow and arrow. Other traits associated with the Augustine Pattern include the introduction of preinterment burning of offerings in a grave pit during mortuary ritual, increased village sedentism, population growth, and an incipient monetary economy in which beads were used as a standard of exchange.

ETHNOGRAPHY

Ethnographically, the proposed project site is in the southwestern portion of the territory occupied by the Penutian-speaking Nisenan. The territory extended from the area surrounding the current City of Oroville on the north to a few miles south of the American River in the south. The Sacramento River bounded the territory on the west, and in the east, it extended to a general area located within a few miles of Lake Tahoe. As a language, Nisenan (meaning “from among us” or “of our side”) has three main dialects – Northern Hill, Southern Hill, and Valley Nisenan, with three or four subdialects. The Valley Nisenan lived along the Sacramento River, primarily in large villages with populations of several hundred each. Between there and the foothills, the grassy plains were largely unsettled, used mainly as a foraging ground by both valley and hill groups. Individual and extended families “owned” hunting and gathering grounds, and trespassing was discouraged. Residence was generally patrilocal, but couples actually had a choice in the matter.

Politically, the Nisenan were divided into “tribelets,” made up of a primary village and a series of outlying hamlets, presided over by a more-or-less hereditary chief. Villages typically included family dwellings, acorn granaries, a sweathouse, and a dance house, owned by the chief. The chief had little authority to act on his or her own, but with the support of the shaman and the elders, the word of the chief became virtually the law.

Subsistence activities centered around the gathering of acorns (acorns from tan bark oak and black oak were preferred), seeds, and other plant resources. The hunting of animals such as deer and rabbits and fishing were also important parts of normal subsistence activities. Large predators, such as mountain lions, were hunted for their meat and skins, and bears were hunted ceremonially. Although acorns were the staple of the Nisenan diet, they also harvested roots like wild onion and "Indian potato," which were eaten raw, steamed, baked, or dried and processed into flour cakes to be stored for winter use. Wild garlic was used as soap/shampoo, and wild carrots were used medicinally. Seeds from grasses were parched, steam dried, or ground and made into a mush. Berries were collected, as were other native fruits and nuts. Game was prepared by roasting, baking, or drying. In addition, salt was obtained from a spring near modern-day Rocklin.

Hunting of deer often took the form of communal drives, involving several villages, with killing done by the best marksmen from each village. Snares, deadfalls, and decoys were used as well. Fish were caught by a variety of methods including use of hooks, harpoons, nets, weirs, traps, poisoning, and by hand. Trade was important with goods traveling from the coast and valleys up into the Sierra Nevada mountains and beyond to the east, and vice versa. Coastal items like shell beads, salmon, salt, and Foothill pine nuts were traded for resources from the mountains and farther inland, such as bows and arrows, deer skins, and sugar pine nuts. In addition, obsidian was imported from the north.

The Spanish arrived on the central California coast in 1769 and by 1776, the Miwok territory bordering the Nisenan on the south had been explored by José Canizares. In 1808, Gabriel Moraga crossed Nisenan territory, and in 1813, a major battle was fought between the Miwok and the Spaniards near the mouth of the Cosumnes River. Though the Nisenan appear to have escaped being removed to missions by the Spanish, they were not spared the ravages of European diseases. In 1833, an epidemic—probably malaria—raged through the Sacramento Valley, killing an estimated 75 percent of the native population. When John Sutter erected his fort at the future site of Sacramento in 1839, the few Nisenan survivors settled nearby. The discovery of gold in 1848 at Sutter's Mill, near the Nisenan village of Colluma (now Coloma) on the South Fork of the American River, drew thousands of miners into the area, and led to widespread killing and the virtual destruction of traditional Nisenan culture. By the Great Depression, no Nisenan remained who could remember the days before the arrival of the Euro-Americans.

REGIONAL HISTORY

Colonization of California began with the Spanish Portolá land expedition. The expedition, led by Captain Gaspar de Portolá of the Spanish army and Father Junipero Serra, a Franciscan missionary, explored the California coast from San Diego to the Monterey Bay Area in 1769. As a result of this expedition, Spanish missions to convert the native population, presidios (forts), and pueblos (towns) were established. The Franciscan missionary friars established 21 missions in Alta California (the area north of Baja California) beginning with Mission San Diego in 1769 and ending with the mission in Sonoma established in 1823. The purpose of the missions and presidios was to establish Spanish economic, military, political, and religious control over the Alta California territory. No missions were established in the Central Valley; the nearest missions were in the vicinity of San Francisco Bay. Presidios were established at San Francisco and Monterey.

After Mexico became independent from Spain in 1821, what is now California became the Mexican province of Alta California with its capital at Monterey. In 1827, American trapper Jedediah Smith traveled along the Sacramento River and into the San Joaquin Valley to meet other trappers of his company who were camped there, but no permanent settlements were established by the fur trappers.

The Mexican government closed the missions in the 1830s and former mission lands, as well as previously unoccupied areas, were granted to retired soldiers and other Mexican citizens for use as cattle ranches. Much of the land along the coast and in the interior valleys became part of Mexican land grants or "ranchos." During the Mexican period there were small towns at San Francisco (then known

as Yerba Buena) and Monterey. The rancho owners lived in one of the towns or in an adobe house on the rancho. The Mexican Period includes the years 1821 to 1848.

John Sutter, a European immigrant, built a fort at the confluence of the Sacramento and American Rivers in 1839 and petitioned the Mexican governor of Alta California for a land grant, which he received in 1841. Sutter built a flour mill and grew wheat near the fort. Gold was discovered in the flume of Sutter's lumber mill at Coloma on the South Fork of the American River in January 1848. The discovery of gold initiated the 1849 California Gold Rush, which brought thousands of miners and settlers to the Sierra foothills east and southeast of Sacramento.

The American period began when the Treaty of Guadalupe Hidalgo was signed between Mexico and the United States in 1848. As a result of the treaty, Alta California became part of the United States as the territory of California. Rapid population increase occasioned by the Gold Rush of 1849 allowed California to become a state in 1850. Most Mexican land grants were confirmed to the grantees by U.S. courts, but usually with more restricted boundaries, which were surveyed by the U.S. Surveyor General's office.

The proposed project site is located approximately two miles northeast of Samuel Norris' Rancho Del Paso and approximately 0.5-mile northwest of Joel P. Dedmond's Rancho San Juan. Land outside the land grants became federal public land, which was surveyed into sections, quarter-sections, and quarter-quarter sections. The federal public land could be purchased at a low fixed price per acre or could be obtained through homesteading (after 1862).

City of Roseville

Roseville had its beginnings in the aftermath of the California Gold Rush when discouraged gold seekers left the mineral regions to take up farming along rich creek bottom lands. These pioneers formed the nucleus of what was to become the "first families" of Roseville. One of the first sections of southwestern Placer County to be settled was the rich lands of the Dry Creek District.

Among the pioneer settlers of the Dry Creek District was Martin A. Schellhous who came to California with his wife and acquired a 240-acre ranch. Having brought a number of cattle with him from Michigan, Schellhous turned his attention to stock raising. Later diversifying and expanding his agricultural pursuits, he planted vineyards, orchards and fields of grain on his property.

Between 1870 and 1879, Roseville experienced slow but steady development. New construction already underway and reported in the Placer Herald of January 1, 1870 included a new hotel being erected by Daniel S. Neff, who had formerly operated the 17 Mile House. By 1890, though growth had not spiked, a movement toward a more industrial base had begun and business activity increased.

Fruit shipping became an important factor in the economy of Roseville at the beginning of the twentieth century. Figures compiled by the Roseville Board of Trade for 1901 revealed that during the year alone, more than 781,000 pounds of fresh deciduous fruits had been shipped from Roseville, along with 3,000 boxes of oranges, 22,380 pounds of pickled olives, and 8,000 pounds of olive oil. Hand in hand with the increased activity of shipping fruit was an upsurge in viticulture. Historic records indicate that a total of 1,195,436 boxes of grapes were shipped from the Roseville depot in 1901.

The new State Highway was routed through Roseville in 1912. Roads were paved commencing at the lower end of Riverside Avenue and connecting to the State Highway on the Lincoln Road. While Roseville was launching its new government and contributing its share to the war effort during World War I, the city continued to grow. In a two-and-a-half-year period (September 1911 – January 1914), more than 110 new buildings were erected. Population increased from 2,608 in 1910 to 4,477 in 1920. By 1924, Southern Pacific Railroad purchased 200 acres of land between Roseville and Antelope for relocation of Pacific Fruit Express shops and construction of 77 miles of new tracks to be used by both Southern Pacific and Pacific Fruit Express. By June 1927, the new facilities were in operation.

The considerable building and commercial development, which characterized Roseville throughout the 1920s, was curbed drastically by the Great Depression. However, municipal improvements continued to progress in spite of the Depression. Though Roseville had become a "city" in 1909, it was not until 1935 that voters, by a 443 to 194 count, permitted the community to become a "charter city" which gave residents the ability to change how their city is governed. Between 1941 and 1942, no major building activity was reported in the columns of The Press Tribune. By the latter date, however, approximately 1,000 new residents had moved into Roseville, most of whom worked in nearby defense installations or for the railroad.

The population boom, which hit southern California with sudden swiftness in the late 1940s and spread quickly to northern California in the following decades, focused on southwestern Placer County after 1960. George Buljan served as mayor during this period of rapid growth and great change. Buljan served on the City Council for 24 years. The city, among other things, named a middle school after him, which is located off Washington Boulevard, just east of the project site. The population boom of the 1960s continued throughout the 1970s.

RECORDS SEARCH

NCIC Records Search

A confidential records search for the project site and a surrounding half-mile radius (project area) was conducted by employees at the North Central Information Center (NCIC) on March 20, 2014 (NCIC Records Search Number PLA-14-32). The search included a review of the NRHP, the California Register of Historical Resources (CRHR), *California Inventory of Historic Resources* (1976), *California Points of Historical Interest* (May 1992 and updates), Directory of Properties in the Historic Property Data File, Archaeological Determinations of Eligibility (State Office of Historic Preservation computer lists dated 2012), records of previously recorded cultural resources, records of previous field studies, and other historic maps and documents.

Approximately 80 percent of the project site has been included in previous investigations. The previous studies were conducted between 1963 and 2007 and vary in size from less than one acre to 18 linear miles. The records search identified 12 previously recorded cultural resources located within 0.5 miles of the project site. Of 12 previously recorded cultural resources, six are prehistoric archaeological sites, five are historic-period buildings, structures, and refuse deposits, and one is a mixed deposit of prehistoric and historic material. Only one of the previously recorded resources, a historic-period concrete building foundation with associated refuse deposits (P-31-788), is located within the project site. No historic landmarks, historic markers, or properties listed in the California Register of Historical Resources were identified within the project area.

Native American Consultation and Other Interested Parties

The California Native American Heritage Commission (NAHC) was contacted on July 25, 2014, to request a search of their Sacred Lands database and a list of contact information for local Native American representatives in the project area. A response was received from the NAHC on July 31, 2014 stating that there are no known Sacred Lands within the project area and providing a list of eight Native American groups and individuals who may have additional information about the proposed project. On August 6, 2014, letters were sent letters to all persons or organizations on the NAHC list. Follow-up phone calls were conducted for every individual or group on the NAHC list on August 18 and 19, 2014, except for Grayson Coney, Cultural Director of the T'si-Akim Maidu. No phone number was available for Mr. Coney, so a follow-up email was sent on August 18, 2014.

On October 10, 2014, a response from the UAIC was received in which UAIC requested an opportunity to be present during field survey and a copy of all technical reports when completed. Because the field survey had already been completed by this time, this request could not be accommodated; however,

the City arranged for UAIC to monitor during Extended Phase 1 (XP1) fieldwork (described below). On July 19, 2016, a copy of all technical reports was sent to the UAIC.

A letter was sent to the Placer County Historical Society on July 29, 2014 to request information on any historical resources located in or near the Project. No response has been received.

Archaeological Survey
